CLEARING HOUSE RETURNS.

Bank exchanges for the week ended March 26 make a less satisfactory exhibit so far as the aggregate is concerned than any full week since the beginning of 1887. In comparison with last week there is a loss in the total of \$109,417,556, of which \$86,609,967 was at New York. The heavy decline at this city is in part accounted for by the further diminution of transactions in stocks, but about half of the decrease has its origin in reduced clearings from other business. Twentythree of the thirty-four cities outside of New York record losses from a week ago which in the aggregate reach nearly twenty-three millions of dollars. At Boston the falling off from March 19 is almost wholly due to smaller stock operations. Messrs. R. G. Dun & Co. report an increased number of failures during the week, the casualties being considerably above the average in the Southern States and Canada. They also state that the prevailing uncertainty with regard to the effect of the Inter-State Commerce Bill affects most branches of business unfavorably, except [in so far as transactions are hastened to make shipments by rail before the changes in rates and expiration of contracts.

Contrasted with the same week of last year there is a loss in the whole country of 10.1 per cent, New York showing a decline of 20.8 per cent, and the total for other clearing houses exhibiting an increase of 17.3 per cent. Heavy gains are reported from a number of points, notably Omaha, 129'9 per cent, St. Joseph 111'3, Kansas City 76'7, Peoria 71'1, St. Paul 54.1, Cleveland 46.9, and Grand Rapids 45.9 per cent.

28.

to

The market value of the share transactions on the New York Stock Exchange for the week has been only \$59,149,000, against \$163,053,000 for the corresponding period in 1996. "For the full week, based on last week's returns.

Pursuing our usual method of deducting two-and-a-half times these values from the New York, we find that the exchanges of other origin record an increase of 42.3 per cent.

As received by telegraph this evening, the returns of exchanges for the five days record an increase in the aggregate over the figures for the similar period of the previous week, and in comparison with the corresponding five days of 1886, all the cities exhibit gains. For the week ended April 2, the subjoined statement indicates an increase compared with last year in the total for all the clearing houses of 7.2 per cent, and an excess outside of New York of 14.1 per cent.

THE FINANCIAL SITUATION.

Money, as expected, has become a little more active this week. On call, as represented by bankers' balances, the extremes have been 9 and 3 per cent, with 6 per cent as the average. Renewals have been made at 6 per cent, and that has been the rate among those of the banks which have been in a position to offer money on call. Stock commission houses having done only a small business, while the stocks that have advanced being many of them the more substantial properties and always comparatively easy to borrow on, no very great urgency in the demand for money has existed on any day during the week; at the same time those who have been interested in higher prices for stocks have been free lenders. It is also presumed that further loans have been transferred to London during the week, though we have no means of confirming the report. Altogether, while the market has been close, it has been so managed as to be kept free from speculative manipulation; and if the new funds our banks will receive from Government first of April disbursements, and if the outflow to the interior is reversed or even checked, the prevailing belief in a somewhat easier money market after a few days may be realized. We have made some suggestions with regard to the nature of the movement of currency to the interior in a subse. quent column; and we would add here, that so far as the issues of silver certificates which are being transferred to the South and West through the Treasury, are made up of small notes, their return to this centre must be a slow matter. In comparing the Treasury receipts of customs yesterday, we noticed that although the silver certificates outstanding have of late increased so largely, the payments in that kind of currency remain small, being only 10.1 per cent of the whole in February and 11.4 per cent in March. Of course this must be in great part due to the fact that as the small notes are so large a percentage of the later issues, they find constant use as the more active currency.

In London and on the Continent we have a sharp con. trast with our own market, money being very cheap indeed. At the first named centre discounts of 60 day to three months bank bills are only 11 per cent; at Paris the open market rate is 2 per cent; at Berlin it is 28 per cent and at Frankfort $2\frac{1}{2}$ per cent. On the Continent the bourses have been a little disturbed on account of the re. port of a renewed attempt upon the life of the Czar, while at London business has been confined to speculation in Americans and in a few British railways; trade gives no signs of increasing activity anywhere in Europe, but it seems as if the very low rates for money ought to encourage speculation in securities. The Bank of England gained £75,000 bullion during the week; according to a special cable to us this was made up by an import principally from Egypt of £91,000, a receipt from the interior of Great Britain of £34,000, and by an export wholly to Germany of £50,000.

The foreign exchange market has been dull and irregular this week. On Monday the nominal rates were reduced half a cent to figures which made them conform more closely to those ruling for actual business, but the tone was reported heavy even at the decline until Wednesday under the influence of offerings of bills drawn by the arbitrage houses against stocks purchased on European account, together with a few grain bills. On Wednesday a firmer feeling was noted in the morning, but it gave way to ease in the afternoon. On Thursday the pressure of loan bills made the market weak, and first-class bankers' 60 day drafts were bought at nearly $1\frac{1}{2}$ cents below the ruling nominal rate, but commercial bills

were scarce. How long these relations will continue in the exchange market it is impossible to divine. While loan bills remain to be absorbed the ruling rates have little relation to foreign trade conditions. The feeling is all the time that exchange must advance. In fact, when the month of March opened it was supposed that gold exports could not long be delayed. It will be remembered that sight rates had been as high as $4.89\frac{1}{2}$ the last week in February. But ever since then exchange has been weak and variable. While money is so cheap in London, and holders of stocks are able and continue to borrow there, these conditions will remain.

A President of a Philadelphia bank in referring to our article of last week with reference to changes in the law as to bank reserves, asks for information on a further point. He states "that the reserve cities outside of New "York have heretofore been allowed to act as reserve agents " for banks outside of the reserve cities and at the same time "keep one-half of their reserve in banks in New York ;" and his question is whether "if banks in such reserve cities "now vote to become reserve cities like New York, can they "still keep the same reserve in New York as heretofore." When we wrote last week we said nothing on this point, but assumed for the time being that the question here raised would be answered in the affirmative, although the natural inference from the amendment is that such was not its intention. But the change when interpreted in that way was so radical and the second section of the amendment apparently so uninviting that we accepted the view that these new central reserve cities could keep one. half of their reserve in New York as heretofore. Since then, having seen it stated that Comptroller Trenholm had sent notice to St. Louis banks deciding that this could not be done, we telegraphed the Comptroller whether such a decision had been made, and he replies that "the law "seems to preclude banks in central reserve cities from "including in their reserve, balances due them by banks "in any other city whatever." Thus interpreted the amend. ment becomes as stated not a very attractive device for an interior trade centre to take advantage of. All banks in large cities must keep balances not only in New York but also at other important points. They cannot conduct their business on any other basis. This they were free to do and to get interest for, while counting it as a part of their reserve, under the old system ; hereafter it appears that as soon as any city takes upon itself the new dignity of a central reserve city this privilege is gone, and it must retain its full 25 per cent in lawful money at home in its own vaults idle. Of course if the new privilege of carrying twelve-and-a-half instead of nine per cent of other bank reserves increases deposits largely, there may be compen. sation ; but we see no reason for anticipating that result, especially as there are, if the reports are correct, already three of these central reserve cities in the West, and the list 1s not finished yet. Under this ruling the more the better for the strength of the banking and currency system, only the Comptroller will have to adopt some plan by which he shall know whether the 25 per cent is always retained at home, for it is only in a few cities that the banks publish weekly returns. If it should turn out also that when a city had reached this new position, it could not retreat or divest itself of its new obligations, the law might perhaps suggest in more ways than one the bewitch. ing invitation the crafty spider extended to the guileless fly.

Mr. Morrison did a graceful thing in nominating Judge Cooley, though a political opponent, as Chairman of the Inter-State Commission. His election to that position will cause general satisfaction in the mercantile com.

Mr. Cooley has had experience in railroad munity. matters, and while no one would accuse him of a leaning towards the railroad side of any question, he is known to entertain practical and sensible views with reference to many problems connected with the administration of railroads, and to have the courage and determination to act fairly and impartially on matters coming before him for We have before called attention to consideration. the fact that the discretionary powers vested in the Commission are very limited, but Mr. Cooley's election is a guarantee that, so far as the President of the Commission is able to guide the action of the Board in this and other matters, the powers will be wisely used, and, so far as consistent with the law, in such a manner as to conserve both industrial and railroad interests, rather than to vex or injure either.

The new law goes into effect next Tuesday, and in certain quarters no little dissatisfaction continues to be felt at the new tariffs, schedules and classifications which the railroads have prepared in anticipation of that event. We think this is natural, and yet, as we said last week, merchants and shippers should not forget that the position of the railroads is an exceedingly difficult one. A new condition of things has suddenly been thrust upon them. They are required under severe penalties to live up to it. They can not afford to make mistakes, because they will prove costly by reason of these penalties. Hence, if they err at all, they must err on the safe side. No doubt many of the tariffs now announced will have to be changed, but time alone can determine that. As an illustration of the difficulties in the way of making a classification satisfactory to all interests, we have the divergence of views that developed this week at the meeting of the special committee of the dry goods men, and which resulted in a disagreement. Much vexation and embarrassment will of necessity result from the law-in the nature of things it could not be otherwise-but we may expect that the railroads, as well as the Commissioners, will seek to reduce the incidental disturbance to a minimum. We notice that some railroad officials are apprehensive lest with uniform rates on all the lines, the minor lines failing to receive their former share of business, may be induced to post lower rates. Under the pool, this was avoided by giving to each road a fixed percentage of the business. It is true that under the new arrangement the bulk of the traffic must go to the stronger lines, but it does not at all follow that these therefore would meet the "cuts" in rates. On the contrary, if the cut were not too large, the stronger lines might be willing to allow it to the weaker lines as a sort of differential.

The increased consumption of coal is quite a striking feature of the situation. The coal trade just now is reported quiet and rather dull, which perhaps is natural considering the pending changes in prices and tolls, but nevertheless the figures of the anthracite production which Mr. John H. Jones, the accountant of the companies, has issued this week, when taken in connection with the changes in stock, show a noteworthy increase in the demand in the first two months of the year, over both 1886 and 1885. For February the output was 2,551,003 tons this year, against 2,385,028 tons in 1886 and only 1,767,707 tons in 1885, while for the two months the production stands at 4,794,-316 tons, against 4,723,299 tons and 3,409,510 tons respectively in 1886 and 1885. These aggregates cer. tainly afford evidence of progress, but the question is, what is the exhibit as to consumption, a part of the 411

| Anthracite Coal. | | February. | 1 | Jan. 1 to Feb. 28. | | | |
|--|-------------------------------|-------------------------------|-------------------------------|-------------------------------|-------------------------------|-------------------------------|--|
| Animacue coa. | 1887. | 1886. | 1885. | 1887. | 1886. | 1885. | |
| Stock beginning of period Production | Tons. 475,448 2,551,003 | Tons. 779,004 2,385,028 | Tons. 837,104 1,767,707 | Tons. 372,282 4,794,316 | Tons. 754,545 4,723,299 | Tons. 874,681 8,409,510 | |
| Supply St'k end of period | | 3,164.032 996,946 | 2,604,811 665,565 | 5,166,598 470,609 | 5,477,844 996,946 | 4,284,191 665,565 | |
| Consumption . | 2,555,342 | 2,167,086 | 1,939,246 | 4,695,989 | 4,480,898 | 3,618,626 | |

Here we find a heavier consumption this year than in the same two months last year, which alone would be a remarkable fact, considering the interruptions occasioned by the coal-handlers' strike. But the increase this year comes after a most noteworthy gain in 1886, so that the amount gone out of sight or into consumption this year stands at 4,695,989 tons, against only 3,618,626 tons in 1885. In other words, as compared with the same two months two years ago there has been an increase in consumption of over a million tons. It is true that in 1885 the figure was down very low, general business then being unusually depressed and buyers also holding off in anticipation of lower prices later on, and yet the enlarged total now reflects clearly the difference in the conditions ruling at the two periods.

There are other features of the situation that must be encouraging to those in the coal trade. Note for instance that stocks at tidewater points on the 1st of March, 1887, were only 470,609 tons, against 996,946 tons on the 1st of March, 1886, and 665,565 tons in 1885. Then the companies are advancing prices for coal, while the railroads in readjusting their schedules have dropped the percentage plan of fixing tolls, and are charging certain fixed rates, which also are higher than those previously prevail. ing. No new combination has been formed for the year beginning April 1, but it is believed that a tacit understanding exists to work harmoniously together; while restricting the production is not thought needful unless a disposition should develop on the part of some of the companies to extend unduly. As an illustration of the improvement that is being experienced, we have the February exhibit of the Reading, showing net of \$731,407 for the month this year, against only \$306,835 in 1886, and for the first quarter of the fiscal year net of \$2,127,485, against \$1,260,101, an increase of \$867,384. Of course there are special reasons for the exceptional gain in the case of the Reading, but the tendency is undoubtedly towards improved results.

The stock market this week has developed increased activity and a stronger tone. There is a disposition to regard the danger from higher money rates as nearly past, and to consider, with that obstacle removed, that the main drawback to higher stock values will have been over come. But there have also been some positive influences of a favorable character. Rates on coal to the seaboard have been advanced, while the demoralization in the eastbound tariff from Chicago seems also to have come to an end, for the grain tariff is quoted firm at figures close to the 25 cents per 100 pounds agreed upon as the new official rate. Then the trunk lines and all their connections, with New England and Southern roads, have resolved to pay after April 1 "no commission, rebate or other drawback," and this it is believed will save the railroads a very large sum of money. Furthermore, railroad earnings continue exceedingly satisfactory, and for the third week of March there is a gain over 1886 of nearly $16\frac{1}{2}$ per cent. Unfavorable reports of net for the month of February come from both the Northern Pacific and the increased production in the previous year having gone Canadian Pacific, but these are the roads that sufinto stocks? To answer that query we have prepared the fered so much from snow in that month. Finally,

Dia

the personnel of the Inter-State Commission is regarded with favor, and there is no fear of hasty or ill-considered action on the part of the Commission. Under these various influences a pretty general advance in prices has been in progress during the week. Business has nevertheless been quite limited in character, and while the better class of properties have not been neglected, it is noticeable that the greatest advances have been scored by a few new specialties. There is evidently an organized attempt to advance prices, and everybody is expressing himself hopeful of seeing much higher quotations.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of gold and currency by the New York banks.

| Week ending April 1, 1887. | Received by N. Y. Banks. | | Net Interior Movement. |
|------------------------------|--------------------------|-------------|-----------------------------------|
| Currency | ¢658,000 | | Loss\$1,845,000 Loss \$200,000 |
| Total gold and legal tenders | 1658,000 | \$2,703,000 | Loss\$2,045,000 |

The above shows the actual changes in the bank holdings of gold and currency caused by this movement to and from the interior. In addition to that movement the banks have lost \$1,400,000 through the operations of the Sub-Treasury. Adding that item to the above, we have the following, which should show the total loss to the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to day. It is always to be remembered, however, that the bank statement is a statement of *averages* for the week, whereas the figures below should reflect the actual change in the condition of the banks as between Friday of last week and Fri iay of this week.

| Week ending April 1, 1887. | Into Banks. | Out of Banks. | Net Change in Bank Holdings |
|--|------------------------|---------------|-----------------------------------|
| Banks' Interior Movement, as above Sub-Treasury operations. | \$658,000 6,100,000 | | Loss\$2,045,000 Loss 1,400,000 |
| Total gold and legal tenders | #6.758,000 | \$10,203,000 | Loss. \$3,445.000 |

The Bank of England gained $\pounds75,000$ bullion during the week. This represents $\pounds41,000$ net from abroad and $\pounds34,000$ from the interior. The Bank of France lost 2,975,000 francs gold and 650,000 francs silver, and the Bank of Germany, since the last report, gained 1,300,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

| | Mar. 3 | 1, 1887. | April 1 | L, 1886. | |
|-----------------|------------|------------|------------|------------|--|
| | Gold. | Silver. | Gold. | Silver. | |
| | £ | æ | A | * | |
| | 24,769,851 | | 22,451,462 | | |
| Bank of France | 47,795,647 | 46,082,949 | 51,217,054 | 44,268,040 | |
| Bank of Germany | 20,212,610 | 17,924,390 | 18,083,070 | 16,035,930 | |
| Total this week | 92,778,108 | 64,007,339 | 91,751,586 | 60,303,970 | |
| | 92,787,726 | 64,002,350 | 91,878,151 | 60,708,118 | |

The Assay Office paid \$144,396 for domestic bullion through the Sub-Treasury during the week, and the As sistant Treasurer received the following from the Custom House.

| Mail 1 | 1 | Oonsisting of- | | | | |
|---------------|----------------|----------------------------|-----------|---------------------|---------------------------|--|
| Date. Duties. | | Duties. Gold. U. Not | | Gold Gertific's. | Silver Ver- tificates. | |
| Mar. 25. | \$225,857 78 | \$5,000 | \$46,000 | \$148,000 | \$25,000 | |
| " 26. | 312,192 35 | 2,000 | 42,000 | 228,000 | 40,000 | |
| # 28. | 526,207 89 | 5,000 | 60,000 | 364,000 | 96,000 | |
| . # 29. | 1.073,105 52 | 4,250 | 131,000 | 791,000 | 145,000 | |
| # 30. | 371,999 01 | 4.000 | 52,000 | 275,000 | 41,000 | |
| " 81. | 356,621 22 | 8,000 | 50,000 | 253,000 | 48,000 | |
| Total. | \$2,865,983 77 | \$28,250 | \$381.000 | \$2.059.000 | \$395.000 | |

Included in the above payments were \$7,750 in silver scin, chiefly standard dollars.

LOSS OF RESERVE BY NEW YORK BANKS. To say that the appointment of Mr. Fairchild as Sec. retary of the Treasury gives great satisfaction among business classes in this community, is expressing such an obvious fact that it seems almost idle to state it. But it means much, for in that position we need so much. It means perfect confidence in his financial ability, practical good sense and unqualified integrity.

There never was a commercial nation whose money market was so completely within the control of a Government officer as ours is to-day. The Sub-Treasury arrangements were bad enough under the best of circumstances, but with our high taxes and large surplus, with our silver coinage and silver certificate requirements and powers, the whole business of the country might be thrown into confusion at any moment if a Secretary of the Treasury was not capable, vigilant and honest. This thought is especially suggested just now, when every one has for weeks been anticipating that difficulty was almost una. voidable through Government operations, only to find that by adroit management we have been steered safely through it all, thus far, leaving the Treasury to-day with less instead of more money than it held a month ago and with prospective disbursements heavy because of a large interest payment (\$7,380,000), and of a 10 million bond call, both maturing April 1st. It is not surprising under such circumstances that the public has become assured, confident that danger from Treasury accumulations to the money market need not be feared if it can in any way be prevented so long as the present management is in control.

The trade movement of money has not, however, less. ened as yet, though a change is generally anticipated now. It may aid to a correct judgment on that point to note a contrast between the movements of currency this year and a year ago. The prevailing opinion is that the present outflow is preparatory to the ordinary 1st of April settlements; and that consequently when that purpose is accomplished a return may be speedily anticipated. This idea, so far as the outflow has been for temporary purposes, But a feature this season of no little must prove true. significance is that the movement to the interior is not a recent affair, but has been in progress without interrup. tion since the first week in February. It has become larger in March and a little more free especially during the last two weeks, but, as stated, it did not begin within that time. Our weekly statements furnish the evidence of this fact, confirmation of which is obtained from an examination of the bank and Treasury returns for the same period taken at longer intervals.

Thus on the 29th of January the banks held of lawful money 118 million dollars, and on the 5th of March about 1051 million dollars, or a loss during the intervening weeks of about 121 million dollars. On the other hand the Treasury on the 31st of January (according to the monthly report of that date) held of gold, silver and legal tenders 2731 million dollars, and on the 5th of March (according to its daily statement) about 2803 million dollars, or a gain of about 71 million dollars. Of course as these figures represent movements of currency at all sub-treasuries, they do not accurately reflect the losses or gains through Government operations of our New York banks; besides during every month our mines with the help of the Government, bring into existence and put into the banks of the country coin to about the amount of 3 million dollars of silver and 3 million dollars of gold, so that about six million dollars of the gain the Government reports show does not represent a corresponding loss to the banks. Hence there is to be

deducted from the $12\frac{1}{2}$ millions of loss noted above to the banks about $1\frac{1}{2}$ millions as having gone into the Treasury (the $7\frac{1}{2}$ millions gained, less 6 millions new coinage) and another $1\frac{1}{2}$ millions net gold as having been exported, leaving $9\frac{1}{2}$ millions net as the amount sent into the interior (West and elsewhere) during the five weeks mentioned. Since March 5 and up to to-day the banks have suffered a further decrease in lawful money of probably between 8 and 9 million dollars, while the Tre sury has lost about 2 million dollars, besides furnishing for the month of March through the mines about 6 millions of new silver and gold currency; so that altogether the shipments West have been very considerably larger per week in March than during February.

Contrasting these results with the movement for the same months a year ago we find quite different conditions. The Treasury gained in its holdings of gold and silver and legal tenders during the two months of February and March, 1886, about 161 million dollars, so that allowing the same addition as allowed above for new gold and silver currency the banks would have lost, by reason of these two movements, say 41 million dollars, that is 161 million dollars less the 12 millions of silver and gold currency coined; during the same months the exports of gold from New York were 151 million dollars; adding this to the above, the net loss to the banks in the two months would be about 20 million dollars, whereas altogether the loss was only a little over 25 million dollars, the whole of the difference being lost the latter half of March. In fact, in February this year the banks sent on an average about 2 millions a week to the interior, against a gain from the same source in the same month of 1886. All of which shows that the outflow this year has been unlike that of previous years and not for temporary first of April purposes,-except, of course, the increased movement the last of March, which we may presume will shortly be followed by a corresponding return. That is to say, the shipments of currency to the interior, which began last fall, have been almost uninterrupted since then.

Some light as to the cause and character of this move ment of currency may probably be gained by recalling the conditions prevailing in 1880. At that time, it will be remembered the same feature was observed and remarked upon-that is, an outflow of currency followed by no return movement. In our weekly review of that year we often referred to it, and in our general retrospect of the money market made after the close of the year we summed up the leading conditions by saying that the year has been notable for an outflow of money and no return. Disappointment was expressed that "the supply in New "York did not increase by a return of funds as it usually had done," the demand being "so large in the remote sections of the West and Southwest that a return current " was almost wholly lacking. Obviously the reason for it then was the revival of business; for the wide extent of our country with remote sections in which currency becomes scarce in quiet times and is scattered anew at every return of activity, results in two instead of one tidal movement-the one is constant every year, a crop affair, and the other periodical measuring the beginning and end of every depression.

Has not that experience a close resemblance to our pres. ent experience? We are not only having a revival of business but in some respects a peculiar one. Never before has there been so sudden and complete a change in the one industry of railroad construction. In 1884 we built only 3,825 miles of road; in 1885 the total built was reduced to 3,131 miles; the last half of 1886 activity set in, bring-

ing the year's total up to probably about 8,000 miles; but in 1887, if indications can be relied upon, these figures are are to be very greatly exceeded. We are building with a rapidity never before equalled, even by night as well as by day, and the anticipation is that considerably more miles of road will be laid in the current twelve months than in any previous year. Of course should a general business depression occur, this anticipation would not in full be realized. But at all events, at the moment there must be unusual calls for currency in the West and South for this purpose and in sections where its return to the ordinary channels of commerce must be greatly delayed.

THE UNION PACIFIC AND MR. ADAMS ADMINISTRATION.

The Union Pacific report issued this week, and which we give at much length on another page, illustrates anew the careful way in which the financial affairs of the company have been managed in recent years, or rather since the advent of the present executive. A reorganization of its finances was the pressing need, as well as the leading purpose of Mr. Adams when he assumed the Presidency of the road. That he has been successful in this task every one of course knows.

To understand how important is the improvement effected we have only to contrast the state of things to-day, with that which existed when the present administration entered upon its work. The company at that date was not only embarrassed, but its finances had drifted into a very confused state. That the directors for the first time in eight years had found themselves obliged to pass the dividend, was really the least important matter of all. The company was burdened with a heavy floating debt, which in its straitened circumstances was rapidly increasing. It had also a large amount of unfinished construction work on hand, requiring immediate completion. But where were the funds to come from? Its borrowing capacity had approached the point of exhaustion. Banking houses knew that the concern was hard pressed, its floating obligations being met with everywhere. At the same time the Government was claiming large amounts due under the provisions of law on account of past operations, and these claims the old management had neither the ability nor the disposition apparently to meet, so that in at least one branch of Congress very threatening measures against the corporation were being put under way. To add to its misfortunes, the road's earnings, as a result of increased competition and business depression, were falling off heavily. The market price of the snares reflected the situation, having dropped below 30. The stock panic that occurred at this time and the general unsettlement of values that it produced, did not help matters any.

It was at this juncture, when all confidence in the property had apparently vanished, credit gone and bankruptcy imminent, that Mr. Adams' administration began. Note now the contrast. The company has not only been placed in a solvent condition, but its credit is completely restored, so that it can borrow money on time on most advantageous terms. In point of fact, however, the privilege is not being exercised, for the report tells us that on the 24th of last August the last remaining note of the company then outstanding was paid, and that from that date to the close of the year the company, for the first time in its history, had no bills payable maturing, though of course it had other current liabilities. Moreover, so far from there being any net floating debt, the amount of cash and cash resources on December 31, 1886, exceeded the total of the liabilities in the sum of \$1,351,189. Even the gross

which for a concern like the Union Pacific is certainly not large.

1 . ar a.

Comparing this with the amount of the floating debt, gross and net, at the time of Mr. Adams' accession to office-say June 30, 1884-we get some really striking results. At that time there were no less than \$7,205,533 of bills payable alone outstanding, while other items of current liabilities footed up \$5,904,487, so that there was a gross floating debt in the large amount of \$13,110,020. The offsets were \$6,209,842, leaving a net debt of \$6,900,-178. On December 31, 1886, on the other hand-only two and a half years after-the gross debt, as we have already seen, was only \$5,715,134, or 11 millions less than the net debt June 30, 1884, and the offsets against this gross debt were \$1,351,189 greater than the debt itself. In other words, against a net debt of \$6,900,178 in 1884. there was in 1886 an excess of cash items to amount of \$1,351,189, representing an improvement between the two periods of \$8,251,367. In addition, allowance must be made for \$916,704 found due by the Court of Claims on the earnings of previous years, which the new management paid, and which really should be added to the amount of the floating debt existing at the earlier date. This added gives a net reduction of \$9,168,071-most assuredly a remarkable record. It might be supposed that this large reduction in the floating debt was accompanied by a considerable increase in the funded debt. In reality the report states the total of the latter only \$323,932 greater than on June 30, 1884. Of course this does not represent the full extent of the changes in that debt. There were some new issues, but through the operation of the sinking funds and the application of the proceeds of land sales, the net increase was reduced to the figure given.

These results become still more surprising when we remember that concurrently with this reduction in the floating liabilities large amounts were spent on new construction and equipment. During the period in question, the report says, 316 miles of new road were completed and paid for, the bridge across the Missouri at Omaha was reconstructed on a new and enlarged plan, and all preparations made for changing the gauge of the Utah & Northern, while about \$1,240,000 was spent for new equipment. In a word, it is calculated that in these thirty months "a sum exceeding \$16,200,000 was spent in improving "the condition of the system, either through extinguish. "ing the floating debt of the company or paying for new "construction and equipment." About \$9,650,000 of this \$16,200,000 it is estimated represents surplus income, and \$6,550,000 the sale of the company's own bonds in its treasury, and securities of auxiliary lines included in the investment account. Such a showing certainly challenges admiration.

The only uncertainty remaining about the Union Pacific, as we have before pointed out, consists in its relations with the United States Government, and the way these are to be readjusted. It had been hoped that the matter would be disposed of at the session of Congress lately ended, but, as on many previous occasions, the expectation was not realized. Mr. Adams devotes a great deal of space to pointing out the necessity for immediate action, and the harm delay is working, and must continue to work-not alone to the interests of the company, but to those of the Government and the public. The various measures introduced in Congress, looking to a settlement, having failed to pass, it is gratifying to hear that the directors of the company propose to meet the Investigating Committee ap. pointed by Congress, " with a distinct and definite proposal "for a readjustment of financial relations which shall be "final-the first proposal of the kind which has emanated "from the company." Perhaps a greater degree of success will attend these efforts than has attended the efforts in the legislative halls, but the known hostility of many Congressmen, and the political and speculative influences at work adverse to the railroads, forbid our entertaining very sanguine views of any proposal, even one having the sanction of a Government commission. However, the need for action is imperative, and if only our legislators can be impressed with that idea, all other obstacles might be quickly brushed aside. Concerning the main features of the contemplated proposal Mr. Adams speaks as follows.

of the contemplated proposal Mr. Adams speaks as follows. "Ignoring the original contract, they (the directors) are prepared, on your (the stockholders') behalf, to make such an offer as to the interest upon the Government bonds advanced in aid of the construction of the road which shall hereafter mature, accompanied by a plan for the gradual reduction, and ultimate payment in full, of the principal of the debt, as they believe cannot but commend itself to the minds of all reasonable men. On the other hand, your directors will ask the Government to put the company in position to meet the liabilities it thus offers to incur by allowing it to stand on an equal footing with its competitors. Those competitors conduct their affairs on recognized business principles. They have the power to construct lines, to lease properties, to consolidate other properties with their own, and to contract loans. They same powers should belong to the Pacific roads. If they do not, the Pacific roads stand at a great and constant disadvantage. That they should stand at such disadvantage is certainly not for the interest either of the Government, their largest creditor, or of the communities through which they run, and whose development depends upon them. No useful purpose can be subserved by thus crippling great railroad corporations."

With reference to the past year's operations, the report shows a surplus above charges and requirements of \$3,746,368, equal to 6.15 per cent on the stock. But these figures do not possess the significance they otherwise would, because they are based on a condition of things that must in the near future be changed. The charge on account of the subsidy indebtedness certainly will be different. In calculating the surplus given, the Government requirement is figured at only \$808,033, while the amount of interest that accrued against the company on the subsidy debt is \$2,012,370. At first sight, this would seem to require a deduction in the full amount of the difference of \$1,204,337. But in the first place, allowance must be made for the increment of the sinking fund in the United States Treasury, which for 1886 seems to have been \$255,936, and which apparently has not been taken into account. Then it must be remembered that the United States Supreme Court has decided that the com. pany is not obliged to repay the interest on the subsidy debt till the maturity of the debt, so that what is required is not \$2,012,370, but a sum which at the end of ten or a dozen years shall yield that amount. Finally, it is not at all probable that in any arrangement for the funding of the debt, the rate of interest will be as high as the 6 per cent now paid on the bonds-all of which makes it evident that exact results cannot be attempted, and that pending a change in the present methods of providing for the subsidy debt, it is idle to speculate either as to the outcome or probable position of the road under it. For the same reason an analysis of the income statement on the basis of which the \$3,746,368 surplus is arrived at, is uncalled for. We may say, however, that this surplus exists after paying \$591,965 for sinking funds out of earnings, and that while the receipts on account of the Kansas Pacific land sales have been taken into the account, the Union Pacific sales have not been, the company having from land sales and earn. ings combined redeemed no less than \$1,075,555 bonds during the year. In short, then, nothing hampers the Union Pacific in its development and prosperity except the uncertainty with regard to its relations to the Govern. ment.

[VOL. XLIV.

CHICAGO BURLINGTON & QUINCY.

The Chicago Burlington & Quincy report has been issued this week-a date considerably earlier than in 1886. The only exception one can take to the report is that it is not fuller. Nowhere in it is there any record of the tons of freight carried one mile, the number of passengers carried one mile, or the rate per ton per mile or per passenger per mile. Neither is there any information as to train mileage, or engine service. In a word, the report is limited simply to the financial results of the year's operations.

For these reasons our review of the road's doings must be confined to a study of the income and financial statements. It is a striking commentary upon the success that has attended the career of this property, that the company was able to pay full 8 per cent to its stockholders during all the years of depression preceding the late industrial revival and this too on a largely increased amount of stock. One of the Burlington & Quincy's neighbors-the Chicago & Alton-did the same thing, but in that case the total of the stock was only about 171 millions, while that of the Burlington & Quincy is over 764 millions. It takes no less than \$6,110,722 to pay the 8 per cent dividends on the stock of the Burlington. That in the face of increasing competition, the road should in 1886 have been able to pay this sum and contribute in addition a million dollars to the renewal fund, besides applying \$670,295 (out of earnings) to sinking funds and yet have left a surplus of \$526,831 without counting the \$846,771 net receipts from the Burlington & Missouri in Nebraska land grant-that the road should be able to show such results as this, affords a forcible illustration of its vitality. To be sure, the property did just about as well in the year preceding (there being only a trifling improvement on 1885), and in some other years has done very much better, but that does not detract in the least from the favorable character of the present exhibit. The following summarizes the fiscal results for each of the last fourteen years.

| Years. | Mileage Dec. 31. | Gross Earnings. | Op. Exp'ses and Taxes, | Net Earnings. | Other Receipts. | Total Net Income. |
|--------|--|--------------------|---------------------------|------------------------------------|--------------------|----------------------|
| | | \$ | 8 | 8 | | 8 |

| .881 | 4,428,368 | 4,349,287 | 1,000,000 | 479,980 | 55,263,700 | 59,122,725 |
| 882 | 4,664,003 | 5,023,599 | 750,000 | 281,739 | 69,649,696 | 68,648,050 |
| 883 | 4,883,941 | 5,566,484 | 1,500,000 | 987,646 | *71,941,246 | 77,408,491 |
| 885 | 5,381,950 | 5,566,580 | | 511,105 | 76,450,146 | 77,160,608 |
| | 5,127,864 | 6,110,572 | | | | |
| 886 | 5,214,514 | 0,110,072 | 1,000,000 | 504,654 | 76,384,525 | 76,924,508 |

held in the treasury.

The gross earnings are thus the largest in the company's history. But the gain on 1885 is only about \$172,000, which may occasion surprise, con-

h

Digiti

miles greater than at the beginning. In explanation, it should be said that almost the whole of the additions to mileage were made in the closing months of the year, and therefore counted only in small part in the 1886 results. Taking the average for the two years, we get a total of 3,743 for 1886, against 3,531 in 1885, which shows a much smaller amount of increase. And yet the increase is over 200 miles, or about 6 per cent, while gross earnings have increased less than one per cent. We presume the smaller ratio of gain in earnings is accounted for by a reduction in rates, as was the case with the St. Paul, but the report does not contain any data bearing on that point. The expenses, like the earnings, are the largest on record, but with reference to the increase in the late year, it is due to an augmentation of about \$311,000 in the item of taxes, the ordinary operating expenditures having been reduced \$225,000. The net earnings are not the largest ever made. They are above those of 1885, and considerably higher than those of 1884, but over a third of a million-(\$377,000) below those of 1883. The miscellaneous income, however, has been increasing of late years, so that the total net income of 1886 has been only once exceeded, namely in 1883, and only \$86,000 then.

The net earnings of 1886 (\$12,236,725) are greater than the gross earnings of 1876 (\$12,003,950). In the interval, however, the mileage has risen from 1,343 miles to 4,036 miles. The expansion in stock and debt is no less striking. In the period from 1873 to 1878 the amount of the stock ranged between 261 and 28 millions, and the funded debt between $25\frac{1}{2}$ and $30\frac{1}{2}$ millions. In 1880, however, both stock and debt were increased to above 54 millions. In 1886 we find the stock at $76\frac{1}{3}$ millions and the debt at 791 millions. Combined, stock and debt amounted to not quite 52 millions in 1873, to 611 millions in 1879, to nearly 109 millions in 1880, and to nearly 156 millions in 1886. In other words, in the decade, stock and debt have been increased over 100 million dollars. But the company has been able to take care of it all, and pay besides the high rate of 8 per cent on the enlarged amount of stock.

The increase in the debt in the late year was only \$2,615,200, yet we have seen the company added 390 miles to its mileage. Not only that, but large amounts were spent for other construction work and for new equipment, &c. In fact, the total outlay for construction and equipment in the late year is reported at no less than \$8,168,-315. The question occurs, where did the company get the funds for these large expenditures? In the first place, the \$2,615,200 increase in the debt, represents merely the net addition-the gross addition was \$2,870,200. Then the renewal fund supplied a million. Surplus earnings and the Burlington & Missouri land receipts supplied \$1,373,602 more. Besides this, we find current liabilities of \$4,094,-518 on December 31, 1886, against only \$2,776,741 on December 31, 1885, showing that in this way \$1,317,777 of funds was furnished. On the other hand, in the same period the total of cash and cash items was diminished from \$9,354,995 to \$8,327,686, or \$1,027,309, which discloses the source of that much more. Finally, profit and loss has a greater credit to it, in amount of \$344,243. Add. ing all these various items together, we get an aggregate of \$7,933,131, which comes very close to the \$8,168,315 outlay. It was recently reported that new bonds for a large amount-\$11,000,000-had been negotiated, and this of course will put the company in ample funds.

In one particular, the Burlington & Quincy's operations have always been unsatisfactory, and in that particular there has been but little improvement in the late year. We refer to the small direct return received on the investsidering that the mileage at the end of 1886 was 390 ments in other roads. In the purchase of the Hannibal & St. Joseph, the Kansas City St. Joseph & Council Bluffs, the Chicago & Iowa, and various other roads, the company has spent over 26 million dollars. As far as we can see, the only return this investment yielded in 1886 was \$263,075, being the 5 per cent dividend on the Council Bluffs stock held, this forming part of the \$615,342 miscellaneous income above. We referred last year to the fact that in 1885 properties represented by this investment, the netted a surplus above operating expenses and interest on their outstanding liabilities not owned by the Burlington & Quincy, of only \$170,000, against \$700,000 in 1884, and \$1,000,000 in 1883. In 1886 there was apparently a recovery again, and the surplus is stated as amounting to \$790,000-that being absolutely all the information furnished about these lines. The only effect, however, of the larger surplus, was to give the Burlington & Quincy a dividend of 5 per cent on its Council Bluffs stock, instead of 24 per cent as in 1885, and raising the amount received from that source from \$131,500 to \$263,000. Of course, it is to be supposed that the Burlington & Quincy gets indirect benefits-either in protecting its traffic, or adding to it.

1 10 40

BULGARIA AND THE PEACE OF EUROPE.

There is something peculiarly interesting in the present condition of Europe. It is only a few weeks since war on a large scale seemed an absolute certainty. In the interval there has been no radical change in the situation. With the single exception that the German Parliament has acquiesced with the demands of the Government in regard to the increase of the strength of the army, and the extension of the term of service, things are very much as they were. Yet how completely the war talk has ceased ! How changed is the tone of feeling ! The conviction is as general to day that there will be no warnone, at least, for the present year-as it was some weeks ago that war was imminent, and unavoidable. It is only a day or two since Prince Bismarck said, "Two months "ago I feared there would be war. Now, I do not." What does it mean? What is the secret of this feeling of security? Does it mean that war is dreaded for its possible consequences, and that not one of the Powers is willing to run the risk of precipitating hostilities? Or that there is a disposition on the part of each to maintain the status quo? Or that an understanding has been come to by some of them to allow certain possible changes to go unquestioned?

There are many reasons why, in our judgment, an affirmative answer could not be given to the last question. There are at the present moment three disturbing centres -Bulgaria, Alsace Lorraine and Egypt. We know well that the only Power which is giving the British trouble in Egypt, directly at least, is France, and we know that no definite understanding has been come to between those two peoples. As to Alsace-Lorraine, all talk about possible cession to France on easy terms has ceased; neutralmation has been pronounced by Prince Bismarck "a de-"lusion;" and the autonomous arrangement established in 1879 is to be abolished. The extinction of the autonomy of the provinces, and the relegation of the legislation to the Reichstag, as it was prior to 1879-such is Germany's answer to the revanche party in France and to the pro-French party in what the Germans call Reichland. Between France and Germany, it is safe to say, there is no understanding. Then as to Bulgaria. The parties most immediately interested in the settlement of affairs in that country are Russia and Austro-Hungary. Russia has not abandoned her purpose to have the settle-

ment made in her interest, and the Austro-Hungarian people, even more than the Government, are as resolute as ever that Russia shall neither occupy Bulgarian territory nor set one of her own tools on the Bulgarian throne. There is really no fresh European concert, either of a general or of a special kind.

As to the second question, whether the present prevailing peace sentiment implies a disposition on the part of the different Powers to maintain the existing arrangements, it is equally impossible to give an affirmative answer. The status quo; so far at least as some of the Powers are concerned, and those the most interested in disturbing it, is maintained rather in spite, than because, of any disposition in its favor. The most natural explanation of the peace sentiment is that, in present circumstances, war is dreaded for its own sake, and because of its possible consequences. A war arising out of any of the existing causes of discontent could hardly fail to assume large dimensions and to involve most of the great Powers; and the presumption is that it would materially affect the present national boundary lines. It is because no one is willing to take the initiative, and for no other or higher reason, that the peace of Europe is for the present secured.

It is not to be denied that there is much room for gratitude in the fact that peace has been secured, no matter what the cause. It would have been more agreeable, however-a cause for greater satisfaction-if some, at least, of the disturbing factors had been removed out of the way. But they are not; and it is morally certain that they will continue to be a source of irritation. No one is disposed to associate a European war with any possible complication in Egypt. France, as has been said, is the only nation really opposed to English occupation. But France to obtain the mastery on the banks of the Nile will not come into collision with such a power as Great Britain, and if it should happen that at any time united Europe should ask the British to withdraw their troops from Egypt, and to give up their special control in that country, we have little doubt that they would gladly enough comply with the request. Alsace-Lorraine is likely to become less and less a disturbing question as time rolls on. It is impossible, however, to doubt that the return to the status prior to 1879 will create much bitter feeling both in the Provinces and throughout France. The joint provinces were enjoying a sort of Home Rule. It had been given them as a peace-offering. Now it is to be taken from them. Think of Home Rule being granted to Ireland, and taken from her after the lapse of eight years! It is but little likely, however, that the sentiment in Alsace and Lorraine and the sentiment in France will take any stronger shape than that of complaint, unless war should be provoked by complications in another direction.

If, however, we have sympathy for the people in Alsace and Lorraine, we have even greater sympathy for the people of Bulgaria. Their situation is truly pitiable. Bullied by Russia, and denied the right by that Power to have a Prince of her own choosing, the other Powers looking on meanwhile and refusing to interfere, Bulgaria is in the position of a man with hands and feet tied. In such a situation it is impossible but that things will reach a crisis —such a crisis as will imply domestic despair and domestic ruin, and as will compel interference. Is not the present state of things in Bulgaria a disgrace, not to Russia only, but to all the European Powers. If Russia will not allow the people to manage their own affairs in their own way, there is just cause for a Conference. A Conference, we know, is dreaded; but it is demanded in the interests

THE CHRONICLE.

of justice, and whatever might be the inconveniences attending it, it might prove to be the easiest way out of a great and serious difficulty.

FINANCIAL REVIEW OF MARCH.

The money market worked a little closely in March, the bank reserves were low, and the rates to stock borrowers sometimes rose to 7 per cent. On the 5th of the month the surplus of the New York City banks was \$9,088,055 and on the last Saturday, the 26th, it was \$6,186,850.

The adjournment of Congress on the 4th relieved the business community from the usual apprehension of legislation on financial and commercial matters, and left the Inter-State Commerce law and the Trade Dollar Redemption law as the chief mementoes of the session.

The Bank of England rate was reduced from 4 per cent to 31 on the 10th, and again to 3 per cent on the 24th. Foreign exchange rates were easy in our market, and weakened so far that all fear of gold exports was removed for the present, and it was generally believed that the outward movement of stccks and bonds to the foreign markets was considerable.

At the Stock Exchange business was exceedingly dull and lifeless during most of the month. There was little animation in stocks, and speculation was held in check by some apprehensions of a temporary stringency in money, and also by uncertainty as to the working of the Inter-State Commerce law. Towards the close of the month there was more activity, but this was mainly in specialities, which were pushed up one after another by the different cliques interested in them. The tone was strongest near the close of the month, and the outlook was then promising.

Among the railroad events, the famous Baltimore & Ohio negotiation was facile princeps. This was a reported proposition for a sale by Mr. Garrett of a majority inter est in the stock of that company, and it became the talk of the market for ten days or more, and at the close of the month was still supposed to be pending. The Chicago & Atlantic and the Pittsburg & Western reorganization plans were announced ; the Mexican National loan was offered in New York and London; the Chicago & Eastern Illinois stock was bought in the interest of Atchison ; the Wabash purchasing committee were put in possession of the lines west of the Mississippi on giving their bond to pay the receivers' certificates ; the period for depositing securities under the Reading plan expired March 31, and it was found that a very large proportion of the stock and bonds had been deposited.

The following summary shows the condition of the New York City Clearing-House banks, rates of foreign exchange and prices of leading securities and articles of merchandise, about the 1st of April, 1885, 1886 and 1887.

RAILROAD EARNINGS.

The complete statement of earnings for the third quarter of March makes an even better showing than the partial statement prepared last week. Then the ratio of increase was only $12\frac{1}{2}$ per cent; now it is nearly $16\frac{1}{2}$ per cent. The later exhibit covers sixty-three roads, and though a few roads report a falling off from last year, the total decrease on them all is only \$15,292, while the aggregate of the gains is \$524,160, making a net increase of \$508,868. Among the roads specially distinguished for their gains are the Chicago & Atlantic, the Louisville New Albany & Chicago, the Milwaukee Lake Shore & Western, the Milwaukee & Northern, the Peoria Decatur & Evansville, the St. Louis & San Francisco, the St. Louis Arkansas & Texas, TI e F ort Worth & Denver City, the Wis consin Central and the O nio & Mississippi.

1887. 1886.

Monetary Commercial English Rews

[From our own correspondent.]

LONDON, Saturday, March 19, 1887.

Compared with some previous periods the week just concluded may be considered to have been characterized by political quietude. The abortive attempt on the life of the Czar of Russia cannot be said to have had any significance outside his Dominions. The relations between France and Germany are not more strained than they were, and the *status* quo in Eastern Europe is unchanged. The fact that we have got through another week without any indication of a fresh catastrophe naturally increases the belief that peace will yet be maintained, and that the war which might result, and probably would do so, in the re-arrangement of the map of Europe, will not be commenced this year.

Confidence, which is always of slow growth, is certainly increasing in commercial circles, not that any particular movement has taken place in trade during the past few days. Business generally is looking up, the improvement being pretty evenly distributed among hardwares and textile manufactures, and there is hope of a continuance of the expansive movement. Greater animation is also prevalent in the speculative sections of the stock markets and the metal exchange, but there does not appear to be much inclination to dabble in produce. The position is without doubt improving, and when the prolonged winter is terminated and spring is upon us, we may witness something approaching to real animation. The steady contraction of balances shows that capital is distributed over a larger area and is more generally employed in the extension of trade. There are not so many bills floating about just now as is usually the case in trade revivals, but this may be in some measure accounted for by the greater popularity which telegraphic transfers for settlement of accounts and the issuance of short credits instead of long-dated bills are now acquiring. The method of conducting commercial affairs has been in a measure revolutionized of recent years, thanks to the rapid extension of the telegraphic and the railway systems of the universe, and the more general employment of steam-shipping. With Australia now brought within five weeks' steaming of the United Kingdom, and with greater facilities for the sale of produce, the necessity for long credits has ceased.

The financial year is rapidly drawing to a close, and the actual results are now looked forward to with some interest. Judging from the state of affairs on March 12, there is no reason to apprehend they will be otherwise than satisfactory—that is, of course, taken as a whole. The estimated revenue for the year 1836-87 was £89,869,000. Up to March 12 d

ti

h

re

the receipts were £85,103,385. The weekly average for the past two months has been £2,400,000. Supposing this rate to be kept up during the last nineteen days of the year the estimates would be considerably exceeded. Comparing the receipts to date with those for the corresponding period of the past financial year, we have some very satisfactory results. The excise certainly has not shown any elasticity; on the contrary, instead of an increase there is a deficiency of £291,000. The receipts so far have been £23,964,000, and it is hardly probable that the estimate of £25,694,000 for the current year will be reached. On the other hand, however, income tax exhibits an increase of £1,150,000; the customs receipts are about £330,000 heavier, and there are also encouraging gains under the heads of stamps as well as the postal and telegraph services. The only weak point in the accounts seems to be the excise, but if we are to infer that the diminution in the receipts from this source marks but another step towards growing national sobriety, we have no reason to cavil at it. especially as there will be larger amounts of capital available for the development of other and more legitimate interests.

The Railway and Canal Traffic Bill has been read a second time in the House of Lords, and there is now reasonable hope that it will become law during the present Parliamentary session. It is essentially non-political, and is devised and promoted with the laudable endeavor to resuscitate our flagging industries. The argument that because some £800,000,000 have been sunk in the development of the railway system of the country an unassailable monopoly has thereby been created, hardly holds good. National interests must receive first consideration, and if it be shown that the home trade is suffering from the excessive charges for the carriage of goods whilst the competition of the foreigner is fostered and encouraged by the granting of preferential rates, then it is indeed high time that some drastic measures should be adopted, whereby home enterprise shall be allowed to escape from the severe handicapping to which it is at present subjected. Besides, the companies themselves must admit that unless they wish to see the traffic of any given manufacturing centre a diminishing quantity they must be prepared to assist the manufacturer. Profits have of late been cut so fine that the item of expenditure for traffic has become of more serious importance. The business way in which the matter was discussed in the House of Lords promises well for i's future examination in the House of Commons. All shades of political thought are alive to the fact that in consequence of the sturdy growth of foreign competition, home industries at the present moment require careful nursing, and if it can be proved that their legitimate development and expansion are in any way hindered by onerous traffic charges, some measures for practical relief will have to be adopted. Traders and agriculturalists have suffered long. It certainly does appear extraordinary that in these days of agricultural depression a company should be formed in Antwerp for the export of Belgian fruit, butter, milk, poultry and vegetables to England. Such, however, is the case, and it is likely to commence operations immediately.

In the money market there has been no new feature of importance. The inquiry incidental to the Stock Exchange settlement was not large, but it fell upon a market barely supplied with capital, and recourse had therefore to be had to the Bank of England for assistance. The rate for short loans was as high as 31/2 per cent to 4 per cent, but it has since eased down to $2@2\frac{1}{2}$ per cent. Discount business has been very quiet, bills being still scarce, and the competition for them is keen. The weekly Bank return is a strong one and points to the probability of an early reduction in the rate. The reserve has gained £540,026, but as there has been a simultaneous increase in liabilities, the proportion remains practically the same as last week-namely, 48.84, against 48.83 per cent. The amount of the reserve is now £16,471,000, or £4,885,000 more than last year. In the matter of bullion the gain on the week is £433,876, bringing the total up to £34,058,000, or \pounds 1,600,000 in excess of last year. It will thus be seen that the position of the Bank just now is decidedly strong. The amount of the private deposits held is only £23,046,000, being $\pounds 2,430,000$ less than last year. The market just now is anything but well supplied with capital, more money having evidently gone into general circulation, and the revenue collections at the same time sweeping up supplies. Discount rates here, though low, are 1/4 to 1/2 per cent higher than those current at Berlin and Paris.

At the meeting of the Bank f England a dividend of 5 per

419

cent for the half-year was declared. The profits were shown to be £718,370, and after providing for the dividend, the "rest," which at the close of the financial half-year was £3,750,286. will be £3,222.636. The dividend being in excess of the corresponding half of last year, when 434 per cent was paid, will have to be formally confirmed by ballot.

The rates for money have been as follows :

| | | Rate. | | | | Ppen market rates. | | | | Interest allowed for deposits by | | | |

Messrs. Pixley & Abell write as follows on the state of the bullion mar

bullion mar Gold.-Purchases to the amount of 2261,000 have been made by the Bauk during the week. An order for South America has also absorbed some 2250,020. The only export to Irdia is 215,000 to Bombay. We have to record the following arrivals: 267,010 from South America, 24,000 from Bombay, 25,000 from Australia. 25,000 from the Cape, 274,000 from River Plate, and 22,000 from Chile; total, 2161,000. Silver, which has lately been upheld by a considerable special order, has to-day fallen to 4554d, the Indian banks even now refusing to pur-chase. The arrivals are: From Australia, $23,00^\circ$; New York, 215,000; Chile, 2.2,000; total, 250,000. 220,000 has gone to Bombay. Maxican Dollars.-With the exception of a few special orders nothing has been done in Mexican dollars, and the price is nominal.

The quotations for bullion are reported as follows:

| GOLD. London Standard. | Mar. 17 | Mar. 10. | SILVER. London Standard. | Mar. 17. | Mar. 10, |

Messrs. Matheson & Co. are receiving subscriptions for \$8,500,000 first mortgage 6 per cent gold bonds, part of an issue of \$10,500,000 of the Mexican National Railroad Company, the price of issue being 92 per cent. Subscriptions are also being received for the same in Amsterdam. There has been no other item of financial interest during the week worth mentioning.

There has been no fresh feature in the grain trade during the week. English wheat was fairly well held, and was perhaps rather stronger at the close than at the opening, but in the case of foreign wheat less money has been occasionally taken. Although no particular change has taken place in the statistical position, or at all events the difference has not exceeded estimates, there are signs that were the market infused with a little more life, it might assume a stronger position than it now occupies. There is a long interval between this and harves when the ew grain will be marketable, and unless in the interim we receive liberal outside assistance, our stocks here will be very seriously depleted-so much so in fact that any prolonged period of unsettled weather might result in disorganization.

The following shows the imports of cereal produce into the United Kingdom during the first twenty-eight weeks of the season, the average price realized and other items, compared with the three last seasons:

Arkansas State Bonds.—A press dispatch from Little Rock, Ark., March 50, said that a bill to provide for the set-tling of the undisputed State debt has passed both houses of the Legislature and gone to the Governor for signature. The total debt is a little above \$5,000,000, of which \$3,000,000 is accumulated interest. The bill provides for using the money now in the sinking fund, whenever exceeding \$25,000, to pur-chase bonds and matured coupons after advertising for bids; also for issuing certificates of State indebtedness in various sums to be exchanged at par value for undisputed bonds and matured coupons; these certificates to be receivable at par in payment of the sinking fund tax of one mill on all taxable values, for all State taxes on liquor licenses and for all for-feited lands by the State. The Governor, Secretary of State and Treasurer are constituted a State board to carry out the purposes of the bill. [So much of the State debt has been disputed that this measure may be less important than it appears.] appears.]

Fitchburg-Troy & Boston.—A dispatch from North Adams save that the papers for the transfer of the control of the Troy & Boston Railroad to the Fitchburg Company have the froy & Doston harroad to the fitchburg Company have been signed. A special meeting of the Troy & Boston stock-holders to ratify the sale has been called for April 28. The Fitchburg pays \$3,000,000 in 4 per cent bonds and \$1,000,000 in consolidated stock for the road. The first four years holders of stock are to get $5_8'$ of the regular dividend on Fitch-burg consol. stock, the next four years to get 5 per cent, and after that the full dividend.

Inter-State Commerce Commission.—The Commission-ers met in Washington March 31, and organized by electing Judge Cooley as President. The Commissioners and their respective terms of office are as follows: Thomas M. Cooley, of Michigan. for the term of six years; William R. Morrison, of Illinois, for the term of five years; Augustus Schoonmaker, of New York, for the term of four years; Aldace F. Walker. of Vermont, for the term of three years; Walter L. Bragg, of Alabama, for the term of two years.

Kings County Elevated.—The Brooklyn City Works De-partment have issued a permit to the Kings County Elevated Railroad Company to erect its structure in Fulton Street from Adams Street to the city line, under the consent of the Mayor and City Works Commissioner already secured. The permit is like the one granted to the company on December 5, 1885, under which work was done until stopped by injunction. The *Tribuhe* reports that much of the iron for the structure is ready to be put up, and it is reported that the road will be built at the rate of a mile a month. The Union Company has a large force of men at work in Flatbush Avenue, and will shortly begin work in Hudson Avenue. The portion of its route con-necting these two streets crosses Fulton Street, and there the structure has already been put up. What steps will be taken by the Kings County Company in relation to this obstruction of its route is not yet decided, but the directors of the Union Company claim that they are prepared to maintain their prior rights at that point. Kings County Elevated .- The Brooklyn City Works De rights at that point.

Ohio & Northwestern.—A dispatch from Cincinnati an-nounces the arrival there of Senator Warner Miller, Wm. Walter Phelps of New Jersey, and others, who are on a tour of inspec-tion over the lines of the Ohio & Northwesiern Railway, re-cently the Cincinnati & Eastern. It is intended to extend the line from Portsmouth, Ohio, to meet an extension of the Kanawha & Ohio road thus opening a new line to the mineral regions of Ohio and West Virginia from Cincinnati. —The Louisville New Albany & Chicago Bailman Company

regiot s of Ohio road this opening a new first of the anti-regiot s of Ohio and West Virginia from Cincinnati. —The Louisville New Albany & Chicago Railway Company offers for sale in our advertising columns to-day \$900,000 of its consolidat-d six per cent gold bonds, due in 1916. This company's doing an increasing business, and we are informed that the gross earnings for the quarter will probably show \$100,000 increase over the same period of last year. A six per cent gold bond at or below par, by a responsible company, is now a rare thing, and the bonds merit careful consideration. —The firm of J. H. Latham & Co. has just been dissolved by the retirement of Mr. J. H. Latham, the senior member, who became a partner in the firm of Winslow, Lanier & Co. on April 1st inst. The business of the late firm of Messrs. Latham & Co. will now be conduct d by the remaining part-ner, Mr. Frederick W. Perry, who is favorably known for his energy and ability in connection with the purchase and sale of all kinds of securicies.

-Attention is called to the advertisement of Mr. A. D. Middleton (late of the firm of Middleton & Co in Exchange Place) the general agent of the Kansas Investment Company, of Topeka, Kansas. Mr. Middleton, who is well known in this city, offers to the public 6 per cent secured gold bonds of the above company, principal and interest payable at the Ninth National Bank in this city. -Messes Hamilton & Bichen honkas and brokers have

-Messrs. Hamilton & Bishop, bankers and brokers, have removed to large and commodious offices in the building hav-ing entrances at 96 Broadway, 6 Wall and 5 Pine streets, known as the Schermerhorn building, where they will be glad to see their friends, and others desiring to deal in bonds, stocks and securities.

-Under heading of "Banking and Financial," Messrs. Cof-fin & Stanton, of 11 Wall Street, invite attention to their offering of the Brooklyn Cable Company 1st mortgage bonds.

-The St. Paul Minneapolis & Manitoba Railway Co. have declared the usual quarterly dividend of $1\frac{1}{2}$ per cent, payable

PAYABLE AT THE FARMERS' LOAN & TRIST CO., NEW YORK. DUE 1907.

THE ORANGE BELT RAILROAD

THE ORANGE BELT RAILROAD extends from Monroe, a Station on the Jacksonville Tampa & Kev West Raitway, along the west bank of Lake Monroe, southwesterly through the towns of Sylvan Lake, Paols, Islant Lak', Glen Ethe, Long v. of Altamont, Forest City, Too noto, Lake ine, Clarkona, Millers and Crown Point, Forest City, Too noto, Lake ine, Clarkona, Millers and Crown Point to Oakland, a beantiful villag located on the south shore of Lake Apopka, a distance of 34 miles, and is being rapidly extended through to Point Pinelias on the Gulf. This Road passes through the most fertile lands of the State of Flor-isfactory business, and earning mole than the interest on its bonded debt, and when completed we see no reason why it should not pay handsome dividends on its stock as it is bonded for the small amount of \$5,000 per mile. These bonds are a first and only it should not pay wood that are earning over \$40,000 a year net, besides which the Cong-many has valuable real e tate and of the rproperty, estimated in all with the mills to be worth \$300,000, not including the Railroad and its franchises and east \$1,000,000, not including the Railroad and its franchises and the east \$1,000,000, not including the Railroad and its franchises

at any time after five years, and it is believed that they will be able to retire them all in five years, as it is for the inter-est of the Guarantors to do so, they being the owners of 75 per cent of the stock, which, with the 25 per cent we off r, will own the Road after these Bonds have been etired, and will be the only lien upon the Railroad equipment and franchises.

We look upon this security as a good investment, and with 25 per cent of stock bonus offered with the b. nds, they should command the attention of the investing public.

PRICE 9712 AND INTEREST, WITH 25 PER CENT STOCK BONUS. Respectfully yours.

The Bankers' Gazette.

WALL STREET, FRIDAY, April 1, 1887-5 P. M.

The Money Market and Financial Situation.—Since April first has arrived without any serious pressure in the money market, those who have feared a stringency will now breathe more freely.

The outward movement of our stocks and bonds to the foreign markets is yet an important factor in the general situation, though it is not quite clear as to the proportions of this movement,—how much of it is made up by the negotiation of railroad bonds abroad and how much by the straight purchase of stocks and bonds in the open market here for shipment to the other side.

At the Stock Exchange the tone has been evidently stronger, and the great majority of operators appears to be on the bull side, while the talk of the Street is nearly all in that direction. Bear influence is rather conspicuously absent, and the constitutional bears, if they have any plans, are waiting for prices to get higher before they make an attack.

Activity in financial negotiations pertaining to railroads still goes on, and this week we have the sale of the Chicago & Eastern Illinois stock to some party not announced, but supposed to be Atchison Topeka & Santa Fe; Rock Island has also disposed of \$6,000,000 more of its collateral trust bonds to a syndicate, the proceeds to be used for extensions in Nebraska.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 3 to 9 per cent, the usual rate to stock brokers being 5@6 per cent; to-day the rates were 3@9 per cent. Prime commercial paper is quoted at 5@6 per cent.

The Bank of England weekly statement on Thursday showed a gain in specie of £75,000, and the percentage of reserve to liabilities was 48.57, against 49.55 last week; the discount rate remains unchanged at 3 per cent. The Bank of France lost 2,975,000 francs in gold and 650,000 francs in silver. The New York Clearing House banks, in their statement of

The New York Clearing House banks, in their statement of March 26, showed a decrease in surplus reserve of \$1,148,500, the total surplus being \$6,186,850, against \$7,835,350 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks:

| | 1887. March 26. | Differ'nces fr'm Previous Week. | | 1885 March 28. |
|--|--|------------------------------------|-----------------------------|------------------------|
| Loans and dis. Specie Circulation Net deposits. Legal tenders. | 79,602,700 7,647,800 374,702,200 | Dec. 7,442,400 | 7,989,600 380,264,600 | 10,899,700 353,443,900 |
| Legal reserve Reserve held. | \$93,675,550 | Dec.\$1,860,600 Dec. 3,009,100 | \$95,066,150 107,863,300 | |
| Sarplus | \$6,186,850 | Dec.\$1,148,500 | \$12,797,150 | \$48,421,725 |

Exchange.—The chief feature of the foreign exchange market during the past week has been its extreme dulness, there having been an almost entire absence of demand from remitters. Rates have been rather weak, partly in consequence of the dulness and partly the result of pressure of security bills drawn against stocks and bonds. The much higher rates for money here than in London also work against the exchange market. Posted rates have been reduced $\frac{1}{2}$ c., to 4 85 $\frac{1}{2}$ and 4 87 $\frac{1}{2}$ @4 88. To-day the rates on actual business were as follows, viz.:

To-day the rates on actual business were as follows, viz.: Bankers' 60 days' sterling, $4 84\frac{3}{4}@4 85$; demand, $4 87\frac{1}{4}@4 87\frac{1}{4}$. Cat les, $4 57\frac{3}{4}@4 88$. Commercial bills were $4 83@4 83\frac{1}{4}$; Continental bills were: Francs, $5 21\frac{1}{4}@5 21\frac{3}{4}$ and $5 19\frac{3}{4}@$ 5 20; reichmarks, $95\frac{1}{4}@95\frac{1}{4}$ and $95\frac{1}{2}@95\frac{5}{4}$; guilders, $40@40\frac{1}{4}$ and $40\frac{1}{4}@4(\frac{5}{4})$.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying $\frac{1}{2}$ discount, selling $\frac{1}{2}$ premium; Charleston buying par@1-16 premium; selling $\frac{1}{2}$ @ $\frac{1}{2}$ premium; New Orleans,

commercial, 25@50c. discount; bank, \$1 prem.; St. Louis, 50@75c. discount; Chicago, 50c. discount. The rates of leading bankers are as follows :

| April 1. | Sixty Days. | Demand. |
|---|---|---|
| Primebankers'sterling bills on London Prime commercial Documentary commercial Paris (francs) Amsterdam (guilders) Frankfort or Bremen (reichmarks) | $\begin{array}{r} 4 85^{1} \\ 4 83^{1} 2 24 83^{3} \\ 4 83 24 83^{3} \\ 5 22^{1} 2 05 2^{1} \\ 8 0^{1} 6 24^{0} \\ 9 5^{1} 8 095^{1} \\ 9 5^{1} 8 095^{1} \\ \end{array}$ | 4 87 ¹ 2@188 5 20@5193 40 ¹ 4@40 ⁵ 10 95 ⁵ 8@95 ³ 4 |

United States Bonds.—Government bonds have been dull and without feature, except for considerable strength in the 4s and 41s, the former class being quoted fully one per cent higher than last Friday.

The closing prices at the N. Y. Board have been as follows

| | Interest Periods. | | Mar. 28. | Mar. 29. | Mar. 30. | Mar. 31. | April 1. |

* This is the price bid at the morning board ; no sale was made.

State and Railroad Ronds.—State bonds have been dull and very few classes have been dealt in. The most prominent have been the Virginia deferred bonds, the price being irregular and closing at 12 bid, though the transactions have not been specially large; North Carolina special tax bonds have advanced and close at 142.

The demand for railroad bonds has been fairly brisk, and it has been very general, no class being specially prominent for activity. The general market for bonds has sympathized with the stock market to a great extent, and consequently prices have been gradually improving in a moderate way, while a few classes have advanced rather more than the majority. These are Atlantic & Pacific 4s and incomes, Ohio Southern 1st and incomes, Indiana Bloomington & Western incomes, Fort Worth & Denver 1sts, Erie 2ds and Colorado Coal & Iron 6s, though the advance has not been fully maintained in all those named.

Railroad and Miscellaneous Stocks.—The temper of the stock market during the past week has been decidedly bullish, and transactions have been heavier than for a long time past. That the net advance for the week is no greater in the general market than it is, is due to reactions which have occurred at times from realizations and some hesitancy on account of continued fears of tight money. There has been no active bear movement, however, and all the talk has been on the bull side, it even being rumored that many of the bears have changed to the other side of the market, and some of the prominent operators have made plans for a bull campaign. The course of the market during the past week has contributed something toward bearing out this theory, the general list having been strong as a rule, and a few specialties having advanced quite sharply under favorable rumors and reports of different kinds. Foreign buying has also been somewhat of a feature, assisting the rise and helping to weaken the foreign exchange market. Other favorable features have been the bull movements commenced in the grangers, the Gould stocks and a few other specialties the rise in which has given the strong tone to the general market and assisted in the advance of the others. Compared with a week ago prices generally show an improvement, in some cases the advance being quite marked.

As mentioned above, the grangers have been quite prominent, Northwest and the Omahas leading the advance in the early part of the week and St. Paul coming in for an advance later on. Various rumors have been current in regard to these stocks, the principal one relating to the formation of a Chicago pool to advance them. Northwest has also been the subject of rumors in regard to increased dividends. Another prominent group have been the Southwesterns, or Gould stocks, Teras Pacific, the Wabashes, Missouri Pacific and M. K. & T. all sharing in an active and upward movement, on rumors that insiders in these stocks were strong bulls on the general market. In the early part of the week Canada Southern was active and advanced sharply, but aside from this there has been nothing special to note in regard to the Vanderbilts. Fort Worth & Denver has been specially prominent for activity and wide fluctuations, though the advance was quite steady until Thursday, when there was some reaction, followed by another improvement. Other strong stocks have been Columbus & Hocking Coal, Richmond Terminal, Kingston & Pembroke. the Nickel Plates, and a few others less prominent. 0

GENERAL QUOTATIONS OF STOCKS AND BONDS. Quotations in New York represent the per cent value, whatever the par may be; other quotations are frequently made per share. The following abbreviations are often used, viz.: "M.," for mortgage; "g.," for gold; "g'd," for guaranteed; "end.," for endorsed; " cons., for consolidated; " conv.," for convertible; "s.f.," for sinking fund; "1.g.," for land grant. Quotations in New York are to Thursday; from other cities, to late mail dates. Subscribers will confer a favor by giving notice of any error discovered in these Quotations.

Investment Kailroad Intelligence.

The INVESTORS' SUPPLEMENT contains a complete exhibit of The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., January, March, May, July, September and November, and is fur-nished without extra charge to all regular subscribers of the OHRONICLE. Extra copies are sold to subscribers of the OHRONICLE at 50 cents each, and to others at \$1 per copy.

ANNUAL REPORTS.

Union Pacific Railway.

(For the year ending December 31, 1886.)

The annual report presented by Mr. Adams in advance of the full report will be found at length on another page. The statistics are generally for the whole system, including auxiliary lines, and the net result of the year was a surplus income of \$5,746,369 over all annual charges, against a similar surplus of \$2,471,180 for 1885. Operations for three years have been as follows:

OPERATIONS AND FISCAL RESULTS.

Kansas City Fort Scott & Gulf Railroad.

(For the year ending December 31, 1886.)

The bonded debt of this company has been reduced during the year by the purchase of \$53,000 bonds from cash received from the Land Department, leaving total amount outstanding January 1, 1897, of Kansas City Fort Scott & Gulf Railroad Company 7 per cent bonds, \$2,247,000. The net amount to be gradually realized from the land assets still remaining for the purchase of bonds is estimated by the General Manager st urchase of bonds is estimated by the General Manager at

purchase of bonds is estimated by the General manager as about \$200,000. The ten-year 6 per cent coupon notes of the company have been increased during the year by the issue and sale at par of \$220,000; the proceeds of which have been used for acquiring an interest in coal properties, and for other items of construc-tion. The total amount of these notes now outstanding is seen 0.00 tion. Th \$320,000.

\$320,000. For the Kansas City Belt Railway, the additional amount advanced by this company during the year was \$74,906; on account of which bonds have been received and sold with the guaranty of this company attached. The Kansas City Clinton & Springfield Railway, owing to a complete failure of crops on its line, showed a deficit upon its bonded interest for the year of \$52,000, which was advanced by the Kansas City Fort Scott & Gulf Railroad Company, in conformity with its agreement, and for which it holds the obligation of the Clinton Company. The gross earnings of the Fort Scott road were however increased \$89,354 by inter-change of business with the Clinton Road. The gross earnings from business interchanged with the

The gross earnings from business interchanged with the Kansas City Springfield & Memphis Railroad amounted during the year to \$743,182.

eland Akron & Columbus.

(For the year ending December 31. 1886)

The stockholders of this company have just authorized the issue of \$1,800,000 5 per cent first mortgage bonds. Of these only \$1,300,000 will be issued at present, the re-mainder being held to provide the equipment of the Dres-den branch to be built, and for any other purposes to be deter-mined hereafter. Of the \$1,300,000 new bonds, \$600,000 will be read the proceent mortgage debt which bears 6 new mined hereafter. Of the \$1,800,000 new bonds, \$600,000 will be used to retire the present mortgage debt, which bears 6 per cent, and by a provision in the mortgage may be retired be-fore maturity. The remaining \$700,000 to be issued at pres-ent will be used in the construction of the Dresden branch, which will extend from Killbuck, Holmes County, almost directly south through Coshocton County, to Dresden Junc-tion, a distance of thirty-four miles, and there connect with the Muskingum Valley road for Zanesville. The President, Mr. N. Montserrat, has been re-elected. The first annual report of the company to the stockholders shows the following earnings: 1886. 1835.

| Freight Freight (coal) Passenger. Mail Express Miscellaneous. | | 1885, \$178,043 55,106 199,548 11,407 20,109 28,677 |

GENERAL INVESTMENT NEWS.

Baltimore & Ohio .-- Friends of Mr. Henry S. Ives report this week that the option for the purchase of a controlling in-terest in the Baltimore & Ohio Railroad has been extended to April 25, and it was intimated that the Ives Stayner syndicate had given new security that it would exe cise the option. It was stated that President Garrett had reduced the amount of stock to be paid for outright from 80,000 to 50,000 shares, with an understanding that the voting power of the stock held in trust under his father's will should be given to the purchasers

Buffalo New York & Philadelphia.—The gross and net earnings for February and for five months of the fiscal year were as follows:

Central Vermont.-The Central Vermont road (not including the Ogdensburg & Lake Champlain and New London Northern) reports the following results of operations for the half-year to December 31, 1886, the first half of the fiscal vear:

| Six months to Dec. 31, 1886. Gross earnings Expenses. | |
|---|---------------------|
| Net earnings | \$528,933 78,250 |
| Surplus | \$450,682 |

Chicago & Eastern Illinois.—The stock of this company has been sold at 110 to some purchaser whose name is yet un-known. The Beston Advertiser says: "The sale of a controlling interest in the Chicago & Eastern Illinois at 110, in the absence of any announcement as to the purchaser, has led to the cur-rent belief that it was purchased in the interest of the Atchison system. This belief cannot be positively confirmed, as those who know will not tell, and those who think they know are not even disposed to tell what they think. One thing appears certain, and that is that the Atchison is going into Chicago, and both the Wisconsin Central and the Chicago & Eastern Illinois stocks have been boomed on the supposed prospect that it would use the terminals of one road or the other. This sale, carrying with it the right to one-fifth of the stock of the Chicago & Western Indiana road and the Chicago & Eastern Illinois Chicago & Eastern Illinois .- The stock of this company & Western Indiana road and the Chicago & Eastern Illinois terminal at Chicago, very naturally inclines the public to believe that it has been purchased in the interest of the Chicago Santa Fe & California road by the Atchison people."

Chicago St. Louis & Pittsburg.—Following is a statement of the earnings of this road, obtained for publication in the CHRONICLE :

| | Jan. 1 | | |

| Dubuque & Sioux C | | | | | |

of the Dubuque & Sioux City Road, the Illinois Central will surrender its lease of the disputed line October 1, according to an optional provision of the document.

In New York it is reported that parties in the interest of Illinois Central have offered Drexel, Morgan & Co. 80 cash for the 25,840 shares Dubuque & Sioux City stock registered in their names, and made the same offer to Mr. Jesup. It is stated that this offer is their ultimatum.

Fitchburg.—Dow, Jones & Co. report: The Fitchburg directors have just completed arrangements for the purchase of the Hoosac Tunnel dock and elevator. The agreement calls for 5 shares of Fitchburg stock for 4 shares of the Dock Company, and will necessitate an increase in the Fitchburg Company's capital of \$1,512,500. Nearly 6,000 shares of Dock Company, entire 12,100 shares, are already in control of the Fitchburg road and one other party. Meeting of Fitchburg stockholders to ratify the purchase and to authorize an increase of the capital stock and issue of bonds not exceeding \$1,500,000 has been called for April 11th.

Flint & Pere Marquette —The forthcoming report of the Flint & Pere Marquette Railroad Company for 1886 will show :

| Gross earnings Operating expenses | | \$1,946,790 1,347,840 | |
|--|----------------------|--------------------------|---|
| Net earnings Interest and dividends | \$649,670 647,909 | \$598.950 593,725 | |

Indiana Bloomington & Western.—This railroad, from Indianapolis to Pekin, Ill., a distance of 202 miles, including all rights of way, &c., and also the line of road, extending from Indianapolis eastward to Springfield, Ohio (commonly known as the Eastern Division), besides terminal facilities and franchises, were sold at Indianapolis, Ind., March 28, by the United States Master in Chancery, for \$3,000,000, to J. D. Campbell. The sale was in accordance with the plan of reorganization adopted some weeks ago. This plan includes the consolidation of the Columbus Springfield & Cincinnati and the Indianapolis Bloomington & Western. The consolidated lines will be known as the Columbus Indianapolis & Western. The headquarters of the company will be continued at Indianapolis. The sale was made subject to any lien of the Cincinnati Sandusky & Cleveland Railroad lease and included the lease of the Peoria & Pekin Railroad and one-fourth of its stock.

Little Rock & Fort Smith.—A dispatch from Fort Smith, April 1, says: "The Little Rock & Fort Smith Railway passes into the hands of Jay Gould to-day, and active work on the extensions of the line is to begin at once. The road is to be extended from Van Buren to Fort Gibson, Cherokee Nation, and four miles of the track is now laid out from the first-mentioned place. The line will be built on the north side of the Arkansas River to a point on the north bank opposite this city, where a cantilever bridge is to be constructed at once, and will be ready to operate by the middle of July or the first of August."

Louisville & Nashville.-The gross and net earnings have been as follows:

| | -Gross Ed | arnings. | Net Ea | rnings. | |
|--------------------|--------------|-------------|-------------|-------------|--|
| | 1886-7. | 1885-6. | 1886-7. | 1885-6. | |

New York Woodhaven & Rockaway.—At a meeting of the directors of the New York Woodhaven & Rockaway Railroad Company at Hunter's Point Wednesday afternoon, Austin Corbin was elected President to fill the vacancy caused by the death of James M. Oakley; J. Rogers Maxwell was elected Vice-President.

Norfolk & Western.-The gross and net earnings in Feb ruary were as below.

| | -Febru | uary | -Jan. 1 to | Feb. 28.~ |
|--------------------------------------|-------------------------------|-------------------------------|-------------------------------|-------------------------------|
| Gross earnings Operating expenses | 1887. \$299,303 172,674 | 1886. \$221,788 137,456 | 1857. \$578,609 349,795 | 1886. \$440,695 278,696 |
| Net earnings | \$126,628 | \$84,331 | \$228,814 | \$161,999 |

Northern Pacific.—The gross and net earnings by months; in 1885 6 and 1886-7, have been as follows:

| - | Gross Earnings | | Net Earnings | |
|--------------------|----------------|-------------|--------------|-------------|
| 1 | 1886-7. | 1885-6. | 1886 7. | 1885-6. |
| July 1 to Dec. 31. | \$7,342,295 | \$6,743,260 | \$3,970,124 | \$3,640,981 |
| January | 571,421 | 480,330 | 40,721 | 30,052 |
| February | 525,723 | 594,240 | 26,602 | 182,708 |
| Total 9 months | \$9 130 111 | \$7 917 930 | \$1.037.447 | \$3 853 741 |

Land sales for the same period in 1886-7 were 180,692 acres; amount of sales, including town lots, \$636,602.

Ohic River.—The Ohio River Railroad Company, whose line runs from Wheeling to Point Pleasant, Mason County, has placed a loan for \$3,000,000 with the Fidelity Safe Deposit Company, of Philadelphia. The mortgage covers the entire line of the road, including the extension from Point Pleasant to Huntington, now under contract.

Oregon Railway & Navigation.—President Elijah Smith of the Oregon & Trans-Continental Company said to a reporter that the lease of the Oregon Railway & Navigation property to the Oregon Short Line for Union Pacific was not signed; but he expected President Adams to come to New York and sign it before the end of this week. He also felt sure that Union Pacific would take his company's holdings of Oregon Railway & Navigation stock.

Philadelphia & Beading.—The result of the joint operations of the Philadelphia & Reading Railroad and Coal & Iron Company in the month of February, the third month of the fiscal year, was an increase of \$654,112 in gross earnings and an increase of \$424,571 in net, compared with February, 1886. For the three months from December 1 gross earnings show an increase of \$969,350 and net an increase of \$867,384.

| | |

The total of all classes of securities deposited is \$110,409,464 out of an aggregate issue of \$117,972,859.

out of an aggregate issue of \$117,972,859. **Richmond & Alleghany.**—The reorganization plan of Rich-mond & Alleghany has been issued. The new securities will be \$6,000,000 5 per cent firsts; \$5,000,000 preferred stock and \$5,000,000 common. In 1888 2½ per cent interest will be paid on the bonds and 5 thereafter. The present 1sts will get 100 per cent in new 1sts, 37 per cent in preferred stock and 80 per cent in common stock. The 2ds get 53¾ per cent in preferred stock and the common stock gets 70 per cent in new common, having paid 10 per cent assessment in all, including the \$2 10 already paid. The money for the assessment will be used to pay receiver's certificates. Those who paid the first assessment of \$2 10 can receive their money back by giving up their stock. The new company will have in its treasury \$1,000,000 firsts and \$1,000,000 of preferred stock after the distribution of new securities is finished.

Richmond Terminal—Richmond & Danville.—Kiernan's report on Friday says: "The Richmond Terminal Company yesterday took important action, resulting in the adjustment yesterday took important action, resulting in the adjustment of the quesion respecting Richmond & Danville 6 per cent debentures. For some time past it has been considered desir-able to convert the \$4,000,000 of these bonds into a consoli-dated 5 per cent bond. The company proposed to pay 118 per cent, which included the 3 years' past-due interest on the consolidated 5s. Holders of \$1,250,000 of the bonds as-sented, but the two largest holders outstanding refused. At the meeting Geo. S. Scott proposed to pay in the consolidated 5s. 24 per cent to the non-assenting bondholders and 21 per cent to those who had assented, this being and including in-terest to April 1, 1887, the holders to retain their 6 per cent debentures for their principal, as they considered their deben-tures as good as the consolidated 5s. The reason the assented bondholders received less was because they had been paid 2 95-100 as interest on their interest. President Sully opposed the adoption of the proposition, but it was finally carried, and all the debenture holders will assent, thus enabling the matter to be adjusted forthwith.

St. Louis & San Francisco.—The results of operations for the year 1886, and comparison with previous year are shown below, in advance of the pamphlet report:

-It is reported, apparently on good auhority, that the pur-chase of the South Pacific Coast Road (narrow-gauge) has been concluded by Mr. Huntington with ex-Senator James G. Fair. This railroad is operated between San Francisco and Santa Cruz, and is different from the Pacific Coast narrow-gauge road between Port Harford and Las Animas.

Toledo Peoria & Western.—At Springfield, Ill., March 28 articles of incorporation were filed in the office of the Secre tary of State for the Toledo Peoria & Western Railway Com-pany. The principal office is to be at Peoria and the capital stock \$4,500,000. It is proposed to construct the railway from a point on the eastern boundary line of Illinois, in Iroquois County, westerly to the city of Warsaw, thence to the town of Hamilton, on the Mississippi River, and by a branch from La Harpe to Burlington, Iowa. Harpe to Burlington, Iowa.

Harpe to Burlington, Iowa.
Union Pacific.—The annual meeting was held in Boston March 30. It was voted to ratify the action of the President in agreeing to lease to the Chicago Kansas & Nebraska Railway Company the right to make joint use of the tracks and certain other property of the Union Pacific road situated between Topeka and Kansas City; also to ratify his action in regard to similar transactions with the St. Joseph & Grand Island and the Chicago Rock Island & Pacific roads.
The proposed lease of the Oregon Railway & Navigation lines by the Oregon Short line, in the interest of the Union Pacific, was also approved.
Mr. Adams introduced a series of resolutions, in which it was declared that the road was indebted to the United States in the sum of \$49,210,265 on account of the subsidy bonds and interest. These bonds are due between 1896 and 1899, and the amount will be so large that it will be beyond the power of the company to pay it off from its actual or prospective resources; therefore, be it

the power of the company to pay it off from its actual or pro-spective resources; therefore, be it Resolved, That the President and directors are hereby instructed to formulate and submit to the Government of the United States a plan for settling the subsidy and funding the same for such periods at such reasonable rates of interest and under such terms as to additional secu-rity for a gradual repayment of the principle as will in their judgment be wise and just to both the Government and the company. Resolved, Further, that the President and directors be and they are hereby authorized to proceed and take all proper and necessary meas-ures to secure an early acceptance by Congress of such plan for settling and funding the company's subsidy debt and also for securing the lib-eration of the company and its business, as far as possible, from the control of the United States and its officers and from all interference growing out of its present relations with the Government. There were 438,200 shares represented. All the votes were cast for the following directors: Charles Francis Adams, Frederick L. Ames, Elisha Atkins, Ezra H. Baker, F. Gordon Dexter, Mahlon D. Spaulding, all of Boston; Henry H. Cook, Sidney Dillon, David Dows, Andrew H. Green, Colgate Hoyt, all of New York; S. R. Callaway, Omaha, Neb.; Greenville M. Dodge, Council Bluffs, Ia.; James A. Rumrill, Springfield, Mass.; John Sharp, Salt Lake City. Mr. Adams was re-elected President, and the meeting adjourned. The land grant mortgage bonds that matured April 1, 1887, were paid off. The Treasurer of the company gives notice that he will purchase any or all of the land grant bonds as follows : Bonds due October 1, 1888, at 104¹/₃ flat ex April 1 coupon; bonds due April 1, 1889, at 105³/₄ flat, ex April 1 coupon; bonds due April 1, 1889, at 105³/₄ flat, ex April 1 cou-pon.

pon.

-The gross and net earnings for February and from Jan. 1 to Feb. 28 were as follows:

| February | | Jan. 1 to Feb. 28 | | |
|----------------------------------|----------------------|-----------------------------------|--|-----------------------------------|

Reports and Documents.

REPORT OF THE UNION PACIFIC RAILWAY COMPANY.

The Union Pacific system is composed of the roads of the Union Pacific Railway Co. (1,832.45 miles) and auxiliary lines (2,761.95 miles), and has a total length of 4,594.40 miles. The earnings and expenses of the system for 1886, as compared with 1885, were as fo'lows:

| It is set to be a set of the set of the set | Union Facific Railway Company. | | Auxiliar | y Lines. | Union Pacific System. | |

| | 326 15 | 267 26 | 168 60 | 156 85 | 232 08 | 202 07 |
| Net earnings per mile of road | \$4,105 27 | \$4,586 58 | \$542 21 | \$485 62 | \$1,977 77 | \$2,165 30 |

At the beginning of the year 1886 certain changes were made in the rates arbitrarily charged for carriage of company material, etc., which, as compared with the previous year, worked to the advantage of the operating department against the commercial department. Due allowance for these changes in the methods of bookkeeping being made, the gross earnings, computed on the same basis for both years, increased \$1,265,050 in 1886 over the earnings of 1885, while the operating expenses increased \$2.032.601.

The reason for the increase in operating expenses is explained by the General Manager as follows :

"The average mileage of the entire system operated in 1886 shows an increase of 1.66 per cent; and per mile of road operated the gross earnings show an increase of 1.93 per cent, the operating expenses an increase of 8.35 per cent, and the net earnings a decrease of 8.66 per cent. The total train mileage shows an increase of 7.70 per cent, and the car mileage an increase of 6.56 per cent. An increase of 2.12 per cent of train mileage is accounted for by more extended work train service, necessitated by the improvements made to track and road-bed.

"The increased operating expenses are attributable principally to these improvements, maintenance of way on entire system showing an increase of 28:63 per cent, on consolidated lines 27:16 per cent, on Utah & Northern 82:11 per cent, and on Oregon Short Line 36:75 per cent. During the year 46,920 tons of new 60 and 67 pound steel rail were laid; the lighter steel removed to the more important branch lines, and the iron released used in the construction of less important side lines. This involved the handling of over 62,590.5 tons of steel rails, and, while adding largely to the value of the property, increased the working expenses to a much greater extent than required for ordinary maintenance.

"The greater cost of operating expenses is also caused by a considerable increase in maintenance of oars, which on the Ontire system amounts to 19 41 per cent, on consolidated lines to 20 20 per cent, and on Oregon Short Line to 46 11 per cent."

FINANCIAL RESULTS OF OPERATION OF THE UNION PACIFIC SYSTEM.

After the payment of all fixed charges and the deduction of Government requirements, the balance applicable to dividends in 1886 was \$3,746,368 58, or 6 15 per cent upon the capital stock of the Union Pacific Railway Company, as compared with \$2,471,181 18, or 4.06 per cent in 1885. Although the net earnings of the system have decreased \$692,262 51, the revenue from investments and miscellaneous sources has increased to such an extent that the balance applicable to dividends is \$1,275,-187 40, or 51.60 per cent more than that of 1885, as is evident from the following table :

| | 1886. | | 1885.* | | Increase. | Decrease. | |

• For purposes of comparison, the figures for 1885 have been revised by deducting the earnings and expenses of that portin of the railroad of the Utah & Northern Railway Co. north of Silver Bow, and of the railroad of the Montana Railway Co., for the months of August to December, inclusive, this portion of the Union Pacific system having been operated by the Montana Union Railway Co. since August 1, 1886; the earnings of the Montana Union Railway Co. are not included in those of the system In the early part of the past year \$50,000 bonds secured by the Kansas Pacific Consolidated Mortgage were purchased by the trustees with the proceeds of land sales for cancellation. No bonds could be bought after that time at par and accrued interest, the highest price allowed by the indenture for their purchase. The trustees therefore advanced to the company, in accordance with the terms of the mortgage, a sufficient sum of money, derived from land sales, to pay the interest accrued during the year on the outstanding Kansas Pacific Consolidated Mortgage bonds. The amount thus received was applied to interest. At the same time the company appropriated from its current funds a sum of money, which was spent on the construction of railroads tributary to the Kansas division. The first mortgage bonds representing the cost of these railroads were delivered to the American Loan & Trust Co., trustee, during the year and since its close, according to the terms of the trust indenture of the Union Pacific Railway Co., executed July 1, 1886, creating and establishing a sinking fund for the further security of the lien and mortgage creditors of the Kansas Pacific Railway Co.

FUNDED AND FLOATING DEBT.

The following table exhibits the condition of the funded and floating debt of the entire Union Pacific system, its mileage, etc., on June 30, 1884, December 31, 1884, December 31, 1885, and December 31, 1886, respectively :

| | June 30, 1884. | Dec. 31, 1884. | Dec. 31, 1885. | Dec. 31, 1886. |
|--|----------------------------------|------------------|----------------------------------|--------------------------------|
| Funded debt of the system in the hands of the public | \$146,588,427 87 1,958,032 50 | | | \$148,233,092 96 637,300 00 |
| Total funded debt | \$148,546,460 37 6,900,177 95 | | \$146,936,408 53 1,861,445 40 | |
| Total funded and floating debts | \$155,446,638 32 | \$151,354,231 53 | \$148,797,853 93 | \$147,519,203 23 |
| Miles of road | 4,419.8 | 4,476.4 | 4,519.5 | 14,594.4 |
| Debt per mile of road | \$35,170 51 | \$33,811 59 | \$32.9:3 52 | \$32,108 48 |

* Excess cash and cash resources. f Excluding Montana Union Railway Co.'s lines, 66'7 miles.

Accounting, therefore, the bonds and other securities of the company held in its own treasury as bonds "afloat"-that is, issued-the changes between June 30, 1884, and December 31, 1886, have been as follows:

| prorease in funded debt | \$323,932 59 8,251,367 68 |
|-----------------------------------|------------------------------|
| Total decrease in debt | \$7,927,435 09 |
| Increase in miles of road | 174.6 |
| Deorease in debt per mile of road | \$3,062 03 |

During the two years and six months which elapsed between the change in the company's management in June, 1884 and the 31st of December, 1886, a sum exceeding $$16,200,000\ 00$ was spent in improving the condition of the system, either through extinguishing the floating debt of the company, or paying for new construction and equipment. The amount applied to construction was spent chiefly in the rebuilding of the Omaha bridge, making preparation for the change of gauge of the Utah & Northern and extending certain of the more important branch lines. A large amount ($$1,240,000\ 00$) has also been spent for new equipment.

The above sum of \$16,200,000 00 was derived from the following sources:

Meanwhile, during the same period, bonds of the company to the amount of \$5,996,500 00 were retired through the operation of the sinking funds and the land grant trusts. Of the bonds thus retired \$2,397,000 00 belonged to the issue known as the land grant bonds and \$1,525,000 00 to the issue known as the Kansas Pacific Consolidated Mortgage bonds.

During the period in question 316 miles of new road were completed and paid for; the bridge across the Missouri River at Omaha was practically reconstructed on a new and much enlarged plan, adequate to the present and all immediate future requirements of traffic. This work will be completed in June of the present year. All preparations were made for changing the gauge of the Utah & Northern road north of Pocatello, and the final conversion from the narrow to the standard gauge will be made in June.

The investment account in bonds and stocks of other railroad companies, which was \$32,938,275 82 on the 30th of June, 1884, on the 31st of December, 1886, amounted to \$32,911,775 95.

Accordingly, as appears from the table printed above, at the close of the year 1886 the company had within thirty months wiped out a floating debt of \$3,251,367 68, while at the same time the aggregate outstanding funded debt of the system had been increased \$323,932 59, and the amount of the investments of the company in the securities of its branch or auxiliary companies (\$33,000,000 00) had been diminished \$26,499 87. During the period named the financial condition of the system, including both the company and the auxiliary lines, as represented in the aggregate of floating debt, funded debt and investment account, had been improved in the net amount of \$7,900,935 23, and in addition to this \$3,800,000 00 had been spent in new construction and equipment.

LOCAL AND THROUGH BUSINESS.

The decrease in the value of through and Pacific Coast, and the increase in the value of local, business has steadily continued, as will be observed from the following tables. In these tables, under the head of local business all business is included except Pacific Coast business to and from California, Nevada, Oregon and Washington Territory, and through business. Through business signifies all business passing to and from be tween the eastern termini of the Union Pacific system at Omaha, Council Bluffs, Kansas City and Leavenworth, and its western termini at Ogden, Huntington and Garrison (Silver Bow in place of Garrison since August 1, 1886). Pacific Coast business includes all California and N-vada business originating from or destined to points west of Winnemucca, Nevada, a station on the Central Pacific railroad 419 miles west of Ogden; and also all business to or from points in Oregon and Washington Territory west of Huntington, Oregon,

d

E, I

Dic

\$893.000 00

In past years Oregon and Washington Territory business was classified as local or through business; it is now classified as Pacific Coast business, and the figures for 1885 have been revised in accordance with the basis adopted in 1886. The value to the system of local business as compared with through and Pacific Coast business, 1886 and 1885, is shown by the following table of passenger and freight earnings:

| Year. | Local Business, including Coal. | Through Business, including Pacific Coast Business. | Totals. |
|------------------------|------------------------------------|---|----------------------------------|
| 1886 1885 | \$19,187,758 27 17,910,335 49 | \$4,637,868 46 4,967,754 28 | \$23,825,626 73 22,878,089 77 |
| Increase | \$1,277,422 78 | \$329,885 82 | \$947,536 96 |
| Percentage of increase | 7.13 | 6.64 | 4.14 |

The increase in local business has, by the sum of \$947,536 96, more than made good the decrease in through and Pacific Coast business.

The number of passengers carried one mile was:

| Year. | Local Business. | Through Business. | Totals. |
|------------------------|----------------------------|--------------------------|----------------------------|
| 1886 1885 | 157,800,538 129,461,386 | 90,722,472 58,776,030 | 248,523,010 188,237,416 |
| Increase | 28,339,152 | 31,946,442 | 60,285,594 |
| Percentage of increase | 21.89 | 54.35 | 32.03 |

The number of tons of freight carried one mile was:

| Year. | Local Business, including Coal. | Through Business, including Pacific Coast Business. | Totals. |
|------------------------|---------------------------------------|---|------------------------------|
| 1886 1885 | 797,278,485 742,977,818 | 316,824,367 251,802,405 | 1,114,102,852 994,780,223 |
| Increase | 54,300,667 | 65,021,962 | 119,322,629 |
| Percentage of increase | 7.31 | 25.82 | 11.99 |

Peculiar interest attaches to the movement of Pacific Coast business during the past year because of the dissolution of the Trans-Continental pool February 20, 1886, resulting in a complete demoralization of rates after that date on all Pacific Coast business, both passenger and freight. The effect of this demoralization upon the traffic and receipts of the original dized Union Pacific road has already been referred to. But a considerable portion of the Pacific Coast traffic is now done over other portions of the Union Pacific system. The effect of the Trans-Continental war of rates on the freight receipts of the whole Union Pacific system is very clearly shown in the following table :

PACIFIC COAST BUSINESS FOR THE YEARS 1886 AND 1885.

| | Freight Earnings. | | Tons Carrie | Rates & Ton & Mile. | | |
|---|---|---|---|---|---|---|
| | 1886. | 1885. | 1886. | 1885. | 1886. | 1885. |
| January. February. March. April. May. June. July. September. October. November. December. | \$84,325 86 115,510 09 165,417 84 129,818 69 178,241 01 155,041 66 208,482 83 194,602 73 153,453 89 195,789 63 162,890 68 152,227 46 | $\begin{array}{r} \$64,422 \ 85\\ 108,994 \ 48\\ 176,349 \ 61\\ 167,224 \ 50\\ 222,843 \ 55\\ 179,852 \ 34\\ 265,297 \ 35\\ 251,495 \ 52\\ 289,782 \ 54\\ 261,092 \ 29\\ 193,224 \ 83\\ 123,464 \ 06\\ \end{array}$ | $\begin{array}{r} 6,697,082\\ 11,757,397\\ 38,819,853\\ 32,765,375\\ 20,563,772\\ 14,806,739\\ 23,562,851\\ 22,168,286\\ 19,227,155\\ 22,240,090\\ 19,568,386\\ 20,570,694 \end{array}$ | $\begin{array}{r} 8,324,840\\ 9,182,051\\ 15,367,782\\ 14,058,026\\ 16,966,152\\ 19,155,525\\ 20,373,490\\ 23,137,408\\ 21,296,146\\ 15,059,369\\ 9,528,515\end{array}$ | Cents. 1*26 0*98 0*43 0*40 0*87 0*78 0*88 0*88 0*88 0*88 0*88 0*83 0*74 | Oentis. 0.777 1.19 1.15 1.19 1.38 1.066 1.38 1.23 1.23 1.23 1.23 1.23 1.23 1.23 1.23 1.23 |
| Total | \$1,896,002 37 | \$2,304,043 92 | 257,747,680 | 188,569,038 | 0.74 | 1.22 |

From the above table it appears that in March, 1886, immediately after the war of rates had begun, the tonnage moved one mile was more than double that of the same month of the previous year. With the increase of business, rates decreased from 1.15 cents per ton per mile in 1885 to 0.48 cent in 1886, resulting in a decrease in gross earnings derived from Pacific Coast business in March of \$10,931 77.

The Pacific Coast tonnage moved one mile during the entire year shows an increase over 1885 of 69,178,642 tons, or 36.68 per cent; the gross revenue derived from this class of business shows a decrease during the same period of \$408,041 55, or 17.71 per cent.

In 1885, Pacific Coast freight earnings amounted to 8.97 per cent of the gross earnings of the system; in 1886 they represented but 7.12 per cent of those earnings.

Pacific Coast business for 1886 shows an increase in the number of tons of freight east bound carried one mile of 23,340,594 tons, or 25.81 per cent; and an increase in the number of tons west bound, of 45,838,048 tons, or 47.58 per cent, as compared with 1885.

The results above set forth have a peculiar significance taken in connection with the report of the officers of the Interior Department to the Secretary of the Treasury of March 5, 1885, referred to in the last annual report (p. 9.) It will be remembered that in the report in question it was claimed that the so-called subsidy, or payments made by the Pacific railroad comparies to the Pacific Mail Steamship Company, under the arrangement through which rates were maintained, had been improperly deducted from the gross receipts of the Pacific railroad companies in ascertaining the requirements of the Government, and that a large sum of money was, therefore, still due from the companies to the Government under the Thurman Act.

The arrangement in question terminated in March last. No further payments under it were made; and the rates of freight, no longer sustained through the agreement, were at once reduced in the manner and to the degree set forth in the foregoing table. The cause of complaint on the part of the Government was, therefore, removed. The result speaks for itself. The Government requirements under the Thurman Act being fixed at twenty-five per cent of the net earnings of certain of the aided lines of the companies, and the net earnings of those aided lines being to a very considerable extent dependent on the profits derived from the trans-continental traffic, when the trans-continental traffic went to pieces, the twenty-five per cent was correspondingly reduced. Accordingly, the Government requirements of your company for the

raser stlouisfed org/

year 1886 were, largely through this cause, reduced to \$808,032 80, as compared with \$1,184,053 05 in 1885. It would thus appear that the Government of the United States had an interest in the maintenance of the subsidy arrangement with the Pacific Mail scarcely less than that of the railroad companies themselves.

* This account covered the actual notes of the company on which it was borrowing money. * The increase in this account December 31, 1886, is due principally of the succeeding year, and vouchers payable in the early months struction of the Omaha bridge and extensions of branch lines. ‡ Includes full amount of coupous due on following day. * This account covered the actual notes of the company on which it * 5 Includes notes receivable held by the company, advances to Utah Central Railway Co. for purchase of steel raits, open accounts at Omaha against other railroad companies and individuals, and advances to branch lines on current account. # The amount found due the United States by the Court of Claims, on earnings of past years, \$916,704 02, is not included at these respective dates.

Iowa Falls & Sioux City,—Boston reports state that the directors of the Iowa Falls & Sioux City Railroad have submitted to the stockholders a proposition for the sale of the road to the Illinois Central Company on the following terms: Stock to be purchased by the Illinois Central at \$50 per share, exclusive of Treasury assets and of the company's lands unsold and bills receivable from land sales. There are now in the treasury \$460,500 bonds to be sold to the Illinois Central for \$555,320, and 326 shares of stock to be assigned to the Illinois Central and to be entitled to their proportion of treasury assets, the Illinois Central to assume and guarantee payment of the principal and interest of the mortgage bonds. The rental account is to be adjusted to March 1. David P. Kimball has been appointed trustee to receive certificates of

stock. All the net assets will be divided pro rata among the stockholders, and such dividend will probably amount to 33 per cent upon each share of stock.

per cent upon each share of stock. Cincinnati Hamilton & Dayton.—An official of the Cincinnati Hamilton & Dayton Railway is authority for the statement that representatives of the syndicate that controls that company have purchased the Dayton & Delphos narrowgauge road for \$260,000. With this purchase the C. H. & D. also gets the right of way for an extension from Delphos to Decatur, Ind., where the company secures connection with the Chicago & Atlantic for Chicago. The Dayton & Ironton will be made standard gauge on Sunday, April 3, and it is said that the new purchase, the Dayton & Delphos, will be widened before May 15

THE CHRONICLE

The Commercial Limes.

COMMERCIAL EPITOME.

FRIDAY NIGHT, April 1, 1887.

We have had wintry weather over a considerable portion of the United States this week. Frosts and snows are reported from Southern latitudes, and in the South Atlantic States early vegetables grown for Northern markets have been killed. In the Ohio and Missouri Valley it is reported that wheat has been damaged. The spring trade is injured, and the re-opening of inland navigation is delayed by the lateness of the season. Floods, which did some damage, are abating. Mercantile values generally gained strength early in the week, with cotton and coffee very active. The low rates of ocean freight have continued to afford some stimulus to the export of cereals, of which we still have a large surplus to go forward, but the general export movement is light. The progress of legislation in several States to restrict or prohibit the sale of intoxicating liquors is exciting much interest.

The speculation in lard for future delivery has been very dull all the week at prices showing no important fluctuations To-day the market weakened under very moderate offerings. Lard on the spot has been very dull, and closes nearly nomi-nal at 7.50c. for prime city, 7.60@7.65c. for prime to choice Western; 7:85c. for refined to the Continent and 8.10c. for refined to South America.

DAILY CLOSING PRICES OF LARD FUTURES

| | Saturd'y. | | | Mond'y. | Tuesd'y. | Wedns'y. | Thursd'y. | Friday |
|--------------|-----------|----|------|---------|--------------|--------------|-----------|--------------|
| April May | deliv | 'y | 7.51 | 7.62 | 7.58 7:05 | 7.60 7.66 | 7.60 | 7.57 7.61 |
| June | ** | | 7.68 | 7-75 | 7.72 | 7.72 | 7.74 | 7.70 |
| July | 11 C | | 7.74 | 7.88 | 7.79 | 7.78 | 7.80 | 7.75 7.31 |

Pork has been drooping, and closes somewhat unsettled at \$15@\$16 for old and new mess, \$13 50@\$14 for extra prime and \$16 50@ \$17 50 for clear. Cut meats have been more active, but at easier prices; pickled bellies 71/20, hams 111/20 111/2c. and shoulders 63/4c.; smoked hams 121/2@121/2c. and shoulders 73%c. Beef is steady at \$9 50 for extra mess and \$10@\$10 50 for packet per bbl., and \$16@\$18 for India mess per tierce. Beef hams are steady at \$21 50@\$22 per bbl. Taltow is lower and more active at 3 15-16c. Stearine is dull at 8c., but oleomargarine sold freely to-day at 6%c. Butter is easier at 21@33c. for creamery and 20@28c. for State dairy. Cheese is firmer at 123@14%c. for State factory full cream and 7@114% of skime. The following is a comparative summary of aggregate ex-

ports from November 1 to March 26.

| 1886-7. 1885-6. |
|---|
| Pork, 1bs 19,236,000 19,089,200 Inc. 146,300 |
| Bacon, &c., 108, |
| Lard, lbs 151,334,857 124,107,215 Inc. 27,227,642 |
| The speculation in Rio coffee has been active all the |
| week. An carly advance was followed by a decline. |
| which nearly recovered, and the market to-day was |
| quite buoyant, closing with sellers at 13.70@13.75c. |
| |
| for the earlier and 13 80@13 90c. for the later months. |
| Coffee on the spot continued active, and the quota- |
| tion for fair cargoes Rio was advanced to 151/4 c., but the busi- |
| ness in mild grades is not so brisk at the advance asked. Raw |
| sugars opened the week active, but are latterly quieter. |
| closing slightly easier at 4 9.16@45%c. for fair refining Caba |
| |
| and 51/8@53/8c. for Centrifugal 96 deg. test. Molasses was very |
| active; 950 hhds. Cuba, Porto Rico and Barbadoes sold to- |
| day, and the market is firm at 191/2c. for 50 deg. test. Teas |
| are quiet. |
| Kentucky tobacco has sold in the past week to the extent of |

are quiet. Kentucky tobacco has sold in the past week to the extent of 325 hds., of which 125 for export at unchanged prices. Seed-leaf has been dull, and sales for the week are only 1,180 cases as follows: 240 cases 1881-82-83 crops Pennsylvania seed, 12 to 16½c.; 420 cases 1885 crop do., 12 to 18c; 120 cases 1885 crop, Pennsylvania Havana, 10 to 18½c.; 100 cases 1885 crop Little Dutch, p. t.: 100 cases 1885 crop, Ohio seed, p. t., and 200 cases sundries, 7 to 28c.; also, 450 bales Havana, 60c. to \$1 05, and 200 bales Sumatra, \$1 20 to \$1 45. Crude petroleum certificates have ruled very dull, with only fractional changes in values, closing to day at 63½@633ge Spirits turpentine has been dull and closes lower at 38c. Low grades of rosin have been taken for export to the extent of 5@6,000 bbls. and prices are firmer at \$1 20@\$1 25 for com-mon to good straimed. The Metal Exchange has developed no features of special interest. To day, however, block tin was more active at 22 50c, on the spot and 22 70c. for July, and ingot copper sold to the extent of 25.000 lbs, for April at 10'35c., a slight decline. Lead dull at 4'30@4'40c. Decan freights are still very low, especially for grain to British ports to which shipments are checked by the higher values current. A moderate business is done to the Continent. The nominal rate for wheat to Liverpool and London is one penny a bushel. Petroleum charters were brisker earlier in the week at low rates, but late business is dull.

COTTON. FRIDAY, P. M., April 1, 1887, THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Apr. 1), the total receipts have reached 24,115 bales, against 46,298 bales last week, 57,716 bales the previous week and 72,953 bales three weeks eince; making the total receipts since the 1st of September, 1886, 5,040,883 bales, against 4,850,597 bales for the same period of 1885-86, showing an in-crease since September 1, 1886, of 190,286 bales.

Total 1885[31,975 + 11,817 + 17,149] 5,880 [53,821] 600 305 The speculation in cotton for future delivery at this market has been very active, at widely fluctuating prices, closing, as compared with last Friday at a material advance, especially for this crop. There was a very buoyant market on Saturday, with a further advance on Monday morning, but on Monday afternoon there was a good deal of selling to realize profits, and it was said that one or two leading bulls were closing their accounts, under which the early advance was lost. On Tues-day Liverpool greatly disappointed sellers by making an ad-vance of 4-64th: @ 5-64ths, which caused with us another sharp advance for this crop, and the next was somewhat dearer; but the higher prices caused free selling and about half the morn-ing's advance was lost. On Wednesday a firm opening was followed by a decline which was not checked until values were 20@ 29 points below the best figures of Tuesday for this crop; then a reaction set in, on which] there was a recovery of 5@ 8 points. Yesterday the market was active and buoyant in the face of a decline at Liverpool, owing to active buying by German houses. To-day, with very favorable reports from Liverpool, this market advanced to the best prices of the week; but most of the advance was lost in the later dealings, the demand having fallen off. Cotton on the spot advanced ½c. on Saturday and again on Monday, with rather more doing, but on Wednesday there was a decline of 1-16c. Yester-day, however, there was a fresh advance of ½c., except for stained, which was marked up ¼c. To-day there was a further advance of 1-16c. Middling uplands 10%c. The total sales for forward delivery for the week are 1, 166,500 bales. For immediate delivery the total sales foot up this week 2,737 bales, including 422 for export, 2,815 for consumption, for speculation and — in transit. Of the above, — bales were to arrive. The following are the official quotations for each day of the past week. The speculation in cotton for future delivery at this market

each day of the past week.

* The figures for Louisville in both years are "net."

The above totals show that the old interior stocks have decreased during the week 28,843 bales and are to-night 189,831 bales *less* than at the same period last year. The receipts at the same towns have been 7,945 bales more than the same week last year, and since September 1 the receipts at all the towns are 76,096 bales more than for the same time in 1885-86.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS, In the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week.

| Week ending | CLOSE | NG QUOTA | TIONS FOR | R MIDDLING | G COTTON | ON- |

RECEIPTS FROM THE PLANTATIONS, —The following table indicates the actual movement each week from the plan-tations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

| Week | Receipts at the Ports. | | | St'k at Interior Towns. | | | Rec'pts from Plant'ns | | |
|---------|------------------------|--------|--------|-------------------------|---------|---------|-----------------------|--------|--------|
| Ending- | 1885. | 1886. | 1887. | 1885. | 1886. | 1887. | 1885. | 1886. | 1887, |
| Feb. 25 | 50,312 | 92,867 | 95,013 | 216,482 | 442,606 | 301,199 | 32,563 | 87,303 | 74.848 |
| Mar. 4 | 56,866 | 68,223 | 79,931 | 199,179 | 442,408 | 265,991 | 39,563 | 68,025 | 44,749 |
| " 11 | 42,581 | 62,129 | 72,953 | 181,132 | 421,786 | 286,962 | 24,584 | 41,457 | 43,924 |
| " 18 | 32,885 | 57,743 | 57,716 | 170,155 | 392,722 | 200,914 | 21,908 | 28,729 | 21,668 |
| " 25 | 28,810 | 64,328 | 46,298 | 158,175 | 358,392 | 173,846 | 16,830 | 29,998 | 19,230 |
| Apr. 1 | 28,111 | 59,095 | 34,115 | 144,998 | 335,665 | 143,169 | 14,934 | 86.868 | 3,437 |

The above statement shows-1. That the total receipts from

The above statement shows—1. That the total receipts from the plantations since September 1, 1886, were 5,135,991 bales; in 1885-86 were 5,170,410 bales; in 1884-85 were 4,707,070 bales, 2. That, although the receipts at the outports the past week were 34,115 bales, the actual movement from plantations was only 3,437 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 36,366 bales and for 1885 they were 14,934 bales.

AMOUNT OF COTTON IN SIGHT APR. 1.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Mar. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

| | 1886-87. | 1885-86. | 1884-85. | 1883-84. |
|--|-----------|-----------|-----------|-----------|
| | | 4,850,597 | 4,579,287 | 4,619,661 |
| Interior stocks on Apr. 1 in excess of September 1 | 95,108 | 319,813 | 127,783 | 76,238 |
| Tot. receipts from planta'tns Net overland to Mar. 1 Southern consumpt'n to Mar. 1 | 623,233 | 617,134 | 501,782 | 461,070 |
| Total in sight Apr. 1 | 6,009,224 | 5,992,544 | 5,388,852 | 5,346,969 |
| Northern spinners' takings to | | | | |

It will be seen by the above that the increase in amount in sight to-night, as compared with last year, is 16,680 bales, the increase as compared with 1884-85 is 620,372 bales and the increase over 1883-84 is 662,255 bales.

as compared with 1884-85 is 620,372 bales and the increase over 1883-84 is 662,255 bales. WEATHER REPORTS BY TELEGRAPH.—The temperature has continued rather low at the South during the week, acting as a partial check to planting operations. The Mississippi River is now falling rapidly. *Galveston, Texas.*—We have had rain on one day of the week, the rainfall reaching six hundredths of an inch. Average temperature 64, highest 79, lowest 46. During the month of March the rainfall reached two inches and ninety hundredths. *Palestine, Texas.*—It has rained on one day of the week, the rainfall reaching three hundredths of an inch. Planting is making good progress. The thermometer has averaged 58, the highest being 78 and the lowest 34. The rainfall during the month of March reached one inch and one hundredth. *New Orleans, Louisiana.*—It has rained on one day of the week, the rainfall reaching fifteen hundredths of an inch. The thermometer has averaged 63. *Shreveport, Louisiana.*—The scene has been no rain all the week. The thermometer has ranged from 35 to 80, averaging 59.

59.

^{59.} Columbus, Mississippi.—It has rained on one day of the week, the rainfall reaching sixty-five hundredths of an inch. We have had ice on two nights. The thermometer has aver-aged 45, the highest being 70 and the lowest 26. Rainfall-during the month of March two inches and ninety-four hundredths.

Leland, Mississippi.—Rainfall for the week thirty-three hundredths of an inch. We had heavy frost on Thursday night. The thermometer has averaged 53, ranging from 32 to 76.

Greenville, Mississippi.—It has rained on two days of the week, the rainfall reaching twenty-three hundredths of an inch. Planting is making good progress. We have had light frost. The thermometer has ranged from 37 to 81. *Clarksdale, Mississippi.*—The weather has been too cold, but as the week closes there is a favorable change. Rain has fallen on one day to the extent of thirty-three hundredths of an inch. Buffalo gnats are damaging stock some. The thermometer has averaged 45, ranging from 30 to 64.

of an inch. Buffato ghass are training stock some. The thermometer has averaged 45, ranging from 30 to 64. *Vioksburg, Mississippi.*—It has been showery on two days of the week, the rainfall reaching eighty-one hundredths of an inch. The thermometer has ranged from 39 to 83, averaging 59. During the month of March the rainfall reached two

of the week, the rainfall reaching segmey-one fundired the of the week, the rainfall reaching seventy-eight hundred the rainfall reached two inches and eighty-eight hundred the. *Gloster, Mississippi.*—The weather has been cool and dry all the week. Average thermometer 60, highest 82, lowest 38. *Helena, Arkansas.*—We have had rain on two days, and the remainder of the week has been pleasant but too cold. The rainfall reached thirty-seven hundred thes of an inch. There has been light frost on three nights and ice formed on one. Planters are giving increased land to cotton this year. The river has fallen eight feet and is now ten feet below high-water mark. The thermometer has averaged 52, the highest being 72 and the lowest 30. The rainfall during the month of March reached four inches and twenty-five hundred ths. *Memphis, Tennessee.*—We have had rain on two days of the week, the rainfall reaching seventy-eight hundred thes of an inch. The river is now tour teen and four-tenths feet below high-water mark and falling rapidly. The thermometer has ranged from 30 to 77, averaging 50. *Nashville, Tennessee.*—It has rained on five days of the week, the rainfall reaching eighty-seven hundred ths of an inch. The thermometer has ranged from 30 to 77, averaging 50.

inch. The thermometer has averaged 46, ranging from 24 to 74

Mobile, Alabama.—It has been showery on three days of the week, and has rained severely on one day, the rainfall reaching one inch and seventy-four hundredths. Planting is making good progress in some sections. The thermometer has ranged from 38 to 72, averaging 59. During the month of March the rainfall reached three inches and sixty-five hundredths.

Montgomery, Alabama.—The days have been warm but the nights cold, with one light rain. The rainfall reached two hundredths of an inch. The thermometer has ranged from 32 to 76, averaging 56. During the month of March the rainfall reached seventy-two hundredths of an inch.

Selma, Atabama.—It has rained lightly on two days of the week, the rainfall reaching twenty hundredths of an inch. The thermometer has averaged 55, the highest being 72 and the lowest 31,

the lowest 31, Auburn, Alabama.—We have had rain on one day of the week, but not enough to do much good. The rainfall reached twenty hundredths of an inch. The weather has been too cold; ice formed on Monday. The thermometer has ranged from 30 to 73, averaging 54.5. It rained on eleven days in March, and the rainfall reached two inches and twenty-seven hundredths. INDIA COTTON MOVEMENT FROM ALL PORTS.—The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Mar. 31.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

| | Shipm | ents thi | s week | Shipm | ents Since | Receipts. | | |
|------------|------------------|--------------------------------------|---------------|------------------|--|--|------------------|--|
| Year | Great Brit'n. | | Total. | Great Britain | Conti- nent. | Total. | This Week. | Year. |
| 886 885 | 3,000 9,000 | 27,000 13,000 25,000 43,000 | 16,000 34,000 | 94,000 | 256,000 243,000 182,000 238,000 | 349,000 337,000 249,000 446,000 | 52,000 40,000 | 614,000 571,000 375,000 628,000 |

According to the foregoing, Bombay appears to snow an *increase* compared with last year in the week's receipts of 22,000 bales, and an *increase* in shipments of 33,000 bales, and the shipments since Jan. 1 show an *increase* of 12,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

| Shipme | nts for th | e week. | Shipments since January 1. | | | |
|-------------------|-------------------------------------|---|--|---|--|--|
| Great Britain. | Conti- nent. | Total. | Great Britain. | Continent. | Total. | |
| | | | | | | |
| | 2,000 | 5,000 | 30,000 | 44.000 | 74,000 | |
| 5,000 | | 5,000 | | | 42,000 | |
| | | | | 21,000 | *2,000 | |
| | | | 2.000 | | 2,000 | |
| | | | | | 2,000 | |
| | | | 2,000 | | 2,000 | |

| Total | 55,000 | 449,000 | 21,000 | 413,000 | 38,500 | 314,000 |

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrange-ments we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

| Alexandria, Egypt, Mar. 30. | 188 | 6-87. | 188 | 85-86. | 1884-85. | | |
|--|----------------|--------------------|-------------|--------------------|---------------------|--------------------|--|
| Receipts (cantars*)— This week Since Sept. 1 | 2,8 | 14,000 35,000 | 2,8 | 4,000 | 34,000 3,304,000 | | |
| | This week. | Since Sept. 1. | This week. | Since Sept. 1. | This week. | Since Sept. 1. | |
| Exports (bales)— Fo Liverpool Fo Continent | 5,000 2,000 | 240,000 131,000 | 4,000 5,000 | 211,000 138,000 | 1,000 1,000 | 281,000 154,000 | |
| Total Europe | 7,000 | 371,000 | 9,000 | 349,000 | 2,000 | 435,000 | |

* A cantar is 98 lbs.

This statement shows that the receipts for the week ending Mar. 30 were 14,000 cantars, and the shipments to all Europe 7,000 bales.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market continues firm for both yarns and shirtings, but the advance is checking business. We give the prices for to-day below, and leave those for prev-ious weeks of this and last year for comparison :

-From the Bombay Company's (limited) EAST INDIA CROP.-Cotton Report dated Feb. 25, we have the following:

The weather in Guzerat has improved somewhat, and is now warmer, but there is listle doubt that the Broken cro, will be shot and late though the quality is expected to be up to the mark. Arrivals of thi

growth are not expected in any quantity until the latter end of March. The weather in the Dholierah districts has also been warmer, but this scop is not expected to turn out larger than, if as large as, last years. In consequence of this probable short outturn of the Dholierah and Broach crops, the estimates until recently generally entertained here of the expects to Europe for the six months ending June 30 of a mil-lion bales are now reduced to 900,000 bales or thereabouts, some even inclining to the opinion that this figure will not be reached.

-

JUIE BUTTS, BAGGING, &C.—There is nothing new to report in the market for bagging. Only a moderate trade is being done, very little call being noted for large parcels. Prices are steady, and sellers are quoting 6¼c. for 1½lb.,6½@6¾c. for 1¾lb., 7@7¼c. for 2lb., and 7½c. for stan dard grades. Butts are in fair request. and sales of 3,000 bales are reported at 1.70@1¾c. for paper grades, and 2@2¼c. for bagging qualities, these figures being quoted at the close.

THE FOLLOWING ARE THE GROSS RECEIPTS OF COTTON at New York, Boston, Philadelphia and Baltimore for the past week, and since September 1, 1886.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 122,275 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.:

- sels carrying cotton from United States ports, &c.:
 CAIRO, stoamer (Br.), at Liverpool from New Orleans. On the hatches being removed Mar. 7 from No. 3 hold of steamer Cairo, it was found that seven bales of cotton had been damaged by fire, and other bales and grain damaged by water.
 HARTVILLE, steamer (Br.), from Norfolk for Liverpool. A quantity of cotton, &c., was thrown overboard from steamer Hartville at Halifax in distress. The steamer underwent temporary repairs, and sailed for destination March 28.
 WAESLAND, steamer (Bele,)-The following cargo, which was jettisoned from steamer Waesland while ashore on Goodwin Sands, was picked up at sea and landed at Dover Mar. 5: 52 bales cotton, 1,291 pieces and 2 cases pork, 126 small hams, 112 tubs lard, 12 tins pineapple, &c.
 DRUMADOON, bark (Br.)-Lighter Bessie arrived at Galveston, March 19, with 25 more bales cotton from bark Drumadoon, and had finished the work. Since the bark was burned last fall, 1,447 bales; 300 bales were burned with the bark.
 Cotton freights the past week have been as follows :

BREADSTUFFS.

FRIDAY, P. M., April 1, 1887.

The flour market has ruled steadier, with some improvement in the demand, but buyers have been readily met at old figures,

The wheat market has gained strength from adverse reports regarding the prospects in California, as well as in many of the Western States. These, together with the free outward movement which has recently been in progress, gave a firmer tone to the views of holders; but the advance in prices is not important, as it was found that higher figures materially curtailed purchases for export, especially to Great Britain, notwithstanding rates of freight are extremely low. City millers have paid very full prices for choice samples; but with very free receipts at Minneapolis the visible supply has been maintained at pretty full figures. To-day there was a buoyant opening on the indications of an intention to "corner" May options at Cl icago; but regular trade was dull and the market closed unsettled.

DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

Indian corn has recovered somewhat in sympathy with wheat, but it required only a slight advance in prices to put an effectual check upon business for export, while the home trade continued very slow. To-day there was some improvement, with steamer mixed 485%@4834c. in elevator, but business was very quiet.

DAILY CLOSING PRICES OF NO. 2 MIXED CORN.

Oats have been unusually dull. There has been some effort on the part of holders to get better prices, but it had little success, because buyers withdrew. To-day the market was firm but dull.

THE DRY GOODS TRADE.

NEW YORK, Friday, P. M., April 1, 1887. The situation in the dry goods trade has not materially changed the past week, and few new or interesting features were developed in the market. There was a continuation of the moderate activity in staple and patterned cotton goods reported of late, and large shipments in this connection were made by Pacific Coast and Western jobbers in anticipation of advanced freights. Men's-wear woolens ruled quiet in first hands, and the demand for imported goods was comparatively light, stormy weather in some sections of the country having tended to check the demand for consumption. Business in jobbing circles was fairly active, a large distribution of staple and department goods having been made by most of the leading jobbers. The tone of the general market continues firm' and the recent sharp advance in raw cotton has compelled manufacturers to make higher quotations for print cloths, cotton flannels, Southern sheetings, &c. About 3,000 cases white goods and printed organdies will be presented at auction the coming week, and the results of the sale (which will be the most important of its class ever held in this country) are awaited with interest.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending March 29 were 5,138 packages, including 3,468 to China, 302 to British West Indies, 247 to Hayti, 210 to Central America, 166 to Venezuela, 120 to British East Indies, 119 to Santo Domingo, etc. Brown, bleached and colored cottons were distributed in liberal quantities by the commission houses, and prices ruled firm all along the line. Cotton flannels were in noticeably good

demand and some makes have been advanced by agents, as were prominent brands of Southern sheetings and drills. Print cloths were in fair demand and dearer, in sympathy with raw cotton, extra 64x64s having closed at 3%(c. plus $\frac{1}{2}$) per cent and 56x60s at 3c. Stocks last Saturday and for the three previous years were as follows: March 26. March 27, March 28, March. 29,

| М | arch 26. 1 | March 27, 1 | March 28, 1 | farch. 29. |

| Outside speculators (est) | | 15,000 | 325,000 | 75,000 |
| THE REPORT OF A DOLL HERE AND A DOLLAR AN | | | | |

Total stock, (pieces)...... 168,000 456,000 1,584,000 741,000 Prints were moderately active in both first and second hands, but the demand was irregular. Ginghams, printed and woven cotton dress fabrics, seersuckers, lawns, batistes and white goods were severally in fair request and steady in price.

DOMESTIC WOOLEN GOODS .- There was little if any improve. ment in the demand for clothing woolens at first hands, operations on the part of wholesale clothiers having been conducted with a degree of caution bordering upon timidity. Orders for heavy cassimeres and worsted suitings were neither numerous nor important in the aggregate amount, and transactions in overcoatings were mainly confined to making deliveries on account of back orders. Cloakings, Jersey cloths and stockinettes continued in steady request, and there was a moderate movement in Kentucky jeans and satinettes. Allwool and worsted dress goods were in fair demand for present and future delivery, and prices remain firm. Flannels and blankets were only in moderate request by package buyers, and shawls ruled quiet; but there was a fair business in wool hosiery and underwear, further large shipments of which were made by Pacific Coast jobbers.

FOREIGN DRY GOODS.—Owing to somewhat unfavorable weather conditions, there was only a moderate re-order demand for imported goods at first hands, but a fair distribution was made by jobbers. Dress goods and silks were in steady but limited request, and housekeeping linens and white goods were less active than of late, though steady in price. Laces and embroideries were sold in very fair quantities privately and through the medium of the auction rooms, and there was a moderate call for re-assortments of hosiery and fabric gloves, For clothing woolens the demand was comparatively light, and prices for some descriptions of worsted suitings are in buyers' favor.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending March 31, 1887, and since Jan. 1, and the same facts for the corresponding periods are as follows:
