TO BONDHOLDERS OF THE

Mexican National R'y Co. Bondholders, to avail themselves of the benefits of the Matheson-Palmer reorganization agreement of Oct. 15, 1886, are required to deposit their bonds without delay in the Union Trust Company, No. 78 Broadway, New York, against its negotiable receipts

Messrs. Geo. S. Coe, Exstein Norton and Joseph D. Potts have been agreed upon as the Purchasing Committee, to whose order the bonds will be de-

Only deposited bonds are entitled to participate in the subscription for new bonds or in the reorgan-ization plan. The custody of more than a majority of the bonds has already been secured. Bonds can be deposited until Jan. 27 withow_t

charge.

The undersigned have accepted the appointment as members of the Purchasing Committee under the Matheson-Palmer Reorganization Agreement of Oct. 15, 1886, and bonds can be deposited to their order as stated in the foregoing notice.

GEORGE S. COE, EXSTEIN NORTON, JOSEPH D. POTTS.

TO BONDHOLDERS

OF THE

Mexican National R'y Co.

The agreement for the reorganization of the Mex-ican National Railway Company, executed between Messrs. Matheson & Co., of London, and General William J. Palmer, of New York, dated Oct. 15, 1886, having beeen adopted by this committee, bondhold-ers are now notified that they should deposit their bonds with as little delay as possible in the Union bonds with as little delay as possible in the Union Trust Company, subject to the order of the Purchas-ing Committee-George S. Coe, Eckstein Norton, and Joseph D. Potts.

As the execution of this plan involves many mat-ters wherein assenting bondholders have powers and rights other than those which are held or exercised by the Purchasing Committee, this committee, at the request of a large number of bondholders, continues its organization and will represent bondcontinues its organiz tion and will represent bond-holders collectively, in der to protect such powers and rights and aid the xecution of the plan. Bondholders, therefore who desire to be so repre-sented are requested to sign a proxy or power to that effect to this committee Bondholders represented by this committee will be notified at the proper time of their nor rate rights

be notified at the proper time of their pro rata rights of subscription to the new securities and of any other privileges.

Copies of this power and any further information desired can be had by applying to the Secretary of the committee, W. W. NEVIN, 32 Nassau Street, New York.

SPENCER TRASK, SELAH CHAMBERLAIN, JOHN DE RUYTER, HENRY AMY, GEORGE BURNHAM, CHARLES J. CANDA, SAMUEL B. PARSONS, WM. E. D. STOKES, AUGUST RUTTEN, Committee.

TO THE BONDHOLDERS

OF THE

Lake Erie & Western Railway Co.

The holders of the first mortgage bonds of the Lafayette Bloomington & Muncie, the Lake Erie & Larayette Bioomington & Mincle, the Lake Effe & Western and the Sandusky Extension Divisions of the Lake Erie & Western Railway Company are hereby notified to present their bonds at the office of the Central Trust Company on January 25, 1857, at which time the principal of each of such bonds, together with the coupons past due on the same and interest on such past due on the same and interest on such past-due coupons to the above-mentioned date, will be paid by the purchaser. CLEARING HOUSE RETURNS.

The returns of exchanges for the week ending January 15, although not of so satisfactory a character as those for the preceding week, are yet not unfavorable. There is a decline in the aggregate from the figures of January 8 of some two hundred millions of dollars, but this considerable loss was in large part the result of special influences. In the first place the discussion of the Inter-State Commerce bill in the U.S. Senate was a disturbing influence at the centres of speculation, and New York being the most important of these suffered most, its effect being marked by smaller transactions at the Stock Exchange. Furthermore, it is to be remembered that the totals for the first week of January were largely swelled by the annual interest payments. Under these circumstances the present exhibit is more favorable than a merely superficial comparison with the figures for the previous week would seem to indicate.

Contrasted with the similar period of 1886, there is a gain in the total of 3.9 per cent. Of the thirty-one cities included in our table, only four (Boston, Providence, Portland and Galveston) record losses, and those small, while in many instances the gains are very large, notably Indianapolis 141.9 per cent; Kansas City 75.6; Peoria 74.6; Omaha 49.9; Memphis 48.2, and Detroit 40.8 per cent.

Operations in shares on the New York Stock Exchange for the week embrace a market value of \$81,163,000, and compare with \$137,282,000 for the corresponding week in 1886. Deducting two-and-a-half times these values from the total clearings * Estimated on the basis of the last weekly returns.

at New York we find the clearings due to other than stock transactions to be \$439,109,360, against \$309,392,285 a year ago, or an increase of 41.9 per cent.

As received by telegraph this evening, the returns of exchanges for the five days exhibit a small increase over the aggregate for the like period of last week. In comparison with the corresponding five days in 1886 New York records a dceline of 5.7 per cent, but in the whole country there is a gain of 0.5 per cent, and outside of New York the excess reaches 16.1 per cent.

THE CHRONICLE

THE FINANCIAL SITUATION.

The tendency of the money market this week has very naturally been towards lower rates. Money on call as represented by bankers' balances has loaned at 6 and 2 per cent, averaging about 43 per cent; but the banks have continued to demand 6 per cent. Time loans, however, having from four to six months to run, are negotiated at 41 to 5 per cent according to the grade of the collateral, and there is a good supply of money for this class of loans, besides liberal offerings on call from loaning institutions. Rates for commercial paper are also easier, for although the city banks are not eager buyers, the demand from out-of-town institutions and trust companies absorbs the supply. As to the future of money, there is no change in the prospect as noted by us last week. The movement of funds from the interior to this city continues and is likely to continue for some time, if the trade of the country does not quicken again.

The cable reports discounts of 60 day to 3 months' bank bills in London at 38 per cent, against 31 early in the week, while the Bank of England minimum remains at 5 per cent. It is stated that there are some indications of a reduction in the Bank rate. This may be so, for there is such a wide difference between it and the market rate that the official minimum cannot be exerting any great influence upon the foreign exchanges. We have evidence of this fact in this week's Bank return, which, according to a private cable to us, although the gain was reported at £440,000, included only £65,000 from foreign sources (mostly France), the remainder £375,000 having come from the interior of Great Britain. Besides, the Bank's stock of bullion is now above 20 million pounds sterling, and in the natural course of events the Bank managers look forward to arrivals from America before very long.

From the trade reports we have prepared the following statement of the gold movement of Great Britain since 1857. It is an interesting contribution to the history of the times. It will be noted that for the first 19 years that country needed for its commerce and uses, fresh additions to its gold supply of $\pounds 86,026,061$. Since the demonetization of silver not only has it received no new additions, but these figures show a net loss of $\pounds 8,365,424$. The statement is as follows.

SUMMARY OF GREAT BRITAIN'S GOLD MOVEMENT FOR 29 YEARS.

Years.	Imports.	Exports.	Excess of Im- ports.+ Exports

* The *imports* of the precious metals into Great Britain were not registered until November 1, 1857.

Perhaps the commission on "British Trade Depression', might find something instructive in these figures.

Our exchange market has been dull and irregular this week. On Monday the leading drawer advanced rates to \$4 83½ for long and \$4 87½ for short, but the Canadian banks kept half a cent per pound lower figures posted until Thursday, when the advance became general. Even then the market was simply firm, with the demand greatest for long sterling, the preference being given to 60-day drafts in consequence of the comparatively easy discount rates. The arbitrage houses have done but little, but their operations have been against this centre, though not suffi.

ciently to make any decided impression ; and as we write, the tone of the market is so sensitive that it might easily be turned either way by a pressure of bills or a decided demand. Yet it is hardly necessary to add that although there may be temporary declines we must expect the tendency to be upward after this time. We have shipped 423,219 more bales of cotton to Europe this year up to last night than we had shipped at the same date last year; so unless the crop is very much larger than current estimates our shipments for the remainder of the season must be much smaller than a year ago. Of breadstuffs we have a larger supply and better prices for it in Europe ; but wheat and corn make exchange slowly. Imports are also increasing. Hence leaving out any movement either way in securities (and the reader can judge as well as we, of the tendency in that particular, especially if the Inter-State Commerce bill becomes a law) the expectation of lower rates for any length of time does. not seem authorized.

Now that the Inter-State Commerce bill has passed both Houses of Congress, it goes to the President for his approval. No one knows what the President's views with regard to it are, though among Washington correspondents there seems to be a general belief that the bill will be signed. Holding the opinion we do as to the effect of the measure on the trade of the country, we cannot feel quite so sure of that. The public certainly has good reason for the confidence felt that Mr. Cleveland will not be afraid to veto it, if in his judgment it ought not to become a law. Whether in that event it can command the votes necessary to again pass it, is not a question for consideration. A protest in behalf of the commerce which it will disturb, even if it be ineffectual, would be educational, for the people will read a President's message, and remember it too-especially if subsequently forced to experience the harm it attempted to arrest. After that protest has been clearly made, even the passage and enforcement of the law would not be an unmixed evil. A nation must often suffer to learn, and there never was one more in need of disciplinary schooling than ours just now.

We do not claim or believe that railroad management is perfect and unselfish; nor have we opposed a railroad commission. We do assert, however, most unequivocally that trade and commerce to-day is the creature of our carrying system; that the general traffic arrangements in operation are a development of circumstances and conditions way beyond the will or whim of railroad presidents; that a higher law put them in operation and that a statutory law annulling them would, even if clearly and wisely guarded, be a dangerous experiment. But in this case not one single advocate of the bill has been able to answer with any precision the questions put to him or consistently to explain its provisions. The best Senator Cullom could say for the clause we have so much discussed was, that it did not mean anything, although in answering Senator Hoar he admitted that it meant much. This is precisely the position the advocates in the House have held under cross-examination, and Mr. Weaver, of Iowa, only stated an obvious truth when he said in substance-" not all the lawyers in the land can " tell me what is meant by the words 'under substantially "'similar circumstances and conditions'! The Senate "conferees disagree and the House conferees disagree "among themselves and with one another." And yet it is this obscure, ambiguous measure, (no one caring appar. ently whether its meaning is harmless or whether it will disturb the entire trade and producing interests of the country), that is to be put into operation. Ought not such

the opportunity given to make its provision definite and a certain?

The Pacific Railroad debt question and the proper way of settling it is brought up anew this week by the communication transmitted by Secretary Manning in reply to the Senate resolution asking for information on the subject-It will be remembered that the proposition under discus sion is to settle the debt by a series of 160 semi-annual payments of equal amount. The proposition seems to be a reasonable one, the doubt with regard to it being whether the methods laid down in the bill for calculating the payments yield correct results. Mr. Manning has had an examination made by the Government actuary, and finds that while according to the bill in its present shape the semi-annual instalment called for to meet interest and principal (taking all the Pacific roads together) would be \$1,525,948 88, the actual amount needed to effect that purpose would be \$1,834,063 98. Of course, if such a discrepancy exists, the measure should be modified accordingly. It would also seem that the provision as to the amount of interest to be abated on payments anticipated, is subject to a construction liable to cause loss to the Government and at variance doubtless with the intentions of the friends of the measure; that also should be made more definite. A somewhat similar measure for settling the debt is under consideration in the House; possibly this may in these respects answer the purposes tetter than the Senate bill. By a resolution of the House, Thursday, the Secretary was asked to compute the effects of that bill, and soon Congress will be in position to understand the respective merits of the two measures.

But whatever defects either may contain, this does not militate against the principle, which is to find a basis of agreement alike protective of the interests of the Government and of the debtor corporations. The present state of things cannot be allowed to go on. The Government least of all can afford its continuance. Existing provisions of law are inadequate to secure the payment of the debt. If merely the original principal of the loan were involved, there would be no occasion for anxiety. But there is in addition the accumulated interest to be repaid. The aggregate of principal is only \$64,623,512, while the amount of interest up to the first of January, 1887, was \$70,854,325, of which only \$21,552,144 had been repaid by the companies, leaving a total debt at the present time of \$113, 925,693. But before the maturity of the loan the Government will have to pay \$43,406,921 more for interest. Under existing law, the companies can be depended on to extinguish only a small portion of this latter sum before the loan falls due. The reason is that the Government requirement is based on a percentage of the net earnings of the subsidized portions of the lines, which net earnings owing to low rates and increasing competition, are becoming less with each succeeding year. Thus the requirement suffices to pay only a fraction of the yearly interest on the subsidy loan, and each year sees the amount owing by the companies increased. Clearly, therefore, the Government cannot risk delay. Neither can the roads, for with such a debt to meet, and no provision for dealing with it bankruptcy will sooner or later be the result. A common danger suggests common precautions, and hence the railroads are as anxious to find a way of paying the debt as the Government. The points on which a settlement should be effected are only two, (1) protection of the interests of the United States, and (2) annual payments or such a settlement of the debt as is within the ability of the companies to meet and yet maintain their existence

a common ground for Government and the roads to stand on, ought not to be difficult to find.

The condition of general trade has undergone no decided change in recent weeks. A close observer however cannot fail to notice that though business continues active and prosperous, there are various signs which indicate that there is a little less doing than we have been accustomed to of late. To be sure, the iron and steel industries remain in a condition of extreme activity, under special stimulating circumstances. But outside of these trades, and of the production and consumption of bituminous coal, which is in a measure dependent upon the condition of the iron trade, there is some little abatement of the spirit of buoyancy which had become such a prominent characteristic of trade operations. On the other hand, railroad earnings, which are certainly a pretty good index of the course of trade, record uninterrupted progress towards higher totals. On another page we give our usual tables, showing a gain of 17 per cent for the first week of January on 56 roads, and of 29 per cent on 41 roads (all that have yet reported) for the second week of the month. It is not forgotten that January earnings last year were very poor so that the comparison is with small totals, but the ratio of gain is large enough to cover that contingency and still leave room for considerable improvement in the ordinary way.

The characteristic of this week's stock market is, that while values have been strong and weak by turns the specialties have absorbed the largest amount of attention. Take up any day's stock-list and one quickly sees how insignificant are the transactions and how small the fluctuations in the shares of the better class of properties, and then by contrast the enormous sales and great rise in the less substantial things-many of them overloaded with debt and having no history except that traceable in bankruptcy courts, and others which with but a dim or dubious past and little present net income, assume new responsibilities on a scale that would appall even dividend earners of large magnitude. Such operations may dazzle the unthinking, but they furnish only a very poor basis of stability. Of course, it is to the future and not to the present that these look, and undoubtedly the future, with prosperity continued, is bright, but it is not wise or safe to bank upon "magnificent possibilities" alone. The coal handlers' strike has not yet been ended, but the companies are evidently gaining the upper hand. Rumor has again succeeded in settling the Nickel Plate-Lake Shore matter, this time with the effect of depressing the Nickel Plate stocks, but no official announcement has yet been made.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of gold and currency by the New York banks.

Week ending January 21, 1887.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency Gold		\$319,000	Gain. \$2,433,000
Total gold and legal tenders	\$2,752,000	\$319,000	Gain\$2,433,000

ment cannot risk delay. Neither can the roads, for with such a debt to meet, and no provision for dealing with it bankruptcy will sooner or later be the result. A common danger suggests common precautions, and hence the railroads are as anxious to find a way of paying the debt as the Government. The points on which a settlement should be effected are only two, (1) protection of the interests of the United States, and (2) annual payments or such a settlement of the debt as is within the ability of the companies to meet and yet maintain their existence and preserve the stockholders' interest. Within these limits

for the week, whereas the figures below should reflect the actual change in the condition of the banks as between Friday of last week and Friday of this week.

Week ending January 21, 1887.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' Interior Movement, as above Sub-Treasury oper.and gold import.		\$319,000 6,300,000	Gain .\$2,433.000 Gain 50,000
Total gold and legal tenders	19.102.000	\$6,619,000	Gain. \$2,483,900

The Bank of England gained $\pounds 440,000$ bullion during the week. This represents $\pounds 65,030$ received from abroad and $\pounds 375,000$ from the interior. The Bank of France lost 2,400,000 francs gold and gained 300,000 francs silver, and the Bank of Germany, since the last report, gained 12,760,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	Jan. 20	, 1887.	Jan. 21, 1836.		
	Gold. Silver.		Gold.	Silver.	
on the second	£	£	£	s	
Bank of England	20,033,231		20,953,690		
Bank of France			45,909,602		
Bank of Germany	18,260,090	16,192,910	17,619,250	15,605,750	
Total this week			84,482,542 83,319,984		

The Assay Office paid \$108,016 through the Sub-Treasury during the week for domestic and \$354,964 for foreign bullion, and the Assistant Treasurer received the folowing from the Custom House.

1		Consisting of-					
Date.	Duties.	Gold.	U. S. Notes.	Gold Oertific's.	Silver Oer- tificates.

Total.	\$3,006,192 75	\$21,500	\$558,000	\$2,023,000	\$399,000		

Included in the above payments were \$7,500 in silver coin, chiefly standard dollars.

GOLD AND SILVER PRODUCTION SINCE 1851.

According to the usual first of January report of Mr. Valentine (of Wells, Fargo & Co.), which was made public a week ago, the production of both gold and silver appears to be on the increase in this country. The development is not so very large in either metal in view of the general revival of all industries the past eighteen months; and yet in silver production the constant and decided growth s a surprise to many, under the decline in price which has so long been in progress, the two conditions moving at about equal pace, only in opposite directions, the production going up as the price has gone down ever since 1872. But with regard to gold the course has until two years ago been with slight variations just the reverse; that is, as the demand for it has become more urgent the production has fallen off-not very materially, but constantly. The largest yield of gold since 1870 (when Mr. Valentine began his compilations), according to the Mint estimate, was \$51,200,000 in 1878, and according to Mr. Valentine was \$44,880,223 in 1877; from this point the decline was, ac cording to the Mint, to \$30,000,000 in 1883, and according to Mr. Valentine to \$25,183,567 in 1884.

These facts are simply cumulative evidence proving how very little, the actual cost of production has to do with the ruling value of either metal. Mining is a kind of lottery. Large amounts of money are lost in it every year. But that does not dispirit the public, for when a so follows."

paying vein is struck the margin of profit is a wide one. No more evident fallacy is anywhere current to day than the idea that the cost of production of either gold or silver governs its price. The edict of nations fixes the price of each, the new ventures taken depending on the spirit of enterprise that prevails, while the success attained is contingent upon lucky finds. When either metal is everywhere demonetized or spoiled of its uses so that no need for it exists except for manufacture, then demand, price, and cost of production will keep together as closely as they do in other products, and not until then. We recall this condition because so many continue to lose sight of it or refuse to acknowledge it, in accounting for the decline in silver of late years and the wide fluctuations now. Its present recovered strength is but

a reflexion of the hope that the Royal Commission excites,

and nothing but remonetization can save it from sinking

far below the price it has hither to touched. Mr. Valentine's compilation for 1886 brings down the production of gold, silver and lead in the States and Territories west of the Missouri River (including British Columbia and receipts in San Francisco by express from the west coast of Mexico) to the 31st of December. The "aggregate result" given in this statement "may be " relied on with reasonable confidence as approximately cor-" rect." These are the words used in the circular, and we believe they convey a true estimate of the report. At the same time, while the "aggregate" may be relied on, Mr. Valentine we think does not claim entire accuracy for his analysis of the metals-that is, for the percentages by which he divides them. We make that suggestion because of the difference between these and the Mint Bureau's results, which can perhaps be, in part at least, harmonized for recent years on this idea. We gave our reasons in detail two years ago for rejecting the older Mint estimates. They were made up from very little original data at a time when gross exaggeration was general in mining circles and almost necessary in a Government official who attempted to report mining results; and as those results differed so widely from Mr. Valentine's reports based upon actual express returns which could not be far wrong, the trade never received them. But it is not our purpose to open that question again. Latterly it is satisfactory to note that the difference between these two authorities has gradually become less, while the Mint method has been growing more thorough, and we think it quite possible that they may now be reconciled on the basis referred to above.

With regard to the aggregate production in 1886, Mr. Valentine gives the following.

States and Territories.	Gold Dust and Bullion by Express.	Bullion	Silver Bullion by Express.	Ores and Base Bullion by Freight.	Total.
	8	8	s	*	\$
California	12,579,353	623,678	918,403	563,948	14,690,385
Nevada	1,739,959		5,522,596	1,927,365	9,169,920
Oregon	451,907	250,000	1,310		703,217
Washington	139,694	25,000			164,694
Alaska	394,975	50,900			444,975
Idaho	1,816,500	300,000	2,603,000	3,015,000	7,733,500
Montana	2,100,000	500,000	7,840,000	10,400,000	20,840,000
Utah	19,140		3,080,759	5,531,698	8,631,595
Colorado	3,500,000		5,750,000	15,750,000	25,000,000
New Mexico	104,784	50,000	279,909	3,387,178	3,821,871
Arizona	583,827	100,000	1,371,083	4,048,468	6,103,373
Dakota	2,405,250	200,000	251,437		2,856,687
Mexico (W. Coast St's.),	469,490		1,627,204	12,000	2,108,694
British Columbia	692,845	50,009			742,845
Totals	26,997,727	2,153,678	29,224,701	44,635,635	103,011,761

Out of the foregoing "aggregate" of gold, silver, copper and lead, Mr. Valentine finds the results "approximately as follows."

Gold, 29_{100}^{87} per cent	 	 \$30,773,759
Silver, $52\frac{2}{100}$ per cent	 	 53,776,055
Copper, 9 per cent		
Lead, $8_{\frac{99}{100}}$ per cent		 9,185,192

Total as above for 1886\$103,011,761

These figures as stated above include British Columbia and express receipts at San Francisco from the west coast of Mexico; after deducting these we have left for the United States \$29,561,424 of gold and \$52,136,851 of silver. The mint figures of gold for 1885 were \$31,801,-000; Mr. Valentine's for that year were only \$26,393,756. Mr. Kimball, Director of the Mint, thinks his total, made up from the year's deposits at the various mints, must be accurate. We have no doubt of his endeavor to make it so, and if we are authorized as already suggested to vary Mr. Valentine's division and percentage of gold, &c., to that extent, a correspondence in results could be attained. The difference in that year (1885), after allowing say about \$500,000 for Eastern States, which Mr. Valentine does not include, would be about \$5,000,000. That is a large variance, but it was in just about the same amount in 1884. Adding then that sum to Mr. Valentine's 1886 total would make the Mint figures for gold for the last twelve months \$34,500,000, showing a marked revival in the gold production of the United States.

But there is a feature in this production of decided interest, and one which deserves the special attention and thought of those who would demonetize silver. We refer to the fact that the mining of gold found alone is all the time falling off, and that the increased yield of that metal noted above comes from mines in which silver and gold are together. Is it not possible that this union in nature may force a union in the money of commerce, even if nations should continue their efforts to divorce them ? Gold is scarce even now. Nations are struggling for it; of that we need no other witness than the banks at European centers which guard it so closely as to put a premium on withdrawals for export and give light-weight coin at that. It does not require a vivid imagination to picture the condition among them when silver currency is everywhere rejected, even in the Eastern silver-using countries; for we all know t must come to that if the discredit now in progress is not arrested; and when it does the value and use of silver will be brought down to a manufacturing basis. With that result in view one can see the force of the fact referred to, that the only kind of gold mining that is progressing now is where gold and silver are found together-that is where each adds to the inducement for mining and helps pay the expenses. This truth finds further illustration in the annual record of total dividends paid as prepared by the Engineering & Mining Journal for the past three years. Their report is as below. These figures we should add are not claimed to be a complete record of profits realized in gold and gold and silver mining, as many returns are not obtainable. The comparative results for which we reproduce them are however correctly represented by the statement.

Dividends by mines-	1884.	1885.	1886.
Producing gold only. Producing gold and silver. Producing gold, silver and lead Producing gold, silver,lead & copper.	320,000	698,027 32,000	48,000
Total	\$2,578,324	\$2,948,419	\$3,491,934

5074500501

)4 15 The foregoing brings out the truth clearly that dividends by mines producing gold only are steadily declining each year, the total given in this compilation as distributed by such mines in 1884 being \$2,222,324, against \$1,567,-434 in 1886, whereas those producing gold and silver

rose from \$320,000 in 1884 to \$1,531,900 in 1886. The fact is that silver and gold are generally found together, and must be mined together; and hence if silver demon etization is continued until that metal loses almost all itvalue, the loss on it will prevent the working of the large majority of the gold and silver mines, and hence prevent the production of the gold in the ore which comes out of those mines. In other words, cutting off the new silver supply means cutting off the new "gold supply as well.

We need not dwell longer on these special features which current production in the United States suggest. The inquiry of chief interest and to which the facts already given lead, is the world's total supply. That is a subject that we have attempted to investigate annually for many years, and every year we are more and more impressed with its difficulty. Even the product of the United States, if one seeks only to accept correct data, becomes a very embarrassing problem. The figures prior to 1870 which pass as Mint figures are known to be wholly estimates and believed to be exaggerations. They have never been accepted by the trade, and they find no support in either our exports of the precious metals or in current Mint deposits. Yet it seems impossible to correct them now, except by substituting other "guesses;" so in lack of facts we are compelled to insert them with this protest. But in compiling any statement of the old stock of gold in the world we think a considerable deduction can be safely made for those years. Since 1870 and down to 1883 we use Mr. Valentine's returns as the basis of our gold estimates. For the years following we accept in the main the Mint figures. The Mint estimates are now prepared from substantial data with great care, and though the method assumes perfect accuracy in the accounts of the different Min ts in separating domestic from foreign bullion and coin de posited, etc., yet the results reached as now made up can. not be far astray. Besides they are Government figures, and being such, we desire to adopt them unless there is clear reason for rejecting them.

As to other countries, the increased importance of the investigation has led us during the last six months to use special effort to secure revised estimates everywhere. We have only been partially successful, but with the assistance of figures obtained by our State Department for the Director of the Mint, we think the results we now give will require less change hereafter than any figures hitherto issued. One feature has become more obvious the more we have extended our investigation, and that is the tendency to exaggeration which older estimates disclose and which many countries, mainly the smaller producers. even now show. It is true, however, that the late increase in the production of the precious metals which as we have seen is so noticeable a feature in the United States, is also in a measure apparent in the production of some other countries. As mining machinery and methods improve, increase in yield would be natural even though no new enterprises were being started; but the impulse for new undertakings cannot be resisted where the chance for money-making has so wide a margin of possible profit; such a venture has peculiar attractions the world over, and capital seems to be always awaiting every enthusiastic prospector. Yet in spite of these natural tendencies, there was a kind of lull in gold operations for years back, just as if the sources were drying up, the richer findings having been exhausted. Possibly this was the transition or reactionary period-that is to say, the passing from mining that was In

America the recovery in the aggregate output was further | duct we have the consecutive annual figures since 1822 and delayed by the decision three years ago respecting hydraulic mining which stopped the working of the old debris mines. But these checks to development seem to have been passed now, and it looks as if the world's gold supply might hereafter be a slowly increasing quantity.

With regard to Australia, however, taking the latest reports as correct, no improvement is to be noted. Yet in one sense there may be said to be an improvement, for when comparison is made of the last three years with previous years, it looks as if the retrograde movement was perhaps about arrested; even the 1885 total, though it is a little less than the total for 1884, is a little larger than the total for 1883. We speak inquiringly as to the correctness of the latest reports, because though they are elaborate and apparently official they differ somewhat from previous official compilations. They are prepared by Mr. George Anderson of Her Majesty's Mint at Melbourne, at the request of Mr. Kimball, the Director of our Mint. We received a statement last year from Mr. Hayter, the Government Statistician, which brought the total down from the first discovery in Australia to 1883; it covered just the same years except the latest ones, but the results do not accord with these which Mr. Anderson furnishes. For instance for 1882 the Government Statistician's figures sent us reported the details for each colony with an aggregate for the year of 1,553,542 ounces, valued at £6,086,860; the statement Mr. Kimball has from Mr. Anderson makes that year's results at 1,545,966 ounces. This to be sure is not a large matter, but a similar variance seems to extend through previous years; and yet we only refer to these differences because this new statement (which is apparently official and final) makes necessary corresponding changes in our general table of the world's production. The totals for 1885 and for the whole period since the first discoveries are as below. We have added the values on the basis of 77s. 9d. per ounce, the price at which the Bank of England is obliged to buy gold of standard fineness.

PRODUCT OF GOLD IN AUSTRALASIAN	COLONIES.

For Russia the later statements of production show apparently some recovery. Mr. Kimball, Director of our Mint, has obtained and publishes in his last report not only the official figures of production for 1885, but a full and very interesting statement of the coinage rules, regulations and system of Russia, which were in some particulars materially changed in 1886. The production of the mines during 1885 is given at "38,125,517,254 grams "valued at gold 31,778,094 roubles $81\frac{1}{2}$ copecks." The equivalent of 31,778,094 gold roubles would be about £5,235,169, which is the largest production in any year since 1880. It will be noticed, however, that the reported yield of the Russian mines was given for 1884 at the very small figure of $\pounds4,507,914$ and it may be that a portion of the 1885 production really belongs to the previous year. If so, it would appear that there has been no material change in the yield for four years. Adding the 1885 pro-

give them below in pounds sterling.

GOLD AND SILVER PRODUCED IN THE RUSSIAN EMPIRE.

The total Russian production for these sixty-four years reaches, according to the above, £193,892,019 gold and £9,153,049 silver.

Other countries' contribution to the world's gold and silver supply seems to us quite an uncertain quantity. Within the last six months, as already stated, we wrote to every producing country for its official figures, and have followed the inquiry up with considerable diligence since. We are obliged to say, however, that though the claims made are definite, and in many cases quite large, we cannot trace where the South American production goes if it is mined, The United States does not receive it, nor does Great Britain receive it according to the official trade figures, nor is there any evidence that it is kept for home use. For the eleven months ending with December 1st, Great Britain exported in 1886 to South America and Mexico £3,942,689 of gold and only reports an import from the same countries of gold at £1,863,548; of silver she imported only £3,052,-534 in 1886. Almost all of the silver included in these imports was from Mexico, and yet Bolivia alone reports a production of 16 million dollars of the same metal in 1885, the exact amount that was also claimed for 1883. The Mexican figures, both the production and coinage, are given by Mr. Valentine for ten years in his circular. We should mention that Mexican officials do not accept these returns, making up a much more ambitious showing of their mining results ; but investigation does not confirm their higher estimates, and we follow Mr. Valentine's report. The totals we give in our tables below of the product of gold for "other countries" and of silver under the head of "South America," although less than some of the current estimates, cover, we think, large allowances. Using the data we have thus referred to in detail, we have prepared the following as covering the total gold production of the world since 1851.

NOTE.—The production of Queensland for the years 1851 to 1877 inclusive ($\pounds 10,299,886$) was given as a single item at the close of 1877. We have, however, divided it equally among the years named, adding to each of those year's production $\pounds 381,477$.

The foregoing shows a total gold production in the world since 1851 of £867,023,554—of which £315,358,068 was the yield of Australasian mines, £328,316,515 was the yield of the mines of the United States, £154,398,971 was the yield of Russian mines and the remainder, £68,950,000, was the yield of the mines of all "other countries."

It was our purpose to carry back figures of silver production to the same date as given above for gold, but we have not yet obtained sufficient data. Hence, with regard to that metal we simply reproduce our compilation of last year (which carried back production to 1877) adding this year's results.

THE CANAL AND NEW YORK GRAIN RECEIPTS.

It is sometimes claimed that the canal has outlived its usefulness, that the railroads are steadily encroaching upon it, and must finally supersede it altogether. Such arguments are common when the railroads are at war with each other and taking freight below the cost of moving it, and thus rendering competition on the part of the water route difficult and nearly impossible. It needs however

only a brief period of peace and firm rates among the rail carriers to demonstrate how important an element in through transportation the canals still are.

An illustration of the truth of this statement is afforded by the figures we present this week showing the grain receipts at New York during the late year, as compared with previous years, and the amount contributed to the total by the canal and each of the various rail routes. The railroads were at peace in 1886 and a 25 cent tariff on grain from Chicago to New York continued in force the whole time, with scarcely any deviations on the part of the pool lines. The year therefore is a good one for observing what the water route is able to do when normal conditions prevail-that is, when the state of things is such as to give the canal a chance to demonstrate its power and usefulness. In 1885 there was no such opportunity, for though a settlement was reached between the trunk lines in the summer of that year, and an effort at once made to establish a higher schedule of rates, the effort did not succeed and it was not till the 1st of October that a 20 cent schedule was actually carried into effect and not till the 23d of November (when canal navigation was about over) that the 25 cent tariff was inaugurated. Clearly, therefore, the conditions were not favorable to a large traffic by canal in that year, but decidedly the reverse. For our present purpose this difference is an advantage, for by taking simply the figures for the last two years, we have a perfect contrast between results in a year when the canal is operating under favorable conditions and when it is not.

Briefly stated, then, the movement of grain to New York over the canal in 1886 increased nearly 50 per cent on that for 1885, and reached the large total of 44 million bushels. In 1885 the total had been not quite 30 millions, the increase thus being over 14 million bushels. In the same interval the aggregate receipts rail and water increased only a little more than four millions, so that the additional 10 millions of increase by the canal may be taken as reflecting the effect of the better conditions that existed in 1886 for water competition. Of course, no one need be told that 44 million bushels is a very heavy contribution to the total, but a better idea of the importance of the water route will perhaps be obtained when we say that this forty-four millions formed full one-third of the whole receipts at New York, the railroads having together contributed 84,741,170 bushels, and 2,132,370 bushels having come by river and coastwise, thus making the aggregate receipts 130,910,062 bushels. Moreover, while in 1886 the canal furnished over one-third the total, in 1885 it had furnished less than one-quarter. Here are the receipts by routes for each of the last six years.

VOL. XLIV.

1885. Inc. or Dec.

January 1 to Dec. 31.

The canal thus shows for 1886 the largest proportion (33.64 per cent), and for 1885 the smallest (23.63 per cent) in any of the years given. A larger amount came by canal than in any of the other years-larger even than in 1881, when total receipts were nine millions greater. We would have to go back to 1880 and 1879 to find an equally large movement by canal. In those years, however, the total receipts (rail and water) were very much heavier than now, and the canal's proportion was also larger. In 1880, for instance, 43.57 per cent came by water (no distinction was then made between canal receipts and these coming coastwise), and this 43.57 per cent amounted to 73,677,721 bushels, against the 46,168,892 bushels coming in the same way in the late year. Both 1880 and 1879, however, were exceptional years as regards the size of the crops and the extent of the foreign demand. It is sufficient to know that the canal has done better than in any recent year, and has furnished over one-third of New York's total grain movement.

With such an excellent showing for the canal, it seems almost paradoxical to say that the railroads also have reason to congratulate themselves upon their exhibit. They have lost in volume of traffic (though not in earnings), but a loss was calculated upon, and the falling off (as a whole) is perhaps less than expected. Owing to the low rates at which business was taken in 1885, the grain movement by rail in that year was unusually largelarger than in any year since 1879, and reaching nearly 93 million bushels. From this heavy total the 1886 movement shows a falling off of not quite 84 million bushels. It is only fair to say, however, that were it not for the large gain by the "various" or miscellaneous roads, the falling off would be much greater. These miscellaneous roads had 6,421,184 bushels in 1886, against only 959,959 bushels in 1885. The increase represents chiefly the operation of the Lehigh Valley outside of the pool, and presumably is the result of taking freight at rates lower than those on the pool roads. Not having its own line to Buffalo, the Lehigh is at a disadvantage. When rates are low therefore it is not in a position to compete for through traffic. On the other hand when rates are high, the margin of profit being sufficient to admit of the underbidding of the pool tariff, it can secure a share of the traffic. This is what happened. But even allowing for the increase on the miscellaneous roads the comparison is a good one with all recent years except 1885. Thus excluding those roads we get an aggregate of 78,319,986 bushels for 1886, 92,008,581 bushels for 1885, 68,774,591 bushels for 1884, 78,533,167 bushels for 1883, and 79,115,884 bushels for 1882.

All the individual roads, however, have not fared so well, and especially is this true of the older lines. The Lackawanna has done well enough, having increased its total from 5,718,000 bushels to 10,221,000 bushels, but that merely swells still further the loss on the other lines. It follows that the loss on the three original roads is very heavy, as the West Shore carried about the same amount as in 1885. On the Erie the falling off reaches over $4\frac{1}{4}$ million bushels, on the Pennsylvania over 51 millions, and on the New York Central nearly 83 millions. But against the loss in traffic we have the gains from the higher tariff all through the year. The latter, as we have frequently pointed out, was much the more important circumstance. Renewed evidence to the same effect is offered by the following statement in our usual form, showing approximately the gross revenue from through grain tonnage in December and the twelve months, 1886 and 1885, on each of the five pool lines.

up to that for December, 1885, and the three old roads

APPROXIMATE GROSS REVENUE FROM THROUGH GRAIN TONNAGE.

Inc. or Dec.

Thus, notwichstanding the heavy losses in traffic by the

Erie, the Pennsylvania, and the New York Central, the

Pennsylvania is the only one that shows diminished

earnings from the traffic, and that only slightly. On the

Central there is an increase of \$139,000, and on the Erie

an increase of \$218,000. Of course the heaviest increase

of all is that of the Lackawanna, which had both a larger

movement and better rates in its favor. The increase

reaches \$374,000. The West Shore's gain is also very

large, namely \$216,000. Taking the five roads together,

the gain is \$927,000, which is a striking illustration of

the benefits resulting from the higher rates, bearing in

mind that this gain is made on a movement (on the five

roads in question) nearly 14 million bushels less than in

It will be noticed that for December the results as to earn-

ings are not quite so favorable, the total revenue not being

1886.

all showing considerable declines. This is owing in the first place to smaller receipts (the new roads being the only ones that increased their totals) and in the second place to the fact that the advantages on account of a higher tariff in that month were very slight. All through December, 1885, a 25 cent rate was maintained. In 1886 there was an advance to 30 cents on the 20th of the month, but the higher rate does not appear to have been strictly adhered to; bearing that in mind and also the fact that the advance counted for only the last eleven days of the month, we have in our calculations above taken the average rate for the whole month no higher than 26 cents. This gain of one cent (equal to only 20 cents per ton for the whole distance between Chicago and New York) counted for very little against the loss of over a million bushels in the receipts. According to the following table the falling off in the movement would appear to be very much less than a million bushels, but it should be remembered that our calculation does not include the "various" roads, which contributed 1,027,149 bushels to the rail receipts in December, 1886, against only 140,625 bushels in 1885, the Lehigh Valley apparently being as Excluding these outside roads, the active as ever. receipts by the five pool roads on which we have figured earnings foot up 7,550,076 bushels, against 8,623,163 bushels in 1885.

.

Aside from the prominence assumed by the miscellaneous roads, the feature of chief moment in this December statement is the extraordinary amount of grain brought in by the West Shore, its total reaching over 21 million bushels, and its percentage 24.21, against but 5.71 per cent in the same month of 1885. The road delivered only a trifle less than the Central itself, and the two Vanderbilt roads together had nearly one-half (actually 48.88 per cent) of the entire deliveries, rail and water. In this way, though the Central lost heavily (1,595,478 bushels) on its own movement, it more than made good the loss by the gain (1,646,773 bushels) on the West Shore. The other new road, the Lackawanna, also increased its receipts, but the Erie suffered a decrease of 971,468 bushels and the Pennsylvania a decrease of 380,957 bushels, and neither of course had a counterbalancing gain such as the Central had.

THE COURSE OF NET EARNINGS.

Statements of gross earnings are of course useful, bu statements of net earnings are more especially so to the investor. We gave in our last issue an extended review of the former for the late calendar year. In the present number we are able to present an exhibit of the net earn. ings, not for the full year, but for the eleven months, actual results for December not yet being obtainable. We deferred publishing the statement to get completer returns, and also to enable us to give the aggregates, the number of roads now reporting being so large as to mak_e a footing very desirable.

Full details with regard to individual roads follow, as usual, at the end of this article, but in respect to them al no better idea, we think, can be afforded of the course o^f gross and net earnings than is offered by the following exhibit, embracing all the roads on which comparisons can be made for the two years.

	November. (53 roads.)		Jan. 1 to Nov. 30. (51 roads.)		
	1886.	1885.	1886.	1885.

Gross earnings Operating expenses			212,608,243		

Net earnings...... 13,971,815 13,457,024 118,315,124 112,024,018 This comprises an important body of roads-in number not so large as contained in our exhibit of gross earnings last week, but covering more of the larger systems, nota. bly the Pennsylvania, the Union Pacific, the Burlington & Quincy and the Southern Pacific. As a consequence, the aggregate of gross earnings here for the eleven months is almost as great as that last week for the full year, amounting to only a trifle less than 331 millions (\$330,923,367). As against this total in 1886, the total in 1885 was \$308,. 757,336, so that we have an increase of over $22\frac{1}{8}$ million dollars, or about 71 per cent. This gain of 22 millions, however, was accompanied by an increase of nearly 16 millions in expenses, so that the exhibit of net is not quite so satisfactory, the gain being only 64 million dollars, or about $5\frac{5}{8}$ per cent. It follows clearly from this that the cost of operating has increased, which is not unnatural considering that the price of nearly everything that enters into railroad accounts has materially advanced. This fea. ture has latterly been developing, and hence it is that the figures for November show its effects more strikingly than those for the eleven months. Thus 53 roads for November record a gain of \$2,722,382 in gross (85 per cent), and of only \$514,791 (not quite 4 per cent) in the net.

But there is still another circumstance to be considered in connection with the augmented expenses. Some of the roads have been operating under unfavorable conditions. For instance, the anthracite coal roads have only recently

ASER

been receiving better prices for their product, and the Pacific roads have had a war on trans-Continental busi ness to contend against. Hence, some of these have fared poorly, and the bad result on them has operated to make the aggregate less favorable than it otherwise would be. It is desirable therefore that we should separate the roads into groups or classes and see what kind of a comparison we get on that basis for each set. This is done in the following.

Here we have ten distinct classes of road, and while every one of them has larger gross than in the same eleven months of 1885, three of them have smaller net, namely the Pacific systems, the coal roads, and the Mexican roads, the latter comprising simply the Mexican Central, which as will be seen by the November return has latterly great improved in results. As a class, the coal roads have done worse perhaps than any others. Among these there is included the Buffalo New York & Philadelphia, besides anthracite coal companies like the Reading and Susquehanna & Western. The first-mentioned road is still affected by the triangular fight on coal to Buffalo, and thus tariffs are low and earnings small. The coal companies would appear to have done very much better in November, but while it is true that both their gross and their net show a gain for that month, the improvement is more apparent than real, and owing chiefly to the fact that the Reading in its figures has included in 1886 \$592,774 spent for betterments during the year (this being carried back as a credit item in the November return), against only \$108,303 so charged in the previous year. The Pacific roads owe their bad statement mainly to the unfavorable results on the Southern Pacific (which has to bear the brunt of the Trans-Continental fight), and to a heavy increase in the expenses of the Union Pacificthe Northern Pacific, the Canadian Pacific and the Oregon Navigation all having increased their net for the eleven months, though the latter for November had a loss.

Of course, the trunk lines and the roads in the middle western section have the largest ratio of gain. But all things considering, the Southern roads have distinguished themselves more than any others. The comparison in case of the trunk lines is between a year of peace and high rates and a year of war and poor rates, so the contrast is very marked. On the Southern roads, however there is no such distinction, and yet we find a gain of over 9 per cent in the gross and of 14 per cent in the net. There is not a single one of the eleven Southern roads, that does not record increased net for the eleven months, though for November there are one or two that fal behind. Northwestern roads and the roads west of the

Missouri have only moderate ratios of gain, competition having been greatly increased in that section. On the Eastern roads the gain is in good part due to the heavier earnings of the Rome Watertown & Ogdensburg, which has absorbed some additional mileage during the year. RAILROAD EARNINGS.

Owing to the fact that earnings last year in January were reduced by bad weather, the gains this year are unusually large. For the second week of the month 41 roads show an increase of \$468,527, or 2 9 per cent, as follows:

Monetary Commercial English Rews

[From our own correspondent.]

LONDON, Saturday, January 8, 1887. The opening week of the New Year has not been characterized by the occurrence of any important event either commercial or financial. The aptitude of the South American States and Australasian colonies for borrowing, which was a feature of the past year, promises to be no less prominent in t Since April in 1886 the Utica & Black River is included, making mileage 655 miles, against 449 last year. Wexican currency. Work of changing gauge in progress. the year just commenced. Already we have a new Argentine

[VOL, XLIV,

ted for a small issue on the part of the City of Auckland, New Zealand; but the facilities for such operations which were freely granted during 1886 do not promise to be so readily forthcoming during 1887. Although financial stringency is not apprehended, it is abundantly clear that so far at least as can be determined from present indications money will be distinctly higher in value. There is not that amount of capital offering which was available twelve months ago, and as unquestionably a stronger demand exists, but one result can follow, and that is the establishment of a higher range of prices. For all that, however, there is no reason to believe that the development of bona fide schemes will be checked. Recent experience has shown that subscriptions to sound undertakings are far in excess of the amounts required, but the permanent hardening of money here will necessitate the offering of better terms than it was thought needful to grant during the past two or three years. Dearer money will have one good effect, seeing that it will place a salutary hindrance upon that class of companies which is gotten up mainly in the interests of promoters and venders. If the value of money could be really enhanced through the expanding demands of trade, we should certainly have good cause for congratulation; but that has not been the case as yet. With the increasing tendency to Stock Exchange speculation there is likely to be oft-recurring sharp, short periods of stringency, as the fortnightly settlement comes round. That money has been profitably employed during the past half-year is evident from the returns so far announced by the leading joint-stock banks. The excess dividend over last year is frequently decided, but the gain cannot be attributed to an increase in the trade demand for money. The average Bank rate for the year was 3.57 per cent, against 2.92 per cent in 1885. This improvement is hardly sufficient to account for the heavier dividends earned, that result being more probably due to the profitable employment of money in loans to the Stock Exchange. However, the fact remains that the banks have had a better half-year than they have enjoyed for some time past. The following is a list of the dividends so far announced :

	Second half of				
	1886. Per cent	1885 Per cent	Inc. +, or dec		
	per annum.	per annum.	Per cent.		
Alliance	7	612	12+		
City	10	10			
Consolidated	10	9	1+		
London Joint Stock	1219	12	12+		
London & Westminster	15	131%	112+		
National Discount	12	13	1-		
Union of London	1219	10	219+		
Imperial	7	7			
Union Discount of London	8	8			

Money has been distinctly easier during the week. The distribution of the dividends has appreciably increased floating balances, and as the demand both for loans and discounts has at the same time fallen off, quotations have given way. The charge for day-to-day loans has declined to 21/2 per cent, and the discount rate for three months' bills has been weak at 33% per cent. The weakness is regarded as merely temporary. After the repayment of leans to the Bank has been effected it will not be found that balances will be at all heavy, and they will at the same time be steadily reduced by the revenue collections. The feature of the weekly Bank return is the evidence that the Government has been borrowing in order to provide for the dividen is on consols. In Government securities there is an increase of £4,799,654, and the public deposits have been swollen by £4,639,597. From this it will be seen that the Government in some measure anticipated the revenue Collections. The other changes are of no special importance. Gold is flowing back from the provinces, the gain in bullion being £487,142, of which only £145,000 came from abroad; but as note circulation also increased £391,050, the actual gain in the reserve is only £96,092. The heavy increase in the liabilities has caused the proportion to fall from 35.38 to 30.89 per cent. per cent

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c.

Tenders for £1,695,000 Treasury bills have been received at the Bank of England. The allotments were : In bills at three months £1,400,000 and six months £295,000. Tenders for bills at three months at £99 2s. 6d. and above will receive in full, and for bills at six months, at £93 6s. 7d., about 93 per cent ; above in full. The average rate for the three months' bill was £3 93. 6.75d., and for the six months' £3 6s. 5.75d. per cent.

Another Argentine 5 per cent loan for £4,290,100 at 851/2 per cent is just announced by Messrs. Baring Bros. and Messrs. J. S. Morgan.

Messrs. Pixley & Abell write as follows on the state of the bullion market:

builden market: Gold-There has been no important demand for gold, and all arrivals have been sent to the Bank of England, which has purchased $\pounds74,000$, and sold $\pounds60,000$ for Australia and the Cape. They comprise: From River Plate, $\pounds14,000$; from West Indies, $\pounds23,000$; from Australia, $\pounds12,000$; from Bombay, $\pounds10,000$; total, $\pounds59,000$. The P. & O. steamer takes $\pounds10,000$ to Bombay. Silver-Although the arrivals have been on a large scale, there has been no difficulty in placing the various parcels in the market, and the price has gradually improved to 46 7-16d. The Bank of Bengalrate has been raised to 6 per cent. The arrivals are $\pounds40,000$ from New York and $\pounds10,000$ from Chili. The P. & O. boat takes $\pounds165,000$ to Bombay.

Bombay. Mexican Dollars—The unsold portion of the arrival by the French steamer realized 457gd., but the market has since improved, and we now quote 46d. The arrivals are: From New York, \$10,000; from West Indies, \$2,000; from Vera Cruz, \$90,000; total, \$102,000.

An uneasy feeling has of late been felt amongst Stock Exchange speculative circles. There has been a good deal of reckless "plunging." Serious losses have resulted, and the default of clients has severely shaken more than one firm. It is known that many were assisted over the last settlement. and although the atmosphere has since become clearer, there is still a good deal of anxiety. One outside speculator is known to have lost over £100,000 and to have paid about £60,000. As, however, he is interested in a well-established house of business the payment of the balance in full is only a matter of time. But such satisfactory liquidations are not likely in many cases, and the house will no doubt lose heavily. According to the return of the Cleveland Iron Master's

According to the return of the Cleveland Iron Master's Association the make of pig iron during December was 193,293 tons, being an increase of 6,600 tons over the previous month. In spite of this increase the stocks have been reduced to 652,445 tons, from 667,772 tons—a decrease of 15,327 tons. The total shipments during the month were 7,586 tons less than in No-vember; namely, 63,777, against 71,363 tons, and from this it may be inferred that the home demand has improved. The number of furnaces making Cleveland iron at the end of the year was 49, being 4 less than at the close of November. The The present stocks of pig iron are about 135,000 tons more than at the close of 1885.

the close of 1885. The Board of Trade returns just issued for December are not so favorable as those published for the preceding months, but so far as our trade with America is concerned there is no cause for complaint. The imports during the month have increased $\pm 57, 695$, whilst for the year they show a deficiency of $\pm 21,023,277$; but nearly $\pm 16,000,000$ of this is on account of reduced payments for foodstuffs. The exports for the month exhibit a falling off of $\pm 150,918$. On the whole twelve months the deficiency is only $\pm 680,505$, and when allowance is made for the generally lower range of values, it will be admitted that the volume of business transacted during 1887 must have been larger than in 1886.

must have been larger than in 1886. The following are the totals of the imports and exports during December and the 12 months :

& Colonia	l Produce.	Irish Proc	luce, dec.	-Re-exports & Oolonial	Mdse. dec.

The firmness in the grain trade has not relaxed. The wheat market cannot be described as animated, but it is certainly strong, and the week's business has been conducted on a basis of an advance of 1s. to 2s. per qr. The Imperial weekly average has already risen to 35s., being 43. 9d. per qr. more than for the corresponding week last year, whilst the season's average is 31s. 9d., against 30s. 10d. per qr.-a gain of nearly 1s. per qr. This growing steadiness, in the face of increasing supplies on passage and larger American stocks available, is a feature worthy of notice. It shows clearly that the trade has attained a much sounder position, and that confidence in the future is improving. Wheat growers have certainly good cause to congratulate themselves this season when they recall the condition last season. Then there was a steady and almost uninterrupted depreciation in values. Now, on the other hand, after some opening weakness the trade has been gradually hardening, and for the last six or eight weeks the recovery has been sure and steady, without a reactionary movement, whilst the fact that the market remains firm at the improvement speaks well for a continuance of the hard-ning tendency. Consumption, it may be presumed, is just now quite of an average character, and there is probably rather more speculative business than has been the case recently. The stronger inquive business than has been the case recently. The stronger inquivy for freights also in connection with the trade improvement now in progress has to be taken into con-sideration. Regarded as a whole, the prospect just now seems to favor the belief that the market in the immediate future will continue to harden, particularly if the weather remains as severely seasonable as at present.

Commercial and Miscellaneous News

IMPORTS AND EXPORTS FOR THE WEEK .- The imports of last week, compared with those of the preceding week, show an increase in dry goods and a decrease in general merchandise. The total imports were \$9,076,518, against \$8,598,054 the preceding week and \$3,965,059 two weeks previous. The exports for the week ended Jan. 18 amounted to \$6,261,634, against \$5,982,469 last week and \$7,141,137 two weeks previous. The following are the imports at New York for the week ending (for dry goods) Jan. 13, and for the week ending (for general merchandise) Jan. 11; also, totals since the beginning of the first week in January:

OREIGN	IMPORTS	AT	NEW	TORE.	
--------	----------------	----	-----	-------	--

For Week.	1884.	1885.	1986.	1887.
Dry Goods Gen'l mer'dise	\$2,591,920 5,904,991	\$2,267,455 3,967,458	\$2,930,695 6,320,331	\$3,218,942 5,857,576
Total	\$8,496,911	\$6,234,913	\$9,251,076	\$9,076,518
Since Jan. 1. Dry Goods Gen'l mer'dise	\$5,406.718 12,387,144	\$4,936,345 10,072,645	\$4,620,019 11,968,055	\$5.669,161 12,005,408
Total 2 weeks	\$17,793,862	\$15,008,990	\$16,588,074	\$17,674,572

In our report of the dry goods trade will be found the im-ports of dry goods for one week later. The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Jan. 18 and from January 1 to date:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1884.	1885.	1886.	1887.
For the week Prev.reported	\$5,955,765 6,474,595			\$6,261,634 5,982,469
Total 2 weeks	\$12,430,360	\$15,704,393	\$12,066,588	\$12,244,103

The following table shows the exports and imports of specie at the port of New York for the week ending Jan. 15, and since Jan. 1, 1887, and for the corresponding periods in 1886 and 1885:

EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

The following is a translation state of the Chrome Steel Works of Brooklyn, whose card is published in the CHRONICLE, have a neat little pamphlet which they circulate, entitled the "Jail-breakers' Catechism." Having sent some of these to South America an item appeared in *El Nacio*, a newspaper of Lima, which is considered by the proprietors of the Chrome Steel Works as a good joke. The following is a translation :

"Advertisements."—It is proven that the Yankees show wit in the recommending of their inventions and of the goods they offer for sale. We have before us a pamphlet of Mr. Chrome's Steel Works, who offers the best steel for all kinds of work, and as a proof he asserts that he and a friend of his have escaped four times from the penitentiaries of as many different cities in that country, thanks to his profound ac quire-ments and to the steel he employed to cut the safety-bars of the prisons mentioned. In order to prove finally that he has no rival, he states that he is at present in the penitentiary in Brooklyn, and that his escape is impossible because the doors and safety-bars of the cells are of steel made by himself.

of steel made by himself. —The Janual statement of the Liverpool & London Globe Insurance Company, published elsewhere, shows the total assets in this country to be now \$6,639,780, an increase of over \$700,000 above last year's figures. The surplus has attained the large amount of \$3,077,528 25, an increase of \$500,000 over last year. Of the assets \$1,380,000 are invested in real estate, \$1,874,493 51 in loans on bond and mortgages, and \$1,929,100 in U. S. Government bonds. The statement in every item offers an additional proof of the progressive and conservative policy of this company in the thirty-ninth year of its business in this country, of its business in this country,

THE CHRONICLE.

FIRST MORTGAGE 6 PER CENT 30-YEAR BONDS OF THE

KALAMAZOO STREET RAILWAY CO., Kalamazoo, Michigan.

Interest May 1 and Nov. 1, at the Central Trust Co.,

NEW YORK. The Company has been in operation two years, and by its annual report published Jan. 12, 1886, shows net earnings of \$11,953:30 for the previous eighteen months, leaving a surplus of \$2,953.30 over and. above all charges and interest on the bonds.

The Company, through its Secretary, reports May 12, 1886, that the earnings for January, February, March and April are 68 per cent morethan the corresponding months last year, which is sufficient to pay interest on the bonds and a dividend on the stock.

We know of no better investment in the market. PRICE PAR AND INTEREST.

GRISWOLD & GILLETT

NO. 3 WALL STREET, NEW YORK.

WE OFFER AT 106 AND INTEREST THE BALANCE: UNSOLD OF THE FIRST MORTGAGE 6 PER CENT GOLD BONDS

OF THE

FORT SMITH & VAN BUREN BRIDGE CO. THESE BONDS ARE GUARANTEED PRINCIPAL AND INTEREST BY THE

ST. LOUIS & SAN FRANCISCO RAILROAD CO.,

WHOSE 1ST PREFERRED STOCK IS SELLING AT 116

GRISWOLD & GILLETT. NO. 3 WALL STREET, NEW YORK.

GRAPE CREEK COAL COMPANY, Of Danville, III.

FIRST MORTGAGE 6 PER CENT SINKING FUND BONDS, DUE 1916.

INTEREST PAYABLE APRIL AND OCTOBER, AT THE FARMERS LOAN AND TRUST CO., N. Y., TRUSTEES.

These bonds are a first and only lien upon one of the most valuable and well-established coal properties in the State of Illinois, consisting of over 2,000 acres of coal land, 122 houses, a well-stocked store, ample farm buildings, and all the machinery, plant and appliances-on which there is no indebtedness whatever except this issue of bonds.

Of this issue \$125,000 are set aside and held in trust by the Farmers Loan & Trust Company, of New York, and cannot be used for any other purpose than for buying more coal lands, building more houses and making additional permanent improvements to the property \$300,000 of these bonds have already been sold, and are held for investment by some of the most conservative investors in this city State, and throughout New England, including many of the leading Savings Banks, Bank Presidents and Trustees.

A sinking fund is provided in the mortgage for the payment to the Farmers' Loan & Trust Company of \$20,000 per annum, beginning April 1, 1891, for the redemption at par of that amount of bonds each year, until the entire issue is redeemed and canceled.

The rental from the houses and the profits from the store, screenings and the farms will more than pay the interest on the entire issue of bonds without touching the profits from th sales of_coal.

For the two years and eleven months ending April 1, 1886, the company earned \$169,462 and 51-100, or nearly 6 per cent on \$1,000,000, and with the additional plant to be put upon this property it should earn 6 per cent on \$2,000,000, while the interest charges are only \$30,000 yearly.

We offer a limited amount of these bonds to investors that are seeking safe securities for investment, and we look upon them, at the price offered, as the most profitable investment in the market, paying the investor about 6 1-2 per cent interest.

Price, 95 and accrued interest.

The Money Market and Financial Situation .- While the general outlook remains good, there is yet no particular animation in commercial or financial circles, and the markets have rather a halting appearance. There is little doubt that the sitting of Congress has something to do with this, and as the short session this year should terminate in March, the Country will have but a little time to wait before the result of Congressional legislation will be known and its effect upon business can be fairly estimated.

At the Stock Exchange the activity is limited almost entirely to specialties, in which the parties with inside information have control of the market. It is impossible for the average stock operator to deal with safety in such specialties as Rich. mond Terminal, East Tennessee, New York & New England, &c., if important negotiatio ns are pending, unless he has reliable information of what is going on from some person behind the scenes.

The several railroad reorganizations so successfully completed in 1886 will pave the way for others not yet finished, and with each of these corporations fairly reorganized, and its new secu-rities dealt in at the Stock Exchange, our market has one obstacle removed from the path of healthy progress and more

legitimate speculative transactions. The open market rates for call loans during the week on stock and bond collaterals have ranged from 2 to 6 per cent, the usual rate to stock brokers being 4@5 per cent; to-day the rates were 3@5 per cent. Prime commercial paper is quoted at 5.5% ber cent at 5@6 per cent.

at 5@6 per cent. The Bank of England weekly statement on Thursday showed a gain in specie of £440,000, and the percentage of reserve to liabilities was 41.73, against 38 last week; the discount rate remains unchanged at 5 per cent. The Bank of France lost 2,400,000 francs in gold and gained 300,000 francs in sllver. The New York Clearing House banks, in their statement of Lawyer 15 showed an increase in surplus reserve of \$3,825,125

January 15, showed an increase in surplus reserve of \$3,825,125, the total surplus being \$18,611,800, against \$14,786,675 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks:

	1887. Jan. 15.	Differ'nces fr'm Previous Week.		1885. Jan. 17.
Loans and dis. Specie Circulation Net deposits Legal tenders.	88,088,000 7,872,200 374,187,600	Inc. 2,578,800 Dec. 24,600 Inc. 4,048,700	9,804,000	98,485,600 11,311,600 353,726,100

Surplus	\$18,611,800	Inc. \$3,825,125	\$33,015,950	\$51,148,775

Surplus......] \$15,611,800[Inc. \$3,825,125] \$33,015,950] \$51,148,775 Exchange.—Sterling exchange has generally been quite dull during the past week, though there has been some demand consequent upon foreign transactions in our stocks. This, together with the fact that there has been no large supply of commercial bills, has kept up rates pretty well, the posted rates being advanced to $483\frac{1}{2}$ and $487\frac{1}{2}$. A small amount of francs arrived from France early in the week, and this is believed to be the last amount likely to arrive for the present. To-day the rates on actual business were as follows, viz.: Bankers' 60 days' sterling, $482\frac{2}{4}@483$; demand, $486\frac{2}{4}@487$; Cables, $487\frac{1}{2}@487\frac{2}{4}$. Commercial bills were $481\frac{1}{4}@482$; Continental bills were: Francs, $523\frac{2}{4}@524\frac{2}{3}$ and $521\frac{1}{4}@521\frac{1}{5}$; reichmarks, $94\frac{2}{3}@94\frac{4}{3}$ and $95\frac{1}{3}@95\frac{1}{4}$; guilders, $39\frac{7}{3}@40$ and $40\frac{1}{3}$ $@40\frac{1}{4}$.

State and Railroad Bonds .- State bonds have been pretty State and Kallroad Bonds.—State bonds have been pretty active, the dealings covering quite a large number of issues. Virginia deferred bonds were again somewhat prominent, being active and higher. They close to-day at $15\frac{1}{5}$; Louisana consol. 4s at $80\frac{8}{5}$; Tennessee settlement 3s at $78\frac{8}{5}$. Railroad bonds have had a fairly good business, and the market has been pretty strong as a rule, though showing some irregularity. There has been no decline of moment, however, and theough the changes as a rule are not very important they

irregularity. There has been no decline of moment, however, and though the changes, as a rule, are not very important, they are generally in the direction of a higher range. Nickel Plate bonds, especially the 2ds, have been quite conspicuously strong on the common reports of a settlement with Lake Shore and the reorganization of the company. Besides these there has been no special activity, though some of the Wabash and Texas & Pacific bonds have been quite strong and higher, and Hock-ing Valley bonds declined on Thursday in consequence of an unauthorized rumor of an over-issue of bonds.

unauthorized rumor of an over-issue of bonds. **Railroad and Miscellaneous Stocks.**—The market has been generally firm during the past week, with conspicuous strength in some stocks, and in the early part of the week some activity was noticeable. Taken as a whole, however, the mar-ket has not been very active, the dealings being largely con-fined to a few specialties, the fluctuations in which have given the tone to speculation. In fact, except for the rise in these stocks there would be little change in prices, as the balance of the market has been dull and fea-tureless, and there have been few influences of general signifi-cance. The agitation about the Inter-State Commerce bill seems to have subsided, and its passage by the Senate last Friday had little effect on prices. The strike among the coal handlers in New Jersey does not appear to influence prices greatly, though the rumors circulated at times of its termina-tion have been used to bull the coal stocks. The movement in the coal stocks has been one important feature of the week's speculation, they having been pushed rapidly up by the bulls, who have freely bought Jersey Central, Lackawanna and Reading. Various rumors have been circu-lated in connection with this movement, though nothing definite has been developed to account for the rapid rise. In the case of Jersey Central, which on Thursday lost a great part of the improvement, it is rumored that the buving is for con-

the case of Jersey Central, which on Thursday lost a great part of the improvement, it is rumored that the buying is for con-

of the improvement, it is runnered that the buying is to con-trol by strong parties. Richmond Terminal has again been very active and on Sat-urday, the 15th, was advanced very sharply, touching 53 on Monday morning, from which point it declined almost as sharply, and has since been rather irregular. The terms of the deal with East Tennessee were announced early in the week, and the announcement was followed by weakness in Terminal and the announces stocks, though this was partly the effect of and East Tennessee stocks, though this was partly the effect of a natural reaction, and partly due to the fact that a large increase in Terminal stock is to be made to take up the remaining Richmond & Danville stock.

Another report of the week was the Nickel Plate settlement with Lake Shore, whereby the latter company agrees to guar-antee a new issue of 4 per cent bonds to take up the old issues of Nickel Plate bonds, and the present Nickel Plate stocks are to be assessed; the latter declined after this announcement. New England developed much strength in the latter part of the media theorem the strength in the latter part of How has the week, though there was no known cause for the advance. Hocking Valley declined sharply on Thursday on a rumor, afterwards denied, of an over-issue of bonds.

Railroad Intelligence.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Socks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., February, April, June, August, October and December, and is fur-nished without extra charge to all regular subscribers of the CHRONICLE. Extra copies are sold to subscribers of the CHRONICLE at 50 cents each, and to others at \$1 per copy.

ANNUAL REPORTS.

Colorado Central Consolidated Mining Company. (For the year ending October 31, 1886.)

The annual report of the President, Mr. Paul Lichtenstein, read at the annual meeting, contained the following remarks:

Balance in treasury. Output. Interest on deposits and U. S. bonds. Dividends on treasury stock.	\$84,074 279,173 1,423 2,880	0007 440
Paid lessees, for labor and supplies Permanent improvements Office expenses, printing and salaries Legal expenses and litigations Taxes and miscellaneous expenses G. W. Hall's claim Dividends paid	10,212 16,500	\$367,452
		949 137

Balance in treasury \$118.414 Cleveland & Canton Railroad.

(For the year ending Dec. 31, 1886.)

The affairs of this reorganized company having more than ordinary interest, and the details of its late history and present ituation being unknown to many readers, the President's seport is published at length on a subsequent page. The statement of earnings and expenses in 1886 as compared with 1885 is as follows.

with 1885 is as follows :

Gross earnings	1886.	1885.	Increase.
Operating expen., including salaries	\$358,219	\$291,916	\$66,302
taxes and insurance		258.748	22.791

report on another page.

Lehigh Valley Railroad.

(For the year ending November 30, 1886.)

At the annual meeting the President's report was read, but no official copy has yet been obtainable. The report stated that the anthracite coal tonnage for the fiscal year ending November 30 was 6,656,474 tons, and the bituminous 45,262 tons, a total of 6,701,736 tons. In 1885 the total coal tonnage was 6,812,430, and in 1884 6,068,967, while the largest tonnage in the previous history of the company was 6,592,646 tons in 1888. tons in 1883.

tons in 1883. In the general expenses were included State taxes, loss on Morris Canal and estimated depreciation. The capital account at the end of the fiscal year showed, preferred stock, \$106,300; common stock, \$32,112,300; bonded debt, \$25,458,000. On De-cember 1 there were drawn for payment 201 consolidated six per cent sterling bonds of \$1,000 each, reducing the bonded debt by that amount. During the year \$460,000 was expended upon the construc-tion account for building the Hazleton & Delaware branch, new equipment, &c. The Company purchased \$200,000 of the first mortgage bonds of the Carthage & Adirondack Railroad Company to enable that company to complete its line into the

Company to enable that company to complete its line into the iron ore region of the Adirondack. This will furnish tonnage for the Lehigh Valley for a three hundred mile haul.

Announcement is made of the arrangement entered into be-tween the Lehigh Valley and the Pennsylvania, by which the trains of the former run into Pottsville. It is also stated that the management of the Southern Central Railway Company of New York has been undertaken by the Lehigh Valley. The latter company owns a large amount of the securities of the company, and expects to obtain better results by combined in preference to independent management. The income account for the year was as follows -

GENERAL INVESTMENT NEWS.

Cameron Coal.—The Farmers' Loan & Trust Company, the trustee, gives notice that it has canceled all the old mort-gage bonds of this company.

gage bonds of this company. Central Iowa.—The January coupons of the first mortgage sevens of the Central Iowa Railroad Company have not been paid. Boston advices state that the company has failed to earn its interest, but some of the bondholders claim that the interest on the bonds was earned by the main line, but that part of the money was diverted to pay interest on branch line bonds.

Chicago Milwaukee & St. Paul.—The income bonds of 1886 are payable in currency and have a sinking fund of 4 per cent beginning January, 1889, which is applicable to the pur-chase of bond at 105; and if they are not purchased at that price they may be drawn and paid at 105. The bonds are convertible into common stock at par within 60 days after any dividend day. The company agrees at any time after Jan. 1, 1889, at the request of a majority of outstanding bonds, to execute a mortgage covering the company's line from Chicago to Kansas City, including the bridge over the Missouri River at Kansas City and terminal facilities in that city. If a 2d mortgage should be placed on any part of the company's road the property above named shall be secured for the benefit of income-bond holders. Columbus Hocking Valley & Toledo.—Mr. Greene, Vice-Chicago Milwaukee & St. Paul.-The income bonds of

income-bond holders, Columbus Hocking Valley & Toledo.—Mr. Greene, Vice-President and General Manager of the Columbus Hocking Valley & Toledo Ruilroad, after consultation with President Shaw, furnished the following statement for the Assoclated Press: "The rumor about a shortage in the Columbus Hock-ing Valley & Toledo Railway account is false." Mr. Hum-freville, of the company, said: "There is not a word of truth in the report of any alleged unauthorized bond issue. There is none and there has not been any." Denver & Rio Grande.—The board of directors of this

is none and there has not been any." Denver & Rio Grande.—The board of directors of this company have unanimously resolved that it will be greatly to the interests of the company to construct the proposed lines from Red Cliff to Aspen via Glenwood Springs (with a branch to the coal fields) about 130 miles, and from Montrose to a point near Ouray about 31 miles. Much money has already been expended on these lines by the old company, and this expenditure (as well as valuable rights of way and privileges) will be lost if the construction be not carried on promptly. This will require the issue of the first consolidated 4 per cent gold bonds reserved in the treasury for this and similar pur-poses, at the rate of \$20,000 per mile of the new road, as pro-vided in Article I. of the consolidated mortgage. A form of assent has been forwarded to the registered holders of pre-ferred stock for them to authorize under date of Feb. 15 the issue of the required bonds, and they will, no doubt, return their assents promptly. their assents promptly.

Des Moines & Fort Dodge.-Following is a statement of the earnings of this road as specially obtained by the CHRONI-CLE :

		December Year.		ear.

Flint & Pere Marquette.—In the United States Court at Detroit the common stockholders of the Flint & Pere Mar-quette Railroad have brought suit against the company. It is claimed that the reorganization of 1880 was illegal, and that since that time the road has been run in the interest of the holders of preferred stock.

holders of preferred stock. Fort Worth & Western.—A dispatch from Fort Worth says that there will be a meeting of the stockholders of the Fort Worth & Western Railway at Fort Worth, on Saturday, March 19, for the purpose of authorizing the issuance of a first mortgage on the corporate property and franchises or the com-pany to secure the payment of the bonds to be issued running forty years from their date, drawing interest at the rate of 6 per cent per annum in gold, and limited in amount to \$15,000 per mile of railway, which indebtedness is necessary for the construction, equipment, completion and operation of the

road. The directors are nearly all New York capitalists-H. W. Slocum, W. W. Lawrence, Calvin E. Brcadhead, George H. Sheldon, E. A. Morse, R. M. Winne, W. F. Lake, B. B. Haddock and Daniel Butterfield.

118

Haddock and Daniel Butterfield. Illinois Central.—At Chicago, Jan. 18. a special meeting of the stockholders of the Illinois Central Railroad Company was held for the purpose of increasing the capital stock of the company from \$29,000,000 to \$30,000,000. Shareholders regis-tered Jan. S have the right to subscribe for the new stock at the price of \$136 per share, none to be disposed of at a less price. The proceeds are to be applied to the payment of \$500,000 for elevator property at Chicago, and for double tracking the line to Kankakee, and buying car equipment. Lake Frie & Western.—At the close of business on Satur-

tracking the line to Kankakee, and buying car equipment. Lake Erie & Western.—At the close of business on Satur-day, Jan. 22, when the time expired for depositing securities for the reorganization of the Lake Erie & Western Railway, the following had been received by the Central Trust Com-pany: 75,000 shares of stock out of a total issue of 77,200 shares; \$989,000 of Lafayette Bloomington & Muncie income bonds out of a total issue of \$1,000,000; \$1,479,000 of Lake Erie & Western incomes out of a total of \$1,485,000; \$5 0,000 Sandusky division bonds cut of a total of \$580,000 and all the first mortgage bonds of all the divisions. The foreclosure sale having been confirmed, this large deposit of securities under the plan issued by Gen. Thomas and Mr. Nelson Robinson ensures the reorganization of the company accordingly. Mr. Thomas gives notice to first mortgage bondhol lers to present their bonds on Jan 25 at the Central Trust Co. and receive pay-ment in full. ment in full.

ment in full. Michigan & Ohio.—This company is to be reorganized and will consolidate with the Cincinnati Jackson & Mackinaw. The latter is an incompleted road from Franklin, Obio, north to Eaton, and projected to extend 70 miles north to Jackson on the Michigan & Ohio. A syndicate has been formed to buy the Cincinnati Jackson & Mackinaw after its completion. The syndicate will then issue new securities, a first 5 per cent 50 year mortgage at the rate of \$10,000 per mile, with \$30,000 of common and \$30,000 of preferred stock. The issue of bonds will be \$3,400,000.—R. R. Gazette. Nachrille Chattanages & St Lonis —The gross and net

N.Y. Chicago & St. Louis (Nickel Plate).—The proposed terms of adjustment for this company have not been officially announced, and Mr. Depew is reported as saying that nothing new has been settled. According to the Street reports accepted as approximately correct, the Lake Shore is to guarantee a new fifty-year 4 per cent first mortgage bond of the Nickel Plate to the amount of \$20,000,000, the proceeds of which will pay the \$15,000,000 of present first mortgage bonds at par and accrued interest; also the outstanding \$2,000,000 of second mortgage bonds, which were originally turned over to the Lake Shore for security of the floating debt of from \$1,000,000 to \$2,000,000. There are also \$4,000,000 of equipment bonds outstanding, which are secured on the equipment, and which will necessarily have to be paid. The Nickel Plate, according to this statement, is to be reorganized, the stocks reduced one-half, to \$11,000,000 of preferred and \$14,000,000 of the common, both of which are to be assessed for an amount necessary to purchase needed equipment and put the road in repair. Other variations of the reported terms say that the first mortgage bonds will receive \$12,000,000 of the new 4 per cents and the balance in cash; also that the amount raised by assessment on the stock will be \$5,000,000. N. Y. Chicago & St. Louis (Nickel Plate) .- The proposed

N. Y. Stock Exchange.—The Wheeling & Lake Erie Rail-way Company asks the Stock Exchange to list its \$3,000,000 first mortgage bonds and 36,000 shares of capital stock.

Northern of New Jersey.—The report of the Northern Railroad of New Jersey.—The report of the Northern Railroad of New Jersey, leased to the New York Lake Erie & Western, as submitted to the State Railroad Commissioners for the year ended Sept. 30, shows: Gross, \$322,316; operations, \$241,806; other income. \$8,593;] charges, \$39,265; net income, \$49,738; dividends, \$40,000; sinking fund, \$10,000; surplus September 30, 1285, \$20,914; surplus September 30, 1886, \$20,652; cash, \$18,100.

Oregon & California.—It is reported now that Mr. C. P. Huntington has obtained control of the Oregon & California Railread by the conclusion of a definite contract between Mr. Andrew Haes, acting for the London committee of bond holders, and Mr. Huntington, on behalf of the Southern Pacific Company and the Pacific Improvement Company. The negotiations for the sale have been pending for a long time pact. By the terms of the accrement as reported the The negotiations for the sale have been pending for a long time past. By the terms of the agreement, as reported, the Oregon & California first mortgage bondholders are to receive a new 5 per cent bond at par, guaranteed by the Southern Pacific, and £4 sterling in cash for back interest. The pre-ferred stockholders will receive one share of Central Pacific stock for every two shares of their own stock, together with four shillings sterling for each preferred share, and the com-mon stock holders will get one Central Pacific share for every four of their own shares, together with three shillings ster-

ling for each common share. This will require \$7,750,000

ling for each common share. This will require \$7,750,000 of Central Pacific stock, as there are \$12,000,000 of Oregon & California preferred and \$7,000,000 Oregon & California com-mon stock. At the Southern Pacific office it is said that the announcement is premature, the transaction not yet having been definitely closed. —Mr. Huntington is reported as saying to a reporter that "the purchase of the Oregon & California will not involve the issue of any new Central Pacific stock. The amount of Central Pacific stock now outstanding is \$100,000,000. Some of this outstanding stock not in the treasury will be used to buy the Oregon & California road. The payment of the cash is mostly provided for by the Haes]party."

Oregon & Trans-Continental.—A statement of the assets and liabilities of the Oregon & Trans-Continental Company on January 10, 1887, has been issued. It shows total assets of \$22,873,193, liabilities \$7,137,500, net assets \$15,735,693. The details vary but little from those published in the CHRONICLE of May 29, on p. 664.

Pacific Railroad Debts.—Mr. Manning has written the following reply to the Senate resolution of Jan. 6, calling upon him for information as to the sums of money owing to the United States by the Pacific railroad companies:

following reply to the Senate resolution of Jan. 6, calling upon him for information as to the sums of money owing to the United States by the Pacific railroad companies: TREASURT DEPARTMENT, WASHINGTON, D. C., Jan. 17. The senate profession of the senate profession of Jan. 6, 1887, calling on this Department for Information as to the sums of money which were owing to the United States by the bond subsidized Pacific railroad com-panies, respectively, on the 1st day of January, 1897, with details of all are due and to become due, principal and interest, under existing law, severally and collectively from said companies, and what difference. In reply due to the Treasury if Senate bill No. 1200 isolation and the sums when a second of the treasury if Senate bill No. 1202 isolation and the senate bill result to the Treasury if Senate bill No. 1202 isolation and the treasure to Jan. 1, 1897, on subsidy bonds issued to said companies, was \$70,554,252 C, of which there had been repaid by the companies at that date the 'sum of \$21,552,144 14, leaving due on account of interest the sum of \$49,302,148 8. There will be due on the same account at maturity of the subsidy bonds september 11, 1897, the further sum of \$13,406,921 83, making a total of \$92,709,103 86 due on account of interest the sum of \$49,302,148 8. There will be due on the further sum of \$13,406,921 83, making a total of \$92,709,103 86 due on account of principal of these bonds at maturity the sum of \$64,823,512, making an aggregate indebtedness due and to become due of \$157,328,615 36. Treycard to the inquiry as to what difference will result to the Treas-my fith Senate bill No. 1,200 should become a law, it may be stated that the special method prescribed by the bill for obtaining the con-stat anomal payment adequate to extinguish both principal and inter-est of the indebtedness of the companies, insufficient to cancel even the inferest, being sufficient to provide for the payment of only eleven-twelffus of the informatio

To a part of Mr. Outhwaite's inquiry in the House of Repre sentatives—that in which he asked for the sums of money which were owing to the United States on the 1st day of Jan-uary, 1887, the *Herald* dispatch from Washington gives the following figures:

4

\$100.675 Interest and other charges amounted to \$105,649 and dividends on preferred stock to \$33,500; a total of \$139,149, leaving a surplus of \$941 for the year.—*Railroad Gazete*.

Portland & Ogdensburg.—The annual meeting of the Portland & Ogdensburg Railroad Company (which is the old corporation), held at Portland, passed the following vote unanimously :

unanimously: Voled, That the President be, and hereby is, authorized to execute and deliver, in the name and in behalf of the Portland & Ogdensburg Railroad Company, a deed releasing and conveying all right, tile and interest of this corporate property, real and personal, of every kind and description, to the Portland & Ogdensburg Railway Company, and that said eeed be in the substantial form herewith submitted. The choice of directors was passed by and the old board hold till their successors are elected. Then the meeting of the Portland & Ogdensburg Railway, which is the new corpo-ration, was held. The whole number of votes, 23,241, were cast for the following directors: Samuel J. Anderson, Horatio N. Jose, Weston F. Milliken, Charles H. Amsden, Stephen R. Small, Francis Fessenden, Frederick N. Dow, Willard H. Woodbury, Sidney W. Thaxter, Charles J. Chapman. The road was reported to be in good condition, many improve-ments and repairs having been made during the year. The earnings for the year ending Sept. 30 were as follows: 1885-86. 1384-85.

Earnings Expenses	1885-86. \$361,376	1884-85. \$361,993 262,836
Net earnings	\$121,782	\$99,157

Richmond & Alleghany .- A circular recently issued by the committee to those who signed the agreement of reorganiza-tion said that by reason of the insufficient earnings of the road they were unable to see how the agreement for reorgan-ization could be carried out and the interest on the proposed road they were unable to see how the agreement for reorgan-ization could be carried out and the interest on the proposed new first mortgage bonds paid on the first day of July next. The aggregate of receivers' certificates is \$493,717, car trust cer-tificates \$376,000, and other liens \$157,000, making in all \$1,-026,717, an amount involving an annual first charge of about \$60,000. The committee earnestly recommends that the exist-ing agreement for reorganization shall be modified as follows: 1. The new first mortgage bonds shall be issued minus coupons for the years 1887 and 1888. 2. For the coupons so withheld, holders of said bonds shall receive an equal amount of the preferred stock of the new company; and to provide for the same an assessment of ten per cent in kind upon the entire amount of the new preferred stock shall be made and become a part of the said agreement. The assessment already paid to the committee by the holders of the old common stock, about one hundred thousand dollars, is to be applied as provided for in the existing agreement. Whatever may be the net earn-ings of the reorganized road for the years 1887 and 1888 will be applicable and applied to the extinguishment of receivers' certificates and other prior indebtedness. On the basis of present earnings, those of 1887 and 1888 will probably pay about \$300,000 of receivers' certificates and make the \$990,000 of preferred stock, which will be in the treasury of the com-pany, an available asset.¶

Under this alteration and amendment, the preferred stock of the reorganized company will be issued as follows:

To holders of old first mortgage bonds, 37 per cent, or..... \$1,850,000 To holders of old second mortgage bonds, 43 2-10 per cent, or 2,160,000 Leaving in the treasury of the new Co. 19 8-10 per cent, or. 990,000 Total 100 per cent, or..... .. \$5.000.000

Calvin S. Brice, Samuel Thomas and George S. Scott, as repre-sentatives of the East Tennessee and Richmond and Danville sentatives of the East Tennessee and Richmond and Danville interests. It was anounced also that the collateral trust loan for \$3,500,000, from which the Terminal Company will make its cash payment of \$4,400,000 for the control, had been taken by the First National Bank in behalf of a syndicate formed some time ago for the purpose. Besides the bank, the syndi-cate comprises Messrs, Brice and Thomas, who take two mil-lions of the bonds; John H. Inman and John D. Rockefeller, one million each; George S. Scott and Moore & Schley, \$500,000 each, and some others. The price at which the bonds were taken was not made public, but it is understood that they will be placed on the market at about par."

Rome Watertown & Ogdensburg.—The directors have de-clared a dividend of 21% per cent, payable Feb. 15, 1887. The following are the earnings for three months ending Dec. 31, 1885 and 1886:

Earnings			Increase, \$278,812 110,659
Net	\$384.106	\$216,552	\$167,553
Income from other sources	7,914	7,455	459
Total income	\$392,020	\$224,008	\$168,012
Fixed charges, rentals and taxes	255,571	157,938	97,612
Net income	\$136.449	\$66.050	\$70.399

Only \$90,000 of the income bonds of the company are out-standing, and in accordance with the terms of the mortgage-securing them, the directors have given notice that they have decided to retire them.

Texas & Pacific.—Application will be made next week to the U. S. Circuit Court at New Orleans for the foreclosure of the various divisional mortgages that are in default. This is in accordance with the reconstruction plan, and has been ordered by the Reorganization Committee. At the same time applica-tion will also be made for an order on the Tex. & Pac. Railway receivers for the payment of all interest in arrears on the first mortgage bonds of the company, the amount of bonds out-standing being \$3,784,000. The March, 1886, interest was bought by the Fidelity Trust Company, and the September-interest has not yet been paid.

interest has not yet been paid. Troy & Boston-Fitchburg.—At the annual meeting of the Troy & Boston Railroad Company, held in Troy, several Vanderbilt parties were chosen directors and President Robin-son was re-elected President. The Troy *Telegram*, in com-menting upon the proposed consolidation of the Troy & Boston and Fitchburg roads, says: "While there is no longer any doubt as to the consolidation, it is still a fact that the arrange-ments have not yet been entirely completed. This is due to a certain hesitancy on the part of the first mortgage bondholder, and one of the trustees of the first mortgage bonds of the Troy & Boston Company, is understood to be opposed to the con-summation of the scheme as offered by the company." * * * "The Fitchburg road agrees to take the Troy & Boston if it is handed over clear of incumbrance, or it will exchange Fitch-burg four per cent bonds for the bonds of the Troy & Boston road."

Wabash St. Louis & Pacific.—James F. Joy, Thomas H. Hubbard, Edgar T. Welles and O. D. Ashley, the purchasing committee of the bondholders of the Wabash St. Louis & Pacific Railroad Company, have called on the holders of stock, general mortgage bonds and collateral trust bonds of that com-pany for some expression of opinion as to the advisability of paying an additional million of dollars to the Circuit Court for the Eastern District of Missouri and taking the property west of the Mississippi River out of the hands of its present receivers. The committee paid \$625,000 to the Court after the sale, and is strongly in favor of regaining the control of the property west of the Mississippi. The Court has ordered the \$1,000,000 to be paid within sixty days from December 31.

—The thirty-seventh annual statement of the Manhattan Life Insurance Company is published in this issue of the CHRONICLE. Under its new President, Mr. James M. McLean, the Manhattan continues to sustain its long record of pros-perity, having during the last year participated in the general business improvement of the country, and showing a substan-tial gain in all directions. With a surplus of nearly \$3,750,-000 as regards policy-holders, the Manhattan has surely the best possible guarantee for a prosperous and satisfactory future. future.

-Messrs. Poor & Greenough issue a summary of railroad construction in 1886. The total mileage built is stated as 8,648 miles—in New England, 41 miles; the Middle States, 374; in Central Northern States, 1,231; South Atlantic group, 1,018; Mississippi Valley, 339; Southwestern States, 2,427; Northwest-ern States, 2,578, and Pacific States, 637 miles. The total mileage in the United States is now placed by them at 137,615 miles. miles.

-Messrs. John H. Davis & Co., 10 Wall Street, are offering for sale a small amount of the 50-year first mortgage bonds of the Minneapolis & Pacific Railroad. A circular and map of the road are issued by Messrs. Davis & Co., and they strongly recommend the bonds.

-Mr. Joseph J. Martin, of 10 State Street, Boston, has issued his excellent pamphlet, entitled "Stock Fluctuations," This annual is a standard work, and ought to be in the hands of every person at all interested in stocks and bonds sold in the Boston market.

The Ontario Silver Mining Company has declared its 128th dividend, being 50 cents per share (or \$75,000), for December, payable at the transfer agency of Messrs. Lounsbery & Co., 15 Broad Street, on the 31st inst.

-The Homestake Mining Company has declared its 102d idend (for December), payable at the transfer agency of dividend (for December), payable at the transfer agency Messrs. Lounsbery & Co., Mills Building, on the 25th inst.

-Mr. John B. Manning, of 14 Wall Street, issues on a card a neat statement of the book values and dividends of New York bank stocks on January 1, 1887.

Reports and Documents.

CLEVELAND & CANTON RAILROAD.

DIRECTORS' REPORT TO THE STOCKHOLDERS FOR THE YEAR ENDING DECEMBER 31, 1886.

ENDING DECEMBER 31, 1886. GENTLEMEN: —It is now eighteen months since your read left the hands of a receiver and came back to your own manage-ment. At that time its treasury was empty, its credit gone, and it was heavily in debt. The gross earnings were but very little in excess of the operating expenses. The outlook was in the highest degree discouraging, and to add to the natural difficulties of the management, useless quarrels and conten-tions were fomented among the stockholders, at the very out-set, by parties desirous of obtaining control of your property, and this same factious spirit has been kept zealously alive by the same parties during all this period, and has manifested itself by a bitter and unceasing opposition to every plan of im-provement attempted by your directors. Many expensive lawsuits have been instituted in the courts of Ohio, including several injunctions and a *quo warranto* suit, all obviously intended to thwart and embarrass the efforts of your directors towards carrying out their earnest ideas and convictions with regard to your property, and to create among the stockholders a feeling of distrust and want of confidence in the motives and intentions of the management.

a feeling of distrust and want of confidence in the motives and intentions of the management. This unfortunate spirit of opposition and lack of harmony have done much to increase the difficulties of your directors and obstruct their efforts to develop the earning capacity of your property, and have caused serious delays in many important undertakings which they consider vital and hoped speedily to accomplish—such an undertaking, for instance, as a change of gauge, which could have been accomplished a year ago on the most advantageous terms, for money was then at a low rate, and rails, rolling stock, equipment and other railroad supplies were at bottom prices—would now, on account of recent and still continuing advances in prices, cost us at least one hundred and fifty thousand dollars more than at that time.

At that time. Notwithstanding discouragements and opposition, however, your directors have carefully looked after the affairs of your company, and have done what they could to develop and improve the property and to save and increase its income, so that to-day we can with confidence and pleasure state that the condition of the roadbed and equipment has been very much improved, and compares favorably with the best roads in Ohio. The net earnings from operation are more than doubled, and the communities through which the road passes are very much better served. We have obtained a perfect title to the property, and it is free from all debts and encum-brances excepting its obligations to the terminal and equip-ment companies, and all bills are paid promptly every month. We have, in fact, demonstrated that you have a good property capable of being made very valuable if you will all act in harmony, so that some important and necessary changes here in suggested can be undertaken at once and speedily completed.

harmony, so that some important and necessary changes herein suggested can be undertaken at once and speedily completed. Since the first of the year the business of the road has been increased to the utmost capacity of our equipment, and we feel sure that with more equipment the road can do a much larger business, but we cannot recommend the policy of pur-chasing or leasing more narrow-guage rolling stock, for we do not believe that there is a stockholder who still thinks that a narrow-gauge road in Ohio can permanently serve the pub-lic to the test advantage or pay dividends to the stockholders. There are many reasons why a change of guage is a neces-sity, the principal ones being that we cannot, with profit, ex-change freight in connection with standard guage roads, and that shippers dislike to have their goods rehandled in transit or to pay the charge for transfer; manufacturers, therefore, refuse to build on our line because they are therefore put to a disadvantage with their competitors; your road is therefore deprived of that important element of local growth in busi-ness and population which makes a railroad permanently suc-cessful. The general freight business of the country is gradu-ally increasing, and as a standard road we can reach new markets for our coal and other freight, we can better compete for our share of general business and can handle the same at much less cost than as a narrow-gauge. But it is coal on which we must largely depend for our great increase in business. We are the shortest line from any large coal fields in Ohio to Cleveland, a city of 225,000 inhabitants, and for supplying the domestic demand—make us essentially a coal road, and what we need is to prepare ourselves to handle coal in larger quantities and at a minimum cost. To do this we need a 60-lb steel rail, 25-ton coal cars and heavy locomotives, in short a standard-gauge read, with the best standard-gauge equipment. Another important matter which we feel it our duty to bring to the attention of the stockholders at

standard-gauge equipment. Another important matter which we feel it our duty to bring to the attention of the stockholders at this time, is the relation of your company to the Cleveland Terminal and Bos-ton Car Trust associations and Boston Equipment Company. While it is very gratifying to note the large increase in our earnings the past year, it is important to bear in mind the fact that we have used and are still dependent upon terminal facilities and rolling stock to which we have no title whatever, and which were leased by these trust companies to the Con-notton Valley Railway Company, at very high rentals, which

IRONICLE. [Vor. XLIV, your directors did not feel justified in assuming, and which, as a matter of fact, they have never paid, and the receiver's certifi-cates issued in payment of such rentals before the property came into the hands of your directors have not yet been paid, and are still in the nature of a lien against your company. We have always desired, and still desire, to have a settlement with the owners of the Terminal and Equipment Trusts and decide what amount we shall pay—how to pay it and reduce the rate of interest—and thought we had an equitable plan to do this last spring. By the terms of that plan, we intended to settle with the Terminal and Boston Car Trust Associations at par and with the Boston Equipment Company at about 75 per cent—giving in payment the 5 per cent notes of the company, redeemable at any time within five years, namely:—for each \$1,000 of debt we gave a note for \$800 and ten shares of preferred stock (the market price was then \$19 to \$21 a share). After we had settled with about one-third of the owners of the trusts and saved to the company of over \$75 a day. Deposited with the three trusts is nearly \$1,000,000 par value of our preferred stock (actual amount \$956,900), which is held as security for the settlement of their claims against us. These are liable to be pressed for payment at any time, and complications arise which in the present condition of affairs might cause the company considerable loss. It is but fair to the owners of these trusts, and justice to ourselves, that these matters should be settled, for they have rights which we cannot afford, nor do we thunk it right, ot aircegard. That we want is a fair settlement with a reasonable rate of interest to be paid regularly, even if we remain a narrow-gauge. Tast January we established a coal tariff giving equal rates

auge Last January we established a coal tariff giving equal rates and facilities to all shippers located upon our line. It has resulted in largely increasing the tonnage as well as the gross earnings from the transportation of coal. Our road has a fair passenger business, having earned \$108,000 gross in the last twelve months, and the increase is about 5 per cent a year; we do not expect a change of gauge would increase this business pary much.

do not expect a change of gauge would increase this business very much. We conclude this part of our report with a statement of the results of the operation of the road during the past year, and a comparison with the results for the preceding year (1885), and in this connection we wish to call your attention again to our last report (six months ending Dec. 31, 1885), in which, among other things, we gave our estimates of what it was pos-sible to accomplish in the way of an increase in business and earnings for the year 1886. The earnings are as follows: 1885. 1886. Increase.

Gross earnings	1886. \$358,219.17	Increase. \$66,302.68
cluding salaries, taxes and insurance	281,540.27	22,791.75

Net earnings..... \$33,167.97 \$76,678.90 \$43,510.93

the following conclusions: First—That the operation of your railroad as a narrow gauge, located as it is, does not now, and never will, meet the financial expectations of the stockholders; that it is unwise to continue the operation of the road as a narrow gauge, with debts and liabilities against the company of eight hundred and thirty thousand dollars in the form of trusts, receiver's certifi-cates, &c., part of which bear interest at the rate of 8 per cent, part at 7 per cent, part at 6 per cent and part at 5 per cent. To meet this interest and at the same time pay a dividend to the stockholders seems an impossibility.

To meet this interest and at the same time pay a dividend to the stockholders seems an impossibility. *Second*—Some plan should be adopted whereby the debts and liabilities of the company may be liquidated and replaced, either by capital stock or by securities bearing not more than 5 per cent interest, and should be comprehensive and finan-cially broad enough to not only extinguish the present debts, but provide means, at the same time, to change the gauge and to carry out some plan such as we shall set forth in this report.

and to carry out some plan such as we shall set forth in this report. Third—We realize that the plan to be adopted must meet with the approval and support of the stockholders, and be substantially unanimous, and that no plan opposed by any considerable number of stockholders can be successfully car-ried out, or should be attempted by your directors. For that reason, we now recommend the issuing of bonds, rather than of preferred stock, although the issue of preferred stock, in many respects, would be better, could the plan be adopted with unan-imity. We have always advocated and urged a change of gauge, as will be seen by our various reports, and we have no doubt that the stockholders agree that the gauge should be made stand-ard. But it has been a question of raising the money and of agreeing upon a plan. A change to a standard gauge would be a profitable and permanent investment; it can be done without calling on the present owners for money, and we will endeavor to show you that the results will be very satisfac-

as 6.

g g s r e tory to the *present* security owners. Last year we proposed a financial plan which we believed was the best under the circumstances, but it met with opposition from some of the owners, and as *any* plan to be successful must meet with the approval of at least two-thirds of the preferred and a major-ity of the common stock, we herewith submit one which we believe will commend itself to every stockholder who will take the pains to acquaint himself with the operation of railroads. We will state that during the past year we have been prepar-ing the road for this change, and have put down a great many standard ties and widened the cuts and fills where needed, all of which, being done with the regular help, has added but little to the operating expenses, so that it is practically a standard-gauge-road-bed to-day. To supply and put down new 60-lb. steel rails with proper ties and switches, strengthen bridges where necessary, and add all things required for the change of superstructure, and with a safe allowance for the sale of the present rails, will require an outlay of about \$500,000. To supply all equipment necessary to double our present

change of superstructure, and with a safe allowance for the sale of the present rails, will require an outlay of about \$500,000.
To supply all equipment necessary to double our present coal tonnage, with a safe allowance for the sale of the present cars, &c., will require \$400,000. To purchase additional coal wharves and freight facilities at Canton and Cleveland will require about \$60,000. To settle the obligations of the Terminal and Equipment Companies and notes of the company given on account of said Terminal Companies, cannot exceed \$830,000, making a total of not over \$1,790,000, which amount will be sufficient to make all needed changes. We have no doubt, however, that the business will very soon increase so as to require more equipment, and think it wise to make provision for the purchase of more cars as soon as they are found to be needed, so that we will not again be obliged to issue equipment stock or bonds.
To accomplish the above, we recommend a mortgage of \$2,000,000, due in thirty years, and drawing 5 per cent interbankers in Boston and are assured that such a mortgage can be placed at about par. As a narrow gauge we have earned during the past year \$358,000 gross, at an expense, including taxes and insurance, of not over \$250,000. That is to say, as a narrow gauge we are to-day earning about enough net to pay the interest required on the mortgage above referred to, and as a standard gauge we can, in addition to this interest, pay a dividend on the present preferred stock. There are connections possible to be made with other roads which will hore aconder the subsection of the interest pay a dividend on the present preferred stock. There are connections possible to be made with other roads which will increase our earnings beyond our estimates, but we have confined our figures to the business along the line only.
If the change is not begun at once, we will not only lose the benefits to be derived from next year's business, but will be obliged to pay more for rail

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 21, 1887.

^r The week has been without incident of importance except the passage through the House of the Inter-State Commerce bill and the labor troubles; but the latter have not been of much significance. The dispute with the Old Dominion Steamship Company still proves a source of embarrassment to the steamships up for European ports, and may for a time obstruct in some degree the shipment of cotton from Southern markets via New York. Heavy snows have interrupted railroad transportation in the more northern latitudes.

The speculation in Lard for future delivery has shown but a moderate degree of spirit, and prices have been unsettled. An advance on Saturday last was more than lost on Monday and Tuesday, but has since been fully recovered, the market today showing some improvement. Lard on the spot has been quiet but is rather better to-day, closing at 6.60c. for prime City, 6.80@6.85c. for prime Western, 7.20c. for refined to the Con tinent and 7.30@7.35c. for refined to South America.

DAILY CLOSING PRICES OF LARD FUTURES.

	Sa	urd'y.	Mond'y.	Tuesd'y.	Wedns'y.	Thursd'y.	Friday.	
Feb. deliver, March " April " May " June "		6·79 6·86 6·93 7·00 7·07	6.77 6.82 6.89 6.96 7.04	6.75 6.80 6.87 6.94 7.00	6·78 6·83 6·90 6·98 7·05	6.76 6.82 6.89 6.96 7.03	$6.81 \\ 6.87 \\ 6.94 \\ 7.01 \\ 7.08$	

Pork has been taken to a fair extent at steady prices, closing at \$12 50@\$12 75 for new mess, \$10 75@\$11 for extra prime and \$14 75@\$15 50 for clear. Cutmeats have been firm, but generally quieter; pickled bellues 65% @7c., hams 914@91/2c. and shoulders 514@51/2c.; smoked hams 101/4@105/2c. and shoulders 61/4@63%c. Beef is dull at \$7 50@\$8 for extra mess and \$8 50@9 for packet per bbl. and \$15@\$17 for India mess per tierce; beef hams are easier at \$19@\$19 50 per bbl. Tallow sells readily at 41/4@4 5.16c. Stearine is firm at 714@73%c. and oleomargarine is quoted at 6@61%c. Butter is in moderate demand at 20@31c. for creamery. Cheese is firm at 1134@131%c. for State factory full cream and 61/2@115%c. for skims. The following is a comparative summary of aggregate exports from November 1 to January 15:

1885-6. 10,530,200 Inc.

85,800

Inc. 3,222,731 Inc. 26,100,299 113,797,55565,140,846The speculation in Rio coffee was dull, and except for a "spurt" in the middle of the week the tendency has been downward, but to-day there was a steadier feeling, closing with sellers at 12.95@13c. for the active months. Fair cargoes of Rio have further declined to 14%c., but close steady at the reduction ; Macassar sold to-day at 161/2c. for early arrival. Raw sugars have continued to rule very dull, and to-day were quoted a fraction lower at 4 9-16c. for fair refining Cuba and 51%c. for centrifugal 96-degrees test. Molasses is nominal at 20@2014c. for 50-degrees test. Teas in good demand.

The transactions in Kentucky tobacco are limited to 250 hhds., mainly for export. In seed leaf large sales of Pennsylvania growth are reported, with a moderate general demand. Sales 2,928 cases, as follows: 654 cases 1881, 1882 and 1883 crops, Pennsylvania, 111/2@14c.; 1,354 cases 1885 crop, do., 934@11c.; 50 cases 1884 crop, Pennsylvania Havana seed, private terms; 150 cases 1885 crop, do. do., 934@15c.; 200 cases 1885 crop, Ohio seed leaf, 6@8c.; 120 cases 1885 crop, Little Dutch, 8@91/2c.; 150 cases 1885 crop, State Havana, private terms, and 250 cases sundries, 6@35c.; also, 600 bales Havana, 60c.@\$1 05, and 250 bales Sumatra, \$1 20@\$1 60.

Naval stores have been quiet and the close is somewhat nominal at 39@391/c. for spirits turpentine, \$1 021/2@\$1 10 for common to good strained rosin, and \$2 for tar. Crude petroleum certificates reflected a moderately brisk speculation, but a mid-week advance was followed by some depression, and the close to-day is at 711/8@711/4c. The iron markets gained strength early in the week, and the opinion was expressed that prices would advance to figures that would admit of free importations; but the close is dull and straits tin is nominatat 22.65c., lake copper 11.60c. and lead 4.40c.

Ocean freights have been dull. To-day the grain shipments were quite moderate, including Liverpool and Glasgow at 43/d. and Bremen at 60pf. Wool has met with a better demand. Hops are more freely offered and weak, Clover ced is more firmly held.

FRIDAY, P. M., Jan. 21, 1887. THE MOVEMENT OF THE CROP, as indicated by our telegrams THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Jau, 21), the total receipts have reached 155,884 bales, against 142,915 bales last week 159,044 bales the previous week and 236,618 bales three weeks since; making the total receipts since the 1st of September, 1886, 4,213,641 bales, against 3,978,442 bales for the same period of 1885-86, showing an in-crease since September 1, 1886, of 235,199 bales.

The speculation in cotton for future delivery at this market opened the week under review with the exhibition of some strength, due mainly to the comparatively small stocks at Southern interior towns, showing that the comparatively full receipts at the ports did not reflect an equal movement from plantations. But on Monday and Tuesday there were declines; Liverpool and Manchester did not give as much support to values as they had done recently, and many of the "bulls" became discouraged and sold out. On Wednesday there was a a buoyant opening, the "bears" found themselves a little oversold, and the "bulls" took advantage of a demand to cover con. tracts to force up values; but the market was quiet in the closing dealings, and yesterday the advance was more than lost under the continued free movement of the crop and the disappointing report from Liverpool. To-day the market opened stronger, slightly declined, but closed steady, without active influences from any quarter. Cotton on the spot was marked down 1-16c, on Monday and up 1-16c, on Wednesday. The demand continued moderate and mainly for home con-sumption. To day the market was quiet at 9½c, for middling uplands.

The total sales for forward delivery for the week are 410,600 bales. For immediate delivery the total sales foot up this week 1,839 bales, including — for export, 1,739 for consumption, 150 for speculation and — in transit. Of the above, — bales were to arrive. The following are the official quotations for each day of the past week.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all the European figures are brought down

to Thursday evening. But to make the totals the complete figures for to-night (Jan. 21), we add the item of exports from the United States, including in it the exports of Friday only.

The imports into Continental ports this week have been 90,000 bales.

The above figures indicate an *increase* in the cotton in sight to-night of 151,729 bales as compared with the same date of **1886**, an *increase* of 148,850 bales as compared with the corres-ponding date of 1885 and a *decrease* of 172,235 bales as compared with 1884.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1885-86—is set out in detail in the following statement.

	Red	Movement to Jan. Receipts. 18hi	21,	1887.	Reu	Receipts. grimmi		1886.

The above totals show that the old interior stocks have decreased during the week 15,563 bales and are to-night 130,074 bales *less* than at the same period last year. The receipts at the same towns have been 18,330 bales *more* than the same week last year, and since September 1 the receipts at all the towns are 31,729 bales *more* than for the same time in 1885-86. IVOL. XLIV.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS,— In the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plan-tations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

	Veek	Receipts at the Ports.			St'k at Interior Towns.			Rec'pts from Plant'ns		
En	ding-	1884-85	1885-86	1886-87	1884-85	1885-86	1886-87	1884-85	1885-56	1886-87
Dec.	17	258,340	238,011	260,659	363,866	481,239	410,953	286,755	284,907	269,527
**	24	207,893	240,166	283,045	363,520	521,319	488,534	207,547	280,246	305,626
45	81	154.075	189,852	236,618	349,488	543,557	443,565	140,043	212,090	248,649
Jan.	7	133,994	140,829	159,044	320,785	528,561	423,252	105,291	123,833	138,781
**	14	130,951	108,458	142,915	304,859	513,993	389,745	115,025	95,920	109,408
**	21	93,911	110,310	155,884	298,080	493,250	368,428	87,132	89,567	132,56

The above statement shows—1. That the total receipts from the plantations since September 1, 1886, were 4,532,009 bales; in 1885-86 were 4,455,842 bales; in 1884-85 were 4,332,562 bales, 2. That, although the receipts at the outports the past week were 155,884 bales, the actual movement from plantations was only 132,567 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 89,567 bales and for 1885 they were 87 132 bales 87,132 bales.

AMOUNT OF COTTON IN SIGHT JAN. 21.-In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Jan. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1886-87.	1885-86.	1884-85.	1882-84
Receipts at the ports to Jan. 21		3,978,442	4,051,697	3,862,207
Interior stocks on Jan. 21 in excess of September 1	318,368	477,400	280,865	281,744
Tot. receipts from planta'tns Net overland to Jan. 1 Southern consumpt'n to Jan. 1	513,742	525,092	358,048	382,415
Total in sight Jan. 21	5,195,751	5,111,934	4,805,610	4,649,366
Northern spinners' takings to				

It will be seen by the above that the increase in amount in sight to-night, as compared with last year, is \$3,\$17 bales, the increase as compared with 1884-85 is 390,141 bales and the increase over 1883-84 is 546,385 bales. t

men. The thermonication of the second second

Wilson, North Carolina.—We have had rain on one day of the week, the rainfall reaching twenty hundredths of an inch. The thermometer has averaged 41, the highest being 62 and the lowest 12 the lowest 12.

INDIA COTTON MOVEMENT FROM ALL PORTS .- The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Jan. 20.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS

	Shipme	ents this	s week	Shipments Since Jan. 1.			Receipts.	
	Great Bril'n.			Great Britain	Oonti- nent.	Total.	This Week.	Year.
1887 1886 1885 1884	2,000 5,000	7,000		10,000	44,000 23,000 33,000 56,000	33,000	43,000 33,000 21,000 44,000	126,000 95,000 58,000 157,000

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 10,000 bales, and an increase in shipments of 3,000 bales, and the shipments since Jan. 1 show an increase of 19,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, years, has been as follows. "Oth Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e week.	Shipmen	ts since Jan	uary 1.
	Great Britain.	Oonti- nent.	Total.	Great Britain.	Continent.	Total.
Oalcutta- 1887 1886 Madras-	3,000 3,000	1,000 2,000	4,000 5,000	6,000 6,000	1,000 2,000	7,000
1887 1886				1,500 1,000		1,500 1,000
1887 1886	3,000 2,000	1,000 2,000	4,009 4,000	3,000 5,000	4,000 2,000	7,000
Total all	6,000 5,000	2,000 4,000	8,000 9,000	10,500 12,000	5,000	15,500

The above totals for the week show that the movement from the ports other than Bombay is 1,000 bales *less* than same week last year. For the whole of India, therefore, the total shipments since January 1, 1887, and for the corresponding periods of the two previous years, are as follows:

EXPORTS TO EUROPE FROM ALL INDIA

Shipments	18	87.	18	86.	18	85.
so all Europe from_	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.

EAST INDIA CROP.—From the Bombay Company's (Limited) Cotton Report of date Bombay, Dec. 17, we have the following:

ing: Some rain has fallen in the Berars, but the weather has now cleared up, and the damage after all will probably not be so serious as was at first anticipated. Rain has also fallen heavily in the Barsee and Jul-gaum districts, where it is feared that considerable damage has been done, and the outturn as well as the quality of the cotton will proba-bly be affected thereby. Although no rain has fallen recently in Guze-rat, accounts of the growing Broach crop are not quite so favorable, as the weather otherwise has not been of the rest, but prospects for this generally are fairly satisfactory, but in the Bhownugger districts the plants have suffered somewhat from continued cloudy weather. Arri-yals, which still consist chiefly of Bengals and Oomrawutee descrip-tions, have been on a free scale, but we may expect a temporary falling off in receipts from the latter districts, in consequence of the recent rains, JUTE BUTTS. BAGGING, &C.—The market for bagging ha

JUTE BUTTS, BAGGING, &C.—The market for bagging haben pairs and prices are easier. Sellers are doing some shading, and quotations are 6c. for $1\frac{1}{2}$ lb., $6\frac{1}{2}$ c. for $1\frac{3}{4}$ lb., $7\frac{3}{2}$ lb. and $7\frac{3}{4}$ c. for standard grades. No change is reported in butts and only small lots are moving at 1 11-16@ $1\frac{3}{4}$ c. for paper grades and $2\frac{3}{2}\frac{1}{4}$ c. for bagging qualities.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 180,587 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

BREADSTUFFS.

FRIDAY, P. M., January 21, 1887.

The flour market has been dull, and prices, in sympathy with the course of wheat, have shown a downward tendency, calling for some further revision of quotations. The low grades are best supported. The decline in the higher grades has led to some speculative business in them, looking to a reaction. Rye flour is also decidedly lower under fairly full supplies, and in cornmeal and buck wheat flour also some reduction has been accepted.

The speculation in wheat for future delivery showed some strength until Wednesday, when the cable advices were dull, nearly stopping the business for export, and a fall of rain was reported in California, which was regarded as greatly improving the prospects of the crop in that State. The effect was a drop of one cent a bushel, but this decline let in freely the orders for shipment and prices became steadier. To-day, however, there was a fresh decline, and "too much wheat" was generally the cause assigned.

Indian corn has sympathized largely with wheat, showing much strength until Wednesday, when a considerable decline took place. The export business has amounted to a few boat" loads daily, and mostly of "steamer No. 2 mixed," which sold to-day at 46%@47c. in elevator. The straight white and yellow grades are in some demand at full prices.

Oats have been dull and unsettled, as well as quite irregular, not only between spots and futures, but between white and mixed. The tendency has latterly been downward, and the decline in white oats is for the week a material one. To-day the market generally was stronger, with the regular trade quite brisk.

THE DRY GOODS TRADE.

NEW YORK, Friday, P. M., Jan. 21, 1887.

The situation in the dry goods trade has undergone further mprovement the past week, and a fairly satisfactory business was done in the wholesale branches, making due allowance for the early stage of the season. Package buyers from nearly all distributing points in the West and South have appeared in he market in large numbers, and while some have hardly got to work as yet, operations on the part of others have reached an important aggregate amount. Staple and fancy cotton fabrics were fairly active in first hands, but selections were mainly governed by near prospective requirements, and there was not apparently the least tendency toward speculation. Domestic woolen goods were a trifle more active in the fore part of the week, but a subsequent announcement that 11,000 pieces 6-4 heavy clothing woolens will be peremptorily sold at auction the coming week had a somewhat disturbing effect upon the market, and caused many intending buyers to defer operations until the results of the sale can be ascertained. Foreign goods have met with rather more attention, but the demand was chiefly restricted to certain specialties required for early distribution. Prices of both domestic and imported fabrics are steadily maintained as a rule, and some descriptions of the former have slightly appreciated during the week. without checking their sale.

DOMESTIC COTTON GOODS.—The exports of domestics from this port for the week ending January 18 were 3,122 packages, including 1,207 to China, 448 to Chili, 392 to Hayti, 368 to Argentine Republic, 201 to Uraguay, 143 to Brazil, &c. Plain and colored cottons were more active in the hands of agents and leading jobbers, and though transactions averaged light, selections were numerous, and reached a very fair aggregate amount. Prices ruled firm all along the line because of the limited stocks on hand, and some makes of wide sheetings, plaid osnaburgs, &c., have been slightly advanced by the mill agents. Print cloths were in moderate demand and firm on the basis of 334c.@37-16c. for 64x64s and 2 15-16c.@3c. for 56x 60s. Stocks ast Saturday, and for the three previous years, were as follows :

Stock of Print Cloths-	Jan. 15, 1887. 80.000	Jan. 16, 1886. 94.000	Jan. 17, 1885.	Jan. 19, 1884.	
Held by Providence manuf'rs. Fall River manufacturers Providence speculators	46,000	33,000 286,000	439,000 419,000 320,000	103,000 287,000 263,000	
Outside speculators (est)	40,000	30,000	300,000	75,000	

Total stock, (pieces)...... 208,000 443,000 1,478,000 731,000 Printed calicoes were in moderately good demand, and printed lawns, sateens, foulards, ginghams, wash dress fabrics, seersuckers, white goods, scrims, quilts, table damasks and cotton hosiery were severally distributed in liberal quantities at firm prices. DOMESTIC WOOLEN GOODS.—The demand for men's-wear

DOMESTIC WOOLEN GOODS.—The demand for men's-wear woolens was only moderate as regards heavy Fall fabrics for next season, though some fairly good orders for overcoatings, suitings, &c., were placed in the early part of the week. Light-weight cassimeres and worsteds continued to move steadily on account of back orders, but new business was chiefly of a hand-to-mouth character. Satinets were fairly active at times, and there was more inquiry for Kentucky jeans and doeskins at first hands. Cloakings have ruled quiet, but there was a very fair demand for Jersey cloths by the manufacturing trade. All-wool and worsted dress goods were more active in first hands, and agents continued to make large deliveries of leading makes in execution of back orders. Flannels and blankets were mostly quiet in agents' hands, but prices remain firm, and there was only a light re-assorting demand for woolen shawls and skirts, as usual at this stage of the season. Carpets continued to move steadily, and current quotations are very firmly maintained by manufacturers' agents.

FOREIGN DRY GOODS have shown rather more animation in importing circles as regards new business, and there was a very fair movement in certain specialties on account of back orders. Wash dress goods were more active, and all-wool and worsted dress fabrics were distributed in fair quantities. Silks continued sluggish, but some good-sized orders for seal plushes were placed for next season. Mens'-wear woolens were in irregular demand, and there was a moderate business in linen goods, laces, embroideries, hostery, &c., but fabric gloves ruled quiet in first hands.
