THE STATE AND CITY DEPARTMENT. See pages 382, 383, 384, 385, 386 and 387 for our State and City Department.

All advertisements with relation to State and City Bonds will likewise be found on the same and following pages.

THE FINANCIAL SITUATION.

The condition which has been most conspicuous in its influence upon the markets this week has been the progress of the cholera epidemic. That scourge seems now to have appeared almost everywhere in Europe, and at many points on the Continent its course is attended with peculiar malignancy. The arrival at New York on Tuesday night of the Moravia from Hamburg with the plague on board, and twenty-two deaths reported as having occurred on the passage, brought this condition even more forcibly But the disturbed feeling to public notice here. due to that special cause was quickly quieted by the issue on Thursday afternoon of a quarantine circular by the Government (which we give in a subsethat quent column) ordering in substance no vessel from any foreign port carrying immigrants allowed enter at to any port in shall be the United States until the vessel has undergone quarantine detention for twenty days, or longer if public interests require a longer detention. That is no doubt a severe measure, and yet nothing less vigorous would appear to meet the occasion. Our people too feel a good degree of satisfaction with this order, not only because it seems to be needful as a measure of defense against the cholera scourge, but because it puts a stop for the time being to that almost greater scourge, the weekly landing on our shores of a multitude of people drawn from the very lowest classes of Europe. Of course it also shuts out some that we would be glad to admit.

This epidemic is also working no little harm by restricting our export business, and through that is disturbing financial affairs. We cannot think that phase of it will be of long continuance, and yet it must last while the distribution of goods in Europe is fettered by quarantines and while business transactions are everywhere made difficult and deferred through non-intercourse between parts of even the same country by reason of the existence of the contagion in a virulent form in some of the leading This situation is obviously decontinental cities. pressing cotton and breadstuffs, and if these articles are rushed to market now as thev usually are at this period of the year, the effect on prices may be quite serious. The delay in the shipments of produce is likewise the immediate cause probably of the renewal of gold exports. The remoter cause is of course our silver currency issues, made more disturbing by the very small gold balance the Secretary of the Treasury has thought it wise to carry. We are glad to see that with the first of September the gold holdings of the Government are increased somewhat. The report for that date shows \$114,156,217 net against \$110,444,392 on the first of August. Our Treasury should however have 200 millions now to ensure a feeling in Europe of stability here.

Money has continued to exhibit a hardening ten deucy. This has been due chiefly to the further loss of reserve and to the rumors of more gold exports auc finally to the withdrawal yesterday of \$2,600,000 for shipment to-day to Europe. The special

flurry in call money was also aided by the decline in stocks which led to a calling in of loans and some discrimination against those properties which yielded most readily to bearish demonstrations. This special activity was on Thursday, the market before that not having advanced above $3\frac{1}{2}$ per On that day loans were made at 6 per cent. cent and there was a good demand for money at The lowest $5\frac{1}{2}$ per cent at the close of the day. rate for the week was 2 per cent and the average until Thursday was probably a little in excess of 21 per cent. With the high rate then made and the rates of yesterday the average for the week was about $3\frac{1}{2}$ per cent; renewals were made at $2\frac{1}{2}$ to 3 per cent and banks and trust companies quote 3 per cent as the minimum. Time contracts are in fair demand, but the inquiry for money is not urgent, while the supply is abundant, the foreign bankers being liberal with their offerings; rates are 3 per cent for sixty days, $3\frac{1}{2}$ per cent for ninety days, 4 per cent for four months, and 41 per cent for five to six months on good mixed There is no great discrimination against collateral. industrial stocks where these are put in on a fair margin. For commercial paper there is a good out-oftown inquiry, but the city banks are holding their funds for the accommodation of their customers and for out-of town depositors. The supply is good and there is a fine assortment of names. Rates are $4\frac{1}{4}$ to $4\frac{1}{2}$ per cent for sixty to ninety day endorsed bills receivable; 54 to 5% per cent for four months commission house names, and 5½ to 6 per cent for good single names having from four to six months to run. The bank return for last week showed that five of the larger banks held \$4,943,-800 out of the \$9,887,875 surplus reserve in all the banks in the association.

The features abroad this week have been (1) the failure of a colonial house of long standing, but this appeared to have no influence in London, and (2) the spread of the cholera on the Coutinent and its appearance at Liverpool and at other points in England, the latter seeming to have had a stagnating effect upon business. The cable reports discounts of sixty to ninety day bank bills in London at 15-16 of 1 per cent. The open market rate at Paris is 1 per cent, at Berlin it is 1 per cent, and at Frankfort 15 per cent. The Bank of England gained £158,000 bullion during the week. This, as we are advised by special cable to us, was due to the import of £275,000 (of which £174,000 was from Australia, £61,000 from Portugal and £40,-000 from other countries), to exports to Egypt and India of £80,000, and to shipments to the interior of Great Britain of £37,000. The Bank of France gained £137,000 gold during the week.

Foreign exchange was dull and easy until Wednesday, when it grew firmer under the influence of the interruption to exports caused by the cholera; but the tone was again easier yesterday. Compared with Friday of last week the market opened unchanged on Monday at 4 87@4 871 for long and 4 8812@4 89 for short; on that day the Bank of Montreal reduced its rates to 4 87 for sixty day and 4 881 for sight, and the Bank of British North America lowered its short rate to 4 881. On Wednesday Brown Bros. advanced to 4 871 for 60-day and to 4 89 for sight, and the Bank of British North America restored its short rate to 4 89. Yesterday the Bank of Montreal again advanced to 4 871 for 60 days and to 4 89 for sight, making rates by all the bankers uniform. Rates for actual business were 4 863@4 87 for 60 day; 4 85@4 881 for sight; 4 85½ to 4 88% for cable transfers; 4 86@4 86½ for prime and 4 85½@4 85% for documentary commercial bills. Yesterday \$2,600,000 gold was withdrawn for export to-day.

Whatever may be the effect of the regulations regarding cholera on trade in the near future, there can be no doubt that up to the present time the volume of business has continued large. At least that is the conclusion which the records of bank clearings would appear to justify. Through the use of the telegraph we are able to present to-day the totals of clearings at the various cities for the month of August, and the comparison with last year is on the whole a decidedly encouraging one. Including New York City the final aggregate shows an increase of 8.4 per cent and outside of New York an increase of as much as 12.4 per cent, which is much larger in both cases than for July. To be suro, in August last year the decrease had also been larger than for July, but it is to be remembered that the present increase would be even heavier than it is, if stock sales on the New York Stock Exchange were still cleared in the old way, through the banks, instead of in large part through the Stock Clearing House according to the new methods. As far as the number and value of the share transactions on the Stock Exchange are concerned, there has been no material difference in the two years, but the reduction effected in ordinary bank clearings for August by the new method is estimated at the large sum of 380 million dollars. However, the showing is very satisfactory as it is, without allowance for that factor.

The improvement noted in the case of the final aggregates also extends to most of the leading points. Taking the eleven cities whose results we usually summarize for a series of years, only two, namely San Francisco and Baltimore, record lower totals than for 1891 —all the rest have gains. The following furnishes the figures back to 1885. It will be observed that the aggregate outside of New York is larger than for the corresponding month of any previous year, and the same remark applies to the Western cities considered by themselves, more particularly Chicago, St. Louis, Pittsburg, Cincinnati and Kansas City. Even at New Orleans—a Southern port—the August clearings for 1892 are the best-on record.

With reference to the transactions on the New York Stock Exchange during the month, we have already stated that there is very little difference in that particular between August 1892 and August 1891. The present year the sales aggregated 5,447,178 shares, last year 5,841,699 shares, the volume of business not having been very large in either year. In the market value of the sales the accordance is very close, the 1892 aggregate being about 321 million dollars, against 323 millions for 1891. The following furnishes a summary by months.

The Atchison Topeka & Santa Fe has issued its July statement of gross and net earnings this week, covering the first month of the new fiscal year, and the results are very satisfactory. On the Atchison system itself there is a gain over last year of \$142,782 in gross and of \$149,043 in net, while on the St. Louis & San Francisco system there is a further gain of \$41,822 in gross and of \$38,478 in net, making together an increase of \$184,604 in gross and of \$187,521 in net. This is the more gratifying as it follows heavy gains in the corresponding month of other years. The Burlington & Quincy statement for the same month is of a somewhat different character. The road reports a heavy increase in gross, namely \$452,641, but a still heavier augmentation in expenses (\$487,031), leaving the total of the net less than for July last year. It is claimed in Boston that the increase in expenses represents outlays for improvements made to prepare the road for the traffic expected from the World's Fair at Chicago. The Chicago Milwaukee & St. Paul statement has also been issued this week, and shows an increase of \$407,447 in gross and of \$136,039 in net. The Canadian Pacific, with an increase of \$115,503 in gross, reports an increase of \$19,522 in net. The Rio Grande Western reports gross practically unchanged from a year ago, but net reduced from \$103,971 to \$95,579. The Erie, like the Pennsylvania and the Baltimore & Ohio, has suffered a decrease in gross and a still larger decrease in net owing to an augmentation in expenses. The decrease in the gross is \$33,733, in the net \$119,897. We refer to the expansion in trunk line expenses in another article. Northern Central has increased its gross from \$566,194 to

\$587,686, and its net from \$165,423 to \$168,298. The Ohio & Mississippi on diminished gross has increased its net from \$76,594 to \$82,626.

In the South we have a very good exhibit from the Chesapeake & Ohio. While gross has increased only from \$864,112 to \$877,216, net has been increased from \$236,769 to \$301,796 by reason of a saving of \$51,923 in expenses. This saving in expenses will be accepted as confirmation of the statement of the management, contained in the annual report reviewed by us last week, that the company had now reached a point where the large expenditures made for improvements in other years are no longer necessary, thus allowing of a greatly reduced operating cost. The other Southern roads which have submitted returns this week, present much less favorable comparisons. The Louisville & Nashville loses \$32,520 in gross and \$54,299 in net; the gain in the previous year however had been very heavy. The Norfolk & Western has increased gross \$40,388, but as the mileage operated was larger, this was attended by an increase of \$65,964 in expenses, thus producing a loss in net of \$25,576. The Jacksonville Tampa & Key West reports gross of \$40,151 against \$39,826, and net of \$5,774 against \$12,841. On another page we have reviewed the results of the Northern Pacific for the fiscal year ending June 30. 'For June the showing on that road is very favorable, gross being up from \$1,-895,832 to \$2,060,069 and net from \$616,260 to \$1,-023,983. The Wisconsin Central for the same month increased its gross \$91,355, and its net \$65,291.

Fears regarding the cholera have overshadowed all other influences on the Stock Exchange this week. On the announcement in the morning newspapers Thursday that on a German steamship which had arrived Tuesday night 22 deaths from cholera had occurred among the immigrants during the voyage, and that the vessel was being held at quarantine in the Lower Bay, the market developed great weakness, which operators for a decline took advantage of, with the result of forcing a large and general decline all through the list. False reports were circulated at the same time that cases of cholera had actually appeared in the city, and these had the effect of putting the market in a semi-panicky condition, transactions being large and at steadily declining prices. A sharp rise in the rates for money, reports of further gold exports, and the low prices ruling for wheat operated to promote the weak feeling existing. Yesterday, however, more rational views again prevailed, and with the knowledge that the authorities-national, State and local-were taking vigorous measures to protect the community, while no new cases had developed even at quarantine, the temper of the market in the morning changed and a considerable recovery took place. The tone however continued unsettled, owing to the difficulty of measuring the effect on our foreign trade of the prevalence of the epidemic abroad and the quarantine regulations made necessary by the same; and in the afternoon the tendency was again downward, under a sharp decline in Reading and other anthracite coal properties, caused by rumors of serions differences between the Reading and the Pennsylvania on coal matters.

The following gives the week's movements of money to and from the interior by the New York banks.

• The division (between gold and silver) given in our table of coin an d b ulion in the Bank of Germany and the Bank of Beiglum is made from the best estimate we are able to obtain; in neither case is it claimed to be accurate, as those banks make no distinction in their weekly returns, morely reporting the total gold and silver, but we believe the division we make is a close approximation.

NOTE. —We receive the foregoing results weekly by cable, and while no all of the date given at the head of the column, they are the returns issued nearest to that date—that is, the latest reported figures.

GROWTH IN DEPOSITS IN GREAT BRITAIN AND THE UNITED STATES.

We publish this week (page 369) the returns of the national banks to the Comptroller under his last call, that of July 12 1892. These reports are to-day more than interesting; they have become instructive, for though they cover national banks only, that system now numbers 3,759 separate institutions, and as there are more or less of them in every State they touch the business interests of every section; hence the reports called for five times a year reflect in a measure our industrial development.

Probably the item which discloses this development most strikingly is the growth in individual deposits. We have often called attention to this feature, but a long and elaborate article in the London Journal of the Institute of Bankers for May by Mr. James Dick, on Banks and Banking in the United Kingdom, in which we find a comparison between 1883 and 1891 of what is called in the text of the article the deposits in Great Britain and Ireland in those years, will give added interest to a somewhat similar exhibit for the United States. Mr. Dick's summary is subjoined

Note oche	Dait Dione D Stemment J		
	United Kingdom.	1883.	1891.
(1) Deposi	ts asocrtained£	474,844,000	£660,660,000
(2) Saving	s banks' deposits ascertained	87,652,000	113,983,000
(3) London	n private banks estimated	68,000,000	50,000,000
(4) Countr	y private banks estimated	80,000,000	50,000,000
(5) Foreig	n and colonial banks estimat'd	50,000,000	120,000,000
Tot. depr	osits or liabilities to the public.	£760,496,000	£994,643,000

It should be said in explanation of the foregoing statement that the items used in making up the compilation are not in all respects what would in this country be included under the head of deposits. We find another table in Mr. Dick's article which gives these matters more in detail, and we are thus able to analyze the above. It seems that the heading over compilation from which the first line of the above figures is taken-the line marked (1)-reads "deposits, current accounts and notes," and it will be observed that the total in the above summary is dcscribed as "total deposits or liabilities to the public." We may consequently assume that the last clause of this description ("liabilities to the public ") and not "total deposits" would be the more proper designa-

tion, although as said the text of the article appears to treat the compilation as "deposits," and the remarks made by others after the reading of the paper speak of it in the same way. To show just what the statement covers the Bank of Eugland figures which are included in the same will serve as an illustration. The Bank of England's pertion of the item numbered (1) is given separately (the date of the return used being omitted) at £61,-868,000 in 1891. According to the published report of the Bank of England on December 31 1891, the private deposits of that institution were £30,646,813 and the public deposits were £5,397,102; if to these we add the notes in circulation at the same date, which were £25,652,430, we reach about the same total as that used by Mr. Dick. Thus it is apparent that the aggregates in the summary differ materially from an aggregate of individual deposits made up in the United States, and yet as the two years' results given in the summary are prepared by the same method the increase from 1883 to 1891 may be taken as approximately indicating the increase during that interval in deposits in the United Kingdom.

We have often referred to the marvelous growth of this same item in the United States, illustrating our remarks by the National Bank figures. When, however, we confine the exhibit to the returns of those institutions, the growth is only, partly shown, though they afford results worth noting. Thus the returns of the national banks on July 1 1882 gave the individual deposits at \$1,066,-707,248, whereas on July 12 1892 the same total reached \$1,753,339,680, or an increase of about 700 million dollars. Were we to go back a few years further and compare those figures with the last exhibit, the contrast would be perhaps more striking. For instance take June 1877the individual deposits were reported at only \$636,267,-529; now, as we have seen, they are returned at \$1,753,-000,000. Perhaps we ought to add that the number of these banks according to the last return (July 12 1892) was 3,759, whereas on July 1 1882 the number was 2,239 and on June 22 1877 it was 2,078.

But these statements come far short of representing the aggregate of individual deposits in the country or the growth in such deposits. Even the savings banks of the country, though only very partially developed in any section except the New England and old Middle States, furnish about as large a total. According to the returns published in our STATE AND CITY SUPPLE-MENT of the strictly mutual institutions, the aggregate deposits of those banks in the New England States in 1891-92 wcre \$699,814,480, and in the old Middle States \$726,903,013, or a total of \$1,426,717,493. If to those we add the returns of the other savings banks of the country, stock and mutual, aggregating \$303,550,494, we have a total of deposits in the savings banks of the whole country of \$1,730,267,987. These latter returns are mostly dated in 1891. From the report of the Comptroller of the Currency for 1882 we get a total aggregate of the savings banks in 1881-2. The returns are given in detail, but the aggregate deposits are \$966,797,081, showing an increase in about ten years of over 750 million dollars.

There are only two other items which we can include —one is the State banks and the other is the Loan and Trust companies. For both of these classes of institutions the returns cover the years 1890.91, the total deposits reported for the State banks being \$556,637,012, and for the Loan and Trust companies \$355,330,080. The Comptroller of the Currency in the report for 1882

gave the corresponding figures (dates 1880-82) for State banks at \$281,835,496 and for Loan and Trust companies at \$144,841,596. Bringing together all these returns we have the following as the result reached :

Individual Deposits.	1890-92,	1830 82.
National banks	\$1,733,339,680	\$1,0
Savings banks	1,730,267,987	980.707,081
State banks	536,637,012	281,835,400
Trust and loan companies	355,330,080	144,841,596
Total individual deposits	\$4,395,574,739	\$2,460,181,421

This is certainly a very remarkable exhibit. shows an increase in the United States in this item of deposits of not very far from 80 per cent during about ten years, or an increase in that period of very nearly two thousand million dollars. That by no means covers the whole ground. There are many other kinds of associations which take deposits and loan them out. Building associations for illustration; that, though, is only one of a class. But the above result is sufficient for our purpose. It tells the story of this country's marvelous development in late years. Mr. Dick in his article with reference to the United Kingdom speaks of "the accumulation of wealth" which is "held in trust by the banks and represented by these figures," as "a monument of industry; of latent stored-up labor of head and hand," in the United Kingdom. What are we authorized to say with reference to the compilation we have made? To some extent the deposits are duplicated, but not to a large extent, and not we think to a larger extent than in Mr. Dick's comparison.

PRICE AND RATE REGULATION.

The decision in the Texas railroad cases last week invests with new interest the very able and instructive paper on the Legal Theories of Price Regulation which Prof. Arthur T. Hadley has prepared for the Yale Review. As is the case with all of Prof. Hadley's efforts, the subject is carefully treated, and the deductions he makes and the conclusions he reaches possess additional value and merit on that account. The Professor traces the history of price regulation by Government from ancient to modern times, including of course the attempts to fix railway rates, and he shows that the methods have differed widely in different countries and at different periods of the world's history, and that these differences are all clearly referable to the differences in circumstances and conditions of the nations making the attempts.

After stating that a sale presents two distinct aspects, according as it is regarded as an individual transaction affecting buyer and seller alone, or as one among many transactions which furnish the means of supplying the market with commodities in the necessary quantities for consumption, he points ont that the Roman law looked solely at the former aspect, treating the transactions as something which concerned only the buyer and seller, each being free to make any terms he pleased. In those days it was considered that every man was absolute master of his own property, and that dectrine was consistently carried out. Such a state of things was only possible where law was highly developed and commercial transactions but slightly so. In ancient Rome both of those conditions existed to a marked degree. The Romans were able to command the products of the world by the compulsory labor of slaves at home and the taxation of people who were little

there is far less mention of markets or of trading in the world-wide transactions of Imperial Rome than in the much more restricted ones of Athens a few centuries earlier. In mediæval Europe the situation was different, commercial transactions, while small contrasted with those of the present day, having a large importance compared with those of the Roman Empire, and then also the property law was less highly developed. The land owner felt the necessity of exchanging his products for those of artisans or craftsmen, and hence the question of price regulation assumed much greater consequence than it had in Rome. It follows that there was a change of legal theory, attempts being made to fix prices by public authority. The attempts were crude, but the idea controlling them was that sellers were likely to exact more than a just price if left to themselves, and that buyers on their part were likely to endeavor to pay less than the proper price, and hence that a standard of fairness must be enforced by public sentiment, if not by direct legislation, to prevent abuse on one side or the other.

Prof. Hadley notes that this latter theory was never consistently carried out even in Feudal times. For one class of products, of which he says wheat furnishes the best instance, it was not carried out at all, partly because of the variations in yield from year to year, and still more because the sellers of wheat were the people who had most to do with making the laws. In the case of manufactured articles, custom and police regulation were more effective. Manufacturing conditions varied but little from year to year, and the amount of capital involved was so small that there was a well defined relation between product and the labor expended on it. Yet even here Prof. Hadley finds that prices were fixed in many instances by the guilds rather than by the public-by sellers rather than by consumers. Thus there was a distinct tendency towards class legislation, and as time went on and this tendency became more pronounced, the courts more or less gradually undertook to restore the common law system of regulation of prices by free competition. Prof. Hadley points out that there is an essential difference between this system and the system which obtained under the old Roman theory. The Roman law allowed free determination of prices as a consequence of the unrestricted right of private property. The common law encouraged it as a means of supplying a market more fully and fairly than could be done in any other way. "The common law, both in its rules and its exceptions, recognized the public commercial end, which the Roman law did not."

But other circumstances also combined to bring the system of free competition into favor. Within the last one or two centuries there have been great improvements in the Arts and Sciences, the processes of manufacture and production have been simplified and cheapened, and have also been prosecuted on a vastly greater scale. This made necessary the increased use of capital. The laws of the Middle Ages had not been very favorable to investments of capital, at least investments into which the speculative element entered to any great extent. But with the change in conditions it was speedily recognized that the quickest way to secure the capital needed was to allow the owner or borrower of capital to manage his industry in any way that his business interests seemed to dictate. Moreover, it was felt that to have cheap goods competition was the one thing essential. Speaking on this point,

this necessity and possibility with praiseworthy quickness. If a man could produce goods for less than had previously been paid, it was for the advantage of the whole community to encourage him. But he thinksand it is this conclusion at which he arrives that will attract special attention-that legal progress in the direction indicated has now about reached its limit. under the technical conditions of industry to-day. Says he: "As long as the fixed capital is relatively small and the circulating capital relatively large, competition will never permit rates to be much above cost of service, and will cease when rates fall below that standard. But if the capital charges are large, as in a modern factory, or still more clearly in a consolidated railroad system, the standard which will bring in new capital is very much higher than that which will cause existing capital to contract its operations. The automatic character of price regulation as it was produced by competition a hundred years ago is now apparently gone, and in some measure, though not so far as is generally supposed, it is gone in reality."

The subject of railway rates forms part of the general question of price regulations. It had always been recognized by the common law that there were certain industries where competition was impracticable if not impossible, and such industries had been subject to special regulation or law. Of such methods of regulation canals supplied the most important instances during the last century, maximum tolls being fixed by charter. Later-that is, at the beginning of the present century-the same thing was done in the case of railroads. Professor Hadley reasons that these methods of regulation proved inoperative because the prices actually charged were so much lower than any one had contemplated at the outset. Under the great increase in the volume of business-so much greater than any one could have thought likely at the beginning-rates could be and were very much reduced. But the process of reduction was not very even, and hence led to grea inequalities, which inequalities were intensified through the arbitrary power possessed by the railroads to discriminate very decidedly between different persons and different places. In these instances, moreover, efforts at enforced competition increased rather than diminished the inequalities, since the effect was to reduce rates to the very lowest level in some cases while leaving them absolutely unchanged in others.

The crying evil therefore was the practice of inequalities, and it was to the removal of these that the courts were obliged to address themselves. The first efforts of the English courts in the direction of enforced equality were extremely crude, and Prof. Hadley remarks that the decisions conflicted with one another to a great extent. Moreover the attempt was made to carry the law too far, resulting in its practical nullification. Graquily, however, the courts narrowed the scope of judicial interference, finally confining their attention to cases of clear and conspicuous inequality, where different persons were charged different rates for the same or substantially the same shipment, the underlying theory being that while those in charge of the roads should have the right to fix rates within charter limits, yet if a reduction was made to one it must be accorded to another. As to whether the circumstances and conditions of the two parties were essentially the same, that was a judicial as distinct from a legislative or administrative question.

was the one thing essential. Speaking on this point, There is no sharp line of distinction between Eng-Prof. Hadley says that the courts of England recognized land and the United States as regards the methods employed.

NORTHERN PACIFIC'S SHOWING FOR THE FISCAL YEAR. The Northern Pacific statement for June has been issued this week, and from it we are able to make up the accounts for the fiscal year—that is, for the twelve months ending June 30. The year was rather an eventful one, and the outcome has been awaited with

the accounts for the fiscal year-that is, for the twelve months ending June 30. The year was rather an eventful one, and the outcome has been awaited with considerable interest. For the six months to December 31, it will be remembered, the result had been much better than expected, chiefly however by reason of a decided increase in the item of miscellaneous income; in the latter half of the year the situation was such that the management decided to snspend dividends on the preferred stock. No doubt the belief has been that the company had lost heavily in earnings as compared with the year pre-ceding. As a matter of fact the figures reveal only a comparatively small decrease in gross, while the net has actually increased, and is the largest in the history of the company. We present the following to show

the course of gross and net earnings during the last six years. The figures do not include the operations of the Wisconsin Central for any of the years.

Northern Pacific.	1891-03.	1890-01.	1889-90.	1888-89.	1887-83.	1896-87.,

Total earnings	24,961,457	25,151,544	22,610,503	19,707,468	15,846,928	12,789,448
Operal'g expens's	14,170,365	14,010,402	13,089,187	11,863,541	9,025,596	6,904,617
Per cent	(57.48)	(59.40)	(57.89)	(60.2.))	(56.98)	(53.99)
Net earnings	10,483,092	10,211,142	9,521,386	7.813,027	6,800,782	5,884,831

All things considered, we have here a most remarkable record of growth and progress. Conditions in the late year, as is well known, were not altogether favorable-on the contrary some of the chief conditions were unfavorable. At the eastern end of the system the large crop of spring wheat produced last season in Minnesota and North Dakota counted as a beneficial influence of some moment; but on the other hand industrial interests on the Pacific Coast experienced considerable depression which operated to the disadvantage of the lines at the Pacific end of the system. Moreover, the company was also deprived of the traffic in the transportation of wheat from the Pacific Coast to Daluth and Minneapolis (furnishing a very long haul), which had been a feature of the operations of the previous year; the conditions of the late year did not warrant shipments of that kind. Altogether it would not have been surprising if gross receipts had heavily fallen off, especially seeing that there had been large and uninterrupted gains in all the years preceding. What we actually find is that passenger earnings have declined only \$384,000 from the heavy total of the year preceding and freight earnings no more than \$147,000. In aggregate gross earnings of all kinds the decrease is less than half a million dollars. In a word, after rising from \$12,789,448 to \$25,151,544 in the four years from 1887 to 1891, the decrease in 1892, on unfavorable conditions, has been only to \$24,661,457that is less than 2 per cent. The not earnings after having risen from \$5,884,831 to \$10,211,142 between 1887 to 1891, in 1892 further rose to \$10,485,092.

The exhibits for the closing months of the year showed decidedly improved results, and it is this circumstance that operated to better the character of the statement for the year. June particularly made a

lation in America, while on the other hand there have been a good many efforts at legislative re-adjustment of charges in England. There is this difference, however, that while the successful regulation in England has been almost exclusively judicial, that in the United States has been the work of administrative bodies. The American legal development dates from 1871, when the reaction from the over-construction of railroads was beginning to make itself felt. By the aid of land grants, municipal subscriptions and other unwiso devices to encourage artificial growth, says Professor Hadley, we had prepared ourselves for a practical experience of the failure of the theory of enforced competition. The farmers at the same time were suffering from low prices, and the result was the passage of the so-called Granger Laws, which were so harsh in their operations and effects. The railroads resisted this legislation on the broad ground of unlimited property rights, and were defeated. Professor Hadley observes that to-day the position assumed by the railroads is wholly different from that which they adopted in 1873. They no longer contend that their business is like any other business, nor deny the right of public authorities to say something about rates. They do. however, deny the right of the authorities to make unreasonably low rates, and on this issue, as fought out in the Minnesota cases, they were successful. In other words, the courts will not allow the legislative authorities unlimited power to make rates any more than they were willing thirteen years previously to accord the same right to the railroads. The decision in the Texas cases had not been rendered when Professor Hadley wrote his essay, but Judge McCormick in granting the prayer of the railroads based his arguments mainly on the same broad grounds. There is protection, too, against class legislation in having the reasonableness of rates subject to judicial determination, for such class legislation is exceedingly likely where, as in the case of our Western roads, the ownership lies in the East while those using the roads are in the West. Professor Hadley expresses the opinion that there is every reason to hope that the price regulation of the future may take more and more the direction of securing equality rather than of fixing rates.

There has been more or less judicial regu-

The conclusions which Professor Hadley reaches as the result of his able analysis of the subject of price and rate regulations will attract wide attention, the more so as they are in accord with the opinions of the best thinkers on railroad subjects. Says the Professor : "The Roman theory of absolute property rights is untenable in a commercial community. The Feudal theory of fixing prices by public authority on the basis of custom is still more untenable. The English common law theory of voluntary competition works extremely well in industries with small capital and independent establishments, but is subject to important limitations where there is a de facto monopoly. Compulsory competition has proved impracticable; charter maxima have been inoperative. We are reduced to the three alternatives of socialism, class legislation, or judicial enforcement of equality on the basis of private initiative in rate-making. The dangers of each of the two former bring us down to the latter as the only visible line of development which will not sacrifice more than it gains." From this last proposition we think few persons who have thought much on the matter will dissent. It would certainly seem very difficult to refute.

splendid record in this respect, gross having increased as compared with last year from \$1,895,832 to \$2,060,-069, and net having increased over \$400,000, or from \$616,261 to \$1,023,983. Thus far we have not considcred the Wisconsin Central results. That road in June increased its gross from \$426,527 to \$517,882, and its net from \$150,334 to \$215,625. The following table gives the comparative gross and net both of the Wisconsin Central and the Northern Pacific for June and also the twelve months.

	Northern	n Pacific.	1Visconst	n Central.	Total both Co's.	
	1802. 1591.		1802.	1891.	1892.	1891.

 Net earnings...
 10,485,092
 10,211,142
 2,047,727
 1,838,445
 12,532,819
 12,069,557

We see by this that the Wisconsin Central for the twelve months enlarged its gross as well as its net, the former from \$5,245,714 to \$5,543,964, and the latter from \$1,888,445 to \$2,047,727. If we combine the results for the Wisconsin Central with those of the Northern Pacific we find aggregate gross earnings diminished only from \$30,397,258 to \$30,205,421, while aggregate net has advanced from \$12,099,587 to \$12,532,819.

It was known that fixed charges would be heavier in 1812 than in 1891, and yet under such a favorable exhibit of earnings as the above figures reveal one would be inclued to think that the amount earned for the stock ñ 'ie two years could not have differed greatly. As it i, this surplus for 1892 proves to be only \$834,887, against \$1,910,753 for 1891 and \$2,059,891 for 1890. The subjoined statement will show how that result is arrived at. The statement contains the charges itemized as far as the monthly returns furnish the items.

It thus becomes plain that the addition to charges has been far in excess of what would have been supposed likely, the total of these charges (including the rental of the Wisconsin Central) having risen from \$12,188,930 to \$13,750,417, or considerably over 11 million dollars. It is to be regretted that the reason for this heavy addition cannot be determined from the from \$6,247,074 to \$6,901,956 is not hard to underthe item of rentals to branch roads. But it will be ob- which we shall presently advert.

served that the most striking increase of all occurs in the three final items lumped together in the table, comprising payments for "general interest," for "sinking funds" and "miscellaneous." The aggregate of these for 1891 was only \$830,429; for 1892 it figures out almost a million dollars greater, or \$1,823,236 in amount. It is these items, therefore, that furnish the key to the whole situation. When analyzing our figures for the six months to December 31 we were informed that there had been a change in the company's method of bookkeeping, that the item of sinking fund payments now embraced not only the payments made out of earnings but also those made out of the proceeds of land sales which latter had previously been excluded from the income statements. As part of the same change, such proceeds are also included on the other side of the account under the head of miscellaneous income, so that that item is likewise affected. The amount involved in the change in question we do not know, and hence we cannot tell how far it goes to explain the increase of a million dollars in the three items of charges lumped together. The annual report, however, will doubtless furnish full information. In the meantime there is cause for congratulation in the fact that in such a year as the last the Northern Pacific should have been able to. make a surplus so large as \$834,887 over and above all charges. As the amount of the preferred stock now outstanding is \$36,564,250 the surplus is equal to about 21 per cent on the same.

TRUNK LINE EXPENSES.

Comments have been made on the continued increase in the expenses of the Pennsylvania Railroad, as disclosed by its monthly returns. In England the criticisms on this feature have been severe, it being argued that owing to the great augmentation in expenses the improvement in net results during the last few years had not proved commensurate with the heavy capital outlays incurred during the same period of time. These strictures on the management of that road suggest an examination of the figures of the other trunk lines, in order to determine whether their record and experience have been any different. We have on a previous occasion referred very briefly to the matter, but did not then have the full data we now possess.

In reviewing the Pennsylvania statement last week for July, which showed a decrease of \$101,110 in gross carnings accompanied by an increase of \$280,807 in expenses on the Eastern lines, and a decrease of \$156,-811 in gross with an increase of \$154,679 in expenses on the Western lines, we noted that in the case of the Baltimore & Ohio the character of the exhibit for July was much the same, that road reporting a falling off of \$129,194 in gross coincident with an expansion of \$39,452 in its expense accounts. This week we have had the Erie return also for July, and it reveals results which differ in no manner from those disclosed by the statements of the Pennsylvania and the Baltimore & Ohio-that is, there is a decrease of \$33,733 in gross attended by an increase of \$86,164 in expenses, thus producing a loss of \$119,897 in net. The loss in gross earnings on all these roads is presumably attributable to the labor troubles which occurred at the above statement. The increase in funded debt interest steel mills during the month in question, and hence we may suppose is merely temporary in nature. The stand, especially as there is a coincident decrease in augmentation in expenses is due to other causes, to

As the comparisons in these cases cover merely a single month and also go back only one year, it is evidently desirable to extend the investigation somewhat further, so as to allow of deductions on a broader and more comprehensive basis. For this purpose the results for the six months from January 1 to June 30 will be very useful. Wo select this period because it brings the figures down to a recent date, and at the same time permits us to include roads which will not furnish monthly exhibits, but merely quarterly or half-yearly statements, the Lake Shore & Michigan Southern for instance having just filed at Albany its return for the three months ending June 30. In the following table we have brought together the gross earnings, operating exponses and net earnings of the Pennsylvania, both Eastern and Western lines, the New York Central, the Lake Shore, the Michigan Central, the New York Chicago & St. Louis (or "Nickel Plate"), the Cleveland Cincinnati Chicago & St. Louis (or "Big Four"), the Eric, the Baltimore & Ohio and the Wabash-in other words all the larger trunk lines -for the first half of each year back to 1889. The statement will be found quite interesting entirely apart from the aid it furnishes in a study of the tendency of expenses, for the totals cover figures of very large magnitude, the aggregate of the gross reaching only a trifle less than 140 million dollars and the aggregate of the net over 39 million dollars.

* Rome Watertown & Ogdensburg included in all the years. * Not including taxes.

Wo thus see that as respects the tendency towards increased expenses the showing for July has been by no means exceptional, nor does the character of the Pennsylvania's return differ greatly from that of the exhibit of the trunk lines as a whole. As compared with the six months of 1891 the Pennsylvania the present year increased gross earnings on the Eastern lines about 14 million dollars and on the Western lines nearly 2¹/₂ million dollars, while the net earnings of the former actually diminished \$150,000 and those of the latter increased less than \$200,000. Looking now at

creased over 14 million dollars, lost nearly half a million dollars in net: the Erie, with a gain of a million in gross, has added practically nothing to its net; the Baltimore & Ohio, with gross increased \$775,000, has lost nearly \$200,000 in net; the Wabash, though having increased gross \$428,000, has suffered a decrease of \$100,000 in net; the Michigan Central, while having gained nearly \$700,000 in gross, has gained but \$80,000 in net. And so we might go through the list.

If we compare with the year preceding the last, that is with 1890, we find that there was a special reason for the heavy increase in expenses on the Pennsylvania the present year in the fact that that road last year had very heavily contracted its expenses. This is especially true of the Western lines, where the saving in 1891. was so decided that with a decrease of nearly 11 million dollars in gross the net was actually increased over \$200,000; and even the Eastern lines then showed slightly increased net, notwithstanding a decrease of almost half a million dollars in the gross. Some of the other trunk lines also practiced economy in their expense accounts last year, as for instance the Baltimore & Ohio and the Wabash, though the reduction in expenses in those cases was not so marked as on the Pennsylvania. Still even as between 1892 and 1890 (omitting altogether the intervening year) the increase in expenses is quite a feature of the returns. In these two years gross earnings have risen from \$131,954,713 to \$139,901,341, while the net has remained substantially the same, being \$39,070,657 for 1892 against \$39,054,598 for 1890, the increase in expenses having consumed practically the whole of the addition to the gross. Out of the ten systems whose figures are separately given in our table, five actually have lower net for 1892 than for 1890. It is worth noting that of the five which show larger net than two years ago, the Pennsylvania Western lines constitute one and that the increase on them is heavier in amount than on any of the others.

The course of gross earnings during the years covered by this review furnishes notable evidence of the tendency of traffic to grow and expand on these lines. We start with gross of \$117,920,615 in 1889. It is proper to say that earnings in that year were by no means poor, the crops of 1888 having been large. The season of 1889 produced still larger crops, and hence there was a very marked increase in earnings in the first half of 1890, the total rising from \$117,920,615 to \$131,954,713. In 1890 the crops were short and the result was a great falling off in the grain movement during the first half of 1891. Daring this latter period, too, the strike in the Connellsville coke region occurred and iron production was greatly reduced, and yet under these unfavorable influences gross earnings declined only from \$131,954,713 to \$130,578,207; and now under the effects of last season's very exceptional crops this small loss has been entirely recovered, and the total raised to \$139,901,341. The net earnings increased from \$35,287,311 in 1889 to \$39,054,598 in 1890, bai dave since then, as we have seen, remained stationary, notwithstanding the further addition to the gross.

No doubt several circumstances have contributed to the. increase in expenses. With the outlook for traffic, and earnings bright, managers aro naturally inclined to beliberal in the making of repairs and renewals, just as they arethe total for all the lines given in the statement, we inclined to be economical and sparing when the traffic find that with gross increased from \$130,578,207 to conditions point in the other direction. This being so, \$139,901,341, net has fallen off from \$39,566,611 to a comparison of a year of one extreme, like 1892, with \$39,070,657. The New York Central, with gross in- that of a year of the opposito extreme, like 1891, prc-

As bearing on the duces very striking contrasts. question of large expenses at the present time, it should be observed furthermore that the coming World's Fair at Chicago operates as a special stimulus to heavy outlays, railroad managers all making extra efforts to put their lines in superior shape, so as to be able to take care of the very heavy traffic expected as a result of that event. Again, though tariff schedules have been fairly well observed, the tendency of rates under the low prices prevailing for all commodities and the small margin of profit left to the producer, is steadily in the direction of lower figures. This makes it necessary that a road shall do a larger amount of business in order to produce the same amount of earnings as before, and this increase in business of course involves increased expenses. Finally, while the tendency of rates continues downward, the cost of labor, which forms an important item of expense, is in not a fow departments of the service rising rather than declining.

DEBT STATEMENT AUGUST 31, 1892.

Clearings by Telegraph-Stock Exchange Clearing House Transactions .- The subjoined statement covers the clearings for the current week, usually given on the first page of the CHRONICLE, but which on account of the length of the other tables is crowded out once a month. The figures are received by telegraph from the leading cities. It will be observed that as compared with the corresponding week of 1891 there is a decrease in the aggregate of 7.5 per cent. So far as the individual cities are concerned, New York exhibits a decrease of 17.1 per cent, due not only to the sumller volume of speculative transactions this year, but also to the operations of the Stock Exchange Clearing House. Philadelphia and St. Louis record gains, but there are losses at Boston, Baltimore, Chicago and New Orleans.

From May 17 to 24 inclusive the stocks cleared were Chicago Milwaukee & St. Paul, Louisville & Nashville, Northern Pacific pref. and Philadelphia & Reading. On the 25th. Atchison, Chicago Burlington & Quincy, Bock Island and Union Pacific were added to the list. On June 4, Chicago Gas, Missouri Pacific, New York Lake Erie & Western and New York & New England were added; on June 15, Delaware Lackawanna & Western, American Sugar common and Western Union were added.

UNITED STATES QUARANTINE AGAINST CHOLERA,

The following circular, declaring a twenty days' quarantine against vessels carrying immigrants and coming from any foreign port, was issued by the Treasury Department on Thursday, with the approval of the President:

TREASURY DEPARTMENT, OFFICE OF THE SUPERVISING SURGEON-GENERAL UNITED STATES MARINE HOSPITAL SERVICE, WASHINGTON, Sept. 2, 1892.

To Collectors of Customs. Medical Officers of the Marine Hospital Ser ves, Poreign Steamship Companies, State and Local Boards of Health :

ncc, Foreign Steamship Companies, State and Local Boards of Health:
 It having been officially declared that chalers is prevailing in vari-ous portions of cussia. Germany and Fraces, and st certain ports in Great Britain, as well as in Asia; and it having been maje to appear that immigrants in large numbers are coming hoto the United States from the infected districts aforesand, and that they and their personal effects are lable to introduce a blear alter and use that they and their personal from the infected districts aforesand, and that they and their personal effects are lable to introduce a blear alter the United States from the infected districts aforesand, and that they and their personal effects are lable to introduce a blear alter the United States, and that vessels convering them are thereau a direct memore to the public health; and it having been further shown that under the laws of the sels a sufficient length of time to insure against the introduction of con-tagious diseases, it is hereby ordered that no vessel from any foreign port carrying immigrants and it is a main the thereonder a quarantine de-tention of twenty days (unless such detention is forbidden by the laws of the State on the regulations made thereunder), and of such greater number of days as may be fired in each special ense by the State are thoritics.
 This elevelut to take immediate effect, except in cases of vessels affoat at this date, which will be made the endiect of special consider-ation upon due application to the Department. WALTEE WYMAN.
 Supervising Surgeon-General United States Marino Hospital Service. CHARLYS FORTER, Secretary of the Treasary. Approved, BENJAWIN HARRISON.

Monetary Commercial English News

[From onr own correspondent.]

LONDON, Saturday, August 20, 1892.

The price of silver, after rising at the beginning of the week o \$8 5-16d. per ounce, dropped back again on Thursday to 37% d. per ounce, and there has been a very general fall in silver securities ; Indian rupee paper, for example, has fallen during the week about 11/4 and Mexican sixes about 13/4. The securities of the Mexican railway companies, however, are supported by the new pooling arrangement. The shares of Eastern banks have likewise all dropped ; those of the Chartered Mercantile Bank have fallen 11/2; they are £25 paid, with a liability of £25 in case of liquidation, and they have changed hands this week at about 3%. The shares of the

Bank of China and Japan are about 1/6, or even under. Naturally this general fall has excited a good deal of apprehension and rumors were circulated that one of the banks had applied to the Bank of Eugland for assistance and had 'been refused. There is absolutely no foundation for the rumor, which appears to have been invented for "bear" purposes. No application has been made by any important institution to the Bank of Eugland. As a matter of course the banks are losing through the fall in silver, but the particular institution pointed at is not believed to be in serious danger, though the depreciation of its shares has gone so far as to alarm its depositors. Probably some reorganization will be necessary.

The banks and discount houses are trying to raise rates, and the discount rate in the open market has in fact been advanced to 1 1-16 per cent. It will probably rise higher if apprehension increases; otherwise it will be very difficult indeed to maintain the advance, for business of all kinds is exceedingly quiet, while the supply of unemployed money is very large. The Bank of England holds at present not far short of 271/2 millions sterling in gold, and its reserve considerably exceeds 17¼ millions sterling.

On the Stock Exchange business is still stagnant. But though there is no increase in business, quotations in the British railway market and in foreign securities are higher. During the elections here there was a good deal of "bear" selling of British railway stocks ; but as the public has taken very calmly the change of government, and was prepared for the decline in railway dividends, the "bears" are now buying back. The strength of the foreign market is almost entirely derived from Paris, where the great operators are as confident as ever, and where money is exceedingly cheap. The Spanish loan is not yet completed, and the news from Russia is not reassuring ; still the Paris Bourse is confident in its own ability to maintain quotations, and the negotiations between Russia and Germany have also strengthened the Berlin Bourse. On the Continental bourses, however, there is very little more real business than in London ; the movements are mainly due to "bear" re-purchases, the public everywhere acting very cautiously. Early in the week there was a severe fall in Uruguayan securities, it being reported that the Government was in great need of a fresh loan, and that a revolutionary rising was prevented only by the loyalty of the army. The real position is not known, for exceedingly little intelligence is received from Montevideo, the public here being almost entirely dependent for its information upon private advices. There has since been some recovery. There are no fresh bank failures in Australasia ; according to the report of the Committee of Investigation of the Mercantile Bank of Australasia, the bank has been insolvent ever since 1889. The directors obtained excessive accommodation from the institu. tion, and land and finance companies promoted by one of the directors slso got improper advances. The committee estimates that a call will have to be made upon the shareholders for nearly half a million sterling.

The cotton trade presents the same features noted heretofore. The demand for the Far East is of course affected by the state of the silver market, but the home trade in all its branches continues fairly good. There is no scarcity of employment and no material reduction in wages.

The Treasurer of Queensland, in making his financial statement on Thursday, said that the past year had been a very unsatisfactory one for all the Australasian Colonies. In the past they had indulged in borrowing to an excessive extent. So far as Queensland was concerned there was a deficit for the year of over £200,000, and for the new year he estimates a deficit of £100,000, which he proposes to cover by reducing the salaries of Members of Parliament and increasing the Customs duties.

According to an estimate of the harvest in this country, published by one of the sgricultural papers this week, out of a total of 325 reports the wheat crop is an average in 124, under average iu 163 and over average in 35 cases. Barley is said to be, as the Times also reports, the best crop of the year, both the yield and the quality being good. Oats is under average in 136 cases, average in 120 and over average in 54 cases. French reports are to the effect that the yield is turning out better than had teen expected, and will be very little under average. The news from Austria-Hungary is that the crop is up to the average, and it is said to be likewise about an average in Germany, Holland and Belgium. In Spain much damage has been done by excessive drought in many

districts. The intelligence from Russia is still conflicting, and it is impossible to form any definite judgment; all that is known is that the harvest will be very bad in some districts and good in others. Leaving Russia out of account, the European harvest will probably be very nearly up to the average. The wheat market continues exceedingly quiet, traders buying only from hand to mouth.

Messrs, Pixley & Abell write as follows under date of August 18:

August 18: Gold has been in considerable demand eince last weck, chiefly for Austria, and there has also been some inquiry for United States gold coin. Since the 11th inst, the Bank has received £319,000, of which £150,000 enne from Australia and £110,000 from Lisbon. Arrivals: West Indies, £2,500; South Africa, £60,000; New York, £12,000. Shipments: To Bombay, £20,000. Silver, after a sudden recovery to 38 5-16d., has given way on ac-count of the unsatisfactory India Council Allotment, and closes very weak 10-day at 375d. Arrivals: West Indies, £35,000; New York, £20,000. Shipments: To Bombay, August 12, £105,000. Mexican Dollare-These coin have been in decided request, and to-day have been sold for the East at 37%d., a difference of only ¹4d. below bar silver.

The quotations for bullion are reported as follows:

WALL STREET, FRIDAY, SEPTEMBER 2, 1892-5 P. M.

The Money Market and Financial Situation .- The cholera facts and fancies in Europe and in this country have had some little effect upon the markets this week. Among other results is that of causing the sale of stocks here for foreign account, as usually happens whenever there is any prospect of calamity abroad, since the easiest way of getting a supply of gold quickly and at least expense is by selling securities in the New York market.

The Texas railroad decision and the New Jersey Chancellor's decision against the Reading combination in New Jersey have both been obeyed, and as a result of the latter the Central of New Jersey has gone back to its own managers. The opinion of Chancellor McGill goes quite fully into the Port Reading Railroad question, and holds that the lease of the Central Road to that company with a guarantee of the lease by the Philadelphia & Reading was in truth a lease to the latter company, and that the New Jersey law forthe latter company, and that the New Jersey law for-bidding lesses to foreign corporations cannot be evaded by a matter of form in organizing a company under the laws of that State to take the lease and hold it. The parties interested in the combination have stated, however, that the breaking of this lease will have no effect on the practical working of the companies in harmony. In the meantime the Reading system is broadening greatly, and new routes for its coal have been opened via the Pough-keepsie Bridge, over the Lehigh Valley road to Buffalo and by the Lake steamers, and over the Harrisburg connec-tion with the Western Maryland and the Balto. & Ohio roads. The gold situation and the movement in securities are cer-tianily not very satisfactory at this late date in the season, and the depressed condition of affairs abroad and our own silver inflation must be held chiefly responsible for this. The open market rates for call loans during the week on stock and bond collaterals have ranged from 2 to 6 per cent, the average being 3½ per cent. To-day rates on call were 3 to 4 per cent. Commercial paper is quoted at 4¼@5¾ p. c. The Bank of England weekly statement on Thursday showed an increase in bullion of £159,000, and the percentage of re-serve to liabilities was 50.65, against 50.19 last week; the dis-count rate remains unchanged at 2 per cent. The Bank of France shows a decrease of 3,425,000 francs in gold and 700,000 francs in silver. The New York Clearing-House banks in their statement of August 27 showed a decrease in the reserve held of \$4,323,700 and a surplus over the required reserve of \$9,837,875, against \$12,378,875 the previous week. bidding lesses to foreign corporations cannot be evaded

Foreign Exchange.-The market for sterling bills has Foreign Exchange.—The market for sterling bills has been desidedly stronger this week, owing to a better demand and a moderate supply of commercial. Purchases by arbitrage houses against the sale of stocks for foreign account have been among the influences that strengthened prices. Exports of gold (all by to-morrow's ateamers) amount to \$2,600,000. Actual rates for exchange are: Bankers' sixty-days sterling, 4 863/(@4 87; demand, 4 88@4 89¼; cables, 4 883/2;@4 883/. Posted rates of leading bankers are as follows:

State and Rallread Bonds.—Sales of State bonds at the Board have included only \$5,000, Tenn. Settle. 3s at 751/3; \$1,000 Ala. class A at 101.

Railroad bonds have been more active on some issues, owing partly to the same causes that have affected the stock market. On a few popular bonds also the interest fell due September 1, and after payment the prices declined more than the amount of the coupon, when the whole market weakened; among these were Atchison incomes and Hocking Valley fives. The Reading preferred income bonds have declined in company with the stock, in consequence partly of the New Jersey decision, and also because the July earnings were less favor-able than some had expected. The Louisville St. Louis & Texas bonds have sold freely and close at 963, a new consoli-dated mortgage having been authorized. The Ontario & Western refunding 4s have sold well and close at 83. Prices on the general list of bonds that are usually active bave not weakened much in sympathy with stocks, and there is little Railroad bonds have been more active on some issues, owing on the general list of bonds that are usually active have not weakened much in sympathy with stocks, and there is little doubt that these securities as a class will be fortified by the decision in the Texas Railroad Commissioners' suits if that decision is upheld by the U. S. Supreme Court. The railroads having generally promised to pay gold interest on their bonds would under this interpretation of law be enabled to make rates which would permit them to earn and pay such in-terest in case of a silver currency in the future.

rates which would permit them to earn and pay such in-terest in case of a silver currency in the future. Railroad and Miscellaneons Stocks.—The stock market has had quite a shaking up this week, with a sharp de-chara in some of those specialties that had been most strongly pushed upward. There had been reports for several days of large sales by a leading operator who has recently figured quite prominently in bulling certain stocks, and then came the cholera scare on Wednesday afternoon, followed by quite a break in stocks on that day and Thursday. But the bear attacks based on these matters developed rather an inflated condition of the market in some quarters, with appar-ently slender margins, which were easily exhausted on a moderate decline in prices. To-day stocks were generally stronger in the morning and a part of Thursday's loss was recovered, but the strength was not maintained, and Reading to keen and honds were especially weak in the afternoon on the prosect of a war in coal freight rate. The industrial stocks fell off easily when the market weak-ned, and American Sugar declined to 106%, General Electric to 108%, National Lead to 38%, preferred to 90, American Coth Oil to 40½, Western Union Telegraph to 93%; New York & New Eagland, which had been recently one of the paseding combination is denied. The granger stocks are far-ored by the wheat yield in Kansas and some other States, but their prospects for corn traffic out of this year's crop must yet their prospects for corn traffic out of this year's crop must yet their prospects for corn traffic out of this year's crop must yet their prospects for corn traffic out of the its while first fush of the Texas decision. The Central of New Jersey road has gone back to its own managers, and the stock closes at 100½, against 1854 last week.

will be redeemed on November 1 next at the office of Messrs, Drexel, Morgan & Co., New York, at 105.

Central of New Jersey.—In obedience to the orders of Chancellor McGill, this company has formally taken pos-session of its property. President J. R. Maxwell, of the Jer-sey Central, issued the following general notico: "An injunction of the Court of Chancery of New Jersey hav-ing been issued and served this day, enjoining and restraining the Port Reading Railroad Company from using or operating

the Port Reading Railroad Company from using or operating the railroads and other property of this company and command-ing and directing this company to resume control of all its property and franchises and the performance of all its cor-porate duties—notice is hereby given that this company has this day, pursuant to the commands and directions of said in-junction, re-entered into the possession of all its railroads and other property heretofore demised to the said the Port Reading Railroad Company, and that from this date it will run and operate all its railroads and all their appurtenances." The full list of executive, operating and other officers is officially announced.

officially announced.

Cincinnati Hamilton & Dayton .- The proposition to au-Cincinuati Hamilton & Dayton.—The proposition to au-thorize the execution of a mortgage supplemental to the gen-eral mortgage dated June 1, 1892, securing the issue of \$3,-000,000 general mortgage 5 per cent bonds, and providing for the issue of \$4,800,000 additional to be used in retiring and paying off bonds, was ratified by the stockholders of the Cin-cinnati Hamilton & Dayton at the meeting called for the pur-pose at Cincinnati, August 29. The vote was 22,422 shares in favor and 185 against. It is proposed that this supplemental mortgage shall amend the general mortgage and grant power to the board of directors in its discretion to increase the issue of mortgage bonds, the amount pat to exceed \$7,800,000 the of mortgage bonds, the amount not to exceed \$7,800,000, the additional \$4,800,000 bonds to be used solely for retiring bonds now outstanding under the mortgages of 1875 and 1887.

Cleveland Cincinuati Chicago & St. Louis.—The compara-tive statement of earnings, operating expenses and deductions from income for the years ending June 30, 1891 and 1892, were as follows :

	-Year ending 1890-1.	June 30

Balance, net income	1,347,737	1,409,399

Balance, net income income income 2,352,170 1,409,399 Colorado Coal & Iron-Colorado Fuel.—A circular has been issued by the Colorado Coal & Iron Company giving the terms of the consolidation with the Colorado Fuel Com-pany. The facts as to the new company and its capitalization were given in the last issue of the CHRONICLE. The \$9,250,000 common stock which the new company will issue to take up the \$13,000,000 common of the two companies will be dis-tributed, \$5,250,000 to the Colorado Fuel and \$4,000,000 to the Colorado Coal & Iron. The holders of the old stock of the Colorado Coal & Iron. The holders of the old stock of the Colorado Coal & Iron. The holders of the old stock of the Colorado Coal & Iron. The holders of the old stock of the colorado Coal & Iron. The holders of the colorado fuel and the stock of the Colorado Coal & Iron Development Company. This latter company will own all the agricultural and town lot property owned by the Colorado Coal & Iron. It is pro-posed, prior to consolidation to transfer to the Colorado Coal & Iron Development Company, a corporation already organ-ized, and all ot whose present outstanding stock is owned by the Colorado Coal & Iron Company, real estate and other property to the value of \$4,970,000, for which amount Colorado Coal & Iron Development stock will be issued aggregating with stock now owned by the Colorado Coal & Iron Company, \$6,000,000. The new company will have the following property: 60,000 \$6,000,000.

\$6,000,000. The new company will have the following property: 69,000 acres of land, containing 400,000,000 tons of proved coal de-posits, 800 coke ovens, 15 coal mines with daily capacity of 12,000 tons of all kinds of coal, steel works at Bessemer, in-cluding 3 blast furnaces, capacity 300 tons pig iron per day, rail mill, capacity 300 tons per day, bar mill, pipe plant, 30 tons per day, iron mines and cash and convertible assets of \$1,216,568. Last year the companies in the consolidation pro-

duced 3,200,000 tons of coal and coke, three quarters produc-tion of the entire State. The yearly increase has been from 25 to 30 per cent. The saving on account of the consolidation should be 10c. per ton, or \$220,000, as well as maintained sell-ing price during the dull months, which would add additional revenue. There will be \$100,000 saved in managerial expenses.

Concord & Montreal .- The Concord & Montreal road has voted to issue 12,000 shares of new stock, and rights will be offered for this new issue.

offered for this new issue. Grand Rapids & Indiana.—The announcement is made by Messrs. Winslow, Lanier & Co., fiscal agents of the Grand Rapids & Indiana Railroad, that they have been informed by the officers of the company that, owing to the unexpected financial outcome of the last six months, the company is un-able to meet the September interest upon its 5 per cent general mortgage bonds. The officers of the company express the hope that the suspension of interest will be only temporary. The road is controlled in the interest of the Pennsylvania Railroad, which guarantees some of the prior lien securities, but not these general mortgage 5s. but not these general mortgage 5s.

but not these general mortgage 5s. Lorlllard Co.—The annual report of the P. Lorillard Com-pany for the year ending June 30, 1892, just issued, shows that the net profits, after charging out all expenses, including management remuneration, were \$406,813; from this amount there was paid during the year in dividends 8 per cent on the preferred stock, amounting to \$160,000, and a semi-annual dividend of 5 per cent on the common stock, amounting to \$150,000, leaving a balance to the credit of profit and loss ac-count of \$186,313. The report further states that there have been no special features to note throughout the past year affecting the business of the company. It has been a fair average year, trade has been steady, uniform and undisturbed by any unusual circumstances, and from the present outlook every encouragement is expected for an equally satisfactory result for the coming year. result for the coming year

Louisville St. Louis & Texas.—This company proposes to fund its indebtedness by the issue of first consolidated 5 per cent mortgage bonds, which have been authorized for \$5,000,-000. Of this amount \$3,800,000 will be reserved to retire at maturity the present firsts. It has been arranged to retire at once the \$250,000 outstanding second mortgage sixes and the \$630,000 Louisville Hardinsburgh & Western first mortgage sixes; also the entire Car Trust and floating debt. This will leave the property free of all liens outside the first mortgage and leave a large balance of bonds in the company's treasury for future requirements. The cost of the 15-mile extension of the road from its present terminus at West Point to a connec-tion with the Louisville & Nashville, about eight miles from Louisville, which will be completed by the end of the year, will be provided for by the issue of bonds under the first mortgage reserved in the treasury for that purpose. The fixed charges when these changes are consummated will be about \$240,000. The net earnings for the year ending June 30 were about \$260,000 and the earnings for the two months since the close of the fiscal year show an increase of about 20 since the close of the fiscal year show an increase of about 20 per cent over the corresponding months of last year. Ar-rangements are now being made which will ensure a large increase of traffic,

Minneapolls & St. Louis.—The foreclosure proceedings set for a hearing Aug. 22 have been adjourned to Oct. 12. A suit begun Aug. 11 by H. H. Porter, owning \$2,000,000 of the Improvement and Equipment bonds, asking for a judgment, has been discontinued.

Mutual Gas (Chicago).—The Mutual Fuel Gas Co. has in-creased its capital from \$500,000 to \$5,000,000, preliminary to applying to council for the privilege of extending its mains into the city. Its territory is now confined to Hyde Park.

into the city. Its territory is now confined to Hyde Park. New York & New England.—Mr. Parsons, President of this road, takes a favorable view of its present status, and is quoted as saying: "The reports that the breaking up of the New Eng-land Terminal Company will be an injury to the New Eng-land Railroad Company are not true; on the contrary, the New England has got rid of the most expensive lecch ever fastened upon it. The New England Terminal Company was a joint adventure of the Housatonic and New England railroad com-panies, and was a great burden to both roads. The former managers of the New England and Housatonic roads tried to force business over this slow water route, and the result was that the New England road lost all its business in New Britain, Waterbury, Danbury and other large places. The New Eng-land road is now fast recovering this business, which now goes to New York over the Northern road, and the gross carnings for July this year (allowing for the one less working day) were July this year (allowing for the one less working day) were about the same as last year. It is estimated that the liabilities of the New England Terminal Company exceeded assets by at lenst \$500,000, and when Mr. Morgan offered to take the old boats, floats, etc., and assume all the liabilities of the Terminal Company (amounting to about \$1,200,000) for \$150,000 spot cash, or sell his half to the New England Railroad Company and past that company is to about \$1,200,000) for \$150,000 spot cash, or sell his half to the New England Railroad Company and pay that sum, it took us just one second to decide to pay him the \$150,000 and be released from the incubus. The New York & New England Railroad has now three routes into New York, viz.: Via New Haven Railroad from Hartford or Willimantic, via Northern Road from Brewsters, and via its own line of boats from New London. The finances of the New England Railroad are in a better condition now than at any time within three years, and the increasing business via Newburg, via Poughkeepsie Bridge,

and the Northern Road via Brewsters, bids fair in the near future to more than make up for the business which the New Haven-Old Colony alliance has diverted. The combined and malicious efforts to harass and to injure the business and credit of the New England road by the dissemination of false statements and the continued litigation are disreputable, and the men who are bought to lend their names to these efforts are disreputable. The sole object is to fajure the credit of the New England road. There is no merit in the actions which have been brought, and only one has been brought to a hear-ing, and in it the New England road was upheld in every way, and the injunction which had been ordered against it persecution is the delay of the New England road's develop-ment. It cannot be prevented, hut the present attacks may postpone its progress for awhile." and the Northern Road via Brewsters, bids fair in the near

New York & Northern.—For the quarter and year ending June 30 results as reported to the N. Y. State Railroad Com-missioners were as follows:

Pacific Mail Steamship Company-Panama. - The fifteea-**Facilic Mail Steamship Company—Panama.**—The fift-en-year contract between these companies expires next Febru-ary. The Pacific Mail has paid the Panama road \$55,000 monthly from its subsidy from the Trans-Continental Asso-ciation. Mr. E. A. Drake, of the Panama road, said : " We are issuing some bonds with the view of probably extending our line to Panama Bay and securing other advantages. The company is in a strong position for an independent service. There is \$1,500,000 in the sinking fund."

The Papama Company reports that it carried last year 51,000 tons of freight for the Pacific Mail Company. Of that quantity 22,000 tons comprised Central 'Acuerican an't Mex-ican freight, and the Panama people claim that they ought to be allowed a certain percentage of all freight emanating from that particular territory.

from that particular territory, A new contract between the Panama Railroad and the Pacific Mail Steamship companies was agreed to on Wednesday by the Executive Committee of the railroad company and Mr. Edward S. Lauterbach, representing the Steamship company, Mr. Lauterbach said after the meeting: "We have agreed upon the terms under which the contract will be renewed for a year from Feb. 1, 1893, and the contract will be drawn and executed as soon as the assent of the foreign controlling in-terest in the railroad company can be obtained by cable. The terest in the railroad company can be obtained by cable. The contract is to run for a year oaly, because the liquidator or receiver of the Pauama Canal Company, which controls the railroad, could not make a contract that might outlive his term of ollice.

railroad, could not make a contract that might outlive his term of office. "Under the new agreement the railroad company makes important concessions to the Pacific Mail Steamship Com-pany, and the steamship company agrees to continue the pay-ment of the sum of \$55,050 a month to the railroad company. In addition to this payment it has been agreed that the rail-road company shall have an interest in the Central American and Mexican business to the extent of one third of the excess of gross carnings from that business during the contract year of gross earnings from that business during the contract year over the average gross earnings from the same source during the last five years of the present agreement."

Philadelphia & Reading-Central of New Jersey.-The fall opinion of Chancellor McGill, of New Jersey, having now been received, we quote a part of his remarks going to es-tablish the point that the lease to the Port Reading Railroad was virtually a lease to a foreign corporation. He says:

The Attorney-General further urges: *first*, that the lease in question is lu reality made to a foreign corporation, and, *second*, that such a lease is forbiddeo by the statute approved May 2d, 1885, eotitled "An Act respecting the leasing of railroads," except under conditions which do not exist.

is in reality mide to a foreign corporation, and, second, that and a lease is forbildeen by the statute approved May 2d, 1885, eotited "An Aot respecting the leasing of tailroads," except under conditions which do not exist.
Equity looks at the substance, not merely the outward form. The transaction of the 12th of Jauuary, 1892, between the three defendants consists, in form, of a lease between two of them and a guarantee of that lease, coupled with a traffic agreement to which all three of them are parties. Such is the form. But when the fact that a law which in its terms prohibits a lease to a foreign corporation without legislative smotion is contemplated, and regard is had to the characters and relations of the contracting parties, and to the terms of the settruments, a substantial edus, and the simultaneous exceention of those lostruments, a substantial edus, differing from the form, is disclosed. The statue for had a lease to The Philadelphia & Reading Railroad Company, a foreign corporation, until a law should be enacted which would approve such a lease. Yet it did not prohibit a lease to a domestic corporation. The Philadelphia & Reading Railroad Company, entering into the same transaction, and a same and a set of the set of the paper called the "guarantee." That paper expressly embodied the lease and bound the same transaction, and a sa party thereto, exceuted the paper called the "guarantee." That paper expressly embodied the lease and bound the proposed alliance of company, was a mere form. The guarantee. That paper expressly embodied the lease for the dames is, so the same training a distributed for the second or of the se

Rubber Trust.—A combination of the rubber interests of the country is announced. The new trust will be known as the New York Belting & Packing Company, the Chicago Rub-ber Company and the Cleveland Rubber Company. The trust embraces fifteen factories.

embraces fifteen factories. Texas Rallroads.—At Austin, Texas, August 31, the follow-ing circular was issued by the Railroad Commissioners of Texas in consequence of the recent decision of Judge Mc-Cormick, of the United States Circuit Court at Dallas: "The Weatherford Mineral Wells & Northwest Railway Company, having applied to the Commission for exemption from the operation of its tariffs and orders on account of a notice received from the Texas & Pacific Railway Company and the Gulf Colorado & Santa Fe Railroad Company, that said corporations will not, under the recent decision of the U. S. Circuit Court, honor joint rates made by the Weather-ford Mineral Wells & Northwestern Railway Company in ac-cordance with the tariffs and orders issued by this Commission, and this Commission have fully considered such application, it is hereby ordered that until further notice the Weatherford Minerat Wells & Northwestern Railway Company be exempt from the operation of said tariffs and amendments thereto, and that this order shall take effect with the enforcement of said notice by the Texas & Pacific and Gulf Colorado and Sante Fe roads." It is s pposed that all the railroads in Texas will soon be

It is supposed that all the railroads in Texas will soon be exempted.

United States Morigage Company of New York.—The-following, for the aix months ending June 30, is given in addi-tion to our statements published July 30.

# The Commercial Finnes.

### COMMERCIAL EPITOME.

FRIDAY NIGHT, Sept. 2, 1893. The temperature of the past week was of about seasonable average, and conditions generally favorable for safo development of unharvested crops. Natural influences affecting trade have been propitious, but the progress of business was soriously retarded by grave apprehensions in regard to the cholorn. The rapid and alarming spread of that disease has induced our national authorities to declare a twenty-days quarantine against vessels from all infected ports, and the consequent detention of cargoes afloat will, it is feared, result in inconvenience if not loss. The handling of merchandise for ocean shipment in either direction merchandise for ocean shipment in either direction has also become curtailed to as nearly the limit of actual necessity as circumstances will admit, operators feeling the propriety of showing the utmost cantion until danger from the epidemic becomes less threatening. Speculation has been moderate in all kinds of merchandise, with quite a general tendency to liquidate outstanding engage-ments. At some Western points there is complaint of scarcity of cars suited to prompt movement of crops. Lard on the spot has continued in slow demand and prices have declined under increased offerings. The close, however, was fairly steady at 7:25c. for prime City, 7:85c. for prime Western and 8:15c, for refined for the Continent. The specu-lation in lard for future delivery has been dull and values have declined, owing to the uncasiness caused by the cholera epidemic and in sympathy with the corn market. DALLY OLOSING PRIORE OF LARD FUTURES.

#### DAILY OLOSING PRICES OF LARD FUTURES

	Sal.	Mon.	Tues.	Wed.	Thur.	Fri.
ber delivery		8.09	7.98	7 80	7.83	7.85
r delivery	8.00	8.02	7 94	7.79	7.84	7.84

easy at 84.49c. Coffee advanced early in the week, but declined later under lessened demand and fears of diversion of stocks from Europe to this market. The close is unsettled. Rio quoted at 143/c. for No. 7, good Cucuta 211/c., and interior Padang 271/c. Contracts for future delivery have been quite irregular, but on the whole the tendency was in buyers' favor under a selling out of long contracts and some pressure from the short side. To-day the tone was a trifle firmer in the absence of selling orders, but the market lacked animation. The close was quiet, with sellers as follows: quiet, with sellers as follows:

There has been a decidedly better business in Straits tin for the week at about steady prices, though at the close there was less doing and prices weakened a trifle, closing at 20'45c. Sales for the week amount to about 400 tons. Ingot copper is dull and a shade easier at 11'60c. for Lake. Lead is firmer but quiet at 4'20c. for domestic. Pig iron is unchanged and dull. Refined petroleum is quiet and unchanged at 6'10c. in bbls., 3'60c. in bulk, 6'80c. in cases; crude in bbls. 5'55c.; in bulk 3'05c.; naphtha, 5c. Crude certificates dull and easier, closing at 55c. Spirits turpentine has been in slow demand and the close is lower at 27'4@28'4c. Rosins are in limited supply for common grades and firmer at \$1'25@\$1'30 for common and good strained. Hops dull and lower. Wool less active, but firm.

### COTTON.

FRIDAY, P. M., September 2, 1892.

THE MOVEMENT OF THE CROP, as indicated by our telegram from the South to-night, is given helow. For the week ending this evening the total receipts have reached 23,473 bales, against 11.578 bales last week and 5,703 bales the previous week, making the total receipts since the 1st of Sept., 1853, 5,916 bales, against 32,991 bales for the same period of 1891, showing a decrease since Sept. 1, 1892, of 27,045 bales.

On the speculative market for cotton very few really new engagements have been made, but there was a liberal liquidation and especially of the long interest. The moving influences were traceable to slightly better crop advices, an increasing movement of new cotton, and continued unpromising trade reports from Europe, supplemented by the universal feeling of apprehension created by the rapid spread of the cholera. On Saturday prices advanced slightly on a covering demand, and on Monday the position was fairly steady, though finally closing a fraction off. During the session of Tuesday there were some moderate fluctuations, closing at a few points further decline, and on Wednesday there was a sharp break of 13 points caused by liberal selling. out of longs under the report that the cholera had appeared in New York Harbor. Yesterday the pressure was somewhat relieved but no recovery of value could be secured. To-day there has been a slight improvement, based upon more liberal sales in Liverpool to Manchester spinners and a light movement reported at the Southern interior towns. Cotton on the spot has been moderately active at irregular rates, at one time selling 1-16c. off but recovering and closing at last Friday's

selling 1-16c, off but recovering and closing at last Friday's rate, middling uplands 71%c. The total sales for forward delivery for the week are 513,400 bales. For immediate delivery the total sales foot up this week 22,778 bales, including 3,423 for export, 1,255 for consumption, 700 for speculation, and 17,400 on contract. Of the above — bales were to arrive. The following are the official quotations for each day of the past week—August 27 to September 2.

JUTE BUTTS, BAGGINO, &C.—A moderate amount of business in jute bagging has been transacted during the week under review, on the basis of 614c. for 134 bbs., 634c. for 2 bbs. and 714c. for standard grades. Jute butts are quiet but steady at 136c. for paper grades and 236c. for bagging qualities. A large business has been done for future delivery, mainly in paper grades. The stock of jute butts and rejections in New York on September 1 was 64,700 bales, against 66.000 bales at the same date in 1891 and 96,000 bales in 1890. The imports into the United States during the eight months—January 1 to September 1—reache 1 a total of 198,812 bales, against 504,990 bales a year ago and 384,247 bales in 1890. JUTE BUTTS, BAGGINO, &C .- A moderate amount of business

DOMESTIC EXPORTS OF COTTON MANUFACTURES.—Through the courtesy of Mr. S. G. Brock, Chief of the Bureau of Statistics, we have received this week a statement showing the exports of domestic cotton manufactures for July and for the seven months ended July 31, 1892, with like figures for the

corresponding periods of the provious year, and give them below

DEEP WATER ON CHARLESTON BAR.-The following letter

from Lieutenant G. L. Carden to a prominent resident of Charleston, S. C., has just been sent us, and explains very clearly of what benefit to the harbor have been the jetties constructed under his supervision.

Constructed under his supervision. U. S. REVENUE STEAMER MORRILL, PORT OF CHARLESTON, S. C. Aug, 25, 1892. DEAR SIR: It may interest you to know that today between the hours of 10:40 A. M. and 11:03 A. M., with the tide not over sir inches below high-wa'er mark, the Morelli ran two careful lines of sounding over the stocel ground on the other end of the Jettles channed, with the cosult that the least dopth of water obtained was 14 feet 6 inches. This cast was accompanied almost simultaneously by a call of 15 feet 6 inches from the sposite loadsman. The soundings were taken with the Morelli under slow headway, a leadsmanth both the starboard and port chalus, and a clear channel way sheat. On the second run over the shoal the following casts were obtained at the rate of eight per minute and were scrutinized by Cap-tain H. T. Blake, Lieutennat II ward Emary and myself. The wheel was in charge of Mr. Elwin Deonis, pilot. Commenced sounding at 10:57 A. M. Starboard Leed. Port Lead.

# G. L. CARDEN, Lieutenaut U. S. R. M.

MEMPHIS DISTRICT CROP REPORT,-Messrs. Hill, Fontaine & Co. of Memphis issued on August 30 their report for August on colton in the Memphis district (West Tennessee, North Mississippi. North Arkansas and North Alabama), summariz-ing it as follows :

many soctions will be delayed ustil the middle of Ostober. The corn crop is in better condition than cotton, and on account of the large increase in acreage the yield of this cereal promises to be more than suple for home demand.

FIRST BALE OF LOUISIANA COTION.—The first cotton of the Louisiana crop of 1892 was received at New Orleans on Wednesday, August 24, from G. W. Beggs of Beggs's Station, St. Landry Parish. It was sold at auction to J. Skinner, at 7 cents per pound. Last year the first bale of Louisiana cotton reached New Orleans on August 12; in 1890 the first arrival was on August 8, and in 1899 on August 13.

NEW NORTH CAROLINA COTTON.—The first bale of cotton of the crop of 1892-93 raised in North Carolina was received at Raleigh on August 31 from L. T. Byrd, Cleveland Township, Johnston County, N. C., and was shipped the same night to Norfolk. Last year the first bale of new North Carolina cotton reached Norfolk six days earlier, or on August 25, and in 1890 the first arrival was on August 20.

MEMPHIS FIRST BALE.—Mr. Henry Hotter, Secretary of the Cotton Exchange at Memphis, telegraphs us that the first bale of cotton of the crop of 1892-93 grown in the Memphis dis-triet was received at Memphis on Thursday, September 1, from Friarspoint, Coahoma County, Mississippi. It classed strict middling, and was sold by auction at 9 cents per pound. The bale was shipped to Providence, R. I. The first bale arrived last year on August 22, and in 1890, as well as in 1889, on August 18. August 18.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 12,180 bales. Total bales.

### BREADSTUFFS.

FRIDAY, September 2, 1892.

The market for flour, sympathizing with a decline in wheat, has been dull, and values have been weak and here and there have been lowered to a moderate extent. Meal has also been in light demand and weak. To-day the market for flour was dull and heavy. Meal was dull and unchanged. The speculation in wheat has been moderately active, and immediately after our last there were an advance on unforce.

The speculation in wheat has been moderately active, and immediately after our last there was an advance, on unfavorable weather conditions, both at home and abroad, and stronger foreign advices, but later weather reports from all parts became favorable, foreign markets turned weaker, the crop movement continues large, and considerable uneasiness was shown over the rapid march of cholera westward, all of which led "longs" to sell, and caused a sharp decline in values. In the spot market there has been an active business, both exporters and millers being good buyers. The sales yesterday included No. 2 red winter at  $\frac{1}{2}$ @1c. over September delivered, choice red winter at 81½c. delivered, and No. 1 Northern at 84% c. delivered. To-day the market was a shade easier under selling by "longs," owing to continued favorable crop prospects and full crop movement. The spot market has been fairly active for export. The sales included No. 2 red winter at 79% c. delivered, No. 2 hard winter at 77% c. delivered, and ungraded red winter at 74½@80c. DALLY OLOBING PRIOES OF NO. 2 BED WINTER WHEAT.

Oats have steadily declined under unloading by "longs," prompted by a continued good crop movement, and later the weakness of wheat and corn helped to send prices downward. The market to-day was lower in sympathy with the decline in other grains.

#### THE DRY GOODS TRADE.

NEW YORK, Friday, P. M., September 2, 1892. There was little to disturb the even tenor of the market at first hands during the past week until just at the close. Trade has reached fair proportions in the way of new business, with a continued free movement on account of back orders. Jobbers have placed a considerable number of orders for duplicate lots of merchandise for fall trade, Western houses parcate lots of merchandise for fall trade, Western houses par-ticularly being prominent in this connection. Converters have not been an active factor. nor have exporters cut any better figure than of late. While the general tone of the market is firm to hardening, there has been rather more evidence in one or two quarters of production just now being larger than the demand, and of less stiffness on the part of sellers. This, however, is but an incidental experience. The jobbing trade has again been active and large sales are reported for the week in all leading departments. For the month of August, which closed Wednesday, the aggregate business in jobbing circles has marked a considerable advance on results attained in August last year, mainly due to the heavy sales of woolen August last year, mainly due to the heavy sales of woolen and worsted dress goods, silk fabrics and printed cottons. An occasional department has barely held its own, as in the instance of ginghams, which, although doing fairly well now, were in slow demand early in August. Country reports of trade prospects continue encouraging and collections are good. trade prospects continue encouraging and collections are good. At the close of the week the danger of cholera obtaining a foothold in New York overshadows all other considerations. Should but one or two cases only be reported in the city it is apprehended that trade will be seriously affected. As it is, many buyers have pushed their business during the past two days in order to leave town as quickly as possible. There ought to be a good stream of visiting buyers for some weeks yet, but cholera in New York would, it is believed, divert it to other jobbing centres. The situation has thus serious pos-sibilities for the jobbing trade of the city now in the height of its fall season. its fall season.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending August 30 were 2,228 pack-ages, valued at \$113,393, their destination being to the points specified in the table below:

NEW YORK TO AUG. 30.		1892.	1891.

* From New England mill points direct.

The value of the New York exports since January 1 have been \$7,337,528 in 1892 against \$3,721,155 in 1891. In brown sheetings business has been of fair extent at first hands and fully up to the average with the jobbing trade. The demand has run mainly on 3½ to 5½ yard makes, with 4 yard styles in heaviest request. Prices are unchanged. Drills have ruled quiet for both home and export trade. Bleached shirtings are mostly firm, and in some instances further advanced, but there are one or two makes of medium-priced lines selling slowly and not over steady in price. priced lines selling slowly and not over steady in price.

"Forget-me-Not" 36-Inch bleached has been advanced to 6c. and Berkley "Coronet" cambries to 7½c. per yard. Wide sheetings continue sold up in most popular brands and colored cottons, dealms, tickings and fancy ducks are in a similar position. Kid finished cambries are in fuller supply colored cottons, denims, tickings and fancy ducks are in a similar position. Kid finished cambrics are in fuller supply than of late, but still firm. Other domestics are all un-changed. Prints continue very firm all round; all the Garner prints have been variously advanced from  $2\frac{1}{2}$  per cent up to  $\frac{1}{2}$  c. per yard. Agents have reported better progress with spring styles of ginghams, but the business in these is still unimportant. Print cloths remain quoted at  $3\frac{1}{2}$  c. per yard for 64 squares, but this quotation is nominal, as there are no sellers thereat of spot goods and fe v who will accept it for deliveries up to and including January. 1892. 1891. 1890.

	1892.	1891.	1890.
Stock of Print Cloths -	Aug. 27.	Aug. 29.	Aug. 30.
Held by Providence manufacturers.	None.	299,000	473,000

Outside speculators (est.)	None.	None.	None.
Total stock (pieces)	4.000	762.000	596,000

Total stock (pieces) ..... 4,000 DOMESTIC WOOLENS.—A very moderate business has been done this week in heavy-weight woolens and worsteds, but quite an averago volume of orders has been recorded in spring quite an average volume of orders has been recorded in spring weights. Piece-dyed and solid colored worsteds and fancies have had the preference in the higher-priced ranges, while in low-cost goods all-wool fleece and cheviot suitings have formed the bulk of business done. Some buyers have shown dissatis-faction this week with the low-priced goods delivered to them, stating that they were not equal in quality to the sample lots, and fears are expressed that some manufacturers, in their resonance to preduce goods delivered to the mark and fears are expressed that some manufacturers, in their endeavor to produce goods cheaply, have overshot the mark, and that they are likely to have the disagreeable experience of heavy rejections by purchasers to contend against. Cotton warps are still slow, and there is little doing in light-weight satinets. Overcoatings and cloakings are in fair demand and steady in price. Flannels and blankets quiet. Woolen and warsted dress goods are in steady duplicating request, keeping worsted dress goods are in steady duplicating request, keeping manufacturers well employed.

FOREIGN DRY GOODS.—An active business has been reported this week in all leading lines. Fine woolen and worsted dress this week in all leading lines. Fine woolen and worsted dress goods in serges, Henriettas, cashmeres, whip-cords and in a wide variety of fancies and high novelties have moved freely, ns have silk dress fabrics, ribbons, laces and trimmings. Linens, handkerchiefs, hosiery, gloves, &c., are all in steady demand. The quarantine proclamation has, however, at the close thrown importing circles info some disorder. A large proportion of fall supplies is already forward, but import ant shipments are due this month. The enforced delay in landing those already on the way and the additional difficulty and expense of getting others sbipped introduce new and perplex-ing features into the situation. At the time of writing im-porters do not appear to have any clear idea of what the effect will be on market values. Importations of Dry Goods.

#### Importations of Dry Goods.

The importations of dry goods at this port for the week ending Sept. 1, 1892, and since Jan. 1, and the same facts for the corresponding periods of last year are as follows:

#### TERMS OF SUBSCRIPTION.

Commercial and Financial CHRONICLE contains 40 to 64 pages published every week.

State and City Supplement of CHRONICLE contains 180 pages published several times each year.

Investors' Supplement of CHRONICLE (a Cyclopædia of Railroad Securities) contains 160 pages published every other month.

Subscription to CHRONICLE for one year \$10.00, which includes every issue of both SUPPLEMENTS.

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the STATE AND CITY SUPPLEMENT. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department." we expect to bring down weekly the information contained in the STATE AND CITY SUPPLEMENT to as near the current date as possible. Hence if every Subscriber will note in his SUPPLE-MENT on the page designated at the head of each item a reference to the page where the item in the CHRONICLE can be found, he will at all times possess a complete and fresh cyclopædia of information respecting Municipal Debts.

#### COMPTROLLER MYERS'S ANNUAL REPORT.

The report of the Comptroller of the city of New York for the year ending August 1 1892 has been made public this week. It contains, as is required by law, a full and detailed statement of the receipts and expenditures of the corporation during the year and an account of the money borrowed on credit.

According to the official figures the city had to its credit on August 1 1892 a balance of \$4,445,093 49, and of this amount \$3,127,836 28 was held in the sinking fund. The summary of the receipts and expenditures is as follows :

Balance in City Treasury August 1 1891	<b>\$1.274</b> 282 30 L
Receipts-From laxes.	. 32.970.525.97
From general fund	2 011 963 72

\$1,228,728 03

Net State deht Jan. 4 1892..... Since 1855 the Colorado State tax rate has been \$4 per \$1,000 and remains the same again this year. Of the 1892 tax rate, \$3.36% will be applicable to the payment of warrants and the balance, \$1.631/3, is levied for general State purposes.

The bonded debt of Colorado was incurred for the purpose of building the State Capitol, and the details of the securities will be found in the STATE AND CITY SUPPLEMENT, page 131.

Melrose, Mass.-Valuation and Tax Rate.-The Assessors' returns give the following statistics for 1892: Valuation of real estate, \$8,157,850; personal property, \$405,690; total, \$8,563,540. The total valuation in 1891 was \$7,777,715, and the increase during the year, \$785,825. The appropriations for the present year are \$123,604; State tax, \$5,757; sewer tax, \$646; county tax, \$6,428; total tax, \$136,437; tax rate, \$15.80 per \$1,000.

During the last ten years Melrose has more that doubled in population. The assessors give the number of inhabitants as 9,535, which is 2,465 less than the requisite number for becoming a city,

Virginia State "ebt .-- Secretary G. S. Ellis of the Bondholders' Committee has given notice that the books of the Planters' National Baak, the Richmond depository for receiving securities of the State of Virginia under the agreement of May 12 1890, the plan and proposition of November 28 1890, and the settlement effected thereunder, would be closed on September 1 1892, and that no more of the securities will be received by the committee.

Valuation of Arkansas Railroad Property-The State Board of Railroad Commissioners have finished their work and have issued a comparative statement showing the mileage and valuation of the railroads in the State for the years 1891 and 1892. The grand totals show that in 1891 there were 2,215.27 miles of railway in Arkansas, valued for taxation at \$18,413,640. In 1892 the mileage increased only 28.17 miles, while the valuation for taxation is fixed at \$18,785,286, an increase of \$371.646.

New Orleans-Thirty-fourth Distribution of Premiums on Bonds.-According to the requirements of the New Orleans premium bond plan, 10,500 of the premium bonds were called for payment on July 15, and on that date 1,176 bonds were drawn by lot from those which were payable to receive premiums as follows:

20 50

The list of bonds drawn for premiums has been sent to the CHRONICLE by the New Orleans Board of Liquidation, and we publish the same in full below.

\$5,000 Premium.-The one premium of \$5,000 was awarded to the bond numbered 767,096.

\$1,000 Premiums.-The five premiums of \$1,000 each were awarded to the bonds bearing the following numbers:

762,725 29 751 179,813 368,701 566.491 \$500 Premiums.-The twenty premiums of \$500 each were drawn by the following bonds :

The series numbers of the bonds called for payment on July 15 were published in the CHRONICLE of April 80, volume 54, page 731. For explanation of the premium bond plan see volume 53, page 943.

Bond Proposals and Negotiations .- We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

Adrian, Mich .- The citizens of Adrian have voted to issue bonds for the purpose of purchasing the local water works. No definite action has as yet been taken by the Common Council, nnd the amount and rate of interest are not reported. The total assessed valuation of Adrian in 1891 was \$3,952,780 and the tax rate per \$1,000 was \$20 40. The city has no debt of any description.

Boston, Mass.—(STATE AND CITY SUPPLEMENT, page 21.)— City Treasurer Alfred T. Turner writes us that an issue of bonds to the amount of \$200,000 for a new insane hospital has been ordered by the Common Council, but it has not yet been decided when the loan will be offered for sale. The bonds will bear interest at the rate of 4 per cent per annum and mature July 1 1912.

Brooklyn, N. Y.-(STATE AND CITY SUPPLEMENT, page 44).-Comptroller Jackson will receive sealed proposals until Taes-day, September 13 1892, for the purchase of the whole or any part of the following loans:

\$200,000 of 3½ per cent Permanent Water Loan Boads, reg-istered, payable January 1 1911.

\$200,000 of 31% per cent School Building Bonds, registered; \$100,000 payable January 1 1918 and \$100,000 payable January i 1919.

\$200,000 of 3½ per cent Twenty-sixth and adjacent wards Sewer Bonds, registered; \$100,000 payable January 1 1915 and \$100,000 payable January 1 1916.

\$100,000 payable January 1 1916.
All of the above bonds are exempt from taxation by the City of Brooklyn and County of Kings except for State purposes. Interest payable January and July of each year.
The total assessed valuation of Brooklyn's real estate this year is \$467,607,395, and that of personal property \$16,615,947. The real estate shows an increase of \$18,804,925 over 1891 and the personal property a decrease of \$1,435,832, making the net increase \$17,319,093. The reduction in the assessed valuation of the property of the elevated railroad companies was nearly \$5,000,000, and the city has taken property worth nearly \$1,000,000 for the Bridge extension. The valuation of personal property has steadily declined for several years. Five years ago it was \$22,000,000.
Buffalo, N. Y.-(STATE AND CITY SUPPLEMENT, page 45.)-

Buffalo, N. Y.-(STATE AND CITY SUPPLEMENT, page 45.)-The Common Council has ordered that \$100,000 of water bonds be issued to refund the 7 per cents falling due in October of this year.

Charlottesville, Va.—(STATE AND CITY SUPPLEMENT, page 148.)—The people of Charlottesville will vote at the coming general election in November on the proposition of issuing \$125,000 of city bonds. Of this amount it is proposed to issue \$20,000 for sever purposes, \$25,000 for school purposes and \$20,000 for street improvement purposes. The bonds will all bear interest at the rate of 5 per cent per annum and will be-come due 30 years from date of issue.

Clacinaati, Ohio.—(STATE AND CITY SUPPLEMENT, page 77.)—On August 27 the following bids were received by City Auditor D. W. Brown for additional paving bonds to the amount of \$450,000.

The bonds are of the denominations of \$500, dated June 1 1892, redeemable on or after June 1 1902, and payable June 1 1912. They bear interest at the rate of 4 per cent, payable semi-annually at the American Exchange National Bank of New York City.

Cleveland, 0.—(STATE AND CITY SUPPLEMENT, page 78).— Bids will be received by the City Auditor until September 19 for the purchase of bridge repair bonds of the city of Cleve-land to the amount of \$16,000. The loan will be composed of coupon bonds of the denominations of \$1,000 each and will bear interest at the rate of 5 per cent per annum, payable composed by semi-annually.

College 1111, 0.-Village Clerk F. R. Strong writes the CHRONICLE that the \$12,000 of side-walk bonds recently ad-vertised for sale were awarded to the Western German Bank of that place for a total premium of \$15. The bonds are in denominations of \$500 eac', dated Sept. 1 1892 and payable Sept. 1 1912. They bear interest at the rate of 5 per cent per aanum, payable semi-annually.

Cumberland, Md.-(STATE AND CITY SUPPLEMENT, page -The special election held in Cumberland on August 29 to vote on the question of issuing \$100,000 in bonds to increase the water supply of the city resulted in the defeat of the proposition by a majority of 236 votes. A special dispatch from that city to the Baltimore Sun reads as follows: "The prevailing senti-ment in favor of a reservoir instead of a direct pumping sys-tem is largely responsible for the defeat of the measure. Many of the voters declared themselves opposed to authoriz-

ing the expenditure until the people were informed of the manner in which the money was to be expended. The proba-bilities now are that another election will be held at an early The probaday, and that an appropriation sufficiently large to cover the expense of building a reservoir will be asked for. The situa-tion regarding the present water supply is too embarrassing to remain unsettled, and some means must be employed to supply more water."

**Douglas Co.**, Neb.—(STATE AND CITY SUPPLEMENT, page 118).—We are officially informed that this county will issue road bonds to the amount of \$150,000 and \$500,000 cf railroad-aid bonds. The present debt of the county is \$546,000; total assessed valuation, \$25,739,851; tax rate (per \$1,000), \$22:95. Duluth Minn. (Same type Complement procession)

Duluth, Minn.—(STATE AND CITTSUPPLEMENT, page 102.) The Secretary of the Duluth Board of Education, Mr. A. Le-Richeux, writes us that the matter of issuing \$100,000 of 5 per cent 30 year bonds which were recently voted is now in the hands of a special committee, who will report at a future meeting of the Board.

meeting of the Board.
Fort Wayne, Ind.—(STATE AND CITY SUPPLEMENT page 86.)
—On September 7 1892 funding bonds to the amount of \$24,000 will be sold at auction by the Common Council.
These bonds are issued in denominations of \$4,000 each, bearing 5 per cent interest, payable semi-annually at the Hamilton National Bank, of Fort Wayne. Ind.
Bonds mature as follows: One on the 15th day of September, 1893 and one on each succeeding year for five years thereafter

1893 and one on each succeeding year for five years thereafter.

Galnesville, Fla.- An election will scon be held in Gaines-ville to vote on the question of issuing \$13,000 of improvement bonds.

Glendale, Ohio.—Proposals will be received by Village Clerk Lewis Shillito until the 28th of September 1892 for the purchase of seventy water bonds of Glendale, being dated September 1 1892 and payable in thirty years from date. Each bond will be for the sum of five hundred dollars, and bear interest at the rate of five per cent (5 per cent) per annum payable semi semuelly. annum, payable semi-annually.

Gloucester, Mass.—(STATE AND CITY SUPPLEMENT, page 24.) —The following notice of the bond sale this week has been sent to the CHRONICLE by City Treasurer Edward Dolliver:

"The city of Gloucester \$50,000 highway improvement 10-year 4 per cent loan was awarded to the Gloucester Safe De-posit & Trust Company at 101 75. The other bids were as follows: Brewster, Cobb & Estabrook, 101.56; Equitable Mortgage Company, 101.27; Blake Bros. & Co., 100.91; E. H. Rollins & Co., 100.781; Lamprecht Bros. & Co., 100.7616; E. C. Jones, 100.70; Spencer Trask & Co., 100.68; R. L. Day & Co., 100.53; Gay & Stanwood, 100.514; Fhird National Bauk, 100 39; Cape Ann National Bank, 100.10."

Gravesend, N. Y .- Proposals will be received by Supervisor Gravesend, N. 1.—Proposals will be received by Supervisor John Y. McKane at the Town Hall of Graveseud on Thursday, September 8 1893, for the purchase of \$39,000 bonds of the town of Gravesend, 5 per cent local improvement loan, pay-able forty years from the first interest day following the date of the bonds. These bonds are issued in pursuance of Chap-ter 118 of the Laws of 1892.

Hagerstown, Md.—(STATE AND CITY SUPPLEMENT, page 74.) —Improvement bonds of this city to the amount of \$7,000 will soon be offered for sale.

Kern and Tulare Irrigation District, Cal.—Bids will be received by the directors of the Kern and Tulare Irrigation District until September 6 for the purchase of \$700,000 of 6 per cent bonds. These bonds will be of the denominations of \$500 each, and it is stated that they will not be sold for less than 90 per cent of their par value.

Kissimmee, Fla.—It is reported that the citizens of Kissimmee will vote on the proposition of issuing improvement bonds to the amount of \$10,000.

Madisonville, O.-Bids will be received until Sept. 17 1892 by Bennett Carter, Village Clerk, for the purchase of sewer bonds of Madisonville, Ohio, amounting to three thousand four hundred and fifty dollars. These bonds will bear date Sept. 13 1892 and will be payable one year after date, with 6 per cent interest, at the Fourth National Bank, of Cincinnati, Okio Ohio.

Newburg, N. Y.- (STATE AND CITY SUPPLEMENT, page 50.) - The following list of bids received for \$18,000 of 4 per cent refunding water bonds maturing September 1 1912 has been sent to the CHRONICLE by City Clerk D. J. Conant.

From the above statement it will be observed that the net debt of the city is less than 2 per cent of the assessed valuation, and by act of Congress approved July 30, 1830, the indebtedness is at all times limited to 4 per cent of the assessed valuation. The city owns water works valued at \$1,500,000, which formish a net income of \$000,000 per annum. The legality of the issue has been approved by our coursel, and we recommend the bonds as a desirable investment. Philce 103 AND INTEREST, nu which there ricking	& Co., BOSTON. New Whatcom, Wash.—Bonds of New Whatcom to the amount of \$50,000 have been sold to the Puget Sound Loan, Trust & Banking Company of Whatcom, Wash. The company paid a premium of \$250 for the loan.

Norwood, Ohlo.—Bids will be received by Villago Clerk W. E. Wichgar until Sept. 29 1892 for the purchase of ten street improvement bonds of Norwood, Ohio. These bonds will be dated Sept. 25 1892 and payable in 1, 2, 3, 4, 5, 6, 7, 8, 9 and 10 years respectively. Each bond will be for the sum of \$883 09 (or less if part of the assessment in anticipation of which they are issued is paid in cash), with Interest at the rate of six per cent per annum.

Oxford, N. C.—In order to subscribe for n portion of the capital stock of the Oxford Coast Line Railroad Co., it is reported that the town of Oxford will issue bonds to the amount of \$20,000.

Paterson, N. J.--(STATE AND CITY SUPPLEMENT, page 61.)-In answer to our inquiry concerning the report that Paterson would issue honds to the amount of \$55,000, Treasurer Baldwin writes that no bonds will be issued by the city for the present.

Quincy, Mass.—(STATE AND CITY SUPPLEMENT, page 29.)— At a meeting of the Quincy City Council held this week, an order to change the date of re-issuing the water bonds from December 1 to September 1 was defeated. The amount of the loan is \$25,000.

Radford, Va.—An election held recently in Radford resulted in favor of issuing improvement bonds to the amount of \$100,000.

Rochester, N. Y.-.(STATE AND CITY SUPPLEMENT, page 53.) A telegram from Rochester states that City Treasurer Williams will sell at public auction on Sept. 13 \$1,000,000 50-year 3¹/₂ per cent bonds for the purpose of furnishing additional water supply to the city, the city reserving the privilege of paying any and all of the bonds at any time after the expiration of

20 years from date of issue. No bid of less than par will be accepted.

South Denver School District, No. 7, Colorado.—The officers of this district have been advertising for bids on a \$12,000 issue of bonds. Offers were to be received uatil Septomber 1. The award has not yet been announced.

Suffelk, Va.-This city will issue school building boads to the amount of \$8,000.

Wyoming, 0.—Bids will be received until September 19 1892 by W. A. Clark, clerk of the village of Wyoming, Ohio, for the purchase of the following described bonds:

The bonds will be dated Sept. 1 1892 and one of each denomination will be payable in one, two, three, four, five, six, seven, eight, nine and ten years respectively. They will bear interest at the rate of 6 per cent, payable annually, and are issued in anticipation of the collection of assessments. The amount of each of said bonds may be reduced because of the payment of assessments in full within thirty days.

#### STATE AND CITY DEBT CHANGES.

We subjoin reports as to municipal debts received since the last publication of our STATE AND CITY SUPPLEMENT. Some of these reports are wholly new and others cover items of information additional to those given in the SUPPLEMENT, and of interest to investors.

New York—Kings County.—(STATE AND CITY SUPPLEMENT, page 48.)—The following statement of the financial condition of Kings County has been corrected to date by means of the County Treasurer's annual report recently issued. Mr. H. H. Adams is County Treasurer.

Kings County includes the city of Brooklyn, which covers most of the county's area.

F See next page for continuation of debt changes.

shall have been paid and all our financial obligations wiped out. It is because of these conditions and prospects that the credit of the city stands so high and our bonds, at a very low rate of interest, are sought for by investors. It may be noted here that the value of our water works alone exceeds the amount of the entire debt of the city, thus making our pave-ments and sewers the same as already paid for, a condition of things very pleasing to contemplate, and such as no other things very pleasing to contemplate, and such as no other town in the oil regions can show." The statement of the debt of Titusville, its assets, valuation,

etc., has been corrected to date. This city is situated in Crawford County.
