THE

# **NEW YORK LIFE INSURANCE COMPANY**

Begs leave to announce that its Twenty-Year Tontine Policies, issued in 1872, are now maturing, with the following results:

1.

 Ordinary Life Policies are returning from 20 to 52 per cent in excess of their cash cost, according to age of insured. (See example below.)

2. Twenty-Year Endowment Policies are returning from 58 to 71 per cent in excess of their cash cost, according to age of insured. (See example below.)

 Limited Payment Life Policies are returning from 43 to 141 per cent in excess of their cash cost, according to age of insured. (See example below.)

# EXAMPLES OF MATURING POLICIES.

Policy taken at Age 43, \$2,000; Cost, \$1,402; Cash Value, \$1,757 76
 Policy taken at Age 30, \$5,000; Cost, \$4,853; Cash Value \$8,238 45

3. Policy taken at Age 37, \$10,000; Cost, \$7,166; Cash Value, \$'0.338 40

THESE RETURNS ARE MADE TO MEMBERS AFTER THE COM-PANY HAS CARRIED THE INSURANCE ON THE RESPECTIVE POLICIES FOR TWENTY YEARS.

II.

1. Persons insured under Ordinary Life Policies may, in lieu of the above cash values, continue their insurance, at original rates, and receive CASH DIVIDENDS of from 71 to 115 per cent of all premiums that have been paid, and annual dividends hereafter as they accrue. (See example below.)

2. Persons insured under Limited Payment Life Policies may, in lieu of the above cash values continue their insurance, without further payments, and receive CASH DIVIDENDS of from 67 to 163 per cent of all premiums that have been paid, and annual dividends hereafter as they accrue. (See example below.)

# EXAMPLES OF DIVIDENDS.

- Policy (see above) may be continued for the original amount at original rates with annual dividends, and the accumulated dividends, amounting to \$980 62, may be withdrawn in cash.
- 2. Policy (see above) may be continued without further payments, receiving annual dividends, and the accumulated dividends, amounting to \$4,820 30, may be withdrawn in cash.

Persons desiring to see results on policies issued at their present age, and further particulars as to options in settlement, will please **address the Company** or its Agents, giving date of birth.

### III.

The Management of the Company further announce, that :

- I. THE COMPANY'S NEW BUSINESS FOR 1891 EXCEEDED \$150,000,000.
- 2. ITS INCOME EXCEEDED THAT OF 1890.
- 3. ITS ASSETS AND INSURANCE IN FORCE WERE BOTH LARGELY INCREASED.
- 4. ITS MORTALITY RATE WAS MUCH BELOW THAT CALLED FOR BY THE MORTALITY TABLE.
- 5. A DETAILED STATEMENT OF THE YEAR'S BUSINESS will be published after the Annual Report is completed.

All cities, 1 day	226,409,816	214,971,012	+5.3		
Total all cities for week	\$1,352,682,483	\$1,237,700,287	+9.3		

The full details of clearings for the week covered by the above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the various clearing houses at noon on Saturday, and hence in the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night. Below are our usual detailed figures for the previous week, that is covering the returns for the period ending with Saturday noon January 9, with the comparative totals in 1891.

The aggregate for the opening week of the new year is a very satisfactory one, the increase over the last previous full week-that ending December 19-reaching over two hundred and eighty-six millions of dollars, of which two hundred and thirteen million is at New York. Speculation in share properties at the New York Stock Exchange has been active. 1

The comparison with the corresponding week of the previous year is the most favorable in many months, the gain in the total for the whole country being 28 per cent, while outside New York the increase reaches 16 per cent. In some cases the ratio of excess over 1891 is very marked, notably at Waco, New York, Minneapolis, St. Paul, Omaha, Des Moines, Lincoln, Baltimore, Springfield and Syracuse.

# STATE AND CITY DEPARTMENT.

See pages 128, 129, 130, 131 and 132 for our State and City Department to-day. Among other matters of interest will be found the "Fourth Article" on Laws of Kansas Affecting Municipal Debt.

All advertisements with relation to State and City Bonds will likewise be found on the same and following pages.

### THE FINANCIAL SITUATION.

We get a little light this week upon the foreign exchange problem. It may suprise the reader to know that it is a kind of light which seems to make the solution less, rather than more, obvious. All through December the common formula among bankers, when attempting to account for the material advance in the rates, has been to attribute it in part to the engagements maturing at and about the end of the year, but largely to a lack of commercial bills because of smaller exports. This week the Bureau of Statistics has issued its usual preliminary statement showing the exports in December of the leading articles of breadstuffs, provisions, cotton, &c., and we give the figures below with previous years for comparison. These official data disclose the remarkable result that instead of a falling off from the unprecedented totals of the previous months there is actually an increase. Remember too what the trade situation was when the month of December started-that on the entire movement the merchandise balance for November had reached the unprecedented total of \$45,511,000, while for the months of September, October and November 1891 the favorable balance was \$102,902,000. To such a trade situation add now the new fact which, as stated, has just been made public, that the December exports of leading articles aggregate \$91,725,073, against \$87,709,216 in November (that is over 4 million dollars more than in the month when our total trade balance reached 45 million dollars) and \$74,185,219 (that is over  $17\frac{1}{2}$  million more than) in December 1890. We do not anticipate that the merchandise balance on the whole trade for December will make quite as favorable an exhibit as for November, on account of increased imports; but even if that be so it will be large enough for December, and judging from present appearances for January also, to indicate that the course of the foreign exchange market is wholly out of accord with the foreign trade movement, and cannot be accounted for by any surface reasons.

Money continues to flow copiously into our Clearing House banks. Both Treasury transactions and the interior movement are adding to the supply. Last week, though the gain in surplus reserve was not large, the average gain reported in actual reserve was over  $4\frac{1}{2}$ million dollars, and no doubt that result was made up on rising averages. We notice, however, that though the surplus was returned at \$18,961,125, five of the largest banks held \$8,481,800, and if we add the reserves of two of the uptown institutions, whose business is chiefly commercial, we find in the seven banks \$11,433,400, which indicates that while the remainder are doubtless well supplied, the margin is comparatively small and quite manageable. About the only feature in the market for money this week has been a fairly good inquiry on call from commission houses who are for the present indisposed to secure time contracts, preferring to wait until the engagements they can make reduced short to 4 86, and yesterday Brown Bros. & Co.

will carry them further along in the year before maturing.

Money on call, representing bankers' balances, loaned this week at 3 and at 1 per cent, averaging 21 per cent; renewals were made at 3 per cent. Banks and trust companies maintain 3 to 4 per cent, chiefly for the reason that loans by these institutions, though subject to call, usually remain undisturbed for an indefinite period, and are therefore practically short-time loans. On time the supply of money offering is large, but the demand is light, for the reason already stated. Rates are 3 per cent for thirty days,  $3\frac{1}{2}$  per cent for sixty to ninety days, 4 per cent for four months and 41 per cent for five to six months on good Stock Exchange collateral. Commercial paper continues in good demand, as indeed it has for the past six weeks, and the inquiry comes from all quarters, including this city. The supply is surprisingly small considering the season, and although a great deal is placed, there is no accumulation of first-class names. Lower grade paper does not meet with much favor, but there is a good supply. Quotations remain at  $4\frac{1}{2}$  per cent for sixty to ninetyday endorsed bills receivable,  $4\frac{3}{4}$  to  $5\frac{1}{4}$  for four months commission house names, and 5 to 6 for good single names having from four to six months to run.

The cable reports discounts of sixty to ninety day bank bills in London 13 per cent. The open market rate at Paris is 23 per cent, at Berlin it is 2 per cent and at Frankfort 24 per cent. The discount rate of the Bank of Germany was reduced on Monday to 3 per cent from 4 per cent. The London market was depressed on Thursday on news of the death of the Duke of Clarence. It is reported that large parcels of the last Russian loan have been offered on the petite bourse in Paris, indicating that the Russian finance minister has been seeking to dispose of part of the residue of the loan through Paris agents. By cable it was stated on Thursday that there was a rumor that Russia would remove the prohibition of the export of wheat early in April, and yesterday the wheat market at Liverpool was 2d to 3d lower on these rumors. The Bank of England gained £286,000 bullion during the week. This, as we are advised by special cable to us, was due to an import principally from Portugal and Brazil of £125,000, to the receipt of £484,000 from the interior of Great Britain, and to the export to the Argentine Republic (£313,000) and to Russia (£10,000) of £323,000. The Bank of France gained £5,000 gold and the Bank of Germany since the last report shows an increase of about £470,000 of this metal.

Foreign exchange was firm this week until Wednesday, when by reason of a lighter demand the tone grew easier, and so closed yesterday with the reduction in nominal rates noted below. There is a good mercantile demand for remittance, and also a good inquiry to pay for securities sold here for European account. One banker tells us that the selling of securities was large toward the end of last year, and that this movement has continued in January, holders being disposed to take their profits. The arbitrage operations proper just about balanced each other the latter part of last month and also this month until this week when they were on the whole rather against us than otherwise. Compared with the close last Friday there was an advance by Brown Bros. on Monday to 4 84 for long, and by Baring, Magoun & Co. to 484 for long and  $4.86\frac{1}{2}$  for sight. No change was made for the remainder of the week until Thursday when Baring, Magoun & Co.

### JANUARY 16, 1842.1

THE CHRONICLE.

reduced long to  $4.83\frac{1}{2}$  and short to  $4.85\frac{1}{2}$ . Rates at the close stood at 4 83 to 4 84 for long and 4  $85\frac{1}{2}$  to 4 86 for short. Rates for actual business were  $4.82\frac{3}{4}$  to 4.83for sixty-day, 4 843 to 4 85 for sight, 4 851 to 4 851 for cable transfers, 4 81<sup>3</sup>/<sub>4</sub> to 4 82 for prime and 4 81<sup>1</sup>/<sub>4</sub> to 4 811 for documentary commercial bills. The La Bourgogne came in on Monday with \$172,800 gold to Lazard Freres. The following is the statement of exports of breadstuffs, cotton, etc., issued by the Bureau of Statistics this week and which we have referred to above.

\* Including cattle and hogs.

The Chesapeake & Ohio, which during the last year or two has developed into an important property, has arranged, it appears, to absorb the Elizabethtown Lexington & Big Sandy and the Ohio & Big Sandy, and proposes at the same time to make a readjustment of its securities so as to furnish capital for present and future requirements and eliminate the two classes of preferred stock, leaving the common as the only outstanding issue of stock. The proposition is to give the first preferred stock new  $4\frac{1}{2}$  per cent bonds for twothirds of its amount and common stock for the other third, while the second preferred stock is to receive the bonds for one-third of its amount and common stock for the other two-thirds. The proposition will probably be regarded favorably by the preferred shareholders, as it will give them an interest-bearing security for at least part of their holdings, the preferred shares having thus far received no dividends, though the first preferred shares may be assumed to have been near the dividend point. The operation of course does not increase the total capitalization, only replacing some of the stock with bonds, but does increase the total of obligatory interest charges; still earnings have been growing in a very rapid way, and the prospects look very encouraging, so that the managers, who are careful, conservative men, evidently feel that the additional charge will not impose a burden that cannot easily be borne; moreover, dividends on the first preferred shares, as said, were already in sight. As to the acquisition of the additional road, it may safely be accepted as a fact that the managers see a way of utilizing it to advantage. The Ohio & Big Sandy runs south from Ashland, Ky., to Richardson, Ky., and the Lexington & Big Sandy runs west from Huntington, W. Va., to Lexington, Ky. The Lexington road formed a link in the through route to Cincinnati before the Chesapeake & Ohio built its Ohio extension, and the opening of this extension by depriving the road of the through traffic led to a falling off in its earnings. The road, however, also forms part of a line to Louisville, and even from a local has net of \$165,489 against \$148,579, the earnings of the

Chesapeake & Ohio, particularly in the further development of the coal traffic. Under the arrangement entered into the 6 per cent bonds of the Lexington & Big Sandy will be replaced by Chesapeake & Ohio 44 per cents, thus effecting a saving to that extent.

The New York State Board of Railroad Commissioners have this week submitted their annual report to the State Legislature, and among other things make interesting observations bearing on the construction of unnecessary new mileage and the prohibition of pooling. They renew their previous recommendations that the State regulate the construction of new lines, so as to prevent the unnecessary duplication of railroads, and repeat the arguments in favor of such a course given in former reports. The experience attending the building of the West Shore has probably made paralleling schemes on a large scale unlikely for many years to come, and yet the position taken by the Board is sound and correct. If the State assumes to regulate the roads after they are built, there is no reason why it should not assert its authority a little earlier in the process. The view of the Commission is that the building of a road should not be permitted without a declaration upon the part of the State that there is a public necessity for it. As the Board well urges, the obligations of the State to existing corporations should not be lost sight of, and while compelling them to perform their duties it should at the same time protect them from destructive competition by roads whose construction in no way serves to promote the public convenience. As regards the prohibition of pooling by the Inter-State Act, they state that while no general rate wars have occurred during the twelve months, yet this prohibition renders it very difficult to maintain stable rates as between competitive lines. The Commissioners also express the opinion that such prohibition and the long-and-shorthaul clause of the Act have stimulated the previously existing tendency to consolidation and the absorption of the weaker lines by the stronger. It will be well for Congress, in its consideration of the matter, to give due weight to what our New York Board have to say on the subject, for they are certainly competent to speak on it.

On another page we review at length the returns of railroad gross earnings for the late calendar year. The exhibit is found to be quite encouraging, and the statement for December particularly proves to be very good. We may say that for the first week of the new year the showing is also satisfactory, the aggregate of the 62 roads tabulated in another place for that week indicating an increase over the corresponding week of 1891 of 7.59 per cent. The Northern Pacific continues to fall behind, and some of the Southern roads also are not doing as well as could be wished. On the whole, however, the comparisons are satisfactory as said. As regards net earnings the Union Pacific is the only large road which has furnished a statement this week. The figures cover the month of November and reflect large and noteworthy improvement. Gross receipts, it appears, increased \$273,781, and at the same time there was a reduction of \$371,443 in expenses, thus affording a gain in net of no less than \$645,224. The Flint & Pere Marquette for the same month reports net of \$69,507, against \$65,407, the Milwaukee & Northern \$76,434, against \$46,014, and the New York Ontario & Western \$55,634, against \$49,111. For December the Nashville Chattanooga & St. Louis standpoint can probably be made a useful feeder to the 'Western & Atlantic being included for 1891; the San

Francisco & North Pacific has net of \$10,985 against \$7,739; the Jacksonville Tampa & Key West \$33,810 against \$28,213; and the Cape Fear & Yadkin Valley \$12,403 against \$18,114.

The course of prices on the Stock Exchange, though somewhat irregular, has on the whole been downwards this week. There has evidently been considerable selling to realize profits, and there has also been more or less short selling. Under the pressure prices have receded. Still the tone continues quite confident and the decline is looked upon as a natural reaction. The downward movement was accelerated early in the week by reports that trouble would develop at the meeting of the Western Traffic Association, which reports hardly proved well founded. The Chesapeake & Ohio stocks have been exceptions to the decline, being favorably influenced by the arrangements referred to above. Chicago & Northwestern has also manifested strength, and closes higher than a week ago. Northern Pacific securities have been weak on the continued decline in earnings.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of currency and gold by the New York banks.

## OUR CURRENCY—ITS INCREASING VOLUME.

The first meeting of the Coinage Committee of the House of Representatives, which was held this week, was not an encouraging event. Our legislators showed that they had learned nothing during the vacation, but were under the influence of the same old spirit and the same old purpose still. Yet there is, we think, no need for taking trouble about the passage of a free-coinage measure-it may be agitated and disturb business, but the success of such a bill cannot be anticipated ; the incidents of the meeting and the spirit disclosed are none the less trying however as indicating how very slowly some public men develop. A more pressing matter is the growth in the volume of our circulation under present laws, a growth which the statement made up the first of the year discloses. The total strikes one as large enough to satisfy any inflationist or any devotee of paper. Here is the statement prepared in our usual form.

CIRCULATION IN	THE UNITED	STATES JANUARY	1 1892.

Total currency...\$1,588,781,729 \$159,908,165 \$1,748,684,894 How strange it is that the quantum of currency the country contains, the per capita allowance it possesses, are matters about which a large body of our people should be perpetually distressing themselves. Experience teaches that no poor man either in the East, West or South has secured any of the addition which the Government has for years been making. We all got our wages before these new supplies were afloat, and we get only our wages now. About  $4\frac{1}{2}$  millions of new notes were turned out every month in 1891 and about 41 millions more a month will, we presume, be turned out in 1892. Who among the nation's workers is any richer or has any well-grounded hope of being any richer because of this outflow?

Nor is this the experience of individuals alone; whole districts of the country are being similarly taught. We all hear of these copious supplies of currency being put afloat, but do those sections which need currency most get any ? It is said, and it is no doubt true, that the deposits in our New York City banks are larger now than ever before; money has become a drug, and those having it are absolutely eager to find borrowers at almost any interest rate. At the same time our letters from the South and largely from the West tell of a scarcity of funds and of an entire lack of capital flowing into those active, busy neighborhoods-no demand for lots, no enterprise of any kind apparent. Indeed, the scarcity has become so marked in so many quarters while here such a plethora is in sight, one can hardly help exclaiming that to those who had, has been given until the supply they hold is oppressively abundant, while from them that had not even that which they had has been taken away.

Furthermore the same lesson which we are being taught now, that enterprise and prosperity are not the accompaniment of mere currency enlargement, is a very old principle acknowledged the world over and one which all our financial history has been illustrating. The United States on the first of January 1892 had in active circulation \$1,588,781,729 of currency; the Government estimates the population on that day at 64,680,000; consequently the per capita currency in circulation January 1 1892 was \$24.56. On the first of January 1879 when we resumed specie payments, the circulation in the hands of the people was only \$816,266,722 and only \$942,452,459 on Jan. 1 1880; the Census gave the population in 1880 at 50,155,783; consequently the per capita circulation Jan. 1 1879 was not far from \$16.27 and on Jan. 1 1880 was only \$18.79. To most of our readers these figures are familiar, and yet they cannot be repeated too often, for the truth they unfold is one which appears still to need repeating, that the period of greatest prosperity this country ever enjoyed was not accompanied with a large per capita circulation. If any one needs to be reminded of the degree of prosperity at that time enjoyed, he has only to look

\* All the trade-dollar bullion has been converted into standard dollars, the coinage having been completed December 22 8 1.

at the little table of failures we published last week in our article on that subject. The proportion of failures to the number in business was only 1 in every 158 in 1880, 1 in every 140 in 1881 and 1 in every 122 in 1882. We have seen nothing of that kind since the year last named; the per capita currency has been growing every year and yet the best record that table gives after 1882 is 1 failure in every 103 in 1887 and 1 failure in every 102 in 1890.

What more can our people need to demonstrate the unsoundness of our currency policy? We find that poor men are not getting richer, that needy districts are not getting more currency, that the period of greatest prosperity the United States ever enjoyed was concurrent with the smallest volume of currency we have ever had, and that industrial health (as measured by the death-rate in the list of failures) is deteriorating while this process of increasing the per capita circulation is being persistently pursued. But let us go one step further. Look at our country to-day. There never was a land more blessed in material things than these States at the present moment. What crops we have raised ! The mere marketing of the surplus has lifted the whole carrying industry up from a state of unusual depression into a state of unusual prosperity. We are selling to the outside world all we have to spare at good prices, and just as rapidly as we can hurry our products to the seaboard. Can any one suggest why under these stimulating circumstances enterprise is paralyzed and our industries stagnant? Let Mr. Louis R. Ehrich of Colorado Springs (whose recent address we remarked upon two weeks since) speak for the Western section. Referring to Colorado, he says : "Development in this "State is temporarily paralyzed. No money comes "here for investment. Business is dull. Land attracts "no purchasers. We are being injured more every "month than a 33 per cent bounty on Colorado silver "would benefit us in a year. We are dragging the name of Colorado in the dust. We are besmirching "the reputation of the State. Colorado is being "branded in the East as the home of inflationists and "silver lunatics."

What is here said by Mr. Ehrich about the dulness of trade and the stoppage in the flow of capital to that rich State of Colorado is substantially true of every other section. These great deposits in the New York City banks simply reflect that fact. Capitalists will not let their money go out of their reach; they refuse to put it in any form of investment not easily convertible. So there it stands, the largest aggregate the banks ever held, a monument to its own timidity and a satire on a currency policy that keeps all this capital out of reproductive industry.

# PHILADELPHIA & READING REPORT.

No one interested in the Philadelphia & Reading property has any reason to find fault with the results of operations for the late fiscal year as disclosed by the annual report submitted this week. These results are gratifying in the extreme. The company has earned a large surplus over and above its obligatory charges for interest, rentals, &c., whereas in the previous year there was no surplus at all; as a consequence the holders of the first preference income bonds are to get the full 5 per cent for the twelve months to which they are entitled and even the second preference bondholders get as much as 4<sup>‡</sup> per cent. The prospect appears to be bright, too, for further improvement in the future, if we may judge from President McLeod's review of the situation.

The Reading is an anthracite coal property, and as all know has had many violent ups and downs in its eventful career. These fluctuations have generally been directly connected with the condition of the anthracite coal trade, where periods of depression and prosperity have frequently and quickly succeeded each other. Thus it would happen that when the coal trade was very prosperous the Reading would be able to make a strikingly good statement, while the very next year with the coal trade in an unsatisfactory state the showing would be very poor again. Should the present favorable exhibit therefore be the result of one of these spasmodic changes, having its origin in the facts stated, it would of course be deprived of much of its significance, for the outcome would in that event be qualified by the cir ; cumstance in question. A fair view however does not seem to warrant such an assumption in this instancecertainly not without important limitations.

It is true that the amount of coal mined in 1891 by the various companies reached a large aggregatelarger than ever before in the history of the anthracite trade-and it is also true that the Reading's tonnage was much in excess of the previous year. But with all that the year was nevertheless not a prosperous one in the ordinary acceptation of the term, for though the tonnage was large prices were far from satisfactory. Hence, while the Reading had the advantage of a heavy tonnage it did not have the further advantage of high prices for its coal, and as the company is a producer as well as a shipper of coal, it is easy to see that the one factor counts for as much as the other. Moreover, the causes of the increase in its tonnage, we must believe, are found in great measure outside of the general condition of the trade, being a natural result of the increased facilities provided, the improved position of the property, physically and financially, and the policy of the management in seeking to secure to the company a permanently larger share of the business. In other words, it is a question whether the Reading's tonnage for the reasons given would not have gained anyway, even if the total amount of coal mined by the several producers had not reached unprecedented figures.

It is important to bear this view of the matter in mind in seeking to interpret the results revealed by the report. A year ago, in fact six months ago, hardly any one would have dared to predict results sufficiently favorable to warrant dividends on both the first and second incomes, seeing that in the year preceding, as already stated, the accounts showed nothing earned for either class of bonds. In July last the first incomes sold here at  $48\frac{1}{4}$ ; now the price is 75. And the second and third incomes have had an equally marked rise. The surplus for the twelve months (out of which to make income interest) is reported at \$1,864,961, or just about the amount required for the dividends declared, so that the intention evidently has been to give the bondholders the full amount shown to have been earned. The surplus is arrived at after allowing for the usual sinking funds for the divisional mortgages of the Coal & Iron Company, and after deducting \$310,380 for equipment dismantled. This is of course on the operations of both the Railroad Company and the Coal & Iron Company. For the previous year the accounts, if made up in the same way, show a deficit of \$230,184, though there were some exceptional items of charges at that time.

The difference in favor of the late year, it will be seen, is over two million dollars. In net earnings the improvement has actually been nearly 25 million dollars-that is to say, while the combined companies in the fiscal year 1890 earned only \$8,114,104 net, in the fiscal year 1891 the amount of their net rose to \$10,417,145. Of the increase of \$2,303,040, only \$633,824 comes from the Coal & Iron Company, the remaining \$1,669,216 coming from the operations of the Railroad Company. The Coal & Iron Company's increase was made on a gain of \$2,381,961 in gross receipts, demonstrating that there was a heavy addition to expenses coincident with the increase in business. In the case of the Railroad Company, however, we have a gain of \$944,659 in gross earnings attended by a decrease of \$724,557 in expenses. This is so different from the course of things on other roads as to require an explanation, and President McLeod states that the ability of the company to handle an increased traffic at a less cost "is due to economies resulting from the expendi-" tures made for improvements and facilities especially " pointed out in the last annual report, and furnishes " an early demonstration of the wisdom of the policy " outlined at that time." We are also told that notwithstanding the saving in expenses, "the property " has been improved in all its branches, both in condi-" tion and efficiency."

Charges to capital account during the year for " bet-"terments and additions of a more permanent nature" were \$505,004, and \$1,268,465 was spent for new cars and locomotives, making the total charge to capital account \$1,773,469. In the previous year among the charges of this nature there was one of \$447,585 for the Coal & Iron Company. A foot-note in the present report states that similar expenditures in the late year were charged to operating expenses and taken out of income, allowing for which fact the improvement in net results would be even more marked than indicated above. Mr. McLeod says the Reading is practically free from floating debt, the bills payable of \$1,150,000 reported in the balance sheet representing notes given to secure advances for constructing the line to Port Reading and building other new roads. When these roads, he goes on, sell and realize upon their securities, so much of the proceeds as may be required will be used to take up the notes, thus canceling the debt. He also announces that arrangements have been completed to provide for the company's future needs for new equipment and additional property by the issue of \$10,000,000 collateral trust bonds. The proceeds " will be expended only for improvements and addi-"tions to the present mortgaged estates. All new " lines and extensions will either be of sufficient " importance to provide the necessary funds indepen-" dently, or their promotion will not be undertaken by "the company. Within six years, and before the " maturity of this loan, there will have been liberated " under the plan of reorganization an equal amount of " general mortgage 4s applicable to these purposes " under the mortgage." In this way the company will be given the capital it needs for the purposes mentioned " without unduly burdening the current income, " and at the same time carry the business successfully " through periods of depression, should any occur."

In reference to the position of the management regarding the company's share of the coal traffic, it is stated that while there has been a considerable increase in tonnage, the revenue from the anthracite traffic has not yet reached the proportions to which the

The concessions made by company is fairly entitled. the Board to preserve harmonious relations with other companies "continue to be out of proportion to the "capacity of the collieries, the amount of capital in-"vested in both productive and undeveloped coal lands, "and the facilities possessed for the distribution of coal " in the markets, as compared with those of the other "coal-carrying roads. Your Board has never questioned "the policy of making due concessions to competitors, "who with yourselves are engaged in producing a "commodity far in excess of the demand of the "markets, but the proportion of the business allotted "to this company in years past, when its financial "straits and lack of facilities did not permit it to mine "and distribute its fair proportion of the increase of "tonnage, must not be taken as the measure of the " business to which it is entitled in the conditions which "now prevail since its reorganization and rehabilita-"tion."

It is further pointed out that the completion of the line to Port Reading on the Arthur Kill will give the company increased facilities for the distribution of coal in New York harbor; that the Coxe Brothers' tonnage will add a million tons a year to the company's traffic; that a contract with another coal estate will add 300,000 to 400,000 tons; while at the same time new, improved and enlarged facilities have been provided for the distribution of coal in New England and the West. In extent the Reading coal lands, the report remarks, comprise about 33 per cent of the entire anthracite coal fields of Pennsylvania, but, allowing for the thickness of the veins, the company has fully 50 per cent of the deposits of coal unmined. The operations of the mines at present, it is stated, are confined to an area of less than one-third of the company's coal estates; "the remaining two-thirds-" 66,000 acres-will admit of an unlimited increase for " an indefinite period." Altogether, Mr. McLeod presents very strong arguments in favor of the Reading's claim for an increased allotment. As illustrating the magnitude of the company's operations, reference is made to the fact that there are 16,783 men on the pay-roll of the Railroad Company and 24,754 in the employ of the Coal Company, and this army of 41,537 men received in wages in the late year \$18,237,263. The gross receipts of the combined companies attained the large sum of \$44,422,844.

# RAILROAD GROSS EARNINGS FOR DECEMBER AND THE YEAR 1891.

In reviewing railroad gross earnings for the late calendar year, a very natural observation is that the outcome has proved a great deal better than was supposed likely at the beginning of the year. The country's bountiful harvests afford an explanation of the good returns for the closing months, but even in the earlier part of the year the results greatly exceeded expectations. Still the crops worked a complete change in the aspect of things, so that the contrast between the outlook at the opening and that at the end of the year was marked and noteworthy.

The influences bearing on the year's traffic and revenues are fresh in the minds of our readers, and hence we shall refer to them here only very briefly. In the first place, the comparison being with 1890 was with a year of extraordinarily favorable earnings, the array of strikingly large gains by leading companies for that year having been simply unprecedented, the Pennsylvania lines East and West, for instance, having gained nearly nine million dollars, the Atchison and San Francisco  $5\frac{1}{2}$ million dollars, etc., etc. Altogether our statement prepared shortly after the close of the year showed a gain of over 70 million dollars. This improvement followed directly as the result of the good crops raised in 1889 and the great industrial activity occasioned thereby during 1890. Not alone, however, was the circumstance as to the comparison unfavorable to the late year, but the conditions in 1891 were widely different. The 1890 crops had proved short, making a falling off in the grain traffic during at least the early part of 1891 inevitable over many roads. Then there came industrial depression, the strike in the Connellsville coke region, the prostration of the iron industry, the falling off in ore shipments, the great decline in the price of cotton with resulting depression at the South, and on the Pacific Coast also there was a reaction from the previous era of buoyancy, the lumber trade particularly being reported in an unsatisfactory state. Of course the great crops with which the country was blessed later in the year proved a fortunate circumstance, and exerted an immediate beneficial influence, but in many sections the conditions remained unfavorable to the end.

It is this state of things that gives especial significance to the encouraging character of the exhibit for the year. It is needless to say that the returns of some of the roads reflect the presence of the depressing factors mentioned. Taking the roads as a whole, however, and judging solely from the final aggregates, one not familiar with the facts might suppose that the leading conditions had been favorable rather than the reverse, for there is in these aggregates no evidence of the many adverse influences which distinguished the year. We are able to present a very comprehensive statement, thus giving added value to the results disclosed. We have returns for the full twelve months from 148 roads, operating 98,779 miles of line at the end of 1891 against 96,311 miles at the end of 1890. These 148 roads earned \$562,098,962 gross in 1891 against \$528,943,718 in 1890, showing an increase of \$33,155,244. These roads, however, are simply those which furnish early returns. In addition, we have returns for eleven months of the year from 53 roads whose figures for the final month will not be given out till some weeks hence. These 53 roads earned \$378,-357,135 on 41,935 miles in the eleven months of 1891 against \$367,659,293 on 41,048 miles in the eleven months of 1890. By combining the two sets of figures we get an aggregate of \$940,456,097, covering 140,714 miles, for 1891, against an aggregate of only \$896,603,-011, covering 137,359 miles, for 1890. In other words, we find an improvement of no less than \$43,853,086. In ratio the increase is 4.89 per cent. Here is the statement in tabular form :

	Gre	Miles of Road End of Period.			
	1891.	1890.	Increase.	1891.	1890.
148 roads full year 53 roads 11 months	\$ 562,098,962 378,357,135	\$ 528,943,718 367,659,293		98,779 41,935	96,311 41,048
Grand tot. (201 rds).	940,456,097	896,603,011	43,853,086	140,714	137,359

It is unnecessary to direct attention to the magnitude of these totals for they are so large as to speak for themselves. We may point out, however, that the figures have the additional merit of promptness, only half a month having elapsed since the close of the year.

In reference to the favorable nature of the comparison —the increase of \$43,853,086 for 1891 following, as already said, an increase of  $70\frac{1}{2}$  millions last year—it is perhaps proper to state that the firm maintenance of rates contributed in no small measure to the result. There were no very serious disturbances between the roads. In the West rates had in many instances been advanced towards the close of 1890, and as a rule they were firmly held at these figures during 1891.

We referred above to the very heavy gains made in 1890 by many separate roads. While for 1891 we have no gains of the magnitude of those that year on the Pennsylvania and the for Atchison, yet the list is a very extended one, and embraces many increases of striking proportions. The New York Central heads the list with a gain of over four million dollars (\$4,059,181), the earnings of the Rome Watertown & Ogdensburg being included in the comparison for both years. The Canadian Pacific comes next, with \$3,176,966; then the St. Paul has \$3,050,007 gain, the Atchison (with the San Francisco) \$2,340,213, the Great Northern \$2,229,640, the Chesapeake & Ohio \$1,099,476, the Louisville & Nashville \$1,091,773, and a whole host below a million in amount. Among the roads which have reported only for the eleven months, the Philadelphia & Reading, with the Coal & Iron Company, has \$3,038,325 gain, the Southern Pacific \$2,045,094, the Illinois Central \$1,633,328, the Erie \$1,220,006, and a good many others less than a million. The following is a full list of all gains above \$100,000 in amount for both periods, and also all losses above that amount.

\* The Western lines of the Pennsylvania are not included in our final tables, as the company has reported only the loss from last year -not the earnings in either year.

It will be observed that the losses are not very numerous for either period. They comprise for the eleven months only the Western lines of the Pennsylvania, with \$810,558 decrease; the Union Pacific, with \$986,397 decrease; the Burlington & Quincy, with \$486,957 decrease, and the Oregon Improvement, with \$238,937 decrease. For the full year eleven systems have more than \$100,000 decrease. The Grand Trunk of Canada comes first, with \$422,885; the Denver & Rio Grande second, with \$413,568; then the East Tennessee, with \$398,864; the Milwaukee Lake Shore & Western, with \$320,854; the Memphis & Charleston, with \$226,918; the Grand Rapids & Indiana, with \$215,520; the Mexican Railway, with \$167,254; the Cincinnati New Orleans & Texas Pacific system, with \$136,593; the Kansas City Fort Scott & Memphis, with \$132,955; the Texas & Pacific, with \$105,430; and the Toledo Ann Arbor & North Michigan, with \$103,092. Taking all the losses, both above and below \$100,000, there are 34 out of 148 roads reporting for the full year, and 16 out of 53 among those for the eleven months; in other words, out of 201 for both periods, 50 have sustained a decrease. The roads having large decreases are mainly roads which have suffered most from the various depressing influences at work. Thus the loss on the Western lines of the Pennsylvania is due to the short crops of 1890; the loss on the Milwaukee Lake Shore & Western to the falling off in the iron ore traffic; that on the East Tennessee presumably to the depression of the Southern iron industry, and that of the Denver & Rio Grande to the depressed state of the mining industry in Colorado, as well as to some special circumstances.

As far as the large gains are concerned, they have come, it will be observed, from all sections and from all classes of roads; however, the grain-carrying lines, both in the East and in the West, are especially conspicuous. These grain-carrying roads derived great advantage in the latter part of the year from the large grain crops and the freedom with which the grain, or more particularly wheat, was marketed. Thus it happens that in a number of instances the bulk of the increase was made in the last six months. In some cases the character of the exhibits was completely changed by the results of the later months, and in other cases the early loss was greatly reduced. The Chicago Burlington & Quincy, which for the eleven months shows a loss of only \$486,957 in gross receipts, at the end of the first six months had a loss of as much as \$2,167,-438. The Union Pacific had \$1,803,291 loss at the end of August, but for the eleven months reports only \$986,395 loss. The Missouri Pacific which at one time had quite a loss, for the year has \$411,657 gain. Of the increase of \$3,050,007 for the twelve months on the St. Paul, only \$893,197 had been recorded up to the first of September. The change in the character of the exhibits during the last half of the year is also shown by a recapitulation of the results for the differ-

ized for FRASER

ent months as taken from our monthly statements. Such a recapitulation is furnished in the subjoined table. Up to June the comparisons grew less favorable, the increase for May being a mere trifle. From that time, however, the improvement became more and more pronounced each month, December making on the whole about as good a showing as any.

As already said, the improvement followed chiefly from the large grain movement. At the seaboard the receipts of grain for the year, according to the New York Produce Exchange, were 225,057,180 bushels against 197,099,932 bushels, and the receipts of flour 16,624,773 bbls. against 14,242,282 bbls. This is an increase of 28 million bushels of grain and an increase of 21 million barrels of flour. But for the first six months the receipts were only 59,842,109 bushels, against 124,816,911 bushels, so that a loss of 65 million bushels for the half-year was converted into a gain of 28 million bushels for the year. At the Western primary markets the results were much the same. For 52 weeks of 1891 the receipts foot up 456,421,798 bushels, as against only 401,427,570 for the 52 weeks of 1890, giving an increase of 55 million bushels. But for the period up to June 27 the receipts had been only 144,445,682 bushels as against 199,254,950 bushels in the corresponding period of the year preceding; it follows that a loss of 55 millions was changed into a gain of 55 millions. Below we give our usual detailed statement of the grain movement at the Western markets.

Total of all- 5 wks. Dec., 1891. 5 wks. Dec., 1890. Year '91, 52 wks Year '90, 53 wks	1,153,423 628,181	24,182,198 18,114,588 204,963,698 104,774,679	110.731.90	3 9,364,970 4 8,279,855 1 99,976,97 6 10287812	1 20,301,100	507,491

The first point to attract attention in this statement is the extraordinary receipts of wheat, these reaching for the 52 weeks an aggregate 100 million bushels larger than for the year preceding, the total at 205 million bushels comparing with only 105 million bushels for 1890. While both the winter-wheat and the springwheat points participated in this gain, the latter on the whole made the greatest additions. Thus Duluth shows receipts of 40 million bushels against only 15 millions, Minneapolis 55 millions against 44 millions, and Chicago (which receives both kinds of wheat) 43 millions against 13 millions. Among the winter-wheat markets, St. Louis shows receipts of 244 million bushels against 11 millions, Milwaukee 101 against 71 millions, Toledo 184 against 51 millions, Detroit 71 against 41 millions, and Peoria 13 millions against 1 million, Cleveland recording only a trifling change. At some of these points the loss in corn has proved a great deal heavier than the gain in wheat. For the last five weeks of the year the corn receipts amounted to over 16 million bushels against only 7 million bushels for the corresponding period of 1890, but notwithstanding this increase and notwithstanding that the movement was very free in some other months, stimulated by high prices, the aggregate for the 52 weeks of 1891 reaches only 110 million bushels as against 156 million bushels in the 52 weeks of 1890. Chicago lost 9 million bushels but St. Louis lost 22 million bushels (which is 9 millions more than it gained in wheat) and Toledo lost 123 million bushels. In the case of oats and barley the changes are not so important, but the totals in both instances were smaller than in the year preceding; in rye, on the other hand, there was a large increase, the receipts for 1891 having been over 14 million bushels as against only 5 million bushels in 1890; the exceptional European demand brought out unexpected supplies.

These figures cover the fifty-two weeks ending Saturday Jan. 2. For Chicago we are able to present a comparison for the even year, and give the statement below. It appears that the total receipts of grain at that city, notwithstanding the falling off in the receipts of corn, oats and barley, were 20 million bushels heavier than in the year preceding. The table also gives the receipts of provisions and live hogs.

RECEIPTS AT CHICAGO DURING DECEMBER AND FOR THE YEAR.

		Deecmber.		Year.

Cut m'ts.lbs.	24,204,215	21,562,692	36,772,063		301,820,298		
Lardlbs.	13,200,199	17,580,387	14,293,046		146,873,894		
Live hogs No	1,068,262	821,221	692,131				

The figures as to the provisions receipts are interesting, for they show that for the twelve months of 1891 the movement was considerably smaller than for the twelve months of 1890. Of cut-meats and lard the receipts were only about 280 million pounds against 448 millions, and of pork the receipts were only 13,070 bbls. against 76,769 lbs. Of live hogs, on the other hand, the receipts were 8,600,805 head against only 7,663,828, being a gain of nearly a million. Taking the live-stock movement as a whole the receipts for 1891 appear to have been not quite up to those of 1890. According to a statement furnished by the Chicago correspondent of the Evening *Post* of this city, the deliveries by eleven leading roads in 1891 were only 299,725 car-loads

against 306,871 car-loads in 1890. With the exception of the Chicago & Alton, which brought in 23,192 carloads against 22,008; the St. Paul & Kansas City, which brought in 13,071 car-loads against 11,465 ; the Northwest, which brought in 52,693 car-loads against 48,582; the Illinois Central, which brought in 24,934 car-loads against 22,765; the Wisconsin Central, which brought in 3,761 against 2,425 car-loads-with these exceptions all the roads show a decrease. The Atchison had deliveries of 18,909 car-loads against 24,184; the Burlington & Quincy 74,316 against 80,430; the Rock Island 28,193 against 30,233; the Chicago & Eastern Illinois 4,857 against 5,248; the St. Paul 37,919 against 40,509, and the Wabash 17,880 against 19,022 car-loads.

It was pointed out above that in the South the low price of cotton and the unsatisfactory state of the iron industry, with the reaction from the "boom" in real estate values, had proved depressing influences. On the other hand the movement of cotton to market was very much heavier than in 1890, and in a number of cases served to overcome the effects of the influences mentioned. The gross shipments overland for the twelve months of 1891 were 1,798,439 bales against only 1,522,-510 bales for the twelve months of 1890, while the receipts at the ports reached 6,944,690 bales against 5,682,619 bales, so that altogether the increase was about  $1\frac{1}{2}$  million bales. Only in three minor instances did the receipts for 1891 fail to equal those for 1890, as will appear from the following. It should be noted that for December the gain in the receipts was comparatively trifling, while the shipments overland in that month actually recorded a loss of 46,411 bales.

A few of the Southern roads, more "particularly the East Tennessee, the Cincinnati New Orleans & Texas Pacific and the Memphis & Charleston, have suffered a reduction of their earnings, but most of the lines show gains, and some of the larger systems very decided gains, the Chesapeake & Ohio and the Louisville & Nashville being among this number, though the latter now reports on a greatly increased mileage. The following comparison for six years on eleven leading roads makes the total of those roads for 1891 \$80,794,298 against \$77,370,202 for 1890.

From the very heavy movement of spring wheat in the Northwest, as set out above, we should expect that the roads in that section had made better exhibits than any others, and this is precisely what we find. One or two roads, like the Duluth South Shore & Atlantic and the Milwaukee Lake Shore & Western, which have suffered from the falling off in the iron ore traffic from the Lake Superior mines, report losses in earnings, but the rest have gains and very heavy gains as a rule. It is not needful to single out any particular roads for special mention, but the following table, comprising ten leading roads, with aggregate earnings of 781 million dollars for 1891 against about 721 millions for 1890, will give an idea of the improvement that has occurred. The Chicago & Northwest, the St. Paul & Omaha and the Quincy can not be included in this statement, because their earnings for December have not yet been made public.

\* Not including the lines west of Missouri River.

Among the Pacific roads, both the Canadian Pacific and the Northern Pacific may be supposed to derive benefits from the good crops in the spring-wheat sections, but the Northern Pacific has also had to contend with business depression at the Pacific end of its lines, leading to a considerable falling off in earnings in late months, and as a consequence the gain for the year is only about \$600,000. On the Canadian Pacific the gain reaches over three million dollars. The Rio Grande Western has greatly increased its business since its lines were made standard gauge and the 1891 earnings record a gain over those of 1890 of about 30 per cent.

New Brunswick not included.

In the Southwest, the Atchison of course has done remarkably well and the Missouri Kansas & Texas and the St. Louis & Southwestern also have good returns, while the Missouri Pacific, as said further above, gained enough in the latter part of the year to wipe out the loss of the earlier months; but the Fort Scott & Memphis roads, the Texas & Pacific and the Denver & Rio Grande fall behind in their earnings.

The leading trunk lines to the seaboard derived hardly less important gains from the heavy grain cluded for this year but not for 1890.

VOL. LIV.

movement than the roads in the Northwest, the increase of over four million dollars on the New York Central being confirmatory evidence of this. Not counting the Pennsylvania or the Erie, which have not yet reported their December earnings, there is a gain of over 6 million dollars on the leading lines, and this notwithstanding the loss by the Grand Trunk of Canada.

<sup>†</sup>Fifty-two weeks. <sup>‡</sup>For these years we have added together Clev. Col. Cin-& Ind., Cin. Ind. St. Louis & Chic. and Cairo Vincennes & Chicago. <sup>¶</sup>Rome Watertown & Ogdensburg included for all the years.

As concerns other roads in the Middle and Middle Western States, there are losses in a few cases, as for instance on the Flint & Pere Marquette, the Grand Rapids & Indiana, and the Toledo Ann Arbor & North Michigan; but on the whole these roads present quite favorable reports. Some of the bituminous coal roads, like the Buffalo Rochester & Pittsburg, have heavy gains.

All lines. + Chicago & Western Indiana not included,

We have remarked above that the December statement of earnings is about the best of any month of the year. The gain reaches \$4,104,946, or 9.36 per cent. The increase follows \$2,783,000 gain in December 1890 and \$3,140,104 gain in December 1889. The grain movement was very heavy, and the Northwestern roads are able to make strikingly good exhibits of earnings. For instance, the St. Paul has a gain of \$638,769 for the month, which is excelled only by the \$662,567 gain on the New York Central. The Great Northern system has \$384,461 gain and the Canadian Pacific \$334,509; from that figure down the gains are very numerous. Annexed is a full list of all above \$30,000 in amount, and also all losses above that figure.

### JANUARY 16, 1892.]

# THE CHRONICLE.

The roads with large losses are the Northern Pacific, the Denver & Rio Grande, the East Tennessee, the Mexican Railway, the Chicago & Eastern Illinois and the Texas & Pacific. Forty-four roads altogether fall behind in their earnings, a great many of these being in the South.

a For January, February and March figures are actual for both years, but for rest of period estimated.

CONDITION OF CHICAGO NATIONAL BANKS.—Mr. E. S. Lacey, Comptroller of the Currency, has kindly furnished us this week an abstract of the condition of the national banks in the city of Chicago at the close of business on Wednesday, December 2 1891. From it and from previous reports we have prepared the following, which covers the results for December 2 and September 25 1891, and for purposes of comparison the figures for last year (December 19) are given :

	Dec. 2.	Sept. 25.	Dec. 19
CHICAGO.	1891.	1891.	1890.
Number Resources—	21	21	19

# Monetary=Commercial English News

## [From our own correspondent.]

LONDON, Saturday, January 2, 1892. The last week of the old year has witnessed a good deal of stringency in the money market. Gold amounting to £728,-000 was withdrawn from the Bank of England for Russia, Germany, Spain and Argentina during the week ended Wednesday night. That of itself, however, would not have had a very great effect, for it was known that both Germany and Spain would take considerable amounts and that the demand for both would cease as soon as the new year began. The Argentine demand, too, has been foreseen for a considerable time, and the Russian withdrawal was an exceptional measure. The Russian Government had a few hundred thousand pounds lodged with a small bank here and this sum it withdrew; but it has not disturbed its balances at Messrs. Rothschild's, and so far as can be ascertained does not intend to do so. In round figures the Russian Government has at present in London. Paris, Berlin and Amsterdam about thirty millions sterling, and it is clear that the sum is not too much to provide interest on the debt held abroad, to pay for food, seed, and war and railway material. On the contrary, it is believed that the Russian Government is negotiating, both in France and Germany with a view to obtain further advances, and if it does not succeed the general impression is that gold will have to be remitted from St. Petersburg.

The real cause of the pinch in the market this week was the temporary requirements that always have to be met at the end of the year. The India Council, which is usually a large lender, had to call in considerable amounts to provide for the interest and dividends due on New Year's Day, Several banks and financial houses had to do the same thing in preparation for the interest and dividend payments due on Colonial and foreign securities which are payable in London; and, lastly, the joint-stock banks, which make up their accounts on the last day of the old year, called in large sums for the sake of making it appear that they hold larger reserves than they habitually do. The result of all this was that brokers in the discount market and in the stock markets had to borrow from the Bank of England over two millions sterling in the first three days of the week, and considerable further amounts were borrowed on Thursday. The Bank charged at first only 4 per cent, but on Wednesday and Thursday it advanced its charge to 5 per cent. Of the somewhat over two millions borrowed in the first three days of the week there still remained at the credit of the outside market on Wednesday evening over a million and a half sterling, showing that the accommodation was required to replace loans called in, as above explained. The general explanation now is that money will gradually become plentiful and easy, and that in a couple of weeks there will be a reduction in the Bank rate.

The silver market remains very quiet. For about a fortnight now there has been no change in the quotation, it having stood since the 13th December at 4334d. per ounce.

The new year opens with brighter prospects, both as regards trade and the stock markets, than could be discerned for fully two years. As regards trade, it is no doubt true that the famine in Russia, the bad harvests throughout Western Europe, the financial difficulties of Italy, Spain and Portugal, the banking crisis in Australia, and the general breakdown in South America, will reduce very considerably the purchasing power of all those countries, and that therefore there will be a con tinued falling off in our exports to them. On the other hand there is a very strong hope here that the great prosperity o the United States will lead to better business between the two countries than has been seen for years. There are hopes, too, that India will be a larger purchaser of our goods, and there appear to be grounds for thinking that there will be a recovery in South Africa. At the same time the crisis here is completely over; confidence has revived, and with better credit there is sure to be a revival of new enterprise. As yet, at all events, the bad harvest has not caused a very great rise in the price of food. The spending power of the great mass of our population, therefore, has not much fallen off, and as a consequence the home trade is fairly prosperous. With a revival of confidence, the prospect of a fairly easy money market, and better business with some of our greatest foreign customers, the impression is general that the new year will, at the very least, be a fairly good one.

Business on the Stock Exchange has very naturally been checked during the week by the stringency in the money market. At the Stock Exchange settlement, which began on Monday morning and ended on Wednesday evening, the evidence seemed to show that no great increase had taken place during the preceding fortnight in the speculative account open for the rise. Yet some operators in the American market were charged as much as 61/2 per cent for carrying over their accounts. True, the charge was not made until late in the day, but it shows how difficult it sometimes was to get accommodation. Late on Thursday the market eased somewhat, but there was little inclination then to engage in new risks, as yesterday the Stock Exchange was closed. The expectation, however, is that we shall very soon now see a marked increase in business in the American market. Even the most sceptical acknowledge that there must be a considerable rise. They are impressed by the strength of the market New York during the past fortnight. tics, however, are few; the general i The in sceptics, general impression is that the prosperity of the United States is so great and is so likely to increase for months to come that there must be a very active market. It is indeed the confidence felt in the American market which is inspiring the hope that the new year will be better than its two immediate predecessors. If, people argue, a good deal of money is made in the American market courage will revive and people will attempt to put up prices in other departments, while they will have the means of engaging in new enterprises. In a word, the belief here is that almost everything in which the London market is largely interested will improve during the new year.

On the other hand there is an equally general impression that there must be a decline in international securities. The new Spanish loan for 10 millions sterling nominal was brought out on Monday at the issue price of 81. The subscriptions were received in Treasury bills to the extent of somewhat over half the total amount. The public subscriptions were very small, but the loan was taken firm by a syndicate of bankers, including some of the greatest firms in Europe. As the actual cash payment will amount to only between three and four millions sterling there will be no difficulty, so far as the syndicate is concerned, in paying up the money. The Bank of Spain has already provided itself with the gold it requires, and for some time to come it will therefore be in a much safer position than it has been for a long period. Yet during the week there has been a fall in Spanish 4 per cents from about  $67\frac{1}{2}$  to about 64. Up to the very end doubts continued as to whether the January coupon upon the Portuguese debt would be paid, and Portuguese bonds also have sharply fallen to 32. There has likewise been a decline of from  $\frac{1}{2}$  to 1½ in other international securities, especially Italian and Russian, and that there must be a further decline few people doubt. The market for these securities practically is now confined to Paris, and how long Paris will be able to keep up quotations is the question.

Considering everything, the revenue returns for the quarter and the nine months ended on Thursday night are very satisfactory. For the quarter the total receipts amounted to £23,-759,461, a net increase of £319,975. For the nine months the total receipts were £65,783,921, a net decrease of £536,731. It will be seen that the last three months were decidedly more productive than the preceding six months. It is especially satisfactory regarding the past three months that there was an increase of, in round figures, £300,000 in Customs and Excise, showing that the spending power of the people generally is well maintained. The chief falling off was in stamps, as was to be expected from the total cessation for so much of the year of speculative business. During the three months there was a decrease in stamps of £180,000, and during the nine months the falling off amounts to £575,000.

Messrs. Pixley & Abell write as follows :

Messrs. Fixley & Abell write as follows: Gold-Even higher prices have been paid for gold during the past week, and withdrawals from the Bank amounting to  $\pm 815,000$  have taken place for Russia and South America;  $\pm 132,000$  has been re-ceived. Arrivals-Central America,  $\pm 82,000$ ; Natal,  $\pm 89,000$ ; Chili,  $\pm 2,000$ ; West Indies,  $\pm 22,000$ ; total,  $\pm 201,000$ . The total of gold re-ceived from South Africa in 1891 is  $\pm 2,470,000$ , against  $\pm 1,759,000$  in 1890 and  $\pm 1,335,000$  in 1889.

Silver—There has been no change in the price of silver since the 17th inst., and considerable dealings have taken place, chiefly for the Continent, at 4334d. To-day, however, there have been no dealings, and the price is quite nominal. Arrivals—New York,  $\pounds$ 11,000; Chili,  $\pounds$ 23,000; West Indies,  $\pounds$ 22,000; total,  $\pounds$ 61,000; shipments to Hiogo, 24th inst.,  $\pounds$ 50,000.

Mexican Dollars-These coin remain at melting parity, and few par-cels have come to hand; £27,000 has arrived from the West Indies.

Of the above imports for the week in 1892 \$13,003 were American gold coin. Of the exports during the same time \$2,000 were American gold coin.

-Messrs. Poor & Greenough of New York invite subscrip-tions for \$1.173,000 five per cent 1st mortgage 50-year gold bonds of the Dallas & Waco Railway Co., guaranteed princi-pal and interest by the Missouri Kansas & Texas Railway Co., at 88 per cent flat, carrying interest from Nov. 1. The road in question is the connecting link between the portions of the M. K. & T. system north of Dallas and the part lying south of that city, which prior to the construction of this read was separated by a gap of about sixty miles. The Dallas & Waco Railway was completed in March, 1891, thus establishing the continuity of the entire system, and it has been operated since that time as part of the main line. The average earnings of the entire system are \$5,800 a mile, and the amount of the mortgage on the Dallas & Waco is only \$17,500 per mile for the present issue, and \$2,500 a mile additional authorized by the mortgage are reserved for future improvements.

-Parties desiring investment bonds and guaranteed stocks may be interested in the advertisement of Messrs. A. M. Kidder & Co. in to-day's CHRONICLE.

--Ihe Gallatin Nat. Bank has just held its annual election of directors and officers, re-electing also the old officers.

The movement of breadstuffs to market is indicated in the York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending Jan. 9, 1892 and since August 1, for each of the last three years:

-Messrs. Charles S. Fairchild, Thomas L. Manson, Jr., H. K. Pomroy and Geo. W. Dillaway, as a committee, to which a fifth member will be added hereafter, request holders of the a fifth member will be added hereafter, request holders of the consolidated second mortgage bonds, income bonds and stock of the South Carolina Railway Company to deposit their secur-ities with the New York Security & Trust Company on or be-fore the 8th day of February, to join a plan proposed for the reorganization of the South Carolina Railway Company. The committee reserve the right to substitute a consolidated first mortgage at a rate of interest not to exceed 5 per cent, and not to exceed in amount \$7,000,000, and in that event pay off the existing first and second mortgage honds and interest the existing first and second mortgage bonds and interest thereon in cash. Details of the plan of reorganization may be found in another column.

-The New York Life Insurance Company present in an-other column some interesting statements in reference to their 20-year Tontine policies, issued in 1872 and now matur-ing. Examples are given showing the cost and present cash value, together with the options open to policy-holders. The management of the company further announce that the com-pany's new business for 1891 exceeded \$150,000,000; its in-come exceeded that of 1890; its assets and insurance in force were both largely increased; its mortality rate was much be-low that called for by the mortality table. A detailed state-ment of the year's business will be published after the annual report is completed. report is completed.

-The Union Discount Co., of London, publish in another column their balance sheet and profit and loss account for the six months ending Dec. 31. After paying a 4 per cent dividend on the half-year's business amounting to \$126,100, there is a supplus of \$92,613. This company have a card in the CHRONICLE (see second page) in which they give the rates allowed for money on deposit from week to week.

WALL STREET, FRIDAY, JAN. 15, 1892-5 P. M. The Money Market and Financial Situation.—The outlook remains quite favorable in railroad affairs. The progress of the Richmond Terminal adjustment, the new Chesapeake & Ohio deal and the large earnings of Union Pacific in November were all matters which had a good effect on the general sentiment this week.

The Cotton Exchange has also shown improvement. There is no doubt about the prosperity of the West, but it is too well known that the South is dejected, and if they could secure even a moderate advance in the price of cotton on a basis likely to last, their situation would be greatly improved and the trade of the whole country would feel the benefit of it.

It is quite remarkable how few railroads are now in default on their interest or tied up in foreclosure litigations. The hard times of 1890 and the first half of 1891 did not result in the same crop of defaults which we have had in former years, and it is to be noted with satisfaction that the railroads now having lower rates of interest to pay on their bonds are much better able to pull through a dull period than they were when paying 7 and 8 per cent.

" The better financial status will probably lead to a good many railroad leases and consolidations, and we have already had two recently-first, the "taking over" of Milwaukee Lake Shore & Western by the Chicago & Northwestern and just now the absorption of Mr. Huntington's Elizabethtown Lexington & Big Sandy by the Chesapeake & Ohio.

Two years ago, in January 1890, the whole stock market was broken for a time by the non-payment of any dividends on the Reading preferred income bonds, and the resumption of payment on those bonds this week is quite suggestive as to the improvement that has taken place in two years.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1 to 3 per cent, the average being 21/2 p. c. To-day the rates on call were 2 to 21/2 p. c. Commercial paper is quoted at 41/2@51/4 per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £286,000, and the percentage of reserve to liabilities was 37.52, against 32.01 last week; the discount rate remained unchanged at 3½ per cent. The Bank of France shows an increase of 125,000 francs in gold and 675,000 in silver. The New York Clearing-House banks in their statement

Jan. 9 showed an increase in the reserve held of \$4,520,100and a surplus over the required reserve of \$18,961,125, against \$17,232,050 the previous week.

the following week. State and Railroad Bonds.—Sales of State bonds at the Board included the following: \$18,500 of Tenn. settl. 6s at 105-105½, \$1,000 settl. 5s, at 99½; \$10,000 So. Car. 6s, Brown con., at 97¾; \$5,000 Va. 6s defd., trust receipts, at 8¾; \$10,000 Va. 6s defd., at 8¼; \$10,000 N. C. con. 4s, at 97. Railroad bonds have kept up well their general strength and activity, with particularly heavy dealings in a few bonds. Mo. Kansas & Texas seconds have recently been most prominent for large transactions, owing to the good earnings of the road the past year and an unofficial statement that some prominent for large transactions, owing to the good earnings of the road the past year and an unofficial statement that some interest would be paid on them. The Reading preferred in-come bonds have become more quiet and receded a little in prices since the dividend question was settled on Monday by the declaration of 5 per cent on the firsts and  $4\frac{1}{6}$  on the seconds. If some interest is paid on the M. K. & T. seconds the confidence of income bondholders in general will be further stimulated, as the better position of incomes has beenone of the notable features of the improvement in the railroad situ-ation in 1891. The Ches. & Ohio bonds of various classes have been favorably affected by the proposed new deal and issue of  $4\frac{1}{2}$  per cent bonds to take up the pref. stocks in certain proportions. Richmond Terminal bonds continue strong pending the committee's deliberations. Union Pacific bonds of all classes are fortified by the excellent report of earnings for November. **Bailroad and Miscellaneous Stocks.**—There has been **a** 

**Railroad and Miscellaneous Stocks.**—There has been a pretty healthy stock market—that is, no evidence of weaken-ing in the general tone, no bad slumps in particular stocks, and no sign of a disposition to sell out and realize profits. It matters little that stocks vary a few points from day to day or week to week so long as the undercurrent of feeling is strong and confidence in the future is unshaken. The good exhibit for the year of a reorganized road such as M. K. & T. and the extraordinary improvement in net earnings on such a line as Union Pacific, that was cramped last year for ready money, are good specimens of the sort of statistics coming out from week to week that give substantial support to the mar-ket. The Ches. & Ohio deal, by which the preferred stocks may be exchanged on certain terms for a bond that will yield the holders some income, has made all the C. & O. stocks very Railroad and Miscellaneous Stocks.-There has been a the holders some income, has made all the C. & O. stocks very strong and active. Northern Pacific pref. stock and consol. strong and active. Northern Pacific pref. stock and consol. bonds are again among the weak ones, apparently owing to the lack of hearty support from their friends, and also to the fact that the net earnings were so large in 1890 that the 1891 monthly exhibits appear less favorable by comparison. To-day there was a fair business, with prices generally easier on the leading stocks. Edison General Electric sold down to 89½ although its 2 per cent quarterly dividend is paid as usual. National Cordage closes at 96¾ ex. div.; Chicago Gas at 75½; Am. Sugar at 80½; Nat. Lead at 34¾; Silver bullion certif-icates at 93‰. icates at 93%.

# GENERAL QUOTATIONS OF STOCKS AND BONDS.

Quotations in New York represent the per cent value, whatever the par may be; other quotations are frequently made per share. The following abbreviations are often used, viz.: "M." for mortgage: "g." for gold; "gd," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv." for convertible; "s.f.," for sinking sund; "L.g.," for land grant. Quotations in New York are to Thursday; from other cities, to late mail dates. Subscribers will confer a favor by giving potice of any error discovered in these Operations.

Process of the second	Subscribers will	confei	rafe	ivor by giving notice of any e	rror	discor	vered in these Quotations.

[VOL. LIV.

# Investment Railroad Intelligence.

The INVESTORS' SUPPLEMENT, a pamphlet of 150 pages, contains extended tables of the Stocks and Bonds of Railroads, and other Companies, with remarks and statistics concerning the income, financial status, etc., of each Company. It is published on the last Saturday of every other monthviz., January, March, May, July, September and November, and is furnished without extra charge to all regular subscribers of the CHRONICLE. Extra copies are sold to subscribers of the CHRONICLE at 50 cents each, and to others at \$1 per copy.

The General Quotations of Stocks and Bonds, occupying s'x pages of the CHRONICLE, are published on the third Saturday of each month.

## ANNUAL REPORTS.

Philadelphia & Reading Railroad.

(For the year ending Nov. 30, 1891.)

(For the year ending Nov. 30, 1891.) At the annual meeting in Philadelphia Jan. 11 the old board of directors was re-elected, and President Samuel R. Shipley, of the Provident Life & Trust, was chosen to the vacancy caused by the death of Henry C. Gibson. Only the President's report has yet been published, the regu-lar pamphlet with statistics not being issued till some time later. President McLeod remarks: "It will be observed that there was an increase of the profit from the traffic of the railroad company for the year, over that of the previous year, amounting to \$998, 676, while the traffic expenses have decreased \$79,362, and that the proportion of expenses of operating has fallen from 57.04 per cent to 54.28 per cent. This ability of the company to handle an increased traffic at a less cost is due to economies resulting from the expenditures made for improvements and facilities especially pointed out in the last annual report, and furnishes an early demonstration of the wisdom of the policy outlined at that time. "The management has long foreseen that an increase of its surplus available for dividends upon its income bonds and stock was largely dependent upon a liberally judicious expen-diture in the renewal and improvement of the roadbed, super-structure, buildings, machinery and equipment, and their maintenance at modern standards in all thincs and upon the

diture in the renewal and improvement of the roadbed, super-structure, buildings, machinery and equipment, and their maintenance at modern standards in all things, and upon the provision of ample facilities for the prompt and economical movement of the traffic throughout the system. Accordingly it has not hesitated at any time to incur whatever expendi-tures for such improvements and additions seemed to be reasonably necessary for the proper and economical conduct of the business. Notwithstanding the low rate of percentage of expenses to earnings during the year, the property has been improved in all its branches, both in condition and efficiency. In pursuance of the policy of enlargement there have been ex-pended for betterments and additions of a more permanent nature \$505,004, and for cars and locomotives \$1,268,465, amounting in all to \$1,773,469, which was carried to capital account.

pended for betterments and additions of a table \$1,268,465, nature \$505,004, and for cars and locomotives \$1,268,465, amounting in all to \$1,773,469, which was carried to capital account. "The company is practically free from floating debt; the item of bills payable shown in the balance sheet, amounting to \$1,150,000, represents notes given to secure the advances necessary to complete the construction of the Philadelphia Harrisburg & Pittsburg Railroad, the Port Reading Railroad and the Tamaqua Hazleton & Northern Railroad, and when these companies sell and realize upon their securities, so much of the proceeds as may be necessary will be used to take up the notes, and the indebtedness will be canceled. "The management is gratified to inform you that arrange-ments have been completed for making provision for all necessary betterments, new equipment and additional prop-erty which will be hereafter required, by an issue of \$10,000,-000 collateral trust bonds, bearing 5 per cent interest, which are unused and unpledged, and the proceeds will be expended only for the improvement of and additions to the present mortgaged estates. All new lines and extensions will either be of sufficient importance to provide the necessary funds in-dependently, or their promotion will not be undertaken by the company. Within six years, and before the maturity of this loan, there will have been liberated under the plan of re-organization an equal amount of general mortgage 4s, applicable to these purposes under the mortgage. The possess-ion of these means affords ample assurance of the ability of the company to continue the enlargement of its equipment and facilities at all times in season to meet promptly the demands of its increasing traffic, to avail of all the economies which arise from modern improvements and methods, with-out unduly burdening the current income, and at the same time to carry the business successfully through periods of de-pression should any occur. "In this connection, it is proper to add that the compan

does not include any of the issue of securities of the Coal & Iron Co. "In the last annual report attention was called to the fail-ure of the company for many years past to make adequate provisions in the development of the mines, in rolling equip-ment and terminal facilities, to enable it to netain the place in the coal trade which it ought to command. While there has been a considerable increase of the tonnage, the revenue from the anthracite coal traffic has not yet reached the proportions to which the company is fairly entitled, and the concessions made by your board towards the preservation of harmonious relations with other companies and the maintenance of fair and reasonable prices for the product of the mines, continue to be out of proportion to the capacity of the collieries, the

amount of capital invested in both productive and un-developed coal lands, and the facilities possessed for the distribution of coal in the markets, as compared with those of the other coal-carrying roads. Your board has never questioned the policy of making due concessions to competi-tors, who with yourselves are engaged in producing a commod-ity far in excess of the demand of the markets, but the pro-portion of the business allotted to this company in years past, when its financial straits and lack of facilities did not permit it to mine and distribute its fair proportion of the increase of tonnage, must not be taken as the measure of the business to which it is entitled in the conditions which now prevail since its reorganization and rehabilitation. It is to be expected, therefore, that out of the regard that is due to the great in-terests involved, and a proper consideration of the importance of the subject to the general public, as well as from a just recognition of the equitable right of this company to a larger share of the traffic, your board will be able to secure for your company what its investments entitle it to without the sacri-fice of revenue or the disturbance of existing harmonious relations." \* \* \* \* \* \* \* \*

"It may be of interest to those who are not familiar with previous reports to add that the immense estates of the com-pany aggregate upwards of 194,000 acres, which may be classi-fied as follows:

Coal lands, owned (acres) Coal lands, leased from others (acres)	7.429
Timber lands, owned (acres) Iron ore lands (acres)	102,573 70,489 21,000
Total area (acres) The collieries in operation are located : On lands owned	
On lands leased	
Temporarily abandoned	

<sup>61</sup> "In addition to these, and including small operations, there are 13 collicries which are operated by tenants. All of the company's collicries either have been or are being modern-ized and supplied with improved machinery for handling and preparing the coal for market. "The coal lands comprise in extent about 33 per cent of the entire anthracite coal fields of the State, and taking into account the aggregate thickness of the veins on the com-pany's lands, and the greater proportionate depletion of the estates in the other regions which has been going on for many years, it must be conceded that we have at least 50 per cent of the entire deposit remaining unmined." \* \* \*

\* It appeared in the statements for the year 1890 that the deficit, in-cluding interest on the bonded debt, amounted to \$973,284, and for purposes of comparison with the results of the operations of 1891 there should be added \$447,584 which was charged to capital account, similar expenditures having been made out of income in the past year, making in all a deficit of \$1,420,869, or \$1,088,008 in excess of the deficit for 1891.

#### GENERAL INVESTMENT NEWS.

American District Telegraph Company.—The American District Telegraph Company has increased its capital stock from \$3,000,000 to \$4,000,000. The purchase price of the Mu-tual District Telegraph Company was \$1,275,000. It will be paid with the extra stock and \$275,000 of the \$500,000 of stock held in the treasury of the American District. The consolida-tion of the two companies was formally ratified by vote of the stockholders.

heid in the treastity of the American District. The obsorbing tion of the two companies was formally ratified by vote of the stockholders. American Sugar Refining Company was held in Jersey City. The most important result of the meeting was the de-cision of the stockholders to increase the stock of the company by \$25,000,000, half preferred and half common. This amount of stock will be placed in the hands of the directors, who will dispose of it for the best interests of the company. The reso-lution suggesting such an increase was passed at a previous meeting of the board of directors, and provided that the new stock might be issued if a motion to that effect received a two-thirds vote. The new stock is to be paid for in cash at par, and to be issued in such sums and as the directors may deter-mine, preparations for the issue to be made at once. The new stock is to be issued to acquire other refinery properties, or to build, as the directors may see fit. An election was held to fill the two offices in the board of directors which became vacant at the close of the year by the expiration of the terms of office of Theodore Havemeyer and J. B. Thomas. They were re-elected. The fiscal year was changed to end Nov. 30 instead of Dec. 31, for the convenience of the officers. Mr. Havemeyer made his report as President, stating that the re-fir eries in the company were likewise encouraging. The Treasurer's report was read. The CHRONICLE has been unable to get a copy of the re-port which was read at the meeting, the usual difficulty being ext crienced in getting any information whatever at the Sugar Com puny's offices. The Treasurer's report, as submitted at the m-eting and given in the morning newspapers, is as fol-low: ''The value of cash assets and investments actually taken over by the American Sugar Refining Company, after deduct ing the expenses of reorganization, was \$8,739,000, which, together with the \$11,000 cash capital paid in, made the amount of cash assets and investments represented by the capital st

taken over by the American Sugar Refining Company, after deduct ng the expenses of reorganization, was \$8,739,000, which, together with the \$11,000 cash capital paid in, made the amount of cash assets and investments represented by the capital stock \$8,750,000. The remainder of the stock, \$41,250,-000, represents the real estate and plant transferred to the company. The liquidation of the cash assets and investments above referred to has thus far realized a surplus of \$55,908 36, and of the amount issued for the plant, after providing for all the outstanding certificates of the Sugar Refineries Company, there came back to the Treasurer, available for the purchase of additional property, 3,583 shares of common stock and 3,695 shares of preferred stock, with the accumulated divi-dends, \$54,515. There have been issued, in accordance with the authority conferred by the stockholders, \$10,000,000 6 per cent bonds, none of which, however, have been disposed of up to this time. Two thousand five hundred and sixty of these bonds have been lodged in accordance with the terms of the re-organization agreement with the receivers pending the com-pletion of the dissolution proceedings of the old corporations in Kings County. The decree of the Court dissolving these corporations has been granted, and the bonds will soon be returned to the treasury of the company. By reason of the magnitude of the business and the remoteness of some of the refineries belonging to the company, it has been found impos-sible to secure absolutely accurate reports up to December 31. The books of the company, however, show net earnings for the year not less than \$5,073,002 17, from which amount two semi-annual dividends have been paid to the stockholders, each of 4 per cent on the common and 3½ per cent on the pre ferred stock, amounting in all to \$3,750,000, leaving a surplus of net earnings of \$1,323,002 17 reserved for contingencies." The balance-sheet Dec. 31, 1891, shows: Assets—Cash, \$2,-558,040; call loans, \$1,196,955; sugar, home black

total, \$62,845,391.

Chesapeake & Ohio.—The managers of this company pro-pose to issue a long-time consolidated gold 4½ per cent bond, large enough in amount to cover all the known future needs of the company and to retire the underlying bonds as they mature, and to exchange for the present preferred stocks. It is mature, and to exchange for the present preferred stocks. It is desired to develop the property into a double-track system of more commanding importance in the trunk line business. The preferred stocks are to be exchanged for new bonds on the following basis: First preferred to get two-thirds of its par value in new bonds and one-third in new common stock; second preferred to get one-third of its par value in new tonds and two-thirds in new common stock. Arrangements have already been made to dispose of enough of the new bonds to give a tund to proceed with the immediate develop-ment of the road. The plan as outlined will involve the crea-tion of \$18,000 000 new common stock. In case the company decides to buy the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the Elizabethtown Lexington & Big Sandy Road, it will give one of the

Company. The new bonds will be a first mortgage on all of the new property to be built or acquired. —The purchase of the Huntington roads is admitted by both sides, and in regard to it Mr. M. E. Ingalls said to a New York *Times* representative: "The terms of the deal include the tak-ing up of the Ohio & Big Sandy and Elizabethtown Lexington & Big Sandy 6 per cent bonds and issuing Chesapeake & Ohio  $4\frac{1}{2}$  per cent bonds in their place. The cost of the two Big Sandy roads will be paid with a part of these bonds. For the first mort, bonds we shall give bond for bond. The certificates of indebtedness will be replaced by new common stock. The shares of Big Sandy will be replaced by shares of Chesapeake & Ohio at the rate of one Chesapeake & Ohio for two Big Sandy." \* "The length of road thus secured is 190 miles. We shall issue \$5,000,000 in  $4\frac{1}{2}$  per cent bonds and \$2,000,000 in common stock." in common stock."

Chicago Rock Island & Pacific.—The directors have authorized the extension of the road 140 miles from the present terminus at Minco, Indian Territory, in the direction of Fort Worth.

Cincinnati Jackson & Mackinaw.—At Toledo, on the 8th inst., the main line was re-sold for reasons stated in the CHRONICLE of 2d inst. The property was bid in for the Re-organization Committee, and they are now in possession of the whole line and will proceed with the reorganization.

the whole line and will proceed with the reorganization. Edison General Electric Co.—The Edison Electric Illumin-ating Company has declared its regular quarterly dividend of 1¼ per cent, payable February 1. The Edison General Elec-tric Company announces that an erroneous impression seems to have been formed in regard to the injunction granted by Judge Barrett, restraining the Edison Electric Light Com-pany from paying a dividend. This injunction, the company claims, affects only the details of management of the Edison Electric Light Company, and has no bearing whatever upon the payment of the regular 2 per cent quarterly dividend of the Edison General Electric Company, which will be paid February 1, as usual. Evansville & Indianapolis.—The operations for six months

ning from Campbell Hall to Goshen, N. J. **Richmond & Danville**,—The Richmond Terminal pro-gramme was carried out in Richmond January 12. Mr. John H. Inman was re-elected President, and the follow-ing board of directors was chosen: Samuel Thomas, John G. Moore, John A. Rutherford, Samuel M. Inman, James B. Pace, Calvin S. Brice, C. M. McGhee, George J. Gould, W. J. Oakman, James Swan, W. E. Strong and Gen. T. M. Logan. —The members of the committee that subscribed \$6,000,000 for Richmond & Danville's floating debt have appointed Messrs. C. M. McGhee, J. C. Maben, W. E. Strong, J. A. Gar-land and John G. Moore a sub-committee to carry out the wishes of the committee.

wishes of the committee.

Richmond & West Point Terminal.—President Olcott of the stockholders' committee announces that they have al-ready received proxies on more than 500,000 shares from this company's stockholders. As a mere outline of what the com-mittee's plan may be, it is said that a new company will be formed with power to act as a general proprietary company like the present Richmond Terminal, but also to operate roads. If the charter of the Richmond Danville & Southwestern Railroad, now under investigation, is not satisfactory a new Railroad, now under investigation, is not satisfactory, a new company will be formed. The new company will issue its securities in exchange for those of the several companies in the R. T. system, which will go into its treasury, as will also the present R. T. bonds and stocks, and it is estimated that \$189,000,000 of new bonds and \$136,000,000 new stock will be required to provide for everything.

Savannah Americus & Montgomery.—The application of this company to the New York Stock Exchange was to list \$2,900,000 of its first mortgage six per cent thirty-year gold bonds, Nos. 1 to 350, and 601 to 3,240 inclusive, of \$1,000 each. Mortgage dated April 1, 1889; interest payable January and July 1 of each year. Trustee, The Mercantile Trust & Deposit Company of Baltimore. This road is completed from Lyons Ga to Montgomery.

This road is completed from Lyons, Ga., to Montgomery, Ala., a distance of 270 miles, the gauge being 4 feet 81/5 inches, 60-pound steel rails of first quality being used. The liabilities consist of a car trust amounting to about \$500,000, maturing monthly through seven years. The equipment of this company consists of 22 locomotives

28 passenger and baggage cars, 637 box freight cars, 723 flat cars, 8 cabooses, 1 steam shovel, costing altogether up to this date \$958,915, on which there are trust notes not yet due ag-gregating \$541,963, December 1, 1891.

holders can receive payment for their coupons.

South Carolina Railway.—The new reorganization plan signed by Messrs. Fairchild, Manson, Pomroy and Dillaway will be found in our advertising columns.

Western N. Y. & Pennsylvania.—There has been a sharp contest for control of this road. Two tickets were in the field, one headed by President Calvin H. Allen and the other by Viceone headed by President Calvin H. Allen and the other by Vice-President Samuel DeCoursey, who represented Philadelphia interests. The latter ticket was elected as follows: Samuel G. DeCoursey, Nicholas Thouron, George E. Bartol, Charles M. Lea, William C. Bullitt, J. Rundle Smith, William T. Tiers, E. W. Clark, Jr., John K. Barclay, Gustav E. Kissel, John D. Probst, William Mertens and Edward L. Owen. The capital stock of the company consists of 197,120 shares. Of this amount about 105,000 shares are held in Philadelphia, 12,000 in New York and 80,000 in Holland. The Holland stock is voted through an Amsterdam trust company. An important question came up as to voting the Dutch

is voted through an Amsterdam trust company. An important question came up as to voting the Dutch stock, for which President Allen claimed to hold proxies, and the legal question involved is one which may seriously affect the status of foreign holdings when placed in a "trust" or deposited with a syndicate. The Philadelphia *Press* reports: "President Allen attempted to cast the Holland vote. He produced a joint proxy which gave him and Vice-President DeCoursey the right to vote the stock. Mr. Allen claimed he held proxies and that he would cast 155,993 4-7 votes each for himself and his associates. Mr. Allen presented two cable-creams from Amsterdam authorizing him to vote the provise grams from Amsterdam authorizing him to vote the proxies himself.

At this Mr. DeCoursey said: "Where are the other cable-grams bearing on the same subject? Is that all you have? I say it is not. Where is the one you received last night, tell-

I say it is not. Where is the one you received last night, tell-ng you to support me?" \* \* Mr. Bispham, as counsel for the judges of election, finally an-nounced their decision that under the law of Pennsylvania the right to vote stock could not be divorced from the ownership of right to vote stock could not be divorced from the ownership of it. "The question is—is this Dutch company the absolute owner of this stock. It collects dividends, but in this paper we have the declaration that this is for the account of holders of cer-tificates. Now it would appear that it is not the absolute owner of the stock, but is a stockholder, in part only, for others. The judges, therefore, decide that this proxy offered to be voted for the Dutch Company by Mr. Allen and Mr. De Coursey is not a valid proxy and that the vote should be ex-cluded." There was a protest against this decision, but it was maintained. The Dutch proxies were rejected and President Allen and his party consequently defeated by a large majority.

## The Commercial Times.

#### COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 15, 1892.

A week of unusually mild weather for the season closes with a snow-storm and turning colder. The temperature has been very severe in the Northwest and in the Mississippi Valley. An adequate ice crop is yet to be secured. The coal trade is fairly active. Cotton suffered a further decline early in the week, causing important failures in New Orleans and Philadelphia, but latterly prices have taken a stronger turn. Wheat also declined, but not enough to lead to an export movement on any liberal scale. The diplomatic relations of the Federal Government and Chili are still unsettled, and are begining to cause anxiety in mercantile circles having relations with South America.

Lard on the spot has had only a moderate sale and closes dull, with prices somewhat nominal at a partial decline from figures recently quoted; prime City, 6.05 @6.10c.; prime Western steam, 6.55c., and refined for the Continent, 6.60@6.90c. Lard for future delivery has fluctuated at a wider range than usual, subject largely to manipulation, being somewhat depressed to-day by selling on Western account, prompted in some degree by the low price of corn.

#### DAILY CLOSING PRICES OF LARD FUTURES.

March delivery	6·59 6 65 6·78	$6.59 \\ 6.69 \\ 6.81$	6.67 6.75 6.88	$6.60 \\ 6.68 \\ 6.82$	6·55 6·64 6·77
----------------	----------------------	------------------------	----------------------	------------------------	----------------------

Pork at somewhat easier prices has shown much more activity, and closes with a good demand at \$9 75@\$10 50 for mess, \$9 25@\$9 50 for extra prime and \$12 50@\$14 50 for clear. Beef has been dull ; extra mess \$7 @\$7 50, packet \$8 50 @\$9 50, family \$10@\$12 per bbl.; extra India mess \$16 50@\$19 per tierce. Beef hams have been active at the West at \$12 per bbl. and close firm here at \$13. Cut-meats have been more active; large sales of pickled hams in tierces are reported from the West at 81/4@81/2c. for the spring months, and sales of city cuts were made to day at 534c. for light pickled bellies, 434c. for shoulders and 77%c. for hams. Tallow has been active, but closes quiet at  $4\frac{3}{4}$  @4 13-16c. Stearine is firmer at 73%@75%c. in hhds. and tcs. Oleomargarine is firm at 53%c. Butter is firmer at 24@32c. for creamery. Cheese is firmer at 101/ @12c. for State factory, full cream.

Coffee on the spot has been moderately active, and closes at slightly better prices. Rio No. 7 is quoted at 131/2c. Today's sales included Rio No. 7 at 121/2c., c. & f., and Santos No. 6 to arrive at 15c. Mild grades have been in fair demand. Good Cucuta is quoted at 20c. Java is held higher. The speculation on contracts continues dull, but values have made some improvement on stronger European advices accompanied by a few buying orders. The close was steady, with sellers as follows:

at 4.70c. The interior iron markets are fairly active, but trade here is quiet; No. 2 pig quoted at \$15.50 for Southern and \$16.50 for Northern: steel rails \$30. Refined petroleum is quoted at 6.452. in bbls., 7.70c. in cases and 3.95c. in bulk; naphtha 5.50c.; crude petroleum 5.802. in bbls and 3.30c. in bulk. Crude certificates sold to-day at  $62\frac{3}{4}$ @63c. Spirits turpentine was fairly active and closes firmer at  $35\frac{1}{4}$ @35c. Rosins are quiet and unchanged at \$1.37\frac{1}{2} @\$1.42<sup>1</sup>/<sub>2</sub> for strained. Wool remains dull, although the in-quiry has improved somewhat.  $\frac{2}{3}$ Hops are still wanted for export at full vices export at full i rices

#### COTTON. FRIDAY, P. M., January 15, 1892.

TRIDAY, F. M., January 15, 1892. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 162.788 bales, against 230,205 bales the previous eight days and 233,169 bales the previous six days. making the total receipts since the 1st of Sept., 1891, 5,194,295 bales, against 4,837,613 bales for the same period of 1890-91, showing an increase since Sept. 1. 1891, of 366 682 bales. period of 1890-9 of 306,682 bales.

The speculation in cotton for future delivery at this market opened rather better on Saturday last, but the strength soon turned to weakness, which was not checked until prices had reached a still lower level. On Monday January contracts sold at 6.99c., but for the active months the lowest prices were made on Tuesday, namely 7.01c. for February, 7.24c. for April, 7.35c. for May, 7.45c. for June, 7.55c. for July and 7.63c. for August. The depression was due to the market falling into a state of collapse under the estimates received from the South of a continued large movement of the crop. On Tuesday afternoon a reaction set in and prices advanced rapidly on stronger accounts from Liverpool, with the port receipts falling considerally below estimates, bringing out free buyers to cover contracts. It was understood that on Wednesday morning large buying orders came from the Continent, not only to cover contracts but to secure cotton for future consumption. The ad-vance made progress to the close of Thursday, when prices were 37.6.40 points higher than the lowest figures given above. To-day there was a sharp decline at the opening owing to the failure of Liverpool to respond to our advance. The course of the Liverpool market was said to be caused by the receipt of cable advices over night, saying that the reduction in our crop movement was due to bad weather at the South. Many of the bulls, however, asserted that it is due to exhaustion of planta-tion reserves, especially in the Atlantic States and the Eastern Gulf States. A pretty full recovery followed when it was seen that interior receipts were small, but a fresh decline occurred under rumors that large crop estimates were forth-coming. The small decrease of interior stocks was also an element of weakness. Cotton on the spot advance 1/6c. on Monday, but there was ouly a limited business for home con-sumption. There was yesterday a further advance of 1-16c. To-day the market was quiet at 7.9-16c, for middling uplands. The total sales for forward delivery for the week are 910,800 bales. For immediate delivery the total sales foot up this week 2,248 bales, including 46 for export, 2,202 for consumption, for speculation, and — in transit. reached a still lower level. On Monday January contracts

The following exchanges have been made during the week:

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. The Continental stocks, as well as those for Great Britain and the afloat are this week's returns, those for Great Britain and the aboat are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Jan. 15) we add the item of exports from he United States, including in it the exports of Friday only.

RECEIPTS FROM THE PLANTATIONS .- The following table Indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Receipts at the Ports. St'k at Interior Towns. Rec'pts from Plant'ns. Week Ending 1882-20 1890-91 1891-92 1889-90 1890-91 1891-92 1889-90 1890-91 1891-92  $\begin{array}{c} \textbf{262, 11.} \\ \textbf{262, 612} \\ \textbf{257, 529} \\ \textbf{265, 501} \\ \textbf{265, 501} \\ \textbf{318, 569} \\ \textbf{469, 189} \\ \textbf{564, 754} \\ \textbf{303, 678} \\ \textbf{303, 577} \\ \textbf{303, 577} \\ \textbf{328, 839} \\ \textbf{303, 524} \\ \textbf{304, 525, 526} \\ \textbf{304, 902} \\ \textbf{30$ Dec. 11. ... Jan.

The above statement shows: 1.—That the total receipts from the plantations since September 1, 1891, are 5,765,370 bales; in 1890-91 were 5,364,015 bales; in 1889-90 were 5,031,557 bales. 2.—That, although the receipts at the outports the past week were 162,788 bales, the actual movement from plantations was only 160,242 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 152,076 bales and for 1890 they were 114,518 bales.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.— We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Jan. 15 and since Sept. 1 in the last two years are as follows:

	189	1-92.	189	0-91.
January 15.	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Shipped-	14.000	399,773	20,534	969 969
Via St. Louis	14,220			362,268
Via Cairo	11,662	$245,574 \\ 131,665$	9,947 1,887	190,029
Via Hannibal	8,905	22,512	1,356	
Via Evansville	$1,816 \\ 5,652$		5,148	
Via Louisville		82,584	8,605	
Via Cincinnati	2,759	110.332		120,524
Via other routes, &c	4,104	110,332	1,102	116,306
Total gross overland Deduct shipments—	49,118	1,112,588	48,579	1,004,857
Overland to N. Y., Boston, &c	14,301	195.185	12,143	162,362
Between interior towns	903	42,775	2,270	
Inland, &c., from South	2,079		2,324	
Total to be deducted	17,283	295,603	16,737	284,976
Leaving total net overland*	31,835	816,985	31,842	719,881

The foregoing shows that the week's net overland movement this year has been 31,835 bales, against 31,842 bales for the same week in 1891, and that for the season to date the aggregate net overland exhibits an increase over a year ago of 97,104 bales.

	189	1-92.	189	0-91.
In Sight and Spinners' Takings.	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Receipts at ports to Jan. 15 Net overland to Jan. 15 Southern consumption to Jan. 15	162,778 31,835 12,000		31,842	719,881
Total marketed Interior stocks in excess	206,623 *2,546	6,296,280 571,075		
Came into sight during week. Total in sight Jan. 15		6,867,355	194,918	6,347,896
North'n spinners tak'gs to Jan.15		1,404,711		1,281,979

It will be seen by the above that there has come into sight during the week 204,077 bales, against 194,918 bales for tha same week of 1891, and that the increase in amount in sight to-night as compared with last year is 519,459 bales.

WEATHER REPORTS BY TELEGRAPH.—Our telegraphic ad-vices this evening indicate that over a large portion of the South this week the weather has been very rainy and colder. In sections of the Atlantic and Eastern Gulf States the rain-fall has been so heavy as to cause flocds. At Montgomery, Alabama, the precipitation reached nearly fifteen inches—the heaviest on record. The temperature has been lower, with snow in some localities. Galveston, Texas.—There has been rain on four days of the week to the extent of thirty hundredths of an inch. Snow on two days. The thermometer has averaged 47, the highest being 68 and the lowest 26.

week to the extent two days. The thermometer has two days. The thermometer has being 68 and the lowest 26. Palestine, Texas.—Telegram not received. Huntsville, Texas.—We have had rain on two days during the week, the precipitation reaching fifty hundredths of an inch. The thermometer has ranged from 20 to 72, averaging

Dallas, Texas.—There has been snow, sleet and ice through-out the State, except on the immediate coast. Rain has fallen here on two days of the week, to the extent of eighteen hun-dredths of an inch. Average thermometer 42, highest 50,

lowest 18. San Antonio, Texas.—It has rained on two days of the week, the rainfall reaching twelve hundredths of an inch. The thermometer has averaged 39, the highest being 60 and the lowest 18. Luling, Texas.-

-The weather has been dry all the week.

Luling, Texas.—The weather has been dry all the week. The thermometer has averaged 40, ranging from 20 to 75. Columbia, Texas.—There has been no rain all the week. The thermometer has ranged from 25 to 74, averaging 52. Cuero, Texas.—We have had rain on two days of the past week, to the extent of thirty-four hundredths of an inch. Average thermometer 52, highest 74, lowest 25. Brenham, Texas.—There has been no rain all the week, but snow and sleet have fallen on two days. The thermometer has averaged 47, the highest hair 74 and the lowest 20

snow and sleet have fallen on two days. The thermometer has averaged 47, the highest being 74 and the lowest 20. Weatherford, Texas.—There has been rain on two days of the week, the rainfall being twenty hundredths of an inch. Snow has also fallen on two days. The thermometer has averaged 40, ranging from 12 to 68. Belton, Texas.—Telegram not received. New Orleans, Louisiana.—Rain has fallen on five days of the week, to the extent of five inches and twelve hundredths. A verage thermometer 48

Average thermometer 48.

Average thermometer 48. Shreveport, Louisiana.—There have been two inches of snow the past week and a rainfall of eighty-five hundredths of an inch. The thermometer has averaged 32, the highest being 56 and the lowest 17. Columbus, Mississippi.—It has rained on four days of the week, the precipitation being three inches and sixty-seven hundredths. The thermometer has averaged 40, ranging from 20 to 70

hundredths. from 20 to 70.

*Leland*, *Mississippi*.—Telegram not received. *Meridian*, *Mississippi*.—We have had rain on four days of the week to the extent of four inches. Very little cotton is left on plantations in this vicinity. The thermometer has

left on plantations in this vicinity. The thermometer has ranged from 18 to 50. Little Rock, Arkansas.—The weather the past week has been the most severe experienced here for several years. It has rained, snowed and sleeted on five days, the precipitation being one inch and twenty-five hundredths. The thermom-eter has averaged 25, the highest being 40 and the lowest 14. Helena, Arkansas.—There has been snow or sleet on two days. The week's rainfall has been one inch and thirty hun-dredths on five days. The thermometer has averaged 27, ranging from 13 to 48. Memphis. Tennessee.—Sleet and snow have fallen on five

Memphis, Tennessee.—Sleet and snow have fallen on five days of the week and marketing has been interrupted very much. The weather is now clear but cold. The precipita-tion, including melted snow, reached one inch and sixty-four hundredths. The thermometer has ranged from 12.4 to 48.1, averaging 27.2. *Mashville, Tennessee.*—There has been rain on four days of the past week, the rainfall reaching one inch and forty hun-dredths. Average thermometer 29, highest 44, lowest 18. *Mobile, Alabama.*—We had snow and ice yesterday, and to-day it is freezing. Rain fell on six days of the week, to the extent of seven inches and forty-seven hundredths. The thermometer has averaged 47, the highest being 66 and the lowest 26. Memphis, Tennessee. -Sleet and snow have fallen on five

thermometer has averaged 47, the highest being 66 and the lowest 26. Montgomery, Alabama.—The rain this week, which has fallen on five days, has been the heaviest on record. Railroads are overflowed. The rise in the Alabama River up to noon to-day has been fifty-five feet, and it is still rising, but slowly. There has been a very cold wave with heavy frost since yes-terday. The week's rainfall has been fourteen inches and sixty-four hundredths. Selma, Alabama—Rain has fallen on four days of the week to the extent of seven inches and fifty-six hundredths. The

to the extent of seven inches and fifty-six hundredths. The thermometer has ranged from 25 to 57, averaging 41. *Auburn. Alabama.*—Rainfall for the week four inches and sixty-three hundredths. Average thermometer 32°2, highest 53 and lowest 16.

Madison, Florida.--It has rained on four days of the week, the week, the precipitation reaching three inches and thirty-four hundredths; weather now cold and rainy. The ther-mometer has averaged 57, the highest being 76 and the lowest 32.

Rome, Georgia.-Business is practically suspended on ac count of floods.

Coumbus, Georgia.-We have had rain on five days dur | \* A cantar is 35 pounds.

ing the past week, the rainfall being four inches and forty-five hundredths. The thermometer has averaged 39, ranging from 27 to 59.

from 27 to 59. Savannah, Georgia.—The weather has been cloudy during the week, with rain on six days, to the extent of eighty-two hundredths of an inch. The thermometer has ranged from 30 to 72, averaging 48. Augusta, Georgia.—The weather has been cold and cloudy during the week, with general rains on six days. Snow fell lightly Thursday night. The rainfall reached two inches and ninety-seven hundredths. Average thermometer 42, highest 68 and lowest 23. 68 and lowest 23.

Charleston, South Carolina.—We have had rain on six days of the week, the precipitation reaching eighty-seven hundredths of an inch. The thermometer has averaged 52,

the highest being 68 and the lowest 30. Stateburg, South Carolina.—We have had rain on five days of the past week, the rainfall reaching one inch and eighty-seven hundredths. Average thermometer 39.6, highest 67 and lowest 26 and lowest 26.

and lowest 26. Wilson, North Carolina.—We have had rain on five days of the week, to the extent of one inch and thirty-six hundredths. Average thermometer 43, highest 72, lowest 22. The following statement we have also received by telegraph

showing the height of the rivers at the points named at 3 o'clock January 14, 1892, and January 15, 1891.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The receipt and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Jan. 14. BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

Shipments this week. | Shipments since Sept. 1. Receipts. Great Conti-Brit'n. nent. Total. Great Britain Year Conti-This Week. Since Sept. 1. Total. nent. 61.000 29,000 83,000 51,000 186,000 55,000 139,000 59,000 197,000 366,000 450,000 329,000 '91-2 '90-1

According to the foregoing Bombay appears to show a decrease compared with last year in the week's receipts of 22,00° bales and a decrease in the shipments of 10,000 bales, and the shipments since Sept. 1 show a decrease of 22,000 bales. The movement at Calcutta, Madras, and other India ports for the last reported week and since the 1st of September, for two years, has been as follows. "Other ports" cover Ceylon, Theteorin Kurrachee and Coconada. Tuticorin, Kurrachee and Coconada.

	Shipme	nts for th	e week.	Shipm	ents since Se	pt. 1.
	Great Britain.	Conti- nent.	Total.	Great Britain.	Continent.	Total.
Calcutta-						
1891-92	1,000	2,000	3,000	4,000	14,000	18,000
1890-91		4,000	4.000	5,000	15.000	20,000
Madras-						,
1891-92		1,000	1,000	14,000	9.000	23,000
1890-91	1,000		1.000	15.000	11.000	26,000
All others-						
1891-92	3,000	4,000	7.000	20,000	24.000	44.000
1890-91	1,000	1,000	2,000	16,000	25,000	41,000
Total all-						
1891-92	4.000	7.000	11.000	38.000	47.000	85,000
1890-91	2,000	5,000	7.000	36,000	51,000	87.000

The above totals for the week show that the movement from the ports other than Bombay is 4,000 bales *more* than the same week last year. For the whole of India, therefore, the total shipments since September 1, 1891, and for the corresponding periods of the two previous years, are as follows:

EXPORTS TO EUROPE FROM ALL INDIA

Shipments	189	1-92	189	0-91.	188	9-90.
to all Europe from—	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.

EAST INDIA CROP.-From the Bombay Company's cotton report dated December 19 we have the following :

EAST INDIA CROP.—From the Bombay Company's cotton report dated December 19 we have the following: It seems probable that the supplies of cotton for the coming season will be less than last year, and the common estimate of the shortage amounts to from 300,000 to 400,000 bales. The Government returns of acreage, though not quite complete as yet, show a falling off in the gal cotton is drawn. Owing to the want of early rains in the Ben-gal cotton is drawn. Owing to the want of early rains in the Ben-gal cotton is drawn. Owing to the want of early rains in the Ben-gal cotton is drawn. Owing to the want of early rains in the Ben-gal cotton, as compared with last year, may be attributed to the ordinary rotation of crops. No reliable figures of a reage are yet available from the Madras, Comptah and Dharwar districts, but there is no doubt that the area under cotton is small and that a very poor crop may be expected. The distress owing to the want of rain has been very great. Eather more encouraging accounts have been received of late, but whatever now happens there is no chance of anything but a very inferior outrum. No acreage returns have been received from Kathiawar (Dhollera districts), but there is no reason to suppose that the area planted is smaller than usual. Until quite recently there was every prospect of an unusually large out-turn, but reports have been received of the absence of dews, and the recent unusually hot weather neas withored up the plants. The flowering of the plants also has been retarded owing to bad weather. These unfavorable reports have eaused a considerable reduction in the estimated out-turn, which, it is now thought, will not exceed last year's. The next six weeks are, however, very important for the crop, and if favorable weather inter-there is not much change in the area planted, though it is probably less than last year. This crop is now reported to be doing well, but has still to face the critical period between now and the end of Jan-ury. Mere is not much change in the area p

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. -A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The monthly movements since Sept. 1, 1891, and in previous years, have been as follows.

Monthly		Year Beginning September 1.									
Receipts.	1891.	1890.	1889.	1888.	1887.	1886.					
Sept'mb'r	676,823	732,236	561,710	332,017	654.776	359,203					
October	1,532,426	1,365,231	1,325,358	1,133,016	1,213,404	1.034.450					
Novemb'r	1,376,909	1,145,416	1,257,520	1,159,063	1,178,436	1.197.259					
Decemb'r	1,215,144	1,195,063	1,116,928	1,103,713	963,584	1,164,886					
Total	4,801,302	4,437,946	4,261,516	3,727,809	4,010,200	3,755,798					
	of tot. port										
receipts	Dec. 31	63.46	72.52	67.20	71.58	70.59					

This statement shows that up to December 31 the receipt<sup>5</sup> at the ports this year were 363,356 bales more than in 1890 and 539,786 bales more than at the same time in 1889. By adding to the totals to Dec. 31 the daily receipts since that time we shall be able to reach an exact comparison of the movement for the different years.

JUTE BUTTS, BAGGING, &C.-Jute bagging has ruled steady during the week under review, but the volume of business has been small, the requirements of consumers having been pretty well supplied. The closing quotations this evening are 51/2c. for 13/4 lbs., 6c. for 2 lbs. and 61/2c. for standard grades, The dealings in butts have been only moderate, yet the market continues firm at higher prices. Quotations are 134c. for paper grades and 21/2@23/4c. for bagging quality on the spot and 3c. for future delivery.

SHIPPING NEWS.—The exports of cotton from the Unit **d** states the past week, as per *latest mail* returns, have reach **d** 223,135 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

#### BREADSTUFFS.

FRIDAY, January 15, 1892,

The markets for wheat flour and the coarser stuffs were more or less depressed early in the week by the decline in the grain markets, which led buyers to expect and sellers to concede some reductions in values, which are reflected. pretty generally in the cheaper prices quoted below. On Wednesday the lower prices, with the steadiness in wheat, led to more activity in the dealings in wheat flour, buyers taking the whole range of grades, both for export and home use. To-day the market was weak and values quite unsettled.

The wheat market suffered severe depression early in the week. A fall of snow at the West improved the prospects. for the next crop. Arrivals at Western markets were greatly in excess of former years and of current requirements. Cable advices were weak, and there was a considerable increase in the quantity on passage for Europe. Some of the "long" interest was forced to liquidate, and the current demand was not sufficient to give any adequate support to values. The price of May contracts for No. 2 red winter fell on Tuesday to \$1 01%, from which price there was in the course of Wednesday and Thursday a slight and feverish recovery. The business for export yesterday embraced No. 1 Northern spring at \$1 0334 afloat and No. 2 red winter at \$1 03 afloat. To-day prices again broke down under weak cables and a renewed report that Russia will remove the prohibition against exports.

Indian corn has been further depressed by the excessive supply coming forward from the new crop, which not being in the best condition for storing, is pushed upon the market at such prices as it will bring. The difference between new and old corn was shown on Tuesday, when new No. 2 mixed sold at 5134@524c. afloat and old sold at 58c. afloat; so that when it comes to "steamer" grades the difference is quite marked. To-day there was not much change, but the spot trade was active at full prices. DALY CLOSING PRICES OF NO. 2 MIXED CORN.

#### THE DRY GOODS TRADE.

NEW YORK, Friday P. M., January 15, 1892.

The absence of a pronounced demand for staple lines of cotton goods continues to be the subject of comment among agents, to whom it is becoming increasingly apparent that notwithstanding the fine prospects ahead buyers are still in the main determined not to largely anticipate their requirements. It is believed that the present policy would be abandoned, however, should cotton make a material advance, as the late extreme weakness of the staple is the only visible reason why the experience of the present season in the goods market is so different from that of previous years. It is market is so different from that of previous years. It is also out of keeping with the anxiety displayed by buyers for speedy delivery of their purchases. The deliveries from the mills and warehouses are still large of plain and printed cot-tons, and even wash goods, in which first business was com-pleted some time ago, are still moving out in goodly volume. The tone of the market rules generally steady and prices on the week are mostly without change. Jobbing business has been largely confined to wash fabrics, only a slow trade pass-ing in other departments. There is still a general absence of complaint so far as collections are concerned, and salesmen on the road, and others, report more favorably of future prosthe road, and others, report more favorably of future pros-pects than of business in actual progress.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending January 12 were 2,093 packages, valued at \$111,390, their destination being to the points specified in the table below:

		1892	1	1891
NEW YORK TO JAN. 12.	Week.	Since Jan. 1.	Week.	Since Jan. 1
Great Britain	76	138	70	250
Other European	8	30	40	50

Bouth America	782	2,328	860	1.521
Other countries	16	34	11	28
Total	2,093	5,332	3,522	5,671
China, via Vancouver				
Total	2.093	5,332	3,522	5,671

The value of the New York exports since January 1 have been \$270,439 in 1892 against \$339,160 in 1891.

The demand for staple cottons has been of an intermittent character and generally without activity. Bleached shirtings rule steady and in many instances are well sold ahead. For brown sheetings there have been more inquiries for export goods, but at such low prices that only a small business has resulted. Colored cottons were without new feature apart from Southern plaids. In these the Con Agency has discon-tinued the large rebate previously made, and prices are now quoted at standard 4½ yards, 5½c.; ditto, 5 yards, 4¾c.; ditto, 5½ yards, 4½c., and 6 yards, 4c. net, or 2 off 1) days. Standard prints have been in steady demand, while sp cial-ties in fine printed tissues are in some instances sold to full extent of production. A moderate duplicating business is re-ported in standard and fine dress ginghams, but white goods and fast black fancies are quiet. A fair business has trans-pired in print cloths, although manufacturers are still some-what indifferent sellers of 64 squares at 3 1-16c. per yard. For 56x60s 2 9-16c.@25%c. is quoted here and at Providence re-spectively, and 2¾c. at Fall River for 60x56s. **Biote of Print fluther** The demand for staple cottons has been of an intermittent

Total stock (pieces)	1-1-7813	838.000	372,000

DOMESTIC WOOLENS .- The demand for men's-wear woolens DOMESTIC WOOLENS.—The demand for men's-wear woolens and worsteds for fall delivery has shown some improvement this week in qualities ranging from \$1 50@\$2 50 per yard, with the bulk of business at prices under the \$2 00 mark. Friezes and cheviots in woolens and pieces dyeds and mixtures Friezes and cheviots in woolens and pieces-dyeds and mixtures in worsted goods appear to be attracting most attention at the present time. The overcoatings business continues of fair extent and leading makes are all well under orde . Satinets, union and cotton warp cassimeres are still without activity, although some varieties have had rather more interest taken in them. Spring cloakings are in good request and steady in price. Flannels and blankets are quiet, but the demand for carpets shows improvement. All-wool and worsted dress goods are being delivered as quickly as production allows in all favorite makes, Bedford cords and crepons being par-ticularly called for by buyers.

FOREIGN DRY GOODS.—Importers have again had a quiet week where dependent upon new business. Few buyers have been around, and they have shown more anxiety to have previous purchases completed than a desire to make new en-gagements. In silks and woolen and worsted dress goods gagements. are without feature. Prices are steady for all spring goods, but there are still some broken stocks around which importers are disposed to move without much consideration of price.

#### Importations of Dry Goods.

The importations of dry goods at this port for the week ending Jan. 14, 1892, and since Jan. 1, and the same facts for the corresponding periods of last year are as follows:

#### THE CHRONICLE.

# STATE AND CITY DEPARTMENT.

TERMS OF SUBSCRIPTION.

Commercial and Financial CHRONICLE contains 40 to 64 pages published every week.

State and City Supplement of CHRONICLE contains 184 pages published several times each year.

Investors' Supplement of CHRONICLE (a Cyclopædia of Railroad Securities) contains 160 pages published every other month.

Subscription to CHRONICLE for one year \$10.00, which includes every issue of both SUPPLEMENTS.

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the STATE AND CITY SUPPLEMENT. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the STATE AND CITY SUPPLEMENT to as near the current date as possible. Hence if every Subscriber will note in his SUPPLE-MENT on the page designated at the head of each item a reference to the page where the item in the CHRONICLE can be found, he will at all times possess a complete and fresh cyclopædia of information respecting Municipal Debts.

## KANSAS LAWS AFFECTING MUNICIPAL BOND ISSUES.

[FOURTH ARTICLE.]

In accordance with the promise contained in our last article on the laws of Kansas relating to municipal debt (CHRONICLE, January 2, page 42), we take up to-day the General Statutes which have been framed for the organization and government of Cities. It will be remembered that to conform with the Constitutional provision prohibiting the Kansas Legislature from passing any special acts conferring corporate powers, cities were by the Legislature divided into three classes (first, second and third class), according to population, and general laws were enacted for the organization, &c., of each class. It is of those laws we propose to treat now.

The inquiry in its natural course opens with the Statute making provision for cities of the first class. In "First Class" our second article of this series (CHRONICLE Cities. Tax Dec. 19 1891, page oral in galactic referred Limit as fix. ed in Stat- tails of the three-fold classification referred Tax Dec. 19 1891, page 942) we gave full deto above. Consequently it will only be necessary to state here in a general way that under the title of "Cities of the First Class" is included any city having fifteen thousand inhabitants or over which the city authorities have certified to the Governor as containing that population and which the Governor has declared by public proclamation to be a city of the first class. Since the statute states that the municipality so designated thereupon becomes subject to the law we are about to consider, it seems proper to assume that the limitations and restrictions in this General Statute control the action of the city authorities on all points of difference between it and other statutes. In the matter of taxation we find a number of provisions, and as they lack uniformity the intent is not in all respects perfectly clear.\* First we have section 555, page 201, subdivisions First, Second and Third, where the law limits the power of taxation (1) "for general "revenue purposes not to exceed 6 mills;" (2) "for "general improvements excepting sewerage and improve-\* All our citations respecting cities of the first class refer to the Gen-

eral Statutes of Kansas, compilation of 1889, Vol. I., Chapter 18, pages 198 to 253 inclusive.

"ments for which special assessments are levied" (additional to "general revenue purposes") "not to exceed 6 "mills;" (3) for paying interest-coupons on all bonded debt (additional to above) to an amount sufficient to pay the same; (4) a license tax upon all professions and occupations carried on in the city.

These provisions standing by themselves appear plain enough; but as we proceed we find other sections which Interest on appear to modify the restrictions contained Debt and in the foregoing. For instance, Section requirement 569, page 214, enacts that "at no time " shall the levy of all city taxes of the current year for all " purposes exclusive of schools, water works, sewer and "special improvement taxes, and a general tax for the " paving or macadamizing of areas formed by the inter-"sections of avenues, streets and alleys, exceed two per " cent of the taxable property of the city." The "special improvement taxes" referred to in the above are taxes authorized to be laid wholly on the abutting lots and blocks of land and are for paving, macadamizing, curbing, guttering of streets, for sewerage and drainage by districts, &c. Of course the restriction to two per cent in the last section cited cannot include interest coupons. Then again by Section 573 the City Council is "authorized to make provision for a sinking fund to redeem at maturity the bonded indebtedness of the city." We assume that the word "authorized" means in this case "required," and that a tax for sinking fund purposes would be inserted regardless of this 2 per cent restriction.

As to Bond issues authorized in this General Statute for the Government of first class cities, the provisions.

Bonds for Improve tained in Section 586, page 219. This secments of a General tion authorizes the Mayor and Council to borrow money and issue bonds therefor for

the purpose of paying for "any improvements of a "general nature," and "for the construction of water "works and water power." This authority cannot be exercised, however, "until the City Council shall be "instructed" to borrow the money and issue the bonds "by two-thirds of all the votes cast at an election held "for that purpose," &c. It should be stated that this is a law of 1881, and that it restricts the interest to 6 per cent and requires the bonds to be sold at not less than par and to be made payable in not less than ten years and not more than twenty years, and also makes obligatory a tax levy "on all taxable property within the city, in "addition to other taxes, to pay said bonds at their ma-"turity and their interest coupons as they respectively "become due," except "whenever any of said bonds "are issued" \* \* "for an improvement chargeable "to any particular or local property, the taxes" can "be "levied only on such property."

There are other bond authorizations contained in the statute: (1) Section 587 for bridges and culverts (these Bondsforspe- can only be issued with the consent of a ments. Brid- majority of the legal votes), and for refundges. Only ets., and for refundges. Culverts, ing such bonds, the rate of interest not to ing, Curbing, exceed 7 per cent, the length of bond not being stated; (2) for sewers (Section 588) and for refunding of same, rate of interest not to exceed 7 per cent, no length stated for bond; (3) for guttering or paving or macadamizing (Section 589) or for refunding the same, rate of interest not to exceed 7 per cent, length of bond not fixed. In addition to the foregoing there is a kind of bond authorized by Section 590 called "improvement bonds of the city payable in instalments "of equal amounts each year" to run not longer than

ten years, nor to bear more than 7 per cent interest. This Section 590 was passed in 1887, and very likely was intended in some measure at least to supersede the before-mentioned sections 587, 588 and 589, which were passed in 1885. We assume that to be the fact because this latest statute covers the same objects for improvement provided for in the earlier sections, as well as other objects, and is quite elaborate in its details. It (Section 590) provides that the credit of the city issuing the bonds shall be pledged for the payment thereof; that the instalment coupons shall include the interest on the instalments to the maturity thereof; that if the bonds are issued for an improvement which is by law charged by special assessment against specific property, the Mayor and Council shall levy a special assessment on that specific property each year to meet the year's instalment and interest.

The General Statute framed for the purpose of incorporating and governing "Cities of the Second Cities of see- Class" is contained in Chapter 19, Section Taxes for 756 to and including Section 921, Volume 1. Interest This class we would state in general terms Sinking includes all cities of over two thousand in-

habitants and not exceeding fifteen thousand inhabitants. The limit of taxation is fixed by Section 796. which provides that at no time shall the levy of all city taxes for general purposes (exclusive of school taxes) exceed four per cent. The previous section (795) requires in addition to other taxes a levy sufficient to pay "the interest and coupons" as they come due on all bonds the city has issued or shall issue; and Section 794 not only authorizes but in this case the statute by its terms requires that the City Council make provision for a sinking fund to redeem at maturity the bonded indebtedness of the city.

With regard to the bonded debt of this class of municipalities, the first feature of importance to be Bond issues noted is the limitation to be found in Sec-Limited to 10 per cent. tion 797, where it is stated that the bonded indebtedness of any City of the Second Class shall at no time exceed 10 per cent of the assessed valuation. This limit does not include bonds issued for improvements for which a special tax is levied upon the property improved; and does not forbid the refunding of any existing bonded indebtedness. Section 792 authorizes the City Council to issue bonds for general improvements, but only when instructed to do so by a majority of all votes cast at an election held for the purpose; these bonds shall be payable in not less than ten years nor more than twenty years from date of issue, and rate of interest must not exceed ten per cent. Street bonds can be issued without a vote of the people, but must be payable within one year and out of that year's taxes. Bonds for special improvements are authorized Bonds auth- by Section 790, which was in the original orized for law (passed in 1872) and amended in 1885, wellas Gen and by Section 832 which was passed in poses. 1885 and amended in 1907

1885 and amended in 1887. The latter . section appears to cover about the same objects as the former, but the former requires the bond to be paid in three or five instalments, each year's coupon being for the year's instalment and interest (at not more than 8 per cent) on all sums unpaid ; whereas the latter provides for a bond not longer than ten years at not more than 7 per cent interest with the coupons attached payable each year, each coupon including its portion of the instalments to be paid with interest on all sums unpaid. Other Special Improvement Bonds are authorized by Sections 833, 834 and 835; these are sewerage and 129

sewer bonds, and the provisions are very like those last cited with reference to levying a tax on the property benefitted, and also with reference to the payment of the bonds by instalments.

We cannot omit to mention one other class of obligations Cities of the Second Class are authorized to issue.

Bond Issues We refer to what may be called manufactur-for manu-facturing, ing bonds. Their issue is authorized, the &c., Purpo-ses. Statute states, "to encourage the establishment of manufactories and such other enterprises as may tend to develop and improve such city." A majority of the votes cast at an election called for that purpose is required if more than one thousand dollars to any one object is to be granted. But this law is of a kind which, as we have before said, is probably unconstitutional and void. The courts have often decided that the public cannot be compelled to pay taxes to aid in the establishment of private enterprises.

#### Bond Proposals and Negotiations.-We have re

ceived through the week the following notices of bond recently negotiated and bonds offered and to be offered for sale.

Buffalo, N. Y.-(STATE AND CITY SUPPLEMENT, page 49.)-Buffalo has sold \$300,000 more of her 3<sup>1</sup>/<sub>2</sub> per cent charter bonds.

Bexar County, Tex.—(STATE AND CITY SUPPLEMENT, page 180.)—The State of Texas, as our readers know, has been negotiating with Bexar County for the purchase of \$240,000 of new county court house bonds, interest at 6 per cent, payable annually on April 10th, and principal due May 11 1911. County Treasurer Edward Froboese now writes us that the sale did not take place and the bonds are on the market.

sale did not take place and the bonds are on the market. **Cadwell County, Ky.**—(STATE AND CITY SUPPLEMENT, page 161.)—Cadwell County has issued a call for \$10,000 of its out-standing 6 per cent bonds, which will be redeemed on March 1 1892 at office of the County Treasurer in Princeton, Ky. The bonds are designated as follows : Denomination \$1,000—Nos. 51, 47. Denomination \$100—Nos. 38, 58, 31, 18, 1, 49. Denomination \$100—Nos. 26, 96, 44, 46, 127, 117, 92, 112, 110, 54, 113, 104, 107, 98, 18, 78, 94, 35, 114, 89, 68, 115, 122, 80, 85, 97, 119, 121, 21, 6, 125, 123, 106, 27, 99, 116, 48, 32, 124, 126, 3, 5, 75, 65, 63, 102, 76, 87, 62, 51. Interest on these bonds will cease at date mentioned above. Cedarfown. Ga.—The city of Cedartown has recently sold

Cedartown, Ga.—The city of Cedartown has recently sold at 95 \$50,000 of 6 per cent bonds.

Cherokee County-North Carolina.-New bonds of Cherokee County are offered for sale to the amount of \$30,000, bear-ing interest at 6 per cent, payable annually on April 1. The bonds are to be dated April 1 1891 and mature April 1 1921. We give below the financial status of the county, including this new issue. County seat is Murphy.

The act authorizing this new issue of bonds provides for the

establishment of a sinking fund and special tax levy for the payment of the bonds at maturity, and also requires that the interest coupons be receivable for county taxes.

Cincinnati, Ohio.—(STATE AND CITY SUPPLEMENT, page 86.) —The Board of Administration of Cincinnati are to receive proposals until Jan. 30 1892 for City Hall bonds to the amount of \$200,000, dated Dec. 1 1891, payable June 1 1909, and optional after June 1 1899. Bonds are to bear interest at the rate of 4 p. c. per annum, payable semi-annually on June and December 1st at the American Exchange National Bank of New York New York.

Crockett, Tex.—This city has sold \$12,000 of 30-year 6 per cent improvement bonds.

cent improvement bonds. Kansas City, Mo.--(STATE AND CITY SUPPLEMENT, page 120).-The date for receiving bids for \$2,000,000 4 per cent bonds to pay for constructing new water works in Kansas City has been postponed to February 5. A communication addressed to the Mayor and City Council, signed by prominent citizens, appears in the Kansas City papers. This letter urges, and it would seem very wisely, that it would be better to come to an agreement with the existing Water Company rather than to tear up the streets and duplicate unnecessarily the present plant. We understand the present Water Com-pany have offered to submit to arbitration the whole matter in controversy. Naturally the Water Company will defend their chartered rights, and as a non-resident company the case will have to be decided in the United States Supreme Court. This means delay, and in the meantime the proposed new bond issue must be more or less under a cloud. Newark, N. J.--(STATE AND CITY SUPPLEMENT, page 66.)

Newark, N. J.-(STATE AND CITY SUPPLEMENT, page 66.) he new water bonds of this city will be on sale in small The new

lots to local investors until Jan. 27, after which date the re-mainder of the \$2,000,000 loan will be offered to outside pur-chasers. It is reported that about \$500,000 of this loan has already been taken.

Penns lvania.—(STATE AND CITY SUPPLEMENT, page 69, and CHRONICLE, Vol. LIV., page 44.)—It is reported that the State Sinking Fund Commissioners have agreed to sell Government bonds to the amount of \$300,000, in order to have a sufficient sum on hand to pay off the funding bonds of 1877, which fall due Feb. 1 1892. The amount of these bonds outstanding on Dec. 1 1891 was \$1,444,800.

**Portland, Oregon.**—(STATE AND CITY SUPPEMENT, page 151.)—Bids for \$100,000 of Port of Portland bonds were opened on Dec. 30 1891, but none of the proposals were accepted.

**Rensselaer County, N. Y.**—(STATE AND CITY SUPPLEMENT page 57.)—The bond table in our recent SUPPLEMENT shows that \$35,000 of this county's war bonds (*renewal*) fall due in 1892. Of this amount \$27,000 will be again renewed by the sale of 4 per cent 15-year bonds. This sale will take place on January 30 in Troy, N. Y.

Spokane County, Wash.—(STATE AND CITY SUPPLEMENT, page 152.)—This county has sold \$183,000 of 10-20 bonds bearing interest at 6 per cent, payable semi-annually.

Wilkesbarre, Pa .- (STATE AND CITY SUPPLEMENT, page 77.) -Bonds of this city to the amount of \$20,000 will be offered for sale on Jan. 20 1892.

#### STATE AND CITY DEBT CHANGES.

We subjoin reports as to municipal debts received since the publication last week of our STATE AND CITY DEPART-MENT. Some of these reports are wholly new and others cover items of information additional to those given in the SUPPLE-MENT, and of interest to investors.

Iowa-Clay County .- We have received this week the following statement of the debt and valuation of Clay County. As this is the first information we have obtained from the county no report appeared in our STATE AND CITY SUPPLE-MENT.

County seat is Spencer.

LOANS— When Due. Tax valuation, personal. \$421,844 COUNTY BONDS— 6s, M&N, \$45,000....May 1, 1896 Interest payable at Co. Treasury. State tax (per \$1,000)... \$2:00 Total debt Jan. 1 1892... \$45,000 Tax valuation, real.....1,915,254

Iowa-Franklin County .- The following financial statement for Franklin County was received December 31. As this is the first information we have received regarding the county, its debt figures did not appear in our STATE AND CITY SUPPLEMENT.

County seat is Hampton.
