and City Department. All advertisements with relation to State and City Bonds will likewise be found on the same and following pages.

### THE FINANCIAL SITUATION.

The events of this week have in great part come as a natural sequence of the preceding week. Capital made apprehensive by the condition of our currency, and further disturbed by the speedy collapse of the industrials, especially the disclosed hollowness of "Cordage," has been in just the condition to be easily affected by disquieting rumors and facts, and so to aid any attack of those endeavoring to depress prices. Furthermore, there have been some bank difficulties in the West-not of a nature to affect confidence in any ordinary times, but tending in the direction of deranging instead of building up credit. If to this be added the decided disturbance in the London money market growing out of the Australian difficulties, with the announcement of the failure of another Australian bank, of sterling exchange the advance leading to gold with fresh of exports here rumors to-day, we have a good basis for a scare, and for an extension of the existing lack of trust to some of the railroad properties. Northern Pacific bonds and stocks came in as the chief victims of those seeking to break the market. Reports were put afloat that there was to be a default on the 5 per cent consolidated mortgage and that the company was going into the hands of a receiver. As the floating debt of the Northern Pacific has for some time been known to be large, though recently in process of arrangement, the rumor gained some credence and a concerted attack was made on the company's securities. This was on Tuesday and Wednesday; on Thursday an improved feeling began to prevail, the change for the better being aided greatly by President Oakes's published declaration that there would be no default on the Northern Pacific bonds, and that the company's floating debt was in the shape of time loans and was being easily carried. The improvement made further progress yesterday, especially when it appeared that there were to be no gold exports to-day. Of course, however, the tone continues unsettled.

Money on call representing bankers' balances has been easy during the week, loaning at 7 per cent and at 1 per cent, the average being about 4 per cent. Renewals have been made at 3 to 4 per cent, and banks and trust companies report 5 per cent as the minimum. The demand has been small, the short interest in the stock market enabling brokers to carry stocks without borrowing much money, and the liquidation which has been in progress has reduced the lines in the hands of commission houses very materially. There has been an active demand for time money, but the scrutiny of names and of collateral continues rigid, thus restricting business. The supply is liberal on first-class securities, and no difficulty is experienced in obtaining money upon them at satisfactory rates. One transaction was made this week at 5 per cent for 60 to 90 days on all dividend-pay ing railroad stocks, and a gold note was not demanded. As a rule, however, this precaution is taken, and the quoted rate is 6 per cent for all dates. Commercial paper is very dull. The banks have a large amount of

therefore kept out of the market for paper. Their regular customers call heavily for accommodation, as collections are tardy, and the supply of paper offering is large. Rates are  $6\frac{1}{2}$  to 7 per cent for the best names, including endorsed bills receivable, and 8 to 10 per cent for other names graded according to the credit of the makers.

There has been another large bank failure in Australia this week, which has served to intensify the uneasy feeling in London. It has also led to heavy exports of gold from that centre to Australia, almost a million pounds sterling having been taken from the Bank of England for that purpose. One result has been an advance in the open market rate, followed by a rise in the bank minimum on Thursday to 3½ per cent. Several small failures have occurred in London within the last day or two but they are regarded as unimportant. The Bank of Germany also made an advance in its discount rate yesterday-to 4 per cent. There was some excitement in Berlin early in the week, owing to the dissolution of the Reichstag because of the defeat of the Army bill, and later a speech by the Emperor declaring his purposes regarding the appropriations for the army caused some comment. The cable reports discounts of 60 to 90 day bank bills in London  $3\frac{3}{4}$  per cent. The open market rate at Paris is  $2\frac{1}{2}$  per cent, at Berlin it is 38 per cent and at Frankfort 31 per cent. The higher rates at Paris and in Germany are said to be due to the movement of gold thence to London, exchange at Paris on that centre having advanced to 25 francs 291 centimes for the pound sterling, and there being a corresponding rise at Berlin. The Bank of England, according to our special cable from London, lost £704,045 bullion during the week, and held at the close of the week £24,006,200. Our correspondent also advises us that the loss was the result of exports of £945,000, wholly to Australia, shipments of £247,000 to the interior of Great Britain, and receipts of £488,000, the latter consisting of £334,000 bought in the open market, £100,000 received from Egypt and £54,000 from sunlry sources.

Foreign exchange has been generally firm this week. The offerings of arbitrage bills against purchases of stocks were absorbed by Monday, which tended to stiffen the rates, and then there followed a stronger tone for sight bills and cable transfers, due to dearer discounts in London. By Thursday rates were close to the gold-exporting point. No gold, however, has been engaged for shipment. Compared with rates at the close of Friday of last week the market opened on Saturday unchanged, except a reduction of half a cent by the Bank of Montreal. Later in the day Brown Bros. and Baring, Magoun & Co. reduced both long and short half a cent, while the Bank of British North America made an advance of half a cent for each. No change occurred at the opening on Monday, but in the course of the morning Brown Bros. advanced both long and short half a cent while the Bank of British North America moved the sight rate up half a cent, and then all the drawers quoted 4 86 for 60 days and 4 89 for sight. On Tuesday Brown Bros. reduced the long rate half a cent while the Bank of Montreal advanced both long and short half a cent. On Wednesday Brown Bros. and the Bank of British North America advanced short half a cent, and the Bank of Montreal reduced the long rate half a cent. The only change made on Thursday was an advance of one cent in short by Baring, Magoun & Co. Yesterday Brown Bros. advanced both long and short half a money tied up by recent suspensions, and they are cent, while the Bank of Montreal and the Bank of

British North America advanced sight half a cent, making the rates by all the bankers uniform at 4 86 for long and 4 90 for short. Rates for actual business were 4 85 to 4 85<sup>‡</sup> for long, 4 89 to 4 89<sup>‡</sup> for short, 4 89<sup>‡</sup> to 4 90 for cable transfers and 4 84 to 4 84<sup>‡</sup> for both prime and documentary commercial sterling, the latter being as available as the former.

We have such large surplus stocks of wheat in the country at the present time that a shortage of the crop this year will not be considered any very great detriment, and in some respects may prove an advantage. The Agricultural Bureau at Washington has this week issued its report on the condition of the crops the first of May, and, as expected, it shows a further diminution in the average of winter wheat. The average was low in April at 77.4 but is now reported at only 75.3. Last year the average in April was 81.2, from which there was an improvement to 84.0 in May and a further improvement to 88.3 in June. The year before (in 1891) the condition was 96.9 in April, 97.9 in May and 96.6 in June. From these figures it is easy to see how much less favorable the outlook is the present year than in either of the two years preceding. In Kansas the average is reported as only 51, which compares with 80 in May 1892 and 99 in May 1891. In Illinois the average is 62 as against 86 last year, and in Indiana it is 79 against 85. In Ohio, however, the average is reported 88 this year, compared with only 75 last year. In California there has been an improvement of 10 points since the 1st of April, and yet the average now is only 77 against 94 last year. For Oregon, on the other hand, the condition is given as 99 this year and 97 last year. Some of the Southern States are credited with quite high averages, though for Texas the condition is given as only 74, as against 91 last year.

CONDITION OF WINTER WHEAT.

In winter rye a decline in condition is also reported during the late month, the average now being given as 82.7, as against 88.9 last year in May. The condition of barley is reported as 88.6, against 92.8 last year. The condition of spring pasture is put at 87.2 and of mowing land at 89.2. It is stated that the proportion of spring plowing done May 1 was 73.4, as against an average of 77 per cent for a series of years, showing the effect of the cold and backward spring weather which the country has experienced.

The Pennsylvania Railroad Company is offering through Messrs. Speyer & Co. \$4,000,000 of consolidated mortgage 4 per cent gold bonds at  $102\frac{1}{2}$ , the subscription to be opened on Monday next and to be closed on the same day. The bonds will be offered simultaneously in New York and London. As stated further above, President T. F. Oakes of the Northern Pacific has issued a card announcing that all the interest obligations of the company due the first of June would be

promptly met, and declaring furthermore that the floating indebtedness of the Northern Pacific is in the form of time loans, the bulk of the same not maturing till next October. He also says the loans are amply margined, and that provision to pay or fund them at maturity is assured. It is announced that the plan proposed for the reorganization of the Minneapolis & St. Louis road has been carried through. A dispatch from Topeka, Kan., states that complaint has been made against the Missouri Kansas & Texas road for removing its general offices to St. Louis, and that Governor Lewelling has telegraphed the President of the road calling his attention to the law of Kansas requiring all Kansas corporations to maintain their general offices in the State and warning him that steps would be taken to revoke the charter of the road unless that provision of the law is complied with. This illustrates one of the difficulties which roads in that section have to contend against. June 12 has been fixed as the date for the sale of the Kansas City Wyandotte & Northwestern road, which it is expected will then pass under Missouri Pacific control. The strike of the Ohio coal miners, which has operated to reduce traffic and earnings of some of the Ohio roads, has been settled, the men agreeing to return to work upon the same terms as last year.

We give our statement of railroad gross earnings for the month of April on another page, and it shows a fair amount of increase in earnings for the month in the face of a number of adverse conditions. We have also received this week some more returns of net earnings for March. The Louisville New Albany & Chicago for that month reports an increase of \$26,243 in gross and an increase of \$8,359 in net. The New York Ontario & Western has \$62,280 increase in gross and \$15,057 increase in net, the Western New York & Pennsylvania \$53,379 increase in gross and \$20,868 increase in net, and the Mexican National \$54,706 increase in gross and \$61,272 increase in net. The Philadelphia & Erie reports net of \$122,787, against \$82,-257; the Milwaukee & Northern \$42,609, against \$50,-632; the Chicago & West Michigan \$49,335, against \$45,741; the West Jersey \$34,804, against \$22,585; the Flint & Pere Marquette \$81,565, against \$97,462; and the Detroit Lansing & Northern \$27,980, against \$23,-049. The Camden & Atlantic has a deficit below expenses of \$2,002 in March 1893, against a deficit of \$3,676 in March 1892.

The following gives the week's movements of money to and from the interior by the New York banks.

### RAILROAD PROSPECTS AND THE WORLD'S FAIR.

It has been reported that a certain general manager of one of our Western railroads said not so very long since that when stockholders began to demand dividends all the romance was taken out of railroading. There is a suggestive truth underlying that bit of humor. No doubt a closer inspection of railroad results and management by stockholders is desirable. This is not because of any dishonest practices which prevail, for our roads to-day are as a rule honestly managed. It is in part rather because inspection by owners always tends to induce a closer official study of profit and loss in the various departments of a corporation's business, and consequently to a regulation of charges so as to cover expense and a profit in each department. Such a study is perhaps more constantly needful in railroading than in any other industry, since with all rates low as they now are it is no easy matter to determine just what class of a carrier's business pays and what does not pay. Moreover, rate wars and " patriotism " as a motive for general reductions in rates are much less likely to occur when stockholders' inspection is close and careful.

We are led to these remarks in view of the situation to-day. The roads East and West have in the aggregate gone to many millions of dollars expense during the past eighteen months in preparation for the World's Fair business. The next six months they hope to reap a profit from this expenditure. To secure that, great care will be required. In 1892 they got large gross earnings-the moving of large crops gave them that ; but all the profit went to the producer and not a cent of it to the carrier. As we have so often said, our roads to-day stand between the greed of their patrons and the wants of their employes. The former demand a minimum of rates and the latter a maximum of wages, and the consequence is that every hope of advantage the roads see in prospect results in the entire profit, and more than that generally, being swallowed up by one or the other, while less than the bare bone is left to them for the doing of the service. The whole truth is well illustrated in the fact that though gross earnings were exceptionally large in 1892, net earnings in most instances declined.

The chief question then of interest to our curriers and their stockholders to-day is, what kind of a showing are the roads going to be able to make when the Fair closes and the managements sit down to write up their accounts? Is the result to be the same as in 1892? There is no question with reference to an increase in gross earnings-they will be large enough, for without doubt passenger traffic will surpass all precedent. Chicago has with the taste and the grit its inhabitants have always shown, in this case too against obstacles which no one could have anticipated, put their great undertaking into such an attractive shape that the exodusfrom the East as well as from the West and South to visit the city certainly ought to be well nigh universal. The experience at the opening it is said was disappointing to the railroads, but that, for well known reasons, counts for nothing as an indication of the future. After another month begins and the announcement is made that the work is completed and every exhibit in place, the obvious presumption is that the railroad facilities will all be needed and that gross earnings will be large enough.

But when we come to the question of net earnings

needed on the part of the managements of the roads if they are to work out a satisfactory result. The problem is embarrassed in the first place with the condition that the rates for passengers have been reduced 20 per cent. Probably this was well-nigh a needful concession to a public demand; and further it is to be said that up to this time it has been carried out judiciously. But when charges were already so extremely low that in some sections of the country very little or no profit on passenger traffic could before the reduction be proved to exist, this change evidently introduces a fresh uncertainty. Take, for example, even a fairly remunerative section, the Northwest, and the most prosperous road in it the Chicago & Northwestern. According to its last annual report that road showed an average receipt per passenger during that year of only 2.17 cents per mile. Twenty per cent off from that reduces the rate charged to a trifle over 1.73 cents per mile. Of course an Eastern road or one of our trunk ling roads running over a portion of the country where the population is densest can bear a lower rate. The New York Central, for instance, is as well situated as any in the country for traffic (carrying 224 million passengers, against 15 million on the Northwestern), and yet its average per passenger per mile was in the same year 1.94 cents, so that with the 20 per cent reduction the Central would still get 1.55 cents per mile, against the Northwestern's 1.73 cents, or a difference per passenger per mile of only eighteen hundredths of a cent. These figures, of course, do not show relative profit; nor do they authorize any exact conclusion, except that as the rates stood last year the net result per passenger must have been very small in either case, a conclusion which is further enforced by the statement that the entire gross earnings by the Northwestern from its 15 million passengers was only 71 million dollars, and by the New York Central, with its 224 million passengers, only 134 million dollars.

But admitting that under the circumstances some discount was needful, the reduction made certainly has been judiciously managed thus far. For illustration, the twenty per cent decrease is not applicable to the fast trains, and further the service west of Chicago has lengthened the running time of all trains. This latter regulation will work a considerable saving, and where there was any profit in the passenger business before. will go far towards making good the 20 per cent decrease by enlarging the number of passengers each train carries; that is to say, it permits the hauling of heavier trains with little increase in cost. The trank lines also have agreed not to allow stop-over privileges on any of the reduced tickets, but only on the limited trains; this regulation prevents sculpers getting hold of the tickets, and hence improves the chances of continued harmony between the lines. There are some little differences, especially west of Chicago, left to be adjusted yet, and others will no doubt constantly be occurring; but the unanimity and determination exhibited by the roads at Chicago some weeks since in resisting the threatened strike of the employes showed a more harmonious combination of interests than we have ever seen before, and affords good promise of a favorable adjustment of future entanglements.

The great point to be kept in mind by managers and by stockholders is that there is this year no margin for "romancing." As already remarked, a very large outlay has been made for this World's Fair business. Passenger rates before the reduction were dangerously there can be no doubt that care and diligence will be low, and taking 20 per cent off from that low basis has left the charge on the slower trains with but a trifling opportunity for profit. Under these circumstances the officers cannot fail to understand the needfulness of compounding differences, for the result of the entire venture so far as the railroads are concerned clearly depends upon maintaining the agreement faithfully. The trunk line presidents announced the correct and only safe rule of action at a meeting near the close of last month. A communication was submitted asking if special rates would be made for the transportation of about 1,500 persons connected with the London Polytechnic from New York to Chicago and return. In reply they stated with practical unanimity that it would be inexpedient to grant the request, and resolved that no further reduction than the 20 per cent reduction on slow-train tickets would be made for any class of persons whether foreign or domestic.

There is just now a contest in progress in Colorado which is viewed with no little solicitude, because of the fear it induces that it may involve other roads than those already engaged before the dispute is arranged. The quarrel as it appears to the public is about a trifle, but the interests at stake are vast ; and every day the difference is prolonged makes a general disturbance more likely. Consequently the contest threatens the agreement, and hence the peace of the Western roads, and endangers the entire World's Fair business of that section. This puts a grave responsibility upon the contestants. It is easy enough to start a prairie fire, but not easy to put it out.

#### RAILROAD ENDORSEMENTS .- ARTICLE V. GUARANTIES OF DIVIDENDS.

Of the endorsements popularly known as gaaranties, those on stock certificates especially belong to two distinct classes-the one including true "guaranties," the other "recitals." To the class of true guaranties we assign all endorsements so worded as to be beyond question separate contracts for the performance of the act of guaranty. Reference they may make to existing leases or other contracts, but by containing the word " hereby " or some similar expression, they give unmistakable evidence of being in themselves contracts, subordinate it may be, but at the same time additional to any lease or other operating agreement. The "recital," on the other hand, is in its form nothing more than a declaration of the guaranty which the bond or stock certificate enjoys under some other instrument. Excellent things though such recitals areand they may be little if at all, in some cases, inferior in their legal significance to out and out guarantiesthey belong so far as their wording goes to a different category, and we shall therefore defer discussing them till another time, merely adding that the Morris & Essex, Cleveland & Pittsburg, and many others of the best guaranteed stocks, are of the "recital" variety. To-day we confine ourselves to the endorsed guaranty of dividends, using the terms in their strict and proper sense.

We know of no more clear and concise example of such an endorsement than that placed by the New York Central two and a-half years ago on the shares of the Beech Creek Railroad. The Central leased the Beech Creek practically in perpetuity (i. e., for 999 years), and the endorsement placed on the stock and quoted below guarantees unconditionally and without limitation the payment of quarterly dividends "at the rate of 4 per cent per annum." The endorsement is as follows :

#### BEECH CREEK STOCK.

"For a valuable consideration, the New York Central & "For a valuable consideration, the New York Central of Hudson River Railroad Co. hereby guarantees to the holder of the above certificate of stock the payment of dividends on said stock at the rate of four (4) per cent per annum from the first day of October, 1890, payable quarterly. "(Signed) NEW YORK CENTRAL & HUDSON RIVER RR. Co. "(F. D. Worzscher Societ, Chaumery M. Denew Pres."

" E. D. Worcester, Sec'y. Chauncey M. Depew, Pres.

The Central's guaranty of dividends on Rome Watertown & Ogdensburg stock, given next below, also provides for the payment of quarterly dividends. There is but one limitation, and this in its practical effect is no limitation at all-the dividends are guaranteed only during the continuance of the lease; but as the lease by its terms is to last during the corporate existence of the Watertown Company, and all renewals thereof, the guaranty is as nearly perpetual as well could be. This is the endorsement :

#### ROME WATERTOWN & OGDENSBURG RR. STOCK.

ROME WATERTOWN & OGDENSBURG RE. STOCK. "The New York Central & Hudson River Railroad Com-pany hereby guarantees to the holder, for the time being, of this certificate the payment of one and one-quarter per cent on the par value of the stock represented thereby, on the fif-teenth days of May, August, November and February in each year, during the continuance of a certain lease, dated the fourteenth day of March, 1891, by the Rome Watertown & Ogdensburg Railroad Company to the said New York Central & Hudson River Railroad Company." (Seal of the N. Y. C. & H. E. RR. Co. and the signature of

(Seal of the N. Y. C. & H. R. RR. Co. and the signature of the Treasurer.)

In the endorsement on the stock of the Rensselaer & Saratoga Railroad Company, signed by the Delaware & Hudson Canal Company, we have a strong guaranty, and one that is even more explicit than it appears to be, the guaranty being made "subject to the conditions and provisions" of the lease dated May 1, 1871, and this lease containing provisions that are of much advantage to the stockholder. The guaranty is in the following form :

#### RENSSELAER & SARATOGA STOCK.

RENSSELAER & SARATOGA STOCK. "The President, managers and company of the Delaware & Hudson Canal Company hereby guarantee to the holder hereof the payment of semi-annual dividends of three and one-half per cent each on the shares herein named, on the first day of January and July, 1872, and semi-annual dividends of four per cent each, upon the first day of January and July of each year thereafter, subject to the conditions and provisions of a certain lease made between the said Canal Company and the Rensselaer & Saratoga Railroad Company, bearing date the first day of May, 1871, and duly recorded in Albany, Rensse-laer and other counties. "IN WINNESS WHEREOF the said Canal Company has caused

"IN WITNESS WHEREOF, the said Canal Company has caused its corporate seal to be affixed hereto, and these presents to be signed by its Treasurer."

Such is the endorsement. If now we read the terms of lease we see it stated that, "it is the intention of the parties hereto to make these presents perpetual," and that the Delaware & Hudson Company covenants that, "if by any change of the law the present tax or duty required of the said party of the first part shall be required of the said stockholders, then the said party of the second part [the Delaware & Hudson Canal Company] shall pay the same." In view of possible changes in the tax laws this latter provision may some day be of importance; the lease, however, stipulates that the said company shall not be called upon to pay any "income tax" that may be laid on the dividends. All the conditions of the lease, so far as we have examined them, are favorable to the stockholders, which shows the wisdom, where the endorsement mentions the traffic contract or lease, of studying the traffic contract or lease with care. Manifestly in some cases the conditions therein existing might be as unfavorable as here they are favorable.

Another guaranty given by the Delaware & Hudson Canal Company-that on the stock of the Albany & Susquehanna Railroad Company-possesses an interesting feature and one that is of no little importance at the present time, improving materially the value of

the stock. The public generally, we imagine, believe this stock to be guaranteed 7 per cent dividends, and so it is, but the guaranty further provides that when the \$1,000,000 of 6 per cent bonds loaned by the City of Albany shall be redeemed by the sinking fund the dividends shall be 9 per cent per annum. In other words, the \$70,000 now devoted to interest and sinking fund of the loan [interest being \$60,000 yearly and sinking fund \$10,000] is on the payment of the loan to be divided each year among the stockholders, to whom it will yield 2 per cent per annum on 31 millions capital. Apparently the accumulations of the sinking fund were expected to provide for the payment of the entire loan when it matures in 1895-7. This they will not suffice to do, but'over half the bonds can then be redeemed with the funds in hand, and for the rest of the loan, if it be extended at 4 per cent, the annual sinking fund being retained, there will still be applicable to additional dividends \$40,000 yearly, or over 1 per cent on the stock. What course the company will in reality take with respect to the loan when due it is impossible to say ; but certainly the stock will reap the benefit which comes from paying off or extending the Albany bonds. The Albany & Susquehanna guaranty is shown in the following :

#### ALBANY & SUSQUEHANNA STOCK.

ALBANY & SUSQUEHANNA STOCK. "The president, managers and company of the Delaware & Hudson Canal Company, hereby, for value received, guaran-tee the payment of a semi-annual dividend of 3½ per cent upon the stock represented by the within certificate, to be paid on the first days of January and July in each year, until the Albany City bonds which were loaned to the Albany & Sus-quehanna Railroad Company to the amount of \$1,000,000 shall be paid, by the operation of the sinking fund provided for their payment, and thereafter the said Canal Company guar-antees to pay upon said stock 4½ per cent semi-annually on the same days, subject to the conditions and provisions of the lease made by said Railroad Company to said Canal Company, dated February 24, 1870, and of an agreement supplemental thereto, dated the 7th day of March, A. D. 1876."

It seems as though frequently companies when leasing their road for a guaranteed dividend might, if they asked for it, secure for their stock a similar concession Certainly the saving from time to time made through the refunding or payment of loans properly belongs to the stock, and the guarantor cannot reasonably object to making the concession, provided the annual charge is not thereby increased.

In the guaranty which we shall next cite the guarantors, the Pittsburg & Lake Erie and Lake Shore & Michigan Southern railroad companies, jointly and severally guarantee 6 per cent on the stock of the Pittsburg McKeesport & Youghiogheny [\$4,000,000 outstanding] until July 1, 1934. But, unfortunately for the present holders of this excellent investment security, the guarantors not only do this, but they guarantee to purchase the certificates at their face value in 1934, the holders being obliged to present their certificates for payment, so that the stock by the provisions of the guaranty is made to mature as though it were an issue of bonds, the guarantee stating that-

PITTSBURG MCKEESPORT & YOUGHIOGHENY STOCK.

PITTSBURG McKEESPORT & YOUGHIOGHENY STOCK. "The Pittsburg & Lake Erie Railroad Company and the Lake Shore & Michigan Southern Railway Company, for a valuable consideration, the receipt whereof is hereby ac-knowledged, and in compliance with their agreement in that behalf heretofore made, hereby jointly and severally guaran-tee and become securities for the payment of dividends on the within described shares of stock at the rate of six (6) per cent per annum, rayable semi-annually in equal instalments on each first day of July and January ensuing the date hereof, at the office of the Union Trust Company, of New York, in the City of New York, or of said Trust Company's duly appointed successor, until the first day of July, nineteen hundred and thirty-four. And we covenant and agree on the said first day of July, nipeteen hundred and thirty-four, to purchase said shares of stock from the then holders thereof at their par or face value. And said companies further covenant and agree

to make a like guarantce and covenant, as the foregoing, upon any certificate or certificates issued upon the surrender of the within certificate for any shares of stock represented thereby. The foregoing guarantee and covenants are made upon the express condition, and the present and then holder of said shares of stock, by the acceptance of this certificate and guarantee, hereby covenants and agrees with said rail-road companies, that he will, on the first day of July, nineteen hundred and thirty-four, present the certificate then repre-senting the same at the office of said Union Trust Company, or its duly appointed successor, and upon the payment of the par or face value of said shares by either of said guarantor companies, shall sell and transfer the same to whichever of said companies shall make payment therefor. to make a like guarantee and covenant, as the foregoing, said companies shall make payment therefor.

"WITNESS the respective corporate seals of said The Pittsburg & Lake Erie Railroad Company and the said Lake Shore & Michigan Southern Railway Company, attested by the signatures of the respective presidents and secretaries of suid companying said companies.

"JOHN NEWELL, Pres. Attest, "JNO. G. ROBINSON, Sec'y. P. & L. E. RR. Co.

"JOHN NEWELL, Pres. | Attest, "E. D. WORCESTER, Sec'y. | L. S. & M. S. Ry. Co."

A clause of the nature here disclosed is unusual and we know of no similar case.

We shall close to-day's article with the form of guaranty printed on the back of each certificate of special stock of the Pittsburg Fort Wayne & Chicago Railway Company, of which over 14 millions is outstanding. The guaranty is signed by the Pennsylvania RR. Company, which would make the stock a valuable security even if the road's earnings were not, as they are, far in excess of all interest and dividend charges. It will be seen in the guaranty that the Pennsylvania Railroad Company covenants with the Pittsburg Fort Wayne & Chicago, and also with each stockholder, to pay to said Fort Wayne Company an amount equal to 7 per cent yearly on the special stock, the dividends to be "as free of taxes as the dividends upon the general or prior stock" of the company. While long, the terms of the indorsement are clear and satisfactory, as the reader can see for himself by reading the following :

PITTSBURG FORT WAYNE & CHICAGO SPECIAL STOCK.

PITTSBURG FORT WAYNE & CHICAGO SPECIAL STOCK. "The Pennsylvania Railroad Company having, in pursuance of article sixteenth of the lease of the Pittsburg Fort Wayne & Chicago Railway, requested the preparation and issue to it from time to time of a special stock to be desig-nated the guaranteed and special stock of said railway com-pany, the said Pennsylvania Railroad Company hereby promises, agrees and guarantees to and with the Pittsburg Fort Wayne & Chicago Railway Company, for the benefit of each and every person who may become a holder of said stock, after the same is issued to said Pennsylvania Railroad Company, or to its order, that the said Pennsylvania Railroad Company, or to its order, that the said Pennsylvania Railroad Company, its successors or assigns, shall and will provide and pay to the said Pittsburg Fort Wayne & Chicago Railway Com-pany, quarterly, to wit: on or before the first days of Janu-ary, April, July and October, in each and every year, an amount sufficient to pay quarterly dividends at the rate of 7 per cent per annum, upon said special stock, as free of taxes as the dividends upon the general or prior stock of said Pitts-burg Fort Wayne & Chicago Railway Company are made payable by the provisions of said lease, which payment shall be made quarterly dividends payable upon the general or prior stock of the said railway company, includ-ing under the designation "general or prior stock" all the stock other than the said special stock which the said railway company has heretofore issued or authorized to be issued, for which general or prior stock a dividend fund of \$1,380,000 per annum is in-violably pledged and set apart under the provisions of said lease, bearing date June 7, 1869. And it is further agreed prior stock a dividend fund of \$1,30,000 per annum is in-violably pledged and set apart under the provisions of said lease, bearing date June 7, 1869. And it is further agreed that all needful expenses connected with the said guaranteed special stock, the issue of certificates therefor, and the pay-ment of dividends thereon, shall be borne and paid by the Pennsylvania Railroad Company.

"The promises and agreements hereinbefore set forth are made by the said Pennsylvania Railroad Company not only to and with the said Pittsburg Fort Wayne & Chicago Rail-

to and with the said Pittsburg Fort Wayne & Chicago Rail-way Company but to and with each and every person who shall become a holder of the said special guaranteed stock. "A copy of this agreement shall be printed on the back of each certificate, and the transfer agents of the Pittsburg Fort Wayne & Chicago Railway Company may certify, and they are hereby authorized to certify, on behalf of the Pennsylvania Railroad Company, as well as of the Pittsburg Fort Wayne & Chicago Railway Company, on each and every certificate for

guaranteed special stock, issued from time to time under the provisions hereof, that this agreement has been duly executed by the Pennsylvania Railroal Company, under its corporate

seal. "In witness whereof, the said Pennsylvania Railroad Company has caused its corporate seal to be hereunto affixed, and these presents to be signed by its President and Secretary, the 28 h day of October, 1871. "J. EDGAR THOMSON, President.

the 28.h day of Corner "J. EDGAR THOMSON, "Jos. LESLEY, Secretary. (Corporate Seal of the Pennsylvania Railroad Co.) "For and in behalf of the Pennsylvania Railroad Company, as well as the Pittsburg Fort Wayne & Chicago Railway Company, — hereby certify that the agreement, of which the foregoing is a true copy, has been duly executed by the Pennsylvania Railroad Company, with its corporate seal at-tached, under date October 28, 1871. "......" "Transfer Agent."

"Transfer Agent." Another week we intend to say something concerning " recitals."

#### THE DEPRESSION IN THE IRON AND STEEL TRADES.

The American Iron and Steel Association at Philadelphia has this week issued its annual report, containing the usual mass of interesting and valuable statistics, prepared under the direction of Mr. James M. Swank, the General Manager of the Association. Mr. Swank, who is thoroughly informed as to iron and steel matters, has had charge of the work of compiling these statistics for a great many years, and has gained quite a reputation for himself by reason of his thoroughness and accuracy in this line of investigation. The statistics of most general interest and of greatest importance, such as the year's production of iron and steel, have already been commented on by us, Mr. Swank always following the plan of giving out the figures just as soon as he can secure the returns from the manufacturers-a practice which ensures early and prompt information to the public. The report also contains a review of the iron trade for 1892 and of the causes and influences that contributed to make the year an unprofitable one for manufacturers.

This latter has especial interest at the present time, since the conditions now are much the same as those which prevailed during 1892, and it is of course evident that unless the financial outlook brightens, little hope can be entertained of an improvement in the iron situation in the early future. Mr. Swank refers to the fact that while the production of iron and steel was large, and consumption was also large, prices of most steel and iron products, after having fallen all through 1891 fell to still lower figures in 1892, and touched a lower average towards the close of the year than had ever before been known. In brief, prices failed utterly to respond to the heavy consumptive demand, the consumption in some lines being the largest in the country's Thus it happens that notwithstanding both a history. heavy production and a heavy consumption the year was far from being a prosperous one; it was a year of good profits for very few iron and steel manufacturers, says Mr. Swank, of small profits for many, and of no profits at all for a large number. As a result many failures occurred, and the situation has not changed for the better during the current year; on the contrary, prices are generally lower now than they were at the end of 1892.

Mr. Swank notes that the farmers of the West and the cotton-planters of the South shared in the lack of prosperity so conspicuous in the iron and steel trades. The aggregate yield of grain in 1892 was considerably smaller than the yield in 1891, and at the same time

prices declined-wheat especially falling to a lower point than for many years previously. In the South prices for cotton dropped to exceedingly low figures, and though some improvement occurred before the end of the year, under the knowledge of the reduced crop of 1892, yet the planter got very much less for his cotton than he had been accustomed to receive. In these cases special reasons can be advanced for the low prices ruling-such as the carrying-over of large supplies from the previous crops, and a falling off in the European demand; and yet if Mr. Swank had extended his inquiry further he would have discovered that in many other industries, too, low prices were the feature during 1892, and are still the feature ; the chief characteristic, indeed, of industrial affairs having been the fact that the volume of trade was very large-in many cases large beyond precedent-but that the margin of profit was small and unsatisfactory.

But what is Mr. Swank's diagnosis of the depression in the iron trade ? He says the general financial sitution in this country and in Europe during 1892 was not favorable to the building of new railroads, and hence was not favorable to the iron and steel indus-Then there was a lack of confidence in the tries. country's ability to maintain the parity of gold and silver, which interrupted the flow of European capital this way. The situation was aggravated by heavy gold exports and the attitude of hostility to railroad interests assumed by the Farmers' Alliance and the People's Party of the West. Mr. Swank lays chief stress, however, on another circumstance. He thinks that while . general causes affecting all our industries and even the world's industries, the Baring failure included, have had their influence in depressing iron and steel prices in this country, the principal cause of the depression is to be found in the capacity of the country to produce much more iron and steel than the country could consume, notwithstanding the enormous increase in consumptive requirements in recent years.

Pig iron he states furnishes a good illustration of the . correctness of this view. In November 1889 the capacity of all the blast furnaces in the United States was 11,757,-351 gross tons, in January 1892 it was 14,550,708 gross tons, giving an increase in about two years of 2,793,357 tons; yet consumption and production in 1892 did not vary a great deal from the consumption and production of 1890. As prices of pig iron have steadily declined since 1890, and as stocks have not greatly changed in the interval, the great increase in furnace capacity, he argues, may justly be held to be primarily responsible for the decline. Consumers of pig iron knew that there could be no scarcity in the supply of this product, and hence they were never eager buyers and bought only as their wants required; while producers, knowing that the supply was constantly in excess of the demand, were always urgent sellers and thus were themselves instrumental in depressing prices from month to month.

With this portion of Mr. Swank's remarks there is little reason to find fault. But he goes a step further. He is an advocate of high-tariff duties, and he seeks to draw from the existing depression an argument against the reduction of the duties. Says Mr. Swank-"If it were not for the expectation of lower duties on iron. and steel and on other manufactured products at an early day, the check which low prices, a reaction against booms, and a tightening money market have given to the building of new furnaces and rolling mills and steel works, would justify the theory that the depression in

iron and steel prices is almost over, as the country's population and its need of iron and steel are contantly growing. But the prospect of sharper competition in our own markets with iron and steel manufacturers across the Atlantic discourages the hope that any considerable improvement in prices is possible in the near future." In view of Mr. Swauk's own demonstration that the trouble lies chiefly in an excess of the producing capacity over the consuming capacity, this attempt to make it appear that it is fear of foreign competition that is responsible for the continuance of the existing depression is more ingenious than convincing.

We agree entircly with Mr. Swank in his final conclusion that "the outlook is not favorable for works that are badly situated, or are of antiquated construction, or are operated with insufficient capital,"-and that "the law of the survival of the fittest is inexorable and merciless." But in this the iron and steel trades by no means stand alone. The same remark applies to every other industry. Competition has become so intense in all lines of trade, and profits so small, that a struggle for survival is constantly going on everywhere. In fact, even the fittest find the maintenance of existence far from an easy task under the low prices commanded by their products, and are driven to combination and a resort to other means to enforce economy and make it possible to produce goods at a lower average cost per unit of product.

#### RAILROAD GROSS EARNINGS FOR APRIL.

Our compilations of earnings for April show a moderate though, all things considered, satisfactory improvement, as compared with the results for the corresponding month last year. There is an increase in the aggregate of \$1,390,572, or 3.57 per cent. On the other hand, notwithstanding this gain in the totals there is a considerable number of roads in different parts of the country which record a falling off in earnings, a few in quite large amounts, and from this it is evident that the conditions were not altogether favorable during the month.

As a matter of fact, many of the conditions which prevailed were unfavorable. Of course all the roads were affected (though not in equal degree) by the fact that the month contained five Sundays this year against only four Sundays last year, thus giving one business day less. Many of the smaller roads presumably do little or no business on Sundays, while in the case of the larger roads, even though a considerable number of passenger trains are run; it can hardly be claimed that a Sunday in point of earnings is equal to a week day. In the South some of the roads have suffered from the continued diminution of the cotton movement and in the West a smaller grain movement has been an adverse influence in several instances, though a few roads have profited by the heavy movement of wheat brought about through the attempted corner in that cereal in the West. Western roads also-if the deliveries at Chicago are any guide-had a much smaller live-stock traffic. On the North Pacific Coast the roads continued to feel the effects of the severe weather of the late winter, and in the Northwest some drawbacks were also encountered by reason of adverse weather conditions, the season being cold and backward. High water and overflows likewise interrupted railroad operations in

12 martin

various parts of the country, the effect of this in the comparisons being, however, less marked than it otherwise would be, because very much similar conditions in that particular prevailed in many sections in the corresponding month last year.

In ratio and amount our April statement of earnings has shown only moderate improvement for several years past. The increase the present year, as already stated, is \$1,390,572, or 3.57 per cent. Lust year the increase was \$1,494,147, or 3.68 per cent, and in April 1891 it was \$1,752,780. The following carries the comparisons back for a series of years.

" Annual makes	Mil	eage.	Earr	nings.	-

We have stated above that some of the roads derived an advantage from the heavy wheat movement, occasioned chiefly by the manipulation of the price of wheat at Chicago. As might be supposed, the advantage has been chiefly to the roads running to that point, the price of May wheat on the 12th of the month touching 90 cents per bushel and other markets not having responded to the advance. The high price was not long maintained, and by the close of the month the quotation had dropped to 71 cents. Nevertheless, the deliveries at Chicago reached 4,535,122 bushels in April 1893, against only 819,414 bushels in April 1892. But even at that centre the gain in wheat was in large part offset by a diminution in the receipts of the other cereals-corn, oats, rye and barley. This fact is very clearly brought out in the following statement in our usual form.

RECEIPTS AT CHICAGO DURING APRIL AND SINCE JANUARY 1.

		April.		Sir	ice January	1891. 2,945,705 14,764,605 15,590,476 0 786,470

Livelbogs No	411,182	557,931	523,528	1,810,749	2,843,427	3,387,563		

Thus while in wheat alone the gain was pretty nearly 33 million bushels, in the aggregate of all grain receipts at Chicago the increase for the month was but little over a million bushels. It will also be observed from the foregoing that the flour receipts were smaller than a year ago, and the statement bears out what was said above regarding the falling off in the movement of provisions and live stock. Of live hogs the deliv eries, it will be seen, were only 411,182 head in April 1893, against 557,931 head in April 1892. The livestock receipts of all kinds at Chicago, according to the Chicago correspondent of the Evening Post of this city, reached only 19,844 car-loads this year against 22,675 carloads in April last year. Three or four of the roads, however, among them the Chicago & Alton and the Wabash, brought in more live stock than in the previous year.

The increase in the wheat arrivals at Chicago extended to both winter and spring wheat, but the bulk of the increase was in "spring wheat, and must therefore be supposed to have come from the spring-wheat sections of the Northwest. We may note that besides Chicago, Minneapolis (which is also a spring-wheat market) had an increased wheat movement, the receipts for the four weeks ending April 29 this year being 4,447,-100 bushels, against 3,588,100 bushels in the four weeks of April last year. On the other hand, the receipts at Duluth were only 520,465 bushels, against 4,389,948 bushels in the four weeks last year. Thus it is evident that not all the spring-wheat roads were favored by a heavy movement of that cereal. The falling off at Duluth may no doubt be ascribed in part to the greater drawing power exercised by Chicago by reason of the high quotations ruling there, but also to the late opening of navigation on the Lakes and the difficulty of finding further storage room, stocks of wheat at Daluth last Saturday being reported at 17,509,000 bushels, against no more than 998,000 bushels at the corresponding date in 1892.

As to the winter-wheat markets, St. Louis received less wheat than last year, but on the other hand it received considerably more corn (a million bushels more) and also more oats. Toledo received more wheat, while losing in the corn movement. Peoria, like St. Louis, lost in wheat but gained considerably in corn and oats. Altogether the grain movement was very irregular both as regards the different cereals and the different points of accumulation. In the grand total of all the Western markets there is an increase in wheat and oats but a loss in corn, barley and rye, and also in flour. The following is our usual detailed statement.

In addition to the above there was received at Kansas City during the four weeks this year 370,600 bushels of wheat, 112,594 bushels of corn and 423 bushels of oats. Since January 1 the receipts have been 4,567,875 bushels of wheat, 1,023,850 bushels of corn and 77,937 bushels of oats.

Concerning the cotton movement in the South, the gross shipments overland in April 1893 were only

the receipts at the Southern ports aggregated 175,391 bales against 220,414 bales. We may note that while New Orleans shows smaller receipts, the same as most other points, yet both the Texas & Pacific and the Morgan road brought in slightly more cotton than a year ago.

In view of the great increase in the wheat arrivals at Minneapolis and Chicago, it is perhaps not surprising that the Chicago Milwaukee & Sr. Paul should show a larger gain in earnings for the month than any other road in our tables; the gain is \$316,640, and is the more noteworthy since it follows a gain of \$322,457 last year. Next in order, for amount of guin, is the Missouri Kansas & Texas with an increase of \$167,712; then come the Missouri Pacific with \$137,322, the Norfolk & Western with \$134,050, the New York Central with \$129,187, the St. Louis & South vestern with \$120,700, the Atchison with \$118,493, the Chesapeake & Ohio with \$118,017, the Great Northern with \$92,-117, the Mexican Central with \$30,830, the Rock Island with \$56,631, the International & Great Northern with \$54,962, &c. As to the large losses, they are supplied mainly by five roads, namely, the Northern Pacific, which has suffered a decrease of \$196,471; the Canadian Pacific with a decrease of \$79,317, the Grand Trunk of Canada with a decrease of \$73,779, the Wabash with a decrease of \$59,756, and the Toledo St. Louis & Kansas City with a decrease of \$49,735. The following is a full list of all the large gains and losses.

One fact stands out very prominently on an examination of the above list, and that is that Southwestern roads are especially distinguished among those showing heavy gains, the list including such roads as the Missouri Kansas & Texas, the Missouri Pacific, the Atchison, the St. Louis Southwestern, the Rock Island (which has a line in the Southwest), the International & Great Northern and the Texas & Pacific. It is a fact, too, that as a group Southwestern roads have done better than any others. A few losses are found in that section but mostly by minor roads. The improvement follows no doubt largely from the excellent crops raised last season (the wheat crop in Kansas having been phenomenal) and from the stimulus to general business given by that circumstance, and also 81,058 bales against 114,659 bales in April 1892, while in part, no doub, from the better rates realized in

Texas. A six-year comparison for some of the leading roads is furnished in the subjoined. EARNINGS OF SOUTHWESTERN GROUP.

Northwestern roads show rather irregular results, the gains and losses being nearly evenly distributed, and doubtless the varying character of the grain movement, as outlined further above, is mainly responsible for the irregularity. Most of the larger roads have gains, most of the smaller roads losses.

EARNINGS OF NORTHWESTERN LINES.

The Pacific roads-or rather those of them on the extreme north, neither the Union Pacific or the Southern Pacific furnishing early preliminary returns-have all sustained losses. It is noteworthy, though, that while the loss on the Canadian Pacific is only \$79,317, and follows a gain of \$63,009 last year, the loss on the Northern Pacific is \$196,471 and is additional to a loss of \$143,810 last year. The present year's earnings, indeed, of that company are the smallest of any April since 1888.

In the South, notwithstanding the smaller cotton movement, there are some pretty considerable gainsthe Chesapeake & Ohio and Norfolk & Western being conspicuous instances; still, not a few losses are also to be noticed. For the more prominent Southern roads the comparison for the last six years is as follows: EA

Among the trunk lines the New York Central has a fair gain this year after a gain last year, and the Baltimore & Ohio Southwestern and the Ohio & Mississippi I kewise show improved results; but the Wabash, the "Big Four" and the Grand Truck roads have suffered losses.

Besides the trank lines, a few other roads in the Middle and Middle Western States have likewise sustained decreases; on the whole, however, the roads in those sections are able to present quite satisfactory returns.

#### FALL RIVER MILL DIVIDENDS.

The record of dividends declared by the cotton-manufacturing establishments at Fall River during the second quarter of the year 1893 we are able to present to our readers to-day. The exhibit, like that for the first quarter of the year, is much more satisfactory than the exhibit for the similar period a year ago, a large majority of the mills showing an increased ratio of distribution. In fact the aggregate amount paid out by thirty-four corporations has been \$491,820, or an average of 2 36 per cent on the capital invested, whereas in 1892 the average dividend was only 1.83 pcr cent and in 1891 reached 1.34 per cent. Of course our statement does not include all the mills in Fall River, the missing ones being the Annawan Mfg. Co. and the Durfee Mills, which do not make public their divid-nds, and the Fall River Mfg. Co., which declared no dividend this quarter. Furthermore, there are three other corporations - the F. Il River Iron Works Co., Sanford Spinning Co. and Stevens Mfg. Co.-which have only lately begun operations and base not yet made any distribution of profit to shareholders.

The table below furnishes evidence that a conservative policy has been followed by the management of many of the mills. for while in some instances a much larger amount than in the like period of 1.92 has been paid out, a number have increased the dividend but slightly and six have merely maintained the ratio of last year. It will also be noticed that the Barnaby Mfg. Co., Bourne Mills and Kerr Thread Co. have declared reduced dividends. While the exhibit is a favorable one, the actual results of operations have been more satisfactory than the dividends indicate, considerable amounts having been added to surplus account. One other point worthy of mention in this connection is that the results here disclosed have been achieved in the face of a declining market for print cloths ; but an explanation is found in the fact that mills have been kept busily employed on contracts entered into when goods were ruling at 4 cents or the eabout.

Combining the above results with those for the first quarter (published in the CHRONICLE of February 18, page 298) we have the following exhibit for the half-year. With regard to these figures it is sufficient to say that thirty-four corporations distributed in dividends in the first half of the present year \$902,140, or an average of 4.32 per cent, against \$634,100, or 3.16 per cent in the like period of 1892. In 1891 and 1890 the exhibit was not so favorable as in the current year, but in 1889 and 1838 the ratio of distribution was slightly greater.

As showing the relation this year's dividends bear to those for a series of years, we have prepared the following, which embraces twelve of the leading corporations. The purpose is to compare this year's ratio for the half-year with the average rate per cent for the corresponding previous seven half-years:

									Av ge.
First 6 mos. of	1893.	1892.	1891.	1890.	1839.	1888.	1857.	1886.	7 yrs.
American Linen		219		2	6.	10	74	5	457
Border City	. 6	4	4	4	4	6	6	44	4914
Globe Yarn	. 4	4	4	4	4	4	4	2	357
Granite		6	6	9	12	10	9	5	817
King Philip	. 3	3	3	3	3	3	3	3	3
Merchants'		3	3	4	5	34	4	4	31114
Pocasset		3	2	3	4	4	4		313
Richard Borden	. 4	24	3 2	3	4	3	3	14	257
Sagamore	. 6	34	- 2	3	5	7	5	3	4114
Stafford		3	14	a 4	4	6	6	3	31314
Union		6	6	6	10	10	11	6	767
Wampanoag		2	1	44	1 84	5	6	4	437

Here we see very clearly that so far as these twelve corporations are concerned that in only four instances has the ratio of distribution in the half-year of 1893 been less than the average rate for the like period in the seven years preceding. If we had carried the table back one year further so as to include 1885 the comparison would have been even more favorable to the current year, as our readers will doubtless remember that 1885 was a particularly unsatisfactory year for cotton-manufacturing, a majority of the mills at Fall River passing dividends entirely. In view of the rather slow demand and lower prices for cotton goods latterly, the outlook for the future is somewhat less favorable. It is true, however, that the margin for profit between the cost of the raw material and the price of printing cloths is greater at this writing than at the same time in any year since 1889.

#### Monetary Commercial English Rews

#### [From our own correspondent.]

LONDON, Saturday, April 29, 1893. There has been a very marked rise in the value of money this week. On Tuesday and Wednesday the borrowing at the Bank of England was on quite an unexpected scale, nearly £1,200,000 having been advanced in those two days, and since a considerable amount more has been obtained. In the outside market 2 per cent has been freely paid for day-to-day money and 21/2 per cent for a week. The Bank of England on Thursday charged as much as 3 per cent for its advances. The discount rate at the same time has risen to about 214 per cent. Partly this sudden advance is due to the preparations for paying the interest on the Egyptian debt, the Messrs. Rothschild having called in over a million sterling this week which had been lent to the market. Partly also it is due to the making up of their balance sheets at the end of the month by the joint-stock banks.

But these are merely temporary and small influences; the real cause of the sudden tightness in the money market is the apprehension excited by the continued panic in Australia. Fortunately Australian banks do not accept largely, or at all events their acceptances were chiefly on account of their own branches in Australia, and the amount of Australian bank bills in circulation in the city is quite trifling, considering the immense sums they disposed of. Still, disaster after disaster following with such bewildering rapidity makes it impossible to judge what may happen. Bankers and bill brokers, therefore, are very unwilling either to lend or discount on a considerable scale. Every one prefers to wait and see a little more clearly rather than run risks. Of course there have been rumors that the bank suspensions would bring down many trading firms, but it is not thought likely that it will do so by the best informed, for in fact the banks, to a large extent, competed with merchants rather than served merchants. There have also been rumors during the week of difficulties in the shipping and ship-building trades-not unnaturally, considering the state of affairs at Hull. But the firms talked about have been doing little for a long time. One of them is to be wound up, but will pay everything in full; the other, it is thought probable, will not suspend.

On Tuesday evening the London Chartered Bank of Australia closed its doors. It was established by Royal Charter forty-one years ago, and at one time not only did a very large business but stood in high credit. It had a capital of a million sterling fully paid, and the reserve fund was £320,000. On the last day of December its deposits amounted to about 61% millions sterling, and it had notes in circulation amounting to £219,000. About half the deposits were raised in this country. For fully a year the bank has been known to be in difficulties. About three or four years ago the shares stood at 42. They have gradually been falling, and about a month or six weeks ago they were down to 16; quite recently they fell to 51%. All this warned careful observers of what was coming, and the ultimate suspension has not, therefore, caused much surprise. During the present year this is the fifth bank failure in Australia, with deposits aggregating about 37 millions sterling, and total liabilities considerably exceeding 40 millions sterling. Two local concerns have also had to be assisted.

The India Council is succeeding wonderfully in its declared policy not to sell its drafts below 1s. 25% d. per rupee. On Wednesday of this week it offered for tender 60 lakhs of rupees. The whole was at once taken, and an hour or two later 21 lakhs more were purchased by special contract. The average price was about 1s. 2 11-16d. per rupee. The policy of the Council has made it necessary for the Presidency treas. uries to accumulate money. In consequence the money market in India has become tight and rates have risen rapidly. The Bank of Bombay has this week raised its rate of discount to 7 per cent and the Bank of Bengal raised its rate to 6 per cent. The movement, however, is artificial. If the Council succeeds in selling freely now, money will be poured out of the treasuries, the market supply will be increased, and then rates will again fall away.

Business upon the Stock Exchange continues quite inanimate. Investors are confining their purchases to the very soundest securities, and in large measure to British Government securities, British railway stocks and British municipal securities. The report that Messrs. Drexel, Morgan are about to undertake the reorganization of the Reading Railroad Company has been received here with much gratification, and a considerable rise in all Reading securities has taken place; but the general public is holding aloof from the market, and even operators for the most part are dealing very cautiously. The state of the money market warns every one to be careful. The large joint-stock banks are neither lending nor discounting freely, and if this continues rates upon the Stock Exchange must rise considerably; consequently operators are afraid to deal freely. Besides, the report that the strong Australian banks are about to send gold to Melbourne and Sydney, obtaining it from New York, has revived the fear that the difficulties of the United States Treasury may recur, and that consequently the New York stock market may be affected. Nothing has yet been done in forwarding the settlement of the Argentine debt. A meeting of Lord Rothschild's committee was held at the Bank of England on Thursday, but adjourned until Monday, mainly because Mr. Burns, of J. S. Morgan & Co., is on

the Continent, and it is felt that in his absence it is not desirable to come to any resolution. The feeling amongst the members of the committee, however, is strongly in favor of meeting the Argentine Government in a conciliatory spirit. An attempt will undoubtedly be made to induce the Finance Minister to pay somewhat more. The committee would probably be satisfied with a million and three-quarters sterling per annum for the next five years instead of the million and ahalf offered. But even if the demand is not conceded, an arrangement will probably be arrived at if the bondholders can agree amongst themselves. The main point is whether the full interest upon the funding loan and the '86 loan will be insisted upon. If it is, the negotiations are very likely to break down. Hardly anything is doing in Chilian, Brazilian and other South American securities.

The Continental bourses are steady, but business is quiet. Money is rising in value all over the Continent. The difficulties of both Italy and Spain are increasing. The projected labor meetings on May Day, especially in Austria, are causing apprehension, and the rumors which are circulating of a probable failure of this year's crops in Russia are also affecting the markets. At home the dock strike in Hull has not yet been settled; but fortunately the dockers of other towns have refused to join in a general strike, and the opinion is spreading that the Hull dockers have nearly exhausted their funds, and that they will be compelled, therefore, to yield. Trade everywhere is depressed, but the rumors which circulated early in the week of numerous impending failures appear to be entirely unfounded or greatly exaggerated. The only active market has been that for South African land, gold and diamond shares. Prices generally are advancing, and a very considerable number of new mining companies are coming out. As railroads are being extended, the public is being attracted more and more to that department.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

-Messrs. Clark, Dodge & Co. announce that they are pre-pared to purchase or sell Great Northern preferred stock rights.

rights. —The New York Guaranty & Indemnity Co. and Messrs. Brown Bros. & Co. offer for subscription, and recommend as a desinable investment, \$2,500,000 first mortgage 4 per cent 100-year gold bonds of the Mohawk & Malone Railway Company, payment of principal and interest guaranteed by the New York Cen ral & Hudson River R R. Co., such guarantee being endorsed on each bond. The Mohawk & Malone Railroad leaves the main line of the New York Central at Herkimer and runs northerly through the Adirondacks to Malone, where it connects with other railroads, forming a line to Montreal. The total capital stock of the railroad— which is now in operation, entirely completed and has cost over \$6,500,000, its length being 173 miles—is controlled by the New York Central & Hudson River R R. Co., the lessee of the mortgagor company. The bonds are a first motgage upon the railroad, its franchises and property, and are issued at a rate not exceeding \$15,000 per mile. The sub-cription books will be opened on Monday, May 15, and will close on Wednesday, May 17, at 3 P. M., or earlier. Ten per cent to be paid on application and 90 per cent on June 2. A simulta-neous issue of the bonds will be made in London by Messrs. Brown, Shipley & Co. Brown, Shipley & Co.

-Messrs. Speyer & Co. offer for subscription, at 102½, \$4,-000,000 Pennsylvania RR. Co. consolidated mortgage 4 per cent gold bonds due May 1, 1943, interest payable semi-annu-ally, November and May. These bonds form part of a total possible issue of \$100,000,000 subject only to the prior lien of \$19,997,820 general mortgage bonds, against which an equal smount of consolidated mortgage bonds is reserved. There \$19,997,820 general mortgage bonds, against which an equal amount of consolidated mortgage bonds, against which an equal amount of consolidated mortgage bonds is reserved. There have already been issued under this mortgage \$32,478,020 bonds, partly sterling, partly dollar bonds. These issues were made in 1873, 1874, 1875 and 1879, and the bonds now offered are the first that have been issued since the latter date, and the several issues rank in every respect alike. The consoli-dated mortgage covers all the property and franchises of the Pennsylvania RR. Co., including its main line from Phila-delphia to Pittsburg and branches, all of which are valued at \$104,862,091, besides which it is also a first lien on the company's leasehold interest in other railroad lines and canals and in shares and bonds of other companies of an estimated cash value of over \$50,000,000, which pro-duced in 1893 an income of over \$2,600,001. The bonds have an annual sinking fund of 1 per cent on the amount issued, beginning May 1, 1898, for the purchase of bonds, if obtain-able at a price not exceeding par. If not, the annual amount of the sinking furd may be invested in other lawful securi-ties, but the bonds are not subject to drawing or compulsory ties, but the bonds are not subject to drawing or compulsory redemption before maturity. The subscription list will be opened at 10 o'clock on Monday morning, May 15, and close at 3 o'clock same day, or earlier. A simultaneous issue will be made in London by Messrs. Speyer Brothers.

WALL STREET, FRIDAY, MAY 12, 1893-5 P. M.

The Money Market and Financial Situation .- The week has been comparatively free from unpleasant developments if we except the unimportant failures of a few Western banks. With no more Stock Exchange failures, and without the shaking of a single financial institution in this vicinity, it must be conceded that the great decline in stock values with the excitement attending it has shown up a condition of strength and vitality among banks, trust companies and bankers and brokers that is highly creditable to their sound condition.

The reports of railroad earnings continue to be very good, particularly of the gross earnings since spring fairly opened, and it is evident that the volume of business in the country is large; the passenger traffic to Chicago has been delayed by the bad weather and the tardiness in opening some of the exhibits, but from the 15th of May a much larger business will be looked for.

In our stock market it is natural to expect dulness for some time, as this is generally the rule after such a shaking down in prices as we have recently witnessed. But stocks that are able to continue their dividends out of earnings fairly made are pretty sure to recover their position in a short time, although their values, like all the rest of the market, may take a lower range.

The matter of financing for corporations always involves largely the question of personal honor and cautious, conservative dealing, and when the officers and directors of a company are well known to be engaged in heavy speculations in the stock market, the maxim caveat emptor will apply to the purchase of its stock.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1 to 7 per cent, the average being 4 per cent. To-day rates on call were  $2\frac{1}{2}$  to 5 per cent. Commercial paper quoted at  $6\frac{1}{2}$  to 10 p. c.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £704,000, and the percentage of reserve to liabilities was 39.41 against 41.37 last week ; the discount rate was advanced from 3 to 31/2 per cent. The Bank of France shows an increase of 14,525,000 francs in gold and 1,100,000 francs in silver.

The New York City Clearing-House banks in their statement of May 6 showed an increase in the reserve held of \$1,115,-800 and a surplus over the required reserve of \$12,835,175, against \$12,156,150 the previous week:

Foreign Exchange.-Sterling bills became strong early in the week for demand and cable transfers as discount rates hardened in London, and since the Bank of England rate was advanced on Thursday exchange remains very strong. There are some sterling loans maturing and only a moderate amount of bills offering against the purchase of American securities for foreign account. Gold exports have been checked by the unsettled condition of things in Wall Street. Actual rates of exchange are: Bankers' sixty days sterling, 4 85@4 8514; demand, 4 89@4 891/4; cables, 4 893/4@4 90.

Posted rates of leading bankers are as follows:

May 12.	Sixty Days.	Demand.
Prime bankers' sterling bills on London Prime commercia. Documentary commercial Paris bankers (francs) Amsterdam (guilders) bankers Frankfort or Bremen (reichmarks)b'nkers	$\begin{array}{r} 4 & 84 & @4 & 84^{1}4 \\ 4 & 84 & @4 & 84^{1}4 \\ 5 & 19^{3}8 @5 & 18^{3}4 \\ 40 & @40^{1}_{16} \end{array}$	

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying par, selling ½ premium; Charleston, buying par, selling ½ premium; New Orleans, bank, \$1 50 premium, commercial, 75c.; St. Louis, 90c. per \$1,000 premium; Chicago, 70c. per \$1,000 premium.

C. 6s, non-fundable, at 2. Railroad bonds have been more active this week, with values in some cases rather unsettled, the Northern Pacifics being most prominent and selling at 58 for the consol. 5s on Wed-nesday and 69 for the Chicago & N. Pacific 5s, but closing better at 62 for the consols and 70 for the C. & N. P.— the decline was owing to the false rumors circulated of the non-payment of the June interest, which were contradicted by President Oakes. Atchison 2nd mortg.  $2\frac{1}{2}$ -4s, Class A., sold freely around 47, and close at  $48\frac{1}{4}$ . Philadelphia & Reading bonds have not been very active but have sold lower, especially the general mortgage 4s and the 2d pref. incomes, owing to the condition of the market and poshave sold lower, especially the general mortgage 4s and the 2d pref. incomes, owing to the condition of the market and pos-sibly to the fact that the plan was not issued on Wednesday but awaits the conference with Mr. Pullman on Saturday. The prices of the leading popular mortgage bonds have yielded slightly in sympathy with stocks, and to-day Atchison 1st 4s sold at 80<sup>1</sup>/<sub>2</sub>, Ches. & Ohio R. & A. 1st 2-4s at 80<sup>3</sup>/<sub>2</sub>, M. K. & T. 4s at 79<sup>3</sup>/<sub>4</sub>, Rio Grande Western 4s at 74<sup>3</sup>/<sub>4</sub>, Erie 2d consol. 6s at 96, Gen. Elec. debenture 5s at 90<sup>1</sup>/<sub>2</sub> and Rock Island 5s at 100,

at 96, Gen. Elec. debenture is at 90% and Rock Island 5s at 100. **Railroad and Miscellaneous Stocks.**—The stock market this week has had the usual characteristics of an after-panic period—irregularity, low prices, stocks depressed by baseless rumors and apprehensions, much liquidation by moderate operators, and finally the settling down to more steadiness on a lower range of values. No statement having been made as to the National Cordage Company's affairs the stocks remain depressed under rumors that a large amount of notes are outstanding. The industrials as a class made in Distilling & C. F. and again in Cordage, but Sugar has been supported better than the others. The general depres-sion resulting from last week's crisis and from the false or ex-aggerated reports circulated at this time for the purpose of knocking prices down, have been the chief influences of the week, and the fluctuations of one stock or another have not been of much significance, as the prices did not depend on any change in actual values but solely on market forces ex-reted for a rise or fall. The granger stocks weakeneed on talk of smaller freights and less favorable Fair traffic than had been expected; Northern Pacific preferred was weak, possibly in consequence of the dissensions among its large holders ; Mis-souri Pacific has been among the weakest of the railroad stocks, and Mr. George Gould has just been elected President ; Western Union Telegraph has held its price better than most other stocks. To-day there was rather a dull market, with prices steady as a rule, though Distilling went lower, touching 16 but closing at 17%. The apprehension seems to be past, and although we may not see an immediate return to higher prices, the good properties will assert themselves in due time. Railroad and Miscellaneous Stocks .- The stock market

## Luvestment Railroad Intelligence.

The INVESTORS' SUPPLEMENT, a pamphiet of 150 pages contains extended tables of the Stocks and Bonds of Railroads, and other Companies, with remarks and statistics concerning the income, financial status, etc., of each Company. It is published on the last Saturday of every other monthviz., January, March, May, July, September and November, and is furnished without extra charge to all regular subscribers of the CHRONICLE.

The General Quotations of Stocks and Bonds, occupying six pages of the CHRONICLE, are published on the third Saturday of each month.

ties is better than at any previous time in the history of the company.

ties is better than at any previous time in the history of the company." The report of Secretary and Treasurer Bowron says: "The common stock is held by 280 persons, and the preferred by 133. Omitting duplicate names there are now 392 registered stockholders, as against 319 at the last report. The operations of the past fiscal year show a gross profit of \$923,550, and after providing for coupon and other interest, bond premiums, and dividends on the preferred stock, the balance remaining unappropriated is \$290,069, or about 1½ per cent on the com-mon stock. It is proper to say that this sum includes only 11 months' earrings of the DeBardeleben Company's property and 6 months' of that of the Cababa Company, owing to the different dates at which the fiscal years had closed and inver-tories had been made. The balances brought forward from the last fiscal years of the three companies aggregated \$1,032,-359, so that with the addition of this year's surplus, \$290,069, the undivided surplus stands at \$1,322,428. This surplus is not in a divisible shape, being largely represented by exten-sions and improvements of the company's property, and the remainder is represented by the increased working capital which is needed by the great augmentation of its business. I therefore respectfully renew the recommendation that I be allowed to write off all, or a large part, of this sum in lieu of depreciation or reduction of capital valuations. Nothing has been done in this way for the past three years."

#### New York Chicago & St. Louis RR.

#### (For the year ending December 31, 1892.)

(For the year ending December 31, 1892.) The annual report of Mr. W. K. Vanderbilt, Chairman of the Board, says: "The improvement in the track and struc-tures continues, 125 95 miles of track having been ballasted, 161,196 cross-ties placed in the track and 3,140 tons of new steel rails were laid and new improved fastenings used. Under an equipment trust lease between the Central Trust Company of New York and this company, dated June 20, 1892, the equipment was increased 10 locomotives and 1,000 box cars. Large expenditures have been made during the year upon the equipment, and its condition has been well maintained. As has been stated in former reports, our freight-car equipment is inadequate to handle that traffic, and therefore

it has been necessary to use the cars of other roads and indi-viduals, upon which a mileage charge has to be paid. The necessity of having to use these cars made the balance of hire of cars for the year against us \$433,709. This balance can be largely offset by the purchase of sufficient cars to handle the traffic.

trainc. "The earnings of the year were 6,467,165, being 296,076more than the previous year, and the largest amount the road has yet earned in any year. This was caused entirely by an increased volume of business, the rate per ton per mile and the rate per passenger per mile being less than the previous year. In the former the rate was '534 cent, a decrease of '007 cent; in the latter the rate was 1:45 cents, a decrease of '19 cent." \* \*

'All expenditures for improvements and additions to the "All expenditures for improvements and additions to the property have been charged to the expenses. This includes \$39,305 for new depot at Chicago, \$27,649 for new side tracks, \$2,952 for freight on new box cars and \$840 for right of way. On Sept. 30, 1892, a fire originated in the freight transfer house at Stony Island, Ill., and the loss was a little over \$63,-000, all of which has been charged to expenses. "A dividend of 3 per cent upon the first preferred capital stock, from the net earnings for the calendar year 1892, was declared payable March 1, 1893. Operations, earnings and charges have been as follows, com-piled for the CHRONICLE :

(For the year ending Dec. 31, 1892.)

The report of President C. J. Ives says: "The earnings for the year have been the largest ever made by your property, and advantage has been taken of this to make and pay for many needed improvements. Nine thousand tons of heavy steel rail have been laid on the Main line and Iowa Falls divi-sion. \* \* Extensive improvements and enlargements have steer ran have been late on the main line and row reals divi-sion. \* \* Extensive improvements and enlargements have been made in the yards at Cedar Rapids, 100,000 yards of em-bankment having been put in at a cost of \$13,000, and addi-tional track laid thereon that will hold 400 cars. A new round house of 25 stalls has been erected at a cost of \$34,000, and a new paint shop of 12 stalls for \$15,000, all of which improve-ments mean improvements and to handle the increased business. new paint shop of 12 stalls for \$15,000, all of which improve-ments were imperatively needed to handle the increased busi-ness. The policy of replacing wood with stone and iron in bridges and culverts has been pursued, and a large amount of this work has been done. \* \* There have been added to the equipment during the year 5 locomotives, 6 coaches, 30 furni-ture cars and 1 rotary snow plow. The construction of 45 miles of a line from Forest City, Iowa, to Estherville was ordered at a meeting of your directors of April 6th, and the same was open for business, though not entirely completed, on January 1, 1993. \* \* The increased earnings for the past year have encouraged your directors to commence the payment of dividends, a dividend of 1½ per cent on the capital stock of your company having been declared, and paid on Feb-ruary 1st of this year, and they confidently expect to continue to pay semi-annual dividends at this rate. Statistics of earnings, charges, &c., for three years are com-piled for the CHRONICLE as follows: FISCAL RESULTS.

\* There was received from sale of bonds \$514,000, deducting the \$\$2,985 deficit, leaves \$431,015.

#### GENERAL INVESTMENT NEWS.

Atlanta & Florida.-At Atlanta, G1., May 3, the Atlanta & Florida Railroad was sold at auction, on the petition of the Comptroller-General, for taxes due the State. It was bid in by Judge H. B. Tompkins, representing the Central Trust Company, for the bondholders, who will reorganize the road at once.

**Called Bonds.**—The following bonds have been called for ayment. The numbers may be obtained at the office of the payment. company.

LEHIGH & WILKESBARRE COAL CO.—One-hundred-and sixty-two sterling mortgage bonds of this company will be paid on May 1, prox., on which date interest will cease.

SUNBURY HAZLETON & WILKESBARRE. - Nineteen series "A" bonds will be paid off on May 31.

ST. PAUL MINNEAPOLIS & MANITOBA.—Of the 1st M. sink. fd. 7 p. c. land grant bonds, 160 for \$100 each, 18 for \$500 each and 425 for \$1,000 each have been called for payment July 1.

Id. 7 p. c. iand grant bonds, 100 for \$100 each, 18 for \$300 each and 425 for \$1,000 each have been called for payment July 1.
Canadian Pacific.—At Montreal, May 10, the annual meeting of the shareholders of the Canadian Pacific Railway Company was held, President Van Hørne in the chair. The attendance of shareholders was small. The annual report will be given in the CHRONICLE probably next week.
The most important feature of the meeting was the adoption of a resolution by the shareholders authorizing the directors to issue preferred stock in addition to the capital stock now outstanding, under powers given to the company by an act passed at the last session of the Canadian Parliament. The following were elected directors:
Sir Donald Smith, William C. Van Horne, Richard B. Angus, Montreal; Edmund B. Osler, Toronto; Sanford Fleming, C. E., Ottawa; Lieutenant-Governor George A. Kirkpatrick, Toronto; General Samuel Thomas, New York; George R. Harris, Blake Brothers, Boston; Richard J. Cross, of Morton Bliss & Co., New York; Wilmot D. Matthews, Toronto; Donald McInnes, Hamilton; Thomas G. Shaughnessy, Montreal.
Mr. Van Horne was re-elected President.

Chicago & Northwestern.—At the annual meeting in Chi-cago on June 1 action will be taken upon the matter of formally merging with this company the Milwaukee Lake Shore & Western Railway Company, the capital stock of which has been acquired by the Chicago & Northwestern Railway Company.

way Company. Cleveland Cincinnati Chicago & St. Louis.—At Cin-cinnati, May 10, the meeting of stockholders was held. More than 200,000 shares of common stock and 75,000 of preferred stock were represented, which makes up three-fourths of the issue. The vote was practically unanimous upon both propositions before the meeting. The chief one was to issue a new fifty-million-dollar mortgage and bonds. Five millions of the bonds, bearing 4 per cent interest, are to be sold at the pleasure of the directors, to be used for double track and equipment; \$29,000,000 to be reserved to retire out-standing bonds now secured by mortgage on portions of the property, and the other \$16,000,000 to be used only after 1894 at the rate of \$1,000,000 a year for double track, equipment and construction purposes. and construction purposes.

The other proposition, which was also voted upon affirm-atively, was to give authority to the directors to extend the line of the Big Four to the cities of Jeffersonville and New Albany, Ind., and Louisville, Ky., or to one or more of them, by constructing new lines or by traffic arrangement with ex-iming or heading or burghesing one with existing companies or leasing or purchasing lines now built.

General Electric .- To give a definite reply to the false reports circulated to injure this company, one of the directors wrote to the President, Mr. C. A. Coffin, in Boston, as follows:

wrote to the President, Mr. C. A. Coffin, in Boston, as follows: DEAR SIR—The stories about the General Electric Company's bad financial condition and poor business still continue. Please answer categorically each of the following questions, which will suggest to you the rumors now current, viz: First—Has the company at any time this year been disturbed in any of its loans or been in any instance refused such accommodation as it has desired, or in any instance failed to meet all obligations promptly? Second—Has it sought any unusual accommodation during the past three months ? Third-Do the company and the sub companies owe more money to-day than on Jan. 31, 1893 ? Fourth—Do you contemplate issuing any additional stock or bonds of the General Electric Company, or of any of its controlled compa-nies?

of the General Electric Company, or of any of its controlled compa-nies? Fifth—Is the company in perfectly easy financial condition, and is there likely to be any change in this respect ? Sixth—Do you know of any reason, financial or otherwise, why stock of the General Electric Company cannot be safely and strongly recom-mended as a perfectly safe and sound S per cent investment, or why its future should not be at least as prosperous as its annual report shows its past to have been?

Mr. Coffia answered these inquiries very positively as fol-

Mr. Coffin answered these inquires the first second second

Very trily yours, (Signed) C. A. COFFIN. The following statement for publication was also previously furnished by the General Electric Company in New York: "The announcement that this company is going to be reor-ganized, or needs any reorganization, is absolutely false. The announcement that it has a heavy and pressing floating debt: that it is going to issue, or contemplates issuing any additional securities; is likewise absolutely false. The announcement that the company guarantees any bonds, or has made sales payable in stocks or bonds, is likewise absolutely false. Of the contracts now on its books, over 80 per cent are for cash, and the remainder, less than 20 per cent, are for well secured notes. The company has been, and is, in a perfectly sound and easy financial condition, and, both as to its finances and its earning capacity, has never been in as good shape as to-day. Its obligations, and those of its underlying companies, have been decreased by more than \$3,000,000 since the annual state-ment at the close of the fiscal year. Holders of the stock of the company may hold their investment with perfect safety, so far as its intrinsic value is concerned. so far as its intrinsic value is concerned.

Kansas City Wyandotte & Northwestern.-This road is advertised to be sold in Kansas City, June 12, under the fore-closure decree granted June 18, 1891, in the U.S. Circuit Court of Kansas.

Mechanical Rubber Co.—This company, which was incor-porated under the laws of New Jersey, but transacts business chiefly in the West, has issued a mortgage of \$2,500,000 to trustees for the bondholders. All the machinery, letters patent, trade marks and other property of the company in Cleveland, O., and Chicago, are covered by the mortgage.

Minneapolis & St. Louis.—The stockholders' reorganiza-tion committee of this road is considering a plan of reorgan-ization which may be agreed to very soon. The proceedings in court at Minneapolis for a decree of

The proceedings in court at Minneapolis for a decree of foreclosure on the equipment bonds, have been brought to a close, and Judge Lochran, having decided the case, the form of the decree is at this time the only matter pending. By the terms of the decision the equipment is ordered to be sold. The railroad company has one year, however, in which to tender the amount due and discharge the amount of the lien upon the equipment covered by the bonds in question. The effect of this action will be to expedite all matters concerning the reorganization. The Minneapolis & St. Louis is now controlled by an independent board of directors in connection with the present receiver, who was elected President by the new board. The action brought by the Central Trust Company on the so-called consolidated mortgage is for the purpose of expediting the proceedings at hand. This mortgage is of a very small issue, and is in fact only a collateral for bonds of the same amount issued under the equipment series and held by the amount issued under the equipment series and held by the public at large.

public at large. The contention of the Minneapolis & St. Louis Company was that the lien of the equipment bond was secondary to the lien created by the prior and underlying mortgages. While a decree of foreclosure under the equipment mortgage would satisfy the claims of the equipment bondholders, a decree under the consolidated mortgage would be necessary to give a good title to a purchaser of the road, inasmuch as the consol-idated mortgage acourts the option property incluing the consolidated mortgage covers the entire property, including the equip-ment, improvements and additions, whereas the equipment mortgage would only be a lien upon equipments, and such =

other additions as were created by the avails of the sale of that special issue. The general purpose of the stockholders' reorganization committee is to bid in the property in the in-terest of the stockholders and pay off the equipment bonds, as well as all the past-due obligations, and by a reorganiza-tion place the road in a position where it will pay all interest charges, and devote the surplus of net earnings to the pre-formed totals of which there is \$4 000 000 outstanding. ferred stock, of which there is \$4,000,000 outstanding.

National Cordage Company.—No statement regarding this company's financial affairs has yet been made and at the com pany's offices in Front Street it was said that work on a state-ment was going on, and would result in the production of a voluminous document, which in turn would have to be brought down to reasonable size. Four or five days would probably be required to prepare the statement for use, and until that was done the work of reorganization could not be undertaken. undertaken.

undertaken. -Mr. John Good is reported as saying that the first propo-sition he would make for the reorganization of the National Cordage Company is to advance prices to 11 cents on Manila and 9 cents/on Sisal. He says the chief cause of failure was manufacturing below cost since the John Good contract was broken. The latter was to have \$200,000 a year for stoppage of works, and the National Cordage had an option upon the company's patents for \$7,000,000. -In Kansas City, May 10, William Deering & Co., paper manufacturers of Chicago, through their attorneys, levied at-tachment upon 1,250,000 pounds of binding twine, the prop-erty of the National Cordage Company. The twine is in the possession of the Kansas City branch of the concern. It was attached by the Deerings to secure a debt of \$100,000.

New York & New England.—The foreclosure sale of the Curtis wharf property in Boston, owned by the New York & New England Railroad is now being advertised, but this is simply a technical procedure for getting rid of existing mortgages and the issuance in the place thereof of terminal bands. bonds

New York Susquehanna & Western.—This company has issued a mortgage for \$2,000,000 to the United States Trust Company, covering its terminal, including the Palisade Tuncel, which was recently acquired by the absorption of the Hudson River Railroad & Terminal Company. The mortgage was filed in the Hudson County Register's office. The bonds, which are known as first mortgage terminal bonds, are for fifty years at five per cent.

Northern Pacific.—Referring to the rumors current in Wall Street that the Northern Pacific Railroad Company would not meet its interest due on June 1, President Oakes issued an official announcement that the interest on all its obligations due at that date would be promptly paid. In reference to the indebtedness of the company in the form of time loans the bulk of which do not mature until October, he stated that they are amply margined, and provision for the payment or funding of the same at maturity is assured. It is said that Mr. Henry Villard is contemplating a col-lateral trust loan of \$15,000,000 for retiring the floating debt of the Northern Pacific, reserving a part of the issue for other expenditures that may be necessary during the next few

expenditures that may be necessary during the next few years.

**Old Colony,**—The statement for the quarter and nine months ending March 31 is as follows :

Philadelphia & Reading.—In Philadelphia, May 10, the Board of Managers of the Philadelphia & Reading Railroad did not consider the rehabilitation plan at its special meeting because of the absence of Mr. George M. Pullman, who holds upward of \$5,000.000 of Reading equipment notes. Mr. Pull-man telegraphed from Chicago that he would arrive the latter part of this week, and then the board will probably meet earling. meet again.

## The Commercial Times.

#### COMMERCIAL EPITOME.

FRIDAY NIGHT, May 12, 1893. Weather conditions have quite generally improved during the week. Exporters have been giving fair attention to wheat in consequence of unpromising reports regarding European crop prospects. Larger receipts of swine and continued poor trade on domestic and foreign orders have the effect to reduce values on cured meats. General business is somewhat greater than one week ago, but lacks spirit in consequence of unusual caution among all classes of buyers. Inland navigation is now fully restored, and the influence has been to modify rail transportation charges in many instances. Speculation in leading articles of merchandise has been very conservative, due in part to timidity over the financial situation.

Lard on the spot has continued in moderate request and prices have further advanced, though at the close there was a slight reaction from top prices at 10.25c, for prime city, 11.15c. for prime Western and 11.50c. for refined for the Continent. The speculation in lard for future delivery in this market has been dull but values have advanced on a small movement of swine at the West; to-day the market weakened with the West, where realizing sales and increase in the receipts of hogs caused a decline. The close was easy.

 11.42 Pork has sold slowly, and quotations have been lowered a trifle, closing at \$20 75@\$21 50 for mess ; \$21@\$22 50 for short clear and \$20 50@\$21 for family. Cutmeats were quiet but steady, closing at 12@121/2c. for pickled bellies, 12@101b3. av., 13<sup>1</sup>/<sub>4</sub>@14c. for pickled hams and 9<sup>3</sup>/<sub>4</sub>@10c. for pickled shoulders. Beef is dull and unchanged at \$7 50@\$8 for extra mess, \$8@\$9 for packet, \$11@\$12 for family and \$16@17 for extra India mess. Beef hams are steady at \$18@\$18 50. Lard extra India mess. Beef hams are steady at \$18@\$18 50. Lard stearine is firmer at 11%@12%c. in hhds. and tcs. Oleo stearine has advanced to 9½c. Tallow is firm and higher at 5%@5½c. Cotton seed oil is in demand and higher, closing firm at 48c. for prime crude and 51c. for prime yellow. Butter is weak and lower at 25@29c. for creamery. Cheese is fairly active and steady at 9¼@12c. for State factory, full cream, old and new. Eggs are depressed at 15@15½c. for Western. Coffee has found greater attention from consumers, which in turn stimulated a demand for invoices and advanced cost. Rio guoted at 16c. for No. 7; good Cucuta, 20%@21c. and interior

authors stimulated a demand for involces and advanced cost. Kio quoted at 16c. for No. 7; good Cucuta, 2034@21c. and interior Padang at 231½@241½c. Contracts for future delivery were not very active but a demand to cover short engagements for near options had a stimulating effect upon all months and is still holding the market fairly steady at the close. The following are the final asking prices:

iron is quiet and unchanged at \$12 75@\$15 50. Refined petroleum is firmer but quiet at 5:20 in bbls., 2.70c in bulk and 5:75c. in cases; crude in bbls. is unchanged, Washing-ton closing quiet at 5c. in bbls and 2:50c. in bulk; naphtha 5½c. Crude certificates have been neglected. Spirits tur-pentine has advanced on stronger advices from the South, closing steady at 31@31½c. Rosins are dull and weak at \$1 27½ @\$1 30 for common and good strained. Wool is moderately active and steady. Hops are dull and barely steady.

FRIDAY NIGHT, May 12, 1893. **THE MOVEMENT OF THE CROP**, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 30,150 bales, against 30,965 bales last week and 46,144 bales the previous week, making the total receipts since the 1st of Sept., 1892, 4,821,536 bales, against 6,845,152 bales for the same period of 1891-2, showing a decrease since Sep. 1, 1892, of 2,023,616 bale<sup>2</sup>.

Speculation in cotton for future delivery at this market has again been confined to comparatively narrow volume. Influencing features of a pronounced character were lacking, and continued apprehension of financial stringency has deterred new investment in cotton certificates. On Saturday the market opened firmer and gained 8 points. On Monday the foreign advices were firmer and our market sympathized to the extent of 5.46 points, but finally closed tamely. On Tuesday reports of rising water on the Mississippi had reached England and caused an advance at Liverpool, which was reflected here to the extent of 10@11 points, a number of small operators on the short side covering their engagements with some freedom; but as soon as they were satisfied values promptly dropped off 5 points. Wednesday's market developed a little special interest in consequence of the receipt of the crop report from the Agricultural Bureau, but the text of the report was looked upon as ambiguous and unsatisfactory and had no decided influence either here or abroad. Yesterday, despite stories circulated of rising water in the lower Mississippi and a break in the levee at one point, our market lost about 1%c, under an effort to realize upon "long" contracts. To-day weakness has continued, with a further decline of 8@9 points in consequence of unsatisfactory advices from Europe, intimating a fear of financial distress. Cotton on the spot has sold slowly without change in cost. Middling uplands 713-16c.

The total sales for forward delivery for the week are 652,300 bales. For immediate delivery the total sales foot up this week 3,339 bales, including 1,350 for export, 1,789 for consumption, — for speculation and 200 on contract. The following are the official quotations for each day of the past week— May 6 to May 12.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph is as follows. The Continental stocks, as well as those for Great Britain and the afloat are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (May 12), we add the item of exports from the United States, including in it the exports of Friday only.

The imports into Continental ports the past week have been 53,000 bales.

The above figures indicate a *decrease* in the cotton in sight to night of 413,528 bales as compared with the same date of 1892, an *increase* of 631,405 bales as compared with the corresponding date of 1891 and an *increase* of 1,332,240 bales as compared with 1890.

AT THE INTERIOR TOWNS the movement-that is the receips for the week, and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1891-92—is set out in detail in the following statement.

\* Louisville figures "net" in both years.

The above totals show that the interior stocks have decreased during the week 16,117 bales and are to-night 21,885 bales less than at the same period last year. The receipts at all the towns have been 90 bales more than the same week last year and since Sept. 1 they are 1,183,342 bales less than for the same time in 1891-92.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.-Below we give closing quotations of middling cotton at South-ern and other principal cotton markets for each day of the week.

Week ending	OLOSIN	IG QUOTAT	IONS FOR	MIDDLING	F COTTON	Un

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1 in 1892-93 are 4.935,983 bales; in 1891-92 were 7,054,194 bales; in 1890-91 were 6,848,218 bales.

2.—That, although the receipts at the outports the past week were 30,150 bales, the actual movement from plantations was only 14,033 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 32,030 bales and for 1891 they were 23,394 bales.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.— We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending May 12 and since Sept. 1 in the last two years are as follows:

	189	2-93.	1891-92.

Decrease during week.

It will be seen by the above that there has come into sight during the week 41,027 bales, against 50,667 bales for the same week of 1892, and that the decrease in amount in sight to-night as compared with last year is 2,441,467 bales.

WEATHER REPORTS BY TELEGRAPH.-Reports to us by tele graph this evening denote that rain has been general at the South during the past week and in most cases has been of benefit, especially in Texas. At a few points, however, the heavy precipitation washed out crops, making replanting necessary. Some correspond nts complain of cool nights. The Mississippi River at Memphis is two feet above the danger line and rising, and some crops outside the levee have been flooded. A break occurred in the levee at Lakeport, Ark., on Thursday morning. The outlook in Texas is at present very favorable.

Galveston, Texas.-Strike a line southward along the one Gaiveston, Texas.—Strike a line southward along the one hundredth meridian to the town of San Angelo and thence southeast to Galveston—all the country east of said line has had more than two inches of rain this week, greatly improv-ing crop prospects, except where there has been too much rain, of which there are fears in a few spots. All the rest of the cotton region of Texas has had one inch of rain and plant-ing is now progressing rapidly. It must be kept in mind, however, that the rainfall for the whole State of Texas is still three inches short of the normal unceripitation since January three inches short of the normal precipitation since January first. There has been rain here on three days during the week, the rainfall reaching eighty-one hundredths of an inch. The thermometer has averaged 75, the highest being 80 and the lowest 76

lowest 76. Palestine, Texas.—We have had enough rain for a while, and crops look flattering. There have been hard but bene-ficial rains on three days of the week, the rainfall reaching two inches and sixty-four hundredths. The thermometer has averaged 74, ranging from 60 to 88. Huntsville, Texas.—It has rained tremendously on six days of the week, doing much good, but there has been rather too much rain, washing hill-sides, overflowing creek bottoms and stopping work. Nevertheless with fair weather prospects are excellent. The precipitation reached four inches and twelve hundredths. The thermometer has ranged from 54 to 90, averaging 72.

hundreaus. The inclusion of the seen effectually broken Dallas, Jewas.—The drought has been effectually broken everywhere throughout the whole State of Texas and crops of everywhere throughout promise of best results. In northwesteverywhere throughout the whole State of Texas and crops of all sorts now give good promise of best results. In northwest-ern and western Texas cotton planting is now progressing rapidly. In all the southern half of the State corn is tassel-ing and silking, and the crop will be large even should there not be another drop of rain. A great deal of cotton has already been chopped to a stand and for this early date is as promising as possible. Of course there is the usual complaint about cool nights, poor stands, sickly growth, etc., which amounts to nothing. The plant looks as well as it ever does at this early period. I can state from my own observation this week over a large portion of northwestern and central Texas that the increased acrease is larger than generally esti-Texas that the increased acreage is larger than generally es mated, but I am unable as yet to hazard an estimate. We have had splendid showers on five days of the week, just as wanted, the rainfall reaching two inches and seventy-four hundredths of an inch. Average thermometer 63, highest 88, lowest 59.

San Antonio, Texas.—We have had fine showers on two days of the past week, the rainfall being fifty-one hundredths of an inch. The thermometer has averaged 77, the highest being 92 and the lowest 62.

Luing, Texas.—There never have been better prospects for crops of all sorts. It has been showery on four days of the week, to the extent of thirteen hundredths of an inch. The thermometer has averaged 75, ranging from 60 to 90.

**Columbia, Texas.**—We have had enough rain for a while, Corn, cotton and sugar cane are all thriving as well as possi-ble. Stands are good and fields clean. We have had rain on two days of the week, the precipitation reaching forty-nine hundredths of an inch. The thermometer has ranged from 64

to 88, averaging 77. *Cuero, Texas.*—There is a splendid outlook for both corn and cotton. Stands of both are good, fields are clean and work well up. The corn crop is assured even if we have no more well up. There is a splendy abundant. There have rain, and roasting ears are already abundant. been fine showers on three days of the week, the precipitation reaching one inch and sixty-four hundredths—enough for the present. Average thermometer 72, highest 90 and lowest 54.

present. Average thermometer 72, highest 90 and lowest 54. Brenham, Texas.—Crops are very promising, but no more rain will be needed for a time. We have had hard but wel-come rain on five days of the past week, the rainfall reaching two inches and thirty-eight hundredths. The thermometer has averaged 77, the highest being 90, and the lowest 64. Belton, Texas.—Cotton planting will soon be finished. We have had showers on three days during the week, to the ex-tent of forty-three hundredths of an inch. The thermometer has averaged 66, ranging from 48 to 84. Fort Worth, Texas.—All the Panhundle and all dry west-ern Texas have had splendid rains this week, infu-ing new life into everything. The transformation is like magic. There have been hard but welco ne and beneficial rairs here on five days of the week, the rainfall reaching two inches and seventy-four hundredths. The thermometer has range 1 from 50 to 86, averaging 68.

So, averaging 68. Weatherford, Texas.—The long drought is at last broken. Corn looks well everywhere and cotton planting is finishing off with the best of promise. We have had very hard rain on two days of the week, but none too much, the rainfall being three inches and twenty-nine hundredths. Average thermometer 64, highest 90 and lowest 44. New Orlegge, Louisiang, we have had rain on one day

New Orleans, Louisiana .- We have had rain on one day

during the week, to the extent of fifty-eight hundredths of an inch. The thermometer has averaged 75. *Shreveport, Louisiana.*—Crops are all very backward and the stand of cotton is not so gool as at this time last year. Rain has done slight damage and delayed work. It has rained on three days, the precipitation reaching two inches and thirty-four bundredths. The thermometer has averaged 73, ranging from 61 to 84.

Columbus, Mississippi.—The weather is now clear and cool. Rainfall for the week one inch and sixty-two hundredths on three days. Average thermometer 71, highest 90 and lowest 54.

Leland, Mississippi.-Telegram not received.

Little Rock, Arkansas.—Another week of excessive moisture has just passed, leaving all streams full and farms covered with rain-water, if not otherwise overflowed. Rain has fallen on four days during the week, to the extent of two inches and thirty-seven hundredths. The thermometer has averaged 68,

thirty-seven hundredns. The thermometer has averaged os, ranging from 57 to 82. *Betena, Arkansas.*—Corn looks fine, but cotton does not have as good an appearance as last week. Indications are that the river will overflow all lands on the west side down to the Red River. A break occurred in the levee at Lakeport, Ark., on Thursday morning. The water from the break, it is stated, will flow into the Black River and Tensas Basin, and as these streams are low they may be able to carry off the water stated, will how finds the black lifter and rensas Basin, and as these streams are low they may be able to carry off the water of the crevasse. It has rained on three days of the week, the precipitation having been one inch and forty-two hundredths. The thermometer has ranged from 59 to 81, averaging 69. *Memphis, Tennessee.*—The river is thirty-five feet on the gauge, or two feet above the danger line, and rising. It will probable come to a stand by Sundar Considerable meltionted

probably come to a stand by Sunday. Considerable cultivated land outside the levees is under water and is not likely to be re-planted in cotton this year. Rain has fallen on three days of the week to the extent of sixty-nine hundredths of an inch.

of the week to the extent of sixty-nine hundreaths of an inch. Hail and strong wind accompanied the rain on one day. Average thermometer 68.3, highest 83.9 and lowest 56. Nashville, Tennessee.—Telegram not received. Mobile, Alabama.—We have had heavy and general rain on five days of the week, the rainfall reaching two inches and twelve hundredths. The week closes clear and favorable. The crop is in fair condition and developing promisingly. Overflows along creeks and lower rivers will necessitate some replanting. Seed is scarce but sufficient. The thermometer has averaged 70 ranging from 58 to 82.

Seed is scarce but sufficient. The thermometer has averaged 70, ranging from 58 to 82. *Montgomery, Alabama.*—We had a very heavy flooding rain on Monday, badly washing fields. Altogether we had rain on three days in the early part of the week, the rainfall being two inches and forty-three hundredths. The rivers are fall-ing rapidly and no overflow is anticipated in this section. The weather since Wednesday has been clear but rather and the pickt. The there were the range form fit to 70. cool at night. The thermometer has ranged from 61 to 79, averaging 70.

Selma, Alabama .- The weather is now fair but lands are

Selma, Alabama.—The weather is now fair but lands are still too wet to work. It has raised on two days of the week, the precipitation reaching four inchest and twenty-three hun-dredths. Average thermometer 73, highest 90 and lowest 56. Auburn, Alabama.—Crops look promising, but excessive rain interferes with cultivation. Pears and apples have been attacked by blight and peach trees are shedding fruit badly. It has raised during the week, to the extent of one inch and fifty-five hundredths. The thermometer has averaged 66.4, the highest being 83 and the lowest 49.

fifty-five hundredths. The thermometer has averaged 66'4, the highest being 83 and the lowest 49. *Madison, Florida.*—Stands are good generally, and very little replanting has had to be done. Most farmers are now chopping out. It has rained on two days of the week, the precipitation reaching ninety-five hundredths of an inch. The thermometer has averaged 70, ranging from 56 to 82. *Columbus, Georgia.*—There has been rain on one day of the week, the rainfall reaching seventy-eight hundredths of an inch. The thermometer has ranged from 59 to 83, averag-ing 69.

ing 69.

Savannah, Georgia.—There has been rain on three days of the past week to the extent of forty-six hundredths of an inch. Weather cool and unseasonable. Average thermometer 67, highest 88 and lowest 56.

Augusta, Georgia.—Stands obtained are doing well, but replanting is necessary at a number of points where the plant was killed by cold winds. We have had light rain on three  $d_{4ys}$  of the week, to the extent of sixty-two hundredths of an inch. The thermometer has averaged 65, the highest

three days of the week, to the extent of sixty-two hundredths of an inch. The thermometer has averaged 65, the highest being 86 and the lowest 52. *Charleston, South Carolina.*—The week's rainfall has been seventy-three hundredths of an inch, on three days. The the mometer has averaged 67, ranging from 56 to 85. *Souceburg, South Carolina.*—The weather has been rather cool at night, but crops are doing well. Stands of cotton are good. There has been rain on two days of the week, to the extent of sixty-one hundredths of an inch. The thermometer has ranged from 49 to 80, averaging 63. *Wilson, North Carolina.*—Telegram not received. The following statement we have also received by telegraph

The following statement we have also received by telegraph showing the height of the rivers at the points named at 3 vclock May 11, 1893, and May 12, 1892.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The receipts and nipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to May 11. BOMDAY DECEMPTS AND SHIDNENTS FOR FOUR VEARS

	Shipm	ents thi	s week.	Shipm	ents since	Receipts.		
Year	Great Brit'n.	Conti- nent.	Total.	Great Britain	Oonti- nent.	Total.	This Week.	Since Sept. 1
92-3 91-2 90-1 9-90	3,000 5,000	27,000 48,000	34,000 30,000 53,000 71,000	44,000 78,000	555,000 519,000 695,000 886,000	563,000	88,000 72,000	1,263,00 1,243,00 1,632,00 1,815,00

According to the foregoing Bombay appears to show an *increase* compared with last year in the week's receipts o 2,000 bales and an *increase* in shipments of 4,000 bales, and the shipments since Sept. 1 show an *increase* of 24,000 bales. The movement at Calcutta, Madras, and other India ports for the last reported week and since the 1st of September, for two years, has been as follows. "Other ports" cover Ceylon Tuticorin, Kurrachee and Coconada.

BUNCE BUNCE	Shipme	nts for th	e week.	Shipments since Sept. 1.			
BURB RARE SW	Great Britain.	Oonti- nent.	Total.	Great Britain.	Continent.	Tota	
Oalcutta- 1892-93 1891-92		3,000	3,000	9,000 8,000	28,000 28,000	37,000 36,000	
1892-93 1891-92 All others-				10,000 17,000	6,000 12,000	16,000 29,000	
1892-93 1891-92		2,000	2,000	21,000 25,000	30,000 48,000	51,000 73,000	
Total all- 1892-93 1891-92		2,000	2,000	40,000 50,000	64,000 88,000	104 000	

The above totals for the week show that the movement from the ports other than Bombay is 1,000 bales *less* than the same week last year. For the whole of India, therefore, the total shipments since September 1, 1892, and for the corresponding periods of the two previous years, are as follows:

MAY REPORT OF THE AGRICULTURAL BUREAU.-Under date of May 10 the Agricultural Bureau at Washington issued the following respecting cotton:

following respecting cotton: The cotton report to the Department of Agriculture for May relates to the progress of cotton-planting and contemplated acreage. The proportion of the proposed breadth already planted on the 1st of May was 85.3 per cent, which approaches very closely the area usually planted at that date, which is estimated at 86 per cent. The return estimates for the several States are as follows: Virginia 11, North Car-olina 85, South Carolina 90, Georgia 92, Florida 92, Alabama 93, Mis-sissippi 15, Louisiana 87, Texas 81, Arkansas 71, Tennessee 76. These figures indicate that planting is well up to the average as to time. The only States that are behind in planting are Virginia, where the delay was caused by the cold, backward spring, Texas, caused by extensive drought and backward spring, and Ar-kansas and Tennessee, where extensive rainfall and cold weather retarded operations. In some districts correspondents report

drouth, while in others the returns show the retarding causes to be frost and excessive rain. Germination has been slow and the growth of plant backward. Some indications have been given as to the con-templated acreage as compared with that of last year, which was con-siderably below the average for a series of years, but they are of an uncertain character, and therefore it as impossible to base any satis-factory predictions thereon, and the figures relating thereto are only given to indicate what the correspondents believed to be the intention as to acreage. The reported increase averages 4p per cent. The per-centages by States are as follows: Virginia 123, North Carolina 116, South Carolina 106, Georgia 103, Florida 116, Alabama 102, Missis-sipi 98, Louisiana 95, Texas 100, Arkansas 98 and Tennessee 100. There will be less replanting than usual, owing to the great scaroity of seed. Estimate of acreage will be made on the 1st of June as usual.

The proportion of the crop planted May 1 this year in comparison with the four previous years, and also with an average year, as given in a previous report of the Agricultural Bureau, is as follows:

PROPORTION OF CROP PLANTED.

STATES.	Prop	Proportion Planted				
dound Andrews and	1893.	1892.	1891.	1890.	1889.	May 1, Av'ge Year.

Not given.

FALL RIVER MILL DIVIDENDS .- In our editorial columns to-day will be found an article showing the results of operations of Fall River mills during the second quarter and first half of 1893.

JUTE BUTTS, BAGGING, &C .- There has been only a moderate business in jute bagging the past week. Quotations have been maintained, however, and the close to-night is at  $4\frac{1}{3}$ c. for  $1\frac{3}{4}$  lbs., 5c. for 2 lbs. and  $5\frac{1}{2}$ c. for standard grades. The volume of business in jute butts has been light at former prices, viz.,  $1\frac{1}{6}$ c. for paper grades and  $1\frac{3}{4}$ c. for bagging quality.

DOMESTIC EXPORTS OF COTTON MANUFACTURES.—Through the courtesy of Mr. S. G. Brock, Chief of the Bureau of Statistics, we have received this week a statement showing the exports of domestic cotton manufactures for February and for the nine months ended Mch. 31, 1893, with like figures for the corresponding periods of the previous year, and give them helow:

EAST INDIA CROP .- The following is from the Bombay

EAST INDIA CROP.—The following is from the Bombay Company's cotton report, dated April 8: Receipts from Dhollera districts have been large, and it is satisfac-tory to report that the quality is up to the expectations formed. Broach, too, has been in good supply. Arrivals of good quality have been received from the Dharwar districts. Clearances of cotton during the last fortnight have been on a fair scale. The local mills have not been buying to any large extent, and the demand from Japan has fallen off slightly. It is reported that the Japan mills are likely to take a con-siderable quantity of East Indian cotton before the monsoon.

MEMPHIS DISTRICT CROP REPORT .- The regular monthly

MEMPHIS DISTRICT CROP REPORT.—The regular monthly otton report for the Memphis district was issued by Messrs. Hill, Fontaine & Co. on Friday, May 5, as follows: The weather during the month was in the main unfavorable. The shad been made in planting otton, when general rains interfered, which were followed by cold weather and killing fosts from April 20 to 26, which did material damage to the young plant that was just beginning to sprout, and of our 356 response, 282 report injury from these causes and replanting made necessary. The acreage already planted and to be planted in cotton shows an average in-crease of 34 per cent for the district. Alabama is the only State that reports a favorable increase, the estimate being given at 13 per cent. Arkansas reports an increase of 24, Tennessee has the same acreage as last year, while Mississippi strom 5 to 50 per cent of what had been planted. Two hundred and the used in replanting where made necessary. The number of 24, Tennessee, thas the same acreage as last year, while Mississippi strom 5 to 50 per cent of what had been planted. Two hundred and that will be used in replanting where made necessary. The acreage devoted to corn shows an increase of a unferior cuality that will be used in replanting where made necessary. The acreage district, divided by States as follows: Tennessee 5 per cent for the district, divided by States as follows: Tennessee 5 per cent increase, Alabama 23 per cent decrease. Takor, as a rule, is reported in ample supply and working well, al-hough forty-four report ascarcity offield hands. The heavy and continu-tor far and the high waters of the Mississippi Kieer and its ribu-taries, and which have already overflowed may acres of land in the Arkansas River Valley and threatens serious damage to the bottom ands in the valley to the south of Memphis, and which, if to cours, will greatly reduce the acreage from what is now reported. COMPARATIVE PORT RECEIPTS AND DALLY CROP MOVEMENT. -A comparison of the port movement by weeks is not

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT. -A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The monthly movements since September 1, 1892, and in previous years have here as follows: previous years, have been as follows:

Monthly		Year Beginning September 1.										
Receipts.	1892	1891.	1890.	1889.	1888.	1887.

receipts April 30. 94:35 93:79 96:94 97.41

This statement shows that up to April 30 the receipts at the ports this year were 1,934,516 bales less than in 1891-92 and 1,790,307 bales less than at the same time in 1890-91. By adding to the totals to April 30 the daily receipts since that time we shall be able to reach an exact comparison of the movement for the different years.

This statement shows that the receipts since Sept. 1 up to to-night are now 2,012,435 bales less than they were to the same day of the month in 1892 and 1,818,784 bales less than they were to the same day of the month in 1891. We add to the table the percentages of total port receipts which had been received to May 12 in each of the years named.

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have reached 58,721 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

### BREADSTUFFS.

FRIDAY, May 12, 1893.

There was a brisk business in the market for wheat flour during the fore part of the week and prices were advanced 10 @15c. per bbl. in sympathy with a sharp rise in wheat. The demand was mainly from jobbers, and owing to the limited aupply of low grades was confined principally to spring patents, thus enabling holders to rid themselves of their sur-plus stocks. There was also some export demand in spring bakers', but, as a rule, shippers were debarred from the mar-ket, as the advance put prices above their limits; but later the market became quiet, and yesterday values were lowered 5c. @10c. in consequence of a decided break in the price of the grain. There has been a fair trade in rye flour and prices have advanced about 10c. per bbl. Corn meal has sold moder-ately well at an advance of 5c. per bbl. To day the market for wheat flour was quiet but steady. The speculation in what has been active, and early in the week prices advanced rapidly on free buying, stimulated by There was a brisk business in the market for wheat flour

The speculation in what has been active, and early in the week prices advanced rapidly on free buying, stimulated by poor crop prospects both at the West and abroad and stronger foreign markets; but later reports of warmer weather West and the fall of needed rains in France started the market downward, and yesterday prices broke badly under reports that several Western financial institutions were embarrassed. In the spot market the advance in prices early in the week had a tendency to check the demand, but nevertheless ship-pers have been moderate purchasers and recent sales include No. 2 red winter at ½c. under July, f.o.b., afloat, to arrive, and No. 2 hard winter at 1c. under July delivered. To-day the market opened easier under favorable crop advices from the West and reports of financial difficulties in London, but later strengthened on reports from France stating that the later strengthened on reports from France stating that the recent rains were not heavy enough to be beneficial. The spot market was firm but quiet. The sales included No. 2 hard winter 11½c. under July delivered, to arrive.

Indian corn futures have been moderately active but at de-clining prices under selling by 'longs' to realize profits, prompted by a decided improvement in the weather condi-tions West, thus enabling farmers to proceed with their plant-ing. The spot market has been comparatively firm, owing to scarcity of supplies. The sales yesterday included No. 2 mixed at  $51\frac{1}{3}$  @ $51\frac{1}{3}$ c. in elevator and  $52\frac{1}{3}$ @ $52\frac{1}{3}$ c. delivered. To-day the market was quiet and without change or feature of im-portance. The spot market was firm and higher owing to absence of stock. The sales included No. 2 mixed at  $51\frac{1}{3}$ @52c. in elevator and  $52\frac{1}{3}$ @53c. delivered; steamer mixed at 51c. in elevator and No. 2 white at 53c. delivered. DALLY CLOSING PRICES of NO. 2 MIXED CORN. Indian corn futures have been moderately active but at de-

Oats have declined slightly under reports of better crop prospects West in consequence of favorable weather. A ma-terial decline in prices was checked, however, by an export demand, shippers taking during the past week ab ut 350,000 bushels. To-day the market was quiet and unchanged.

VOL. LVI.

State 2-rowed..... @ State 6-rowed..... @ AGRICULTURAL DEPARTMENT REPORT ON CEREALS, &C .-The report of the Department of Agriculture showing condition of the cereal crops on May 1 was issued on the 1 10th inst., and is as follows :

In the triplet of the correct crops on May 1 was issued on the 10th inst., and is as follows:
The May returns of the Department of Agriculture on the condition of winter wheat shows a reduction of 2.1 moints from the April average, being 75.3 against 77.4 last month and 84.0 in May, 1892. The averages of the principal winter-wheat States are: Ohio, 83; Michigan, 71; Indiana, 79; Illinois, 62; Missouri, 72; Kansas, 51. The average of these six States is 63.3 against 74.2 in April, being a decline of 5.9 points since the first of last month. It is 85 in New York and Pennsylvania against 87 and 88 respectively last month; 97 in Maryland and 85 in Virginia. In the Southern States the averages range from 74 in Texas to 96 in North Carolina. The conditions have been favorable to the growth and development of wheat in the New England, Southern and Pacifie States.
In California the condition has advanced ten points, while in the principal wheat producing States there has been considerable deterior ation. In Kansas, Colorado and Nebraska, where planting was backward and germination slow, owing to continued drouth and much of the plant being winter killed, large areas have been plowed up and devoted to other crops. The same has been done in Missouri. Indiana and fillinois, where the plant was badly winter killed and greatly damaed since by the continued wet weather. In Michigan the severity of the winter greatly damaged the plant, and the woather since has been too cold and backward to admit of recuperation. Damage from Hessian fly in some of the counties of the laster State, Indiana and Ohio is reported, and from the ohinch bug in Kansas. In some of the principal wheat site weather. In Michigan the severity of the winter greatly damaged the uplands is reported in good condition, while on lower and undrained lands the conditions are poor and much of the crop destroyed by drowning.
Winter rye, like wheat, has suffered a decline in condition since last month, its average for My 1 being S

against an average of 77 per cent for a series of years. The movement of breadstuffs to market is indicated in the statement below, prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending May 6, 1893, and since August 1, for each of the last three years:

#### THE DRY GOODS TRADE.

NEW YORK, Friday, P. M., May 12, 1893. The great improvement in weather conditions has been the most important feature of the week, as it has started up a decidedly good demand in the retail trade, to whose arrested distribution for so long a time the inactivity in other branches has been greatly due. Towards the close of the week the jobbers, too, felt some effect of the change, more buyers being around and the demand more general than for some time past. It is of course too early for it to have produced any material change at first hands otherwise than in a sentimental lightening of tone. Business in commission circles has in fact again ruled dull in all directions. Occasionally orders come to hand for respectable bills of goods, but are not frequent enough to suggest any well-defined departure by buyers from the cautious policy pursued by them nor to raise the aggregate business to a level with average dimensions for the time of year. The market generally cannot be reported any better than a week ago, neither is it any worse; and in view of late experiences a stationary period may be looked upon as something gained. Prices are still irregular, according to the situation of sellers with regard to the production of their mills and the class of goods they handle—a condition which may be expected to exist for some time to come unless there thould be an expansion of buying of quite unlooked-for dimensions.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending May 9 were 2,477 packages, valued at \$159,684, their destination being to the points specified in the table below:

NEW YORK TO MAY 9.	Contraction of the second	1893.	1892.		
MEW TORK TO MAT 5.	Week.	Since Jan. 1.	Week.	Since Jan. 1.

Total	2.477	62,200	11.154	96.009	

\* From New England mill points direct.

The value of the New York exports since January 1 have been \$3,044,001 in 1893 against \$4,540,421 in 1892.

Business in staple domestics has been very quiet. For brown sheetings and drills the export demand continues slow and the home trade are still conservative purchasers. The only change in quotations made public is a reduction of 1/4c. per yard in Lawrence LL 36-inch brown sheetings. In bleached shirtings the sales at first hands have been on a limited scale, but a considerable stock of Lonsdale 4-4 bleached wes cleaned up by a leading jobbing house at 7% c. per yard, agents' quotations being 9c., less 5 per cent. Jobbers are also selling kid-finished cambrics at 41/4c. per yard against agents' nominal quotations of 41/2c. per yard. There is no change to note in colored cottons of any description, a hand-to-mouth business passing. Printed fabrics likewise are much as last reported—easy in tone with a slow movement—and a similar record must be made of ginghams and other fine-woven patterned fabrics. Printing cloths have further given way 1/4c. per yard, to 31/4c. for 64 squares, without improving the demand for them, the market closing easy at the quotation named.

	1999.	1092.	1991.
Stock of Print Cloths-	May 6.	May 7.	May 8.
Held by Providence manufacturers.	58,000	None.	423,000
Fall River manufacturers	77,000	44,000	308.000

FOREIGN DRY GOODS.—For seasonable goods there was a small demand all week and no new feature developed. Business in silks, linens and fine woolen fabrics for the coming season was on a moderate scale at previous prices, a quiet order trade for ribbons and hosiery being noted. In men'swear materials some fair sized orders have been secured for Clay twills next spring, on which prices lower than a year ago have been made by foreign manufacturers.

Importations and Warehouse Withdrawals of Dry Goods. The importations and warehouse withdrawals of dry goods at this port for the week ending May 11, and since Jan. 1, 1893, and for the corresponding periods of last year are as follows:

### VIRGINIA STATE DEBT.

## STATE AND CITY DEPARTMENT.

### TERMS OF SUBSCRIPTION.

Commercial and Financial CHRONICLE contains 40 to 64 pages Published every week.

State and City Supplement of CHRONICLE contains 180 pages published several times each year.

Investors' Supplement of CHRONICLE (a Cyclo pædia of Railroad Securities) contains 160 pages published every other month.

Subscription to CHRONICLE for one year \$10.00, which includes every issue of both SUPPLEMENTS.

### REVIEW OF MUNICIPAL BOND SALES IN APRIL.

That the total amount of new bonds issued and sold in April should be the largest reported for any month so far this year is rather surprising when we have been assured from day to day of the extreme dulness of the market and the lack of demand for a good State or city issue. The two largest issues placed during the month were floated by the city of Philadelphia and the Sunset Irrigation District, California, the amounts being \$2,625,000 and \$1,600,000 respectively. Prices received for the April loan showed a slight falling off in general, although there were some exceptions, notable among which is the sale by a Long Island school district of a small 5 per cent twenty-five-year issue at 117.84.

In the table below we give the prices which were paid for April loans to the amount of \$5,869,788, issued by twenty one municipalities; the aggregate of sales for which no price was reported being \$3,306,000, and the total sales for the month \$9,175,788. In the case of each loan a reference is made to the page of the CHRONICLE where a full account of the sale in question will be found.

The April statement does not include Ogden, Utah, bonds to the amount of \$100,000, which were awarded on April 10th to W. J. Hayes & Sons at 102.7, as the legality of the bonds was subsequently questioned on the ground of there being an over-issue, and the point has not yet been fully decided.

The holders of Virginia securities have been gratified this week to learn that Messrs. S. N. Braithwaite, John Henry Daniel and Hon. Edward J. Phelps, the Commission of Distribution, have at last had their meeting and awarded the new 2.3 per cent century bonds among the several classes of old securities represented by certificates of deposit. The announcement of the award, which was cabled from London last Saturday, and has yet to be verified by mail advices, is as follows:

Fourth class, carrying coupons receivable for taxes, will re-ceive 75 per cent of par value in new bonds. Third class 10-40 bonds will receive 70 per cent of par value in new bonds, with a deduction of \$1 50 per \$100 of principal in new bonds on ac-count of each half-yearly coupon due since July 1, 1890, which has not been deposited with the bonds. Second class, consol bonds, 75 per cent par value in new bonds with a deduction of \$2 50 on each \$100 of principal in new bonds for each coupon due since July 1, 1890, which has not been deposited with the bonds.

bonds with a deduction of \$2 25 on each \$100 of principal in new bonds for each coupon due since July 1, 1890, which has not been deposited with the bonds. First class, which includes the principal of the "old bonds" will receive 60 per cent of par value of two-thirds in new bonds and par value of the remaining one-third in West Vir-ginia certificates. The holders of "Pealer bonds" will receive 60 per cent of their principal in new bonds. For par of two-thirds of interest on old bonds and par of interest on "Pealer bonds" a pro rata distribution will be made of the balance of new bonds to be issued, after pro-viding for distribution according to the above awards. For the remaining one-third of interest on "old" bonds West Vir-ginia certificates will be issued.

The South Carolina Bond Case.—A friendly suit has been brought in the Supreme Court of South Carolina to test the validity of the new State bond issue, amounting to \$5,250,000. The point is raised that the issue creates a new debt, which could not be contracted without a vote of No decision has as yet been reported, but the people the State officials have expressed themselves as confident that the validity of the bonds will be sustained. The entire loan in question was taken this year by a syndicate formed by R. A. Lancaster & Co., of New York, and John L. Williams & Sons, Richmond, Va.

The bonds are 41/2s issued, to retire the "Brown consols," and they carry interest since their date, January 1, 1893. They are exempt from taxation and coupons are tax-receivable in South Carolina. There is a sinking fund for their redemption of \$75,000 per annum, secured by phosphate royalties. The bonds mature January 1, 1933, but are redeemable at the pleasure of the State after twenty years.

**Bond Proposals and Negotiations.**—We have re-ceived through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

Ashtabula, Ohio.—(STATE AND CITY SUPPLEMENT, page 78.) City Clerk A. B. Phillips notifies the CHRONICLE that the 27,900 of street improvement bonds offered for sale on May 1 were sold at a premium of \$1,511 15. The loan bears in-terest at the rate of 6 per cent per annum, payable semi-annually at the office of the City Treasurer, and will become due \$2,700 one year from date of issue and \$2,800 yearly there-after until paid.

Bancroft, Neb.—City Treasurer E. T. Rice notifies the CHRONICLE that the \$7,000 of waterworks bonds recently voted will bear interest at the rate of 6 per cent per annum, payable annually on May 1, in New York City, and that same will mature May 1, 1913, with an option of call after May 1, 1898. The date of sale is not reported. The city has no other debt.

Bellevue, Ohio. —Bids will be received by C. R. Callaghan, village clerk, until May 31, for the purchase of street im-provement bonds to the amount of \$11,000. The bonds will be dated June 1, 1893, will bear interest at the rate of 5 per cent per annum, payable semi-annually, and will become due \$3,500, part yearly, from 1902 to 1905, and \$7,500, part yearly, from 1894 to 1903.

Buffalo, N. Y.-(STATE AND CITY SUPPLEMENT, page 45.)-We have received notice from Comptroller Joseph E. Gavin that on May 23 he will receive proposals for \$75,000 of city refunding bonds. The securities are to be dated June 2, 1893, bear interest at the rate of  $3\frac{1}{2}$  per cent per annum, payable J. & D., and mature June 2, 1913. Both interest and principal will be payable at the office of the City Comptroller in Buffalo or at the Gallat n National Bank in New York City, as the purchaser may elect. The following table shows the prices which have been received by the city for similar securities placed this year and last :

Date	e of	sale.	1	Rate.	Amount.	Time.	Award.
					\$75,000	20 years.	104.589
					95,000	20 years.	103.01

The bonded debt of the city of Buffalo on the first day of May, 1893, less bonds held by the city in sinking funds, was \$11,321,435. The assessed valuation of the taxable property of the city, by the rolls of the year 1892, is \$197,084,780, in-cluding real estate \$183,254,870 and personal property \$13,-829,910.

Covington, Ky.—(STATE AND CITY SUPPLEMENT, page 157.) —The Common Council of Covington will receive bids until May 15 for the purchase of \$148,218 90 bonds, of which amount \$14,821 89 will be redeemed each year from May 18, 1894, to May 18, 1908. Interest will be payable annually at 5 per cent at the city depository.

**Dallas, Tex.**—(STATE AND CITY SUPPLEMENT, page 177.)—It is reported that on May 5 the city of Dallas redeemed \$7,000 of Dallas & Wichita Railroad subsidy bonds, paying 10634 for them.

them. Dayton, Ohio.—(STATE AND CITY SUPPLEMENT, page 80.)— Bids will be received at the office of G. V. Lytle, Clerk of the Board of Education of Dayton, until June 5, for the purchase of \$100,000 of 5 per cent bonds. The bonds will be of the de-nomination of \$1,000 each, bearing date of June 15, 1893, and will be payable \$25,000 on June 15, 1897, and \$25,000 yearly from June 15, 1899 to 1901. Interest will be payable semi-annually on June 15 and December 15 in each year, and both principal and interest will be payable in New York City. The bonds are to be issued for the purpose of erecting and com-pleting a high school building and district school buildings, and purchasing sites therefor. and purchasing sites therefor.

Fast Hampton Union School District, N. Y .-- Bonds of his district to the amount of \$11,500 will be offered for sale at Sag Harbor on May 16.

Fall River, Mass.—(STATE AND CITY SUPPLEMENT, page 24.) —Authority has been granted this city to issue bonds to the amount of \$200,000 for water-works purposes.

Galveston, Tex .- (STATE AND CITY SUPPLEMENT, page 178.) -The city of Galveston is offering for sale \$800,000 of 5 per cent water bonds, maturing in forty years. The securities are a part of the loan of \$1,240,000 authorized in 1891 and known as "Limited Debt Bonds." A city ordinance providing for the issuance, sale and redemption of this loan requires that the bonds be payable in 40 years after the date of their issue and be optional after twenty years, interest to be payable in New York and Galveston. The same ordinance further provides that the proceeds of the sale of this issue shall be used and expended as follows :

\$240,000 for streets. \$50,000 for schools.

\$50,000 for alleys and sidewalks. \$900,000 for water and sewers.

The statement of this city's debt, as given in our Supplement issued two weeks ago, has been corrected to date by Auditor R. H. Furman, and is one of the many hundred new reports which we were unable to publish in this Department between the time of their receipt and the day of sending our Supplement pages to press. An advertisement giving further particulars concerning the sale of securities now being offered will be found elsewhere in this Department.

Gardiner, Me.-The City Council of Gardiner has voted to issue \$25,000 of bonds for sewer purposes.

Glencoe Independent School District, No. 1., Minn.—Bids will be received by the Board of Education of this district, until May 20, for the purchase of 6 per cent coupon bonds not to exceed \$12,000 in amount and to be not less than \$9,000. They will be of the denomination of \$500 each, dated June 1, 1893, and will become due July 1, 1907. Interest will be paid annually on the first day of July in each year and both principal and interest will be payable at the Hanover National

principal and interest will be payable at the Hanover National Bank of New York City. The present bonded and total indebtedness of the district is \$4,000, due Aug. 1, 1895. The assessed valuation as equalized for taxation in 1892 was, real estate \$326,186; personal property \$204,224; total \$530,410.

Goldsboro, N. C.—F. W. Bain, City Clerk, writes us that at an ele tion which took place in Goldsboro on May 2 the prop-osition of issuing \$50,000 of improvement bonds was defeated.

For continuation of proposals see next page.

Kingsley, Iowa.-It is reported that the people of this place have voted in favor of issuing bonds for water works purposes.

Long Island City, N. Y.-(STATE AND CITY SUPPLEMENT, page 49.)-City Treasurer F. W. Bleckwenn notifies the CHRONICLE that on May 9 four bids ranging from 100 to 100'15 were received for \$50.000 of 4½ per cent revenue bonds, dated April 1, 1893, and due April 1, 1903. All of the proposals were rejected, and the loan will be re-advertised at another time. We give below a record of the prices received for bonds recently placed by this city.

Date of sale.	Rate.	Amount.	Time.	Award.
March 28, 1893	412	\$522,500	5 to 20 years.	100.63
February, 1893	419	75,000	10 years.	103.25
November, 1892		20,000	10 years.	101.56
August, 1892	412	10,000	10 years.	104.27
August, 1892	419	10,000	10 years.	104.25
August, 1892	412	30,000	10 years.	104.13

Macon, Ga.—(STATE AND CITY SUPPLEMENT. page 167.)— An election will take place in Macon next month to vote on the proposition of issuing \$200,000 of sewer bonds.

Madison, Wis.—(STATE AND CITY SUPPLEMENT, page 102.)— It is reported that the city of Madison is approaching the diffi-culties experienced by Milwaukee in meeting the demands for The Board of Water Commissioners have resolved to ask for the issuance of \$15,000 of bonds for extensions. It is stated that this amount, together with an authorized issue of school bonds, will bring the city's total bonded indebtedness up to 296,300, or within a little less than \$50,000 of the 5 per cent limit

Milledgeville, Ga.—City Treasurer P. L. Fair writes the CHRONICLE that the sale of bonds which was to take place on May 2 has been deferred until after May 12. The bonds are for \$10,000, dated May 1, 1893, and will become due May 1, 1923. They will be of the denomination of \$500 each, with interest at the rate of 6 per cent per annum, payable semi-annually on May 1 and November 1 of each year.

Millville, Pa.-The citizens of Millville will vote on June 7 on the question of issuing water works bonds to the amount of \$80,000.

Milwaukee, Wis .- (STATE AND CITY SUPPLEMENT, page 102.) -Bonds of this city to the amount of \$250,000 will probably be issued soon for the purpose of building new schools. The following is a list of the purpose and amounts of new loans which have been recommended by the finance committee of the Common Council:

Schools	\$250,000	Streets	\$50.000
Water department	100,000	Bridges	50.000
Parks	50,000	Bay View sewerage dist	25,000
Fire department	. 50,000	Sidewalks	15,000
Viaducts	. 50,000	Police department	25,000

Moscow, Idaho.—(STATE AND CITY SUPPLEMENT, page 134.)— J. W. Lieuallen, City Clerk, writes the CHRONICLE that the election which took place in Moscow on April 24 resulted in favor of issuing the \$25,000 of street paving and \$20,000 of refunding bonds, but that the issue of \$25,000 of sewer bonds was defeated. The loans are to bear 6 per cent interest and to run 20 years. Notice of the sale of these bonds has not yet been given.

Mount Vernon, N. Y. --(STATE AND CITY SUPPLEMENT, page 50).--The Common Council of Mount Vernon will receive proposals until May 23 for the purchase of \$15.000 of assessment bonds. Each bond will be for the sum of \$500, bearing interposals until May 23 for the purchase of \$15,000 of assessment bonds. Each bond will be for the sum of \$500, bearing inter-est at the rate of 5 per cent per annum, payable semi-annually, and both principal and interest will be payable at the Bank of Mount Vernon. The loan will be dated May 23, 1893, and will be payable \$5,000 May 1, 1895, \$5,000 May 1, 1897, and \$5,000 May 1, 1899. The holder of these bonds will have the privilege of having them registered, and same will be delivered on June 1, 1893. They are the third of a series of bonds authorized, and by statute cannot be sold for less than par and accrued interest. interest.

North Dakota.—(STATE AND CITY SUPPLEMENT, page 116.) —Hon. K. J. Nomland, State Treasurer, will receive pro-posals until June 1 for the purchase of \$30,000 of refunding bonds. The loan will bear interest at the rate of 4 per cent per annum, payable semi-annually on January 1, and July 1 of each year at the Chemical National Bank, New York. The bonds will be of the denomination of \$1,000 each, and will run 30 years from date of issue without option. They will be sold

Norwood, Ohio.-W. E. Wichgar, City Clerk, will receive proposals until May 23 for the purchase of \$25,000 of 5 per cent water-works bonds.

Philadelphia, Pa.—(STATE AND CITY SUPPLEMENT, page 69). —At a meeting of the Finance Committee of the Philadelphia Common Council, held this week, the Hicks bill providing for the funding of \$34,000,000 of the city's bonds at a lower rate of interest was called up, but as some of the prominent city officials were not present, the consideration of the bill was postponed until next Monday evening.

**Pinal County, School District No. 4**, Ariz.—Bids will be received by J. M. Ochoa, Clerk of the Board of Supervisors of Pinal County, until July 1, for the purchase of \$6,000 of school district bonds. The bonds will be of the denomination of \$500 each, will bear interest at the rate of 7 per cent per annum, payable annually, and will mature July 1, 1913.

Pittsfield, Mass.—STATE AND CITY SUPPLEMENT, page 29.)— Mr. E. H. Kennedy, City Treasurer of Pittsfield, notifies the CHRONICLE that he will receive proposals until May 25 for \$250,000 of 4 per cent sewer bonds, to be dated June 1, 1893, and to mature at the rate of \$10,000 yearly. Both interest and principal to be payable in gold.

Tacoma, Wash.—(STATE AND CITY SUPPLEMENT, page 149). —Bids will be received by the Sinking Fund Commissioners of Tacoma until June 1 for the purchase of gold coupon bonds of the city to the amount of \$2,150,000, the same to be issued for water and light purposes. The bonds will be of the denomination of \$1,000 each, dated June 1, 1893, will bear interest at the rate of 5 per cent per annum, payable semi-annually in New York, and will become due June 1, 1913. A certified check for 5 per cent of the par value of the number of bonds bid for must be attached to the bid, which amount will be forfeited to the city on failure of the purchaser to take the bonds if allotted to him. The checks of all unsuccessful bidders will be returned to them.

City Treasurer Geo. W. Boggs gives notice that street improvement and sever fund warrants will be redeemed on May 15, 1893, and also general fund warrants on May 20, 1893, on presentation at his office, Tacoma, after which dates interest on same will cease.

Taunton, Mass.—STATE AND CITY SUPPLEMENT, page 31.)— Bonds of this city to the amount of \$16,000, issued for water purposes, were sold on May 3 to W. J. Hayes & Sons. The loan is dated January 1, 1893, bears interest at the rate of 4 per cent per annum and becomes due July 1, 1922. Interest is payable on January 1 and July 1 of each year, and both principal and interest will be payable at the Atlas National Bank, Boston.

Vilas County, Wis.—Bonds of this county to the amount of \$ 5,000, for the purpose of building a court house and jail, have been voted. The loan will bear interest at the rate of 7 per cent per annum, payable in Milwaukee.

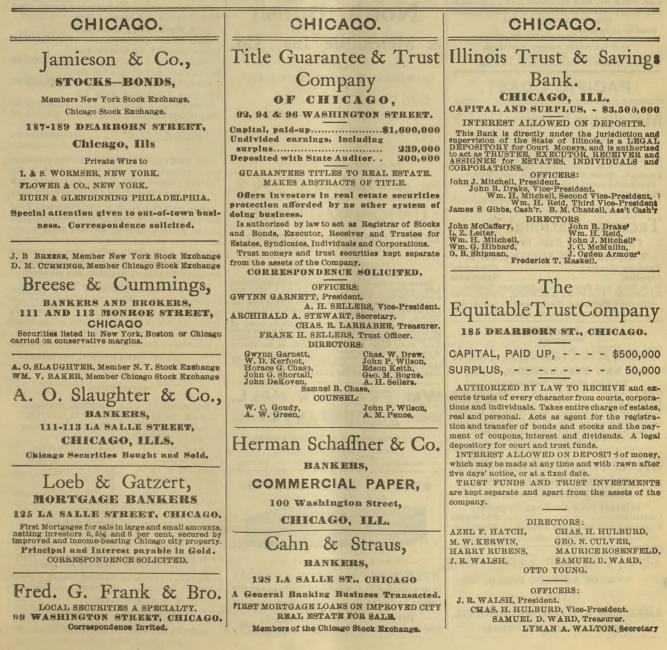

Waco, Texas.—(STATE AND CITY SUPPLEMENT, page 179.)— The Council of Waco is considering the question of issuing sewer bonds to the amount of \$20,000.

Watertown, N. J.—City Chamberlain J. C. Lewis writes the CHRONICLE that on May 8 \$40,000 of Watertown funding bonds were placed with the Jefferson County Savings Bank at par, the bonds to bear interest at 3% per cent per annum, payable semi-annually.

West Lincoln, Ill.—Notice has been given to the holders of 6 per cent bonds of this township, numbers 7, 8 and 9 for \$1,000 each, that the same will be paid at the American Exceange National Bank, New York City, on July 1, 1893.

Westport, Mo.—At a meeting of the Council of Westport recently held an ordinance providing for the issuance of bonds for an electric-light system was defeated.

Wyandotte County, Kan.—(STATE AND CITY SUPPLEMENT, page 130.)—Bonds of this county to the amount of \$13,000 will be issued for the construction of a bridge across the Kaw River, at Bonner Springs.

#### UNION MUTUAL Life Insurance Company, PORTLAND, MAINE. INCORPORATED 1848.

JOHN E. DEWITT, President. JOHN E. DEWITT, President. Taken as a whole the business of the Union Mutual Life Insurance Company for the year 1892 was among the best in the Company's history. ITS INCREASE IN SOME DEPARTMENTS OF ITS BUSINESS WAS LARGER THAN FOR MANY YEAR - PAST. The Company's insurance contracts in point of iberality being unexcelled, coupled with the ines-timable advantages of the Maine Non-Forfeiture Law, have been important factors in producing such satisfactory results. The new Toatine 'I rust Policy as now issued by the Union Mattal is iprobably the best all-round insurance contract in the market.
