REORGANIZATION OF THE Philadelphia & Reading RAILROAD COMPANY.

The Reconstruction Trustees of the Philadelphia The Reconstruction Trustees of the Philadelphia & Rending Railroad Company request the creditors and shareholders to deposit their general mortgage bonds with Massrs. Draxel & Co., and their other se-curities with Massrs. Brown Brothers & Co., under the terms of the plan of reorganization, of which copies can be had upon application at their respect-Vebanking houses and at the darantee Trust & Safe Deposit Company. Under the plan the holder of each \$1,000 six per General Mortgage Bond, with overdue coupons, de-

positing the same, will receive from Drexel & Co. a certificate entiting him to four per cent interest for three years, or until reorganization if sooner effected and upon reorganization to a four par cent new gen-eral mortgage bond for \$1,000 and \$480 of preferred stock-the holder of each saven per cent hond to receive \$20 additional preferred stock. Income Mortgage and Convertible Adjustment Scrip-holders.

ders. Pay=10 per cant cash assessment. Receive=\$100 Preferred Stock for assessment and \$1,000 (with such addition as equals matured coupons at reorganization) of Income Stock.

\$1,000 (With Back coupons as treorganization) of income coupons Fives Consols, 1st Series— Pay—10 per cent assessment. Receive—\$100 Preferred Stock for assessment, \$1,000 (with such addition as equals the matured coupons at reorganization) of Consolidated Stock.
 Fives Consols, 2d Series— Pay—15 per cent assessment. Receive—\$150 Preferred Stock for assessment. \$250 consolidated Stock, \$350 common Stock, \$250 common Stock, \$350 common Stock,

Convertible 7s and Dibentures of Railroad and Coa & Iron Co. Pay-15 per cent assessment. Receive-\$150 Preferred Stock for assessment, \$1,000 Common Stock, with additional stock to cover coupons. All unsecured claims when proven (uhether funded or floating) get the same recog vition as Debenture Bonds.

All insecured claims when proven (a nemer) annex or floating) get the same recog vition as Debenture bonds. The Old Preferred and Common Stock--Pay-810 per share. Receive-810 Preferred Stock for assessment and \$50 Common Stock per share. Deferred Income Bonds--Pay-28 per cent assessment. Receive-825 Preferred Stock for assessment and for each \$1,000 bond \$200 Common Stock. Critificates of Deposit negotiable at the Stock Ex-change, outling the holders to the new securities after raorganization, will be issued to the depositors. Sixty days notice by advertisement will be given of the time for the payment of the assessments. Under this plan tha annual fixed charges are re-ported net earnings of 1855 (\$7,926,303), and secure to the holders of the Income Stock an annual advan-tage of \$1,559,579, to the holders of the Consolidated Stock of \$1,579,203, and the reported average net advidend of fixe per cent on the Preferred Income and Concolidated Stock, leaving an annual surplus fund consolidated Stock, teaving an annual surplus fund conditated Stock of \$33,340.90. To promote the success of the plan an agreement has been made with a syndicate te advance the ex-poses and disbursements, and if necessary to pay the each asseessment. The case reorganization can be effected without fore-floaving under the present charter, funcime fund-stock of the Board of Reconstruction Trustees, JOHN B. CARRETT, Chairman.

JOHN B. GARRETT, Chairman.

CLEARING HOUSE RETURNS.

At a few of the leading cities-Philadelphia, Pittsburg, Baltimore and New Orleans, for example-and also at some of the smaller towns, the reduction in the volume of clearings during the week under review was due to the observance of Good Friday as a holiday. Furthermore, although the day was not strictly a holiday at New York, the closing of the various exchanges, and the virtual suspension of business in some branches of trade, caused a decided decline in Saturday's exchanges, the total for that day being only \$37,655,341, while the average for the other days of the week was \$95,379,100. It is therefore, we believe, safe to conclude that the falling off at all points from this cause was about \$75,000,000. But this does not account fully for the decline from the previous week's figures; for after allowing for that amount, there still remains a decrease of some \$40,000,000, no doubt resulting from the labor troubles and the check to trade which they are causing.

Contrasted with the corresponding week of 1885, the returns make a favorable exhibit, the smaller percentage of gain than last week recorded being due entirely to the holiday mentioned above. In fact, comparison between a like number of days in each year would give an increase of fully 24 per cent in the whole country and over 11.5 per cent outside of New York.

The share transactions on the New York Stock Exchange for the five days reach a total much below those for any similar period since July last, and cover a market value of only

\$58,600,000, against \$69,737,000 for the corresponding full week of 1885. The remaining exchanges, after making our usual deduction for these stock operations, exhibit an increase of 84.8 per cent.

* Estimated on the basis of the last weekly returns

There is no change to note in money this week. Bankers' balances to be sure have ruled lower, the average for the week not being much if any above 2 per cent, though on Thursday the rate was run up to 4 per cent; but the tendency is certainly towards ease notwithstanding the shipments of gold to Europe. The truth is, all speculation is quiet, while business enterprise is widely checked by the labor troubles, so that the requirements for money are light. This is seen in the small amount of commercial paper making, the outlook being so uncertain that new engagements requiring funds are for the time being held in abeyance. Besides that, the flow of money from the interior has been more active this week, and helped to counteract the effect of gold shipments.

But while these conditions exist here, the cable reports 2 per cent at London for sixty-day to three months' bills, and about the same rate at Berlin and Frankfort. This activity, however, is due mainly to the preparations for the French loan, which it is now expected will be issued during the ensuing week. When the awards have been made and the subscriptions rejected and the deposits therefor released, the tension it is presumed will be relieved in all foreign markets, and a relapse to normal conditions be the result. Doubtless this prospect was a leading reason in inducing the managers of the Bank of England this week to refrain from raising the official minimum. Still another reason of influence was the stronger tone for exchange at this point on London, which promised shipments of gold to London in case of any urgency in the demand. Perhaps, too, it was delayed partly on the idea that a rise could have little effect in making European money markets more favorable to London while the issue of the French loan was pending; after the awards are made, the conditions in this particular will be different, and a rise then in the official rate would for that reason be more effective.

The market for sterling and for francs has been firm at Notwithstanding exchange on unchanged quotations. Paris has ruled slightly below the gold shipping point, the steamers sailing on Wednesday and Thursday carried \$1,021,558 46 of gold bars, and \$250,000 more goes by the Servia to-day. With regard to sterling, the demand seems to be strong enough to keep the rates within half a cent per pound of the exporting point, and a further advance may be made if the inquiries for remittance from the arbitrage houses should be urgent. Within the past few days selling of stocks for European account has been active, induced by the labor troubles here and the rise in money in London, though on the other hand, against these sales of stocks, some purchases of bonds are reported; the arbitrage movement, however, is very uncertain, and the course of the speculation may at any time change, so that no accurate forecast of the sterling market can be made. Stock operations in London have been recently most profitable in Americans, and as the facilities for speculation between London and New York are ample, the exchange market just now is more likely to be affected by arbitrage operations than by trade require-In this connection it should be remembered that ments. the trade movement in March was especially adverse, as appears from the statement issued this week by the Bureau of Statistics. It will be noticed in the following summary of it (in which we have brought together the figures since 1879) that the imports were very heavy, as well as the exports light, and that the merchandise balance for the month is therefore \$6,347,000 against us. There was also a net export of \$585,000 of silver and of \$9,081,000

gold, so that the actual result was a balance in our favor of \$3,319,000.

* Exc	ess of 1D	aports.		† Ez	Cess 0:	f export	.s.			

It will be noted (and it is a noteworthy fact) that the above exports for the three months of 1886 are the smallest of any year in the foregoing record. One hundred and sixty-three millions for all our exports (other than gold and silver) during the first quarter of the year is an extremely limited total, especially if compared with the same period of 1883, when the total was nearly 225 millions, or with 1881, when it was nearly 227 millions; even in 1884 it was 1911 millions. Still it was not the mere fact of loss thus disclosed that we wished to call attention to; what we had in mind was the circumstance that there is much more of discouragement generally drawn from that feature of our export trade than it really deserves. The popular belief is that the difference noted represents a loss in actual exportable products-that is, that the world is to just that extent learning to do without America. That feeling or belief is encouraged by the smaller shipments of wheat, which every one notices and which London papers and some American writers love so well to attribute to a permanent substitution of India produce-a country that, notwithstanding all the late extension in railroad mileage and other stimulants, has not been able to increase materially its surplus crop for four years, its wheat exports being 37 million bushels in 1881-82 (four years ago) and 39 million bushels in 1883-84, and probably (when the figures are made up for its fiscal year, which ends with March 31, 1886, they will show) a trifle less for 1885-86 than last year's total.

But passing the India question on this occasion, we think it will surprise our readers to learn that of this loss in our exports of 1886, probably the whole of it is due to a loss in values and not to quantities. We do not mean that we have not exported less wheat, but that taking all our merchandise exports together, the quantities will at least equal the large total of two years ago, when the values were 1911 millions; we have not the figures within our reach to-day to make a comparison with 1883 or with 1881, but wo make it with 1885 and 1884, which will be sufficient for our present purpose. We use as the basis of the investigation the reports on provisions, cotton, oils, and breadstuffs, which are the special monthly reports the Bureau of Statistics issues, and the only articles for which we have returns of both quantities and values.

As those articles together generally make up over 70 per cent of the total export values for the three months, the result they bring us to, cannot be very far out of the way. First, then, we give the following table, the first two columns of tigures being the actual values and quantities of the articles named exported in the three months of 1886, and the third and fourth columns showing what the 1886 values would be if the quantities exported in 1886 had gone out at the values current in 1885 and in 1884 respectively.

			and the second s	and the second se
ARTICLES.	Actual Exports 1 Months 1		Estimated Va Based or	
	Quantities.	Values.	of 1883.	of 1884.
Provisions	258,072,689 lbs.	\$19,136,777	\$22,485,759	\$26,395,806
Cotton	572,409,736 lbs.	56,086,028	61,934,738	60,559,950
Oils	125,255,572 gal.	10,770,953	11,022,490	12,490,301
Breadstuffs	41,743,095 bush.	29,538,056	31,265,978	40,616,081
Matel walnes		\$115 591 814	\$190 708 960	\$139.972.088

The above brings out the fact that if each of these articles in the 1886 exports had gone out at its 1885 value, the total 1886 values would have been \$11,177,146 more than they were-that is, they would have been increased 9.67 per cent; on the other hand, if they had gone out at the 1884 values, they would have been increased \$24,440,274, or 21.15 per cent. Applying these same percentages of increase to the remaining exports for each corresponding year (on the supposition that a similar difference exists) and we should have the result for the last three months (instead of as it was \$163,000,000) about \$179,396,000 on the basis of 1885 values and about \$198,175,000 on the basis of 1884 values. In other words, the chief factor in the loss in exports, as compared with both those years, has been the decline in price. This is an interesting conclusion, but we have not the space to remark upon it further here to-day.

The week's crop news has all of it been of the very best description. We never remember a year when the reports from the West, Northwest and Pacific Coast came up so uniformally favorable. And it is not one crop alone that is thus reported, but it is all crops. Winter wheat is making marvelous progress, and an unusually early harvest seems to be almost assured now; with the exception of Kansas and Michigan, where so much was winter killed, this grain also promises to be a full yield everywhere, contrasting with the failure of last year. The spring wheat planting has been about completed and under very encouraging conditions ; in most sections it is up and in as flourishing a state as one could wish. Oats and corn planting has also made good progress, both grains being in the ground, and successfully started in all but the later districts. The well-informed correspondent of the Journal of Commerce says under date of April 27: "I cannot remember at any "time during the last four or five years having sent you "such a uniformly favorable report of a spring opening "in the Northwest as I am able to wire you to night." From the South and Southwest the reports respecting corn and other grains are also alike good, while cotton planting is making rapid progress, the seed being all in and satisfactorily started in most of the earlier sections, except where the high water in the Mississippi Valley has delayed state of the company's finances and income and the

farm work. Taken as a whole, then, the agricultural prospect may be said to be as full of promise as any previous spring of which we have a record. Especially encouraging is the start grain has secured in the West and Northwest, since a strong, well-rooted, early growth has in it a power of endurance fortifying the plant in a very large measure against all future adverse conditions of weather.

The labor troubles, particularly the more prominent and longest continued strikes, have assumed a better shape this week. That is to say, both the Southwestern railroad disturbance and our street car difficulty are in the way of speedily settling thomselves, it having been demonstrated that both companies can conduct their operations without the aid of their old hands. This will be a very wholesome result if it is reached, for it and the boycotting failures bring out in sharp relief and establish, once for all, the principle that every man and every company has the right to conduct his own business without dictation from any body of men, and further that to harm that business is a crime. Some people, even fairly intelligent ones too, make the mistake of supposing that liberty is synonymous with license, and it takes time and not infrequently severe experience for them to learn that the liberty we enjoy in this country is not of that kind. American freedom, like all things earthly, has its limitations; it permits no man to harm either the person, property or character of another, protecting equally the Bohemian baker and the railroad manager. That principle is, we think, more widely understood here to-day than it was two months ago, and we look at that fact as a hopeful feature.

But there is another species of labor trouble, which has been on the increase this week and is very disturbing both as it exists to day and on account of the fears of its extending which it gives rise to. We refer to the eight hour movement. Of course it is a legitimate question for labor to settle for itself, whether it will work ten, one or no hours ; but clearly a less wise use of an industrious man's liberty can scarcely be imagined. If the earnings of labor come out of the profits of capital-its share of the product, whatever that product be-it scarcely needs to be said . that no man can earn as much in one hour as in ten or as much in nine as in ten. Under pressure, such a demand may be enforced, yet the arrangement if concluded cannot but re-adjust itself, and to the disadvantage of the ambitious, industrious laborer in the end. Of course, these remarks do not apply to any exhaustive work in which eight hours is the limit of a man's endurance, for in that case he could accomplish as much and perhaps more in the shorter time. But in the general run of our industries the present hours are not onerous; and if that were the claim, to pay by the piece where it is possible, would be the correct practice. Still, the wisdom or unwisdom of the movement is not the issue now. Many labor organizations have apparently determined to insist upon this change, and how far it will proceed and to what extent it will unsettle our industries and further check the business activity which was in prospect is the uncertain problem. Still, if the old strikes are exhausting themselves, there would seem to be in that fact a fair assurance that but a short period need be allowed for this new eruption.

An event in investing circles has been the further reduction of cash interest paid on the Chesapeake & Ohio Class B bonds. A year ago the company announced its inability to meet the coupons on these bonds in full, and proposed to pay one-half in cash and one-half in scrip. This was accepted as a fair proposition, considering the

[VOL. XLII,

depressed condition of railroad property generally, and therefore bondholders readily gave it their assent. Consequently both the May and November coupons in 1885 were paid in that way. Now the holders are informed that the coupon maturing to-day will be paid one-third in cash and two-thirds in scrip. The earlier step certainly had a justification in the state of the company's income; the later step is claimed to be an effort to give a preference to the holders of the floating debt. It is only just to the managers to say that the necessities of the company in this particular were foreshadowed in the annual report published by us two weeks ago, where it was suggested that "it would without "doubt be advisable for the holders of that class of bonds " (Series B) to provide for the liquidation of the floating "debt and at the same time reduce the rate of interest " on their securities." The position of the Class B bonds as respects the company's income may be roughly outlined as follows. According to the 1885 report the year closed with a deficit of \$465,886, but it is pointed out that \$345,-063 of this deficit was on account of charges (back taxes, &c.,) not properly belonging to the year's accounts, so that the actual deficit was \$120,823-in other words, that the company fell that much short of meeting the half-cash interest on the bonds in question. It should perhaps be added that this deficit is arrived at after allowing for the payment of \$124,739 of interest on the floating debt. But those figures relate to the 1885 operations; in 1886 net earnings so far (taking the actual figures for the first two months and the company's estimate for March and April, as made yesterday,) are about \$61,000 ahead of that year.

The outlines of a new plan for the reorganization of Texas & Pacific have also been published this week. It is unnecessary to say more of this plan just now than that it has not been favorably received. The sale of the Reading securities held for Central New Jersey floating debt came off as announced, but was hardly an unqualified success. The firsts series fives brought pretty good prices (above the market), but the two million seconds were withdrawn, because the bids were not satisfactory. Mr. Wharton Barker of Philadelphia secured all the firsts (\$1,000,000), and rumor has been busy of course in discovering a reason for the purchase, which now gives him and those he represents a large majority of that class of bonds. Mr. Barker is not friendly to Mr. Gowen, so it can hardly be claimed that the purchase was in the Gowen interest, and though he is apparently opposed to the syndicate scheme, there is a general belief that sooner or later he will be found working in harmony with their plans; for Mr. Barker would obviously be a bold man if he has invested so much more money just for the purpose of keeping Reading in a state of chaos.

Trunk line earnings, so far as reported, continue very satisfactory. The returns for March of both the Erie and the Pennsylvania have come in this week, and both show considerable gains over the corresponding month of the previous year. The statement of the Erie is particularly good, recording a gain of \$224,698 in gross and \$155,218 in net, the total of the net being \$519,354 this year, against \$364,137 in 1885, an increase of over 40 per cent. It must not be supposed, either, that the road showed a decline a year ago, as was the case with the Pennsylvania, for in reality there was a gain then of \$151,509, making the gain over the year 1884 (when the results however were very bad) \$306,727. In fact, the present net is the largest of any March since 1881. Evidently the Erie road is doing well under Mr. King's management.

statement of the Pennsylvania, though also satisfactory in showing an improvement over the previous year, is yet much less favorable than that of the Erie, because if we compare with the years preceding 1885 the showing is not particularly good. Thus on the Eastern lines the gain in net this year is \$144,671, while the decrease in the previous year had been \$243,442. On the Western system the result is somewhat more favorable, and against a deficiency of \$96,039 in March 1884, and \$84,208 in 1885, the deficiency this year is only \$26,769, but in all the years preceding 1884 there had been a surplus. Here are the figures for both Eastern and Western lines for six years.

(TH)			made			T

The following statement, made up from returns collected by us, shows the week's receipts and shipments of gold and currency by the New York banks.

Week ending April 80, 1886.	Received by N. Y. Banks.	Shipped by N.Y. Banks.		nterior sment.
Cnrrency Gold	\$1,000,000	\$300,000	Gain	\$700,000
Total gold and legal tenders	\$1,000,000	\$ 800,000	Gain	\$700,000

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement the banks have lost \$1,000,000 through the operations of the Sub-Treasury and \$1,271,000 more by exports of gold. Adding these items to the above, we have the following, which should indicate the total loss to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to-day.

Week ending April 30, 1888.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' Interior Movement, as above Snb-Treas. oper. and gold exports			Gain \$700,000 Loss 2,271,000
Total gold and legal tenders	\$6,200,000	\$7,771,000	Loss \$1,571,000

The Bank of England lost £60,145 bullion during the week. This represents £45,000 received from abroad and £105,145 sent to the interior. The Bank of France gained 7,548,000 francs gold and 2,388,000 francs silver, and the Bank of Germany, since the last report, increased 863,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	Aprit 2	9, 1886.	April 30, 1885.		
	Gold.	Silver.	Gold.	Silver.

road Included in the above payments were \$8,000 in silver The coin, chiefly standard dollars.

BRITISH AMERICAN CATTLE COMPANIES.

British investments in American cattle-raising do not appear to offer the same tempting returns as was the case when such undertakings first became prominent—at least they do not where prosecuted in the shape of stock companies, and the results by them would seem to offer a fair criterion of the results of other investments of the same class. It is somewhat difficult to get accurate information with regard to this subject, but the Dundee Advertiser of a recent date had an article on the same, based on a compilation prepared by the well-known firm of stockbrokers, Messrs. Andrew Ogilvie & Company, of Dundee, Scotland, which contains much interesting and valuable matter as to the present standing and position of the leading British American Cattle companies.

The growth of these companies extends over a comparatively short period of years, the oldest of them, the Prairie Cattle Company of Edinburgh-which we are informed was the first of such associations formed in Great Britaindating back only five years. At that time the inducements to engage in such ventures must have been great, for we notice that the dividends paid by the company named amounted in 1883 to no less than $20\frac{1}{2}$ per cent, while now for two years only 10 per cent has been paid. After that, other companies were formed very rapidly, and whereas the capital of the Prairie Company, as at present, is £585,822, that of the eleven companies in Messrs. Ogilvie's table is £3,947,089, besides which there are a few minor companies not reported on. In other words, the joint stock capital invested in United States cattle represents over 20 million dollars. The eleven companies in question have a total herd of 672,013 head, and the lands owned and leased by them amount to 3,319,072 acres. Following are some of the leading particulars from Messrs. Ogilvie's compilation as relates to each of the eleven companies.

These details are interesting in showing that much the same forces must have been at work in all the companies -that is, they all suffered from a common cause. The most noteworthy fact of course is the great reduction in dividends that is shown to have occurred during the last two years. With two exceptions, dividends in 1885 were all smaller than in the previous year, and also smaller than in 1883, compared with which year indeed the reduction has been in almost every case very considerable. The rate of return now is not at all large, and bearing in mind the character of the business, seems very low. In our article on the rates of money at leading cities a few weeks ago we pointed out that at Kansas City the cost for discounting cattle paper ranged all the way from 10 to 18 per cent, which encourages the idea of heavy profits to the owners of the ranges or the business would not be

able to bear such a tax; but the figures above give us 10 per cent as the extreme rate of dividends in 1885, and that reached by only one company, another having paid the same rate but the time covering 13 months; of the other nine companies, one paid 7 per cent, one 6, two 5, one 4, and four paid nothing at all.

When the investment of foreign capital in this industry first began, and the outlook appeared brilliant, anxiety was expressed in some quarters lest the movement might assume alarming proportions and the lands of the United States pass into foreign ownership, reproducing or at least suggesting an evil which has caused so much irritation in Ircland. For obvious reasons that condition could not in any degree be reproduced here; but aside from that fact the above figures show how very slight ground for any such apprehensions there need be, the laws of trade and competition applying effective safeguards against any excessive or dangerous tendency. As bearing upon the same point also it may be well to remark that while the total herd of the eleven companies given, as already stated, is only 672,013 head, the total number of cattle in the United States, according to an estimate made a year ago by Mr. Joseph Nimmo, is about 50 millions (49,417,782 was Mr. Nimmo's figure), making it evident how far from a formidable proportion of the whole foreign companies at present control.

But perhaps it may be thought that the influences responsible for the diminution of profits are only temporary in character. We hardly think such a view would be correct for all or even the most of them. The action of President Cleveland in ordering the cattle men out of the Indian Territory, and also compelling the removal of enclosures from public lands everywhere, so far as its effect was to compel owners to sell their cattle and thus for the time being glutted the market was of course an adverse factor wholly transient in nature, but really its influence in that way we presume was very slight. A much more important result of the President's action was in obliging many owners to pay for their grass, instead of obtaining it free, causing an increase of expenses, and so far as that was the case we may suppose the adverse effects more or less permanent. Another influence, though a minor one, that operated against the 1885 profits was that the yield of calves was not up to that of the previous year, only two companies having raised more, the total brand of the eleven companies for 1885 being 116,319 against 126,500 for 1884, a decrease of 10,181 calves. If we would know the main reason however for the decline in dividends, we have only to look at the two columns above showing the amount realized per head of steers in 1885, as compared with 1884. Almost all the companies show a decline in the selling price of the steers, and the decline is very heavy, too, amounting in some cases to as much as, and over, nine dollars a head. The fact that the decline is so general suggests a common depressing cause for all the companies, and this common cause no doubt is found in the circumstance that the large profits formerly made in the business invited competition on a scale that has cut down prices and profits alike, one consequence of the foreign investment in the industry thus being that our people are getting cheaper beef.

It is interesting to observe that the unfavorable results noted have been produced notwithstanding special inducements in some cases to make them otherwise. Thus the Manager and Ranch Superintendent of the Matador are each entitled to one-third of 7 per cent on the net profits earned during the five years ending November, 1887, provided these profits are equal to 20 per cent per annum on the capital. In other words a premium is put on good management. Nevertheless, the Matador paid only 7 per cent in 1885, 6 per cent in 1884, and 8 per cent in 1883. It is clear therefore that circumstances do not favor larger returns.

HOW THE NORTHERN PACIFIC IS DOING.

The prospective opening of the Canadian Pacific route to the Pacific and reports that rates on trans-Continental business have again become demoralized, invest any figures bearing on the Northern Pacific's current affairs with increased interest. There is a disposition in some quarters to look upon the opening of the Canadian road as an event fraught with serious consequences to the Northern Pacific, but there seems to be very little ground for such opinion. The new road is likely to become a factor on through Pacific business, but that business (considering the increased number of competitors sharing in it) is no longer of any great consequence, and, as regards the rates realized on the same, it is hardly the most desirable kind of traffic to have.

It is the local business that is important-not necessarily carried short distances, but supplied by local tributaries or contiguous to the line of road, and which in most cases is carried very long distances before finding a distributing market ; it is this kind of traffic that is the support of the system, and there the new road is so far removed from the old one that competition, for a long time to come, is Moreover, the Northern Pacific out of the question. people have from the first recognized the need and importance of an adequate system of branches, and thus have occupied a good deal of territory to the great disadvantage of all future rivals, and in this way, in some measure at least, protected their system against intru. sion from new comers. Mr. Villard understood full well the benefits to result from such a policy, and as the company at that time did not have the means to carry on the work itself, the Oregon Trans-Continental was organ. ized with that as one of the main ends in view. But the new management has been no less alive in that particular, and additional branches have been projected as needed, some of which are even now in process of construction. As the need for branches has thus been so carefully looked after, it is well to note that the reports about the condition of the crops in the district tributary to the system are unusually flattering, both at the Oregon end and the Minnesota end, making the promise for the business of future months very bright.

Proof of the importance of the local traffic is afforded by the return of gross and net earnings for the month of March, just issued. During the whole of that month the war between the Trans-Continental roads was carried on with great bitterness, and though the Northern Pacific was not one of the chief contestants, yet it had to meet the rate to San Francisco by an equal rate to Portland. Notwithstanding these low rates, however, the March earnings this year show an increase over those of the preceding year of \$166,504, and about \$150,000 of the gain was in freight. It may be claimed that the lower rates stimulated the business and thus increased earnings. But if the through traffic was the source of gain, then since the margin of profit at the rates prevailing must have been very small, and very likely was next to nothing, any gain in earnings would be accompanied by an equally heavy increase in expenses, whereas actually the expenses have fallen off, leaving the gain in net \$171,924, which therefore would seem to be pretty strong evidence that the increase was not brought about in that way, but came from local business. Probably large shipments of stock eastward of last January.

were one of the causes of increase. We do not forget that a year ago the March return recorded a large falling off, but that was simply because the 1884 figures had been swelled to unusual proportions by the Cœur d'Alene gold excitement, and that influence not existing in 1885 earnings dropped back to their normal level. Hence the gain now is not to be considered as merely a recovery of part of the previous year's loss, but may fairly be taken as indicating a natural growth of business.

One effect of the improved earnings is that notwithstanding the increase in charges, the company shows a decidedly smaller deficit in meeting the same than in March, 1885. In fact, the statement is very encouraging indeed in that respect. Thus the deficiency amounts to only \$97,273 this year, against as much as \$232,740 last year. Remembering that the deficit in February was \$295,005, and in January \$430,274, it will be understood that the change for the better is quite marked. January, February and March are never good months for this road, though there is usually an improvement from month to month, but that improvement this year has been very much greater than a year ago, as the following statement of the figures in the two years, by months, will show.

Northern Pacific.	Jan	uary.	Febr	uary.	March.		
Northern Pacific.	1886.	1885.	1886.	1885.	1886.	1885.	
	\$	\$	8	8	\$	\$	
Gross earnings	480,330	553,582			858,116		
Operat'g expenses.	450,278	440,574	411.532	401,955	449,054	454,474	
Net earnings	S0,052	113,008	182,708	168,009	400,062	237,138	
Fixed charges	460,326	382,524	477,713	449,625	506,835	469,878	
Surplus	df.430.274	df.269,516	df.205,005	df.275,616	df.97,273	af.232,740	

Adding the three months together, we find that gross earnings have increased \$117,000, and net \$103,000, but that owing to an increase of \$148,000 in the charges the deficit for 1886 was somewhat larger than in 1885, or \$822,552, against \$777,873. The deficit is large in both years, but that is without significance, since, as said, it is usual and peculiar to the season of year. It may be asked, however, in what position that leaves the company on the operations of the nine months of the fiscal year beginning with the 1st of last July. To answer that question, we present the following statement, giving the results (as previously published by us) for the six months ended December 31, for the three months ended March 31, and for the two periods combined.

AT 11 mm Thealds	8 mos. cn	d. Dec.31.	3 mos. en	a.Mch.31.	Total 9 months.	
Northern Pacific.	1885.	1884.	1888.	1883.	1885-86.	1884-85.
		\$		\$	\$	\$
Gross carnings	6,748,270	6,627,719	1,032,056	1,815,158	S.675,956	8,442,877
Operating expenses	3,102,280	3,268,150	1,310,564	1,297,003	4,413,153	4,565,153
Net earnings Fixed charges	3,640,081	S.359,569 2.660,283	621,822 1,444,974	518,133 1,296,028	4,262,803	9,877,724 3,056,311
Remainder	1	*699,2*6	-mailton-stations and and	summing had a spin spin had been		summaries after the summer

Here we see that while net earnings for the nine months were nearly \$400,000 greater than in the corresponding period of the year preceding, owing to the increase in charges the deficit is heavier than in that year, standing at \$191,582, against \$78,587. But that is really a very satisfactory showing, all things considering. The remaining three months cover a pretty good period; they succeeded in the previous fiscal year in converting the deficit for the nine months into a small surplus, and though the deficit is larger now should do the same again the present year.

• As to other operations of the company during the three and nine months, there has been some reduction of the funded debt since the first of the year, owing to the operation of the sinking funds, and the preferred stock has also undergone a further slight diminution. Here are the figures at four different periods since a year ago the first of last January.

MAY 1, 1886.]

THE CHRONICLE.

Amount Outstanding.	Apr.1, 1886	Jan.1, 1886	July 1,1885	Jan.1, 1885
General first murigage bonds General second morigage bonds No. Div. and Pend d'Oreille Div	\$ 44,028,000 18,857,000 5,878,500	\$ 44,028,000 18,857,000 5,423,500	\$ 43,408,000 18,857,000 5,473,500	\$ 40,903,000 18,857,000 6,500,400
Dividend certificates Total funded debt	4,640,821	4,640,821	4,640,821	4,640,821 89,901,221
General 1st mortgage bonds pur- chased for sluking fund	420,500			
Remainder Annual interest on same	72,453,821 4,849,029	72,584,821 4,855,050		69,536,221 4,172,173
Preferred stock.	98,207,172 1,328,222			

The preferred stock, of course, is reduced out of the proceeds of land sales, and it will be seen that the total of the stock now outstanding is only \$38,207,172, and that in the fifteen months since January 1, 1885, a reduction of over a million dollars has been effected.

FINANCIAL REVIEW OF APRIL.

The month of April was excessively dull at all the Exchanges, and wheat, corn, cotton, provisions, petroleum and stocks were all notable for their sluggish tone and relatively small volume of business.

The railroad strikes on the Missouri Pacific at East St. Louis, and among the Lake Shore switchmen at Chicago, had a bad effect in checking business and destroying confidence among capitalists and investors, while the strikes on the Third Avenue Railroad, and at the sugar refineries and other manufacturing establishments, also contributed to increase this distrust and to make all parties careful about entering into engagements for new work requiring the employment of labor.

The money market had no special feature; rates for call loans advanced slightly at one time, but afterwards weakened and were quoted at $1\frac{1}{2}$ @3 per cent.

The Stock Exchange markets were remarkably dull, as above stated, and prices generally tended towards lower figures. There was little to create any interest in stocks, and prices were well sustained, taking into consideration all the circumstances against the market. There were some important combinations made, among which the most notable was the absorption of the Gulf Colorado & Santa Fe by the Atchison Topeka & Santa Fe. The Wabash St. Louis & Pacific was sold in foreclosure April The Virginia Midland Railroad was leased to the 26. Richmond & Danville, and negotiations were pending for retiring the Richmond & Danville debentures, and making a closer alliance with the Richmond & West Point Terminal Company, which caused a large advance in all the securities of these companies.

Foreign exchange was dull and firm, and a very limited amount of gold was exported during the month.

The following summary shows the condition of the New York City Clearing-House banks, rates of foreign exchange and prices of leading securities and articles of merchandise, about the 1st of May, 1884, 1885 and 1886.

[From our own correspondent.]

LONDON, Saturday, April 17, 1886.

Judged both commercially and financially, the past week has been entirely devoid of any striking event. The Stock Exchange, which may be accepted as, to some extent at least, the pulse of public opinion, has failed to give any indication of activity. There, as in other quarters, a cautious feeling has been apparent, a disinclination to discount the uncertain future being pretty clearly pronounced. In spite of northeasterly winds, the weather, taken as a whole, has been favorable to the agricultural prospect, and we have at the same time had a cheap money market.

But political influences have heen paramount. It is not the Eastern question which this time has been agitating the masses, but the character of the future relations between Great Britain and Ireland, and it is not surprising that the radical changes proposed have been productive of considerable anxiety. A disturbance of home political affairs means a disturbance of internal trade, preventing also our taking full advantage of any improvement which may occur in the export or foreign trade. In fact, until the affair is decided one way or the other, commercial operations will be partially paralyzed. Trade will be restricted to hand-to-mouth dealings, with no inducement for that enterprising speculative spirit which infuses life into general business.

It is singular how trade has almost constantly suffered during the past twelve months or so from political pressure; and in fact it is a little curious that no sooner has one difficulty been in a fair way of being surmounted than another has sprung up in its place. We have passed through the throes of a threatened convulsion with Russia, and have had to view the irrepressible Eastern question from a variety of standpoints more or less hostile. We have had to await patiently the subsidence of the usual excitement attending a general election, and having overcome that we are now brought face to face with the Irish question in a more aggravated form than it has hitherto been presented to us. When all these things, and the uncertainty as to their ultimate effects, have to be considered, there can surely be no surprise that merchants are excessively conservative, with no spirit of enterprise anywhere observable. It is then of prime necessity that the political future should be much clearer before the cautious feeling is relaxed.

Eliminating political influences, there is no reason why trade should not gradually assume a more cheerful aspect. Money is cheap, credit is apparently sound, the agricultural prospect is perhaps a shade brighter than it was, and all the necessaries of life can be had on easy terms. But one important item is still required, and that is confidence. When will confidence be restored, is a question asked with painful iteration in commercial circles just as frequently and almost as gloomily as was the case a year ago, and notwithstanding the more hopeful tone of American advices, it is quite as difficult as it has been for the year past to hazard an opinion when a permanent restoration will be effected.

Sir William Harcourt's budget is a very simple, plain affair. With the materials to his hand it would have been impossible to frame any startling proposals. Practically taxation remains unaltered, the only concession being the abolition of the 4s.

building duty on cottages of a rental under £8, which will cost £16,000, and benefit some 60,000 persons. It is satisfactory to know that no fresh burdens are proposed. Considering the state of trade during the past twelve months, it is not surprising that the revenue should not have exhibited signs of clasticity. It was expected that the financial year would yield £90,790,000, whereas the total receipts only amounted to £89,581,501, or £1,208,699 short of the estimate. The expenditure was £92,223,844 against an estimate of £93,617,171, or £1,393,327 less. The difference of £184,628 goes to reduce the deficit of £2,827,171 anticipated by Sir Michael Hicks-Beach, and the actual deficit for the year is therefore £2,612,513. Tho sources of revenue which have suffered most have been the excise and customs, the former losing £390,000. Some years ago it used to be asserted as a reproach that we were drinking ourselves out of the national debt; but it is very clear that of recent years we have been becoming much more sober as a nation. Ten years ago the excise yielded £31,209,000, while for 1885-86 the receipts were only £26,830,000, or, allowing for the increase in the population, the return per head is now 14s. 9d., against-19s. 1d. This is satisfactory, as the money thus saved is more profitably employed in other channels. During the past decade the savings banks' deposits have risen from £67,575,000 to £97,306,000, or from £2 1s, 3d. to £2 13s. 6d. per head of the population. This goes to controvert the assertion that the spending power of the community is diminishing. In making his statement, the Chancellor of the Exchequer adopted an optimist view, which is not generally accepted outside of official circles, particularly as we are threatened with an issue of £50,000,000 of consols in the doubtful event of Mr. Gladstone's land scheme being carried. This would mean an extra annual addition of £1,500,000 to imperial liability, and which no doubt in the long run the long-suffering British taxpayer would have to meet. The present moment is certainly not opportune to increase the burdens of the nation, although the cheapness of money would facilitate the operation.

The Chancellor of the Exchequer estimates the revenue for 1886-87 at £89,885,000, or £303,000 more than last year, and the expenditure at £90,428,499, leaving a deficit of £559,499, to meet which it is proposed to suspend the new sinking fund of £613,000 and the sinking fund of 1881 of £205,000, both now applicable to purchase of stock in the open market. This will convert the deficit of £559,499 into a surplus of £258,000. In framing his estimates, however, Sir William Harcourt seems to have been rather sanguine in the matter of excise, which, notwithstanding its declining tendency, he expects to yield about a quarter of a million more than last year. Why it should do so in the present state of trade it is difficult to conceive. The present amount of the national debt is £710,000,000, and it will be reduced during the current financial year by £5,958,000. The items of expenditure for 1886-87 are given as follows: Consolidated fund, £30,639,917; army, £18,233,200; navy, £12,993,000; civil service, £18,008,-691; customs and inland revenue, £2,753,000; post-office, £5,218,995; telegraphs, £1,845,510; and packet service, £735,-663: total. £90,428,599. The gross revenue is estimated as follows: Customs, £19,700,000; excise, £25,710,000; stamps, £11,-365,000; house duty, £1,880,000; property and income tax, £15,755,000; post-office, £8,270,000; telegraphs, £1,730,000; Crown lands, £370,000; interest on advances, £1,165,000; and miscellaneous, £2,900,000; total, £39,885,000.

Somewhat more steadiness has prevailed in the money market. This is not due to any increase in the commercial demand, but is the result mainly of a diminution in the volume of floating balances. The market is apparently being brought into a sounder condition, and should there be any revival of the commercial inquiry, it would not be long before some movement in the Bank rate would be necessary. But judging from present indications, any hardening process promises to be very gradual. This week's Bank of England return shows that the aggregate deposits held have been reduced £1,264,000, proving that there is less money floating about, but against this the Bank has been repaid lonns to the extent of £1,228,000. The loss in bullion is £208,000, the present supply being £21,713,694 or £3,850,000 less than a year ago. The reserve, which now amounts to £12,715,939, is nearly £4,000,000 less than last year. It is clear, therefore, that there is not much margin to draw upon before the resources of the Bank would be weakened to such an extent as would render an advance in the rate imperative.

Messrs. Pixley & Abell write as follows on the state of the bullion market :

bullion market:
Gold --There has been a good demand for gold during the week, and the whole of the arrivals mentioned below have been taken for export, together with \$30,000 withdrawn from the Bank. The amounte to hand comprise £3,350 from Sydney, £18,400 from the East, £13,580 from River Plate, £2,270 from the Cape, £110,000 from New York; total, £147,600. The "Medway" has taken £7,450 to the West Indies, and the "La Plata" £100,000 to Lisbon.
Bilver has given way, following the course of the Indian exchanges, the fall being accelerated by the low price at which the india Council bille were allotted yesterday. The only arrival of importance during the week has been about £35,000 from New York. The P. & O. steamer has taken £41,000 to Iadia.
Maxican dollars remained steady during the week at 45%d. on French Government buying, and at this rate the arrival by the "Ville de Bordeaux." about £72,000, was placed; the price, however, hae since given way, and we quote to-day 45%d. per oz.

The quotations for bullion are reported as follows:

GOLD. London Standard. April 15	April 8.	SILVER. London Standard.	April 15.	April 8.

The directors of the Royal Mail Steam Packet Company notify that after considering the accounts of the company for the year 1885, they are not prepared to recommend any distri bution to the shareholders for the half-year ended December 31st last.

Messrs. Baring Bros. & Co. have received applications for £4,191,500 sterling first mortgage debenture bonds of the Canadian Pacific Railway Company, bearing interest at the rate of 5 per cent per annum, the price of issue being £104 per cent. The applications exceeded £6,000,000.

A meeting was held of the Scotch ironmasters to consider the advisability of reducing the rate, but no decision has The number of furnaces blowing is now 97. been arrived at. At a subsequent meeting held in London to consider the advisabily of reducing the make of pig iron thoughout the United Kingdom by 25 per cent, there were representatives from Cleveland, Scotland, South Wales, West Cumberland,

Northwest Lancashire, Lincolnshire, Northamptonshire, and other districts, and it was resolved to take steps to secure the immediate co-operation of all iron-making districts, and especially to obtain from every firm owning blast furnaces an undertaking not to increase the make for a period of three months, pending negotiations now contemplated.

The grain trade throughout the week has been entirely destitute of interest; operations have been about as contracted as they possibly could be. Nothing has been done beyond supplying current requirements, there being nothing passing in the way of speculation. Wheat has been a shade easier, say about 6d. per qr., and has finished up with a dull appearance. The weekly average price is again drooping. At the close of March it was 30s. 9d., but for the week ended April 10 only 30s. 4d. per qr. This clearly exemplifies the difficulty experienced in maintaining any improvement; certainly the current quotation is 1s. 4d. per qr. higher than for the first week in March, but it is still a long way from a remunera. tive point, and the average for the season continues 2s. per qr. below what was considered the bankrupt level of last season, namely 30s. 5d., against 32. 5d. per qr. Neither are there any indications of an early change in the trade taking place. Statistically there is nothing new to notice. Imports have fallen off somewhat, yet the aggregate for the season is in excess of that for the corresponding period of 1884-85 by about 900,000 cwts., but the quantity on passage is appreciably less than last year. For the immediate future, however, the stocks available are ample, and while such is the case and crops are promising it will be useless to look for any distinct hardening of values.

The following return shows the extent of the imports of cereal produce into the United Kingdom during the first thirty-two weeks of the season, the sales of home-grown produce, the average prices realized, and other items, compared with last season :

Grand Rapids & Indiana.—A dispatch from Grand Rapids, Mich., says that W. O. Hughart, President of this railroad, had returned from New York, and announced that he had suc-ceeded in placing \$700,000 in bonds, the money to be used in building the new road from Grand Rapids to Muskegon.

Kansas City Springfield & Memphis.—This road, about a year ago, was completed to Memphis, Tenn., a distance of 487 miles. It is now preparing to extend its line, under another name, from Memphis to Birmingham, Ala., a distance of 250 miles, thereby making a line from Kansas City to Birming-ham, 737 miles long.

nam, '37 miles long. The Boston papers report: "The proposition which the Kansas City Springfield & Memphis Company will soon make in the way of rights on the contemplated extension to Bir-mingham, Ala., will be a block comprising five shares of new stock and a \$1,000 thirty-year 5 per cent bend for \$950 to each holder of ten shares of the old stock. The new construction is to comprise a bridge across the Mississippi River and 250 miles of new road."

<text><text><text><text><text> For four of the old first bonds three will be issued under the reorganization plan. The old bonds bore six per cent interest, while the new ones will be five per cent bonds. I do not know how much stock will be issued. The first bondholders will receive a certain amount, but this will have to be ar-ranged hereafter. No change in the management of the prop-erty is intended at present.

Union Pacific.—At Washington the House Pacific Railroads Committee agreed unanimously to report a bill to extend the indebtedness of the Union and Central Pacific railroads. It indeptedness of the Union and Central Pacific railroads. It proposes to extend the debt over seventy years, payable in semi-annual instalments. In reporting the bill the attempt failed to have a day fixed for its consideration. This puts the bill on the calendar, where the chances of reaching it this ses-sion are very doubtful.

sion are very doubtful. BURDETT'S OFFICIAL INTELLIGENCE for 1886 has just reached us from London. This important manual is issued annually, under the sanction of the Committee of the London Stock Exchange, by its Secretary, Mr. Henry C. Burdett. It aims to give all requisite particulars concerning every security and company of interest or importance known to the Stock mar-kets of the United Kingdom. The completeness and accuracy of this manual make it invaluable to all interested in foreign securities. Bankers and brokers in the United Statescan ob-tain copies, we presume, through Mr. T. S. Gardner, Assistant Secretary of the Board of Trade & Transportation, 55 Liberty St. Anction Sales — The following were sold at anction this

WALL STREET, FRIDAY, April 30, 1886-5 P. M. The Money Market and Financial Situation .-- The slack business at the Stock Exchange this week has caused it to

resemble a midsummer period, when half the brokers are out of town. There is nothing at present to stir up an interest in stocks, and the uncertainties in regard to strikes, railroad earnings, the growing crops, &c., are such as to keep the market in a halting position until some of the doubtful elements are removed.

The reports this week from two of the leading trunk linesthe Pennsylvania and the Erie-for the month of March, are again quite favorable, and they indicate that in spite of the small tonnage of grain and provisions, the trunk lines are doing materially better than last year, and the higher rates are giving the roads a better net profit, even if the tonnage carried is smaller. On this basis there is reason to be hopeful about the trunk lines, since their competition, it is supposed, has reached a maximum for some years to come, and experience has proved that they can earn fair dividends in those years when rates are maintained.

At the West there seems to be the prospect of very active railroad building, as the four great corporations occupying the territory northwest of Chicago have each laid out plans which terntory northwest of Chicago have each laid out plans which involve the building of a large mileage of new road and the outlay of a large amount of capital. The Atchison Topeka & Santa Fe had already perfected its plans for heavy building, and it is probably not too high an estimate to assume that these five great companies will build 3,000 miles of branches, exten-sions and feeders in the next eighteen months. All this, too, is by corporations abundantly solvent, and able to carry the new roads for a few years, until they earn interest on their honds; hence the building in this manner cannot lead to another crop of defaults and forcelowers such as we have had in the past of defaults and foreclosures such as we have had in the past, with disastrous effects to the holders of securities.

The open market rates for call loans during the week on stock and bond collaterals have ranged at 11@4 per cent, and to-day at 2@3 per cent. Prime commercial paper is quoted at 31@5 per cent.

at 3405 per cent. The Bank of England weekly statement on Thursday showed a loss in specie of £60,145, and the percentage of reserve to liabilities was 41 7-16, against 41 3-16 last week; the discount rate remains unchanged at 2 per cent. The Bank of France gained 7,548,000 francs in gold and 2,388,000 francs in silver. The New York Clearing House banks, in their statement of April 24, ahowed a decrease in surplus reserve of \$1,399,100, the total surplus being \$13,323,550, against \$14,722,650 the previous week.

previous week. The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.

State and Railroad Bonds.—State bonds have had a very amall business, the total transactions for the week being as fol-lows: \$20,000 North Carolina consol 6s, 1919, at  $118\frac{1}{2}$ , \$8,200do. consol 4s, at 94-5; \$44,000 do. special tax bonds, at 10-12; \$7,000 South Carolina non-fundable bonds, at  $6\frac{1}{4}$ ; \$1,000Georgia 7s, new, at 103; \$1,000 Louisiana consol 4s, at  $73\frac{1}{4}$ ; \$4,000 Missouri 6s, 1887, at  $104\frac{1}{4}$ ; \$10,000 Virginia 6s deferred, trust receipts at 91 trust receipts, at 91.

Railroad bonds have been very dull most of the week, with a little more activity noticed in the later days. Prices have been irregular and no decided tendency has prevailed in either direction for the general market. Some have improved while others have given way a little. The only conspicuous activity has been in Erie 2ds ex June '86 coupon, which were latterly sold down quite sharply. Ches. & Ohio "B" ponds declined to 68 when it was known that only \$10 in cash would be paid on the May coupons.

The closing prices and range of a few leading bonds are annexed :

* Bid price; no sale.

* Bid price; no sale. Rallroad and Miscellaneous Stocks.—The stock market was perfectly lifeless during the first three days of our week, heginning with Saturday last. Business was restricted to a few room traders and there was no disposition to operate on either side of the market, and as a consequence prices remained practically unchanged. Ou Wednesday, however, a bear movement was inaugurated, and it was rumored that a bear pool had been organized. However that may be, prices gave way considerably under the adverse influence, and have remained quite weak, though there has been no important change in the general situation of affairs, and the decline can-not be attributed to anything except the operations of the bears, assisted by an indisposition to support prices on account of the uncertainty in regard to the continuance and possible of the uncertainty in regard to the continuance and possible spread of labor troubles.

In fact, the still unsettled differences between employers and employed are exerting quite an influence against the market, and there have been fears of further trouble on the first of May on the unreasonable demand for eight hours work with ten hours' pay. This has had some effect on the coal stocks especially, and the weakness in these and a few other specialties has had its influence on the general market, and all

specialities has had its inducted on the general market, and an prices are lower than a week ago. Among the stocks which have had special movements, Union Pacific and Louisville & Nashville have been conspicuous, the latter being notably weak. Consolidated Gas has also been freely sold in consequence of the legislation at Albany. Texas Pacific has sharply declined on the publication of the reorgan-interior along which is a compinence of the reorgan. Pacific has sharply declined on the publication of the Feorgan-ization plan, which is so conspicuously favorable to the Gould interest, and would result in giving complete control to the Missouri Pacific for a trifling consideration. Reading was very weak in the early dealings, but a part of the decline was recovered after the auction sale of securities which occurred here this week. Kansas & Texas was also bid down sharply to-day, said to be on speculative manipulation.

#### ANNUAL REPORTS.

#### Pittsburg Clucianati & St. Louis.

Pittsburg Clucianati & St. Louis. (For the year ending Dec. 31, 1885.) The report of President G. B. Roberts says: "The tonnago transported was 4,066,386 tons, against 3,630,919 tons in 1884, an increase of 435,467 tons, being entirely in through traffic, and mainly in lumber, coke, ore, provisions, agricultural products and miscellaneous manufactures. The coke traffic shows an increase of about 48 per cent, or 63,720 tons. The decrease in coal tonnage was due to the falling off in the Pittsburg local traffic, caused by the substitution of natural gas for fuel in place of coal. There was an increase in freight earnings of \$57,407. The average rate received per ton per mile was 5 3-10 mills, as compared with 6 3-10 mills for the previous year; the average cost was also decreased, but not to as large an extent, tho result being a decreased profit on this class of traffic.

as large an extent, the result being a decreased profit on this class of traffic. "There were carried 1,261,427 passengers, as compared with 1,323,074 in 1884, the loss being in local travel. There was a decrease of \$106,575 in passenger earrings, of which the larger proportion was upon the same traffic. "It will be noted that there was a decrease of the larger

decrease of \$106,575 in passenger enrings, of which the larger proportion was upon the same traffic. "It will be noted that there was a decrease in the operating expenses, although a large sum was expended upon permanent improvements. The main items of this outlay were the con-struction of iron and stone bridges and additional sidings, the change of the channel at Harmon's Creek, thereby dispensing with two bridges, the completion of the Columbus shops and the improvement of the connection with the Cleveland & Pittsburg Railroad at the west end of the Steubenville bridge." As to all the lines operated by the Pittsburg Cincinnati & St. Louis, the report says: "It will be noted that there was a large increase in the tonnage of your lines for the past year, 7,386,169 tons having been carried in 1885, as against 6,752,104 in 1884, a gain of 634,065 tons. This was accompanied, how-ever, by a still further reduction in rates, averaging on your main lines about one mill per ton per mile, so that, while they were called upon to do a largely-increased service, the gross and net revenue therefrom were materially reduced, and in the case of the Little Miami road the traffic was carried at an absolute loss." * * "There was a heavy reduction in the passenger traffic over your entire system, the number of pas-sengers carried being 3,299,460, against 3,579,456, a decrease of 270,906 passengers. There was a general reduction also in the tates on this traffic, ard a reduced profit therefrom upon nearly all your roads. The depressed condition of the country is clearly reflected, both in the reduced volume of passenger travel and the decreased consumption of general merchan-dise." * * *

travel and the decreased consumption of general merchan-dire." * * * "On January 1, 1896, your company surrendered possession of the Cincinnati & Muskingum Valley Railway, in obedience to a decree of the Court of Common Pleas of Jefferson County, Ohio, rendered November, 1885, in the suit of Samuel Jeanes and others against your company and the Cincinnati & Mus-kingum Valley Railway Company. This suit was brought in June, 1885, by the parties named as stockholders of your com-pany, upon the ground that the lease was a fraud upon the rights of the minority shareholders; and that the lease under which it was to provide for betterments to the road, butthat it was now and probably always would be wholly unable to ful-fill its covenant in this particular, or to reimburse your com-pany for advances made, over and above the net earnings, to the Muskingum Valley Company, to enable it to provide for betterments and to meet the interest on its bonds. These advances now amount to \$1,081,013. Leave was granted to Evan J. Henry, a stockholder in the Cincinnati & Muskingum Valley Railway Company, on his own application, to intervene in the suit referred to, and an appeal was taken by him from the decree referred to, to the District Court, in which no deci-sion has yet been reached." DEFEATIONS AND FISCAL RESULTS.

#### Grand Rapids & Indlana.

### (For the year ending Dec. 31, 1885).

(For the year ending Dec. 31, 1885). The annual report for 1885 says: "The gross revenue has decreased \$170,155, or 8 per cent, and net \$10,004, or 1.6 per cent. In the calculation of net, betterments are excluded from the expenses of this year, as for 1884. Freight earnings decreased 8.1 per cent. This is largely due to the rate war, which has prevailed for so much of the year. The number of tons carried one mile was 99,991,291, as against 100,197,431, a decrease of 206,140 ton-miles, or 0.2 per cent. The average rate per ton per mile was 1.217 cents, a decrease of 105 cent. The local tonnage decreased 15.9 per cent, while the through increased 4.5 per cent." * * * * *

#### (For the year ending Dec. 31, 1885).

(For the year ending Dec. 31, 1885). The President's report states that "the failure of the wheat crop along the line, operated to diminish the earnings from local freights \$53,918 and the tonnage 21,456 tons. There was, however, a gain of 33,055 tons in coal and through freight, leaving a net gain of 11,599 tons over last year; but the com-pensation per ton mile having decreased 2 217-1000 cents received in 1884 to 1 991-1000 cents for 1885, this decline of 10°18 per cent in rates produced the loss of \$35,871 in the year's earnings. In the passenger traffic there has been a decrease of 1°91 per cent in the number of local passengers carried and of 6°70 per cent in the number of local passengers carried and of 6°70 per cent in the average length of the local haul, and to this fact is attributable a considerable share of the decrease in the passenger earnings." * * "The operating expenses have absorbed 63°45 per cent of the gross earnings, against 65°46 the preceding year, and are \$66,109 less than in 1884, a decrease of 10°36 per cent." * *

"An arrangement was made with the holders of the \$220,-000 Covington & Lexington 7 per cent bonds, due on June 1, 1885, by which they were extended for a period of five years, with interest not exceeding 6 per cent per annum. We have been unable to perfect suitable arrangements for crossing the Ohio River and for terminal facilities in Cuncinnati, and this, together with the failure to secure the co-operation pledged by the lines formed to operate a new through line from Cin-cinnati to Southeastern points and Florida via Livingston and Jellico (an essential measure to make the extension profitable), have arrested the development of the earning power of the have arrested the development of the earning power of the road, and the earnings have in consequence fallen consider-ably below our expectations and the requirements of the fixed charges for the year, which have been, including \$25,833 for taxes and \$13,200 for judgments chargeable to previous years' operation, \$399,513, or \$89,892 in excess of the surplus avail-able for their payment."

Net earnings...... \$39,281 \$44,592 \$267,492 \$253,536 Chesapeake & Ohio.—The 'half interest in cash due May 1 on the series "B" bonds of this company is not paid, but in lieu thereof ½ of the face of the coupons is offered to bond-holders, or \$10 on each coupon, the balance being paid in scrip. If this one-third of the interest is all that is earned and applicable to the bonded interest, it is all that is earned be paid, but should the interest on ordinary promissory notes of the company be paid in full, while the interest on its bonds is only paid in part? In his annual report, Mr. C. P. Huntington distinctly advo-cates the principle that floating debt should take precedence of bonds, and suggests that the bondholders should assess themselves to pay off the floating debt and should also reduce the rate of interest on their bonds. His words were as follows: "The interest on the floating debt of the company represents about 1 per cent of the par value of the series "B" bonds, and it would, without doubt, be advisable for the holders of that class of bonds to provide for the liquidation of the float ing debt, and at the same time reduce the rate of interest on their securities by bringing the interest liabilities within the earning power of the road." Chicago Rock Island & Pacific.—In reply to interviewers, Breeider Cohle of the company to interviewers,

earning power of the road." Chicago Rock Island & Pacific.—In reply to interviewers, President Cable, of this road, is reported as saying that his company's issue of \$10,000,000 of new collateral trust bonds was to be used for extensions and developments on a large scale. Plans were not yet sufficiently shaped, however, he said, to warrant making them public. Material changes might have to be made, though of course upon every essential point the company's officers were fully agreed. About 700 miles of new road would be built. The extensions were to be west of the Missouri River President Cable thought that in about a fortnight he would be ready to answer all inquiries as to the details of the new enterprise. the details of the new enterprise.

Cleveland & Canton.—The gross and net earnings for March and for three months from Jan. 1 were as follows:

St. Louis Alton & Terre Haute.—The Supreme Court of the United States hss just reversed the decree of the lower court, which was in favor of the St. L. Alton & T. Haute Co., for \$664,874 against the guarantors of the original lessee, the Indianapolis & St. Louis. The lease was for \$450,000 a year, and its terms were guaranteed by the Cleveland Columbus Cincinnati & Indianapolis and Lake Shore jointly for one-third, the Pittsburg Fort Wayne & Chicago for one-third, and the Indianapolis Cincinnati & Lafayette for one-third. For several years after the collapse of the latter company, the other guarantors paid the whole amcunt of the lease, but finally refused to pay more than their respective thirds. The St. Louis Alton & Terre Haute brought suit for \$664,874, amount of unpaid rental, and obtained from the United States Circuit Court a decision in their favor, which is now reversed by the Supreme Court, on the ground that the defendants had no right to make such guarantee. The full text of the decision will he ready in a faw days

by the Supreme Court, on the ground that the detribution no right to make such guarantee. The full text of the decision will be ready in a few days. Texas & Pacific.—A plan of reorganization has been pro-posed by the committee in Philadelphia of which Mr. Wistar is Chairman. The plan is so unfavorable to the Rio Grande

posed by the committee in Philadelphia of which Mr. Wistar is Chairman. The plan is so unfavorable to the Rio Grande Division bondholders, and particularly to the stockholders, that these interests will hardly come into it. It appears to be drawn mainly in the interest of the floating debt holders (the Missouri Pacific Railroad), who are using the consolidated bondholders for the purpose of getting control of the new company at the least possible cost. The large claim of the Missouri Pacific against the Texas & Pacific (about \$1,800,000) has never been explained in detail, nor its validity established, so far as we know, and now it is proposed to acknowledge it in full without inquiry and issue five times its face value in new Texas & Pacific etock. Present stockholders are called on to pay an assessment of two-thirds the full value of their holdings, by surrendering two shares out of three, and after this assessment there is no cash in the treasury for improvements, and they have a mortgage debt of \$40,000,000 ahcad of them The effect of this plan would be to assess present stockhold-ers the enormous assessment of  $66\frac{2}{5}$  per cent on their hold-ings, and at the same time the Missouri Pacific would take about \$9,000,000 of the new stock for its claim, leaving the necessity of purchasing only a small amount to obtain a clear majority. There would certainly be no inducement for the old stockholders to purchase a single share of the new stock a 15, and there is no guarantee that it would be sold. So bold a plan to squeeze out stockholders and get possession of a comold stockholders to purchase a single share of the new stock at 15, and there is no guarantee that it would be sold. So bold a plan to squeeze out stockholders and get possession of a com-pany has seldom been proposed, and it would be far cheaper for stockholders to pay a cash assessment of 10 per cent on their presentholdings, and thus put over \$3,000,000 in the treasury, than to be practically wiped out by this plan pro-posed in the Gould interest. It is outie right that the old consolidated mortgage hand.

It is quite right that the old consolidated mortgage bond-holders should be fully protected and get both principal and interest, and if they consented to reduce their future rate of interest to 5 per cent, this would be a reasonable concession on their part; but a preferred stock for the floating debt at its par value would be sufficient for that class of indebtedness.

As an outline of what might be a fair and simple plan of reorganization, the following is suggested: 1. Pay all interest due to the holders of the consolidated bonds, leave the principal unchanged, and stamp future

coupons at 5 per cent. 2. On the Rio Grande Division bonds and N. O. Pacific bonds, fund overdue interest and interest till 1889 into pre-ferred stock, and after 1889 pay interest at 5 per cent. 3. Let the land income bonds take the lands.

4. Let the floating debt take new preferred stock.

5. Let the present stock pay an assessment of \$10 per share, which would raise about \$3,200,000 cash. The plan from Philadelphia, which seems to be so plainly in Mr. Gould's interest, and which would leave him in control of the company, is as follows:

of the company, is as follows: Ali property-except land grant lands-to be purchased under fore-closure for a new corporation, whose capital stock will be the same amount as that of the present company, the slockholders receiving for every threashares of old stock one new share, with the optional right to buy another for \$!5. The floating debt to be settled for in new stock at \$20 per chare. The new company to make one new fifty-rear gold 5 per cent mortgage for \$40,000,060, of which \$23,000,000, to be known as series "A," hearing obligatory interest; and \$17,000,000 as series "B," with interest payable as earned, non-cumulative, but no new lien can ever be interposed between the two series. Consolidated bonds to receive 100 per cent of series "A" and 20 per cent series "B." New Orleans division bonds to receive 55 per cent of series "A" and 45 per cent of series "B." Rio Grande division bonds to receive 35 per cent of series "A" and 65 per cent series "B." Terminal bonds to receive 25 per cent of series "A" and 65 per cent series "B." Terminal bonds to receive 25 per cent of series "A" and 65 per cent series "B." Terminal bonds to receive 25 per cent of series "A" and 65 per cent series "B." The land grant lands to be purchased and administered by the bond

scries "E." The land grant lands to be purchased and administered by the bond-holders, with the assent and aid of the committee.

The plan involves the annual obligatory interest of \$1,115,000 and conditional interest of \$700,000, making a total annual charge of \$1,815,000 coming ahead of the stock.

Toiedo Cincinnati & St. Louis—Toledo St. Louis & Kausas City.—The consolidation of the constituent companies going to form the new company, whose title is last-named above, is now being advertised along the line of the road, according to law, and will take place about the middle of June. The new securities will not be issued until after that time. There may be an option for income bondholders to subscribe to new bonds or stock, but the plans in this respect have not yet been made public.

### The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAY NIGHT, April 30, 1886. A number of the strikes of workmen have been adjusted, but others have occurred, including fresh troubles to-day with railroad men at Chicago, and other contests are threatened. These multiplied and prolonged disputes have almost entirely destroyed speculation, and caused dealers and manufacturers to limit their purchases to their pressing needs. The effect upon business has been very unfavorable, except that it has promoted exports by preventing any improvement in values, which, under ordinary circumstances, might attend a decrease in supplies. There have been local storms of some severity, and the overflow of the Lower Mississippi River has become serious; but the weather generally has continued springlike, favorable to planting and sowing and to the germination of the seed, and promoting the complete resumption of inland navigation, which had been delayed somewhat.

There has been some depression in lard, caused by the free deliveries on May contracts and the general lack of speculative confidence, notwithstanding the very free export movement which has been in progress. To-day the market was firm, closing at 6.15c. for May, 6.20c. for June, 6.27c. for July, 6.34c. for August, 6.41c. for September and 6 47c. for Oct. Lard on the spot closes quiet but firm at 6.05c. for prime city, 6.171/2@ 6.221/2c. for prime to choice Western and 6.40c. for refined for the Continent. Pork, at some decline, has been more active, closing at \$9 25@\$9 50 for old mess, \$10 25@\$10 50 for new mess, \$10 75@\$11 for family and \$11 75@\$12 50 for clear. Cut meats have been more steadily held, with a fair inquiry; pickled bellies close at 5@5%c., pickled hams at 8%@91/4c. and shoulders at 434@514c.; smoked hams, 93410c. and shoulders 5½@6c. Beef is dull at \$3@\$8 50 for extra mess per hbl. and \$15@\$17 for India mess per tierce. Beef hams are firm at \$19 50@\$20 per bbl. Tallow is dull at 3% c. per lb. Stearine is quiet at 71% c. and oleomargarine at 5% @6c. Butter is again decidedly lower at 17@24c. for creamery. Cheese is also lower at 61/2@101/2c. for State factory. The swine slaughtered at the principal Western towns from March 1 to latest dates num-bered 895,000, against 855,000 for the corresponding period last season, but strikes threaten to seriously impede packing operations at once. The following is a comparative summary of aggregate exports from October 26 to April 24 for two years. for two years:

8¼c.

At to-day's Metal Exchange pig iron certificates were offered at \$18. Tin moderately active and quite firm at 2034 @20.90c.; sold at 20.80c. for May and June. Tin plate very dull. Copper neglected. Lead steady at 4.70@4.85c. for domestic. Spelter was lifeless. Ocean freights are firmer, owing to the taking up of avail-able room for grain and cotton for present shipment and several weeks ahead. Petroleum charters are dull,

### COTTON.

FRIDAY, P. M., April 30, 1886. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (April 30), the total receipts have reached 40,300 bales, against 43,000 bales last week, 56,305 bales the previous week and 41,393 bales three weeks since; making the total receipts since the 1st of September, 1885, 5,030,198 bales, against 4,668,022 bales for the same period of 1884-85, showing an increase since September 1, 1885, of 370,276 bales.

Total 1885 ..... 14.142 4.814 9.107 4.706 32.889 523.820 Total 1884 ..... 10.982 6.150 4.530 944 22.606 527.288 Cotton for future delivery at this market for the week under review has been fairly active, but the course of prices has been variable and somewhat irregular. The resumption of business on Monday following the adjournment from the previous Thursday was rather sluggish, but the marked reduction of stocks at interior towns, the smaller visible supply in the markets of the world and the indications that there would be no pressure from deliveries on May contracts, g ave an upward turn to values which at the close amounted to 4 @6 points. A feature of tho day was the free extension of contracts for May to summer or autumn months. On Tuesda y contracts for April and May showed more strength than the later deliveries, but on Wednesday there was a general decline, under reports of better weather at the South, although Liverpool was dearer for spot cotton and the receipts at the ports were small. Yesterday a better report from Liverpool caused a partial recovery of Wednesday's decline. To-day Liverpool sdvices were again better, and this market developed much strength, though only moderately active, and the close was quiet, the stocks at interior towns not having decreased as much as was expected. Cotton on the spot has met with as more general demand, though not active. Prices were unchanged until yesterday, when an advance of 1-16c. was quoted. To-day a considerable business for export was reported. The total sales for forward delivery for the week are 291.100

quoted. 10-day a considerable business for expert was reported. The total sales for forward delivery for the week are 291,100 bales. For immediate delivery the total sales foot up this week 3,185 bales, including 1,196 for export, 1,469 for consumption, 500 for speculation and — in transit. Of the above, — bales were to arrive. The following are the official quotations for each day of the past week.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (April 30), we add the item of exports from the United States, including in it the exports of Friday only.

		-		

50,000 bales.

The above figures indicate an *increase* in the cotton in sight to-night of 42,379 bales as compared with the same date of 1885, a *decrease* of 317,989 bales as compared with the corres-ponding date of 1884 and a *decrease* of 545,873 bales as compared with 1883.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1884-85—is set out in detail in the following statement.

The above totals show that the old interior stocks have decreased during the week 27,019 bales and are to-night 141,375 bales more than at the same period last year. The receipts at

the same towns have been 15,222 bales more than the same week last year, and since September 1 the receipts at all the towns are 643,911 bales more than for the same time in 1884-5.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS,— in the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plan-tations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week	Receipts at the Ports.			St'k at Interior Towns.			Rec'pts from Plant'ns,

The above statement shows-1. That the total receipts from

The above statement shows—1. That the total receipts from the plantations since September 1, 1885, are 5,265,461 bales; in 1884-85 were 4,740,035 bales; in 1883-84 were 4,746,972 bales. 2.—That, although the receipts at the outports the past week were 40,309 bales, the actual movement from plantations was only 11,036 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were —— bales and for 1884 they were 12,068 bales. 12,068 bales.

AMOUNT OF COTTON IN SIGHT APRIL 30,-In the table below we give the receipts from plantations in another form, and add to them the net overland movement to April 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1885-86.	1884-85.	1883-84.	1882-83.
Receipts at the ports to Apr. 30 Interior stooks on April 30 in	5,039,198	4,668,922	4,713,319	5,660,670
excess of September 1	226,263	71,113	33,653	147,898
Tot. receipts from planta'tns Net overland to April 1	5,265,461 682,645	4,740,035	4,746,972 526,328	5,808,568 572.324
Southern consumpt'n to Apr. 1	253,000			
Total in sight April 30	6,201,106	5,513,117	5,509,300	6,620,892
Northern spinners' takings to				

April 30..... 1,541,487 1,210,382 1,373,429 1,534,218

It will be seen by the above that the increase in amount in sight to-night, as compared with last year, is 687,989 bales, the increase as compared with 1833-34 is 691,906 bales and the decrease from 1882-83 is 419,786 bales.

WEATHER REPORTS BY TELEGRAPH.-The weather has favored planting operations in most sections of the South during the week, and, except in those districts of the Mississippi Valley which are already overflowed or threatened with inundation, satisfactory progress has been the rule. There have been breaks in the levees at two or three points during the week, but to-night the river is reported to be falling at Memphis, although still one foot and four-tenths above the danger line, while our Helena correspondent reports it at eleven inches above the highest water mark but stationary. The outlook in Texas appears to be very promising.

Galveston, Texas.-We have had fine showers on two days of the week, the rainfall reaching one inch and eighty-eight hundredths. The thermometer has averaged 71, the highest being 80, and the lowest 62. During April the rainfall reached two inches and twelve hundredths.

Indianola, Texas.-It has been showery on two days of the week, the rainfall reaching fifty-five hundredths of an inch. The rain was beneficial, but insufficient. Crops look promising. The thermometer has averaged 72, ranging from 64 to 83. April rainfall, eighty hundredths of an inch.

Palestine, Texas.-We have had showers on four days of the week, the rainfall reaching ninety-one hundredths of an inch. Corn has a good stand, and cotton planting makes good

**RONICLE**, **Data** progress. The thermometer has ranged from 54 to 50, averaging 66. During the month of April the rainfall reached two inches and minety-nine hundredths. *Huntsville*, *Texas.*—There have been fine showers on four days of the week, the rainfall reaching one inche and fifty-six hundredths. Corn is good and cotton planting is about completed. Average thermometer 70; highest 83, lowest 50. *Dailas, Texas.*—It has rained on three days of the week, the rainfall reaching forty-seven hundredths of an inch. Planting is progressing finely. The thermometer has averaged 70, the highest being 97 and the lowest 52. *Austin, Texas.*—We have had fine showers on four days of the week, the rainfall reaching one inch and sixty-one hundredths. Good progress is being made in planting. The thermometer has averaged 69, ranging from 52 to 86. *Luting, Texas.*—There has been one good shower durin g the week, but more is needed. The rainfall reached fift-hundredths of an inch. All crops look promising. The thery mometer has averaged from 60 to 88, averaging 73. *Columbia, Texas.*—It has rained splendidly on two days of the week, the rainfall reaching one inch and nine hundredths. We have about finished planting. Average thermometer 72, highest 82 and lowest 60. *Cuero, Texas.*—It has rained splendidly on two days of the week, and just as needed. The rainfall reached one inch and thirty hundredths. Cotton planting progresses finely. Corn averages two feet high and some cotton has six leaves. Everything promising. The thermometer has averaged 72, the highest being 96 and the lowest 60. *Brenham, Texas.*—We have had showers on four days of the week, the rainfall reaching fifty-two hundredths of an inch. Young crops are good, but eastward of this point a hail storm did much local damage. The thermometer has averaged 71, ranging from 58 to 83.

storm did much local damage. The thermometer has aver-aged 71, ranging from 58 to 83. Belton Texas,—It has rained hard on four days of the week, mainly beneficial, but interrupting planting, The rainfall reached two inches and seventeen hundredths. A hail and wind storm this week did considerable damage in a nar-rew track. The thermometer has ranged from 57 to 88, averaging 70.

averaging 70. Weatherford, Texas.—There has been one shower during the week, the rainfall reaching one hundredth of an inch. Planting is making good progress. We are needing rain. Average thermometer 67, highest 80 and lowest 43. New Orleans, Louisiana.—It has rained on three days of the week, the rainfall reaching two inches and seventy-three hundredths. The thermometer has averaged 72. Shreveport, Louisiana.—We have had rain on three days of the week, the rainfall reaching two inches and sixty-eight hundredths. The thermometer has averaged 67, the highest hundredths. The thermometer has averaged 67, the highest hundredths.

being 87 and the lowest 54. Columbus, Mississipl.—It has rained on four days of the week, the rainfall reaching two inches and eighty-eight hun-dredths. The thermometer has averaged 65, ranging from 52 to 82.

Meridian, Mississippi.-It has rained on four days of the week, the rainfall reaching four inches. We are having too much rain, and it is claimed that much damage has been done and that replanting is necessary. ranged from 53 to 75. The thermometer has

Leland, Mississippi.—We have had rain on three days of the week, which has prevented the planters working out their crops. The rainfall reached two inches and twenty-nine hun-dredths. The thermometer has ranged from 44 to 86, averag-

Große. The fainhair reached two haves anged from 44 to 86, averaging 67.4.
Little Rock, Arkansas.—We have had rain on three days the remainder of the week being fair to clear and pleasant. The rainfall reached one inch and thirty-nine hundredths Farm work has progressed well during the week, and the promise is good for a successful crop so far as labor can make it. Average thermometer 67, highest 86, lowest 49. It rained on twelve days during April and the rainfall reached three inches and sixty-two hundredths. The thermometer averaged 61, and ranged from 49 to 86.
Helena, Arkansas.—It has been showering on three days and the remainder of the week pleasant. The rainfall reached one inch and twenty-eight hundredths. The thermometer has averaged 66, the highest being 82 and the lowest 56. During April we had rain on nine days and the rainfall reached four inches and the number of the set side and some on the east side below Arkansas will be overflowed. The thermometer has averaged 66, the highest being 82 and the rainfall reached four inches and the number being 82 and the rainfall reached four inches and the number being 82 and the rainfall reached four inches and the number being 82 and the rainfall reached four inches and ten hundredths.

aged 66, the highest being 55 and the lowest 50. During April we had rain on nine days and the rainfall reached four inches and ten hundredths. *Memphis, Tennessee.*—It has rained lightly on five days of the week, the rainfall reaching seventy-four hundredths of an inch. The river is one foot and four-tenths above the dan-ger line and falling. Planting on uplands is progressing well. The thermometer has averaged 67, ranging from 55 to 83. *Nashville, Tennessee.*—We have had rain on three days of the week, the rainfall reaching forty hundredths of an inch. The thermometer has ranged from 52 to 35, averaging 66. *Mobile, Alabama.*—It has rained severely on one day of the week, the rainfall reaching three inches and eighty-five hundredths. We are having too much rain, but there is a favorable change at the close. Planting late and making slow progress. Average thermometer 60, highest 80 and lowest 59. April rainfall five inches and eighty-six hundredths. *Monigomery, Alabama.*—We have had rain on three days of the week, the rainfall reaching four inches and eighty-one hundredths. The thermometer has averaged 67.9. *Selma, Alabama.*—Telegram not received. *Auburn, Alabama.*—Telegram not received.

Madison, Florida .- We have had rain on one day of the

Madison, Florida.—We have had rain on one day of the week, the rainfall reaching forty-eight hundredths of an inch. Average thermometer 72, highest 89 and lowest 55. Macon, Georgia.—It has rained on two days of the week. Columbus, Georgia.—It has rained severely on one day of the week, the rainfall reaching two inches and twenty-six hundredths. The thermometer has averaged 68, the highest being 80 and the lowest 59. During April the rainfall reached three inches and twenty-nine bundredths.

three inches and twenty-nine hundredths. Savannah, Georgia.—It has rained on one day and the remainder of the week has been pleasant. The rainfall reached one inch and ten hundredths. The thermometer has averaged

71, ranging from 56 to 83. *Augusta, Georgia.*—The early part of the week was clear and pleasant, but during the latter portion we have had rain on two days, the rainfall reaching sixty-three hundredths of an inch. The thermometer has ranged from 54 to 89, averaging 69.

Ing 69. Atlanta, Georgia.—Telegram not received. Albany, Georgia.—Telegram not received. Charleston, South Carolina.—It has rained on one day of the week, the rainfall reaching sixty-nine hundredths of an inch. The thermometer has averaged 68, ranging from 57 to 81. Stateburg, South Carolina.—The early part of the week was clear and pleasant, but during the latter portion we have had delightful showers on two days. The rainfall reached fifty-eight hundredths of an inch. The thermometer has ranged from 55 to 86 averaging 69:4.

fifty-eight hundredths of an inch. The thermometer has ranged from 55 to 86, averaging 69'4. Wilson, North Carolina.—It has rained on two days of the week, the rainfall reaching two inches and forty-six hun-dredths. Planting is about completed in this vicinity. Average thermometer 73, highest 92 and lowest 52. The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock April 29, 1886, and April 30, 1885.

	Apr. 29, '86. Apr. 30, '

INDIA COTTON MOVEMENT FROM ALL PORTS.—The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to April 29.

OMBAY	<b>RECEIPTS</b>	AND	SHIPMENTS	FOR	FOUR	YEARS.

	Shipments this week				ents Sine	Receipts.		
Year	Great Brit'n.	Conti- nent.	Total.	Great Britain	Conti- nent.	Total.	This Week.	Year,
1885 1884	13,000 25,000	20,000 70,000	33,000 95,000	111,000 308,000	364,000 254,000 421,000 484,000	365,000 729,000	54,000 93,000	828,000 562,000 961,000 1,057,000

According to the foregoing, Bombay appears to show sn increase compared with last year in the week's receipts of 4,000 bales, and a decrease in ahipments of 2,000 bales, and the shipmentesince January 1 show an increase of 146,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e week.	Shipments since January 1.			
	Great Conti- Britain. nent.		Totat.	Great Britain.	Continent.	Total.	
Caloutta-							
1886	1,000	1.000	2,000	25,000	25.000	60.000	
1885	2,000		2,000	46,000	11,000	57.000	
Madras-							
1886				3,000		3,000	
1885				4,000		4,000	
All others-							
1886				23,000	13,000	36,000	
1885		5,000	5,000	16,500	20,500	37,000	
Total all-							
1886	1,000	1.000	2,000	61.000	00.000	00.000	
1885	2.000	5,000	7,000	60.500	38,000	99,000	
1700	4,000 1	0,000	7,000	00,000	31,500	98,000	

The above totals for the week show that the movement from the ports other than Bombay is 5,000 bales *less* than same week last year. For the whole of India, therefore, the total ehipments since January 1, 1886, and for the corresponding periods of the two previous years, are as follows: RX

PORTS	TO	EUROPE	FROM	ALL	INDIA
-------	----	--------	------	-----	-------

Shipments	1886.		18	385.	1884.	
to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.
Bombay	31,000 2,000				03,000 13,000	729,000 153,600
Total	33 000	610.000	40.000	463.000	108 000	000 000

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrange-ments we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the porresponding week of the previous two years.

s lezandria, Egypt, Aprit 28.	1885-8 <b>6.</b>	1884-95.	1883-84.
Receipts (cantars*)— This week Since Sept. 1	2,000 2,831,000	10,000 3,578,000	2,000 2,624,000
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since week. Sept. 1,
E sporte (bales)— fo Liverpool To Continent	2,000 223,000 1,000 151,000	2,000 292,000 5,000 178,000	3,000 241,000 1,000 122,000
Total Europe	3,000 374,000	7,000 470,000	4,000 363,000

* A cantar is 98 lbs.

This statement shows that the receipts for the week ending April 28 were 2,000 cantars and the shipments to all Europe 3,000 bales

3,000 bales JUTE BUTTS, BAGGING, &C.—There is a moderate inquiry for bagging, but the market is not active. Buyers are not anxious to lay in any large stock, and are only taking such parcels as they actually need for present wants. Prices are steady and most sellers are asking full rates, but there are some who are willing to shade a fraction on any quantity. The asking figures are  $6\frac{1}{4} (@ 6\frac{1}{2} c. \text{ for } 1\frac{1}{2} \text{ lb.}, 6\frac{3}{4} (@ 7\frac{1}{4} c. \text{ for } 1\frac{3}{4} \text{ lb.},$  $7\frac{1}{2} (@ 8c. \text{ for 2 lbs. and 8} 4 (@ 8\frac{1}{2} c. \text{ for standard grades. Butts$ are rather dull and the market is tending in buyers' favor.The orders are for small parcels, about 1,000 bales beingplaced in this way, and sellers are quoting 1 11-16(@ 17₈ c. for $paper grades and 2@ 2\frac{1}{2} c. for bagging qualities.$ 

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 53,144 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York we nelude the manifests of all vessels cleared up to Thursday night of this week.

Below we add the clearances this week of vessels carrying cotton from United States ports, bringing our data down to the latest dates:

- NEW ORLEANS-For Liverpool-April 26-Steamers Costa Ricau, ----;

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.:

SAPPHIRE, steamer (Br.)-Divers had on April 14 re-commenced operations for salving the cargo of steamer Sapphire, tying in the Northern shoals, near Nienwe Dieppe. Seven bales of cotton were got out of the vessel and taken to the latter place. The position of the Sapphire remained unaltered.
 TYNEMOUTH, steamer (Br.)-Salvage operations have been re-commenced at the wreck of steamer Tynemouth, wrecked near Terschelling; five bales of cotton had been recovered up to April 16. _____ both

### BREADSTUFFS.

FRIDAY, P. M., April 30, 1886. The flour market has ruled comparatively quiet. Yesterday it was reported that there was a strike of the workmen in the great flour mills at Minneapolis. A strike of railroad men at Chicago to-day threatens to interfere with the course of sup-

Chicago to-day threatene to international plies. The wheat market was quite depressed early in the week, and most of the recent advance, due to the threatened corner in May contracts, was lost. There was an eagerness to sell which seemed to have little regard to crop accounts or the nature of foreign advices. The decline finally on Wednesday led to large purchases for export, which gave temporary steadiness to values. But the market has since been variable. To-day there was heavy selling for June delivery,

Oats on the spot were forced up by a "corner" on April contracts, the advance amounting to 2@3c. per bush., but other deliveries were not materially dearer, and the improvement in spots has been almost wholly lost in the past day or two, and the close is with an uncettled feeling.

#### THE DRY GOODS TRADE.

NEW YORK, Friday, P. M., April 30, 1886.

Transactions with package buyers on the spot continued moderate the past week, but there was a slightly improved re-order demand from some of the interior markets, business at several important distributing points in the Northwest and Southwest having been fairly active for the time of year. Labor troubles have naturally rendered buyers cautious, and purchases were chiefly of a hand-to-mouth character, but so numerous that fair aggregate sales of seasonable goods were made by manufacturers' agents and importers. The jobbing trade of this city has shown a moderate degree of animation, but there was some irregularity in the demand by retailers, patterned fabrics having been more freely taken than staple goods. The main features of the market remain unchanged. Nearly all domestic fabrics are steadily held in first hands, because stocks are not as a rule redundant, and staple imported goods are generally steady for the same reason. There is unquestionably a hopeful feeling in the trade, though no little uneasiness is expressed regarding the differences existing between labor and capital, and the definite settlement of these matters would doubtless lead to a more active business than has been witnessed of late.

DOMESTIC COTTON GOODS,-The exports of cotton goods for the week ending April 27 were 3,363 packages, of which 1,306 were shipped to Aden, 525 to Great Britain, 335 to Argentine Republic, 228 to Venezuela, 225 to Brazil, 177 to Mexico, 101 to Hayti, &c. The demand for staple cotton goods at first hands continued moderate, aside from cotton flannels, for which

some good-sized orders were placed for later delivery. Plain and colored cottons ruled steady in price, but transactions averaged light. Print cloths were in moderate demand on the basis of 3 3-16c. for 64x64s and 23/c. for 56x60s. Stocks last Saturday and for the same date the three previous years were as follows :

	April 24,	April 25,	April 26,	April 28.
Slock of Print Oloths-	1886.	1885.	1884.	1883.
Held by Providence manuf'rs.	87,000	445,000	212,000	126.000
Fall River manufacturers	33,000	355.000	232,000	87.000
Providence speculators	235,000	324.000	285.000	315.000
Outside speculators (est)		275,000	75.000	75.000

Total Stock (pieces)...... 370,000 1,399,000 804,000 603,000 Fancy prints other than novelties remained quiet in first hands, but a fair business was done in indigo blues. Printed and woven wash fabrics, as seersuckers, ginghams, lawns, batistes, chambrays, foulards, &c., were in steady request by package buyers and fairly active in jobbing circles,

DOMESTIC WOOLEN GOODS-It was a quiet week in the woolen goods market, new business having been conspicuously light. Agents continued to make fair deliveries of cassimeres, worsteds and overcoatings in execution of former orders, but the demand for these goods by the clothing trade was comparatively small, buyers having determined to pursue a cau -tious policy until the present labor troubles are settled. Price⁸ of the most desirable fabrics adapted to men's wear are well maintained, but such goods as are not strictly in keeping with the prevailing taste are a triffe easier in some cases. Cloak-ings, jersey cloths and stockinettes were only in moderate request, but quotations are unchanged. Satinets, Kentucky jeans and doeskins were in light demand and steady. Ladies' cloths, tricots and soft-wool dress fabrics continued in mod-erate request for the renewal of assortments, and there was a steady call for all-wool cashmeres, diagonals, homespuns, serges, &c., by package buyers and retailers, though purchases averaged light. Flannels and blankets ruled quiet, and steady in price, and carpets were in meagre demand at first hands. Additional orders were placed with the commission houses for wool hosiery and heavy underwear for future delivery, and leading makes are largely sold to arrive. FOREIGN DRY GOODS.—There was a light and irregular demand for foreign goods at first hands, and the jobbing trade was only moderate, though a few seasonable specialties were distributed in fair quantities. Piece silks ruled quiet, but a pretty good business was done in ribbons. Dress goods moved slowly, aside from wash fabrics, in which there was a fair husiness. Men's wear woolens were shuczeish, and the orders, but the demand for these goods by the clothing trade was

moved slowly, aside from wash fabrics, in which there was a fair business. Men's-wear woolens were sluggish, and the demand for linens, laces, embroideries, white goods, hosiery and gloves was mainly of a hand-to-mouth character and moderate in the aggregate.

#### MANHATTAN LIFE INSURANCE COMPANY.

156 & 158 BROADWAY, NEW YORK. HENRY STOKES, President.

HENRY STOKES, President. From Philadelphia Inquirer, Jan. 30, 1884. The new plan of the Manhattan Life Insurance Company continues to meet the popular ravor. It combines the protective feature of Itie insurance with the investment feature of the endowment policy, which tavoids the expanse attending the iaster by the ordinary method. As improvement has also bees added to this new form of p. Hey within the year, which gives the assured the option at the end of the period of taking the endowmeet in cash or of continuing the insurance for a much larger amoust without any further payment of premium, independent of the condition of health at the time. ESTABLISHED 1N 1850.
