SIX PER CENT DEBENTURES, payable half-yearly at the office of THE MER-CANTILE TRUST CO., NEW YORK. These Debentures run for Ten years, but with the option of redemption at the end of Five years. They are direct obligations of the Company, and are further secured by an equal amount of Real Estate Mortgages on improved and pro-ductive Real Estate worth from three to five times the amount of the mortgages, held by THE MERCANTILE TRUST CO., which under special Articles of Agreement acts as Trustee for the holders of the Debentures. They are issued in denominations of \$500, \$1,000 and \$5,000

These Debentures are a very desirable class of investments for Estates and Trust Funds-

and for individuals and corporations desiring an exceedingly safe investment, with a com, paratively high rate of interest.

Write for further information and reference to our office at Kansas City, Mo., or to

CLEARING HOUSE RETURNS.

The returns of exchanges for the week ended June 4 cover only five days at many of the more important business centres, on account of the holiday on Monday. Solely in consequence of the loss of the one day's exchanges there is a decrease from the previous week in the aggregate for all the cities. Outside of New York, however, a gain over last week is exhibited. Compared with the corresponding period of 1886 (in which also only five days were included) there is an increase in the total of 4.6 per cent, while with New York excluded, the excess reaches 16.4 per cent.

For the month of May the clearings record a decline from those for April of \$213,392,172, the loss at New York being \$242,103,073 and the gain at other cities \$28,710,901. Conrasted with June of 1886, the increase in the whole country

reaches 19·1 per cent, and outside of New York 25·7 per cent. For the five months the excess over last year is 9·4 per cent.

THE FINANCIAL SITUATION.

As represented by bankers' balances, money on call has been a little easier this week. The range was between 5 and 3 per cent, the average being only about 4 per cent. Renewals were also made at 41 per cent, but banks have not reduced their rate below 5 per cent, although trust companies have generally loaned at 41 per cent. Time contracts for 60 days on first-class bond collateral with ample margin have been made at 4 per cent; but for 90 days to 4 months 41 per cent has been paid on prime collateral, and 5 to $5\frac{1}{2}$ per cent on mixed security. It is stated that the somewhat lower rates ruling are in great part the result of special competition, a bank recently organized having been quite liberal in its offerings of money on time. Commercial paper is scarce and the large auction sales of quiltings and flannels will, it is reported, add little to the volume of notes, for the reason that payments are expected to be made with cash. This scarcity and quite a good demand from out of town institutions have caused rates to rule a shade easier and we quote 60 to 90 day endorsed bills receivable at 41@5 per cent, 4 months commission house names 5 to $5\frac{1}{2}$ per cent, and good single names having from 4 to 6 months to run, 5 and 61 per cent, the first-named rate for the shorter period.

In London discounts of 60 days to 3 months bank bills are reported higher at 1@11 per cent. No change has taken place in the open market rate at any of the chief Continental cities. The prospect seems to be favorable to a continuance of low rates, the supply of money at all points being liberal, and trade and speculation languishing. Of course the revival of business here must, if prolonged, be felt sooner or later in Europe. In fact it has for some time back been evident in the export fig. ures of Great Britain, and to an extent in those of the But home transactions continue so limited continent. Europe that trade revival The Bank of England gained Blow progress. £179,000 bullion during the past week and we are advised by private cable that this was made up by a receipt from China of £14,000, by a receipt from the interior of Great Britain of £315,000, and by an export, chiefly to the Cape, of £150,000. The total gold in all the European banks, given in a table at the end of this article, as received by special cable to us, is now £205,733,970, against £203, 063,738 the same time last year.

Our foreign exchange market has tended downwards this week in consequence of a pressure of sterling drawn against securities and loan bills recently negotiated; there has also been a fair supply of commercial drafts agains, spot cotton, breadstuffs, &c. On Monday afternoon, the demand being insignificant, nominal rates were reduced half a cent per pound sterling. There was a little better inquiry on Wednesday, the arbitrage houses selling stocks freely and purchasing exchange for remittance, and on Thursday the tone for sterling was steadier, while Conti. nental drafts continued heavy. The selling of stocks on Wednesday was in great part due to an uneasy feeling among the foreign bankers in consequence of the reports regarding the critical condition of Emperor William and the disability of the Crown Prince. The death of the Emperor would, it was thought, impart at least a temporary shock to the foreign markets, and therefore bankers were inclined to realize upon their holdings. The news from Berlin on the following day was more encouraging, and the demand for sterling less urgent.

The struggle over the listing of silver certificates has closed with the success of the application. While we do

not see how the Stock Exchange could have taken any different action, it is no surprise that the measure should have encountered opposition. Congress has put our commerce in jeopardy through the coinage of silver dollars; hence any step that unnaturally forces the market, increasing the price and therefore the stock of silver here, encourages the antagonism between the metals and makes the situation peculiarly bazardous. servative thinkers who are not interested in silver mines, know that the white metal can have no future unless the nations of Europe remonetize it; the tendency of value must continue downwards as it falls more and more into discredit as currency. Now if in the meantime we, through speculation, arrest in any degree this tendency by leading the world's silver markets, America will gradually accumulate the surplus production, increase the output of the mines, and give the Old World a chance to melt up and sell its currency. Of course the idea of the promoters of this scheme is that New York can corner supply and force the merchants of London and of the commercial world to satisfy through us their needs for Eastern markets by the purchase of bullion here. This, it will be seen, assumes that there is no surplus production to accumulate and gradually swamp us. And on that point Mr. Jordan claims that by the very appreciaciation of price, production will, in a way, virtually be shortened; for London now puts upon the market every year not only the face value of India's annual indebtedness, but additional council bills equalling the depreciation (for India's current indebtedness to Great Britain is due in gold), and thereby to that extent increases the supply of what is a substitute of silver for mercantile remittance; as the value of silver goes up of course this excess of council bills will correspondingly lessen. Say for instance that six million pounds sterling represents this extra supply of bills,-that is we believe, according to current estimates, the amount of the increase thus caused; now if we wipe out little by little the loss in the value of bullion, pari passu the supply of bills is shortened until, when the old relation of silver to gold is restored, the whole 30 million of dollars of bills is gone and silver must take its place. Or, to state it in a different way, when the price has fully recovered the mines can produce 30 million dollars more bullion without disturbing the present relations of demand and supply.

That is a very ingenious suggestion, yet one cannot help calling it a big jump from 43 1d per oz. to 61d. per oz. And then again, even if we are able to deceive ourselves as to the permanency of the rise, can we think that with no international agreement as to the currency value of the white metal, and with the experience of past years fresh in mind, that silver-using countries will fail to unload on us if they get the chance? We have in a similar manner very innocently furnished a capital market for India's wheat for several years and have paid for the experience by selling our own surplus subsequently at a painfully low figure. To be sure, there is a difference between these two commodities; the possibility of new supply differs greatly, but a surplus of silver (and there will always be a surplus until the world begins to recoin it as of old) even though it be smaller, would-with an old stock 80 large and discredited-be far heavier than the stock of wheat to carry. And yet we doubt whether there is any need to fear a speculation in New York such as we have imagined and as the promoters of this scheme anticipate. Paradoxical as it may seem, it would stand a much better chance if we were not coining silver dollars. That little operation is so suggestive of evil, and the disaster it invites is so inevitable, according to the belief, of all n

conservative men, that capital will not loan on these certificates with any freedom at all when price has been put up a point or two. We must fortify our base of operations, get out of the quicksands on to solid rock, before we can hope to build up much of a superstructure of the kind proposed. Mr. Fairchild has kindly sent us this week a statement of the silver certificate operations as they stood on the first of June, and we insert the statement here, as it is a good connection in which to see how far this evil has progressed.

Denomination.	Issued.	Redeemed.	Balance.	In Treas'y.	In Circulat'n
	8	8	8	8	8

Total					139,143,328 00

It will be remembered that we published on April 9 a similar statement up to April 1st. Lately the appropriation for small silver certificates has short so we may suppose that the two months' issues of those denominations have not equaled the demand. As it is, however, the amount of ones, twos and fives outstanding June first was \$27,421,844, against \$21,-958,980 on April first, an increase of about $5\frac{1}{2}$ million dollars.

The industrial outlook remains unchanged. As before noted, there is a large volume of business in progress, but the feeling in many lines still continues more or less unsettled. The activity of railroad construction serves to stimulate demand in various branches of industry, while the speculation in land, particularly in the more remote sections of the country, also operates in the same direction. The large immigration movement is another factor of a similar kind. Hence it is that while reports of the general condition of trade are not wholly satisfactory, yet consumption continues very large. It is to be noted that accounts from the West are better than from the East, and also that confidence in the strength of the situation is most marked there. We have prepared our table of bank clearings for the month of May, showing an increase of over 689 million dollars in the total of the whole country over the same month last year, the ratio of increase being 19.1 per cent. Outside of New York the percentage of gain is still heavier, reaching 25.7 per cent. In the latter case the comparison is very much better than in any preceding month this year, as may be seen from the following table in our usual form.

MONTHLY CLEARINGS.

Month.	Cleari	ngs, Total All.	Clearings Or	nutside New York.		
	1887.	1886.	P. Ct.	1897.	1886.	P. Ct.
January February March	\$ 4,370,822,843 3,695,294,565 4,335,761,645	3,848,019,032 4,172,440,549	-4·0 +3·9	1,222,010,794	\$ 1,267,610,954 1,102,511,291 1,267,364,107	+11.1
April May	4,513,018,093	12,163,599,430 3,610,313,361 3,610,281,542	+25.0	4,129,540,743 1,480,146,633 1,508,857,534	3,637,486,352 1,189,338,413 1,199,953,881	+24.5

This addition to the clearings follows of course a similar large addition the previous year, but what makes it especially noteworthy is that it occurs in the face of a falling off in the clearings arising out of stock transactions. As all know, the New York Stock Exchange is experiencing a very quiet time. The evidence of this is

volume of transactions was small in May 1886, in May 1887 it was even smaller, the value of the sales being 51 million dollars less.

SALES OF STOCKS AT THE NEW YORK STOCK EXCHANGE.

The coke strike in the Connellsville region still remains unsettled, but is not an unmixed evil. It has caused the blowing out of iron furnaces for the want of the necessary fuel and thus reduced the production of pig. This in turn has caused consumption to make inroads on stocks, and thus given a firmer tone to the iron market. Just at the moment, however, there is a little uneasiness on reports that iron workers contemplate asking an advance in wages. The coal trade is in a fairly satisfactory state. Bituminous is in excellent demand, while anthracite is meeting with a much better inquiry.

Crop prospects continue quite good. We give our cotton acreage report in full on another page according to which it appears that though the crop can hardly be called an early one, yet it is earlier than a year ago, while acreage is larger and the condition as a whole better than for several years past. We also have the 1st of June report of the Agricultural Bureau at Washington with regard to the condition of cereals, and we give the details in another part of the paper. It will be seen that prospects as a rule are favorable. Winter wheat of course is not up to its condition a year ago, but the general average the 1st of June was only a trifle lower than on the 1st of May—that is there has been no further important decline. We give below the figures showing the averages in each State during the last three months of this and previous years. It should be understood that only winter wheat is embraced in this statement. As concerns the spring variety, the outlook is promising, though the average of condition is lower than in 1886. Corn is not covered in the present report, but really affords a better promise than any other of the cereals.

In railroad affairs nothing of an unsatisfactory nature is apparent at the moment. Returns of earnings continue wonderfully good, our statement for the month of May showing an increase of over $3\frac{1}{2}$ million dollars, or $15\frac{5}{3}$ per cent. For the fourth week of the month, the exhibit is even better than this, the gain on 61 roads reaching over 29 per cent, though this is qualified by the fact that Southern roads a year ago had their earnings reduced by the preparations then making for a change of gauge on the 1st of June. In our article on earnings we call attenfound in the subjoined statement, showing that while the tion to the prominence in this upward movement of earn.

ings that must be assigned to the activity of railroad construction, and as bearing upon the future this feature of the situation ought to be carefully borne in mind. For the present, however, this and the concurrent activity of general business gives the railroad situation a very bright aspect. Evidence of this is furnished not only in the good returns of earnings, but also in the number of roads that are resuming or beginning to pay dividends. We referred last week to the declaration of a dividend on Denver & Rio Grande preferred stock. This week dividends have been declared on Richmond & Danville stock and on Richmond & West Point Terminal preferred shares, while a dividend on East Tennessee 1st preferred is also looked for after the 1st of July. The latter will be an annual dividend, and its rate, according to report, 4 per cent. This is worthy of note in view of the fact that the 1st preferred stock elects a majority of the board of directors for five years (till 1891), "unless before that "time the said company should pay out of its net earn-"ings 5 per cent dividends on such preferred stock for "two full successive years." Western Union Telegraph has also resumed, having declared a quarterly dividend of one per cent.

The stock market has been dull, and until yesterday rather inclined to weakness. With earnings large, crop prospects good, and many new dividends being announced, it is rather surprising that prices should not advance. However, it is merely another evidence that the outside public is not present in the market to any extent. It also shows that no organized effort is being made to effect a rise, trading being left to the professionals who scalp for fractions, first on one side and then the other. It is claimed that the large operators are deterred from taking hold for an advance by the fear that the Treasury withdrawals of funds may later on affect the rates for money, and possibly this is true, but it may be in order to suggest also that perhaps these large operators are not altogether assured yet of the satisfactory working of the Inter-State law. The higher class of properties, like Northwest and Lake Shore, still hold up better than any others, which is an encouraging feature. St. Paul was unfavorably affected early in the week by the announcement of a proposed increase in the stock to the amount of ten million dollars. Perhaps it was the manner of the announcement that occasioned distrust. Certainly there is nothing in the issue itself that should cause uneasiness. Three millions is wanted for the purchase of the Chicago & Evanston, having valuable terminal rights in Chicago, and the rest to provide for a connection with the Gogebic iron regions, and for making extensions into Nebraska. No one will deny that it strengthens the position of the property to supply a part of the means for new capital expenditures by the issue of stock, instead of relying entirely upon the issue of bonds. Yet if a new bond issue had been announced, the market in all probability would have taken no notice of the matter.

The following statement made up from returns collected by us shows the week's receipts and shipments of currency and gold by the New York banks.

Week ending June 10, 1887.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency	\$1,395,000 106,000		Gain \$589,000 Gain 106,000
Total gold and legal tenders		\$806,000	Gain \$695,000

The above shows the actual changes in the bank hold. ings of gold and currency caused by this movement to and from the interior. In addition to that movement the banks have gained \$200,000 through the operations of the Sub-Adding that item to the above, we have the following, which should indicate the total gain to ence may have accomplished nothing substantial or

the New York Clearing House banks of gold and currency for the week covered by the bank statement to be issued to day.

Week ending June 10, 1887.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks'Interior Movement, as above Sub-Treasury operations.	\$1,501,000 5,500,000		Gain\$695,000 Gain 200,000
Total gold and legal tenders		\$6,106,000	Gain \$895,000

The Bank of England gained £179,000 bullion for the week. This represents £315,000 drawn from the interior of Great Britain, and £136,000 net sent abroad. The Bank of France shows an increase of 1,075,000 francs gold and of 2,100,000 francs silver. The Bank of Germany since the last report has gained 8,500,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

	J	une 9, 1887		June 10, 1886.

THE FAILURE OF THE VIRGINIA DEBT CONFERENCE.

We are not among those who look upon the failure of the Virginia bondholders and the Legislative Committee of the State to find a common basis on which to effect a compromise, as suggesting a fruitless effort. The conference has terminated, the Legislature has adjourned, and the foreign representatives have returned home. Nevertheless the effort marks a distinct step forward, even though it has yielded no immediate results. It is the first time in a great many years that the State has shown a disposition to meet the bondholders in a conciliatory mood, the first time that it has offered them anything but the terms of the Riddleberger scheme, the first time that is has treated them as if they were entitled to be consulted about a matter affecting so vitally their financial interests. The bondholders on their part have received proof of the State's good intentions, have been brought in contact with her people and been given an opportunity to determine for themselves (through their representatives) the financial condition of the commonwealth, its resources and taxes, and extent of ability to pay interest. All this we are confident will not go for naught, but on the contrary should pave the way for a settlement later on.

It must not be forgotten either that though the confer-

definite, it has yet resulted in giving us the proposals of | the two parties, which we are thus able to place side by side and examine and contrast. Though the difference on which the conference separated is in some respects radical of vital importance certainly to the State-yet we are surprised to find so close an agreement on essential points. The foreign committee, represented by Sir Edward Thornton and Mr. S. N. Braithwaite, of London, acted chiefly on behalf of the holders of consols and 10.40s, which indeed comprise the bulk of Virginia's debt. As we understand it, both the State and the bondholders agree in proposing to reduce the principal of the consols to 75 per cent, but the bondholders ask for three per cent interest on the original amount of debt, while the State is willing to pay only three per cent on the reduced amount. So in the case of the ten-forties. Both sides accept 63 per cent as the basis of conversion, and both agree upon 21 per cent as the rate of interest, but the bondholders want that rate on the par of the debt, while the State proposes to pay only on the amount as scaled. There is also one other point of difference, and that is as regards the payment of the pastdue coupons. These on both classes of debt the bondholders would fund at 75 cents, but the State offers to fund at only 50 cents on the dollar. This, however, we consider a minor difference, and one which could be easily overcome were the other points in dispute settled. the Riddleberger plan, the coupons were to be funded at 100 per cent, but the principal of the consols, instead of being exchanged at 75 per cent as now proposed, was to be converted at only 53 per cent, while the 10-40s were to be funded at 60 per cent instead of 63 per cent as now.

We thus see that the disagreement between the bondholders and the State concerns chiefly the annual amount of interest to be paid—a point of vital importance, as already said, to the State, for the difference between the larger and the smaller sum counts as a considerable item where the revenue is limited as in Virginia. In a very interesting circular just issued by Messrs. Thos. Branch & Co., of Richmond, Va., calculations are made as to the effect on principal and interest under both the bondholders' plan and the State's plan. The firm estimates that under the bondholders' proposal the 24 millions of debt and coupons would be reduced to \$17,160,000, and under the State's plan to \$16,160,000. But interest in the one case would be \$655,000 per annum, while in the other case it would be only \$462,750, or \$192,250 less. The question is, could the State afford to pay this additional amount. We may suppose that the bond holders' committee fully assured themselves on that point, otherwise they would not have insisted on the larger figure, for it would be folly to seek to impose a burden which the State cannot bear.

But while this may determine the matter from the bondholders' standpoint, the Legislative committee had to take other things into consideration-political expediency for instance. With them it was not only what is the State able to pay, but also what will the political parties of the day allow it to pay? It should be remembered that this was to be a complete and final settlement. Hence it behooved the legislator to make sure that the agreement, whatever it was, be ratified by the voters at the polls. He might make an arrangement now which by the election next fall would be completely upset. The best people of the State we are sure believe in paying every dollar of the debt, principal and interest, no matter how great the sacrifice might be. But there is a large ignorant population, chiefly blacks, who are not at all

to pay. And this is an element in the problem that has to be considered. From the action of the Legislative committee we should infer that having due regard to the influence of that element, further important concessions were deemed unsafe to make.

This being the situation of affairs we cannot help renewing the hope that when the foreign representatives report to the bondholders, a means will be found for another attempt at adjustment. Neither side has anything to gain by a continuation of the present state of things. So long as it lasts the bondholders carry a dead investment, while the State continues to lose in credit and prestige.

ROCK ISLAND AND THE EFFEUTS OF COMPETITION.

The report of the Chicago Rock Island & Pacific for the year ended March 31, just issued, affords when properly studied and interpreted much interesting evidence concerning the character and nature of the influences at work affecting railroad traffic and results in the section of country which this railroad system drains. Such an investigation in the case of this road is especially desirable because the company is one of the very few which furnish the traffic data necessary to an intelligent study of the subject, enabling one to trace effects back to the causes that have produced them.

The Rock Island of course is a prosperous system, and to say this under present circumstances is to say that it is well managed. The road has paid regular 7 per cent dividends, on stock doubled in 1880 by the declaration of a 100 per cent stock dividend. Yet it must be admitted that results are no longer so satisfactory as they were, and that recently they have been growing less satisfactory each succeeding year. This will appear when we say that notwithstanding the revival of business activity, gross and net earnings of the late year fall much below those of the best previous years, while the surplus above the year's charges and dividends has been cut down to very small proportions. The road's fixed charges are very light—the total last year was only \$1,795,350, as against net earnings of \$4,814,240—so that there is but little that stands between the profits and the stockholders, and this makes the reduction in the margin above dividends all the more striking. Before attempting to set out the reasons for this, it will be interesting to measure in exact figures the extent of the change. Accordingly, we give the following summary of annual results for each of the last fourteen years.

Years.	Gross Earnings.	Net Earnings.	Interest. R'nt'ls, &c	Dividends	Surplus.	Land Receipts.	Spent for Improve- ments.
1880-81 1881-83 1882-83 1883-84 1884-85 1885-86	7,133,574 7,399,613 7,366,903 7,854,567 7,895,870 9,409,833 11,061,66 211,956,908 13,266,643 12,189,908 12,535,514 12,206,911 12,204,911 12,004,348 12,319,049	3,349,365 3,511,357 4,329,961 5,265,116	755,000		\$43,387 1,109,900 \$1,213,081 96,385 665,648 1,199,300 1,973,979 1,327,528 740,942 819,071 517,185 220,239 81,703	\$ † † † † † 350,000 490,000 (50,000 470,000 330,000 310,000 230,000	\$ 966,551 1,128,672 \$2,285,689 2,215,000 1,300,000 750,000 463,000

Chicago & Southwestern not included in these years.
Carried to sinking fund.
After paying \$35,276 in settlement of U. S. income tax.
Against this the new company (formed at time of doubling of stock)
elved \$705,672 cash assets from the old company.

Thus gross earnings, notwithstanding a recovery in the late year, stood at only \$12,319,049, while in 1881-2 the total was \$13,266,643. Net is considerably more than a million short of the amount for 1881-2, which was \$5,943,781, while the figure now is but \$4,814,240. As for the surplus, that when made up independent of the land income, foots up only \$81,704 for 1886.7, against governed by a sense of honor, who in fact laugh at the \$220,239 in 1885-6, \$517,186 in 1884-5, \$819,071 in idea of paying a debt that the debtor can not force them \1883-4, \$740,942 in 1882-3, \$1,603,684 in 1881-2, and

even heavier amounts in some of the years preceding. In fact, the surplus is smaller than in any other of the fourteen years given. The further diminution in the late year in the face of the partial recovery in earnings, may per haps occasion surprise, but can be easily explained. In part, it is due to some increase in the charge for interest on account of the collateral trust bonds issued to build the Chicago Kansas & Nebraska (Rock Island extension), which apparently is not yet in position itself to meet But the main reason for the smaller surplus the charge. is, that the gain in gross was not followed by a gain in the net, the latter indeed having slightly fallen off. This decrease in net in turn is the result of heavy expenditures for betterments and renewals. What a liberal policy has been pursued in this latter respect may be judged from the fact that as against 389,407 new cross ties used in 1886, the number in 1887 was 527,409, involving an increase in cost of nearly \$65,000, while 7,808 gross tons of steel were laid in the track in 1886-7, against 3,349 tons in the previous year, the cost being \$250,137, against \$97,925. In fact \$251,048 of the \$337,916 total increase in expenditures is found under the head of renewals of rails and of ties, repairs of roadway and track, of fences, crossings and signs, and of bridges, culverts and cattle guards, the aggregate of these five items standing at \$1,495,536 in 1887, and at \$1,244,488 in 1886. We also find it stated that 57 box freight cars, of 24,000 lbs. capacity, were sold during the year, and replaced by an equal number having 40,000 lbs capacity, and the excess of cost charged to car repairs.

But if this gives us the reason for the decreased results of the late year, it does not explain the still greater and much more important decrease of the earlier years. What accounts for that? Why have earnings fallen off so largely? Has competition become so active, and the additional lines so many, as to diminish the volume of the company's traffic? That has not been the experience of other roads. Has it been that of the Rock Island? Let the following table answer, showing passenger and freight traffic, earnings and rates.

Fiscal Year.	Miles operat- ed end of year	* Tons Carried One Mile.	Amount Received	Passengers Carried One Mile.	Amount Received	Average per ton per mile.	Average per passenger per mile.
1870-71	590 612	151,864,519 168,764,688	\$ 4,023,271 1,218,871	44,609,479 38,580,595	1,713,123 1,394,140	Cents. 2.64 2.49	Cents. 3.84 3.61

*Includes freight carried for company's use, for which nothing is charged, and which, therefore, adds nothing to the receipts.

†Including all receipts from passenger trains.

Here we have a repetition of the old story—an expanding volume of traffic, but a steadily declining rate. The freight tonnage is larger than ever before, and the passenger mileage has only once been exceeded, and then only a trifle. Yet the earnings from freight in 1886-7 are \$1,649,645 lower than in 1881-2, when the tonnage was over 39 millions tons less than now, while the passenger earnings are \$235,153 lower than in 1882-3. In the interval, however, the average per passenger per mile has fallen from 2.50 cents to 2.33 cents, and the average per ton of freight from 1.28 cents to 1.01 cents. To show how steadily and largely rates have declined, we need only say that in the 17 years covered by the above table, there are only three that fail to show a decrease in the average per ton per mile, which now stands at the

low figure of 1.01 cent. Even in the late year there was a fall of six hundredths of a cent, demonstrating that the gain in earnings in that year was made in the face of that fact. In 1870-1 the average per ton per mile was 2.64 cents, and even in 1873-4 it was above two cents; now it is down, as said, almost to one cent. Of course, in some small measure the decline may be due to a greater proportion of low-class freight, but in the main it is the result of an absolute reduction in the rates of transportation.

Pursuing our investigation a step further, we discover that while the Rock Island has maintained and even increased the total volume of its traffic, a very important change has taken place in the composition and character of the same. The Rock Island of course, like all other roads, has encountered very active competition, with the effect of cutting down certain items of traffic. The changes, however, and their extent, are certainly surprising. We have been at some trouble to prepare from the present and previous reports the following statement showing the principal items of the company's freight moved in each of the last seven years. As said above the Rock Island is one of the very few companies that furnish It should be understood that the such information. figures are based on substantially the same number of miles of road in all the years, the operations of the new Chicago Kansas & Texas not being brought into the Rock Island's accounts. We have separated the items selected so as to bring together under separate heads the classes of traffic moved mainly eastward, and those moved mainly westward.

* Not stated. † Including vehicles and machinery, † Including all other items,

The changes are both striking and important. It is on agricultural products of course that competition is most active, and here the effects are very marked. The figures plainly show that the Rock Island has had to yield a large part of its traffic of that class to new competitors. In no item is the loss so conspicuous as in the case of corn. In 1880-1 the road's tonnage of that cereal was 698,783 tons and in 1881-2 641,166 tons; in 1886-7 it was only 299,698 -a loss of nearly 400,000 tons in this item. The amount is smaller even than in 1882-3, following the total failure of all crops in 1881. It will be said that the yield of corn in the late season also was rather unfavorable, which is true, but this circumstance could have counted in only a small part of the Rock Island's year, which ends March 31. Even on the basis of the previous year's total however, there is a falling off of as much as 300,000 tons. In the case of wheat and flour, owing to the connections afforded by the Minneapolis & St. Louis and the Burlington Cedar Rapids & Northern, and also no doubt to the extension of spring-wheat production in that section, the Rock Island managed to increase its traffic till 1884-5, but in the last two years the multiplication of rival lines to St. Paul and Minneapolis has been such that even in these items of traffic, a considerable falling off has occurred;—thus only 109,000 tons of flour were carried in the late year, against nearly 190,000 in 1884 5. In other cereals the changes are not so striking, some indeed showing slight gains. Of cattle, the tonnage in 1886-7 was 122,056 tons, against 164,764 tons in 1883 4. The movement of hogs has been increasing in recent years, nevertheless the total of 1886-7 is 12,000 tons below that of 1880-1. In short, in the products of the farm and the ranch—for which competition is naturally most active—there has in general been a marked decline.

On the other hand, in the case of those articles which mark the growth of manufactures and general industries and the development of the country, there has been a very striking increase. Take coal for instance. The tonnage of this stood at only 489,345 tons in 1880-1; now it stands at 803,190 tons. Sand and gravel has increased from 41,063 tons to 194,816 tons, brick from 23,272 tons to 68,989, iron from 151,105 to 290,299 tons. In this latter item, and that of railroad ties, we have a means also of gauging the part played by new railroad building in present results. Of the 290,299 tons of iron transported in 1886-7, 196,852 tons were classed as pig and railroad iron, and this total of 290,299 tons compares with only 208,819 tons the previous year. Of railroad ties, 99,128 tons were carried in 1886-7, against 56,468 tons in 1885-6, and 46,094 tons in 1884-5. It will be seen that the amount is larger even than in the previous era of active railroad building-87,938 tons in 1881-2. There are various other items of traffic which have changed more or less, but it is unnecessary to refer to them. As regards the decline in merchandise as compared with 1881-2 and 1882-3, that it should be understood is more apparent than real, as a number of small items which were formerly included under that general head, are now separately stated.

The effect of the changes in the company's traffic is seen in still another way. The movement has been so altered that instead of there being an excess of east-bound freight, there is now a large excess of west-bound freight. Thus in 1886-7 the number of loaded cars moved eastward, though greater than in the years immediately preceding, was less than in 1879-80; on the other hand the number of cars moved westward increased over 60 per cent, so that while in 1879-80 the eastward movement was 160,064 cars and the westward 134,354 cars, in 1886-7 the former was only 153,124 cars, and the westward movement 210,275 cars. The following shows the changes from year to year.

LOADED CARS MOVED.

Fiscal Year.	Eastward.	Westward.	Total.
1877-78 1878-79 1879-80 1879-80 1880-81 1881-82 1882-83 1882-83 1883-84 1884-85 1886-87	110,771 187,062 160,064 157,791 159,828 123,550 136,598 146,294 138,112	100,344 105,920 134,354 156,008 176,543 153,846 157,375 169,905 174,621 210,275	211,115 242,982 294,418 293,794 337,871 277,396 293,968 316,199 312,733 363,399

The significance of these results lies in the evidence they afford that crops are a very much smaller factor in the road's business than formerly; that with the growth and development of the country tributary to the road, there has come an extension of traffic of a different kind—traffic resulting from the expansion of local and general industries. Of course this is a very desirable change, for it gives greater stability and strength to a railroad system. We may suppose that the future will show further progress in the same direction. Competition to be sure

is all the time being increased, but on the other hand the range of territory is likewise being extended. The Rock Island for instance, through the Chicago Kansas & Western, has already entered both Kansas and Nebraska, and will endeavor to cover sections still more remote.

RAILROAD EARNINGS IN MAY.

The May statement of earnings is of the same favorable character as its predecessors. Owing to the early date at which the exhibit is prepared, the number of roads included is somewhat smaller than in the months immediately preceding, but the amount of increase is larger even than for April, reaching over 31 million dollars. How this compares with the best of previous months may be judged from the fact that for April on 106 roads (for May the number of roads reporting is 102) the increase was \$3,398,657, for March on 111 roads it was \$4.184,370, and for January on 97 roads it was \$3,828,-885. The ratio of increase for May is 155 per cent. Of course there has been some increase in mileage the number of miles this year standing at 60,065, against 57,154 last year, but the increase here is only about 5 per cent. The following is a recapitulation of the results for each of the last five months.

Period.	Mileage.		Earn	Increase or	
1 67 5065.	1887.	1886.	1887.	1886.	Decrease.
	Miles.	Miles.	8	8	9.
January (97 roads)	56,127	53,592	22,199,905	18,371,020	Inc. 3,828,888
February (101 roads)	55,990	52,980	20,762,296		Inc. 1,736,728
March (111 roads)	61,901	58,864	28,781,619	24,597,249	Inc. 4,184,870
April (106 roads)	60,607	57,481	26,038,442		Inc. 3,398,657
May (102 roads)	60,065	57,154	26,182,332		Inc. 3,537,801

Not only however is the increase very large, but only 10 of the 102 roads report a decrease, the decrease being moreover insignificant and unimportant, except in two or three instances. Such a favorable result was not looked for when the Inter-State law was passed, and it therefore becomes an important question how to account for the heavy and general gains. What were the favoring influences the present year, and is the comparison with full figures in 1886? Taking the latter point first, it is undoubtedly true that results a year ago were reduced by the adverse conditions prevailing. The grain movement then was quite small, but the most serious matter was the disturbances and interruptions occasioned by the strike for eight hours as a day's labor on the 1st of May, and also by the preparations for a change of gauge on Southern roads, this latter having for the moment been quite a serious drawback to the roads affected. The result was that on many individual roads we had diminished earnings, following in some cases too a diminution in 1885. Still, taking the roads as a whole, results were better than expected, the 63 roads then included in our exhibit showing a gain of \$652,647, or about 4 per cent. The significance of this improvement was diminished by the fact that in the same month of 1885, 56 roads had shown a decrease of \$1,298,-837, so that the comparison was with reduced totals. all the years preceding 1885, however, May earnings were very good, the gain in some of the earlier years having been very heavy, as may be seen from the following table.

Don't a	Mileage.		Earn		
Period.	Year Given.	Year Preceding.	Year Given.	Year Preceding.	Increase or Decrease.
	Miles.	Miles.	8	8	8
May, 1880 (44 roads)	******		14,649,613	11,834,041	Inc. 2,815,572
May, 1881 (45 roads)	82,905	28,963	16,708,654		Inc. 2,468,457
May, 1882 (50 roads)	42,345	36,949	20,824,492		Inc. 2,803,110
May, 1883 (59 roads)	47,260	42,730	21,497,057		Inc. 1,833,322
May, 1884 (60 roads)	43,662	39,713	18,038,831	17,457,308	
May, 1885 (56 roads)	44,317	43,537	15,895,528		Dec. 1,298,837
May, 1886 (63 roads)	47,355	46,085	17,070,179	16,417,532	
May, 1887 (102 roads)	60,065	57,154	26,132,332		Inc. 652,647 Inc. 8,537,801

As to the influences at work the present year, they were not all favorable. Take the roads having a cotton traffic for instance. We have reached a period of the year when the cotton movement plays a comparatively minor part in affecting results, and yet the fact is not to be overlooked that as compared with the same period in 1886, there has this year been an important falling off. Thus the receipts at the outports in May, 1887, reached only 31,699 bales, against 114,926 bales in May, 1886, while the gross movement overland by rail amounted to only 43,861 bales, against 86,385 bales. As regards cereals, Western and Northwestern roads had a larger movement in wheat, the speculation in that staple at Chicago having brought out very large amounts, especially from the Northwest Re ceipts of corn on the other hand fell off largely, though it was not on Chicago chiefly that the loss fell, but on such points as Toledo and St. Louis. There was also a falling off in oats at some points, notably at Peoria. In provisions, we find larger receipts at Chicago of pork, cutmeats and lard; but of live hogs only 435,854 were received, against 551,196 in 1886 and 516,059 in 1885.

There is nothing in all these circumstances to account for the exceptional gains in earnings. To what, then, are they to be attributed? Of course, where railroad rates have been raised as the result of the Inter-State law, an explanation is found in that circumstance; but we think that has played only a minor part. In the fact that general business is active all over the country, with the volume of trade larger than in other recent years, a more plausible explanation is found. We are inclined, however, to lay especial stress on the activity of railroad construction. That operates in so many different ways to increase railroad traffic. Take merely the item of rails What a long haul there is on these from the Eastern mill to the point in the Northwest or Southwest where they are to be laid. Then consider the amount of coal, coke, or other fuel, used first in making the iron and then the steel, and the carriers benefitted in transporting this fuel. Go one step further back, and see over what long distances some of the ore from which this iron and steel is made has been moved. These are all processes and stages connected with this single item of steel rails. But consider also the effect of the new railroad construction on other branches of trade-the spikes necessary to fasten the rails and the ties over which the rails are laid. In our analysis of the Rock Island report to-day we show that that road had a larger tonnage in railroad ties the late year than ever before, and that the increase over the previous year amounts to 42,660 tons, and over 1884-5 53,034 tons. All these ties were originally lumber in the forests, which had to be cut down, trimmed, and hauled to the point of destination. Then the bridges that are required in the course of this new construction, the gravel and stone that have to be used, the new stations and freight houses that have to be built, all this makes work and trade and traffic. The equipment and rolling stock for the new mileage also affects hosts of trades and industries-car shops, locomotive works, &c., and these in turn call into requisition every phase and form of human ingenuity and skill; the iron worker, the glass worker, the cabinet maker, the painter and decorator, all find representation in this way. And so we might go on to show that in an almost infinite number of ways the present activity in railroad building enters into every branch of trade and industry. It is for this reason that we think special prominence should be given to it as an element in the very large gains in earnings now reported.

The following table gives in detail the earnings and mileage of each individual road.

† Mexican currency.

We have already referred to the fact that there are only ten roads altogether that show any decrease in earnings. Of these ten but two merit special mention, namely the Oregon Navigation and the Texas & Pacific. With reference to both it is to be said that earnings last year showed an exceptionally large increase. Thus the Oregon Navigation had a gain then of \$141,000, of which \$60,000 is now lost. In the case of the Texas & Pacific not only were earnings last year very large-freight delayed previously by strikes having added to results—but the cotton movement then was quite heavy, while this year it was very light. This latter circumstance no doubt explains why the present year's loss is larger than the 1886 gain.

The best returns are again made by Southern and Southwestern roads-barring out of course the Texas & Pacific. The Atchison has a gain of \$349,632, the Louisville & Nashville a gain of \$190,021, the Norfolk & Western a gain of \$86,192, the San Francisco a gain of \$88,967, and the St. Louis Arkansas & Texas a gain of \$53,644. Even the Richmond & Danville roads, which have on previous occasions been an exception to the rule of gain, all have an increase this time excepting one-and this too in the face of a considerable falling off in the cotton movement on the Atlantic coast. A smaller cotton traffic must also account for the comparatively small increase in the earnings of the New Orleans & Northeastern, as the road delivered only 1,544 bales of the staple at New Orleans this year, against 4,418 bales last year. The Illinois Central Southern line delivered 2,380 bales, against 6,707 bales. In fact, at New Orleans there was a falling off in the receipts of cotton by every one of the routes, water as well as rail.

It is true that some of the Southern roads which now report gains, last year had losses, but in nearly every case the gain is very much greater than the preceding loss. Thus the Richmond & Danville has an increase now of \$40,000, while the decrease of 1886 was only \$11,000, and the present total is the largest for May in any year. In fact, almost every Southern and Southwestern road shows larger earnings than ever before in this month. We bring together below the figures of the leading systems for a series of years past. Their aggregate earnings this year stand at \$4,371,914, against \$3,547,803 in 1886. \$3,463,819 in 1885, \$3,783,316 in 1884, and only \$3,234,7971 in 1882.

*St. Louis & Cairo included in 1887 and 1886, but not in previous years.

The trunk lines and the roads in the territory of the Central Traffic Association make more moderate gains, though the New York Central has an increase of \$344,398. We have some excellent returns, moreover, from this section, among which may be mentioned those of the Chicago & Eastern Illinois, the Mackey roads, the Chicago & Atlantic, the Hamiltonian anapolis St. Louis & Chicago, the Grand Rapids & Indiana, the Lake Erie & Western, and the Louisville New Albany & Chicago. In fact there is a pretty general increase as from the following.

compared with the previous year, but when we extend the comparison further back it frequently happens that we find present totals below those of some of the earlier years. This will appear from the following table showing results on ten prominent roads for six years.

Northwestern roads make perhaps the least satisfactory showing of any in our table. All the new lines continue to report heavy gains, but the older systems, though they report better earnings than in 1886, fail to reach the totals of other good years. The St. Paul has an increase of \$99,000 over 1886, but a decrease of \$119,000 as compared with 1884 and of \$167,000 as compared with 1883. The Manitoba's total of \$580,510 compares with \$433,462 in 1886, but with \$621,167 in 1884 and \$728,207 in 1883. The St. Paul & Duluth has the largest total on record. Below are the earnings of four roads for six years.

May.	1887.	1886.	1885.	1884.	1883.	1882.
	8	8	8	8	8	8

Of course new competition accounts in great degree for the less satisfactory results on these lines. As to the course of the grain and provisions movement, some idea of what kind of a factor this has been, may be gathered from the following.

In other sections of the country, there are a few roads worthy of special mention. The Rochester & Pittsburg shows a large gain by reason of the increased tolls on bituminous coal to Buffalo, the Denver & Rio Grande is profiting by the industrial activity of Colorado, and the Atlantic & Pacific and California Southern by the development of Southern California.

For the five months to the end of May, we have a most satisfactory exhibit of earnings. The gain on the 101 roads reporting reaches 181 million dollars, and there are but seven roads that fail to show an increase.

COTTON ACREAGE, STAND AND CONDITION,

We pursue our usual course of analyzing last year's yield and weather conditions as a preliminary to this year's acreage report, for the data of the present season finds its chief use through a comparison which such a summary permits. In fact a retrospect of two years affords at this time a peculiarly instructive record; it becomes so from the circumstance that those years are so like one another in the aggregate yield and yet differ so widely as to the productiveness of States. Consequently a record of this variation and its causes affords the material for the formation of a clearer judgment than usual with regard to the possibilities of the current year's production.

As a general fact it should first of all be remembered, respecting the last two crops, that they were neither "poor" nor "good" but "fair" crops. They were "fair" as distinguished from "poor" because they were respectively about 800 and 900 thousand bales larger than the yield of the two years 1883 and 1884; but as compared with a "good" crop they were only "fair" because the acreage planted was evidendly for a much larger yield. Had the rate per acre been obtained that was obtained in the unusually productive year of 1882, or even in the seasons of 1880 and of 1879—the two years ranking next in yield, we should have secured from 71 to 73 million bales. At the same time we ought not to forget a fact we referred to last year, that with the larger acreage (that is wider area cultivated) the chances of a full yield or of a bad yield everywhere, are both of course lessened somewhat, while the differences between a thoroughly good and an absolutely bad year become more considerable. These are general considerations necessary to keep in mind in connection with any forecast of future prospects.

But looking at the matter more in detail, it is found that these two years furnish further important dissimilar features or contrasts which it will be helpful to note. Thus, confining the inquiry for the moment to an analysis of the results, we see that (1) the Atlantic States taken together raised a very good crop in the summer of 1885 and a comparatively poor one in the summer of 1886, Georgia ranking first, South Carolina second and North Carolina third in 1885, while in 1886 North Carolina was again the poorest; (2) in Alabama and Misssissippi the yield was good in 1885 (though not as good as in the Atlantic States, not being up to the capacity of the land planted), while in 1886 it was less satisfactory but not nearly as poor comparatively as it was that year in the Atlantic States; (3) the Western and Gulf States made a poor crop in 1885 (though a slight improvement on 1884), but a considerably better one in 1886, yet not up to a full average for the land planted except in Arkansas and perhaps in Tennessee. To summarize these results, and taking 100 as a good average yield on the acreage planted, the comparative, or perhaps we should say the relative, production may in a general way be represented about as follows for the last four summers.

Yield in	1883.	1884.	1885.	1886.
The Atlantic States	55	75	100	75
Alabama and Mississippi	60	55	90	80
Rest of Gulf States	65	60	75	90
Arkansas and Tennessee	65	60	75	100
	65	70	85	85

These figures merely trace in a rough way the course of the yield in the various districts, and help one to keep in mind the results as previously outlined. As a further analysis of the actual production in each State for these and previous years, we give below, as accurately as we can make it up from the data we are able to obtain, the figures of yield for a series of years.

PRODUCTION OF EACH STATE FOR YEARS NAMED--(000s omitted).

d,

Thus far this retrospect has covered only the total yield and the yearly variations in productiveness of States. Let us now carry the investigation one step further and note the causes for these relative results, by recalling the weather and other conditions which prevailed. Pursuing this part of the inquiry, marked contrasts are again disclosed, not only between the States but between the years, for the last two years varied in so many ways.

A first and prominent difference was in the start. Thus in 1885 planting almost everywhere was begun late; but in the Atlantic States there was no special hindrance to progress after it was once well under way, the start and stand being reported good; Alabama and Mississippi and a part of Louisiana came next in favorable development, though cold, dry weather in many sections made the stands to a certain degree less perfect and replanting necessary, Alabama faring, however, best of the three States; in Texas and some of the adjoining districts excessive rains delayed work and made the early growth unsatisfactory, the fields grassy, and much replanting necessary, while in Tennessee and Arkansas, in parts of the State excessive rains, and in other parts cold, dry weather, made the plant very backward and the stands poor, uneven and weakly on the first of June.

In 1886 planting was again late—even later than the previous year-about everywhere, but subsequent development differed widely in different sections; in the Atlantic States not only was seeding very backward, but cold and rain interfered with work, cultivation and growth, making stands uneven and weakly and replanting widely necessary, so that on the first of June last year we gave the condition very fairly in our acreage report by stating that the plant in the Atlantic States was much more dependent than at that date of the year previous upon subsequent growth; Alabama, Mississippi and Louisiana were also subject to the same drawbacks, in varying degrees however, and diversified in some sections by a May drought, Alabama being inly a very little less unfavorable than the Atlantic States and Louisiana in the best condition of the three; Texas, Arkansas and Tennessee all had a better start than the year before, though there was a cold ten days with rains (mainly in Texas), and after that a short May drought which it was feared was going to be harmful, but showers about the first of June relieved this latter anxiety.

As to the summer growth the two years also differed materially. In 1885 fair rains visited about all sections (but generally not so heavy as to check cultivation) until about the first of August, when a severe drought set in, being most harmful in Texas, Arkansas and Tennessee, and also harmful, though to a less degree, in all the other Gulf States; pretty much the same conditions prevailed in the Atlantic States, but they did not do the same injury there. In 1886 the showers kept up through the summer in a very timely way, so that although the plants started poorly, except as already explained, the condition the first of September was generally reported good; then in the Atlantic States and in Alabama and Mississippi came a very dry season (the section least prepared by early growth to endure it), beginning the latter part of August and extending through September, while in Texas drought began in August, followed by heavy rains in September, which did much harm.

This brief retrospect of conditions and yield during the spring, summer and fall of 1885 and 1886 may be epitomized approximately as follows. It is scarcely necessary to say that these figures are not an accurate adjustment of differences, being merely approximations used to recall the relative position of groups of States, as described above, at the start of the two crops, and in their results. To that extent they will prove useful.

It is seldom that two successive years illustrate so clearly the close relation existing between the stand and the yield secured, while at the same time bringing out the fact that the land planted made its best return in neither year, except in a limited district. We now reproduce our thermometer and rainfall record. Because our space is limited we insert the results for only seven years. Our readers will have to consult previous reports for earlier returns.

These averages show that there has been no such extreme heat the past two years as prevailed in previous bad years. The crop loss was not, therefore, the result of any re. markably bad summer conditions, but as we have shown of a poor start, which prevented the plant from growing root enough to withstand anything more than ordinary summer weather. Similar averages for rainfall teach a similar lesson; for the past two years' record shows no extreme either of rain or drought sufficient to account for the crop results. With regard to these State averages of rainfal it should be said, in explanation, that they are sometimes quite misleading, as summer rains are usually local showers and when the stations are grouped by States they may conceal a drought which might cover a wide portion of the State. This is the case in the following, with relation to both 1884 and 1885. By referring to the detailed figures at each station the variations in that particular will be detected.

The words "bad," "good" and "fair" following the years given above mean simply that the aggregate crop for the year named was bad good or fair.

Cotton Acreage and Stand in 1887.

The foregoing figures and suggestions afford a very helpful guide for understanding present prospects and interpreting future weather conditions. They show where and why the last two crops failed, and where and why they succeeded. Add to that now the further data that the last full crop of cotton raised was in 1882, when the total reached 6,992,000 bales, and that since that year the planting has increased annually according to every authority, until according to our own figures it now reaches 19,466,730 acres, against 16,590,000 acres in 1882 (or a growth of over 171 per cent)—adding these facts, the investigator has secured a most advantageous position from which to start his year's observations and figuring. Of course such suggestions are not meant to encourage wild guessing now; they are simply hints to help the buyer and seller in making a correct forecast as the season

The investigations we have made have also this year been very full and complete, and as the crop is earlier than either of the last two, the results reached will be found to be much more conclusive than they were a year ago. In fact it will be remembered that in our report of June, 1886, we stated that the poor start and backward condition of the plant made a recital of the details much less positive than usually possible at this period. As the reverse is the position now, the following summary of the information received from our correspondents in each State will be found especially interesting and helpful.

NORTH CAROLINA.—On the average the planting season was a little earlier than in 1886 in North Carolina, beginning in some sections as early as April 10 and finishing generally the first week of May, although in a few localities seeding was not finally completed until the middle of the month. All of our correspondents state that the seed came up well; in fact some say splendidly, others never better, and still others better than ever before. It is therefore pretty safe to conclude that the start was unusually satisfactory. Practically, no replanting was found to be necessary. While in the early spring the weather was a little cool, it was not sufficiently so to retard growth to any material extent; as a rule, therefore, the conditions have been very favorable and at the close of May the plant was growing finely. Stands range from good to perfect—some report best in years—and one correspondent states that at no time during the past ten years has there been as good prospects of a largely-increased cotton crop as now. In the main, fields were in excellent condition June 1, although grass is complained of in a few districts, owing to late rains. Acreage—Although in some sections of the State there has been a disposition to add to the land under cotton, at other points the opposite has been the case, low prices and last season's poor yield having discouraged farmers. The Commissioner of Agriculture's return to us states that the falling off in the whole State has been 15 per cent, but our correspondents do not at all confirm that figure. We cannot estimate the loss greater than 5 per cent as a maximum. Fertilizers of the home-made variety continue, as in former years, to be more largely used, the commercial sorts showing a corresponding decrease.

South Carolina.—Planting began and was completed in this State in advance of 1886. Under the influence of favorable weather the seed germinated very well—some reports say never better—and the plant made very satisfactory progress. Replanting was necessary to only an extremely limited extent, and that is reported as being the result not of unfavorable conditions, but of defective seed. In fact it is probable that in no year has there been as little replanting as in the present. Since growth began the weather has been almost uniformly favorable. Stands are reported as good to perfect, with the plant growing nicely and the fields well cultivated and clear of weeds and grass. Acreage—From some sections an addition to the area under cotton is reported, but this is more than offset by the decrease at other points arising through a desire on the part of planters for more diversified crops. A careful

perusal of our returns leads us to place the falling off in the State at 2 per cent. Fertilizers—From year to year homemade manures receive more attention, and the present season the increase has been quite marked. On the other hand, and in consequence, commercial fertilizers show a pretty decided decline.

GEORGIA-The planting season, while about six days later than in an average year, was fully one week earlier than in 1886. In some sections of Southern Georgia seed was put into the ground as early as March 20, but operations did not become active generally until about April 7, after which time rapid progress was made, so that planting had, as a rule, been completed before May 1. Germination was delayed in a few instances by dry weather; this is more particularly true of the lower portion of the State; but on the whole the seed came up well to very well. As in the Carolinas, less than the usual amount of replanting had to be done-in fact, none of consequence. Since growth began the weather, aside from being a little dry at times, has favored the development of the plant, stiff lands alone suffering through the lack of moisture. Stands-One correspondent reports the stand as tolerably good, and another says an average; with these exceptions, however, they range from good to excellent and best ever known. At the close of May, according to our returns, the plant was of good size generally, looked healthy and vigorous and was in a high state of cultivation, being unusually clear of weeds and grass. Acreage-In many districts there does not seem to have been any disposition to increase or decrease the amount of land put in cotton, but in others a fair addition has been made, so that for the whole State we estimate the gain to have been about 2 per cent. Fertilizers-In Georgia, as elsewhere at the South, farmers are giving increased attention to home-made fertilizers, the result being a decreased use of the commercial sorts.

FLORIDA.—In some districts of Florida farmers began seeding very early, but generally planting did not begin until March and was completed before the first of May. A few of our correspondents in those sections where the seed was put in the ground very early say that it came up poorly on account of the frosts, and that in consequence some replanting had to be done. At other points, however, and in the main, the seed came up well. Up to the first of May the conditions were said to be in a few localities rather unfavorable, but with those exceptions the weather was satisfactory, the growth healthy, and cultivation quite perfect. Stands are reported from very fair to excellent, with the fields, as stated, in very good order, with prospects above the average. Acreage has undergone some change this season, one of our reports stating that white people have almost ceased to plant cotton, while another states that more attention is being given to cereals. On the whole, therefore, we judge that there has been a moderate decreasesay 5 per cent. Fertilizers are used to only a limited extent in Florida, but home-made sorts are receiving more attention.

ALABAMA.—The planters in this State, like those in the States previously reviewed, were to a considerable extent able to get in their seed a little in advance of 1886. In other words, although there was no material difference in the time at which planting was begun, it was completed generally from a week to ten days earlier than last year. Most of our correspondents report that the seed came up well, but a few state that in consequence of dry weather in April and early May the start was rather poor. A further result of the drought, in conjunction with cool nights, was that a small amount of replanting was necessary on stiff lands. The total portion replanted, how-ever, was inconsiderable. Subsequent to the middle of May the conditions turned more favorable, rain falling where needed, and on the first of June the plant was in the main healthy and vigorous, with a deep tap root and growing nicely. Stands-As may be inferred from the above, notwithstanding the poor start in a few instances, a good stand has been secured. Our reports in fact range from good to very good and perfect. The fields are also unusually clear of weeds and grass, and as a rule in a very high state of cultivation. Acreage-The tenor of the returns on this point is that there has been but little change in the area devoted to cotton; taking the State as a whole, we estimate that there has been an average increase of, say 1 per cent. Fertilizers of the commercial sorts have been taken to about the same extent as last year, but in home-made manures a fair increase is to be noted.

Mississippi.—Farmers were able to begin preparations for the new crop much earlier this year than last, and in some

instances planting was commenced before the first of March For the whole State the season on the average was about two weeks ahead of 1886. To some extent, in the Mississippi Valley and at a few other points, the early spring was rather cool, and that, with a lack of moisture, made the early growth slow. With these exceptions, however, germination is reported from good to very good. A favorable feature the present season is that while in some districts a moderate amount of replanting was necessary in others none at all had to be done, and, compared to the whole area, the replanted portion was inconsiderable. Since the first of May the weather has been quite favorable, rain having fallen where needed, and the warm nights have caused cotton to grow off well, the plant being larger and healthier than for some years at this season. Stands secured range from good to excellent, averaging for the State very good, with the fields, according to our reports, in splendid condition, being well worked and clear of weeds and grass. Acreage-In the hills and on uplands cotton culture has been abandoned to a moderate extent in favor of grass and stock, but this is more than offset by additions to the area in the more productive sections, the average increase for the State being about 3 per cent. Fertilizers are very little used in Mississippi, but home-made manures are yearly receiving more attention.

LOUISIANA.—Reports from this State indicate that all through January, February, March and April the weather was favorable for preparing the ground, and as a consequence planting was in advance of a year ago. In some sections seeding began as early as the middle of March and became general about the 20th, and was finally completed by May 1. The seed came up well, though reported in some instances slowly, on account of dry weather and cool nights during April. Since early in May the conditions have been very satisfactory, and lost ground has as a rule been completely recovered. A very limited amount of replanting was required, owing to the drought. Stands secured ranged from good to very good, and considerably better than last year. Fields are in quite good condition, there being some weeds on account of late rains, but not more than a few days good work will conquer. Acreage-Our returns indicate that there has been an increase in acreage of about 3 per cent. Fertilizers—We have to report a small increase in the use of fertilizers, both commercial and homemade. The total amount of all kinds used in the State is, however, small.

ARKANSAS.—Planting began somewhat earlier than in 1886, and was finished generally the first week in May, or from seven to ten days ahead of last year. Owing to a dry spell in some sections the seed were in the ground ten days longer than usual before coming up or making much of a show, but after rain fell they started quickly, in fact some say better than usual. The above applies more particularly to the Central and Western portions of the State, for at some points on the River and in Southern Arkansas germination is stated to have been poor in consequence of too low temperature. These partially adverse influences rendered a moderate amount of replanting necessary. Since the middle of May the weather has turned more favorable, needed rains have fallen, and with higher temperature the plant has made good growth. Stands -One correspondent reports the stand as not good, but our other returns range from good to magnificent. At the close of May some sections report that the fields were not clean, owing to the late rains, but farmers were rapidly getting the best of the weeds and grass. Acreage—There has been the usual disposition to add to the cotton area this year as in former years, and for the present season we estimate the increase at about 5 per cent. Fertilizers, as is pretty well known, are but little used in Arkansas, but more attention is given each year to home-made manures.

Tennessee.—There was no material difference in the planting season this and last year, except that a few farmers began work a little earlier; but for the whole State the finish was at about the same date as in 1886. As a rule the seed germinated very well, and under the influence of generally favorable conditions made good progress toward development. There were, however, some complaints that lack of moisture and somewhat low temperature checked growth, but on the whole the weather has been quite satisfactory, particularly so of late. Only a small amount of replanting was required. The Stand secured ranged from good to splendid, and the present condition of the plant is excellent—one correspondent says better than ever before. The fields are stated to be clear

of weeds and grass and very well worked. The Acreage has been increased in some districts and decreased in others, but for the State there has been an increase of about 3 per cent. Fertilizers are very little used in Tennessee, but the homemade sorts shows a small increase this year.

TEXAS.—Although at some points in Texas planting began a little earlier than in 1886, the season in general was later than last year. The first planted seed in many sections lay apparently dormant in the ground on account of drought, but since the rains it has come up well everywhere, very little replant ing being required. In North Texas, owing to the failure of oats and partial failure of wheat, some land has been replanted in cotton. Stands are reported good everywhere, and on June 1 the fields were in general clear of weeds and grass. Telegraphic returns from our various Texas correspondents subsequent to the first of June indicate a continuation of very favorable weather, so that altogether the crop prospect is at present excellent, and the plant in a much healthier and more promising condition than a year ago. Acreage-The reports from our correspondents under this head are all of the same tenor; some put the increase as low as five per cent, while others say fifty per cent. For the whole State we estimate the addition to the area in cotton to have been 7 per cent Fertilizers.—Very little attention is paid to fertilizers in

The foregoing details are necessarily brief, but sufficiently elaborated, we think, to convey a pretty clear idea of the situation about June 1st in each of the cotton States. We have, however, prepared our usual statement of rainfall and thermometer as a confirmation of these results, and it will be found in our cotton report on another page.

The facts given furnish sufficient data from which to draw intelligent conclusions upon the points covered by this report.

CONCLUSIONS.

They may be briefly stated as follows:

First—As affecting acreage, we must repeat what we have so often said on previous occasions, that our results are not claimed to be accurate; they are simply the closest approximations we can reach,—except we may have erred while attempting in every case not to over-estimate the amount of land under cotton. But the year's increase is not the most important fact in the present acreage problem, as we have already shown. The South has raised now four partial crops, so that to get at comparative capacity one does not look so much at what has been added this spring as what has been added since the last year of plenty.

The tendency to increase acreage is mainly apparent the present season in the Southwestern States. To be sure Georgia and Alabama show a slight growth; but other than that, all along the Atlantic there is a loss instead of a gain. From Mississippi westward there is an increase everywhere. This is not large in any State except in Texas and Arkansas, but it is a natural expansion, due in the latter two States in part to new settlements, and in all of the States named to an inevitable tendency in the more pro ductive sections of the South, where less expense is connected with cultivation, to enlarge cotton planting; and this we should imagine would be more marked when, as at present, we are passing through a prosperous period, distinguished by the expansion of all other industries. For this reason it is perhaps presumable that estimates made up as ours have been are under estimates. In North and South Carolina the falling off is probably due to a desire to diversify production, this desire being prompted perhaps, or at least stimulated, by the fact that both of those States had the discouragement of a poor yield in 1886 to fight against. The changes from last year as we make them up for each State have been as follows:

STATES.	Acreage,	Estimated for 1887.					
STATES.	1886.	Increase.	Decrease.	Acres, 1887.			
North Carolina	1,082,000		5 per cent.	1,027,900			
South Carolina	1,670,000		2 per cent.	1,636,600			
Georgia	3,006,000	2 per cent.		3,066,120			
Florida	284,000		5 per cent.	269,800			
Alabama	2,924,000	1 per cent.		2,953,240			
Mississippi	2,615,000	3 per cent.		2,693,450			
Louisiana	1,015,000	3 per cent.		1,045,450			
Texas	4,011,000	7 per cent.		4,291,770			
Arkansas	1,344,000	5 per cent.		1,411,200			
Tennessee	940,000	3 per cent.		968,200			
Other States & Ters.*	103,000			103,000			
Total	18,994,000	2.49 per cent		19,466,730			

*The area under cotton in the Indian Territory is increasing, but in the "Other States," which produce little cotton, the tendency is to plant less; altogether the amount is small, and we leave the figures unchanged.

This shows a net increase over 1886 of 2.49 per cent, bringing up the total to 19,466,730 acres. We add the acreage for previous years for comparison.

Second—With regard to the maturity, cultivation and condition of the plant, the conclusions reached are as follows:

(1) As to *Maturity*, though the crop as a whole cannot be called an early one judging from its start, yet it is earlier than last year's crop, and its development since it began to grow has been very rapid, blooms being reported to us the last of May even in parts of Georgia. This comparison with 1886 needs, perhaps, a little qualification, for in its entirety it may be said to apply chiefly to the Atlantic States, since a year ago those states were the most backward; and yet there is no doubt that the plant has come forward marvelously well recently, and if the surroundings continue as favorable during coming weeks and months the picking must begin early rather than late almost every where. We would then as to maturity class the crop though more advanced than last year's growth, neither a late nor an early one, but a good medium one.

(2) Cultivation has met with no material hindrance up to the first of June. Of course the rains which made the cotton grow made the weeds grow also, and labor has had to be active in following closely the job of keeping the grass down. But the fields were in good condition before it began to rain, and as a general thing the rains have given time for the farmers to keep well up in their work; hence it may be said in general terms it is not often that the situation in this particular is so satisfactory. There are of course limited exceptions, where it is claimed weeds are getting troublesome; but even those cases are few in number and limited in extent, and we have no evidence whatever that any permanent harm has been done as yet.

(3) Condition of the plant, as may be gathered from what has been said, was on June 1st much more satisfactory than it was a year ago. In fact for several years we do not think we have been able to report the plant in the

whole cotton section so favorably situated at that date. Two years ago it was well conditioned in Georgia, and in a good part of South and North Carolina, but in most other sections the outlook was not favorable; again, last year Texas, Arkansas and Tennessee we reported "in fine condition," but elsewhere we had to state that the situation was so unpromising that the "June weather "and development was a more important element than is often the case." Now, however, all the States send up good accounts.

For the purpose of enabling the reader the more readily to compare the early weather conditions with previous seasons, we have prepared the following:

1884. Spring was late, but in the Atlantic States no more backward than a year ago. Early progress was, however, slow everywhere, and cold weather made re-planting necessary in many cases. Still, the surroundings the first of June were better than a year ago in the Atlantic States and in Alabama; but in the remainder of the Gulf States and in the Mississippi Valley both rains and floods prevented work, and over a considerable area made re-planting necessary. Since the last week in May the Southwestern conditions have improved, and opened up the possibilities of a good season there; but drought would prove a severe trial in those sections.

1885. Planting began somewhat later than in the previous season, but progressed rapidly. In many sections the early development was rather slow, but in general the seed came up well, and until the latter part of May made rapid growth. At that date heavy rains set in and stopped work; and though June opened with an improvement in this particular, yet in very many sections June was rainy.

1886. Farm work opened late in 1886,—later than in 1885. And after it began, the development of the plant was as a rule (on account of cold and rain) slow in all States except in Texas, Tennessee and Arkansas, where it did better; dry weather, however, in May in Texas, and to a less extent in other States, caused anxiety. For these various reasons the plant was in general more backward than in 1885 on the first of June, except in the States named.

1887. Planting began somewhat in advance of 1886, and, except in Texas, was completed at an earlier date. Early development was retarded at a few points by dry and cool weather, but the seed came up very well in almost all localities. Since the opening of May the plant has made rapid progress under the stimulus of favorable weather, and on June 1 the fields were, as a rule, well cultivated and clean. Our telegraphic advices since June 1 note a continuation of satisfactory con ditions.

With such early conditions, the stand and later history of each year may be briefly stated as follows.

Year.	Stand.	July to Sept.	Sept. to Dec.	Year's results.

THE PUBLIC DEBT QUESTION.

To the Editor of the Chronicle.

DEAR SIR:—In your editorial in the FINANCIAL CHRONICLE of to-day upon "Public Debt Payment," you refer to a proposition of mine upon this subject, but the facts, as stated by you, do not give a correct statement of the plan I proposed. Its object was the "Reduction of the Surplus," instead of the payment of the debt, and it was first advocated by me in my report as Comptroller of the Currency for 1882. In substance he proposed plan is as follows.

It provides for the refunding of the 4 per cent bonds amounting to about 738 millions, into two-and-a-half per cents, in all respects precisely like the fours, except in the rate of interest, the Government offering to the holders of the fours the inducement to exchange the old bonds for the new by paying in advance the difference in interest between two-and-a-half per cent and four per cent as calculated by the Actuary of the Treasury Department. According to this calculation, the holder of \$100,000 of four per cent bonds would receive new two-and-a-halfs, maturing at the same date as the fours, and in addition \$23,552 cash, if the rate of interest upon the interest advanced by the Government is cast at two-and-a-half per cent, or at a little above the borrowing power of the Government. If the rate of interest is cast at four per cent, the holder of \$100,000 of bonds would receive new two-and-a-half per cents and \$20,583 cash.

Holders of the four per cents, including officers of banks and trust companies and other corporations, have expressed the opinion that if such an offer was made the four per cents would be readily returned to the Government, either for conversion or for reduction in the rate of interest. Private individuals who are satisfied with a small income hold Government bonds for the purpose of avoiding taxation; national banks hold them as security for circulating notes and for Government deposits; savings banks and trust companies hold them as a reserve and because they are not subject to taxation; and insurance companies and other corporations are required by law to deposit them with State authorities. It is evident that a bond having a low rate of interest, payable at the same time as the fours, could be used equally well for any or all of these purposes.

Senator Aldrich had a bill pending in the Senate which provided that the two-and-one-half per centum bonds therein authorized to be issued in exchange for four per centum bonds, should not be called in and paid so long as any bonds of the United States theretofore issued, bearing a higher rate of interest, were outstanding and uncalled; and further it provided that the last of such bonds should be first called in, and that order of payment followed until all of such bonds had been paid. The bill also authorized the issue of circulation of National banks up to the par value of the two-and-a-halfs. Such legislation would immediately enhance the value of the two-and-a-halfs, and the holders of the fours, particularly the National banks, who now hold about 1291/2 millions of them, would hasten to make the exchange in order to obtain the earliest numbers of the new bonds, for the same reason that similar exchanges were promptly made for the three-and-a half, and subsequently for the threes at the time those bonds were issued.

The new two-and-a-halfs could also be made more valuable, and the proposed exchange rendered certain, by extending the date of the maturity of a portion of the new bonds to a date subsequent to July 1, 1907, when the whole 738 millions of fours mature. The Government cannot, of course, at that time pay the whole amount, and would have to extend the time of payment, reducing the rate, as it did at the date of the maturity of the five and six per cents on July 1, 1881, when 579 millions of bonds were extended or continued at the rate of three and a half per cent; or, as it did two years subsequently, on July 1, 1883, when more than 300 millions of three-and-a-halfs were continued at the rate of three per cent.

If the date of the payment of the new two-and-a-halfs to be issued be postponed, at the same rate of interest, beyond the maturity of the present fours, and made payable in instalments of 100 millions, annually during each year succeeding July 1, 1907, until the whole amount is paid, the last payment of 100 millions would be July 1, 1913, leaving 37 millions to be paid the following July. Or, if the annual payments were fixed at 80 millions, then the final payment of 37 millions would be in the year 1917, ten years after the maturity of the present bonds — his would make the new two-and-a-half pe

cents exceedingly desirable to all holders of United States bonds, and particularly to that large class who desire the longest bonds. The holders of the four per cents first presenting their bonds for exchange would receive the new two-and-a-halfs having the longest time to run, and there is no doubt there would be a brisk competition among holders to obtain the longest bonds.

If the Government would also offer to the holders of the fours the inducements which are outlined above it may not only refund all of these bonds into the two-and-a-halfs—the lowest rate of interest of any government—but may at the same time receive four per cent interest upon the interest which it pays in advance to these bondholders. In other words, it may successfully reduce its surplus and complete the whole transaction by offering for every \$100,000 of the fours the same amount of two-and-one-halfs and \$20,583 cash.

According to the calculation of the Government Actuary, the just and equitable amount to be paid to the holders in advance as interest upon the 738 millions of fours for an exchange of such bonds for two-and-a-half per cents, is \$173,819,000 in cash.

With the additional inducement of an extension of the date of maturity of the new two-and-a-half per cents, there is no doubt that the whole transaction could be consummated by offering to the holders of the fours in the aggregate \$151,903,000, thus affecting a gain to the Government in the whole transaction of \$21,907,000, and at the same time providing an outlet for the surplus during the next two years of \$151,903,000, according to the Actuary's calculation.

This plan for refunding the last loan of the Government, if the proper legislation can be obtained, is perfectly feasible, and can be readily carried out, and would surpass even the brilliant transactions of Secretary Sherman, when these very bonds, the four per cents, were issued in the year of the resumption of specie payments—1879.

The proposed plan will be of advantage to the bondholder, and, owing to the existing circumstances, still more advantageous to the Government. It provides for the reduction of the surplus as rapidly as the state of the Treasury will warrant, and will give ample time for both parties to mature a bill for a just and permanent reduction of the customs duties.

The present holders of the fours, as you say, can readily realize the money upon their bonds if they desire to do so by selling them at the present high premium. That is true, but the present holders of United States bonds as a rule do not desire to convert the principal of their bonds into money, and under the plan proposed the principal of the bonds will not mature until the date of the payment of the present four per cents; in fact, the date of the payment of a considerable portion of the new bonds would be extended after 1907 for a series of years, for the reason that the Government will be unable to pay the whole amount of 730 millions of bonds on the date of maturity.

Another fact which has an important bearing on this proposition is that by a close calculation it is found that if the present four per cents are worth 129 in the market, the new two-and-a-halfs would be worth certainly not less than 108½ in the same market.

John Jay Knox.

WEEKLY EARNINGS.

For the first week in June ten roads (all that have yet reported) show a gain of 15.23 per cent.

Monetary Commercial English News

[From our own correspondent.]

LONDON, Saturday, May 28, 1887.

The past week has been a comparatively uneventful one. Some slight increase in Stock Exchange speculation has been observed, and the issue of new companies partaking more or less of a speculative nature has continued; but in real commercial transactions nothing fresh has occurred. There has, perhaps, been a slightly better inquiry for iron, but quietness is still the characteristic of the woolen and cloth industries.

It is well for the future of trade that the value of raw material has not been extensively manipulated. As it is, the revival of business in cotton goods has been, to a certain extent at least, checked by the speculative corner in cotton at Liverpool, The Manchester Cotton Spinners' Association are, in consequence of this, considering the advisability of running short time, since they maintain that at the present value of raw material and the low prices current for yarns and cloth, the latter can only be manufactured at a loss. The price of cotton is anything but high, but unless the value of the manufactured article can be enhanced, the endeavors to force up the price of the raw material will be defeated by the curtailment of consumption.

Stout obstacles to improvement in trade still exist, not the least important amongst which are the uncertainty respecting the political future and the lateness of the season. We may, however, satisfy ourselves that trade is moving, though the progress is very slow. At the same time it is extraordinary that the commercial demand for money does not expand; the rate for discounting three months' bills cannot be maintained even at 1 per cent, whilst short loans are granted at figures which are quite nominal. It is hard to reconcile this difficulty of finding employment for money with symptoms of improving trade disclosed in other quarters, namely, the increased railway traffic and the heavier returns published by the Bankers' Clearing House. However, though available balances are heavier now than they were a year ago, the margin is not so wide but that a moderate and sustained increase on the demand would soon bring about a close assimilation, and appreciably influence discount quotations.

Money has remained very quiet and easy, with an abundance of capital lying idle. The employment offering does not increase. At the fortnightly Stock Exchange settlement, just completed, the demand for loans fell far below the capital available; so much so that the banks readily lent to the House at the rate of 1½ and 1¾ per cent per annum for the fortnight. Short loans can still be had at ½, and occasionally as low as ¼, per cent, and the discount rate for three months' bills was weak,

even at % to 1 per cent. The Bank of Bank turn shows no important changes, but the random a further accession of strength. The narray has £241,980, of which £207,345 is on country impeased bullion crease in bullion about £150,000 and returned from general circulation. The aggregate day six held are about £247,000 more than last week, which the critics have decreased £136,360. The amount some some £14,886,900 and the stock of bullion £3.000. It is now £14,886,900 and gain in each case over last year, when the Benth mto was 3 per cent, being about £4.000,000. The proportion of reserve to liabilities is now 47.54 per cent, against 17.16 per cent last week.

The following the bank of the Bank of England, the bank of ascount, the price of consols, &c., compared with the parties years:

Messrs. Pixley & Abell write as follows on the state of the

Gold is still in demand for Germany. The Bank of England purchased during the week £ 6,000 and sold £50,000. The arrivals are £32,000 from Buenos Ayres, £1e5,000 from Australia and Chma, £3,500 from Madras, £2,000 from the Cape and £26,000 from Central America; total, £228,500.

Silver.—With weakening exchanges, the price gradually declined until 43½d. was touched yesterday. With slightly firmer exchange, and a scantily supplied marker, we to-day quote 439-16d. £21,000 has been received from Chile and £52,000 from New York; total, £73,000. The Khediye has taken £57,500 to Bombay. Mexican dollars are again nominal in the absence of supplies.

Tenders for £2.000,000 Treasury hills are to be received by

Tenders for £2,000,000 Treasury bills are to be received by the Bank of England on June 3. This is £406,000 less than the sum maturing—£1,860,000 having been placed in March last in three months' bills, at an average of £2 19s. 0.25d, and £546,000 in December last in six months' bills at an average of £2 17s. 1 3-16d.

Vienna advices notify the completion of the arrangements for the issue of a Bulgarian loan of 20,000,000 francs at 6 per cent interest, the issue price being 90 per cent.

Messrs. J. S. Morgan & Co., having acquired by purchase £2,370,000 five per cent debenture stock and £500,000 five per cent preference shares, of £20 each, of the Argentine Great Western Railway Co., Limited, are now offering them to the public at 961/2 per cent for the debentures and £19 for each £20 share.

Stock Exchange and financial circles have been rather exer_ cised of late by the endeavors to rehabilitate the credit of certain Central and South American States, which has been at a very low ebb for a very long time. The first reports were regarding Honduras, but they seem to have been premature, and, for the moment at least, have been allowed to fall into abeyance. During the past day or two, however, we have been treated to a variety of rumors respect-ing Peruvian affairs which promise to bear fruit of some description. It is now stated that a contract has been signed by the bondholders' committee and the special commissioners of the Government for the re-arrangement of the debt; on what basis has yet to be discovered. It is also reported that the Government are going to transfer the railways to the bondholders, and that the bondholders are to have the concessions for new lines. There is talk too of privileges to work mines and petroleum deposits and export guano. However, so far, with nothing tangible to go upon, the affair may be considered to be more or less in nubibus; but to carry out the arrangements it is hinted that another loan will be required. The amount is placed at £2,000,000 and Messrs. Baring Bros. are mentioned in connection with it, with what amount of truth remains to be seen.

Peru has been a defaulter for some 12 years, and it will require very strong backing to place another loan on this market. The nominal amount of the loans quoted here is about £32,000,000, about two-thirds being in 5 per cents and the balance in 6 per cents; but it is understood that large parcels of the stock are held on the Continent, especially in Holland. The present is certainly a favorable opportunity to raise fresh at the port of New York for the week ending June 4, and

funds if only honest dealing in the future can be guaranteed. There is unquestionably a more speculative feeling abroad, rich is fostered by a superabundance of money; but those who were unfortunately interested in Peruvian securities when they were in the "fifties" and "sixties" may be excused they look askance when requests are made for additional

The rade continues to be characterized by firmness. When a not only fully maintained the late advance, but has occorded a further rise of 6d. per quarter. The Revenue and A Department of the Government of India have issued the following report, dated Simla, April 27th, 1887, on the estimated outturn of the wheat crop in the lower provinces of Bengal for the season of 1886-7:

The cultivation of wheat on a large scale is in the lower provinces confined to the Patna and Shahabad districts of the

Patna division, and to the Patna and Snanaoad districts of the Patna division, and to the Bhagulpore and Monghyr districts of the Bhagulpore division.

Excessive rain during September and October last made it impossible to prepare land for wheat in due time, and the crop has, moreover, suffered from rust brought on by heavy rains in January. On the whole it may be said that the area sown was less than the normal and the outturn will be about three-

These estimates are based on reports which district officers These estimates are based on reports which district officers received from European indigo planters, managers of wards, and Government estates, selected zemindars and others. These reports were forwarded to this office with district officers' criticisms and remarks. The estimates have no claim to statistical accuracy, but district officers and the selected reporters have taken much trouble in the preparation of them, and they are on the whole believed to be fairly trustworthy. and they are on the whole believed to be fairly trustworthy.

Commercial and Miscellaneous News

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show an increase in both dry goods and general merchandise. The total imports were \$8,430,645, against \$7,149,007 the preceding week and \$11,423,543 two weeks previous. The exports for the week ended June 7 amounted to \$5,764,223, against \$5,743,018, last week and \$5,745,155 two weeks previous. The following are the imports at New York for the week ending for dry goods) June 2, and for the week ending (for general merchandise) June 3; also totals since the beginning of the first week in January:

FOREIGN IMPORTS AT NEW YORK.

For Week.	1884.	1885.	1886.	1887.
Dry Goods Gen'l mer'dise	\$1,588,567 6,385,800		\$1,297,034 5,136,115	\$1,687,110 6,743,535
Total	\$7,974,367	\$7,075,787	\$6,433,149	\$8,430,645
Since Jan. 1. Dry Goods Gen'l mer'dise	\$50,790,771 140,355,025	\$42,178,425 117,850,109	\$50,552,981 134,913,769	\$53,485,907 146,829,733
Total 22 weeks.	\$191,145,796	\$160,028,534	\$185,466,750	\$200,315,640

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending June 7, 1887, and from January 1 to date:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1884.	1885.	1886.	1887.
For the week Prev.reported	\$8,435,075 116,965,992

Silver Bullion Certificates.—The Stock Exchange this week granted the application to list these certificates. The silver bullion which will form the basis of the certificates will be received by the Mercantile Safe Deposit Company, in the Equitable Building, and kept in the vaults under locks controlled both by the Deposit Company and the Western National Bank. The certificates will be steel engraved, in form and size resembling petroleum oil certificates. They will be registered and countersigned by the Western National Bank of New York, and deliveries will be made by them.

Under the agreement with the Stock Exchange the following regulations will be observed.

"No bullion will be received of less fineness than 998; no single bar of greater weight than 1,200 ounces will be received on deposit.

"No bar which has been paid out from the deposit company will be again received except under a satisfactory guarantee from depositor as to weight and fineness, and that such bar has not been tampered with.

"The Western National Bank of the City of New York reserves the right to refuse deposits of the kind referred to in the preceding paragraph. It will, however, receive bars of a lower degree of fineness than 998, and cause the bars to be refined at the expense of the depositor, so as to bring the bullion of lower grade within the terms of the requirements of the Stock Exchange.

"The charge for issuing certificates will be 25 cents for each certificate of 1,000 ounces, and the charge for storage will be 1 cent per day for each certificate of 1,000 ounces.

"The Mercantile Safe Deposit Company will report by 10 A. M. of each business day to the Stock Exchange the amount of bullion on hand at the close of each business day, and furnish a statement of the certificates issued on such deposits.

"The Western National Bank will also furnish the Stock Exchange daily at the same hour, the certificates registered and in hand to be registered, if any, issued by the deposit company up to the close of business hours on the preceding day."

New York & Perry Coal & Iron Co.—Stockholders have

New York & Perry Coal & Iron Co.—Stockholders have voted to increase the capital stock from \$1,500,000 to \$3,000,000, the additional stock to be used in the purchase of coal, iron ore and limestone lands, and for increasing the capacity of output of pig iron by erecting other furnaces, etc. Application to list such additional stock will be made to the Stock Exchange. Exchange.

Exchange.

North Carolina Bonds.—A dispatch from Raleigh, N. C., says that Judge Bond, of the United States Circuit Court, has decided the case of the special-tax bond holders in their favor. This suit was brought by Alfred H. Temple, of Raleigh, N. C., in the interest of Morton, Bliss & Co., of this city, and other holders of the special tax bonds of that State. The State of North Carolina issued those bonds in 1869 and has not paid the interest for many years. The payment was secured by a provision in the act of issuance, which ordered a levy of a special tax on all the real and personal property of the State of one-eighth of one per cent. The object of the suit was to compel the State officials to levy this tax to pay the overdue coupons, which amount to nearly one hundred per cent of the total issue of the bonds. The decision holds that the acts passed by North Carolina to stop the collection of taxes to pay this interest are null and void, and that the agents of the State must collect the taxes to pay the interest. must collect the taxes to pay the interest.

North Carolina has repudiated these bonds in toto, and as the United States Supreme Court has always steadily upheld that provision of the U. S. Constitution which forbids an action against a State, there is little probability that any tax will ever be laid to pay these bonds, or that they will ever be

Philadelphia Company (Natural Gas).—This company has already issued nearly all the additional \$2,000,000 new stock in taking in Pennsylvania Natural Gas Co. It is negotiating with the Chartiers Co., which it may also lease, leaving only one independent company. The People's Philadelphia Co. has about \$1,000,000 floating debt, which it is likely will be liquidated from proceeds of new stock.

—The attention of the cotton interest is alled to the card of Messrs. Geo. W. Baily & Co. in to day RONICLE. This firm is composed of young and energy rell acquainted with all departments of the cotton and aving every facility for the quick and satisfactors of orders entrusted to their care.

—Messrs, N. W. Harris on & Co. of Chicago have just purch is issued by Dakota Territory, nearly all cent interest, and paid about half of one policy at the sale by the learning of the contraction.

—The attention of investors is called to the certificates and bonds of the Gas Trust Company of Chicago, dealt in by the well-known house of Messrs. P. J. Goodhart & Co. of this city. These securities have been more or less active in this city. These se market of late.

WALL STREET, FRIDAY, June 10, 1887-5 P. M.

The Money Market and Financial Situation.-We have had another dull week, and brokers now are beginning to look forward to July and to talk of the probable movement which will come after the large disbursements on the first of that month. July has heretofore been a notable month for activity in one or two years, and the operators on the bull side can see no reason why history should not repeat itself in 1887.

The heaviest railroad settlement now in progress is the Phila delphia & Reading reorganization, and that cannot fail to be materially assisted by the remarkable earnings which the Railroad and Iron Company are showing in the current

The topic of most general interest this week is the listing at the Stock Exchange of silver bullion certificates to be dealt in like certificates representing any other commodity. There have been various opinions as to the advisability of taking this action, but we have not to deal with those opinions in this report, and it is merely the fact of the prospective appearance of this novel security at the Stock Board which we wish to record. The whole yearly product of silver in the United States is about \$51,000,000, or equivalent to one-half of the earnings of one single railroad system, the Pennsylvania, whose gross receipts in 1886 on all lines controlled were in round figures \$102,000,000—this comparison may serve to point the relative importance of the silver and other industrial interests in the country.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 3 to 5 per cent, the usual rate to stockbrokers being 41,05 per cent; to-day the rates were 3105 per cent. Prime commercial paper is quoted at 41@51/4 per cent.

The Bank of England weekly statement on Thursday showed a gain in specie of £179,000, and the percentage of reserve to liabilities was 47.04, against 46.44 last week; the discount rate remains unchanged at 2 per cent. The Bank of France gained 1,075,000 francs in gold and 2,100,000 francs in silver.

The New York Clearing House banks in their statement of June 4 showed a decrease in surplus reserve of \$1,451,875, the total surplus being \$4,327,725, against \$5,779,600 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks:

	1887. June 4.	Diffr'nc's fr'm Prev. Week.	1886. June 5.	1885. June 6.
Loans and disc'ts. Specie		Dec. 1,255,700 Dec. 5,300 Dec. 153,700	7,822,200 364,383,700	114,600,100 10,116,500 364,214,300
Legal reserve Reserve held	92,826,775		91,095,925	91,053,575
Surplus	4,327,725	Dec.1,451,875	12,067,975	60,017,725

Exchange.—The sterling exchange market remains in a very dull and lifeless condition, and during the past week there has been no activity worth mentioning. In fact, the almost entire absence of demand has led to considerable weakness, and rates have gradually given way, though the posted rates

are only ½c. lower than a week ago, viz: $4.85\frac{1}{4}$ and 4.87.

To-day the rates on actual business were as follows, viz.:

Bankers' 60 days' sterling, $4.84\frac{1}{4}$ @4.85; demand, 4.86@ $4.86\frac{1}{4}$. Cables, $4.86\frac{1}{4}$ @ $4.86\frac{1}{4}$. Commercial bills were $4.83\frac{1}{4}$ @ $4.83\frac{1}{4}$; Continental bills were: Francs, $5.20\frac{1}{8}$ @ $5.19\frac{1}{8}$; reichmarks, $95.995\frac{1}{4}$ and $95\frac{1}{8}$ @ $95\frac{1}{4}$. guilders, $40.960\frac{1}{8}$ and $40\frac{1}{4}$ @ $40\frac{3}{8}$.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying par; selling \{ \frac{1}{2} \text{@}\} premium; Charleston buying par \(\frac{1}{2} \) premium; selling \(\frac{3}{2} \)-16 \(\frac{1}{2} \) premium; New Orleans, commercial, 75c. premium; bank, \(\frac{1}{2} \) prem.; St. Louis, par. Chicago, 25c discount.

The rates of leading bankers are as follows:

June 10.	Sixty Days.	Demand.
Prime bankers' sterling bills on London Prime commercial. Documentary commercial Paris (francs) Amsterdam (guilders) Frankfort or Bremen (reichmarks)	4 83 ¹ 2 # 4 83 ³ 4 4 83 # 4 83 ¹ 4 5 20 ⁵ 8 # 5 20 40 ¹ 8 # 40 ³ 18	4 87 5 1834 \$\alpha\$5 1835 40516 \$\alpha\$4038 9538 \$\alpha\$9532

Coins.—The following are quotations in gold for various coins

United States Bonds.—The Government bonds have been only moderately active during the past week, the dealings being without any particular significance, and the market without feature. Prices are firm as a rule, though not much changed from a week ago.

The closing prices at the N. Y. Board have been as follows:

-	Interest Periods		June 6.	June 7.	June 8.	June 9.	June 10.
4½8, 1891reg. 4½8, 1891coup. 48, 1907reg.	QMar. QMar. QJan.	*10912	*10912	*10912	*10958	*10934	*1093

* This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.-State bonds have shown considerably more activity this week than for several weeks past, the transactions being somewhat scattered and the Arkansas 7s, various RR. issues, showing the greatest activity and advance. Other prices have not changed to any extent and fluctuations have been slight.

The market for railroad bonds has been dull, in sympathy with stocks, the latter market generally affecting bonds more or less, and all markets have been dull during the past week. Very little is to be said about the bond market in particular, the light transactions having been well distributed over the list, without any special activity in one class. Prices have been somewhat irregular, though as a rule a little weak—that is, the most conspicuous bonds have given way a little, though a few have ruled strong. The Jersey Central issues advanced in the early dealings, on the opposition developed by the holders of these securities to the reorganization plan, and Erick added dealined in grammathy with the steels. 2ds declined in sympathy with the stock market; beyond these there has been comparatively little change in values.

Railroad and Miscellaneous Stocks.—The stock market has been very dull and uninteresting the past week, and the movement of prices has been without any special importance. The bears have made quite decided efforts to depress prices, The bears have made quite decided efforts to depress prices, though without effecting any general weakness or decline. Temporary depression has been caused thereby, however, and weakness has been developed in special stocks for a time. Taking the market as a whole the movement has been irregular, with the fluctuations slight for the majority and the changes for the week unimportant. Various rumors of a somewhat sensational character have been circulated by the bears though they have been without foundations. been circumors lated by the bears, though they have been without foundation, and have not made any serious impression on prices. In fact, the general condition of affairs remains about the same and no really unfavorable features have been developed, railroad earnings continuing to show a gratifying improvement over last year. The announcement of the issue of 100,000 shares of new stock by the St. Paul Company, to provide for new mileage constructed and acquired, caused some weakness in that stock and influenced slightly the general market, though its effect was afterward offset to a great extent by the statement of Mr. Armour that the transaction would be favorable for the

There have been few special features during the week, and the general dulness of the market has been little broken by activity in special directions. Wheeling & Lake Erie has been active in small amounts, though the movement in its price has been without significance. Western Union advanced to the highest point of the year, on the announcement of the resumption of dividends, and a one per cent dividend for the quarter was declared. Fort Worth & Denver had a sharp advance on Saturday and St. Paul & Duluth on Thursday. but beyond

these there has been no special movement.

Kailroad Intelligence.

The Investors' Supplement contains a complete exhibit of the Funded Debt of States and Cities and of the Socks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., January, March, May, July, September and November, and is furnished without extra charge to all regular subscribers of the Chronicle. Extra copies are sold to subscribers of the Chronicle at 50 cents each, and to others at \$1 per copy.

ANNUAL REPORTS.

Galveston Harrisburg & San Antonio Railway.

(For the year ending December 31, 1886.)

The annual report for 1886 has just come to hand. The earnings, expenses and income account for the year, as reported by the lessee, compare with those of the previous year as follows:

year as ionows: Earnings. Freight Passenger. Mail, Express, &c.	1886. \$1,871,447 491,695 236,320	1885. \$2,405,017 525,849 268,210
Total Operating expenses	\$2,599,462 2,322,423	\$3,199,077 1,704,970
Surplus	\$277,039 54,900	\$1,494,107 54,900
Total surplus. Taxes Additions and Betterments. Interest on Bonded Debt Interest on State of Texas Debt. Old Claims	\$331,939 51,771 83,168 1,442,886 27,443 20,546	\$1,549,007 61,555 68,444 1,384,245 14,965 19,601
Balancedef.	\$1,253,877	sur. \$196

The lessee has paid the interest on the bonded debt and all

The lessee has paid the interest on the bonded debt and all other obligations assumed under the lease.

The report says: "The operating expenses have been exceptionally large and they embrace large sums expended in the physical improvement of the road and other betterments, thereby reducing the amounts usually charged the construction account of the road. A considerable sum has been expended to protect the roadbed between Camp Rice and El Paso from the encroachments of the Rio Grande, and it is expected the road will be relieved from this character of expense in the future. At the close of the year 1885 over 800 freight cars were out of service requiring repairs; this number has been reduced at the close of 1886 to 190, which is a small percentage for the equipment on the road. The physical condition of the property has been materially improved in every direction. As renewals become necessary they are made of permanent and substantial character, and these expenditures will, as a sequence, reduce the operating expenses penditures will, as a sequence, reduce the operating expenses

penditures will, as a sequence, reduce the operating expenses in the future.

"As will be seen below, there has been a considerable increase in the number of tons of freight hauled during the year over 1885, but the unprecedentedly low rates to the Pacific Coast and other competitive points that have prevailed during the entire year, operated to reduce the gross earnings from freight \$533,570, or 22.18 per cent, as against 1885; at the same time the increased tonnage and train mileage increased correspondingly the operating expenses contingent upon the movement of the additional freight handled.

"The effect of this reduction of rates can be more fully estimated when we consider that had we received in 1886 the same average rates per ton per mile as we received in 1886 the freight earnings would have shown an increase of \$1,034,215 instead of the decrease shown above."

The freight traffic, in which there has been the principal decline in earnings, compares with 1885 as follows: In 1886, ton miles, 184,706,411; earnings per ton per mile, 1.013c. In 1885, ton miles, 129,150,154; earnings per ton per mile, 1.862c.

Chesapeake Ohio & Southwestern.

(For the year ending December 31, 1886.)

The report of Mr. C. P. Huntington, President, says:
"The company controls a line of railroad from Louisville,
Ky., to Memphis, Tenn., 392.48 miles, and a branch line from
Elizabethtown to Cecelia Junction of 6 miles; total, 398.48
and 47.01 miles of sidings. During the year 74.66
miles of steel rails have been put in the track, leaving now
but 49.76 miles of the old iron rails in the track; and it is con-

templated to replace these with steel rails during the year

templated to replace these with steel rails during the year 1887.

"The organization of the Newport News and Mississippi Valley Company, which contemplated the unification in interest and management of the several lines of railway and other transportation interests of the Chesspeake & Ohio Railway Company and its western associates, having been perfected, your board entered into a lease with that company for the operation of this property for a period of 50 years, commencing with February 1, 1886, by the terms of which, the lessee is to keep the leased property in good repair, to operate, maintain, add to and better the same as the business of the road may from time to time require, and to apply the remaining surplus to the payment of its equipment trust bonds and the interest thereon, and other interest obligations in the order of their priority, and to make such other advances from time to time as may be agreed upon between the lessor and lessee, Under the operation of this lease, greater efficiency and economy are secured in the administration of the several properties, and a better service rendered the public. The results thus far fully justify the wisdom of this measure.

EARNINGS AND EXPENSES.

1886.

Total			

Compared with the operations of the year 1885, there has been an increase in the gross earnings of \$142,169, or 9.04 per cent and a decrease in the operating expenses of \$7,241, and an increase in the surplus over operating expenses of \$149,411 or 29.73 per cent. The earnings from coal have decreased \$25,911, or 10.80 per cent, resulting from a decrease in tonnage of 13.90 per cent; those from local freights have increased \$47,697, or 8.55 per cent, and those from through freight \$102,197, or 31.78 per cent, both resulting from a proportionate increase in the tonnage carried, making a net gain for the year of \$123,983, or 11.09 per cent over 1885. The rates received per ton per mile have been somewhat less, the average receipts being 1 cent, against 1.015 cents in 1885.

There has been expended also during the year the sum of \$311,082 for construction, improvement and equipment, and for real estate the sum of \$13.517, making a total expenditure of \$324,509, which has been charged to the capital account of the company. The additions to the rolling stock consist of 10 ten-wheel freight and 1 six-wheel switching locomotives, 6 passenger, 2 baggage and express, 1 baggage and 200 box cars.

and 200 box cars.

Atlantic & Pacific.—The Chronicle has obtained the following official statement regarding the land grant of this company: Earned under grant from the Government about 16,000,000 acres. Of this there have been sold 1,403,645 acres; in hands of a trustee to pay advances made by the Atchison & San Francisco companies to pay coupon interest, 5,319,065 acres, leaving about 9,277,290 acres undisposed of. Sales during 1886, 208,150 acres, for \$146,049; receipts from stumpage, \$9,993; from interest, \$3,532; total, \$159,576. Paid for interest on Western Division first mortzage bonds \$263,449; expenses of Land Department, \$53,910; debit balance \$157,784.

—The following executive committee of the Atlantic & Pacific has been elected: H. C. Nutt. B. P. Cheney, W. B. Strong. Jesse Seligman and E. F. Winslow. The directors voted to double the subscription for building the Arizona Mineral Belt, on condition that a 5 per cent bond be issued in place of the 6s; that the amount be reduced from \$20,000 to \$18,000 per mile, and that the Mineral Belt show enough money raised from other sources to complete eighty miles of the road.

Boston & Lowell.—The Boston & Lowell Railroad has taken

Boston & Lowell.—The Boston & Lowell Railroad has taken formal possession of the Connecticut & Passumpsic Rivers Railroad, which will hereafter be known as the Passumpsic Division of the Boston & Lowell Railroad.

Division of the Boston & Lowell Railread.

California Southern.—The Boston Advertiser says of California Southern: "A plan has been suggested which meets the approval of some of the largest owners of 6 per cent income bonds. It is to issue a second mortgage 5 per cent bond for par and accrued interest of the incomes, the bond to have the guarantee of Atchison for principal and interest. The total bonded debt of the California Southern would then be about \$27,000 per mile, and the annual interest charge \$1,450 per mile, against \$1,620 at present. Though this plan would give the income bondholders a less interest, their security would be much strengthened."

Chicago Milwaukee & St. Paul —At the appual meeting

\$1,450 per mile, against \$1,620 at present. Though this plan would give the income bondholders a less interest, their security would be much strengthened."

Chicago Milwaukee & St. Paul —At the annual meeting in Milwaukee the old board of directors was re-elected, and George C. Magoun. of Kidder, Peabody & Co., and A. Van Santvoord, of New York, were put in the places of the two directors who died since the last election, Alexander Mitchell and Julius Wadsworth. No action in regard to filling the vacant office of President was taken, the directors agreeing that the road was being well managed now and there was no occasion for hurry in filling the office. As now constituted 9 of the board of 13 directors are Eastern men, as follows: Frank T. Bond, George C. Magoun, Peter Geddes, Hugh T. Dickey, James Stillman, William Rockefeller, James T. Woodward, Joseph Millbank, A. Van Santvoord, all of New York; Selah Chamberlain. Cleveland; Philip Armour, Chicago; John Plankinton, Milwaukee; J. C. Easton, Lacrosse.

The directory reported that it had be en decided to issue 100,000 additional shares of stock, with a face value of \$10,000,000, 30,000 of the shares to be used in buying the Chicago Evanston & Lake Superior Railway, and the remainder to be used in extensions. The Stock Exchange has since received notice that \$10,000,000 of new St Paul stock was to be issued, \$3,000.000 of which would go to pay for the Evanston Road, while the other \$7,000,000 would be allotted to such stockholders of record as may desire to subscribe for it at \$85 a share.

—Mr. P. D. Armour is reported as saying that this new issue of stock is a most favorable transaction for the St. Paul Company. "Take a look at the thing a a st-ckholder in the read. We issued \$10,000,000 of stock. Three millions of it is, ued at par paid for the new Evan-ton suburban branch with terminals at Chicago. including 316 acres in the city limits."

** "Any Chicagoan knows what that suburban road is, and as for the price paid, it is a fact that we can turn around to

Chicago & Western Indiana .- At Chicago, June 8, chicago & Western Indiana.—At Chicago, June 8, the annual meeting was held and resulted in the re-election of the old board of directors. A lease to the Chicago Santa Fe & California Railroad Company was formally ratified. It gives that company the joint use of the Western Indiana tracks from Forty-ninth Street to the passenger station at the head of Dearborn Street for a period of 99 years at an annual rental of \$100,000.

Cincinnati Hamilton & Dayton—Dayton & Michigan.—A dispatch from Cincinnati, June 9, said: The Cincinnati Hamilton & Dayton road has sold to David Sinton and Thomas J. Emery its common stock of the Dayton & Michigan road, of which it held the controlling interest. The price named is \$1,000,000.

Cincinnati Hamilton & Dayton—Terre Haute & In-dianapolis.—At Terre Haute, Ind., June 4, the transfer of a majority of the \$1,988,150 capital stock of the Terre Haute & Indianapolis road was made to the Cincinnati Hamilton & Indianapolis road was made to the Cincinnati Hamilton & Dayton Company. All the old officers of the Terre Haute & Indianapolis RR. resigned, and the following new directors were elected: Henry S. Ives, of New York; C. C. Waite, of Cincinnati; W. H. Ramsey, of Cincinnati; Christopher Meyer, of New York; F. H. Short, of Cincinnati; W. R. McKeen and Josephus Collett, of Terre Haute. The directors elected the following officers: President, Henry S. Ives; Vice-President and General Manager, C. C. Waite; Secretary and Treasurer, F. H. Short. The amount of stock to be taken by the new owners was not exactly known, nor the price.

Cleveland & Canton.—This company has just recorded the mortgage of \$2,000,000 which it was recently voted to put upon the property. The mortgage is made to the International Trust Company.

Cleveland Columbus Cincinnati & Indianapolis.—The earnings, expenses, &c., of this road for April and for four months, obtained for publication in the CHRONICLE, were as

IOHOWS:				
Gross earnings Operating expenses	1887. \$331,293	1886. \$281,588 194,400	Jan. 1 to 1887. \$1,334,958 878,166	April 30.— 1886. \$1,174,162 833,600
Net earnings	\$92,503 67,958	\$87,187 69,083	\$456,792 273,908	\$340,561 274,578
BalanceAdditions to property	\$24,549 55,821	\$18,103 10,706	\$182,984 *333,917	\$65,983 77,980
Balancedef	\$31.272	\$7.397	def \$151 033	def \$11 997

*This item includes \$283,783 spent for new cars, \$33,250 for new engines and \$16,885 for purchase of real estate.

Des Moines & Fort Dodge.—This road was leased to the

Chicago Rock Island & Pacific Railway Company (possession delivered June 2, 1887), for a period of eighteen years. By the terms of the lease the lessee is to pay the arrears of interest now due and thirty per cent of the gross earnings with its guarantee stamped on the \$1,872,000 of first series and extension bonds, guaranteeing them four per cent interest and a guarantee upon the \$1,200,000 of income bonds when they are presented, guaranteeing them 2½ per cent interest, The first series and extension bonds carried a voting power, The first series and extension bonds carried a voting power, and the Chicago Rock Island & Pacific Road, by continued purchases of these bonds and the stock of the road, has acquired a majority vote, and elected the board at its last annual meeting. President Whitehead, who reorganized the road in 1874, and has brought it up from bankruptcy to its present substantial position, resigned as President, and the Superintendent of the road was placed in his stead. When the road was reorganized in 1874 it fell short of paying its running expenses by about \$2,000 a year. It now earns its fixed charges and a surplus. It was then an iron road eighty-eight miles in length; it is now a ste-I road one hundred and forty-three miles in length, with ample rolling stock and terminal facilities. minal facilities.

Duluth South Shore & Atlantic.—Holders of certificates of the Duluth South Shore & Atlantic Syndicate for common and preferred stock were notified that certificates of stock of the Duluth South Shore & Atlantic Railway Company would be issued therefor on and after Tuesday, June 7, 1887, at the C-ntral Trust Company of New York, on surrender of the certificates properly indorsed.

East Tennessee Virginia & Georgia—The gross and net earnings for April, and from July 1 to April 30, have been

	Apr	ril.——	-July 1 to	April 30

Net earnings	\$51,439	\$27,225	\$1,493,862	\$1,317,195

New York Stock Exchange.—The governors of the Stock Exchange have admitted to dealings at the board the following securities and silver bullion:

SILVER BULLION CERTIFICATES—Representing 1,000 ounces of 998 fine silver, deposited with the Mercan ile Safe Deposit Company, and subject to the charge of one cent per day per 1,000 ounces. The certificates are to be registered and countersigned by the Western National Bank.

Norfolk & Western Railroad Company.—\$4,000,000 additional preferred stock, making the total amount listed \$22,000,000. This stock is issued for the purpose of consolidation with the Clinch Valley Railroad Company and the acquirement of additional equipment.

idation with the Clinch Valley Railroad Company and the acquirement of additional equipment.

GULF COLORADO & SANTA FE RAILWAY.—\$324,000 additional first mortgage 7 per cent bonds, Nos. 11,401 to 11,724, making the total amount listed \$11,724,000; also \$500,000 second mortgage 6 per cent gold bonds, Nos. 5,601 to 5,500 inclusive, making the total listed \$5,500,000.

SAN ANTONIO & ARANSAS PASS RAILWAY.—\$552,000 6 per cent 40, year gold bonds, making the total now on list \$1,608.

cent 40-year gold bonds, making the total now on list \$1,608,-

Oto.

Hotston & Texas Central Railway.—Farmers' Loan & Trust Company certificates of deposit of general mortgage bonds; also, that temporary printed certificates be a good delivery until engraved certificates are issued.

Des Moines & Fort Dodge Railroad Company.—\$763,—500 preferred stock and \$4,283,100 common stock.

Louisville & Nashville Railroad Company.—\$1,350,—000 first mortgage 5 per cent 50-year gold bonds, due May 1, 1887. Nos. 1 to 3,500 inclusive, for \$1,000 each, interest May and November. The 1,350 bonds have been issued to coverthe cost of the extensions of the Cumberland Valley branch from Corbin, Ky., to Pineville, Ky., now under construction and approaching completion, about 32 miles; and the cost of the completion of the Indiana Alabama & Texas Ruilroad

from Clarksville, Tenn., to Princeton, Ky., now nearly completed, about 54 miles. Gauge 4 feet 9 inches; steel rails, 58 pou nds. These bonds are a lien only upon the above branches and such other branches as are specified in the mortgage dated April 30, 1887.

New York City & Northern Railroad Co.—Assented Trust Company certificates.

N. Y. Susquehanna & Western R. R.—\$636,000 second mortgage 4½ per cent gold bonds, Nos. 1 to 636 inclusive, \$1,000 each, due 1937.

Chicago Rock Island & Pacific.—\$1,000,000 additional first mortgage 5 per cent extension and collateral fifty-year bonds, Nos. 8,861 to 9,860 inclusive.

Toledo St. Louis & Kansas City R. R.—\$2,000,000 first mortgage 6 per cent gold bonds, Nos. 1 to 2,000 inclusive.

Northern Pacific.—From Philadelphia it is reported that

Northern Pacific.—From Philadelphia it is reported that Northern Pacific dividend scrip issued to preferred stock will be funded in a 6 per cent 5-20 debenture, interest semi-annual, first coupon payable July 1. If another mortgage shall hereafter be made on the property these debentures are to be included. The large holders in New York, Boston and Philadelphia have agreed to accept the new obligation.

Oregon Improvement Co.—The gross and net earnings for April, and from Dec. 1 to April 30, were as below:

—Dec. 1 to April 30.— 1886-7. 1885-6. \$1,841,247 \$1,401,738 1,227,628 989,762 1886. \$198,241 169,587 \$28.654 \$613,619 \$411.976

Oregon Pacific.—It is stated that a syndicate composed of Rowland G. Hazard. Samuel S. Sands, A. S. Barnes, T. Egenton Hogg, S. V. White, George S. Brown, of Alexander Brown's Son, of Baltimore, F. W. Rhinelander, and others. have subscribed for the unissued 6 per cent first mortgage gold bonds of the Oregon Pacific Railroad. The syndicate's purpose is to complete the road from its starting point at Yaquina Harbor, Oregon, to its eastern terminus at Boise City, Idaho.

Oregon Railway & Navigation.—The following is a statement of the gross and net earnings of this road:

7 April. 7 July 1 to April 30. 1887. 1886. 1887. 1886. 1887. 1886. 253,780 228,916 2,484,532 2,490,375

Net earnings........\$183,768 \$179,057 \$1,939,557 \$2,094,036

Philadelphia & Reading.—At Philadelphia, June 7, the petition of the receivers asking authority to make arrangements with the reorganization trustees, so that moneys in the hands of the trustees may be applied to taking up \$2,000,000 of six per cent and \$834,671 of four per cent outstanding receiver's certificates, was approved by Judge Butler in the United States Circuit Court. The \$2,000,000 receivers' certificates were issued under the order of the Court of June 17, 1884, and the four per cents were authorized to be issued for materials and supplies after April 1, of the same year.

Upon petition of the Philadelphia & Reading RR. Company, the Coal & Iron Company, and the receivers, the United States Circuit Court recently gave permission that arrangements be made to provide for the payment of reorganization plan assessments on such of the company's securities as are pledged to secure the floating debt. The petition set out that many creditors who have deposited pledged securities under the reorganization plan are willing to pay the assessments on them, providing the amounts so advanced are added from time to time to their Railroad and Coal & Iron company notes when renewals are made. By doing this it was stated the sacrifice of the pledged securities could be averted. A schedule annexed to the petition showed the securities out as collateral for floating debt on May 28, compared with the same on February 28, 1886, fifteen months previous, as follows:

Feb. 28, 1886, **May 28, 1887, **Decrease.

Pittsburg & Western.—At Pittsburg, June 8, a number of capitalists were present at the sale of this road. The first bid made was for \$756,000 by Charles H. Coster of New York, representing Drexel, Morgan & Co and the reorganization committee of the Pittsburg & Western stockholders. No other bid was received, and the Pittsburg Bradford & Buffalo Railroad, one of the former company's leased lines, was next put up, bringing a bid for \$144,000. The total bids so far

amounted to \$900,000, and as the commissioner had announced that he would not make a sale under \$1,000,000, the two properties were put up together and Mr. Coster bid \$1,000,000, For this sum the property was knocked down to the reorganization committee, composed of John Lowber Welsh, John R. Terry, Thomas H. Coster and Anthony J. Thomas of New York and Philadelphia.

Richmond & West Point Terminal.—The executive committee of the Richmond Terminal Company decided to recommend that the directors declare a semi-annual dividend of 2½ per cent, payable July 1. The directors will declare the dividend, and the stock books will be closed from June 22 to July 5. The committee appointed General E. B. Thomas to be general manager of the Mobile & Birmingham division of the system. Contracts were let for building the line from Briarsfield, on the East Tennessee Virginia & Georgia road, to a point on the Georgia Central near Birmingham.

Rome Watertown & Ogdensburg.—Following is the statement of earnings and expenses for April and the seven months ending April 30, 1886 and 1887, including Utica & Black River in both years:

Gross earnings $\frac{1}{1887}$, \$237,290 \$2 Operating expenses ... $\frac{144,408}{1}$ \$82.171 \$717,766 \$626,575

St. Louis Alton & Terre Haute.-At the annual meeting St. Louis Alton & Terre Haute.—At the annual meeting of the St. Louis Alton & Terre Haute the stockholders ratified the lease of the St. Louis & Southern and guaranteed the interest on their first mortgage bonds, and also authorized a lease of the Chicago St. Louis & Paducah, which has recently received a vote of \$100,000 4½ per cent bonds from the city of Paducah to aid in building its line from Marion, the terminus of the St. Louis & Southern to Paducah. Contracts are already let on a portion of the road, and construction will be pushed as rapidly as possible. It will give a through route from St. Louis to Paducah.

St. Louis & Western.—This road, which is the old Laclede & Fort Scott, has been sold under foreclosure for \$30,000. It is understood that the road was bought in the interest of the St. Louis & San Francisco.

Sault Ste. Marie Bridge Co.—The sale is reported of \$900, 000 of the first mortgage 5 per cent 50-year bonds of this company, at par and interest. The bonds are guaranteed, principal and interest, by the Canadian Pacific, Duluth South Shore & Atlantic and Minneapolis Sault Ste. Marie & Atlantic Railroad Companies, who hold jointly the stock.

Schuylkill Navigation Company, Philadelphia & Reading.

—The Reading reorganization trustees had before them on the 4th inst. the offer formulated some time ago for the Schuylkill Navigation security holders, and which was rejected last week by the directors of that company. The trustees decided to present the offer at once to the individual holders. The offer is that for the \$1,700,000 of Schuylkill Navigation first mortgage bonds and \$2,817,000 of various other loans, Reading junior securities should be given, the percentage at which the Schuylkill Navigation securities should be valued at varying according to the order of priority.

Western Union Telegraph.—From the quarterly statement just issued it appears that the actual net income for the quarter ending March 31 was \$37,593 better than the estimate. For the current quarter ending June 30 the following statement compares the estimate with the actual of the corresponding quarter of 1886:

Actual	1, 1886.	Estimated, 1887.
Quarter ending June 30— Net revenue	\$903,881	\$1,050,000
Deduct	*103,616-	\$123,500 20,000 143,500
Net income Less dividend	\$800,265	\$906,500 812,000
Surplus for quarter	\$800,265 3,509,568	\$94,500 6,815,932
Surplus for June 30	\$4,309,833	\$6,910,432

*\$40,000 deducted, being returned from sinking fund.

The Tribune money article remarks: The end of the current quarter closes the company's fiscal year; so by to-day's statement we are able to present the results of the company's business—subject only to corrections in the returns for the present quarter—for the year compared with that of the preceding year. The result shows 4 1-16 per cent earned upon the stock, and that with rates for telegraphing lower than they ever were before and so low that neither the Western Union nor any of its competitors seems inclined to go any lower. Out of the last year's business the only dividend declared has been the one declared to-day, so that the company's nominal surplus has grown from \$4,309,833 on June 30, 1886, to an estimate of \$6,900,433 for June 30, 1887. The subjoined table compares the results for two years all the figures except those for the current quarter being the corrected ones: The Tribune money article remarks: The end of the current

Years ending June 30— Net revenue	1886. \$3,919,856 534,452	1887. \$3,949,816 573,910

ST. PAUL & DULUTH RAILROAD.

CIRCULAR TO STOCKHOLDERS.

PHILADELPHIA, June 7th, 1887.

To the Stockholders of the Saint Paul & Duluth Railroad Com pany:

Having for several years been entrusted with the proxies of both common and preferred stockholders of the Company, representing a large majority of the whole number of votes, and feeling that I had done nothing to forfeit the confidence thus reposed in me, I ventured on May 12th to again request the proxies of stockholders not intending to be present or otherwise represented at the Annual Meeting at Saint Paul on the 20th instant, and I beg to thank the large number of stockholders who have already favored me with their proxies, as well as those who may still be intending to do so.

ers not intending to be present or otherwise represent at the Annual Meeting at Saint Paul on the 20th Instant, and I beg to thank the large number of stockholders who have already favored me with their proxies, as well as those who may still be intending to do so.

The efforts of the management to advance the interests of the Company have heretofore been so successful and the stockholders have shown so high edgree of appreciation of them, that opposition to the heart of the directors and to measures of policy produced them to be a simple stockholders and the stockholders to the fact that the directors have pursued a policy of bringing the property to the highest state of efficiency and productiveness possible with the means at their command by applying the surplus income, after the payment of dividends due the preferred stockholders, to the improvement of the line, and in additions to its equipment, by which its earnings have been largely increased in spite of reduced rates and competition successfully met. The opposition has been fostered by the publication of anonymouse conventions in newspapers and pamphets during the convention of the preferred stockholders and the stockholders to believe that their interests are in maintage with the stockholders to believe that their interests are in maintage with the stockholders of the stockholders, and they were so regarded by the great body of common and preferred stockholders, to whom they had been previously submitted by the maintage of the stockholders, to whom they had been previously submitted, and who almost unanimously assented to them through their proxies. A small number of stockholders, representing but a mere fraction of the total vote at the meeting, objected to the adoption of the measures; and there being some question as to their legal adoption upon less than an unanimous vote, they were postponed until the n

bonds. But if the money cannot be raised, in this way as needed, then recourse is to be had to the mortgage bonds of the parent or terminal Company as may be found most expedient, those of the terminal Company to be used rather than those of the parent Company. It was supposed that the stockholders generally would understand the propositions and their object sufficiently without this explanation, and I believe from the manner in which they have sent me their proxies assenting, with but few exceptions, to all four of the propositions, that they do understand them as here stated, and their confidence as well as that of the investing public, in the directors, and in their ability to successfully carry out the object of the propositions, was shown immediately after their announcement in the advance of the common stock from sixty-five to ninety, an advance as flattering to the directors as its rapidity was unexpected.

It was at once seen that the object of the directors was to open the way to the payment of dividends to the common stockholders, and that, with the constantly-increasing business of the Company, a six per cent dividend upon the common stock for the fiscal year beginning July 1st simply depended upon the ability of the directors to raise the money for improvements from time to time as required in some one or more of the ways proposed, without having recourse to the income from the operation of the railroad, as heretofore. So easy of accomplishment did this seem, that the advance of the common stock might well have continued until it reached par and given assurance of the success of the plan without the issue of a bond or increasing the fixed charges a dollar. But just here a disturbing element appeared in the form of an impracticable plan, issued without any previous consultation with the Board of Directors. The plan is addressed to preferred stockholders only, and appears under the date of May 31st, over the names of two firms of bankers and brokers of New York, who request proxies to enable them to c

noncers only, and appears under the date of May 31st, over the names of two firms of bankers and brokers of New York, who request proxies to enable them to carry it out. The plan is finger that the standard of the preferred and one-half of the common stock, and a very slight examination of its provisions will, I feel sure, satisfy most stockholders that this assent from nearly twelve hundred comparatively small stockholders in this country and Europe could never be obtained. I have already had interviews with, and received letters and telegrams from, enough stockholders to satisfy me of this. It is, therefore, difficult to understand how the projectors of this scheme, issued at a late hour, without notice to or consultation with the Board of Directors chosen by the stockholders, could expect it to succeed. What inducement is there in it for preferred stockholders to give up an assured seven per cent stock, having but a million dollars mortgage debt ahead of it, relinquish a large share in the control of the Company, and accept instead a five per cent bond and a small bonus in common stock, with no definite assurance of the market value of either or the amount of income they would together yield?

The plan contains no proposition whatever for providing the means for continuing the improvements and additions deemed so essential and necessary by the Board of Directors, and for which they desire the two million dollars. The probability of redemption of the preferred stock "in the very near future" is the chief motive relied upon to induce preferred stock in the scheme. It is true the "Plan of Sale, Purchase, and Reorganization" does provide for the purchase of preferred stock (presumably for retirement) from the income from lands and stumpage not required in paying the seven per cent dividends upon the preferred stock, but this seems to be inoperative under the laws vesting the Company with the lands, which expressly say that they shall be used for the construction, operation and equipment of the preferred stock it

or sold stock on the next day, and it does not show what stock they may own, control, or be interested in, standing in the names of their companies, firms, associates, employés, members of fam-

of their companies, firms, associates, employes, members of families or brokers.

One member of the Board, who has seen fit to carry but a few shares of stock in his own name has, at every Annual Meeting for several years, voted some eight thousand votes standing in the names of others, which stock he directly controlled. No one knows better the small reliance to be placed upon such disclosures of holdings of stock than the parties issuing the circular, and that they should have stooped to such means to help them to proxies shows the trifling claim they have upon the stockholders for them.

The directors of the Saint Paul & Duluth Railroad Company and their record of its management are too well known for them to be seriously affected by the insinuations conveyed in the circular, but if any stockholder has been tempted by it or through any lar, but if any stockholder has been tempted by it or through any misapprehension of the facts, to give to its projectors his proxy, I trust that he will at once revoke it by executing and forwarding to me at Saint Paul without delay the inclosed proxy. I hope that no stockholder who has heretofore failed to send me his proxy will longer delay doing so. If any stockholder who has already sent me a proxy in which he withheld his assent to any of the propositions that he may now feel disposed to favor, he will please execute and forward another proxy assenting to such proposition. It is desirable in every case that all of the propositions should be assented to, leaving the discretionary [power as to their use with the Board of Directors] the Board of Directors

Respectfully, WILLIAM H. RHAWN.

TOLEDO ST. LOUIS & KANSAS CITY RAILROAD CO.

APPLICATION TO THE NEW YORK STOCK EXCHANGE. The following is a copy of the application submitted to the New York Stock Exchange for the listing of \$2,000,000 of bonds which have just been placed on the Regular List:

bonds which have just been placed on the Regular List:

New York, February 21st, 1887.

The Toledo St. Louis & Kansas City Railroad Company was formed on the 12th of June, 1886, by the consolidation of the Toledo Dupont & Western Railway Company, of Ohio, the Bluffton Kokomo & Southwestern Railroad Company, of Indiana, and the Toledo Charleston & St. Louis Railroad Company, of Indiana and Illinois, respectively, were each organized according to law, to take title in their respective States to the railroad property theretofore known as the Toledo Delphos & Burlington Railroad Company, of Ohio and Indiana, and the Toledo Cincinnati & St. Louis Railroad Company, of Ohio, Indiana and Illinois, being in all a line of railroad of three feet gauge, in full operation, and extending from Toledo, Ohio, to East St. Louis, Illinois, a distance of about 450 miles. This railroad property was purchased December 30th, 1885, by Sylvester H. Kneeland, at foreclosure sale, under decrees of foreclosure, issuing out of the Circuit Court of the United States for the District of Indiana, and the Southern District of Illinois, and the Northern District of Ohio, Western Division, respectively, and was purchased in behalf of first mortgage bondholders of the companies heretofore owning said property, subscribers to a deed of trust, known as of April 9th, 1884.

The purchaser at foreclosure sale and associates proceeded under the laws of Ohio, Line and associates proceeded

The purchaser at foreclosure sale and associates proceeded under the laws of Ohio, Indiana and Illinois to organize in the respective States corporations for the purpose of owning and managing said property and uniting the same by consolidation, to the end that all the said line of railway and property from the City of Toledo, O., to East St. Louis, Ill., might belong to and be operated by one corporation. Such proceedings were afterwards had, resulting in the consolidation of these corporations, and in the formation, on the 12th day of June, 1886, of the present company.

The company herewith submits certificates of counsel as to the entire regularity and legality of the foreclosure sale, reorganization, and all other proceedings hereinbefore mentioned.

	50 35
Total miles single track. The main line is at present laid with iron and steel rails, a follows:	es as

The entire work of reconstruction was contracted for early The entire work of reconstruction was contracted for early last year, and the contractors, in turn, made contracts, before the advance in price, for enough steel rails (61½ lbs.) and fastenings, deliverable monthly, to fill the entire contract during the current year, and to lay the entire line with heavy steel during that period. Work is now being, and has been since last summer, vigorously prosecuted for the purpose of widening the gauge of the entire line broadening all embankments and cuts, strengthening and rebuilding all bridges, constructing all necessary additional stations, water-tanks, repair and machine-shops and sidings, so that the line reaching from Toledo to East St. Louis shall be in all respects a first-class road of standard gauge. While this work is being pushed, it necessarily dominates everything else, requiring the use of a large portion of the general equipment for construction, and not only rendering the transaction of the ordinary business of the road difficult, but reducing gross and net earnings to a minimum. This will soon change as to a great part of the line, it being expected that the work of widening the gauge of the Toledo Division (extending from Toledo to Frankfort, Ind., a distance of 207 miles), will be completed in a few months, the work as to the St. Louis Division being vigorously prosecuted at the same time. [The change to standard gauge on the Toledo Division will be completed before July 1, 1887.]

The following is a full statement of the stock and bonds issued by the company on the line from Toledo to St. Louis, alof which have been issued and delivered by the company to the trustees acting for the parties in interest, the same having been issued in consideration of the conveyance of the said property to this company, the broadening of the gauge of its road, furnishing the same with motive power and rolling stock, discharging underlying liens, and for exchange with first mortgage bondholders of the foreclosed companies, holders of Metropolitan Trust Company receipts:

1st. \$11,250,000 Capital Stock, divided into 112,500 shares of \$100 each.

2d. \$5,805,000 of Preferred Stock, divided into 58,050 shares of \$100 each, entitled to dividends at the rate of 4 per cent recommends. ments and cuts, strengthening and rebuilding all bridges, con-

2d. \$5,805,000 of Preferred Stock, divided into 58,050 shares of \$100 each, entitled to dividends at the rate of 4 per cent per annum, not cumulative.

annum, not cumulative.
3d. \$9,000,000 of First Mortgage bonds, Nos. 1 to 9,000, both inclusive, dated June 19th, 1886, maturing June 1st, 1916, principal and interest payable in gold at the company's office in New York, and bearing interest from and after June 1st, 1886, at the rate of 6 per cent per annum, payable on the 1st days of December and June of each year, and evidenced by coupons maturing December 1st, 1886, and each subsequent June 1st and December 1st, until the maturity of said bonds. The said First Mortgage constitutes the first and entire lien on the property and franchises of this company, its real estate, The said First Mortgage constitutes the first and entire lien on the property and franchises of this company, its real estate, terminals and equipment, The bonds can be registered, if desired, on the books of the company, at its agency in the City of New York. This issue of bonds is secured by a Mortgage Deed of Trust made by this company to the American Loan & Trust Company of New York, and the Hon. Joseph E. McDonald, of Indianapolis, Ind., under date of June 19th, 1886, conveying to said Trustees all its line of railroad hereinbefore described, together with all property of every kind and description, both real and personal, belonging or appertaining thereto, which it now owns or may hereafter acquire.

LIABILITIES OF THE COMPANY. First Mortgage Bonds (not in hands of Trustees). \$2,000,000

The Commercial Limes.

COMMERCIAL EPITOME.

FRIDAY NIGHT, June 10, 1887.

The week is notable for the decline which has taken place in speculative values, and especially of such leading staples of agriculture as cotton, wheat and coffee, which had been forced up by combinations whose ramifications embraced operators in both continents; at the reduced prices they are still much dearer than a year ago. The weather has continued generally favorable to crop prospects, but the period has arrived when active trade for the season usually comes to an end. Great confidence is felt that the mercantile affairs of the country for the coming autumn and winter will prove active and remunerative, and preparations are consequently in progress for a large and general business.

The speculation in lard futures has been fairly active, rising at times into briskness, and prices have improved, though not without frequent fluctuations. To day there was a slight further improvement. Lard on the spot has been rather firmer, but is to-day quiet at 6.65c. for prime city, 6.971/2@ 7.021/2c. for prime to choice Western, 7.20c. for refined to the Continent and 7.60c. for refined to South America.

DAILY CLOSING PRICES OF LARD FUTURES.

Saturd'y. Mond'y. Tuesd'y. Wedns'y. Thursd'y. Friday 6.96 7.06 7.16 7.23 7.12 7.05 7.15 7.25 7.33 7.22 6:94 7:04 7:14 7:20 7:10 7·02 7·12 7·20 7·27 7·15 7·03 7·13 7·22 7·29 7·19 July deliv'y .. 7.05 August " .. 7.14 Bept " .. 7.25 October " .. 7.32 Nove'b r " .. 7.22

Pork has continued inactive and nearly nominal; old mess \$1475;new do,\$1575;prime \$14@\$14 50 and clear \$1650@\$1750. Cutmeats have been quiet; pickled bellies, 71/8@71/2c.; shoulders, 65/8 @63/4c. and hams 11@111/4c.; smoked shoulders, 73/4c. and hams 121/4@121/2c. Beef remains nearly nominal. Beef hams in fair demand at \$21 50@\$22 per bbl. Tallow steady at 33/4c. Stearine has been steady at 81/4c., with oleomargarine lower at 6%c. Butter is steadier at 16@19%c. for creamery and 14@181/2 for State dairy. Cheese has been fairly active and steady at 9@10c. for State factory full cream. The swine slaughtered at the principal Western towns, March 1 to June 8, numbered 2.185,000, against 2,010,000 for the corresponding period last year.

The following is a comparative summary of aggregate

1 to June 8, numbered 2.185,000, against 2,010,000 for the corresponding period last year.

The following is a comparative summary of aggregate exports from November 1 to June 4:

1886-7. 1885-6.

Pork, 1bs. 26.565,200 27,048,000 Dec. 4°2.800 Bacon, &c., 1bs. 281,635,906 296,068,017 Dec. 14,432,111 Lard, 1bs. 194,479,499 182,806,661 Inc. 11,672,833

The speculation in Rio coffee was active at buoyant prices early in the week, but has wholly collapsed in the past three or four days, during which the decline is about 2@2½c. per 1b., the market being greatly depressed to-day, closing with sellers at 19@19-65c.for the early and 19-65@19-80c. for the late months. Coffee on the spot is also lower, and the sales to-day embraced No. 4 Rio at 21@21½c. Raw sugars are easier at 4.7-16c. for fair refining Cuba and 5.3-16c. for 96 deg. test centrifugal, with sales to-day of 2,380 hhds. English islands, 88 deg. test, at 4½c. Molasses easier at 20½c. for 50 deg test. Teas are steadier for Oolongs, but old crop Japans are more freely offered.

Kentucky tobacco during the past week has been a little more active, with sales of some 300 hhds., of which 200 hhds. for export. Prices are firmer, and for leaf ½c. per 1b. higher. The prospects of the growing crop are fine, but from best sources it is asserted that not more than 75 per cent of an average crop will be planted and higher prices are looked for. Seed leaf has been quieter, the recent rains having greatly improved the prospects for the growing crop. Sales for the week are 1,050 cases, including 300 cases 1885 crop, New England Havana seed, 10@15c.; 200 cases 1885 crop, Pennsylvania Havana, 10@20c.; 150 cas s 1884-5 crop, Dutch, 9@13c., and 100 cases 1885 crop, Wis on-in Havana, private terms; also 350 bales Havana, 60c. % 105, and 125 bales Sumatra, \$1.20@\$1.50.

Spirits turpentine has been in good demand but closes quiet at 35@53½c. Rosins met with a moderate inquiry and are steady at \$1.25c.130 for common to good strained. Tar is unchanged at \$2 per bbl. Crude certificate

18@23c. for good to choice. Wool has a free sale of the flew clip at full prices.
On the Metal Exchange little of interest has occurred. To-day tin dull but steady at 22.85@23.10c. spot and 2234@22.90c. futures. Copper quiet and a shade easier at 9.90@9.95c. up to 10½@10.30. Lead steady at 4.65@4½c., July sold at 4.67½c. Spetter dull at 4½@4.57½c. Ocean freights have been oull; grain shipments are much reduced and to-day 1½d. was the rate to Liverpool.

COTTON.

FRIDAY, P. M., June 10, 1887,

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (June 10), the total receipts have reached 4,032 bales, against 7,599 bales last week, 9,765 bales the previous week and 10,626 bales three weeks since; making the total receipts since the 1st of September, 1886, 5,179,919 bales, against 5,207,949 bales for the same period of 1885-86, showing a decrease since September 1, 1886, of 28,030 bales.

The speculation in cotton for future delivery at this marke has been fairly active for the week under review, but the course of prices, besides being extemely variable, developed early in the week much irregularity as between this and the next crop, with a very unsettled feeling. Liverpool accounts were much better on Saturday and Monday, but they met with little response here, having in a great measure been "discounted," and the project of short-time in Lancashire, with very favorable reports from the growing crop, was a depressing influence. On Tuesday morning a general and material decline took place, but a quick advance followed the short-time movement abroad was not likely to be adopted. There was also some buying for Southern account. On Wednesday there was free selling of July and August options at a decline, with an equally free buying of September and October, operators expressing the belief that the difference of nearly a cent a pound between August and October was too great; and the distant monhs attracted more attention. Yesterday a sharp decline at Liverpool and the Chronicus's acreage report caused much depression. To-day there was great speculative excitement and wide fluctuations, the effect of a fierce contest between the bulls and bears, in which the former had the advantage at the close. Cotton on the spot was quiet and unchanged, until Wednesday, when 2,000 bales were reported for Russia, but quotations were reduced ½c. To-day the market was steady at 11 5-16c. for middling uplands, with 2,000 bales more taken for Russia, making 7,000 bales in all. Deliveries on June contracts have been quite liberal throughout the week.

The total sales for forward delivery for the week are 700,500

throughout the week.

The total sales for forward delivery for the week are 700,500 bales. For immediate delivery the total sales foot up this week 8,612 bales, including 7,017 for export, 1,595 for consumption,—for speculation and—in transit. Of the above,—bales were to arrive. The following are the official quotations for each day of the past week.

We have included in the above table, and shall continue each week to give, the average price of futures each day for each month. It will be found under each day following the abbreviation "Aver." The average for each month for the week is also given at bottom of table. Transferable Orders—Saturday, 11:40c.; Monday, 11:35c.; Tuesday, 11:35c.; Tuesday, 11:35c.; Tursday, 11:10c.; Friday, 11:25c.

The following exchanges have been made during the week:

15 pd. to exch. 100 Nov. for Mar.

30 pd. to exch. 1,500 Sept. for Aug.

01 pd. to exch. 300 July for Aug.

02 pd. to exch. 500 Nov. for Jan.

104 pd. to exch. 800 July for Aug.

204 pd. to exch. 800 July for Aug.

Even 500 Oct. for Apr.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as

the

those for Great Britain and the afloat, are this week's returns those for Great Britain and the anoat, are this work and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (June 10), we add the item of exports from the United States, including in it the exports of Friday only.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week Receipts at the Ports		Ports.	St'k at Interior Towns.			Rec'pts from Plant'ns			
Ending-	1885.	1886.	1887.	1885.	1886.	1887.	1885.	1886.	1887.
Мау в	8.633	39,150	13,077	81,928	221,127	86,506	2,228	18,164	2,602
" 13	9,413	34.754	12,686	70,945	200,056	72,510		13,683	
* 20	7,429	29,447	10,626	64,235	174,496	64,868	760	3,887	2,984
" 27	6,964	22,790	9,765	57,807	156,692	58,588	486	4,986	3,485
June 3	3,917	19,837	7,599	51,941	139,841	53,833	*****	2,986	2,844
" 10	4,729	22,778	4,032	47,701	118,907	51,659	489	1,839	1,858

The above statement shows-1. That the total receipts from the plantations since September 1, 1886, are 5,183,518 bales; in 1885-86 were 5,311,006 bales; in 1884-85 were 4,740,493 bales.

2. That, although the receipts at the outports the past week were 4,032 bales, the actual movement from plantations was only 1,858 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 1,839 bales and for 1885 they were 489 bales.

AMOUNT OF COTTON IN SIGHT JUNE 10.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to June 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1886-87.	1885-86.	1884-85.	1883-84.
Receipts at the ports to June 10	5,179,919	5,207,949	4,710,007	4,772,655
Interior stocks on June 10 in excess of September 1	3,599	103,057	30,486	1,199
Tot. receipts from planta'tns Net overland to June 1 Southern consumpt'n to June 1	771,792	807,051	596,331	
Total in sight June 10	6,311,310	6,408,057	5,588,824	5,615,954
Northern spinners' takings to June 10	1,524,306	1,680,584	1,297,143	1,473,387

It will be seen by the above that the decrease in amount in sight to-night, as compared with last year, is 86,747 bales, the increase as compared with 1884-85 is 722,486 bales and the increase over 1883-84 is 695,356 bales.

as compared with 1832-85 bales.

WEATHER REPORTS BY TELEGRAPH.—There has been a continuation of favorable conditions at the South during the week, and the crop is making excellent progress.

Halveston, Texas.—It has rained on two days of the week, the rainfall reaching twenty-four hundredths of an inch. Average thermometer 80, highest 86, lowest 68.

Palestine, Texas.—There has been heavy rain on three days of the week, the rainfall reaching one inch and forty-four hundredths. Corn crop is assured and the best for four years. Cotton is doing well, but at some points is badly in the grass. A few days of dry weather will give planters a prospect of the best yield for five years. The thermometer has averaged 76, the highest being 90 and the lowest 61.

Huntsville, Texas.—Prospects are good. Rain has fallen on five days of the week to the depth of one inch and forty-nine hundredths. The thermometer has averaged 81, ranging from 67 to 95

from 67 to 95

Dallas, Texas.—It has rained on two days of the week, the rainfall reaching one inch and ten hundredths. First new wheat has been marketed. It weighs sixty-one pounds to the bushel and the crop averages fifteen bushels per acre. Cotton progresses favorably. The thermometer has ranged from 64

to 95, averaging 81.

Austin. Texas.—Crop prospects are bright. It has rained on three days of the week, the rainfall reaching seventy-seven hundredths of an inch. Average thermometer 82, highest 94

and lowest 71.

Luling, Texas.—Crops promise a good yi-ld. R in has fallen on three days of the week, the rainfall r-aching two inches and thirty-three hundredths. The thermometer has averaged 83, the highest being 94 and the lowest 73.

Columbia, Texas.—There has been one very beneficial shower during the week, the rainfall reaching thirty-two hundredths of an inch. The thermometer has averaged 80, ranging from 70 to 90.

ranging from 70 to 90.

Cuero, Texas.—Prospects are excellent. It has rained on two days of the week, the rainfall reaching eighty-two hundredths of an inch. The thermometer has ranged from 72 to 95, averaging 83.

Brenham, Texas.—Crop prospects are magnificent. Rein has fallen on four days of the week, to the depth of sixty hundredths of an inch. Average thermometer 82, highest 92 and lowest 69.

hundredths of an inch. Average thermometer 82, highest 82 and lowest 69.

Belton, Texas.—We have had fine rains on five days of the week, the rainfall reaching eighty-eight hondredths of an inch. A good corn crop is assured. Cotton is later than usual, but a good stand has been obtained and the plant is in excellent condition. The thermometor has averaged 81, the highest being 94 and the lowest 68.

Weatherford, Texas.—It has rained on four days of the week the rainfall reaching two inches and thirty-two hundredths. Cotton and corn are doing well, being greatly benefitted by the rain. The thermometer has averaged 77, ranging from 58 to 97.

New Orleans, Louisiana.—It has rained on two days of the week, the rainfall reaching sixty-four hundredths of an inch. The thermometer has averaged 81.

Shreveport, Louisiana.—Rainfall for the week one inch and

ninety-one hundredths. Average thermometer 77, highest 96, lowest 66.

ninety-one hundredths. Average thermometer 11, highest 99, lowest 66.

Columbus, Mississippi.—The crop is doing finely, the first cotton bloom being reported on Monday. There have been showers locally on five days of the week, the rainfall reaching one inch and six hundredths. The thermometer has averaged 77, the highest being 90 and the lowest 62.

Leland, Mississippi.—It has rained on four days of the week, the rainfall reaching one inch and fifty-two hundredths. The thermometer has averaged 77, ranging from 64 to 89.

Greenville, Mississippi.—Crop pro pects are good. The thermometer has ranged from 65 to 93, and the rainfall reached one inch and fifty-eight hundredths.

Meridian, Mississippi.—Telegram not received.

Clarksdale, Mississippi.—Telegram not received.

Vicksburg, Mississippi.—Telegram not received of the week, the rainfall reaching forty hundredths of an inch. The thermometer has averaged 81, ranging from 65 to 96.

Gloster, Mississippi—There has been rain on two days of the week, the rainfall reaching one inch and sixty-one hundredths. The thermometer has ranged from 68 to 98, averaging 86. dredths.
aging 86.
Helena,

aging 86.

Helena, Arkansas.—There have been light showers on six days of the week, the rainfall reaching forty-five hundredths of an inch. We are having too much rain, although at a few points there are still complaints of drought. Crops generally reported good, but somewhat grassy. Labor is doing well. The thermometer has averaged 78, the highest being 90 and the lowest 66. the lowest 66.

Memphis, Tennessee.—It has been showery on four days of the week, the rainfall reaching twenty-two hundredths of an inch. Rains have been unequally distributed; in some sections there has been too much and in others not enough. First bloom received this (Friday) afternoon from Sharkey County, Mississippi. The thermometer has averaged 78, ranging from 66 to 02.5 66 to 92.5

Mobile, Tennessee.—Telegram not received.

Mobile, Alabama.—It has been showery on two day of the week, the rainfall reaching seventeen hundredths of an inch. The crop is developing promisingly. Averaging thermometer 77, highest 91 and lowest 64.

Montgomery, Alabama.—Crops are splendid. The cotton outlook was never better. It has rained on one day of the week, the rainfall reaching one inch and eventy-two hundredths. The thermometer has averaged 81, the highest being 95 and the the lowest 69.

Selma, Alabama—We have had rain on two days of the week, the rainfall reaching ten hundredths of an inch. The

Selma, Alabama—We have had rain on two days of the week, the rain all reaching ten hundredths of an inch. The thermometer has averaged 79, ranging from 68 to 88.

Auburn, Alabama.—Crops are fine. There have been showers on two days of the week, the rainfall reaching twenty-three hundredths of an inch. The thermometer has ranged from 67 to 92, averaging 79.7.

Madison, Florida.—It has rained on one day of the week, the rainfall reaching eighty one hundredths of an inch. Crops

from 67 to 92, averaging 79 7.

Madison, Florida.—1: has rained on one day of the week, the rainfall reaching eighty-one hundredths of an inch. Crop condition good. Average thermometer 77, highest 91, lowest 64.

Macon, Georgia.—Crop accounts are generally favorable. It has rained on one day of the week.

Columbus, Georgia.—There has been no rain all the week. The their mometer has averaged 85, the highest being 95 and the lowest 75.

the lowest 75

Savannah, Georgia.—We have had rain on two days and the remainder of the week has been pleasant and warm. The rainfall reached forty two hundredths of an inch. The ther-

rainfall reached forty-two hundredths of an inch. The thermometer has averaged 79, ranging from 68 to 97.

Augusta, Georgia.—The weather has been warm and dry during the week with light rain on one day to the extent of twelve hundred hs of an inch. There are some complains of absence of rain, but generally accounts are good and the crop is developing finely. The thermometer has ranged from 66 to 99, averaging 82.

Atlanta Georgia

Attanta, Georg a.—The weather has been very hot and good for growth. Rain has fallen on one day of the week to the depth of ninety-one hundredths of an inch. Average thermometer 78 4, highest 90 and lowest 65.

Albany, Georgia.—Crops continue fine. There has been rain on three days of the week, to the depth of forty-two hundredths of an inch. The thermometer has averaged 80,

hundredths of an inch. The thermometer has averaged 80, the highest being 95 and the lowest 66.

Charleston, South Carolina.—We have had rain on four days of the week, the rainfall reaching one inch and twenty-seven hundredths. The thermometer has averaged 79, ranging from 66 to 98 ing from 66 to 93.

ing from 66 to 93.

Stateburg, South Carolina.—Rain fell on Thursday to the depth of fitty-one hundredths of an inch, but the remainder of the week has been clear, warm and very favorable. The thermometer has ranged from 61 to 90, averaging 77'-1.

Wilson, North Carolina.—It has rained on one day of the week, the rainfall reaching eighty-seven hundredths of an inch. Average thermometer 80, highest 94 and lowest 65.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 30'clock June 9, 1887, and June 10, 1886.

	June	9, '87.	June 10, '86		
New Orleans Above low-water mark. Memphis Above low-water mark. Nashville Above low-water mark. Shreveport Above low-water mark. Vick-burg Above low-water mark.	7 12 9	Inch. 5 8 5 9 2	Feet. 14 17 9 2 35	Inch. 2 4 2 4 9	

and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to June 9.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

	Shipme	ents thi	s week.	Shipm	ents Since	Receipts.		
	Great Brit'n.		Total.	Great Britain	Conti- nent.	Total.	This Week.	Year.
1886	9,000	47,000 36,000	68,000 45,000	269,000 188,000	590,006 563,000 432,000 552,000	832,000 620,000	43,000	1,320,000 1,222,000 904,000 1,424,000

According to the foregoing, Bombay appears to snow an increase compared with last year in the week's receipts of 4,000 bales, and a decrease in shipments of 29,000 bales, and the shipments since Jan. 1 show an increase of 71,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two rears, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e week.	Shipments since January 1.				
	Great Britain.	Conti- nent.	Total.	Great Britain.	Continent.	Total.		
Calcutta— 1887 1886 Madras—	6,000	1,000	6,000 2,000	86,000 45,000	101,000 26,000	187,000		
1×87 1886 All others—				4,000 3,000	2,000	6,000		
1887	4,000		4,000	19,000 23,000	15,000 13,000	34,000 36,000		
Total all— 1887 1886	10,000	1,000	10,000 2,000	109,000 71,000	118,000 89,000	227,000 110,000		

The above totals for the week show that the movement from the norts other than Bombay is 8,000 bales more than the same week last year. For the whole of India, therefore, the total shipments since January 1, 1887, and for the corresponding periods of the two previous years, are as follows:

EXPORTS TO EUROPE FROM ALL INDIA.

Shipments	18	887.	18	86.	1885.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of he movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, June 8.	1886-87.	1885-86.	1884-85.		
Receipts (cantars*)— This week Since Sept. 1	2,859,000	1,000	1,000 3,595,000		
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since week. Sept. 1.		
Exports (bales)— To Liverpool To Continent.	1,000 252,000 1,000 149,000	2,000 227,000 2,000 168,000	1,000 298,000 4,000 193,000		
Total Europe	2,000 401,000	4,000 395,000	5,000 491,000		

This statement shows that the receipts for the week ending June 8 were — cantars, and the shipments to all Europe 2,000 bales.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market is steady for both yarns and shirtings, and that production is being curtailed slowly. We give the prices for to-day below, and leave those for previous weeks of this and last year for comparison

Comparative Port Receipts and Daily Crop Movement —A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement since September 1, 1886, and in previous years, has been as follows.

Monthly		Year	Beginnin	g Septembe	r 1.	-
Receipts.	1886.	1885.	1884	1883.	1882.	1881.

COTTON ACREAGE REPORT.—In our editorial columns will be found to-day our annual cotton acreage report, with an account at length of the condition of the plant in each section of the South, together with our rainfall and thermometer record.

NEW YORK COTTON EXCHANGE-ANNUAL ELECTION.-The annual election of officers and managers of the New York Cotton Exchange was held on Monday, June 6. The follow ing were the successful candidates:

resident—Charles D. Miller. Vice-President, J. H. Parker-Treasurer—Walter T. Miller. Managers—T. M. Foote, M. H. Lehman, C. W. Ide, S. T. Hubbard, Jr., T. Scott, W. F. Sorey, J. O. Bloss, Wm. V. King, J. H. Hollis, R. P. Slater, T. P. Ralli, G. A. Chapman, Wm. Mohr, B. S. Clark and Harry Allen. Trustee of Gratuity Fund—Emanuel Lehman. Inspectors of Election—J. B. Guest and A. G. Munn, Jr.

AGRICULTURAL DEPARTMENT'S REPORT ON ACREAGE.-Th Agricultural Department at Washington issued on the 10th inst. its report on cotton condition and acreage. The follow ing is what it says on the subject of acreage:

In the acreage of cotton an increase of 1 per cent is reported. Ther appears to be a slight decline in the States of the Atlantic coast and an increase west of the Mississippi. The State averages are: Virginia, 90 North Carolina 99.5, South Carolina 98, Georgia 98.5, Florida 97, Alabama 100, Mississippi, 100-4, Louisiana 102, Texas 106, Arkansas 102-5 Tennessee 100.

The following is the report of the Department on condition Condition of cotton is higher than in any June since 1880, averaging 96.9, and has only been exceeded three times since 1870. The besyleid in that period, however, was in 1882, when June condition was 9, a figure that has been discounted six times since 1870. It is a good beginning, but does not insure a good crop. The State averages are, Virginia 99, North Carolina 99, South Carolina 98, Georgia 99, Florida 99 Alabama 99, Mississippi 99, Louisiana 97, Texas 91, Arkansas 98, Tennessee 97, general average 96.9. There is generally an unusually good "stand" or "plant." In Texas the early planted did not come up well ate planting is better. There is not a full plant in some fields in Arkansas. Clean cultivation is reported as a rule, and a healthy color amogod growth. The following is the report of the Department on condition

The above statement of condition, compared with the reports for previous years, is as follows:

AGRICULTURAL DEPARTMENT'S JUNE CONDITION REPORTS.

June Condition.	1887.	1886.	1885.	1884.	1883.	1882.	1881.	1880.	1879.	1878.

Average.	96.9	88.7	92	87	86	89	93	99	96	99

The average given above for all the States is the average given by the Department.

JUTE BUTTS, BAGGING, &C.—Some business is reported f bagging in a small way but the market is not active. Pricare steady and sellers are generally asking 6@6¼c, for 1½ 16½@6¾c, for 1¾ 1b., 7@7¼c, for 2 lb. and 7½@7¾c, f standard grade, but some are asking a shade higher. A fa trade is being done in butts and sales are reported at 1 13-16 1½c, for paper grades and 2½@2¼c, for bagging quality.

WEATHER RECORD FOR MAY.—Below we give the rainfall and thermometer record for the month of May and previous months of this year and the two preceding years. The figures are from the records of the Signal Service Bureau, except at points where they have no station, and at those points they are from records kept by our own agents.

March.

EGYPTIAN COTTON CROP.—Our correspondent at Alexandria, writing under date of May 9, sends the following report of the General Produce Association of Alexandria, which we have translated and give below.

ALEXANDRIA GENERAL PRODUCE ASSOCIATION COTTON REPORT. The following is a $resum\acute{e}$ of the replies received to the inquiries of April 15, 1887.

April 15, 1887.

Béhéra.—The sowing of cotton took place at the usual time, that is to say, at the end of March and in the course of April. The seed have sprouted well, and with a very few exceptions replanting has been unnecessary. Water is generally sufficient, especially in the northern part of this province, where the land is lower, and has always been easily watered. The majority of our correspondents believe that the cotton culture this year occupies almost the same area as last year; two of them mention an increase of five to ten per cent; no one indicates any diminution. Most of the cotton sown 'in this province is Ashmounly, and only exceptionally are there any fields of white and Gallini cotton; however, both these kinds of cotton are pretty extensively planted in the villages on the banks of the Nile, where they sometimes occupy a third of the acreage. 3.79 3.23 1.88 1.65 3.18 4.05 5.47 in the vinages on the 10 4 8 8 1 10 8 13 third of the acreage.

Charkieh .- Plantings were made as a rule at a favorable time-from the end of February to the early days of * pril; no replanting has been necessary. The young plants have thus far been favored by a good necessary. The young plants have thus far been favored by a good temperature and everywhere present the finest appearance. Water is sufficient in some places and lacking in others; quite serious complaints are made on this subject in the Minet-el-Gamh district and in several other districts of the southern part of this province. The same area is other districts of the southern part of this province. The Same area is sown with cotton as in 1886—our correspondents are unanimous on this point; only one makes an exception and believes that more has been sown this year. The district of Minet-el-Gamb raises a certain amount of white cotton, the rest of the province prefers "Ashmouni" cotton this year, however, there has been a little more Bamiéh cotton planted

Dakahliéh .- Planting done in March and April, according to the cus tom of this province; character of the plants excellent and the growth

od. Very few complaints on the subject of water, which, it appears is sufficient. The majority of our correspondents do not say whether more or less cotton has been planted this year than was last, and those who say anything on the subject express different opinions, which leads us to believe that the cultivation of cotton has increased in some districts and diminished in others. This province is sown (nly with

Ashmouni cotton and a little Bamiéh cotton.

Galioubich.—The ordinary time of planting was forestalled by a few days this year, and, favored by a good temperature, the seed sprouted perfectly; the young plants are everywhere early and flourishing. Considerable fears are expressed in regard to the water supply; abundant in March, it very sensibly diminished in April; several villages may be completely deprived of it. This drought is attributed to the repairs of dams and other important works undertaken by the Government. It is hoped, however, that measures will promptly be taken to resupply the canals with water. We have cultivated with cotton this year almost the same amount of feddans as in 1986; however, one of our correspondents believes that some hundreds of feddans less have been planted, in consequence of lack of water. Almost the entire area Galioubieh .- The ordinary time of planting was forestalled by a few been planted, in consequence of lack of water. Almost the entire area is planted with Ashmouni cotton and a little Bamiéh cotton.

Garbieh .- Cotton was generally sown in this province at the custom-Garbiel.—Cotton was generally sown in this province at the custom-ary and regular time; however, some planters, influenced by the bad results of the early plantings last year, believed it necessary to delay fifteen or twenty days. Nothing has had to be replanted. Plants are of a good character, almost everywhere are well advanced, and present a fine appearance. The volume of water is less than in 1886; still, thus far all the region has been irrigated, which shows that the water is sufficient. The majority of our correspondents are of the opinion that their province has sown the same amount of cotton as last year; it appears, however, from three replies from Goddaba that there has been sown there from 10 to 15 per cent less; on the other hand, four letters from Chabas, Kafr-Zaiat, Mehallet-el-Kibira and Samanout indicate for these districts an increase of cultivation of 5 to 10 per cent. The principal production of this province is Ashmouni cotton, with the exception of the Eastern districts of which Ziftéh is the centre, which plant much white cotton, and Goddaba, Gallin, and others, which are given to the culture of Gallini; we believe, however, that both these kinds of cotton have slightly decreased this year, to the advantage of the Ashmouni; and it is reported at the same time that in general, and notably in the districts of Kafr-Zaiat and Mehallet-el-Kibira, there has been sown a larger proportion of Bamiéh cotton.

Ménoufiéh.-Good reports come from this province; plantings took place at the customary time; the young plants have grown vigorously and are everywhere in perfect condition. Water is sufficient, with the exception of the Menouf district, where it is lacking. According to our correspondents they are raising in this province as much cotton as in 1886, all Ashmouni and Bamién; the proportion to this latter may

have slightly diminished.

-Sowing was done earlier this year; the seeds have sprouted well and the plants are in good condition. Water is abundant, which permits, it is stated, a sensible increase of the cotton culture. There have been planted chiefly the varieties which are peculiar to this province and which, it is claimed, are the only ones which can give good results.

Upper Egypt .- We can say nothing at this time with regard to this district, as our reports have not been received.

General Observations .- We have little to add to the foregoing. The conclusions which one derives from these reports are the following: Plantings took place at the usual time; only in very few cases any earlier than usual in some places slightly later, in consequence of the hard lesson which the inclement weather of last year taught those who were wont to be in a hurry. The sprouting of the seed was excellent, and the growth oed, the condition of the plants now being vigorous. Supply of water has been sufficient, although the amount may be less than last year at the same time. Acreage is as great as in 1886; we hope to give the official figures in our next résumé. The proportions sown with our different kinds of cotton are about the same as last year with the exception of white and Gallini cotton which seem to have lost

ground a little, In short, there are almost no complaints.

This statement refers only to six provinces forming lower Egypt, and to Fayoum, excluding upper Egypt, intelligence from which has not

yet reached us.

P. S.-ALEXANDRIA, April 30, 1887 .- We have received news from Mansourah that a storm passed over that district on the first inst. Heavy rains and even hail fell in some localities which, in the opinion of some, may have injured the poor lands sown with cotton.

-From the Bombay Company's (limited) Cotton Report, dated May 6, we have the following:

Receipts now begin to show a falling off, compared with last year, being about 6,000 bales less for the fortnight. From the Comrawuttee districts alone 16,000 bales less have been received. It is but natural now to look for small arrivals

from these parts, as no doubt the great improvement in prices towards the end of March and in April caused supplies to be hurried to market as quickly as possible. Dholleras also have probably been influenced in the same way, but not to the same extent, as sellers up country are quite aware that local mills depend largely on the Dhollera crop for their monsoon requirements, and no matter how prices may tend during the season, a fair proportion of the crop is likely to be held over. The Dhollera crop itself, from latest information received, is not likely to be smaller than last year. In the south of Kattiawar the crop is smaller, but in the north, where, however, the cultivation of cotton is not so extensive as in the south, a crop 25 per cent larger than last year is now looked for, so that on the whole it is estimated the crop will be about the same as last year. Comptahs and Dharwars are arriving freely, and are already 23,000 bales ahead of last year, notwithstanding that these crops are small this season.

Taking into consideration the larger estimate of the Dhollera crop, and the fact that the crops generally have been influenced.

crop, and the fact that the crops generally have been influenced by the improvement in prices, an export of 950,000 bales for the six months ending 30th June is not now so improbable as

appeared likely a month back.

Shipping News.—The exports of cotton from the United States the past week, as per latest mail returns, have reached 9,386 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the Chronicle last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

BREADSTUFFS.

FRIDAY, P. M., June 10, 1887.

The market for wheat flour has been dull for the week under review, and prices have been depressed, so much so that some revision of quotations becomes necessary, especially in the low grades which are not so eagerly taken for export. Rye flour, on the contrary, is dearer and corn meal rules steady.

The wheat market opened the week with an exceptional show of strength on the spot and for June contracts, the effect of manipulation, in which the Western markets were leading; but the market has since been dull and weak. Foreign advices have been less favorable and the export demand materially curtailed thereby, while crop accounts improved and the sup plies of the old crop to be disposed of continued inconveniently large. It is believed that the Western bull party will make very heavy deliveries on July contracts, and regular buyers hold off in anticipation thereof. To-day there was a quiet but irregular market; parcels on the spot and for early delivery showed exceptional strength, but the later options were weak.

DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri
June delivery	9778	994	9918	9838	97%	9734

May, 1888, delivery	101	101	110034	110038	9912	994

Indian corn has been depressed and unsettled. There has been a fair export movement, but the offerings were sufficiently free in view of the large visible supply. The offerings are mainly No 9 mixed, received by canal, and prices of parcels on the spot are somewhat unsettled. To-day the spot market was weak and futures irregular.

Oats have developed some irregularity. Prime grades for prompt delivery have been taken more freely at advancing prices, but the more distant futures were depressed throughout. corresponding period of last year for comparison.

Thus, yesterday, No. 2 mixed sold at 34c. for June and 31%c. for September, and No. 2 white at 38c. for June and 34c. for September. To-day there was no decided change.

Rye is quiet but firm, Barley malt in fair demand at

AGRACULTURAL DEPARTMENT JUNE REPORT.—The report of
the D-partment of Agriculture for June 1 respecting cereal
crops was issued on June 10, as follows:

Tot. June 7, '84† 16,565,639 7,953,589 3,492,624 886,246 314,998

crops was issued on June 10, as follows:

The June returns of the Department of Agriculture indicate a reduction of nearly 2 per cent in the area of winter wheat. Changes in acreage of States are very slight, except in Kansas, where a reduction of 22 per cent is reported, caused by bad harvests and low prices. The spring-wheat area has been enlarged 6 per cent from increase of immigration and farm-making west of the Mississippi in the districts traversed by the Northern Pacific Railroad. Most of the increase is in Dakota, which reports an increase of 24 per cent. The total area of wheat is about 37,000,000 acres, a fraction of 1 per cent more than that of the previous crop. In condition of winter wheat there is no marked change, the average being 84.9, a reduction of nine-tenths of 1 per cent for May. In 18.6 the June average was 92.7. Reports of shortstraw are very numerous; in some districts there are indications that the yield of grain will be larger proportionately than of straw. If there is no increase from this cause, the yield must be less than an average. The harvest is already in progress up to the thirty-eighth degree of north latitude. The condition of spring wheat is good in Dakota and the Territories westward, but below average records in Wisconsin. Minnesota, Iowa and Nebraska. The general average for spring wheat is 87.3, which is lower than in recent years but thirteen points higher than in 1881. At harvesting last year the condition averaged 80. Dry weather in April has been injurious to winter wheat. Insects have committed greater depredations than usual. The central belt westward from Pennsylvania and Virginia has suffered local damage from the Hessian fly and the chinch bug has wrought injury in Illinois, Missouri and Kansas.

The area of winter rye has been diminished over 6 per cent, mainly by a large reduction in Kansas.

The area of winter rye has been diminished over 6 per cent, mainly by a large reduction in Kansas. Condition is better than that of wheat, as usual averaging 88-9.

An apparent colargement of the barley acreage of 3 per cent is indicated. The increase is in Dakota, California, Oregon and the Territories. Condition averages 87, being slightly above that of wheat. There is a continuance of the extension of oats culture. The increase is 4 per cent. This crop has taken a part of the area formerly in wheat in Kansas, an advance of 30 per cent over the acreage of last ear. The increase is large in the Northwest, and there is a tendency cenlargement in all sections of the country.

THE DRY GOODS TRADE.

NEW YORK, Friday, P. M., June 10, 1887. There was a fair movement in dry goods on account of former transactions the past week, but new business was only moderate, most of the out-of-town buyers who attended the

recent auction sales having returned home as soon as they were able to supply their pressing wants. For most descriptions of seasonable goods the demand was chiefly of a handto-mouth character, and light in the aggregate, but a very fair trade was done in certain fall and winter fabrics for later delivery. Although comparatively quiet-as usual at this advanced stage of the season-the jobbing trade was probably in excess of the corresponding period in former years, owing to the numerous re-orders for staple and department goods which were daily received by mail and wire. The main features of the market are substantially unchanged. Domestic cotton goods are very firmly held by the mill agents, as are most descriptions of woolen goods, and foreign fabrics of a staple character are generally steady in price. Both jobbers and retailers are, as a rule, in good spirits and well pleased with the outcome of the spring trade, which has been more than fairly satisfactory in most sections of the country.

DOMESTIC COTTON GOODS.-The exports of cotton goods from this port for the week ending June 7 were 2,091 pack ages, valued at \$130,718. These shipments include 1,316 packages to China, 147 to South America, 376 to the West Indies, 79 to Mexico, 72 to Europe, 21 to Central America, 45 to British East Indies and 35 to all other countries. Since the 1st of January the exports aggregate 89,132 packages, valued at \$5,216,463. Of this total China has had 49,914 packages valued \$2,347,900; and 15,961 packages, valued at \$1,150,910, have gone to South America. For the similar period of 1886 the exports to all ports reached 88,780 packages and in in 1885 were 70,206 packages. Agents continued to make liberal deliveries of plain and colored cottons on account of back orders. and a fair amount of new business was transacted by commission houses and large jobbers who cater for the wants of package buyers. Prices ruled steady all along the line, and an advance in bleached shirtings was led by "Fruit-of-the-Loom" which was marked up 1/4c. per yard, and subsequently placed "at value." Brown and colored cottons were in steady request and stocks are so well in hand that prices remain firm. Print cloths were more active than the previous week and dearer, extra 64x64s "spots" having sold at 33%c., while 56x 60s closed firm at 3 1-16c. Stocks last Saturday and for the three previous years were as follows:

Stock of Print Cloths— Held by Providence manuf'rs.	June 4, 1887. 116,000	June 5, 1886. 74,000	June 6, 1885. 445,000	June 7, 1884. 295,000
Fall River manufacturers Providence speculators Outside speculators (est)	236,000	69,000 156,000 20,000	375,000 324,000 275,000	381,000 285,000 150,000
Total stock, (pieces)	455,000	319,000	1,419,000	1,091,000

Printed calicoes, other than fine sateens, were quiet in first hands, and lawns and batistes were only in moderate demand, but a good business was done in dress ginghams adapted to the coming season, and fancy wash dress fabrics as seersuck-

ers, crinkles, &c., continue 1 in fair request.

DOMESTIC WOOLEN GOODS.—Following the recent auction sales there was a moderately good business in wool flannels, and blankets have met with a fair share of attention from intending buyers. Wool and worsted dress goods were in steady demand and leading makes are largely sold ahead for later delivery. Jersey cloths and stockinettes were taken in fair quantities by manufacturers, and some makes have been advanced from 71/2 to 10 per cent, because of the recent rise in worsted yarns. Kentucky jeans and satinets were quiet in demand. but there was a fair movement in these goods in execution of back orders, and prices remain firm. The demand for men'swear woolens, as cassimeres, trouserings, worsted suitings, overcoatings, &c., was more or less disappointing, as has been the case for some time past, but production has been so largely curtailed of late, that stocks are not cumbersome as a rule, and really meritorious fabrics are held with considerable firmness. Carpets were in pretty good demand, and a fair business in wool hosiery, heavy underwear and fancy knit woolens was done by the commission houses.

FOREIGN DRY GOODS.—At first hands the demand for imported goods was quite moderate, and the jobbing trade was light and irregular. Summer dress fabrics were distributed in small parcels to a fair amount, but silks, satins and velvets ruled quiet. Linen goods were in meagre demand, but steady in price, and selections of laces and embroideries were seem ingly governed by actual requirements. Men's-wear woolens continued dull, and prices are very unsatisfactory in some instances. The offerings through the auction rooms were small and unimportant, and but few more public sales will be held this season.
