## CLEARING HOUSE RETURVS.

The exchinges for tho week ended July 17, although the total is leas thas for masy previous weeks, were quito satisfactory. At New York there is a material decline from either of the fre precerling full weeks, but that decline cannot be ascribed to any falling off in general business, but results through lessened activity in speculative circles-W Wll Street in particulsr. As the week ended July 10 this year covered only flve busiaes days, no fair comparion with the returas for that period cen bo made, but golag back to July 8 wo find that at ten citles the present fgures oxhiblt an Increase, whlle at other points outaide of New York, Chicago, Phlladelphis and Boaton (at which cities the clearloge for the first days of July were considerably swelled by half-yearly vettlements), the loses are as a rule small.

During the week of $188 ;$ with which the current returns compare, there was a rery markod lacrease in the volume of speculation at New York, and as a rewult tho exchanges at that city recorded a heary galn. The consequeace is that now, and for the frat tlme slace September a year ago, New York clearings for the week show a losa from lant year. Outslde of New York, however, the contrast with $189 \%$ is very favorable, many clearing houses recording decided gains, as witnesa Omahs 9 per cent, Lowell $5 \cdot 5$, 311 wauke $40 \cdot 7$, Columbus 40.6, Detroit $87 \cdot 7$, Kansas City $87 \cdot 0$, Chicago $23 \cdot 5$ and Phlladelphia 20-0.

As regardastock speculation, the cransactions on the siew York Stock Exchange embrnce $1,181,012$ shares for tho week thil year, ag Inse 2, 107, 727 shares for the week of 189.5. The t itket valu of thes salen has been rerpectlvely $\$ 73,5 i 0,000$ = $\$ 129,09 \%, 000$, and afver ieducting double these valued from
the New York totais, the exchanges arising through other business oxhlblt an excess this year of 29.2 per cont.

Total all
Ontalda New Tort IcNi,
For the five days eading this evening the exchanges as rocolved by telegraph make is eatiblactory exhibit. On account of continued light speculation at New York, the clearings for that clty record a small loss from the proceding period, and largely owlag to this fact the aggregate for the whole country thowe a slight decline. In comparison with the corresponding five day of last year, however, there is an lacrease of $\overline{6} 6$ per cent in the total for all the cities, whereas outzide of Now York the galn reaches $25 \cdot 7$ per cent.

## THE FINANCIAL SITUATION.

The change in money so far as there has been any the past week has been in the direction of little better rates. Bankers' balances have ranged between 1 and 4 per cent, averaging somewhat above 2 per cent, but renewals have been made at about $2 \frac{1}{2}$ per cent, while banks have generally succeeded in obtaining 3 per cent for all the money they cared to put out on call. We hear of one transaction at 5 per cent for six months on stock collateral, which shows quite a change in feeling within about a month, for in June $3 \frac{1}{2}$ per cent for the remainder of the year was all that was bid for aimilar loans. Rates for commercial paper have also been marked up about $\frac{1}{2}$ of 1 per cent this week, the supply being good and the demand limited to purchasers outside the banks. Our Clearing House institutions are not purchasing, as they are experiencing a better inquiry from merchants their regular castomers for discounta, and ont of town banks are practically out of the market. those at Boston especially finding employment at home at better rates than those ruling here. At Chicago we notice a plentiful supply of funds as $\mathrm{ye}^{\dagger}$, the demand from the interior distributing centres not being excessive.

A special dispatch by cable to us states that the loss in bullion by the Bank of Eagland this week, which is reported at $£ 38,000$, resulted from receipts principally from Australia of $£ 60,000$ and from the interior of Great Britain of $£ 22,000$ (making the total receipts $£ 82,000$ ) and from an export wholly to Portugal of $£ 120,000$. Discounts of 60 -day to 3 -months bills remained at 1 per cent, the same as at the close of last week, till yesterday, when the rate was reported firm at $1 \frac{1}{8} @ 1 \frac{1}{4}$ per cent, indicating a little better demand, and possibly some improvement in business in Great Britain. There has undoubtedly been an increase in exports which has, with some reason, been taken as indicative of a better trade; we gave the figures for June as received by cable two weeks since, but we have the details now by mail, and it appears that the growth was mainly (about two thirds of it) in the shipment of cotton goods to India which we are informed have been put in there in excess of the demand, so that the movement has been progressing on a smaller scale during July. It will be noticed that the Bank of Germany has gained this week $24,277,000$ marks, being made up by the arrival of the consignments of gold from this country, We now have the explanation of the loss by the same bank of $18,520,000$ marks reported by cable on the 3 d instant, it being stated that it was sent to Russia towards the close of June to aid in meeting July interest payments and the amount from New York was probably ordered out to supply that demand.
There has been a further decline of half a cent par pound sterling in foreign exchange, due, it is claimed, mainly to the continued pressure of bankers' bills drawn by the arbitrage houses against outgoing securities, but in part to free offerings of fatures against cotton and bread. stuffs. The reduction was made on Tuesday, and the feature on that day and on the following day was a heavy tone for long sterling and a firmer feeling in short bills, this variation being attributed to the extension of a sterling loan. On Thursday the market became steadier. The Bureau of Statistics issued its trade statement for June thia week, the substance of which we give below for the six months for the three years. It will be noticed that the net merchandise movement in June left a favorable balance of $\$ 1,750,000$, but if we include gold and silver the total net exports in June were $\$ 11,150,000$.
forkion trade movement of the united states-(000s omitted,)

The foregoing also shows that up to July 1 we had lost 2 net amount of $\$ 34,367,000$ of gold, so that the total up to this date would be about $\$ 35,000,000$.

The bullion price of silver has remained unchanged during the week. Whether this is a mere temporary firmness or the starting point of the expected reaction, it is impossible to aay. It would seem reasonable that silver should for a time recover something of the late loss, for its decline has recently been hastened by every interest losing confidence in the metal, and the action of some of them cannot continue to have the same force much longer. We refer especially to the cuatom which has been growing constantly during the last half year, of anticipating payment for goods shipped to India and China by an immediate cover of exchange, although the account for the goods was not payable for many months. The merchant thus completed his transaction and did not leave the result of it subject to a possible further decline in silver. This has al ways been the custom to some extent, but if we suppose that 25 per cent of the shipments were so provided for formerly, and that now, in place of 25 per cent, 75 per cent is at once covered, one can readily see what an increase of exchange would, for the time being, be put on the market-that is, not only the amount of the bills maturing with the ordinary 25 per cent anticipated, but an additional 50 per cent of all shipments to those countries which, according to the usages of trade previously prevailing, would have been held off until the bills for the goods matured; and yet good judges estimate that these figures furnish about the measure of the extent of the change referred to, affording a mass of business pressing upon the market all of which must be done at low figures, and therefore especially demoralizing to rates of exchange. The mere recital of these facts, however, shows that there is not only a limit to the growth of this kind of operation, but that there must soon come a time when the current increase of bills caused by thus anticipating accounts will be followed by a corresponding decrease-a dearth made by this very anticipation; and if concurrently, confidence in silver should in a measure be restored, the old custom might return, and the reaction be quite material for a time.

This is the best hope we can offer for the poor white metal. No doubt also a price will aometime be reached at which production will decrease materially, but that is a slow process, and besides production is only one source of supply the vast stock in the world which is now discredited a
monay being the more depressing inflnence, and one that must prove increas!ngly burdensome ef ch succeeding year unless the demonetizing tendency now in progress is arrested by united action of the commercial powers. Mr. Giffin assumes that a settlement will be reached by some of the nations agcepting silver as their currency (and this is a farorite idea among the monometallists of London) learing tho gold to bo divided up between Eag land, Germany and France. Of courso his suggestion has reference to the Únited States, for our silver advocstes who would lower us to the lovel of Mexico have all along been the only hope of Europe. We do not undertake to say that this hope will not in part be realized, but we can afirm most positively, that even if through the tricks of Congressmen wo shou!d bo damped upon a silver basis, it would not lor a cooment relieve but increase the silver demoralizstior, for it would be only the signal for confusion in all industries here, and the beginning of a fight, certain to succeed, for a rehabilitation of our finsuces which would pot that metal in a far worse plight than it has ever been.

We could wish our Senators, before they set on the surplus resolution now before them, wonld seriously conaider in which way action by them will tend-whether to strengthen or to weaken confidence. It is reported that they propose to increase the amount fixed for the limit of the boldings. Of course that is some improvement on the result reached in the House. But is not the sotling of any limit at this particular time very unwiso-may we not oven call it hazardous? As we showed last week, this is a time When the danger eignal is Aying all over Enrope. During the last year every birmetallic nation has atrengthened its gold reserve. The Bank of France hold to-day over 270 mallion dollars in gold or about 72 million dollars more than 16 held eighteen monthe ago and about 45 mil lions more than it held a year ago. Besides, our Gavern. ment has a special source of weakness, for we are coining silver which the Treasurer cannot get ont, and juat to the extent of bis silver dollar accumalation his aurplas becomes unavailable. In view of these conditions we ask is it Wise, will it excourage or diecourage businces enterprice is it perfectly safe, to meddlo at all with the Treasury policy? We most earnestly beg our Senalors to give tho c juntry the benefit of the doubt-for can they fail at least to see thet any action by them is of doubtful wisdom ?-so that the people may dismise all anxicty and feel free to go to work developing the country's resources.

The anthracite conl trade, which of late weeks bas been in s rather unatisfactery condition, ought to improve now as the result of tho action of the managers of the COAl roads this week. The trouble has been not so much that the companies had disregarded the combination greement as that they had faled to observe it as closely es they should. For instance, sccording to the officisy atatement for the month of June, issued last Saturday by Mr. John II. Jones, tho accountant of the companies, the outpat for that month was $2,592,318$ tons, or 102,286 Lons more than in the came month of last year, which resulted in an increase of stocks at lide-water shipping points dnring the month of 86,285 tons. But the allotment ficr the month had been only $2,400,000$ tons, and hard this been observed, instead of an increase of stocks in the amount already given, there would have been a decrese of orer 100,000 tons, reducing the slocks to proportions more easily managed, and doubtloss removing the 100 prevalent complaint that the demand was poor and prices conatantly doclining. Indeed, it is difficult to see how prices conld follow any but a downward conrse in siew of such circumetances. The argument becomes all
the stronger when we remember that in Mry the allotmen had been exceeded by 253,639 tons, and in April by 194,726 tons, making an excess for the three months of no less than 640,683 tons-safficiont almost to wipe out the entire stocks now reported at tidewater. The difficulty was further increased by tho fact that as a result of this policy, somo bayera were induced to hold off from making immediato purchases in tho hope that atill lower pricea would prevail later on.

But this week the managers have adopted the heroic remedy. The allotment for August has been placed so low (for the period of year) that even should the com. panies, following tho tactics of previona months, mino somewhat in excess of ith there would still remain a considerable margin on the safo side. In brief, the allotment has been fixed at $2 \frac{1}{2}$ million tons, or threo-quarters of a million loss than the allotment for the samo month last year, and 523,910 tons below tho actual production for that month. At the same time-as an earnest apparently of their intention to compass the situstion-we havo the announcement that the selling prices of coal are to be raised 15 (c) 25 cents per ton with the lst of August. Unless therefore the companies themselves deatroy the promise which these facta afford, it would seem as if they were on tho path to a somowhat improved sitnation of affairs. The following are Mr. Jonea' figures in our usual form, arranged to ahow consumption, $2 s$ well as production and stocks. It will be noticed that the consumption continuea in excess of a jear ago-72,523 tons for Jane, and 1,583,344 tons for the half year - which is a favorable sigo, and bardly lends support to the reports that the demsind was poor.

Tho goneral conditions bearing upon railroad tramc and railroad rates continne of the most favorable character, and as a reault tho returns of earnings coming in from week to week aro of very encouraging kind. It is scarcely possible now to find a road with diminishing earnings, and where a loss is reported it is usaally the result of some special circamstance or condition. The amaller yielid of wheat in the Northwest may later on have aome effect, though it is alwayg to be remembered that ahould business continue to revive as now there must be an increaso in the volumo of general and miscellaneous traflic, and should the production of corn be reduced, as some fcar, by a continuance of dry, hot weather in the extremo West, that also might operato unfavorably on tho railroads; but these are all matters of the future, the influ. ence of which no one csn measure just now. For the present it is sufficient to know that rates and pools appear to be on a basis of unusual strength. In the Northwest rates wero reatored in full this woek, and the managors are at work on a plan for a pool of largo dimonsions. It is a matter of common remark that ao littlo difficulty ahould have boen experienced in adjusting affairs, tho dis puted points boing disposed of with mach less friction than any one supposed possible. As regards the trank lines, pool aflaira have hardly over beon in bettor condition, and the spirit of amity is everywhero manifest. There was a report at one time that the Grand Trunk lino 1 Canads was cutting ratea, the report baving its origin,
no doubt, in the large shipments of grain from Montreal investigation, however, disclosed that cail rates were being maintained, but that some of the ocean stesmers from the Canadian port had made a cut, which consequently operated in favor of the Canadian line on export business. Other evidence of the improved situation of trunk line affairs is seen in the statement that the unsettled pool -balances between the lines from St. Louis, so long a troublesome point at issue, have finally been adjusted, and also in the fact that the Lake Erie \& Western has joined the Central Traffic Association, thus ensuring complete harmony in the territory of that association.

The stock market maintains the characteristics for which it has of late become noted-that is, it resists pretty well efforts at decline, and responds readily to good news or influences of a favorable description. Bonds are in particular request, and speculation runs to these and low. priced stocks rather than to the high-priced share proper. ties. The outlook for an active industrial revival is considered good, and as in such revival the railroads cannot fail to participate confidence in their future is strengthened. There have been $\dot{\text { a }}$ number of occurrences having a bearing upon particular stocks, and these have had some effect upon the market-where they were favorable; where they were unfavorable they passed unnoticed. New York \& New England was stimulated by rumors of $a^{\circ}$ new line to New York from Danbury, though very little confidence was put in the report, it being felt that the possible gain from that source would be more than counterbalanced by the certain loss from the severance of amicable relations with the New Haven, snpposing that the management could be prevailed upon to substitute the Danbury phantom for the New Haven reality. Illinois Central has reduced its semi annual dividend from 4 to $3 \frac{1}{2}$ per cent, but as the company's earnings have suffered a decline during the half year, and the management is known to be very conservative, no one is disturbed by the reduction. Central New Jersey has been kept active by a revival of the old-time report that an alliance with the Baltimore \& Ohio was about to be perfected; this time rumor was definite enough to specify a two years' contract, terminal rates, etc., but it appears that only the Finance Committee has acted on the matter jet. In the case of the sale of the Reading collateral held as security for the payment of Jersey Central floating debt, it is stated that the Chancellor's decision has been reversed, the court holding apparently that before Read. ing's securities could be sold, it must be proved that Jersey Central was unable to pay the debt.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of gold and currency by the New York banks.

The above shows the actusl changes in the bank hold. ings of gold and currency caused by this movement to and from the interior. In addition to that movement the banks have lost $\$ 1,500,000$ through the operations of the Sub. Treasury. Adding that item to the above, we have the following, which should indicate the total loss to the New York Clearing. House banks of gold and currency for the week covored by the bank statement to be issued to-day. It is always to be remembered, however, that the bank statement is a statement of averages for the week, whereas the figures below should reflect the actual change in the condition of the banks as between Friday of last week and Friday of this week.

The Bank of England reports a loss of $£ 38,000$ bullion for the week. The Bank of France lost $1,850,000$ francs gold and gained $2,800,000$ francs silver, and the Bank of Germany since the last report increased $24,277,000$ marks, reflecting the arrival of gold from New York. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

Included in the above payments were $\$ 10,500$ in silver coin, chiefly standard dollars.

## MEXICO-RESUMPTION OF RAILWAY SUBSIDIES AND INTEREST PAYMENTS.

Though the telegraph has this week brought us news of another of those internal disturbances (or uprisings, as they are called) for which our sister republic is so noted, it is gratifying to be able to turn to the other side of the picture and note that Mexico is once more engaged in the effort to improve her credit and arrange ber financesthis time it is hoped with greater probsbility of success than has usually been the case. A year ago, it will be remembered, the situation being desperate, the Government felt it incumbent to take extreme measures to restore the financial equilibrium, and as a result a decree-a convenient mode of settling difficulties-was issued, suspending the payment of railway and other subsidies, reducing salaries of Government officials, and compelling holders of floating and other internal obligations to fund the same into a new 25 -million dollar 6 per cent loan. The holders of the external debt were not included in this comprehensive provision for relieving the country of the charges upon its revenues, only because the interest on this external debt had been in default for many years previously.

Now there are evidences of a determined attempt in the other direction of a restoration of the nation's creditslowly and gradually of course, but with an apparent purpose towards that end. It was declared from tho first that the provision of a year ago was merely temporary, and that as soon as sufficient time had elapsed to permit of the finances being placed on a sounder and more enduring basis the rights and equities of the nation's creditors might be expected to receive consideration Gen. Diaz has always been regarded as representing the best element in the Mexican character, possessel of true patriotism and intelligence ; and confidence in his integrity
did mach to keep alive in the friends of the Mexican people the hope that some day Mexico would rank among the fraternity of orderly, solvent nations. The fact that Gen. Diaz had taken such an heroic step was accepted as proof that the need was imperative, and that no other course was poesible-how imperative it was anyone who knows how heavily the revenues had been burdened with charges of every description, will easily understand. The fact that he now consents to an effort to meet the claims of creditors by a series of part payments, calculated at once to gain the confidence o! the creditors in the Government's upright intentions, while at the same time sug. gesting that the fature is to be discounted only graduallythis fact wesay is proof that in the eatimation of the President of the Mexican Repablic, the time has arrived when the country can asfely assume increased burdens again. That of conrse is a very welcome announcement to all those in any way interested in the welfare of our neighbor.

The evidencea of the new departure to which we sllude are (1) the partial resumption of subsidy payments to the railroads, and (2) the settlement of the external or Euglish debl. It is the 6rst of these, of course, that is of chiof importanco to us, since by resson of our large interest in two of the principal lines in Mexico we are directly concerned in tho resumption of tho railway subsidies. The lines wo refer to, are, as overy one knows, the Mexican Central and Mexican National, which indeed are the only roada of any consequence in the country barring the old Mexican Railway between Vera Cruz and che City of MericoOne of the inducementa offered to build these new lines was the aubsidies promised, which to mako them the more attractive were put in the form of a lien on the national customs revenues, and were thus supposed to be beyond the danger of default or lapso of payment. But when the pressure came they met the same fate as other charges. The resumption of payments now is to be gradual, and the first or early instalments, as is reasonable, are to be small, but the plan proposes a ateady increase in the per contage till finally the fall maximum is reached. It is obviously more desirable to havo the contributiona amall and sure than large and doabtful.

The full percentage to which the Moxican Central is entitled is 8 per cent and that of the Mexican National 6 per cent, making 14 per cont together. At present (for tho six months from July 1, 1896, to January 1, 1887), the Mexican Central is to have only threequarters of one per cent and the Mexican National three-quarters of that, or say 56-100 of one per cent. From the lat of January to the lat of July, 185\%, the Mexican Central is to have one per cent and the Moxican National threequarters of one per cent, and thereafter there is to be an increase each siz months of one per cent on the Central and threequarters of one per cent on the National. The complete figures on the latter not having been published belore, and some doubt having been raised with regard to those for the Central, we have taken paina to obtain the official atatements for both companies, and have arranged them a below.

Here we have a protty rapid increase after the year 1887. From an average of $1 \frac{1}{2}$ per cent in that year, the Central rises in 1888 to $3 \frac{1}{2}$ per cent, in 1880 to $5 \frac{1}{2}$ per cent, in 1890 to $7 \frac{1}{\frac{1}{2}}$ per cent, and in 1891 to 8 per cent; and the National increases from $1 \frac{1}{8}$ in 1887 to $2 \frac{5}{8}$ in 1888, to $4 \frac{1}{5}$ in 1889, to $5 \frac{\pi}{6}$ in 1890, to 6 per cent in 1891. Or taking the two roads together the encashment will be at the rate of $2 \frac{5}{3}$ per cent of the customs revenue in 1887, $0 \frac{1}{8}$ in 1888, $9 \frac{5}{8}$ in 1859, $13 \frac{1}{3}$ in 1890, and 14 per cent in 1891; thus the maximum percentage is not reached till Give years hence. In relerence to the amounts that these percentages will yield to the rosds and take from the Gov. ernment (supposing that the scheme does not miscarry), it is somowhat difficult to determine. The sum will vary of course as the customs receipts do, and as to theso customs receipts there is no definite or reliable information. The Mexican Financier, however, recently estimated the probablo customs revenue for 1887 at 17 million dollars, and for the parpose of showing how the subventions to these two roads would increase on the basis proposed we may as a purely arbitrary matter take the Financier's figures, giving us the following result.

| On basic of $817,000.000$ Cutoms | Mexican Central. |  | Mexin National |  | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | P.e. | * | P.c. | * |  |
| $1 \times 3$ | 14 | 255,000 | 13.4 | 101.850 | 148,250 |
| 1848 | 3\% | 305,000 | \% | 416.250 | 1,041.25 |
| 189\% | 04 | 205,000 | 4\% | 701,250 | 1,030,85 |
| 1800 | 318 | $1.857,000$ | 8* | 20,250 | 8,231,200 |
| 201. | 8 | 1 1,sco,000 | 6 | 1,020,00 | 2,380,000 |

The total required for these subsidies would thus be less than half a million in 1887, but over a million in 1888, over $1 \frac{8}{8}$ millions in 1889, nearly $2 \frac{1}{4}$ million dollars in 1890 , and 28 millions in 1891. As these are Mexican silver values, the yield to tho companies in equivalent American money would of course be less.
It is at this juncture that the settlement of the English debt is annonaced from London. In this settlement, of course, our peoplo have no direct interest, and yet in view of the simulcaneous resumption of the subsidy payments to the railroads, it is an event of considerable importance. As bearing upon the restoration of Mexican finances, it is really of more importance than the other circumatance, for so long as these obligations remained in default, the financial repute of the nation must needs Lave continued low and her credit poor and doubtful. Moreover, by reason of our connection with the railroads in question, we have a rital concern in knowing what the burden may be on account of this Mexican debt held sbroad which the Mexican Government has now undertaken to carry.

It is perhape well to say that this is not the first time that it has been attempted to adjust interest and coupons on the English debt. In 1883 it seemed as if an agreement had been arrived at, and would be satisfactorily carried through ; but, for reasons which we need not stop to detail here, it was not perfected. A similar attempt in 1884 also miscarried. The present arrangement is not as savorable to the bondholders as that submittod in 1883. Then it was proposed to resume at onco sull payment of interest at 3 per cent, and, besides, tho back coupons were to be exchanged for a somewhat larger percentage of their nominal amount than now. But Mexico was "fush" then, as the result of the influx of American capital in the building of railroads, and the ides was that this exceptional state of things would not only bo continued but be improved upon. It was a belie! natural enough in the circumstances, but one which the experience of the last few years has shown to havo been delusive. Now only one per cent per annum is to be paid for the first year (covering the July 1886 and the January

1887 coupons), and theamount is to be gradually increased at the rate of one half per cent per yoar, till the maximum of 3 per cent is reached in 1890.
There are really only two principal issues of this English debt, the $£ 10,241,650$ of bonds of 1851 and the $£ 4,864$, 800 bonds of 1864, the latter however representing in large part simply coupons (July, 1854, to July, 1863,) of the former bonds funded in 1864. The 1864 debt, as a result, is to be converted into the new consolidated debt at the rate of only 50 per cent of its face value. The original or 1851 debt is not to be scaled at all in principal, but the 60 per cent of accumulated coupons (no interest has been paid on the bonds for 20 years) is to be exchanged at only 15 per cent of their nominal amountthat is, only $£ 9$ is to be allowed for the $£ 60$ back interest, 80 that the total of principal and interest of a $£ 100$ bond is to be capitalized at $£ 109$, and on this latter sum interest is to be paid after the manner mentioned above. In addition to these two main classes of bonds, there are some very minor issues, namely, the bonds of the deferred debt of 1837, unpaid certificates of the conversion effected in 1851, and the certificates issued by the Messrs. Baring for the anpaid third of the coupon of July 1866; these are to be exchanged at 20 per cent. In reference to the 1851 debt, it is contemplated ultimately to exchange the principal of the same into the new consolidated debt as well as as the coupons, and the Mexican Government is to have until December 31, 1890, in which to effect the exchange. Prior to that date the Government retains the right to purchase any amount either of the old or the new bonds at their market price, or to redeem the bonds by drawings at 40 per cent of their par. After that it is to have the right to buy at the market price or redeem at 50 por cent. In regard to the resumption of interest payments, it is stated that General F. Z. Mena, the Mexican representa. tive, has had the money for the July coupon on the 1851 debt at the rate of one-half of one per cent ( 10 shillings per bond) in bank for some time, but that the actual distribution of the cash will be deferred till the receipt of the official ratification of the scheme from Mexico. The con. version of the back coupons of this 1851 debt (as well as the principal of the 1864 debt) is to be begun as soon as the new bonds are ready for exchange, and the operation is to be completed within a year and a half from that time. It is also agreed that the Mexican Government shall not issue more new bonds in London than those called for under this arrangement, excepting only enough to meet the expenses of the settlement, which latter, however, it is provided, shall in no case exceed $£ 200,000$.

But the question of chief interest to us is, in what position does this leave Mexico with reference to total debt and the charges on the same during the next few years. In speaking of the debt we mean, of course, the recognized debt, which is composed of the English bonds as above and the forced loan of 25 million dollars issued a year ago to take up the internal or floating debt. The Imperial or Maximilian debt was repudiated from the first. The amount of the English debt may be calculated as follows : The principal of the threes of 1851 will remain unchanged at $£ 10,241,650$; the $£ 6,144,990$ coupons of the same at 15 per cent will add $£ 921,748$ to the amount ; the $£ 4,864,800$ 3s of 1864 at 50 per cont will add $£ 2,432,400$ more, giving altogether a total of $£ 13,595,798$. Assuming that the expenses will reach the full $£ 200,000$ allowed, this total would be increased to $£ 13,795,798$ and the con' version of the minor debt issues will probably raise the amount to 14 million pounds. Suppose, however, we take it at 15 million pounds. We would then have an external debt (roughly) of 75 million dollars and an internal debt
of 25 million dollars, or a total debt of just 100 million dollars. The internal debt bears 6 per cent interest, and therefore calls for an annual payment of $\$ 1,500,000$. The 15 million pounds external debt on the terms proposed would call for $£ 150,000$ ( 1 per cent) in 1886 (coupons July '86 and Jan. 87); £225,000 ( $1 \frac{1}{2}$ per cent) in 1887; $£ 300,000$ ( 2 per cent) in 1838; $£ 375,000$ ( $2 \frac{1}{2}$ por cent) in 1889; and $£ 450,000$ (3 per cent) in 1890.

Accepting the foregoing as a correct statement of the interest requirements on the debt, and adding the probable call for the railway subsidies previously given, we have the total charges on both accounts from year to year, till the maximum is reached in 1891. With reference to the interest on the English debt, we reduce pounds sterling to dollars on the basis of five dollars to a pound, but have made no allowance for the depreciation in the value of silver. The interest on that debt of course is payable in gold, while Mexico is on a silver basis, and as silver depreciates in value, it takes more and more dollars to pay a given amount of interest in gold. But as no one can tell what changes in the monetary policy of the globe may take place within the next few years, and as it is not intended in these calculations to present exact results, which in the nature of things are impossible, but merely to afford an idea of the comparative changes during the next few years as the result of the new policy in the particulars outlined above, we have discarded that factor in the problem altogether. Thecall for the purposes named will be as follows.

| l'early requirement. | English Debt at $£ 15,000,000$. | Internal Debt at $825,600,060$. | Mex. Cent.and Mex. Nat. Subsidy. | Grand Total. |
| :---: | :---: | :---: | :---: | :---: |
| 1887. | 81,125,000 | 81,500,000 | \$410,230 | \$3,071.230 |
| 1858. | 1,500,000 | 1,500,000 | 1,041,250 | 4,041,280 |
| 1880. | 1,875,000 | 1,500,000 | 1,038,250 | 5,011,250 |
| 1800. | 2,250,000 | 1,500,000 | 2,231,850 | 5,981,250. |
| 1891. .......... | 2,250,000 | 1,500,000 | 2,380,000 | 6,130,000 |

This provides for an increase of about a million dollars a year on these items, beginning with a total charge in 1887 of a little over three million dollars, and reaching in 1891 somewhat over six millions. The amount does not seem large even at its maximum, and yet for a nation like Mexico it evidently is not small, especially in vien of the fact that it has not been a very unusual thing in the past to have the ordinary expenditures for carrying on the Government exceed the total income. But since the decree of a year ago a policy of rigid retrenchment has been pursued, and evidently Gen. Diaz and his Government think that payments on the scale laid down can be made with a continuance of that policy. As to the precise amount of surplus that the Government expects to have at its disposal, or the extent of its income, there are no authentic or official figures, and when it comes to making an estimate, one guess is probably as good as another. We therefore do not attempt to cover that point.

## THE GRAIN MOVEMENT AND TRUNK LINE EARNINGS.

Notwithstanding the higher transportation rates in force this year, the receipts of grain at New York during June were heavier than a yoar ago, and notwithstanding these higher rates also, the Eastern trunk lines, as a whole, have lost but little grain tonnage compared with the corresponding period in 1885, while the gain by the canal route, considering the great advantages that that route has had by reason of the comparatively high through rates by rail, has been insignificant.

In June, 1885, trunk line affairs were in the lowest deptes of demoralization. It was just before the West Shore settlement, and rates on grain from Chicago to New York were bardly at any time during the month above 13
cents per 100 lbs , and many contracts were made at as Low a figure as $10 \frac{1}{2}$ cents per 100 lbs . This year we have had an official tariff of 25 cente, which has apparently been faithfully observed. Naturally, one would think that with this great disparity in rates, there would be a wide difference in the extent of the movement in the two years. Instead of that, the difference is so small as to be scarcely worthy of notice, the total receipts by rail in June, 1886, having been $6,031,529$ bushels and in June, $1885,6,276,884$ bushels. Evidently, therefore, the effects of the higher tariff in this month have not been what many supposed they would be, snd evidently slso the trank lines did a wise thing in not reducing the schedule one fifth (from 25 cents to 20 cents) as at une time proposed.
But if the railrosds have not lost much trsficic as the result of the bigher charges, certainly the cana! mast hsre gained decidedly-so one might suppose. Of course, the rate by water in - messure follows the rate by rail, but with the tariff by rail at 25 cents, there ought to be greater room for competition by the water route- $\boldsymbol{r}$, rather, the competition ought to be more effective-than with the tarifi st lees than half that figare. In point of fect the canal has gained, bat not in the degree that one migat expect. On the total of $5,723,400$ bnsbela by canal last year, the increase this year is only 507,150 bashels, giving the canal 50 per cent of the total movement by rail and water, against 16.70 per cent in June, 1885that is, aboat 3 per cent more of the rotal movement than - year ago. The only deduction perminable from thie, however, is that the railroads have fared bettor in main. taining the volume of their trafic than there was reason to imagine they would. It doee not follow that the water roate is losing any of its forco as a competitor to the railroals. In reality the cansl carried, as utated, over one hall of the total movement-or to pat it in another way, it delivered more than all the rosds combined; one reason no doubt why the gain in percentage compared with last year was no scmall is that the percentage a year ago (despite the extreme low rail rates then prevailing) had been to grest.
Forthermore, the main specialty of the canal would appesr to be wheat, since much of this comes sll the way from Chicago, permittling of the combined ase of the lake and conal routo (all water), and of a total of 4,932,212 busbels of whest recoived hero during the month by sll routes no less than $4,803,200$ boshels came by canal-that is, nearly 98 per cent-which does not argue that the canal is losing its bold. On corn the cass is different. Much of this we may suppose is gathered by the Western connections of the truak lines in districts where stl water transportation is not posuble-say fo the valley of the Ohio-and the railroad getting it at the initial point carriea the cereal all the way to the sesbosrd. Even here, bowever, the canal has $1,348,300$ out of a total of $2,407,320$ bushels. Thas the canal's proportion of the movement in any given period depends much apon the kinds of grain composing that movement; it is intereating, therefore, to note that besides the $4,932,212$ busbels of wheat, snd the 2,407,320 busbels of corn forming part of the 12,457,722 bushels recelpts of all kinds during the month, flour contributed the equivalent of $2,280,955$ bushels and corn meal the equivalent of 135,204 busbels, all of which in both cases was delivered by railrosd, while osts contributed $2,180,400$ bushels, barlay 625 bushela, rye 46,503 bushels, pens 44,600 bushels, snd malt 429,893 bushelo--slmost sill theee corning by rail. Bat be the component parts what they may, the one fect romsins, that on the movement as a Whole the railroads have not suffered any notoworthy
diminution in traffic, as compared with last year, notwithstanding the higher charges in force. When we come to the figures of the individual roads there sre of course many and marked changes, but these have no necessary reference th the difference in the tariff rates between the two years. In the following table we give the smount carried by each road, and its proportion of the whole, in June of the last six years.

Here we note much the same results as in the month preceding, namely first that the Erie beads the list with a larger amount and a larger percentage than any other road, larger even than the New York Central, and secondly that "various railroads" again take an unusual proportion of the whole, indicating that the Lohigh Valles outside of the truak line pcol is still actively at work. As to the Erie carrying more than the Central, that of course is rather sarprising, but lest it be considered that it is an exceptional condition of things never occurring bofore, we may say thst in this very moath the sarne thing happened both in 1834 and in 1883. If, bowever, we consider the West Shore as forming part of the Central, and add its percentage to the Central's own, then we hsve s total of 18.13 por ceat, or nearly two per cent more than the percentage of the Erie. The Lackeswanna, like the Erie, bas gained on last year, though its percentage is not very large this time, being only 4.09 per cent, agsinst 3.08 per cent in 1835. The Pennsylvania has lost very decidedly, its percentage being smaller even than that of West Shore, namely 4.52 per cent; last year it had 8.18 per cent, and in 1882 as much as 17.07 per cent.
These figures, however, all cover only a single month, and may consequently be exceptional in some respects. It will therefore be better to examine the totals for the period from the first of Jsauary, which will this time possess the more interest that June completes the balf year. The following is a comparison on this balf year back to 1831.

This shows that the total movement for the half year has been well maintained, there beling only two years in the aix given when the total was much heavier. Yet under the competition of the Lackawanna and the Lehigh Valley, we find that even the Erie has a alightly lower percentage than in 1885 , which thus gives it a smaller ratio than in any of the other years, while the Central and the Pennsylvania have both lost very largely. The ratio of the Central is only 24.97 per cent, against 32.24 per cent in the half year of 1885, and the Pennsylvania'a percentage is $8 \cdot 57$, against 14.73 , the proportion of both roads being the smallest among the years given. "Various railroads" had 6 per cent of the movement this year, against less than one per cent in 1885, and the increase is undoubtedly the result of the Lehigh Valley's efforts to get a share of the business. The West Shore had only 5.93 per cent of the total, againat 10.20 per cent last year; but if we add the West Shore and Central together, we get 30.90 per cent for the two roads, on which basis the Central does not make such an unfavorable comparison with its percentage for the earlier years.

As to the higher rates obtained, we may take the aver. age through rate on grain this year at full 25 cente per 100 lba., Chicago to New York, and for last year at not above 12 cents. On the basis of these figures it will be seen that there is room for a large falling off in the volume of traffic without in any way diminishing the amount of earnings. Taking one-balf of the rates given as representing in each case the proportion of the through rate received by the Eastern trunk lines, and assuming (what is very nearly correct no doubt) that the grain was carried for the whole of the distance ketween Buffalo and New York, and allowing also for the difference in the weight of the buahel as between the different cereals-on that basis we get the following as the approximate earnings from this grain tonnage to New York in June this year and last, and the aix monthe ended with June, on the five leading roads.
approtimate earnings from tirbovgi grain tonnagr.

It is a aignificant and atriking fact, illustrative of the beneficial effects of the higher rates, that though the West Shore handled 100,000 bushels less than in June last year, the Pennsylvania 440,000 bushels less, and the New York Central 649,000 bushela less, every one of these roads had, according to the above, larger earnings from this traffic this year than in 1885. The gain on the Central reaches $\$ 32,000$; on the West Shore $\$ 20,000$, and on the Pennsylvania \$6,00n. The Erie which had both a larger tonnage and heavier rates, more than doubled its earnings of June 1885, which were only $\$ 55,000$, but are now $\$ 127,000$, or $\$ 72,000$ more. The Lackawanna has also more than doubled its receipts from the traffic, which stand at $\$ 32,000$ for June 1886, and at only $\$ 11,000$ for June 1885. It is worthy of note, too, that on the five roads together the gain for the month reaches $\$ 151$,000 , equivalent to an increase of over 80 per cent. For the six months only the West Shore and the Pennsylvania are behind their earnings of last year, and neither of them very largely either, considering that the one carried $2,700,000$ bushels lesa of grain and the other almost
$4,000,000$ bushels less, while $4,000,000$ bushels less, while on the other hand the earn. inga of the Erie and the Lackawanna have increased over $\$ 200,000$, the latter the result of both higher rates and

AGGRESSIVE RUSSIA.
Russia rarely fails to take advantage of any opportunity which is offered her to push what she considers to be her own special interests. She has the advantage over most of the Powers of knowing precisely what she wants ; and when she does move, it is never without premeditation, and rarely indeed except in harmony with a well-defined purpose. Her eye seems fixed on Britain more than upon any other of the Western Powers ; and it is curious to notice how she seems to feel her own hands liberated whenever those of her great rival are tied. It is not forgotton how Russia in 1870, encouraged by the con. fusions which had been created by the Franco-German war, and particularly by the isolation of Great Britain, repudiated the Black Sea clauses of the Treaty of Paris, thus virtually undoing a large part of the work accomplished by the Crimean War. Again, and without any word of warning to any of the Powers, when the British Govern. ment and people are preoccupied with a great domestic controversy, she sets aside one of the most important provisions of the treaty of Berlin, and proclaims Batoum to be no longer a free port. It may be that in itself consid. ered the closing of the port is a matter of comparatively little importance. But it is not to be looked at from a merely commercial standpoint; and when it is viewed in connection with the general conduct of Russia in regard to Eastern affairs-with the Czar's known sentiments regarding Bulgaria, and with his recent manifesto to the officers of the Sebastopol fleet-it reveals not only a per. aistent purpose, but a disregard of the obligation of treaties fitted to bring conferences and treaties into world-wide contempt.

In the original treaty of San Stefano, Batoum was claimed by Russia; and it was to be held exclusively as a Russian port. In hia first famous dispatch of April 1, 1878, Lord Salisbury, in setting forth the objections entertained by the British Government to the above-named treaty, contended that "the acquisition of the important harbor of Batoum will make the will of the Russian Government dominant over all the vicinity of the Black Sea." It was contended on the other hand by Prince Gortschakoff that Lord Salisbury exaggerated the importance of Batoum. It was desired, he said, by Russia, because there was no other port in the district available for her comrerce and security. When the Berlin Conference assembled, the question was discussed at length; and the compromise arrived at and embodied in the 59th article of the Treaty is as follows: "His Majesty, the Emperor of Russia, declares that it is "his intention to constitute Batoum a free port essentially "commercial." It was only with reluctance Lord Beacons. field accepted this compromise. He would have preferred that the fortress which had been captured by Russia should, while constituted a free port, have remained in the hands of Turkey; but he finally consented, regarding it as a happy idea that, at the end of a great war, a disputed fortress should be converted into a free port and a commercial depot for all nations. At the same sitting of the Conference, the question of the Dardanelles Straits was also discussed; and Lord Salisbury declared, as is recorded in the 14th Protocol, that "if the acquisition of Batoum had been maintained under conditions which would menace the liberty of the Black Sea, England could not have taken the engagement toward the other European Powers to inderdict to herself the entry of that sea. But Batoum having been declared a free and commercial port, the English Government will not decline to renew their engagements under the modifications
imposed by the decisions already taken at the Congress.' It thus appears that the maintenance of the status quo regarding the Straits-" the order of things established by the Declaration of 1856, and by article II. of the Treaty of London of the 13th of March"-was made conditional on Batoum being declared a free port by Russia. That this was the understanding is rendered all the less donbtiol by the language in which Lord Salisbary closed the discus. sion. He "understood that Batoum was to be a com. mercial port, and therefore accepted in principle the status quo ante for the Straits."

From this presentation of the case, it will be gathered that there has been no imperfect or doubtful understanding among the Powers as to the character of Batoum as determined by the treaty of Berlin. It was to be a free commercial port; and on condition of being a free commercial port, Fingland came under the obli. gations of the arrangement of 1871 , regard. ing the Black Sea-an arrangement substituted at the instance of Rassia for the stipulations of the treaty of Paris, 1856. Two things result from this-one that in proclaiming the port of Batoum no longer a free port, the Czar has not been acting in ignorance; the other that the British Goverament would bo justified in abrogating tho Black Sea treaty, and placing Russia again under the conditions which followed the Crimean war. It is gratifying to know that Lord Roseberry, Mr. Gladstone's Foreign Secretary, has spoken with sufficient plainnees on the sub. ject, and has protested againat the conduct of Russia as a "flagrant violation of tho Treaty of Berlin." It is a noteworthy circumstance that Lord Salisbary is about to retarn to power when his own handiwork is in peril, if not actually deatroyed. It will be intereating to notice how he will act in the premises. He is not a man given to backing down; and it is bardly conceivable that under the slight regard which Russia has shown for the treaty Powers, and for Great Britain particularly, he will be silent It is not likely that Lord Salimbury will allow himaelf to be dragged into any violent extreme ; bat tho may 10 present the case as $t 0$ draw forth a vigorous joint protesh-such a protest as Russia cannot disregard.

## IMPORTS AND EXPORTS FOR JUNE AND FOR THE SIX AND TWELVE MONTHS END. ING WITH JUNE IN 1886 AND 1885.

## [From our own correspondent.]

London, Ssturday, July 10, 1886.
It was a foregone conclusion that any varistion in the condition of trsde during the past week was almost an impossibility. Men's minds have been too much occupied with the political struggle, and the momentous issues involved, to give more than an average amount of attention to commercial affairs. It is felt by those most cloaely interested that in the malntenance of the unity of the empire lies our commercial strength, and the attempts to looson those ties are naturally viewed with dismay by many. That under the circumstances husiness should have remained quiet, has attracted no surprise.

Meanwhile, however, signs of improvement, which have occasionally asserted themselves, are becoming more pronounced. The iron trade certainly romains in a depressed condition in splte of an extended demsnd on American account. The market is suffering from overproduction, and until some soheme can be devised whereby production and consumption can be made to assimilste more closely than they do at present, a certain amount of disorganization must be experienced. A Wolverhampton correspondent, referring to this question, re marks that "there appesrs to be more reliance now placed upon some reduction of stocks being brought about either by arrangement or otherwise, as a further largeaddition to stocks has mede an increase of $171 ; 000$ tons in the first six months of the jear. The atock on hand now aggregates a quantity exceeding fire months' make, and is well on towards 700,000 tons." The difficulty will have to be grsppled with in some way unless manufacturers are prepsred to put up with permanently low prices, which will of course mean continued low wages. In spite of reported growing activity in railway construction both in Americs and India there are no aigns that the demand for iron and steel in the near future will exhaust our capsbilities of production; therefore, however much specuIstion may influence the value of the raw materials, it is reasonable to suppose that the price of the manufactured article will still be depreased.

But the sluggishness noticed in iron and steel is not refiected in woll or cotton. In the former considerable animation is apparent. The publio sales of colonial produce are progressing with even greater briskness than they opened, and a further advance has taken place in prices. Some Anstralian descriptions are now fully 4 d . per lb. dearer than in April, snd in Cape sorts the improvement ranges from $13 / 2 \mathrm{~d}$. up to 31 . per lb, and the market at the timg of writing is at its best. The trade of the country generally at the present moment is unquestionably in a sounder condition than it has been for some time past. There is no speculative excitement nor are values at all inflated. On the contrary the volume of operations is restricted, and is founded on the principle of amall profits. But these profits have a real monetary value and do not exist merely on paper, as is frequently the case when we aro enjoying the doubtful and fleeting prosperity of a speculstive "boom." When the political excitement has died out, the formation of the new ministry been decided upon, and the crops gecured, we msy look for a further development of trade; and it is a satisfaction to know thst we have not long to wait for the time when the realization of these hopes should commence.
The distribution of the consol dividends has further swollen the already plethoric bslances and has incressed the weakness of the money market. A supersbundance of capital has been offering, and the demsnd has remsined as slack as ever; hence quotstions have continued to recede. Day-to-day loans have been offering as low as $1 / 2$ per cent, but without attractiag borrowers, and the discount rate for three months' bills has been weak at /s per cent, some transactions being reported as low as $13-16$ per cent. The weekly Bank of Eigland return exhibits the changes usually noticed at this season. Dividend payments have reduced the total of public deposits by $£ 2,355,095$, but as a setoff to this there has been an increase of $£ 2,746,658$ in other deposits. The reserve has been reduced to
 stock of bullion, which now amounts to $£ 21,123,894$, there has been a reduction of $£ 195,530$. The proportion of reserve to liablities has been reduced from $37 \cdot 50$ to $35 \cdot 36$ per cent. In all the Continental cities money appears to be about as little wanted as with ourselves, and apparently we have entered upon a period of protrscted inanimstion, unless the trade demand should speedilr become brisker.

The rates for money have been as follows

- 11 1-10

The following return ahows the position of the Bank of England, the Bank rate of discount, the price of consols, the price of middling upland cotton and wheat, and the Bankers' Clearing House return, compared with the three previous jears:

The Australasian colonies are arein borrowers. Tenders will be received during the ensuing week for a Tasmanlan 4 per cent loan for $£ 1,000,000$, at the minimum of 99 per cent. The New South Wales Gevernment is also in the market, this time requiring $£ 5,500,000$ in $31 / 2$ per cent inscribed stock, re-paysble in 1021 at par. The minimum price is 91 per cent.

The Board of Trade returos, just published for June and the half-year, are more eatisfactory than many recent issues. From an examination of the statistics it would appear that the condition of trade has distinctly improved, and we may probably witness a jet mere decided movement when the election hindrances hsve ceased to exist. The exports of British and Lrish produce and manufactures show an increase for the month of $£ 818,757$, reducing the decrease for the six months to $£ 1,038,826$. In the imports thero is a falling off of £ 185,043 for June, owing principally to the lower value of cereal produce, and a loss on the six months of $£ 10,036, \%$ \%

The totais have been as foliows:

- Imporis Poreign- - Erporis Brilish $4-$ Re-arporis Foneign-

From an examivation of the accompanying statistics, it will be seen that our trade with the Uaited States is an expanding quautity. Oar indebtedness on account of cereal produce and cotton has increased, and in some of the articles of import heavier arrivals are reported. This naturally augments the capacity of America to purchsse our manufactures. Tho export business a'so appears 10 bo quietly extendiag, the statistics relating to hardwares, de., showing up batter than for some time past, and aitogether the position seems to be improving. In colonial and lorejgn wool on American accoust there seems to bo a falr business doing, a demsnd liaving sprung up recently at the sales. Tho export during June was $3,277,118 \mathrm{lb} \mathrm{\%}$, valued at £0; inis, against $3,531,17 \mathrm{t}$ lbs., valued at $£ 153,22$; last year. For the six months, however, the export was $24,019,219$ lbs., gainst only $16,681,583$ lbe. in $1855^{j}$, the values belag, respectively, $2400,93 j$ and [623,0:0.
The following shows the imports from America during June, so far as emmerated is the Board of Trade returns :

Below ars the exports of British and Irish proluce to the United States, as far as can bo gathered from these official statistics, during June

The return of the Cieveland Ironmasters' Association for June shows that the total make of pig iron during the month was 202,000 tons, of which 131,000 Lons consisted of Cleveland iron. The make was 8,918 tons less than that of May. The total stocks of the district now amount to BS9,155 tons, an in crease of 10,413 tons during June. There are 91 furnaces blowing, of which 65 are making Cleveland iron.
Arcording to stubbs' Weekly Gazelte there mere 252 bills of anle registered In England and Waies during the week ended July 8, being 8 less than for the corresponding week of lastyear. The total to dat 3 was 6,211 -an jacrease of $1 \% 5$. The number of failures for the weels was 09, an increaso of 18 , and to dats 2,4\%8, an lacrease of $19 \%$.
The grain markets have been more or less nominal. Wheat cannot be sald to have varied in valus. The fine weather at one time threatened to further accentuato the weak tone of the previous week, but the conflicting nature of later cable adrices from America, and the hardening tendency of the Chicago and New Fork markets, have not been without a certain amount of Influence here, although they have failed to promete anlmation. The lalter part of the week in consequence witnessed some slight improvement in the tone of the market. Any decisive re-action is, however, impossille, without some appreciable improvement in the demand, ard of that there are no present sigas. Should tho reports of damage to tho American crops prove correct, the trade will no doubt speedily change for the better, but pending their veriflcation the market can hardly be expected to vary much from its present position. In the existiag state of statistics, however, asy agricultural disaster would certainly have a very speedy and decisive effect. In the quantity of whent and flour aflont io us, there is a falling off compared with last year of about 475,000 quarters, and the American visibie supply of Wheat is, roughly, $1,000,000$ quarters less now than then. The stocks also are diminishing. Those in London at the beginnlng of Juiy were 357,189 quarters, being about 81,000 quarters less than on tho lat of April last, and about 4,800 quarters helow the aupply held on July 1st last ycar, when the imperial average price was 33s, per qusrter.
The following refers to the atocks of tho under-mentioned articles in London at the given dates:
Apr.1. July 1. July 1. $\quad$ d $\quad$ 189. J. July 1. July 1.

The following return shows the extent of the importa of cereal produce into the United Kingdom during the first forty-four weeks of the scason, the salea of home-gromn produce, the average prices realized and other itema compared witis that season

гмровтв.

Supplies available for consumption in forty-four weeks (exclusive of atocks on September 1):

139th Call for U. S. Bonds.-The Treasury Department has resued the 139th call for bonds, under date of July 19, 1888, retiring $\$ 4,000,000$ bonds on Sept. 1, 1886. These are three per cent bonds, issued under the act of Congress approved July 12, 1882, and numbered as follows:
$\$ 50-$ Original No. 133 to original No. 135 , both inclusive.
si00-Origlinal No. 1,730 to original No. 1, N12, both incluelve
S500-Original No. 787 to original No. 824 , both inclusive.
$\$ 1,0$ o-Original No. 5,524 to original No. 5,962 , both Juclusive.
$\$ 10,000$ Orlgiaal No. 12,612 to orlginal No. $12,9 n 5$, both inclusiv aud original No. 23,738 to original No. $23,7 \pm 7$, hoth inclusive. Total, $\$ 4.000,400$.
Greeu Bay Winona \& St. Panl. -The Farmers' Loan \& Trust Company has issued a circular to the bondholders of the Green Bay Winona \& St. Paul Company containing the followiog proposition: If the bonaholders will agree to fund the three coupons in default on the first mortgage bonds into a five per cent bond, running until 1916, the trust company will pay the coupon due August 1 in cash. The three defaulted coupons amount in the aggregate to about $\$ 108,000$. The funding would enable the trust company to turn the property over to the railroad company.
Anction Sales.-The following were sold at auction recently by Messrs Adrian H. Muller \& Son, 12 Pine Street :

WALI, STMEET. FMIDAY, Jalf B3, 1SVG-5 P. M.
The Money Market and Flaanclal Sitaatlon.-The financial markets have shown nearly the same phases this week which have been observed for some time past, namely, a strong undercurrent, though the rolume of business has been moderate.

There is no change in the strong sentiment which is pushiag up the prices of all classes of investment boads, and week by week it is found that one bond after another is climbing up, until there are very few left which pay 8 per cent on the purchase price, and nearly all of these aro tainted with some defect, either of present troublo or future uacertainty, in the anirs of the company issuing them.

The new railroad mileage under construction in the Uvited States is considerable but It is to be remarked that dearly all of it is onder the direction of old aad strong corporations, Which are able to lose money for a few years in making adrances to pay the interest on new bonds, for the sake of gettlag valuablo feoders for the busines of their main lines. Ind the railroads of $18: 2$ and 1833 beca constructed in the same way, the crop of defaults in 1873 and 1891 would aever have occurred.
Reports of injury to cura by drought have probably been mnch exaggernted for apeculative cffect, as there appeared to be an adrance io corn in progress at the Chlcago Boand, ad at the same time some selling of granger stocka in New York. It is not unlikely that the proces of afternately bulling atocks and gralo for a few points nise may bo kept up for come time in the
uture, as it has becomeone of the favorite apeculative methods.
The open market rates for call lown duriag the week on stock and boad collaterala have ranged at 1 104 per ceat, and to-day al 24 per cent. Primo commercial paper is quoted 83 @ per cent.
The Bank of Eogland weekly rentement on Tburalay ihowed - loss in apecie of $£ 89,000$, and the percentage of reserve to Lisbilities was $399 \cdot 10$. agniast $301-16$ last week: the discount rate was unchanged at if per cent. The Bank of France lost 1,8;0,000 france la gold axd gained 2,800,000 france io silver.
The New York Clearing Ilouse banks, in their atatement of July 17, showed an increase in surplus reserve of $\$ 449,475$, the tneal surplu being $\$ 13,610,925$, againat $\$ 13,101,450$ the previous week.

Exchange.-Sterling exchange has been oaly moderately active, the derasad beíng atill very limited. IRates have agaia Wcskened, as a result of the morement of securities to London and a coasequent free offering of securits bills. Posted rates were reduced \& cent on Tueadey to $480 \frac{1}{2}$ and 489 . Commercial blls are in amall aupply.

To-day the ratea on sctual busiaess were as follows, viz.
 Cablea, $4871048 \%$. Commercial blls were 48404841 Contioental bills were: France, 518 @ 510 and $616 \frac{1}{0} 05167$ relchmarks, 9510951 and 951095 ; guilders, 4010401 and $404840 \%$

The mics of leading bankers are as follows :

The following were the raten of domentic exchange on New York at the ander-mentioned cities to-day: Sarannab, buying
par, selling 1 © $\frac{1}{2}$ premium; Charleston, buyiag par@t premium, selling 3-16बt premium; NewOrleans, commercial, $\$ 1$ premium, bank, $\$ 150$ premium; St. Louis, 25 discount; Chicago, $25 @ 40$ discount.
Ualted States Bonds. - There has been more demand than usual for Government bonds the past week, and as a consequence the market has shown some activity and prices have improved. Another call for 3 per cent bonds was issued, retiring $84,000,000$ of them Sept. 1.
The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks.
The closing prices at the N. Y. Board have been as follows:

|  | Interest Periads. | July 17. | July 19 | July 20. | July 21. | July L2. | July 23. |

## 

State aft Railroad Bonds. - The feature of the market for State bonds has been the largo transactions in Virginia 6s deferred and trust receipts; $\$ 247,000$ of the former sold at $11-12\}$ and $\$ 529,000$ of the latter at 10$\}-13 \frac{1}{8}$. Other sales have not been solarge, as follows: $\$ 52,500$ Louisiana consol. 48 at 707-771; 104,000 South Carolina 0s, non-fundable, at 6-77; $\$ 13,000$ North Caroliaa 0s, 1010, at 124$\}-1251$; $\$ 9,000$ do. consol. Is at 08-90; $\$ 47,000$ Tennesseo settlement 3 s at 74:ift: $\$ 12,000$ do. compromise at 71 $; \$ 1,000$ Alabsma Class C, at $103 \%$, and $\$ 4,000$ do. Class $A$, at 1051.
The railroad bond market has been quite active and strong the past week, and the demand for good boads continues. Foreign buying has been a feature of the market, being quite prominent io Erie securities, which have been very actlve and advancing. Other conspicuously strong honds have been the Teras \& Pacific issuea, and also the Missouri Kansas \& Teras 5s and Os. Other classes have not been acarly so active as these, but the tone of the general market has becu stroag, and many boads have slightly improved.
The closing prices and range of a few leading bouds sre snacred:

## - Hut price: no sale.

Hallrond and MIscellancous Stocks.-Duriog the early part of the past week tho stock market wss excessively dull, and although busineas improved somewhat later, thero has been ao great activity and the total transactlons of tho week are-couparatively light. The movement of prices, too, has not been great for the majority of stocks, and the changes for the week are in most cases unimportant. The geacral tendency has, however, been bullish and in spite of the prevailing dulness there is an undercurrent of atrength which prevents any material loss in values and causes a recovery on every favorable development, however trifing. Another feature in the market which has recently exerted considerable influence is the foreign buying, which was most noticeable in Erie stocks and bonds and Lake Shore during the past week, causing as improvement in the stocks named.
The reports and rumora of the week have generally been of a favorable nature (except the drought in some parts of the Weat), though not sufficiently so to cause any material adrance. Weatern rates have been restored according to the agreement entered into last week, but this was, of course, anticipated, and had little anfluence on prices. The cosl stocks, especially Lackswanna, have been conspicuous, and the news in regard to them is that the August output of coal has been restrieted to $2,500,000$ tons and the prices advanced 15 and 20 cents over the rates at which coal has actually been sold of late. Jersey Central further improved, on the contiaued rumors of an arrangement whereby Baltimore \& Ohio is to use the tricks of the former road lato Jersey City for a period of two years. New York \& New England has been one of the strongest and most active stocks on the list ; the buying was very brisk on a report thst a road was to be built to Danbury givigg tho New England road sn entrance into New York. Today, Friday, the market was quite dull, sad prices were geacrally a thade lower, the Northern Pacifics being dmong the atroageat of the list.

NEW YORK STOCK EXCILANGE PRICES FOR TEEK ENDING JULY 23, AND SINCE JAN. 1, 1886.

*Those are the prices bld and asked; no salo was made at the Board.

'The Intestors'Supplement contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonde of Railroads and other Compantes. It is published on the last Saturday of every other month-viz., February, April, June, August, October and December, and is fur nished without extra charge to all regular subscribers of the Cbronicle. Extra copies are sold to subscribers of the Crronicle at 50 cents each, and to others than subscribers at $\$ 1$ per copy.

## GENERAL INVESTMENT NEWS.

Atchison Topeka \& Santa Fo-Chicago Kansas \& Western. The stockholders of the Chic. Kan. \& West. R. R. Co., which has claarge of the construction of a large extent of new mileage of road connected with the Atchison Topeka \& Santa Fesystem, have reorganized the company by releasing a number of local directors along the different rontes, and substituting Eastern parties who are more directly interested in the Santa Fe enterprises. The new board of directors is as follows: E. W. Kinsley, H. S. Burdett, G. H. Burdett, E. J. Thomas. J. F. McKim A. F. Luke and D. L. Gallup of Buston; D. W. Finney of Neosho Falls, Jacob Mulvane, J. P. Griswold, P. J. Bunebrake, J. R. Mulvane and G. F. Parmelee of Topeka.

Hoston lloosac Tnnnel \& Western.-The traffic of this rad shows a decided improvement. and coupon No 4 of the debenture bonds, due September 1, 1885, amounţing to $\$ 50,000$, bas been called for payment.

Buffalo N. Y. \& Philadelphia.-The gross and net earnings for June, and from October 1 to June 30, were as follows:
 - Expenses in $1685-6$ inctude $\$ 170,000$ spent for renowais and bettermente.
Central of New Jersey-Philadelphia \& Reading. -The announcement was made (and created much surprise) that the New Jersey Court of Appeals had set aside the decision of Chancellor Runyon ordering the sale of the Reading first and aecond s-ries 5 per cent bonds, pledged as collateral to secure the parment of the floating debt of the Central Railroad of New Jrreey. The reversal of Chancellor Runyon's decision leaves the matter in a curious position. It will be remembered that when the Jersey Central was leased to the Reading the condition was mace that Mr. Gowen should pay Jersey Central's floating debt, for which there were meantime pledged as co!lateral $\$ 1,000,000$ of first series and $\$ 2,000,000$ of second series Reading 5s. The floating debt was not paid, and Chancellor Runyon last spring ordered the sale of the collateral at auction 10 satisfy the debt. Mr. Gowen protested, but the Chancellor refused to alter his order, and the bonds were put up at auction in New York, and the $\$ 1.000,000$ of first seriea $5 s$ were knocked down to Mr. Wharton Barker of Philadelphia, at an average price of $533 / 4$. The $\$ 2,000,000$ of second series were aleo offered, but as only 25 was offered, all except a small lot were temporarily withdrawn. The Reading Railroad Company engaged A. G. Richey as counsel and endeavored to have the sale eet aaide. According to the decision of the New Jersey Court of Appeals, the sale was improper and eliould not have been made, but as Mr. Barker was a bona fide purchaser at auction sale, it is difficult to see precisely what will be the effect of the decision, so far as his bonds are concerned.
Ceniral 0hlo.-The stockholders of this railroad company, Belaire to Columbus (not the Ohio Central), have made arrangements to fund at $41 / 2$ per cent the originsl 6 per cent bonds issued for the coustruction and equipuent of the road, amounting to $\$ 2,500,000$. The new bonds will be issued at once and an option given the holders of the old 6s to exchange them for the $41 / 2$ per cent bond. The new issue will run for forty-four jears. The following members of the Board of Directors were elected: Samuel Spencer to take the place of Robert Garrett, David Lee, in place of A. B. Crane, private secretary to Mr, Garrett ; Join R. Hall, Quaker City, Ohio.
Chicago \& Eastern Illinois. -The gross earnings for the year ended June 30, 1885, were $\$ 1,600,000$. For the year ended June 30, 1886, they will be about $\$ 1.720,000$, or an increase of $\$ 120,000$. The accounta for ten months show actual net earnings of $\$ 85,000$ in excess of those for the same period of 1885. It is a very conservative cstimate that the increase in net earnings for the remaining two months will amount to $\$ 15,000$, making a total increase for the year of $\$ 100,000$, or $\$ 800,000$ as against $\$ 700,000$ in round numbers for 1885 . The fixed charges, including rent, interest and taxes, are in the close vicinity of $\$ 600,000$. On this basis there was earned for the stock last year $\$ 103,000$, and this year there would be $\$ 203,000$ for the $\$ 3,000.000$ stock, or neariy 7 per cent. Last March a dividend of $21 / 2$ per cent was declared, it being the first for four years. Friends of the company expect another $21 / 2$ per cent in Sentember.

Daytou \& Irouton.-Earnings for May in 1885 and 1886, and since Jan. 1, in 1886, were as follows :

|  | --- | - | Since Jan. |
| :---: | :---: | :---: | :---: |
| Grnas earn | $18 \div 6$ | \$1:3,393 | $1,188 .$ |
| Exponses. | 19,169 | 11,998 | 95.497 |
| Deffeit. | \$7,586 | sur. $\$ 1,394$ | \$5.947 |
| Charges | 1,415 | 1,029 | 10,006 |
| Defleit. | \$0,031 | sur. \$365 | \$15,954 |

IIfienton \& Texas Central.-The parties in control of the Houston \& Texas Central Railrosd have offered a definite proposition to the bondholders, which differs a little from the proposals formerly made. The first mortgage bondholders are asked to fund one more coupon on their bonds than the eecond and junior bondholders, which is probably intended to serve them right for teing first mortgsge men, and endeavoring to get a lien ahead of other interests. The intercat on the first mortgage bonds is to be reduced to 0 per cent, and in consideration for this the principal of these bonds, which falls due in 1891, is to be extended for ten reirs, but to be subject to be called in at any time ot par. If the bonds fell due on July 1, 1891, they would in all probability be called in and paid off on July 2, as there could be no difficulty in the company's negotiating $\$ 6,000,000$ bonds at 4 per cent as a first li n on the main line of the Houston \& Texas Central Railroad and its land grant. The holders should not be misled by a subsequent clause referring to the purchase or calling in of bonds at 110 with proceeds of land sales; this does not apply to the provision that the first mortgage bonds shall be "subject to call," which means subject to be called in and paid off at par. The following is the substance of the agreement now offered to the bondholders: All bonds and coupons to be deposited with the Central Trust Company of New York. The unpaid coupons on the 1sts, to and including January 1, 1887 ; on the consolidated morigage main line, to and including October 1, 1886; on the consolidated mortgage, Waco division, to and including November 1, 1886 ; and on the general mortgage, to an 1 including October 1, 1836, shall be funded into debentures of the Housion \& Texas Central Railway, principal and interest guaranteed by the Southern Pacific Company. The amount of the coupors computed at the reduced rates of interest hereafter to be borne by the bonds. The debentures shall run for ten years and shall bear 5 per cont interest. The first mortgage bonds, all divisions, shall be stamped that they hereafter bear 6 per cent int rest, payable semi-annually, gusranteed by the Southern Pacific Company, and the first mortgage main line and Western division shall have their maturity extended ten years. subject to call. The consolidated mortgages, both main line and Waco divisions, shall be stamped that the interest has been reduced to 5 per cent, guaranteed by the Southern Pacific Company. The general mortgsge bonds shall be stamped that the rate of interest has been reduced to $4 \mathrm{p}^{\mathbf{r}}$ cent guaranteed by the Southern Pucific Company. The Houston \& Texas Central Company agrees to waive all claims in regard to sales of land as contained in the original bond, and agrees that the trustefs shall call for redemption every six montbs an amount of first and consolidated bonds equal to the moneys from land sales, to redeem at 110 and interest the firsts and 105 and interest the consols. Bonds so bought shall be canceled. The agreement alaall not be valid unless signed on or before September 1, 1886, to the amount of $\$ 7,500,000$ of the firats, $\$ 3,300,000$ of the consola and $\$ 2,700,000$ of the general mortgages, and holders of coupons on the firsts to the amount of \$300,000.
Indiana Bloomington \& Western.-Suit has been filed at Springfield. O., by the altorneys of the old Columbus Springfield \& Cincinnati Railroad against the Indiana Bloomington \& Western Road for $\$ 251,675$ back rental, covering a period from April 1, 1882, to date. The suit is brousht in the name of the Cincinnati Cleveland \& Sandusky and the Columbus Springfield \& Cincinnati roads, aud its obj sct is to secure judgment for the amount named.
Maine Central.-The gross and net earnings for May and for fire months of the year, reported for the Chrosicle, are as follows:

Mexlcan National. - A copy of the plan of reorganization of the Mexican National Railway Company was issued this week by the Bondholders' Committee, composed of Spencer Trask, John De Ruyter, Henry Amy, Samuel B, Parsons, Charles J, Canda, William E. D. Stokes and August Rutten, of New York; Selah Chamberlain, of Cleveland, Ohio, and George Burnham, of Philadelphia. The bondholders who accept the plan are to deposit their bonds with the Central Trust Company, receiving receipts therefor. The plan proposes to provide means for completing the International Liue, including the road to the Lampazos coal fields. and acquiring the present rolling stock by creating $\$ 12,500,000$ prior lien 6 per cent bonds, assenting bondholders to liave preference in subscribing to these bonds issued in the course of conetruction. The right to redeem these bonds at par and accrutd interest is reserved. The present $\$ 21,330,000$ first mortgage bonds are to be exchanged into eecurities, to be issued in two series, each old bond gettiug half in each series :
"A" serles to bear 6 per cent interest, curaulatire, payable when earned.
"B" erries, hearing interest up to 0 per cent, non-cumulative, parable after Series a hare received their interest.

The oventue interest on the oid first mortgage bonds is to be provided for as the judgment of the commitice directs.
The prior lien bondholders and new Series $A$ and $B$ bondholders are to hold control of the nroperty until there shali have been earnedi and paid on Series Batcurities 6 per cent for two consecutive years:
The fourth and fifili clauses of the plan are as follows
Fourth-To protect the hoiders of the recurtites fo to be issuat againat any alintion of their reapeetive intereats, the Rakes blaill bo United to the raquirements of this Misn, and to that end tho rallway or olhere, in referemce 10 any thee other than the intios or parts of lines Sallito nnd Sum Misurt, nud the roan to the coal tields-10 all about

$\$ 1.810$
23,510
\$ 45,360 65,041

$\$ 59.185$ lant.- One of the sencations of this week was the snnouncement that \& New lork connection for the New fork \& New Eogland would shortly be made. The entrance was to be effected over the tracks of a new road to be called the New liork Danbury \& Bowton Railrod. The firat notlce of the construction of euch s road was the fling io the County Clerk's ofllces in White Plaina and in this cliy of a mortgage to the American Lana \& Trust Company to secure an iesuc of $83,000,0006$ per cent hoods payable in 1926, to be issued by the company in connection with the construction and equipment of a double track. standard gauge, railroad from the New lork city limits to Dantury, adistance of fifty-four milea.
Mr. John C. Short, of the American Finance Company, is mentioned as the principal financial "promoter" of the enterpri
known.

Set York \& Net Fagland.-The Suprema Court of Connecticut has decided thst the road may pay dividends upon its pecticut rock of of,000,000. The pecial act of the Connecticut Legialature in 1891, authorizing the fasse of this atock, allowed this, but the directors hesitated because of a general law of she State prohibiting payments of any dividende by corporations whose capical might be impalred. The question whether the general law was in thin casesuperseded by the apecial law was recently arqued before the Supreme Court in New Ifaven. The judges met in Hartford this week, and decided that the dividends may bo paid.
Uregon Short Lise. The earniogs for May and the first fire moathe of the jear were as follows:

Philadelphla \& Readins-Central of New Jerser. At Trenton, N. J., the Court of Errors and Appeals, seversed the order of the Chancellor authorizing Receiver Little, of the Central Railroard, to sell the Readiag bonds pledged as coliaterai to secure the piyment of the Central's fiaating debt.
St. Josepls \& St. Lonls.-In St. Louis, July 22, a meeting of the stockholders of this road was held for the purpose of roting on a proposition to issue \$?25,000 first mortgage bonds to provide means for improving and equipping the road. The lice 2876 miles, extending from St. Joseph to Lexington, and Was formerly operated by the Wabash under a lease. At the meeting there were present Vice-President Winslow Judson, John R. Lionberger, I. W. W. Finiey of New York, E. W. Pattison and others. Altogether two-thirds of the stockholders, or 7,000 shares, were represented. The meeting uvanimously roted to issue the bonds and ratify the saie of the eame already made by Vice-President Judson to Massachusetts partien. The effect of this action will bo to enable the company to thoroughls equip the road with new rolliug stock, to lay such parts insteel rails as are not jet so laid, to increase the terminal facilities at St. Joseph, and to improve the earning capacity.
St. Lonis Arkansis \& Texas.- A report was circulated in the Street that the Stock Exchange Committee on Securities had refused to iist the bonds and stocks of the St. Loutis Arkansas \& Texas road (the reorganized Texas \& St. Louls). This repmrt, the Herald states, is not correct. "The application for listing these accurities was made just before the committeo adjourned for the summer vacation, and the matter simply stands over until they meet apain in September. The first snd second mortgane bonds are fifty-year six per ceat gold bonds, and the Street does not seem to question their being worththe price they are selling for, viz., 96 and 42 regpectively. The traffic of the road is expected to be greatly benefitied by the change to the standard gauge. This work is in progress and will be completed in September."

At St. Louis, July 22, the stockholders of this company held a special meeling, Is was unanimously voted to auchorize the issuance of first mortgage bonds to the nmount of $\$ 4,000$ per mile for the purposo of widening the gauge and remodeling the zolling atock so as to conform to the standard gauge. This amount fa nothing new, but only a part of the original issur of $\$ 13,000$ per mile provided for in the srtleles of reorgalzation. The amount of $\$ 0,000$ per mile has partially been and is being expended in the purcliase of the road and paying off the obligations of the court and receiverslip. The thrit mortgage now amounts to $\$ 13,000$ per mile in sho total, and the amount to be used ie $\$ 2,950,000$, all of which goes into tho radbed, motive power and rolling atock. The work of widening the gauge and getting ready for the change hes been In progreas eome time, and over 500 miles are ready to push the rails apart. Over 1,100 miles have been contracted lor, and the necesary changes to locomotives aro being made as fast as poeslule. In Xew York there have been issued $\$ 1,500$, 000 of these dew first mortgage bonds, all of which have been oold to a byudicato represented by Woerishoffer \& Co. and others. The boods were sold at about par aud the money was paid Into the Central Trust Company Thursday. The compeny has very liberal bids for the remainder necessary to complete tho wideaing of the gaugo, \&c., but waits for better offers, expectlag an advance in the price of the bonds.
Southern I'aclfic Compans.-The following is a comparaIfve statement of the earnings, expenses and fixed charges of this company for May, and from Jan. 1 to May 31. The total mileage is 4,693, aguinst 4,678 last year.

-Includes Interest, rentaln, Cent. Pac. guarantee, tayes and U. 8. dues.
Texas \& Paclfic.-Gen. I. J. Wistar, Chalrman of the Philadelphla committee of reorganization, publishes a notice that his committes holds depesits of 00 per cent of the Consolidated, 78 per cent of the Terminai, and nearly haif of the New Orleans Paclic bonds. This cominittes will continue to roceive deposits of all claszes of securities untll Sept. 20 next. reservior the right to closo at any earlier date if deemed advisable.
The Crimonicue has pointed out from the beginning that the Wistar pian was so lormed as to effect a reorganization of the Texan \& Pacific Railway in the intereat of Mr. Jay Gould and the Missourl Paclic, as holders of floatiog debt. In order to do thit it was necessary to secure the co-operation of the consolidated mortgage bondholders, and they were offered unususily liberal terms. These bondholders have overy reason to take the beat terms they can get, and they have naturally
acceded to a proposition which offered them a bonus of 20 per cent in eecond mortgage bonds. But the Terminal mortyage bonds claimed to have assented are probably only thoese pledged to the Mriseouri Pacific for floating debt, which have really never been issued and will be canceled when the floating debt is paid. No class of recurity-holders has objected more atrenuonsly to the Wistar plan as inequitable than some of the bouna fide holders of the Terminal bonds, of which only about $\$_{8}$ or 70, ,vop were actually sola. But granting all the assents claimed, there would still remain unasssonted the entire issuee of Iand Mortgage bonds and scrip $\$ 10,500,000$; Rio Grande Dlvision bonda $\$ 13,000,000$; Terminal morttage bonda held by the public, about 8600,000 ; N. O. Division benda (eay 60 per cent), about $\$ 4,000,000$, and all of the stock, $\$ 33,000,000$, making a total of $\$ 00,100,000$ of Texas Pacific bonds and stock unvilling to accede to the Wiatar propositions. Surely, a plan conceived with fair regard to all interests would obtain ${ }_{\text {a }}$ better support than this.
One fact is quite conspicuous in regard to the assents claimed, namely, that no stock is included, showing prettv conclusively that $\mathbf{M r}$. Gould and hia friends are no longer holders of Texas \& Pacific stock, and an election of directors at the present time, it it could be held, would leave the control of the company in other hands.
Dou, Jones © Company report to-day that Mr. Robert Fleming who repreests London interests, gays that in his conference with the Philadelphia committee he proposed as a solution of the matter the purchase of the consolidated mortgage bonds at 95 and interest, being about par fatt. a price which was considered satisfactory by an influential portion of their committee and by leading bankers of Philadelphia. On Friday he returned to Philadelphia, saw Gen. Wistar and informed him that arrangements could at once be made for carrying this proposition into effect, provided the reorganization was placed in satisfactory shape, and Mr. Fleming understood that the matter would probably end in that way. But afterward Gen. Wistar and certain of his committee came to New York and had a conference with their principals here, and no reply has since been made to Mr. Fleming's proposition.
Mr. Fleming said: " The radical difference between the Wistar plan and the other committee's was not one of perentages, but of the control of the property. It was well known that whatever value there was in the road, after the consolidated mortyage bonds, lay first in the bonds of the New Orleana Pacific and Rio Grande divisions, and then in the stock, and there the control should lie. But instead of that, under the Philadelphia plan, the control goes to the Missouri Pacific, as holder of the biggest block of stock, and its interest would of coures be to pay the fixed charges and nothing more. As to the value of the property, the Philadelphia committee themselves have reported that when the road was put in order by an expendture of $\$ 4,000,000$ it could be operated at a maximum of 55 per cent. This on the minimum earnings of any of the past four years would leave $\$ 2,700,000$ net, but, not withstunding, they propose to turn over the control to the Missouri Pacifio on a fixed charge of only $\$ 1,150,000$, the balance in income bonds, the Missouri Pacific at the same time going on making extensions to divert into their own hands a iraffic which now belonge to the Texas Pacific." Mr. Fleming hoped to have a reply from Gen. Wistar very Eoon.
The statement originating in Philadelphia that the Wistar Committee now controls all of the property of the Texas Pacific, excepting the track of the Rio Grande Division, has prompted the New York Committee to call attention to the fact that the official report of the company shows the equipment of the Rio Grarde division to be 1,324 engines and cars out of a toal of 3,144 belonging to the entire road, the proportion appertianivg to the Rio Grande divisioion being grater than etther the Eastern division or the New Orleans Pacific. The equipment is covered by the Rio Grande mortgage, and is inventoried and filed with the court. The committee also assert that the claim of the Wistar Committee that it will be able to reerganize the company because it has succeeded in securing control of the Eastern and part of the New Orleans divi. slons, is unfound d , for these ressons: 1st. Under the laws of Texas the railroad can only preserve its franchiees by being sold as an entirety. 2d. The United States charter is an entire instrument and cannot be divided. 3d. The laws of Texas forbid the consolidation of Texas railroads with those of other States.
Vicksbnrg Slureveport \& Pacific.-This company has arranged with the Central Trust Company of New York to exchange the Income bonds and stock for a new bond issued for $92,500,000$, secured by a first mortgage on the land and a third morigage on the railroad. The Incomes and stock are exchanged at the rate of 50 per cent and 25 per cent reapectjvely for the new security. The new bond bears date January 1,1886; is due January 1,191 . No interest is paid for two years, then three per cent is paid for three yeare, four per cent for three years, and five per cent thereafter, principal and interest payable in gold.

Wabasis St. Louls \& Paclife. - In the suit for foreclosure of the Chicago division, Judge Gresham heard argumenta in Chicako, July 20, on a motion to have a separate receiver appointed. Judge Gresham said that for the present he would merely order the St. Louis receivers to report their method of moing business with the Chicago division.

## The Commercial thimes.

## COMMERCIAL EPITOME.

Friday Niaitr, July $23,1880$.
There is hardly a feature of trade calling for special refer ence, except that improved accounts from growing crops have caused depression in speculative values of many leading staples of agriculture, and permitted the better progress of regular trade. Labor troubles have ceased to be the cause of anxiety with manufacturers, though outbreaks of minor significance are reported. Congress will probably adjourn in a week or two, without accomplishing anything beyond routine legislation; bills affecting the revenue, the currency, and kindred matters are not likely to pass.
There was, early in the week, a decline in prices of lard for futurn delivery, the effect of ales to realize and the weakening of epeculative action, but in the past few days sympathy with the corn market has held values nearly steady, and the close this afternoon is at 6.76 c . for August, 6.83 c . for September, $6 \cdot 70 \mathrm{c}$. for October and 6.60 c . for November. Spot lard has continued dull and drooping, closing to-day at 6.35 c . for prime city, $6.721 / 2 @ 6771 / 2 \mathrm{c}$. for prime to cholce Weatern and 7 c . for refined for the Continent. Pork has been quiet and eaaier, but closes steady at $\$ 11371 / 2 @ \$ 1175$ for new mess, $\$ 1175 @ \$ 1275$ for family and $\$ 1325 @ \$ 1450$ for clear. Cut meata have been dull; pickled bellies, 65 @ ${ }^{6} \mathrm{c}$., pickled hams $11 @ 113 / 4$ c. and shoulders $6 @ 61 / 4 \mathrm{c}$.; smoked hams, $121 / 2 @ 13 \mathrm{c}$. and shoulders $71 / \mathrm{c}$. Beef is dull at $\$ 8$ for extra meas, $\$ 850$ for packet per bbl. and $\$ 12 @ 13$ for India mess per tieree. Beef hams are dull at $\$ 2150 @ \$ 22$ per hbl. Tallow has been active at $4 c$. Stearine is firm at 8@81/4 c, and oleomargarine is in demand at $6 @ 61 / 8 \mathrm{c}$. Butter ss lirmer at $14 @ 20 \mathrm{c}$. for creamery. Cheese has been dull, and closes easier at $53 / \nsubseteq 8$ c. for State factory* The swine slaughtered at the principal Western town from March 1 to latest dates numbered 3,340,000, against 2,960,000 for the corresponding period last season. The following is a comparative rummary of aggregate exports from October 26 to July 17 for two years

$$
\text { 1885-6. } 1884-5 .
$$ Pork...............lbs. $31,411,200$ 39,465,200 DeG. $8,054,000$

 Coffee on the spot has been weak, with fair cargoes of Rio down to $91 / 2 \mathrm{c}$, with mild grades being taken freely at nearly full prices, including Padang at $171 / 2 @ 181 / 2 \mathrm{c}$. Rio options have also declined, and to-day were further depressed, closing this afternoon with sellers at $7 \cdot 65 \mathrm{c}$. for August, $7 \cdot \% 0 \mathrm{c}$. for September, 7.75 c . for October and November, 7.80 c. for December and January, and 7.85 c. for February. Raw sugars have been freely offered, causing a slight further reduction in values; fair refining is quoted at $43 / 4$ c., and centrifugal 96 -degrees test at $53 / 3 \mathrm{c}$. Refned sugars easier. Molasses is lower at $173 / 4 @ 18 \mathrm{c}$. for 50 -degrees teat. Teas have been quiet.
Kentucky tobacco has been more active, the sales being 300 hhds., of which 175 for export; luge quoted at $4 @ 51 / 2 \mathrm{c}$. and leaf 6@11c. Seed leaf has been brisker; sales for the week are 1,550 cases, as follows : 400 cases, 1885 crop, Pennsylvania Havans, 15@17c.; 100 cases, 1884 crop, Pennsylvania Havana, 101/2@111/e.; 150 cases, 1883 crop, Pennsylvania leaf, 101/2@ $121 / 2 \mathrm{c}$.; 400 cases, 1881 crop, Pennsylvania leaf, $131 / 2 @ 1 \%$ c.; 100 cases, 1885 crop, Little Datch, $91 / 2 \mathrm{c}$.; 200 cases, 1835 crop, Ohio, private terms; 100 cases, 1884 crop, New England, $16 @ 20 \mathrm{c}$.; and 100 cases sundries, $5 @ 28 \mathrm{c}$; also 300 bales Havana, 60 c.@ $\$ 105$, and 200 bales Sumatra, $\$ 130$ @ $\$ 160$.
Crude Petroleum certificates have been active for speculation; the increased flow of wella has been offset by an improved trade and freerexport, and certificates close this afternoon at 66@ $661 / 80$.; crude in bbls. quoted at $6 @ 63 / \mathrm{c}$., ; refined in bbls. 7c. and in cases $85 / 909 / \mathrm{c}$.; naphtha, 81/4c. Spirits turpentine has been firmer and to day advanced to 35 c . Rosins are rather dearer for the pure gradees, but common to good strained is still quoted at $\$ 1 @ \$ 105$. Wool is dull, Hops are unsettled.
Pis iron certificatea remain nominal, and there ia some irregularity in the interior markets. Steel rails for early deli very are held higher. Block tin has heen unsettled, and to-day a buoyant rpening, whih rales at $22: 2 \overline{\mathrm{c}}$. for September, dropped to 22 c . spot and early futures. Copper is dull at $0 \cdot 90$ c. for lake. Lead is quoted at $4 \cdot 85 @ 5 \mathrm{c}$. and spelter $43 / 8 \mathrm{C} 43 / 2 \mathrm{c}$.
Ocean freights have been more active and grain rates have improved, with shipmenta to-day at $23 / 4 \mathrm{~d}$. to Liverpool, $31 / 4$ @ $3 \% / 2 \mathrm{~d}$. to London. 2d, to Glasgow and $31 / \frac{1}{4}$ d. to Antwerp. Petroleum charters included crude to Cette at $22.101 / 2 \mathrm{~d}$., refined to United Kingdom 2s. 3d. and to German Baltic 2s. $71 / 2 \mathrm{~d}$.

## COTTON

Friday，P．M．，July 23， 1886. Tres Mopenent of the Crop，as indicated by our telegrams from the South to－night，is given below．For the week ending this evening（Julv 23），the total receipta have reached 6，741 bales，against 9.471 bales last week， 12,904 balea the provious week and 13.510 bales three weeks aince；making the total receipts since the 1st of September， $1885,5,589.612$ bales，agains1 $4,721,835$ bales for the same period of $1884-85$ ，showing an Increase since September 1． 1885 ，of 568.297 bales．

The speculation in cotton for future delivery at this market was very dull and prices were drooping and unsettled，until the opening of Wedneeday＇s business．The reports of the con－ dition and drospects of tho growing crop were much more farorable，and Liverpool became dull and weak．But on Wednesday afternoon the speculation for the rise was renewed， encouragel by the rapld reduction of stocks and tho liberal scale on which consumaption was maintained．Liverpool made a much better report on Thureday，giving a buoyant opening to tho market，the adrance amounting to 111010 points from the lowest Aguros for the weok．Then camo a reaction under sales to realize．A partial recovery last evening was followed by a freah decline to－day，under a sharp dacline at Liverpool and rumors of a failure at Manchester，but there was a steadier closing．Cotton on tho spot was dull，but quotations were without change untll yeaterday，when there was a nominal adrance of l－16c．To－day the market was dull and heary， but quotations were unchanged at 90.16 c ．for middling uplands．
The total eales for forward dolivery for the week are 346，700 bales．For immedlate delivery the total sales foot up this week 4，089 balen，including 2，213 for export，1，839 for consumption， －for speculation and－in transit．Of the above，－bales were to arrive．The following are the official quotations for aach day of the past week．

market and baleg，
The total salea and future deliveries each day during the week aro indicated in the following statement．For the con－ renience of the reader we also add a column which shows at a glance how the market closed on same days．

The dally dellvorthe given abovo are sotusills dellvereat the day previoun en that on whloh they are revortol．
Tit Salma and Paicrs of Futures are shown by the follow． ing comprehensive table．In tho itatement will be found the
daily market，the prices of salce for each month each day，and the closine hids．in addition to the daily and total sales．

TמR V181BLE SUPPLY OF COTTON to－night，as made up by cable and telegraph，is as follows．The Continental stocks，as well ss and consequently all the European figures are brought down to Thursday evening．But to make the totals the complete fgures for to－night（July 23），we add the item of exports frem the United States，including in it the exports of Friday only．

## ＊Corrected．

The above totals show that the old interior stocks have decreased during the week 3,010 bales and are to－night 38,634
bales more than at the same period last year. The recerpts at
the same towns have been $3,63 \%$ bales more than the same the same towns have been 3,637 bales more than the same
week last year, and bince September 1 the receipts at all tre $t$ swns are fis. 6.33 bales more than for the same time in 1884-5.

| \%... | 2, max | 8.101 | n,34 | 50.150 | 34.80 | A19101 | -. | 003 | 8,817 |

The above statement shows-1. That the total recelpts irom the plantations aince September 1, 1385, are $5,333,5 \% 2$ bales: In $1081-95$ were 4.750 .410 bales: In $1883-81$ were $4,737,458$ bales.
2. - That, although the recapts at the outporta the past week were 6 ift bales, the actual movement from plantations wae only $3,3: 7$ bales, the balance being taken from the stocks at the intarior towns. Last year the recelpts from the plantationa for the same week were 003 bales and for 1894 they were - balen.

Ayount or Cottus in Siont Jult 23, -In the table below we give the recejpts from plantations in another form, and add to them the net orerland movement to July 1, and also the takings by Southern aplnners to the same date, so se to give suberantiallv the amount of cotton now la eight.

|  | 1895-88. | 1888-85. | !883-84. | 1832-83. |

 anmpared with $1843-34$ to $312,0.37$ balen and the decrease from
Whatmer Reforts by Thazorapm,-Thete has been turthet improvement in the westher condition in those sectlons of the South where rains had been exceselve; consequently crop sccounta are more favorahle and the fielde are being rapidly cleaned. Our reports from Texas are of an excecdingly satisfactory character.
Galceston. Texas. -The westher has been warm and dry all the wrek. The thermometer has averaged 84, ravging from 78 to 91.
Indlanoln, Texas.- It has raiued on one day of the week, the rainfall reaching eleven hundredtha of an inch. Cotton is dolng nleely. The thermometer has ranged from 76 to 07, averaging 84.
Palestive, Texas.- We hare had delightful showers on threedass of the week, exteading over n wide aurface. The rainfall reached one inch and aisty- ive hundredths. The cotin crop promiaes to by immense. The average thermometer 83, higheas 90, lowest 72.

Ifuntsollle. Texar. - We have had rain on one day of the week to the extent of eeven hundredthi of sn lach. The crop is dereloping promiaingly. The thermometer has averaged so, the higheet lejng 90 and the lowest $\% 7$.
Dallrs. Texas. -The weather hes been dry and very hot during the week. Cotion ls growing finely. The thermometer has averaged 89 , ranzing from 73 to 107.

Austín. Texan.-The cutcon crop consinues to develop fromisingly. The thirmometer has ranged from 72 to 99 ,
averaging s\%.
Luffing, T'excs. - We have bud warm and very hot weather
all the week. The crop is good but neods rain. Arerage ther mometer 90, highest 106 and loweat 77.

Columbia, Texas.-There has been one fine shower during the week, the raiafall reaching sixtr-two hundredths of an icch. Crops are spleadid, and unless caterpillars come too a00n we will make more cotton than can ever be picked. The thermometer has averaged 85 , the highest being 97 and the lowest $7 \overline{0}$.

Cuero, Texas.-The weather has been warm and dry all the reek. Cotton is doiag nicely and picking is about beginning. The crop will be enormous. The thermometer has averaged 88, ranging from 73 to 103.

Brenham, Texas.-There have been delightful showers on three days of the week, the rainfoll reaching ninety-nine hundredtha of an inch. Crops are aplendid. The thermometer has ranged from 70 to 104 , areraging 88.
Bellon, Texas.- It has mined splendidls on one day of the week, the rainfall reaching one inch and forty-eight hundredths. The reather is very hor. The crop is doing finely and the indications are that it will be one of the best ever grown. Arerage thermometer 87, highpst 106 and lowest 72.
Weatherford, Texas.-We have had no rain all the week and are veeding it very much, though cotton is holding up well. The weather is terribly hot. The thermometer has averaged 20 , tho higheat being 109 and the lowest 78.

New Chleans, Loutstana. - We have had rain on one day of the week, the rainfall reaching sirteen huadredths of un inch. The thermometer has averagod 83
Shreceport. Lontstana.-Rainfall for the week eighty-four hundredths of an inch. Average thermomater 80, highest 96, lowest $6 \%$.
Columbus, Mississtppl.-We have bad no rain all the week. The thermometer has averaged 77 , the highest being 94 and the Inweat 58.
Leland. Mississippi.- It has rained on two daye thia week, the rainfall reachlag four hundredths of an inch. The thermometer has ranged from 68 to 90 , areraging 78.5
Little Rock, Arkansas.- It has been cloudy on two days of the week and the remainder fair with light rain on three daya. The rainfall reached eloven hundredihs of an inch. Crops are generally good and clean. Soms raiss would now be acceptable though we hear no reports of any sufferiag. Average thermometer 90 , highest 90 and lowest 65.
Helena, Arkansas.-It has rained on one day and the remainder of the week pleassat. The ralnfall reaclsed eleven hundiedths of an inch. Crop accounts ave nore faverable, and good progrees is being made in cleanng the fielda of grass. There have been good rains in some bectiona and none in others. The thermometer has averaged $78 \%$, the higheat being 88 and the lowest CO.
Memphis, Tennessee. -There has been no rain at this point during the week, but in tho immediate sections rain ftll on Wedneeday mornlog. Reporta from the crops ue conflicting but they are generally needing rain everywhure. Prospects compared with this time last year are claimed to be from ten to fifteen per cent worse. Tho thermometer has averaged 78 , ranking frous 64 to 92.
Nashoille. Tenressee. - It has rained on one day of the week, the ralnfall reaching forty-seren hundredths of an inch. The thermometer has ranged from 57 to 89 , averaging 75.
Sfobile, Alabama. - We have liad one bliowes during the week, the ralnfall reaching thirty-one hundredtlis of an loch. Crop accounts are more favorable, and gool progress is being made in clearing the fielda of weeda. Average thermometer T0, higheat 02 and lowest 64.
Montgomery, Alabama. - It has been showery on two days of the week, the rainfall reacbing seven hundredths of an inch. We hear rumors of caterpillaze, but thiak them of lith importance. Crop accounts are more fivorable, and good progress is being made in clearing the fields. The thermometer has averaged $\% 9$, the highest being 95 and the lowest 05.
Selma, Alabarna.- It hes rained on one day of the week, the rainfall reaching five hundredtha of an jach. On account of the favorable weather good progress ia being made in clearing the fields. Crop accounta are more lavorable. The thermometer has averaged 83.

Anburn. Alabama.-It has rained severely on 1 wa days of tho week, the rainfall reaching one inch and forty-fre hundredthe. The crop is derelopiog promiaingly and good progress is being made in clearing the fields of weeds. The thermometer has ranged from 62 to 91.5 , averaging $77{ }^{\prime \prime} 4$.

Madison, Florida.- It has rained on three days of the week, the rainfall reaching fifty-two hundredths of an inch. Wo are Javlag too much rala. Average themometer 81, highest 93 , lowest 75.

Macon, Georgla.- The early part of the week waa clear and pleasant, but during tho latter porion there has been rain on two days. Crop accounta are rather more favorable.
Colimbus, Georgia. - We have had nice showers on two daya of the week, the rainfall reaching one inch and fortyseven hundredths. Crop accounts are more favorable, owing to good weather the past ten days. The thermometer has averaged 81, ranging from tiv to 90.

Savannah, Georgia.- We have had rain on every day of the week, the rainfall reaching three inches and thirly-three hundredths. Tho thermometer has ranged from 60 to 00 , aver aging 77.
Augusta, deorgia.-It has rained on three daya, and the rainfall reached two hundredths of au inch. Decidedly better
accounts come from the crops. Continued improvement is now looked for. Average thermometer 7\%, highest 04 and lowest 64.

Charleston, Gouth Carolina.-There has been rain on five days of the week. The thermometer has ranged from 67 to 92 , averaging 79 .
Stateburg, South Carolina.- It has rained on one day of the week, the rainfall reaching nine hundredths of an inch. A fow miles South of here the rain was very heavy. Crop accounts are more favorable. Arerage thermometer 78, highest 89 and lowest 68.

Wilson, North Carolina.-It has rained on two days of the week, the rainfall reaching twenty-one hundredths of an inch Crop accounts are more favorable. The thermometer has averaged 80 , the highest being 87 and the lowest 69 .
The following statement wo have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock July 22, 1886, and July 23, 1885.

According to the foregoing, Bombay appears to show sn increase compared with last year in the week's receipts of $7,00 \mathrm{C}$ bales, and an increase in shipments of 15,000 bales, and the shipments since January 1 shcw an increase of 259,000 bales, The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows, "Other porte" cover Ceglon. Tuticorin, Kurrachee and Coconada.

|  | Shipments for the week. |  |  | Shipments since January 1. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Great Britain. | Oontinent. | Totat. | Great Britain | Oontinent. | Totai. |
| $\begin{gathered} \text { Oalonta-... } \\ 1886 \ldots . . . . \end{gathered}$ | 300 | $\ldots$ | 500 | 34,500 34,400 | 34,000 15,000 | $\begin{aligned} & 88,500 \\ & 69,400 \end{aligned}$ |
| $\begin{gathered} \text { Madrag....... } \\ 1888 . . . . . \end{gathered}$ |  |  |  | $\begin{aligned} & 3,000 \\ & 4,000 \end{aligned}$ | 500 | $\begin{aligned} & 3,500 \\ & 4,000 \end{aligned}$ |
| $\begin{gathered} \text { Authorg- } \\ 1886 \ldots . . . \\ 1885 . . . \end{gathered}$ | 100 |  | 100 | $\begin{aligned} & 20,000 \\ & 2 \neq 700 \end{aligned}$ | $\begin{aligned} & 12,000 \\ & 24,500 \end{aligned}$ | $\begin{aligned} & 32,000 \\ & 49,200 \end{aligned}$ |
| $\begin{gathered} \text { Tota1 sill- } \\ 2886 . . . . . \\ 1885 . . . . . \end{gathered}$ | $\begin{aligned} & 500 \\ & 103 \\ & \hline \end{aligned}$ |  | $\begin{aligned} & 500 \\ & 100 \\ & \hline \end{aligned}$ | 77,500 83,100 | 46.500 39,500 | 124,000 122,600 |

The above totals for the week show that the movement from the ports other than Bombay is 400 bales more than same week last year. For the whole of India, therefore, the total shipments since January 1, 1880, and for the corresponding periods of the two previous years, are as follows:
gipozts to europe from all indu.

| Shspments to all Europe from- | 1886. |  | 1885. |  | 1884. |  |

Manchester Market.-Our report received from Manchester to-night states that the market is quiet for both yarns and shirtings, and that the demand in each case is poor. 32 s cop twist is quoted at $7 \times 71 / 2 \mathrm{~d}$, and $81 / 4 \mathrm{lb}$. shirtings at 5 s .6 d .@ 6s. 6d.
Cotton Trade of Great Britaln, by Thomas Ellison, Our readers will be pleased to know that Mr. Thomas Ellison has just issued his work on the Cotton Trade of Great Britsin which he has had for so long a time in preparation, It is a handsome volume, furnishing cotton merchants and manufacturers with a very useful and convenient record of the cotton industry, not only of Great Britain, but incidentally of the whole of Europe. No one is better fitted than he by practical experience and long study for preparing such a work, He begins with a brief historical resume of the earliest data respecting the textile industry, and from that starting point traces, through subsequent chspters, the progress of invention and its effects upon the manufacture of cotton down to the present time. On this branch of his subject the chapter covering the economical results of the mechanical improvements introduced since 1815 is especially suggestive, the elaborate tables and deductions he gives in that connection, furnishing such an array of facts bearing upon the topio discussed as to present a very complete and graphic record of the growth of the industry during that important period. Mr. Ellison's book will shortly be for sale in this country, at least a limited number of copies have been shipped to Now York and the demand will be supplied so long as the copies hold out.
East Indla Crop.-Messrs. Wallace \& Co., in their Cotton report dated Bombay, June 15, say:
We had a havary fall of raln on June 5th, and it was generally expocted that tho monsoon had set in in earnest; but since that date there have
becn only a few showers, and the weather has been quito auitahle for shipplng operatlons; but home prices have offered little or no induce. ment for fresh engagements. Tue atock of cotton warehoused ln Bombay 18 estimated to amonut to about 150,000 hales, whech chledly conslsts of Dhollerath and Oomra decerptious, thie bulk of, which runs below and about "good," there belng very little "fully good" or "fine" now left.

Jute Butts, Bagaina, \&c.-The market for bagging hss been quite active, and orders are showing an increase in size. There bave been some buyers of large lots in market, and this has kept prices quite steady, with sellers showing a disposition. to ask a shade more money. The closing quotations are 61/2c. for $11 / 2 \mathrm{lb}$., 7@ $7 / 4 \mathrm{c}$. for $13 / 4 \mathrm{lb}$., $73 / 408 \mathrm{c}$. for 2 lb . and $81 / 2 \mathrm{c}$. for standard grades. There is not much call for jate butts, the inquiry being of a jobbing character, though some demand is reported for lots to arrive. Prices are about steady, and paper grades are quoted at $15 / 013 / 4$ c., while bagging qualities are held at 216@23\%8.
Comparative Port Receipts and Daily Crof Movements -A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the jears named. The movement since Septomber 1, 1835, and in previous years, has been as follows.

| Monthly Beceipts. | ing september |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## BREADSTUFFS.

Fridat, P. M., July 23, 1836.
The flour market hes been dull and drooping. There was a moderste inquiry from shippere, but the bad weather and the depression in wheat has kept the local trade within narrow limits. The tone at the close is, however, rather steadier.

Wheat declined sharply in speculative values, and is somewhat lower on the spot. There is no change in crop accounts. There is no doubt that apring wheat has been injured materially, but the crop of Winter wheat is very large, and its quality has seldom been surpassed. It is being marketed very freely, and the bears have made the most of this circumstance to depress prices. Wheat on the spot has been taken very freely for export, the purchases for this account amounting to 100,000 @ 150,000 bushels daily, and there was a brisk inquiry at the close.

DALLT CLOAING PRIOES OF NO. 2 RED WINTER WHEAT.

|  | $\mathrm{sal}_{8}$ | Mon. | Tues. | Fed. | Thure. |  |

India corn for future delivery advanced materially on Tuesday and Thursday, on reports that the growing crop had been injured by drought snd cold nights. But on the cessation of the speculation prices quickly fell off. The export business has been light, owing to the advance asked for desirable grades. To-dsy the market wss casier and fairly active.

DALIT CLOBLN PRIOEA OF NO. 2 MIXED CORX.

The speculation for the rise in oats has been stimulated, as in the case of corn by reports unfavorable to the yield of the new crop, especially at the West; and besides there has been a scarcity of supplies available for prompt delivery. The advance in prices is important, but the market to-day was dull and weak.

The movement of breadstufts to market is indicated in the statements below, prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending July 17, 1886, and since July 26 for each of the last three years:

| Recospte at- | Flour. | Wheat. | Corn. | oats. | Barley. | Rye. |

The visible auppiy of grain, comprising the atocks in graaary at the principal polats of accumalation at lake and seaboard porta, and in transit by rail and water, July 17, 1933 :

- Minneapolla and BL. Paul sol troleded.

## THE DRY GOODS TRADE.

Naw Yorin. FMdey, P. M., Joly 23, 1896.
There was a sery fair movement in dry gooda during the weck uoder review, but the volume of bualaess was hardly up to the arerage of ireseding weeks. There in etill is the market a large force of Wetern and Southweatern jobbers and department busers, and their purcbases of fall and winter goods were felrly liberal in the aggregate ; but many Southern merchants have alrcady "atocked up" and returned home, having eupplled their immediate and near prospective requirements. Ecro businera in clothing woolens, seersucker coatings, \&c., for next efriog, wes done by the commission housea, but transectic ne In this connection rere wholly for future delivery and moderate in amount. Imported fabrica have ahown rather more avimation in fint handa, but tbe demand was characterized by a good deal of irregularity, the general moremeti baving been comparatively light. The jotling trade was fair for the time of year, a considerable distrituticn of printa, domestice, flannela, blankets, jeans, hooiery, de., having been rade in package lota by some of the leading firms. Prices of nearly all kinds of manufactured gooda are firmly malntained, and atocks are remark. ebly well in hand os a rule. It is, howover, announced that the Raritan Woolen Milla will make an auction sale of 1,000 packages colored blankets theeoming week, and the result of the male is awniled with interest.
Doysstic Cottos Cloods. The exports of cotton goods from thi port for the week ending July 20 were 5,112 peckages, and the principal sbipmente were as follow: China,

1,285 packages; Bremen, 1,367; Great Britain, 1,235; U. S of Colombia, 3.4; Santo Douningo, 140; Ceatral America, 129, and Argentine Republic, 123. The demand for plain and colored cottons was bteady, but molerate, and prices ruled firm all along the line. Low grade brown and bleached goods were slightly advanced by agents, and low grade cotton flanuels were in active demand, and are in light supply and very firm in price. Print clotha were in moderate demand and firm on the basis of 336 c . for 6 ix 6 Ig and $215-16$. . (or $53 \times 60 \%$ Stocky last Sututdsy and for three provious years were as follows

|  | $J u$ | $J$ |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | 412.000 | 347,000 |  |
|  |  |  |  |  |
|  | 23 | 320 | 310 |  |
|  | 20 | 300,0 | 200 |  |

Tutal stock (pleces) ........ $\overline{239,000} \overline{1,470,000} \overline{1,413,000} \overline{709,000}$ Printed calicoes were rather less active than in preceding weeks, but there was a fairly satisfactory busiaess in ginghams, crinkled seersuckers, fancy cothon dress goods, table damasks and fancy skirtings. Cotton hosiery continued in fsir request, and sorne goo ordera for balbriggau uaderwesr were placed for next spring.
Doyestic WOorey Goods.-There was only a moderate call for heavy cluthing woolens at first haods, but there was a far movement on account of back orders, and prices ruled steady. Spring wooleas and worateds have been opeaed by some of the roill agents at about last year's prices, and very fair orders (for future delivery) were piaced for certaia pppular mater. Ladies' cloths, tricota, poft wool suitiags, all-wool cashmeres, and other all-wool and worsted dress goods, conciaued in good demand, and stocks are so eroeptionally light that prices remsin very firm. Satinets and Keatncky jeans wers in moderate request, and there was an irregular businces in cloakings. Flannels continued to move steadily at trm prices, and there was a fairly grod demand for blankets, ahawls and skirts, by pickage buyers. Carpsts were more active in the hands of ageats and leading jobbers, and prices ruled steady all aloug the line. Wool hosiery, heavy shirts and drswers, cardigans and fancy knit wooleas, were freely distributed oa account of back orders, and new business was of Psirly ciond dimensions.

Forkios Dhy Goods. - There was a freer movement in certain imported fabrics on account of former orders, but the general demand was only moderase. Dress goots and spring clothing worstede were more active in some quarters, and ailts an 1 silk velveta were distributed in fair quantities. Linen goods were in moderate requeat, but laces and embroideries were aluggish la firt hands. Hoslery and fabric gloves were in ateady requeat, with most relalive activity in medium grades. Prica of most foreign fabrica are stesdy in this market, and 0 rm at the sources of supply abroad.

## Importattonm of Dry Goode.

The importations of dry goods at this port for the weck ending Juis 22,1898 , and sixce Jan. 1, and the same facts for the correspondiny periods are as follows:

Ganks and \%anlices Out af gexu goxk.
