CLEARING HOUSE RETURNS

Bank exchanges for the week ending December 17 record a further small decline, but it is entirely outside of New York, for notwithstanding the fact that Stock Exchange transactions were about ten per cent less than during the previous week, the clearings at this city show a slight addition. Aside from New York the only cities which exhibit gains over December 10 are Providence, Springfield, Lowell, Philadel. phia, Cincinnati, Indianapolis, Columbus, St. Paul, St. Joseph and San Francisco. With reference to this city the lack of animation in all branches of speculation is affecting clearings very materially-how materially is well illustrated by the week of last year with which we now compare, when the dealings in share properties accounted for over one-half of the total exchanges.

Compared with the similar week of 1886 there is a decrease at New York of 34.3 per cent, and twelve other cities also recorded losses ranging from 0.9 per cent at St. Joseph to 34.1 per cent at Galveston. The number of clearing houses show, ing increases is not so imposing as during preceding weeks, neither are the percentages so heavy. The most important are, however, Wichita, 35.5 per cent; Columbus, 35.2; Springfield, 34.8; Peoria, 31.9, and Omaha, 29.2 per cent. The net result of the contrast with a year ago is, moreover, a falling off in the whole country of 253 per cent, and a decline outside of New York of 0.6 per cent.

Operations in shares on the New York Stock Exchange for the week cover a market value of \$72,882,000, against \$211,-992,000 for the week of last year. As is our custom, we deduct two-and-a-half times these values from the New York totals to arrive at the exchanges due to other business, the result reached being \$470,248,783 and \$463,556,166, respectively, in the two years, or an increase of 1.4 per cent.

NO. 1,174.

Not included in totals.

• Not included in totals. We have received our usual five-day telegraphic returns of exchanges and they are given below. The total for the seven cities exhibits a falling off from the corresponding five days of last week, and in comparison with the similar period of last year there is a loss of 19⁻¹ per cent. On the basis of theso telegraphic returns the estimate for the full week er ding Dec. 24 would seem to point to a decrease, compared with 1886, of about 0⁻¹ per cent, the week of last year, however, embraced only five business days, Christmas having occurred on Saturday. Messrs. R. G. Dun & Co. report tho number of failures for the week ended to night as 290 (261 in the United States and 29 in Canada), against 288 last week and 263 for the same week of last year.

"For the full week, base 1 on last week's returns.

THE FINANCIAL SITUATION.

The money market has become sensibly easier this week so far as represented by call rates for bankers' balances ; the extremes have been 4 and 6 per cent, not averaging more than 41 per cent, at which likewise renewals have been made. Time loans have also been obtained running from 60 days to 4 months at 5 to 54 per cent on first class security from trust companies and out-of-town banks. This is an unusual condition for the closing weeks of the year when the calling in of loans by banks, trust companies and other institutions in anticipation of the first of Jan. usry disbursements generally combine to make money more active, if not really stringent. Still, the easier tone prevailing in the place of the ordinary spasm is readily explainable. Three conditions, affecting both the supply and demand, have contributed in producing it. The extremely limited transactions at the Stock Exchange are one of them; had speculation been active the inquiry Another influence would have been more active. and quite as important has been the Government disbursements the last three weeks; they have run so much in excess of the receipts as to average for each of the two previous weeks an addition to our bank reserves of over 1 million dollars, and this week nearly two millions. Besides, there is the well-known fact that Stock-Exchange borrowers and probably many merchants have to a greater extent than ordinarily, fearing stringency, secured time loans running into the new year or made early provision for all their December wants. Notwithstanding these conditions, it is still true that banks find no difficulty in putting out every dollar they can spare at fully six per cent. Just now they are not disposed to loan on time except where it is necessary to accommodate good customers, but are responding with some freedom to the demand for call money though in no case so far as we can learn below the legal rate. They continue to have a very active inquiry for accommodation from the West. The banks there have discounted large lines of paper and are getting rediscounts from their correspondents here, and it is this demand, which has been so urgent of late, that is enabling our institutions to find employment for their funds at such satisfactory rates. The present anticipation is that after we have entered upon the new year and the Government first of January disbursements have got into bank, money will be easier. That would be a safe conclusion in any ordinary year.

The situation in Europe has been somewhat strained at intervals during the week, and while the published reports are contradictory, private advices reveal the fact that there is real apprehension felt regarding the attitude of Russia. Any one can see how easy under existing circumstances it would be for the condition on the Continent to change from a war footing to actual warfare. There is so great irritation existing between neighboring nations that the merest accident might, one would think, bring on a conflict. We state on a subsequent page why, as we look at it, a peaceful result may be anticipated, and yet there is no doubt that the situation is grave, especially in view of the reported condition of the Czar's health. The continental bourses have more or less reflected this uncertainty and apprehension during the week, and it is noticed that the open market rates for money at Paris and Berlin have remained firm at 23 per cent within the last few days. At London, however, notwithstanding the loss of bullion by the Bank, the rate of discount for 60 day to 3 months' bank bills has dropped to 23 per cent. The Bank of England's loss of bullion which is reported

at £77,000 has been brought about by a large shipment to Germany. Our special cable states that £192,000 gold has this week been exported to Germany; £45,000 was imported partly from South America and £70,000 was received from the interior of Great Britain. The Bank of France also lost £116,000 gold.

Our foreign exchange market has been strong this week at an advance of one cent a pound sterling since Thursday of last week. This advance is probably in some measure due to the condition on the Continent, but mainly the result of an active demand on the part of bankers and the small supply of bills offering. There is always good buying of bills in December to remit for interest and other obligations maturing on or about January 1, both because of an anticipated demand for bills on or about that date, and also because bankers are advised by their correspondents in Eirope that coupons, &c., have been bought by them. The smount thus required ought to be large this year, for we have certainly sent an unusual amount of securities to Europe during the twelve months. The advance in rates is therefore no surprise, especially as the exports of breadstuffs are small, and of cotton are much less than they were a month ago, and less than they were last year at this time. The arbitrage houses are doing scarcely snything. There was an importation of \$170,000 in gold bars from London on Monday, having been ordered out about ten days ago, when, as will be remembered, exchange was for a brief period at the gold importing point.

It is with sincere sorrow that financial circles learned yesterday of the momentarily expected death at his home in Albany of ex-Secretary Manning, who at that time was President of the Western National Bank of this city. "Be careful and remember that work kills" were among the last words that Guvier uttered ; they were addressed to Professor Agassiz, then a young man at Paris, and Agassiz himself subsequently illustrated them in his own experience. But of no one could it be more truly said than of Mr. Manning that his life was a sacrifice to his untiring devotion to duty. He became Secretary of the Treasury in March 1885, when the government finances were in a most threatening position, beset with Even Mr. McCulloch, his immediate predeperils. cessor, acknowledged in a letter written the last of February of that year the impossibility of con. ducting the Treasury affairs without adopting silver payments. The Custom House revenues were then forty-five per cent of them in the white metal. But through his personal effort, close attention and skillful management, the details of which it is unnecessary to repeat here, Mr. Manning was enabled gradually to obtain control of the gold movement and the Treasury recovered itself. By the time the next year began no one doubted the Gov. ernment's ability as well as intention to pay every creditor in the kind of currency he desired, whether gold, silver or legal tenders. We only recall this matter, because it was a great achievement, gave stability to public finances and permitted the term of prosperity which the country has since then been enjoying . Besides, it is merely an example of the spirit and zeal Mr. Manning threw into all the work of the department-the secret of his subsequent illness and the cause of his death. We all remember the later facts, how he was suddenly prostrated in March, 1886, the sickness which followed, compelling the close of his public career with February, 1887. In parting with his adviser at that date, President Cleveland very fitly, and with great truth, said: "Your "labors, your achievements, your successes and your devo-"tion to public duty are fully seen and known, and they

" challenge the appreciation and gratitude of all your "countrymon."

Trade affairs are in a quiet state at present, a point hav. ing been reached where few developments of moment, one way or the other, are for the time being looked for. The holiday trade is probably more than usually active, both t and general business being slike in this that they are large in amount. But profits are cut very fine, and the average business man to day evinces more than the ordinary degree of caution in mapping out operations for the future. This hesitation is increased by other obvious causes. First and foremost is the uncertainty and doubt as to the probable action of Congress on the surplus ques-It is an axiom that nothing so paralyzes trade as tion. doubt and uncertainty, but meanwhile Congress idles away its time doing nothing but pass resolutions of adjournment, though the President in the matter and method of his annual message brought the necessity for prompt action sharply before the legislative body. It happens at the same time that the prospective falling off in railroad construction puts a further element of doubt in special trades, as its extent can not yet be determined. But this is a matter that will soon remedy itself. In the circumstances, however, it is not surprising that our merchants and manufacturers should proceed slowly and with deliberation.

Railroad gross earnings continue very satisfactory, and in this we have an evidence of the large volume of trade in progress all over the country. These figures of earn. ings are a much better indication just now of the extent of business being done than the totals of clearings, for the luli in Stock Exchange speculation as compared with an active period last year, makes these latter rather misleading. For the second week of December our statement on another page, comprising 73 roads, shows earnings this year \$575,932, or 13.87 per cent, greater than a year ago, with 16 of the roads reporting decreases. In the same week in 1886 there were 65 roads which reported a gain of \$679,696, or 15.73 per cent, some traffic which had been delayed in the first week of the month by snow and ice having been forced into that week. The further large gain the present year is therefore all the more noteworthy. Future returns, however, will be regarded with much more interest, as the general reduction of rates west and southwest of Chicago, which went into effect this week, is a factor in the situation regarded with a little apprehension in some quarters. As concerns the net, only a very few returns have come in for November, and these are all favorable.

On the Stock Exchange the dealings this week have been very limited in volume and unimportant in character, the number of shares sold being next to the smallest of any week this year. Outsiders show no disposition to take part in the speculation, while the professional traders have doubtless been deterred from making any large ventures by a recollection of the money squeeze last December, and the fact that at the turn of the year the calling in and shifting of loans not infrequently produces a temporary stringency. The scaling down of rates in the West and Southwest, as definitely inaugurated this week, has also had some adverse effect, though the fact that this was unattended by any decline in prices indicates either that operators for a decline are altogether inactive or else are disinclined to extend their interest on that side of the market. O1 the whole, tho 13h dull the tone has been firm, and some of the Northwestorn stocks instead of declining have slightly advanced, the changes, however, being almost all insignificant. Cnicago Burling. ton & Quincy was a feature on Thursday, rising several

points on comparatively few transactions, but it has since dropped back almost to the original figure. Philadelphia & Reading has been attacked once or twice on rumors of differences about the scale of wages for the ensuing year, and this has caused some decline in that stock, but altogether the price has been well maintained. Columbus Hocking Valley & Toledo stock has been strong on the continuation of the injunction restraining the old management from diaposing of their holdings. The market has gradually hardened the last two days, and yesterday there was a pretty general advance-on limited transactions, however.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of currency and gold by the New York banks.

Week ending December 23, 1987.	Received by N. Y. Banks.		Net Interior Movement.
Currency			Loss \$950,000
Gold			Long 755,000
Total gold and legal tenders	\$1,781,000	82 795.000	Loss. #1.013.000

The above shows the actual changes in the bank holdings of currency and gold caused by this movement to and from the interior. In addition to that movement the banks have gained \$2,075,000 through the operations of the Sub-Treasury (including \$190,000 for gold imports). Adding that item to the above, we have the following, which should indicate the total gain to the New York Clearing House banks of gold and currency for the week covered by the bank atatement to be issued to-day.

Week ending December 23, 1887.	Into Danks.	Out of Banks.	Net Change in Bank Holdings.
Banks' Interior Movement, as above 8nb-Treasury operations			Loss \$1,015,090 Gain 2,075,000
Total gold and legal tenders	\$10,146.000	19,038,000	G aln. \$1,000,000

The Bank of England lost £77,000 builton during the week, made up by the shipment of £147,000 net abroad and the receipt of £70,000 from the interior of Great Britain. The Bank of France lost 2,900,000 francs gold and gained 1,150,000 francs silver, and the Bank of Germany, since our last report, shows an increase of 3,500,000 marks. The following indicates the amount of bullion in the principal European banks this week and at the cor. responding date last year.

Included in the above payments were \$14,000 in silver coin, chiefly standard dollars.

NATIONAL BANK NOTES AND SILVER CER-TIFICATES.

The figures we gave last week with regard to the silver certificate issues, suggest a side of the currency problem not sufficiently considered, as we think, by those who are discussing or advocating new facilities for floating bank notes. Our divers kinds of currency have to all appearance lived together peaceably so long, we have grown almost to believe that there is no conflicting relation, no antagonism between them. Let us look at the situation a moment as it now is, and note how that situation was reached, for we may find useful hints can be gathered from recent events.

First of all we want to recall the fact-for in these discussions it ought always to be kept clearly in view-that the volume of circulation in the United States has of late years grown to very large proportions. Those who have followed what we have written in past months have some conception of this feature, and yet it requires a further comparison to afford a clear measure of the expansion which has been in progress. To present the case briefly, and yet as lucidly as possible, we have prepared the following, which gives the situation as it stood (1) January 1, 1879, when we began that matvelous cycle of prosperity ushered in concurrently with specie payments; (2) on July 1, 1884, when our industrial progress had been checked, and we were in the process of liquidation; (3) on July 1, 1885. when the first glimmerings of another business revival were to be seen; and (4) on November 1, 1887, a date which apparently marks the beginning of a new period of rest and reflection.

	Jan. 1, 1879.	July 1, 1884.	July 1, 1885.	Nov. 1, 1887.

*The gold for Jan. 1, 1879, we give as estimated at that time. Mr Kimball, the present Director of the Mint, has made deductions in this item since, and we see that he now estimates the amount in the country on July 1, 1879, at only \$245,741,837. We have not his figures for Jan-1 of that year and hence make no change, although if we were to do so it would leave the comparison more striking and our argument the stronger, for wo do adopt Mr. Kimball's lower gold figures for each subse quent date in the table.

The most instructive as well as most conspicuous fact the foregoing brings out is the comparison existing between Nov. 1, 1887, and Jan. 1, 1879. During that period of less than 9 years it is seen that the actual circulation increased 591 per cent. Even at the earlier date there could have been no lack of currency in the country, since, as already stated, it sufficed for starting a business era of most marvelous prosperity. Then again in July 1885, although we had added to the 1879 stock 46 per cent, the currency total was still 83 per cent less than at present, and yet another season of industrial activity set in which is just now on the wane. We refer to these events for the purpose of showing that new facilities for the issue of bank notes are not a real need; that is to say, with the existing supply of currency, if commerce languishes, it most certainly cannot be because the country is short of that kind of tool. We admit that we should like to have a new bank scheme perfected and in operation; it will only be when other circu'ating devices are out of the way and the bank note substituted and made responsive to business wants through a thorough system of redemption, that the certificates.

best and most scientific paper money system possible will have been attained. We are therefore by no means opposed to, but most earnestly favor, a new bank note system. All we mean to assert here is, that the above facts show a constantly and largely increasing volume of currency in face of the decrease of bank notes, and that a dearth of currency cannot therefore be pleaded in favor of any new law.

We are aware many will claim that the close money market of the past few months disproves what we have said and shows that the country has not even now enough That is a conception which will never be recirculation. moved from the popular mind except with study, experience and observation, but is so obviously erroneous that we hardly think many of our readers can be misled by it. The figures we have given above establish the opposite conclusion. The more carefully one examines them and the attendant conditions of trade, the more impressed will he be with their teaching. Note the very large additional volume added to the circulating medium during the first era of prosperity and another during the present cycle, and yet added in vain, for the lapse in activity comes at the moment of largest quantity of what is called money. In other words, is there not here pretty satisfactory evidence that pouring currency into the channels of commerce cannot continue glowing eras because it did not continue these? Such periods always meet an active money market in the end. The gradation in public feeling or tone, as it is called, explains the cause:--first is a condition of absolute distrust, then follows an era of confidence restored, and finally universal credulity prevails. In the latter stage men will overtrade, credit exchanges will multiply, various forms of indebtedness increase, until the demand for loans becomes urgent, pressing upon money lenders from all sides, and then the pinch comes-not because the currency outstanding is insufficient, but because credulousness in the values which support the credits affoat has lessened. These, we are aware, are tedious elementary truths, yet we see no likelihood of our being able to refrain from repeating them so long as a large number of public men believe they can keep the loan market easy by putting out paper money.

But the conclusion we wish to bring the reader to, is not only that we need no addition to our circulating notes, but that a new bank note device in operation now might prove very disturbing. Such a scheme, to be wisely launched, must come with some change in our existing currency methods. For instance, how can the Treasury get rid of the burden of silver dollars except bank-note circulation is contracted ? We see what a vast volume of paper money is now afloat, and we know it cannot be long before it will begin to congest at our monetary centres. The Government is however in addition coining silver dollars at the rate of over 3 millions a month-the total may amount to 40 million dollars the coming year. The important fact to be remembered is that only because bank circulation has been retired has it been possible to float silver certificates thus far. In one particular that statement may appear to need modification ; a place was made for the smallest notes by calling in all other small notes, but the fives and tens would have been returned through the custom houses as rapidly as put out, were it not that the bank note contraction furnished the need for them. Additional amounts can be kept in the channels of commerce in no way except by making a place; that is, by creating a demand or use which will absorb the issues. Hence, while this craze for silver lasts, and the public mints continue to turn out these dollars, the field cannot be occupied by bank notes, but must be left free for silver

We see no other safe course-except in case Congress | could be induced to remodel our paper money arrangements throughout. The importance of so doing no one questions. But roducing taxation is doubtless the first necessity; and there promises to be so much friction attend. ing that affair, that little time, we fear, even if the disposition existed, will be found for maturing and enacting a new currency system. There is no harder task if undertaken conscientiously. One may judge of that from the almost unlimited number of differing plans our leading bankers are proposing in the matter of bank notes. Or perhaps a more exact idea of the Babel to be harmonized on that point alone, will be obtained by reading the concluding portion of Comptroller Trenholm's report. He has done a very useful work in brieging together and analyzing one year's communications to him suggesting modifications of the laws in this particular. We gave his conclusions in full two weeks since, and they will be found instructive read. ing, even though the reader does not agree with the recommondations. In fact, in this latter event, they may be the more inspiring; for we have always thought that Doctor Taylor's Scotchman, who went so regularly to the dobating club simply that he might contradict a bit, was a true philosopher.

THE ECONOMIC DISTURBANCES SINCE 1873. [SECOND ARTICLE.]

As long as Mr. Wells confines himself to generalities concerning man's increased control over the productive forces of nature, or to remote causes like the Suez Canal, it is hardly necessary to answer him. But when he attempts to explain why particular commodities have fallen and are falling in price, he touches matters which are more important and more easy to decide. We believe that many of his conclusions are wrong simply because many of his facts are wrong.

Take for instance those relating to wheat. Of all the articles in his list this is probably the one whose fall in price has had most to do with the distinctive features of the present crisis. Wheat in England has fallen to less than two-thirds of its former figures. In the United States the decline has been hardly less marked. There has been some decrease in cost of production, but nothing corresponding to this. How does Mr. Wells explain it? "An all-sufficient explanation," he says, "would seem to " be found in the circumstance that all investigation shows " that the comparatively recent increase in the world's sup-"ply of food has been greatly in excess of the concurrent "increase of the world's population." This is a sweeping statement, and one which we cannot accept. We do not know of any such investigation which has shown anything of the kind. Mr. Wells certainly has not proved it. The evidence which he adduces breaks down completely. Parts of it are palpably untrue or unfair; while those which will stand the test of examination do not prove his proposition, but rather the reverse.

"According to Mr. Neumann Spallart," he says, "the "production of coreals in Europe doubled from 1869 to "1879, and in the case of Russia her exports of wheat "increased from 36,565,000 bushels in 1880 to 67,717,000 Noumann.Spallart is probably the best "in 1884." authority on the world's grain production anywhere to be found; much too good an authority to make the statement here attributed to him. He never said anything of the kind. The fact that Mr. Wells (who is here blindly following Prof. Laughlin) allows himself to be led into such a statement shows that he is quite unfamiliar with the conditions of wheat production in Europe. It is not merely a misquotation; it is one which no man who writes on the that an increase of one per cent annually would just

world's wheat supply ought to make. As for Russis, the year 1880 was the worst that there has been for a long time in her wheat harvest. In 1878 she exported over 100,000,000 bushels; so that if Mr. Wells had compared 188t with 1878 instead of with 1880, he would have found a decrease of 34 millions instead of an increase of 31 millions. The exports of Russian wheat for the five years 1880-1884 were almost exactly the same as for the fivo years 1876-1880; if anything, a trifle less, in spite of all the increased facilities for putting the crop on the market.

Mr. Wells' atatements concerning the United States are hardly less open to attack. " The careal production of the "United States increased from 932,752,000 bushels in "1862 to 2,992,881,000 in 1884; or in the ratio of 452 per "cent." It may be remarked that Mr. Wells' arithmetic at this point seems, to say the least, a trifle peculiar; but let that pass. The real objection to this comparison is that the initial year is by no means a fair one. In 1862 little more than half of the country was available either for pro. duction or for enumeration; men's best energies were turned to fighting and not to wheat-raising. No wonder that North and South together, in profound peace, and at the end of twenty years of unparalleled growth, should raise three times as much grain as was grown in 1862 by the States then available for enumeration, in the midst of an exhausting war. The only wonder is, that Mr. Wells should make the use he does of a comparison so distinctly unfair in its basis.

But he has another set of facts with regard to the United Statos, which impress him so much that he repeats them twice over. "The average wheat production of the "United States for the five years from 1881 to 1885, "inclusive, was 436,000,000 bushels; while for the ten " years preceding -some of which supplied the heaviest de-"mands for exportation ever experienced-the average "was only 366,000,000 bushels." Very true; but what does it prove? One of these periods was, on an average, seven and a half years later than the other. The increase of population in the United States in such a period is more than 20 per cent. To have kept pace with such increase, the wheat product for the second period should have been at least 450 millions instead of 436. Mr. Wells' theory about food supply increasing faster than population falls to the ground, in this instance at any rate. This will be still clearer in tabular form.

1871-80.	1831-85.
366,000,000	436,000,000
03,000,000	141,000,000
263,000,000	292,000,000
44,000,000	53,000,000
6.1	5.3
	\$66,000,000 0\$,000,000 263,000,000 44,000,000

No system of deduction for seed, &c., will alter the general character of these ratios. For the United States, at any rate, Mr. Wells' "great increase of food supply, as "compared with population," turns out to be a decrease of nearly ten per cont.

It is impossible to make similar tables for Europe with any approach at completeness, the statistics of production of exports and of imports being much more complicated. Enough, however, is known to disprove rash statements concerning the relation of wheat supply to population. The two most careful and most frequently quoted estimates of the population of Europe in modern times are those of Behm and Wagner, in 1874, and Levasseur in 1886. The former gives 300 millions of inhabitants for Europe, and the latter 345 millions. But Levasseur's estimates are habitually rather high; and it is probable

It certainly cannot be about cover the actual growth. less than three-fourths of one per cent.

Now, in the face of this growth, let us look at the harvest estimates of Neumann-Spallart for Europe, which furnish altogether the best data available. To avoid the error due to individual seasons, good or bad, we take average results for decades. We give the figures in hectolitres of a little less than three bushels each.

AVERAGE ANNUAL EUROPEAN HARVEST.

Hectolitres (1 h	ectontre equal	s 2º6 busileis.)	-
			Change
	1870-80.	1875-84.	per cent.
Wheat.		440,800,000	-3
Rye	448,700,000	413,800,000	-8
Barley	227,500,000	230,900,000	+1
Oats	541,800,000	524,200,000	-3
Corn	120,800,000	134,500,000	+11
Other grain	102,900,000	88,800,000	-14
		1,833,000,000	-313
Total	1,000,100,000	1,000,000,000	0-0

This deficit has not yet been made up in Europe itself at least as far as wheat is concerned. Reducing the figures to bushels, and bringing our comparison down to date, we find the wheat crop of Europe to have been as follows

	Bushels.
1870-1880 (Neumann)	1,287,000,000
1875-1894 (Neumann)	1,249,000,000
1883 (Neumann)	1,267,000,000
1884 (Neumann)	1,377,000,000
1885 (U. S. Agricultural Department estimate)	1,201,000,000
1886 (U. S. Agricultural Department estimate)	1,173,000,000
1887 (Vienna Congress estimate)	1,259,000,000
Average 1883-1887	1,256,000,000

The last five years thus show an absolute deficit of 30, 000,000 as compared with the wheat harvests of a decade earlier. But if we make allowance for the growth of population during that period, which cannot be considered at less than three-fourths of one per cent annually, we find an additional allowance of at least 100,000,000 bushels needed, in order to give the same relative supply. The real deficit, as compared with the needs of the people, is 130,000,000. How is this made up? 60,000,000 bushels of it from the United States, whose exports of wheat and wheat-flour have risen from 75,000,000 in 1875 to 135,. 000,000 in 1885; about 40,000,000 from India, whose present wheat export is almost entirely the creation of the last few years; perhaps 10,000,000 from Australia and New Zealand; not quite 5,000,000 bushels from the Argentine Republic; while in other exporting countries-Canada, Egypt, Algiers, Chili, &c.,-the gains and losses nearly balance. Even on this minimum estimate of increase of population the per capita wheat supply of Europe would seem to have diminished in the course of the last ten years.

These figures are probably by no means free from error. We are inclined to think that Neumann's earlier figure was a little too high and that there has been no very great diminution in the absolute wheat product of Europe. But they are trustworthy enough to show that there has been no marked change in the proportion between wheat supply and population-certainly none which will account for the actual fall in prices. The picture drawn by Mr. Wells of a market, already overstocked, which India and South America are flooding with an increasing surplus, is a fanciful one. What are the four or five million bushels of the Argentine Republic in a market whose annual variations of supply amount to hundreds of millions? The increase in Indian wheat exports during the last five years instead of being, as Mr. Wells implies, "continuous and of great "magnitude," has been triffing in amount and by no means continuous from year to year.

That the wheat market is in one sense overstocked, we admit. The fall in price shows it. But that this is due to any overproduction as compared with the needs of

which we have quoted (and which are quoted by Mr. Wells himself) mean anything at all, they show that the proportion between wheat supply and population in civilized countries has remained substantially unchanged, while the price of wheat has fallen one third. The apparent excess of supply in trading centres is to be regarded as a congestion of the market rather than a sur plus available for the consumer.

IMPROVEMENT EXPENDITURES NEW YORK CENTRAL.. ON THE

The report of the New York Central for the late fiscal year, issued this week, is an unusually complete document. It does not contain any remarks, but that has always been a characteristic of the Central. The details of operations, however, are stated with great clearness and at much length, so that results can be easily seen and quickly interpreted. Indeed, the report from beginning to end is a mass of carefully arranged statistics, and the comparative tables given, extending over a long series of years, convey at a glance the progress and changes which have occurred in the Central property since its consolidation in 1869. In addition to the regular matter, we notice that the management has this time incorporated a complete set of the quarterly statements for the year.

The net results of operations for the twelve months were reviewed by us in our issue of October 8, when the preliminary figures were published, and the final statement now submitted does not change the results very materially. In brief, the road after paying four per cent dividends and all charges and rentals, had left a surplus of \$1,570,376 on the accounts for the year. This would have paid an additional dividend of 12 per cent. In other words, the company earned in exact figures 5.76 per cent on its stock, and this too after charging large amounts of betterments to expense account.

It is with reference to this latter point, namely the extent of extraordinary expenses included in the year's accounts, that the present report will be most closely scrutinized. As compared with the previous year gross earn. ings have increased \$4,790,695, and net only \$1,012,448that is, there was an augmentation in expenses in the sum of over 33 million dollars. Of course, the fact that the operations of the West Shore are included for the full twelve months in 1886-7, and in 1885-6 were included for only nine months, tends to swell the totals, but that affects both gross and net results and does not at all account for the large proportionate increase in expenses. So, too, with regard to an enhanced cost of operating; even admitting that labor and some other items are dearer now, the increase reported is altogether too large to be explained ia that way. Hence the conclusion is inevitable that the expense account in the late year included some extraordinary charges, such as heavy outlays for improvements and betterments, and this view the pamphlet before us confirms.

The report does not tell the precise amount of additions to expenses in this way, but a statement is given of the work of "reconstruction. and repairs completed or in progress, and included in operations," which covers three and a half pages, and by its size alone affords an idea of the nature and comprehensive character of the improvements that are being carried on out of earnings. The enumeration o items includes new passenger and freight stations, build ings, engine houses, docks, piers, bridges, grading and filling, tracks and sidings, and motive power and equip ment. As regards the latter, we find that thirty-three consumers, we are disposed to deny. If the statistics new locomotives were added, 30 to replace old ones sold or

destroyed ; 11 locomotives were also equipped with anti-Of passenger and baggage cars, 46 were fire heaters. bought, only seven of which went to replace old ones; 35 cars also were equipped with the anti-fire heater. Then 1,643 freight cars having a capacity of 25 tons each wore purchased, 986 going to increase the road's equipment, and the other 657 replacing cars having a capacity of only 6 to 15 tons. Five miles of new second track were added (between Tonawands and La Salle), over 22 miles of sidings were laid, new tracks were put in the Lyons yard, while 19 miles of double track were laid with 80 pound rails in place of 65 pound rails. Altogether 8,962 tons of rails were used in repairs; referring to the previous year's report, we find that only 5,053 tons were then given as having been used in "construction and repairs." And all this was charged to operating expenses, together with the cost of new build. ings, stations, bridges, sheds, &c., &c. In fact, the only charge to capital account for the year is \$417,290 spent in the purchase of land, a new elevator, and some floating equipme

We have stated that the report does not give the total of expenditures represented by these various items, but some idea of their cost and magnitude can be had from an analysis of the details embraced in the usual exhibit We find that of the \$3,778,247 of expenses. total increase in expenses, \$1,863,577, or about one-half, occurs under the head of expanses for operating the road. It is in this item that the addition to the expense account arising from the enlarge. ment of the volume of traffic and the enhanced cost of wages, fuel, &c., would show, and we may therefore consider the increase under that head as being the result of those causes. The rest of the increase in expenses, however, must be attributed to other circumstances, being in large degree the outgrowth simply of a very liberal policy in making renewals, improvements and betterments.

The expense for maintaining road, for instance, was \$832,118 greater than in the previous year, and the expenditures for repairs of equipment and machinery were over a million dollars greater-in exact figures, \$1,082,552. The additions here are the more noteworthy that there had been an increase under both heads the year before, though this may have followed from the operation of the West Shore, which previously had not been included. Going one step further, it is discovered that there is an increase in every item the late year. Repairs of freight cars alone account for \$739,184, and the large addition to the number of these cars, noted above, gives the resson for this increase. Repairs of road-bed account for an increase of nearly \$300,000 more, and the cost of rails used in repairs and cost of repairs of buildings nearly \$200,000 each. And so we might go through the entire list. In fact, with the exception of the addition of \$142,763 to the taxes on real estate (these taxes being reported under the head of maintenance of road and real estate), almost the whole of the \$1,914,670 augmentation in expenses for mainten. ance of road and equipment may be taken, it would seem to us, as representing outlays of an unusual or extraordinary character. The \$739,184 increase for "repairs of freight cara" is clearly of that nature, and it is certainly no exaggeration to say that about 11 million dollars of the addition to expenditures in the late year was caused by such items.

But it may be claimed that the maintenance expenditures in the previous year were comparatively small; kence that the increase possesses little real significance.

Or perhaps it will be contended that with the operation of a larger amount of track the cost of maintenance naturally would expand, though this point is deprived of much of its force because of the fact that in 1885-6 the West Shore was operated only three months less than in 1886-7. However, to meet all inquiries of this kind, we have prepared the following statement showing the expenditures under the different heads for the last nine years.

	NRW	YORK	CENTRAL	EXPENSES.
--	-----	------	---------	-----------

Year.	Maintaing Road and Real Estits	of Kquip-	Total Road and Equipm't.	Operating Road.	Grand Total.
			8		
1818-79	2,815,710	8,768,717	6,609,157	10,813,616	16,199,073
1879-80	9,131,486	3,611,895	6,716,811	11,103,583	17,849,901
1890-51	3,434,685	4,273,024	7,709,800	11,756,478	19,444,787
1881-52	4,079,585	8,660,761	7,746,319	11,619,025	19,396,974
1882-83	4,652,936	4,219,914	8,872,860	11,877,714	23,750,594
1883-84	4,087,809	2,890,130	6,008,028	16,881,285	17,819,81;
1881-85	8,746,805	2,580,193	6,835,75%	9,993,574	16,819,871
1885-86	4,059,101	2,901,162	6,96/1,203	11,650,113	19,610,37
1896-87	4,891,219	3,9+3,711	8,874,933	13,613,690	22,844,022
Total	84,931,955	80,890,313	05,822 204	102,929,705	164,752,000
Average	3,881,398	8,432,200	7,313,540	11,406,631	18,750,22

To understand these figures it must be remembered that the four years ending with 1883 were very prosperous years for the Central, and that in the most of these the company pursued the same liberal policy with reference to renewal and reconstruction expenditures as in the late year. In 1878-9 for instance maintenance expenses for both road and equipment were only \$5,609,457. In the next year there was an increase to \$6,746,311, followed in 1880-1 by a further increase of a million dollars to \$7,708,309, while in 1882-3 the total rose to \$8,872,850. This latter was the very best year the company ever had. Yet the amount spent in the late year was fully as large-a few thousand dollars heavier in fact. In 1884-5, which was a very bad year, the total dropped to \$6,335,798, and as compared with that year the present aggregate shows an increase of over 24 millions. Even the average for the nine years including the late year, is \$1,561,344 below the \$8,874,933 total for 1886-7. Of course the cost of operating has also greatly expanded, but that, as already stated, is susceptible of explanation on other grounds. If the million and a half dollars above the average apent on renewals and betterments had not been devoted to the purposes mentioned, the surplus balance on the twelve months' operations would have been just that much larger, and the amount earned on the stock instead of 53 per cent would have been 71 per cent. But that is hardly to the point; our object was simply to demonstrate that in the late year a very considerable sum had been spent for additions and improvements and charged to expanses.

THE WAR CLOUD IN EUROPE.

Recently a state of uneasiness has again prevailed throughout Europe. Unessiness existed while the Czar was yet in Denmark ; and there can be no doubt that the discovery of the formation of the triple alliance was a cause of irritation to himself and his trusted counsellors , if not to the Russian people generally. Explanations were made, and after the Czar's return to his own capital, the outlook somewhat brightened. All of a sudden, however, the anxiety returned, and Russia was moving her battalions westward, through Poland, and establishing herself in strength along the entire frontiers of Germany and Austria. For some days the excitement at Vienna, at Berlin and throughout the Balkan regions amounted to a panic. War preparations were initiated ; credits were called for ; and explanations were demanded from Russia both by Germany and Austria. Explanations have again been made, but the threatening aspect of affairs has not altogether disappeared.

And yet, all the facts being considered, we are inclined to take a hopeful view of the general situation. On Monday last Lord Salisbury, speaking at Derby, proudly stated that so far as was known in diplomatic circles there was no ground whatever for the war terror that had seized the bourses, exchanges and newspapers of Eirope. Lord Salisbury is not one of those men who use language wil fully for the purpose of concessing thought or for the purpose of producing impressions not justified by fact. On the contrary he means what he says; and his words are always to be taken as an honest expression of opinion or of fact. When, therefore, he says that so far as diplomacy is concerned there is no known reason for the war scare, we must take him at his word. Of a similarly reassuring character was the announcement made by cable on Monday that, with the exception of the Thirteenth Division, no troops had recently moved westward from the Moscow district; and we are not permitted to question the accuracy and authority of the announcement of a later date, made through the Paris Temps, that the Russian Government had informed the allied Powers that the movement of troops in Poland had ceased. The indications, as well as the announcements, are for the most part of an encouraging and hope inspiring character.

It is well that matters have taken this favorable turn. It is unfortunate, however, that the nations of Europe should be standing, so to speak, perpetually on the very verge of a volcano which is liable at any moment to vomit forth destruction and death, on a scale of almost unparalleled magnitude. It is not without reason that terror takes hold on the multitude and affects the markets. It is well known that but for certain restraining influences, which, happily, for the moment are all-powerful-such are the enmities and antagonisms, and such are the aggressive tendencies,-the European peace would not last for an hour. It is plain as noon day to every thoughtful observer that if Russia had her way she would make short work of Bulgarian independence; and it is equally evident that if France were certain of victory, there would be no delay in attacking Germany. It is the known existence of these sentiments which causes such importance to be attached to every rumor which points to an alliance between Russia and France; an alliance offensive and defensive between these Powers would be a menace to the peace of Europe. There is no reason to believe that any definite or decided steps have been taken towards auch an alliance; but there is no denying the fact that prior to the late change in France there was much suggestive coquetting between the two governments. For the present the coquetting has ceased. and, considering the character of the new French President, and the influence which M. Jules Ferry had both in the election of the President and in the composition of his cabinet, there is but small chance that the courtship will have any serious practical result.

We have referred to certain restraining influences, which for the present are powerful in the interest of peace. What are these influences? One of them we have just mentioned—the improbability in present circumstances of a Franco-Russian alliance. France has quite enough to do at home; the revanche party are not now in the ascendant; and Russia without France to act on the western flank of the enemy will not venture to go to war with Austria and Germany and Italy combined. The great restraining influence, however, is the triple alliance. This alliance, which includes Germany, Austria and Italy, is of the most thorough kind. It is defensive and precautionary in its primary purpose; but directly war is declared it becomes offensive and remains inde-

fensible-forbidding any of the allied powers to make peace without the consent of the other two. The Triple Alliance, powerful as it is in itself, is greatly strongthened by the approval of England; and it is already well understood that if Russia should rashly and with out just cause break the peace the navy of England would come to the aid of the allies. It is impossible to overestimate the value of such assistance. In the event of war breaking out it would be natural for Russia to make for the coasts of Italy-3 movement which would paralyze Italy so far as the alliance is concerned, because it would compel her to keep her troops at home. Bat with the Brit. ish fleet added to that of Italy and to that of Austria, Russia would not be able to show her face in the Mediterranean. Of this both France and Russia are well' aware; and the French papers particularly have been much exercised by the more than probable adhesion of Great Britain to the cause of the allies in the event of war. It is not wonderful that in the presence of such an array of force Russia hesitates to act. It is not denied that if France and Russia were united, Germany and Austro-Hungary, even with the aid of Italy, might have their energies sorely tried. But we have to do with the facts of the moment; and these justify us in regarding the Triple Alliance, with the moral and probable material support of Great Britain, as a sufficient and satisfactory guarantee for continued peace.

It is gratifying to find the good sense of E rope taking this sensible and practical shape. It will be still more gratifying when combinations in the interests of peace shall result in the general reduction of those vast armaments which are now and have long been the curse of the. European communities.

HOW AND WHY THE CANAL HAS INCREASED ITS GRAIN TRAFFIC.

In the prominence of the canal, the grain movement at New York still presents the same characteristics as noted a month ago. The statement for November, showing the sources of the deliveries in that month, has now been compiled, and it is really noteworthy to observe how the canal keeps increasing both the amount and the proportion of its contributions to the total movement.

The receipts in November were quite heavy-1,532,548 bushels greater than in November, 1886, and 2,838,518 bushels greater than in 1885. But of this increase of 1,532,548 bushels as compared with last year, the railroads have only 249,651 bushels, and of the 2,838,518 bushels increase over 1885 they have only 141,867 bushels. In all three of these years the railroads were at peace. Rates have varied of course, but the advantage on that score we should judge was in favor of the present year. For instance, it was only on shipments for domestic consumption that the roads received full 25 cents per 100 lbs. Chicago to New York this year ; last year that was the rate on both export and domestic shipments. In 1885 the rate was likewise the same on both classes of shipments, though it was not till the 23d of the month that the tariff was placed at 25 cents, having previously been only 20 cents. The canal's increasing importance, therefore, can hardly be claimed to be due to the exaction of higher rates on the part of the railroads. Moreover, even the small increase that has occurred in the railroad shipmenta is entirely in the various or miscellaneous roads (comprising chiefly the operations of the Lehigh Valley outside the trunk-line association); these roads brought in 829,167 bushels this year, against 504,927 bushels in November, 1886, and only 155,233 bushels

DECEMBER 21, 1887.]

THE OHRONICLE.

in 1885. Excluding them, the five trunk lines brought in 6,615,878 bushels this year, against 6,690,467 bushels last year, and 7,147,895 bushels two years ago—that is, less with each succeeding year, in face of the fac; as shown, that the total by all routes, rail and water, considerably increased. The following gives the details of the deliveries for a series of years past.

RECEIPTS OF GRAIN AT NEW YORK BY ROUTES DURING NOVEMBER.

Note.—In the above table flour has been reduced to grain on the basis of 4_2 bushels to a barrel, and no distinction made in the weights of the different kinds of bushels, all being added together on the same basis.

The West Shore is the only one of the five trunk lines that has increased its ratio this year. It brought in 12.01 per cent of the movement, against 9.94 per cent last year, and 3 85 per cent in 1885. About half of its 1,868,846 bushels deliveries, however, was oats, namely 910,000 bushels, and this cereal, too, accounts for more than the whole of the increase over the previous year. On the New York Central the changes as compared with last year are very slight-there being a trifling reduction in the ratio, though a slight increase in quantity; but it should be observed that the Central suffered a very heavy falling off last year, its deliveries then having been cut down to 1,933,399 from 2,759,393 bushels, so that the compar. ison is with small totals. The Erie and the Pennsylvania however, have experienced continuous declines. The former in 1885 contributed 2,393,014 bushels to the total movement, but in 1886 contributed only 1,826,811 bushels, and now for 1887 is down to 1,454,600 bushels. In these two years its ratio for that month has been cut down just about one-half, or from 18.80 per cent to 9.34 per cent. On the Pennsylvania the ratio has been reduced from 9 60 per cent to 4.84 per cent, that road having furnished only 753,237 bushels this year, against 1,222,752 bushels in 1885. The Lackawaona does not show a continuous decrease, but it has lost a good part of the previous year's gain.

The canal percentage is not quite so heavy as in the previous month, but the quantity brought in was much greater, and as compared with the corresponding month last year the gain is very decided. Thus while the deliv. eries by that route were 7,896,000 bushels this year, in 1886 they were 6,565,502 bushels, and in 1885 only 5,036,500 bushels. The ratio is 50.73 per cent, against 46.79 per cent last year, and 39 58 per cent in 1895. In fact, both in ratio and amount the canal has improved greatly on all other recent years. The predominance of that route is also seen in the figures for the different cereals. Take wheat and corn for instance. The deliveries of the former at this port in November this year were over 800,000 bushels less than last year, but the amount coming by cana] fell off only about 100,000 bushels, the canal contributing 3,817,100 out of total receipts of wheat by all routes of 4,318,670 bushels. In the case of corn the

total this year was larger than last, but the deliveries by the railroads were less, so that that the causi gained more than the total increase; out of 3,253,986 bushels received altogether, it furnished 2,530,200 bushels. So, too, as regards barley; 1,099,100 bushels came by causi out of 1,459,420 bushels, and the increase on it is heavier than the total increase. In fact, if it were not for the gains in flour and oats, the former of which hardly ever goes by water, the railroads would make a much less favorable showing even than they do.

As a similar state of things was observed in previous months, it is evident that the causes that have produced it are more than temporary or transient. We have already seen that their origin is not to be found in differences of railroad rates, such changes as have occurred being rather in favor of the present year than otherwise. We think the activity of railroad business all over the country, will in the main account for the change. For months reports have been general from the trunk lines that there was more traffic offering than they could take care of with their existing facilities. From every side even now a scarcity of cars is reported. As a result, much of the facilities that would ordinarily be available for the shipment of produce has been diverted to other purposes. It is to be remembered that grain is low-class freight, and returns but little profit to the railroads. If they can keep their rolling stock occupied in business yielding, say, 60 @75 cents per 100 lbs. it is to their interest to give such traffic preference. This is probably the situation as it presented itself to the managers, and as a result they let much of the grain go to the lake and canal route.

At first eight this view would seem in conflict with the well-known fact that rates on grain have been more or less demoralized all through the year. If the roads made no effort to get this business, why did rates decline, it will be asked. But it should be remembered that the cut has extended only to export business, and there it is easily explicable on the theory that the roads were simply protecting their customers. Export shipments of course are governed by the price in Liverpool; besides, each road has its regular patrons, and these, under fair treatment, are usually retained year after year. Hence if one of the lines reduces rates, so as to enable its customers to make export shipments, the other roads protect their customer in the same way, and thus it happens sometimes that in a period of active business like the present railroad rates on special classes of traffic will undergo reductions even when the general tendency is in the opposite direction.

This analysis of the situation pats a different phase upon the figures in the above table showing a reduced grain movement on several of the railroads. It indicates that the roads have suffered some of their low-priced freight to go to other routes in order to carry more of the highclassed freight. Bearing this in mind, the following statement, in our usual form, of the revenue derived by the Eastern trunk lines from this grain traffic will not be misunderstood. In figuring the results for the present year we have found it impossible to get an average of the rate realized by the roads during November, since there is no means of telling what each company received as its proportion of the total through rate on shipments to foreign countries, nor can we know what proportion of the total arrivals has been for export and what for domestic use. We have therefore taken the same average as in the previous month, namely 22 cents per 100 lbs., which would compare with 25 cents in November, 1886, and 22 cents in 1885.

APPROXIMATE GROSS REVENUE FROM THROUGH GRAIN TONNAGE.

	November.			Jan. 1 to Nov. 30.			
	1887.	1886.	1885.	1887.	1886.	1885.	
	\$	\$	\$	8	8	8	
New York Central	94,000	111,000			1,474,000		
Erie	67,000	104,000	120,000	1,022,000	1,131,000		
Pennsylvania	35,000	45,000	01,000	448,000	545,000		
Del. Lack. & West	23,000	49,000	14,000	253,000	558,000		
West Shore	86,000	80,000	25,000	525,000	457,000	346,000	
Total	305,000	383,000	359,000	3,490,000	4,165,000	3,192,000	

There is here a falling off as compared with the same month last year, in the case of every road except the West Shore, and the same for the eleven months. But as already said, this does not convey a correct idea of the course of traffic and earnings from general business. Still, it is useful as showing the result on a special class of traffic usually of considerable importance to the roads. We now give the receipts by routes for the eleven months of the year to the end of November, from which it will be seen that while some of the roads make a better comparison for this period than for November, yet all, with the single exception of the West Shore, carried less grain than in 1886, though the loss on the Erie is insignificant. The canal has brought in more grain than in any other of the years given.

Monetary Commercial English News

[From our own correspondent.]

LONDON, December 10, 1887. No abatement of confidence in the future can be said to have taken place during the week, although some uneasiness has been caused by the reported movements of troops on the Russian frontier. As a set-off to these rumors, we have had the pacific termination of the French Presidential crisis and President Cleveland's message to Congress, which has been unquestionably well received here, as its provisions, if carried out, must ultimately have a beneficial effect on our trade. Our commercial prospect generally may be considered bright The reported troubles in Canada may cause some losses here, but just now there is a singular absence of rumors reflecting adversely on the stability of any of our leading firms, and from this we may assume that trade is certainly sound.

We have, however, yet to ascertain what will be the effect of the present speculation in produce and raw materials Hitherto cotton and wool may be said to have escaped the excitement, but the speculation in metals remains very strong, and notwithstanding occasional reactions, quotations on balance continue to gain. Copper and tia have up to the present been the main centres of attraction, but iron is now hardening, although the recent statement of the Cleveland Ironmasters' Association is not so favorable as was expected. The task of forcing up the prices of copper and tin has been comparatively easy. Unlike wheat, they have limited markets, and a few capitalists working quietly had no difficulty in acquiring, not only the bulk of the present stocks of the metals, but also the command of arrivals due in the near

future. The moment was very opportunely chosen, as there was a perceptible increase in the quantities going into con sumption, while stocks were light. Therefore actual buyer and those who had uncovered accounts open for the fall were entirely at the mercy of holders, and have had to pay accordingly.

An easy money market has prevailed throughout the week. Certainly no signs of tight money with the approaching close of the year have been observed. The difficulty in finding employment for balances has rather increased. Loans barely make 2 per cent, and the discount charge for three months' bills is weak at 2% to 3 per cent. The German inquiry for gold has ceased, but some purchases are being made on Indian account. In the Bauk of England return the more important change has been the increase of £1,001,403 in Government securities, from which it may be inferred that the banks have been taking back some of their stock from the open market. The reserve has gained £69,977, but the proportion to liabili ties which, last week, stood at 48.04 per cent, has receded to 46.93 per cent. The item of bullion exhibits a gain of £70,837, the whole of which must have been recovered from internal circulation, as there have been no foreign gold movements during the week. In the aggregate deposits held an increase of £752,485 is shown. " Other securities" have been reduced £293,298, showing some repayment of loans. The amount of the reserve is now £12,776,204, or £1,117,000 more than last year. The stock of bullion stands at £20,423,459-an increase of £323,000 over the same time last year.

The rates for money have been as follows:

Messrs, Pixley & Abell write as follows on the state of the bullion market:

Gold-During the week there have been no movements of gold at the Bank of England. Some demand has arisen for export. Arrivals: £4,000 from the Cape of Good Hope. £25,000 has been shipped to Benhar

 $\pounds 4,000$ from the Cape of Good Hope. $\pounds 25,000$ has been shipped to Bombay. Silver—There has been a sharp rise since our last, greatly accentuated by the good rates obtained by the India Council. The price to-day is 443_{164} . $\pounds 30,000$ has arrived from New York. The arrival is also reported of the Aller, from New York, with $\pounds 59,000$. $\pounds 88,663$ has been sent to Bombay, per P. & O. steamer. Mexican Dollars, ex French Steamer, were sold at 427_{96} . Since then, owing to the rise in silver, rates have slightly improved. In the absence of business, there is no quotation.

The quotations for bullion are reported as fellows :

GOLD. London Standard.	Dec. 8.	Dec. 1.	SILVEII. London Standard,	Dec. 8.	Eeo. 1.

Some excitement has been caused here by the reported lm portant discoveries of gold in Wales-in the Mawdash Valley no ar Dolgelly. Some samples shown are estimated to contain six ounces to the ton. It is, however, considered very doubtful whether anything of importance will come out of the dis covery, Gold has been found in Wales for a long time past' but hardly in paying quantities. Not far from present site, now attracting so much attention, is the old Cloggan mine, from which between the years 1860 and 1865 some £60,000 gold was extracted by the rather prinitive process of panning, but now the latest scientific methods are used with, it is main tained, proportionate success. Possibly we shall soon have a Welsh gold mine added to the list of our public companies. The shower of new prospectuses continues, but it is question. able whether the new undertakings introduced receive any large measure of public support.

Messrs. Heinemann & Co. have introduced a 6 per cen. loan of the City of Cordoba (Argentine Republic),n is £198,400 and the price of issue 95 per cent,

Tenders for £2,325,000 Treasury bills have been received by the Bank of England, and the whole amount has been allotted in three months' bills at an average of £3 18s. p. ct., tenders at £99 5s. 21/2d. receiving about 45 per cent, and those above in full.

The River Plate Trust Loan and Agency Company are authorized to receive subscriptions for £120,000 six per cent 1st mortgage bonds of £100 each of the Circuta Railway Company of the United States of Colombia, South America. The price of issue is 95 per cent, and the bonds are redeemable at par through the action of a cumulative sinking fund of 21% per cent.

The capital creations for the week have been :

The Cleveland Ironmasters' return for November shows that the total make of iron for the month was 209,152 tons, or 12,613 tons less than in October. The make of Cleveland iron alone was 109,326 tons-a decrease of 7,140 tons in the month. The number of furnaces on Cleveland ore at the end of November was 51, against 53 in October; and on Hematite, &c., 42, against 42. Notwithstanding the decrease in make, the total stock of pig-iron increased by the end of the month by 1,721 tons over October. There was a deficiency in shipments foreign of 7,357 tons and coastwise of 4,046 tons, compared with October; and the actual shipments for November were 64,488 tons, against 71,363 tons in November, 1886.

The Board of Trade Returns issued for November are favorable, and so far as our exports are concerned quite up to expectations. The gain for the month is as much as £1,607,669, which, it is satisfactory to notice, has been distributed with tolerable evenness between the textile and hardware industries. The excess for the eleven months is £5,702,491. In the matter of imports a deficiency of £200,634 is shown for the month. Cotton importations exhibit an increase of £323,360, but those of wool are valued at £126,014 less, although the 'tendency may be momentarily checked by the return of mild

quantities received were 2,151,278 lbs, heavier. The elevenmonths' importations were £9,309,235 more than last year. Our payments for food were quite up to the average.

The following are the totals of the imports and exports during October and the eleven months:

	-Imports & Colonial	Foreign -	-Ksports H Irish I'ron	rillah d	Re-esports & Coloniai

The general appearance of the grain trade has not undergoneany appreciable change. Firmness is still its distinguishing feature and sellers throughout have the advantage. Wheat has been well held and has occasionally brought higher prices. Quotations at the principal selling ports are relatively higher than they are with us, but values abroad ard more regulated by speculative action than is the case here? Prices seem to hint at a firm market, although the hardening

open weather. In the statistical position nothing fresh of importance has transpired. The chances of a further improve ment in prices are qui'e as strong as they were, particularly as with the steady expansion of trade, consumption promises to be of a full average character during the present season.

The following shows the import of cereal produce into the United Kingdom during the past 14 weeks of the season, and other items compared with last year:

Commercial and Miscellaneous News

NATIONAL BANKS .- The following banks have recently been organized :

3,821—The Fourth National Bank of Dayton, Ohio. Capital, \$400,000. Joseph B. Thresher, President; Ziba Crawford, Cashier. The national banking association known as "The Market National Bank of New York," and located in the City of Now York, N. Y., has changed its tille to The Market and Fulton National Bank of New York, S, 822—The Sidney National Bank, New York. Capital, \$50,000. John A. Clark, President; Hiram W. Herriek, Cashier.
3,823—The First National Bank of Chadron, Neb. Capital, \$50,000. A. Bartlett Richards, President; A. C. Miller, Cashier.
3,824—The First National Bank of Centralia, Kan, Capital, \$50,000. A. J. Best, President; A. Oberndorf, Jr., Cashier.
3,825—The Troy National Bank, Ohio. Capital, \$50,000. Noah H. Albangh, President; Noah Yount, Cashier.

-The Market National Bank and the Fulton National have this week consolidated and hereafter the new concern will be known as The Market & Fulton National Bank of New York. It will gratify the friends of Mr. Robert Bayles and Mr. Albert Gilbert, who have so long and acceptably filled the positions of President and Cashier of the Market Bink, to know that they are to hold the same positions in the new organization. It is not often that two companies of any kind in good standing consolidate. For two solvent banks to do it, is even more unusual. And yet the Market and the Fulton are both popular and excellent institutions, with profitable business, good surplus, stocks selling at high figures; and they join fo cessimply because they have reason to think it will be more profitable to do so. The new concern starts with about \$1,400,000 capital and surplus, about 41/4 million deposits, and intends to begin on May 1st the building of a new banking house on the corner of Gold and Fulton streets which it will occupy as soon as completed. No doubt with such surroundings and under its present management it will have a very prosperous future.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports of last week, compared with those of the preceding week, show an increase in both dry goods and general merchandise. The total imports were \$5,051,608, against \$7,973,353 the pre-ceding week and \$3,841,576 two weeks previous. The exports for the week ended December 20 amounted to \$5,062,876, against \$6,493,418 last week and \$7,056,569 two weeks previ-ous. The following are the imports at New York for the week ending (for dry goods) December 15 and for the week ending (for general merchandise) December 16; also, totals since the beginning of the first week in January : IMPORTS AND EXPORTS FOR THE WEEK. -The imports of last

The Bankers' Gazette.

Dividends will be found on the preceding page.

WALL STREET, FRIDAY, Dec. 23, 1887-5 P. M. The Money Market and Financial Situation.—We have had another week of very dull business, and it is evident tha there is the usual disinclination to operate just at the close of he year.

There are many who anticipate a gradual improvement in activity after the January disbursements have been made, and they aupport their views by pointing to the fact that the railroad and financial situation is remarkably good and that the prices of stocks and bonds are relatively low when compared with their range in the past eighteen months.

The session of Congress brings its customary period of uncertainty to all the markets, but the probability of any extreme tariff legislation against manufactured goods is very remote, as neither party is a unit on the tariff question; while as to other matters it seems almost inevitable that legislation must result in a reduction of taxes in some shape and possibly in measures to distribute the surplus. Our Congressmen will scarcely vote in favor of any bill that will cause tight money in the year of a Presidential election. Their financial instincts on this question may be trusted with more certainty, perhaps, than on any other single point in the whole field of political economy.

The way in which gross earnings are keeping up in December confirms our predictions that the year 1887 would turn out to be one of very large gross earnings, though on the other hand the exhibits of net are not always so satisfactory, in many cases by reason of the fact that liberal expenditures are being made for renewals and betterments and charged to operating expenses.

For commission houses the present December is one of the worst known, but for customers it is a better month than December, 1886, when there was so much activity resulting from the famous money squeeze, which was such a profitable operation for the distinguished gentlemen who engineered it.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 4 to 6 per cent, and to-day the rates were 4@5 per cent. Prime commercial paper is quoted at $5\frac{1}{4}@6\frac{1}{2}$ per cent.

The Bank of England weekly statement on Thursday showed a loss in specie of £77,000, and the percentage of reserve to liabilities was 44.92, against 46.16 last week; the discount rate remains unchanged at 4 per cent. The Bank of France lost 2,900,000 frances in gold and gained 1,150,000 frances in silver.

The New York Clearing House banks in their statement of Dec. 17 showed an increase in surplus reserve of \$1,721,200, the total surplus being \$7,928,400, against \$6,207,200 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks:

Net deposits 8036,600 lnc. 800 7,914,100 10,005,700 Legal tenders 26,736,500 lnc. 962,500 18,062,600 28,305,200		1887. Dec. 17.	Diffr'nc's fr'm Prev. Week.	1886. Dec. 18.	1885. Dec. 19.
Surplus	Circulation Net deposits Legal tenders Legal reserve Resorve held	8,036,600 8,036,600 351,566,800 26,736,500 87,891,700 95,820,100	Inc. 724,000 Inc. 800 Dec. 138,800 Iuc. 962,500 Dec. 34,700 Inc. 1,686,500	$\begin{array}{r} 74,386,000\\ 7,914,100\\ 353,761,600\\ 18,062,600\\ 88,440,400\\ 92,448,600 \end{array}$	$\begin{array}{r} 92,818,100\\ 10,005,700\\ 377.502,000\\ 28,305,200\\ 94,375,500\end{array}$

Exchange.—Sterling exchange has been active part of the time during the past week, the demand from bankers having been quite brisk, chiefly for remittances in connection with January interest disbursements. In addition to this there has been a scarcity of commercial bills, and these facts have aused a very strong tone to prevail in rates. Actual rates have been steadily working up, and posted rates have been advanced 1c, to 4 83¹/₂ and 4 87.

To-day the rates on actual business were as follows, viz.: Bankers' 60 days' sterling, 4 823 @4 83; demand, 4 864 @4 864. Cables, 4 864 @4 87. Commercial bills were 4 814 @4 814; Continental bills were: Francs, $5\,23\frac{3}{205}\,24\frac{3}{5}$ and $5\,21\frac{1}{40}$ 5 21 $\frac{1}{4}$; reichmarks, $94\frac{1}{40}$, $95\frac{3}{20}$, $95\frac{3}{20}$, 7.16; guilders, 400, $40\frac{1}{4}$ and $40\frac{1}{40}$, $40\frac{3}{4}$.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying discount; selling discount@par; Charleston, buying do 3-16 discount; selling par; New Orleans, commercial, \$125 discount; bank, par; St. Louis, par; Chicago, 60c. discount. The rates of leading bankers are as follows:

December 23.	Sixty Days.	Demand.
Prime bankers' sterling bills on London	4 8312	4.87
Prime commercial Documentary commercial	4 81404 8131	
Paris (francs). Amsterdam (guilders).	40 240118	
Frankfort or Bremen (reichmarks)	95 0954	403160404 951209558

Coins.—The following are quo	otations in gold for v arious coins:
8overeigns\$4 84 @\$4 87	Silver 14s and 19s 9934@ -

Dimes & 12 dimes 9912@ par.	

* Now demonetized.

United States Bonds.—The business in Government sceurities continues on a very restricted seale; as most of the bonds now outstanding are held for investment or by the banks to secure circulation or deposits, few are transferred in the market. Prices for the 4s and 41s have ruled strong and the latter are a little higher than a week ago.

The closing prices at the N. Y. Board have been as follows:

	Interest Periods		Dec. 19.	Dec. 20.	Dec. 21.	Dec. 22.	Dee. 23.
4 ¹ 28, 1891reg. 4 ¹ 28, 1891reg. 48, 1907reg. 48, 1907coup. 68, cur'ey,'95reg. 68, cur'cy,'96reg. 68, cur'cy,'97reg. 68, cur'cy,'98reg. 68, cur'cy,'98reg.	QMar. QJan. J. & J. J. & J. J. & J. J. & J. * This is the price hid at the morning board; no sate was made.

State and Railroad Bonds.—State bonds have not been specially active, and there has been no feature to the market. Tennessee settlement 3s have been strong. No other class merits special notice.

Railroad bonds have been dull, in sympathy with the extreme dulness of the stock market, though the business in bonds has been relatively more active than in stocks. No special movement of prices has taken place, and the changes for the week, in most cases, are unimportant. The prevailing tone has been irregular. There has been no special demand for investment, and the speculative trading is on a small scale.

Railroad and Miscellaneous Stocks .- The stock market during the past week has been extremely dull and lifeless; in fact the aggregate of transactions is about the smallest of the ycar. There has been no interest whatever exhibited in the market outside of the operations of a few "room traders," whose dealings have made up the entire total of each day's business. Naturally, in such a market the fluctuations have been very slight and mostly unimportant. A generally firm undertone, however, has prevailed, though on occasions special stocks have shown weakness. On Thursday a little more activity developed, but in a time of ordinary activity this day's business would have been considered very small. Reading was the feature, declining 11 on a revival of the rumors of possible trouble among the miners, but most of this decline was recovered to-day. Burlington & Quincy, on the other hand, spurted up sharply, said to be due largely to the covering of 60-day contracts coming due at this time.

There has been little news of consequence, and very few influences to affect prices. The war talk abroad has occasioned some foreign selling, but this has not been extensive, nor has it had much effect on prices. Chicago has most of the time been ranged on the side of lower prices, the reduction in rates by the Western roads having been considerably discussed, though directly occasioning no special weakness.

though directly occasioning no special weakness. To-day, Friday, the market continued dull, though the tone was a little stronger, with Lackawanna, Reading and Union Pacific leading the advance. -----

Net Earnings Monthly to Latest Dates .--The tables follow Net Earnings Monthly to Latest Dates.—The tables follow ing show the latest net earnings reported this week, the returns for each road being published here as soon as received, but not kept standing from week to week. The first state-ment includes all roads for the latest month and from Janu-ary 1, 1887; following that we give the totals for the fiscal year on those companies whose fiscal year does not correspond with the calendar year.

ANNUAL REPORTS.

45,304 20,639

36,997

 $165,990 \\ 45,297$

New York Central & Hudson River Railroad.

(For the year ending September 30, 1887.)

The statistics for the late fiscal year have just been issued. The Central report now includes the West Shore earnings and charges, and the surplus over all expenses and charges (includ-ing dividends paid) is gratifying, amounting as it does to \$1,570,377, against \$1,072,966 last year. The statistics of traffic, earnings, income, &c., are shown in

the following tables :

"For several months we did not feel justified ur der

1887. "For several months we did not feel justified under this law in attempting to compete with rates by water, and this continued until, by the ruling of the Commissioners, rail lines were permitted to make rates reasonably competitive with those named by water." The net results are about the same as last year, showing a surplus of \$\$1,009 after payment of all fixed charges, oper-ating expenses and two semi-annual dividends of 3 per centum each. The expenditures for permanent improvements this year are about \$100,000 in excess of similar disburgements last year. All expenditures for this year have been obarged to operating exp-nses, except cost of land purchased, new shops and double track from Westbrook Junction to Cumber-lard Junction.

The operations and earnings for four years have been compiled for the CHRONICLE as follows:

OPERATIONS AND FISCAL RESULTS.

Richmond Fredericksburg & Potomae Rallroad Co. (For the year ending September 30, 1887.)

The report states that "out of the net profit a dividend of 3 per The report states that "out of the net profit a dividend of 3 per cent was paid to common stockholders on July 1, 1857, and the board proposes to pay on January 1, 1888, a dividend of 3½ per cent additionel. Something more than sufficient to pay this amount of dividend has been earned, but we must bear in mind the fact that the year just closed has been an unusually prosperous one, and that the expenses of the com-ing year will be increased by the necessity of adding three new engines and some additional cars to the equipment of the road. road.

"Since last annual report the new station and offices now occupied by the company at Byrd Street, have been com-pleted. The total cost of the one-half interest owned by your company in the property is \$91,314. This has been paid without adding to the oebt of the company, partly out of carnings and partly by the sale of the old depot and offices on Broad Street."

Callfornia & Oregon .- This railroad is completed. The driving of the golden spike marked the completion of direct railroad communication between Portland and San Francisco, the chief cities of the coast from Seattle to San Diego, a distance of over 1,400 miles.

Cedar Falls & Minnesota.—The hearing in the Dubuque & Sioux City (Cecar Falls & Minnesota) case has been pist-poned until January 10.

Central of Georgia.-The Plant system of railroads and the Georgia Central Rairoad have formed an alliance, which virtually consolidates two of the greatest railroad properties in tually consolidates two of the greatest railroad properties in the South. This arrangement secures to the Ocean Steam-ship Company of the Georgia Central Railroad all the Florida freights which the Plant system can furnish at Savannah. New directors of Central Railroad will be S. M. Imman and H. T. Imman of Atlanta, Ga., and W. Luttgen of August. Belmont & Co.-Boston News Bureau.

Central of New Jersey .- The receivers give notice that all past due coupons of convertible debenture bonds will be paid on and after December 31st inst.

Chleago & Calumot .- This railroad company of Chicago has Unicago & Ualifilier.—This railroad company of Chicago has placed a morigage upon its entire property amounting to \$7,000,000. The mortgage is given to the Central Tru-t Com-pany of New York, as trustee, and Frank H. Tuthill of Ham-mond, Iadiana. The mortgage covers, besides the five miles of track already built by the company, all the latter's real estate, personal property and franchises. The present purpose of the company is to build about 55 miles of road additional, for which a portion of the above \$7,000,000 bonds will be issued.

Chicago St. Louis & Pitt-burg.—The gross and net earn-iogs and charges for November and for the eleven months, Jan. 1 to Nov. 30, have been as follows:

Cleveland & Canton.—The Beaton Herald remarks: "The net earnings for the year will be about \$110,000. The road-bed has now been prepared for standard gange rai's except three.

bridges, and a contract has been let for a new draw for one of these. Some \$84,000 has been expended upon the road this fall, and by Spring or early summer everything will be ready for standard gauge rails. The company has not sold its bonds, but may do so at any time."

but may do so at any time." Columbus Hocking Valley & Toledo.—At Columbus, Ohio, December 23, Judge Evans, of the Court of Common Pleas, refused to grant a motion to dissolve an injunction in the case of the Columbus Hocking Valley & Toledo Railway Company against Burke and others, holding that the acts of Burke and his associates, owning all the capital stock of the railway company and electing themselves directors, issuing mortgage bonds and using the proceeds to buy from themselves and others a mining corporation, were void. Notice of a bill of exceptions was given by Judge Burke. Dpluth South Shore & Atlantic.—This railroad is practi-

a bill of exceptions was given by Judge Burke. Duluth South Shore & Atlantic.—This railroad is practically completed. Two hundred and fifty miles of the eastern portion of the line have been operated during the year 1887 as a local road, and its earnings to Dec. 21 have been about \$1,500,000 gross, and \$660,000 net, not including any traffic derived from construction. The line, when opened as a through line in the spring of 1888, will have maximum grades of 52 feet to the mile, as against grades 78 to 80 feet by any other line from St. Pau', Minneapolis and Duluth east. It will have the same sources of local business as in 1887, with the addition of the Gogebic iron traffic and also the through business in grain, &cc.

Eastern (Mass.)—At Boston, D c. 22, Judge Devens informed counsel for; Dwight Braman and other stockholders that the court had issued an order to restrain D. Foster and others who were elected directors at the recent annual meeting of the Eastern Railroad Company from acting as such until such time as the court can pass upon the questions raised as to the legality of the elections.

Evansville Terre Hante & Indianapolls.—Articles of incorporation have been filed in Indiana. The proposed road will run from Sullivan to Indianapolis, a distance of 75 miles. The capital stock is \$1,000,000, of which \$986,000 has been subcribed by Mr. D. J. Mackey, of Evansville, the remaining \$14,000 being divided between 14 others of Evansville and New York.

New York. Flint & Pere Marquette.—Arguments were heard at Detroit in the United States Court this week on a motion to vacate the restraining order preventing the Flint & Marquette Railway Company from completing their contemplated purchase of the Port Huron & Northwestern narrow guage railway. Judge Brown decided to allow the order to remain in force until he has had time to prepare a written opinion in the case. This is regarded in the light of a victory for the common stock holders of the road, as it is understood to mean that the injunction will remain in force until such time as the case can be heard upon its merits.

be heard upon its merits. —The terms of the proposed purchase of the Huron road are the purchase of all the outstanding stock and bonds of the company by a 5 per cent bond of the Flint & Pere Marquette road. This would increase the fixed charges of the Flint road by about \$125,090, and the Huron road earned \$115,000 last year.

Honsatonlc.—At the annual meeting held in Bridgeport, Dec. 16, a board of directors was elected, and resolutions adopted recommending that a branch of the road connecting the towns of Newtown and Derby be built, for the purpose of making a direct connection with the New Haveu & Derby Railroad. The annual report showed the receipts for the year to have been \$982,549; the expenses \$581,260; net earnings, \$401,283; surplus for the year, \$89,136. The new board of directors elected Mr. W. H. Starbuck, President, in place of Mr. Wm. H. Barrum.

Wm. H. Barrum. Indianapolls Decatur & Springfield — Indianapolis Decatur & Western.—At Indianapolis, Ind., Dec. 22, the reorganization of the Indianapolis Decatur & Springfield road under the name of the Indianapolis Decatur & Western road was perfected and the new company elected the following directors for the ensuing year: John D. Probst, New-Jersey; Hiram Hitchcock, Henry B Hammond, Horace L. Hitchcock, Steven H. Thayer, Charles C. Allen, Thomas B. Atkins, John K. Warren, New York; E F. Leonard, Illinois; John R. Elder, Robert B F. Pierce, Indiana. Under the reorganization plan no reduction in the amount of bonded debt resting on the road is made, but an effort is being made to induce the holders of the first mortgage bonds to accept 5 per cent interest on those bonds, which amount to \$1,800,000, and which now draw 7 per cent interest.

Lehigh & Hudson.—At the annual meeting of the stockholders of the Lehigh & Hudson Railroad Company, held at No. 161 Broadway, Mr. Grinnell Burt was elected President. According to the annual report the gross earnings of the road for the fiscal year are \$241,431; operating expenses, \$142,625; net earnings, \$101,806; interest and taxes, \$94,647; and net income, \$7,159.

Manhattan Elevated.—An advertisement of the call for a meeting of New York Elevated stockholders Jan. 10 says it is to authorize the issue of \$15,000,000 bonds, \$8,500,000 to take up present firsts, \$1,000,000 to take up present debentures, \$1,500,000 to pay for equipment and real estate, and \$4,000,000 for future use for new road and equipment.—Dow, Jones & Co.

Mexican Central.—Of the securities of this company the New York Stock Exchange listed last week \$1.709,000 first mortgage 43, making \$42,879,000 in all; \$341,000 incomes,

making \$9,075,000 in all, and will list \$1,000,000 common stock Jan. 4, making \$36,000,000 stock in all. The directors lately authorized an increase of the stock to \$37,500,000. The increase in securities is on account of branch line construction. While the branches call for the issue of Central Mexican stock and bonds, these are to be eventually converted into Mexican Central securities. The company has recently built 58 miles of railroad upon the Guadalaj ar division, graded some 25 miles more, and done some work upon the Tampico division.

division. Minnesota & Dakota.—A dispatch to the New York Times says: "The contract for the grading of the Minnesota & Dakota Railroad has been let to Job Voak, of Massachusetts, the survey as made last month confirmed without material change, and construction arrangements so far perfected that little remains to be done before the opening of spring. Termminal facilities have been secured in Fargo. * * The grading contract as let is for a single track from Fargo, 152 miles due northwest to a point 15 miles west of New Rockford, in Wells County, passing through the three established towns of Ottawa, Sherbrooke and New Rockford, to reach the Missouri in the spring, and to bave the road in operation the entire distance in time to move next season's crop. Vice-President and S'cretary E. H. Cutler has gone to Wilbraham, Mass., and will conclude the financial adjustment of the company immediately."

Minneapolis & St. Louis.—Dow, Jones & Co. say that a meeting was held Tuesday, in Minneapolis, to decide whether moncy should be borrowed to pay the January 1 interest on Mioneapolis & St. Louis income bonds. Heretofore, this interest has always been paid. It was decided to default on the interest due in January. One of the provisions of the bonds is that interest on these bonds must be defaulted two years before forcelosure proceedings can be begun.

Minneapolis Sault Ste. Marie & Atlantic.—The first train went over the Minneapolis Sault Ste. Marie & Atlantic Railway from Minneapolis on the 16th. The International bridge is finished and connection with the seaboard completed.

New York & Canada.—The report to the State Railroad Commissioners for the fiscal year ending Sept. 30 shows the following:

	1886-7.	1885-6.
Gress earnings	\$828,970	\$772,664
Operating expenses	513,798	471,571
Net earnings	\$315,172	\$301,093
Fixed charges	268,090	268,787
Surplus	\$47,081	\$32,305

N. Y. & Northern.—Messrs. Maitland, Phelps & Co. have purchased from the N. Y. & Northern Railway Co. the balance of the issue of \$1,200,000 5 per cent 1st mortgage gold bonds of that company. The report of the N. Y. C. & Northern to the Railroad Commissioners for the year ended September 30 shows the following:

Gross earnings Operating expenses	$\begin{array}{c} 1886-7. \\ \$484,380 \\ \ldots \\ 418,049 \end{array}$	$\begin{array}{r} 1885-6, \\ \$523, 351 \\ 412, 275 \end{array}$
Net earnings	\$65,731	\$111.676 116
Gress income Fixed charges	\$65,764 225,155	\$111.192 254.120
Defleit for year		\$142,928

New York & Rockaway.—The New York Woodhaven & Rockaway report for the year ending Sapt. 30, 1887, shows: Gross earnings, \$140,212; expenses, \$117,809; other income, \$457; charges, \$34.241; deficit up to Sept. 30, 1886, \$174,565; deficit Aug. 31, 1887, \$185,945.

Orange Belt.—This railway company of Florida has just completed its connection at Macon with its western section, which now gives it over 100 miles of completed road in full operation, and by the 25th of this month the cars will be running into Tarpon Springs, making 118 miles of completed road in operation out of a total of 150 miles. The entire line will be completed by Feb. 1.

An operation out of a total of hor lines. The curve fine will be completed by Feb. 1. Quincy Missouri & Pacific.—The daily Commercial Bulle tin says: "The Quincy Missouri & Pacific Railroad, formerly operated as a division of the Wabash, and over which the latter road sends a large amount of business, is to extend its track, which will transform it into a through line from the Missouri River through the States of Missouri, Illinois and Indiana. This extension, it is stated, is an assured fact. The line of the Q incy Missouri & Pacific now runs from the Mississippi River at Quincy west to Trenton, Mo., and thence southwest to Leavenworth. The present plan is to build a line from Trenton to St. Joseph, a distance of about 80 miles. This would givo a fairly direct line between Quincy and St. Joseph, and would bring the Quincy Missouri & Pacific into direct competition with the Hannibal & St. Joseph to St. Joseph is put down as 206 miles, and the friends of the Quincy Missouri & Pacific claim that their line from St. Joseph to Quincy will be only 6 miles longer, although the eastern termini of the roads are about forty miles apart. The Quincy Missouri d Pacific people are reticent about the source of the funds to be employed in the proposed construction, but it is stated by t reliable authority that the same parties who are backing an ex tension of the Ohio & Mississippi road from Beardstown, Ill, to Quincy are furnishing the necessary funds." Reusselaer & Saratoga.-The report to the State Railroad Commissioners for the fiscal year ending Sept. 30 shows the following:

Gross earnings	1886-7. \$2,400,307 1,497,481	1885-6. \$2,280,391 1,281,610
Net earnings Other Income	\$902,824 9,545	\$098,581 6,681
		\$1,005,262 990,372
BalancoDe	1.8141.609	Sur \$1.1 800

Richmond & Danville,-At Richmond, Va., Dec. 21, the meeting of the Richmond & Danville Railroad Co. was held.

meeting of the Richmond & Danville Rallroad Co. was held. The annual report of the President was submitted and referred to a committee consisting of Messre, Sully, G. T. Stone, J. H. Imman and J. A. Rutherford, to be printed and distributed, and it will probably be given out next week. The stockholders elected the following board of direct-tors: H. C. Fahnestock, C. S. Brice, Samuel Thomas, John G. Moore, John H. Imman, Charles McGhee, Samuel M. Imman, George F. Stone, J. H. Rutherford, Emanuel Lehman, John S. Barbour and J. C. Maben. The new directors organ-ized by the election of George S. Scott to be President of the company in place of Alfred Sully.

Richmond & West Point Terminal—The board of directors of the R. T. Company was reorganized by the election of Jay O. Moss, James Swann and Edward Lauter-bach, to take the places of R. T. Wilson, John Rockefeller and R. P. Flower, resigned, and the board adopted a resolution recommending to the new board of the Richmond & Danville Company about to be elected that George S. Scott be chosen as their president.

as their president. Rome & Decatur.—The committee of creditors of the firm of Grovesteen & Pell, to whom has been entrusted the pre-paration of a plan for the completion of the road, have reported. This is the second plan prepared, the first one, which provided for the retirement of the first mortgage bonds by an issue of preferred stock and for the completion of the road by a mortgage for \$400,000, having failed of success by reason of the opposition of the holders of six of the first mort-gage bonds. Thirty-two miles of the road remain to be con-structed, of which about 26 miles have been graded. The work is now at a standstill, and the roadway rapidly deterior-ating. The early completion of this gap in the lune between Rome, Ga., and Attalla, Ala., is therefore necessary, and additional equipment should be provided. For these purposes \$400,000 in cash is required. The read is now in the hands of a receiver, who has been anthorized by the Alabama Chancery Court to issue receiv.r's certificates to an amount not to exceed \$400,000, the same to bear interest at the rate of 7 per cent. It is also provided that they shall be disposed of at not less than par, the proceeds to be used for the completion of the road and for the extinguishment of liers other than the first mortgage, and to have priority over the first mortgage bonds. The suc-ressful negotistion of the receiver's certificates is therefore, in and to have priority over the first mortgage bonds. The successful negotistion of the receiver's certificates is therefore, in cessful negotiation of the receiver's certificates is therefore, in a measure, dependent upon the assent of the first mortgage bondholders. The plan now proposed makes the creditors' committee a committee to complete, foreclose, purchase and reorganize the road, by the issue of receiver's certificates upon the terms above stated. * * The assent of the holders of 75 per cent of the outstanding bonds of the company is neces-sary to put the plan into effect. Chairman Edwards of the reorganization committee states that he has secured the assent of the holders of 50 per cent of the bonds, and expects unani-mous assent.—Commercial Bulletin. mous assent .- Commercial Bulletin.

San Francisco City Bonds .- The Supreme Court of Cali: San Francisco Ulty Bouds.—The Supreme Court of Cali: fornia decided in favor of the validity of the Dupont Street bonds, etc., and but for a writ of error from the Supreme Court of the U. S. the taxes would have been collected, coupons paid, etc., but the last proceeding ties the matter up again until the Supreme Court of the U. S. passes upon the questions raised by the writ of error.

Shenandoah Valley.—The Philadelphia Press says: "At Roanoke, Va., during this week the Master's report in the case of the Shenandoah Valley Railroad Company has been before Judge Blair. Numerous counsel were in attendance and argument on the various questions at issue will probably take the rest of the week. It is understood that the principal conten-tion will be between the fact memory hardbellars and the the rest of the week. It is understoor at issue will probably take the rest of the week. It is understood that the principal conten-tion will be between the first mortgage bonds, who claim the issue of \$1,560,000 first mortgage bonds in the hands of the trustee of the general mortgage. These bonds, it is said by the first mortgage tondholders, have never been legally issued. The proposed lease of the Shenandoah Valley to the Norfolk & Western provided for satisfactory settlement to both classes of bonds, but since the refusal of the Norfolk & Western to proceed further with the guarantee, the fight between the two classes of bond. olders has become bitter. The lease of the Shenandoah Valley by the Norfolk & Western, which has been dropped, provides, among other things, for a sufficient amount of money to put the Shenandoah Valley Road in good working order, as the earnings of that road did not suffice for that purpose. The receiver has therefore been compelled to issue additional certificates and will probably have to issue more."

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Dec. 23, 1987.

As is usually the case at this season of the year, the near approach of the holidays is seen in all commercial circles. Regular trade is limited to urgent needs. As measures for the reduction of taxation are discussed, and the opinioa of the country is drawn out on this topic, the prospects for the passage of some measure to that end seem to improve. Very severe weather has been experienced weat of the Mississippi River, causing the loss of many lives from freezing.

The speculation for the rise in lard culminated early in the week, and values have since been variable and nesettled, closing to-day at some further decline. Lard on the spot has not maintained the best prices of the week, and closes dull at 7.75c. for prime city, 8@8.10c. for prime to choice Western, 8c. for refined to the Continent and 8.25c. to South America. Some Western dealers are calling attention to the adulteration of refined lard with cottonseed oll.

DAILY CLOSING PRICES OF LARD FUTURES.

I	Saturd'y.	Mondy	Tuesd'y.	Wednad'y.	Thursd'y.	Friday.

ł	July delivery 8.50	8.20	8-19	8-1-1	8.41	8.37

Pork has been in good demand, but closes dull and weak; new mess \$15 50@\$15 75, extra prime \$13 and clear \$16@\$18. Cutmeats are without decided change in value, closing dull; pickled bellies, 71/2@72/c.; shoulders, 67/3@7c., and hams, 934@10c.; smoked shoulders, 81/4c., and hams, 111/4@1136c.

The Cincinnati Prive Current of Dec. 22 says: "While the past week has further widened the difference in the packing this season as compared with a year ago, the decrease has been less marked than the preceding week; the ten leading points have fallen 94,000 behind corresponding week last year, and all points about 100,000 hogs. The aggregate packing from November 1 is now about 3,525,000 hogs, against 3,800,000 a year ago-a decrease of 275,000."

Beef is quiet and nominal at \$8@\$8 25 for extra mess, and \$8 50 for packet per bbl., and \$13@\$15 for India mess per tierce. Beef hams are steady at \$17 50 per bbl. Tallow firm at 4 5-16@43%c. Stearine is quiet at 81/4@83%c. Olcomargarine is quoted at 61/4@63/sc. Butter is quict at 20@ 33c. for creamery, the outside figure for Elgin fancy. Cheese is more active for export; State factory, full cream, 10@12c., and skims, 4@9c.

Coffee on the spot has been quite active for all growths throughout the week, and the close is strong, with fair cargoes of Rio quoted at 18%c. and sales at 16%c. for No. 9; also Java at 19@22c. The speculation in Rio options was at buoyant prices until yesterday, when a sharp decline took place, followed to-day by a partial recovery, closing with sellers as follows, for delivery in 1888:

March	June 18.05e. July 15.75e.	Sept
April 10.15e,	Aug 15.35c.	Dec14.60a

\$1 10 for good strained rosin.

FRIDAY, P. M., Dec. 23, 1887. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Dec. 2^o), the total receipts have reached 202,859 bales, against 213,902 bales last week, 240,019 bales the previous week and 252,406 bales three weeks since, making the total receipts since the 1st of September, 1887, 3,796,726 bales, against 3,519,180 bales for the same period of 1886, showing an in-orease since September 1, 1887, of 277,546 bales.

«Crease since beptember 1, 1001, or 211,010 bares.

RECEIPTS FROM THE PLANTATIONS.—The following table Indicates the actual movement each week from the planta-tions. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports which finally reaches the market through the outports.

	Teek	Receip	ts at the	Ports.	St'k at .	Interior	Towns.	Rec'pts	from P	lant'ns.	
Lin	ding-	1885.	1886.	1887.	1885.	1886.	1887.	1885.	1886.	1887.	
	IS										
	95										
Dec.	2										
\$3										263,140	ł
3.6	16	238,011	260,659	215,902	481,289	410.953	497,889	284,907	269,527	247,948	
46	23	240.166	283.045	202.859	521.819	433.584	503.678	280.246	S05.826	209.165	

The above statement shows—1. That the total receipts from the plantations since September 1, 1887, are 4,276,574 bales; in 1886 were 3,904,654 bales; in 1885 were 3,922,859 bales. 2.—That, although the receipts at the outports the past week were 202,*59 bales, the actual movement from plantations was 209,168 bales, the balance going to increase the stocks at the interior towns. Last year the receipts from the plantations for the same week were 305,626 bales and for 1885 they were 280 246 bales 280,246 bales.

AMOUNT OF COTTON IN SIGHT DEC. 23.—In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Dec. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1887.	1886.	1885.	1884.
	1007.	1000.	1030.	103.1.
Receipts at the ports to Dec. 23	3,796,726	3,519,180	3,417,390	3,537,441
Interior stocks on Dec. 23 in excess of September 1	479,848	385,474	505,469	346,305
Tet. receipts from plantat'ns Net overland to Dcc. 1	452,425	321,366	341,137	227,855
Southern consumpt'n to Dec. 1	134,000	105,000	89,000	78,000
Total in sight Dec. 23	4,862,999	4,331,020	4,352,996	4,189,601
Northern spinners' takings to				

It will be seen by the above that the increase in amount in sight to-night, as compared with last year, is 531,979 bales, the increase as compared with 1885 is 510,003 bales, and the increase over 1884 is 673,398 bales.

WEATHER REPORTS BY TELEGRAPH .- Reports to us by telegraph to-night denote that the temperature has in general been low at the South during the week, and that in about all ections rain has fallen.

Galveston, Texas.-We have had rain on four days of the week, the rainfall reaching one inch and fourteen hundredths. There has been frost on three nights and snow and ice on one. The thermometer has averaged 46, ranging from 32 to 66.

Palestine, Texas .- The weather has been quite cold during he week, with rain on two days to the extent of ten hundredths of an inch. The thormometer has averaged 59.

San Antonio, Texas .- We have had dry but very cold weather during the week. Average thermometer 48, highest 74, lowest 16.

New Orleans, Louisiana .- It has rained on four days of the week, the rainfall reaching one inch and ninety hundredths, The thermometer has averaged 48.

Shreveport, Louisiana.—Rainfall for the week twenty-four hundredths of an inch. The thermometer has averaged 40, ranging from 20 to 60. Columbus, Mississippi.—We have had rain on two days of the week, the rainfall reaching one inch and forty-eight hun-dredths. The thermometer has ranged from 18 to 48, averag-ng 80. ng 89. 📰

Greenville, Mississippi.—It has been cloudy during the week, with rain on two days, the rainfall reaching twenty-nine hundredths of an inch. The thermometer has averaged

nine hundredths of an inch. The thermometer has averaged 39, ranging from 22 to 57. *Leland., Mississippi.*—Rainfall for the week forty-four hundredths of an inch. Average thermometer 35 6, highest 50, lowest 20. *Vicksburg, Mississippi.*—Rain has fallen on four days of the week to the extent of one inch and fifteen hundredths. Average thermometer 46, highest 73, lowest 27. Last week it was showery on four days, and the rainfall reached thirty-three hundredths of an inch. Average thermometer 47, high-cat 53, lowest 29. est 53, lowest 39.

ist 53, lowest 39. Helena, Arkansas.—It has rained lightly on three days of the week, the rainfall reaching eighteen hundredths of an inch. Not much cotton remains to be picked. The ther-mometer has ranged from 16 to 56, averaging 37. Little Rock, Arkansas.—It has been cloudy on five days of the week, with a rainfall of sixty-three hundredths of an inch. Slight snow fall on one day of the week. Average thermom-eter 35, highest 62 and lowest 15, Memphis, Tennessee.—R-in has fallen on one day of the week, to the extent of fourteen hundredths cf an incn. Aver-age thermometer 36, highest 55 and lowest 14.5. Nashville, Tennessee.—It has rained on four days of the week, the rainfall reaching forty-four hundredths of an inch. The thermometer has averaged 36, the highest being 42 and the lowest 29.

The thermonicer and the lowest 29. Mobile, Alabama.—It has rained constantly on two days of the week, and has been showery on one day, the rainfall reach-the week, and has been showery on one day, the rainfall reach-

the week, and has been showery on one day, the rainfall reach-ing two inches and twelve hundredths. The thermometer has averaged 45, ranging from 31 to 65. *Montgomery, Alabama.*—It has rained on four days of the week, the rainfall reaching one inch and seventy-nine hun-diedths. Frost on two nights. The thermometer has ranged faom 30 to 63, averaging 44. *Selma, Alabama.*—Rain has fallen on two days of the week, the rainfall reaching one inch and eighty hundredths. Average thermometer 42, highest 57 and lowest 31. *Auburn, Alabama.*—Telegram not received. *Madison, Florida.*—We have had rain on four days. The thermometer has averaged 51, ranging from 35 to 68. *Macon, Georgia.*—It has rained on two days of the week. *Columbus, Georgia.*—We have had rain on three days of the week, the rainfall reaching one inch and ninety-four hun-dredths. The thermometer has ranged from 32 to 50, aver-aging 42. dredths. eging 42.

Savannah, Georgia.—The weather has been clouly during the week, with rain on three days. The rainfall reached two inches and forty-nine hundredths. Average thermometer 50, highest 66, lowest 36.

highest 66, lowest 36. Augusta, Georgia.—The early part of the week was clear and pleasant, but the latter portion has been cloudy and cold, with light rain on three days. The rainfall reached eighty-nine hundredths of an inch. The thermometer has averaged 47, the highest heing 61 and the lowest 81. Atlanta, Georgia.—We have had rain on four days of the week, the rainfall reaching sixty-four hundredths of an inch. The thermometer has averaged 54, ranging from 29 to 71. Albany, Georgia.—Telegram not received. Charleston, South Carolina.—We have had rain on four days of the week the rainfall reaching one inch and ninety-seven hundredths. Average thermometer 50, highest 62 and lowest 37.

lowest 37.

Stateburg, South Carolina.—We have had rain on three days of the week, the rainfall reaching one inch and one hundredth. Frost on one night. The thermometer has averaged 46, the highest being 60 and the lowest 33 5. Wilson, North Carolina.—Telegram not received.

The following statement we have also received by t-legraph, showing the height of the rivers at the points named at 3 o'clock Dec. 22, 1887, and Dec. 28, 1886.

The foregoing shows that there has been exported from the United Kingdom during the two months 205,676,000 lbs. of manufactured cotton, against 206,463,000 lbs. last year, or a decrease of 792,000 lbs.

JUTE BUTTS, BAGGING, &C.—A fair demand is reported for bagging and the market.ls steady. Few large orders are reported, as the buying is only for present wants of con-sumers. Sellers are quoting 51/2°. for 11/2 ib., 60. for 13/4 ib., 6)/2°. for 2 ib. and 7°. for standard grades. Only a light business is noted in butts, though some inquiry is reported for futures. For paper grades the prices are 21/4@23/2°., while bagging qualities are quoted at 23/4@21/2°.

EAST INDIA CROP .- The following is from the Bombay Com-

pany's (Limited) Cotton Report of November 18: Receipts of cotton for the past fortnight are considerably less than for the corresponding period hast year, due mainly to the lateness of the Bongal crop, of which description about 5,000 bales tess during the for

night have been marketed than hast year, and from the Communities districts about 2,000 hales have been received. The quality of the small lots of new colon that have been received is antifactory, but it is feared that the quality of the Khandelsh cotten will not keep up to the few samples received, which were picked before the late rains. Heavy rain fell in the Khandelsh districts, and in the iserance a fortaight ago, and in small quantities in (international in the iserance a fortaight ago, and in small quantities in (international in the southern Mahratia country. This will cause some dark leaf in the early arrivals from the former dis-tricts, but the outturn may be, if anything, a little larger. Breach de-greeks of as being materially improved, and unless damage is done by frost inter on a good crop of this growth may be looked for. Comptaha, Durwars, du., are reported to be coming on satisfactority, the rain these peets of the Dheilera erop are unchanged, the rainfail there having been accoment to the the trop, but otherwise the weather has been accom-bed to the the the trop, but otherwise the weather has been accom-able of inter, with ample dows, which are said to have connected to some extent the short rainfail. Taking averything into consideration the crops now promise an all-found yield about the same as last year.

E.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. -A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The movement since September 1, 1887, and in provious years, has been as follows.

Monthly		Year Beginning September 1.

BREADSTUFFS.

FRIDAY, P. M., December 23, 1887.

The flour market has been without important feature or decided change in values. Exporters have not, as a rule. been able to meet the views of holders and trale has be n quist in that direction, while the local dealers have supplied only their more urgent needs.

The wheat speculation opened weak, under a considerableselling movement for the purpose of realizing profits. But danger to the fall-sown wheat in the Northwest from a "blizzard" of great severity and the darkening of the war cloud on the co-tinent of Europe not only checked the decline, but caused some advance. The speculation, however, was not active, and in wheat on the spot the slight advance was sufficient to bring busine s almost to a standstill. At the lower prices early in the week a line of white wheat was taken for shipment to Barcelona. To day there was a slight further improvement in futures and a better business was done on the spot, including a line of 50,000 bushels spring for export,

DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT

Indian corn declined under a check to the speculative mo meet. Some recovery full wed but the speculation fell off to very small proportions and the regular trade came almost to a standstill. To day the market was dull and drooping,

THE DRY GOODS TRADE.

NEW YORK, Friday, December 23, 1887.

The past week has witnessed a moderately large movement n staple cotton and woolen goods on account of previous transactions, and very fair shipments of certain spring and summer fabrics were made in like manner to remote dis. tributing points in the in erior, but new business was restricted in volume as far as the commission and importing houses were concerned. In jobbing circles It is probable that rather more than an average distribution was made for the time of year, the order demand for assorted lots of staple and department goods having been better than usual, while a very considerable package trade in domestics, prints, etc., was done by a few of the large jobbers. The market for staple cotton goods continues very firm, and the mill agents are holding many makes "at value" in anticipation of higher prices in the near future. Printing cloths are dearer at the manufacturing centres, and prints have consequently appreciated, some makes of light fancy prints, etc., having been opened at a considerable advance upon last season's prices.

DOMESTIC COTTON GOODS .- The exports of cotton goods from this port for the week ending December 20 were 2,350 packages, valued at \$165,621. These shipments include 1,349 to South America, 400 to China, 375 to the West Indies, 87 to Mexico, 57 to Europe, 43 to Central America, 28 to Africa, and 11 to all other countries. Since the 1st of January the exports aggregate 186,118 packages, valued at \$11,345,298. Of this total China has had 87,552 packages, valued at \$4,171,889, and 41,632 packages, valued at \$2,983,222, have gone to South America. For the similar period of 1886 the exports to all ports reached 203,919 packages; and in 1885 were 172,458 packages. At first hands the demand for staple plain and colored cottons was only moderate, but the movement on account of back order was of good aggregate propertiens, and prices continue very firm all along the line. Print cloths were very setive, and the market closed very strong on the basis of 31/2c. for 64x64s] and 3 1-16@31/2c. for

y, 56x60s. Stocks last Saturday and for the three previous 20 years were as follows :

	1887.	1886.	1885.	1884.
Stock of Print Otoths-	Dec. 17.	Dec. 18.	Dec. 19.	Dec. 20.
Held by Providence manuf'rs	219.000	60,000	125,000	428,000
Fall River manufacturers	19,000	105,000	102,000	354,000
Providence speculators	32,000	42,000	240,000	320.000
Outside speculators (est)	25,000	25,000	70,000	260.000

Total stock (pieces)...... 295,000 232,000 537,000 1,362,000

Light prints were more active in first hands, and some makes have been opened by the mill agents at an advance of ½c. per yaid from last season's prices. Ginghams and other woven wash dress fabrics, also white goods, were freely distributed by sgents in execution of back orders, and a fair amount of new business was done in this connection by the commission houses.

DEMESTIC WOOLEN GOODS .- The event of the week in woolen goods circles was a conference of manufacturers and commission merchants in regard to certain abuses about the system of credits and other matters pertinent to this important branch of the trade. The meeting was harmonious and a permanent organization was effected from which a satisfactory outcome is expected. Light-weight clothing woolens were quiet in demand, but very fair deliveries of caesimeres, worsteds, cheviots, &c., were made (on account of back orders) by the commission houses. Heavy woolens have met with rather more attention from clothiers, but transactions were only moderate in the aggregate. Jersey cloths continued in good demand by the manufacturing trade, but cloakings have relapsed into a quiet condition. Satinets and Kentucky jeans have shown very little animation, and the demand for flannels and blankets was almost wholly of a hand-to-mouth character as usual at this stage of the season. All-wool and worsted dress goods continued in fair request, and a pretty good business was done in carpets.

FOREIGN DRY GOODS.—The demand for foreign goods at first hands was exceedingly light, and the jobbing trade was by no means active. The auction season has practically closed and such public offerings as were made during the week were light and unimportant. Staple goods are generally steady in price and stocks are as a rule in very good shape.

Importations of Dry Goods,

The importations of dry goods at this port for the week ending Dec. 22, 1887, and since Jau. 1, and the same facts for the corresponding periods of last year are as follows:
