Terms of Subscription—Payable in Advance :

Subscriptions will be continued until definitely ordered stopped. The publishers cannot be responsible for remittances unless made by drafts or Post Office Money Orders.

or Post Once Money Orders. These prices include the INVESTORS' SUPPLEMENT, of 120 pages issued once in two months, and furnished without extra charge to subscribers of the CHRONICLE. A file cover is furnished at 50 cents; postage on the same is 18 ents. Volumes bound for subscribers at \$1 00.

London Agents:

Messrs EDWARDS & SMITH, 1 Drapers' Gardens, E. C., who will take subscriptions and advertisements and supply single copies of the paper at 1s. each.

WILLIAM R. DANA & Co., Publishers, 102 William Street, NEW YORK. Post Office Box 958. WILLIAM B. DANA. JOHN G. FLOYD.

CLEARING HOUSE RETURNS.

Notwithstanding the fact that the volume of stock speculation at New York during the week ending October 22 exhibits a falling off from the previous week, the exchanges record an increase of nearly twenty-seven millions of dollars. Elsewhere the changes from October 15 have been as a rule merely nominal, some cities showing slight gains and others unimportant losses, the result in the aggregate outside of New York being a decline of a little more than half a million. Altogether the statement is a very satisfactory one, more parevery point some excess over the corresponding period of the preceding year is recorded. Furthermore, this is only the third instance of the kind within the last six years. A falling off in stock operations at Boston accounts for the diminution in clearings at that city. As stated above, gains over the similar week of last year are exhibited at all points, and they vary from 0.4 per cent at New Haven to 93.7 per cent at St. Joseph, the excess at Grand Rapids reaching 55.3 per cent, Omaha 44.4, Columbus 38, Minneapolis 37.5, Wichita 36.7, New Orleans 36.6, Norfolk 35.4 and Peoria 32 per cent. Compared with the week of 1885 there is a decrease of about 1.75 per cent, but it should be remembered that at that time stock dealings were very heavy. Contrasted with 1884, however, the increase is nearly 30 per cent. At the New York Stock Exchange share sales for the week cover a market value of \$111,240,000, against \$133,630,000 for the same week of last year, and the exchanges arising through other than stock operations are \$464,451,453 and \$400,511,056 respectively in the two years, or an increase of 15.9 per cent, For the full week, based on last weak's returns.

The returns of exchanges for the five days, as received by telegraph, exhibit a decrease from the corresponding period of last week of \$105,760,484. Contrasted with the five days of 1886, the aggregate for the seven cities records a gain of 4.5ticularly so since for the first time since August of 1886 at per cent. Our estimate for the full week ended October 29 indicates an excess over a year ago of about 7.4 per cent. Messrs. R. G. Dun & Co. report the number of failures for the week ended to-night (October 28), as 216 (193 in the United States and 23 in Canada), against 201 last week and 215 for the same time a year ago.

THE CHRONICLE.

THE FINANCIAL SITUATION.

The conditions with regard to money have so changed at this centre, that it has ceased to be any longer an adverse element in financial or commercial operations. We do not by any means wish to leave the inference that it has become a drug or even that bank rates have declined very materially. Of course so far as bankers' balances represent the condition, there is a considerable decline compared with a few weeks back, and during the past week the extremes have been 6 and 3 per cent, averaging $3\frac{1}{2}$ per cent. But this movement is seldom representative of the real condition of the markets, in fact very rarely except in special emergencies. So also large amounts have been loaned on time at very low rates on Govern ments. The Treasury balances in depositary banks have all been put out in that way at $3\frac{1}{2}$ per cent, and we hear this week of a round sum borrowed of a savings bank at the same rate, the collateral being city bonds and Governments. But none of these operations are really indicative of the market. A better gauge is that time loans can be obtained for three, four and five months on first-rate collateral at 5 per cent, though banks are getting 6 per cent for about all they put out. This, they say, they are able to do, because the out-of-town inquiry from their correspondents, especially in the West and Southwest, is urgent, and takes off any excessive supply. There is more being done in commercial paper by our city institutions, as their lines have run low and the demand from their mercantile customers has subsided. The supply of paper is not abundant, and rates are consequently easier. First class 60 to 90 day bills receivable are quoted at 6 per cent; four months' commission house names are $6@6\frac{1}{2}$ per cent; and good single names, having four to six months to run, are $6\frac{1}{2}$ to $7\frac{1}{2}$ per cent.

The Bank of England rate remains unchanged at 4 per cent, and discounts of 60 day to 3 months' bank bills in London are easy at 3 per cent, while the open market rate at Paris is $2\frac{1}{4}$ and at Berlin $2\frac{1}{8}@2\frac{1}{4}$ per cent, against $2\frac{3}{4}$ per cent early in the week, indicating that the flurry caused by the failure of the Leipzig Bank has sub-As all fear of any withdrawals of gold for Amersided. ica is for the time being removed, and as the trade inquiry is very limited, while the political situation bears a peaceful outlook, there seems nothing for the moment to give any special movement to money. The Bank of England reports a gain of $\pounds 40,000$ bullion during the week, made up, as we are informed by a private cable to us, by an import mostly from South America of £60,000 and by a shipment to the interior of Great Britain of £20,000. The Bank of France lost £179,000, mainly caused, we are informed, by a movement to the colonies. Our foreign exchange market has been dull but firm all the week, until Friday, when first there was an advance of a half a cent per pound starling, subsequently a decline of a half cent in both long and short, but finally a recovery again. The higher rates and changed condition of the market have been largely due to the changes in our money market. While the stringency lastel it was profitable to employ foreign capital here, so large amounts were transferred through the medium of exchange. Now this money is being returned and that makes an unusual demand for sterling, which absorbs the offerings not only of bankers' bills but of commercial bills also. The operations of the arbitrage houses have resulted in the making of some drafts against securities, but not enough to produce any decided impression upon the market. Cotton is moving very freely, but in the present conditions of trade 1880. In that year the net merchandise balance in favor and money bills against it are quickly absorbed.

imports are now at an end for the present. The receipts during the week were \$1,360,490 on Saturday, \$217,000 on Monday, and \$14,000 on Tuesday, making a total of \$1,591,490.

So far as trade movements affect exchange, the October trade statement will of course show an alteration in conditions. But up to the first of October the results have Mr. Switzler, of the Bureau of not been propitious. Statistics, has this week issued the figures for September, and although they come the nearest to affording a favor. able balance on the merchan lise movement of any month since March, the balance still continues to run against us, the imports that month being \$723,000 in excess of the exports; but classing silver as merchandise, which it really is, this would be changed to an excess in exports of \$539,000. That of course takes no account of the 10 millions a month which it has been our custom to allow for undervaluations of imports, freights paid, and interest, &c., due by us to Earope, and which would make the net adverse balance for September $9\frac{1}{2}$ million dollars. Yet notwithstanding that fact, we have imported of gold in September a net of \$13,913,000, as will be seen from the following statement, arranged in our usual form, show. ing the imports and exports of merchandise, gold and silver each month this year, and the totals for the same months of previous years.

* Excess of imports.

† Excess of exports:

Some question the need for adding to our indebtedness every month 10 million dollars on account of items which cannot appear in the trade statement. The only way in which one can test the propriety of that method is by an investigation of past results. If it is found that during a series of years we have paid Europe on the average in gold or merchandise that amount over and above paying for our merchandise imports, there seems no escape from the conclusion that there must be a debt accruing against us annually in the same sum, outside of and in addition to the declared imports. The inference which such an inquiry creates may be illustrated by taking the trade movement for the six years prior to 1886. We cannot enter upon that inquiry in detail to-day, but any one, by referring to the official reports, can confirm the following statement of bulances for the twelve months of each of the years referred to.

Calendar Year.	Merchandise Balance,	Silver Bilver		d Imports l Ecports.	Year's Net Bilince Unpaid.
1850	\$192,876,245	\$1,352, 117	Imp.	\$70,583,239	\$123,645,424
1881	163,339,679	8,467,329	Imp.	57,795,077	114,012,231

balance was \$1,352,417, which together would make a debt due the United States from the outside world on its trade for 1880 of \$194,228,663. Of this the outside world paid us by shipping gold to us in the amount of \$70,583,239, leaving at the end of the year due us and unpaid (unless we had owed them the 10 millions a month • he whole six years the referred to) \$123,645,424. aggregate balances thus left uppaid reached \$641,809,837, averaging for each year \$106,968,306. This of course takes no account of the purchase of American securities, which would add so much more to the payments due us, for it is probable that Europe increased its holdings during the most of the years included in the above statement. For example in 1885 it will be remembered the West Shore settlement was effected, and in that year the movement to Europe of our stocks and bonds was unusually free; but special movements need not be referred to, for without doubt the net increase of foreign holdings in the six years reached a large total. Hence we see no escape from the conclusion that at least 10 millions a month of our foreign trade balance must, during the period stated, be presumed to have been settled in the manner indicated.

In trade circles the tendency in the East still continues in the direction of increasing quietness. This follows in part from the fact that in certain lines of trade, the season for a heavy movement is over, but also in a measure from the naturally conservative attitude which characterizes Gur merchants are inclined to go slowly and business. be prudent and cautious. In the West and South trade is much more active. From some sections the complaint of insufficient money is still heard, while rates almost uniformly continue high. It is a fact also that our Eastern banks can place all their surplus funds in the West at a good figure. Such facts as these are illustrative of the situation there. It is possible that the activity may be entirely healthy, for in truth there seems no limit to Western growth, and yet only time can settle the question and, meanwhile, the East is evidently inclined to proceed cautiously and await developments. The uncertainty moreover, as to the extent to which new railroad construction work may be carried on next year, also puts an element of doubt into the calculation. We show in another article that in an important section of the Northwest the crop yield the past season has been as good as it was last year. So far as it goes that is a favorable factor. On the other hand, with a falling off in railroad construction, the demand for all kinds of iron would also fall off, and this, combined with the heavy production of iron, accounts for the weakness and unsettled state of that trade.

of carnings this week, some of a favorable nature and others the reverse. Among those of the former kind may be mentioned particularly the September gress of the Chicago & Northwestern. It had been stated very confi. dently that this would show a loss of \$200,000, and in view of the bad exhibit made by the Burlington & Quincy for August the report found credence. Now we have instead of a loss a gain in the sum of \$107,491. On the other hand, the September statement of the Pennsylvania has caused some disappointment. A substantial gain in the net was expected, whereas it appears that heavier expenses have again more than counterbalanced the increase in gross, leaving the net slightly less than a year ago. What makes the loss in net the more surprising is that the same circumstance-that is, heavier expenses - had reduced the total last year, so that the aggregate now (we are referring to the Eastern system) is the smallest for that month of any year since 1882. An idea

of the great augmentation in expenses will be obtained when we say that as compared with two years ago the amount of the same for September has increased \$863,796 -this for one single month and only on the Eastern system. In view of such figures, we think no one will be inclined to claim that the addition represents an increase in the ordinary cost of operating; rather that it must be the result of expenditures for other purposes. It should be stated, too, that on the Northern Central, another one of the Pennsylvania roads, the same heavy increase in expenses and decrease in net for two successive years is observable. It was believed at one time that the increased passenger business arising from the celebration of the Centennial of the Constitution at Philadelphia would add largely to the Pennsylvania's results, but it is now stated that this was rather a hindrance than otherwise, as it interfered with the movement of freight, besides which the passengers were carried at low rates. On the Western lines a much better showing is made, these reporting a surplus above all liabilities of \$255,981 for September this year, against only \$81,328 last year and a deficit of \$90,226 two years ago. Of course, for the nine months to the end of September, very heavy gains are shown, both on the Eastern and Western lines, as will appear from the following table in our usual form.

LINES EAST OF PITTSBURG.	1887.	1886.	1885.	1884.	188 3.	1882.

Result	2,014,176	1,897,803	1,801,825	1,938,027	2,244,194	2,180,296
Jan. 1 to Sept. 30. Gross earnings Operat'g expenses.	41,053,675 26,930,019	36,868,283 23,894,451	33,237,632 22,016,661	36,399,099 22,856,839	37,893,907 23,817,360	35,888,778 22,284,277
Net earnings	$\overline{14,123,656}$ +:035,928	12,971,852	11.220.971	13,542,260	14,078,547	13,604,501 + 1067,772
	15,159,584	12,879,896	9,976,486	12,830,401	14,970,905	14,672,279

The gross earnings here for September, unlike the net, are very satisfactory-showing as they do a gain of \$332,-516 on last year and \$729,940 on 1885—and this is the more gratifying that on the grain movement to New York the road, according to an article in another part of the paper, must have lost some \$23,000. On the Central and West Shore the loss, as compared with last year, in the revenue from through grain traffic, was a still more important item, reaching \$127,000, and yet according to the Central's quarterly statement total gross earnings for the month increased \$341,933. Hence, except for the loss in the grain traffic, the Central would have had an increase of \$468,000 for September, and this is merely an illustration of the very favorable state of the business of the trunk There have been a number of surprises in the returns lines at present. We have also had this week a very satis. factory return, both of gross and net, from the Reading for the same month, and likewise from the Central of Georgia. The latter has increased its gross from \$583,-457 to \$780,134, and its net from \$248,785 to \$364,231. The Norfolk & Western is another road that is doing quite well, and has net of \$186,305 this year, against \$137,854 last year, and for the nine months \$1,210,297, against \$919,983. The Grand Rapids & Indiana and the Cleveland Columbus Cincinnati & Indianapolis have slightly lost in the net, though both have gained in the gross. The Northern Pacific is another road that has lost in the net, after having gained in the gross. The stock market for most of the week showed a pretty firm and improving tone, and prices quite generally advanced, but yesterday afternoon under some unfavorable developments a considerable decline ensued and the close was weak. The volume of business has continued small, with operations confined mainly to the professional traders.

556

THE CHRONICLE.

favorable influences One of the of the week has the definite settlement disputes been of the Northern between Pacific and Oregon the the Trans-Continental, and the discontinuance of all suits against each other. New York & New England has been strong on rumors of a change of control and the resignation of one of the directors who has the reputation of being actively engaged in forcing prices down. Western Union has been aided by reports that some sort of agreement was under way with the Postal Telegraph for advancing rates. Chicago & Northwestern and the grangers were benefited by the unexpected increase in the September gross earnings of the road. Philadelphia & Reading has been firm and higher on good earnings and the excellent condition of the coal trade, which latter fact also served to advance the properties of the other anthracite carriers. On Thursday it was sought to weaken the market by the circulation of a report that the Missouri Kansas & Texas was to be placed in receiver's hands, but this had only a temporary effect, and the market quickly recovered on the denial of the story. Yesterday afternoon, however, all the Kansas & Texas securities dropped heavily, and this was followed just at the close of business by the announcement that the Chesapeake & Ohio-one of the Huntington roads-had been placed in the hands of a receiver. The effect was to unsettle the whole market. The Gould properties have been weak and inclined to lower prices nearly all through the week. It is announced that Mr. Gould and part of his family will leave for Europe to day for an extended trip.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of currency and gold by the New York banks.

Week ending October 28, 1887.	Received by N. Y. Banks.	Net Interior Movement.
Currency		Loss \$689,000 Loss 530,000
Total gold and legal tenders		 Loss\$1,219,000

The above shows the actual changes in the bank holdings of currency and gold caused by this movement to and from the interior. In addition to that movement the banks have lost \$300,000 through the operations of the Sub-Treasury and have gained \$1,500,000 by Assay Office payments for gold imports. Adding these items to the above, we have the following, which should indicate the total loss to the New York Clearing House banks of currency and gold for the week covered by the bank statement to be issued to-day.

Week onding October 25, 1887.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks'Interior Movement, as above Bub-Treas. opera. and gold imports.	• • • • • • • • • • • • • • • • • • • •		Loss \$1,219,000 Gain 1,200,000
Total gold and legal tenders	\$5,274,000	\$5,293,000	Loss \$19,000

The Bank of England gained £40,000 bullion during the week. This represents £60,000 received from abroad and £20,000 sent to the interior of Great Britain. The Bank of France lost 4,475,000 francs gold and 1,275,000 francs silver, and the Bank of Germany, since the last report, shows an increase of 6,320,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

The Assay Office paid \$231,220 through the Sub-Treasury during the week for domestic and \$1,508,318 for foreign bullion, and the Assistant Treasurer received the following from the Custom House.

			Consisting of-					
Date.		Gold.	U. S. Notes.	Gold Oertific's.	Silver Cer- lificates.			
Oct. 21.	\$335,321 52	\$6.000	\$34 000	\$255,000	\$39,000

" 27.	405,096 37	4 0 00	80,000	239,000	32,000			
Total	\$2,754,320 76	\$24,500	\$373,000	\$2,134,000	\$218,000			

Included in the above payments were \$7,500 in silver coin, chiefly standard dollars.

THE CROP YIELD IN THE NORTHWEST.

There is now, and has been for some time, a disposition to regard the railroad outlook in the Northwest as very unfavorable. So far as this view is based upon the increase of new mileage and the building of competing roads in that section, it has of course a certain basis of facts to support it. But in addition an idea has got abroad that the crop situation there is a bad one, that the yield has been very much less than a year ago, and that hence the railroads in that section will have a decidedly smaller volume of cereal traffic during the next ten or twelve months. If the facts and figures that we have gathered are reliable, this latter supposition would seem to be founded on error and misapprehension.

There has been no important reduction in the yield in the Northwest as compared with a year ago. In special districts particular cereals show a falling off in production, but taking that territory as a whole and having re. gard to all the leading cereals—corn, wheat and oats the total product for 1887 is found to differ but slightly from that for 1886. This statement may occasion surprise, but we shall cite the figures further below to prove That a contrary view should prevail is natural. Corn, for instance, that principal crop, has proved so much smaller than the exceedingly favorable promise held out early in the season-favorable almost beyond precedent-and the disappointment has consequently been so great that one is very apt to compare the result with the imaginary quantity represented by this early promise rather than with the actual outturn in the previous year, or the average for a series of years. We had been looking for extraordinary results, and now find only an ordinary yield.

The fact is also lost sight of that if the crop the present year be an unsatisfactory one, that is precisely what it was in the previous year. In other words, it is exactly the condition the railroads have been living and working under during the last twelve months, in which period they have, on the whole, furnished pretty good returns of earnings, though doubtless not as good as the roads in some other sections. But it will be claimed that the total corn production for the United States, in 1887, is a hundred millions or so smaller even than the poor yield of 1886. That appears to be correct. But what section of the country is responsible for the further loss? Not the Northwestern States, but almost entirely what is called the Central or Middle Western section-Ohio, Indiana and Illinois, large surplus States, and also Michigan, Kentucky and Tennessee. In these six States the indicated yield the present year is over 126 million bushels short of last year, and it is the decrease in that section that cuts down the total yield.

* The division (between gold and silver) given in our table of coin and bullion in the Bank of Germany and the Bank of Belgium is made from the best estimate we are able to obtain; in neither case is it claimed to be accurate, as those banks make no distinction in their weekly reports, merely reporting the total gold and silver; but we believe the division we make is a close approximation.

THE CHRONICLE.

In the Northwestern States on the other hand the yield is generally heavier than in 1886. Iowa, for instance, a State through which so many of the Northwestern roads run, and which next to Illinois has a greater railroad mileage than any other State in the Union, has produced more corn than last year, and with its 206 million bushels excels all other States in total yield-excelling even Illinois, decidedly, which last year stood at the head of the large producers. But a more comprehensive view of the crop situation in the Northwest is afforded by taking all the different States in that section together and comparing not only the yield of corn, but also of wheat and oats, as is done in the following table. The results for 1886 we have taken from the Agricultural Bureau statement of the production for that year, and those for 1887 are our own, based, however, entirely on the Bureau's latest indications of yield. In the case of wheat and oats we have used the Bureau's figures of the average yield per acre in each State in connection with its previous report of the area sown, but in the case of corn our calculations are based simply on the differences in the condition figures October 1 this year and last, as affected by the changes in acreage. Thus for Nebraska, with the corn condition October 1, six per cent poorer than a year sgo, and the acreage increased six per cent, the one is regarded as offsetting the other, and the production is stated the same for both years. Made up in this way the results for corn are sure to be changed somewhat when the Bureau statement is finally reported next January, but they ought to be sufficiently close to afford a good idea of the actual situa We should say that while tion in that particular. properly only Wisconsin, Minnesota, Dakota, Iowa and Nebraska should be classed as Northwestern States, we have also added Kansas and Missouri because so many of the Northwestern companies have lines running to Kansas City and other Missouri River points, and are thus affected by the yield in those two States.

	Cor	·n.	Whe	rat.	Oa	ts.
State.	Indicated Yield, 1887.	Pro- duction, 1886.	Indicated Yield, 1887.	Pro- duction. 1886.	Indicated Yield, 1887.	Pro- duction, 1886.

Minnesota Dakota Iowa	Bushels. 29,348,000 18,710,000 21,969,000 206,801,000	15,805,000 198,847,000	Bushels. 13,063,000 27,224,000 34,833,000 26,837,000 16,731,000	32,455,000	Bushels. 34,855,000 36,942,000 29,812,000 67,480,000 22,447 000	Bushels. 39,656,000 40,735,000 20,651,000 78,454,000 21,865,900
Total Kansas Missouri	382,957,000 114,041,000 152,331,000	$\frac{106,129,000}{369,179,000}\\ 126,712,000\\ 143,709,000\\ 639,600,000$	118,691,000 9,527,000 29,114,000	138,189,000 14,558,000	191,533,600 33,367,060 \$9,793,000	25,516,000 30,577,000

This shows that only two of the States, namely Minnesota and Kansas, indicate a smaller yield of corn than in 1886, and that the total for the whole seven, so far from falling below a year ago, is 10 million bushels greater than then. Missouri particularly makes an excellent comparison, the indicated yield for 1887 being $8\frac{1}{2}$ million bushels greater It should be stated than the production for 1886. perhaps that in some quarters the Kansas yield for 1887 is placed considerably lower than above, but the same authorities greatly increase the production of Iowa and Dakota, so that the grand total would not be affected much; in any event and whatever the changes it does not seem likely that the seven States will show for 1887 a total production materially different from that for last season. As regards wheat, it is known of course that the States raising the spring variety have not done as well as last year, and that Kansas also has suffered a further reduc tion, even from its small total of 1886. Hence it is not surprising that five of the seven States should show a diminished production, only Dakota and Missouri exhibit-

ing an increase, leaving the total yield for the seven States nearly $17\frac{1}{2}$ million bushels less than last year. It is only fair to say, however, with reference to the effects of this diminution, that some of them have already been felt and to that extent they will not be an influence in Thus for the period from the succeeding months. beginning of August to the 15th of the present month, the receipts of wheat at the eight principal Lake and River ports of the West (not including Minneapolis) were only 21,900,164 bushels this year against 32,900,267 last year, a falling off of 11 million bushels, of which falling off about $6\frac{1}{4}$ million bushels occurred at Duluth, an exclusively spring-wheat market. In the matter of oats there is a decrease in production in three of the States-Wisconsin, Minnesota, Iowa—but an increase in Dakota, Nebraska, Kansas and Missouri, and the total is about $7\frac{1}{4}$ million bushels in excess of the previous season.

If we combine the three cereals, we get an aggregate for 1887 almost precisely the same as for 1886, the totals being respectively 1,071,357,000 bushels and 1,071,785,000 bushels. Hence, while in individual States and localities some roads may suffer from a diminished yield as compared with 1886, taking the Northwest as a whole the crop situation does not indicate any important changes, though, of course, the low prices prevailing are an unfavorable feature.

PRICES AND MANUFACTURE OF COTION.

Mr. Ellison has issued this week in Liverpool his annual review of Europe's cotton consumption and manufacture for the season ending October first, and we have obtained all the figures by cable. They are instructive not only as a record of this industry for the year, but also for broader reasons. Low prices of commodities are a general condition and the source of world-wide commercial depression. We are repeatedly told by a certain class of economists that these prices-although the start in the decline dates back in most cases ten or more years-are due to over-production. Not stopping to discuss the question whether over production is not an influence always of short duration, invariably curing itself; passing that question-here is at least one article not in excess and which has not been in excess for years back (except as every production may and does now and then in some small measure exceed consumption), and yet as much as any other is involved in the general derangement.

We do not propose to enter upon an investigation of that subject to-day; but because of its c nucction with the universal search after a remedy, it is important to keep it in mind in studying these trade figures, and especially to note some of the facts and conclusions given later on. The total takings of spinners for the year ending October 1, 1887, have been as follows. We have obtained by cable also the corrected figures for last year and add them as well as those for 1884-85 for comparison.

From Oct. 1 to Oct. 1.	Great Britain.	Continent.	Total.

Stock Oct. 1 (end of year)	218,000	221,000	195,000

This is perhaps a sufficiently forcible exhibit to impress any reader with the wonderful proportions and progress of this industry. And yet it is quite incomplete; for of late years the United States and also, though to a lesser extent, India have assumed important positions as cotton spinners adding materially to the world's spinning power. As this development both in India and the United States directly curtails the needs for goods from European sources, the growth in the cotton goods industry can only be seen by combining results in the two countries named with the above figures for Great Britain and the Continent. This we have done in the following, having reduced all the figures to bales of 400 lbs. each.

World's Consumption.	Great Britain.	Continent	United States.	India.	Total.
1878-79	. 2,943,000	2,596,000	1,784,000	262,230	7,485,2:0
1879-80	. 3,350,000	2,750,000	1,981,000	301,480	8,382,480
1880-81	. 3,572,00	2,956,000	2,118,000	371,400	9,017,400
1881-82	. 3,640,000	3,198,000	2,197,000	389,600	9,424,600
1882-83	. 3,744,000	3,380,000	2,375,000	447,400	9,946,40
1883-84	. 3,666,000	3,350,000	2,244,0(0	520,700	9,810,70
1884-85	. 3,433,000	3,255,000	1,909,000	584,800	9,181,800
1885-86	. 3,628,000	3,465,000	2,278,000	630,300	10,001,300
1886-87	3,694,000	3.640.000	2,423.000		10,4(8,800

It will be remembered that only a few years ago every authority seemed to be agreed that the world's spinning capacity had outstripped the world's consuming capacity It was widely claimed that expansion on the Continent, in the United States and in India had overdone the business and was going to bring ruin to spinners in Great Britain. This was only in 1884-85. Instead of the forecast proving true, the very next year every part of the world, according to the above, increased its production, bringing the total up to a higher figure than it had ever been before; whereas during the past season (1886-7) now just closed, nearly 500,000 bales more have been added to the consumption of the raw material, making the total cot ton consumed by the mills that year 10,468,800 bales. A single further fact must be mentioned—this expansion has been during a period when general trade has been dull and depressed the world over except in the United States.

the production of the raw cotton. It is sufficient here to repeat what we have already said, that there has been no excessive production of the raw material, any more than there has been of goods. Surplus stocks of both are either at a low ebb or below the average, and yet dragging markets with a complaint of no profits or the narrowest possible margin for profits in both the manufactured and unmanufactured article, is the consentaneous echo the world over. To illustrate how the course of prices of cotton has been affected by or has followed this spurt in manufactures which began two years ago, we have obtained an average annual price of middling uplands at New York by taking the quotation for that grade on each Friday of each week, beginning with the first Friday in October and ending with the first Friday in March for the seasons 1883-4 to 1886-7. Our reason for selecting these months instead of using the prices for the whole year is that the months named cover the period when almost all the crop is marketed, while from early spring and through the summer there is very apt to be a speculation and not infrequently a corner in cotton which prevents those months from being a fair test of trade conditions. Now if the reader will bear in mind that the revival in manufacture began in 1885-6 and that surplus stock of raw cotton (visible and invisible supply) on October 1, 1883, was 2,405,000 bales, and on October 1, 1887, was 1,800,-000 bales, he will be able to see the force of the fact that the price of middling uplands made up as above stated averaged for 1883-4 a little over $10\frac{1}{2}$ cents, for 1884-5 a little under $10\frac{3}{4}$ cents, while for 1885-6 and in 1886-7 the average was only a little over $9\frac{1}{3}$ cents. Here then is an instance of a great revival in the manufacture of cotton goods, with a decrease in the surplus stock of the raw material, concurrent with a decline of nearly $1\frac{1}{2}$ cents per p und in the raw material. Does that look as if an overproduction of cotton produced these very low, and if we may be permitted to use the word starvation, prices which the planter is receiving? It seems to us worth while for those who rest on such a belief to overhaul their theories and make them harmonize with these and other similar facts which we can furnish them in other industries, for do not such facts prove that they have by no means diagnosed the case correctly?

But we mi st pass this point and refer very briefly to other figures received by cable from Mr. Ellison's circular He estimates that to supply spinner's wants in Europe and America the current season a total supply of 10,192,000bales of 400 lbs. each will be needed, against a consumption the past season (including burnt and taken for Mexico and Canada) of 9,932,000 bales same weights, or an increase of 260,000 bales. To get all this will, he says, call for a crop in America (if old stocks are not intrenched upon) of 6,864,000 bales (ordinary weights), and of 2,392,000 bales (ordinary weights) from other sources, all of which reduced to average bales of 400 lbs. each, gives the above total of 10,192,000 bales. One can gauge better the degree of probability these results possess by arranging this estimate and last year's figures in the following form.

[VOL. XLV.

These conditions and results will bear study. We cannot at this time enter upon the other branch of the subject.

e	185	6-87.	1887-88.

The first column in the above, giving the details of the new supply last year, is in part estimated by us, as the figures were not included in the cable received; they are not quite accurate as to sources other than America, yet they cannot differ from the actual more than a very few bales. It will be noticed that Mr. Ellison in making up the requirement f_{rom} the United States at the figure he does has estimated the Egyptian supply about 10,000 bales less than last year the East India supply at about 77,000 bales less and sundries about 88,000 bales less. We may be in error, but we should think that present advices with regard to Egypt would authorize an estimate of supply from that source a little larger instead of a little smaller than last year's yield; with regard to India it is too early for a satisfactory opin ion, though it is to be said (1) that last year's crop was an excellent crop, so that estimating the chances a like good result may be thought quite doubtful, but (2) there was about 50,000 bales more afloat from India for Europe on Oct. 1, 1887 than on Oct. 1, 1886; as to the supply from other sources given under the head of "Sundries," we are without sufficient information to form a belief with regard to its extent.

As for the consumption during the current season, almost everything depends upon the activity in general trade in the United States. We think good judges would estimate to-day 100,000 bales increase in America. As to Europe there is even more uncertainty respecting the result. Our readers will find on a subsequent page in our usual Cotton Report a very useful table which we have prepared show ing the actual export each month for two years of cotton manufactures from Great Britain expressed in pounds The important fact it shows is that the total exports in 1886-7, although a little more than in 1885-6, were considerably smaller the last six months of the season than the first six months. This change in volume of shipments during later months of course makes it an open question what England's export of goods, and consequently consumption of cotton, will be this season. We have not facts enough about the condition of the industry on the Continent to form an intelligent opinion. The increase has been pretty steady in the past, but whether that indicates continued development during the current season or a temporary rest our readers are as able to judge as we are.

SMALLER GRAIN RECEIPTS AND TRUNK LINE EARNINGS.

In our review of earnings for September we pointed out that as compared with the corresponding period in the previous year there had been a great contraction in the grain movement to the Western primary markets, and that this had affected adversely the earnings of the roads in that section of the country. From the figures of the movement to the Atlantic seaboard it is evident that the same circumstance is manifest in this part of the country, with similar effects upon the roads (the trunk-lines) engaged in transporting the stuff. Last year the receipts of grain at New York and other Atlantic ports in September were unusually large, as was the case also in the West; and this makes the contrast with the small receipts of the present year all the more striking. Thus while in 1886 the deliveries of flour and grain at this port by rail and water reached 17,126,798 bushels, the largest for that month since 1879, this year the deliveries were only 11,321,080 bushels, the smallest for September in a great many years. If we examine the movement at the other Atlantic ports, Boston, Philadelphia and Baltimore, we find much the same story. There the receipts this year were only half those of a year ago,

or but 6,277,347 bushels, against 12,591,254 bushels Combining New York with the other ports, we get total arrivals of 29,718,052 bushels for September, 1886, and only 17,598,427 bushels for September, 1887, a difference against the present year of over 12 million bushels.

Some have attributed the falling off to the reduced yield the present season of wheat and corn, and by others it is referred to the low prices prevailing for wheat which it is claimed have induced farmers to hold back, at least temporarily, considerable amounts of that staple. Not unlikely both influences have had more or less effect. Certainly a very large part of the falling off is found in the item of wheat, though the decrease is by no means confined to that cereal, but extends to all the other cereals, with one exception. At New York the receipts of wheat were only 4,042,554 bushels, against 7,055,038 bushels last year; at the other three ports the contraction is still more marked, the receipts being only 1,492,583 bushels, against 5,222,165 bushels. In a word, the wheat receipts at the four Atlantic ports have fallen off $6\frac{3}{4}$ million bushels. In the case of flour there is a decrease also in the total of the three ports outside of New York-638,252 barrels, against 738,607 barrels—but at New York there is a slight increase, namely 591,989 barrels, against 555,951 barrels, making however, as will be seen, the combined total less than a year ago. The minor cereals, barley, rye, malt and peas, also all show a decrease, except that in the case of Philadelphia and Boston there is an increase in the receipts of malt. But corn and oats exhibit a falling off only second to that of wheat, New York receiving 1,862,500 bushels of the former against 3,889,950 bushels in 1886, and the other three ports but 623.241 bushels, against 1,808,475 bushels; while of oats the receipts were 2,128,350 bushels at New York, and 975,271 at the neighboring ports, or 3,103,621 bushels together, against 4,901,575 bushels last year.

It is obvious of course that with this large diminution in the total movement to the seaboard, of this kind of traffic, that the volume of the same over the trunk lines must have correspondingly diminished. At New York there was additional loss from the diversion of an increased proportion of the movement to the canal or water route. This latter is rather surprising in view of the fact that the railroads were offering inducements to shippers in the shape of low rates on through cargoes to Europe But perhaps it was because the canal was so evidently getting the better of the railroads that the latter were induced to cut rates. Be that as it may, the fact remains that the canal has gained on the railroads. As regards quantity the water route shows a heavy reduction (which is natural with the total movement so much reduced), but it has increased its proportion of the total from 46.86 per cent to 53.93 per cent, or fully 7 per cent while the proportion coming by rail has been cut down from 51.24 per cent to 45.35 per cent. The following will show the amounts and ratios brought in at New York by each of the various routes, rail and water, in Septem ber of the last six years. It will be seen that the canal's percentage is the largest for any of the years given, while the railroads, against 45 per cent for 1887, had over 70 per cent of the movement in one of the earlier years, when moreover there were only three trunk lines to New York instead of five as now. Of course in some of the years the proportions coming by rail and by canal have been affected by the prevalence of a rate-war among the roads, in which freight was taken at a very low figure, but it is interesting to observe that, irrespective of that fact, the percentage by the railroads is the smallest for any of the years given.

Total all ... hush 11 32 08 117,128.798 14.857,451 14,5-0.929 16,712,418 12,442,453 NOTE.-In the above table flour has been reduced to grain on the basis of 412 bushels to a barrel, and no distinction made in the weights of the different kinds of bushels, all being added together on the same basis.

The percentages of the different roads here show some variations from last year, but not enough to call for any special comment. The significant fact is, that every one of the roads records a large falling off in quantity, reach. ing over a million bushels on the Central, over 650,000 bushels on the West Shore, nearly 850,000 bushels on the Erie, about 570,000 bushels on the Lackawanna, and about 210,000 bushels on the Pennsylvania.

With this diminution in the quantity carried, and also reduced rates in force, the revenue from the traffic has, it need hardly be said, greatly diminished. The cut in rates, as in previous months, was confined to the export busi ness and did not extend to the local through shipments. It is stated that in some cases grain was taken through to Liverpool at a rate no greater than the ordinary tariff on shipments from Cuicago to New York. An effort was made on the 19th of September to stop the cutting by an agreement among the companies to charge full tariff rates adding ocean freights on to this, but the effort was only temporarily successful, and by the end of the month reports of concessions were again numerous. Now another attempt is to be made by quoting fixed through rates to the leading European centres, the railroads taking the responsibility for fluctuations in ocean freights, and the rates being uniform via all the seaboard cities. This attempt we should think would be more likely so succeed, and it is to be hoped it will. However, it has no bearing on last month's figures, and we refer to it merely as one of the current incidents connected with this rate situation. Probably the average realized on the grain shipments during September was not above 20 cents per 100 lbs., Chicago to New York, but to be safe we take it at 22 cents, against full 25 cents in September last year, one-half the amount being in each case considered as belonging to the roads east of Buffalo. On this basis, the revenue to the five lines to New York on the shipments above, would be about as follows, the results for both 1886 and 1885 being added.

present a small one in the total traffic. This is letter seen in the returns for the nine months to the end of Septem. ber during which period the trunk lines so for as made public have furnished good exhibits, and yet the revenue from this through grain movement was much aller than in 1886, though above that for the correspond period in 1885. The following shows the deliveries by each of the various routes for the nine months.

THE SUEZ CANAL AND THE NEW HEBRIDES.

Among the items of intelligence which have reached us during the week, importance is attached to the announcement that France and Great Britain have arrived at an amicable understanding both with regard to the Suez Canal and with regard to the New Hebrides. The announcement is all the more gratifying that it furnishes another illustration of the growth of that sentiment in favor of peace, among most of the leading powers of the world—a characteristic feature to which we have more than once called the attention of our readers.

On Monday last it appears the double convention was signed. The full details have not been made public, but enough is known to justify the opinion that while the arrangements are such as to secure peace, they do not involve the sacrifice of honor on either side. With regard to the Suez Canal, we are told, the convention provides that it shall be kept open in time of war; that a zone or belt on either side is to be determined by international commission ; that within the limits so determined and at both approaches, hostilities will be forbidden; that belligerents shall neither embark nor disembark troops or war material on the canal or in the ports of access; and that, if Egypt is unable to compel respect for the treaty, she will have the right to appeal to the Sultan, who, with the signatory powers, will take such steps as may be necessary to enforce obedience. It is also announced that the convention has been approved by Germany, Austria and Russia. With regard to the New Hebrides, it appears that the agreements of 1878 and of 1883 have been confirmed; that France shall evacuate the military posts, and that order shall be maintained on the Islands as formerly by the French and English men-of-war. The arrangements commend themselves by their common sense provisions. It is not yet time to say what is to be the ultimate fate of Egypt. But whether it is to remain under British protection, or under the joint protection of France and Britain, or whether it is to be neutralized, and made independent or semi-independent, it is absolutely essential that the Saez Canal be recognized as one of the highways of commerce, and that it be not subject to the whims and caprices, or affected by the course this movement covers but one item and that at changing conditions, of any one power. Considering the

[VOL. XLV.

APPROXIMATE GROSS REVENUE FROM THROUGH GRAIN TONNAGE.

	S	eptember.		Jan. 1 to Sept. 30.			
	1887.	1886.	1885.	1887.	1886.	1885.	
	\$	8	8 -	\$	8	8	
New York Central	94.000	177,000	81,000	993,000	1,230,000	986.000	
Erie	46,000	166,000	65,000	902,000	907,000	\$51,000	
Pennsylvania	37,000	60,000	36,000	387,000	447,000		
Del. Lack. & West	17,000	53,000	10,000	211,000	463,000		
West Shore	21,000	68,000	35,000	391,000			
Total	218,000	461,000	225,000	2.854.000	3.366.000	2.543.00	

We thus reach a total revenue from this source on the five roads in question of only \$218,000 this year, or smaller even than in 1885. In 1886 it will be observed the amount was over twice what it now is, or \$464,000. Of

THE CHRONICLE.

use to which the Canal has already been put, one wonders whether such an arrangement as that which has been sketched will command the approval of the British Parliament and people. It was the use which was made of the Canal by Lord Beaconsfield in the early part of 1878 which compelled Russia to halt, and which ultimately substituted the treaty of Berlin for that of San Stefano; and it was the use which was made of the Canal by Lord Wolseley in 1882 which broke the power of Arabi Pasha. Under the new arrangement it might be possible to make such use of it as was made by Lord Wolseley, whose object was to put down a rebellion; but if the convention be accepted in the form in which it has been sent to us, it will not be possible for any future Lord Beaconsfield to terrorize Russia or any other European Power, by using the Canal for the purpose of transporting Indian battalions to Malta. If, then, there is a sacrifice in the arrangement at all, the sacrifice is on the side of the British Power.

But it is difficult under any system of neutralization to see how any other arrangement could be made; and if concession or sacrifice has to be admitted it is all the more praiseworthy that it has been made in the interests of peace-In the event of a rising of the natives in India, it might be found to be extremely difficult to prevent the British Government from using the canal for the conveyance of troops; and it will not be at all a surprise to us to learn that the convention contains some provisionary clause looking to such an emergency. The great point gained by such a convention, whatever may be its subordinate provisions, if it should be accepted by all the Powers, will be that the Canal, at all times, in war as in peace, will be a secure pathway for commerce. If the Panama Canal should ever be completed, it will have to come under the same conditions. What is wanted now, and what must more and more become a necessity, is increased facility for international trade and intercourse. The canals and tunnels of the future must be cut for peace, not for war, purposes.

The New Hebrides arrangement, although of less importance than that regarding the Suez Canal, is still of the utmost consequence when looked at from the standpoint of peace or war. Since 1853, France has claimed lordship over New Caledonia and its dependency, the Isle of Pines. But little use was made of the territory till the fall of the Commune and the transportation of the Recidivists. The presence of French ships of war in these waters, where there was no rival power present in any force, led to not unnatural consequences. It encouraged the spirit of conquest or of occupation. Landings were affected on some of the New Hebrides, a group of islands lying a little more to the east, but at no great distance from New Caledonia, and military posts were established. In the meantime the Australian colonies were overrun by escaped convicts from New Caledonia. Complaints were made to the British Govern. ment. France was remonstrated with; and yielding to the pressure which was brought to bear upon it, the French Government came under obligations in 1878 and again in 1883. The promises, however, were made only to be broken. Meanwhile the deportation of criminals of a much more degraded sort than the Recidivists continues; and among the Australian colonists who have, naturally enough, a hearty detestation of convict settlements, the opinion prevailed that France had resolved to pollute their neighborhood by the scum of her population. The New Hebrides were to be turned to a use similar to The cry became general in that of New Caledonia. Queensland, in New South Wales and in Victoria, "We "have got rid of our own penal colonies; and we shall not

"have French Botany Bays at our very coasts." Deputations were sent to London, and the Imperial Government was informed that if France did not let go her hold on the New Hebrides the colonies would take up arms in their own defence. At the Colonial Conference held in London during the early summer, these views were freely and forcibly expressed in the ears of the Government; and Lord Salisbury, spite of his coldness and apparent haughty indifference, which greatly offended some of the Colonial representatives, found it necessary to give the whole subject his serious consideration. It would not do to let the colonists go to war on their own account. The consequences might be disastrous. The result has been the convention of which we have above given the outline. France continues in possession of New Caledonia; but she lets go her hold upon the New Hebrides. It is the first time that the Australians have raised the cry with any emphasis, "Australia for the Australians;" and the fact is not likely to be forgotten by them that they have already obtained a victory. The influence, the strength of which they have experienced, they will continue to exert ; and the presumption is that the deportation of criminals to New Caledonia by the French Government will soon be discontinued.

The most cheering fact in connection with the whole affair is the evidence which it furnishes of an improved state of feeling between France and Great Britain. Since 1882 their relations have not been of the most friendly kind; and they have been pursuing opposite policies. France and England have really no opposing interests; and the absence of good feeling between them has been a cause of regret. This return to a good understanding cannot fail to have a happy effect.

IMPORTS AND EXPORTS FOR SEPTEMBER.

The Bureau of Statistics has issued its detailed statement of the foreign commerce of the country for the month of September, and the nine and twelve months ended with Sept. 30, 1887, as well as comparisons for the corresponding periods of the preceding year, as follows.

MERCHANDISE.

101 I	in on the second

Monetary Commercial English News

[From our own correspondent.]

LONDON, Saturday, October 15, 1887. At times during the past week panicky symptoms have been observed on the Stock Exchange. The speculative markets have been more or less in a state of disorganization Nothing certainly has occurred to influence appreciably the real value of the various issues either for better or worse though whatever variation may have occurred should have

been productive of greater steadiness. But these movements have of late manifested a growing tendency to frequently repeat themselves. The speculative area so far as stocks are concerned is becoming wider year by year, while the par price of the new issues is placed so low that even those with

ways are increasing. A larger volume of business is thus clearly shown, which may perhaps be further increased by the subsidence of monetary stringency.

The money market has entered upon an easier phase. The continued recovery in the American exchange and the cessation of the gold inquiry for New York have had a distinct influence here, especially as the commercial demand for money is only moderate, while balances have so far increased as to induce the discount establishments to lower their rates of allowance on deposits 1/2 per cent, giving 21/2 per cent for money at call and 234 per cent if with notice. The jointstock banks have made no change, their allowance being still 2½ per cent for deposits at notice. Stock Exchange requirements were met by the banks advancing to the House at the rate of about 4½ per cent per annum for the fortnight. The general charge for short loans has been about 21/2 to 3 per cent. In the Bank of England return the variations are rather important. It is clear that there has been more move ment in money. The payment of the dividends has reduced the total of public deposits by £3,174,395, and the repayment of loans has lowered the total of "other securities" by £1,666,. 748, but in spite of this "other deposits" have increased £1,438 * 381, the present total being £23,482,961, against £24,662,057 last year. In the matter of reserve there has been a gain of £137,554, owing to the contraction of £253,045 in note circulation and the proportion to liabilities which last week was 38.69 per cent is now 41.59 per cent. As regards bullion a deficiency of £115,491 is shown, notwithstanding that £103,000 was sent in from abroad during the week. It would therefore appear that about £218,000 has gone into general circulation. The amount of the reserve is now £11,315,766, or about £684,-000 more than last year and the stock of bullion which is £20,004,541 shows a deficiency compared with that period of about £280,000.

small means are able to participate in the chance of the great profits which are promised by the advertising toot. Individually these operations do not count for much, but collectively they represent a total which has a somewhat weighty influence upon the markets; in fact, persistent small sales are more likely to unsettle values than the sale of a similar amount of stock in a single block. Apparently the losses lately have fallen mainly upon the professional speculators, who have been living on one another. The public do not appear to have supported the markets. This unsound condition of Stock Exchange dealings has a very bad effect upon the introduction of new companies. It is known that there is a long list ready, but times are too unpropitious, and the schemes are therefore shelved until a more convenient season The delay is no doubt very vexatious to the syndicates and others immediately interested, but in their present temper the public could hardly be expected to support any project which was not thoroughly stable. Meanwhile it is some consolation to recognize that the signs of improving trade are multiply ing. The recent issue of the Board of Trade returns was not unsatisfactory, and the traffic statements on the goods rail-

THE CHRONICLE.

Silver.—A gradual decline took place during the beginning of this week, and when it became known on Wednesday that the India Council had made sales at under 1s. 5d. per rupee, the fall became more marked. The price to-day is 44d. per oz., which shows a decline of about 1 per cent compared with the quotation last week. Arrivals—£5,000 from Buenos Ayres and £30,000 from New York; total, £35,000. Exports, £40,000 to Rombay to Bombay

Mexican Dollars are quite nominal and no transactions have taken place.

The quotations for bullion are reported as follows :

GOLD. London Standard.	Oct. 13.	Oct. 6.	SILVER. London Standard.	Oct. 13	Oct. B.
Bar gold, fineoz. Bar gold, contain'g	s. d. 77 9	s. d. 77 9	Bar silveroz, Bar silver, contain-		d. 44 7-16
20 dwt3 silveroz. Span.doubloonsoz. S.Am.doubloons.oz.	77 10	77 10	ing 5 grs. goldoz. Cake silveroz. Mexican dolsoz	47 7-16	44 13-16 47 15-16

The fortnightly settlement on the Stock Exchange concluded this week was rather disastrous, five failures being announced. The decline of Canadian, American and Mexican railway securities has been the cause of the embarrassments, but the mischief has been aggravated by unsound and reckless trading. Unfortunately, also, evidence of dishonesty has not been wanting. A clerk in the employ of Messrs. Vagliano Brothers & Co., Greek merchants, is in custody on the charge of forging bills of exchange to an amount variously estimated at from £60,000 to £80,000, the bulk of which has been dissipated on the Stock Exchange. Some of these bills have been utilized to pay differences and others were lodged as cover against speculative dealings. It was owing to a doubt respecting the authenticity of one of these bills and a reference to Messrs. Vagliano on the subject that brought the whole matter to light. People are asking how such a description of cover could have been accepted and whether further unpleasant developments are not likely. The competition for business on the Stock Exchange has certainly of late been very keen and there is possibly less scrupulousness in accepting credits.

The official Receiver in Bankruptcy for Warwickshire has just issued his report and summary of the affairs of Messrs. Greenway, Smith & Greenway, bankers of Warwick & Leamington, and also of their private estates, who, it will be remembered, failed early last month, and the net result shows a deficiency of £311,170. In commercial circles considerable dissatisfaction is felt at the disclosures.

Messrs. Fuller, Herbert & Co., are authorized to receive subscriptions for 6 per cent first gold mortgage bonds for \$1,500,000 (part of an issue of \$3,600,000) of the Atlanta & Hawkinsville Railroad Co. of the U.S.A. The issue price being £195 for \$1,000 bond.

The capital creations for the week have been:

NATIONAL BANKS.-The following banks have recently been organized :

3,803—The McPherson National Bank, Kansas. Capital, \$100,000 Eli P. Williams, President; W. H. Cottingham, Cashier.
3,804—The Burrill National Bank of Ellsworth, Maine. Capital, \$50,000. Charles C. Burrill, President; James E. Parson,

Cashier.

IMPORTS AND EXPORTS FOR THE WEEK. - The imports of last week, compared with those of the preceding week, show an increase in both dry goods and general merchandise. The total imports were \$10,155,381, against \$7,812,794 the preceding week and \$8,905,539 two weeks previous. The export s for the week ended Oct. 25 amounted to \$5,673,052, against \$6,277,025 last week and \$6,286,022 two weeks previous. The following are the imports at New York for the week ending for dry goods) Oct. 20 and for the week ending (for general merchandise) Oct. 21; also, totals since the beginning of the first week in January :

A firm trade has prevailed for wheat. A quotable advance can hardly be mentioned, but the tendency keeps strong and the advantage remains with sellers. The severe weather hints at an early closing of the navigation, thereby reducing shipments to us, but if we regard the position from a statistical point of view there is still greater reason to anticipate an improvement. The quantity of wheat and flour afloat to us is some 220,000 qrs. less than last year. But the recovery is very slow. The average price for the season is still some 2s. 4d. per qr. below what it was last year, so that there must be a distinct advance before we are placed on a level with 1886. It should not, however, be long before a close approximation is effected, for while the tendency is now towards improvement, last year at this time there was a developing weakness.

The following shows the imports of cereal produce into the United Kingdom during the first six weeks of the season, and other items, compared with previous years:

Dry Goods Gen'l mer'dise		$\$1,625,426 \\ 6,716,915$

American Cotton Oil Trust.—The trustees of the American Cotton Oil Trust have completed the reorganization of the board. N. K. Fairbank, of Chicago, and J. O. Moss, of this city, were elected in place of W. H. Burnett, of Chicago, and Lyman Clapp, of Providence, R. I. The board now is made up as follows: J. H. Flagler, N. K. Fairbank, J. O. Moss, E. Urquhart, J. Aldige, W. P. Anderson, J. H. Kendall, J. L. Macaulay and John Scott. Mr. Flagler has been chosen President. He is President of the National Tube Works of McKeesport, Penn.

Arizona Mineral Belt.—Construct n upon the Arizona Mineral Belt road has ceased, owing to some misunderstanding between its officers and the Atlantic & Pacific as to the erms of the latter company's subscription. President Nutt of the A. & P. says that the conditions of his company's subscription were never fulfilled. There are now thirtysix miles of track completed on the Arizona Mineral Belt road, and grading done and ties scattered for seven miles more. A halt in construction is necessitated, and meanwhile the road has been leased for operation to the Arizona Lumber Company, which has advanced the company funds partly sufficient to meet its pay roll, said lease being terminable on payment of the debt. There are debts of some \$50,000 in all.

Atchison Topeka & Santa Fe.—As to the Chicago extension the work of construction is now going forward with remarkable rapidity. Fully 90 per cent of the grading has been finished, and the track-laying is being pushed at the rate of four miles per day on each division. Up to the present time 144 miles of track have been completed, 68 on the Missouri division and 76 on the Iowa division. This represents almost one-third of the total track-laying of the entire line.

will issue its extension mortgage bonds at \$20,000 a mile. The road commences at Knoxville Junction, Tenn., on the Cincinnati Southern, and runs easterly via Oakdale through Oliver Springs to Hawkinsville, with a branch from Oakdale to the mouth of the Little Emery river, a total trackage of about 25 miles. An extension is under construction from Oliver Springs to Clinton, on the Knoxville & Ohio Railroad, 17 miles and two branches of five miles each, making a total mileage of about 52 miles. This acquisition serves to increase the importance of the Knoxville & Ohio line to the East Tennessee system. The Knoxville & Ohio Railroad is the line by which the East Tennessee Virginia & Georgia Railroad makes connection with Louisville and Cincinnati via Jellico. It is of great importance to the system in giving control of the business from northern cities to East Tennessee and points further south. The road was built through the mountain ranges at large cost, and while it is only seventy miles in length, about \$4,000,000 were expended by the City of Knoxville, the counties through which it passes and the present company, in its construction. It cannot be paralleled, by the terms of the charter, within 25 miles, and occupies a commanding position for future business, being the only line reaching the Coal Creek coal fields.

Ogdensburg & Lake Champlain-Lamoille Valley.-The Court of Appeals of New York has reversed the decision of the lower court and declared that the Ogdensburg & Lake Champlain Railroad must operate the Lamoille Valley extension and pay the bonds thereof before any payment is made upon Ogdensburg & Lake Champlain income bonds. These bonds amount to \$350,000, and the decision net only declares them valid, but restores the Vanderbilt connection with Northern New England. Counsel for Messrs. R. L. Day & Co., who brought the suit in the interest of the income bondholders, have secured a stay of proceedings, pending a motion to be made for leave to serve an amended complaint.

-Messrs. Blake Bros. & Co., the well-known bankers, offer a first-class city security in the CHRONICLE advertising columns.

Auction Sales.—The following were sold this week at auction by Messrs. Adrian H. Muller & Son :

[VOL. XLV.

Atlanta & Hawkinsville.—London cable advices state that subscriptions are solicited for an issue of \$1,500,000 in 6 per cent first mortgage bonds of the Atlanta & Hawkinsville Railroad Company. The Atlanta & Hawkinsville line begins at Atlanta, entering the city over the East Tennessee Virginia & Georgia Railway, with which it has a traffic agreement. The \$1,500,000 is part of an authorized issue of \$3,600,000.

Chester Valley.—The plan for the reorganization of the Chester Valley Railroad proposes that a long term 4 per cent income mortgage bond he issued, the interest to be payable only if earned, for the principal of the first mortgage of \$500,000. For the arrears of interest on this mortgage, amounting to about \$350,000, 5 per cent preferred stock is to be issued, and for the present stock, amounting to \$971,900, new common stock is to be given, par for par. This has the approval of the committee, but the Reading Railroad Company, which by virtue of the ownership of \$252,000 mortgage bonds practically controls the situation, must also approve of it.

East Tennessee Virginia & Georgia-Knoxville & Ohio-Waldens Ridge.-The East Tennessee road has recently come into possession of the Waldens Ridge road, and

WALL STREET, FRIDAY, Oct. 28, 1887-5 P. M. The Money Market and Financial Situation.—The week has been almost devoid of new features.

The Philadelphia & Reading scheme progresses favorably, and this being now by far the largest operation going on in financial circles it is watched with the more interest. The net earnings of the Railroad and Coal & Iron companies for the month of September were \$1,262,934, double what they were in the same month of 1886, and the net earnings for the ten months of the company's fiscal year ending November 30 now foot up \$9,815,686. As the fixed charges under the reorganization are expected to fall below \$7,000,000 this is a good outlook for the bonds, and it gives an assurance' that the new Reading 4 per cent mortgage bonds will rank from the start as a first-class security.

There is another long view of the Reading affair that makes it of great importance, and that is the undoubted fact that it will remove from the anthracite coal companies the great obstacle in the way of harmonious working. Heretofore the Reading has been a weak spot that nothing could overcome, and being in a condition of never-ending impecuniosity, the company broke through every prudential rule and threw its products on the market. Now the case will be different, and the position of the coal roads, as a class, will be much stronger than it has ever been before.

The attack on M. K. & T. stock and bonds has been one of the oddities of the week, and the Street is unable to tell whether it is anything more than a little badgering of Mr. Gould to give him a "send-off" before he sails on the Umbria to-morrow; the sales look too large, however, for such by-play.

Just before the close it was known that a receiver had been appointed for the Chesapeake & Ohio Railroad, but this was not regarded as of much importance, as it has only been a question of time for a year or more past when this would be done.

The prospect seems good at the present moment for a full winter business on the trunk lines. We are now within a month of the usual closing of inland navigation, and the export movement of wheat is held in check by the very low prices at Liverpool, while there is almost a certainty of large quantities being needed later on. The demand for anthracite coal at the West can hardly be met, and the traffic will probably continue to be heavy.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 3 to 6 per cent, the usual rates to stockbrokers being 3@4 per cent. To-day the rates were 3@6 per cent. Prime commercial paper is quoted at $5\frac{1}{2}@6\frac{1}{4}$ per cent:

The Bank of England weekly statement on Thursday showed a gain in specie of £40,000, and the percentage of reserve to liabilities was 45.47, against 43.87 last week; the discount rate remains unchanged at 4 per cent. The Bank of France lost 4,475,000 frances in gold and 1,275,000 frances in silver.

The following table shows the changes from the previous

To-day the rates on actual business were as follows, viz.: Bankers' 60 days' sterling, $481\frac{1}{2}@481\frac{3}{4}$; demand, $485\frac{1}{2}@485\frac{3}{4}$. Cables, $486@486\frac{1}{4}$. Commercial bills were $480\frac{1}{4}@480\frac{1}{4}$: Continental bills were: Francs, $524\frac{3}{2}@525$ and $522\frac{1}{2}@523\frac{1}{3}$; reichmarks, $9411-16@94\frac{3}{4}$ and $95\frac{1}{3}@953-16$; guilders, $39\frac{5}{2}@39\frac{3}{4}$ and $39\frac{1}{3}@40$.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 4 discount; selling 4 discount@par; Charleston buying 4@3-16 discount; selling par; New Orleans, commercial, \$1 25@ \$1 50 discount; bank, par; St. Louis, 50c. discount; Chicago, 40@50c. discount.

The rates of leading bankers are as follows:

October 28.	Sixty Days.	Demand.		
Prime bankers' sterling bills on London. Prime commercial.	$-\frac{1}{4} \frac{82}{803} \frac{1}{64} \frac{821}{81}$	486 @486 ¹ 2		
Decumentary commercial Paris (francs)	4 804 24 8 19			
Amsterdam (guilders) Frankfort or Bremen (reichmarks)	. 391016 2.10	$40^{1}8a40^{3}16$ $95^{1}4a95^{3}8$		

United States Bonds.—The week's business in Government bonds has been more active than for some time past, though most of the transactions were in comparatively small amounts. Prices of the 4s and $4\frac{1}{2}$ s have been quite strong and advancing, and are $\frac{1}{2}@\frac{5}{2}$ higher than a week ago.

The closing prices at the N. Y. Board have been as follows:

	Interest Periods		0cl. 24.	<i>Oct.</i> 25 .	<i>Oct.</i> 26.	0ct. 27.	<i>Oct.</i> 28.
4 ¹ 28, 1891reg 4 ¹ 28, 1891coup. 48, 1907reg. 48, 1907reg. 68, cur'cy, '95reg. 68, cur'cy, '96reg. 68, cur'cy, '97reg. 68, cur'cy, '98reg. 68, cur'cy, '99reg.	QMar. QJan. QJan. J. & J. J. & J. * This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.—State bonds have had a moderately active business, which has been distributed among quite a number of issues, none showing any special activity. Prices fluctuate little and are not much changed.

The railroad bond market shows some revival of confidence, and during the past week prices have been gradually working upward, there being a decided reaction from the previous depression. The market has shown relatively much more activity than stocks, though the business has been widely distributed and not marked by special activity in any particular classes. There has also been no sharp or decided advance, but prices have generally improved moderately from day to day, and show more or less advance compared with a week ago. Strength in the bond market is usually an indication of increasing confidence in financial circles generally-at least bonds are often the first to respond to improved conditions, and for this reason the bond market is watched with considerable interest. There have been a few exceptions to the general strength, and Kansas & Texas bonds to-day were notably weak, declining very sharply, while Chesapeake & Ohios also fell off at the close on the appointment of a receiver for the company.

Railroad and Miscellaneous Stocks.-The stock market has been dull and speculation has been of an unimportant character. Nothing of special interest has been developed during the week in financial circles, and the fluctuations, in most cases, have been comparatively slight. The advance in prices which occurred last week was not further continued this week, and the early dealings were marked by some weakness, though the business was restricted in volume. The bears renewed their attacks, but with more caution, as there are indications of a strong undertone, and the bull element is somewhat more confident than it had been. Later in the week, on bull support and favorable reports of earnings on some of the granger lines, particularly Northwest for September, there was a stronger tone. It had been reported that Northwest would show a decrease, whereas the earnings when reported showed an increase of \$107,000, which fact was immediately used by the bulls and made the basis for a moderate advance. The movement for the week, however, has been somewhat irregular and uncertain, and neither bulls nor bears have gained much advantage. Indications are not wanting of a more confident feeling in financial circles generally, though there is still hesitancy in buying stocks. The absence of any unfavorable developments during the past week and the continuance of satisfactory conditions, while they have not established any advance to speak of, have yet had their effect in increasing the better feeling. Special features have been few. Northern Pacific preferred was conspicuous in the early depression, but it subsequently recovered. Western Union was quite strong on Thursday on the report of an adjustment of rates with the Postal Company. Kansas & Texas was sharply depressed on the report (subsequently denied) of the probable appointment of a receiver and the reorganization of the company. This, and the appointment of a receiver for Chesapeake & Ohio, depressed the market at the close.

week and a comparison with the two preceding years in the averages of the New York Clearing House banks:

	1887. Oct. 22.	Diffr'nc's fr'm Prev. Week.	1886. <i>Oct.</i> 23.	1885. Oct. 24.

Exchange.—The sterling exchange market has been quiet most of the past week, though there was a slight increase in the demand at one time, principally from importers. Rates have ruled firm to strong, owing to the lack of pressure from commercial bills, the supply of these having been quickly absorbed. Some of the principal drawers advanced their posted rate for long sterling early in the week $\frac{1}{2}$ c., and subsequently also advanced the short rate, while others keep the old rates. Posted rates to day are $4\ 82\cmmode{a}4\ 82\frac{1}{2}$ and $4\ 86\cmmode{a}4\ 86\frac{1}{2}$. The gold movement is declining, and only \$1,590,000 have arrived since last Friday, most of which was received early in the week.

THE CHRONICLE.

[VOL. XLV.

Investment. Railroad Intelligence.

570

uitized for FRASER

stlouisfed.org/

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., January, March, May, July, September and November, and is fur-nished without extra charge to all regular subscribers of the CHRONICLE. Extra copies are sold to subscribers of the CHRONICLE at 50 cents each, and to others at \$1 per copy.

RAILROAD EARNINGS.

Gross Earnings to Latest Dates.—The latest railroad earn-ings and the totals from Jan. 1 to latest date are given below for all the railroad companies from whom reports can be obtained.

Net Earnings Monthly to Latest Dates.-The tables following show the net earnings to latest dates reported, the returns for each road being published here as soon as received, but not kept standing from month to month. The first table includes all roads for the latest month and from January 1, 1887, the other tables showing those roads separately whose fiscal years begin at other dates than January 1.

ANNUAL REPORTS.

Cincinnati Jackson & Mackinaw Railroad,

(For the fiscal year ending Sept. 30, 1887.)

A map of this road will be found in the next issue of the Investors' Supplement to be published November 26. The annual report has just been issued and contains the following:

ROAD OPERATED.

Road in operation at date of last report :	Miles.
Cecil, Ohio, to Lewisburg, Ohio	103.4
Since constructed or purchased:	
Lewisburg, Ohio, to Carlisle, Ohio	23.6
Cecil Obio to Bryan. Obio	18.8
Dundee, Michigan, to Allegan, Michigan.	133
Dundee, Michigan, to Manhattan Junction, Ohio, leased rights	20.9
Manhattan Junction, Ohio, to Toledo, Ohio, leased rights	41
	301.8

The road in process of construction extends from Bryan, Ohio, to Jackson, Michigan, 60.5 miles, with other small pieces, making 671/2 in all.

All this work is fast approaching completion, except Addison to Jackson, 17 miles, and Reservoir branch, 1 mile, where delay has been incurred by right of way and local aid questions. The main track is all steel, 50, 52 and 56 pounds, mostly the latter.

The President's report mentions, among the important events of the year, the reduction of the bonded debt to \$10,000 per mile; the reduction of interest charges from 6 per cent to 5 per cent; the purchase of the railroad lately known as the Michigan & Ohio, and merging it into this property; the extension of lines from Lewisburg, O., to Carlisle, O., and from Cecil, O., to Bryan, O., 42 miles; the substitution of new steel rails for all iron ones on the main track.

Having at disposal for future extensions \$2,545,000 of the first mortgage bonds, the fact is pertinent that the strategic points to reach a very large trade are Saginaw, Mackinaw and Muskegon.

The distance from Mackinaw to tide water at New York via Michigan Central and New York Central is 1,062 miles. The distance to tide-water at Baltimore, using the present and proposed lines, and the Baltimore & Ohio Railroad, would be 1,043 miles.

\$2,545,000

The consolidated 6 per cent mortgage of the Cincinnati Van Wert & Michigan Railroad Company, of which \$900,000 had been issued, has been taken up, retired and canceled.

Toledo & Ohio Central Railway.

(For the year ending June 30, 1887.)

The annual report of Mr. Stevenson Burke remarks that "the rates for transportation have been very low, much lower than upon most of the other roads of the State, and lower than the cost for moving freight upon most of the railways of the country. The fact that the operating expenses including taxes, considering the rates, were less than 70 per cent of the earnings, and that the track, structures and equipment were fully maintained, speaks well for the property, and gives good reason for believing that the rapid growth in business shown in the past year's operations, with a moderate increase in rates will produce satisfactory results. There is still much to be done in the way of improvements and additions to the property. The terminal property in Toledo, now in litigation, needs filling up and improving. Many trestles along the line need filling with earth, culverts of stone must replace wood, wooden bridges must be replaced with iron, additional branches must be built, and additional sidings, and the road and equipment must be added to and improved.

"These things will absorb for a while the surplus earnings, as the company has no other means of making the improvements and additions."

of the bonds having already assented to this reduction and the extension of the bonds for a hundred years, and we have little doubt that the balance will make the exchange as soon as they fully understand the situation; but as the road needs more money to in part double-track the road and make additions to the rolling sto k, it seemed necessary that some plan should be devised by the shareholders to raise money for that purpose. It is not the intention now to disturb the bonds but to pay interest on them as heretofore."

Cincinnati Hamilton & Dayton.-Judge Vanderveer, of the Butler County Common Pleas Court, appointed a receiver for this company, but Judge Cox, of the U.S. Circuit Court. gave a stay of proceedings at Cincinnati, October 28. The Circuit Court announced its decision simply to continue the stay of proceedings until a full hearing can be had by the court. Thursday (November 3) was designated as the day for the hearing to begin.

Lake Erie & Western .-- Mr. Calvin S. Brice was elected President of the Lake Erie & Western Railroad Company at a meeting of the directors this week. Nelson Robinson was made Vice-President and an executive committee, of which General Samuel Thomas is the head, was chosen. The changes are partly the consequences of the recent sale of his interest in the company by C. R. Cummings of Chicago, who has been its President. The fiscal year has been changed to end on Dec. 31.

New York & Rockaway Beach .- This company has filed a mortgage to secure the proposed issue of \$1,000,000 gold bonds, bearing 5 per cent and running forty years.

Northern Pacific-Oregon Trans-Continental.--The Oregon Trans-Continental Company's directors have ordered the withdrawal of all the suits against the Northern Pacific Company, including that for an injunction against the building of the Palouse Branch. The withdrawal of these suits is the begin-ning of the era of good feeling and harmony between the Oregon companies and the Northern Pacific. As to the division of territory and the Oregon railway lines it is stated that the Union Pacific is to lease and operate all the lines of the Oregon Railway & Navigation Company east of Snake River Junction, the Union Pacific taking the lines west of that point. The Northern Pacific's through business to Portland is to be pro-rated on a mileage basis between Snake River and Portland.

Pennsylvania Railroad.-The gross and net earnings for September and for nine months, January 1 to Sept. 30, were as below stated. On the lines west of Pittsburg & Erie the net result, after payment of interest and all charges, is shown in

how many general mortgage bonds will be issued until the accounts with Drexel & Co., who have been paying interest on the general mortgage pending reorganization, are adjusted, and a settlement has been made with the holders of divisional bonds of the Coal & Iron Company, and the holders of leased line securities have agreed to take new 4's for their present bonds and stock. Up to the present time, however, the amount expected to be issued does not exceed \$50,000,000, and if this amount is increased it will be in exchange for other securities bearing 6 and 7 per cent interest, so that an addition to the principal will reduce the interest charges.

"There are \$12,186,000 of divisional coal land mortgage bonds outstanding bearing 6 and 7 per cent interest. The receivers have purchased the interest in most cases at rates varying from 3 to 6 per cent, while some have been paid in full. It is expected that holders of most of these bonds will be glad to accept the better security offered by the new 4's and will exchange their holdings. Ten million dollars of the generals have been set aside for this purpose.

"The principal of the present general mortgage is \$24,681,-000, upon which no interest has been paid since July, 1884. On January 1, 1889, three and a half years' interest, amounting to \$5,458,010, will be due.

"Drexel & Co. have paid out in the interim \$2,458,100 in purchasing the interest at 4 per cent, which sum must, of course, be returned to them. To pay off the present generals, principal and interest, will require \$30,139,000.

""If the generals are paid off the bonus of \$12,000,000 in first preference bonds will not be required. Only the money received from assessments, amounting to about \$12,000,000, will be capitalized in first preference bonds.

"The original belief was that about \$16,000,000 of second preference bonds would be issued, but since that time about \$3,500,000 of bonds h ld as collateral have been sold out, and the issue of second preferences will thereby be increased. It is now estimated that about \$20,000,000 of second preferences will be issued.

"For the same reason the issue of third preference bonds will be increased from about \$12,000,000 to nearly \$16,000,000. A part of this increase is, however, accounted for by the settlements made with certain leased lines, as the Schuylkill Navigation and Susquehanna Canal, according to which the holders agreed to exchange their leased line securities for Reading bonds of this class."

THE NEW COMPANY.

The capitalization and fixed charges of the new company are estimated as follows:

e	Amount.	Charges.
Prior mortgages	\$33,421,700	\$2,137,607
New generals—	\$2,100,000	
For real estate liens General mortgage scrip	1,697,000	
Coal & Iron bonds	10,000,000	
Car trusts	2,000,000	
General mortgage and interest	30,139,000	· · · · ·
To leased lines.	4,000,000	
Total generals	49,936,000	1.997.440
Rentals.	20,000,000	2,750,000
Total absolute charges	10.000.000	\$6,885,047
First preference.	12,000,000	600,000 1,000,000
Second preference	20.000,000 16,000,000	800,000
Third preference	10,000,000	000,000
	D101 055 500	0.007.017
Totals	\$131,357,700	9,285,047
Stock.	$39,115,576 \\ 6,225,327$	
Deferred incomes	0,220,027	
Total	\$176 698 603	

Of the new interest charges only \$6,885,047 will be absolutely payable, the preference bonds receiving interest if carned in the order of their priority.

-The ten days allowed the holders of Reading first series fives in which to come into the arrangement made with the Wharton Kemble party has expired, and only about \$300,000 took advantage of the offer.

how many general mortgage bonds will be issued until the remains to be completed. The original cost of the road was accounts with Drexel & Co., who have been paying interest to have been \$15,000 per mile. The present value of the road, on the general mortgage pending reorganization, are adjusted, if it is to be completed, is figured at \$347,548, and if it is to be abandoned the value is only about \$125,000.

The total value of the road completed would be \$799,468. The amount required to finish and equip the road, including the payment of debts of \$110,000 and \$89,000 for future requirements, \$451,000.

Whether the road should be abandoned or the money should be raised to complete it was left to be decided at a meeting on Friday.

-The bondholders of the East & West Railroad of Alabama selected the following committee to investigate the affairs of the company: E. F. Browning, J. H. Browning, A. Prentice, T. S. Watson, J. S. Silver, R. W. Webb and F. C. Hollins.

Schuylkill Navigation Co.—The Schuylkill Navigation Co. has addressed a circular to the stock and bond holders of the company, advising those who have not already assented to the terms of settlement with the Reading trustees to do so, as the reconstruction trustees have declared their intention of accepting the securities which have been deposited. The following is a statement of the deposits which had been made to Oct. 13, 1887 :

	Issued.	Deposited.	Outstanding.

Total......\$12,457,134

\$11,785,333 \$671,801

South Atlantic & Ohio.—The South Atlantic & Ohio is the name of a railroad company in which several Boston people are interested, which proposes to build northwest from Bristol, Tenn., to the Kentucky State line. The capital stock is placed at \$4,000,000. Among the directors are John H. Inman, Geo. S. Scott and Wm. P. Clyde, New York; Nathaniel Thayer and Benjamin Dean of Boston, and Ex. Norton, President of the Louisville & Nashville Railroad. The new road will make connction with the L. & N. at Big Stone Gap, Wise County, Va. The South Atlantic & Ohio owns and controls about 1,600 acres in the vicinity of Bristol, and about 59,000 acres of fine ore land in North Carolina, whence the road will be extended later.

Toledo Peoria & Western.—The attorney of this railway company, with headquarters at Peoria, Itl., says the company has, up to date, settled with the relatives or legal representatives of forty of the people who were killed at Chatsworth, and with sixty of those who were injured. The highest amount paid out on death loss was \$2,000.

Wabash.—Dow, Jones & Co sent out on Friday the following announcement concerning Wabash : "The proposed plan for settlement with the Wabash bondholders has been practically perfected. Under it a first mortgage upon all the lines east of the Mississippi River from Chicago, Detroit and Toledo will be made, into which the principal of all the first mortgage bonds now existing can be funded. This mortgage will extend over the lines west of the Mississippi River, and replace the mortgages existing thereon as they mature. All first mortgage bondsreceive past-due interest in cash, except the Detroit division, which will receive first mortgage bonds for the interest past due.

"A second mortgage bond is to be made covering all the lines east of the Missis-ippi River, and under it the equipment, including \$5,000,000 now covered by the car trusts, will be covered, and upon which it will be a first lien. Under certain conditions this mortgage may be extended over the lines west of the Mississippi River. Into these bonds the principal of the existing second mortgage divisional bonds can be converted, also that of the consolidated convertible and the 7s of 1879; the interest on all these issues can be funded into first mortgage bonds. Interest upon interest will be allowed upon

-The gross and net earnings for September, and from Dec. 1 to September 30, have been as below given. The net earnings of both companies aggregated \$1,262,934 in September, 1887, against \$633,557 in September, 1886; for the ten months, net in 1886-7 were \$9,815,686, against \$4,651,627 in 1885 6.

Rome & Decatur-East & West of Alabama.-Major John Byrne, who was commissioned to make an examination of the Rome & Decatur Railroad, which was being constructed by Grovesteen & Pell, who failed two months ago, submitted his report at a meeting of the creditors of the firm in the banking house of Eugene Kelly & Co.

Track is laid from Rome westward fourteen miles and from Atlanta eastward sixteen miles. A gap of twenty-seven miles

FRASER

all first mortgage bonds and upon the 2ds, but not upon the consolidated convertible and the 7s of 1879. A foreclosure of the first mortgage is a part of the plan. It is expected that this plar will go into effect immediately.

"A bondholders' committee, Messrs. McHarg, Atkins, Lawrence, Terry and Romaine, will supervise proceedings and aid in carrying out the plan.

-The notice of payment of coupons has finally been issued as follows :

as follows: The Wabash Railway first mortgage coupons, matured August 1 1885, on Toledo & Illinois, Lake Erie, Wabash & St. Louis, Great Western of 1859, Decatur & East St. Louis, and Illinois & Southern Iowa railroad bonds, and on first mortgage funded debt bonds [series A], apportioned to above; the coupons matured November 1, 1885, on Quincy & Toledo Railroad bonds and on August 1, 1885, on funded debt bonds [series A], apportioned thereto; the coupons matured June 1, 1885, on the Hannibal & Naples Railroad bonds, and on July 1, 1885, on Chicago Division bonds, with accrued interest on all such coupons to November 1, 1887; also such amount of interest on first mortgage scrip certificates as will make the interest payments thereon of even date with the funded debt coupons on the same division; will be paid on November 1, 1887, at the Metropolitan Trust Company, 35 Wall Street, New York. Western New York & Pennsylvania —A mortgage in

Western New York & Pennsylvania.—A mortgage in favor of Carl Schurz and I. N. Seligman was placed on record at Erie, Pa., against the Western New York & Pennsylvania Railroad (the reorganized Buffalo, New York & Philadelphia) for \$15,000,000,

Wisconsin Central.—This company's new consolidated. \$21,000,000 mortgage has been filed.

Reports and Documents.

ABSTRACTS OF RAILROAD MORTGAGES.

We publish this week abstracts of the consolidated first mortgage on the Cincinnati Jackson & Mackinaw Railroad, dated December 1, 1886; of the first mortgage on the Kansas City Springfield & Memphis Railroad, dated April 4, 1883; of the first mortgage on the Kansas City Memphis & Birmingham Railroad, dated February 10, 1887, and of the trust deed of the Richmond & West Point Terminal Company, dated February 1, 1887.

CINCINNATI JACKSON & MACKINAW.

CONSOLIDATED FIRST MORTGAGE ON THE CINCIN-NATI JACKSON & MACKINAW RAILROAD TO SE-CURE GOLD BONDS DUE DECEMBER 1, 1936.

Date.—December 1, 1886.

Parties.-The Cincinnati Jackson & Mackinaw Railroad Company of the first part, and the Central Trust Company of New York, Trustee, of the second part.

Property Covered.-The railroad of the Company extending from Cincinnati, Ohio, through the counties of Montgomery, Mercer, Williams, etc., in said State, to a point on the boundary line between Ohio and Michigan, about 20 miles east of the northwesterly corner of Ohio, and thence northerly to' Jackson, Michigan; and also the railroad formerly owned by the Michigan & Ohio Railroad Company and conveyed to the party of the first part by deed dated March 25, 1887, said road extending from Toledo, Ohio, through the counties of Hillsdale, Kalamazoo, etc., in Michigan, to Allegan, Allegan County, Michigan; and all branches and extensions thereof, and including the franchises, rights of way, lands, buildings, rolling stock and equipments of every kind for use in connection therewith; and all other property of every kind and nature appurtenant to said railroad, whether now owned or hereafter acquired, and also including all its lands and terminal facilities of every kind.

THE BOND.

First Mortgage Consolidated Five Per Cent Gold Bond. Date.-December1, 1886.

Denomination.-\$1,000 Amount Authorized -\$6,000,000; but not to exceed \$10,000 per mile of completed road, the final fraction of the main line being taken as completed road, the final fraction of the main line being taken as one mile. But in case of the construction or absolute acquisi-tion of lines from Franklin to Cincinnati, in Ohio, 41 miles, or from Dundee, Michigan, to Teledo, 21 miles, bonds may be issued there-for at the rate of \$25,000 per mile, though not for more than 75 miles in all. On any branch, lateral or diverging line now or hereafter constructed, not less than one mile in length, bonds may be issued at the rate of \$10,000 per mile, but fractions of a mile shall not be counted counted.

Principal Payable.—The principal is payable December 1, 1936, in gold coin of the present standard, of weight and fineness, at the agency of the Company in New York City.
Interest Payable.—The interest is 5 per cent per annum, payable in like gold coin June 1 and December 1, at said agency in New York.
Course or Registered.—Coursen but may be registered on the books of

Coupon or Registered. - Coupon, but may be registered on the books of the Company. It may again be discharged from registry by a transfer to bearer.
 Sinking Fund.-None.

Prior Liens.-There are outstanding \$1,200,000 first mortgage bonds, secured by a mortgage dated April 14, 1881, and \$1,200,000 second mortgage income bonds, secured by a mortgage dated April 28, 1881, both issued by the Cincinnati Van Wert & Michigan Railroad Company, which are prior liens on 80 miles of the road, extending from a point on the Wabash St. Louis & Pacific Railroad, in Paulding County, to a point on the Dayton & Union Railroad, in Darke County, in Ohio. \$1,200,000 of bonds issued hereunder shall be used exclusively for the purpose of exchanging the aforesaid \$1,200,000 first mortgage. The privilege to the holders of these last-mentioned bonds of making the exchange ceases November 1, 1887, unless the directors of the company extend the time. \$1,200,-000 of the preferred stock of the company is set aside to be used exclusively in exchanging said second mortgage income bonds. Income bonds so exchanged shall be held by the Trustee alive until the exchange is completed, when they shall be canceled. First mortgage bonds of 1881 received in exchange shall be held uncanceled as collateral security for bonds issued hereunder, until all of said first mortgage bonds of 1881 have been exchanged, and the second mortgage of April 28, 1881, has been discharged, whereupon they shall be canceled. Default.—Upon default of interest or principal of any of the bonds, continued for three months after demand for payment, then, at the request in writing of the holders of onefourth of the outstanding bonds, the Trustee shall enter upon and operate the property; and it shall apply the net proceeds therefrom to the payment of the interest in default. If such arrears of interest shall be thus entirely paid, the railroad shall be restored to the company; provided, however, that if the holders of one-fourth of the outstanding bonds shall notify the Trustee, in writing, before the interest so in default has been paid, that they desire the principal of all the bonds due and payable, then, upon notice to the Company, the said principal shall immediately become due and payable, and the Trustee shall continue to manage the railroad until the principal and interest of the bonds are paid, or until the said mortgaged premises are sold, as hereinafter provided. And upon default of interest or principal for three months, the principal having become due either by the terms of the bonds or by the election of the bondholders as aforesaid,

it shall be lawful for the Trustee, upon the written request of the holders of one-fourth of the outstanding bonds, to sell the mortgaged premises at public auction. Upon default of inter, est, continued for three months after demand for paymentthen, if the holders of one-fourth of the outstanding bonds so elect, and shall so notify the Trustee, the principal of all the bonds shall immediately become due and payable. And in case the principal has become due, or in case of default in the performance of any other covenant herein, continued for three months, then, at the request in writing of the holders of one-fourth of the outstanding bonds, the Trustee shall fore-close the Company's equity of redemption in the premises by proceedings at law or in equity; and one-fourth in interest of the bondholders shall have a right to direct the proceedings for foreclosure. No purchaser at any sale shall be compelled to assume the obligations arising under any lease or contract hereby conveyed, unless the purchaser elects so to do. The net proceeds from any operation of the property by the Trustee or a receiver shall be applied to the payment in full of all the outstanding bonds and the interest coupons payable As the coupons atup to the time of such payment ratably. tached to the bonds mature they shall be paid by the Company and canceled.

Trustees.—In case of a vacancy in the office of Trustee, holders of not less than one-fourth of the outstanding bonds and the Company may agree upon and appoint a new Trustee. And in the event of failure to agree in the selection, either the Company or the holders of one fourth of the outstanding bonds may apply to any court of competent jurisdiction to appoint a Trustee, the failure, neglect or omission of said parties to agree being made manifest in such application.

Bondholders' Meetings. - Whenever occasion therefor arises, it shall be the duty of the Trustee, at the written request of the holders of at least 50 of such bonds, to call a meeting of the bondholders to be held in New York City.

KANSAS CITY SPRINGFIELD & MEMPHIS.

FIRST MORTGAGE ON THE KANSAS CITY SPRING-FIELD & MEMPHIS RAILROAD TO SECURE SINK-ING FUND BONDS DUE MAY 1, 1923.

Date.—April 4, 1883.

Parties.-The Kansas City-Springfield & Memphis Railroad Company of the first part, and the New England Trust Company of Boston, Trustee, of the second part.

Property Covered.-All the railroad property now owned hereafter acquired by the Company in the States Missouri, Arkansas and Tennessee; that is to say, all its or of railroad, constructed and to be constructed from Springfield, Greene County, Missouri, easterly and southeasterly through the State of Arkansas to Memphis, Tennessee, a distance of about 290 miles; including branches, side tracks, right of way and all lands, materials, buildings and rolling stock now owned or hereafter acquired for use in connection with the railroad, and all other property now owned or hereafter acquired, and all revenues and franchises; excepting, how-ever, lands unnecessary for the operation of the railroad.

THE BOND.

First Mortgage 6 Per Cent Sinking Fund Bond.

Date.-May 1, 1883

Denomination .- \$1.000 each.

- Denomination....\$1,000 each.
 Amount Authorized....\$7,000,000.
 Principal Payable....The principal is payable May 1, 1923, in lawful money of the United States of America, in the City of Boston.
 Interest Payable....The interest is 6 per cent per annum, payable free of United States Government tax, May 1 and Nov. 1, in the City of Dectar. Boston.
- Coupon or Registered. Coupon; but may be registered at the company's office in Boston, after which it can only be transferred on the company's books until again transferred to bearer.

Sinking Fund and Guaranty.-The Kansas City Fort Scott & Gulf Railroad Company agrees to pay to the Treasurer of the party of the first part 15 per cent of its gross earnings derived from business passing over the property hereby conveyed, which are to be applied, first, to the payment of any interest on the bonds not provided for by the net earnings of the railroad of the party of the first part; and, second, to the purchase by advertisement of said bonds at a price not exceeding 110 and accrued coupon interest; and if bonds are not offered under such advertisement, they shall be drawn by lot at 110 and accrued interest, interest upon the same then ceasing. Default.-In case of default in the payment of principal or interest of the bonds, continued for sixty days, or in the payment of taxes, etc.; or in the case of default for sixty days in the payment of other debts, said default being further continued for fifteen days after demand for their payment made in writing by the Trustee; or in case of failure for thirty days to make reasonable repairs continued after thirty days' notice in writing to make them; then, in any such case, the Trustee may, and upon the written request of holders of one-tenth of the outstanding bonds shall, cause the property to be sold at public auction; and out of the net proceeds he shall pay the principal and interest of the said bonds, whether then or thereafter payable; or the Trustee may, and upon request from one-tenth of the bondholders shall, institute legal proceedings for the enforcement of this deed of trust, by the sale of the premises or otherwise, under the decree of a court; but if requests are made by different parties of bondholders, to the requisite number, for the enforcement of more than one of the foregoing remedies, and said remedies cannot be carried on together, the Trustee shall

determine according to his best judgment under which method it will proceed. The remedies hereinbefore granted shall in no case exclude other remedies at law or equity to enforce this mortgage. In case default of interest shall continue for sixty days, then the principal of all the bonds shall, if the Trustee so elects, upon written notice to the company be at once due and payable.

Trustees .- No provisions are made for the appointment or removal of the Trustee.

KANSAS CITY MEMPHIS & BIRMINGHAM.

FIRST MORTGAGE ON THE KANSAS CITY MEMPHIS & BIRMINGHAM RAILROAD TO SECURE SINKING FUND BONDS DUE MARCH 1, 1927.

Date.—February 10, 1887.

Parties .-- The Kansas City Memphis & Birmingham Railroad Company of the first part, and the New England Trust Company of Boston, Trustee, of the second part.

THE BOND.

Sinking Fund 5 Per Cent Bond.

Date.-March 1, 1887

- Date.-March 1, 1887.
 Denomination.-\$1,000 each.
 Amount Authorized.-\$25,000 per mile of completed toad.
 Principal Payable.-The principal is payable in lawful money of the United States of America March 1, 1927, in the city of Boston.
 Interest Payable.-The interest is 5 per cent per annum, payable, free of U. S. Government tax, March 1 and September 1, in Boston.
 Coupon or Registered.-Coupon, but may be registered at the office of the company in Boston, after which it can only be transferred on the company's books, unless it be again transferred to bearer.

Sinking Fund and Guaranty.-The Kansas City Springfield & Memphis Railroad Company agrees to pay to the Treasurer of the party of the first part 10 per cent of its gross earnings derived from business passing over the road of the party of the first part, which are to be applied, First, to the payment of any interest on the bonds of this issue, not provided for by the net earnings of the railroad of the party of the first part; and, *Second*, to the purchase of, by advertisement, said bonds, at not exceeding 110 and accrued interest, or to the purchase at 110 and accrued interest of said bonds, drawn by lot.

Default .- Provisions the same as in the Kansas City Springfield & Memphis mortgage above.

Trustee.—No provisions are made for the appointment or removal of the trustee.

RICHMOND & WEST POINT TERMINAL CO.

TRUST DEED OF THE RICHMOND & WEST POINT TERMINAL & WAREHOUSE COMPANY TO SECURE GOLD BONDS DUE FEBRUARY 1, 1897.

Date.-February 1, 1887.

Parties .- The Richmond & West Point Terminal Railway & Warehouse Company, of the first part, and the Central Trust Company of New York, Trustee, of the second part.

Property Covered.-The following are the securities pledged, with the valuation set upon them for the purposes of this deed :---

1:

poses of this agreement at 75 per cent of their par value; that is, at \$1,202,250. Consolidated mortgage 5 per cent gold bonds of the Richmond & Danville Railroad received by the party of the first part in exchange for the first consolidated mortgage bonds of the Western North Carolina Rail-road above described, may be substituted for the latter bonds, and in that case shall be valued hereunder at 75 per cent of their par value. The party of the first part may also, with the consent of three-fourths of the bondholders and of the Trustee, substitute for any of the securities pledged other securities of equal market value, provided the said market value be not less than the price fixed for the purposes of this agreement. The party of the first part may withdraw from the operation of this deed any number of the bonds, and not less than the full amount of the stock of any company hereby conveyed, upon the payment to the Trustee of a sum equivalent to the value of said securities, as agreed upon herein; and on the condition of paying in addition thereto any excess over such valuation received on selling the securities withdrawn.

THE BOND.

Six per cent Gold Trust Bond.

Date.-February 1, 1887.

Dale.—February 1, 1887.
Denomination.—\$1,000 each.
Amount Authov ized.—\$8,500,000.
Principal Payable.—The princi, al is payable February 1, 1897, in gold coin of the United states, of the present standard of weight and fineness, at the agency of the company in New York City.
Inverest Payable.—The interest is 6 per cent per annum, payable February 1 and August 1, in like gold coin at the said agency.
Coupon or Registered.—Coupon; but may be registered as to principal.
Taxation.—Both principal and interest are payable free from State or United States tax. United States tax.

Retirement before Maturity -At any time before its maturity this bond may be drawn by lot, and on at least one month's notice be re-deemed at \$1,050 and accrued interest; at the expiration of said one month interest thereon shall cease.

Sinking Fund.-None.

Bonds Conveyed.—The income from the securities hereby conveyed shall be applied to the payment of interest on the bonds secured by this indenture, and if said income be insufficient to meet that interest the company shall make up the deficiency until default on the bonds issued hereunder; the voting power belonging to the securities hereby conveyed shall be exercised by the company, but upon default for six months it shall be exercised by the Trustee; no lien, however, which will in the opinion of the Trustee impair the value of the security of the bonds issued hereunder shall be authorized on any of the properties whose stock and bonds are hereby pledged. The party of the first part agrees that it will each year, so far as in its power lies, cause to be elected as director in the Company of the first part, and in each of the companies whose securities are hereby pledged, one person, chosen by a majority of the bondholders hereunder, for each company; but inability so to do shall not operate as a default so as to render the principal or interest of the bonds due. The Trustee may, for the better security of bonds issued hereunder, use any of the securities hereby pledged, in case of foreclosure or, other proceedings affecting the properties which they represent, for the purpose of acquiring possession of said proper-ties; but the said Trustee shall not institute foreclosure proceedings against any of the said properties without the written consent of the party of the first part, save as its duty under instruments other than this may require such foreclosure.

Default.-In case default in the payment of interest on the bonds hereby secured is continued for six months, the Trustee may, and upon written request of the holders of one-third of the said bonds shall, declare the principal thereof due and payable; and in such case or in case of default of the principal of any of said bonds, the Trustee may, and upon request from holders of one-third of said bonds shall, proceed to sell the securities hereby conveyed at public auction, and it shall apply the net proceeds therefrom to the pro rata payment of the principal and interest due and unpaid,

Trustees.-In case of a vacancy in the office of Trustee, the board of directors of the party of the first part ma said office a solvent trust company in New York City; and if an appointment be not so made within sixty days the holders of a majority in interest of the outstanding bonds may apply to any Virginia court of competent jurisdiction for the appointment of a Trustee.

Securities.	Par Value.	n for Purposes s Agreement.
Virginia Midland, Inc. Bonds Stock West. Nor. Carolina, 1st Consol. "2d Mortg Georgia Pacific, 2d Mortg. Inc Columbia & Greenv., Com. Stock "Pref. Stock Richmond & Danville, Stock E. Tenn. The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Oct. 28, 1887.

General trade presents few salient features for comment. The season of active business for the current half-year draw to a close. The retailers will have their turn for the next two months, and upon their wants, as they shall develop, will the business of the jobber depend. Importers and manufacturers now turn their attention to next spring's trade, regarding which the prospects are said to be excellent. The excitement incident to the approaching elections begins to detract something from the attention devoted to business affairs. The weather has been seasonable, and in Northern latitudes the temperature has fallen, but it has not been injurious to any important interest. Recent rains are giving a better stage of water to the ravigable rivers of the West and Southwest. Higher prices, together with dearer ocean freights. have retarded somewhat the exports of breadstuffs and provisions, but the outward movement of cotton is something phenomenal in its proportions, keeping our stocks in ware-house comparatively small.

The speculation in lard for future delivery at this market slowly gained strength for the week under review, owing mainly to the rise in corn, for the regular demand was by no means urgent. A slight decline yesterday was fully recovered to day. Lard on the spot is very scarce, and to those in want of immediate supplies holders have been able to dictate terms, and the market to day was firm and fairly active at 6 70c. for prime city; 6 90@6 95c. for prime to choice Western; 7c. for refined to the Continent, and 7 45c. for refined to South America.

DAILY CLOSING PRICES OF LARD FUTURES.

Satur	d'y. Mon	l'y Tuesd'y	. Wednad'y.		
Novemb'r delivery. 6	49 6.	6.60	6.63	6.65	6:68

January delivery. 6	50 6.3		6.63	6.61	6.65
February deliv'y., 6	56 64		6.69	6.66	6.71
March delivery 6.	62 - 6.6		6.75	6.71	6.77
April delivery 6	68 6.		6.80	6.77	6.83
May delivery 6		6.84	6.82	6.84	6.91

There is an additional decline in pork, but at the reduction there was much more activity to the demand. Old mess, there was much more activity to the demand. Old mess, \$13 50@\$13 75; new do., \$14@\$14 25; prime, \$12 50@12 75; and clear, \$15@\$16 50. Cutmeats are again partially lower; pickled bellies, $7\frac{1}{2}$ @8c.; shoulders, $5\frac{3}{4}$ @57%c., and hams, $9\frac{1}{4}$ @9½c.; smoked shoulders, $6\frac{3}{4}$ @7c., and hams, $12@12\frac{1}{2}$ c. The number of hogs slaughtered at the principal Western points from March 1st to October 19 were 5,360,000, against 5,410,000 for the corresponding period last year. Beef re-mains nearly nominal. Beef hams dull. Tallow very firm at 41/4c. Stearine is quiet at $73_8 @ 75_8 c$. Oleomargarine is quoted at $61_8 c$. Butter is dull at 19@ 27c. for creamery. Cheese is lower; State factory, full cream, 91/2@111/2c., and skims, 4@9c.

The speculation in Rio coffee has been active, and a pressure to sell has caused a material decline in prices, though there was more steadiness to day, closing with sellers at 16.45c. down to 15.70c. for November to next December, and 15.45c.. 15:15c. and 15:35c., for October, November and December, 1888. Fair cargoes of Rio on the spot are quoted down to 185% c., with more doing at the decline, but mild grades are still dull. Raw sugars have further advanced and are quoted to-day at 5 1-16c. for fair refinery Cuba and 57_8 c. for Centrifugal, 96 deg. test, with large sales of Manila at 3 15-16@4³4c. Refined sugars are dearer. Molasses is nearly nominal. Teas in fair demand.

Kentucky tobacco is in fair demand and prices are unchanged; sales for the week are 450 hhds., of which 350 were for export. Seedleaf was also in good request, and sales for the week are 2.180 cases as follows: 250 cases 1886 crop, New England Havana, 13@35c.; 200 cases 1886 crop, State Havana, 9@16c. 50 cases 1885 crop, do., private terms; 150 cases 1886 crop, Pennsylvania Havana, 8@20c.; 200 cases 1886 crop, Wisconsin Havana, 51/2@11c.; 130 cases 1885 crop, do. private terms; 400 cases 1881-85 crops, Pennsylvania seed-leaf, 9@17c.; 550 cases 1886 crop, Ohio, 61/2@10c., and 250 cases 1886 crep, Dutch, 9@11c.; also 500 bales Havana, 60c.@\$1 05, and 350 bales Sumatra, \$1 45@\$1 75. Spirits Turpentine has advanced to 36c, but rosins are easier et \$1 1713@1 2215 for common to good strained. The speculation in crude petroleum certificates has been active, showing at times considerable excitement, and prices have been mu h higher; but there was less doing to-day, with the close at 7053@7034c. Hops are in export demand at 22@23c for the best. Wools have a brisker sale at full prices. Ocean freights have been quieter in grain shipments; room is scarce and rates to England dearer; but there was some revival to day, with considerable corn taken, to Hull at 3½d regular and to Plymouth at 41, d per stone. The metal exchange has been the scene of an active speculation in ingot copper and a material advance in the prices, with sales to-day of 1,150,000 lbs., closing at 11.25c. for spot, October and November, 11:30c. for December and 11:40c. for January. The speculation in Straits tin was also brisk, and the sales to-day were 60 tons, at 26.10c. up to 26.50c. for November, and 24:45c. for January. Business in other metals has been quiet,

COTTON.

FRIDAY, P. M., Oct. 28, 1887. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Oct. 28), the total receipts have reached 294,934 bales, against 271,799 bales last week, 276,876 bales the previous week and 251,181 bales three weeks since, making the total receipts since the 1st of September, 1887, 1,749,571 bales, against 1,343,801 bales for the same period of 1886, showing an increase since September 1, 1887, of 405,770 bales.

THE CHRONICLE.

In addition to above exports, our telegrams to-night also give us the following amounts of cotton on shipboard, not cleared, at the ports named. We add similar figures for New York, which are prepared for our special use by Messrs. Carey, Yale & Lambert, 24 Beaver Street.

The speculation in cotton for future delivery at this market for the week under review has been somewhat fitful, with the course of prices variable and unsettled, closing but little changed from Friday last. The adjustment of October options has been a disturbing element, the bulls and bears being alike uncertain regarding the probable outcome. Liverpool has been unsettled, but Manchester accounts have been strong, the private advices being even better than the published accounts. November options have been relatively stronger than December, owing to the continued small stocks here causing apprehensions of a repetition of the experience with October contracts. The "certificate system" appears to be operating in favor of the bulls by putting an end to the "short notice," once so formidable at the end of each month. Yesterday there was a further advance in response to a further improvement at Liverpool, but most of it was lost later in the day. To-day there was an early decline, in sympathy with a lower market at Liverpool, but there was a partial recovery on the reduced receipts at many of the interior towns of the South. Cotton on the spot was quiet and unchanged until yesterday, when there was an advance of 1-16c. To-day the market was dull and weak at 9 11-16c. or middling uplands.

The total sales for forward delivery for the week are 543,500 bales. For immediate delivery the total sales foot up this week 1,819 bales, including — for export, 1,819 for consumption, — for speculation and — in transit. Of the above — bales were to arrive. The following are the official quotations for each day of the past week—Oct. 22 to Oct. 28.

The imports into Continental ports this week have been 20,000 bales.

The above figures indicate an *increase* in the cotton in sight to-night of 378,598 bales as campared with the same date of 1886, an increase of 343,493 bales as compared with the corresponding date of 1885 and an increase of 177,723 bales as compared with 1884.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since Sept. 1, the shipments for the week, and the stocks to-night, and the same items for the corresponding period of 1886-is set out in detail in the following statement.

RECEIPTS FROM THE PLANTATIONS. - The following table indicates the actual movement each week from the planta-The figures do not include overland receipts nor tions. Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week	Receip	ts at the	Ports.	St'k at Interior Towns,			Rec'pts from Plant'ns.		
Ending-	1885.	1886.	1887.	1885.	1886.	1887.	f885.	1886.	1887.
Sept.23	114,873	108,601	187,740	52,542	53,734	82,554	132,3-1	114,473	217,782
** 30	159,663	158,465	238,745	71,882	72.674	118,961	179,093	170,355	275,152
Oct. 7	112.107	197,168	251,186	84,785	111,575	147,999	210,010	236,087	280,224
" 14	231,491	230,283	276.878	119,182	143,852	179,580	260 833	262,565	308,457
" 21	261,704	265,818	271,799	161,182	185,521	229,700	303,754	508,487	321,919
• 28	208,023	258,453	294,934	206,307	228,997	208,753	313,148	301,959	333,937

The above statement shows—1. That the total receipts from the plantations since September 1, 1887, are 1,994,494 bales;

in 1886 were 1,524,738 bales : in 1885 were 1,578,910 bales. 2.—That, although the receipts at the outports the past week were 294,934 bales, the actual movement from plantations was 323,987 bales, the balance going to increase the stocks at the interior towns. Last year the receipts from the plantations for the same week were 301,959 bales and for 1885 they were 313,148 bales.

AMOUNT OF COTTON IN SIGHT OCT. 28.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Oct. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1887.	1886.	1885.	1884.
Receipts at the ports to Oct. 28	1,749,571	1,343,801	1,388,453	1,435,830
Interior stocks on Oct. 28 in excess of September 1		180,937	190,457	138,843
Tot. receipts from plantat'ns Net overland to Oct. 1 Southern consumpt'n to Oct. 1	39,462	19,635	22,910	12,391
Total in sight Oct. 28	2,068,956	1,576,373	1,630,820	1,615,064
Northern spinners' takings to Oct. 28	286,353	224,151	265,612	223,968

It will be seen by the above that the increase in amount in sight to-night, as compared with last year, is 492,583 bales, the increase as compared with 1885 is 438,136 bales, and the increase over 1884 is 453,892 bales.

WEATHER REPORTS BY TELEGRAPH.-Our telegraphic advices to night from the South indicate that in some sections of Texas, Mississippi, Tennessee and Arkansas, and in a few districts in the Atlantic States, rain has interfered with crop gathering. Elsewhere the conditions have been favorable for picking, which in some localities is stated to be nearing completion. , Cotton continues to be marketed on a liberal scale.

tralecton. Texas.—We have had rain on three days of the week, the rainfall reaching forty-three hundred hs of an inch. The thermometer has averaged 64, ranging from 48 to 79. Patestine, Zeaks, Picking has been inter upled by the heavy rain on two days of the week. The ramfall reached two inches and sixty-six hundredths. The thermometer has ranged from 43 to 78, averaging 56. through the hard rain on two days of the week. The rainfall reached two inches and ten hundredths. Average thermometer 58, highest 81, lowest 44. Dallas, Iewas.-The weather has been dry all the week and picking makes good progress. The theim meter has averaged 56, the highest being 75 and the lowest 33. Austin, Texas.-Picking is progressing finery. Rain has fallen on two days of the week to the extent of eighty-five hundredths of an inch. The thermometer has averaged 62, ranging from 46 to 82. Luting, Texas .- With favorable weather conditions, picking has gone on actively during the week. The the mometer has ranged from 54 to 82, averaging 68. Columbia, Texas.-It has rained on one day of the week, the rainfall reaching ninety-eight hundredths of an inch. Average thermometer 62, highest 82 and lowest 46. Cuero, Texus.-We have had rain on four days of the week, the rainfall reaching one inch. The thermometer has averaged 59, the highest being 82 and the lowest 46.

MDIA COTTON MOVEMENT FROM ALL PORTS.-The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Oct. 27.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

	Shipme	nts this	week.	Shipme	ents Sine	Receipts.		
Year	Great Brit'n.	Conti- nent.	Total.	Great Britain	Conti- nent.	Total.	This Week,	Year.
1887 1886		6,000		322,000	175,000	1,046,000 997,000	5,000	1,497,000
1885	1.000		1.000	220,000	467,000	687,000 1,141,000	4,000	1,015,000 1,572,00

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 3,000 bales and an *increase* in shipments of 6,000 bales, and the shipments since Jan. 1 show an increase of 49,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for the	e week.	Shipments since January 1.			
· · ·	Great Britain.	Conti- nent.	Total.	Great Britain.	Oonsinent.	Total.	
Calcutta— 1887 1886	1,000		1,000	99,000 61,000	127,000 37,000	226,000 98,000	
Madras- 1887 1886	1,500 3,000	4,000 1,000	5,500 4,000	51,000 35,000	11,000 4,000	62,00 0 39,000	
All others- 1887 1886	1,000 1,000	1,000 1,000	2,000 2,000	82,500 65,000	34,000 48,000	116,500 113,000	
Total all- 1887 1886	2,500 5,000	5,000 2,000	7,500 7,000	232,500 161,000	172,000 89,000	404,50 0 250 ,000	

The above totals for the week show that the movement from the ports other than Bombay is 500 bales more than the same week last year. For the whole of India, therefore, the total shipments since January 1, 1887, and for the corresponding periods of the two previous years, are as follows:

EXPORTS TO EUROPE FROM ALL INDIA.

	18	887.	18	886.	1885.

Bombay All other ports.		1,046,000 404,500		99 7,00 0 25 0,0 00	1,000 3,000	68 7,000 203,0 00	
Total	13,500	1,450,500	7,000	1,247,000	4.000	890,000	

ALEXANDRIA RECEIPTS AND SHIPMENTS .- Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, Oct. 26.	1887.	1886.	1885.		
Receipts (cantars*)— This week Since Sept. 1	170,000 536,000	149,000 442,000	170,000 493,000		
	This Since week. Sept. 1.	This Since week. Sept. 1.	This Since week. Sept. 1.		
Exports (bales)— To Liverpool To Continent	15,000 45,000 5,000 15,000	11,000 3 9,000 2,000 7,0 00	8,000 23,000 4,000 9,000		
Total Europe	20,000 69,000	13,0:0 46,0:0	12,000 32,000		

* A cantar is as ibs.

statement shows that the receipts for the week ending This Oct. 26 were 190,000 cant its, and the shipments to all Europe 20,000 bales.

and pleasant, but during the flatter portion we have had rain on three days. the rainfall reached three inches and eight hundredths. The thermometer has averaged 57, the highest being 82 and the lowest 40.

Atlanta, deorgia. - felegram not received. Albany, Georgia. - We have had rain on three days of the week, the rainfail reaching two inches and eight hundredths. Picking is about finished and about three-quinters of the crop has seen marketed. The thermometer has ranged from 49 to 77. averaging 62.

Charleston, South Carolina .- We have had rain on three days of the week, the rainfall reaching eighty-seven hundredths of an inch. Average thermometer 62, highest 82 and lowest 49.

stateburg, South Carolina.-Rain has fallen on four days of the week and it is still raining. The rainfall reached three inches and ninety-five hundred hs. Light frost on Saturday morning. The thermometer has averaged 57.2, the highest being 75.4 and the lowest 42.6.

Wilson, North Carolina.-It has rained on three days of the week, the rainfall reaching two inches and thirteen huudredths. The thermometer has ranged from 41 to 75, averaging 54.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock Oct. 27, 1887, and Oct. 28, 1886.

MANCHESTER MARKET. -- Our report received by cable to-night from Manchester states that the market is steady for both yarns and shurtings. We give the prices for to-day below, and leave those for previous weeks of this and last year for comparison :

ELLISON'S ANNUAL COTTON REVIEW FOR THE SEASON OF 1886-87.-In our editorial columns will be found an article on "Price and Manufacture of Cotton," in which we give the figures from Mr. Ellison's annual review of the European cotton trade for the season of 1886-87, as received by us to day by cable.

EXPORTS OF COTTON GOODS FROM GREAT BRITAIN.—In addition to the figures which we give in our editorial columns respecting the cotton trade for the past season, we have prepared the following statement of the monthly exports of cotton yarn, goods, etc., from Great Britain for the same season. It will be noticed that we have reduced the movement all to pounds:

Total expe	orts coti	ton mar	ufacture	s	• • • • • • • • • •	lbs.	1,171,739	1,141,505	

The foregoing shows that there has been exported from the United Kingdom during the past season 1,171,739,000 lbs. of manufactured cotton, against 1,141,505,000 lbs. last year. As the entire consumption of the mills in Great B itain was 1,477,600,000 lbs the past season, against 1,456,000,000 lbs. in 1885-S6, there seems to be left for the year ending October 1, 1887, for home consumption (after allowing $4\frac{1}{4}$ per cent for waste in manufacture) say cnly 243,063,000 lbs., against 252,615,000 lbs. the previous year.

DOMESTIC EXPORTS OF COTTON MANUFACTURES.—Through the courtesy of Mr. W. F. Switzler, Chief of the Bureau of Statistics, we have received this week a statement showing the exports of domestic cotton manufactures for September, and for the nire months since January 1, 1887, with like figures for the corresponding periods of the previous year, and give them below :

During the ten days which have elapsed since our last report was written the weather has been fairly favorable for the growing crops. In the Central Provinces, Berars and Khandeish, we have had nearly a week of fine weather, which has done a great deal of good to the plants, but in the Broach and Dhollera districts the dry weather has lasted long enough, and these districts now begin to want more rain.

JUTE BUTTS, BAGGING, ETC.—A fair inquiry is reported for bagging, and the market is steady in price. Some large parcels are moving and sellers are quoting $5\frac{5}{6}@5\frac{3}{4}c$. for $1\frac{1}{2}$ lbs., $6@6\frac{1}{6}c$. for $1\frac{3}{4}$ lbs. $6\frac{5}{6}@6\frac{3}{4}c$. for 2 lbs. and $7@7\frac{1}{6}c$. for standard weight. Butts are selling steadily, though in small lots, and we hear of lots of paper grades at $2\frac{1}{4}@2\frac{3}{6}c$., and bagging qualities at $2\frac{3}{6}@2\frac{1}{2}c$.; but in a large way these figures can be shaded.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 175,618 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

EAST INDIA CROP.—The Bombay Company's (Limited) cotton report, dated September 23, contained the following:

Very little cotton has been coming lately from the Oomrawuttes districts, from which the supplies were rather liberal at this time last year, and as stocks of this growth are very small the probabilities are that local mills will buy Oomras freely when the new crop begins to arrive. Reports of the new crops received lately from the Bengal and Oomrawuttee districts are more satisfactory, but the heat in Guzerat and Kattiawar has been too great for the plants there, and more rain is urgently wanted. In Broach especially, where the bulk of the crop had to be resown, and is consequently late, rain is badly wanted.

The following is from Messrs. Gaddum, Bythell & Co.'s report of like date:

THE CHRONICLE

OCTOBER 29, 1887.]

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.:

- AMY DORA, steamer (Br.), at New Orleans for Genoa.—A fire was discovered A. M. Oct. 25 in the hold of steamer Amy Dora, which was extinguished by the crow. About 100 bales of cotton slightly damaged.
- ASHDELL, steamer (Br.) before reported.—A portion of the cargo of steamer Ashdell was discharged at Savannah Oct. 17. A thorough examination was made of the vessel's forward hold, to see that no fire had communicated from the heated plates, caused by
- that no fire had communicated from the heated plates, caused by the fire on the lighter alongside. The survey called by the captain was held on the 17th, and it was recommended that the cargo be releaded and that as soon as her full cargo is in that she proceed to her destination.
- B OTHAL, steamer (Br.), before reported.—The board of survey appointed to examine into the condition of steamer Bothal. at Charleston, have reported the vessel to be in a seaworthy condition. A survey of the cotton which was injured by fire and water was also made. It was decided that it is unnecessary to remove the cotton from the forward compartment of the vessel, but that the part of the cargo which was injured by the fire and the flooding of the afterhold shall be sold at aution. About 472 bales of burned cotton were fold on Oct. 22 for \$,080.
- were sold on Oct. 22 for \$',080. BROOKSFIELD, steamer (Br.) A slight fire occurred Oct. 21 on board steamer Brooksfield, at West Point, Va., for Liverpool. The only damage reported is that caused by water.
- steamer Brooksneid, at west Point, va., for Liverpool. The only damage reported is that caused by water.
 NAPLES, steamer (Br.), before reported.—A survey was held Oct 18 on the damaged cargo of steamer Naples, at Savannah. It was recommended that it be sold at auction for the benefit of all concerned. About 600 bales were sold at prices ranging from \$27 to \$33 per bale.
- RESOLUTE, steamer (Br.), before reported.—The crew of steamer Resolute, at Bavannah, have refused to make the voyage in the vessel with the wet cotton on board.
- style, at Savannan, nave refused to make the voyage in the vessel with the wet cotton on board.
 SYLVIA, steamer (Br.), at Savannah for Reval, with 4,078 bales cotton on board, had a fire break out in No. 1 hatch Oct. 23. She had hatches 1 and 2, containing about 2,000 bales, flooded. The fire was extinguished and water was being pumped out on the 24th.
 WHITNEY, steamer, which salled from New Orleans for Galveston Oct.
 Section of the 20th in distress having carried away wheel-
- WHITNEY, steamer, which sailed from New Orleans for Galveston Oct. 18, returned on the 20th in distress, having carried away wheelhouse, forward boat, stove in forward end of saloon, flooding cabins and shifting cargo, and doing other damage during a cyclone on the 19th.
- DIXIE, barge, from Houston for Galveston, loaded with 500 bales of cotton, sunk Oct. 21 near Redfish bar. A tug left Galveston with a barge into which it is proposed to transfer the cotton from the Dixie.
- JESEFA FORMOSA, bark (Spanish), Grau, from New Orleans Oct. 9 for Havana and Barcelona, returned to New Orleans on the 21st in distress, leaking badly.

Cotton freights the past week have been as follows:

BREADSTUFFS.

FRIDAY, P. M., October 28, 1887.

The flour market has shown few changes of moment in the past week. At extreme low prices the poorer grades have been fairly active for export, but the higher grades had a slow sale to the home trade. Rye flour and buckwheat flour have declined, under some increase in the volume of supplies. Today the market was steady and moderately active.

The wheat market has been variable and unsettled. On Tuesday the bull party showed much activity and confidence in their operations, and prices male a smart advance, especially the winter months, but the higher prices checked the export movement, and there was but little buying by local millers; and on Wednesday a liberal increase in the quantity afloat for European markets caused most of Tuesday's advance to be lost. A more active export gave a firmer tone to the speculation at the close of Thursday. To-day the speculation was active at full prices, with a moderate export at 84c f. o. b. for No. 2 red winter.

Indian corn has been in good demand for export, and the speculation has shown increased activity and spirit, cau ing a moderate but steady advance in prices. There have been small receipts of the new crop, which the very dry season has put in condition for marketing much earlier than usual; but there is no question that the out-turn is deficient. To-day there was a brisk export at full prices.

DAILY CLOSING PRICES OF NO. 2 MIXED CORN.

The tone of the Liverpool market for spots and futures each day of the week ending Oct. 28 and the daily closing prices of spot cotton, have been as follows:

Spot.	Saturday	Monday.	Tuesday.	Wednes.	Thursd'y.	Friday.
Market, 12:30 P.M.	Steady but quieter.	Steady.	Steady.	Firm.	Active.	Quieter.
Mid. Upl'ds. Mid. Orl'ns.	5 ¹ 4 5 ³ 8	5 ¹ 4 5 ³ 8	514 5 ³ 8	5^{1}_{4} 5^{3}_{8}	$ 55_{16} 57_{16} $	$5516 \\ 5716$
Sales Spec. & exp.	$10,000 \\ 1,000$	14,000 2,000	$12,000 \\ 1,500$	10,000 1,000	$15,000 \\ 2,000$	12,000 1,500
Futures. Market, } 12:30 P.M.	Stendy at 1-64 de- cline.	Stoady at -64 de- cline.	Quiet at 1.64 de- cline.	Firm.	Steady at 1-64 ad- vance.	Quiet at 1-64 de- cline.
Market, 4 P. M.	Steady.	Firm	Dull.	Very steady.	Firm.	Steady.

The opening, highest, lowest and closing prices of futures at Laverpool for each day of the week are given below. These prices are on the basis of Uplands, Low Middling clause, unless otherwise stated.

The prices are given in pence and 64ths, thus: 5 15 means 5 15-61d., and 6 01 means 6 1-61d.

Oats have latterly shown fresh strength, but at the better prices trade was dull. To-day, however, there was a further advance.

The barley market has at length opened for the season. The demand is active and prices are much better than last week. To day the market was quiet at the advance. Barley malt is also decidedly higher, with a fair demand at the improvement. Buckwheat is dull and unsettled.

The following are the closing quotations:

THE DRY GOODS TRADE.

NEW YORK, Friday, P. M., Oct. 28, 1887.

Business in commission and importing circles was comparatively quiet the past week, but by no means unsatisfactory for the time of year. Operations in seasonable goods were continued on a moderate scale by wholesale buyers on the spot, and very fair orders for reassortments were received through the medium of salesmen traveling in the West and South. Spring goods continued to attract a very fair share of ttention, and liberal or ders for some descriptions were placed (for later delivery) with the representatives of domestic manufacturers and importers. The jobbing trade was somewhat irregular, a fair busines for the time of year having been done in most sorts of department goods, while prints and American dress goods were quiet, as were some descriptions of imported goods. Considerable quantities of both domestic and foreign goods were disposed of to pretty good advantage through the auction rooms. The principal auction sales embraced large lines of upholstery and curtain goods, wool hosiery and ostrich feathers, and they were well attended by local and out of town buyers, whose purchasers were conducted with a degree of liberality suggestive of ample confidence in the situation. Prices have not undergone any material change, and the tone of the market for staple goods is generally firm. DOMESTIC COTTON GOODS,-The exports of cotton goods from this port for the week ending October 25 were 2,573 pack 1ges, valued at \$161,118. These shipments include 1,040 to South America, 525 to China, 355 to Africa, 200 to Aden, 137 to the West Indies, 106 to Mexico, 106 to the Sandwich Islands, 42 to Europe, and 62 to all other countries. Since the 1st of January the exports aggregate 156,864 packages, valued at \$2,435,776. Of this total China has had 76,791 packages, valued at \$3,651,171; and 32,926 packages, valued at \$2,362,026, have gone to South America. For the similar period of 1886 the exports to all ports reached 173,259 packages, and in 1885 were 148,710 packages. There was a steady movement in plain and colored cottons in execution of previ

THE CHRONICLE.

ous orders, and a moderate amount of new business was done by commission houses and jobbers. Values of brown, bleached and colored cottons are without quotable change, but holders are very firm in their views because of the very small stocks on hand and the large demand for consumption in sight. Print cloths were less active, but prices remain steady on the basis of 31/4c. for 64x64s and 2 13-16c. for 56x60s. Stocks last Saturday and for the three previous years were as follows:

partition 1	887. 1886.	1885.	1884.
	t. 22. Oct. 23.	Oct. 24.	Oct. 25.
T. Id by Providence manuf'rs., 183	3,000 25,000	$333,000\\268,000$	$411,000 \\ 376,000$
Fall River manufacturers of	,000 -0,000	268,000 260,000	305,000
Providence speculators 40	5,000 $42,0005,000$ $10,000$	160.000	150,000
Outside speculators (est) 75	,000 10,000		

Prints continued quiet in the hands of both agents and jobbers, but stocks are well in hand and desirable styles are steadily held. Dress ginghams, seersuckers, chambrays and light printed dress fabrics were in good demand for future delivery, and a fair business was done in white goods, cotton hositry and spring underwear.

DOMESTIC WOOLEN GOODS .--- As regards men's-wear woolens the demand at first hands was light and irregular, spot goods having ruled quiet, while operations in spring-weight fabrics were conducted on a very conservative basis by the wholesale clothing trade. Light-weight cassimeres, suitings and worsteds were severally in light demand, but there was a fair movement in cheviots on account of former transactions. Overcoatings and cloakings ruled quiet, as usual at this stage of the season, and there was a lessened demand for Jersey cloths and stockinettes by the manufacturing trade. Satinets and Kentucky jeans were in steady, but moderate, request, and desirable makes are steadily held by agents. Flannels and blankets were lightly dealt in by package buyers, but a fair distribution was made by jobbers. All-wool dress goods were more active, and prices of tricots have been slightly advanced by the mill agents. Worsted dress goods were mostly quiet, and there was a steady, though moderate, business in carpets. Wool hosiery ruled quiet, and the sale of heavy shirts and drawers was checked by the announcement of a large auction sale of these goods which will be held on the first of November.

FOREIGN DRY GOODS have shown very little animation in first hands and the jobbing trade was moderate. Dress goods were quiet in the hands of importers, and silks, velvets,

Banks.

Bank of Buffalo,

BUFFALO, N. Y.

S. S. JEWETT, Pres. WM. C. CORNWELL, Cash'r.

Capital....\$300,000 | Surplus......\$250,000

This Bank has superior facilities for making Col-lections in and out of the city on the most liberal terms, and with careful attention to the best inter-ests of its correspondents. CORFESPONDENTS:-Importers' & Traders' Na-tion:: Bank and Chemical National Bank, New York; Merchants' Loan & Trust Co., Chicago; Union Bank of Londen, London.

W. T. BLACKWELL, Pres't. P. A. WILEY, Cashier.

The Bank of Durham,

DURHAM, N. C.,

plushes and velveteens were in light demand, while there was a limited business in linen goods, hosiery, laces, embroideries and gloves. Large lines of curtain and upholstery goods were sold at auction and brought fair prices, but fancy velvets and plushes sold very low when offered at public sale.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending Oct. 27, 1887, and since Jan. 1, and the same facts for the corresponding periods of last year are as follows :
