REDEMPTION OF BONDS.

OFFICE OF THE LEHIGH & WILKESBARRE COAL Co., 119 LIBERTY STREET, NEW YORK, 31st March, 1888.

The transfer books of the Seven Per Cent Bonds of this Company, maturing May 1, 1888, will be closed April 4 at 3 P. M. The principal and interest of said bonds will be

paid on presentation at this office on and after May 1, 1888, on which cate interest will cease. S. R. LANG, Treasurer.

OFFICE OF THE Lehigh & Wilkesbarre Coal Co., 119 LIBERTY STREET, NEW YORK, April 20, 1888.

NEW YORK, April 20, 1888. Sealed proposals to purchase any part of \$803,000 of this Company's 5 Per Cent Sinking Fund Mort-gage Bonds, due Nov. 1, 1912, will be received at this office until SATURDAY, APRIL 28, at noon, when such proposals will be opened and the bonds awarded to the highest bidders, but no bid will be considered at less than nar and accrued interest. considered at less than par and accrued interest.

These Bonds (which are First Mortgage Bonds, except as to one piece of property, which is included as additional security) are part of a total author-ized issue of \$3,000,000 in Coupon Bonds of \$1,000 each, payable in twenty-five years, without the right of compulsory redemption prior to maturity. Interest payable in New York, May 1 and Nov.1. A sinking fund for their ultimate payment is provided by a fund arising from the sales of surface lands and the annual contribution of 10 cents a ton from every ton of coal mined in each year from the property included in the first lien of the mortgage, to which document, on file at this office, particular reference is made for all details of the obligation and its Trust Indenture.

The proceeds of the bonds are to be paid at this office on the 30th inst. and are to be used for the redemption of an equal amount of this Company's Seven Per Cent Bonds, maturing May 1, 1888. The \$803,000 bonds constitute the balance of those set apart for that purpose, which have not been sub-scribed for under the privilege given to the old bondholders and expiring to-day. Statement of business for the year 1887:

Gross earnings......\$9,446,078 01 Expenses..... 7,889,492 05

Flxed charges for in-terest on debt \$680,983 34 Sinking fund charges 269,992 91-950,906 25

Surplus over total fixed charges

preceding similar period, although the returns for individual cities show changes of more or less importance. In the New England section there is a decline of about three millions, while the Middle and Western sections record gains of about ten millions and eleven and a half millions of dollars respectively. The South has also added to its total nearly one million, so that for all points outside of New York the increase over April 14 is \$17,928,316. At this city, however, there has been a falling off of \$18,962,033, leaving for the whole country a net loss of \$1,033,717. The planting of cotton, which was considerably delayed by the unseasonable weather during March, is now making good progress.

There was a decrease in exchanges of \$84,408,908 during the week of 1887 with which comparison is now made, and in consequence the contrast with last year is more favorable than it was a week ago-that is, the decline now recorded in the aggregate of all the clearing houses is not so heavy. Furthermore, the total outside of New York exhibits a gain of 2 per cent, against a loss last week of 7.3 per cent. Important percentages of increase are recorded at Detroit, Peoria, Lowell Duluth, Grand Rapids, Minneapolis, Springfield, Portland and Norfolk.

The speculation in share properties on the New York Stock Exchange displayed a little more activity during the week, the transactions covering a market value of \$73,972,000, against \$110,304,000 for the like period a year ago. After deducting two-and-a-half times these values from the New York clearings there remains \$395,622,712 ascribable to other business this year, against \$419,347,107 in 1887, or a decrease of 5.7 per cent

and 30 in Canada), against 195 last week and 191 for the sametime a year ago. Week End'g April 21 Week Ending April 28. Returns by Telegraph. 1888. 1887. P. Cent. 1888, P. THE FINANCIAL SITUATION.

A feature of the money market this week, and one which marks clearly the changed conditions, is the course of some of the leading banks in loaning on call. Heretofore they have discriminated against-in fact, throwing out-low grade collateral, and have almost invariably refused to lend upon such stocks even when tendered in connection with the better class of securities. This week, fortunately for those commission houses whose customers are trading in these properties, banks have been more liberal, taking, on reasonable margins, a fair amount of the hitherto rejected stocks, but exacting the full rate of 3 per cent for the accommodation. Another feature has been the liberal purchases of bonds by the Treasury, which we have remarked upon below; and still another has been the continued flow of money to this centre from the West and South, with at the same time a falling off in the demand for currency from the Middle and Eastern States, the Boston market having undergone as marked a change in its situation as the New York market. As represented by bankers' balances, money on call has loaned at 4 and $1\frac{1}{2}$ per cent, but comparatively little was done at the extremes, and the higher rate was the result of manipulation. Large amounts have been loaned at 3 per cent and at 2 per cent, making $2\frac{1}{2}$ a fair average, and at this rate renewals have been made. The banks hold out for 3 per cent, and, as explained above, get it by taking mixed collateral. Time loans are There is not much as reported last week. activity, and lenders continue to insist on prime For commercial paper the demand is security. good, but the banks buying are careful to select the best, pursuing the conservative course which has been followed for months, and which the recent failures certainly justify. Rates are $4\frac{3}{4}$ $(0.5\frac{1}{2})$ per cent for sixty to ninety day endorsed bills receivable, $5@5\frac{1}{2}$ for four months' acceptances, and 54@61 for good single names having from four to six months to run.

In Europe affairs have worn a less anxious and uncertain aspect this week. Much better and daily improving accounts have been received respecting the health of the Emperor of Germany, encouraging a hope again, though of course faint as yet, of a permanent restoration to health. So also the situation in France looks more quiet. ing. General Boulanger is certainly not to have an uninterrupted ovation in his effort to attain power. Though his following is for the moment large, it would not be at all surprising if it were to grow smaller since much of the early enthusiasm for him was probably the result of a feeling that the dealings of the Government with the General were harsh, that is unnecessarily severe. In monetary circles the feature has been the continued loss of gold by the Bank of England. How long this will keep up and whether it may not force an advance in the Bank rate has been discussed. The cable reports discounts at London in the open market of sixty days to three months bank bills at 18 per cent. It is argued that the rate is likely to improve. This week the Bank of England lost [£256,000 bullion, made up, as we are advised, by a private cable to us, by an import from Egypt of £130,000, by receipts from the interior of Great Britain of £128,000, and by exports principally to South America of £514,000. The Uruguay and the Brazilian loans and the German demand (the latter for the time being held off) keep up an outward movement, while the usual spring supply of gold from America is wanting, so that the Bank's holdings of bullion are becoming small for this period of the year; this week the offerings will cease. A small advance is, we suppose,

total reported was £21,239,547, against £24,480,552 a year ago. The open market rate at Paris is $2\frac{1}{8}$ to $2\frac{1}{4}$ per cent, and at Berlin and Frankfort it is 12 per cent.

Our foreign exchange market advanced last Saturday to \$4 87 for long and \$4 89 for short after the transactions for the day were over, the explanation given being that the rates for actual business justified this unusual course. The advance has been maintained and until Thursday the tone was firm, but on that day offerings of bills against outgoing securities made the tone easier. The market is now moving in a very narrow range. As it advances in response to a temporary demand a supply is brought out either from bankers who have held for a rise or from those who are negotiating loans, or from various transactions amounting in the aggregate to important sums. As the rates fall a mercantile inquiry is stimulated and the tone changes from ease to firmness. It is impossible to trace all the sources of supply, but there are doubtless many millions of foreign capital already invested and being placed in various American securities, drawings against which are constantly being made, thus neutralizing the effect of the adverse trade balance. An idea of the increasing extent of our trade indebtedness may be gathered from the following statement. Mr. Switzler has issued this week his figures for March, and we give them in our usual form.

† Excess of exports. Excess of imports.

According to the above the acverse merchandise balance for March, 1888, is \$12,268,000. In March, 1887, there was a favorable balance of \$2,422,849. In March, 1887, we exported net, \$1,866,961 gold; in March, 1888, we imported net, \$1,788,000 of gold. That affords a very fair suggestion of the flood of securities which must be daily leaving us for Europe.

Secretary Fairchild's purchases of Government bonds the past week have up to last night reached a total of \$3,775,800, of which \$1,285,800 were 4s and \$2,490,000 41s. Monday he accepted \$85,000 4s, Tuesday he accepted \$600,000 4s, Wednesday he accepted \$440,000 4s and \$2,400,000 41s, Thursday he accepted \$156,300 4s and yesterday he accepted \$4,500 4s and \$90,000 $4\frac{1}{2}s$. The price given for the 4s purchased Monday was 125, and this price has gradually risen, he having taken the latter part of the week offerings as high as 126. The acceptances of the $4\frac{1}{2}$ s were \$2,400,000 at 107 $\frac{1}{2}$ and \$90,000 at 1075 Those prices, we may presume, are about the limit of the Government under the present condition of the bond and money markets. How much currency will be thrown upon the market as a result of these purchases it is impossible to say, for it so largely depends upon the fact whether any of the bonds taken and if so, how many, were held by the Government as security for Government moneys in depositary banks. This information is not attainable at once, though the belief at the moment is that the greater part of the takings this week were not so held. As to price, some think the Government will have to raise its limit materially soon, or the

possible, but any material rise does not appear to be at all likely unless conditions change. There is a circumstance which may help Mr. Fairchild, and that is extremely easy or extremely tight money. In the former case many of our banks may be induced to give up their Government deposits, which would, to the same extent, release the bonds those deposits are held for, and that in turn would increase in a measure the supply on the market for sale. On the other hand, extremely tight money would act as it did before to force or induce sales. Then again it should be remembered that the purchases have been considerably above the market as it ruled before the offer was issued, there having been sales on April 13th of $4\frac{1}{2}$ s at $106\frac{1}{2}$, both registered and coupon, and on April 12th of 4s at 124. Of course that does not prove much, because the market is known to have been almost nominal. And yet as the sale referred to on April 13 of $4\frac{1}{2}$ s at $106\frac{1}{2}$ was for \$45,000 of bonds, and there were \$50,000 4s sold cn April 7 at 124, and on the average not far from \$400,000 a month have changed hands, through sales at the Stock Exchange, since the first of February-as these were the results of a market from one to two points below the Government's present limit, it seems reasonable to expect that the Secretary will continue to find holders willing to meet him at about current figures; in the meantime, and so long as money is as easy as it is now, he will feel no special pressure to purchase.

We have reached the period of the year when it becomes important to know the situation and progress of farm work. It would seem that thus far the conditions have not been very favorable. Definite and exact information is hard to get, but two facts are tolerably well established, first that autumn-sown wheat has suffered severely from winter killing as the effects of the weather, and that spring planting of the various crops has been greatly delayed as the result of the low temperature and the backwardness of spring. This latter applies to cotton as well as to grain, though of late the weather in the South has been favorable. It is easy however to overestimate the importance of the early conditions. At this period of the year, we are only in the first stage of the work. A great deal depends upon future developments. This was clearly seen a year ago in the case of corn, when all the early conditions were exceedingly favorable, yet subse quent drought made one of the shortest crops on record. So now propitious weather would go a great way towards overcoming existing disadvantages.

Returns of railroad gross earnings are again becoming very favorable. During the weeks of March there was for special reasons known to our readers, a falling off in the aggregate as compared with last year, and this was con. tinued through the first week of April, when there was, however, only a merely nominal falling off-one per cent. In the two weeks since then, the causes which produced the previous unfavorable comparisons no longer existing, the returns have grown progressively better. Taus for the second week of April, according to our statement on another page, there was a gain of 4.88 per cent, seventysix roads being embraced in the exhibit, while for the third week, of the month forty-six roads have thus far reported on which the aggregate gain is as much as 10.23per cent. Of the 46 roads, only nine show reduced carnings. The exhibit is the more striking that for the corresponding week last year there had also been a large gain-936 per cent on 65 roads.

But the most favorable and really surprising statement is that of the Pennsylvania for March, which has been 523

exhibit, one must remember that the conditions this year were generally unfavorable to large earnings and that the month embraced the blizzard of the 12th of March; fur ther, that the comparison is with extraordinary totals last year, the gain in the gross then on the Eastern system having been over half a million dollars, and this in one single month. Yet in the face of that heavy gain last year, and the adverse circumstances existing the present year, we now have a further gain of Fver \$100,000, when everybody was expecting a decline; even the net on the Eastern system records a further slight increase, and is the heaviest of any year since 1881. On the Western lines, however, the effect of the unfavorable conditions prevailing is clearly seen, and especially as these lines are also suffering from the great shortage of last season's corn crop; hence they now report a deficiency below the amount necessary to meet all liabilities of \$90,276, against a surplus in March, 1887, of \$212,702, being a loss of \$302,-978. In the previous two months there had been, it will be remembered, a loss even on the Eastern system (solely, however, because of augmented expenses, the gross having increased heavily), and thus the net result on the combined system for the quarter ended March 31 is a loss of about \$700,000, as will appear from the following.

LINES EAST OF PITTSBURG.	1888.	1887.	1886.	1885.	1884.	1888.

As regards the reports of net from other companies for the same month, the exhibits thus far received are rather irregular. The Reading shows quite a loss, in part as the result of the blizzard. On the other hand, the Norfolk & Western has quite a noteworthy gain, and the Richmond & Danville roads likewise generally exhibit improved net. The Northwestern and the Omaha have published their March gross this week, both showing heavy losses, but this was to be expected in view of the heavy gains last year, and the rate war and other adverse elements this year.

On the Stock Exchange an active speculation at higher prices has developed. The temper is decidedly hopeful, and the tone at times has been positively buoyant. This change from the depression prevailing a few weeks back has followed mainly from the resumption of bond purchases by the Treasury Department, removing a cloud from the future of money, and making the banks inclined to be less exacting as regards the collateral required for loans. But concurrently other favoring features have also helped the upward movement. The recent restoration of rates in the Northwest and the improved aspect of railroad affairs there, the settlement of the labor troubles both in the East and the West, and the fact that railroad gross earnings are again beginning to increasethese are all having the effect of imparting confidence in the situation. At the same time, the feeling that prices were low and had been unduly depressed, operated to induce liberal purchases both for investment and speculation. In this week's rise the whole market has participated, but the more prominent specialties have been first the Pacific stocks and Reading and New York & New England, and latterly the Gould stocks, especially issued this week. To appreciate the significance of this Manhattan and Missouri Pacific. Union Pacific advanced

on the good showing for the late year, and Northern Pacific and Oregon Trans-Continental on excellent current earnings. Philadelphia & Reading was but slightly affected by the loss in net for March, while on the other hand reports of the probable early negotiation of a sufficient amount of new fours to pay off the generals, had a stimulating effect on the stock, under which the price advanced to 64¹/₄ yesterday, closing, however, at 63.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of currency and gold by the New York banks.

THE INTERNATIONAL & GREAT NORTHERN AND KANSAS & TEXAS.

The prospective change in the Kansas & Texas management, and the rumors that have been current this week of a possible receivership for the International & Gt. Northern, make it interesting to recall the relations of these roads the means by which control of the latter is held, the desirability of retaining that control, the effect on Kansas & Texas of a default or receivership for the Great Northern, and the relation of each to the Missouri Pacific system.

The Karsas & Texas has assumed none of the obliga. tions of the International & Gt. Northern; it has not leased the road, nor has it guaranteed any of the bonds. It holds the property simply through stock ownership. This ownership of the stock was secured by the exchange in 1881 of its own stock for that of the International & Gt. Northern, the ratio of exchange being two shares of Kansas & Texas for one share of the Great Northern Hence, the Kansas & Texas is the sole and absolute owner of the entire capital stock of the Gt. Northern, and as such charged with the responsibility attaching to such ownership. In some respects, this species of control pos. sesses an advantage over that secured through a lease or rental guaranty, for the operating company is in position to throw the road over at any time and put an end to all embarrassment on account of its obligation.

But ownership of this kind also possesses decided disadvantages. In the first place the operating company has its investment to protect in the stock of the road owned. In the present case this represents a very considerable item. The capital of the Great Northern is \$9,755,000, and the cost to the Kansas & Texas was twice that amount, or \$19,510,000—that is, the Kansas & Texas had to issue 19½ millions of its own stock in order to secure the 9¾ mil.

ions of Great Northern stock. In the event of a foreclosure, should the Kansas & Texas be unwilling or unable to protect its ownership, the investment would of course be entirely wiped out. On the other hand an assessment on International & Great Northern stock would hardly be more agreeable, for the Kansas & Texas would have to raise the cash to pay it. Hence it would seem in the highest degree desirable that those who are looking after Kansas & Texas interests should seek by all means to avoid the contingency of a default or receivership on International & Great Northern, now or in the future.

But this is not the only or the main reason for guarding against a severance of the Great Northern from the Kansas & Texas. The Great Northern is a very important piece of road. It runs through Central Texas, and constitutes a valuable feeder. It may briefly be described as extending from Mineola and Longview, on the Texas & Pacific, in the northern part of the State, to Galveston and the Gulf of Mexico, in the one direction, and to Laredo on the Rio Grande river in the other. It connects with the Kansas & Texas at two points-Taylor in the south of Texas and Mineola in the north-thus forming continuous lines between Galveston and the Mexican border and the Mississippi and Missouri rivers. The northern termini of the Kansas & Texas are not as good as they might be, but with the Great Northern cut off from it, the real difficulty would be at the other end, for the Kansas & Texas would then be practically without any southern terminus of consequence.

Furthermore, we may be sure that with the Great Northern in antagonistic hands, the whole of the northbound traffic would be turned off to the Iron Mountain, even if that is not already being done. Moreover, another difficulty would ensue; parts of the Kansas & Texas would be without the connecting links with other parts. Thus the branch of 67 miles between Trinity and Ogden does not connect with the Kansas & Texas at all, except over the Great Northern. Then it must be remembered that the piece of road between Fort Worth and Whitesboro, in the main line of the Kansas & Texas, is not owned but simply leased, the road belonging to the Texas & Pacific. If the unrestricted use of that piece of track should be denied the Kansas & Texas, the northern and southern divisions of the latter would be completely separated from each other.

While, however, the International & Great Northern is quite essential to the Kansas & Texas, it is practically indispensable to the Missouri Pacific. The Missouri Pacific has no other outlet to the Gulf or the Rio Grande. It can do without the Kansas & Texas proper, for it has a substitute in the Iron Mountain (a parallel line), which answers its purposes much better. Not so as regards the International & Great Northern, for this road and the Iron Mountain form very short and direct routes to Mexico and the Gulf Coast. Besides, with the Great Northern dissevered from its connection with the Missouri Pacific system, much business from Central Texas which is now being sent over the Iron Mountain might be transferred to the Kansas & Texas, even if not naturally tributary to the latter. It is to be presumed that the Missouri Pacific is alive to this phase of the matter. In fact, while such an animated discussion has been going on about the election of directors for the Kansas & Texas, which takes place in May, the circumstance has, perhaps, been overlooked that the election of the International & Great Northern, which takes place in April, has already been held. At this election the board of directors was chosen with the exception of the last two names . Jay Gould, Russell Sage, A. L. Hopkins, S. H. H. Clark, Ira H Evans, F. A. Rice, James A Baker, B. W. McCullough and Henry Kane.

It would thus seem that whatever may be the result on the Kansas & Texas, the Missouri Pacific influence is sure to retain control at least of the International & Great Northern for another year. It may be, however, that a desire exists to make the hold on this property still stronger, and that, therefore, the rumors referred to in the beginning of this article are well founded, to wit: that a receiver. ship through the aid of the State courts (the Great Northern lies wholly in Texas) has been determined on. The de. fault now spoken of, however, would appear to be wholly uncalled for, as it would cover the coupons on the first mortgage bonds, which sell in the market above par, and interest on which can be earned in any event, whatever may be said of the junior bonds. The interest falling due May 1 on these first mortgage bonds is only \$238,620, and the total per year \$477,240, while net earnings above expenses and taxes, even last year were \$607,262 and in 1886 were \$906,710. Moreover, the interest on the second mortgage bonds which fell due March 1 was promptly paid. But a receivership now might be used to induce the second mortgage holders to grant important concessions, while at the same time through the fear of an assessment on the stock, all owned by the Kansas & Texas. the latter might be led to come to terms. In any event the policy of the International & Great Northern will for the present continue to be guided by the Missouri Pacific.

We make this statement that our readers may the more readily understand the points at issue. If the views expressed are correct, then the International & Great Northern is the key to the situation. The Missouri Pacific cannot afford to lose the road, while the Kansas & Texas is forced in self-defense to hold on to it.

UNION PACIFIC'S POSITION AND PROGRESS.

The Union Pacific has this week issued the report of its operations during 1887. The complete form in which it is given out, and to which we have become so accustomed since the beginning of Mr. Adams' administration, leaves the security holder nothing to desire in the way of information about the company's affairs. Great detail is also quite essential, for the Union Pacific is one of those properties whose operations and accounts involve a variety of knowledge which can only be obtained from full official statements.

The features that impress one most on a study of the report are the growth and progress of the company's affairs and the mileage of the system. The extent of the latter is not generally known. Reports of eatnings and operations for 1887 are based on 1,824 miles, termed the Union Pacific proper, and 2,940 miles of branch and auxiliary road, making 4,764 miles together. This is the mileage directly operated, but in addition the company leases the Oregon Railway & Navigation, 752 miles, and controls the St. Joseph & Grand Island, 447 miles, besides which it has an ownership in over 1,000 miles more of various minor rcads. Altogether, the Union Pacific system in its entirety may be said to comprise over 7,000 miles of road.

As already stated, the statements of earnings and operations are based not on this 7,000 miles, but on 4,764 miles, the remainder being separately operated, but the income accounts, embracing as they do receipts from investments and also charges incurred on the same, cover the results to the Union Pacific on the entire body of roads. And here it is interesting to note that after meeting all charges for the year and making full provision for

the requirements to the United States Government under existing law, besides contributing \$587,670 to the company's sinking funds, there remained a surplus revenue on the operations for the twelve months of no less than \$3,169,729, a sum equal to 5.2 per cent on the company's stock. If the results on the Union Pacific proper are taken, then the surplus would be still larger, namely \$3,599,508, or equivalent to 5.91 on the stock. And this is in both cases independent of the income from land sales, which each year reaches a very large amount, but is most of it pledged to specific uses. The favorable out. come is the more gratifying that it has been obtained in the face of a number of adverse circumstances. Thus the shortage of the crops in Kansas and Nebraska had the effect, we are told, of diminishing the tonnage of agricultural products, as compared with the previous year, 13.8 per cent. At the same time the operation of the Inter-State law, while beneficial in cutting off a good part of the dead-head travel, caused a great deal of disturbance as regards local passenger and freight traffic, entailing a reduction of rates, and consequently affecting the revenue from that class of traffic.

Strange as it may seem, with the constant development of the local business of the system, the improvement in the late year followed almost wholly from the through traffic. For instance, while the revenue from local business increased only 345,594, or 1.84 per cent, the revenue from the through business increased 1,941,785, or 41 per cent. And yet the passenger movement shows 23,958,228more local passengers one mile (increase 15.48 per cent), and 51,958,331 more tons of freight one mile (increase $6\ 67\ per\ cent$), than in 1886. On the through business there was an increase of 192,589,436 tons or emile ($58.80\ per\ cent$), but a decrease of $8,386,429\ passengers$ one mile $(9.06\ per\ cent.)$

The improved results on the through business follow from several distinct causes: (1) the cessation of the war on trans-continental business and a return to remunerative rates; (2) the development and settlement of the Pacific States, particularly California and Oregon; and (3) the lease of the Oregon Navigation, by which the Union Pacific was enabled to get its share of the benefits arising out of that development. The importance of these factors will be better understood when we say that taking the Pacific Coast tonnage, distinct from the other through traffic, there is an increase of 144,292,365 tons in the movement one mile, or nearly 56 per cent, an increase in the revenue of \$1,525,177, or over $80\frac{1}{2}$ per cent, with an advance in rates from 0.73 cent per ton per mile to 0.85 cent.

It was pointed out above that the surplus for the year on the Union Pacific proper was \$3,599,508. But this gives only an imperfect idea of the company's income. The total net income from all sources, including land sales, is stated at \$7,057,132. Of course much of this, and especially the income from land sales, has been appropriated to special purposes, but to the extent to which it has been available it has been applied to the construction of new branch reads, and for new construction and equip. ment on the company's main lines. The company built 350 miles of additional road during the year, the outlay for that purpose reaching \$5,580,079, and its own construction and equipment expenditures cost \$1,238,715, so that the aggregate disbursements on capital account amounted to \$6,818,794. The means for these disbursements, the report informs us, were provided to the extent of \$3,600,000 rom the surplus revenue above, and \$448,000 came from he sale of securities; the reduction of the material account supplied 14 million more, and the remainder was derived

through the issue of temporary loans and in other ways. The management say that new construction work has now practically been stopped, and that it is not intended to enter upon any further extensions till either a settlement with the Government is arrived at or some general financial plan for supplying future needs is carried into effect. At present the company has no means at its disposal for capital expenditures of any kind except the accruing sur. plus revenue, and the uncertainty attending the company's relations with the United States makes it difficult to borrow on advantageous terms. With that obstacle removed, however, the management think the company would at once be placed upon a dividend-paying basis.

The change in the company's financial condition during the last few years has of course been very striking. The company now has practically no floating debt. In fact the figures show that on December 31, 1887, current assets exceeded current liabilities in the sum of \$401,689. On June 30, 1884, on the other hand, the net floating debt reached the large sum of \$6,900,178, so that the Union Pacific is now \$7,301,867 better off than it was in that respect at the time of Mr. Adams' accession to office. But in the meantime the total of the funded debt has also been reduced nearly a million dollars (\$955,549), though the number of miles of road represented by the debt has been increased 351. In other words though the system has been enlarged to that extent, the debt, floating and funded, has been reduced over $8\frac{1}{4}$ million dollars.

Such facts and figures as these do not argue weakness or insolvency. On the contrary they show great strength and recuperative power, while demonstrating that the property is being exceedingly well managed. This being the case, why should not Congress remove the only other obstacle to the success of the road? Remember that it is the law and not the company that is responsible for the existing condition of things. Whatever criticism may be made upon the earlier management (everybody that no fault be found with concedes can the present management), the fact must be admitted that the company is living faithfully up to all the requirements of the existing statute. But this law has fallen far short of the expectations entertained with regard to it a, the time of its enactment, and hence does not meet exist. ing needs. It must therefore be amended or replaced. The necessity for such a step is admitted on all sides. The difficulty does not lie in meeting the original principal of the subsidy debt (\$33,539,512)-that could easily be replaced at maturity by a loan at a lower rate of interest But in addition there are accumulations of back interest to the amount of \$16,363,744, raising the total of the debt to \$49,903,256. What is still worse, the debt is growing larger each succeeding year, because existing provisions of law suffice to meet only a part of the yearly interest, and the bonds have an average of nearly ten years more to run. Hence unless the law is changed the debt cannot be met at maturity-a contingency which both the United States and the company are interested in avoiding.

In the circumstances the only question would appear to be as to the method of readjustment. We have repeat. edly pointed out that an extension of the time of payment and a provision by which such payment could be made in fixed instalments seemed to offer the best and fairest means of settlement. No one has suggested an abatement of any portion of the debt; all that is asked is that the annual instalments required shall be within the ability of the road to meet. A number of measures have been proposed having that object in view, and there is a bill before the House of Representatives now that apparently answers all the requirements of the case. We do not see

ed.for FRASER

why it should not be speedily passed by Congress. The United States would lose nothing, while the Union Pacific would be relieved of a burden that impairs its credit and hampers it in various other ways. The present management have demonstrated that the company if honestly managed can be made perfectly responsible, and there is no reason, therefore, why its obligations with the United States should not be rearranged on a better and safer basis.

IMPORTS AND EXPORTS FOR MARCH.

The Bureau of Statistics has issued its detailed statement of the foreign commerce of the country for the month of March, and the nine and twelve months ended with March 31, 1888, as well as comparisons for the corresponding periods of the preceding year, as follows :

MERCHANDISE.

Monetary Commercial English News

[From our own correspondent.] LONDON, April 14, 1888. Now that the conversion of consols has been effected, there is the probability of money becoming easier, for the market receives 5s. per cent "bonus" upon £307,000,000 of consols and reduced, in addition to the dividend for the quarter on the consols. Together the bonus and dividend amount to not far short of £2,500,000. The payment of a part of this had been anticipated, but the bulk of it was set free this week. The retention of a large amount of Government money in the Bank of England has to the present caused a certain amount of stringency unusual at this time of year, and "short" money has been in very strong demand. A good many operators have been obliged to go to the Bank of England, paying the official minimum of 2 per cent, while in the open market loans for a week have been obtainable at rates ranging between 11/2 and 2 per cent. Discount rates are again higher, three months' choice bills being negotiated at 15% per cent, or a rise compared with a fortnight ago of ½ per cent. Exchange movements have been more favorable to this country the last few days, owing to the hardening of the money market here,

without corresponding movement at the great Continental centres. A fortnight ago the open market rate in Paris was 2¼, and it remains the same to-day, but rates in Berlin have fallen from 21% at the end of March to 11/2 per cent. As a result of the changes in exchange rates, the Continental demand for gold has died away, and excep for two small amounts taken for Holland and a with drawal for Lisbon, which probably is really for Brazil, there has been no gold taken for Continental account. On the other hand, there is the probability of considerable amounts being taken for South America, and a shipment was made this week of £300.000 for Montevideo.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols &c., compared with the last three years :

Brazil has been in the market as a borrower, Messrs. Rothschilds having placed a loan of £6,000,000 in 41/2 per cents at the issue price of 97 per cent. Two American railway issues have been effected this week, one the Kansas City Wyandotte & Northwestern Railroad, which placed \$2,000,000 first mort-gage 5 per cent bonds at the issue price of £195 per bond of \$1,000. This loan, as well as \$860,000 31/2 per cent Western Counties Railway of Nova Scotia, have been offered by the Trustees, Executors and Securities Insurance Corporation, an institution recently formed for the purpose of acting as a sort of public trustee company, and performing functions analagous to those of the Farmers' Loan & Trust in New York. Parliament has not sanctioned, however, the main object of the company, and the corporation is now taking agency business for the issue of loans. Beside the two railway issues referred to, it offers 5 per cent debentures of the English & American Mortgage Company for £100,000. The Nova Scotian affair has excited some amount of attention on account of the unusua proceeding of a company purchasing a Canadian Government annuity of 31/2 per cent interest and 1/2 per cent sinking fund for a period of thirty years, and then coming to this country to provide the capital for the annuity, the construction of a small piece of road and the purchase of additional equipment for the whole road.

Mr. Goschen's intention to change the stamp duties for the registration of new companies has created quite a flurry amongst company promoters. During the week from April 4th to April 11th there were registered by the Government Department 124 companies, with capital amounting to very nearly £26,000,000. Last year company promotion was very active, but then only 35 companies, with less than £6,000,000 of capital, were registered. Some of the new registrations have been followed by appeals to the public for capital. The Bankers' Trust Company asks for £1,500,000; the Trust Com_ pany of England announces a first issue of £500,000; the Mort gage Trust Company of America has also been formed, offer. ing a capital of £250,000. It is not unlikely that a considera. ble amount of American securities will be purchased by these trust companies. The Buenos Ayres, Valparaiso, Transandine Railway Company offers, through Messrs. Morton, Rose & Co. £346,000 7 per cent "permanent" debenture stock at the price of 125 per cent.

With respect to the Government debt, comment has been caused by the fact that immediately after the announcement of the success attending the conversion, the new form of debt-234 per cents-fell below par. The explanation of this is that the speculative account for the fall in consols at the last consols settlement had to be closed on account of the new consols taking the place of the old debt. With £470,000,000 of debt, operators for the fall have thought that the opportunity has come for again resuming their speculation, and a good deal of stock has been sold on Continental account. Paris operators are "bears" both as regards consols and French rentes.

Messrs. Pixley & Abell write as follows on the state of the bullion market:

bullion market : Gold.—The demand for gold for the Continent has continued, and all amounts in the open market have found eager buyers. Considerable sums have been withdrawn from the Bank of England, in all $\pm 501,600$; $\pm 317,600$ has been paid in; $\pm 55,000$ has been received from China, $\pm 20,000$ from India and $\pm 12,000$ from the Cape; or a total from these sources of $\pm 87,000$. $\pm 10,000$ was shipped on the 12th to Bombay. Silver.—Indian exchanges were slightly firmer on Saturday and Mon-day, and silver at once improved. On Tuesday business was done at 42%d. The India Council, however, on Wednesday sold at weaker rates than were generally expected, and a decline again began. Yester-day and to-day rates have been nominal only, and to-day's nearest quo-tation is 42%d. There has been $\pm 11,000$ received from Kiver Plate and $\pm 14,500$ from New York; total, $\pm 25,500$. The shipments have been: $\pm 123,400$ to Bombay on April 6, $\pm 39,000$ to Bombay on April 12 and $\pm 5,000$ to Calcutta on April 12; total, $\pm 167,400$. Mexican Dollars.—Some small amounts have been purchased for China, but the market generally has been very quiet, and values have been ruled by the silver quotations. The quotations for bullion are reported as follows:

The Board of Trade returns of the month are regarded as disappointing, but the small increase in the exports is probably largely due to the severity of the weather, and the inclusion in March this year of a holiday week, against a normal period last year. The monthly imports and exports of the first quarter of 1888, in contrast with last year, show the following features:

Imports. January February March	$\substack{1888.\\ \pounds 34,802,988\\ 29,532,776\\ 32,590,821}$	$1887. \\ \pounds 31,047,422 \\ 28,513,994 \\ 32,794,930$	$\begin{array}{r} Difference. \\ + \pounds 3,755,566 \\ + 1,018,782 \\ - 204,109 \end{array}$	$\begin{array}{r} Per \ ct. \\ + \ 12.09 \\ + \ 3.57 \\ - \ 62 \end{array}$
3 months	£96,909,085	£92,320,046	+ £4,589,039	+ 4.97

January February	$\pounds 18,583,671 \\ 18,992,423$	$\pounds 17,808,735$ 17,255,133	+ 1,737,290	+ 10.07 ;
March	19,047,307	19,002,083	+ 45,224	+ .24
3 months	£56,623,401	£54,065,951	+ 2,557,450	+ 4.73

There is a rather better feeling in the iron market, and at the quarterly meetings at Middlesbrough, Wolverhampton and Birmingham prices were generally firmer and there were more inquiries, especially for steel billets for the States. Steel manufacturers in all districts are represented to be extremely busy, and in the North there is a large demand for steel for ship-building purposes.

This week the speculation in diamond mining shares has received a check, and on Thursday and Friday there was a serious fall in prices, De Beers shares dropping about £8 per share to 361/2 and recovering at a bound to 421/4. There has been something like a crisis in Kimberly, in consequence of directors there voting themselves life governors of the com pany with one-fourth of profits in excess of 30 per cent dividends.

The corn markets have been much more active the last week and prices are slightly higher. Yesterday's markets showed an advance of 6d. for English wheat and a firm tone without quotable change for foreign descriptions. On account of the holidays supplies of home-grown wheat have been rather less. But this has not been the reason for the firmer tone of the market, the true cause of the movement being the crop reports from the United States and the backward condition of crops at home owing to the bleak weather. Around London hedges which usually at this time of the year are pretty well "out in the green" are at date of writing with only the faintest show of the bud. The imports of wheat for the thirty-one weeks to the 7th April, including flour reckoned as wheat, have been 10,260,000 quarters, against 10,925,-000 quarters and 9,568,000 in the corresponding periods of the two previouslyears. The native wheat marketed has for the thirty-one weeks been, 5,871,000 quarters, contrasting with 4,583,000 quarters at same date last year and 6,021,000 quarters in the corresponding period of 1885-86. The quantity of wheat and flour on passage to the United Kingdom is returned as 2,298,000, against 1,970,000 quarters, and 2,148,000 quarters two years ago.

The Board of Trade returns give the quantities of corn and wheat flour imported in the seven months from September 1 to March 31, as under :

1		1885-86.		1886-87.	1887-88.

-The London and Brazilian Bank, limited, has a subscribed capital of £1,250,000, and a paid-up capital of £625,000, with a reserve fund of £325,000. The directors' report for the year ending Jan. 31, 1888, shows an available balance of £82,568 (including £13,144 brought forward from last year). Divi-dends have been made at the rate of 8 per cent per annum, free of income tax; also the payment of a bonus of 8s. per share is now recommended, being 4 per cent on the paid-up capital of the bank. These payments will absorb £70,000, leaving a balance of £12,568 to be carried forward to credit of profit and loss new account. Mr. J. Lawrence McKeever is the manager at the Agency in New York.

-The Whitebreast Fuel Company had net earnings in March of \$6,319, against \$13,456 in the same month last year, the decrease being caused by the Chicago Burlington & Quiney strike. For nine months ending March 31 net earnings were \$117,614, against \$103,823.

-The well-known firm of Messrs. Blake Bros. & Co. will remove on or about May 1st to large and convenient offices at Nos. 5 and 7 Nassau Street, where they will have larger facili-ties for accommodating their friends and customers.

-The Ontario Silver Mining Company has declared its usual dividend of \$75,000 for March, payable at the transfer agency, Messrs. Lounsbery & Co., Mills' Building.

- Messrs. Drexel, Morgan & Co. have been awarded the \$2,500,000 St. Louis 4 per cent city bonds at \$1,017 60 each, a premium of 17 60 on each bond.

-Messrs, Chrystie & Janney, bankers, will remove on May 1st, inst., to No. 6 Wall Street, where they will occupy a fine suite of cffices.

Auction Sales.-The following were sold recently at auction by Messrs. Adrian H. Muller & Son:

WALL STREET, FRIDAY, April 27, 1888-5 P. M. The Money Market and Financial Situation.—The purchases of bonds by the Government for the five days of this purchases of bonds by the Government for the five days of this week have resulted in the taking of \$3,775,650 of securities at premiums ranging from 124.70 to 126 for the 4s and from $107\frac{1}{2}$ to $107\frac{1}{2}$ for the 4 $\frac{1}{2}$ s, thus restoring to the chan-nels of business an amount of currency considerably in excess of the par value of the bonds purchased. The effect on the money market, however, is of less importance to the Stock Exchange than the fact that all the money paid out for these bonds must seek investment in other directions, and this cir-cumstance furnishes an element of great strength in the immecounts nuts seek investment in other directions, and this eff-cumstance furnishes an element of great strength in the imme-diate future. The main point on which the Government must base its operations in these bond purchases is the early date of maturity of the \$230,000,000 of $4\frac{1}{2}$ per cents, which fall due on Sept. 1, 1891, only a little over three years from the present time. As holders see that it is inevitable their bonds shall be paid off, they will more readily accept the large premium now offered and turn over their principal into new securities that pay a higher rate of interest. The Stock Exchange has kept up to the best standard in tone and in strength of prices, and any advance more rapid than we have had would be rather suspicious and unhealthy than otherwise. Some persons are predicting a reaction in the market, but they did this just as confidently a week ago when prices were several points lower. Last week in mentioning the latest sales of seats at the cumstance furnishes an element of great strength in the imme-

Last week in mentioning the latest sales of seats at the various Exchanges, the N. Y. Stock Exchange was given as \$18,000, but since then a seat has been sold at \$20,000.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 11 to 4 per cent,

stock and bond collaterals have ranged from $1\frac{1}{2}$ to 4 per cent, and to-day the rates were $1\frac{1}{4}@2\frac{1}{2}$ per cent. Prime commercial paper is quoted at $4\frac{n}{4}@5\frac{1}{2}$ per cent. The Bank of England weekly statement on Thursday showed a loss in specie of £256,000, and the percentage of reserve to liabilities was 40.84, against 40.82 last week; the discount rate remains unchanged at 2 per cent. The Bank of France gained 4,900,000 francs in gold and 1,275,000 francs in silver. The following table shows the changes from the previous week and a comparison with the two preceding years in the averages of the New York Clearing House banks:

	1888. April 21.	Diffr'nc's fr'm Prev. Week.	1887. April 23.	1886. April 24.

Exchange.—The demand for sterling exchange has at times been quite active, though the business fell off somewhat in the latter part of the week. Commercial and other bills have been scarce, and notwithstanding the buying of our stocks on foreign account, security bills have not been offered in sufficient quantities to seriously affect the market. Rates have been strong and are higher, the posted rates of leading bankers having been advanced early in the week 1c., to 4 87 and 4 89.

been advanced early in the week $\frac{1}{3}$, to $\frac{1}{3}$ of and $\frac{1}{3}$ of $\frac{1}{3}$. \pm To-day the rates on actual business were as follows, viz.: Bankers' 60 days' sterling, 4 86 $\frac{1}{4}$ @4 86 $\frac{1}{3}$; demand, 4 88 $\frac{1}{4}$ @4 88 $\frac{1}{3}$. Cables, 4 88 $\frac{1}{3}$ @ 4 88 $\frac{3}{2}$. Commercial bills were 4 85 $\frac{1}{2}$ @4 85 $\frac{1}{3}$. Continental bills were: Francs, 5 19 $\frac{3}{3}$ @5 20 and 5 17 $\frac{1}{3}$ @5 18 $\frac{1}{3}$; reichmarks, 95 $\frac{5}{3}$ @95 $\frac{1}{3}$ and 95 $\frac{5}{3}$ @95 $\frac{1}{3}$; guilders, 40 $\frac{1}{3}$ @40 $\frac{1}{3}$ and 403 $\frac{1}{3}$ @40 $\frac{1}{3}$. 408@401

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying par; selling 3-16@1 premium; Charleston, buying 1 premium; selling 1 premium; New Orleans, commercial, 75c. premium; bank, \$1 premium; St. Louis, 90c. premium; Chicago, 50c. premium.

United States Bonds.—The purchases of Government bonds by the Secretary of the Treasury seem to have had the effect of stimulating business in them here, as well as to cause an advance in values. Transactions have been quite brisk in the 4s and 4¹/₃s, and the former have been strong and advancing throughout the week, the Secretary showing a disposition to pay more each day than the previous day's prices. The 4¹/₃s have not advanced so much. Below is a table showing the amounts offered and purchased each day:

1	416	Per Cents di	te 1891.	4 Per Cents due 1907.				
	Offerings.	. Purchases. Range.		Offerings.	Purchases.	Range.

* This is the price bid at the morning board; no sale was made.

State and Railroad Bonds.—State bonds have again had quite a business, though they do not call for special comment. Prices are generally firm, and some have improved a little, including Virginia is deferred and Tennessee settlement 3s.

The brisk demand for railroad bonds continues, and during the past week the market has been active and very strong. The disposition to buy bonds is not limited to any special classes, but all kinds of bonds, both high and low-priced, have been in demand, though naturally the lower-priced issues have been in demand, though naturally the lower-priced issues have had the largest business, as this buying is of a more speculative character. It is said, however, that the demand for first-class investment mortgages is in excess of the supply, and these classes are consequently rising gradually in value. The sharpest advances have been in the speculative bonds, and some of the bonds of the Gould roads have been conspicuous for improve-ment, including Missouri Kansas & Texas 5s and 6s, Texas & Pacific incomes and Rios, New Orleans Pacific 1sts, &c. Atlantic & Pacific 4s and incomes have also advanced, as well as the dif-ferent Oregon bonds, Fort Worth & Denver 1sts, and many others, in which the improvement has been less marked. others, in which the improvement has been less marked.

Railroad and Miscellaneous Stocks .- The stock market during the past week has been more active, and prices have been strong, and in some cases even buoyant, the whole list advancing more or less, with no serious reaction. The favorable features have been the improved feeling engendered by the Government purchases of bonds at rising prices; the spread of the business to some extent to the outside public;

the Government purchases of bonds at rising prices; the spread of the business to some extent to the outside public; the foreign purchasing, and the sharp advance in some leading stocks under special influences. Some parties have been look-ing for a set-back from the considerable improvement already made, but so far the tone has continued bullish throughout, and a strong undertone has apparently been the basis for a new upward turn whenever prices flagged in their movement. Chicago has been reported bearish, and several unfavorable reports have come from there, though these applied only to the grangers and caused no general uneasiness. Among the several groups of stocks the Gould specialties have been very prominent, and all have advanced materially. The improvement extended to Missouri Pacific, M. K. & T., Western Union, &c. Manhattan Elevated also came into some prominence and sharply advanced. Union Pacific was helped by the favorable annual report and the entire harmony at the annual meeting. Reading has been another feature for activity and strength on favorable rumors, though nothing new has transpired except the Baltimore & Ohio arrange-ment mentioned in the papers this morning. The other coalers have also been strong, though not so active. Next in import-ance have been Northern Pacific preferred and the Oregons, all improving under an increased demand. The grangers also have advanced considerably, under the lead of Burlington & Quincy; Northwest and Omaha touched the highest prices of the year. the year.

[VOL. XLVI.

Investment AND Kailroad Intelligence.

The INVESTORS' SUPPLEMENT, a pamphlet of 132 pages' contains extended tables of the Funded Debt of States and Cities and of the Stocks and Bonds of Railroads and other Companies. It is published on the last Saturday of every other month—viz., January. March. May, July, Septem-ber and November, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Extra copies are sold to subscribers of the CHRONICLE at 50 cents each, and to others at \$1 per copy.

Net Earnings Monthly to Latest Dates.-The tables following show the latest net earnings reported this week, the returns for each road being published here as soon as received, but not kept standing from week to week. The first statement includes all roads for the latest month and from January 1, 1888; following that we give the totals for the fiscal year on those companies whose fiscal year does not correspond with the calendar year.

ANNUAL REPORTS.

Union Pacific Railway.

(For the year ending December 31, 1887.)

(For the year ending December 31, 1887.) The annual report presented by Mr. Adams in advance of the full report will be found on another page under the head of Reports and Documents. The statistics given below are for the whole system, including auxiliary lines, and the net result of the year was a surplus in come of \$3,169,730 over all annual charges, against a similar surplus of \$3.746,368 for 1836. The net earnings of 1887 were about \$1,900,000 larger than in 1986, but in the uncome account this improvement was largely off-set by a decline of \$1,095,750 in the item of amount received from trustees of the Kansas Pacific consolidated mortgage, and nothing credited as receipts from premiums, etc., against \$670,000 under this head in 1886. Operations for three years have been as follows :

Cincinnati Washington & Baltimore. (For the year ending December 31, 1887.) The annual report has not yet appeared in pamphlet form-but from the statements submitted at the annual meeting we have the information following. The President remarks that the claims of the Baltimore & Ohio Railroad Company against this company have increased, as shown in the accounts during the year, in the sum of \$152,647. Of this sum \$76,346 consists of interest on coupons of the 4½ per cent first mortgage bonds paid by that company se guarantor. The coupons thus paid since the reorganization amounted to \$775,405. The items of indebtedness to that company are as follows: Coupons held, \$53,785 ; warrants and coupons of first mortgage bonds B. & O. holdings, unpaid, \$348,590 ; supplies and materials fur-nished and supply claims purchased, \$1,067,716; total, \$1,777.-\$56 ; less balance of traffic accounts, \$49,010 ; total, \$1,778.-\$45; estimated interest on unpaid coupons, \$130,000 ; estimated interest on supply claims, \$125,000 ; total, \$255,000 ; total, including estimated interest \$1,973,945. "The uncanceled and uncollected coupons are regarded as a fien having the same validity as the bonds to which they belong. The supply and material claims are held under the existing laws of this State to be in the nature of a prior lien. Up to the present time the B. & O. Company has not taken any action or signified any intention of taking immediate action looking to the enforcement of these claims. Whether these claims may be permitted to run for a protracted period and what measures may be devised for their liquidation are subjects worthy of the carnest consideration of the stockhold-cers. It is proper to state that the B. & O. Company has not taken any action or signified any intention of taking immediate action looking to the enforcement of these claims. Whether these claims may be permitted to run for a protracted period and what measures may be devised for their liquidation are subjects worthy of the carnest consideration of the sto

"Unless the earnings should be considerably increased, the ability of the company to meet all its expenses and pro-vide for all future interest payments without further assist-ance from some source, may very properly occasion some anxiety." anxiety.

Comparative s'atistics for four years are as below given.

Chicago St. Louis & Pittsburg. (For the year ending December 31,1887.) The annual report of Mr. G. B. Roberts, President, states that the freight earnings show a marked improvement, the gain being \$866,116, or 25:12 per cent. Of this increase \$381,-741 was in the local and \$534,375 in the foreign tomage, a result due not only to the greater volume of traffic, but to the better rates obtained thereon. "The additional tomage was chiefly in lumber, coal, coke, stone and miscellaneous prod-ucts of quarries, flour, grain, pig and bloom iron, steel rails and other manufactured articles, and was partially offset by a decrease in products of the forest, ore, provisions and miscel-laneous agricultural products. While there was a decrease in the traffic exchanged with other roads at Indianapolis, there was a general increase at other points, and notably in the ton-mage exchanged with the Toledo Peoria & Western Railroad at State Line. There was also a large gain in our deliveries of coal and coke at Chicago. Freight rates were better main-tained than in 1886. The rate on local tonnage was 712 mills and on foreign tonnage 55 for mills it he average on both classes being 6.3 mills, against 5.9 mills in 1886." * * "A gratifying increase was obtained in the passenger earni-migs, amounting to \$121,657, or 11.74 per cent. Of this in-trease \$88,712, or 13:29 per cent, was in the local travel, and \$32,944, or 9 02 per cent, in the foreign travel." * * "Mile the earnings exhibit the very satisfactory increase referred to, the expenses, although augmented to some extent by the additional service consequent upon the greater volume of traffic and by increased outlay in the rebuilding of freight cars and engines, show a comparative reduction, the percent-age of expenses having been 73:23, against 81.91 in 1886. The increase of net earnings, \$700,000, enabled your company to meet all its fixed charges for the year and have a surplus, of \$339,993, while at the same time thee condition of the pro

At the annual meeting a resolution was passed authorizing the officers of the company to issue debenture bonds or other secu-rities and negotiate with the holders of overdue coupons on the 5 per cent bonds to fund such coupons, amounting to about \$1,800,000, into the new securities, on terms that shall be sat-isfactory to both parties. Comparative statistics for four years, compiled for the CHRONICLE, are as below.

Toledo Ann Arbor & North Michigan Railway.

(For the year ending December 31, 1887.)

The report of Mr. J. M. Ashley, President, states that the property of the company has steadily increased in value, and its financial and material condition is recognized by all prac-tical railroad men as more promising than at any period in its

history. The increase in operating expenses for 1887 was anticipated, and the attention of stockholders called to it in the last annual report, wherein it was stated that 'as the road is extended into the northern and le's populous portion of the State, it may safely be estimated that the percentage of operating expenses will be somewhat increased until after the new road-bed shall have become firm, and business shall have been developed in the comparatively new country."

with be somewhat increased units also the new roarbed shall have become firm, and business shall have been developed in the comparatively new country."
It has been the uniform custom of this company to charge to the "operating expenses" account all such extra work as relaying a few miles of steel rails to replace iron, to cutting down or lifting the track, filling up trestle-work with earth, &c., &c., and it will continue to pursue the same policy without charging such expenses to capital account.
The car trusts originally made were paid off during the year just closed, and the cars are now the property of the company. Another small "trust" was made in December, 1897, amounting to \$92,364, on the payment of which the cars will become the property of the company.
During the year the company acquired some valuable additions to its property, especially near Toledo and at Ann Arbor and Owosso. This property, together with the machine shops and round house being built at Owosso, and a new passenger station at Ann Arbor, will, when complete, add more than \$100,000 in value to the company's betterments.
Until last year the north-bound traffic exceeded 80 per cent of the entire traffic, and the south-bound traffic for 1887 increased to a fraction over 30 per cent, and it is estimated that the increase in south-bound traffic after the road is in full operation to Cadillac, will reach 40 per cent in 1888; or at that trate per annum for the months in which the road shall be opened for business to that place.
The rapid extension of road and building of connecting lines has been one of the striking features in the history of the Ann Arbor Company. The Cadillac road, 64 miles, was finished by January, 1888, and will be ready for through traffic in May. It is to be merged into the Ann Arbor Company on terms yet to be settled. The main line Toledo to Cadillac will then be 284 miles.

234 miles. The Muskegon road, from Ashley on the Ann Arbor road due west to the City of Muskegon, 96 miles, has just recently been completed and is expected to add largely to the earnings of this company.

The Toledo Saginaw & Mackinaw Railway was organized to build from Durand on the Avn Arbor road, via Saginaw, to the Straits of Mackinaw, and it will probably be open from Durand to Saginaw in July next, being a most valuable 40 miles extension of the Ann Arbor road.

extension of the Ann Arbor road. The contract has been let already by another company for the construction of the road from Cadillac to Frankfort on Lake Michigan, 63 miles, and when completed it will be operated by this company. The Chippewa Valley Road and Detroit Charlevoix & Macki-naw are other enterprises which would benefit greatly the Arm Arbor's business

Ann Arbor's business.

Ann Arbor's business. The Ann Arbor Company has taken the advance in adopting a plan of "Profit Sharing and Stock Allotment" for its em-ployes, and an examination of their plan will be of interest to all parties interested in the subjects of capital and labor. A copy can be obtained of Mr. J. M. Ashley, at the New York office, 150 Broadway. The results of operations for the two years 1886 and 1887 were as below:

GENERAL INVESTMENT NEWS.

Bradford Eldred & Cuba.—The first mortgage bondholders held a meeting and a committee was appointed to present a report at a 'meeting' two weeks later. Mr. T. C. Platt was made receiver in 1885, and about \$23,000 of receiver's certificates were authorized, which are yet unpaid. A statement of earn-ings furnished by the receiver from February, 1885, to March, 1888, shows: Gross earnings, \$120,875; operating expenses, \$144,488; sundry expenses, \$4,023; construction, \$7,362; in-terest on bonds, \$103,210. Central Pacific - A to employed in the interview.

Central Pacific.—At a nuch earlier date in the year than usual, this company has issued a pamphlet report which is in the broad style of the Pennsylvania and Union Pacific reports, and presents the handsomest appearance of any report ever

issued by the company. It came to hand too late for this week, but will be duly noticed in the CHRONICLE of May 5th.

Chesapeake & Ohio.—The trustees in charge of the reorg-anization of the Ches.& Ohio RR. have notified the Monarch Line Steamship Company that the contract under which the Chesapeake & Ohio guaranteed the expense of running steam-ers between Newport News and London and Liverpool will be canceled. The railroad company found it a losing business. Chicago f. Atlantic. Lab. Contact of the state of the state

Chicago & Atlantic.—Judge Gresham of Chicago will probably hear an application next month for the forectosure of the Chicago & Atlantic Railroad. The reorganization of the property has been delayed by the objections of the parties who hold a portion of the second mortgage bonds as collateral, but the settlement of all difficulties is anticipated in the near future future.

Chicago Milwaukee & St. Paul.—General Manager Ros-well Miller has been elected President of the Chicago Milwau-kee & St. Paul Railroad Company, to fill the vacancy caused a year ago by the death of Alexander Mitchell. The election was by the directors at a meeting in the New York offices. Mr. Miller is a thorough railroad man and for a long time has been at the head of the practical management of the St. Paul System. The company is to be congratulated on having a first-class railroad man as its president.

Cleveland Columbus Cincinnati & Indianapolis-St. Louis Alton & Terre Haute.—The old suit for \$664,874 back rental claimed against the proceeds of sale of the Indianapolis Rental claimed against the proceeds of sale of the indianapolis & St. Louis Railroad has now been finally decided on appeal to the U.S. Supreme Court. This suit by the St. Louis Alton & Terre Haute Railroad Co. was decided against the plaintiffs by Judge Drummond, and the U.S. Supreme Court has now affirmed that decision. This relieves the Cleveland Columbus Cincinnati & Indianapolis Railway Company of its last serious contraversy. controversy.

Consolidated Gas.—This company has placed \$600,000 of the \$3,000,000 issue of bonds with private parties. The balance will be held in the treasury as originally proposed.

will be held in the treasury as originally proposed. Duluth South Shore & Atlantic.—An engineer of this road states that the track is now laid fifteen miles from Ash-land, and there remains twenty-seven miles to bring the road to its junction with the Northern Pacific. There remains a good deal of ballasting to be done, but everything will be fin-ished up in good shape by August 1, and trains will begin on their regular time at that date. The total length of the line from Duluth to the "Soo" is 315 miles, and 484 from Minne-apolis to the "Soo" on the "Soo" road, making Duluth much nearer the East by rail than the Twin Cities.

Flint & Pere Marquette.—From Boston it is reported that the common and preferred stockholders have agreed that no-appeal shall be made to the Supreme Court; common stock to be issued on receipt of the decree as soon as certificates can be printed. The common stock to have four representa-tives in the new board of directors and the preferred seven.

tives in the new board of directors and the preferred seven. Houston & Texas Central.—The largest holder of bonds, Mrs. Hetty Green, has assented to the plan of reorganization and signed the agreement. She owned \$1,000,000 general mortgage bonds, \$125,000 first mortgage on the main line and \$125,000 firsts on the Western division, which have now been deposited with the Central Trust Company. It is stated that the assent of Mrs. Green gives the committee all of the \$4,325,-000 general mortgage bonds except \$31,000, and all the first mortgages except \$2,000,000 held by the "Moran party," who will continue the opposition. Lawyers representing all inter-ests have started for Galveston, Texas, to be present before Judge Pardee on May 1, when a motion for a foreclosure of the mortgages will be made. the mortgages will be made.

Kansas City Fort Scott & Gulf-Kansas City Springfield & Memphis-Kansas City Fort Scott & Memphis. At Kan-sas City, April 20, the directors of these systems met to con-solidate the different companies forming the systems into one organization. In building the Fort Scott system a large number of minor companies were organized in different parts of Missouri and Kansas. The consolidation was a matter of form and wholly for the convenience of the company is manor missouri and Kansas. The consolidation was a matter of form and wholly fer the convenience of the company in man-aging its business. There were ten separate organizations in the old system. All the roads were consolidated under the name of the Kansas City Fort Scott & Memphis, except the Kansas City Clinton & Springfield and the River branches, which are not yet finished.

which are not yet finished. Lehigh & Wilkesbarre Coal.—The 7 per cent bonds of this company maturing May 1, 1888, will be paid off on presenta-tion at the office on and after that date. Sealed proposals to purchase any part of \$303 000 of this company's 5 per cent sinking fund mortgage bonds due November 1, 1912, will be be received at the office until Saturday, April 28, at noon when such proposals will be opened and the bonds awarded to the highest bidders; but no bid will be considered at less than par and accrued interest.

Mexico Central.—President Wade, of the Mexican Central Railway, announces that t_{AC}^{i} Congress of the State of San Luis Potosi has granted to the company an extension of eighteen months on the "rampico division subsily. The com-pany has now 112 r_{AC} of this division completed, and about 175 miles more to build. The limit of time is now Jan-nary 1800. uary, 1890.

Mexican Na⁴.ional.—A meeting of the holders of Messrs, Matheson & Jo.'s certificates for \$5,000,000 bonds, known as the "Matheson" bonds of the old Mexican National Railway

Company, was held in London and the following resolution was unanimously adopted, viz.:

was unanimously adopted, viz.: That the agents, Messrs. Matheson & Co., do retain in their hands all "A" and "B" second mortgage bonds of the Mexican National Railroad Company, received and held by them in respect of the old first mort-gage six per cent gold bonds of the Mexican National Railway Company of the London issue; and in respect of such "A" and "B" bonds so re-tained that the agents. Messrs. Matheson & Co., be, and they are hereby fully empowered to take any and all steps they deem best for protecting the interests of the certificate holders, and that they be, and are here-by, fully authorized to exercise the voting power in respect of such "A" and "B" bonds.

In submitting this resolution, Mr. Magniac referred to the negotiations for the reorganization of the old company, and clearly described the care Messrs. Matheson & Co. had taken clearly described the care Messrs. Matheson & Co. had taken to preserve for the Matheson bonds the subsidy of \$2,500,000 which had been pledged as collateral security for that issue. He explained why it was necessary for them now to retain the custody of the corresponding "A" and "B" bonds, so as to make available the subsidy which had been established by deed as a security for these bonds, and could not in any way be made applicable to any other of the Mexican National Railroad bonds. He further showed that the right of voting, carrying with it the control of the line, had been reserved to the whole body of bondholders.

carrying with it the control of the line, had been reserved to the whole body of bondholders. Minneapolis Sault Ste. Marie & Atlantic-Minneapolis & Pacific-Aberdeen Bismarck & Northwestern.-These three railroads are to be consolidated. Gen. W. D. Washburn is reported as saying on his return to Minneapolis that the roads have been practically under one management since their or-ganization, and the same officers will continue to operate the new road. The Aberdeen Bismarck & Northwestern Road, which has been graded, has been taken into the system and will be pushed to completion at once. The new road will now have about 1,000 miles of track under its direct control. "We have made a close contract with the Canadian Pacific that will benefit both roads. We fix the tariff East and they do the same West. We have arranged to issue consolidated bonds for the equipment of the road and for terminal facilities; the amount of bonds will be known in a short time, but enough money has been raised for every purpose to put the system in first class condition. Our passenger equipment has already been ordered. We shall double our freight equipment. The road has never been in condition to handle the freight which the business required, and we will spend at once over \$1,000,-000 for a new freight outfit. We shall also add to our termi-nal facilities at Gladstone and Minneapolis."

Missouri Pacific.—Uriel A. Murdoch, the surviving trustee under a mortgage made in 1868 by the Missouri Pacific Rail-road Company to secure the payment of \$7,000,000 of bonds, has been relieved by the Supreme Court at his own request. The Mercantile Trust Company of New York will be appointed in his place.

Missouri Kansas & Texas.—The securities holders' com-mittee has ssued an extended reply to the letter of Mr. Jay Gould on M. K. & T. affairs, which will be found at length

Gould on M. K. & T. affairs, which will be found at length on a subsequent page. —Kiernan reports that Mr. Sage wrote a letter to the M. K. & T. committee, proposing the following basis of compromise: First—A reorganization of the company to be perfected, and a new mortgage bearing 4 per cent to be made for the present mortgage indebtedness of the company and for the purpose of exchanging the same for the present indebtedness. Second—To make an income mortgage, not accumulative; to adjust the rate of interest to the present holders of the several bonds issued by such company for the length of time which they have to run respectively. Third—That an assessment of —— shall be made on the stock for the purpose of clearing up the present indebtedness of the company, and build an extension of the same to branch roads in Texas, which it is believed would add to the securing of the present and future sources of business to the main line. New York Lake Erie & Western.—This company offers,

New York Lake Erie & Western.—This company offers, through Messrs. Drexel, Morgan & Co., to extend at 4 per cent for forty years its fifth mort. 7 per cent bonds (\$709,000), maturing June 1, and Drexel, Morgan & Co. offer to purchase at par and accrued interest all of the mortgage bonds which holders do not care to extend at 4 per cent.

New York & New England.—The gross earnings and ex-penses for the quarter ending March 31 were as below:

Net earnings	\$334,250	\$362,889	Dec.\$28.638
Gross earnings	1888, \$1,156,932 822,681	1887. \$1,152,401 789,512	Inc. \$4,530 Inc. 33,169

Dec.\$28,638 N. Y. Stock Stock Exchange—New Securities Listed.— The Governing Committee of the New York Stock Exchange have added to the list securities as follows:

able the company to pay for improvements upon and addi-tions to the property, in pursuance of Article 16 of the lease with the Pennsylvania Railroad Company.

Tennessee Coal & Iron.—This company proposes to issue \$1,000,000 8 per cent cumulative preferred stock, for improve-ments, to holders of the \$10,000,000 common stock. Privilege of taking at 90 will be offered first to holders of common stock of record June 27, payable one-third in present common stock at \$30 per share and the balance in cash. This plan would retire about \$1,000,000 common stock.

retire about \$1,000,000 common stock. Texas & Pacific.—The committee of reorganization of this company have practically completed their work, and have authorized the distribution of all the new stock and securities by the Farmers' Loan & Trust Company of New York, com-mencing on the 7th of May. The Hon. John C. Brown will be the President of the company residing on the line, and as he is now the sole receiver, the receivership will be allowed to stand for a short time longer in order to close up certain details of the reconstruction. Mr. Jay Gould will act as chairman of the executive committee, thus securing amity with the Mis-souri Pacific system. souri Pacific system.

Wabash.—Notice is given to holders of Wabash certificates issued by the Central Trust Company that six months' interest due May 1, 1888, will be paid on that date at the Central Trust Company, No. 54 Wall street, according to the reorganization agreement of November 21, 1887.
—The receivers' accounts for the month of March show gross receipts (of \$678,499; expenses, \$694.677; deficit, \$16,178; balance of cash on hand, March 1, \$243,765; balance, March 31, \$227,587.

31, \$227,587.

31, \$227,587.
Toledo Peoria & Western — President E. F. Leonard of the Toledo Peoria & Western Railroad has made a statement of his ccmpany's condition to the security holders. When all claims by reason of the accident at Chatsworth in August, 1887, filed and audited have been paid the total will not exceed \$235,000. The gross earnings of the Toledo Peoria & Western for the seven months, July, 1887, to January, 1888, both inclusive, were \$607,074. After paying taxes and all expenses of operation, and for improvement, renewals and repairs, the net earnings for the above period are \$150,000. President Leonard says that a conservative estimate of the earnings and expenses of the remaining five months of the President Leonard says that a conservative estimate of the earnings and expenses of the remaining five months of the fiscal year warrants the belief that the net earnings for the year will exceed \$200,000, an amount in excess of the require-ments of the company to meet its interest charge. The latter is \$180,000, or 4 per cent on \$4,500,000 of first mortgages. The Purchasing Committee of the T. P. & W. received \$424,000 first mortgage bonds of the T. P. & W Railway Company in settlement of advances for payments ordered by the United States Court, and for other purposes. These \$424,000 bonds will be offered for sale on May 24 by the Auditing Committee. No bid will be received at less than 67½ per cent for each bond of \$1,000. of \$1,000.

Railroad Construction. - The Railway Age recently

Railroad Construction. — The Railway Age recently had the following: "When the year 1887 closed with the extraordinary and unprecedented record of having built nearly 13,000 miles of railways, it had already become the settled belief that rail-way building had been greatly overdone and that the present year would witness an almost complete stoppage of enter-prise in that direction. This opinion still seems to generally prevail, and is frequently expressed in conversation and in the newspapers, so that most people believe that practically no extension whatever has been made to our railway mileage since the end of 1887. When, therefore, we state that in the first three months of 1888 more miles of track were laid, on a greater rumber of lines and in a greater number of States and Territories, than, according to our record, where laid during the same period in 1887, the assertion will proba-bly be received with surprise if not incredulity. It is, how-ever, true, as the following summary of track-laying from January 1 to April 1, compiled from the detailed records in his office shows: <u>States</u> <u>Lines</u>. <u>Miles</u> <u>States</u>. <u>Lines</u>. <u>Miles</u>.

Western New York & Pennsylvania.—This company gives notice that it will pay \$16 67 in scrip for coupons maturing April 1, 1888, on its second mortgage bonds, at its office.

office. Union Pacific.—The annual meeting held in Boston on the 25th ratified the action of the directors in leasing the Oregon Railway & Navigation Company's lines through the Oregon Short Line Company. The only change from last year's board was the election of Samuel Carr, Jr., to fill the vacancy caused by the death of General Manager and Vice-President T. J. Potter. The usual vote ratifying and approving the investments made by the directors during the year was, after a detailed exclanation by President Adams, passed. Presi-dent Adams, in response to inquiries from stockholders, stated that it was the purpose of the directors during the ensuing year to pursue a very conservative course with reference to new construction, and that at present no new lines were under year to pursue a very conservative course with reference to new construction, and that at present no new lines were under

consideration. —Trustee Frederick L. Ames of the Union Pacific land grant mortgage advertises for proposals to sell him bonds sufficient to absorb \$1,095,000, on or b∈fore April 30.

Tand grant mortgage advertises for proposats to set num bonds sufficient to absorb \$1,095,000, on or before April 30. Grand Trunk of Canada.—A full synopsis of the annual report of the Grand Trunk Railway, issued in London on Tuesday, has been received at Montreel. In it is included the accounts of the Northwestern & Hamilton, recently ac-quired. The net receipts of the Grand Trunk for the year 1887 were £647,956, against £595,697 last year. After de-ducting pre-preference charges, amounting to £433,109 8s. 6d., and interest on the bonds of the controlled and subsidiary lines acquired by the company, amounting to £23,949 18s. 11d., the net revenue balance on the half year is £238,766 3s. 3d. This, added to the balance for the last half year, gives a total of £240,839 13s. 9d., which pro-vides for the payment of a full dividend for the year ended December last of 4 per cent on the guaranteed stock and first preference stock, together with arrears of dividend on the latter stock for the half year ended June last, and the pay-ment of a dividend on second preference stock of 6s. 8d. per cent for the half year. These payments absorb £240,749 0s. 5d., leaving a balance of £90 13s. 4d. to be carried forward to the next half year. There was an increase in the number of passengers carried compared with the previous half year and an increase of £35,027 in the receipts. There was also an increase in freight traffic of 48,507 tons and £7,096 in money. The working expenses were £1,371,741, being an increase of money.

THE CHRONICLE.

Documents. and Reports

UNION PACIFIC RAILWAY.

ANNUAL REPORT FOR THE YEAR ENDING DECEMBER 31, 1887.

The Union Pacific system is composed of the roads of the Union Pacific Railway Co. (1,824.06 miles) and auxiliary lines (2,939.89 miles). The system has a total length of 4,763.95 miles. The lines of the Oregon Railway & Navigation Co. (752.1 miles) and of the St. Joseph & Grand Island system (447:35 miles), though leased respectively by the Oregon Short Line and the Union Pacific, are not treated as belonging to the Union Pacific system, or included in the above mileage, each of those properties having an independent management.

Balance.	a-	\$3,151,879	16	\$2,505,561 99 21,113,600 00		\$1,095,750 00
Balance applicable to dividends		\$3.169,729		\$3,619,161 99		

Balance applic 1 Interest received from bonds held in trust.

2 Of this amount, \$1,041,300 were derived from land sales and \$72,300 from interest on bonds held in trust,

From this table it appears that the balance applicable to dividends on December 31, 1897, was \$3,169,729 16, or 5.20 per cent upon the onital stock of the Union Pacific Company.

In the last annual report it was stated that negotiations for the leasing of all the property of the Oregon Railway & Navi-gation Company by this Company, through the medium of the Oregon Short Line, had then for a number of months been going on. The terms of the lease were finally agreed upon on the 11th day of April, immediately succeeding the last annual meeting of this Company, and have been approved by the boards of directors of the Short Line, of this Company, and of the Oregon Bailway & Navientian Company Oregon Railway & Navigation Company.

At a later period in the year negotiations were entered into between the representatives of your Company and those of the Oregon Railway & Navigation Company and the Northern Pacific Railroad Company, with a view to modifying, in various essential respects, the original terms of the lease, and also enabling the Northern Pacific Railroad Company to participate in the advantages thereof. This result, if brought about, it was hoped, would remove the danger of serious complications resulting from the completion of the Cascade Division of the Northern Pacific, which gives that Company an independent outlet to tide-water at Puget Sound. Conclusions of a satisfactory character were reached in January, and duly approved by the boards of directors of the Northern Pacific and of this Company, at meetings held respectively on the 17th and 18th of January last. They were also approved by the Executive Committee of the Oregon Railway & Navigation Company, Meanwhile, up to the present time, this supplementary joint lease has not been acted upon by the Board of Directors of the Oregon Railway & Navigation Company, sitting at Portland. They have informally signified that the arrangement was one which did not appear to them to be conducive to the interests of the corporation of which they are directors, or of the community in which they live. It is confidently believed that these objections will be removed at an early day, and that the joint lease will be ratified by all parties concerned, so as to take effect on the first day of July next.

In the interim the Railway & Navigation Company is operated under the terms of the lease of Jannary 1, 1887, as a joint Property with the Oregon Short Line. The lease, though defective in certain respects which will be provided for in a supplementary agreement already perfected, has proved highly advantageous both to the Oregon Short Line and the Union Pacific. This may not at once appear in the published reports of the companies. Not improbably the Oregon Short Line and Union Pacific may be called upon to meet an apparent deficit between the surplus revenue of the Railway & Navigation Company and the rental provided in the lease. It may, therefore, on the face of the returns, appear that the lease is a burden rather than an advantage to the lessee companies. But in estimating the advantages and disadvantages of such a contract it must be borne in mind that the real object to be obtained is not so much a surplus of revenue earned by the leased lines themselves, over and above all operating expenses and fixed charges, as the control of the business of the lease by th lessee company. In the case of the Oregon Railway & Navigation Company, the Oregon Short Line and Union Pacific enjoy a haul of nearly fifteen hundred miles on the great bulk of all intercharged traffic. If this traffic were to be diverted over another and competing line, the profit earned on it during this most exceptional haul would be entirely lost to your company. While directed over the tracks owned by your Company, it is, because of the distance it is carried and the regularity with which the business can be conducted, traffic of the most profitable description. A close examination of the returns of the Oregon Short Line and of the Union Pacific will demonstrate this fact.

The foregoing proposition is one which few persons at all familiar with matters connected with the operation of rail roads would deny. Neverthless your directors call attention to it, for the reason that during the recent investigation by the United States Commissioners, there was no feature of the Union Pacific system which was more questioned, or which had to be so laboriously demonstrated. By a portion of the Commission, at least, the ground was openly taken that no branch or leased line can, save under most exceptional circumstances, be considered as otherwise than a burden on the mother or lessee line, unless its returns show that it earns a profit over all operating expenses and fixed charges on the business done over its own iron. Your attention has already been called to the fact that in the case of the Oregon Railway & Navigation Company the bulk of interchanged traffic, both passengers and freight, is hauled 1,400 miles over the tracks of the lessee companies. Yet the value of the traffic thus secured to the Oregon Short Line and Union Pacific nowhere appears as a separate item in the returns. The same is true, though in less degree, of all the branches and connecting lines owned and operated as part of the Union Pacific system. An examination of the several returns of these lines, herewith submitted, will show that a number of them failed during the past year to earn their operating expenses and fixed charges, reporting an apparent deficit Yet, with the possible exception of the Denver South Park & Pacific, there was probably no one of them the traffic of which over the main lines of your Company did not return to it a profit in excess, and often largely so, of any deficit which had to be met. The value of this branch line traffic to the main line, irrespective of all branch line earnings, has in the case of the Union Pacific been recently estimated by the Comptroller, as the result of careful investigation, at not less than \$5,000,000 a year. (Testimony United States Pacific Railway Commission, vol. 2, p. 899.)

During the year, owing largely to the lease of the Oregon Railway & Navigation Co., the value of the Pacific coast traffic greatly increased, the revenue from it amounting to \$3,418,866 46, as compared with \$1,893,688 79 in 1886, an increase of 80 per cent.

Local business has not shown a proportionate growth. This to a considerable extent has been due to the drought which prevailed in Kansas and Nebraska during July and August, which proved so destructive that, as will be seen by reference to the classified table of freight movement herewith submitted, the tonnage of agricultural products moved during the year decreased 13.8 per cent as compared with the previous year. During the same period the tons moved under every other heading increased.

The revenue derived from the local traffic of the company was also seriously affected during nine months of the year by the operation of the Inter-State Commerce act, which necessitated, after April 1, 1887, almost a complete re-arrangement of tariffs. Your directors do not propose to discuss at this time the practical results which have followed the enforcement of the provisions of the law in question. It would even yet be premature to do so. Meanwhile, the returns do not indicate that the provisions of the act have borne more heavily upon the Union Pacific system than upon railroads in other sections of the country. The difference between the long and short haul rates charged on the Union Pacific system before the law went into effect was, in fact, much less than had been currently stated or was generally supposed.

The revenue derived by the company from its local freight business, excluding commercial coal, was \$11,566,772 80 in 1887, as compared with \$11,964,459 52 in 1886, a decrease of 3.33 per cent.

Under the restricting provisions of the Inter-State Commerce act, as nearly as can be ascertained, about one-half, or 45 per cent, of the free passenger travel, exclusive of employes, has been cut off. This amount of travel at full tariff rates would represent about \$250,000 a year; it may be estimated that the annual revenue of the company was increased by one-half that amount, or \$125,000, through the limitation of this abuse. On the other hand, large reductions were made in local passenger rates, averaging on the Oregon Short Line and Utah & Northern division 15 per cent, and affecting passenger earnings to the estimated amount of \$300,000.

As a result of the financial operations of the year, the funded debt has been decreased \$1,788,472 50 while the balance of cash assets over the sum of the floating liabilities has decreased \$949,500 62, making for the year a net decrease of liabilities, both funded and floating, of \$838,971 88.

A large amount of new equipment, both motive power and cars, is required to accomodate the rapidly-increasing traffic of the company. It must be furnished, or business cannot be done with economy. It is estimated that three millions in value will be called for either during the current year or early in 1889. This cannot be paid for out of any means now at command. Your directors have, therefore, decided to issue ten-year notes of the company, secured by a trust covering the new equipment in part purchased by such notes; following in this respect the policy which has for a number of years been pursued with most satisfactory results by the Pennsylvania Railroad Co. The legality of these notes cannot be called in question under the limitations imposed on the company by section 4 of the act of March 3, 1873, as they are issued in direct payment for equipment purchased. A serious difficulty, peculiar to the Union Pacific, is in this way overcome. An equipment deed of trust, on the most approved plan, has accordingly been prepared, and recorded in conformity with the laws of the several states and territories in which the Union Pacific owns and operates roads. The first series of notes under thi trust will be issued and disposed of during the current year. These notes, or their proceeds, can be applied to no other purpose than the payment for the new equipment, to purchase which they are issued.

During the year the company has increased its investment and permanent improvement accounts \$6,818,794 24, of which \$5,580,079 59 was invested chiefly in the construction of new branches or extensions, and \$1,238,714 65 was spent for new construction and equipment for the company's main lines. There have been built 350 miles of additional road. Of the foregoing amount (\$6,818,794 24), the sum of about \$448,000 was derived from the sale of the company's securities, and \$3,600,000 from surplus revenue, which might otherwise have been applicable to dividends. There remained the sum of about \$2,700,000, which was provided for in other ways, chiefly through temporary loans and a reduction of the material account.

It had been intended, as was stated in the last annual report, to meet the cost of all future branches and extensions by the issue of a new series of five per cent collateral trust bonds of the Union Pacific Railway Co., offering the same in the first place to the stockholders in proportion to their holdings. Work was contracted for early in the year with this understanding. In view of the constant discussion of the affairs of the company, which resulted from the investigations of the Pacific Railroad Commission, and which continued throughout the entire summer, the times were not considered propitious for placing a loan of the character of that referred to. Subsequently, when the conclusions of the commission were made public, monetary conditions were unfavorable. Under these circumstances the securities representing the construction of new branches and connections, which would have formed the underlying security of the proposed collateral trust loan, were placed in the treasury of the company, where they now are ; and the outlay they represent has in part been carried as a floating liability. Whenever an adjustment shall be reached as a result of the labors of the Pacific Railroad Commission, the bill now pending before Congress becomes a law, or whenever the financial conditions are favorable for the negotiations of securities, the loan in question can be placed, and the company put at once on a dividend-paying basis.

At present little new construction is going on, whether upon the existing system or contemplated new lines. Neither is it proposed to enter upon such construction until either a settlement is effected with the Government or some general financial plan is adopted for meeting the cost of such work in advance of entering upon it.

FUNDED AND FLOATING DEBT OF THE UNION PACIFIC SYSTEM.

The following table shows the condition of the funded and floating debt of the entire Union Pacific system, its mileage, etc., on June 30, 1884, December 31, 1884, December 31, 1885, December 31, 1886, and December 31, 1887, respectively :

	June 30, 1884.	Dec. 31, 1884.	Dec. 31, 1885.	Dec. 31, 1886.	Dec. 31, 1887.
Funded debt of the system in the hands of the public Add bonds of Union Pacific Railway Co. in treasury of Co			\$144,788,958 53 2,147,450 00		\$147,004,611 29 586,300 00
			\$146,936,408 53 1,861,445 40	\$148,870,392 96 1,351,189 73	\$147,590,911 29 401,689 11
	\$155,446,638 32	\$151,354,231 53	\$148,797,853 93	\$147,519,203 23	\$147,189,222 18
Miles of road	4,419.8	4,476.4	4,519.5	4,594.4	4,771.1
Delt per mile of road	\$35,170 51	\$33,811 59	\$32,923 52	\$32,108 45	\$30,850 17

Accounting, therefore, the bonds and other securities of the company held in its own treasury as bonds "at is, issued—the changes between June 30, 1884, and December 31, 1887, have been as follows:	
Decrease in funded debt	7,301,867 06
Total decrease in debt	88,257,416 14
Increase in miles of road	351.30
Decrease in debt per mile of road	\$4,320 34

BALANCE SHEET.

The total net income of the company from all sources, including proceeds from land sales, was \$7,057,132 24 in 1886, if the amount of interest accrued during the year on United States subsidy bonds, less repayments by the company and accretions to the United States sinking fund, is deducted. This income has been spent chiefly upon construction of branch lines, permanent improvements to the property of the Union Pacific Railway Co. and new equipment, as is shown by the increase of \$5,580,079 59 in the investment accounts of the company (representing chiefly the cost of bonds and stock received in payment of advances to branch line companies for construction), and of \$1,238,714 65 in the new construction and equipment accounts, an aggregate increase of \$6,818,794 24. [See balance sheet at end of this report on next page.]

FLOATING DEBT.

At the close of the year the company had \$3,335,000 notes payable outstanding, which, with other liabilities, made an aggregate gross floating debt of \$7,464,443 04, an increase of \$1,749,309 22 as compared with the similar debt on December 31, 1886. The cash and cash resources of the company properly applicable to the reduction of the gross floating debt exceeded that debt on December 31, 1887, by \$401,689 11 compared with a similar surplus in cash resources on December 31 1886, of \$1,351,189 73. The balance of cash resources over liabilities therefore decreased \$949,500 62 during the year.

By reference to the statement of floating debt it will be observed that the resources of the company applicable to the payment of the debt include an item entitled "Bills and Accounts Receivable," amounting on December 31, 1887, to \$6,273,-955 62, an increase during the year of \$782,728 29. The item as it is now constituted embraces the following accounts:

	Notes receivable.	\$816,233 84 688,017 00
	Station Agents and Conductors and Freight in transit	2,506,492 91
	Railroad Companies within the System	1,990,256 28
VH 70	Stone and Coal Departments	
JUE NY.	Total	\$6,273,955 62

The balances due from railroad companies outside of the system, and on bills collectible, all of unquestioned value, have increased during the year \$387,550 78; and the balances due from railroad companies within the system, chiefly the Oregon Short Line and the Omaha & Republican Valley, show an increase of \$595,689 37. The balances due from the Denver South Park & Pacific are not included in this item. The balance due from the Stone and Coal Department is of questionable value, and will have to be charged off. The other changes in the accounts as compared with 1886 are of comparative unimportance. The difference between the decrease in funded debt afloat (\$1,788,472 50) and the decrease in cash resources over liabili-

ties (\$949,500 62), or \$838,971 88, represents the actual improvement during the year in the condition of the aggregate funded and floating debt of the company, excluding the debt due the United States. -

¹This account covered the actual notes of the company on which it was borrowing money. ²The increase in this account Dec. 31, 1886, is due principally to the registration in 1885 of tax vouchers payable in the early months of the succeeding year, and vouchers for material to be used in the construction of the Omaha bridge and extensions of branch lines. ³Includes full amount of coupons due on following day.

⁴ Includes notes receivable held by the company, advances to Utah Central Railway Co. for purchase of steel rails, open accounts at Omaha against other railroad companies and individuals, and advances to branch lines on current account. ⁵ The amount found due the United States by the Court of Claims, on earnings of past years, \$916,704 02, is not included at these respective dates.

MISSOURI KANSAS & TEXAS BAILWAY.

OPEN LETTER OF THE COMMITTEE OF SECURITY-HOLDERS. New York, April 24th, 1888.

To the Board of Directors of the Missouri Pacific Railway Company.

GENTLEMEN-A communication addressed to you by your President and published in the New York papers of the 20th instant challenges an analysis and criticism at our hands, a committee of the security-holders of the Missouri Kansas & Texas Railway Company, inasmuch as it implies a stricture upon our motives and casts imputations upon the property which we are endeavoring to protect.

Your President, Mr. Gould, who is also President of the Missouri Kansas & Texas Railway Company, refers to the fact that for eight years he has without a dollar of salary given his time and attention to the affairs of "that company." This phrase leaves it somewhat in doubt whether it is the Missouri Kansas & Texas or the Missouri Pacific to which he has devoted his constant attention, but we will assume that he means

the Missouri Kansas & Texas Railway Co. At the same time he asserts that he welcomes a change in the management and is disposed to co-operate with any parties who can render more efficient service to the Company than he and his associates have been able to do.

We shall also assume for the present that he is sincere in the statement that he has rendered efficient service to both corporations. But imasmuch as the relation between the lessor and the lessee Company, if not necessarily one of antagonism, is, to say the least of it, one in which conflicting interests may very naturally arise, it seems to us that the question of the efficiency of that service should not be left wholly to the judgment either of an executive officer or of a board of direction which represents primarily the interest only of the lessee Company. In the face of the fact that notwithstanding the "efficient" services of your and for the present "our" President, the securities of the Missouri Kansas & Texas Railway Company have suffered a decline within the past two years—as to the first of the present mortgages from 116 to 90; of the consolidated 6 per cent mortgage, from par to 60; of the consolidated 5 per cent mortgages from 87 to 51, and of the stock from 39 to 11- it is not unnatural that the security-holders of the lessor Company should feel some misgivings as to the safety of the interests which are thus wholly intrusted, not only as to the physical possession of the property, but also as to direction of the financial affairs of the Company, to the officers appointed by a preponderating interest in the stock and bonds of the lessee Company.

It is true that during the same period of time there has been a consid-crable decline in the stock of the lessee company-the Missouri Pacificbut it is material not to overlook the fact that no corresponding decline in the mortgage securities of the Missouri Pacific Railway Company has the mortgage securities of the Missouri Pacific Railway Company has taken place during the same interval, and it is significant to note that the larger decline of the stock of the Missouri Pacific Railway Company commenced only when concerted action on the part of the Missouri Kansas & Texas Railway Company stockholders was imminent by reason of their evident restlessness as to the safety of their own posses-sions.

Your President, Mr. Gould, states that since December, 1880, there has been expended about \$2,500,000 for laying the Missouri Kansas & Texas track with new steel rails. So large an expenditure for better Texas track with new steel rails. So large an expenditure for better-ment of permanent way should have reduced materially the cost of maintenance and operation, and yet we are confronted with the fact that the operating expenses, according to the report, have increased from 58 per cent in 1886 to 72 per cent in 1887. We are at a loss to understand what your President may mean by his

statements that "The board of directors of the Missouri Kansas & Texas " Bailway Company during these years has been in harmony with that of the Missouri Pacific Company," and that "the latter company has "during periods of light earnings made advances necessary to meet "current expenses, 'relying upon future earnings for reimbursement.' We have before us the official statements of the Missouri Pacific Railway We have before us the official statements of the Missouri Pacific Railway Company for the last few years, from which it appears that the Missouri Pacific Railway Company has been constantly in debt to the Missouri Kansas & Texas Railway Company, and there is no indication of the existence at any time of any such "light earnings" of the Missouri Kansas & Texas property as would require any such generous advances as your President seems to indicate. The harmony of interest between the two companies referred to by your President is perhaps sufficiently accounted for by printing in parallel columns the names of the New York members of the present board of directors of the Missouri Pacific Company and the present board of directors of the Missouri, Kansas &

Texas Company. Of the Missouri Kansas & Texas Of the Missouri Pacific u Company.

R. M. GALLAWAY.	

In a statement under oath, made by Mr. Henson, Secretary of both companies, in the Barry suit in December, 1886, he conceded that the Missouri Pacific Railway Company was then indebted to the Missouri Kansas & Texas Railway Company in the sum of about a million o dollars. Had not the security holders of the Missouri Kansas & Texas Railway Company under those circumstances a right to assume (in reliance upon the statement made by Mr. Henson which revealed this condition after a period of years) that theretofore a like condition, differing only in amount and that amount favorable to the Missouri Kans as & Texas Railway Company, had existed, and that, notwithstanding certain large expenditures made for the betterment and permanent im provements of the Missouri Kansas & Texas Road had been incurred this condition of the accounts would not be reversed by an increase o operating expenses, when both prices of labor and the result of such permanent improvement should have reduced operating expenses from 6 per cent to 10 per cent at least.

permanent improvement should have reduced operating expenses from to be reent to 10 per cent at least. This claimed by your President that there had been an advance made of the Missouri Pacific Railway Company of about \$500,000, not covered by earnings, in addition to the absorption of a million or more of Missouri Kansas & Texas Railway Company which existed in December, the first out Kansas & Texas Railway Company which existed in December, the first the missouri Kansas & Texas Railway Company which existed in the Missouri Kansas & Texas Railway Company. Such a change in the relations of the two companies, if it be a fact, sufficiently justified from the part of those primarily interested in the Missouri Kansas & Texas relations of the two companies, and, accordingly, the committee representing such security cholders instituted an inquiry in February and were informed that at the beginning of the year 1886 here was no fatting debt of the Missouri Kansas & Texas Railway Company, and were informed that at the beginning of the year 1888 here was no fatting debt of the Missouri Kansas & Texas Railway Company, and were informed that at the beginning of the year 1888 here was no fatting debt of the Missouri Kansas & Texas Railway Company, and were informed that at the pension of accounts after repeated assurances that an exactly contrary condition of accounts after the relations in the Could's letter. The first ground alleged is the entire failure of the corn one on the line of the railway in Missouri and Kansas. The official statements of this for the railway in Missouri and Kansas. The official statements of the further failure of the corn arop on that held for last year shows, however, that the shrink proteomany the security. This inconceivable that in the case of the company, the security for the case of the company, the security of the case of the company, the security of the security of the case of the company. It is inconceivable that in the case of the company, the security for the fast many of the fast t

ed for FRASER

business running into the fertile lands of Texas from the North and East and Northwest over its lines, and which has not fallen off. Your President, therefore, well informed as he usually is upon all sub-jects concerning rail way management and the causes that influence rail-way carnings, must, partly perhaps by reason of his long absence from the country, have been seriously misled as to the first cause to which he attributes the diminished earnings of the Missouri Kansas & Texas Rail-way Company. The second cause upon which he assumes to account for this extraor-dinary condition of affairs is the construction of three new lines of rail-road into Texas. Two of these lines have, however, been constructed for such a period of time that they are not properly to be regarded as a new cause or influence to account for the difference of condition be-tween the 1st of January, 1887, and March, 1888. Only one of the lines to which your President refers has by new construction made any inroad into the business of the company within the past thirteen months, and under all the circumstances it is not conceivable that any of the new lines have caused a serious diversion of the well-established business of a line so thoroughly equipped and so efficient as the Missouri Kansas & Texas Railway. The third eause which your President aster for the charged financial

APRIL 28, 1888.]

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, April 27, 1888.

The occurrences affecting trade and commerce during the past week have been quite unimportant. The debate in Congress over the new tariff bill drags its slow length along, and the political intelligence from Europe is without decided feature. Even in labor trcubles there is nothing to call for special reference. The temperature early in the week was quite low; damage being reported to fruits by frosts. The close, however, is much warmer. Money is easy, but trade and speculation alike feel the absence of stimulating influences.

Lard on the spot was firmer and fairly active early in the week, but declined yesterday and was again lower to day closing dull at 7.85c. for prime city, 8.25@8 30c. for prime to choice Western, 8.10c. for refined to the Continent and 9c. for refined to South America. The speculation in lard for future delivery opened the week quite buoyant, but has latterly declined smartly, under sales to realize, and again fell off to day, closing unsettled.

DAILY CLOSING PRICES OF LARD FUTURES.

	Saturd'u.	Mond'y	Tuesd'y.	Wednsd'y.	Thursd'y.	Friday
May delivery	8.29	8·31 8·33	8·25 8·27	8:21 8:22	8·16 8·17	8·10 8·10
July delivery	8.37	8·35 8·37	8·29 8·31	8·25 8·28	$8.19 \\ 8.22$	
Sept. delivery		8.39	8.34	8·30 8·30	8·26 8·26	

Pork is firm, but the close is dull; mess, \$14 50@\$15 50 for old and new; extra prime, \$12 50@ \$12 75; clear, \$16 50@ \$18. Cut_ meats are firmer and have been active, but close dull; pickled bellies, 73%@734c.; shoulders, 71/2@75%c., and hams, 11@114c.; smoked shoulders, 81/2c., and hams, 12@121/4c. Beef is nominal at \$7@\$7 50 for extra mess and \$8 for packet per bbl.; India mess quoted \$11 50@ \$13 per tierce; beef hams dull at \$15,75@\$16 per bbl. Tallow steady at 4%@5c. Stearine is dearer at 93/8@91/2c. and oleomargarine is quiet at 7@71/8c. Butter is in active demand and firmer at 22@271/2c. for creamery. Cheese is unsettled; old State factory quoted at 10@ 1234c.; new do., 9@1114c., and new skims, 3@5c.

Coffee on the spot has been much more active. Vesterday there were sales of Padang, March shipment, at 1634c., and Government Java to arrive at 14% c., c. and f.; and a full business was done in R o at 1278@1314c. for No. 7, the inside price on store terms. The speculation in Rio options has been fitful, kut at generally better prices, closing to-day barely steady, with sellers as follows :

Raw sugars were dull and drooping, and close somewhat nominal at 43/@4 13 16c. for fair refining Cuba and 5 7-16@ 51/2c. for centrifugal, 96 deg. test. Refined sugars are also a fraction lower. Molasses fell back to 20c. for 50 deg. test, causing a revival of trade. The tea sale on Wednesday went off at steady prices, Formosa Oolongs doing a little better; yesterday 16,500 half-chests Oolongs sold at private sale. Sicily fruits have sold freely at auction, at prices covering a wide range.

Kentucky tobacco has been quieter, and sales for the week are only 350 hhds. at unchanged prices. Seedleaf continues in fair demand, and sales for the week are 1,550 cases, as fol lows : 700 cases 1886 crop, Pennsylvania, 91/2@14c.; 200 cases 1886 crop, do. Havana seed, 10@18c.; 150 cases 1886 crop State Havana, 10@20c.; 150 cases 1886 crop Wisconsin Havana, 5@11c.; 150 cases 1886 crop, New England Havana, 11@ 28c., and 200 cases sundries, 5@30c.; 500 bales Havana, 60c.@ \$1 10 and 350 bales Sumatra, \$1 38@1 85.

Spirits turpentine declined to 38c., but was more active to day at 381/2c. Rosins are quiet \$1 171/2@\$1 221/2 for common to good strained. Crude petroleum certificates have been unsettled but less depressed, closing to-day at 8534@857%c.

On the Metal Exchange there has been a sharp decline in Straits tin, which closed to-day at 221/4c. for July. Ingot copper has been unsettled, selling to-day on the spot at 16.70c., with a forced sale of 100,000 lbs. O ford at 151/2c. for Apri'. Domestic lead is down to 45%c. and spelter 434c. The iron markets are still depressed; foreign Bessemer pig about \$19 50, duty paid.

COTTON.

FRIDAY, P. M., April 27, 1888, THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (Apr. 27), the total receipts have reached 30,641 bales, against 27,960 bales last week, 28,504 bales the previous week and 39,563 bales three weeks since, making the total receipts since the 1st of September, 1887, 5,220,725 bales, against 5,122,154 bales for the same period of 1886-7, showing an in-crease since September 1, 1887, of 98,571 bales.

Neither bulls nor bears seemed to have the courage to act. The character of the foreign advices generally, the full movement of the cur-rent crop and the better planting weather have favored the tears; but the large export movement, effecting a rapid re-duction in stocks, has given the bulls a slight advantage in the turn of values. Liquidation is going on at the South with some argency, but it is also evident that Europe wants cotton, and though taking only after a hand-to-mouth fashion, ship-ments promise to be well sustained for the remainder of the current crop. On Wednesday the bulls showed more confi-dence than for some time past. Yesterday a buoyant opening was followed by depression, under the full issue of short no-tices for May delivery, which were thrown upon the market, and subsequently by purchases for arrival to be exported. To-day the market was depressed by unfavorable foreign ad-vices. Cotton on the spot met with a fair demand for export and home consumption, and on Wednesday some speculation was reported. Yesterday quotations were advanced 1-16c. To day the market was quieter but steady at 9 13-16c. for midling uplands. The total sales for forward delivery for the week are 289,200 bales. For immediate delivery the total sales foot up this week 4,404 bales, including 2,344 for export, 1,660 for consumption, 400 for speculation and — in transit. Of the above — bales were to arrive. The following are the official quotations for each day of the past week—Apr. 21 to Apr. 27.

each day of the past week-Apr. 21 to Apr. 27.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat are this week's returns and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Apr. 27), we add the item of exports from the United States, including in it the exports of Friday only.

The imports into Continental ports this week have been 60,000 bales.

The above figures indicate a decrease in the cotton in sight to-night of 111,647 bales as compared with the control and of 1887, a *decrease* of 66,303 bales as compared with the corresponding date of 1886 and a *decrease* of 23,924 bales as compared with 1885.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since Sept. 1, the shipments for the week-and the stocks to-night, and the same items for the corres, ponding period of 1886-87—is set out in detail in the following tatement.

RECEIPTS FROM THE PLANTATIONS. — The following table Indicates the actual movement each week from the planta-tions. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week	Receipt	Receipts at the Ports.			St'k at Interior Towns.			Rec'pts from Plant'ns.		
Ending-	1886.	1887.	1888.	1,886.	1887.	1888.	1886.	1887.	1888.	
Mar. 23	64,328	46,298	38,380	358,392	173,846	276,960	29,998	19,230	30.470	
** 80	59,095	84,115	33,396	325,663	143,168	262,737	36,366	3,437	19.173	
Apr. 6	41,392	29,308	39,563	319,744	132,220	249,536	25,473	18,360	26,363	
" 13	56,205	21.627	28,504	295,810	119,046	235,765	32,371	8,453	14,733	
** 20	43,960	14,222	27,980	271,836	107,106	217,278	19,486	2,282	9,491	
** 27	40,309	15,141	30,641	242.113	96,981	199,870	11,086	5,016	13,23	

The above statement shows—1. That the total receipts from the plantations since September 1, 1887, are 5,396,765 bales; in 1886-7 were 5,171,075 bales; in 1885-6 were 5,265,461 bales. 2.—That, although the receipts at the outports the past week were 30,641 bales, the actual movement from plantations was only 13,235 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the same week were 5,016 bales and for 1886 they were 11.086 bales. 11,086 bales.

AMOUNT OF COTTON IN SIGHT APRIL 27.-In the table below to them the net overland movement to Apr. 1, and also the takings by Southern spinners to the same date, so as to give substantially the amount of cotton now in sight.

	1887-88.	1886-87.	1885-86.	1884-85.
Receipts at the ports to Apr. 27	5,220,725	5,122,154	5,039,198	4,668,922
Interior stocks on Apr. 27 in excess of September 1	176,040	48,921	226,263	71,113
Tot. receipts from plantat'ns Net overland to Apr. 1 Southern consumpt'n to Apr. 1	5,396,765 855,124 349,000	720,395	682,645	
Total in sight Apr. 27	6,600,889	6,194,470	6,201,106	5,513,117
Northern spinners' takings to Apr. 27	1,547,421	1,433,967	1,541,487	1,210,382

It will be seen by the above that the increase in amount in sight to-night, as compared with last year, is 406,419 bales, the increase as comp red with 1885-6 is 399,783 bales and the increase over 1884-5 is 1,087,772 bales.

WEATHER REPORTS BY TELEGRAPH .- Our telegrams from WEATHER REPORTS BY TELEGRAPH.—Our telegrams from the cotton belt to-night denote that there has been a continua-tion of quite favorable weather conditions during the week. Planters are making rapid progress in putting in their seed. Beneficial rains have been quite general in Texas, but at a few other points rain is desired. *Halveston, Texas.*—Good rains have fallen on three days of the week, the rainfall reaching one inch and thirt en hun-dredths. The thermometer has ranged from 68 to 78, averag-ing 73

ing 73.

ratestine, Texas.-It has rained splendidly on three days of

ratestine, *Texas*, —It has rained splendidly on three days of the week, just as needed. Corn is growing finely and cotton is coming up. Average thermometer 69, highest 81 and lowest 56, and the rainfall reached one inch. *Huntsville*, *Texas*.—Both corn and cotton are doing well. Beneficial rains have fallen on three days of the week, the rainfall reaching eighty-five hundredths of an inch. The thermometer has averaged 74, the highest being 86 and the lowest 62. lowest 62.

Dallas, Texas.—We have had rain on two days of the week, the rainfall reaching fifty hundredths of an inch. Planting is active. The thermometer has averaged 71, ranging from 55 to 87.

San Antonio, Texas.—There have been splendid rains on four days of the week, and corn and cotton look very promis-ing. The rainfall reached two inches and forty-six hun-dredths. The thermometer has ranged from 60 to 79, averaging 71.

Luling, Texas.—It has rained magnificently on two days of e week, the rainfall reaching two inches and four hunthe

dredths. Corn is growing fast, and cotton has a good stand and looks well. Average thermometer, 74; highest, 31; lowest, 65

and looks well. Average thermometer, 74; highest, 31; lowest, 65.
Columbia, Texas.—Rain has fallen on one day, but not enough. More is needed. The rainfall reached seventeen hundredths of an inch. The thermometer has averaged 74, the highest being S4 and the lowest 63.
Brenham, Texas.—Rain has fallen on two days of the week, just as wanted, and crops are very promising ; the rainfall reached one inch and twenty-one hundredths. The thermometer has averaged 72, ranging from 64 to S6.
Belton, Texas.—Planting is making rapid progress and small grains are very promising. It has rained splendidly on four days of the week, the rainfall reaching one inch and eight hundredths. The thermometer has ranged from 61 to 80, averaging 71.
Weatherford, Texas.—Planting is active and grain crops promise a very large yield. Rain has fallen on one day of the week, just as needed, and to the extent of two inches. Average thermometer 71, highest 86 and lowest 52.
New Orleans, Louisiana.—We have had rain on two days of the week, the rainfall reaching sixty-eight hundredths of an inch. The thermometer has averaged 69.
Shreveport, Louisiana.—Rainfall for the week one inch and twenty-three hundredths. The thermometer has averaged 69.
Columbus, Mississippi.—There has been no rain all the week. The thermometer has ranged from 34 to 76, averaging 56.

Columbus, Massissippi.—There has been no rain averaging 56.
Leland, Mississippi.—The weather has been very dry. It was cloudy the latter part of the week, but no rain fell. Average thermometer 62.4, highest 80, lowest 44.
Greenville, Mississippi.—There has been no rain during the week. The thermometer has averaged 62, ranging from 47 to 79. Last week the weather was clear. The thermometer ranged from 49 to 83.
Clarksdale, Mississippi.—Telegram not received.
Vicksburg, Mississippi.—We have had no rain all the week. Average thermometer 68, highest 95, lowest 47.
Little Rook, Arkansas,—The weather has been fair to clear during the week, with light rain on one day, but too little to measure. Reports from various points indicate need of rain in this section. It is needed to sprout cotton and for the benefit of the small-fruits and berry crops. The thermometer has averaged 67, ranging from 43 to 84.
Heltna, Arkansas,—The weather has been dry and ccolduring the week with one shower. The rainfall reached nineteen hundredths of an inch. Farming is backward. Rain is needed. The thermometer 'has ranged from 46 to 82, averaging 62.

ing 62. Memphis, Tennessee.—We have had warm and dry weather all the week and rain is needed. Average thermometer 63, highest 82, lowest 43.

Nashville, Tennessee.—There has been rain on two days of the week, the rainfall reaching twenty-seven hundredths of an inch. The thermometer has averaged 56, ranging from 38 to 81.

Mobile, Alabama.—We had a severe local hail and rain storm on Monday, the rainfall reaching two inches and seventy-four hundredths. Planting makes good progress and is about completed on uplands. The thermometer has ranged from 50 to 80, averaging 65. Montgomery, Alabama.—The weather has been fine during

Montgomery, Alabama.—The weather has been fine during the week, with rain on one day to the extent of twenty-five hundredths of an inch. The thermometer has averaged 63, the highest being 82 and the lowest 44.

the highest being 82 and the lowest 44. Selma, Alabama.—We had a rain and hail storm on one day of the week, the rainfall reaching ninety hundredths of an inch. Average thermometer 60, highest 75, lowest 45. Auburn, Alabama.—We had light frost on Saturday night. During the week the rainfall has reached eight hun-dredths of an inch. The thermometer has averaged 61, the highest being 78 and the lowest 42. Madison, Florida.—Telegram not received. Macon, Georgia.—Telegram not received. Columbus, Georgia.—We have had no rain during the week. The thermometer has ranged from 50 to 76, averaging 64. Savannah, Georgia.—The weather has been pleasant during the week, with rain on one day to the extent of thirty-two hundredths of an inch. The thermometer has averaged 62, the highest being 80, and the lowest 48. Augusta, Georgia.—The weather has been clear and pleas-ant during the week with no rain. Light frost on the 25th, but no damage. Planting is approaching completion. Rain is wanted. The thermometer has averaged 61, ranging from 44 to 84. Augusta Georgia.—Telegram not received 44 to 84.

Atlanta, Georgia.—Telegram not received. Charleston, South Carolina.—Rain has fallen on one day of the week, the rainfall reaching four hundredths of an inch. The thermometer has averaged 62, the highest being 84 and the lowest 51.

Stateburg, South Carolina.—There has been no rain all the week and it is now needed. Cotton is coming up. One light frost, but no damage. Average thermometer 51, highest 82 and lowest 42. Columbia, South Carolina.—Rain has fallen on one day of

the week, the rainfall reaching one hundredth of an inch. The thermometer has ranged from 41 to 80, averaging 61. Wilson, North Carolina.—It has rained on one day of the week, the rainfall reaching twenty-seven hundredths of an inch. Average thermometer 55, highest 70 and lowest 38

INDIA COTTON MOVEMENT FROM ALL PORTS.—The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Apr. 26.

JUTE BUTTS, BAGGING, &C.—Only a light trade is being done in bagging, and the market is quiet. Prices are easy and dealers are quoting $5\frac{1}{2}$ c. for $1\frac{1}{2}$ lb., 6c. for $1\frac{3}{4}$ lb., $6\frac{1}{4}$ $6\frac{1}{2}$ c. for 2 lbs. and $6\frac{3}{4}$ @7c. for standard grades. Some small sales of jute butts are reported, but no inquiry is noted for large lots. Quotations are $1\frac{7}{3}$ @2c. for paper grades and 2@ $2\frac{1}{4}$ c. for bagging qualities.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 43,269 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph and published in

50

the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

BREADSTUFFS.

BREADSTUFFFS. FRIDAY, P. M., April 27, 1898. The flour market has been only moderately active and with-out salient feature of any sort. The check to the advance in wheat did not materially affect values, but reduced the volume of trade. Dealers are not inclined to carry full stocks when the warm weather is coming on. To-day the market was quiet, with some irregularity in values. The wheat market has been feverishly unsettled. Unfavor-able accounts have been published regarding the prospects of the fall-sown crop in the Ohio Valley and the lateness of the season in Europe has given a strong tone to foreign advices; but the bulls appear to have seen in these nothing more than favorable conditions for realizing. There was a large business for export to Lisbon on Wednesday, said to bedue to an advance of impost duties by Portugal, and red winter on the spot brought extreme prices—yesterday touching 97c. delivered— but generally business on the spot, which were firm. Indian corn was depressed by freer offerings early in the week, but yesterday showed renewed strength, on the more urgent demand from the regular trade. To day reports of fuller movement at the West caused an irregular decline.

THE DRY GOODS TRADE.

NEW YORK, Friday, April 27, 1888.

VOL XLVI.

The market for dry goods was tame and uninteresting the past week. At first hands the demand for both domestic and foreign fabrics was strictly moderate as regards transactions with buyers on the spot, but re-orders by mail and wire were somewhat numerous, and reached a fair aggregate amount. There was a constant search for "job lots" of staple and patterned cotton goods by wholesale buyers, but very little business was accomplished in this connection, because of the small stocks resting in the hands of the commission houses and at the mills. Owing to the backwardness of the season the retail trade has been somewhat disappointing to this date, and there was consequently a less active demand for reassort ments at jobbers' hands than has usually been witnessed at this stage of the season. There were some disturbing ele-ments in the trade. The house of Metcalf Bros. & Co., De-troit, Mich., has made an assignment, as have T. D. Blake & Co., woolen goods commission merchants of this city, and the knit goods concern of Clarke, Radcliffe & Co. (also of this city) has been financially embarrassed. There is, however, no ments at jobbers' hands than has usually been witnessed at

Co., woolen goods commission merchants of this city, and the knit goods concern of Clarke, Radcliffe & Co. (also of this city) has been financially embarrassed. There is, however, no reason to suppose that the financial condition of the trade at large is otherwise than perfectly sound. DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending April 24 were 2,818 packages, valued at \$201,199. These shipments include 853 to China, 343 to Hodeidah, 242 to Mexico, 900 to South America, 196 to the West Indies, 87 to Europe, 86 to Central America, 77 to British Guiana, and 34 to all other countries. Since the 1st of January the exports aggregate 51,214 packages, valued at \$3,089,351. Of this total China has had 21,408 packages, valued at \$1,079,514 and 9,366 packages, valued at \$624,277, have gone to South America. For the similar period of 1887 the exports to all ports were 70,064 packages, valued at \$4,004,390; of which 39,514 packages, valued at \$1820,275, went to China; and 11,846 packages, valued at \$1820,275, went to China; and 11,846 packages, and in 1885 were 52,209 packages. At first hands the demand for staple cotton goods was light and irregular, and the jobbing trade was sluggish, but there was a better undertone in the market, shrewd buyers having discovered that there are very few surplus stocks in the hands of the commission houses. market, shrewd buyers having discovered that there are very few surplus stocks in the hands of the commission houses. Prices of brown, bleached and colored cottons are for the most part steady and without quotable change, the near approach of the demand for next season having rendered the mill agents firmer in their views. Print cloths were in fair demand and steady at last week's quotations—say $3\frac{1}{2}c$. for 64x64sand 31.16c. for 56x60s. Stocks last Saturday and for the three previous years were as follows:

			pril 25.
	77.000	87.000 4	445.000
		33,000 :	355,000
			324,000
Outside speculators (est) 4,000 5	50,000	15,000	275,000

Total stock (pieces)...... 60,000 322,000 370,000 1,399,000 Printed calicoes ruled quiet, and there was a steady though moderate business in printed and woolen cotton dress fabrics, white goods, table damasks, quilts and scrims, at unchanged prices.

DOMESTIC WOOLEN GOODS.—The movement in heavy-weight clothing woolens, on account of back orders, was of fairly good proportions, but the current demand was light and disclothing woolens, on account of back orders, was of fairly good proportions, but the current demand was light and dis-appointing to the mill agents, new business in fancy cassi-meres, suitings, worsteds, cheviots, overcoatings, &c., having been confined within very narrow limits. Specialties in cloak-ings were in very fair request, and a moderately good trade in Jersey cloths and stockinets was done by some of the com-mission houses. For saturets, Kentucky jeans and doeskins there was only a moderate demand at first hands, but stocks are so well in hand that desirable makes are steadily held by agents. Seasonable dress fabrics ruled quiet, but some very fair orders for all-wool and worsted goods adapted to the fall trade were placed (for future delivery) with the mill agents. Flannels and blankets have met with rather more attention, but actual transactions were light in the aggregate, and there was only a moderate inquiry for carpets, wool hosiery and heavy underwear. FORETION DRY GOODS.—The situation in the market for imported fabrics has not materially changed. The retail trade has not realized expectations, owing to unfavorable weather conditions, and the demand for reassortments at the hands of importers and jobbers was consequently light. Some pretty good orders for fall dress fabrics, as cashmeres, Henrietta cloths, serges, &c., were placed with importers, but season-able dress goods ruled quiet. Ribbons were fairly active, but silks, satins, velvets and plushes, ruled quiet, and the demand for other foreign goods was chiefly of a hand-to-mouth char-acter.

acter.
