THE NATIONAL STARCH MANUFAC-TURING COMPANY. OFFICE OF THE TREASURER, 29 BROADWAY, NEW YORK, April 6, 1892. * The semi-annual FOUR PER CE \T divised due May 1, 1892, on the first preferred stock of this com-pany will be paid at this office on May 2 to stock-holders of record at the closing of the books April 1892. The transfer books will be closed at 3 P. M., April 4, and reopen at 10 o'clock Tuesday morning, May 3. The coupons due May 1, 1992, on the bonds of the National Starch Manufacturing Company will be paid on Monday, May 3. upon presentation at the chase National Bank, New York. CHARLES C. BURNS, Treasurer.

NEW YORK, April 8, 1892. To the Holders of Voting Trustees' Certificates for 1st and 2d Preference Stock of the Chesapeake & Ohio Rail-

way Co.

Holders of over two-thirds in amount of each class of Chesapeake & Ohio Railway Company stock trust of Chesapeake & Onio Kaliway Company stock trust certificates issued by the undersigned having as-sented to the creation of the securities outlined in the plan set forth in said Company's circular of Jan. 22, 1892, said plan has been carried into effect and securities have been issued and delivered to us to enable us to proceed with exchanges thereunder Holders of our certificates for first and second preference shares may now exchange them at the office of Drexel, Morgan & Co., 23 Wall Street, New York, who will make exchanges without delay.

The basis of exchange, as set forth by the Railway Company in said circular of January 22, 1892, is: The first preferred stockholders to receive two-

thirds of the face value of their stock in its new 4½ per cent General Mortgage Bonds, bearing interest from July 1, 1892, and one-third in common stock trust certificates. The second preferred stockholders to receive one-third of the face value of their stock in like bonds and two-thirds in common stock trust certificates. Fractions will be adjusted by equitable

cash settlements. The bonds are for \$1,000 each, and bear interest from March 1, 1892, and their recipients, under this notice, may either pay the four months' interest (from March 1 to July 1), viz., \$15 per bond, in cash, or the company will detach the September coupon and pay the interest from July 1 to September 1,

viz., \$7:50 per bond in cash. Pursuant to arrangements made for the purp the shares of preference stock so exchanged will be transferred and placed in trust, being marked "non-negotiable," it being intended that they shall be so held until all or nearly all, the preference shares shall have been exchanged, when they may be canceled, unless it should be decided to cancel them at an earlier date.

J. FIERPONT MORGAN, JOHN CROSBY BROWN, GEORGE BLI-S, Voting Trustees.

Valuable Copper Mining Property

For Sale.

For Sale. THE SAINT MARY'S COPPER MINING COM-PANY, at their last Stockholders' Meeting, voted not to extend their charter, but to sell their real estate and wind up the corporation. Accordingly they now offer for sale their Mining Location in Houghton County, Michigan. This consists of the North half (N&O Section Eighteen (8) in Township 55 North of Kange 33 West, and the North half (N%O and the South West quarter (8. W. 34) of Section 13, Township 55 North of Range 34 West. The lands contain 800 acres in one body and extend for two mises from East to West across the very heart of the mining District of Lake Superior. The Mineral Range railroad traverses the entire length of 3240 feet across the North Half of Section Eighteen, and both the "Albany & Boston Conglomerate" and the "Epidote Lode" traverse the same section with the same length of veit. This property is one of the nosp promising and valuable for exploitation in the Company's affairs. Applications for the purchase of same with be received at the Company's office, No. 68 Devonshire St., Room 14, Boston. "HEED'K BECK, Treasurer.

STATE AND CITY DEPARTMENT.

THE

Sce pages 612, 613, 614 and 615 for our State and City Department to-day. Among many other items of news we give the full detailed statements of the bonded debt, assets, valuation, etc., of New York State and Pennsylvania, each report having been corrected for the CHRONICLE by State officials.

All advertisements with relation to State and City Bonds will likewise be found on the same and following pages.

A new edition of the STATE AND CITY SUPPLEMENT,

revised to as near the day of publication as possible, will be issued early in the month of May.

THE FINANCIAL SITUATION.

Though complaints of poor trade are still very frequent, a more hopeful feeling pervades business circles. Even the silver advocates in Congress are beginning to admit that their pet measure now stands and that only a slim chance of success, the outlook for free silver is growing poorer every day. This belief is also shared in by the general public, and has made a distinct impression on the public mind, so that business men are taking fresh courage and becoming somewhat more venturesome. It must be evident now that it was a mistake not to force the issue sooner. If instead of dallying with the evil, a firm, determined stand had been taken two years ago and all propositions of compromise rejected, the present obnoxious law under which the Government is compelled to purchase 54 million ounces of silver a year, and which is deranging and debasing our currency, and must prove a check on the full development of industrial interests so long as it remains on our statute books, might have been averted. And then how different the industrial aspect would be! With nations as with individuals, compromise measures, where principle is involved, are futile and fatal, and the history of the United States is especially rich in illustrations of the truth of this statement.

Money on call remains at the now almost stereotyped rate of $1\frac{1}{2}$ to 2 per cent. Renewals are made at 2 and banks and trust companies quote 2 per cent as the minimum and none pretend to ask more. On time there are such liberal offerings of money from every quarter, except perhaps from our city banks, that lenders find it necessary to continue employing brokers to get their funds out. When borrowers are found, not only are very advantageous rates offered, but almost any fairly good collateral is accepted, and in cases where a superior grade of security is given the quoted rates are shaded, with the stipulation, however, that the security shall remain without substitution to the maturity of the loan. Rates are $2\frac{1}{2}$ per cent for 30 days; 3 per cent for 60 to 90 days; $3\frac{1}{2}$ per cent for 4 to 5 months, and 4 per cent for 6 to 7 months. The offerings of commercial paper are now much larger than a month ago, but so eagerly are good names sought for, not only in the city, but in the interior, that there is no accumulation, and consequently rates are easier, being now quoted at $3\frac{1}{2}$ per cent for 60 to 90 day endorsed bills receivable, 4 per cent for 4 months commission house names, and $4\frac{1}{2}$ to 5 per cent for good single names having from 4 to 6 months to run.

The feature in the European situation this week has been another decline in the price of bar silver, which after reacting to 403 pence on Monday, on Thursday fell to 394 pence again, unsettling Eastern exchanges; yesterday, however, there was a recovery to The cable, referring to the fall in the 39¹/₂d. price last week, states that Indian trade was demoralized and the market for shares of Indian banks thrown into a panicky condition. After the recovery in the price of the metal, confidence was partially restored, but paralysis in trade remained, and doubtless this is the condition this week. It is reported that London bankers have decided to form a city committee of the Bi-metallic League to urge upon the government the need of cooperation with other nations in the coinage of gold and silver. The Bank of England minimum rate of discount was reduced on Thursday to $2\frac{1}{2}$ per cent from 3, at which it had stood since January 21. The cable reports discounts of 60 to 90 day bank bills in London $1@1\frac{1}{8}$ per cent. The open market rate at Paris is $1\frac{1}{2}$; at Berlin it is $1\frac{1}{2}$, and at Frankfort $1\frac{3}{4}$ per cent. The Bank of England lost £815,000 bullion during the week. This, as we are advised by special cable to us, was due to shipments of £1,084,000 to the interior of Great Britain, to exports of £25,000 to Malta, and to receipts of £294,000, part from Portugal and part bought in the open market. The Bank of France shows a gain of £425,000 gold for the week, and since the last return the Bank of Germany has lost about £1,660,000 of this metal.

Exchange was dull and firm until Wednesday when it grew easier, influenced by offerings of bills drawn by the arbitrage houses against outgoing securities, the purchases of which in the stock market were large. There was a scarcity of commercial bills, however, and the market appears to be dependent mainly upon bankers' bills. Rates opened on Monday at 4 87 for long and 4 89 for short, with the exception of the Bank of Montreal and the Bank of British North America, which advanced the 60 day rate to 4 871, and later in the day Brown Bros. also moved up to 4 871 for long, leaving Baring, Magoun & Co. at 4 87 for 60 day and 4 89 for sight. There was no change on Tuesday, but on Wednesday Baring, Magoun & Co., advanced the long rate to 4 871, while Brown Bros. and the Bank of Montreal reduced long to 4 87 and short to 4 881. On Thursday the Bank of British North America lowered the sight rate to $4.88\frac{1}{2}$. The market closed steady yesterday at 4 87@4 $87\frac{1}{2}$ for 60-day and 4 $88\frac{1}{2}@4$ 89 for sight. Rates for actual business were $4.86\frac{1}{4}@4.86\frac{1}{2}$ for long, $487\frac{1}{2}@487\frac{3}{4}$ for short, $487\frac{3}{4}@488$ for cable transfers, $4\ 85\frac{1}{4}$ @ $4\ 85\frac{1}{2}$ for prime and $4\ 85$ @ $4\ 85\frac{1}{4}$ for documentary commercial bills.

In view of the low prices prevailing and the complaints of unsatisfactory trade, our figures of bank clearings possess considerable interest. We give below the statement usually given on the preceding page, and which shows the results for the current week at seven leading centres, as received by telegraph last night. It will be observed that as compared with the corresponding week last year, there is quite a large ratio of gain in the aggregate—15.8 per cent. Of course, as far as New York is concerned, a more active speculation on the Stock Exchange has had much to do with the improvement, but with the exception of New Orleans and Boston the other cities also all show gains. Philadelphia and Chicago particularly have large increases. The loss at New Orleans reflects the condition of things in the South. The loss at Boston, however, has no significance, being due entirely to the occurrence of Fast Day in the week this year.

CLEARINGS.	Week Ending April 9.					
Returns by Telegraph.	1892.	1 1891.	Per Cent.			
New York	\$60 ,352,221	\$508,608,698	+19.6

Total all cities, 5 days	\$986,716,780	\$861,859,665	+14.5			
All cities, 1 day	215,804,311	200,445,754	+7.6			
Total all cities for week	\$1,202,521,091	\$1,062,305,419	+13.2			

We have also prepared this week our statement of clearings for the month of March, and in that case a more extended analysis is possible. For the whole country -that is at all the clearing houses combined-the gain as compared with last year reaches over a thousand million dollars, or 25.1 per cent, the total having risen from 4,234 millions to 5,296 millions. There was a decline last year, but only from 4,641 millions to 4,234 millions. In the increase the present year the Stock Exchange business has played a very important part. The statement of Stock Exchange sales during March which we gave last week enables us to measure roughly the extent of that influence. The market value of the share transactions this year according to that statement was 484 million dollars, against only 195 million dollars in the corresponding month last year, being an increase of 289 million dollars. At our usual average of $2\frac{1}{2}$ checks to each transaction, this increase of 289 million dollars in the stock sales would represent an increase in clearings in amount of 722 million dollars. As the total increase in clearings is 1,062 million dollars, this still leaves a considerable margin of gain not due to the New York Stock Exchange sales. Even in the case of the New York clearings, where the total increase is 815 million dollars, the increase of 722 million dollars in the stock sales leaves a fair margin of The following furnishes a summary of the gain. clearings both with and without New York. It will be noticed that outside of New York the increase for the month is 13.8 per cent.

MONTHLY CLEARINGS.

Month.	Clearings, Total All.			Clearings Outside New York			
	1892.	1891.	P. Ct.	1892.	1891.	P. Ct.	
	\$	\$	-	8	\$		
January	5,652,864,766			2,103,748,800	2,010,201,886	+4.7	
February	5,207,327,071			1,969,858,135	1,668,522,867		
March	5,296,215,774			2,035,569,251	1,788,013,198		
1st quar.	16,155,907,611	13,174,380,935	+22.6	6.109.176 186	5,466,737,951	111.0	

Besides the stock sales, there is one other modifying circumstance to consider, and this applies not only to New York but to all other points. There was an extra business day in the month the present year-that is to say, there were only four Sundays in the month in 1892, leaving 27 business days, while in March 1891 there happened to be five Sundays, leaving only 26 business days. Where, however, the conditions have been unfavorable-as at New Orleans and San Francisco on account of the depression in the sections in which those points are situated-even this extra day has not sufficed to prevent a falling off in the clearings for the month, though it is proper to say that at the first-mentioned point, namely New Orleans, the decrease is not heavy, the total this year standing at 44 millions, against 45 millions. At San Francisco, the decrease has been more important, the aggregate for 1892 being only 67

zed for FRASER

millions against 78 millions for 1891. The subjoined furnishes a comparison extending back seven years at eleven leading cities—both for March and the three months ending with March.

Total all... 16,156 13,174 14,346 13,504 11,403 12,428 12,192 9,144 Outside N.Y. 6,109 5,466 5,427 4,849 4,282 4,156 3,666 3,046 With the two exceptions already mentioned—New Orleans and San Francisco—every one of the cities separately given in the above, exhibits an increase, and in the majority of cases the 1892 totals are the largest of all the years. The expansion at Chicago—from 334 millions to 404 millions—particularly attracts attention, since that point has been steadily gaining for a series of years.

The management of the Mexican National, in the annual report issued this week, find it possible to speak quite encouragingly of the outlook for that property. President Raoul's remarks are quoted in full on another page, and he presents a plain, straightforward and business-like statement of the company's affairs. Net earnings for, the year in American currency were \$927,217, but \$335,964 was spent in making extra repairs and renewals, and this with some other items of expenses reduced the sum available for interest to \$480,650. The difference between that amount and the \$738,835 interest on the Prior Lien bonds was supplied out of the subsidy collections. It is believed that the point has now been reached where the Prior Lien interest can be met entirely out of earnings. For a number of years the management have spent large sums in improvements and charged the same against earnings. Such a policy, where not carried to extremes, is always commendable. In the Mexican National case it was imperative, since severe trials and misfortunes had impaired the road's credit and also its physical condition, so that extensive outlays were required to bring the property up to a fair standard. The good effects of that policy are now being felt, and it is thought that quite moderate expenditures hereafter will suffice to keep the property in condition. If the expectation that interest on the Prior Lien bonds can be met out of earnings shall be realized, then the holders of the junior bonds-more particularly the series A bonds which bear accumulated interest since 1887-are to be congratulated, for in that event the subsidy collections available for this purpose can be used to their full extent in the gradual extinction of the Prior Lien bonds, thus reducing the amount of said

bonds ahead of the junior securities. Just now gross earnings are falling off somewhat, because of dull trade following last season's poor crops in Mexico, and also because of the low price of silver which has led some importers to hold off on their purchases in the hope of an advance in the metal. This however is considered merely temporary. But even with lower gross earnings the amount available for interest is much larger than a year ago, owing to the diminished expenditures for betterments. The company has begun to furnish complete statements each month, to show just what has been earned for interest, and from the latest statement of that kind it appears that for January and February, 1892, the amount so available was \$126,082, against only \$105,516 for the two months of 1891.

We shall print our usual monthly review of railroad gross earnings for March next week. A preliminary tabulation which we have prepared shows a gain of \$3,348,862, or 9.35 per cent, 108 roads being comprehended in the statement. Some more returns of net earnings for February have been received this week, and they are of the same character as those previously noticed. Among Northwestern roads, the Minneapolis & St. Louis is distinguished for a very heavy ratio of improvement, the net this year being \$81,737, against only \$43,820 in February 1891. Still more noteworthy is the gain on the St. Paul & Duluth, where net this year is \$61,560, The Chicago Burlington & against \$22,818. Northern for the same month has net of \$68,544, against \$51,026. The Wabash has an increase of \$143,000 in gross and an increase of \$21,000 in net. The Southern Pacific on its lines east of El Paso has gross of \$1,011,587 against \$1,001,278, and net of \$250,566 against \$224,548. The Flint & Pere Marquette reports net of \$72,618 against \$46,076; the Chicago & West Michigan, \$33,332 against \$31,960; the Ohio River \$16,384 against \$10,997 ; the Milwaukee & Northern \$34,569 against \$31,044; the Western New York & Pennsylvania \$74,337 against \$65,658, and the Colorado Midland \$46,033 against \$34,318. The roads which show diminished net are the Detroit Lansing & Northern \$17,545 against \$23,125 ; the Ohio & Mississippi \$61,395 against \$62,815; the Oregon Improvement \$30,011 against \$51,377, and the Toledo & Ohio Central \$31,194 against \$32,830.

Speculation on the Stock Exchange has been fairly active this week, and though prices have fluctuated widely from day to day, and some of the specialties have had sharp breaks, the tone on the whole has been strong and the tendency upward. London seems to have bought considerable stock at times. New York & New England further declined, on the liquidation it is said of a pool in the stock, and Richmond Terminal securities were knocked down on a repetition of the reports that the plan of reorganization would not succeed. During the last two days, however, these reports have met with denial, leading to a recovery in price. Union Pacific has been advanced on rumors of a change in the management, and Delaware & Hudson has risen sharply on a revival of the old story of the probability of Vanderbilt control. Central of New Jersey and Lackawanna also advanced and Reading remained comparatively firm notwithstanding the refusal of Governor Abbett, of New Jersey, to sign the bill legalizing the recent leases. St. Paul and the Granger stocks have been strong.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of currency and gold by the New York banks.

THE FIRST OF APRIL TREASURY STATE-MENTS.

Though the proportion of the Customs payments made in gold during the late month, as we showed in our issue of the 26th ultimo, fell to very small figures, the Secretary of the Treasury nevertheless has succeeded in increasing his net stock of gold. According to the statements just issued, the Government held the first of April \$125,815,040 of gold coin and bullion over and above the amount required against the outstanding gold certificates, while the net gold balance held the first of March was only \$122,122,113, showing that there was an addition during the month of \$3,-692,927. Moreover, there had been an addition in February too-to the amount of \$2,547,209-making together for the two months an increase of about $6\frac{1}{4}$ million dollars. It will be remembered that after dropping from \$130,740,631 January 1 to \$119,574,904 February 1, the net balance advanced to \$122,122,113 on the first of March, and the further addition the late month has raised the amount to \$125,815,040 on the first of April. While these variations from month to month may not be invested with special significance, it is encouraging in view of the silver agitation and the continued purchases of $4\frac{1}{2}$ million ounces of silver a month to know that the Treasury position is strong and that the Government reserve of gold has for two months now been increasing.

Total money holdings of all kinds in the Treasury also increased during the month, though not quite as much as the gold holdings alone. In February the increase in gold was made in the face of a decline in the total money holdings. The aggregate holdings now are \$153,878,031, against \$150,363,638 March 1 and \$153,339,469 February 1. This is independent of the holdings in depositary banks. It is interesting to note that these latter holdings are still being reduced, and April 1 amounted to only about $17\frac{1}{2}$ million dollars, against about 184 million dollars March 1, nearly 19 million dollars February 1 and about 195 millions January 1. On the 1st of April last year the amount held by the banks was almost 30 million dollars. The following table in our usual form gives the money holdings both in sub-treasuries and in the banks, the 1st of April as compared with the 1st of March. With reference to the increasing deficit on the legal tender

ed for FRASER

notes—which deficit means that there are more currency certificates outstanding than legal tenders to represent them in the Treasury—it is evident that the Secretary is continuing the practice of issuing the currency certificates against deposits of Treasury notes as well as legal tenders. As, however, the debt statement does not tell us how much has been issued against the one or the other, we charge the whole amount against the legal tenders as under the old method.

Fractional silver		14,746,917
Total Gov't cash in sub-treasuries	\$150,363,638	\$153,878,031
Amount in national banks		17,500,750
Metal and in hanks and sub-trassuries	\$168.602.930	\$171.378.781

Total cash in banks and sub-treasuries. \$168,602,930 \$171,378,781

Including the amount in depositary banks, the cash holdings April 1 were \$171,378,781 against \$168,602,-930 March 1, thus giving a net increase of cash of about 2[‡] million dollars. One of the items embraced in these totals is the fractional silver, which April 1 stood at \$14,746,917, or 5[‡] million dollars less than at the corresponding date a year ago, indicating that that much fractional silver has been got out by the Secretary during the twelve months.

Passing now to the other points disclosed by the 1st of April statements an interesting fact is the increase in both Customs revenue and in total revenue as compared with the corresponding month last year. An increase in total revenues had also been observed in the month preceding, but then there was no increase in Customs receipts. This time the increase in the latter is quite a feature, the amount at \$16,415,312 for March 1892 contrasting with \$15,373,522 for March 1891. Internal revenue receipts also increased about a million, but as miscellaneous receipts fell off over a million, total receipts increased only \$630,000, the amount for the present year being \$30,048,806 against \$29,418,330 last year. In March of the preceding year, however, the amount had been \$34,778,000, so that the increase the present year follows a loss last year of fully 51 million dollars. So too as regards the Customs receipts considered by themselves-while there is an increase of a million dollars the present year this comes after a decrease in 1891 of nearly 51 million dollars, the total then having dropped from \$20,800,000 to \$15,373,000. These figures are instructive, because they show that we have now reached the time where the comparison is with heavily diminished totals for last year.

In reference to the expenditures, they have proved smaller than a year ago, being \$28,989,589 against \$31,. 502,941, and thus the total was a million dollars less than the receipts. The saving has been almost entirely in the interest payments and the payments on account of the National Bank Redemption Fund. For the nine months of the fiscal year from the 1st of last July the expenditures have been only 268 million dollars, against 298 million dollars in the corresponding nine months of the year preceding. Here too, as we pointed out a month ago, the difference is entirely accounted for by the reduction in interest payments, in payments on the National Bank Redemption Fund and in the payments for premiums on bonds purchased. Last year \$33,754,419 was paid for interest in the nine months (future interest having been anticipated); this year only \$17,252,318, or 16¹/₂ million dollars less. The premium on bonds purchased last year was \$10,401,220; this year

of course nothing. The payments on the National Bank Redemption Fund then were \$17,656,585; this year only \$13,153,369. The difference in favor of the current year on these three items is thus $31\frac{1}{2}$ million dollars. With these items eliminated, the expenses for 1892 stand a little heavier than a year ago—that is, amount to \$237,713,555, against \$236,193,897.

In regard to the debt changes during the month, it appears that there was a further decrease of \$1,150 in the amount of the refunding certificates outstanding, and that \$1,700 of 4 per cents were issued to take up these certificates, principal and interest. The unpaid remainder of the $4\frac{1}{2}$ per cents—that is $4\frac{1}{2}$ per cents not extended at 2 per cent or presented for redemption—was reduced during the month from \$2,138,650 to \$1,898,-950, and there was a decrease of \$26,040 in the amount of other debt matured and not yet presented for payment. The National Bank Redemption Fund was reduced from \$29,888,003 to \$28,894,831. Allowing for the cash held in the Treasury, the aggregate net debt of the country during March was diminished just about two million dollars.

THE BURLINGTON & QUINCY REPORT.

In studying the annual statement of the Chicago Burlington & Quincy one is impressed with the great strength of that property as revealed in the results disclosed. For many years the road held an almost unique position in the degree of prosperity which it enjoyed, maintaining uninterrupted 8 per cent dividends. Then came a period of adversity-the locomotive engineers' strike, short crops, virulent competition-and prospects for a time appeared very gloomy. To those who knew the inherent strength of the system, its excellent location and natural advantages, its extensive system of branches, its good physical condition, and its capacity for attracting traffic, the final outcome was never doubtful. There might be poor results for a while but in the end the great recuperative power of the property was certain to become manifest, and rapid recovery and improvement ensue. This is precisely what has happened, and now the outlook is taking on some of its old time brightness.

Of course the company is not paying 8 per cent dividends as of old, nor is there any immediate likelihood. of a return to that basis of distribution, although the gains in both gross and net for current periods are now very large. In making smaller returns, however, to its shareholders than a decade ago, the Quincy stands by no means alone. Nearly all the large companies are paying less. Conditions are vastly different than before: rates are lower, many items of cost that enter into operating accounts are higher, while the public insists on more frequent service and increased accommodations; and then also there are more lines to divide the traffic among than a few years back. But the country, and especially the Western country, is growing all the time, and where the roads are honestly and efficiently managed, and are not hampered by repressive legislation and unwise action on the part of State and National commissions, their prospects must improve. The trouble heretofore has been that great hostility to railroad interests has prevailed in the West, thus preventing as rapid a recovery as might otherwise have occurred, and aggravating the ordinary difficulties which the railroads have had to overcome. The most hopeful sign is that there has been some modification of public opinion in that respect.

Considering that the Burlington & Quincy is such a large corn carrier, that the corn crop in 1890 was exceedingly short, and that as a consequence the earnings of the road, gross and net, fell off very heavily during the early months of 1891, the result for the full year is very satisfactory, and makes the outlook for the current year under the large corn crop of 1891 especially encouraging. In 1890 the company paid 5 per cent dividends out of the year's income, but fell nearly half a million dollars (\$480,890) short of earning the dividends. In the late year the dividends altogether aggregated only 44 per cent (the first three quarterly dividends having been at the rate of 4 per cent per annum and the last at the rate of 5 per cent), but quite contrary to the result for 1890 there was a surplus above the dividends-in amount of \$679,426. One reason for the improvement was a large increase in the income from investments and miscellaneous sources, which income for 1891 was \$1,371,627 against only \$806,034 for 1890. But of course the main factor in the improved results was the very large crops raised in 1891, under which the road was able to retrieve its early losses. These good crops we may suppose were largely responsible even for the increase in the income from investments, since this income is derived almost entirely from the lines controlled, which are as much benefitted by a good harvest as the Quincy itself.

It will be understood that while there is improvement as compared with 1890 and the poor years immediately preceding, the results are far from equaling those realized in the period of the company's great prosperity. In fact the system earned but little more gross in 1891 on 5,300 miles of road than it did in 1883 on 3,300 miles, while the net was just about one-quarter less. This, however, simply emphasizes the marked nature of the change in conditions in the interval, and the severity of the influences against which the company has had to contend. President Perkins's remarks this time are very brief, but as bearing on the change here noted his observations are pertinent and instructive. He lays stress on the fact that though the road was able to earn something more than the dividends paid during the late year, the aggregate of these dividends (as we have already shown) was after all only $4\frac{1}{4}$ per cent, which is certainly not a high rate of return. The arrangements made among the railroads for the maintenance of rates helped to prevent serious reductions, but such arrangements, he says, are uncertain and far from satisfactory, owing to the bad effects of the Inter-State Commerce Law. He then goes on to state that if the country and the cities continue to grow in population and business, it is in spite of unwise laws, not because of them; "but as most persons do not and can not take " the time for any careful and connected investigation " of the subject, this prosperity, which is the result of "other causes, and which would be greater if no such "laws were enacted, is often thought to be directly due "to them. It is as certain that national and State in-"terference by statute with the natural laws of com "merce must bear bad fruit as it is that in the long " run the natural laws will prevail."

Perhaps sooner or later this fact will be recognized. For the present the encouraging feature is that rates are fairly well maintained and that earnings are expanding in a very decided way as the result of the large grain movement. The Quincy has as yet furnished only the returns for January and February, but for these two

gross earnings and of \$800,206 in net-an amount of improvement which would appear to leave no room to doubt that the company will earn the 5 per cent dividends that are now being paid.

THE NORFOLK & WESTERN.

It is always pleasant to take up an annual report of this company, for its record of progress has been a marvelous one, and each additional report furnishes new and striking testimony to the fact. Among the smaller systems (for in point of mileage and income, of course, the Norfolk & Western does not rank with the very large systems of the day), it would be difficult to find any with a more noteworthy record of growth and development-all established, moreover, in a very few years. And the most encouraging feature is that the growth has been continuous and uninterrupted, and is still in progress. The late year certainly in its general influences was not favorable to Southern roads, since the South has been experiencing considerable industrial depression, and the Norfolk & Western could not escape in some measure being adversely affected by that circumstance, and yet every page of the report affords evidence of further increase and expansion in business and operations-an expansion secured, as we have frequently pointed out, through the steady development of the road's traffic and the careful fostering of local industries. The result should prove very gratifying not only to the owners of the property but also to the management under whose skilful direction the system has attained its present dimensions and importance.

We have said that the Norfolk & Western was not to be classed with the very large systems of the day. And yet its income and traffic are by no means small. Thus total gross receipts in the late year amounted to over nine million dollars (\$9,188,042) and net earnings to over three million dollars (\$3,178,274). Fully 13 mil lion passengers were carried and over 54 million tons of freight, while the passenger mileage was 713 millions and the freight mileage 1,293 millions. Obviously this latter represents a total of very large magnitude, but to appreciate its full significance one must compare it with the traffic mileage of some other systems-say with some of the large systems west of Chicago. The Norfolk & Western operations for the late average of 1,091 based on an were year miles of road. The Chicago & Northwestern in the year ending May 31 1891 operated nearly four times as much mileage-4,254 miles-but its freight ton mileage was only about one-half larger than that of the Norfolk & Western, being 1,950,037,071. The Chicago Milwaukee & St. Paul operated over five times as much road as the Norfolk & Western-that is, it operated 5,721 miles-but its tonnage mileage in the year ending June 30 1891 was only 1,895,635,111 against the 1,292,984,631 on the Norfolk road on 1,091. miles. The Norfolk & Western actually has a larger tonnage mileage than the Rock Island, for the latter in the year ending March 31 1891, on 3,408 miles of road, had a tonnage movement of only 1,208,301,229 tons. In the matter of motive power and equipment, the Norfolk & Western also closely approaches some of these large Western systems. On December 31 1891 it had no less than 12,339 freight cars in service, with 349 locomotives and 176 passenger coaches. The Rock Island March 31 1891 had 15,568 freight cars, with 534 locomotives, and 390 passenger, mail, sleeping and months there is a gain of no less than \$1,509,450 in express cars. The Chicago & Northwestern on its 4,254

miles has 846 engines and 26,906 cars of various kinds, passenger and freight, while the St. Paul, on its 5,721 miles, has 801 locomotives and 25,995 cars of various kinds. But notwithstanding its relatively large amount of rolling stock, the Norfolk & Western finds itself constantly hampered because of a lack of sufficient equipment to meet its requirements; and with the extra business to result from the completion of the Ohio Extension and from its other new connections, further additions to the equipment are declared to be imperatively necessary.

While the Norfolk & Western has a very large traffic, it gets very low average rates on the same. In the late year there was a further decline, the average dropping to less than $5\frac{1}{2}$ mills per ton per mile (5.48), the lowest in the company's history. Very few roads in the United States can show a lower average than this. The Western roads mentioned in the preceding paragraph, namely the Chicago & Northwestern, the Rock Island and the St. Paul, all realized an average in their latest fiscal years of over 10 mills-that is about a cent per ton per mile-their traffic, however, being radically different. The Pennsylvania in the late calendar year on its lines east of Pittsburg and Erie realized an average of 6.59 mills per ton per mile. The Pennsylvania's tonnage includes a large amount of coal and other bulky and low-class freight, and so does the tonnage of the Norfolk & Western, and besides this it has been the endeavor of the Norfolk & Western management to stimulate and foster the growth of local industries through low transportation charges.

It is to this enlightened policy that the expansion of the income and traffic of the system is due. Of course the system has been considerably extended during the last few years, and as against 1,091 miles operated in 1891 the mileage in 1886 was only 507 miles; but in the same period of five years the number of tons of freight moved increased from 1,555,867 to 5,797,941, the number of passengers carried from 400,269 to 1,887,522, the gross earnings from \$3,252,056 to \$9,188,042, and the net earnings from \$1,291,147 to \$3,178,274. The passenger movement one mile has grown from 19,580,000 to 71,394,761, and the freight movement one mile from 403,008,908 to 1,292,984,631. Nothing could illustrate better than these comparisons the great development which has occurred in these five years.

The management have devoted special attention to the coal traffic, as is well known, and keep enlarging that traffic 500,000@600,000 tons every year, so that from 929,635 tons in 1886 the coal and coke tonnage rose to 3,282,671 tons in 1891. But it must not be supposed that the growth has been confined to that item. Far from it. Thus the road carried 539,339 tons of iron ore in 1891 against but 65,851 tons in 1886, it carried 283,590 tons of pig iron against 34,917, 247,863 tons of stone against 24,451, 18,672 tons of zinc ore and spelter against 1,437, and 258,178 tons of "other minerals" against 36,671 tons. The 1891 tonnage for every one of these items was larger than that of any other year. Nor must it be supposed that the whole of the growth is found even in the mineral traffic. Since 1886 the mineral traffic (including coal and coke) has risen from 961,366 to 4,154,884 tons, or if we include coal for the company's own use from 1,092,962 tons to 4,630,313 tons, an addition during the last five years on this latter basis of 3,537,351 tons. The increase in total traffic during the same time has charges.

been from 1,555,867 to 5,797,941 tons, being an increase of as much as 4,242,074 tons, or 704,723 tons more than the increase in the mineral traffic alone which shows how wide and general the expansion has been.

The bulk of this expansion has been in the local business, a feature to which we have often alluded, and which forms one of the strongest points in the company's affairs. The same circumstance likewise gives added emphasis to the low average rates at which the company renders transportation service for its patrons, demonstrating as it does that these rates have been adopted not under the stress of rate wars with rival lines, but solely with the view of fostering the growth of local industries-a policy which has proved successful at once in building up these local industries and expanding the company's traffic. Out of the 5,797,941 tons of freight moved in the late year, only 707,550 tons were through freight while 5,090,391 tons were local freight. Moreover, of the increase of 738,346 tons in total tonnage over the year preceding, all but 18,671 tons was in the local freight. The earnings from the freight business in 1891 were \$7,090,316, and of this only \$1,389,806 came from the through traffic. Of the \$2,097,725 passenger earnings, but \$174,503 was derived from through traffic, the road having carried only 31,631 through passengers in the late year, as against 1,855,891 way passengers. In fact, the earnings from local traffic (passenger and freight combined) are stated to have been no less than 82.2 per cent of all earnings.

Of course with the extension of the mileage and property of the system there has come an increase in the stock and debt of the company and an increase also in its annual obligations. The year 1891, we have seen, was a trying one, on account of the business depression prevailing. The company was able, however, to meet all its charges for that period and to pay out \$1,072,500 in dividends on the preferred shares, after which a surplus of \$131,289 remained on the operations of the twelve months, \$129,575 of this amount being used in the purchase of bonds under the sinking fund clause of the equipment mortgage. It is proper to say that the income of the year included a contribution of \$135,000 from the special dividend fund provided at the time of the acquisition of the Shenandoah Valley for the purpose of meeting dividends on the \$4,500,000 of preferred stock issued in payment of that property.

As to the future, while of course the business depression prevailing in the South is an unfavorable feature, the fact that the road has thus far passed through the depression so satisfactorily is very encouraging. Moreover, the company has recently acquired important new connections in the lease of the Lynchburg & Durham and the Roanoke & Southern. Most important of all, the Ohio Extension will be completed during the year, giving the system an outlet west and northwest for its coal, which cannot but add very greatly to its traffic. The mileage of the system will then exceed 1,500 miles. It is proposed that another, and probably final, issue of \$10,000,000 preferred stock shall be made, only \$5,000,000 to be used the present year. We have seen that the net income above charges in the late year was over a million dollars; the management, however, are conservative, and they feel that in the best interests of the company a further increase in stock is to be preferred to an increase in fixed NEW YORK STATE BANKS.—We are indebted to Mr. Charles M. Preston, Superintendent of the New York State Banking Department, for a detailed statement of the condition of the State banks in New York on Saturday morning, March 19, 1892. From it and from the latest statement of the condition of national banks—that of March 1—we have prepared the following, which gives the results for all the banks in New York City, and also the figures for the banks, both national and State, in New York outside of this city. For comparison we retain the totals under the December calls for New York City. The aggregate for State banks does not include either

Monetary Commercial English News

[From our own correspondent.] LONDON, Saturday, March 26, 1892.

The rate of discount in the open market declined early in the week to $1\frac{1}{2}$ per cent, but recovered on Thursday to $1\frac{3}{4}$ per cent, owing to a report that a large amount of gold was about to be shipped either to Russia or Austria. It appears that an order for nearly a million and a quarter sterling in gold has been placed with the Messrs. Rothschild, but they have gradually and quietly bought up the amount in the open marketchiefly from the supplies that have come from the United States-and therefore the immediate order will not affect the Bank of England. At the same time there is some apprehension that the efforts of the Austro-Hungarian Government to get gold may disturb the market. It is very unlikely, however, that a great loan for Austria-Hungary can be placed, but doubtless that Government will continue to attract small amounts of gold from time to time. It is expected here that considerable amounts will almost immediately be shipped from New York to this market. Apart from the Austro-Hungarian demand and the occasional demands for Russia, there is nothing to affect the money market. Trade is falling off, and as speculation is absent, purely financial and commercial influences are tending to lower rates.

The price of silver fell yesterday to 40 7-16d. per ounce. Before the last American silver act was passed the lowest price touched in London was 41 15-16d. per ounce, early in 1889. It will be recollected that in September, 1890, the price rose as high as 545_8 'd. per ounce, but has been falling ever since, with the result that it is now $1\frac{1}{2}$ 1. per ounce low er than the lowest quotation of 1889. America is selling freely while there is hardly any demand for India. The official discount rates of the Banks of Bombay and Bengal are now 4 per cent—unusually low for this season of the year. Indian bank shares are fallling heavily, and more or less all silver securities.

The market for American railroad securities here was very quiet but steady up to Thursday morning, when there was a

VOL. LIV.

è

sharp break owing to alarmist telegrams from New York respecting the Bering Sea dispute and the fall which had thereby been occasioned in New York the day before. Nobody here, however, attaches any importance to the Bering Sea controversy. A serious quarrel with the United States appears utterly impossible, and there is full confidence in an early and satisfactory settlement. Still there is very little inclination on the part either of the public or of the great operators to engage in new risks. The Murrieta liquidation still imposes upon everyone an expectant attitude, for it is feared that several houses which have been hitherto supported by the Messrs. de Murrieta may be compelled to suspend. It has long been known, of course, that those houses were able to keep afloat only by the assistance given by the Messrs. de Murrieta, and no serious consequences are therefore apprehended from their suspension. However, until the full effects are known there is unwillingness to operate, the more particularly as the announcement that the Messrs. de Murrieta had gone into liquidation has made a very bad impression in the Argentine Republic and Uruguay. At Montevideo, for instance, there has been this week a run upon the branch there of the London & River Plate Bank. The bank, fortunately, was fully prepared, and every demand was at once met. The premium on gold at Buenos Ayres, which had fallen a little while ago to 240 per cent, has gone up again to 253 per cent, and this week there has been a considerable reaction in Argentine and Uruguayan securities.

On the Continental bourses there has been some recovery this week from the fall of last week, but this is due mainly to buying back by operators for a decline. As soon as this buying back ends there is a general expectation that a fresh fall will occur, for it seems inevitable that Greece must make a compromise with its creditors. The crisis in Italy is becoming more acute and the difficulties of Spain are increasing. The famine in Russia, too, is getting worse, and the concentration of troops in Russian Poland is causing political apprehension upon the Continent. The best opinion is that the Russian Government has no intention to break the peace, but that it is strengthening its garrisons in Poland, partly in anticipation of an attack from Germany but chiefly out of fear of a revolt in Poland. The Poles are evidently very much excited, and as they are beginning to hope for assistance from Germany and Austria-Hungary the Russian authorities fear that disturbances may break out.

The Portuguese Finance Minister has proposed to the delegates of the foreign bondholders a temporary reduction of the interest by 50 per cent, with permission for the next two years to pay even the 50 per cent in paper. On the other hand, the 50 per cent not paid is to be funded, and a sinking fund is to be established for redeeming the bonds in fifteen years. Gradually the interest is to be restored to the full rate. Further, the Minister asks for a fresh loan of four millions sterling. The proposals have made a bad impression, but they will probably be accepted, with some modifications; the fresh loan is hardly likely to be made. Lastly, the banking crisis in Australia continues; early this week another bank had to close its doors.

As the competition between marine insurance companies and the private underwriters at Lloyds has been growing keener for a long time, Lloyds' underwriters have lately begun to insure other than marine risks. The committee of Lloyds has this week published an announcement that the deposits and guarantees lodged with them by underwriting members as security for their individual liabilities are applicable only to settlement of claims arising out of marine policies or policies connected therewith. Every member is obliged to make a deposit of £5,000.

The coal miners' stoppage in the Midland Counties came to an end on Saturday night but the strike in Durham still continues.

Messrs. Pixley & Abell write as follows under date of Mar. 24:

Messrs. Pixley & Abell write as follows under date of Mar. 24: Gold-After a period of continued demand for gold, which has lasted from May, 1891, there is at length a great falling off in inquiry, and some bars have been purchased by the Bank of England, although in no large quantities. The Bank has received $\pm 23,500,$ and ± 50000 has been withdrawn for Rio. Arrivals: Bombay, $\pm 31,0000$; Natal, $\pm 46,000$; Japan, $\pm 32,000$; total, $\pm 109,000$. Silver-Since our last silver has persistently declined, the prices being; ± 14 , on the 18th, $\pm 1d$, on the 21st, ± 40 , and the 22d, ± 405 , do the 23d, and $\pm 40^{9}$, fd. to-day, each drop being a fresh record. Only small amounts have been too much for the market. To-day's rate is quite nom-nal at the close, and nothing further could be done except at a decline. Arrivals; N. Y., $\pm 27,000$. Shipments: To Calcutta, 11th inst., $\pm 95,000$; Bombay, 23d inst., $\pm 116,000$.

Mexican Dollars-These coin are quoted at 114d. under bar silver, and there have been no dealings in the absence of supplies. The quotations for bullion are reported as follows:

THE CHRONICLE.

GOVERNMENT REVENUE AND EXPENDITURES.—Through the courtesy of the Secretary of the Treasury, we are enabled to place before our readers to-day the details of Govern-ment receipts and disbursements for the month of March. From previous returns we obtain the figures for previous months, and in that manner complete the statement for the nine months of the fiscal years 1891-92 and 1890-91.

CHANGES IN LEGAL TENDERS AND NATIONAL BANK NOTES TO APRIL 1.—The Comptroller of the Currency has furnished us the following, showing the amounts of national bank notes March 1, together with the amounts outstanding April 1, and the increase or decrease during the month; also the changes in legal tenders held for the redemption of bank notes up to April 1:

	ALL TO ALL ALL ALL ALL ALL ALL ALL ALL ALL AL
\$1,217,400 1,309,294	\$172,510,013 91,894
	\$172,418,119
\$212,200 1,339,294	\$30,190,035 1,127,094
	\$29,062,941
	\$1,217,400 1,309,294 \$212,200

* Circulation of national gold banks, not included above, \$111,332.

According to the above the amount of legal tenders on deposit April 1 with the Treasurer of the United States to redeem national bank notes was \$29,062,941. The portion of this deposit made (1) by banks becoming insolvent, (2) by banks going into voluntary liquidation, and (3) by banks re-ducing or retiring their circulation, was as follows on the first of each of the last five months:

Deposits by-	Dec. 1.	Jan. 1.	Feb. 1.	March 1.	April 1.

-It is stated that the Pennsylvania Railroad Company has made a negotiation with Kuhn, Loeb & Co. and Speyer & Co., of New York, covering \$11,000,000 4½ per cent gold bonds of 1940 of the Pittsburg Cincinnati Chicago & St. Louis Rail-way Company. The bonds are issued under a consolidated mortgage limited to \$75,000,000 upon the Pennsylvania Com-pany's system west of Pittsburg consolidated into the Pitts-burg Cincinnati Chicago & St. Louis Railway Company, and arrangements have been made to convert all but about \$21,000,000 of outstanding prior liens into the consolidated 4½ p. c. bonds, guaranteed principal and interest by the Pennsyl-vania Company.

-In another column the Canadian Pacific Railway gives notice to its shareholders that the annual meeting will be held in Montreal on the 11th of May. The meeting will be made special for the purpose of giving effect to any legislation of the Parliament of Canada authorizing the issue of additional consolidated debenture stock in exchange for mortgage bonds currenteed by the company. guaranteed by the company.

-Evansville & Richmond general first mortgage forty-year five per cent bonds are offered for sale by Messrs. Harvey Fisk & Sons. These bonds are guaranteed, principal and in-terest, by the Evansville & Terre Haute R.R., a dividend payer since 1880. Further particulars may be found in the adver-tisement in another column.

—The City Chamberlain of Albany, N. Y., advertises in our State and City Department the sale at auction on April 20 of some new issues of bonds.

WALL STREET, FRIDAY, APRIL 8, 1892-5 P. M.

The Money Market and Financial Situation.-The export of \$600,000 gold last week has not been followed up by further shipments, but on the contrary the Bank of England rate is down to 21/2 per cent, and there has been more buying of American stocks for London account than we have had for some time before. This latter movement is attributed by some to the arrival in London of Mr. J. Pierpont Morgan, and whether this is precisely correct or not in this instance, there is probably no person whose opinion on our railroad securities would have more influence in London than Mr. Morgan's. The situation is remarkably good when compared with April of last year, when gold was going out so freely, and foreign holders were more inclined to sell than to buy our securities.

Prices of bonds and stocks are generally much higher than they were a year ago, but then we were just recovering from the panic year 1890, the new crops of spring planting were yet scarcely in the ground, and gold was exported at a rate almost alarming. Now, we have been reaping the benefit of the immense crops of 1891, of which a good part yet remains to be transported, and with the exception of the unsatisfactory silver purchases and issue of Government notes therefor, there is scarcely a threatening cloud upon the horizon, although the Presidential election year is not regarded as favorable for active business.

It may be fair to take 5 per cent as a reasonable standard of interest to be looked for on a good railroad mortgage bond, and there are many bonds on the Stock Exchange list which still yield that interest approximately at their ruling prices, though it is well known that the choicest gilt-edged bonds yield less than that.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 11/2 to 2 per cent, the average being a little less than 2 p. c. To-day rates on call were 11/2 to 2 p. c. Commercial paper is quoted at 31/2@4 per cent.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £815,000, and the percentage of reserve to liabilities was 40.24, against 40.45 last week; the discount rate was reduced from 3 per cent to 21/2 per cent. The Bank of France shows an increase of 10,625,000 francs in gold and a decrease of 900,000 francs in silver.

The New York Clearing-House banks in their statement of April 2 showed a decrease in the reserve held of \$407,800 and a surplus over the required reserve of \$18,017,950, against \$18,007,425 the previous week.

Mex. Doubloons.15 50 @15 70 [English silver.... 4 80 @4 90Fine gold bars... par @4 prem. U.S. trade dollars - 70 @--State and Railroad Bonds.—Sales of State bonds at the Board have included \$2,000 North Carolina 4s at 98; \$14,000 Louisiana cons. 4s at $85\frac{1}{4}@85\frac{5}{8}$; \$10,000 Virginia 6s def. tr. receipts, stamped, at 7; \$1,000 Tennessee settlement 3s at $69\frac{3}{4}$. Railroad bonds have been a trifle more active than last week, and the demand has been pretty well distributed, with prices not materially changed. As the interest on most of the railroad bonds is payable in gold, and also their principal, these securities promise to meet with a growing demand under a continued easy money market; but it is rather obvious that those issues will be most desirable which belong to companies whose managers will keep faith with bondholders, and whose roads can earn a good surplus above their mortgage interest. The Richmond Terminal 5s have again been the most active of the list, and after declining early in the week have lately been stronger, closing at 58% on the better pros-pects of the Olcott plan. Reading incomes have varied with the stock, though not dealt in as heavily as that, and neither of them were much influenced by the New Jersey veto. Atchison incomes have also been more active at better prices, closing at $59\frac{1}{2}$ against 58 last week. The status of other bonds is shown by their prices on following pages. **Railroad and Miscellaneous Stocks.**—The stock market

Bonds is snown by their prices on following pages. **Railroad and Miscellaneous Stocks.**—The stock market has been more active, but quite irregular in the movement of different stocks. There has been more buying of some of the prominent stocks, such as the Grangers, Delaware & Hud-son, Manhattan, &c., as well as of the industrials, like Cotton Oil, Chicago Gas, National Cordage and National Lead stock. Part of the animation came from purchases made for London account and the buying in their direction was said to be larger account, and the buying in that direction was said to be larger

Part of the animation came from purchases made for London account, and the buying in that direction was said to be larger than for some weeks past. St. Paul has been one of the most active stocks, and with its large holdings in London and this market it is presumed that the stock is taken on its dividend prospects as based on the earnings. Atchison is also one of the London favorites, and has met with a fair demand around 371/2@38. The usual ru-mors of N. Y. Central buying came with the rise in Delaware & Hudson above 149, but the stock is off again to-day to 145. Northern Pacific pref. has been quite active, closing at 611/3, the same as last week. New York & New England declined to 363/4 on Wednesday, but rose again sharply above 40, and closes at 397%, the fluctuations seeming to be accounted for by the sales of insiders rather than by any change in value of the stock; one rumor had it that Boston parties were large sellers. Reading has been tolerably steady within a limit of about 2 per cent, and the veto of the New Jersey bill had little effect. Richmond Terminal has fluctuated as the prospects of its plan were thought to vary from day to day. The American Cot-ton Oil has advanced above 40, probably on the hope of a dividend this season on the preferred stock, if not on the com-mon. Manhattan Elevated was notably strong to-day, rising to 124 and closing at 1231/2. Silver bullion certificates are very dull at 861/8. dull at 861/8.

* For week ending March 26.

Our regular statement of earnings for the month of March will be published next week. We furnish to-day the following preliminary aggregates.

Month of March. 1892. 1891. Increase. P.O. Gross earnings (108 roads) \$39,184,080 \$35,835,218 \$3,348,862 9.35 It will be observed that the totals include 108 roads, and that these 108 roads show a gain of \$3,848,862, or 9.35 per cent.

The following will furnish a comparison of the weekly results for a series of weeks past.

Net Earnings Monthly to Latest Dates.—The table foi-lowing shows the net earnings reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of March 19. The next will appear in the issue of April 23.

ANNUAL REPORTS.

Norfolk & Western Railroad.

(For the year ending Dec. 31, 1891.)

The annual report of President Kimball will be found at length on subsequent pages, together with some statistics of the past year and the balance sheet on Dec. 31, 1891, given with more detail than is practicable in this column. The comparative statistics for four years have been compiled for the CURPOURT or follower.

 Under the plan the holders of each class of security will

receive

Poughkeepsie Bridge Company's bonds-

\$1,120

Central New England & Western Railroad Company's first mortgage bonds-

\$1.100

Central New England & Western Railroad Company's general mortgage bonds.

The holder of each \$1,000 bonds, with coupon maturing March 1, 1893, and subsequent, attached, will receive : Income mortgage bonds, series A, 5 per cent..... \$1,000 Income mortgage bonds, series A, 5 per cent.......\$1,000 Over \$17,000,000 actual cash is said to have been expended in these properties, and when the lines under way are com-pleted they will afford connection in New England with the New York New Haven & Hartford at several points, the New York & New England, the Housatonic Railroad, the Nauga-tuck Railroad, the Boston & Maine Railroad, the Connecticut and the Boston & Albany.

and the Boston & Albany. Chesapeake & Ohio.—Messrs. J. Pierpont Morgan, John Crosby Brown and George Bliss, the voting trustees, give notice that holders of over two-thirds in amount of each class of Chesapeake & Ohio Railway Company stock trust certifi-cates having assented to the creation of the securities outlined in the plan set forth in said company's circular of Jan. 22, 1892, "said plan has been carried into effect and securities have been issued and delivered to us to enable us to proceed with exchanges thereunder. Holders of our certificates for first and second preference shares may now exchange them at the office of Drexel, Morgan & Co., 28 Wall Street, New York, who will make exchanges, without delay. The basis of exchange, as set forth by the Railway Company in said cir-cular of January 22, 1892, is : "The first preferred stockholders to receive two-thirds of the face

cular of January 22, 1892, is: "The first preferred stockholders to receive two-thirds of the face value of their stock in its new 4½ per cent general mortgage bonds, bearing interest from July 1, 1892, and one-third in common stock trust certificates. The second preferred stockholders to receive one-third of the face value of their stock in like bonds and two-thirds in common stock trust certificates. Fractions will be adjusted by equitable cash settlements. The bonds are for \$1,000 each, and bear interest from March 1, 1892, and their recipients, under this notice, may either pay the four months' interest (from March 1 to July 1), viz., \$15 per bond, in cash, or the company will detach the September coupon and pay the interest from July 1 to September 1, viz., \$7 50 per bond in cash."

Chicago Rock Island & Pacific .- The tracklaying on the Chicago Rock Island & Pacific.—The tracklaying on the extension being built south of Minco, I. T., has been completed for about 15 miles south of that town to a point a few miles beyond Salt Creek, near the Washita River. The contractors are constantly increasing the forces at work on the extension, and it is claimed that about 3,000 men are now employed on the line through the Indian Territory. The last contract which has been let for grading ends at Flat Creek, about 10 miles north of the Red River, and it is not proposed to let any addi-tional contracts until the point of crossing the Red River has been decided. If the work is not delayed the track will prob-ably be laid as far as the Red River by July 1, and connection will be made with the roads in Texas in August. The engin-eers passed through Bowie, near Henrietta, last week, and they are now surveying toward Springtown and Fort Worth.

Citizens' Gaslight Co. of Brooklyn.—At Albany, April 2, articles of consolidation of the Citizens' Gaslight Company of Brooklyn and the Union Gaslight Company of Brooklyn, under the name of the Citizens' Gaslight Company of Brook-lyn, were filed with the Secretary of State. The directors of the consolidated company are Isaac Gates and C. Weldenfeld, Orange, N. J.; Thomas E. Stillman, Samuel J. Young, Henry H. Adams and Elisha J. Dennison, Brooklyn; Charles G Francklyn, John Byrne, Stephen A. Lathrop, Frank S. Smith and W. Lewis Boyle, New York City; Frank H. Davis, Eliza-beth, N. J., and Thomas H. Thomas of Bay Ridge. The new company has a capital of \$2,000,000.

Duluth & Winnipeg.—The correct figures of gross earnings for the twelve months ended Dec. 31, 1891, were \$35,481 as against \$57,149 in 1890, and for two months of this year \$21,-345, against \$10,782 same period last year. Until Nov. 16, 1891, only 71 miles from Cloquet to Grand Rapids, were operated. The present mileage is 97 miles. There was some error in the 1891 figures, as given in the March SUPPLEMENT. Edison General Electric. The guestale montion of the

error in the 1891 figures, as given in the March SUPPLEMENT. Edison General Electric.—The quarterly meeting of the Edison General Electric Company was held at the office of Drexel, Morgan & Co., Mr. Henry Villard, at the earnest solici-tation of the directors, consented to remain in the office of president. This is supposed to mean that the present man-agement of the Edison Company will continue until the amalgamation with the Thomson-Houston Company is com-pleted, when it is said that H. McK. Twombly is expected to take the presidency of the consolidated company. The only other business transacted was the declaration of the usual quarterly dividend of 2 per cent. It is not yet known how soon the new stock will be ready for delivery, but in the meantime dividends will be paid on the certificates of de-posit.

Houston East & West Texas.—In the Texas State Court, at Houston, April 7, a decree of sale was entered, the date of sale being fixed for August 2.

sale being fixed for August 2. **Hudson River Tunnel Co.**—The N. Y. *Herald* reports that Messrs, S. Pierson & Sons, the great London contractors, who have been constructing the tunnel for years, have filed a mechanics' lien against the company for \$26,550 in the County Clerk's office. Mr. W. R. Hutton, the engineer of the com-pany, expressed regret over the collapse of the project. He said Pierson & Sons are now constructing a similar tunnel wader the Themes. The company has had to stop work before said Pierson & Sons are now constructing a similar tunnel under the Thames. The company has had to stop work before on account of funds, but it never before had a lien filed against it. He said that the tunnel was perfectly practicable, and if it was once completed it could be disposed of to a rail-road company for millions. He said that the talk of there being cracks in the steel rings of the tunnel was true, but they really amounted to nothing. The hopes and calculations of the engineers who were constructing the tunnel, he said, had been verified. A tunnel could be driven through the silt of the North River. Mr. Charles Sooy Smith, of Audubon Park, is President of the company. is President of the company.

the North River. Mr. Charles Sooy Smith, of Audubon Park, is President of the company. Long Island.—This railroad company has executed a mort-gage of \$2,750,000 to the Central Trust Company. The mort-gage secures the same amount of bonds issued to pay for the Metropolitan Ferry Company's franchises, its real estate in New York and Long Island City, and boats. The East Thirty-fourth Street and the James Slip ferries are the principal properties recently acquired. The Herald reports: "The transfer of the Metropolitan Ferry Company to the Long Island Railroad includes considerable real estate, comprising the entire block bounded by Seventh and Eighth streets, Lewis Street and the East River. There are also about fifteen city lots on Thirty-third and Thirty-fourth Streets, and the entire bulkhead from the north side of Thirty-third Street to the centre of the block between Thirty fourth and Thirty-fifth streets. In Long Island City over fifty city lots pass by the transfer. They are located on Borden Avenue, West Avenue and West Third and Fourth streets. There are also five slips adjoining the property of the Long Island Railroad, immediately in front of the depot." Marietta & North Georgia.—The Reorganization Com-mittee have agreed upon a plan which will be submitted to the larger holders, and a majority assent obtained before the plan is made public. New York Ontario & Western.—Notice is given that a meeting of the stockholders of this railway company will be

plan is made public. New York Ontario & Western.—Notice is given that a meeting of the stockholders of this railway company will be held April 20, 1892, for the purpose of sanctioning the issue, by said company, of bonds to an amount not exceeding \$20,-000,000, payable in gold, not more than one hundred years after their date, with interest at a rate not exceeding 4 per cent per annum, payable half yearly, and the execution of a mortgage upon the railroad property and franchies of the company now acquired, and that may hereafter be acquired, to secure the payment of such bonds. New York Street Railroads Consolidated.—The Houston

to secure the payment of such bonds. New York Street Railroads Consolidated.—The Houston West Street & Pavonia Ferry Railway Company, commonly known as the Avenue "C" line, under its charter has the right to lease other railways. This road, the Broadway & Seventh Avenue) the Chambers Street, Twenty-Third Street, the Ninth Avenue, Sixth Avenue and the Metropolitan (the new East Side line), have all been brought together under one manage-ment. This was effected by the recent leases of the Ninth and Sixth avenue roads and the Metropolitan, as the others were already under control of the Elkins and Widener syndi-cate of Philadelphia. Mr. John D. Crimmins, the well-known contractor, was elected President.

Norfolk Wilmington & Charleston.—The incorporators of the Norfolk Wilmington & Charleston Railroad at Charleston, S. C., recently opened books of subscription to the capital stock, and \$100,000 was quickly subscribed. A meeting of stockholders was held and the following officers elected: President, A. A. Gaddis, of Philadelphia; Vice-President, H. E. Young, Charleston; Secretary and Treasurer, K. S. Tupper, Charleston; Directors, H. E. Young, Thomas Pinckney, and T. A. Huguenin, Charleston; R. Duncan Harris, New York; I. C. Naughton and I. N. Baxter, Philadelphia; I. G. Gibbes, Columbia. Columbia.

i. C. Naughton and I. N. Baxter, Philadelphia; I. G. Gibbes, Columbia.
The engineers have completed the survey for the entire length of the road, 352 miles, and are now engaged in locating the line. Starting from Norfolk, Va., the surveyed route follows almost an air line to Charleston, S. C., passing through a section of country which is now almost without railway facilities. From a point near Kingston, N. C., it is proposed to build a branch to Columbia, S. C., a distance of 250 miles. The road is expected, if built, to lessen the distance between the North and Florida by over 100 miles. The cost of constructing the main line is estimated at \$6,000,000.
Ohio & Mississippi.—In a circular issued to the English shareholders in March Mr. J. F. Barnard, the President, takes issue with the recent report of Messrs. Kendrick and Greene as to the amount required to put this road in good shape. It will be remembered that the amount named by them was \$2,932,000, and now Mr. Barnard, after quoting the testimony of Mr. V. G. Bogue, an engineer who made an examination of the property early in March, says: "Finally, we wish emphatically to state that we stand positively on the last annual report of the directors to the bond and share holders, wherein it is stated that six hundred and forty thousand dollars is all that is at present needed to put the whole main line and Louisville branch in good condition, and the Springfield division in good condition for the traffic thereon, and to provide much-needed power and rolling stock ; and that it would be folly to spend much more than that, except it be for entirely new work, for which an estimate was given for two miles, the estimate being \$50,000, which is a very large one, and for placing interlocking of switches and signals at railroad crossings, which latter were not included in the statement made in the last annual report above mentioned."

Philadelphia & Reading.—Gov. Abbett of New Jersey has vetoed the bill to legalize the Reading leases. He says that he has grave doubts of its constitutionality, because it seeks to suspend the operation of the act of 1885, which makes leases unlawful. He remarks:

unlawful. He remarks: "It is plain that members of the Legislature considered that they were, in passing this bill, pursuing the settled policy of the State, which has been to encourage rather than to dis-courage the consolidation of railroad corporations having a common interest in travel and business. "A careful examination of the Act fails to disclose any au-

common interest in travel and business. "A careful examination of the Act fails to disclose any au-thority conferred by it which would authorize or assist any combination to control the necessaries of life. There is noth-ing which authorizes a control of prices by the corporations beyond the natural rule of supply and demand." The Governor adds that experience does not show that an increase in the price of an article transported is a natural re-sult of railroad consolidation where there are other competing railread facilities. Only a combination of all the railroads carrying coal across the State might occasion such a result. He is satisfied that there was no intention under the bill to

carrying coal across the State might occasion such a result. He is satisfied that there was no intention under the bill to increase the cost of coal in New Jersey, whatever might be the effect elsewhere. Even if there was, the bill protected the public, as it provided for amendment or repeal. The Governor calls attention to the fact that the combina-tion of roads will reduce the cost of transportation for the coal companies, and that this reduction is to be the direct out-come of the privileges granted by the State, which means the people, wherefore the saving ought to belong in part to the people. The bill does not provide for this. Such a contract was expected. The Governor thinks that legislative approval would be necessary for the validity of any such contract, and would be necessary for the validity of any such contract, and without any such stipulation so approved it would be unwise to confer the powers sought by the bill. He therefore disapproves it.

Proves it. Pittsburg Chartiers & Youghiogheny.—The capital stock has been increased from \$600,000 to \$1,000,000. The stock-holders also, at a special meeting at Pittsburg, March 25, authorized the issue of four per cent bonds to the amount of \$1,000,000, payable in forty years. The new issue is to be used to retire part of the present bonds, and the balance will be re-served for future improvements and additions to the property. This road is now controlled by the Pennsylvania, which pur-chased it a few months ago.—Railroad Gazette. Pittsburg Shenango & Lake Eric.—At the annual meeting

chased it a few months ago.—Railroad Gazette. Pittsburg Shenango & Lake Erie.—At the annual meeting of the stockholders of the Pittsburg Shenango & Lake Erie Railroad Company, held at Greenville, Pa., the following board of directors was elected: Samuel B. Dick, President; John Dick, John E. Reynolds, Allen M. Cox, Dumont Clarke, Henry M. Dechert, A. F. Henlin and Thomas H. Wells. At a meeting of the board of directors A. C. Huidekoper was elected Vice-President; J. T. Blair, General Manager; P. E. McCleary, Secretary, and Daniel Moore, Treasurer. Richmond & West Point Terminal.—The Richmond Ter-minal Committee gives notice that holders of Terminal securi-ties must decide on or before the 14th inst. whether they will become parties to the plan formed to protect their property, The deposit of a majority of the securities by the 14th inst.

will unite the interests of their holders in the hands of the Committee and assure the success of the re-organization. During the past few days it is reported that the deposit of securities under the plan has largely increased. The Central Trust Co. reports that on Friday over 20,000 shares of R. T. common, considerable preferred and numer-ous lots of other classes of securities were received. The total of the deposits will be named before the closing of the beam

ous lots of other classes of securities were received. The total of the deposits will be named before the closing of the books on the 14th inst. A majority of the Richmond Terminal se-curities in the hands of the committee on the 14th will prac-tically mean that the committee is given a control to be used in the interest of the security holders, and will indicate the carrying out of the plan as it now exists. The transactions on the Stock Exchange in the Central Trust Company certificates indicate a market value equivalent to the securities repre-sented. It is expected that the committee will make applica-tian on Monday to list on the Exchange the certificates of deposit for the East Tennessee securities. It is probable that the time for the acceptance of the rights of subscription (given to the stock and 5 per cent bondholders under the plan) will be extended for the benefit of the regis-tered depositors of such securities as of April 14. The ques-tion upon what terms deposits will be received after that date has not been determined by the committee, and it is probable that no action will be taken in this matter until the time named in the plan has expired. **Rio Grande Western.**—This company has reached a point

named in the plan has expired. **Rio Grande Western.**—This company has reached a point of prosperity where it issues common stock (at \$40 per share) to pay for the acquisition of new property. —In the case of Rothschild, a bondholder of the former Den-ver & Rio Grande Western, against this company, the N. Y. Supreme Court General Term has given a judgment in favor of the plaintiff on his coupons. This decision, if finally upheld, may not be of much importance to the present Rio Grande Western Company, but it will be important in its application to the general rights of bondholders in cases of railroad consolidations or reorganizations without foreclosure. Southern Pacific Company.—At San Francisco, April 6.

application to the general rights of bondholders in cases of railroad consolidations or reorganizations without foreclosure. Southern Pacific Company.—At San Francisco, April 6, 1892, the annual meeting of the Southern Pacific stockholders was held. Of \$118,864,000 capital stock \$116,903,000 was represented. President C. P. Huntington presented his annual report, in which he said: "The President and directors have to report that the business of last year has been in the main satisfactory. The surplus of earnings over fixed and oper-ating or current expenses has been small, owing to many causes, among which may be mentioned the extreme cost of fuel and many other articles largely used in operating the long lines of the company, which Eastern roads are able to get at much lower prices, and this surplus has been used in improving your property and thereby adding to the safety of persons and property that you transport." The press dis-patch says: "President Huntington also submitted figures showing the extent of operations during the year, but these are not made public." [A summary of these figures furnished to the COMMERCIAL AND FINANCIAL CHRONICLE was published in the issue of March 26 on p. 526.] The following board of directors was elected: C. P. Huntington, Leland Stanford, Charles F. Crocker, Thomas E. Stillman, Thomas H. Hub-bard, A. N. Towne, J. C. Stubbs, E. H. Miller, Jr.; S. T. Gage, H. E. Huntington and George Crocker. The two last named are new directors, succeeding W. V. Huntington and L. V. Brown. — A dispatch from New Orleans this week stated that the

named are new directors, succeeding W. V. Huntington and L. V. Brown. — A dispatch from New Orleans this week stated that the Cromwell Line of passenger and freight steamers plying between New York and New Orleans had been purchased in the interest of C. P. Huntington's Southern Pacific Railroad, the owner of the Morgan line of steamers. The N. Y. Herald report says: "The capital stock of \$1,000,000, and held for the most part by Mr. Seaman, the Cromwell estate and the Dela-mater estate, was purchased at a figure slightly below par, and the new owners assumed control on April 1." Tennessee Midland.—At Richmond. Va., April 1, at a

and the new owners assumed control on April 1." Tennessee Midland.—At Richmond, Va., April 1, at a general meeting of the stockholders of the Virginia Construc-tion Company, the agreement made by the board of directors for the disposition of its interest in the securities of the Ten-nessee Midland Railroad Company was ratified by a vote of about three-quarters of all the stock of the company. This company, of which A. S. Buford is President, built the Ten-nessee Midland Railway from Memphis to Perryville, Tenn., about 136 miles, and held nearly the entire issue of its securi-ties. The price paid is understood to be \$2,350,000, of which \$530,000 is cash and the residue guaranteed 5j per cent bonds. The purchaser is T. J. Moss, of St. Louis, who is the principal owner of the Paducah Tennessee & Alabama Rail-road, now in operation from Paducah, Ky., to Hollow Rock, Tenn., under construction to a junction with the Tennessee Midland, and projected to Sheffield, Ala., where connection would be secured for Birmingham, forming a through line from St. Louis to Birmingham. **Toledo St. Louis & Kansas City.**—This railroad has com-

Toledo St. Louis & Kansas City .- This railroad has comroledo St. Louis & Kansas City,—This railroad has com-pleted arrangements for new terminals in St. Louis and northern St. Louis. Two blocks of land have been secured, and on these will be built warehouses, depot, &c. Heretofore the road's terminals have been in East St. Louis, traffic across the river being taken care of on the Eads bridge. The loca-tion of the new terminal means that the road will in the near future use the new Merchants' bridge.

West Jersey.—This railroad has extended the time for transferring the company's certificates of special guaranteed stock into certificates of the common stock to Dec. 31, 1892.

NORFOLK & WESTERN RAILROAD CO.

ELEVENTH ANNUAL REPORT-FOR THE YEAR ENDING DECEMBER 31, 1891.

To the Shareholders of the Norfolk & Western Railroad Co.: The Board of Directors herewith submits its Report of the operations of the Company for the year ending December 31, 1891 :-

PROPERTY.

PROPERTY. Your Company had in operation at the beginning of the year 1,099 77 miles of railroad, 31.40 miles of second track and 285.81 miles of sidings. Your entire property has been maintained in excellent con-dition, and during the year a number of important improve-meats and additions commenced during the preceding year were completed and put into operation. These included in-creased terminal facilities at Lambert Point, 11.20 miles of second track, 20.62 miles of short branches to coal and iron mines and 45.24 miles of sidings. On the Maryland & Washington Division 116.45 miles of the line were thoroughly ballasted, and 7 wooden trestles were replaced by substantial iron viaducts. A brick and iron 22-stall engine-house and repair shops were constructed at Shen-andoah, and a stone passenger station and brick freight sta-tion erected at Buena Vista. Work upon the Ohio Extension was prosecuted continuously

tion erected at Buena Vista. Work upon the Ohio Extension was prosecuted continuously throughout the year, and 75 miles, including the bridge over the Ohio River, were entirely completed, of which 52 miles were on the north end and 23 miles on the south end. Of the grading and masonry on the intermediate section of 115 miles the greater portion is completed, and work upon the remainder is now being vigorously prosecuted. Track-laying and bal-lasting is in progress from both directions, and it is expected that the entire line will be completed and in operation during the year 1892. the year 1892. Your Company operated during the year an average of 1,091

miles

At the close of the year 1891 the length of operated line owned by your Company was 1,120.39 miles, as follows :

		Main Line.

The earnings from Local Traffic, that is passenger and freight traffic originating at, or destined to, points upon your line, were 82.2 per cent of the aggregate earnings. Comparative tables of passenger and freight statistics for several years are given below :

PASSENGER STATISTICS.

Year.	No. of Passengers	Passenger Mileage.	Earni'gs. Per Pass'ger Per Mile. Cents.	Expenses Per Passe'ger Per Mile. Cents.	Profit Per Passen- ger Per Mile. Cents.
1885 1886 1887 1888 1889 1890 1891	$\begin{array}{r} 3 \\ 8 \\ 4 \\ 0 \\ 0 \\ 2 \\ 6 \\ 9 \\ 5 \\ 5 \\ 8 \\ 9 \\ 5 \\ 7 \\ 7 \\ 1 \\ 2 \\ 8 \\ 4 \\ 1 \\ 9 \\ 6 \\ 1 \\ 5 \\ 1 \\ 9 \\ 2 \\ 1 \\ 1 \\ 8 \\ 7 \\ 5 \\ 2 \\ 2 \\ 1 \\ 1 \\ 8 \\ 7 \\ 5 \\ 2 \\ 2 \\ 2 \\ 1 \\ 1 \\ 1 \\ 8 \\ 7 \\ 5 \\ 2 \\ 2 \\ 1 \\ 1 \\ 1 \\ 1 \\ 1 \\ 1 \\ 1 \\ 1$	$19,151,534 \\19,580,000 \\26,703,579 \\35,385,815 \\36,392,466 \\64,086,450 \\71,394,761$	$\begin{array}{r} 3.027\\ 3.122\\ 3.041\\ 2.833\\ 3.017\\ 2.862\\ 2.938\end{array}$	$ \begin{array}{r} 1.777 \\ 1.943 \\ 1.733 \\ 1.563 \\ 1.819 \\ 1.619 \\ 1.867 \end{array} $	1.250 1.179 1.308 1.270 1.198 1.243 1.071

As shown above there was an increase in the average earn-ings per passenger per mile as compared with the year 1890, notwithstanding the fact that during the year passenger rates were reduced on certain Divisions of your system in order that the rates on the entire system should be uniform. This increase was due to the decreased proportion in the number of emigrants, excursionists and second-class passengers carried. The increase in the expenses per passenger per mile as com-pared with the previous year was due to the increased train mileage incident to the opening and operation of branch lines and extensions without a corresponding increase in the num-ber of passengers carried.

ber of passengers carried.

FREIGHT STATISTICS.

- Year.	No. of Tons.	Tonnage Mileage.	Earni'gs Per Ton Per Mile. Cents.	Expenses Per Ton Per Mile. Cents.	Profit per Ton Per Mile. Cents.
1885	1,199,790 1,555,867	295,788,872 403,008,908	0.741 0.655	0.443 0.392	0.298
1887	2.208.688	541.917.945	0.635	0.373	0.262
1888	2,763,376	669,526,740	0.582	0.366	0.216

1891	1,678,806	1,603,865	3,282,671

The steady increase in local consumption of coal and coke is

Ores and Iron.—The shipments of iron ores were 539,339 tons, an increase of 58,355 tons, or 12 per cent, as compared with 1890. The shipments of pig iron were 283,590 tons, an increase of 47,746 tons, or 20 per cent, as compared with 1890.

FINANCIAL.

At the beginning of the year your Company had *cash* on hand to the amount of \$2,746.505 91, of which \$1,939,985 27 was set aside for certain specific purposes, including the con-struction of the Ohio Extension and improvements to the Maryland & Washington Division, and had maturing during the year a collateral loan for \$2,000,000, and bills payable to the amount of \$404,594 26. To meet the Company's maturing obligations and other financial requirements, including the construction of the Ohio Extension and such additions and improvements as were ab-solutely required to accommodate the Company's increasing

Extension and such additions and improvements as were ab-solutely required to accommodate the Company's increasing business, the 55,000 shares of preferred capital stock which were authorized by the shareholders at their last annual meet-ing, as well as the 30,000 shares previously authorized, issued, and held by the trustee of the 100-year mortgage to be applied specifically to the construction of the Ohio Extension, were offered to the shareholders through a circular dated May 8th, 1891. This offer to the shareholders was availed of to the extent of 25,000 shares, and the remainder was disposed of from time to time during the year. There were also disposed of during the year :

\$605,000 100-year mortgage bonds; 400,000 Maryland & Washington Division bonds; 391,000 Equipment Mortgage bonds.

The proceeds of these sales were applied to the liquidation of the collateral loan and other indebtedness, and in payment of the following expenditures for capital accounts :

General improvements and additions to the property, including real estate, sidings, yards and stations	\$318,396 36
For completion of the Clinch Valley Extension and	
branches, and for various small branches to coal and ore mines, including branches to Cripple Creek	1.
Extension	533,121 18
For second track	665,973 45

For terminal facilities	103,041 47
For improvements to the Maryland & Washington Div For the Ohio Extension	2,279,463 47
For equipment	
	AF 050 001 00

The opening during the month of June of your Clinch Val-

The opening during the month of June of your Clinch Val-ley Extension to a connection with the Louisville & Nashville Railroad at Norton, and the sudden accession of new traffic in grain, flour and other products over your lines for shipment from Norfolk, taxed the resources of your Company to the ut-most and forcibly demonstrated the necessity for still further additional transportation and terminal facilities and increased rolling stock for the prompt and economical handling of the traffic, as well as the fact that a greatly increased traffic can be secured if proper provision be made. Work upon the Ohio Extension progressed slowly but con-tinuously during the year, the expenditures being limited to the Company's ability to provide the means at no unreasona-ble cost for the prosecution of the work, and it became evi-dent that to complete the extension to a connection with your Scioto Valley Division in time for the movement of the crops of 1892, as well as for the purpose of having the line in proper working condition in time for the Chicago Exhibition in 1893, it would be necessary to provide not only the means for the completion of the extension as rapidly as possible, but also for increased transportation facilities and rolling stock, without which it would be impossible to transport the traffic which upon the completion of the extension will be thrown over your line. your line.

which it would be impossible to transport the traffic which upon the completion of the extension will be thrown over your line.
It was considered necessary to double-track that portion of your line from Norfolk to Lambert's Point, a distance of about to miles, and at the latter point to erect an engine-house and repair shops and additional yard tracks, piers and warehouses. Additional yards and sidings and other facilities were required at other points upon the line, and a large increase to both passenger and freight equipment.
Owing to the general financial depression and the decreased demand for investment securities, it was impracticable to sell at satisfactory prices the mortgage bonds your Company holds in its treasury; moreover your Management considered it advisable that until the completion of your system, which will be accomplished during the latter part of this year, the fixed charges should not be materially increased, and the money required for capital accounts should rather be provided through a further increase in the preferred capital stock than by the sale of the 100-year mortgage bonds, to which the Company has already and will hereafter become entitled, as by this policy the shareholders will reap all the advantages of future development through increasing dividends, while the risk of weakening the Company's credit through too large fixed narges is avoided.
To enable the Company to energetically continue its construction and improvement work, and in pursuance of the policy above outlined, \$2,000,000 was borrowed from a syndicate with the Company's 100-year mortgage bonds as collateral, the loan bearing interest at the rate of 6 per cent per annum, payable within two years, or earlier under favorable conditions to the Company.
To provide for the financial requirements of the Company in the prompt completion of the Ohio Extension, its equipment, and for general improvements, your Directors recomment with that authority be given for a further issue of

APRIL 9, 1892., preferred stock, of which, if authority be given, it is not con-templated to issue more than 50,000 shares duting the current year, with the understanding that the same shall first be of-fered for subscription to the shareholders. In making this recommendation your Management desires to call attention to the fact that your system has been created and its traffic developed, not through combinations with other companies, but by the actual purchase of properties and construction of new lines, thus necessitating the expenditure of large sums of money, to procure which your Company has had to make frequent disposal of its stock and bonds. Upon the comple-tion of the Ohio Extension the main work of construction will be finished, and your Company will have a comprehensive system and the direct ownership of over 1,300 miles of rail-road, with such connections with other lines as will give the fullest opportunity for the development of both local and through traffic, and the energies of your Management will be devoted to that end. Whilst not deeming it prudent to com-mit the Company to a definite line of financial policy for an indefinite period, yet your Company will be such as will enable it to provide from time to time for such additional equipment and transportation facilities as will be needed for increasing traffic by the sale of mortgage bonds at satisfactory prices. The authority given at the last annual meeting for retiring the common stock upon some equitable basis has thus far not been availed of ; your Management recognizes, however, that fairness to the common stockholders demands that they shall be placed in a more advantageous position than they now oc-cupy in consequence of the considerable increase which has

been availed of ; your Management recognizes, however, that fairness to the common stockholders demands that they shall be placed in a more advantageous position than they now oc-cupy in consequence of the considerable increase which has taken place in the preferred stock, and that it will be advan-tageous to the credit and standing of the Company to have the two classes of stock merged into one upon which dividends can be paid, and it will continue to endeavor to bring this question to a satisfactory solution. Of the bonds issued under the Equipment Mortgage of June 1, 1888, all had been disposed of in the acquisition of equip-ment prior to the close of the year 1890, excepting those re-served by the trustee for retiring outstanding Car Trusts of a, previous date. In anticipation of the future requirements of the Company there was created, December 30, 1891, under authority given at a meeting of the shareholders held Decem-ber 15, 1890, the "Equipment Mortgage of 1992" for \$5,000,-000, interest at 5 per cent, and maturing in 1912. A sinking fund of 3 per cent per annum, payable from and after January 1, 1893, on the bonds outstanding, is provided, to be applied from and after July 1, 1893, to the purchase and redemption of outstanding bonds issued under the mortgage. The right is reserved by the Company to redeem the bonds at par and interest at any time after 10 years. Your Company now holds in its treasury \$650,000 of these bonds, which it has re-ceived from the Roanoke Machine Works in settlement of ad-vances to that company, and which amount was used by that company during the past two years in building equipment. AUXILIARY COMPANIES. RoaNoKE MACHINE WORKS.—The operations of the Roanoke Machine Works for 1891 resulted in net income, after the pay-

AUXILIARY COMPANIES. ROANOKE MACHINE WORKS.—The operations of the Roanoke Machine Works for 1891 resulted in net income, after the pay-ment of interest on funded debt, and after charging off \$25,-493 20 expended for repairs and improvements to the works, of \$18,466 13, which, added to the surplus income carried for-ward from the preceding year, amounted to \$83,041 54, from which dividends were paid upon its capital stock amounting to \$79,306, leaving a balance of surplus income of \$3,735 54. The receipts of your Company from this source are included in your Reveaue Account in "Other Income." VIRGINIA COMPANY.—The balance-sheet accompanying this report shows in detail the property which the Virginia Com-pany now owns. The net income of the Company for 1891 was \$49,790 54, from which dividends were paid amounting to \$45,000, leaving a balance of surplus income of \$4,790 54. Your revenue account includes receipts from this source. CHANGES IN ORGANIZATION.

CHANGES IN ORGANIZATION.

CHANGES IN ORGANIZATION. It is with great regret that your Board records the death on May 27, 1891, of Mr. Everett Gray, of London, whose connec-tion with the Company dates from soon after its organization in 1881, from which time, as its representative abroad and as a member of the Board for several years, he was active and un-remitting in advancing its interests. The vacancy thus created has been filled by the election of Mr. William Vivian, of London of London.

A vacancy also occurred in the Board through the resig-nation of Mr. W. C. Houston, Jr., which will be filled by the shareholders at their annual meeting.

CONNECTIONS.

CONNECTIONS. The through traffic of your system for 1891 amounted to 707,550 tons of reight and 31,631 passengers, and yielded a revenue of \$1,564,310 44, or 17.8 per cent of the total earnings. The traffic interchanged with the East Tennessee Virginia & Georgia Railway was affected by the general business de-pression, especially in iron and other industrial enterprises. The tonnage interchanged decreased from 794,225 tons in 1890 to 608,463 tons in 1891, but the revenue therefrom increased from \$1,236,541 04 in 1890 to \$1,252,261 27 in 1891 ; the coke shipments to points upon that line decreased from 185,938 tons in 1890 to 92,703 tons in 1891, a decrease of 93,235 tons. The number of passengers interchanged decreased from 47,497 in 1890 to 40,042 in 1891, a decrease of 7,455; but the passenger earnings increased from \$202,822 33 in 1890 to \$224,364 38 in 1891, an increase of \$21,542 05.

The connection of your Clinch Valley Division with the Louisville & Nashville Railroad at Norton was completed during the month of June, and resulted in an immediate in-terchange of traffic which taxed to the utmost the facilities of your Company. The lack of adequate transportation facilities and equipment prevented the development of this traffic to its full extent. For the 6 months following the com-pletion of the connection the traffic interchanged amounted to 167,294 tons and 1,377 passengers; the Gross Earnings of your Company from the freight traffic interchanged with the Louisville & Nashville Railroad being \$253,482 09, and from passengers \$5,478 97. passengers \$5,478 97.

In order to facilitate the interchange of traffic with the Louisville & Nashville Railroad and its connections, a fast freight line was organized, designated the Cumberland Gap Despatch Line, which is now in satisfactory operation. The "Great Southern Despatch," the fast freight line estab-lished in 1884, and which operates between Northern and New England points over your Maryland and Washington Division and main line, and Southern and Southwestern points reached by the East Tennessee Virginia & Georgia Railway and its connections, has, through the co-operation of the Pennsyl-vania Railroad Company, been strengthened by the estab-lishment of new agencies and opening up of additional terri-tory, and it is believed that the business of this line will be largely increased. An important additional connection was effected during the

An important additional connection was effected during the year at Hagerstown, Md., the northern terminus of your Maryland & Washington Division, through the completion by the Philadelphia & Reading Railroad Company of its line to a connection with the Western Maryland Railroad, thereby affording your Company an additional communication with interior Pennsylvania and Northern and New England points, and improving your Company's facilities for shipments of pig and manufactured iron and cotton to manufacturing dis-tricts of the North and East, and enabling your Company to receive additional shipments of anthracite coal, machinery, and manufactured products for distribution to points upon your own lines and its connections. The necessity for improved arrangements for the transaction

your own lines and its connections. The necessity for improved arrangements for the transaction of passenger traffic with the city of Washington, the capital of the country, and which, according to the Census of 1890, had a population of 230,392, becomes more apparent each year. During the past year, through improved facilities extended to your Company by the Baltimore & Ohio Railroad Company for the interchange of passenger traffic at Shenandoah Junc-tion, the number of passengers carried over your lines to and from Washington increased from 15,020 in 1890 to 17,033 in 1891. in 1891.

In 1891. Your management appreciates the fact that to properly de-velop the Company's local traffic, it is necessary to effect close relations with connecting lines, and when practicable to in-crease the number of such connections; as by such means more extended markets are obtained for the products of agri-culture and the manufacturing industries upon your lines. In provide annual reports mention has been made of the

culture and the manufacturing industries upon your lines. In previous annual reports mention has been made of the Lynchburg & Durham Railroad and the Roanoke & Southern Railway, and it has been shown that upon the completion of these lines to connections with your system they would both serve as valuable feeders and facilitate the further develop-ment of the coal and other traffic of your line. Negotiations were in progress during the year which resulted in your Com-pany assuming the management and operation of both com-nanies on March 1, 1892. The Lynchburg & Durham Railroad as constructed is 115

panies on March 1, 1892. The Lynchburg & Durham Railroad as constructed is 115 miles in length, and extends from Durham, N. C., to a point on the Richmond & Danville Railroad about 3 miles south of your line at Lynchburg. It has been found impracticable to interchange traffic with that line except through the con-struction of a direct connection. Your Company already owns a branch or belt line extending partly around the city of Lynchburg, its present terminus being about 1¼ miles from the present terminus of the Lynchburg & Durham Rail-road. Under the arrangements as effected, your Company agrees to complete this belt line to a connection with the Lynchburg & Durham Railroad, and to operate that property under a lease from March 1 1892, for a period of 1 year, during which time your Company has the option to continue the lease permanently, conditioned upon the payment by your Company of an annual minimum rental of \$100,000, or to purchase 11,630 shares of the capital stock (out of a total issue of 18,763 shares) and its entire issue of \$2,012,000 5 per cent bonds, for \$1,433,838. Under the terms of the temporary lease your Company agrees to operate the road for 65 per cent of the gross earnings, exclusive of taxes, which are to be paid out of the 35 per cent to be paid to the Lynchburg & Durham Railroad Company. The Reambra & Southern Railway extends from Reambra

out of the 3 per cent to be paid to the Lynchburg & Durham Railroad Company. The Roanoke & Southern Railway extends from Roanoke, Va., to Winston-Salem, N. C., a distance of 121 3 miles. A portion of this line has been in operation for about a year, the remaining or northern portion having been but recently com-pleted to a connection with your line. Under the arrange-ment as effected your Company acquires the ownership of 18,378 shares of capital stock out of a total issue of 23,964 18,378 shares of capital stock out of a total issue of 23,964 shares, and undertakes to operate the road under lease, your Company paying over any balance that remains from gross earnings after paying operating expenses and taxes, interest on bonded debt, and such improvements and additions as may be necessary, your Company guaranteeing the principal and interest of an issue of \$2,041,000 5 per cent mortgage bonds; the former owners of the property depositing with your Com-

pany an amount estimated as being sufficient to put the road in proper working condition, and depositing with the trustee of the mortgage an amount of money sufficient to pay the in-terest on the bonds for a period of one year. Through the control and operation of these two properties your Company now has direct connections with all the im-portant railway lines in North and South Carolina and the South Atlantic seaboard, and it is confidently believed that this will result in very considerable interchange of traffic be-tween those States and Northern and Northwestern points reached by your system, and that the advantages derived will more than compensate for the liability assumed.

CONCLUSION.

CONCLUSION. The year 1891 being one of general business depression, dur-ing which the selling price of iron and its products reached a lower level than at any previous period, and following, as it did, a period of great activity, it was but reasonable to expect that the industrial development upon your line being of re-cent growth would suffer a temporary check, and to a greater extent than would have been the case had the mining and manufacturing industries been of longer standing, and more firmly established; but as a matter of fact, whilst the business depression temporarily retarded, it has not prevented, the steady industrial growth upon your line. Many new industrial works were under construction at the beginning of the year, the greater number of which have been

beginning of the year, the greater number of which have been completed, and some have been put into operation, but others have postponed going into operatian until additional working capital can be secured and better prices obtained for manufactured products.

capital can be secured and better prices obtained for manu-factured products. The past season of business depression has been beneficial in causing the cessation of speculation, which had tended to force prices of town lots and mineral lands above their real values, and also in making it necessary that not only should the new enterprises be provided with ample working capital, but that their management should be most efficient and economical. The result will be that the works which have been established upon a substantial basis will be in a position to take advantage of the revival of business and a return of general prosperity. Very few failures have occurred, and in almost every instance the older manufacturing concerns upon your line have not only continued in successful operation but have paid substan-tial dividends upon the capital invested. The function of a railroad being the transportation of pas-sengers and freight, and the encouragement by every legiti-mate means of the development of the resources of the terri-tory tributary to its lines, the providing of ample equipment for the prompt transportation of all marketable products is the most practical, effective and convincing means of encour-agement that can be furnished. Your Company, through the construction of branch lines and extensions, has opened up an extensive territory exceed-ingly rich in mineral and agricultural resources, and capable of furnishing to your lines a constantly-increasing volume of business. and to secure an adecuate return for the expendi-

of furnishing to your lines a constantly-increasing volume of business, and to secure an adequate return for the expendi-tures incurred it is necessary that each and every year large additions be made to your equipment. The way having been prepared, it now remains to provide the means in the shape of every and engines

additions be made to your equipment. The way having been prepared, it now remains to provide the means in the shape of cars and engines. The growth of business has followed so closely upon the opening of new territory, and has been so rapid and continu-ous at all points upon your line, that although liberal additions have each year been made, your Company has at no time had equipment sufficient for its requirements. Your passenger traffic has increased from 215,904 passengers carried in 1881 to 1,887,522 passengers in 1891, and your freight traffic from 538,102 tons in 1881 to 5,797,941 tons in 1891. Your mineral traffic alone has increased from 48,311 tons in 1882 to 4,154,894 tons in 1891, results sufficient to justify the most sanguine expectations as to the future. The results of the operations of your Company show that your earnings have increased year by year in proportion to the equipment provided, and that for every \$1,000,000 worth of cars and engines placed in service, your Company has earned annually an average of about \$930,000, as is shown by the following statement: Valueofnew Roll-Increasein Gross Gross

Your Management has been earnest and active in promoting the development of all the resources of the country tributary to its lines, and so far as the mineral development is con-cerned with gratifying results. The agricultural development, however, has not kept pace with the demand for farm pro-ducts, due to the rapidly-increasing population in the mining and manufacturing districts. This is particularly the case in the Pocahontas coal field, where the large and constantly increasing population has cre-ated a pressing and growing demand for agricultural and dairy products, which now come from distant markets, largely in the shape of canned goods. In close proximity to the coal fields there are many fertile walleys, admirably adapted to division into small dairy and truck farms, which, if intelligently managed, can be made Your Management has been earnest and active in promoting

very remunerative. The character of the soil and abundant water supply should render this section particularly attractive to emigrants from such countries as Switzerland, Germany and Belgium, and your Management will make special efforts to bring these facts to the notice of immigrants seeking desir-able homes and remunerative occupations. Upon the completion of your Ohio Extension, which will be effected during the present year, the main work of construc-tion will be completed, and your Company will own and con-trol a comprehensive system of railroads aggregating more than 1,500 miles in length, capable of indefinite local develop-ment, and so situated as regards connections with other rail-roads and terminals at Norfolk as to enable it at all times to control a reasonable proportion of through traffic, and so con-structed as to grades and physical condition as to permit of economical operation. At present your system is disjointed, your Scioto Valley

structed as to grades and physical condition as to permit of economical operation. At present your system is disjointed, your Scioto Valley Division being separated from your main line by the uncom-pleted portion of the Ohio Extension ; consequently the traffic of that Division is almost exclusively local. Even in its pres-ent isolated condition it is a profitable division of your line, contributing for the year 1891 \$788,654 to the gross earnings and \$332,677 to the net earnings of your system, and upon the completion of your Ohio Extension a large volume of new and additional business in both directions will be thrown over that Division, which will greatly augment its earnings. The completion of the Cripple Creek Extension of your North Carolina Division, from Ivanhoe to Speedwell, a dis-tance of about 17 miles, through one of the richest mineral sections tributary to your lines, has been in contemplation for some time past, and considerable grading has been done; but its completion has been delayed for several reasons, one being the desirability of the proper development of the tarritory con-tiguous to the completed portion of the North Carolina Exten-sion before opening up additional territory. The building of many new iron furnaces during the past few years renders it advisable that this work be now completed. It will also be necessary during the present year to construct engine houses and repair shops at Norton, Kenova and Lam-bert's Point, and to enlarge the engine house at Bluefield. At Lambert's Point one or more additional piers and warehouses will be required, your terminal facilities at that point being inadequate even for your Company's present business. With the constantly increasing traffic and consequently in-creasing number of trains, it will be necessary from time to time to construct additional yard and passing sidings and sec-ond track.

Your Management is confident that the general business conditions upon your line are such as to justify the belief that a very large increase in traffic and revenue is now solely de-pendent upon suitable provision being made for the prompt and economical handling of the business which can be ob-tained, and with the additional transportation facilities as now contamplated provided and ample additions made to the

tained, and with the additional transportation facilities as now contemplated provided, and ample additions made to the rolling stock, the earnings of your Company for the coming year will be satisfactory to the shareholders. The Treasurer's condensed balance sheet, and a statement and description in detail of the funded debt of the Company, is hereto appended. For full statistics of the operations of your line you are referred to the reports of the Comptroller and of the Vice-President and General Manager, which will be published in connection with this report. The Board takes pleasure in acknowledging the ability and fidelity with which the officers and employés have discharged the duties intrusted to them during the year. By order of the Board,

By order of the Board,

F. J. KIMBALL. President.

Note.—This preliminary report is printed for the informa-tion of shareholders prior to the annual meeting to be held at Roanoke, Virigina, Wednesday, May 4th, 1892. The full re-port, containing complete statistics as furnished by the heads of departments, will be ready for distribution about that time.

WM. G. MACDOWELL, Treasurer.

MEXICAN NATIONAL RAILROAD CO.

FIFTH ANNUAL REPORT-FOR THE FISCAL YEAR ENDING DECEMBER 31, 1891.

NEW YORK, March 18, 1892.

To the Stockholders and Bondholders:

The Board of Directors herewith submits a report of the operation of your property for the year ending Dec. 31, 1891.

Net over cost of working road...... \$1,159,021 18

Equivalent in U.S. currency..... \$927,216 94 From which deduct the following repairs and replacements not properly chargeable to Capital Account :

335,964 69	Increasing number of ties to the mile and ballasting Old line \$\$41,065 30 Replacement rails, Texas Division 106,490 64 Replacement, locomotives 9,524 80 Replacement of cars 136,261 15 Replacement of bridges 22,052 27 Stations and warehouses 18,849 \$\$9 Additions to track and right of way grounds 1,720 64
\$591,252 25	Balance remaining
	From which deduct the following general expenses not included in the cost of working the road: Expenses, collection and distribution of Sub- sidy
76,172 52	
\$515,079 73	Net over all expenses, renewals and replacements
34,429 18	From which deduct earnings from Federal Government not yet collectible
\$480,650 55	Net result available for interest
258,184 45	Received from Subsidy Trustees, on account of interest deficiency for 1891

Total available funds..... \$738,835 00

60,905 00

\$738,835 00

Further details of the earnings and expenses, and the finan-cial condition of the Company, may be seen by reference to the statements of the Treasurer and of the Trustees of Subsidy published herewith.

EXPLANATORY OF THE ABOVE CHARGES AGAINST NET INCOME

INCOME The report of last ear explained the necessity for deducting from income the tem designated as "Earnings from Govern-ment not yet collectible." "The earnings of the Company are practically all in Mexican silver dollars, while our obligations, outside the limits of the country, which form a large portion of the expenses of the Company, and all interest obligations, are in standard gold dollars of the United States. The books of the Company are kept in both currencies, and an arbitrary discount of 20 per cent is adopted for the purpose of accounting. The actual transactions in the conversion of silver into gold are seldom in exact accord with the arbitrary rate and the difference, as it

603

may be more or less, is carried to the debit or credit of Ex-change Account. Under this method the gain by reason of the average rate of exchange ruling higher than 20 per cent in 1890 produced a credit to Exchange Account of \$14,670 60, while for 1891 the low selling price of silver produced the debit above shown of \$51,796 14. This explanation is deemed advisable in order that you may have brought clearly before you how largely the net income of the Company is affected by the price of silver, and that the amount debited against in-come for account of exchange, represents the discount beyond the arbitrary rate of 20 per cent. At the close of the year the amount remaining of the fund of \$217,000 appropriated by the Matheson-Palmer agreement to pay debts of the Old Railway Company was \$49,583 60. The Mexican National Construction Company alleges a claim against this fund of \$104,244 10, and interest from October 1, 1886, the alleged balance of an open account against the Old Railway Company existing at the date of the Matheson-Palmer agreement.

1866, the alleged balance of an open account against the Old Railway Company existing at the date of the Matheson-Palmer agreement. The position of the Board is, that the Matheson-Palmer agreement compromised and settled all money obligations of the Old Railway Company to the Construction Company, and that the Construction Company is indebted to your Company, as successors to the Old Railway Company, for \$207,000 of Car Trust certificates and coupons. Car Trust certificates and cou-pons to the amount of \$232,200, together with sundry other things, were accepted by the Railway Company in a settle-ment made between the Construction Company and the Rail-way Company July 31, 1884, in payment of the balance then due in open account to the Railway Company by the Construc-tion Company. The Construction Company was given credit for this sum and the said amount carried on the Railway Com-pany's books as "Certificates and Coupons Receivable," on the faith of the Construction Company delivered \$25,200 of the coupons, leaving a balance due of \$207,000, as above stated. No part of the \$2,000,000 of First Mortgage Bonds paid to the Construction Company under the terms of the Matheson-Palmer agreement, article V, for the purpose of liquidating Car Trust certificates and coupons was ever paid to the Rail-way Company in lieu of the said certificates, and the said amount is still due. In addition to this, the Construction Company became in-dabted to the Rail-way Company in the sum of \$66, 228, 70, 657

In addition to this, the Construction Company became in-debted to the Railway Company in the sum of \$66,328 79 for the sale of supplies from store-houses on the line, after said supplies became the property of the new Company, under Arti-cle VII of the Matheson-Palmer agreement, and for sundry

minor items. The Construction Company disputed this position with the Board, and after a fruitless effort at arbitration brought suit for the amount of this claim.

for the amount of this claim. The item "Expenses in connection with settlement of Debts of old Company" in the above statement, of \$9,405 04, repre-sents money paid out for legal and arbitration expenses, and amount paid to the American Surety Company of \$1,700 for making a bond to vacate an attachment which the Construc-tion Company had levied upon the bank account and other property of your Company in New York at the time of institu-ting its suit.

As you are aware, it has been necessary to expend large amounts of money during the past several years to bring up the condition of the old line and its appurtenances and for re-placing much of the old equipment. To have charged these sums into the working expenses would have given no adequate idea of the legitimate cost of working the road, and fluctuating or they necessarily are it would have destroyed the usefulness

sums into the working expenses would have given no adequate idea of the legitimate cost of working the road, and fluctuating as they necessarily are, it would have destroyed the usefulness of comparisons with previous periods and of comparisons with the working expenses of other lines, always very valuable to the managing officers. These expenditures have therefore been carried in special accounts and deducted from the income of the Company at the end of the year. The criticism has been made that under this policy the se-curity holders cannot obtain from the published monthly re-ports of earnings and working expenses a satisfactory knowl-edge of the actual net results. To meet this, it has been decided to issue in future a full statement of all expenditures, showing the distinction between those for working the road and those for extraordinary renewals and replacements. The item deducted for the replacement of bridges would seem to represent repairs that belong to working expenses. It does not. In the original construction of the old line, quite a number of waterways were provided with stone abutments and piers, but completed with a superstructure of temporary woodwork. The expenditure represents the repairs of such of this stone work that was improperly built originally, and the replacement of the temporary wood work with iron girders. A proportion of the expense equivalent to what would have been working repairs has been charged into the working ex-pense accounts. pense accounts.

pense accounts. The management has never been unmindful of the fact tha the hope of any surplus from the earnings applicable to inter-est on those securities junior to the Prior Lien Bonds de-pended, aside from the growth to be expected in the business of the country, upon judicious application of liberal sums upon the road and equipment, in order to fit if for operation with proper economy and prompt movement of traffic. This policy has been followed out to the fullest extent compatible with the limitations placed by the income mortgages upon the character of expenses, and limited further as they have been by the amounts that could be withdrawn from the working capital during any one year.

From the date of your enterprise to the time the through ine was opened, near the close of 1888, there was expended apon betterments and additions, from the fund provided by the reorganization agreement, \$253,381 92. During this time, and in fact later, large improvements were constantly being made in physical condition, the expenses for which were in-separable from working expenses, and which contributed to the high working percentage of those years. Since 1888 there has been expended from the Betterment Fund for betterments and additions, \$446,476 97, and from Income for extraordinary

has been expended from the Betterment Fund for betterments and additions, \$446,476 97, and from Income for extraordinary replacements and renewals, in 1890 \$108,155 32, in 1891 \$335,-964 69, making a total expenditure beyond working expenses for improving the condition of the line of \$1,143,978 90. There are many improvements yet desirable, and for which money could be expended with confidence in large returns upon the investment through the advantages it would bring in facility and economy of operation; yet they are of such a character that it is practicable now to extend the work over longer periods and greatly lighten the annual burden the in-come of the Company has heretofore borne. The management believes it is not overstepping the limit of conservative expression due in an annual report to say that it

The management believes it is not overstepping the limit of conservative expression due in an annual report to say that it looks with much confidence to improved results in the future. Assuming that a business equivalent to that of last year may be sustained through the coming year, and in view of the re-duction in expenditures for extraordinary account now con-templated, it seems clear that the net earnings will provide the interest on the Prior Liens, and that all the collections from the Subsidy may be appropriated to the cancellation of those bonds, and if we should have for 1892 the same percent-age of growth in the traffic as the Company has experienced for the past two years, it seems reasonable to expect a surplus at the close of the year applicable to interest on its "A" bonds. OPERATIONS. OPERATIONS.

The following are the comparisons of the results of this year

ican Currency. \$4,206,422 74 3,754,966 36
\$451,456 38
\$3,047,40 ¹ 56 2,927,961 89
\$119,439 67
\$1,159,021 18 827,004 47
\$332,016 71
72.45 77.98
5.53
12.02
40.15

Of the large expenditures upon extraordinary accounts during the year, \$335,000 were for those purposes that con-tributed directly to the improvement of the property and economy of future operation. It has left the property under better conditions for future operation than it has ever been before.

The gross revenues have been increased \$451,456 38, with an increase in expenses of \$119,439 67. The prominent items that go to make up this increase in expenses are :

Fuel Cross ties and bridges Repairs to telegraph line Outside agencies for securing traffic	5.674 41
Outside agencies for securing cramerication	

\$124,715 96

The other expense accounts have had ordinary fluctuations, the losses and gains about balancing. The increase in fuel is almost in exact accord with the increase of miles run by engines, and is therefore not an increased cost, but an increased consumption in consequence of increased work. The condemned and destroyed cars up to the close of 1890 were 125, and during this year 121 have been condemned and destroyed, and written off the equipment list. It was not found practicable to contract for the replacement of these cars on the terms suggested in the last report, and their replacement was too urgently demanded by the increasing traffic to delay it, and they were bought and paid for from the income of the Company. Additional rolling-stock will still be needed if the expected increase in the traffic is obtained, but the Company is now in the financial condition that should enable it to provide it without embarrassment. At the close of last year there remained to the credit of the betterment fund \$69,542.66. During this year there has been expended against it: For purchase of lands at Santiago, City of Mexico, to increase and rectify shop ward limits

For purchase of lands at Santiago, City of Mexico, to increase and rectify shop-yard limits......
For a shop plant at Acambaro.
For stations buildings at Acambaro and Toluca and plans for passenger station, Mexico.
For extension of tracks to reach smelters at Monterey and for additional side tracks at Toluca and New Laredo..... .. \$2,228 50 .. 36,704 96 27,394 98 3.073.11

1	or auditional side tracks at rolatin and row martine	
-		\$69,401 55
	Leaving a balance of	\$141 11

Some of the unfinished work on the new line was completed during the year at a cost of \$2,290 83 and charged against the capital reserve.

TVOL LIV.

capital reserve. In November last it was thought advisable by your Board to re-establish the office of Second Vice-President, and Mr. Gabriel Morton, the Treasurer of the Company, was elected to fill the position. At the same time steps were taken to remove the Treasurer's office to the City of Mexico, with a view of concentrating the accounting work of the Company in one place and adding the strength that such concentration would naturally give to the managing force there.

TRAFFIC.

During the year a slightly better average rate on the whole traffic was maintained, and the proportion of the increased freight traffic earnings due to this cause was \$79,346 64, leaving \$225,773 64 as the proportion due to the increased tonnage. The increased number of tons transported this year over last is 30,711, which represents the equivalent of 16,337,-149 tons transported one kilometer. The ruling of the United States Treasury Dept., referred to in the last report, had the influence of greatly limiting the export ore traffic, but it also resulted in producing smelter

The ruling of the United States Treasury Dept., referred to in the last report, had the influence of greatly limiting the export ore traffic, but it also resulted in producing smelter plants in the Republic, and the influence upon our aggregate ore traffic has been favorable. The earnings from export ore and bullion have fallen off, as compared with last year, \$13,709. The earnings from local ore and bullion have increased \$104,314. There is a large smelter plant at San Luis Potosi and another at Monterey that have been put in blast during the past 30 days. These will more than double the smelter output on our line, and it is hoped that a much larger traffic will result therefrom during the coming year. It was stated in the last annual report that the discontinu-ance of the use of a part of the El Salto Line by the Hidalgo Road for bringing its traffic into the City of Mexico would re-sult in a decrease in the earnings of that branch. The decrease has amounted to \$37,504 25. It is all attributed to the above cause, because the net earnings left to the line are more than it ever before made during its existence, except during the time it was used by the Hidalgo Road. The Matamoros Line has barely paid expenses. A drought that prevailed in that section of the country during the year affected its earnings to a much greater extent than was possi-ble to be offset by reduction in expenses. The earnings from the Texas-Mexican Road, as compared with last year, have fallen off about \$34,000 (United States currency). A portion of it is due to the failure of rains along the line, which decreased its local traffic, but a study of the statistics develops the fact that the decrease of earnings is dis-tributed over every class of its traffic. Some work was done during the year by private companies toward improving the harbor of Corpus Christi. They are sanguine of success, and their plans appear to be well consid-ered, but a lack of money has prevented any practical result. If this is ever accomplished it is believed the

FIRST MORTGAGE BONDS AND SUBSIDY. In March last the Trustees of the First Mortgage Bonds and of the Government Subsidy pledged for their security, called for redemption and cancellation under the terms of the trust deed, 319 of the bonds. At the close of the year \$287,000 had been presented and redeemed, and certificates of cancellation of that number delivered to the Treasurer of the Company. The decrease of outstanding First Mortgage Bonds by that number is shown in the Capital Account. The usual state-ment of the Trustees of Subsidy is herewith published. Respectfully submitted, W. G. BAOUL.

W. G. RAOUL President.

company were filed recently in the county clerk's office in New Brunswick, N. J. The capital is \$50,000,000, divided into 500,000 shares of stock at \$100 a share. It will be the largest company engaged in the manufacture of rubber goods in the world. The incorporators are: William Barbour, of Barbour Brothers, Paterson, N. J.; J. Edward Simmons, President of the Fourth National Bank of this city; John I. Waterbury, President of the Manhattan Trust Company; William L. Tren-holm, ex-United States Controller and President of the Amer-ican Surety Company, and John P. Townsend, President of the Knickerbocker Trust Company. The corporators met and elected the following board of directors: Mr. Barbour, Mr. Simmons, Mr. Waterbury, Mr. Trenholm, Mr. Townsend, Henry Steers, President of the Eleventh Ward Na-tional Bank; Robert M. Galloway, President of the Merchants' National Bank; Charles E. Thayer, of Boston. T. Patterson, of Sawyer, Manning & Company of Boston. The company is incorporated for fifty years, and it is sup-posed that it will soon control most of the rubber boot and shoe plants in the country. The offices of the company will be in New York, Boston and Chicago.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, April 8, 1892.

Storms of great violence occurred early in the week in the northerly sections of the Mississippi Valley. On the seaboard it was quite warm-unseasonably so-bringing vegetation rapidly forward and giving an impulse to many branches of business. A destructive fire at New Orleans, with other influences, gave a stronger tone to the cotton market. The export of breadstuffs is still embarrassed by the deficient supplies arriving by rail, but liberal purchases have been made at the West to come forward on the resumption of inland navigation. In the meantime rates for ocean freights are again down to very low figures, grain being taken for Liverpool on Wednesday at 13/4d. per bushel.

Lard on the spot has been dull and prices declined, but the close is firm at a partial recovery to 6c. for prime City, 6.55c. for prime Western and 6.721/2@6.921/2c. for refined for the Continent. The speculation in lard for future delivery was dull at declining prices until to-day, when the dearer grain markets caused a brisk demand to cover contracts and prices took a high range, though closing somewhat below last Friday.

DAILY CLOSING PRICES OF LARD FUTURES.

Sat.May delivery6.55July delivery6.66August delivery6.75

Pork has been taken quite freely, mostly for export, all the week, until to-day, when very little was done. The close, however, was about steady at \$9 50@\$10 for old mess, \$11@ \$11 50 for new mess, \$10@\$10 50 for extra prime and \$12 50@ \$14 50 for clear. Beef has been quiet; extra mess, \$6 50@\$7; packet, \$8@\$8 50; family, \$9 50@\$11 50 per bbl.; extra India mess, \$15@\$19 per tierce. Beef hams are firmer at \$14@\$14 50 per bbl. Cut meats have been dull, and at the close show an irregular decline, the sales to-day including 30,000 lbs. pickled bellies, 10@12 lbs. average, at 5% c. Tallow has improved, and closes fairly active at 43/4c. Stearine is quiet at 7@71/4c. in hhds, and tcs. Oleomargarine is nominal at 53/4@57%c. Butter has declined to 18@25c. for creamery. Cheese is dull at 10½@12c. for State factory, full cream.

easier.

easier. Kentucky tobacco has been rather more active on a demand for export, and prices rule quite firm. There has been a fair movement in seed leaf, but not so active as last week, as sales are only 1,550 cases, as follows: 500 cases, 1890 crop, Wiscon-sin Havana, 12@14c.; 200 cases, 1891 crop, Wisconsin Havana, p. t.; 200 cases, 1890 crop, State Havana, 14@25c.; 250 cases, 1890 crop, Pennsylvania Havana, 13½@40c.; 250 cases, 1890 crop, Zimmer's, 13¾@15, and 150 cases sundries, 6½@35c.; also 700 bales Havana, 20c.@\$1 15, and 250 bales Sumatra, \$2 25@\$3.25. also 700 bale \$2 25@\$3.25.

\$2 25@\$3 25. Of metals, Straits tin has been quiet, and the price shows no change, closing quoted at 19'90c. Ingot copper is quiet, but rules steady at 11'95c. for Lake. Domestic lead is quiet and unchanged at 4¼c. Pig iron continues in good demand and prices show a slight improvement, closing at \$14 75@\$15 50 for Southern and \$15 00@15 50 for Northern No. 2. Refined petroleum is quoted at 6'10c. in bbls., 7'50c. in cases and 3'60c. in bulk; naphtha, 5c.; crude in bbls. 5'45c. and in bulk 2'95c. These prices show a partial decline from last week. Crude certificates sold to-day at 56½@57c. Spirits turpentine is dull and lower, and closes lower at 37c. Rosins have been more active, and close higher at \$1 43½@\$1 47½ for strained. Hops have further advanced, but wool is very dull. dull. MR A

NOBORNO

COTTON.

FRIDAY, P. M., April 8, 1892. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 63,958 bales, against 68,599 bales last week and 65,188 bales the previous week, making the total receipts since the 1st of Sept., 1891, 6,576,069 bales, against 6,370,512 bales for the same period of 1890-91, showing an increase since Sept. 1, 1891, of 205,557 bales.

Total 1890... [28.805 | 4.758 | 18,529 | 6,347 | 58,439 | 264,165 The speculation in cotton for future delivery at this market showed strength early in the week, but the chief feature was the buoyancy on Monday morning caused by the destructive fire in New Orleans and its effect in causing a sharp advance in Liverpool. August contracts rose to 6.90c., against 6.70c., the lowest figure of last week. But when New Orleans tele-grams reported that the destruction of cotton had been much exaggregated—would not exceed probably 30 000 bales—most of the lowest figure of last week. But when New Orleans tele-grams reported that the destruction of cotton had been much exaggerated—would not exceed probably 80,000 bales—most of the early advance was lost. Under a weak Liverpool report there was a lower opening on Tuesday, to which larger re-ceipts at our ports contributed; but part of the early decline was recovered, and there was a small advance on Wednes-day morning, favored by a stronger Liverpool market and a small movement of the crop. Still speculation was sluggish, operators for a rise showing little heart in taking action upon circumstances that seemed to favor a higher range of values. On Thursday there was renewed buoyancy, with many indications of a strong "bull" movement. Liverpool reported a better market, bu t the chief source of strength was the more active and dearer spot markets. Weather reports were without feature until Thursday, when heavy rainfalls were noted in the Mississippi Valley. There were also local floods in Alabama and Georgia. To-day the market opened sluggishly—in fact, sold off a point or two—but quickly rallied when the strong closing of the Liverpool market was reported, and finally made a further advance, with an exceptionally large demand for August con-tracts from parties who were "short." Cotton on the spot was fairly active at steady prices, there being rather more demand for home consumption as well as for export, and on Thursday quotations were advanced 1-16c. To-day the market was firm at 6% c. for middling uplands. The total sales for forward delivery for the week are 418,100

The total sales for forward delivery for the week are 418,100
bales. For immediate delivery the total sales foot up this week
681 bales, including for export, 681 for consumption,
for speculation, and in transit. Of the above bales
were to arrive. The following are the official quotations for
each day of the past week—April 2 to April 8.
and day of the past week-April 2 to April 8.

Total Continental stocks......

The above figures indicate an *increase* in the cotton in sight to-night of 1,026,992 bales as compared with the same date of 1891, an *increase* of 1,654,199 bales as compared with the corresponding date of 1890 and an *increase* of 1,927,953 bales as compared with 1889.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week, and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1890-91—is set out in detail in the following statement.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week	Receip	ts at the	Ports.	St'kat	Interior	Towns.	Rec'pts from Plant'ns.			
Ending-	1890.	1891.	1892.	1890.	1891.	1892.	1890. [1891.	1892.

11 ' g	23 570					367,991		50,914	41,505	

The above statement shows: 1.—That the total receipts from the plantations since September 1, 1891, are 6,888,131 bales; in 1890-91 were 6,631,818 bales; in 1889-90 were 5,723,836 bales. 2.—That, although the receipts at the outports the past week were 63,958 bales, the actual movement from plantations was only 41,505 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 50,914 bales and for 1890 they were week 2.913 bales.

2,913 bales. OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.— We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Apr. 8 and since Sept. 1 in the last two years are as follows:

	189	1-92.	1890-91,		
April 8.	Week.	Since Sept. 1.	Week.	Since Sept. 1.	
Shipped— Via St. Louis	13,915	575 253	†15,547	553,890

* Decrease during week.

It will be seen by the above that there has come into sight during the week 79,929 bales, against 78,153 bales for the same week of 1891, and that the increase in amount in sight to-night as compared with last year is 443,968 bales.

many sections. Galveston, Texas.—We have had showers on three days of the past week, to the extent of twenty-six hundredths of an inch. The thermometer has ranged from 51 to 74, averaging 62.

62. Palestine, Texas.—Planting is active. There have been good showers on three days during the week, the rainfall being eighty-nine hundredths of an inch. Average thermometer 66, highest 86 and lowest 46. Huntsville, Texas.—Corn and cotton planting are progressing rapidly. Small grains look very promising. It has been showery on two days of the week, the precipitation reaching forty-three hundredths of an inch. The thermometer has averaged 66, ranging from 46 to 85. San Antonio, Texas.—Planting is progressing finely. No rain has fallen during the week. The thermometer has ranged from 44 to 92, averaging 68.

rain has fallen during the week. The thermometer has ranged from 44 to 92, averaging 68. *Luling, Texas.*—Both corn and cotton are coming up well. The weather has been dry all the week. Average thermome-ter 62, highest 90 and lowest 45. *Columbia, Texas.*—Young corn and cotton are coming up well and some cotton has already been chopped to a stand. There have been good rains on three days of the week, the precipitation being fifty-one hundredths of an inch. The thermometer has averaged 66, the highest being 93 and the

lowest 40. Cuero, Texas.-*Cuero, Texas.*—Cotton chopping has already started and young corn looks well. It has been showery on two days of the week, the precipitation reaching thirteen hundredths of an inch. The thermometer has averaged 70, ranging from 55 to 86.

to 86. Brenham, Texas.—Planting is going ahead nicely. We have had one shower during the week, the precipitation reaching eight hundredths of an inch. The thermometer has ranged from 54 to 85, averaging 71. Belton, Texas.—Planting of cotton is well under way. Small grains look promising. We have had dry weather all the week. Average thermometer 68, highest 87 and lowest 50. Weatherford, Texas.—Small grains look favorable and corn and cotton planting are going ahead satisfactorily. We have had good showers on two days of the week, the precipitation reaching forty-four hundredths of an inch. The thermometer has averaged 68, the highest being 89 and the lowest 48. New Orleans, Louisiana.—It has rained during the week to the extent of one inch and eighty-three hundredths. Average thermometer 66.

thermometer 66.

thermometer 66. Shreveport, Louisiana.—It has rained on five days of the week, the precipitation reaching two inches and seventy-nine hundredths. The thermometer has ranged from 48 to 83, averaging 65. Columbus, Mississippi.—Telegram not received. Leland, Mississippi.—We have had rain during the week to the extent of seven inches and forty nine hundredths. The thermometer has averaged 65.9, the highest being 79 and the lowest 52.

lowest 52

lowest 52. Little Rock, Arkansas.—Telegram not received. Helena, Arkansas.—It has rained on six days of the week, on one of which heavily. There has been too much rain, and the river is rising, with prospects of an overflow. Weather clear this morning. The rainfall reached four inches and nineteen hundredths. Average thermometer 64, highest 74, lowest 48.

Memphis, Tennessee.—We have had rain on five days of the past week, with a precipitation of three inches and four hund-reths. It is now clear. Farm work has been delayed by the

bad weather. The thermometer has averaged 64.3, the highest being 76.9 and the lowest 50. Nashville, Tennessee.—It has rained on four days of the week, the precipitation reaching three inches and ten hun-dredths. The thermometer has averaged 64, ranging from 50 to 78to 78

The thermonieter has averaged or, ranging from so to 78.
Mobile, Alabama.—Planting is making good progress.
There has been rain on four days of the week, the precipitation reaching fifty-six-hundreths of an inch. The thermometer has ranged from 62 to 76, averaging 69.
Montgomery, Alabama.—The heavy rains on Wednesday and Thurday at Rome, Ga., and along the Coosa at Gadsden, Ala., has started the Alabama on another boom, and up to noon to-day it had risen thirty feet; but weather now being clear a fall is expected by to-morrow without serious damage.
Planting is progressing well. Rain has fallen on two days of the week, to the extent of thirty-two hundredths of an inch. Average thermometer 71, highest 82 and lowest 61. In last week's telegram it should have been stated that the value of fertilizer tags sold has been \$41,118 this year against \$56,688 for 1890-91 and \$48,693 for 1889-90.

for 1890-91 and \$48,693 for 1889-90. Selma, Alabama.— Rain has fallen on two days of the week, the precipitation being one inch. The thermometer has aver-aged 70, the highest being 82 and the lowest 54. Auburn, Alabama.—The weather has been warm and pleas-ant and without rain all the week. The thermometer has av-eraged 63.7, ranging from 41 to 78. Madison, Florida.—There has been rain on one day of the week, the rainfall reaching twenty-five hundredths of an inch. The thermometer has ranged from 48 to 81, averaging 63.

Columbus, Georgia .- We have had rain on one day of the

week, the rainfall reaching fourteen hundredths of an inch. Average thermometer 69, highest 80 and lowest 55. Savannah, Georgia.—We have had light rain on one day of the week, the precipitation being inappreciable. The ther-mometer has averaged 70, the highest being 84 and the lowest 58.

Augusta, Georgia.—Conditions have been favorable and planting is well under way. Rain has fallen on two days of the week, the precipitation reaching eighty-two hundredths of an inch. The thermometer has averaged 68, ranging from 59 to 82

Charleston, South Carolina.—We have had rain on two ays of the week. The thermometer has ranged from 56 to days of the week. 79. averaging 62.

Stateburg, SouthCarolina.—Cotton planting is in progress. Rain has fallen lightly on one day of the week, to the extent of two hundredths of an inch. Average thermometer 65⁻¹,

highest 81.5 and lowest 53.5. Wilson, North Carolina.—We have had rain on one day of the week, the precipitation reaching thirteen hundredths of an inch. The thermometer has averaged 69, the highest being 82

and the lowest 46. The following statement we have also received by telegraph showing the height of the rivers at the points named at & o'clock April 7, 1892, and April 9, 1891.

Shipments this week.				Shipm	ents since	Receipts.			
Year		Great Conti- Brit'n. nent.		Great Britain	Conti- nent.	Total.	This Week.	Since Sept. 1.	
	6,000 25,000	$16,000 \\ 40,000$		59,000 206,000	309,000 457,000 630,000 567,000	836,000	70,000 79,000	818,000 1,296,000 1,361,00 1,215,000	

According to the foregoing Bombay appears to show a decrease compared with last year in the week's receipts of 2,000 bales and an *increase* in the shipments of 47,000 bales, and the shipments since Sept. 1 show a decrease of 177,000 bales. The movement at Calcutta, Madras, and other India ports for the last reported week and since the 1st of September, for two years, has been as follows. "Other ports" cover Ceylon. Tuticorin, Kurrachee and Coconada.

0	Shipmen	nts for the	e week.	Shipments since Sept. 1.			
•	Great Britain.	Conti- nent.	Total.	Great Britain.	Continent.	Total.

* A cantar is 98 pounds.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market is firm for yarns and dull for shirtings. There is a more general resort to short time. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison:

	1]	189	2.			1891.				
		Cop. vist.			lbs rting		Colt'n Mid. Uplds	32	s Cop. 'wist.		4 lbs. irtings.	Oott'n Mid. Uplds
" 18 " 25 Apr. 1		d. @7 ¹ 8 @7 ¹ 16 @7 ⁷ @7 ⁷ @6 ⁷ 8 @7	5	012 112	8. @6 @6 @6 @6 @6 @6	d. 6 5 4 ¹ 2 4 3 3	358 3916	$738 \\ 738 $	0734 0734 0734	8. d. 6 0 5 11 5 11 5 11 5 11 5 11 5 11	s. d. @7 0 @611 @611 @611 @611 @611	$ \begin{array}{c} d. \\ 41316 \\ 41516 \\ 41516 \\ 478 \\ 478 \\ 478 \\ 41316 \end{array} $

JUTE BUTTS, BAGGING, &C.—There have been only few transactions in jute bagging during the week under review, but the offerings have been small. Quotations are nominally $6\frac{1}{2}c$. for $1\frac{3}{4}$ lbs., 7c. for 2 lbs. and $7\frac{1}{2}c$. for $2\frac{1}{4}$ lbs. Jute butts are in small supply, and quotations are firmly main-tained at $2\frac{1}{4}(@2\frac{1}{4}c)$. for paper grades and $2\frac{3}{4}(@3c)$. for bagging quality. 1,250 bales of damaged butts, paper grades, were sold at auction last week at prices ranging from $1\cdot07\frac{1}{4}(@1\cdot15c)$.

sold at auction last week at prices ranging from 1.07½@1.15c. COTTON FIRE AT NEW ORLEANS.—A very destructive fire broke out in front of the Fire-Proof Cotton Press on North Front Street, New Orleans, at 10:30 A. M., April 3, and subse-quently extended to the press itself, as well as to the Shippers, Independent and Orleans cotton presses. The Fire-proof Press contained about 20,000 bales of cotton, the Orleans Press about 25,000 bales, the Independent about 5,000 bales and the Shippers about 12,000 bales, or 62,000 bales in all. The loss has not yet been definitely ascertained, but the Chief Super-visor of the New Orleans Cotton Exchange estimates the total loss as 30,000 bales, and in addition 4,000 bales are badly damaged. No change will be made in the stock total at New Orleans on account of the fire until an actual approximation, if not actual figures, of the entire loss, can be obtained. if not actual figures, of the entire loss, can be obtained.

EAST INDIA CROP PROSPECTS.—The following is from Messrs. Gaddum, Bythell & Co.'s report, dated Bombay, March 5:

In the up country markets arrivals are rather below the previous week's figures, the falling off in supplies being caused by holidays intervening. Broach crop is coming forward very slowly, and arrivals this week are about 10,000 bales less than what was received last year during the same period. The ginning factories are at present working on a fairly large scale, however, and we should now get freer arrivals. The whole of the Broach crop is now picked and secured in the villages. Bhownuggur are now getting fair supplies daily, but the disposition to hold back their cotton for better times prevails among the cultivators of this district also.

THE FOLLOWING ARE THE GROSS RECEIPTS OF COTTON at New York, Boston, Philadelphia and Baltimore for the past week, and since September 1, 1891.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 126,421 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.

vessels carrying cotton from United States ports, &c.
AUSTRALIAN, steamer (Br.), Kelly, from New Orleans for Liverpool, has arrived at Queenstown in tow. The Australian's shaft was broken and she was towed 800 miles by steamer Catalonia.
LAKE WINNIPEG, steamer (Br.), from New York for Liverpool, ran aground in Buttermilk Channel Saturday, but was hauled off at midnight Sunday by tusy Wm. McCaldin and James A. Gartield, and towed to anchorage off Liberty Island. Two hundred and forty head of eattle were taken off. Vessel was surveyed Monday morning, but no damage reported. Her eattle will be re snipped and vessel will proceed.

Cotton freights the past week have been as follows:

BREADSTUFFS.

FRIDAY, April 8, 1892.

The markets for flour and meal have taken a strong turn for the better. There were large purchases on Tuesday for Europe of wheat flour in sacks at the West, with a full busi-ness for the West Indies. The local trade bought freely on Wednesday and Thursday, although many received from Western mills marked up prices 5@10c. per bbl. The stronger grain markets served to promote the improvement. Today

Western mills marked up prices 5@10c. per bbl. The stronger grain markets served to promote the improvement. To-day wheat flour was active and prices were partially dearer. The wheat market has made in the aggregate a material advance in prices, but the movement toward higher figures was frequently interrupted by free selling to realize. The improvement began on Monday, with reports of large pur-chases at the West and the recurrence of bad weather in the Northwest. The speculation became very active on Tuesday and was well maintained throughout Wednesday and Thurs-day, foreign advances in the interval showing more strength. Wheat on the spot has continued very scarce and No. 2 red winter in elevator was quoted yesterday at 8c. per bushel above the price for March contracts. To-day the market was excited and buoyant. The speculative sales exceeded 22 million bushels and prices for this crop rose 234@3 cts. per bushel, owing to favorable foreign advices and bad crop reports. reports.

Indian corn has made a sharp advance. Notwithstanding the full premium of pa cels on the spot over May contracts. (3½ cents yesterday) shippers have taken about all that was offered, almost shutting out the local trade from the markets, and this fact, together with smaller receipts at primary points. and this fact, together with smaller receipts at primary points, and some reduction in the visible supply, has greatly encour-aged the bulls in the speculation, besides prompting free pur-chas:s to cover contracts. To-day there was a further and material advance, due partly to sympathy with wheat and partly to reduced receipts at the West, owing to bad roads. There was something of a "corne." on spot corn, and No. 2 mixed brought 54c. delivered.

THE DRY GOODS TRADE.

NEW YORK, Friday P. M., April 8, 1892.

The market at first hands has been unmistakably dull all week. Buyers have come forward in a perfunctory fashion and the trade has shown a much keener desire to secure forwardings on existing contracts than to make new ones. To some extent this is traceable to the effects of further serious weather disturbances over a considerable portion of the West, but making allowances for this influence it has to be con-ceded that the consumptive demand is short of expectations. In staple lines some of the largest distributers are admit ing slow trade, and many agents just now are anxious to make things comfortable for buyers in the desire to move off accumulating stocks. This practically means a weak market and a shading of prices, and it is safe to say that outside of some exceptionally well situated brands, agents' quotations of brown and bleached cottons are purely nominal. By far the greatest number of tikets are so situated, although it is contended on the other hand that the popular brands, more or less sold ahead and steady, represent the largest propor-tion of production. As the margins between the two divi-sions widen, buyers will pay more attention to the former; but for the moment they are operating lightly in both. Mill deliveries continue free on previous contracts. The jobbing trade in New York has improved during the past week, but is only fair in other sections; both here and elsewhere there are more evidences of weakness than a week ago. Collections some extent this is traceable to the effects of further serious are more evidences of weakness than a week ago. Collections continue regular and are one of the best features of the situation.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending April 5 were 8,445 packages, valued at \$390,821, their destination being to the points specified in the table below:

		1892.	1891.

* From New England mill points direct.

* From New England mill points direct The value of the New York exports since January 1 have been \$3,596,598 in 1892 against \$3,307,852 in 1891. The market is in an irregular condition for both brown and bleached cottons, with a dull demand, and, except for most popular tickets, a weak tone. Buyers are difficult to deal with, and concessions in their favor are frequent, although not openly quoted. During the week a well-known line of low-grade bleached cottons was let out by the H. B. Claffin Company at 5% c. per yard—a considerable cut from agents' quotations and a fair indication of existing conditions in low

and medium priced shirtings. Export business in brown sheetings and drills and blue goods has proved rather better than of late, owing to the low prices acc pted by sellers. Wide sheetings and colored cottons are exceptionally steady, being well under contract. Orders for new-season cotton flannels are being booked at value, and it is expected that when agents make their prices, a decline from previous quo-tations will be disclosed. Printed fabrics are inactive at first hands, it being between seasons with printers, but a fair business is doing by jobbers. Ginghams also are slow out-side of the jobbing trade, in which a cut in a regular fine dress gingham from 10½c. to 734c per yard was the most prominent feature of the week. Print cloths have been quietly firm all week at 3 1-16c, per yard for 64x64s, 56x60s being still quoted at 2%c, per yard. It is reported that the engravers employed by printers have made a demand for shorter hours, pay to remain unchanged, and that they may quit work on Monday if their request is not complied with. The printers have given no decision yet. 1892. 1891. 1890. have given no decision yet.

Stock of Print Oloths-	April 2.	April 4.	April 5.
Held by Providence manufacturers.	None.	403.000	348,000
Fall River manufacturers		136,000	22.000
Outside speculators (est)		None.	None.

DOMESTIC WOOLENS.—The best reature of the week in men's-wear woolens and worsteds has again been the duplicating demand from clothiers for spring styles. Individually orders have been for small parcels, as was to be expected so late in the season, but they have reached a fair aggregate. Agents have in face of this buying shown more steadiness in stock goods, and most transactions have been at regular prices. For heavy weights the market is quict but agents have made goods, and most transactions have been at regular prices. For heavy weights the market is quiet, but agents have made fair deliveries of sample pieces, from which a later dupli-cating demand is looked for. Overcoatings are well sold ahead and steady, while cloakings also are in a favorable position. Satinets have moved rather better than of late, but unions and cotton-warp cassimeres continue neglected. Flannels and blankets are in indifferent request. Orders for autumn styles in all-wool and worsted dress goods are not coming forward as briskly as was anticipated, but it is prob-able that buyers are waiting until the display of autumn lines is more nearly complete than at present. The price question is still unsettled beyond the point that no advance is likely in face of the low quotations made by foreign manu-facturers. facturers.

FOREIGN DAY GOODS.—The general features of this depart-ment were without material change. For current supplies there was only a moderate call either for staples or special-ties, and prices in the latter were irregular. Fair importation orders were recorded in leading makes of dress goods and men's fancy worsteds, prices of which frequently rule below last season's quotations.

Importations of Dry Goods.

The importations of dry goods at this port for the week ending April 7, 1892, and since Jan. 1, and the same facts for the corresponding periods of last year are as follows:

TERMS OF SUBSCRIPTION.

Commercial and Financial CHRONICLE contains 40 to 64 pages published every week.

State and City Supplement of CHRONICLE contains 184 pages published several times each year.

Investors' Supplement of **CHRONICLE** (a Cyclopædia of Railroad Securities) contains **160** pages published every other month.

Subscription to CHRONICLE for one year \$10.00, which includes every issue of both SUPPLEMENTS.

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the STATE AND CITY SUPPLEMENT. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the STATE AND CITY SUPPLEMENT to as near the current date as possible. Hence if every Subscriber will note in his SUPPLE-MENT on the page designated at the head of each item a reference to the page where the item in the CHRONICLE can be found, he will at all times possess a complete and fresh cyclopædia of information respecting Municipal Debts.

THE STATE DEBTS OF NEW YORK AND PENNSYLVANIA.

The financial reports which we give below indicate that both New York and Pennsylvania have paid off a large amount of their State debts during the past year. Since September 30 1890 New York has redeemed \$100,000 of Niagara Reservation bonds and \$1,936,650 of its canal debt, making the total debt reduction \$2,-036,650. During about the same period Pennsylvania has paid bonds to the amount of \$3,983,152. The net debt of New York State is at present \$891,929 and that of Pennsylvania \$2,988,718.

In stating the total debt of New York we omit the item of \$122,695 for Indian annuities as this is an imaginary indebtedness and has no existence except from the fact that a sum equal to interest at 6 per cent on about that amount is annually appropriated by the Legislature as annuities to the Indians.

Referring to the redemption of New York's debt Governor Flower's message to the Legislature this year contained the following remarks :

Part of the canal debt matures on Oct. 1 next and the remainder on Oct. 1 1893. The balance of \$491,929 01 now unprovided for will not have to be paid by tax, the Comptroller estimates, as there is expected to be a surplus in the canal fund revenue to meet it. If that prediction be well founded the State has levied its last tax for the payment of the canal debt.

The Niagara Park debt matures at the rate of \$100,000 each year, but its bonds are held by the State and can be paid at any time from the surplus now in the treasury if the Legislature so direct. They draw interest at the rate of $2\frac{1}{2}$ per cent per annum.

It will be seen from the foregoing that New York's debt is no burden to the taxpayers of the State.

We give the New York returns first and following these are similar details of the debt of Pennsylvania.

NEW YORK STATE.—The subjoined report of New York's debt has been corrected for the CHRONICLE in the State Comptroller's office at Albany, and it shows that the total liabilities were decreased \$2,036,650 during the fiscal year ending October 1 1891.

In the foregoing table under date of March 1 1892 the amount of debt redeemed includes the amount redeemed during the fiscal year ending Dec. 1 1891, \$2,538,352, and the amount redeemed from Dec. 1 1891 to March 1 1892, \$1,444,800; total, \$3,983,152.

1891 to March 1 1892, \$1,444,800; total, \$3,983,152. The sinking fund received during the year 1891 the sum of \$2,177,847 84.

The sinking fund on March 1 1892 held the following securities: Allegheny Valley Railroad bonds, \$1,700,000; interest on same, \$14,167; United States 4 per cent consols, \$3,000,000 at 116, \$3,-480,000, and cash, \$183,883; total, \$5,378,050.

The unfunded debt mentioned in the above table consists of relief notes in circulation, \$96,143; interest certificates unclaimed, \$4,597; interest certificates outstanding, \$13,038, and bonds past due, upon which interest has ceased, \$20,414.

ASSESSED VALUATION.—The value of taxable real estate in 1889 was \$2,002,942,127; in 1888 the valuation was \$1,840,433,540.

APRIL 9, 1892.]

A PROPOSITION TO REFUND PHILADELPHIA'S SIXES.

A plan is being formulated by the city officials in Philadelphia to refund the 6 per cent municipal bonds which fall due to the amount of \$16,387,900 within the next five years. The object is to obtain money for the construction of the Schuetzen Park reservoir and the completion of the new boulevard. These two projects alone will, it is estimated, cost over \$12,-000,000, and unless the tax rate were considerably increased it would be many years before either of them could be accomplished.

The sinking fund is amply sufficient to pay off this loan as it matures, so that if the bonds are refunded the Sinking Fund Commissioners will turn over to the general city fund for appropriation an amount each year equal to the amount of 6 per cent bonds maturing. In other words, the city would, under this plan, have available for appropriation in addition to its annual tax levy the sum of \$623,100 in 1893; \$4,295,200 in 1894; \$6,691,900 in 1895; \$2,977,400 in 1896; and \$1,800,300 in 1897, or a total of \$16,387,900 in the next five years.

The new bonds to be issued will probably run for thirty years, bearing interest at the rate of $3\frac{1}{2}$ or 4 per cent.

Mayor Stuart in his message published this week strongly favors this proposition.

Lake County, Col.-(STATE AND CITY SUPPLEMENT, page 142.)—A suit has been entered in the United States Circuit Court against the County Commissioners of Lake County, Col., for \$26,500. The defendants on July 31 1890 sold a

number of bonds issued by authority granted at a general election Oct. 7 1879 for the purpose of securing funds to erect necessary public buildings. The plaintiff became possessed of \$50,000 worth, and now brings suit upon their coupons, as their payment has been refused.

Bond Proposals and Negotiations.—We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

sale. Albany, N. Y.--(STATE AND CITY SUPPLEMENT, page 47). City Chamberlain Charles A. Hills will offer at public auction on April 20 4 per cent public building bonds to the amount of \$260,000 and 4 per cent street improvement bonds to the amount of \$185,000. The public building bonds will fall due as follows, viz.: \$5,000 on May 1 1893, and a like amount on each succeeding May 1 to and including 1911, and the remainder, \$165,000, will be payable May 1 1912. The street improvement bonds will fall due \$37,000 yearly from November 1 1892 to November 1 1896, inclusive. The city's general bonded debt on April 14 1892 was \$2,062,000; water debt, \$1,-741,500; total debt, \$3,803,500; sinking fund, \$823,593; net debt, \$2,979,907. In addition to the debt as thus stated there is a railroad loan of \$1,000,000 issued to the Albany & Susquehanna Railroad Company, and secured to the city by a first mortgage payable, principal and interest, by the Delaware & Hudson Canal Company. There are also outstanding street improvement bonds to the amount of \$680,500, payable by special assessment on property benefitted. Albany's total assessed valuation is \$70,389,755, and the tax rate per \$1,000 is \$17:40. See advertisement elsewhere in this Department. Benton County, Mo.--(STATE AND CITY SUPPLEMENT, page

Benton County, Mo.—(STATE AND CITY SUPPLEMENT, page 119.)—The County Court will receive on May 5 propositions for funding \$292,500 of 6 per cent 10·30-year bonds issued July 1 1882 in compromise and redemption of bonds previously issued and payable at the National Bank of Commerce, New York. These bonds constitute the entire indebtedness of the county, which has a valuation of over \$3,000,000.

Brooklyn, N. Y.--(STATE AND CITY SUPPLEMENT, page 48.)-The New York Legislature has authorized Brooklyn to issue bonds to the amount of \$100,000 for police station-houses.

bonds to the amount of \$100,000 for police station-houses. **Cincinnati**, 0.-(STATE AND CITY SUPPLEMENT, page 86).-We clip the following item from a local paper: The sinking fund trustees have accepted control of the \$150,000 of new school bonds. An amendment to the bill will be drafted by which the sinking fund will have control of these bonds without any in-terference from the School Board. The financial statement for March is as follows: Receipts-Interest on bank deposits, \$29 63; water-works rent, \$3,500; rents from Cincinnati Southern railroad, \$250,000; ground rents, \$719 35; street assessments, \$2,792 34. Expenditures-Redemption of bonds and coupons, \$31,017 24; rents, \$2,628; salares, &c., \$1,453 60; judgments against city, \$998 83; balance March 31 1892 \$284,301 10. \$284.301 10.

East Birmingham, Pa.—Borough debt 10-20-year bonds bearing interest at the rate of 4 per cent have been bought for the sinking fund of the city of Pittsburg. The amount of the issue is \$8,000.

Galveston, Texas.—(STATE AND CITY SUPPLEMENT, page 181). City Auditor R. H. Tierman writes us that \$250,000 of Galveston's new 5 per cent bonds have been sold to Messrs. Whitaker & Hodgman, of St. Louis, Mo. No arrangements have as yet been made for the disposal of the remainder.

Greenville, S. C.-(STATE AND CITY SUPPLEMENT, page 168). -The city of Greenville has sold \$75,000 of 6 per cent 30-year sewer bonds to Messrs. John L. Williams & Son of Richmond, Va.

Hackensack, N. J.—The Improvements Commission of the town of Hackensack will receive bids until April 11 for the purchase of 5 per cent town bonds to the amount of \$25,000. These bonds will be sold with accrued interest from Feb. 1 1892. The principal of the loan will fall due \$5,000 yearly from Feb. 1 1902 to Feb. 1 1908 inclusive.

Hempstead, N. Y.—The people of Hempstead, Long Island, will vote at the spring election on the question of issuing bonds for \$50,000 to macadamize five miles of road:

La Grande, Oregon.--Proposals will be received till April 11 by the Recorder of the city of La Grande for \$30,000 of 6 per cent water bonds.

Los Angeles, Cal.—(STATE AND CITY SUPPLEMENT, page 148.) —The Common Council's special committee to investigate the water question has recommended that a proposition to issue bonds to the amount of \$100,000 be submitted to the citizens.

Newark, Ohio.—(STATE AND CITY SUPPLEMENT, page 89.)— Street improvement bonds of the city of Newark to the amount of \$33,000 have been sold to Messrs. Seasongood & Mayer of Cincinnati.

New Haven, Conn.—(STATE AND CITY SUPPLEMENT, page 42.)—New 4 per cent sewer bonds of this city to the amount of \$100,000 have been sold to Messrs. N. W. Harris & Co., of New York.

York. Omaha, Neb.-(STATE AND CITY SUPPLEMENT, page 128). City Treasurer Henry Boller will receive bids until April 25 for the purchase of grading bonds to the amount of \$41,200, paving bonds to the amount of \$50,000, sewer bonds to the amount of \$50,000 and \$100,000 of Public Library bonds. The foregoing will all be dated May 1 1892 and bear interest at the rate of 5 per cent per annum, payable semi-annually at the banking office of Kountze Bros., New York. The total debt of the city, including this issue, is \$1,911,100; the assessed val-uation for 1892 is \$20,431,759; actual valuation about \$160,-000,000; and the population is estimated at 140,142.

Orange, N. J.-(STATE AND CITY SUPPLEMENT, page 66.)-A contract with the Mutual Life Insurance Company of N. Y. for sewer bonds to the amount of \$484,000 has been ordered to be signed by the Mayor.

Seattle, Wash.—(STATE AND CITY SUPPLEMENT, page 143.) —The new 5 per cent. 20-year gold bonds of this city were sold to Messrs. Blair & Co., of New York, and Brewster Cobb & Estabrook, of Boston.

Silver Bow County, Mont.—(STATE AND CITY SUPPLEMENT, page 137.)—Proposals will be received until May 2 by the Connty Clerk of Silver Bow County for the purchase of \$125,000 of 5 per cent refunding bonds. The bonds are to be

dated July 1 1892 and will mature July 1 1917 with an op-tion of call after July 1 1907. These bonds are to redeem the entire indebtedness of the county, which consists at present of 7 per cent bonds to the amount of \$100,000 and 6 per cent bonds to the amount of \$25,000. The county's tax valuation in 1891 was \$20,260,599, and the actual value of property is es-timated at \$35,000,000 timated at \$35,000,000.

Talbot County, Md.—(STATE AND CITY SUPPLEMENT, page 81.)—The \$33,000 of 5 per cent bonds recently advertised by this county were not sold, as no premium was offered for the same. Many of the holders of old railroad 6s which matured on April 1 1892 are now exchanging them for bonds of the new issue.

Tonawanda, N. Y.—(STATE AND CITY SUPPLEMENT, page 59.)—The village of Tonawanda has voted to issue \$20,000 of bonds for the completion of its sewerage system.

Waco, Texas.--(STATE AND CITY SUPPLEMENT, page 182). Sewer bonds of this city to the amount of \$30,000 have re-cently been sold to H. S. Palmer, of Milwaukee, Wis. The bonds bear interest at the rate of 6 per cent and the selling price was 05 and account interest. price was 95 and accrued interest.

Youngstown, Ohio.—(STATE AND CITY SUPPLEMENT, page 91.)—City grading and curbing bonds to the amount of \$9,000 were recently sold to Messrs. Spitzer & Co. of Toledo. The firm paid a premium of \$227 50 for the bonds.

STATE AND CITY DEBT CHANGES.

We subjoin reports as to municipal debts received since the publication last week of our STATE AND CITY DEPART-MENT. Some of these reports are wholly new and others cover tems of information additional to those given in the SUPPLE-MENT, and of interest to investors.
