#### CLEARING HOUSE RETURNS.

The returns of exchanges for the week ending December 10 exhibit a decline from the previous week of over ninety-six millions of dollars, and in the aggregate are less satisfactory than for any full week since the first of November. This is accounted for mainly through the lack of activity in speculation at New York and some of the other large centres, for it was to the heavy dealings in stocks at New York at this time in 1886 and 1885 that the larger volume of clearings then recorded was in good part attributable. So far as general mercantile affairs are concerned, things are now, as usual just preceding the holidays, rather quiet, except of course in the retail branches. The movement of the crops continues on a fairly liberal scale. Instituting comparison with the corresponding week of 1886, we find that there is a falling off at New York of 24.3per cent, due almost wholly, as stated above, to the smaller stock operations. Eight other cities also record losses from year ago, but, except at Galveston, they are unimportant. On the other hand, there are some heavy percentages of gain recorded, notably Wichita 54.7 per cent, St. Joseph 49.4, Grand Rapids 42.8 and Denver 41.6 per cent. Contrasted with the similar period of 1885 there is a decrease in the aggregate of about 4 per cent. Share transactions on the New York Stock Exchange for the week cover a market value of \$81,660,000, against \$161, 516,000 for the week of last year. As is our custom, we deduc two-and-a-half times these values from the New York totals to arrive at the exchanges due to other business, the result reached being \$447,702,044 and \$456,961,302, respectively, in the two years, or a loss of 2 per cent.

Our usual five-day telegraphic returns of exchanges have been received and are given below. The total for the seven cities exhibits a decline from the corresponding five days of last week, and in comparison with the similar period of last year there is a loss of 29.6 per cent. On the basis of these telegraphic returns the estimate for the full week ended Dec. 17 would seem to point to a decrease, compared with 1886, of about 25.5 per cent. Messrs. R. G. Dun & Co report the number of failures fer the week ended to-night as 288 (254 in the United States and 34 in Canada) against 254 last week and 288 for the same week of last year.

### THE CHRONICLE.

#### THE FINANCIAL SITUATION.

There has been no material change in money the past week, yet whatever change has taken place has been in the direction of a little increased firmness. O1 call, as represented by bankers' balances, the extremes have again been 6 and 3 per cent, with the average nearer 5 per cent, at which renewals are reported to have been made. Out-of-town institutions, trust and insurance companies and private individuals are also reported as making time loans to some extent at 5 per cent, running 30 days on prime collateral, and 51 to 6 per cent being bid and paid on same security for three, four and five months, with a few exceptional transactions at 6 per cent for six months. These figures as to time loans are obtained by us from leading note brokers, and no doubt represent actual business, but they do not really represent the market. So as our far city banks concerned are they are loaning no money either on call or in any other way at less than the legal rate. The demand they tell us is very active, no difficulty at all being found in placing all and more than they can get at that figure. The inquiry is from almost every quarter; one bank officer, as an indication of the conditions, showed us letters from excellent customers in several important Western cities, received by yesterday's mail, asking for accommodation in large amounts, which can only be responded to by calling in 6 per cent money. This urgency is reflected in the papers published at Chicago and other cities where the demand from the lesser upon the leading interior grain centres is said to be very active at high rates of interest. Mercantile paper is reported firmer than last week, 6 per cent being the exception for choice 60 to 90 days endorsed bills receivable, the majority of that class of paper going at  $6\frac{1}{2}$  per cent. For four months acceptances the ruling rate is  $6\frac{1}{2}$ @7 per cent, with the transactions nearer the latter figure, and good single names having four to six months to run nominally  $7\frac{1}{2}@8$  per cent.

Discounts at London of 60 to 90 day bank bills are re. ported at  $2\frac{3}{4}$  @  $2\frac{7}{3}$  per cent, while at Paris the open market rate is  $2\frac{5}{8}$ , against  $2\frac{3}{4}$  per cent last week. At Berlin and Frankfort, however, the rate has advanced, being now  $2\frac{1}{2}$  per cent, against  $2\frac{1}{4}$  per cent last Friday, while the Vienna Bourse is reported to have been panicky this week, especially yesterday. This advance at Berlin and excitement, at Vienna are most likely due to the renewal of political rumors with regard to Russia and Austria, and the preparations reported making on the part of the latter power by the erection of huts, &c., to dispatch reinforcements to Galicia. There have also been very contradictory rumors during the week with regard to the health of both Prince Bismarck and the Crown Prince, the latest reports indicating, if true, that the earlier ones were greatly exaggerated. Still the age and frequent indisposition of the Enperor and his prime minister, with the state of health of the Crown Prince, make the situation in Germany one of no little uncertainty and cannot fail to cause solicitude, especially when there is any fresh ground for a war scare. The Bank of England reports a gain this week of £134,000 bullion which, according to a private cable to us, was made up by an import of £50,000 from South America with receipts from the interior of Great Britain of £134,-000, and by an export to Lisbon of  $\pounds 50,000$ . The Bank of France shows a loss of £128,000 during the week.

above those recorded in our last. Yesterday the Bank of British North America further advanced its long ster. ling, their rate being now 4.83 for long and  $4.86\frac{1}{2}$  for short. This upward movement is due to a demand almost wholly from bankers, presumably to remit in settlement of accounts maturing at or near the end of the year. The demand also comes upon a market unusually bare of commercial bills. Cotton is now going out in less quantity, while breadstuffs apparently we do not care to sell, and are engaged in piling it up at our centres of trade. A good illustration of what is being done in this way and its effect, may be had in the figures of exports of breadstuffs, cotton, &c., for November, issued this week by Mr. Switz. ler of the Bureau of Statistics. We have prepared them in our usual form and give them below.

The reader will see from the foregoing that the value of cotton exports was nearly 51 million dollars more in November this year than in the same month last year, and yet the total value of all the articles named only shows an increase of  $1\frac{1}{2}$  million dollars. This shortage in breadstuffs is wholly the result of speculation, very sure to bring us trouble if not stopped at once. Our crops are no doubt short; even the world's yield of wheat may be short; it seems to have been last year; but granting that, it is not in the power of any combination to corner our supply, pile it up at home, and succeed in the operation. "Everything comes to him that waits" except success in such a venture. If the operators would only first let out three fourths the export, the issue might be different. As it is, expenses eat out the power of endurance; the credit which is carrying the stock is impaired each succeeding month; some weak holders perhaps unload and prices decline a little; distrust gets possession of the money lenders and then the

[VOL. XLV.

Our foreign exchange market has been firmer again and gradually advanced this week, the rates on Thursday break comes and our surplus is sold at the lowest price of the year. We have tried the experiment so many times and failed so disastrously that we cannot understand how men of credit enough to command the necessary funds can be found willing to go into the operation again.

That prices of commodities are low, no one needs to be told; the cause or causes which have produced the situation is a problem every one would like to see solved and many have worked over with divers result. Gold monometallists as a rule refuse to believe that silver demonetization has anything to do with it, and hence they look to new business methods, new marketing facilities, and overproduction to account for the change. The latest investigator on that side of the question is Mr. David A. Wells. He has just completed a series of articles which to us seem to be in the reasoning so circuitous and inconclusive, and in facts so faulty, that we have thought it desirable to publish something in reply. So to-day we give on a subbeing one cent for long sterling and half a cent for short | sequent page the introductory article and shall fol-

THE CHRONICLE,

low it by others during succeeding weeks. We do this because of the serious consequences of error. The decline has been in progress for years, has passed the point in many cases where there is any profit, and is universal. Slight temporary recoveries have occurred through "trusts," speculative corners, or business revival in America, but only to be followed by a lower depression. And all this is remediless if we are to accept Mr. Wells' theories-we must simply wait and suffer under the grinding power of these economic changes until their force is spent or neutralized. How long, it passes the imagination to conceive-if for example the Suez Canal, which was built, that is finished, in 1869 (eighteen years ago) is in truth a prominent cause of present distress as that writer claims it is. But we did not intend to discuss those questions here; our purpose was only to call attention to the article on a subsequent page.

In the anthracite coal trade, the demand has slackened somewhat, under the mild weather prevailing, while the supply on the other hand is more abundant now that the season for heavy shipments to the West is over. As a result, prices are easier. Mr John H. Jones yesterday issued the figures for the month of November, which show how urgent the demand was a short time ago. It will be remembered that when the October statement was published we pointed out that notwithstanding the great inquiry that had prevailed, consumption this year in that month had been less both than in 1886 and in 1885. For November this is changed, and after allowing for the differences in stocks we find the consumption to be 3,433,063 tons, against 3,325,396 tons in the same month of 1886, 3,270, 329 tons in 1885, and 3,101,371 tons in 1884, evidencing a steady and continuous increase. The following will show how this result is reached; we give in the same statement the figures for the first eleven months of the year.

Anthugaita Comi		November.		Jan. 1 to Nov. 30.		
Anthracite Coal.	1887.	1886.	1885.	1887.	1886.	1885.
Stock beginning	· Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
of period	153,976	440,982	661,616	372,282	754,545	874,681
Production	3,385,190	3,277,636	3,279,116	31,572,939	29,325,012	28,626,704
Total supply .	3,515,166	9,718,598	3,940,732	31,945,221	30,079,357	29,501,385
St'k end of period	112,103	893,202	670,403	112,103	393,202	670,403
Consumption .	8,433,065	3,325,316	3,270,329	31,833,118	29,686,355	28,530,932

It will be noticed that stocks at tidewater points were further reduced during the month and are now down to the low figure of 112,103 tons, against 393,202 tons on December 1, 1886, 670,403 tons on the same day in 1885, and 712,392 tons in 1884. Hence even though there should now be a decided falling off in the demand, the ume past. It should be said that as compared with November last year, every one of the companies increased its production this year with the exception of the two roads that mine Lehigh coal, namely the Central New Jersey and the Lehigh Valley. On the latter the falling off is as much as 229,806 tons, but on the Central of New Jersey it is only 70,669 tons, the latter company also mining Wyoming coal and thus being able partly to offset its loss from the Lehigh region. Of the other companies the Lackawanna has increased its output 188,432 tons, and the Delaware & Hudson 94,742 tons. There is no change in the character of the reports of railroad earnings. It is almost marvellous how the gross keeps on increasing, while at the same time the net in so many cases fails to bear out the anticipations encouraged by the gross. In another article we summarize the net for October, and find that the gain over last year is less than <sup>8</sup> per cent, decidedly more than the whole amount of the roads. But while the Grand Trunk has never been very

increase shown being contributed by two classes of roads -the Pacific roads and the coal companies. Arranging the roads in groups or sections, five out of nine of the groups record lower net than a year ago. On the other hand, the reports of gross continue to exhibit very large gains. Thus our statement for November, published last week, showed four million dollars increase. Since then we have had the returns of one or two prominent companies not included in that statement, like the Atchison, which reports a loss of \$69,244, and the Gulf Colorado & Santa Fe, which has a gain of \$106,887, but the general result is not materially changed. Furthermore, 69 roads have furnished figures for the first week of December, the gain reaching  $17\frac{1}{2}$  per cent. It is possible that as the improvement in gross for November and December has been greater than for October, the returns of net for those periods when received will also show better.

Among the statements of net received this week, there are a few that deserve special mention, namely those of the St. Paul, the Chicago & Alton, and the Atchison. The return of the Alton covers September, the others October. The St. Paul it will be remembered had a gain of only \$2,012 in the gross for October, and as expenses are shown to have increased \$61,969 the net has fallen off \$59,957. For November we may presume that the comparison when published will be more favorable, as the gross for that month has increased \$171,687; the same road also reports an increase of \$43,634 for the first week of December. The Atchison having lost \$13,187 in gross in October, and expenses having increased, the net has been reduced \$153,496. Besides the competition of new roads, the Atchison of course has also suffered from the failure of the crops in Kansas. The Alton on its September exhibit does better than either of these, gross being increased \$64,648 and the net \$7,741. We have thought it would be interesting to bring together the results on these three roads both for the latest month and since January 1, as follows.

	, .	c				
	St. Paul. October.		Atch Octo	ison. ober.	Chic. & Alton. September.	
	1887.	1886.	1887.	1886.	1887.	1886.
Month.	8	8	\$	\$	\$	\$
Gross	2,800,689	2,798,677	1,674,160	1,687,318	842,062	777,414
Expenses	1,421,203	1,359,234	808,080	667,772	478,482	421,575
Net Since Jan. 1.	1,379,486	1,439,443	866,080	1,019,576	363,580	355,839
Gross	20,208,167	19,998,849	15,308,334	12,740,023	6,489,535	5,758,160
Expenses	12,692,283	12,172,548	8,209,880	6,615,367	3,604,317	3,271,359
Net	7,515,884	7,826,301	7,098,454	6,124,656	2,885,218	2,484,801

Thus for the period since the first of the year, though position of the companies is vastly better than for a long the St. Paul is \$310,417 behind its net of 1886, the Atchison is \$973,798 ahead, and the Alton \$400,417 ahead. Hence the less favorable results for the month are chiefly important as demonstrating that under the reduction in rates so generally going on in the Northwest and Southwest, it costs the railroads more money to do a given amount of work, and that as a consequence expenses are being largely increased. The adjustment this week of the dispute on dressed beef rates between the Grand Trunk of Canada and the American lines, is a striking illustration at once of the power and of the disposition of the trunk lines to enforce and carry out their policy of harmony, and thus secure remunerative rates for the transportation of freight and passengers. The Grand Trunk of Canada has alway been more or less of a disturbing factor in trunk line affairs, just as the Canadian Pacific has since its completion given considerable trouble to the Trans Continental

#### 804

### THE CHRONICLE.

[VOL. XLV.

tractable, yet its control being held in England, where they look with disfavor upon railroad wars and besides are very conservative, it has generally been amenable to peace influences. Hence, even under the present trouble, there was little reason to apprehend any general disturbance from that source. Still the matter was a more than ordinarily difficult one, for, as we pointed out two weeks ago, the fact that the dressed beef industry is concentrated in the hands of a few persons, invests these latter with un. usual power over the railroads. Having for years given their business to special lines, they threaten to withdraw it from those lines unless more favorable terms are conceded. This is refused, and the business is withdrawn. The shipper gains nothing by the operation, for rates are the same by all the routes, but the road affected loses a considerable amount of its traffic, and thus is forced in very self. defense to grant the demands made. The difficulty is further increased, because under the Inter State law pools -by which the injured road could be reimbursed for any loss to it resulting from its maintenance of agreed tariffs -are forbidden. But even this especially difficult problem the trunk-line combination has overcome, and thus afforded new evidence of its strength and determination. It is understood that the Grand Trunk is to have a differential in its favor, but that is a minor matter. The main point is that the spirit which dictated the trunk-line compact is shown to be still dominant.

The stock market has been dull and irregular this week, with the tendency most of the time downward. As stated above, the trunk-lines have reached an agreement with the Grand Trunk of Canada with reference to the rates on dressed beef, and the requisite ten days' notice of an advance has been given. Western Union Telegraph has increased its dividend from 1 per cent quarterly to 11 per cent. The Milwaukee Lake Shore & West ern, besides the usual dividend on its preferred stock, also declared an annual dividend of 4 per cent on the common stock. The Detroit Bay City & Alpena will distribute 4 per cent. Manhattan Elevated announces its customary 11 per cent quarterly, and the Richmond & West Point Terminal has declared another  $2\frac{1}{2}$  per cent semi-annual on the preferred stock. All these are favoring features, as also is the decline in wheat. On the other hand, the chronic inability to maintain rates in the Northwest and Southwest, the heavily reduced yield of corn in certain sections, with the uncertainty about what Congress will do to prevent Treasury accumulations, are disturbing features which for the moment encourage indis. position to trade in stocks. There has also been a rise in foreign exchange rates, thus removing all possibility of further gold imports now. The less active demand for coal and the continued mild weather which is being experienced, have provoked attacks on the coal properties' and the weakness of Richmond Terminal stock has likewise acted as a drag on the market. It is also a fact that the usual purchasers are many of them carrying such lines of stocks as to make them either unwilling or unable further to increase their loads, and hence the public holds aloof from Wall Street.

In addition to that movement from the interior. the banks have gained \$1,000,000 through the operations of the Sub-Treasury. Adding that item to the above, we have the following, which should indicate the total gain to the New York Clearing House banks of currency and gold for the week covered by the bank state. ment to be issued to day. It is always to be remembered. however, that the bank statement is a statement of averages for the week, whereas the figures below should reflect the actual change in the condition of the banks as between Friday of last week and Friday of this week.

Week ending December 16, 1887.	Into Banks.	Out of Banks.	Net Change in Bunk Holdings.
Banks' Interior Movement, as above Sub-Treasury operations			Loss \$657,000 Gain 1,000,000
Total gold and legal tenders	\$8,549,000	\$8,206,000	Guin \$343,000

The Bank of England gained £134,000 bullion during the week, due wholly to receipts from the interior of Great Britain. The Bank of France lost 3,200,000 france gold and 200,000 francs silver, and the Bank of Germany, since our last report, shows a decrease of 260,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the cor. responding date last year.

· [	Dec	ember 15,	1887.	December 16, 1886.

SMALL SILVER CERTIFICATES. Among the interesting facts brought out by the Government reports this year is the condition of the silver certificate issues. Many people think that the Government can manufacture, put and keep out just as much currency as the law makers choose to enact the legal machinery for. We do not mean to controvert or to go into an examination of that claim to-day, but we have it in mind to attempt to throw a little light upon it another week. A preliminary of no little importance is the state of these silver certificate issues. A record of them has a two-fold value-it gives as strong a case as those who favor the of currency and gold caused by this movement to and popular assumption can find or could wish for the purpose

of establishing their belief, and yet at the same time it affords a good illustration of the fact that there is only one method by which the issuers can successfully put afloat such a currency, while enforcing the further familiar truth by and by to be disclosed, that the people's capacity for using currency has limits no more vague than its capacity for using other tools.

But to day we only desire to make a record of what has been done, a bit of history useful in many ways. We are enabled to bring the record down to a late date, as Mr. Hyatt, the Treasurer, very kindly has sent us the figures representing the situation on the first of December. It will be remembered that the small silver certificate act was attached to and passed as a part of the Sundry Civil Appropriation bill in July, 1886. The act in substance "authorized and required" the Secretary of the Treasury "to issue silver certificates in denominations of one, two and five dollars," in lieu of silver certificates of larger denominations, or upon deposits of silver dollars. At the time of its passage we at once called attention to the great importance of the power granted, remarking among other things that "it puts out of reach of any combination of "circumstances the embarrassment of the Treasury again 'for years to come." It was not, however, until about the first of October that the new ones began to appear in circulation, the usual hindrances in preparing plates and printing notes having delayed the Secretary's action. Since then the demand has been constant, much of the time beyond the capacity of the Bureau of Engraving and Printing, through insufficient appropriation, to supply; the Secretary in his last report stated that the circulation of small silver certificates would have been greater had he been able to furnish them faster.

But nevertheless the progress in getting out these issues has been very rapid, the total now outstanding reaching large proportions. The Treasurer in his report gives an exhibit of the notes outstanding for June 30, 1886 and 1887; on the 1st of last April we obtained similar figures for that date, and now, as already remarked, Mr. Hyatt has sent us a statement of the condition on the first of December. We thus have a fair record of the progressive develop ment of these silver currency issues. The number and denominations of those in circulation at the dates men tioned were as follows.

	In Circulation.							
Denomination.	June 30,1886.	April 1, 1887.	June 30,1887.	Dec. 1, 1887.

### PRESENT STATUS OF THE BALTIMORE & OHIO RAILROAD.

From the financial statements submitted this week (and which we give in full in our railroad department), we get the first clear idea of the position of the Baltimore & Ohio property which it has been our privilege to We say in years for though the chief have in years. uncertainty about the road's affairs undoubtedly relates to the changes and developments that have occurred within comparatively recent periods, yet the annual reports of the company have always lacked definiteness and been unnecessarily brief, many of the essentials to a correct knowledge of the company's doings being omitted. The income statement—which by the way could not be had till the publication of the annual report, a long time after the annual meeting-has never been as full as it should be, and moreover has been confined to the operations of the main stem and branches. Now, however, we have a complete and detailed account of the results for the whole system, and it is a matter of satisfaction that this defect has been removed.

The selection of the administrative head of the enterprise has also been made this week, but is significant only as showing that the plans mapped out by the syndicate when they took hold of the property are being steadily carried to completion. Mr. Samuel Spencer, the new President, is of course fully competent to undertake the task entrusted to him. He has been identified with the property for many years, has had a long and varied experience, and has really been in executive control for a long time, andwhat is most important-is known to be in full sympathy with the plans and purposes of the syndicate. It is proper to say that perfect harmony prevails between the syndicate and the board of directors and the stockholders. Reports have been frequent of late that troubles and differences had arisen, that the syndicate was exacting harsh terms, and that much opposition to them had developed. We happen to know that these reports are all untrue. There has been no hitch or disagreement. On the contrary, a thoroughly good understanding has prevailed from the first, and we think it may well be questioned whether among all the plans and reorganizations with which the Drexel-Morgan syndicate have been connected any have progressed so smoothly and satisfactorily as the present.

A full analysis of the Baltimore & Ohio's position and prospects must embrace three distinct points; (1) the amount and nature of the floating debt, which has been the cause of so much embarrassment; (2) the means by which the company is to be relieved of this debt, and the method by which large cash payments for the sinking funds are to be avoided in the future, and (3) the relations between earnings and charges and dividends both on the basis of the old arrangements and as changed by the new arrangements. Taking up the first point, the figures submitted show that the company has undoubtedly been carrying a large amount of current or floating The total of the debt September 30 is liabilities. reported at \$11,148,008, made up of \$6,505,678 of loans, \$2,263,636 of bills payable, \$134,572 of unclaimed dues, \$481,813 to be expended on the Washington branch terminals, \$543,505 due the sinking funds, and \$1,218,804 of pay-rolls and vouchers. The floating debt proper, the report says, consists of the first two items, namely, loans and bills payable, amounting to \$8,769,314. Either sum, however, is large. The \$543,505 due the sinking funds will, under the new method, be paid in consol bonds, and therefore will require no cash. The

\* Of this total \$1,472,355 were on Dec. 1st in the Treasury unassorted.

Recalling the fact that the first issues of the ones, twos and fives were made about the first of October, 1886, the above record becomes complete. These three denominations reached on April 1, 1887, as will be seen, \$21,958,-980, on June 30th they aggregated \$30,613,734, and on December 1 they had increased to \$52,083,192. This growth in the small notes has not only been on the deposit of silver dollars, but also by the exchange of the large notes. For instance, on the 30th of June, 1886, there were \$13,365,820 of notes of one hundred, five hundred and one thousand dollars each, while on the first of December, 1887, there were only \$4,535,630 of the same denominations.

SER

### 806

### THE CHRONICLE.

[VOL. XLV.

company also had \$360,716 of cash in its treasury. Deducting these two items from the total of \$11,148,008, the debt is reduced to \$10,243,787. The company also has \$1,740,773 of supplies on hand, but we discard that item, as we have never been able to consider it a proper offset to floating obligations.

To extinguish this 10 millions of floating debt in round numbers, five millions of new consolidated bonds and five millions of third series preferred stock are to be issued. This accomplished, the company would yet have over  $2\frac{1}{2}$  millions of consolidated bonds unissued in its treasury (as we shall show below), and besides hold unencumbered  $1\frac{1}{2}$  million dollars of the capital stock of the United States Express Company and 5 million dollars of the capital stock of the Western Union Telegraph Company—constituting the amounts received in part payment for the sale of its express and telegraph properties. In other words, the company will not only be relieved of all present burdens, but be placed in easy position to supply any future wants for construction, equipment and improvement.

But the chief feature of the arrangement is that by obviating most of the cash payments heretofore made into the sinking funds, the company secures financial relief practically without any increase in the fixed charges to be paid out of earnings. In order to explain that point it will be necessary to refer briefly to the purposes comprehended in the issue of the consolidated mortgage. The company has been obliged up to the present time to invest annually large and increasing sums in the sinking funds of its various issues of bonds. It had to make not only large direct contributions, but the yearly increment of the funds had also to be added on in the same way Thus no less than \$775,462 was required for that purpose in the late year, and the total of payments of all kinds then stood at \$11,560,152. But that was by no means the chief difficulty. With each addition to the fund, the yearly increment becomes larger and thus it was apparent that unless the method was changed a point would be reached in the near future where the amount absorbed for this purpose would be appalling. To obviate that difficulty and at the same time relieve the company of its burden of current liabilities, the consolidated mortgage was devised. The mortgage is for \$29,600,000, "sub. "stantially," as the report says, "the existing unmatured "main line mortgage indebtedness." The face of the main line mortgage debt is \$31,432,000, but after deduct. ing \$912,000 paid on account of the loans of 1880 and 1885 extended at 4 per cent, and \$841,192 cancelled bonds in the sterling sinking funds, the amount remaining is \$29,678,808 as given.

All future contributions and accumulations on account

past contributions and accumulations to the sterling mortgages, that amount likewise has been made available to the company, and the five millions of bonds to be taken by the syndicate form part of it. Of course, the sale of this five millions five per cent bonds will increase charges \$250,000, and the issue of five million six per cent third preferred stock will further increase charges \$300,000, making \$550,000 altogether, but as against that the saving on sinking funds will be, as stated, \$640,750.

We are now prepared to see what the results have been on the late year's operations. On that point the statement before us gives full and detailed information. The interest on each issue of bonds is figured separately, and the rental and sinking fund charges are also given at length. It is found as a result that after allowing in full for all charges and the 4 per cent dividend paid on the stock last May, and after contributing no less than \$775,-462 towards the sinking funds, a surplus balance of \$17,-605 remained on the 1886-7 accounts. It has become the fashion to refer to the Baltimore & Ohio as a non-dividend payer, simply because the dividend customary in November was omitted this time. But the company actually did pay 4 per cent in the year, and, according to the figures given, earned it too. We should think, therefore, that if any inference were warranted from such results, it was simply that the basis of distribution had been lowered.

Of the \$775,462 contributed to the sinking funds in the late year, \$640,750 we have seen will not be repeated the present year, while on the other hand interest and dividend charges will be increased \$550,000 by the issue of the new bonds and the new preferred stock. In addition, the interest on the car trusts issued in 1887 will be \$106,875, or \$59,085 more than in the late year, and there will also be required a payment of \$250,000 on account of the principal of that trust. By adding these two amounts to the \$550,000 given, we get a total increase in charges of \$859,085. But this must be reduced by a saving of \$176,535 in interest on floating debt, making the net increase \$682,550, and this the \$640,750 reduction in the sinking funds comes within \$41,800 of wiping out. In other words, while total charges (not including the 4 per cent dividend on the ordinary stock, but including the dividends on the preferred shares) in the late year were \$6,303,701, in the current year they will be \$6,345,501.

Hence even on the poor results of 1886-7 the company could pay a 4 per cent dividend in the current year, and yet come out nearly even. But now that the road has been brought in harmony with, instead of being antagonistic to, the other trunk lines, results ought to be much better. Not only that, but there will also be a considerable income from the 1½ million United States Express Company stock (paying 4 per cent dividends) and the 5 millions of Western Union Telegraph stock (now paying 5 per cent) held in the company's treasury. Altogether, this exhibit appears to afford a new and favorable outlook for the Baltimore & Ohio property.

of the sterling loans of 1895, 1902, and 1910-com. prising the greater part of the annual sinking fund pay. ments-will be made with this consolidated mortgage In effect, the arrangement is equivalent to setting aside each year a certain amount of the consoli. dated bonds held in reserve for that purpose, to the prior bonds when they mature-that retire is, instead of paying cash into the sinking funds, consoldated bonds, which can be sold for cash when the sterling loans mature, will be paid in. As the report says, this does not increase the debt, but simply keeps it where it now is. It does, however, release to the uses of the company the cash that the sinking funds would otherwise absorb. As the annual contribution is \$280,720 and the increment of the fund as it now stands is \$360,039, the amount so released is \$640,750. By making the \$29,600,000 consolidated loan cover also \$8,177,000 of former.

### THE ECONOMIC DISTURBANCES SINCE 1873. [FIRST ARTICLE.]

Commercial depression may result from two distinct causes: either over-investment of capital, involving increase in the supply of goods and change in the methods of production; or contraction of currency and credit, involving decrease in the available means of exchange. The crisis of 1857 was an example of the latter; that of 1847 in England furnished a good instance of the former.

NO. Wanter a

### THE CHRONICLF.

#### DECEMBER 17, 1887.]

It is only in their beginnings that the two causes are distinct. As matters progress, each becomes complicated with the other. Over-production produces a fall in prices, loss of credit and mercantile failures; and thereby lessens the facilities for payment, exactly as if there had been contraction of currency. Contraction of curren. cy, on the other hand, reduces the immediate purchasing power of the community, and leaves producers and middlemen with unsold goods on their hands, exactly as if there had been an overproduction of those goods. The state of things in the advanced stages of a commercial crisis can often be explained on either cause indiscriminately accord. ing to the personal bias of the investigator. Until recently the tendency of most writers was to lay too much stress on matters of banking and currency, and too little on changes in the method of production. The majority of practical English economists of the last generation had gained their chief experience in banking, and had little or no knowledge of manufacturing business. It was natural that they should exaggerate the importance of the causes which came under their own immediate observation. To day the mistake of these economists is clearly perceived. It is felt that new methods of production are an important cause of commercial crises; and some people are inclined to regard them as the only cause. In the reaction against the English theory, which treated commercial crises as "panics" of greater or less duration many writers have gone to the other extreme of considering the contraction as a mere incident, of secondary importance, perhaps more apparent than real, and certainly not an independent factor in the trouble. This is substantially the ground taken by Mr. Wells in an able and carefully written series of articles on the Economic Disturbances since 1873 which have appeared in the Popular Science Monthly and are about to be published in book form. The weight which the writer's name carries and the number of facts which he adduces in support of his conclusions make it important to examine them in detail, and to point out clearly where the argument is open to attack.

The present crisis is in some respects different from any of its predecessors, because the fall in prices has lasted so long. It is this continuous depression of prices which has stood in the way of any real recovery, and which has made even the active speculations of 1880 and 1881 seem like a mere pause in the descent. To determine the reason why prices have so long continued to fall, is the most important problem in economic science at the present day. But its solution is attended with special difficulties. lf the conditions of production had changed while the world's currency system remained the same, we should have one explanation. If the currency system had changed while the conditions of production remained the same, we should have another. But the conditions of production and the world's currency system have both changed at the same time, each in a way which has had no exact parallel in past history; and it becomes an exceedingly delicate matter to determine the relative importance of two causes which so closely interact with one another. The problem has a practical as well as a speculative interest. If the crisis is simply due to improvements in production, we have nothing to do but to wait for these things to work out their own result. It may be long and hopeless waiting, but we could not expect to turn back and resist the progress of invention in the industrial world any more than the trades unionist can expect to resist for any length of time the introduction of machinery in his particular trade. But if the crisis is to any considerable degree due to the demonetization of silver, the case 'stress, are means of lessening the price to consumers; but

at once assumes a different aspect. It becomes a matter with which governments may have at once the power and the duty to interfere.

Mr. Wells tries to exclude the latter cause altogether. He holds, first, that the general fall in prices, such as it is, is amply accounted for by man's increased control over the productive forces of nature; and, second, that if we examine the history of individual articles, we shall find reasons for the lower prices of most of them in changed conditions of production, while those whose conditions of production have not changed have not fallen in price. We shall examine these propositions in order, considering this week the general effect of improvements in production and reserving the detailed analysis of prices for subsequent issues.

The effect of improvements generally is to throw an increased quantity of goods on the market at a reduced cost per unit of product. But in anything like a health. ful condition of industry, the quantity marketed will increase more rapidly than the price falls. In other words, the aggregate product after the improvement, measured in dollars and cents, should be greater than before. If other things remain exactly the same, this increase in the volume of business will create a need for more money with which to transact it. The old demand for money "to move the crops" had a basis of fact, however wrong the measures may have been by which the United States Treasury undertook to meet it.

Now, no one would deny that there has been an increase in the volume of business in the last twenty years without a correspondingly large increase in the available amount of metallic currency. Either the credit system must have expanded to meet it, or there must have been a virtual contraction of the currency as compared with the wants of trade. It has been the custom to assume that the credit system expands, almost automatically, and that an increasing proportion of business is done without the use of cash. Mr. Wells himself makes this assumption, without trying to prove it. That an increas. ing amount of business is settled without the use of cash, we are ready to admit; that an increasing proportion of business is thus settled, we do not believe. The use of cash payments in the retail trade has grown enormously in the last twenty years. At the beginning of that time weekly payment of operatives was exceptional, and various forms of truck or store orders were common. To day a large proportion of the operatives receive cash weekly from their employers and pay the stores cash down. The same general movement has been going on in the dealings between producers and middlemen. In the ordinary operations of life the tendency to shorten the term of credit has been all but universal. One of the ablest living English economists has boldly challenged the doctrine that, as civilization advances, credit takes the place of money. On the contrary, money takes the place of credit. To see the credit system in its full vigor one must go to half-civilized countries like Turkey. As a country advances it uses more cash. But if volume of business and use of cash are both increasing, it follows of necessity that a failure to increase the supply of metallic money involves a relative scarcity of means of payment. Mr. Wells in one place incidentally admits this, and seems to think it an unimportant admission. But it really involves giving up his whole case. It is precisely this relative scarcity which makes the trouble. The Suez canal and the railroads, and the other improve. ments in transportation, on which Mr. Wells lays so much

### THE CHRONICLF.

that is not the difficulty. The difficulty is that something else comes in and lowers the price to the producers; and there is a strong *prima facie* reason to believe that it is something connected with the currency. Mr. Wells tries to make improvements account for too much. Reduced rates from Chicago to Liverpool will account for lower prices at Liverpool; but they will not account for lower prices at Chicago. The introduction of a new machine may account for commercial distress among the owners of the old machines, but it will not explain why this distress should be shared by the owners of the new one.

Mr. Wells says, in brief, that improvements have reduced cost of production and that therefore prices have fallen. We do not dispute this. But we deny that it is a complete explanation of the facts before us. Improvements have also increased the volume of business. The world's available currency has not been allowed to increase correspondingly in volume. A relative contraction has been thus caused which has made it more difficult to carry on the world's trade, and which has given rise to the existing distress among producers—a distress too widespread and too profound to be fully explained by Mr. Well's methods.

#### THE COURSE OF NET EARNINGS.

The interest in net earnings increases rather than lessens as the year comes to its close. The constant reductions in rates in important sections of the country, and the disposition so generally shown to take advantage of the present period of prosperity and spend more than the ordinary amounts on renewals and improvements, in road and equipment, thus greatly increasing the expense account these circumstances have led to a closer study of the net and less dependence upon gross earnings. This is reasonable, since the net must always be the standard by which an outsider can judge of a road's ability to pay its charges and dividends to its stockholders.

Our usual monthly statement covers this time the month of October. The character of the exhibit is the same as in all other recent, months, that is, distinctly less favorable than earlier in the year. Not only is the ratio of gain in the net smaller than in the gross, but at the same time the roads reporting diminished net as compared with last year continue to grow more numerous. The following is a brief summary of the October results and also the results for the ten months to the end of October.

	Мо	nth of Octo (65 roads.)		Jan. 1 to October 31. (57 roads.)

(65 roads) 42,579,981 33,504,577 4,075,404 11 17,396,940 16,179,724 1,217,216 8 In some respects October makes a less favorable exhibit even than the months preceding. In the first place, there is an unusually large number of roads (twenty) reporting diminished totals, some of them large and prominent companies too. In the second place, there is an increase in the number of groups and sections distinguished in the same way, the trunk-line group, the Northwestern lines, the roads west of the Missouri, the Mexican roads and the Eastern companies all showing losses in the net this time. Then, some of the other groups have much smaller gains than heretofore. Finally, more than the whole amount of increase reported is contributed by the coal companies and the Pacific roads. Thus as we shall show below the gain in net on the latter reaches \$909,441, and on the coal roads \$563,756, making together \$1,473,197, while the increase on all the roads is only \$1,217,216.

It is well to correct here an erroneous impression with reference to the totals we are comparing with for last year. It seems to be generally supposed that net earnings in October 1886 were unusually good, and that hence the present net can not be expected to contrast very favorably with such large aggregates. Indeed open statements to that effect have been made. The statements, however, are not founded on facts. Some companies undoubtedly did report heavily increased net, though the number of such is by no means large; but with reference to the great body of roads it can not be said that October 1886 was a very good month-rather the reverse. In reviewing the figures for that month we remarked that if there was one character. istic above any other that the returns disclosed, it was that in so many different cases an increase in gross earnings had been almost entirely wiped out by heavier expenses, leaving the net but little if any larger than in the previous year At that time we had not begun to summarize the net as we do now, so we can not give the exact results for the roads as a whole, but looking back over the returns for that month a cursory search reveals over two dozen com. panies which then showed diminished net, there being indeed almost as many returns of this nature as those reporting improvement. As an element in the comparison, therefore, this is a feature favorable to the present year, and hence the fact that in the face of it the gain the present year is so small and so unevenly distributed is all the more disappointing. In the case of the individual companies, we have quite a good many instances where there is a decrease this year in net, not after an increase but a diminution the previous year-in other words where there is a decrease for two successive years. The Pennsylvania on its eastern system is one of these. Then there are the Northern Central, the Shenandoah Valley (including betterment expenditures), the Minneapolis & St. Louis, the Burlington Cedar Rapids & Northern and the Chicago Burlington & Quincy, which all have losses this year in addition to losses last year. On the other hand of course there are some roads which last year were conspicuous for heavy gains and are again conspicuous the present year for further heavy gains. These belong most of them to the Southern class, among which ome striking instances of continuous improvement are to

[VOL. XLV.

Thus we have an increase of \$4,075,404 in the gross earnings, but an increase of only \$1,217,216 in the net, expenses having been augmented \$2,858,188. As indi. cating how much more favorable the returns were earlier in the year, the totals for the ten months show a gain of \$36,954,781 in the gross and of \$16,378,628 in the net, the latter being over 44 per cent of the former. Moreover, the ratio of increase in the net for the month is less than 8 per cent, but for the ten months is about  $15\frac{1}{4}$  per As compared with September, October shows a cent. slightly increased ratio of gain both in the net and in the gross, but the variations are not very important, and as will be seen from the subjoined recapitulation of the monthly summaries October is the fourth successive month with greatly reduced gains in net, a sharp change having occurred with the close of the first half of the year.

befound. There is the Nashville Chattanoga & St. Louis for example which last year increased its net from \$76,065 to \$85,786 and now makes a further gain to \$114,917. The Chesapeake Ohio & Southwestern has net of \$116,011 this year against only \$67,442 two years ago. In like manner the Louisville New Orleans & Texas has increased from \$69,381 to \$116,013 in the two years, and the Fort Worth & Denver from \$23,653 to \$39,418. The Louisville & Nashville has increased from \$544,190 in 1885 and \$584,084 in 1886 to \$628,931 in 1887. The Norfolk & Western did not show much improvement in net the previous year, but now has increased from \$147,460 to \$200. 266, or nearly 36 per cent. Notwithstanding these exceptionally good returns, however, the ratio of gain on the Southern roads as a whole is less than in previous months -chiefly by reason of the fact that the Memphis & Charleston, the Caroline Central, the Richmond & Petersburg, the Seaboard & Ronoake and the Shenandoah Valley all have suffered losses in the net. Annexed is our usual table giving a summary of results by groups and sections, the figures in parenthesis indicating the number of roads in the groups.

W., Louisville & Nashville, Nashville Chattanooga & St. Louis, Norfolk & Western, Louisville New Orleans & Texas, Memphis & Charleston, Shenandoah Valley, Fort W. & Denver City, Cape Fear & Yadkin Valley, Kentucky Central, Petersburg, Richmond & Petersburg, Seaboard & Roanoke and Carolina Central.

Coal Companies-The Buffalo N. Y. & Phila., Phila. & Reading RR., P. & R.

regard to the coal roads, which stand next to the Pacific companies in amount of increase, and much above them in ratio of gain, there is nothing new to say. The Northern Central is the only one among them having a loss. The loss on the Trunk lines is owing chiefly to the decrease on the Pennsylvania, though the Grand Trunk of Canada and one of its connections (the Detroit Grand Haven & Milwaukee) also show slightly reduced totals. The loss by the Eastern companies follows from the increase in ex. penses on a number of roads controlled by the Pennsylvania, namely the Baltimore & Potomac, the Camden & Atlantic and the West Jersey. Among the Northwestern lines the Burlington & Quincy of course has the largest amount of decrease, but all the other roads embraced under that head, with the exception of the Minnesota & Northwestern and the Keokuk & Western, also show losses

### Monetary Commercial English News

#### [From our own correspondent.]

#### LONDON, Saturday, December 3, 1887.

It is clear that belief in the commercial future is strengthening. Hitherto, beyond some attempts to manipulate the cotton market, speculative purchases of raw material have been of comparatively little importance. But the barrier has now apparently been broken down. Tin and copper have both risen in value, and with the exception of iron all metals have of late hardened more or less. In unmanufactured produce the course of speculation may be said to be stayed, but it is quite within the range of probabilities that it may be The prospect certainly is extended with the new year. brightening. We have no monetary stringency to contend with, and Continental advices have lost their bellicose tone and have assumed a phase of comparative mildness. We have, besides, the additional crumb of comfort, unfortunately not a large one, of a rather stronger grain market. All this continues to impart greater vitality to business circles, and at the same time tends to increase our hopes of larger operations during 1888.

But should there be some reduction in the volume of speculation between now and Christmas it would not be at all sur prising. It is usual for the closing weeks of the year to witness some curtailment of engagements, as there is always the chance that money may suddenly become dearer and thus augment the cost of continuing dealings. But this is only a transient matter. Taking a broader view of the situation we discover further reason for congratulation. The hardening of outward freights is undoubted evidence of an expanding export trade, and if there has not yet been a corresponding increase in the inward charges, it will probably not be long before some change for the better occurs. We may, in fact, generally rest content with the belief that the new year will see us in a more prosperous condition than now, albei that 1887 compares favorably with 1886.

The present position of the money market is rather uncer tain. It is singular that in spite of large purchases here of

mit Branch, and for the ten months the same roads together with Lykens Val. Eastern Companies—The Baltimore & Potomac. West Jersey, Camden & Atl., N. Y. Ont. & Western and Rome Wat. & Ogdensburg.

Mexican Roads-The Mexican Central and Mexican National.

In amount (though not in percentage) of increase the Pacific roads excel all others. There are several reasons for this, though they do not apply with equal force to althe roads. The higher rates on trans Continental business that have been in force since the Inter-State law went into effect, have of course benefitted all the companies. Then such of the roads as have connections with Southern California have been favored by the exceptional activity that has developed in that section of the country and the large immigration movement that has been in progress there. The Oregon Navigation reports slightly increased net, notwithstanding the opening of the Cascade division of the Northern Pacific. Of the \$909,441 total gain by the Pacific roads, \$432,102 is sup plied by the roads in the Southern Pacific system. With

Rio Tinto shares on French account, some heavy buying of copper and tin, and free dealings in Colonial wool by both German and French buyers, the Berlin and Paris exchanges should be disposed to droop, and that there should be a demand for gold for Berlin. The prospect of Continental capital being sent here for employment has therefore become somewhat dimmed. Attention is at the same time directed to the weakening of the American exchange. The interval between now and the close of the year may possibly witness some quotable improvement in the value of money. The weekly Bank of England return is a singularly uninteresting document. The position of the Bank remains practically the same as last week, the proportion of reserve to liabilities being 48.04, against 48.23 per cent. In the reserve there is the small loss of £17,622. Bullion has increased £77,058, notwithstanding the shipment of £100,000 to the Cape of Good Hope thus showing a steady reflux of coin from the provinces; but this is more than counterbalanced by an increase of £94,680 in note circulation. The reserve now amounts to £12,706,227 and the stock of bullion to £20,352,622, being increases over the corresponding totals of last year of £1,360,000 and £350,-

000 respectively. The charge for loans has been as high as 4 per cent, but has fallen to about  $2\frac{1}{2}$  per cent.

The rates for money have been as follows:

Messrs. Pixley & Abell write as follows on the state of the **bullion** market:

Gold has been in demand since our last, and all arrivals were absorbed source and both in domain since our last, and an arrivals were absorbed in sovereigns for the Cape were withdrawn from the Bank. The arrivals comprise about £180,000 from West Indies and South America and £15,000 from the East. The P. & O. steamer has taken £35,000 to Bombay Bombay.

Silver has been in good demand for India at 431816d. @4378d. The latter we give as to-day's quotation. We have received £105,000 from New York, £75,000 from South America and £30,000 from West Indies; total, £210,000. The P. & O. steamer has taken £96,000 to India. Mexican dollars, in the absence of supplies, have remained nominal. The P. & O. steamer has taken £25,000 to China and the Straits.

The quotations for bullion are reported as follows:

The operations of the French syndicate in copper and tin have continued, with the result that Chili bar copper has improved £11 per ton on the week, and while English tin is £12 per ton dearer, foreign shows a rise of £15. Some statistics have just been published respecting copper, which, though disclosing an improvement in the demand and a reduction in stocks, cer tainly cannot be said to explain the extraordinary advance which has taken place in the value of that metal. The present stock in London, Liverpool, Swansea and France is 36,821 tons, against 41,003 tons held on November 1 and 42,876 tons on hand on October 1. Including the approximate quantities of Chilian and Australian advised by mail and telegram to date. the visible supply is now 45,121 tons, against 48,503 tons a month ago and 49,376 tons on October 1. The actual reduction in the month, therefore, has been nearly 3,400 tons and in the two months 4,250 tons. At the same time it must be admitted that there is more metal going into consumption. The deliveries during November were 12,973 tons, against 11,-234 tons in the previous month. The import during November was 8,791 tons and during October 9,361 tons. It would seem from this that the demand is overtaking production, but if the present price of copper be maintained for any lengt'i of time the supply will be very materially increased. The difficulty hitherto has been to work mines at a profit. The present comparative scarcity is anything but due to an approaching exhaustion of supplies. Manufacturers know this perfectly well and they are, therefore, hardly likely to purchase in excess of immediate requirements. On the first of December last year the visible supply was 62,740 tons and the actual stock on hand 55,240 tons. During November, 1886, the price of Chili bars ranged from £3934 to £40% and during the past month the variation was from  $\pounds 43\%$  to  $\pounds 67\%$ 

With the exception of iron, which has scarcely varied, other metals have sympathised with the changes in tin and copper. Lead has advanced £1 to £2 per ton, spelter and zinc are both about 5s. per ton dearer, and quicksilver has risen £2 10s. in the week, the present price being £10 to £10 10s. per bottle. Although iron has not so far moved much, an early advance is looked for. The shipbuilding yards on the Clyde are becoming more active. About 60,000 tons have been placed during the past month, and further heavy orders are expected to be completed almost immediately.

A quiet but firm market has prevailed for wheat. The recent advance appears to be well sustained, and it is quite possible that a further improvement may take place. The hopes of the holders of grain are gradually becoming brighter, and higher prices are looked for. These anticipations of better things are not without a certain statistical basis. The progress of events during the first three months of the cereal year

Tenders for £600,000 Metropolitan Board of Works 3½ per cent consolidated stock have been received by the Bank of England and they amounted to £3,390,800, at prices varying from the minimum of £98 10s. to £100 7s. 6d. per cent. Tenders at £100 5s. 6d. will receive about 74 per cent of the amount applied for and those above that price in full. The average price obtained for the stock is £100 6s. 4d. per cent.

The Debenture Guarantee & Investment Company, limited. are authorized by the directors of the Societe Francaise des Houilleres du Nevere to receive applications for £150,000 7 per cent first mortgage debentures of £20 each of the Barcelona Railway and Coal Mines of Nevere (Venezuela). The issue price is 95 per cent. The company is French and has a capital of 1,500,000 francs in 3,000 shares of 500 francs each and has a Venezuelan Government guarantee of 7 per cent per annum on £180,000, with concessions for 99 years dating from 1882.

The capital creations for the week have been :

LOCAL.

Guernsey Flour & Fruit Company (Limited), £5 shares. £75,000 West Clare Railway Company 4 per cent Perpetual Govern-ment and County, guaranteed, £10 shares..... 50,000

affords some foundation for the belief in an improved state of affairs, and although the time for high prices of cereal produce may now be said to be relegated to the past, some further advance over current quotations is by no means improbable. According to the weekly average returns of the sales of homegrown wheat the prices realized have ranged from 28s. 5d. to 30s. 9d. per quarter, the highest price being touched last week. The average so far does not however work out very high, and is still 1s. 4d. per quarter below that of last year, namely, 29s. 7d. against 30s. 11d. per quarter. But signs are not wanting that this difference will gradually disappear and will in turn be succeeded by a comparison favorable to this season. Our imports of wheat and flour do not keep up to the level of last year; the quantity of wheat and flour on passage shows a deficiency compared with them of nearly 350,000 quarters, while the sales of home-grown wheat have increased by 161,400 quar-All this tends to bring the market into a healthier conditers. tion, and strengthens the hope of better prices later on. The following shows the imports of cereal produce into the United Kingdom during the first thirteen weeks of the season, and other items, compared with previous years:

### Commercial and Miscellaneous News

IMPORTS AND EXPORTS FOR THE WEEK. -The imports of last week, compared with those of the preceding week, show a decrease in both dry goods and general merchandise. The total imports were \$7.973,353, against \$9,841,576 the pre-ceding week and \$8,591,963 two weeks previous. The exports for the week ended December 14 amounted to \$6,483,418, against \$7,056,569 last week and \$5,627,244 two weeks previous. The following are the imports at New York for the week ending (for dry goods) December 8 and for the week ending (for general merchandise) December 9; also, totals since the beginning of the first week in January :

FOREIGN	IMPORTS	AT	NEW	YORK.

For Week.	1884.	1885.	1886.	1887.

WALL STREET, FRIDAY, Dec. 16, 1887-5 P. M.

The Money Market and Financial Situation.—There  $ha_s$  been a December dulness creeping over the market this week. It is very unlike the December of 1886, when we had a time of great buoyancy in the first part of the month, followed by a collapse which wiped out in a day the profits accumulated through many weeks.

There are some reasons to think that we shall have an im-

lived lusiness at the Stock Exchange after the opening of the new year, unless there are unfavorable occurrences not now foreshadowed. In the first place, stock operators and the public at large have been working on the defensive as regards the stock market for a year past, always anticipating disastrous events which never came to pass, and always giving undue weight to the slightest drawbacks, although they possessed no general significance. It may be that the tide will turn and that the feeling will gradually come over the market that this caution has been overdone, and that stock and bond values are really on a conservative basis.

What the precise effect on general business will be of a reduction in the railroad building it is yet too early to say, but in this country the unexpected often happens, and it will possibly be found that the reaction from the present year of maximum railroad construction will have less influence on mercantile business than a similar decline has had in former periods.

One point in railroad management is to-day worthy of special notice, and that is, the great conservatism about increasing dividends. There are a number of railroads that have earned a large surplus and have yet declined to raise their dividends, either keeping a strong balance on hand or using the excess of income for improvements to the property and getting it in better shape to meet the inevitable competition.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 4 to 6 per cent, and to-day the rates were  $4\frac{1}{2}@5$  per cent. Prime commercial paper is quoted at  $5\frac{1}{2}@6\frac{1}{2}$  per cent.

The Bank of England weekly statement on Thursday showed a gain in specie of £134,000, and the percentage of reserve to liabilities was 46.16, against 46.93 last week; the discount rate remains unchanged at 4 per cent. The Bank of France lost 3,200,000 francs in gold and 200,000 francs in silver.

The New York Clearing House banks in their statement of Dec. 10 showed an increase in surplus reserve of \$361,475, the total surplus being \$6,207,200, against \$5,845,725 the previous week

Cables, 4 851 @4 86. Commercial bills were 4 801 @4 801; Continental bills were: Francs, 5 25 and 5 221 @5 217; reichmarks, 941 @947 and 951; guilders, 391 @397 and 40 @401.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1 discount; selling 1 discount@par; Charleston, buying 1 discount; selling par; New Orleans, commercial, \$1 50 discount; bank, par; St. Louis, 25@50c. premium; Chicago, 60@70c. discount.

The rates of leading bankers are as follows:

December 16.	Sixty Days.	Demand.
Prime bankers' sterling bills on London Prime commercial. Documentary commercial. Paris (francs). Amsterdam (guilders). Frankfort or Bremen (reichmarks)	4 803404 81 4 809204 8034 5 25 05 2438	$\begin{array}{r} 4 86 @ 4 86^{1}_{2} \\ 5 22^{1}_{2} @ 5 21^{7}_{8} \\ 40^{1}_{8} @ 40^{3}_{16} \\ 95^{1}_{4} @ 95^{3}_{8} \end{array}$

United States Bonds.—Government bonds have not been active and business is still restricted in volume, though a few large transactions in the  $4\frac{1}{2}$ s were recorded. Prices, however, have ruled very strong, especially for the 4s, which are  $1\frac{1}{2}$ higher than a week ago. The  $4\frac{1}{2}$ s are slightly higher and the 6s remain the same.

The closing prices at the N. Y. Board have been as follows:

	Interest Periods		Dec. 12.	Dec. 13.	Dec. 14.	Dec. 15.	Dec. 16.
4 <sup>1</sup> 28, 1891reg 4 <sup>1</sup> 28, 1891coup. 48, 1907reg.	QMar. QJan.	*107 <sup>1</sup> 4 *124	*107 <sup>1</sup> 4 *124	$1071_{2}$ 125	$1071_{2}$ *125	$1071_{2}$ *12434	125

\* This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.—State bonds have had a fair amount of business, distributed, as usual, among a large number of different issues, none of which have shown any special activity or changes in price.

Railroad bonds have been fairly active, though no special animation has been manifested in the general market. A few classes have been more prominent than the rest for activity, and these have also had some effect on the course of prices. The tone for the week has been somewhat irregular. In the early dealings prices became somewhat unsettled in sympathy with a weak stock market, and the general tendency was downward, though no important decline took place. Later a better feeling manifested itself and quite a number of issues were strong and advancing, giving a healthier tone to the market, though weakness still prevailed in some. In the improvement, the Chesapeake & Ohio coupon 4s and currency bonds were conspicuous, as were also the Missouri Kansas & Texas issues, which have recovered a part of their sharp decline. Others ruled strong, though less prominent in the advance, and Columbus & Hocking 5s were quite weak.

Railroad and Miscellaneous Stocks.-The stock market has been dull, and although at one time there was a little animation, owing to free selling, the business of the week has generally been of small proportions. The tone of the market has been unsettled and irregular, the bears having been at times very active in hammering prices. The most active selling movement occurred on Monday, when the bears made a vigorous raid on the market and succeeded in depressing prices for nearly all leading stocks more or less. The most active and weakest were Lackawanna, Union Pacific, Reading, Western Union and Richmond Terminal. There was no special cause for this decline other than the action of the bears and the nonresistance of the bulls, as there was no particular news of importance enough to account for it. The weakness of the market continued, with less force, for awhile, and then gave way to a steadier feeling, business having, in the meantime, become very dull. The change in sentiment was caused partly by a stronger market in London and an increased foreign demand, stimulated by the settlement of the cutting on dressed-beef rates and the advance in the tariff to a paying basis. Foreign operations have been quite a feature throughout the week, their sales having assisted the early decline, and the steadier tone having helped our market afterward. During the latter part of the week the market has been very dull and still somewhat irregular, though generally stronger than in the early dealings. As stated above, the news of the week has not been important. General features remain about the same and are, in the main, favorable; but there is a manifest indisposition to operate so near the close of the year. Of special features there have been few. The Richmond Terminal stocks have been prominent and fluctuated irregularly. The dividend on the preferred stock was declared, but Messrs. Flower, Rockefeller and Wilson have retired from the directory. Western Union makes a good quarterly statement, and has increased its dividend 1 per cent; but these facts failed to have any important influence on the stock.

VIOUS WOOK.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks:

÷.	1887. Dec. 10.	Diffr'nc's fr'm P <b>r</b> ev. Week.	1886. Dec. 11.	1885. Dec. 12.

**Exchange.**—Sterling exchange has been only moderately active and the demand is still of a restricted character. Rates have ruled firm, however, principally owing to the scarcity of commercial and bankers' bills. Actual rates have been gradually working up during the week, and on Wednesday posted rates were advanced  $\frac{1}{2}$ c. from the higher rates quoted a week ago, and are to-day  $4 82\frac{1}{2}@83$  and  $4 86@86\frac{1}{2}$ .

To-day the rates on actual business were as follows, viz. : Bankers' 60 days' sterling, 4 81% @4 82; demand, 4 85% @4 85%.

### THE CHRONICLE.

817

# Investment Kailroad Intelligence.

The INVESTORS' SUPPLEMENT contains a complete exhibit of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month-viz., January. March, May, July, September and November, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Extra copies are sold to subscribers of the CHRONICLE at 50 cents each, and to others at \$1 per copy.

### RAILROAD EARNINGS.

Gross Earnings to Latest Dates .-- The latest railroad earnings and the totals from Jan. 1 to latest date are given below for all the railroad companies from whom reports can be obtained.

The returns still continue very satisfactory. For the first week of December we have reports from 69 companies, and though eight of these show losses, the gains on the remainder are sufficiently heavy to make the aggregate increase nearly 18 per cent.

#### ANNUAL REPORTS.

#### New York Ontario & Western Railway.

(For the year ending September 30, 1887.)

The preliminary report of President Thos. P. Fowler states that the accounts for the months of August and S-ptember have not yet been finally audited, but the results will closely approximate the figures now presented. Comparative statements of the earnings and working expenses are given below, and although the figures for the months of October, November and December, 1885, necessarily include the earnings of the West Shore Line south of Cornwall, whilst there are no corresponding earnings in the corresponding months of the late fiscal year, the traffic of the company has developed to an extent very nearly covering the loss of the West Shore traffic in the period referred to; on the other hand, the company is relieved of the cost of working that portion of the West Shore Railway.

The surplus of \$71,608 will be applied in payment for muchneeded additional rolling stock and other additions to the property, until provision is made from capital account to reimburse the same. With the sum of \$113,487 so applied last year, revenue has, therefore, provided within the last two years the sum of \$185,996 in permanent increment to the property of the comp ny.

tized for FRASER

(For the year ending Oc'ober 31, 1887.)

The full report of General Dudge, President of this company, will be found on another page under the title "Reports and Documents."

The road will be completed to the State line by Jan. 1st. 453 miles, and the through connection made to Denver by March 1, 800 miles. The financial statement of the company shows that after paying interest and also \$61,606 for taxes, insurance, renewals and terminal facilities, it has a surplus of \$19,166 for the year, which, carried to the balance of income account, gives a total surplus of \$224,002.

The road has operated during the year from 163 to 200 miles. It pays interest only upon the bonds issued upon completed road which has been operated commercially for three months. As completed road has been added the earnings show not only an increase in gross, but also an increase per mile. The increase of gross earning; for the year was \$246,564 and the net earnings \$126,295, or \$635 per mile of operated road. The total fixed charges per mile when the road is completed is limited to \$1,080. The net earnings per mile upon the road operated during the past year was \$1,527. Under the mort-gage the company is limited to \$18,000 per mile first mortgage bonds upon the main line, making the entire issue \$8,354,000. No bonds can be issued upon extensions or branches under this mortgage. The interest upon securities issued to the Construction Company under its contract upon road that is used for construction purposes only (that is before it is turned over to the company ready for use) is paid by the construction company.

The earning of the roal up to the present time have been entirely from local bu iness. About the 1st of March a con-nection will be made with the road building south from Denver, and after that time the entire line from Fort Worth to Denver, about 800 miles, will be operated as one line, known as the Pan Handle Route and the Fort Worth & Denver City Division will not only have the earnings locally, but also the earnings of all the through business passing over it between the Gulf and Denver.

Operations for three years were as follows:

•		
Miles operated 1834-85. <i>Barnings from</i> 144	1885-86. 163	1836 87. 276

Total disbursements	\$165,419	\$231,861

### New York Providence & Boston Railroad.

(For the year ending September 30, 1887)

The annual report of Mr. S. D. Babcock, President, shows that the number of passengers carried one mile in 1886 was 30,573,526 and in 1887 42.104,551, a large increase and all in local bus ness, as the number of through passengers decreased. The increase in the construction and equipment account amounts to \$204.362. the main items being the proportion of the Union depot at New London, the extension of the second track between Mystic and New London, a new engine house at Providence, rew locematives and cars, the extension of the Harbor Junction track, and real estate. If the outlay for the new bridges be defucted, it will be found that the road has been operated for (2.7 per cent of its gross earnings (excluding dividends received from the steamboar company), which is a BOSTON, Dec. 10, 1887.

The final instalment of ten per cent on the subscription to the securi-ties of the Atchison Topeka & Santa Fe Railroad Company, and the Chicago Kansas & Western Railroad Company, under circular No. 59 of the Atchison Topeka & Santa Fe Railroad Company, dated Feb. 14, 1887, will be due and payable Jan. 2, 1888, at the office of the company in Boston.

in Boston. No transfer of blocks will be made after Dec. 15, 1887. The first issue, the Atchison Collateral Trust 5 per cent bonds or scrip, was deliverable June 1, 1887. The second issue, the Chicago Kansas & Western Railroad Company 5 per cent bonds or scrip, was deliverable Sept. 1, 1887. The third issue, the Atchison Collateral Trust 5 per cent bonds or scrip, was deliverable Nov. 1, 1887. The fourth issue, 25 per cent, the Chicago Kansas & Western Rail-road Company 5 per cent bonds or scrip, will be deliverable Jan. 2, 1888, to subscribers of record Dec. 15, 1887, on payment of this instalment Jan. 2, 1888.

Stin. 2, 1888. Scrip certificates representing bonds of the Atchison Collateral Trust 5 per cent bond, or the Chicago Kansas & Western first mortgage 5 per cent bond, may be converted into said bonds, in equal amounts of \$100, \$500 and \$1,000, after Jan. 2, 1888. The Chicago Kansas & Western Railroad income bonds will be de-livered Feb 1 1888.

livered Feb. 1, 1888.

#### Yours respectfully, GEO. L. GOODWIN,

It is desired that the bonds and the scrip be called for by the subscribers in person or by order at an early date.

Baltimore & Ohio.-The President and Directors have issued a circular at much length giving details of the company's in-debtedness and the proposed relief under the syndicate transaction. This circular is of much importance, being the first information yet given out concerning the finances of the company since the affair of last summer, and it will be found in full on a subsequent page.

Boston & Maine.-At the annual meeting it was voted to issue terminal bonds as provided by legislative acts. It was also voted to confirm the improvement bonds previously issued on account of the Eastern Railroad lease.

Broadway, N. Y. (Horse Railroad) .- The report of the Broadway & Seventh Avenue Railroad Company for the year ended September 30 shows:

Gross earnings	1887. $$1,659,730$ $1,072,703$	1886.\$1,634,9441,133,185
Net eatnings Other income	\$587,027	\$501,759 4,700
Net income Fixed charges	394,022	\$506,459 375,598
Net income	\$193,005	\$130,860

Brunswick & Albany.—A meeting of shareholders of this railway was held at Frankfort, Germany, December 14. Sev-enteen persons representing 162.400 shares we e present. It was unanimously resolved to sell the line to the Savannah & Florida company. The committee appointed to conduct the transfer will receive £250,000 in 4 per cent mortgage bonds of the Savannah & Florida Company, and £130,000 in income bonds of that road.

Cairo Vincennes & Chicago.-The semi-annual statement for the first six months of the fiscal year, May 1 to Oct. 31, shows:

Earnings. Operating expenses and taxes	$\substack{1887.\\\$410,377\\243,825}$	1886, \$362,252 257,770
Surplus. Rentals.	\$166,552 5,781	\$104,482 5,781
Net for six months. Operating exp. and taxes, 1887, 59½ per cent; 18 Receiver's certificates Wabash Cairo Division bonds Eight coupons including Jan. 1, 1888	886,71 per ce	102010101
Total. Length of road, 267 miles.	••••••	\$5,294,5 <b>61</b>

There is no capital stock, and every bond has been deposited with bondholders' committee.

By consent a decree has been issued by the United States Court releasing this, the Cairo Division, from all liability or entanglement arising from its having been a portion of the Wabash system.

creditable showing, considering the fact that actual operating expenses are always increased on account of the delay occasioned by construction.

Below are the earnings and income account for four years:

including amounts received from investments.

### GENERAL INVESTMENT NEWS.

Atchison Topeka & Santa Fe.-The Assistant Treasurer of this company has issued the following circular, closing subscription No. 59 and with it all outstanding subscriptions :

Cedar Falls & Minnesota.-The directors of the Cedar Falls & Minnesota Railroad have authorized counsel to protect the interests of the road in its contest with the Dubuque & Sioux City Company. One of the directors says payment of January interest on the bonds will depend upon whether the company receives the rental from the Dubuque & Sioux City. Central Pacific .- It has been announced in London that the Central Pacific Railrcad will pay a dividend next spring. It is stated that 1 per cent will be paid then, although no official action has yet been taken in regard to the matter.

Cincinnati N. O. & Texas Pacific.-The affairs of the Cincinnati Southern Railway leased by this corporation are attracting some notice. The earnings of the company for attracting some notice. The earnings of the company for November, 1887, were \$324,116, an increase of \$51,532 over the same month in 1886. This is a gratifying exhibit, and if December may be estimated as approaching \$45,000, the increase for the year will be \$500,000. In considering the situation, however, stockholders should bear in mind that with nearly all of its capital invested at the outset in purchasing equipment, &c., from the carrying company, the C N. O & T. P. Co. have had no reserve fund to draw upon for permanent improvements, increase of colling stock, &c., and, not owning, have not been able to bond the road, as companies usually do, for such purposes. In other words, "betterments" as well as "maintenance of way" have had to come

from net earnings, or be charged against capital, leaving a deficiency in the latter that had to be provided for before a division of earnings could safely be made. Still, the showing is an encouraging one, and if the road can go on and hold this improvement, or still further increase it, the outlook will be most gratifying.

820

Cheshire (Mass).—The directors met this week to consider the proposition for a union with the Fitchburg road by an exchange of stock on the basis of four shares of Cheshire for five of Fitchburg. No action was taken, however, and the meeting adjourned subject to call. Some of the directors are understood to be displeased because the terms leaked out. Several propositions are said to be under consideration, and it is reported that other lines would like the road.

Eastern.-At the annual meeting of the Eastern Railway Company it was voted "that the interests of this company require a consolidation of stocks and franchises between it and the Boston & Maine Railroad, and that the directors of this company are requested to co-operate with the directors of the Boston & Maine Railroad in procuring from the Legislature at its next session the proper enabling legislation."

Houston & Texas Central.—A meeting of the committee of general mortgage bondholders of the Houston & Texas Central Railway Company took place Thursday at the offices of the Farmers' Loan & Trust Company. After some discussion the reorganization plan was adopted, Mrs. Hettie Green not being represented at the meeting.

The total issue of general bonds amounts to \$4,405,000; the committee controlled on deposit \$2,205,000, and also arranged for the \$880,000 hypothecated with the Morgan Steamship Company as collateral, and also for \$65,000 held in the same way by the City National Bank, leaving outstanding \$1,155,-000. Of this last mentioned amount Mrs. Green holds \$1,100,000, and there remains "scattering" \$55,000.

In the address of the General Mortgage Bondholders' Committee, they say that by the settlement over \$2,000,000 of over-due coupons on the first and second mortgages, which were a lien ahead of the general mortgages, will be paid off or made subsequent thereto. The fixed charges of the new company will amount to about \$960,000, of which something over \$700,000 will be required to pay interest on first and second mortgages, as against \$987,000 on the present status. The gross earnings will be over \$3,000,000 for the year. The road can be operated at an expense of not more than 65 per cent, leaving \$1,050,000 for fixed charges.

Lake Shore & Michigan Southern.-The statement of the earnings and expenses for the year ending September 30th, as submitted to the N. Y. State Commissioners shows the fol-

New York & New England.-At the annual meeting, at Boston, the stockholders of the New York & New England Railroad, voted to authorize the directors to issue bonds to the extent of \$1,950,000, secured by the terminal lands in Boston, and the lease of the following roads was approved: Milford & Woonsocket; Milford Franklin & Providence; Massachusetls & Rhode Island.

There was but one ticket for directors in the field, and it contained the names of the following new members: Sidney Dillon, Thomas Rutter, A. E. Orr, Ex. Norton, W. P. Shinn and Henry Hentz, of New York; M. T. Stevens and Stern Morse, of Boston, and Messrs. Howard, Farrell and Landers, representing local interests in Connecticut. The following who served last year were re-elected: Eustace Fitch, John H. French, A. S. Moss, Nicholas Sheldon, B. F. Vaughn, of Provi-dence; William H. Stevens, of Bridgeport; William H. Star-buck, John L. Macauley, J. A. Bostwick and E. V. Carey, of N.Y.

The members of the board retiring are: Stanton Blake, George M. Rice, Fred. J. Kinsbury, W. H. Stevenson, Vernon H. Brown, Heman Clark, John G. Moore, H. V. Newcomb, T. W. Pearsall and Elijah Smith.

New York Providence & Boston.-The stockholders of this railroad have authorized the issue of \$1,000,000 stock. Messrs. J. Pierpont Morgan and G. G. Haven were elected directors of the company.

New York Stock Exchange-New Securities Listed.-The following were listed this week :

FORT WORTH & DENVER CITY-\$320,000 additional first sixes, making the total listed \$7,088,000.

NASHVILLE CHATTANOOGA & ST. LOUIS-\$371,000 first sixes, gold, of the "Jasper Branch" (to the free list); \$430,000 first sixes bonds on branches, to the free list, making total listed \$750,000.

NORTHERN PACIFIC—"Helena & Northern and Northern Railroad Company," \$250,009 first sinking fund fives, gold, and \$480,000 first sinking fund sixes, gold, of the Spokane & Palouse Railway, making total listed \$1,168,000.

ST. LOUIS ARKANSAS & TEXAS-\$780,000 first mortgage gold bond certificates, making total listed \$14,495,000; also, \$2.395,000 common stock, making total listed \$11,950,000.

ST. PAUL MINNEAPOLIS & MANITOBA--\$7,000\_000 first fours, gold, namely, \$5,904,000 coupon and \$1,093,000 registered, PITTSBURG & WESTERN-\$9,100,000 first fours, gold, and trust company's certificates for \$5,000,000 preferred and \$6,-975,000 common stock.

MEXICAN CENTRAL-\$1,709,000 first fours, making total listed \$42.879,000 and \$341,000 incomes, making total listed \$9,075,000; and that on January 4, 1883, \$1,000,000 common stock be added to the \$35,000,000 already on the list. The committee recommends that the first mortgage sevens of 1911 of both classes be stricken from the list.

Richmond & Danville .- A meeting of the stockholders of the Richmond & Danville Railroad Company was held in Richmond, but no quorum being present it was adjourned until December 21. Some facts in regard to the year's operations will be found in the Richmond Terminal report on another page.

Richmond & West Point Terminal Co.-At the annual meeting of the Richmond Terminal stockholders in Richmond on the 14 h Alfred Sully, of New York, was unanimously re-celeted President of the company. The following directors were also chosen without opposition: John H. Inman, Geo. S. Scott, Samuel Thomas, C. M. McGhee, John G. Moore, S. Wormser, George F. Stone, J. A. Rutherfurd, William Rockefeller, Cal-vin S. Brice, Emanuel L hmap, R. T. Wilson, R. P. Flower, John H. Hall, all of New York, and James B. Pace and T. M. Logan of Richmond. The President's report will be found at length on another page.

San Antonio & Aransas Pass.-This railroad, for the four months ending October 31, 1887, shows: Gross carnings, \$239,-981; operating expenses, \$154,449; net earnings, \$85,532; fixed interest charge, \$53,820; net surplus, \$31,712; the estimated earnings for November were \$75,919.

Southern Pacific Company.—The following is a compara-tive statement of the earnings, expenses and fixed charges of this company for October, and from January 1 to October 31. The total mileage is 5,106, against 4,902 last year :

<i>Gross carnings</i> — Pacific system Atlantic system	1887. \$2,669,820	ber <u>1886.</u> \$2,200,706 775,106	\$22.055.126	1886. \$19.415.436

Texas & Pacific.—A circular issued by the Secretary of the company, Mr. C. E. Satterlee, states for the information of stock and bond holders that since the appointment of the reorganization committee the road has to a large extent been rebuilt from the fund provided by the stockholders and from the net earnings of the property during that period. There have been purchased and put in the track : 57,830 tons of 56 lb. steel rails and 1,987,835 cross ties, and a very large amount has been expended in raising track, widening embankments, ballasting, bridging, and for additional sidings, terminal facilities, &c. In addition to this there have been added 27 new locomotives, 218 box cars, 12 caboose cars, 870 flat cars and 25 fruit cars, besides a new transfer boat at New Orleans, costing \$62,000. The receiver will henceforth furnish the gross and net earnings for publication. The actual gross and net earnings for October were as follows:

Groes	<i>October.</i> \$728,362	Jan. 1 to Oct. 31. \$4,756,797
Net.	\$295,822	\$765,974

The obligatory interest charge under the plan of reorganization will be about \$1,287,000, and taxes \$130,000, following

### Beports and Documents.

### RICHMOND & WEST POINT TERMINAL RAILWAY & WAREHOUSE COMPANY.

ANNUAL REPORT FOR THE YEAR ENDING NOV. 30, 1887.

#### To the Stockholders of the Richmond & West Point Terminal. Railway & Warehouse Company:

GENTLEMEN-Your President and Board of Directors, in presenting to you the report of the operations of this company for the past year, beg leave to refer the stockholders to their report dated March 23d, 1887, which gives a full statement of all the transactions of the company from November 20th, 1886, to that date, and will suffice as a basis for the details contained in the report of the Treasurer, from March 23d to November 30th, 1887, hereto attached, which, together with the statements showing the

GENERAL ACCOUNT OF NOVEMBER 30TH, 1887.

MILEAGE NOW OWNED BY THE TERMINAL COMPANY,

SECURITIES ACQUIRED SINCE MARCH 1ST, 1887,

SECURITIES NOW OWNED BY THE COMPANY,

will give the stockholders full information of the present finan cial condition of the Company and its property, and will suffi ciently illustrate the following remarks :

The terminal Company is a proprietary company. Origin-ally organized as an auxiliary to a small system, it has within the short space of fourteen months become the most important railway company of the South, and has become in the control of mileage the sixth company in rank of importance in the United States. The underlying principle which actuated the Board of Directors in bringing into your ownership this extensive system has been the belief that the consolidation of the control of these roads must result in great economies, in less competition, and also enable the roads within the system to devote their attention to furnishing better facilities for the public in the way of safer and quicker transportation of freight and passengers, instead of wasting their energies and resources in senseless competition at competing points, or reckless invasions into each other's territory. As long as the statutes of the different States authorize any

combination of men, responsible or irresponsible, to build a road to or from any place, even to the extent of paralleling an existing line, so long will it be necessary to protect invested capital by consolidating in one ownership, as far as possible, the lines traversing a country so sparsely settled as that covered by the Terminal lines.

The wisdom of uniting the various properties now in the ownership of your Company has received the endorsement of your Board of Directors.

The financial result of the operations of the Richmond & Danville Railroad proper for the year ending September 30th 1887, is as follows :

RICHMOND & DANVILLE RAILROAD COMPANY FOR YEAR ENDING SEPTEMBER 30TH, 1887.

	Gross earnings. Interest on investments	\$4,152,991 50 202,170 40			
	Operating expenses and taxes	\$4,355,161 90 2,287,857 22	\$2,067,304	68 <sup>,</sup>	
	Less— Interest consol. mortg. bonds "general mortg. bonds consol. mortg. 5 per cent	292 680 00			
	" debentures" " floating debt Rentals leased roads	213 360 00			i,
I			1,482,517	87	
I	Net income		\$584,786	81	

There was expended in addition for-

821

which is the charge under the second mortgage of \$25,000,000, which bears interest up to 5 per cent, but is dependent upon income and non-cumulative. While the committee cannot fix an exact date for the issue of the new securities, no time is being lost, and they expect to deliver the same during the coming spring.

Wabash.-At Chicago, Dec. 13, the payment of Wabash coupons was deferred at a conference held in Judge Gresham's chambers in the United States Circuit Court. Some time ago formal orders were entered in the different Wabash foreclosure suits, directing the receiver to pay coupons upon bonds of the different divisions as those different divisions should show sufficient available surplus earnings for the purpose. Under this order it was understood that the receiver would pay coupons on January 1 on certain of the divisions, but not on all of them. On the representation to Judge Gresham by most of the parties interested in the suits that such payment was undesirable unless it embraced all the divisions, he informally directed Receiver McNulta to defer the proposed payment on January 1, and not to make another payment until some further consideration should be given to the matter. But opposi-tion to this immediately came from New York, and on the 15th it was reported he would allow the original order to stand.

For other Investment News see "Commercial and Miscellaneous News," on a previous page.

Construction R. & D. RR.	\$78,721 24
Equipment	114,592 3
Betterments A. & C. A. L. RR.	56,608 4
	50,008 40

In my annual report as President of that Company, I have recommended that certain heavy drains upon its net earnings shall be discontinued, and that a certain limit shall be placed upon the amount of betterments and construction, and I think it safe to say that if these recommendations are carried out the operations for the year ending September 30, 1888, will show largely increased net earnings.

A line is being constructed by parties friendly to the interests of this company from Clarksville, the Southern terminus of the Richmond & Mecklenburg Railroad through Oxford to Durham, North Carolina. This line extends through one of the richest tobacco sections of that State, and will form a short line from the Northern States and Richmond, Virginia, to Raleigh, North Carolina. A large increase of business may therefore be confidently expected by the Richmond & Mecklenburg Railroad, and this road will doubtless in the early future yield an income on its securities owned by your company.

The Oxford & Henderson Railroad has also developed a good traffic, and will no doubt be able to more than pay the interest on its bonds, all of which are owned by this company.

The annual report of the East Tennessee Virginia & Georgia Railway Company for the year ending June 30, 1887, is as follows:

EAST TENNESSEE VIRGINIA & GEORGIA RAILWA	Y COMPANY
FOR YEAR ENDING JUNE 30, 1887.	1887
Gross earnings Total expenses	\$4,368,180 74 2,901,228 87
Net earnings Less fixed charges and taxes	\$1.466.956 17
	\$523.012 36

Net income

The year's business of that company has been very satifactory to its officers, and its ownership by the Terminal Company has resulted in securing for the East Tennessee Virginia & Georgia Railway, as well as the other properties owned by the Terminal Company, many reciprocal advantages. There is no question but that the acquisition of the East Tennessee, Virginia & Georgia property by the Terminal Company has been a very wise and judicious movement. This company has received 4 per cent upon the first preferred stock which it purchased to insure such control, which is nearly the amount of interest which the Terminal Company pays upon the fixed Whatever difcharge obligations incurred by such purchase. ference there may be has more than been made up by benefits and earnings received by the Western North Carolina and the Richmond & Danville railroads.

The Louisville & Nashville Railroad has invaded the territory of the East Tennessee Virginia & Georgia during the past year at several important points.

They claim the right, without notice, to build into any of our territory, and this position taken by the Louisville & Nashville Company will need the earnest attention of your new Board.

In bringing together, within so short a space of time, so large an aggregation of railroad properties, it must be apparent to every stockholder that no perfect organization or executive system could be put into operation summarily , The organization of the operating department now in force is as follows:

Major Henry Fink is Vice-President of both the Richmond & Danville and the East Tennessee systems. He is the responsible operating officer of the two systems combined, with headquarters at No. 10 Wall Street, New York City.

Mr. E. B. Thomas is General Manager of the combined properties, with headquarters at No. 1,300 Pennsylvania Avenue, Washington, D. C., with Major Peyton Randolph as Assistant General Manager.

Mr. Sol Haas is G neral Traffic Manager of the entire system, with headquarters at Richmond, Va.

This covers the operation of the entire mileage owned by the Terminal Company except that of the Georgia Pacific, which, since its acquisition in 1852, has been operated by its present officers as an entirely separate and independent property. There have been reasons for this, such as new construction and other matters pertaining to the rapid development of the iron districts of Alabama, which this road traverses. The rapid growth of Birmingham, Anniston and other towns on the line of the Georgia Pacific has also demanded especial care and attention from some local executive officer. For these reasons Major John W. Johnston, of Birmingham, Ala., has been kept in charge of this property as its President.

The gap in the line of the Georgia Pacific Railway between Birmingham, Alabama, and Columbus, Mississippi, was completed on the 12th of April last, since which date the traffic of that road has shown a very large increase. The development of the business of the Georgia Pacific Railway during the past year has been very gratifying, and the remarkable increase in the prosperity of the section traversed by it gives every assurance that the earning capacity of that company will in the near future yield a satisfactory income on the large investment your company has in the property.

The annual report of the Georgia Pacific Company has not yet been published, but the operations for the year ending September 30, 1887, show the following results, to wit :

STATEMENT OF OPERATIONS OF THE GEORGIA PACIFIC RAIL-WAY COMPANY FOR YEAR ENDING SEPT. 30, 1887.

On the Richmond & Danville lines, the Southern Express Company's contract expired December 10, 1887, and the Terminal Company is now at liberty to assume the management of its own express business through the agency of such a company as I suggest, or in such other manner as may be deemed judicious.

The experience of the past year has shown to my satisfaction that the administration of the Richmond & Danville Railroad should be entirely separate from that of this company. That system of roads is now so large that for its successful administration it should receive the entire time of its chief executive officer; and it is equally true that to successfully care for the interests of the stockholders of the Terminal Company, who are owners of over \$46,000,000 value of stocks and bonds, the ex cutive officer of this Company should give its business his exclusive attention.

Respectfully submitted, ALFRED SULLY, President.

### OFFICE OF TREASURER, NOVEMBER 30, 1887.

#### To Alfred Sully, Esq., President:

SIR-I beg herewith to submit for your information the general account of the Company as of this date, a statement of the securities owned by the Company, and a list of the roads owned and controlled.

Among the receipts of the company since March 1st., the date covered by your last report, have been 3 per cent dividend on the stock of the Richmond & Danville Railroad Company, 4 per cent on the 1st preferred stock of the East Tennessee Virginia & Georgia Railway Company, 6 per cent on Georgia Pacific Equipment Trust bonds and  $2\frac{1}{2}$  per cent on the Virginia Midland general mortgage 5 per cent bonds.

The ordinary general expenses of the Company have been only \$8,515 since March 1; the other amounts, \$13,653 90, charg d to that account are principally the cost of engraving the 6 per cent trust bonds, the trustee's charges, and expenses attending the collection of payments for the preferred stock issued December, 1886.

The legal expenses, \$41,013 52, include all expenses on that account during the present management, all of which have been settled since March 1, embracing special counsel fees in the negotiations for the purchase of a controlling interest in the Richmond & Danville and the East Tennessee Virginia & Georgia railway companies, and all legal expenses attend-ing the issue of the new stock and the 6 per cent trust bonds. The bills payable show an increase of \$199,425.

This increase is due to the following investments made since the last report:

48½ acres of land in and near City of Atlanta, Ga.... Georgia Pacific Equipment Trust Bonds Minority interest in the Asheville & Spartanburg Railroad..... \$72,300 90,765

In addition to the above investments, this company furnished the rails for the Statesville & Western Railroad (the grading and cross-ties being furnished by local subscription, without cost), and has received therefor all of the securities of that company, consisting of \$300,000 first mortgage bonds and \$:00,000 stock.

Since the last report this company has received from the American Construction Company \$160.000 second mortgage bonds of the Richmond & Mecklenburg Railroad Company in settlement of balance due from the former company for advances for the construction of the Richmond & Mecklenburg Railroad. These bonds are at the rate of \$5,000 per mile, and have ahead of them a first mortgage of \$10,000 per mile.

We have received in settlement for advances by this company for the construction of the Oxford & Henderson Railroad \$ 95,000 6 per cent 1st mortgage bonds of that company and \$3:5,000 of the stock, being all of the bonds and stock issued by the Oxford & Henderson Railroad Company.

Since the last report a further dividend has been received Company, consistfrom the Richmond & Danville Extension ( ing of \$914,078 stock of the Georgia Pacific Railway Company.

zed for FRASER fraser.stlouisfed.org

The expenses of the Terminal Company for the past year have been very light, considering the amount of business transacted; but these expenses can be curtailed by corsolidating the transfer offices of the Terminal Company and of the different companies controlled by it, and also by having the executive offices of all the different companies in one building.

\$183,925 40

Ever since the acquisition of the control of the East Tennessee Virginia & Georgia Company, a great deal of the attention of your President has been devoted to utilizing the express business over our entire system. The Southern Express Com-pany is now operating over all the lines of the Terminal Company except'a portion of the Virginia Midland Railway. The compensation paid by us is much less than should be received, and I recommend the formation of a new express company, to be owned by the Terminal Company, to operate over all our lines and over such adjacent lines as will bring additional business. There is no reason why the earnings of such a compuny should not be secured for the holders of the securities of this company and of the various companies making up the Richmond & Danville stock for the stock of this company system.

In accordance with the resolution of the Executive Committee, adopted May 11 last, authorizing the purchase of the minority interest in the Asheville & Spartanburg Railroad, all of the old bonds of the Spartanburg & Asheville Railroad not then owned by this company (except \$2,600), amounting to \$:01,700, have been purchased at a cost of \$90,765. In the reorganization of the Asheville & Spartanburg Railroad this company has received \$1,045,229 78 of the capital stock of the new company, leaving only \$4,770 22 not owned by this company.

On May 1, 1887, the Virginia Midland Railway Comrany offered to the income bondholders of that company 110 per cent (of the face value of said bonds) for the principal and accrued interest of the income bonds, in the new 5 per cent general mortgage bonds of the Virginia Midland Railway Company. This proposition was accepted by the Terminal Company, and it received \$1,763,908 of the 5 per cent general mortgage bonds of the Virginia Midland Railway Company for the \$1,603,155 income bonds owned by it.

Since March 1 only 309 shares of Richmond & Danville Railroad stock have been exchanged for the common stock of this company. In accordance with resolution of the Executive Committee, adopted August 24, 1887, the right to exchange was canceled, and the 29,564 shares of terminal stock remain-

THE CHRONICLE.

ing in the hands of the Central Trust Company as security under trust deed of February 1, 1887, was withdrawn. This stock was exchanged for \$863,000 of the 6 per cent collateral trust bonds of this company, which were delivered to the trustee and canceled, thereby reducing the annual fixed charges \$51,780. This company now owns 42,610 shares of the stock of the Richmond & Danville Railroad Company, leaving 7,390 shares in the hands of other parties.

The accrued coupons on the second mortgage income bonds of the Georgia Pacific Railway Company, which have not heretofore been included among the securities owned, have been taken up, and appear in that account in the statement appended to this report.

The following is a summary of the changes in the securities owned since last report :

### FORT WORTH & DENVER CITY RAILWAY CO.

ANNUAL REPORT FOR THE YEAR ENDING OCT. 31, 1887.

To the Stockholders of The Fort Worth & Denver City Railway Company.

**GENTLEMEN:** 

Your Directors herewith submit a statement of the opera-	-
tions of your Company for the fiscal year ending Oct. 31, 1887 :	
Th gross earnings were	
Net earnings	
Ratio of operating expenses to earnings	
Fixed charges\$185,580 00	

The road and equipment are in good condition, and no serious accident has occurred during the year. In September a portion of Pease River Bridge was washed away, and traffic north of that point was stopped for several days. On October 7th another heavy rise in the Pease River washed out 470 feet of the same bridge, and stopped traffic for seven days. The actual damage by these washouts amounted to about \$4,500. Steps have been taken to put a four-span bridge across this river and thus avert a repetition of this trouble.

There have been faid 11.6 miles of 54-pound steel rails, to replace iron rails, leaving but 14 miles of iron rail in the main line. 64,760 new cross-ties have been p'aced in the track east of Wichita Falls; and the track has been maintained and generally improved, as shown in detailed statements.

1,600 feet of sidings have been put in at Kiley Junction, and the necessary connections to facilitate the transfer of cars. with the Gulf Colorado & Santa Fe Railway; and we have bought, jointly with that Company, fifteen acres of land at that point, and built a joint depot thereon. We have expended \$31,000 for necessary terminals at Fort

Worth.

There has been expended for new equipment \$4,006 28. Construction has been pushed vigorously. Your company has completed during the year extensions from Vernon, in Wilbarger County, to Quanah, in Hardeman County, 28.4 miles; thence to the 200th mile post in Hardeman County, 8.7 miles. At this point the Pan-Handle Construction Company took up the work, and have completed the road to the Canadian River, a distance of 370 miles from Fort Worth. Of the new line completed by them, we have assumed control and are operating 77.2 miles to Clarendon, in Donley County. The work from the Canadian River to the State line is well under way, and will be completed by the 1st of January, 1888. We have kept in view the importance of building a road that can be operated to the greatest advantage. In no case has the grade been allowed to exceed one per cent, and there are no heavy curvatures. The materials used are first class.

A clause in your Company's contract with the Pan Handle Construction Company provides that the Construction Com-pany may call for and receive bonds of your company as fast as they complete sections of ten miles of road, but the Fort Worth & Denver City Railway Company pays interest only upon bonds issued upon road which it has accepted and used, commercially, for three months. Under this contract the interest charges to be paid by the Railway Company for the year 1887 are upon about \$4,000,000 of bonds, a portion of which remains in the treasury of the Company, the proceeds of which may be used for betterments or the purchase of addi-00 tional equipment. Ю The issue of bonds upon the road of your Company has been 00 reduced from \$25,000 per mile to \$16,000 per mile upon 253.1 )( miles of road, making the total bonded debt of the Company, upon its entire line of road, when completed from Fort Worth to the Texas State line, \$3,154,000, being an average of )() 0 \$18,000 per mile, which amount cannot be increased, either upon main line or branches. )() The Denver Texas & Fort Worth Railroad Company is building its line from Trinidad, Colorado, to connect with 70 your road at the State line of Texas, and this connection will be made some time during February, 1888. Agreements have been made by your Company with the Denver Texas & )5 60 Fort Worth Railroad Company and the Denver Texas & Gulf Railroad Company by which the three roads will be 0 operated as a through line, under one management, between Fort Worth and Denver. Your road occupies a commanding position. geographically and commercially, in relation to the best agricultural portion of Texas, the Indian Territory, New Mexico, Colorado and the Northwestern States. It will have for its support, when completed, in addition to its own productive territory, a good portion of the local territory of the east and west connecting lines, by bringing to their service the most direct and shortest

### THE CHRONICLE.

road to the seaboard. For European business, it places all of that vast territory, so rich in mineral production, relatively as near tidewater as the middle trade-centres which are now supplying its requirements, but are doing so with the extra burden of from 1,000 to 1,200 miles excess of rail haul as compared with your line. The same is true respecting business between the territory available to this road, and New York and other Eastern commercial centres, except that with your line there are far less intermediate contending forces, considering existing laws.

Among the important resources of your road are the coal fields of Southern Colorado, from which all that portion of Texas and New Mexico traversed by this road and a consid-erable portion of the Indian Territory must receive its coal supply, and from which will be drawn a great portion of the coal supply for Denver and adjacent territory, including that for some of the trunk lines entering Denver from the East. The pineries of Eastern Texas will, by your road, furnish

the most available supply of lumber for Northwestern Texas, part of the Indian Territory, New Mexico and Colorado; and this will prove a fruitful source of revenue, thus making

business to be handled by your cars in both directions. The history of your road, with regard to its earning capacity as a short local road in Texas, having no through business, cannot be taken as a criterion for its revenue-earning power as a trunk line making important through connections, and even changing entirely the relation of what is probably the richest producing portion of the United States to tidewater.

The agricultural resources of the territory tributary to your road, and the low price at which land may be purchased, present to the emigrant great inducements. The soil is deep and fertile, and is well adapted to the culture of small grain. Water is obtained anywhere by sinking for it, and running streams are not infrequent. The climate is regular and salubrious. Settlers are gradually coming in, and the indications are that there will be a large increase of settlement from now on, and in a very few years this entire region will, we believe, be thickly settled and cultivated.

Respectfully submitted,

#### MORGAN JONES. President.

The following summary has been prepared by parties officially connected with this enterprise and thoroughly acquainted with its details :

The growth of trade and rapid development of our own and other territories on the Pacific have rendered a passage for ships through the American isthmus a necessity to the further march of commercial progress. For the past decade the world has been looking to Panama for the fulfilment of this long-deferred hope, but it begins to be realized that that project has broken down. Its collapse opens the way for American capital and enterprise to secure the control of a greater pathway of commerce in American hands, by availing of the favorite route of American explorers and engneers across the Republic of Nicaragua.

The Nicaraguan Government has granted a number of coin-cessions for a canal in past years, but hitherto no work has been done under them. Upon the failure of the treaty nego-tiated in 1884, securing to the United States the right of way tiated in 1884, securing to the United States the right of way for a canal, the Nicaraguan Executive made a contract with the Nicaragua Canal Association of New York, represented by Mr. A. G. Menocal, which was confirmed by the Legislat-ure, and formally promulgated in April, 1887. Under that contract, granting exclusive right of way and other valuable privileges, operations were commenced by the sailing of the steamship "Hondo" on November 30th from New York for Greytown, carrying a party of forty skilled engineers, sur-veyors and assistants, to make the final surveys and locate the route of the canal. in preparation for the work of construction, route of the canal, in preparation for the work of construction,

One distinction between this concession and its forerunners which, perhaps, accounts for its present advance beyond the embryonic stage, is that it embodies the suggestion of value. Hitherto Nicaragua has granted concessions without price, for contingent benefits merely. The concession of 1887 was bur-dened with a pecuniary condition which its recipients were obliged to fulfil within sixty days of its acceptance. Thus the vitalizing element of capital was infused into the projectand it became an actual and valuable entity to its hold, ers. These include Mr. Frederick Billings of the Northern Pacific Railroad, in whose offices, and presided over by whom, the Nicaragua Canal Association perfected its organization. Mr. Francis A. Stout, President, Mr. Horace L Hotchkiss, Treasurer, and Mr. J. W. Miller, Secretary, of the Nicaragua Canal Construction Company, Hon. Charles P. Daly, ex-Chief Justice of the Count of Common Place of councel and Macros Justice of the Court of Common Pleas, of counsel, and Messrs. Hiram Hitchcock, of the Fifth Avenue Hotel, A. C. Cheney, President of the Garfield National Bank, Charles H. Steb-bins, ex-Gov. Alonzo B. Cornell, Geo. H Robinson, of the Delamater Iron Works, F. F. Thompson, of the First National Bank, and J. F. O'Shawaharara all of New Yorks, Debart Corn Detamater from works, F. F. Thompson, of the First National Bank, and J. F. O'Shaughnessy, all of New York; Robert Gar-rett, T. Harrison Garrett and C. Ridgely Goodwin, of Balti-more; ex-Gov. Horace Fairbanks, of Vermont; R. A. Lan-caster, of Richmond, Va.; Jules Aldige, of New Orleans, and Wm. P. Anderson, of Cincinnati. Commader H. C. Taylor, U. S. N., is General Manager of the company; Mr. A. G. Menocal, S. N., is General Manager of the company; Mr. A. G. Menocal, Civil Engineer, U. S. N., is Chief Engineer; and the work now begun is in accordance with his plans. The sub-Chief Engi-neer and commander of the expedition on the "Hondo" is Civil Engineer R. E. Peary, U. S. N., well known in connec-tion with previous Nicaraguan surveys.

During Gen. Grant's administration a commission appointed by him to consider the subject of canal communication between the Atlantic and Pacific, consisting of Brig-Gen. Humphreys, Chief of Engineers, U. S. A.; C. P. Patterson, Superintendent U. S. Coast Survey, and Daniel Ammen, Commodore, and Chief of the Bureau of Navigation, unanimously

reported to the President: "That the route known as the Nicaragua Route, beginning on the Atlantic side at or near Greytown; running by canal to the San Juan River; thence following its left bank to the mouth of the San Carlos River, at which point navigation of the San Juan River begins, and by the aid of three short canals of an aggregate length of 3.5 miles reaches Lake Nicaragua; from thence across the lake and through the valleys of the Rio del Medio and the Rio Grande to what is known as the port of Brito, on the Pacific Coast; possesses, both for the construction and maintenance of a canal, greater advantages and offers fewer difficulties from engineering, commercial and economic points of view, than any one of the other routes shown to be practicable by surveys sufficiently in detail to enable a judgment to be formed of their relative merits.'

The commission also declared their belief that the detailed explorations and surveys by officers of the United States Navy, submitted to them, the manner of collecting the information, and the laborious works, conducted through a series of years, by naval officers, under the instructions of the Navy Department, on a field of operations extending from Tehuantepec to Panama, precluded the existence of as favorable lines for the construction of an inter-oceanic ship canal as those presented for consideration in their report.

The proposed route is the one thus reported upon, slightly modified by the Government survey of 1884-5, conducted by Mr. Menocal. Its total length is 169.8 miles. The Lake of Nicaragua, 110 feet above the mean level of the sea, will be the summit level, and the rivers flowing into and from the lake will be utilized to the best advantage in order to reduce the actual canal excavation to the lowest possible limit, which will not be over forty miles. A system of locks at either side of the summit level will be constructed, of such dimensions as to give commodious passage to vessels of the size now used for ocean navigation in Europe and America. The bottom width of the forty miles of canal will vary from 80 to 120 feet, and the surface width from 80 to 288 feet, with a depth of from 28 to 30 feet; but the 129 miles of river and lake will form a waterway safe for rapid navigation, with ample depth throughout. The total cost is estimated at \$64,036,197. The following table of tonnage that would make use of the canal to-day if it were open is based on the reports of the Bureau of Statistics, United States Treasury Department, and, of course, is prepared from official data :

# The Commercial Times.

# COMMERCIAL EPITOMF.

FRIDAY NIGHT, Dec. 16, 1897.

Measures looking to a reduction of taxation at the present session of Congress continue to be actively discussed. But while something will probably be accomplished in that direction, much time will be required to harmonize conflicting views and interests, and it is by no means certain that the protective features of our import duties will be disturbed in any important particular. On the whole, the trade position and prospects may be regarded as satisfactory. It is highly probable that the deficiency bill, which failed at the last session of Congress, will soon be re-enacted, and, with other payments, release some of the money now retained in the Federal Treasury.

The speculation in lard for future delivery has been well maintained throughout the week, receiving its strength not from any present demand, but from a marked reduction in the number of swine slaughtered at the princ pal Western points, which threatens a production much smaller than last year. To day there was a further advance, with a firm closing at about the best prices of the day. Lard on the spot has been quiet, but to-day was more active and dearer, closing at 7 60c. for prime city, 7.95@8.05c. for prime to choice Western, 7.90@8c. for refined for the Continent and 8.25@8.30c. for South America.

Pork has been more active at full prices, and closes with a FORK has been more active at full prices, and closes with a firmer feeling; old mess, \$14 50; new do., \$15 50; prime, \$13, and clear, \$16 50@\$18. Cutmeats have been dull and weak but close steady. Pickled bellies,  $7\frac{1}{2}@7\frac{3}{4}c.$ ; shoulders,  $6\frac{7}{8}@7c.$ , and hams,  $9\frac{3}{4}@10c.$ ; smoked shoulders,  $8\frac{1}{4}c.$ and hams,  $11\frac{1}{4}@11\frac{3}{6}c.$  The packing returns for the week to the Cincinnati Price *Current* show a continuance of decrease in number of hogs handled, compared with corre-sponding time last year. The ten leading points have packed sponding time last year. The ten leading points have packed 420,000 for the week, against 549,000 last year, and these places show a total of 1.923,000 since November 1, against 1,971,000 a year ago, or 48,000 decrease.

Beef is quiet and nominal at \$3@ \$8 25 for extra mess, and \$8 50 for packet per bbl., and \$14@\$15 for India mess per tierce. Beef hams are firmer at \$17 50 per bbl. Tallow lower at 4 5-16c. Stearine is quiet at  $8@81_{\%}c$ . Oleomargarine is quoted at  $63_{\%}c$ . Butter is quiet at 20@33c. for creamery, the outside figure for Elgin fancy. Cneese remains quiet; State factory, full cream, 10@1134c., and skims, 4@9c.

Coffee on the spot has been in active demand from the regular trade, and in view of the rapid reduction of stocks prices have shown an upward tendency. To-day fair cargoes of Rio were quoted at 181/2@183/4c., and the total sales, including mild grades, amounted to about 15,000 bags. The speculation in Rio options has been fairly active, and the early deliveries have developed strength, but to-day at some further advance the close was dull, with sellers as follows, for delivery in 1888 :

10.000	Mor 15.750	1 Sept
Jan	May	Oct. 14.75c.
Feb16.00C.	July	Nov 14.70c.
March	July	14.400.
April	Aug	Dec

Raw sugars have been unsettled, but close firm and fairly active at 518@5 3-19c. for fair refining Cuba and 5 15 16c. for shipment at 24c. for 50-degrees test. The tea sales went off at easier prices for Japans and low Formosas. Kentucky tobacco in better demand and holders inclined to ask more money. Sales for the week are 450 hhds., of which 250 for export. Seed leaf fairly active, sales for the week argregating 1,100 cases as follows: 400 cases 1881-85 crop, Pennsylvania, 91/2@141/2c.; 200 cases 1886 crop, Pennsylvania, 9@15c.; 150 cases 1886 crop. New England Havana seed, 13@ 30c.; 100 cases 1886 crop, New England, 14@18c.; 100 cases 1886 crop, Wisconsin Havana, 7@10c., and 150 cases sundries, 4@28c.; also 400 bales Havana, 60c.@\$1 05, and 250 bales Su-matra, \$1 25@\$1 75. Spirits rurpentine is firm at 38c., with a fair demand, and rosins are steadier at \$105@\$110 for common to good strained. Crude petroleum certificates have been variable, but were to day active and buoyant, closing at 7814@7836. Wool is dull. Hops are steadier. On the Metal Exchange, the speculation in Straits tin has subsided, and the close is dull at 351/2@36c. on the spot and 33 @331/2c. for future delivery. The movement in copper has b-en more active, and prices advanced, but to day. with much excitement, they close at some reduction from bed prices, or about 17.90c. on the spot, 17.75c. for December, 17.95c. for January and 18c. for February. Lead shows renewed specu-tative interest, and to day was active and buoyant, with sales of 500 tons for February at 5.10@5.171/2c. Spelter quiet at 5½c. The iron markets are steadier.

Tonnage in	1879	2,771,886
Tonnage in	1885	4,252,434

Increase in six years (tons).....1,480,548

At the same rate of increase the tonnage for 1892, the possible date of completion of the Nicaragua caual, would be 6,506,214 tons, which, at \$2:50 per ton (the Suez canal tolls), would return a gross revenue of \$16,265,535. The cost of maintenance and operation will not exceed \$1,000,000 per year. The development of our Pacific States would, it is be-lieved, be very rapid from the day the canal was open-d. That such a facility would quickly and largely increase the traffic is shown by the experience of the Suez canal, which in 1870 transported a net tonnage of 436,609, at tolls of \$1.031,865, and in 1883 a net tonnage of 5,775,861, at tolls of \$13,702,413.

Offices of the NICARAGUA CANAL CONSTRUCTION CO., 34 & 36 Wall Street. NEW YORK, December 12th, 1887.

This has been a very dull week in ocean freights.

zed for FRASER fraser.stlouisfed.org

### COTTON.

FRIDAY, P. M., Dec. 16, 1887. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Dec. 16), the total receipts have reached 213,902 bales, against 249,019 bales last week, 252,406 bales the previous week and 249,388 bales three weeks since, making the total receipts since the 1st of September, 1887, 3,593,867 bales, against 3,236,135 bales for the same period of 1886, showing an increase since September 1, 1887, of 357,732 bales.

The speculation in cotton for future delivery at this market took a turn toward higher prices at the beginning of the week under review. It was seen that receipts at the ports for the remainder of December are to compare with large figures for the corresponding period of last season; a marked reduction was anticipated, and it was believed that this reduction would revive confidence in short crop estimates and lead to a renewal of speculation for the rise. These expectations were fully realized, except that on Tuesday the advance was checked by sales to realize, although Laverpool and Manchester were better. On Wednesday there was renewed buoyancy, Liverpool having made a further advance and the receipts at the ports being comparatively small; but a full interior movement caused some depression at the close. Yes erday, not-withstanding an improvement at Liverpool, there was much selling to realize, which caused the decline of a few points. To-day the market opened stronger on the favorable reports from Liverpool and Manchester, and smaller receipts at many interior towns, but free selling was caused by reports of a panic on the Paris Bourse and increase 1 stocks at interior towns, under which most of the early advance was lost. Cotton on the spot has remained quiet, but helders were firm, and quotations were advanced 1 16c. on Monday. Yesterday quotations were ravised, low grades were reduced 1-16c. and high grades advanced 1-16(0.1)/s c. To-day the market was 1-16c. dearer, mid lling uplands closing at  $10^5$ /s c.

The total sales for forward delivery for the week are 625,100 bales. For immediate delivery the total sales foot up this week 504 bales, including — for export, 504 for consumption, — for speculation and — in transit. Of the above — bales were to arrive. The following are the official quotations for each day of the past week-Dec. 10 to Dec. 16.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat are this week's returns,

\* The figures for Louisville in both years are "net."

The above totals show that the old interior stocks have increased during the week 30,356 bales and are to-night 84,270 bales more than at the same period last year The receipts at

The second secon

No. 14 14 - 2740 ---

the same towns have been 5,782 bales more than the same week last year, and since September 1 the receipts at all the towns are 274,034 bales more than for the same period in 1886.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS .-In the table below we give the closing quotations of middling cotton at Southern and other principal cotton markets for each day of the past week.

Week ending	CLOSING QUOTATIONS FOR MIDDLING COTTON ON-									
Dec. 16.	Satur. Mon.		Tues.	Wednes.	Thurs.	Fri.				
Galveston New Orleans. Mobile Savannah Charleston Wilmington . RECEIPTS FROM THE PLANTATIONS. - The following table Indicates the actual movement each week from the planta-tions. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week	Receip	ts at the	Ports.	St'k at	Interior	Towns.	Rec'pts from Plant'ns.			
Ending—	1885.	1886.	1887.	1885.	1886.	1887.	1885.	1886.	1887.	
** 25 Dec. 2 ** 9	270,431 259,925 242,797 248,134	268,596 280,262 275,716 227.886	284,816 249,388 252,406 249,019	\$09,261 \$40,405 \$82,627 434,343	337,180 366,079 360,832 402.085	384,794 409,428 449,202 463.323	299,751 291,069 285,019 299,850	288,079 309,162 800,470 239,199	322,588 274,022 292,180	

The above statement shows—1. That the total receipts from the plantations since September 1, 1887, are 4,067,406 bales; in 1886 were 3,599,028 bales; in 1885 were 3,619,913 bales.

2.—That, although the receipts at the outports the past week were 213,902 bales, the actual movement from plantations was 247,948 bales, the balance going to increase the stocks at the interior towns. Last year the receipts from the plantations for the same week were 269,527 bales and for 1885 they were 284,907 bales.

AMOUNT OF COTTON IN SIGHT DEC. 16.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Dec. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1887.	1886.	1885.	1884.
Receipts at the ports to Dec. 16 Interior stocks on Dec. 16 in	3,593,867	3,236,135	3,154,224	3,329,548
excess of September 1	473,539	362,893	465,389	346,651
Tot. receipts from plantat'ns Net overland to Dec. 1 Southern consumpt'n to Dec. 1	452.425	321,366	341,137	3,676,199 227,855 78,000
Total in sight Dec. 16	4,653,831	4,025,394	4,049,750	3,982,054

WEATHER REPORTS BY TELEGRAPH. - Our telegraphic advices from the South to-night indicate that the marketing of the crop continues on a fair scale, interrupted to some extent by rainy weather.

Galveston, Texas.-We have had rain on four days of the week, the rainfall reaching two inches and five hundredths. The thermometer has averaged 56, the highest being 61 and the lowest 45.

Palestine, Texas.-Rain has fallen on two days of the week

The stock to night is the larges: on record. Marketing makes good progress. The thermometer has averaged 46, ranging from 32 to 59.5.

Nashville, Tennessee.-There has been rain on six days of the week, the rainfall reaching forty-five hundredths of an

inch. The thermometer has ranged from 26 to 59, averaging 45. Mobile, Alabama.—It has been rainy on three days of the week, the rainfall reaching forty-three hundredths of an inch. Average thermometer 39, highest 63, lowest 54.

Montgomery, Alabama.—Rain has fallen on three days of the week. The thermometer has averaged 53, the highest being 62 and the lowest 32.

Selma, Alabama.-We have had rain on three days of the week, the rainfall reaching thirty hundredths of an inch. The thermometer has averaged 52, ranging from 35 to 63. Auburn, Alabama.—Telegram not received. Madison, Florida.—We have had rain on two days of the

week, the rainfall reaching seventy one hundredths of an inch. The thermometer has averaged 58, the highest being 71 and the lowest 40.

Macon, Georgia.-There has been rain on three days of the week.

Columbus, Georgia.—It has rained on two days of the week, the rainfall reaching seventy-five hundredths of an inch. The thermometer has ranged from 33 to 55, averaging 47.

Savannah, Georgia.-We have had rain on three days of the week, the rainfall reaching one inch and forty-two hun-dredths. Average thermometer 56, highest 69, lowest 39. Augusta, Georgia.—The early part of the week was clear

and pleasant, but the latter portion has been cloudy, with rain on four days. The rainfall reached two inches and eleven hundredths. The thermometer has averaged 51, the highest being 67 and the lowest 36.

Charleston, South Carolina.- It has rained on four days of the week. Average thermometer 56, highest 67 and lowest 43.

Stateburg, South Carolina.—It has rained on three days of the week, the fainfall reaching sixty-eight hundredths of an inch. There has been one frost. The thermometer has averaged 50 5, the highest being 66 and the lowest 34.

Wilson, North Carolina.-Telegram not received.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock Dec. 15, 1887, and Dec. 16, 1886.

	Dec.1	5, '87.	Dec.	16,'86.

INDIA COTTON MOVEMENT FROM ALL PORTS .- The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Dec. 15. BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

Shipments this week.			Shipm	ents Sinc	Receipts.			
Year	Great Brit'n.	Oonti- nent.	Total.	Great Britain	Conti- nent.	Total.	This Week.	Year.
1887 1886 1885 1884	3,000	7,000 7,000	$10,000 \\ 7,000$	$336,000 \\ 225,000$	706,000 490,000	1,086,000 1,042,000 715,000 1.207,000	<b>30,000</b> <b>19,000</b>	1,552,000 1,106,000

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts, of 12,000 bales, and a decrease in shipments of 6,000 bales, and the shipments since Jan. 1 show an *increase* of 44,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of January, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e week.	Shipments since January 1.			
	Great Britain.	Conti- nent.	Total.	Great Britain.	Continent.	Total.	
Calcutta-						-	
1887				99,000	127,000	226 <b>,000</b>	
1886	2,000		2,000	65,000	37,000	102,000	
Madras-							
1887	1,000		1,000	60,000	13,000	73,000	
1886	3,000		3,000	44,000	6,000	50,000	
All others-							
1887		2.000	2.000	88,000	38,000	126,000	
1886	1,000	2,000	3,000	68,000	57,000	125,000	
Total all-				<u></u>			
1887	1.000	2.000	3.000	247,000	178.000	425,000	
1886	6.000	2,000	8,000	177.000	100,000	277.000	
1000(	0,000 )	2,000 )	0,000 (	111,000	100,0007	211,000	

to the extent of twenty-two hundredths of an inch. Average thermometer 47, highest 56 and lowest 30.

San Antonio, Texas.-It has rained on four days of the week, the rainfall reaching one inch and seventy-four hundredths. The thermometer has averaged 48, ranging from 38 to 64.

New Orleans, Louisiana. - We had rain on three days of the week, the rainfall reaching one inch and forty-three hundredths. The thermometer has averaged 55.

Shreveport, Louisiana.-Rainfall for the week sixty seven hundreaths of an inch. Average thermometer 48, highest 59 and lowest 34.

Columbus, Mississippi.-We have had rain on two days of the week, the rainfall reaching thirty-two hundredths of an inch. The thermometer has averaged 45, the highest being 62 and the lowest 24.

Leland, Mississippi.-Rainfall for the week twenty-six hundredths of an inch. The thermometer has averaged 48, ranging from 30 to 66.

Greenville, Mississippi.-Telegram not received.

Clarksdale, Mississippi.—Telegram not received. Helena, Arkansas.—It has sprinkled lightly on three days of the week, the rainfall reaching nine hundredths of an inch. The thermometer has averaged 46, the highest being 56 and the lowest 28.

Memphis, Tennessee.—Rain has fallen on three days of the week, to the extent of sixty-three hundredths of an inch.

The above totals for the week show that the movement from the ports other than Bombay is 5,000 bales less than the same week last year. For the whole of India, therefore, the total shipments since January 1, 1887, and for the corresponding periods of the two previous years, are as follows :

EXPORTS TO EUROPE FROM ALL INDIA.

Shipments	18	887.	18	886.	1885.	
to all Europe from—	This week.	Since Jan. 1.	This week.	Since Jan. 1.	This week.	Since Jan. 1.
Bombay All other ports.		1,086,000 425,000		$\overline{\substack{1,042,000\\277,000}}$	7,000 5,000	715,000 231,000
Total	7,000	1,511,000	18,000	1,319,000	12,000	946,000

ALEXANDRIA RECEIPTS AND SHIPMENTS.—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The follow ing are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, Dec. 14.	1887.		1	886.	1885.	
Receipts (cantars*)— This week Since Sept. 1		80,000 76,000		60,000 22,000		60,000 53,000
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Exports (bales)— To Liverpool To Continent	14,000 7,000	132,000 68,000	11,000 7,000	$127,000 \\ 45,000$	10,000 8,000	111,000 58,000
Total Europe	21,000	200,000	18,000	172,000	18,000	169,000

\* A cantar is 98 pounds.

This statement shows that the receipts for the week ending Dec. 14 were 180,000 cantars, and the shipments to all Europe 21,000 bales.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market is firm for both yarns and shirtings. We give the prices for to-day below, and leave those for previous weeks of this and last year for comparison:

	1	1887.		1886.			
	32s Cop. Twist.	8 <sup>1</sup> 4 lbs. Shirtings.	Cott'n Mid. Uplds	328 Cop.	8 <sup>1</sup> 4 lbs. Shirting <b>s</b> .	Cott'n Mid. Uplds	
" 25 Dec. 2 " 9	$\begin{array}{c} \mathbf{d.}  \mathbf{d.} \\ 734  \overline{@} \ 838 \\ 758  \overline{@} \ 814 \\ 712  \overline{@} \ 818 \\ 713  \overline{@} \ 818 \\ 713$	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$	$     \begin{array}{r}       5916 \\       5916 \\       558 \\       5916     \end{array} $	$\begin{array}{c ccccc} \hline d. & d. \\ 7^{3}_{16} @ 7^{11}_{16} \\ 7^{3}_{8} @ 8 \\ 7^{3}_{8} @ 8 \\ 7^{5}_{16} @ 7^{15}_{16} \\ 7^{3}_{8} @ 8 \\ 7^{3}_{8} @ 8 \end{array}$	$5 7 \frac{1}{2} \frac{1}{2} \frac{1}{6} 6 7 \frac{1}{2}$ $5 7 \frac{1}{2} \frac{1}{6} 6 7 \frac{1}{2}$	5316	

EUROPEAN COTTON CONSUMPTION FOR NOVEMBER.—We have received to-day (Friday), by cable, Mr. Ellison's figures for November and since October 1. We have also received the revised totals for last year and give them for comparison. The spinners' takings in *actual* bales and pounds have been as follows:

October 1 to December 1.	Great Britain.	Continent.	Total.
For 1887. Takings by spinnersbales Average weight of bales Takings in pounds	661,000 433 286,213,000	628,000 437 274,436,000	1,289,000 435 560,649,000
For 1886.			
Takings by spinners bales	565,000	330,000	945,000
Average weight of bales	447	438	413
Takings in pounds	252, 586,000	166,672,00	419,258,000

According to the above, the average weight of the deliveries in Great Britain is 433 pounds per bale this season, against 447 pounds during the same time last season. The Continental deliveries average 437 pounds, against 438 pounds last year, and for the whole of Europe the deliveries average 435 pounds per bale, against 443 pounds last season. Our dispatch also gives the full movement for this year and last year in bales of 400 pounds each.

pinners' stock Dec. 1	191,	285,	476.	110,	38,	148,	

The foregoing shows that the weekly consumption in Europe is now 143,000 bales of 400 pounds each, against 140,000 bales of the same weight at the corresponding time last year. The total spinners' stocks in Great Britain and on the Continent have increased 264,000 bales during the month, and are new 328,000 bales more than at the same date last season.

EAST INDIA CROP.—From Messrs. Gaddum, Bythell & Co.'s Report of date Bombay, Nov. 11, we have the following:

As regards the growing crops, reports from the Oomra districts are not quite so favorable this week. Rain has been pretty general, but little actual damage seems to have been done; in fact, in some districts the plants will be all the better for the rain, should fine weather now set in, of which there is every probability. Rain has also fallen in the Broach districts, and matters there have improved considerably. The Dhollera and Bengal crops continue to progress favorably.

A correspondent of the Liverpool Daily *Post* (who, that journal states, has been wonderfully correct during the last three years) writes as follows under date of Bombay Oct. 28:

Regarding the cotton crop of India, we are glad to say that the prospects are greatly improved in the Berars, Oonras, and surrounding districts, as well as the places where Western, Comptah, Dharwar, &c., cotton is produced. On all these sides, let people say what they like, the yield will be more than last year. The only exception is the Bengal cotton, which we see from our report will be short by about 30,000 to 40,-000 bales only, compared with last year's unusually large crop. As regards the Guzerat and Kattiawar sides the rains at the Elephantas disappointed us, so the yield there will be reduced, but only by about 30,000 to 40,000 bales, and if heavy dews at night continue with fine clear weather throughout, there will be a material change for the better. As to Broach, the prospects are not so bad as last year. Had there been less rain the crop would have been a bumper one. There is an increase of acreage, besides the crop will be an early one. On the whole, India's yield will not be anything short of that of last year.

By reference to our table of cotton receipts at Bombayit will be noticed that the weekly arrivals have been for several weeks smaller than last year. That we suppose may be taken as corroborating the reports as to a smaller Bengal crop and also indicating that the Oomrawuttee cotton is at least not as early, if it is as large, as a year go.

JUTE BUTTS, BAGGING, &C.—A steady demand is reported for bagging and prices are firm at  $5\frac{1}{2}c$ . for  $1\frac{1}{2}$  lbs., 6c. for  $1\frac{3}{4}$  lbs.,  $6\frac{1}{2}c$ . for 2 lbs. and 7c. for standard grades, while in a small way a shade higher is quoted. Butts are moving fairly, though the lots are small, and sellers are quoting  $2\frac{3}{8}c$ . for paper grades and  $2\frac{1}{2}c$ . for bagging quality, but in a large way sellers would accept  $\frac{1}{6}c$ . less.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. —A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement since September 1, 1887, and in previous years, has been as follows.

Monthly		· . · ·				
Receipts.	1887.	1886.	1885.	1884.	1883.	1882.
Sept'mb'r October Novemb'r	1,213,404	1,031,450	$\begin{array}{r} 385,\!642 \\ 1,\!055,\!524 \\ 1,\!083,\!552 \end{array}$	1,090,385	1,046,092	326,656 980,584 1,094,697
Total Perc'tage			$\overline{2,521,718}$	2,557,994	2,120,281	2,401,937 39 <sup>.</sup> 90

This statement shows that up to Nov. 30 the receipts at the ports this year were 456,704 bales more than in 1886 and 521,898 bales more than at the same time in 1885. By adding to the totals to Oct. 31 the daily receipts since that time we shall be able to reach an exact comparison of the movement for the different years.

	1887.	1886.	1885.	1884.	1883.	1882.	
To. Nv.30		2,590,912					į

The comparison with last year is made more striking by bringing together the above totals and adding the average weekly consumption up to this time for the two years.

This statement shows that the receipts since Sept. 1 up to to-night are now 441,262 bales more than they were to the same day of the month in 1886 and 512,750 bales more than they were to the same day of the month in 1885. We add to the table the percentages of total port receipts which had been received to Dec. 16 in each of the years named,

THE EXPORTS OF COTTON from New York this week show a decrease compared with last week, the total reaching 16,683 bales, against 19,503 bales last week. Below we give our usual table, showing the exports of cotton from New York, and the direction, for each of the last four weeks; also the total exports and direction since September 1, 1887, and in the last column the total for the same period of the previous year.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 148,581 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.

- A. F. HURT, steamer.—The 270 bales cotton on steamer A. F. Hurt's lighter, sunk near Phebus Landing, were brought down to Wilmington, N. C., Dec. 5. Very little of it was damaged.
  BRABO, steamer (Belg.), from Mobile for Liverpool, in going down the channel got a line twisted around her propeller when about fifteen miles down, which necessitated her stopping. A diver will remove the line the line.

the line.
COUNTESS, steamer (Br.), Waters, from Galveston, at Liverpool Dec. 10, lost some bales of cotton from deck cargo.
KIMBERLEY, steamer (Br).—The work of discharging the cargo of British steamer 'Kimberley, from Mew Orleans for Liverpool, stranded near Wash Woods, N. C., was still going forward on the 12th; the schooner Emily Johnson was towed into Norfolk on Dec. '9 with cargo. Twenty-five of the crew arrived at Norfolk on the 10th.
PAXO, steamer (Br.), Chisholm, from Charleston for Sebastopol, arrived at Gibraltar 14th with machinery out of order.

### BREADSTUFFS.

FRIDAY, P. M., December 16, 1887.

The flour market has been dull and unsettled, with prices favoring buyers all the week. The check to the speculation for the rise in the grain markets, an easier turn to values there and indisposition to trade which usually attends the near approach of the Christmas and New Year holidays, have all combined to keep business within the narrowest limits. Buyers took only to supply their urgent needs, and parties desiring to close out full lines were compelled to make concessions. To-day the market was quiet but steadier.

The wheat speculation has in a great measure subsided, and prices have become unsettled and somewhat irregular. The decline in current values is not important, but the movement for export as well as takings of local millers was very small. Rains in the trans-Mississippi region have relieved in a good degree the apprehensions that were felt regarding the out-turn of the next crop, and rumors affecting European politics assumed a less disturbing aspect. To-day a weak opening was followed by some recovery, in sympathy with the revival of speculation at the West, causing some dem and to cover "shorts," but regular trade was dull.

DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

DALLI CHOMIC INCOM OF THE THE								
December delivery	Sat. 90 <sup>5</sup> 8	Mon. 89	<i>Tues.</i> 8778	Wed. 8812	<i>Thurs.</i> 8838	Fri. 89 <sup>1</sup> 4		
January delivery February delivery	$91^{1}_{4}$ $92^{1}_{2}$	89 <sup>5</sup> 8 90 <sup>7</sup> 8	88 <sup>1</sup> 2 89 <sup>3</sup> 4	89 <sup>1</sup> 8 90 <sup>3</sup> 8	89 90 <sup>1</sup> 8	89 <sup>5</sup> 8 90 <sup>7</sup> 8		
April delivery	$93^{5_8}94^{5_8}95^{1_2}$	92 93 937 <sub>8</sub>	903 <u>4</u> 917 <sub>8</sub> 9234	$911_2 \\ 921_2 \\ 933_8$	$91^{1}_{8}$ $92^{1}_{8}$ $93^{1}_{4}$	92 93 <sup>1</sup> 8 93 <sup>7</sup> 8		
May delivery June delivery December '88 delivery	95 <sup>5</sup> 8 98 <sup>1</sup> 2	937 <sub>8</sub> 965 <sub>8</sub>	$927_8 \\ 957_8$	$931_{2}$ $963_{8}$		$-937_8$ 967 $_8$		

Indian corn has declined under the abatement of speculative action, with considerable selling to realize. The regular trade, whether for export or home use, has been extremely dull, and yesterday the lowest prices that had been quoted in some time were accepted. The new crop continues to be marketed freely, and it is in fair condition for present use. To-day a firm opening was followed by a slight speculative improvement, but "spot" business was dull, and fair new Southern white sold from the dock at 58@59c.

#### DAILY CLOSING PRICES OF NO. 2 MIXED CORN.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
January delivery	6314	6112	6112	61	61	6134
February delivery	63 <sup>1</sup> 8	6134	6134	614	6112	6218
May delivery	$63^{1}2$	$62^{1}4$	62	6134	62	6314

Oats have been also depressed, but not in the same ratio as wheat and corp. Holders have shown more strength, but regular trade is dull, and prices have given way some, and the speculation has become sluggish. To-day the market was firm but quiet.

### DAILY CLOSING PRICES OF NO. 2 MIXED OATS.

Sat. Mon. Tues. Wed.

The movement of breadstuffs to market is indicated in the statements below, prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending Dec. 10, 1887, and since August 1, for each of the last three years:

	1

#### THE DRY GOODS TRADE.

NEW YORK, Friday, December 16, 1887. Business in commission and inporting circles was re'atively quiet the past week, the near approach of the "stock-taking" period having caused jobbers to govern their purchases of seasonable goods by pressing requirements. There was also a lull in the demand for some descriptions of epring goods at first hands, most of the large distributers having already placed their early orders, while small dealers are not yet quite ready to begin operations for next season. Agents continued to make very fair shipments of staple cot. ton goods, clothing woolens, shirting prints, cotton hosiery, &c., on account of back orders, and some fair deliveries of foreign goods were mide in this connection by leading importers. The jobbing trade was of fair proportions for the time of year, and more than an average pickage business in domestics and prints was done by some of the leading houses. The valuable account of the Goo. H. Gilbert Manufacturing Co., of Ware and Gilbertville, Mass., has been transferred from the commission house of Brown, Wool & Kingman (in liquidation) to Mesrs. E. Oelbermann & Co., who will hereafter represent the popular makers of all-wool dress gools, flannels, &c., made by the Gilbert mills. DOMESTIC COTTON GOODS,-The exports of cotton goods from this port for the week ending December 13 were 4,663 Packages, valued at \$279,036. These shipments include 2,734 to China, 811 to South America, 362 to A len, 201 to the West

Indies, 132 to Central America, 108 to Mexico, 94 to Africa, 90 to Europe, 48 to British Honduras and 33 to all other countries. Since the 1st of January the exports aggregate 183,767 packages, valued at \$11,179,677. Of this total China has had 87,152 packages, valued at \$4,149,234, and 40,283 packages, valued at \$2,897,387, have gone to South America. For the similar period of 1886 the exports to all port reached 196,794 packages; and in 1885 were 170,649 packages. Staple cotton goods were less active in demand, but there was a good steady movement in most descriptions on account of former transactions, and the market retains the buoyancy of tone reported for some time pas', because of the exceptionally small stocks on hand. Print cloths were in fair demand, and very firm closing at 3 7-16c. for 64x64s and 3 1-16. for 56x60s. Stocks last Saturday and for the three previous years were as follows:

		1887.	1886.	1885.	1884.
	stock of Print Oloths-	Dec. 10.	D.c. 11.	Dec. 12.	Dec. 13.
Held	by Providence manuf'rs	210,000	59,000	120,000	413,000
Fa	11 River manufacturers	. 31,000	91,000	81,000	327,000
Pr	ovidence speculators	37,000	42,000	240,000	320,000
Ô	itside speculators (est)	30,000	20,000	65,000	259,000
0.0					

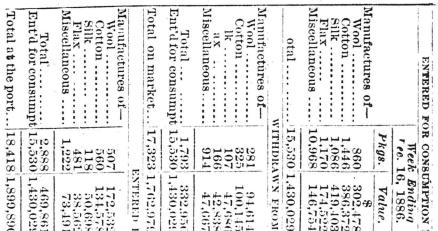

Total stock (pieces)....... 308,000 215,000 506,000 1,310,000 Printed calicoes were in moderate demand, and prices are very firm because of the meagre stocks on hand. Printed sateens and lawns, also ginghams and other woven wash dress fabrics, were in fair request, and leading makes are largely sold in advance of production.

DOMESTIC WOOLEN GOODS.—There was little, if any, improvement in the demand for clothing woolens at first hands, but considerable deliveries of li ht weight cassimeres, worsted suitings, chevoits, &; were made by the commusion houses in execution of former orders. Cloakings ruled quiet, but manufacturers were fairly liberal buyers of Jersey cloths and stochinets. For Kentucky jeans, doeskins and satinets there was a light and irregular demand by packabe buyers, but stocks are in good shape as a rule and prices remain steady. Flannels and blank-ts continued in light request, but regular makes are generally firm in price. All-wool and worsted dress fabrics were in moderate demand for later delivery and leading makes of the former are largely sold ahead by the mill agents. Carpets were more active and opening prices are firmly maintained.

FOREIGN DRY GOODS.—The market for imported goods was quiet, as usual at this stage of the season, other than a few specialties in h liday goods having been in very light demand ty jobbers and retailers. The auction rooms presented no features of noteworthy mention, and next week will probably bring the fall season to a close.

#### Importations of Dry Goods.

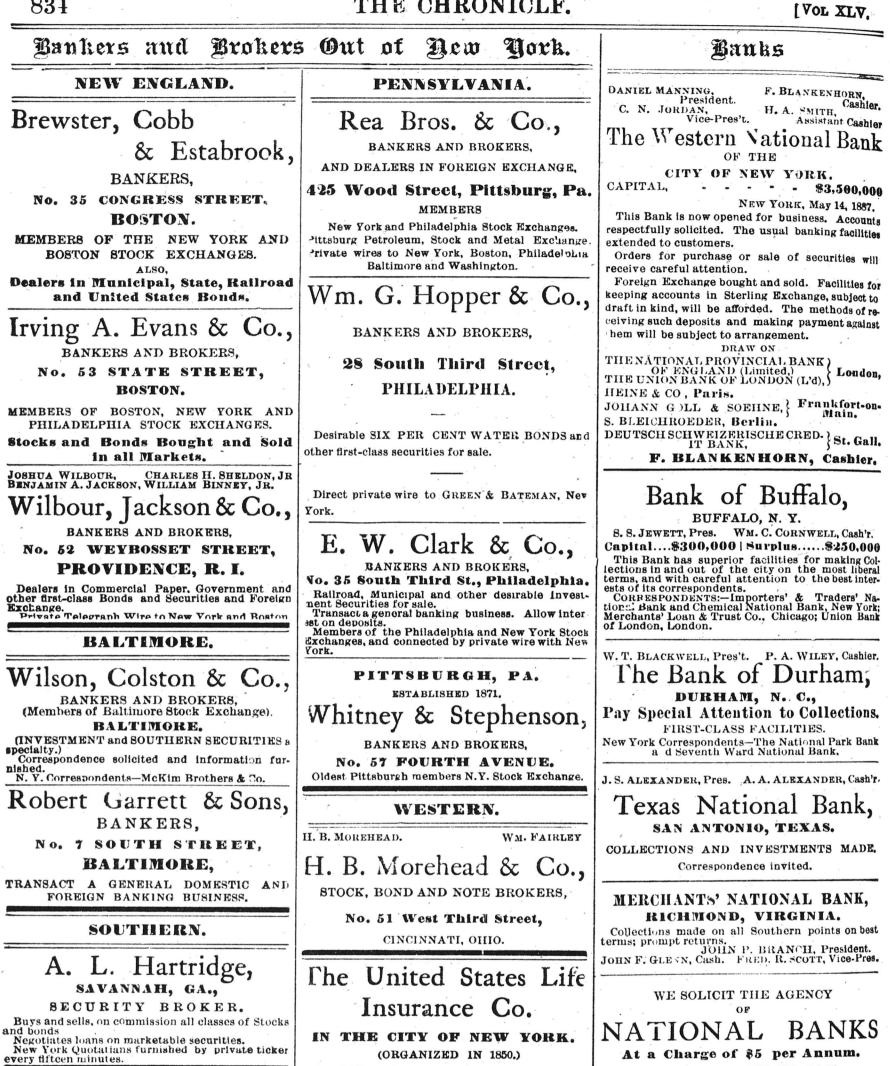

The importations of dry goods at this port for the week ending Dec. 15, 1887, and since Jan. 1, and the same facts for the corresponding periods of last year are as follows:
