CLEARING HOUSE RETURNS.

The following table, made up by telegraph, etc., indicates that the total bank clearings of all the clearing houses of the United States for the week ending to-day, August 12, have been \$789,490,065, against \$929,268,982 last week and \$990,972,905 the corresponding week of last year.

CLEASINGS.	Week Ending August 12.						
Returns by Telegraph.	1893.	1892.	Per Cent.

 The full details of clearings for the week covered by the above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night.

 Our usual detailed figures for the previous week, covering to rearry and the comparative totals in 1892, are given below. The aggregate of exchanges shows a gain of nearly twenty two millions of dollars over the previous week, fifteen millions of which is outside of New York. Contrasted with the corresponding period of 1892, all but seven of the cities record losses, and in the aggregate for the whole country there is a decrease of 15 per cent. The most important percentages of slower, 80'1: Portland, Ore., 76; Memphis, 66'8; Birmingham, 65'8; Sioux City, 63'4; Louisville, 62'9: Helena, 62'8; Milwaukee, 62'2; Lexington, 58'7, and Seattle, 58 per cent. The heaviest gains have been at Duluth, 25'8 per cent, and Binghamton, 19 per cent.

 per cent.

All advertisements with relation to State and City Bonds will likewise be found on the same and following pages.

THE FINANCIAL SITUATION.

Other than the President's Message and the meeting of Congress, which we have remarked upon in a subsequent column, the premium on gold and currency that has prevailed has been the important topic. This feature in the situation we referred to last week when it had developed only very moderate proportions. From that beginning, however, the demand for currency gradually grew more urgent, the premium rising as high even as 5 per cent, disclosing a marked scarcity of currency, not alone in this city but very noticeable at Philadelphia and Boston in the East and at Chicago and other centers in the West. All kinds of currency were in request, including even standard silver dollars. Foreign bankers also report that $1\frac{1}{2}$ to 2 per cent was paid for gold to arrive. Of course, the gold import movement has been affected by these operations, which in turn have raised foreign exchange rates materially, since the premium paid raises the par of exchange and consequently the point at which gold can be imported at a profit. Thursday, however, there were decided indications that the transactions in currency had culminated. On that day the supply was increased by large offerings and the demand slackened. Yesterday the same conditions continued to prevail, and the premium on currency dropped to 11@2 per cent.

Nothing could better illustrate the utter and general loss of confidence than this disappearance of paper money. Every one was satisfied that gold was being hoarded and would go on being hoarded so long as the conditions remained as they were. The uninterrupted and increasing export of that metal and the continuance of the silver bullion purchases which were forcing the outflow would obviously lead to that result. Likewise recent evidence of the truth of the assumption may be found in the national bank returns under the late call of July 12, 1893, which we have been receiving from Comptroller Eckels and for two or three weeks publishing comparative statements of. All the returns thus far received record a very large loss of gold-larger than can be accounted for by the exports and transfers to the Government. So natural and logical an operaation can cause no surprise. But hoarding currency is another affair altogether. No doubt, with the exception of amounts taken by speculators, the withdrawals have been in the main the work of the more ignorant classes, who really have no clear notion of the actual situation. They have read and heard everywhere of the large outflow of gold money and without possessing any distinct idea of the cause for the outflow, the fact has excited their fears and led them to hold on to the currency given them in payment for wages or obtained in other ways, this currency being the only form of money they receive.

Disturbed confidence in the measure of values must always develop after much the same fashion. It first affects the more timid among the better informed, and from that beginning gradually widens until the whole body of men of all degrees of intelligence, each according to his light and opportunities and in his own field,

is led by the same influence to hoard every device bearing the common name of money. Of course when this spirit develops among the less intelligent all discrimination is at an end. Consequently the present situation can be no marvel. It will soon begin to right itself. Indeed, the currency speculation seems to have culminated already, as we have stated above. But until Congress begins to show pretty clearly what is to be the outcome of the repeal bill, it is hardly possible to look for a sufficient return of paper money to the banks to restore the normal currency conditions. In the meantime the large arrivals of gold from Europe must do much to re-establish confidence. The imports this week have been 131 million dollars, and further large amounts are afloat. Our private cable gives the amount withdrawn for the United States from the Bank of England during the week ending Thursday at £1,951,000.

The money market has remained very much as reported last week. On call, money has been loaning at 6 and 2 per cent, averaging about 5 per cent, while renewals have been at 6 per cent; banks and trust companies are not loaning. The supply, however, is abundant, mainly because of an indisposition on the part of capitalists to place their money for fixed periods, and although there is an urgent demand for time contracts the supply is insignificant, notwithstanding liberal commissions are offered for any date from thirty days to four months. Nothing has been done in commercial paper. If those houses who have notes maturing can obtain an extension, that will supply the present need, no new accommodation being asked for. By advancing the rate on renewals of loans the banks have this week had some country loans paid off, but they are not yet in a condition to accommodate their city customers. Clearing House certificates now outstanding are \$37,015,000.

The only feature in Europe this week has been the advance in the Bank of England miminum rate of discount to 4 per cent after the price of gold coin had been moved up to 76 shillings 10 pence per ounce. Yesterday the Bank of Germany also raised its rate, advancing to 5 per cent. The cable reports discounts of sixty to ninety day bank bills in London 41@41 per cent. The open market rate at Paris is $2\frac{1}{2}$ per cent, at Berlin it is 44 per cent, and at Frankfort 43 per cent. According to our special cable from London the Bank of England lost £2,290,708 bullion during the week and held at the close £25,232,459. Our correspondent further advises us that the loss was due to imports from the Continent of £136,000 and from Australia of £100,000, to exports to the United States of £1,951,000, to Canada of £55,000 and to Turkey of £50,000, and to shipments to the interior of Great Britain of £471,000.

Our foreign exchange market has been almost entirely dominated this week by the premium on gold in transit and by the advance in the open market and the official discount rate in London. The premium upon gold enhanced the value of the metal in New York, so as to make possible, if not profitable, the import of gold. This was true although on Thursday rates for sight bills and cable transfers were not only above the normal gold-importing point, but very near that at which gold has been exported. The premium here on gold ranged, as already stated, from $1\frac{1}{2}$ to 2 per cent after Tuesday, the average being equal to about 7 to 81 cents per pound sterling, but on Thursday afternoon there were indications of a smaller premium, and yesterday afternoon the best bid for gold was one half of one per cent, with offerings at one per cent.

The arrivals of gold during the week have been on the Umbria. \$1,530,000; the two Havana steamers. \$296,000; by the Saale, \$580,000; by the Majestic, \$1,780,000 ; by the Spree, \$4,248,750 ; by the Normannia, \$4,500,000 ; and from Canada, \$600,000-making \$13,534,750. Posted rates for sterling have fluctuated widely from day to day, and yesterday with the drop in the premium on gold the market became utterly demoralized. Perhaps the best indication of the course of rates during the week is furnished by the following, showing the daily changes by leading drawers.

The market closed unsettled and weak yesterday, with rates for actual business 4 80 to 4 81 for sixtydays, 4 85 to 4 851 for sight, 4 86 to 4 861 for cable transfers, 4 79 to 4 791 for prime and 4 781 to 4 79 for documentary commercial bills.

The report of the Agricultural Bureau at Washington issued Thursday afternoon shows a pretty general decline in the condition of the crops of the country since the 1st of July, caused mainly by drought. In the case of spring wheat, the condition the 1st of August is reported only 67, as against 74.1 the 1st of July and 87.3 the 1st of August last year. As the winter-wheat condition the previous month had also been reported very much lower than in 1892, a smaller aggregate wheat crop this year than last is therefore beyond question. But as we have remarked on previous occasions, a reduced wheat yield the present year will cause no uneasiness, since such large supplies have been carried over from the last crop. The Department likewise reports a decline of 10 points in the condition of oats, which is now given as only 78.3 against 86.2 a year ago.

Most interest, however, centres in the condition of corn, as that crop transcends every other in importance. A decline of a little over 6 points is reported for the month, but the average still stands comparatively high, being given as 87. The average is also above that for the corresponding date last year, when the condition the 1st of August was only 82.5. The following shows the averages for all the principal crops the 1st of the month for several years past.

August 1.	1893.	1892.	1891.	1890.	1889.	1888.	1887.
Corn	87.0	82.5	90.8	73.3	94.8	95.5	80.5
Spring wheat	67.0	87.3	95-5	83.2	81.2	87.3	78.8
Spring rye		89.8	89.6	86.8	93.4	91.4	84.6
Oats		86.2	89.5	70-1	92-3	91-7	85.6
Barley		91.1	93.8	82.8	90.6	89.4	86.2
Potatoes		86.8	96.5	77.4	94.3	93-2	80.9
Cotton		82.3	88-9	89.5	89.3	87.3	93.3
Tobacco		88.8	88.5	69 2	84.4	86-1	73.1
Timothy		93.2	90.9	93.6	94-5		80.6
Buckwheat	88.8	92.9	97.3	90-1	95.2	92.5	93.3

With regard to corn the Bureau makes a remark which is decidedly important at this juncture. It says that while in some parts of the country continued dry weather has injured the crop beyond recovery, "it is nevertheless true as to the larger portion of the area devoted thereto, that improvement is not only possible, but with a sufficient rainfall through the month of August will be assured." When now it is added that during the last two days rains have fallen in many of the Western States, the outlook can not be regarded as altogether discouraging. It is interesting to note furthermore that in two rather important corn-producing States the condition of corn improved during July. Iowa is ally small, efforts are evidently being made to add to

one of these States, its condition being given as 102, and Missouri is another, the condition for that State being given as 95. Two or three other but less important corn-producing States also show an improvement for the month. The averages for the principal States for a number of years are shown in the following.

With the exception of the four States last mentioned, the averages in the foregoing for the present year, it will be seen, are all higher than "for the same date last year.

A rather important event this week has been the abrogation of the lease of the Lehigh Valley to the Philadelphia & Reading. What effect this step will have on the future of the Reading it is difficult to say at this time. The action has been followed by the resignation of Mr. Wilbur of the Lehigh Valley from the Reading board of receivers, and the appointment of Mr. John Lowber Welsh in his place. Another important event has been the action of the Union Pacific management with reference to the payment of the 8 per cent sinking fund bonds of the company which fall due the 1st of September. Rumors had been current that the company would find it difficult to take care of this debt. Official announcement has now been made that part of the issue is to be paid out of cash held by the sinking fund trustees, while the rest (amounting only to about \$3,800,000) is to be extended at the present rate of interest for a term of years. As the bonds are well secured and the offer is an advantageous one, it will no doubt be readily accepted. The Illinois Central audited return of earnings for the month of June has been issued this week, and is very favorable, there being a gain in gross of \$346,581 and in net of \$394,343 as compared with the corresponding month last year. For the month of July estimated gross shows an increase of \$283,683. The West Virginia Central & Pittsburg for July reports an increase of \$5,866 in gross earnings and an increase of \$2,306 in net earnings; the Georgia Railroad for the same month has lost \$22,343 in gross and \$11,034 in net, and the San Francisco & North Pacific has lost \$10,170 in gross and \$11,578 in net. The Mexican National for June reports gross of \$331,160, against \$325,523, and net of \$111,013, against \$118,203, the figures being stated in Mexican currency. The Minneapolis & St. Louis for June has net of \$49,687, against \$60,098; the Denver & Rio Grande \$316,007, against \$315,841; the Wabash \$281,-125, against \$302,055, and the Philadelphia & Erie \$212,973, against \$84,403.

If, as has been stated in some of the newspapers, supplies of coal in the West and Northwest are unusu-

We have received this week the statement of them. the amount of freight passing through the St. Mary's Falls or "Soo" canal during the month of July, and find that aggregate tonnage east bound and west bound was heavier than for the same month last year, notwithstanding a considerable falling off in the iron ore shipments as a result of the diminished demand and depression in the iron trade. The increase has been very largely in the coal shipments, which reached 618,021 tons in July, 1893, against only 542,003 tons in July, 1892. Aggregate tonnage of all kinds passing through the canal in July, 1893, was 2,017,183 tons, against 1,926,210 tons in July, 1892. The westbound shipments increased from 599,971 to 719,421 tons, coal being the main item in the same, while eastbound shipments fell off from 1,326,239 tons to 1,297,-762 tons; more than the whole of the falling off in the latter occurred in the iron ore shipments, which were only 836,327 tons in 1893 against 932,706 tons in 1892. The flour and grain shipments were much heavier than last year, 1,042,845 bbls. of flour passing through in July, 1893, against only 792,289 bbls. in 1892, and 4,881,064 bushels of wheat against 4,556,785 bushels.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of currency and gold by the New York banks.

PRESIDENT CLEVELAND'S MESSAGE TO CONGRESS.

Public interest has this week centered upon the doings of Congress, that body having come together in extra session on Monday, and upon the President's Message which was delivered on Tuesday to the Senate and House. Who can recall among the critical situations our commercial history records such an occasion as ex ists to-day ? Many make comparison with other crises, more particularly with 1873. But there is no similiarity except on the surface ; the present emergency is unique, the only one of its kind. Note the condition of business and the attitude of all commercial classes throughout the country. Every eye to-day is fixed on Washington. Not a hope of real relief from any other source is indulged in by any one. Moreover, it is no mere figure of speech to say our industries are paralyzed; so far as we can remember, never did that word express so accurately the literal truth. Our industries are not moribund, they are not in a state of insolvency or ap-

proaching insolvency. Nothing of that kind explains the idle spindles, the noiseless machinery, the stilled workshops—animation is suspended, that is all; the wheels of commerce are simply out of action. Awaiting what? Is it liquidation or anything of that character? By no means—just waiting ready to start up at any moment on the repeal by Congress of a little piece of injudicious legislation. The nation attempted to create value by statute, and the operation of the law has gone so far as to destroy throughout Europe and America every bit of confidence in the stability of things here.

As Congress meets at a juncture such as these thoughts suggest, not a word is required to explain the deep concern with which the President's message has been looked for and read. We all might have formed a pretty accurate conception in advance of actual knowledge of what would be the character of this state paper, for President Cleveland has met the conditions in his usual direct and open way. The message contains just what the occasion required and nothing more, is free from any trace of political bias, mixes up no other subject with the one which engrosses the public mind, and consequently strengthens the hope of all conservative classes. He tells us the exact truth with reference to the origin of the harmful legislation the nation is suffering from. It was an expedient to avert a worse device, "a truce after a long struggle between the advocates of free silver coinage and those intending to be more conservative." He shows clearly the working of the statute, how it has robbed the country of its gold, destroyed confidence, dislocated our industries, and how it is sure in the end to be most mischievous of all in its effect upon "the man who earns his bread by his daily toil." Finally he enforces the truth that the "financial condition of the country should be considered at once and before all other subjects" and that "it is of the utmost importance that such relief as Congress can afford" should "be afforded at once" by the "prompt repeal" of the disturbing statute.

President Cleveland has thus done all that he can do. He has in obedience to a general and even impatiently expressed wish of the people convened Congress in extra session, and he has in a clear, straightforward manner told the members of both Houses how serious. the crisis is and what is the only remedy. Accordingly, under our method of government, the responsibility rests now wholly with this National Legislature, which the public has from the first looked to as its ultimate hope. We may say without exaggeration that very nearly every business man is suffering to a greater or less degree, and hence that all the active enterprising workers in the land are waiting for and watching the deliberations and action of their representatives with an intensity of feeling seldom if ever equaled. The peculiarity, too, of this crisis is that the commercial classes, outside of a few silver States, know just what they want-their demand, coming up from all parts of the country, is for the repeal of the purchasing clause of the silver bullion law of 1890. No compromise of any description will be tolerated, and the attempt to turn this single issue into another "truce," or to attach to it legislation about banks or about other currency matters will be looked upon as prompted by a desire to embarrass and delay the only action which public opinion has determined can successfully relieve the strain of which the offensive law is the cause. We do not mean that the people believe all further currency legislation will be needless. After the repeal measure is passed a new bank and currency arrangement will come to the front as a chief essential in legislative work, and ought to be devised with as much expedition as is practicable. But for the time being, and until the country's industries have been rescued from the peril they are in, there is no place for anything of that sort, since each day's delay sorely tries the endurance of a large class now under severe pressure, lengthens the list of the disasters produced, and will surely retard recovery after the repeal is effected.

As yet Congress has accomplished little. That is a disappointment to many no doubt, but was inevitable. The forms for affecting legislation are a necessary preliminary to definite action and have to be constructed first. Furthermore it takes time for the views and methods of a body of men coming from such diverse surroundings to be adjusted to the conditions and organized for effective work. All this has been in progress during the week and as far as developed the outlook is favorable.

BUILDING OPERATIONS IN NEW YORK, CHICAGO AND BROOKLYN.

The erection of new buildings does not as a rule attract much attention as a factor in our industrial situation. Yet in the large cities the expenditures for new work of this kind reach very considerable aggregates each year, and the construction of the edifices gives employment to great numbers of men, besides affecting directly or indirectly many different trades and requiring the use of large amounts of building materials. Nor can it be claimed that the degree of activity and the expenditures involved are not subject to fluctuations from year to year. Indeed general trade and financial conditions have as much influence in this department of business as in others, and in addition there are of course the usual special stimulating or retarding agencies, arising out of exceptional events and occurrences, which affect results in greater or smaller measure according to their nature and importance.

In view of the financial disturbances and business depression we have experienced the present year, the records just now have particular interest. The Real Estate Record & Guide, of this city, a short time since gave its usual compilation of the statistics for New York City and Brooklyn, showing the number of plans filed and the number and cost of the buildings projected for the six months of the current year to June 30, and from The Economist of Chicago we have the totals for the World's Fair city. Of course data regarding projects filed do not offer an absolute guide to the building operations in progress. Some of the projects may be abandoned, and on others work may not be undertaken till a long time afterwards. But if we assume that with special exceptions the average of such lapses and "deferrals" does not vary a great deal from year to year, a comparison of the numbers and amounts of the projects between corresponding periods is useful as an indication at least of the relative extent and activity of the work and of the changes which are taking place. Here in New York the projects for the first six months are usually very much larger than those filed in the last six months, and reflect the work in great part which it is proposed to undertake in these last six months when the weather conditions favor outdoor operations. It may be that the difficulty of

obtaining needed accommodations in the money market, and the uncertainty of the business outlook, may interfere the present year to a greater extent than usual with the immediate carrying out of the projects for which plans have been filed, but as we shall show further below a large proportion of the projected buildings are of a class that is unlikely to be affected very greatly by such developments.

Taking first the statistics relating to Chicago, we find just what we should expect to find, that is, a striking falling off in the projects for new buildings as compared with the corresponding six months of 1892. The Economist of Chicago reports that permits for the erection of 4,863 buildings, to cost \$18,235,895, were issued in the first half of 1893, as against permits for 6,716 buildings to cost \$28,840,400 in the first half of last year. This is a falling off of 1,853 in the number of buildings and \$10,604,505 in aggregate cost. The totals are smaller also than in the first half of 1891, when the permits covered 6,068 structures of an estimated cost of \$22,877,700. We say the falling off is what one would expect, because the fact that the World's Fair was to be held in the city in 1893 undoubtedly proved a stimulus and furnished the motive for the construction of an unusually large number of buildings in 1890, 1891 and 1892, so as to provide for the growth of population and demand for buildings which the Fair was sure to bring. Now that the Fair is actually open, that motive no longer exists, while a feeling of caution and conservatism would naturally make investors and builders inclined to go slow in providing further new buildings until it was seen what the situation and demand were likely to be after the Fair. Very few persons have any idea how largely building operations in Chicago have expanded since 1889. We referred to the matter about a year ago, but the addition of another year to the figures makes the results still more striking and interesting. In the following we give the statistics for several calendar years past, both for New York and Citizen.

Outoago.			
NEW BUILDINGS PR	OJECTED IN	CHICAGO.	
Steel and No Posterior added as	No. of	Feet	Estimated
Calendar Years.	Buildings.	Frontage.	Cost.
1886	4,654	112,302	\$21,324,400
1887	4,833	115,508	19,778,100
1888	4,958	116.419	20,360,800
1889	4.931	119,573	25,065,500
1890	*11,608	*266,284	*47.322.100
1891	11,805	282,672	54,001.800
1892	13.118	326,222	63,463,400
		A STATE OF THE OWNER	

Towns of Hyde Park, Lake, Lake View and portions of Jefferson and Cleero included for the first time in this year. The aggregate of new buildings for these towns in 1889 was 2,659, costing \$6,450,500.

BUILDINGS PROJECTED IN NEW YORK CITY.

Calendar	No. of	Estimated	Calendar	No. of	Estimated
Years.	Buildings.	Cost.	Years.	Buildings.	Cosl.
1885	3.370 8	\$45,918,246	1839	3,621	\$68,792,031
1886	4,097	58,479,653	1890	3.507	74,676.373
1897	4.385	66,839,980	1891	2,821	56,072,624
1888	3,076	47,142,478	1892	2,967	59,107,618

Thus in the calendar year 1892 the aggregate cost of the new building projects in Chicago was actually greater than the aggregate for New York, the amounts being \$63,463,400 to \$59,107,618. In 1889, if we include the figures for the towns annexed since then, the total for Chicago was only about 311 million dollars; in 1890 there was an increase to 471 millions, in 1891 to 54 millions, and in 1892, as we have seen, to 631 millions. In New York the course was just the reverse of this, and from \$68,792,031 and \$74,676,373 in 1889 and 1890 respectively there was a drop to \$56,072,624 and \$59,107,618 in 1891 and 1892 respectively. Of course, as regards the number of buildings comparisons between the two cities are of little use, since the structures are so different in character. The \$59,107,618 aggregate cost for 1892 at New York covered only 2,967 structures, whereas the \$63.463.400

aggregate for Chicago covered no less than 13,118 buildings. The Chicago statement also gives the frontage of the buildings, and it will be noticed that the aggregate frontage for 1892 was 326,222 feet, which, added to the 282,672 feet for 1891 and the 266,284 feet for 1890, gives a grand total for the three years of 875,178 feet, equal to over 165 miles of buildings !

Turning now to the figures for this city for the first six months of the current year, the exhibit is quite different from that for Chicago for the corresponding period. As there had been no such increase here as at Chicago, there was no room for a fall such as has occurred at that point. As a matter of fact, the estimated cost of the new buildings in New York for which plans were filed in the first six months of this year is reported as three or four million dollars larger than in the first half of last year, though the number of buildings is somewhat less. The figures are 1,552 buildings for 1893, against 1,814 for 1892, with the cost \$43,007,813, against \$39,252,583. The Record and Guide says the increase is the more noteworthy considering that the building law was in process of amendment last year, and in consequence a number of plans were filed at that time as paper projects for the purpose of obtaining the easier conditions of the old law. Says the Guide: "It is true the figures this year include \$5,000,000 for the new cathedral of St. John the Divine, a large part of which is a mere anticipation of what is to come; still if we eliminate this from this year's figures and then from last year's figures the number of paper plans filed at the Building Department, we may say that enterprises involving quite as much, if not more, have been undertaken in the first six months of 1893 than in the similar period of 1892." The St. Luke's Hospital. to cost a million dollars, is also included among the 1893 projects, but on that undertaking work is actually in progress. The Cathedral project came in to swell the totals in May and the Hospital the totals in June, and the following shows the numbers and amounts for each month as comparing with the same months of the years preceding. It will be observed that there were really only two months that showed a larger aggregate cost than the corresponding months of 1892, and only one month that showed a larger number of buildings.

NEW BUILDINGS PROJECTED IN NEW YORK CITY.

	1893.		1892.		1891.		1890.

Much the same feature is observable when the projects are grouped according to the place of location of the buildings in the different parts of the city. The following is an analysis of the figures on that basis. DISTRIBUTION OF NEW BUILDING PROJECTS IN NEW YORK.

First Half-Year.		1893.	1892.		1891.

Luke's Hospital to cost \$1,000,000.

[VOL. LVII.

Thus there are just two sections that show any decided increase in the aggregate cost of the new buildings provided for, namely the section south of Fourteenth Street and the section between 59th and 125th streets, west of Eighth Avenue, and in the latter case the increase would disappear if the cost of the cathedral were taken out. These two sections also furnish by far the greater proportion of the aggregate for the whole city, the first-mentioned section being credited with a total of \$12,862,722 and the last-mentioned section with a total of \$14,036,250, or together nearly 27 million dollars out of 43 millions, or if we eliminate the Cathedral 22 millions out of 38 millions. The fact is a significant one in its bearing on the probability of the construction under the present adverse financial conditions of the new structures planned. In the district south of 14th Street the outlay is chiefly for new office buildings, hotels, stores, etc.; in the district between 59th and 125th streets a considerable amount represents costly private residences. Now where the project covers buildings of large cost, the promoters of the undertaking, it may reasonably be supposed, have long since made full provision for the financial part of the scheme, and, besides, where land is so valuable as in the sections in question, the incentive to replace old and small buildings by new and commodious large structures, or to build upon vacant lots. is very strong even in times of business adversity. Hence while the existing business depression will doubtless be sensibly felt in this as in other branches of trade. yet, for the reasons mentioned, the effect is likely to be less than would otherwise be the case. We may note, too, that analysis of the totals for the whole city reveals much the same characteristics as the figures of the two special sections mentioned. That is to say, flats and tenements, where ruling conditions may be expected to have decided influence, foot up less in 1893 than in 1892-\$11,365,800 against \$13,179,500; while office buildings, hotels, stores, churches, &c., furnish a decidedly increased aggregate, \$19,953,400 against \$13,611,500, or without the Cathedral \$14,953,400 against \$13,611,500. We may state, furthermore, that even in the private dwellings there is a falling off, the total standing at \$8,242,250 against \$9,587,415. In miscellaneous structures, however, there is an increase-\$3,446,363 for 1893 against \$2,874,168 for 1892.

As regards Brooklyn and Kings County, there is a falling off as compared with the corresponding six months of 1892 in the number of buildings projected, but only a trifling decrease in the aggregate cost, the total number of buildings being 2,199, against 2,380, and the cost \$11,452,444, against \$11,953,084. The decrease in the number of buildings is almost entirely in the brick buildings, of which there are only 867 in 1893, against 1,021 in 1892, the number of frame buildings being 1,332, against 1,359. The following gives the estimated cost of the new buildings in New York and Kings County for a series of years.

ESTIMATED COST OF NEW BUILDINGS PROJECTED.

 First six months.
 1893.
 1892.
 1891.
 1890.

 New York City...\$43,007,813
 \$39,252,583
 \$34,500,816
 \$45,698,511

 Kings County...
 11,452,444
 11,953,034
 12,330,837
 13,563,325

Total......\$54,460,257 \$51,205,667 \$46,831,653 \$59,261,836 In connection with the new building projects, a feature of the real estate operations of the six months is worth pointing out. It appears that in New York the conveyances were larger in 1893 than in 1892, while the mortgages recorded were less in number and amount. There were 8,071 conveyances in 1893 as against 8,070 in 1892, and the consideration involved was \$150,300,-

925 against \$135,477,515. On the other hand, the mortgages numbered 7,908 for \$105,428,554, against 8,186 for \$108,961,626. For a period of financial distress this is certainly a not unsatisfactory showing. In Kings County there was a falling off in the transactions, the conveyances numbering 9,312 for a consideration of \$32,736,454 in 1893 against 9,717 for \$41,235,535 in 1892, and the mortgages 7,562 for \$29,121,222 against 8,025 for \$31,212,594.

RAILROAD GROSS EARNINGS FOR JULY.

We think no one will be surprised to find an unfavorable exhibit of railroad gross earnings for the month of July. The financial disturbances and complete unsettlement of all industries had foreclosed the possibility of any other result, and besides the returns from week to week as tabulated by us had foreshadowed the probable nature of the exhibit. Our statement for the month comprises 138 roads, and in the aggregate of the earnings of these roads there is a falling off of \$1,765,527 or 4.11 per cent. Out of the 138 roads no less than 72 are obliged to report diminished earnings, but all things considered a falling off of only 4 per cent in the aggregate is a much better showing than one would have supposed possible under the circumstances.

In the case of the separate roads the losses are in some instances very heavy, both in ratio and amount, reaching 50 per cent or over. Of course the heaviest losses as a rule come from the roads which run through the sections of country where silver mining is one of the main industries, the mine owners having ordered a pretty general shut-down after the announcement of the closing of the India mints to the coinage of silver on private account and the great drop in the price of the metal which resulted from that event. But there are many roads remote from the silver-producing sections which report losses of as much as 20 or 25 per cent from the totals for the corresponding month last year. The truth is, while the sections mentioned have, for the reason stated, suffered most, the existing disturbance in business has been general and widespread, and no section of the country or class of roads has been exempt from its effects. Mills and factories in large number all over the United States have shut down or else have curtailed operations very extensively ; in some cases this step has been taken merely as a precautionary measure, in others because of an actual falling off in demand, and in still others because of the inability to obtain credit or cash with which to carry on the daily work. The derangement of the ordinary banking and business methods, owing to the great distrust prevailing and the scarcity of currency, and the difficulty of selling domestic exchange in the usual way and upon the usual terms, and, furthermore, the fact that cash was at a premium over checks, served to aggravate and intensify the prevailing troubles, and suggested the stoppage of work in many cases as the easiest and wisest course to pursue.

Except for the increase in passenger travel in connection with the World's Fair at Chicago the falling off in earnings in the aggregate would be more striking, and several roads which now show an increase would have a decrease. Only very few roads furnish statements in sufficient detail to enable one to see the passenger and freight revenues separately. It is safe to assume, however, that the gain of \$283,683 on the

any road in our table-may be ascribed largely to that circumstance. The situation of the Illinois Central as regards passenger travel to the Fair is, as is known, exceptional. Still, the effect in the case of some other roads is also very marked. Take the Cleveland Cincinnati Chicago & St. Louis; that road, per our figures further below, lost \$65,912 in its earnings for the month; but the freight revenues alone show a decrease of as much as \$124,292, while the passenger earnings increased \$48,501, and there was also an increase in the revenues from mail and express. The Evansville & Terre Haute has a gain in aggregate gross for the month of \$6,625; on analysis it is seen that freight revenues fell off \$6,385, but that there was an increase of \$11,906 in passenger revenues, the latter an increase of over 40 per cent. The Grand Trunk of Canada for the four weeks ending July 29 has an increase in gross of \$42,348, which is made up of a decrease of \$72,612 in the freight revenues and an increase of \$114,960 in the passenger revenues. So in the case of the Chicago & Grand Trunk, which is the Grand Trunk's line to Chicago, while aggregate gross earnings have increased \$47,594, freight earnings fell off \$32,791, the gain coming from an increase of \$80,385 in the passenger receipts; in this case the increase in the passenger revenues reaches over 75 per cent, the aggregate of the same for the four weeks being \$186,361 this year against \$105,976 last year ; in the last three weeks the increase in the passenger receipts of this road was in. each week over 100 per cent.

As regards the character of the exhibit last year, we are not comparing with a period when there had been an exceptional amount of improvement. Some of the roads in the Northwest and also some of those in the Southwest then had quite satisfactory gains, but on the other hand many of the roads in the South and in the Middle and Middle Western States (the latter chiefly because of a smaller grain traffic and the effect upon the iron trade of the troubles at Homestead) showed losses at that time, and in the grand aggregate of all the roads the increase was only a little over a million dollars-\$1,040,346, or 2.34 per cent. In the years preceding, however, more particularly in 1891 and 1890the gains had been heavy, as will be seen by the following :

and the second	Ma	eage.	Earr	nings.

As concerns the factors which ordinarily play such a prominent part in affecting railroad traffic and earnings, but which this time are so completely overshadowed in importance by the unfavorable state of the general trade situation-as concerns these factors the grain movement at the West fell below that of a year ago, and the remark applies with special force to the wheat receipts. Doubtless a variety of influences contributed to the falling off in wheat-the smaller crop raised the present year, the fact that the supplies already Illinois Central-the heaviest gain reported this time by held at the Western markets were very heavy

the inability to secure accommodations from the banks, and the extraordinarily low price to which the cereal dropped. For the four weeks ending July 29, the present year, the receipts of wheat at the Western markets were less than 11 million bushels, as against over 17] million bushels in the corresponding four weeks of 1892, being a decrease of over 6 million bushels. Last year the spring-wheat markets had shown a very heavy increase ; this year the receipts at Minneapolis have been 2,927,170 bushels, against 4,-043,700 bushels, but at Duluth 2,556,543 bushels, against 2,202,776 bushels. It is the winter-wheat points that record the largest contraction, and these points sustained a heavy loss in most cases last year too. At St. Louis the receipts in the four weeks of 1893 were only 2,060,584 bushels, against 3,207,172 in the four weeks of 1892 and 3,705,989 bushels in 1891. Toledo received no more than 602,340 bushels the present year, against 2,427,300 bushels in 1892 and 4,150,-761 bushels in 1891, indicating a very noteworthy Detroit and Cleveland received more falling off. than last year but less than two years ago. At Chicago, which receives both winter and spring wheat, the receipts in the four weeks of 1893 were only 1,226, 497 bushels, against 2,526,687 bushels in 1892 and 6,-103,609 bushels in 1891, the four weeks in this latter year including the 1st day of August, when the movement was very heavy. The following gives full details of the grain receipts.

Total of all- 4 wks. July, 1893 4 wks. July, 1892 Since Jan. 1, 1893 Since Jan. 1, 1892	1,061,327 1,147,525 6,618,587 7,851,077	10,943,707 17,099,510 79,300,316 87,820,363	$\begin{array}{c} 11,293,764\\ 6,109,904\\ 72,714,434\\ 74,592,157\end{array}$	9,948,031 62,982,578	461,653	86.397 187,566 2,036,507 2,541,019

In addition to the above there was received at Kansas City during the four weeks this year 232.804 bushels of wheat, 153,154 bushels of corn and 1,449 bushels of oats. Since January 1 the receipts have been 5,517,323 bushels of wheat, 1,432,214 bushels of corn and 130,144 bushels of oats.

It will be observed from the foregoing that in corn the movement was heavier than a year ago, but that in oats and the other cereals, as in the case of wheat, the receipts this year were smaller than last year. The gain in corn inured chiefly to the benefit of Chicago and St. Louis. The loss in cats occurred mainly at Chicago. The figures given cover the four weeks ending July 29. The following shows the grain movement at Chicago for the even month, and also the movement of provisions and live hogs at the same point. RECEIPTS AT CHICAGO DURING JULY AND SINCE JANUARY 1.

Mannesser		July.		Since January 1.			
Lan. is	1893.	1892.	1891.	1893.	1892.	1891.	
Wheat.bush.	1,320,548	2,667,748	5,761,107	20,553,297	11,280,414	10,772,503	
Cornbush.	9,416,299	5,334,115	7,317,335	39,346,178	39,035,838	38,381,875	
Oats bush.	6,022,601	8,011,352	3,822,906	40,408,943	40,950,091	30,216,655	
Ryebush.	44,250	145,267	346,872	866,325	1,520,743	1,317,939	
Barley.bush.	80,982	196,907	33,832	5,404,185	6,793,093	4,082,552	
Total grain	16,894,680	16,355,389	17,282,052	106,578,878	99,580,179	84,804,527	
Flour. , bbls.	301,697	349,950	230,421	2,718,477	3,187,175	2,155,963	
Porkbbls.	1,000	437	87	3,516	11,013	6,974	
Cut m'ts.lbs.	12,219,697	19,519,941	13,657,614	72,577,287	107,664,145	127,441,823	
Lardlbs.	5,828,761	7,981,935	5,168,135	32,055,026	50,312,504	46,610,686	
Live hogs No	519,507	488,820	468,497	3,310,301	4.771.448	4,987,59	

Thus in the aggregate Chicago received half a million bushels more grain in 1893 than in 1892, the gain in corn having offset the loss in wheat and the other cereals, but the aggregate was not as heavy as in July 1891. In most of the items of the provisions movement there was a falling off from 1892. Of live hogs the receipts were 519,507 head in 1893, against 488,820 head in 1892.

Regarding the cotton movement in the South, this of course reaches comparatively small dimensions in July, when the old crop season is so near its end. The receipts at the Southern ports the present year were somewhat larger than a year ago, while the gross shipments overland were a little less, being 28,000 bales against 33,000 bales.

RECEIPTS OF COTTON AT SOUTHERN FORTS IN JULY AND FROM JANUARY 1 TO JULY 31, IN 1893, 1892 AND 1891.

The heaviest loss in earnings by any road in our tables comes from the Northern Pacific, which for the first three weeks of the month (the fourth week has not yet been reported) has suffered a decrease of \$487,-452. Doubtless many will think that this loss is the result of the competition of the Pacific Extension of the Great Northern, and the fact that the Great Northern system is able to show a gain for the month would seem to lend color to the idea. But the Great Northern gain is less than one quarter the Northern Pacific loss, and as the seven hundred miles of new road in the Great Northern must have created some entirely new traffic it is evident that only a small part of the Northern Pacific's loss can represent a diversion of traffic to the Great Northern. The truth is, the Northern Pacific is greatly affected by the depression in the mining industry, the company having a considerable mileage in Montana for instance, and Montana is one of the largest silver-producing States in the country. General business depression on the Pacific Coast has also been an unfavorable circumstance in its case. Besides this, the war of rates on trans-Continental business is an important matter-more important we should say than the loss of traffic by diversion to the Great Northern, though we have no data to confirm this conclusion.

But the Northern Pacific stands by no means alone in showing a heavy loss in earnings. The Missouri Pacific reports a decrease of \$336,891, and the Atchison Topeka & Santa Fe, including the St. Louis & San Francisco, a decrease of \$290,498, both systems being

AUGUST 12, 1893.]

in the Southwest. Then we have a decrease of \$269,232 by the Milwankee & St. Paul, a Northwestern road. The Denver & Rio Grande has lost \$286,600, and this of course follows from the demoralization of the mining industry in Colorado. The Louisville & Nashville, which has its mileage in a totally different section that is, in the South—has a decrease of \$178,551. Other roads with considerable losses are the Missouri Kansas & Texas with \$96,857 decrease, the Mexican National with \$89,397, the Mexican Central with \$87,779, the Cincinnati New Orleans & Texas Pacific with \$79,727, &c., &c., the losses coming from nearly all sections of the country. The following furnishes a list of all losses and also all gains above \$30,000 in amount.

Missouri Kan. & Tex...

The large gains, it will be seen, are not very numer-We have referred above to the increase of \$283,ous. 683 on the Illinois Central and the \$131,454 increase on the Great Northern. The New York Central, which now reports on 224 miles more road, has \$133,-192 increase. The gain on the Grand Trunk of Canada, which reaches (including the Chicago & Grand Trunk and the Detroit Grand Haven & Milwaukee) \$85,447, has already been analyzed, and found to be due to the great gain in passenger earnings. Aside from these, there are only seven roads or systems whose gains amount to over \$30,000, namely the Rock Island with \$66,697 increase, the Canadian Pacific with \$56,905. the Pittsburg & Western with \$54,744, the Minneapolis St. Paul & Sault Ste. Marie with \$49,585, the New York Ontario & Western with \$40,541, the Buffalo Rochester & Pittsburg with \$39,997, and the Wabash with \$34,699.

When we arrange the roads in groups, we find that in nearly every group the roads having decreases outnumber those having increases; Southern, Southwestern and Northwestern groups however make on the whole the least favorable exhibits. The two groups last mentioned showed considerable improvement a year ago, and the roads in Northwestern group the present year besides having had a smaller wheat movement also suffered in some cases from a falling off in the iron ore traffic. The following affords a six-year comparison for some of the principal Northwestern roads.

THE LATE TROUBLE IN SIAM.

There are many reasons for gratulation that the Siamese difficulty has been adjusted, even if not on an entirely satisfactory basis. Lord Roseberry is credited with the statement that war has not been so imminent between France and Great Britain for a long time as it was for some days at the end of July and the beginning of the present month. It was seen and felt everywhere that apart from the right or wrong of the original question between France and Siam the situation between the two great nations was strained. Skilful diplomacy was needed; and happily the right men were found to do the needed work. If some credit must be given to the dislike which each of the powers entertained for war, too much praise cannot be given to the Marquis of Dufferin and the Earl of Roseberry for making the preservation of the peace first a possibility and then for making it secure.

The general subject, however, has not yet ceased to occupy men's minds; and there are several points which are well worthy of a little consideration. As to the origin of the difficulty, the French have shown great temper because of a few lives lost, and some personal injuries sustained. We hear nothing of the loss of life sustained by the Siamese. Yet the Siamese were in their own land, and acting in defense of their own territory, their own property and their own people. It is not difficult for France to show that according to treaty arrangements she had certain privileges on the eastern border of Siam. It is undeniable, however, that the Mekong River has hitherto, during the greater part of its course, run through Siamese territory, that its banks are inhabited by Siamese people, that on both sides of the river Siamese forts dominated the situation, and that in every sense of the term the Mekong was part of the legitimate property of the Siamese Government.

It was not till 1861 that the French had any territory in that part of the world. In that year, in conse quence of some difficulties between the natives and the honor. The wrong that has been done has been done

French missionaries, Napoleon III. made war upon Lower Cochin-China, and made himself master of the three provinces, Saigon, Bienhoa and Mytho, together with several islands off the coast. In 1867 three other provinces were annexed. Henceforth Lower Cochin-China came to be known as French Cochin-China. We have not had time to forget the Tonquin war, which in 1884 resulted in bringing the whole of the Empire of Annam under a French Protectorate. Cambodia, more to the south of the Peninsula, had come under a French Protectorate in 1862. The whole of the eastern and southeastern coast is thus virtually under French control. It is a vast territory, covering in all its extent not less than 132,000 square miles, and including about nineteen millions of people. A glance at the map will show that the French are dependent for their trade on the territories lying to the north.

Siam has a larger territory but a smaller population. The area of the country is estimated at about 250,000 square miles, with a population amounting to about 6,000,000. For this northern trade Siam and Annam (including the entire French protectorate) are rivals. Siam has had the advantage of the Menam River, which makes a connection with the Shan States and with Burmah beyond. She has also had the advantage of the Mekong, which likewise connected with the Shan States, and put her in communication with Yunnan, on the Chinese border. She has had another great advantage. Since the annexation of Burmah to India, the British have courted the trade by Bangkow and the Menam; and as a consequence the British trade has so distanced that of France in those regions, and by the use of Siamese land and water, as to put that of France almost entirely out of sight.

The success of the trade in and through Siam has greatly irritated the French. This irritation has been increased by the enterprise of the Siamese Government, which, in order to facilitate communication between the two great rivers, the Menam and the Mekong, has constructed a railroad from Bangkok to Khorat. This railroad was opened last year on March 10 by the King of Siam in person. France has long been complaining of Siamese encroachments. She has charged that Siam was exercising jurisdiction beyond her territorial limits, and that in various ways she was diverting trade from Annam and Cochin-China to her own benefit. In these circumstances the opening of the Khorat Railroad was well fitted to give offence. But the construction and working of such a railroad gave France no just cause of quarrel. On the part of the Siamese Government, it was a just and legitimate enterprise. France had already done her best to advance her own trade interests by opening a new and shorter route to Yunnan. Why should not Siam be equally on the alert, and equally active ? It was not difficult for France to find cause of quarrel on the Mekong. It was the difficulty on the Mekong which brought the French ships to the Menam, which led to the threatened blockade and the ultimatum. These things are now facts of history.

So much for the cause of the trouble. It is not possible thus to look at the situation and to reflect on the enormous sacrifice which Siam has consented to make without feeling that in this case again, as so often before, might has triumphed over right, and that the weaker has been grieviously wronged. It was not the business of Great Britain to do more in the case than protect her own interests and guard her own honor. The wrong that has been done has been done

The Siamese were not annoying their by France. neighbors. They were not courting outside interference by any civil war.

France has mightily increased her territory in Southeastern Asia. She is brought nearer to her ancient rival and conqueror on Asiatic soil. It remains to be seen whether she has increased her strength or added to her weakness by her rough treatment of Siam. Her colonizing efforts hitherto have proved unprofitable. She may find out some day that mere territory is neither wealth nor strength.

PRESIDENT CLEVELAND'S MESSAGE.

Congress convened in extraordinary session on Monday of this week, in accordance with the President's proclamation, and on Tuesday the President's Message was received as follows:

To the Congress of the United States: The existence of an alarming and extraordinary business situation, involving the welfare and prosperity of all our people, has constrained me to call together an extra session of the people's representatives in Congress, to the end that through a wise and patriotic exercise of the legislative duty with which they solely are charged, present evils may be mitigated and dangers threatening the future may be averted. Our unfortunate financial plight is not the result of un-Our unfortunate financial plight is not the result of un-toward events nor of conditions related to our natural re-sources, nor is it traceable to any of the afflictions which fre-

sources, nor is it traceable to any of the amiltions which fre-quently check national growth and prosperity. With plenteous crops, with abundant promise of remunera-tive production and manufacture, with unusual invitation to safe investment and with satisfactory assurance to business enterprise, suddenly financial distrust and fear have sprung up on every side. Numerous moneyed institutions have sus-ind do how we obundent area to ware in the distribution of the second and the second s

enterprise, suddenly financial distrust and fear have sprung up on every side. Numerous moneyed institutions have sus-pended because abundant assets were not immediately avail-able to meet the demands of the frightened depositors. Surviving corporations and individuals are content to keep in hard the money they are usually anxious to loan, and those engaged in legitimate business are surprised to find that the securities they offer for loans, though heretofore satisfac-tory, are no longer accepted. Values supposed to be fixed are fast becoming conjectural, and loss and failure have in-volved every branch of business. I believe these things are principally chargeable to Con-gressional legislation touching the purchase and coinage of silver by the General Government. This legislation is embodied in a statute passed on the 14th

This legislation is embodied in a statute passed on the 14th day of July, 1840, which was the culmination of much agita-tion on the subject involved, and which may be considered a truce, after a long struggle, between the advocates of free sil-ver coinage and those intending to be more conservative. Undoubtedly the monthly purchases by the Government of 4,500,000 cunces of silver enforced under the statute were re-marded by those intersted in silver production as a cortain

4,00,000 butters of silver enforced under the statute were re-garded by those interested in silver production as a certain guaranty of its increase in price. The result, however, has been entirely different, for imme-diately following a spasmodic and slight rise, the price of sil-ver began to fall after the passage of the act, and has since reached the lowest point ever known. This disappointing re-ult has led to renewed and periotet of fort in the direction sult has led to renewed and persistent effort in the direction of free silver coinage.

Meanwhile not only are the evil effects of the operation of the present law constantly accumulating, but the result to which its execution must inevitably lead is becoming palpable

which its execution must inevitably lead is becoming palpable to all who give the least heed to financial subjects. This law provides that in payment for the four million and five hundred thousand ounces of silver bullion which the Secretary of the Treasury is commanded to purchase monthly, there shall be issued Treasury notes redeemable on demand in gold or silver coin, at the discretion of the Secretary of the Treasury and that said notes may be rejeased. It is how in gold or silver coin, at the discretion of the Secretary of the Treasury, and that said notes may be reissued. It is, how-ever, declared in the act to be "the established policy of the United States to maintain the two metals on a parity with each other, upon the present legal ratio, or such ratio as may be provided by law." This declaration so controls the action of the Secretary of the Treasury to prevent his exercising the discretion nomi-nally vested in him, if by such action the parity between gold and silver may be disturbed. Manifestly, a refusal by the Secretary to pay these Treasury

and silver may be disturbed. Manifestly, a refusal by the Secretary to pay these Treasury notes in gold, if demanded, would necessarily result in their discredit and depreciation as obligations payable only in sil-ver, and would destroy the parity between the two metals by establishing a discrimination in favor of gold. Up to the 15th day of July, 1893, these notes had been is-sued in payment of silver bullion purchases to the amount of more than \$147,000,000. While all but a very small quantity of this bullion remains uncoined and without usefulness in the Treasury, many of the notes given in its purchase have been paid in gold.

the notes given in its purchase have been paid in gold. The policy necessarily adopted of paying these notes in gold has not spared the gold reserve of \$100,000,000 long ago set aside by the Government for the redemption of other notes, for this fund has already been subjected to the payment of of their Government,

new obligations, amounting to about \$150,000,000 on account

new obligations, amounting to about \$150,000,000 on account of silver purchases, and as a consequence for the first time since its creation been encroached upon. We have thus made the depletion of our gold easy, and have tempted ther and more appreciative nations to add it to their stock. That the opportunity we have offered has not been neglected is shown by the large amounts of gold which have been recently drawn from our Treasury, and exported to increase the financial strength of foreign nations. The excess of exports of gold over its imports for the year ending June 30, 1893, amounted to more than \$87,500,000. Between July 1, 1890, and July 15, 1893, the gold coin and bullion in our Treasury decreased more than \$132,000,000, while during the same period the silver coin and bullion in the Treasury increased more than \$147,000,000. Unless Gov-ernment bonds are to be constantly issued and sold to replen-ish our exhausted gold, only to be again exhausted, it is

ish our exhausted gold, only to be again exhausted, it is apparent that the operation of the silver purchase law now in force leads in the direction of the entire substitution of silver for the gold in the Government treasury, and that this must be followed by the payment of all Government obligations in depreciated silver.

At this stage gold and silver must part company and the Government must fail in its established policy to maintain the two metals on a parity with each other. Given over to the two metals on a parity with each other. Given over to the exclusive use of a currency greatly depreciated according to the standard of the commercial world, we could no longer claim a place among nations of the first class, nor could our Government claim a performance of its obligations, so far as such an obligation has been imposed upon it, to provide for the use of the people the best and safest money. If, as many of its friends claim, silver ought to occupy a located the commercial the currence of the could

larger place in our currency and the currency of the world through general international co-operation and agreement, it is obvious that the United States will not be in a position to gain a hearing in favor of such an arrangement so long as we are willing to continue our attempt to accomplish the result single handed.

The knowledge in business circles among our own people that our Government cannot make its flat equivalent to in-trinsic value, nor keep inferior money on a parity with superior money by its own independent efforts, has resulted in such a lack of confidence at home, in the stability of currency values, that capital refuses its aid to new enterprises while millions are actually withdrawn from the channels of trade and commerce to become idle and unproductive in the hands of timid owners. Foreign investors, equally alert, not only decline to purchase American securities, but make haste to

sacrifice those which they already have. It does not meet the situation to say that apprehension in regard to the future of our finances is groundless and that there is no reason for lack of confidence in the purposes or power of the Government in the premises. The very exist-ence of this apprehension and lack of confidence, however caused, is a menace which ought not for a moment to be disregarded. Possioly if the undertaking we have in hand were the

Possibly if the undertaking we have in hand were the maintenance of a specific known quantity of silver as the parity with gold, our ability to do so might be estimated and gauged, and perhaps in view of our unparalleled growth and resources, might be favorably passed upon. But when our avowed endeavor is to maintain such parity in regard to an amount of silver increasing at the rate of \$50,000,000 yearly, with no fixed termination to such increase, it can hardly be said that a problem is presented whose solution is free from doubt.

The people of the United States are entitled to a sound and stable currency and to money recognized as such on every exchange and in every market of the world. Their Government has no right to injure them by financial experiments opposed to the policy and practice of other civilized States, nor is it justified in permitting an exaggerated and unreason-able reliance on our national strength and ability to jeopardize

able reliance on our national strength and ability to jeopardize the soundness of the people's money. This matter rises above the plane of party politics. It vitally concerns every business and calling and enters every house-hold in the land. There is one important aspect of the sub-ject which especially should never be overlooked. At times like the present, when the evils of unsound finance threaten us, the speculator may anticipate a harvest gathered from the misfortune of others the capitalist may protect himself by us, the speculator may anticipate a harvest gathered from the misfortune of others, the capitalist may protect himself by hoarding, or may even find profit in the fluctuation of values, but the wage earner—the first to be injured by a depreciated currency and the last to receive the benefit of its corrections is practically defenseless. He relies for work upon the ven-tures of confident and contented capital, This failing him, his condition is without alleviation, for he can neither prey on the misfortunes of others nor hoard his labor. One of the greatest statesmen our country has known, speaking more than fifty years ago when a derangement of the currency had caused commercial distress, said : "The very man of all others who has the deepest interest in a sound currency and who suffers most by mischievous legis-

a sound currency and who suffers most by mischievous legis-lation in money matters is the man who earns his daily bread by his daily toil." These words are as pertinent now as on the day they were

the discharge of our duty at this time must especially injure those of our countrymen who labor, and who, because of their number and condition, are entitled to the most watchful care

It is of the utmost importance that such relief that Congress It is of the utmost importance that such relief that Congress can afford in the existing situation be afforded at once. The maxim "He gives twice who gives quickly," is directly ap-plicable. It may be true that the embarrassments from which the business of the country is suffering arise as much from evils apprehended as from those actually existing. We may hope, too, that calm counsels will prevail, and that neither the capitalists nor the wage earners will give way to unreason-ing conjet and eacrifice their property or their interests under

hope, too, that caim counsels will prevail, and that neither the capitalists nor the wage earners will give way to unreason-ing, panic and sacrifice their property or their interests under the influence of exaggerated fears. Nevertheless, every day's delay in removing one of the plain and principal causes of the present state of things enlarges the mischief already done and increases the responsibility of the Government for its existence. Whatever else the people have a right to expect from Congress they may certainly demand that legislation condemned by the ordeal of three years' disastrous experience shall be removed from the statute books as soon as their repre-sentatives can legislatively deal with it. It was my purpose to summon Congress in special session early in the coming September, that we might enter promptly upon the work of tariff reform, which the true interests of the country clearly demand, which so large a majority of the people, as shown by their suffrages, desire and expect, and to the accomplishment of which every officer of the present Ad-ministration is pledged. But while tariff reform has lost nothing of its immediate and permanent importance, and must in the near future engage the attention of Congress, it has seemed to me that the financial condition of the country should at once and before all other subjects be considered by your honorable headr. should at once and before all other subjects be considered by your honorable body.

I earnestly recommend the prompt repeal of the provisions of the act passed July 14, 1890, authorizing the purchase of silver bullion, and that other legislative action may put be-yond all doubt or mistake the intention and the ability of the Government to fulfill its pecuniary obligations in money uni-versally recognized by all civilized countries. GROVER CLEVELAND.

EXECUTIVE MANSION, Aug. 7, 1893.

FALL RIVER MILL DIVIDENDS.

The results of the operations of the cotton manufacturing establishments at Fall River for the third quarter of 1893 have been quite satisfactory. Thirty-four corporations, with a combined capital of \$20,278,000, are represented in the subjoined statement, only three of which-the American Linen Company, Metacomet Manufacturing Company and Weetamoe Mills-have passed their dividends, and in these cases the money which would otherwise have been distributed to stockholders has been applied to extensive improvements in machinery, &c. In fact a number of the mills have applied an appreciable portion of earnings during the past quarter to repairs and additions. The aggregate amount paid in dividends by the thirty-four corporations has been \$418,750, or an average of 2.06 per cent on the capital invested, whereas in 1892 the average dividend was only 1.92 per cent and in 1891 reached but 1.22 per cent. The current favorable exhibit has been possible in the face of a declining market for many descriptions of goods, owing to the fact that mills were well supplied with the raw material, purchased at low prices, and were working under contracts entered into when goods were comparatively high.

Combining the above results with those for the half-year (published in the CHRONICLE of May 13, page 780) we have the following exhibit for the nine months. With regard to these figures, it is sufficient to say that thirty-five corporations dis-

tributed in dividends in the nine months of the present year \$1,320,890, or an average of 6.21 per cent, against \$972,980 or 4.94 per cent in the like period of 1892. In 1891 and 1890 the exhibit was not so satisfactory as in the current year, but in 1889 and 1888 the ratio of distribution was somewhat higher.

For the purpose of showing the relation this year's dividends bear to those for a series of years, we have prepared the following, which embraces fourteen of the leading corporations. The intention is to compare this year's ratio for the nine months with the average rate per cent for the corresponding period in the previous seven years :

The second se			-

It will be noticed that in only five instances has the ratio of distribution in the nine months of 1893 been less than for the like period in the preceding seven years. The outlook for the future is at this writing rather uncertain. In consequence of the unsatisfactory condition of the goods markets some 700,000 spindles were stopped on August 5 for an indefinite period, and it is expected that there will be a further shutting down of machinery within the next few days.

CONDITION OF NATIONAL BANKS IN BALTIMORE, LOUISVILLE, SAN FRANCISCO, DETROIT AND MILWAUKEE, -Mr. Jas. H. Eckels Comptroller of the Currency, has furnished us abstracts of the condition of the national banks in the above-named cities at the close of business on Wednesday, July 12, 1893. From them and from previous reports we have prepared the following, which covers the results for July 12 and May 4, 1893, and for purposes of comparison the figures for last 'year (July 12) are given:

BALTIMORE.	July 12,	May 4.	July 12,

Monetarn Commercial English News

[From our own correspondent.]

LONDON, Saturday, July 29, 1893.

There is a strong demand for gold in the open market for dispatch to America, and yesterday £190,000 in the metal was withdrawn from the Bank of England. In consequence the rate of discount in the open market has gradually moved up to 1% per cent. But it is difficult to raise the rate, the supply of money is so abundant and the demand so small. The Bank of England holds in coin and bullion over 291/2 millions sterling, and the "other" deposits, in which are included the bankers' balances, nearly amount to 35 millions sterling, while the reserve exceeds 19 millions sterling. Still, if there are large withdrawals from the Bank for New York, there will be a very rapid rise in the rate of discount.

The price of silver has fluctuated during the week between 32d. and 321/6d. per ounce, with little demand. The India Council has again been unable to sell its drafts. On Wednesday it offered for tender 40 lakhs of rupees and received not a single application. The closing of the mints has so seriously checked exports from India that there is little demand for remittance, and the little there is is easily provided for by the purchase of rupee paper, which embarrassed holders are selling here actively, while there is a good demand for it in India.

The feeling on the Stock Exchange on Monday and Tuesday was exceedingly bad. On Monday there were two failures of moderate importance and on Tuesday a third. American securities of all kinds were sold in very large amounts, and rumors circulated that at the settlement, which began on Wednesday morning, there would be an unusually large number of failures. Of course, there were also reports affecting important commercial firms. The rumors, as usual, were many of them quite unfounded, and all exaggerated. On Wednesday when the settlement actually began there was a very much better feeling. Only one small failure was an. nounced that day. As so many had been expected this was regarded as very reassuring. Even the appointment of receivers for the Erie, which was not known in London until Thursday morning, had not the effect most people feared, and in spite of the break in New York, prices here were main tained all through Thursday at about a dollar above those re ported from New York at the closing the previous day. On Thursday there was very influential buying both for British and Continental investors, the great fall in American securities having induced people to think that the worst had been nearly if not quite discounted. The Continental buying was by great capitalists, but the British buying was even of a better kind-the general investing public, in small amounts.

There is now a very much better feeling than has prevailed for a considerable time past, and if nothing unexpected happens in New York, probably investment buying will continue. Very much speculation in the American or indeed in any other department is not to be looked for just now, the losses having been so heavy and the prospect being so uncertain as yet. But investment buying will certainly go on unless it is checked by unforeseen accidents. There is unquestionably a very large amount of unemployed money. Investors have been holding aloof from all markets for a very long time past, and the fall that has taken place in so many American secu rities is sure, therefore, to attract steady buying. The best information here, likewise, is that there will be considerable

Continental buying. Most prices in the inter-Bourse department are looked upon as altogether too high, and it is thought that the greater Continental holders will sell Continental Government bonds for the purpose of buying American securities. Besides, the opinion is growing here that a default in Spain cannot now be much longer postponed. Up to the present the Spanish Government and the Bank of Spain have been able to obtain money enough in Paris to meet their most pressing engagements ; but the best opinion is that even the most venturesome Paris bankers will hesitate to go on lending. If that view spreads upon the Continent, the fear of troubles in Spain will lead to general selling on the Bourses and corresponding buying in the American department. A very unfavorable view, too, is taken here of Italian finances. The position in Italy is not as dangerous as in Spain, but it is unquestionably very bad, and unless a change of policy is quickly adopted matters must drift from bad to worse. The Colonial market is neglected. Nothing fresh is to be reported from the Far East, and the South American department is quiet. Yesterday, the last day of the Settlement, there were four small failures on the Stock Exchange, making nine since Monday morning.

The great coal lock-out has unfortunately begun. Over a quarter of a million of men cease working immediately, and about 60,000 others have given notice and are expected to go out next week. Altogether it is estimated that between 300,000 and 340,000 men will have struck work within the next week or two. Efforts are being made to induce the Scotch miners to support those of the Federation, but at present it is not thought likely that those efforts will succeed. The general impression is that the lock-out will not last long. The employers estimate that it cannot continue more than four or five weeks, and they are very confident that the men will have to give way. The miners, on the other hand, assert that they are in a position to hold out for a much longer time. and they profess to be quite as confident as the employers. The prospect of so great a strike, which is likely to disorganize almost every industry in the country, has not had as depressing an effect upon the market for British railway stocks as might have been expected. The Stock Exchange believes that the miners will give in in a very short time, and that the disturbance of business therefore will be much less than is generally supposed.

The railway dividends continue to be satisfactory considering all the circumstances. This week the Lancashire & Yorkahire has annonneed a distribution at the rate of 31/2 per cent, comparing with the same rate twelve months ago. The North Staffordshire rate will be 4 per cent, against 414 twelve months, ago, and the Metropolitan District Company will distribute on the preference stock 234 per cent, against 314 per cent at thitime last year.

The rates for money have been as follows:

	1	Igut e	-	Interest allowed for deposits by								
Londe	277	-	B	ank Bil	la.	T	rade Bil	ls.	Disc't H'			
	Bank		Three Months	Four Months			Four Months	Siz Months		At 7 to 14 Call. Days

Messrs. Pixley & Abell write as follows under date of July 27 :

July 27: Gold-A fairly good demand for gold has sufficed to clear arrivals off the open market, and only small amounts of coin have reached the Bank-In all, ±50,000. ±100,000 has been taken out for Turkey. Ar-rivals: Bombar, ±55,000; Cape, ±73,000; Chili, ±3,000; West Indies, ±51,000; New Zealand, ±4,000; total, ±166,000. Shipments to India July 21, ±10,000. Silver-The United States Treasury again declining to buy silver, in accordance with their law, more pressure to sell caused further weak-ness and prices fell to 32±4d. During this week scarcity of supply has somewhat hardened the market, and we quote to-day 32'sd. Arrivals: New York, ±142,000; Cape, ±,000; Chili, ±63,000; West Indies, ±43,000; total, ±258,000. Shipments July 21: Bombay, ±57,800; Calentta, ±30,300; China, ±315,953; Japan, ±12,500; Colombo, ±39,772. Mexican Dollars-There is good demend for the second

Mexican Dollars-There is good demand for these coin, but nothing . doing.

The quotations for bullion are reported as follows:

WALL STREET, FRIDAY, AUGUST 11, 1893-5 P. M.

The Money Market and Financial Situation .- This has been an important week on account of the meeting of Congress under a special call, for the express purpose of repealing a law that is palpably working great injury to the business interests of the country. The President's message was eminently satisfactory, but the strength of the true anti-silver men in Congress has not yet been developed. It might be of great service at this time if men at the West and South who are in earnest about the silver business would hold meetings of their Boards of Trade or Exchanges and definitely request their Senators and Representatives to vote for the unconditional repeal immediately, as the only method of restoring confidence.

The whole currency scare of the past few weeks has given rise to many absurdities. In the first place the depositors in savings banks and other banks that are well known to be solvent could not better themselves by withdrawing their deposits, as the currency in their hands (excepting gold) would be worth no more in case of depreciation than if it were left be worth no more in case of depreciation that if it were fert in the banks. Again, we have had the anomaly of currency of all sorts—gold, silver and silver certificates, coin notes, bank notes, &c.—commanding a premium over checks, which at times was as much as 5 per cent; but to-day this premium

broke down quickly to 1 per cent. The amount of gold already received and engaged to come from abroad may reach \$24,000,000, while the new national bank from abroad may reach \$24,000,000, while the new national bank currency thus far ordered this month is reported as \$17,000,-000, so that there is now in sight approximately \$41,000,000 of additional currency that is perfectly legitimate, and not calcu-lated to spread apprehension with every dollar of new issue like the pestiferous coin notes forced out under the act of 1890. The open market rates for call loans during the week on stock and bond collaterals have ranged from 2 to 6 per cent, the average being 5 per cent. To-day rates on call were 21/2 to 5 per cent. Commercial paper very difficult to negotiate; nominal quotations are 8 to 12 p. c. for the very best grades. The Bank of England weekly statement on Thursday showed a decrease in bullion of £2,290,000, and the percentage of reserve to liabilities was 42 99, against 46'11 last week; the discount rate was advanced from 3 to 4 per cent. The Bank of France shows a decrease of 2,924,000 frances in gold and 1,968,000 frances in silver.

1,968,000 francs in silver.

1,968,000 francs in silver. The detailed statement of the condition of the Clearing-House banks has been discontinued for the present, and will not again be issued so long as there are any loan certificates outstanding. The totals, however, are furnished as usual, and the figures for last Saturday (Aug. 5) as compared with those of the preceding Saturday show a decrease in the re-serve held of \$12,024,100, there being a deficit below the required reserve of \$14,017,800, against a deficit of \$4,301,675, the previous week :

and one in	1893 Aug. 5.	Differen'sfrom Prev. week.	1892. Aug. 6.	1891 Aug. 8.

Foreign Exchange.-The rates for sterling were strong and advancing all the week until Thursday afternoon, when the higher rate for money in London and the smaller exports of gold there, together with the reduced premium for currency here, led to a reduction in cables and demand bills. This here, led to a reduction in cables and demand bills. This decline continued to-day and a sharp break occurred under free offerings of bankers' bills, which were not fully ac-counted for. Actual rates of exchange are: Bankers' sixty days sterling, 4 80@4 81; demand, 4 85@4 85½; cables, 4 86@4 86½. The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savanah, buying ½ discount, selling par @ ½ premium; Charleston, buying par, selling 1-10 premium; New Orleans, bank, nominal; commercial, \$5 00.0 \$7 00 discount; Chicago, \$10 00 per \$1,000 discount, and later \$5.

Posted rates of leading bankers are as follows:

Aug. 11.	Sixty Days.	Demand.

United States Bonds .- The dealings in Government bonds continue large and prices have advanced nearly 1 per cent this week. The demand from national banks is now running more on the currency 6s, as showing a larger profit on circu-lation. The deposits for new circulation are still heavy, and from one large house dealing in Governments about \$7,000,000 bonds were sent to Washington this week. Quotations are as follows:

Fine gold bars... par 0'4 prem. U.S. trade dollars - 60 0 - -State and Railroad Bonds .- Sales of State bonds have

included \$3,000 Tenn. settlt. 3s at 65. Railroad bonds have been fairly active without much im-

Railroad bonds have been fairly active without much im-provement in prices. Many investment brokers are calling the attention of their customers to the low prices now ruling for dividend-paying stocks and mortgage bonds of good stand-ing. For those who have confidence that this great country will not debase its currency to a silver standard and thus dis-card gold as a part of its circulating medium, the present emergency offers a great opportunity for investment. In any event what is the prospect for such bonds as Atchison 1st 4s now selling at 71, Ches. & Ohio R. & A. 1st (4s after 1893) at 75, Chicago & Erie 1st 5s at 871%, Duluth S. Shore & At. 1st 5s around 90, Columbus & Hocking Valley consol. 5s at 75, Mo. Kan. & Tex. 1st 4s at 74, N. Y. Chicago & St. Louis 1st 4s at 90, Northern Pacific 2d 6s at 101, Rock Island 5s at 89, and many other bonds at similar prices? It is a fair inquiry to ask whether bonds of this sort are not likely to be good under any circumstances in the future that the principal is well secured the present prices offer tempting investments. investments.

Investments. Railroad and Miscellaneous Stocks.—The stock market have been expected from the activity of last week, as might have been expected from the activity of last week, and also on the first assembling of Congress. The highest prices reached on the active covering of shorts noted in our last report were not fully sustained, and the reactions have been more or less marked in the different popular stocks. It is generally believed, however, that there is still a very large short interest outstanding, and should the proceedings of Congress at any time assume such a shape that the repeal of the aliver purchase law seemed a foregone conclusion, there would probably be sharp covering. The market bore up re-markably well under the unfavorable bank statement of Aux. 5, as the peculiar currency situation is pretty well u -dive much relief. Some of the railroads are beginning?. They have be effects of decreased business in their gross earnings but all are reducing expenses as much as practicable. The roads profiting by the World's Fair passengers have yet nearly for the effect of the targe gold imports are expected invite much relief. Some of the railroads are beginning?. Now the effects of decreased business in their gross earnings what all are reducing expenses as much as practicable. The roads profiting by the World's Fair passengers have yet nearly for the effect of the targe gold in a much better position by be new arrangement for extending its maturing land grant ond. Of the general list there is not much of interest to be aid except what is shown by the daily range of prices given on another page. The tone to-day was strong at the close, silver bullion certificates have been much firmer, owing to a soluter bullion certificates have been much firmer, owing to a built the as a compromise. Railroad and Miscellaneous Stocks .- The stock market hope that the silver men in Congress may get in some substitute as a compromise,

ANNUAL REPORTS.

San Francisco & North Pacific Railway.

(For the year ending June 30, 1893.)

San Francisco & North Facilie Railway. (For the year ending June 30, 1893.) The annual report of this company is promptly issued for the year ending June 30, 1893. To the income table it will be seen that the surplus rev-enue for the year ending June 30, 1893, was \$61,745, against \$81,007 for the preceding year. This is not due wholly to a decrease in the earnings. The gross earnings for the past year were only \$10,194 less than the preceding year, and in analyzing the traffic receipts as compared with the preceding year it is apparent that the slight decrease in the passenger receipts is not attributable to any local effect, but to the general business depression and naturally large travel to the World's Fair. The camping, stage and excursion travel has been as heavy this year as it was the preceding year. The diminution in freight traffic is largely explained by the shrinkage in basalt block and tan-bark shipments. Notwith-standing the decrease in gross revenue, had it not been for extraordinary expenses of a betterment character (which might have been debited to capital expenditure instead of operating expenses), the net earnings for this year would have compared favorably with last. There has not been any change in the amount of the capital stock, but the bonded indebtedness of the company has been increased during the present year \$90,000. This issuance of first mortgage bonds was for an additional 3 27 miles of lateral track constructed below Guerneville and placed in operation in the Fall of 1892. This extension, necessary to reach the large belt of redwood timber, was made in accordance with

VOL. LVII.

-

a contract with the Sonoma Lumber Company, and will greatly accelerate the shipments of forest products, as the redwood belt thus reached will furnish heavy traffic for several years.

The statistics for three years have been compiled for the CHRONICLE as follows :

GENERAL INVESTMENT NEWS.

Baltimore & Ohio.—The gap between Morgantown, W. Va., and Uniontown, Penn., has been closed up by the com-pletion of the extension of the State Line railroad from Uniontown to the West Virginia State line, where connection is made with the Fairmount Morgantown & Pittsburg. The two roads were consolidated this week. They are controlled by the Baltimore & Ohio and will give the latter an air line from Pittsburg to Central West Virginia, developing a valu-able coal, coke and timber region. able coal, coke and timber region.

Called Bonds .- The following bonds have been called for payment :

WEST JEESEY & ATLANTIC R.R.-Bonds of 1880, numbered 188, 202, 240, will be paid Aug. 19, interest ceasing on that date.

Canadian Pacific .- It is announced that by September 15 the Canadian Pacific Railway will have completed a connec-tion between its main line and St. Paul, Minn., via the Minne-apolis St. Paul & Sault Ste. Marie RR., and after that date its through passenger trains will run from Vancouver via St.

through passenger trains will run from Vancouver via St. Paul, Duluth and Sault Ste, Marie. It is also reported that the Canadian Pacific Railway will take possession of the Montreal & Western and commence operat-ing that road as far as St. Jovitte on September 1 next. The new line is now completed to St. Jovitte, a distance of 51 miles from St. Jerome. Chicago & Texas-Grand Tower & Cape Girardeau-Grand Tower & Carbondale.—The Chicago & Texas has been organized to absorb the Grand Tower & Cape Girardeau and the Grand Tower & Carbondale, two small connecting roads in Illinois. Bonds and stock to the amount of \$2,500,000 each have been authorized. have been authorized.

Commercial Cable Company.—The authorized capital stock of this company is \$10,000,000, of which amount there was listed on September 24, 1889, \$6,716,000, and on May 14,

1890, \$1,000,000. The total amount issued and listed by the Exchange to date is \$7,716,000, leaving a balance in the company's treasury of \$2,284,000. The issue of this balance of the company's capital stock has been duly authorized by the Board of Directors, and the company now applies to the Governing Committee of the Stock Exchange to have the same regularly listed, making the total amount listed \$10,-000,000.

Balance transferred to the reserve fund \$559,467 The application was approved and the additional stock listed.

Detroit Bay City & Alpena.—While this road has showed improved earnings as compared with last year it is stated that the earnings have been applied to meet floating indebtedness and the company was obliged to make default on the coupon due July 1 on the first mortgage bonds. The interests of the bondholders are being looked after by Messrs. Drexel, Morgan & Co., who in expectation of a default on the previous coupon in January last then received the assents of a majority interest.

Fitchburg .- This road reports for the quarter and year ending June 30 as follows :

desilation convinces	-Quar.end	l.June 30	-Year ended	i June 30

Florida Central & Peninsular.—The statement telegraphed from Jacksonville last week that the Florida Central & Peninsular Railroad Company had been sold is untrue. The Florida Central & Peninsular Railroad Company is rapidly completing its extension to Savannah, and on Oct. 1 it will assume control of the South Bound Railroad from Columbia assume control of the South Bound Kalifout from Cohubina to Savannah, thus forming a short line in connection with the Atlantic Coast Line and the Richmond & Danville systems be-tween Tampa, Ocala, Jacksonville and Savannah, Washing-ton and New York.

Lehigh Valley-Philadelphia & Reading.—On the 8th inst. the Lehigh Valley Railroad Company, by permission of Judge Dallas, of the United States Circuit Court, terminated the lease to the Reading Railroad Company entered into Feb. 11, 1892. This action was taken in view of the continued default on the part of the Reading Coal & Iron Company in the pay-ment of the survey due under the contract between the Lehigh

on the part of the Reading Coal & Iron Company in the pay-ment of the sums due under the contract between the Lehigh Valley Coal Company and the Reading Coal & Iron Company. President Elisha P. Wilbur, of the Lehigh Valley Railroad, was discharged at his own request from the position of Re-ceiver of the Reading Railroad Company, and John Lowber Welsh was appointed his successor. A meeting of the Lehigh Valley Company directors was held at the company's offices in Philadelphia, and at its con-clasion a circular was addressed to the stockholders of the Lehigh Valley Railroad Company, which, among other things, said : said :

said : In view of the continued default on the part of the Philadelphia & Reading Coal & Iron Company in the payment of the sums due under the contract dated Febraary 11, 1892, between the Lehigh Valley Coal Company and the Philadelphia & Reading Coal & Iron Company, the Lehigh Valley Coal Company in the day declared said contract termi-nated; it being provided by the terms of the lease of the Lehigh Valley Railroad Company to the Philadelphia & Reading Railroad Company, the Lehigh Valley Coal Company this day declared said contract termi-nated is the long provided by the terms of the lease of the Lehigh Valley Railroad Company to the Philadelphia & Reading Railroad Company, be also at once terminated, your board have this day exercised said option. "The Board desires to call the attention of the stockholders of the company to the fact that the resumption by this company of its prop-erty has been effected at the most favorable period in the year for vuch resumption, the largest business of the company and the heaviest receipts being those of the autumn season, and that, by the comple-tion of the company has been greatly reduced by the payment of large part thereof in cash, and by the funding of a part into bonds, and the funding of the balance has only been deterred from an un-willingness to dispose of the company's securities at a time when the markets were unfavorable for the placing of such securities, except at a sacrifice. "At the present time the commany has in its possession first motea sacrifice.

a sacrifice. "At the present time the company has in its possession first mort-gage bonds on its coal and railroad properties amounting to \$14,000,-000 at par, and other available assets, against which the joint total outstanding liabilities of the Lehigh Valley Railroad Company and of the Lehigh Valley Coal Company are less than \$4,000,000. "It is of course probable that circumstances necessarily attendant on the resumption of our property at a period of extraordinary finan-cial stringency may result in a reduction of dividends, but it is hoped it will be only temporary, and that it an early day the healthy con-dition and earning capacity of your property will be proven to your entire satisfaction."

entire satisfaction." The petition of the Lehigh Valley Co. was based on the fact that the Philadelphia & Reading Coal & Iron Co. defaulted in its payment for the coal both in January and February last, and that on March 20 last there was due the Lehigh Valley Coal Company the sum of \$968,763 63. That promissory notes were given by the Philadelphia & Reading Coal & Iron Com-pany to the Lehigh Valley Coal Company for \$500,000 of the amount so due and unpaid, but that all of the notes are long since overdue and none of them paid, so that the gross amount is owing to the coal company.

is owing to the coal company. The receivers of the Philadelphia & Reading Railroad Com-pany and the Philadelphia & Reading Coal & Iron Company

answered the petitions of the Lehigh Valley Company assent-ing to the abrogation of the lease. They say: "The said re-ceivers answ. ing admit the truth of the averments of fact contained in said petitions, and particularly that they have been and are unable to make payment of the sum of \$968,-768:63 for coal purchased by the Philadelphia & Reading Coal & Iron Company prior to the appointment of the receivers, for which demand has been made by the Lehigh Valley Com-pany, as stated in its said petition, and said receivers are unable to deny that, under the terms of the contracts referred to in said petition, the Lehigh Valley Coal Company and the Lehigh Valley Railroad Company have the right to end the same and to exercise the right of entry, as in said petition set forth. forth

"The receivers further show that having given careful study to the question of the probable profit to be derived to the in-terests in their charge from a continuance of the contracts with said petitioners, they have reached the conclusion that it cannot be anticipated that the results of such operation will make them to meride a fund afficient to most the according enable them to provide a fund sufficient to meet the accruing rental upon the railroad and demised premises and also pay the arrears due for coal purchased prior to the appointment of the receivers; and as the receivers are advised that under the contracts referred to the Lehigh Valley Coal Company is entitled to demand immediate payment for said arrearages, and in default the set of the present the said arrearages. and in default thereof to peremptorily rescind the said agree-ment, and that thereupon the said railroad company is enti-tled to end and terminate said lease, the receivers, therefore, assent to the prayer of the said petitions and such order as your honorable Court may make in the premises."

Missouri Kansas & Texas—International & Great North-ern.—At Galveston, Tex., for several days, the attorneys for the M. K. & T. R. R. Co. and the International & G. N. were be-fore District Judge Stewart for the purpose of arguing the motion for a temporary injunction restraining the Interna-tional & Great Northern road from interfering with the contract entered into by the M. K. & T. with the Galveston Houston & Henderson Railroad to transport its trains to and from Houston. The argument of counsel developed the fact that the M. K. & T. intends attacking the validity of the 99 years' lease under which the International is operating the Galveston Houston & Henderson road, and that in return the International people will attack the organization of the Mis-souri Kansas & Texas system and dispute its right to do busi-ness in Texas, claiming that the M. K. & T. of Texas, which, Henderson, has no legal existence and is owned and controlled by the Missouri Kansas & Texas Railway of Missouri, a foreign by the Missouri Kansas & Texas Railway of Missouri, a foreign corporation, and that the contract entered into by the M. K. & T. with the Galveston Houston & Henderson road is void. On the application of the International's attorney Judge Stewart granted a further postponement until the 14th inst.

National Cordage.—On account of the continued stringency of the money market the Reorganization Committee of the National Cordage Company has decided to extend to assent-ing stockholders the option of postponing the payment of their second contribution, now due on August 10, until and including August 25, provided those who exercise this option pay interest on such postponed payments at the rate of 6 per cent per annum. The committee announces that steady prog-ress is being made in the perfection of unincumbered titles to the various properties, the cancellation of sub leases, the adjustment of accounts and liabilities, and in the ar-ragement of other matters preliminary to and forming a nec-essary part of the reorganization and of the security for the proposed readjustment of all the interests concerned. Some of the cordage manufacturers of the United States met this week at the office of the John Good Cordage & Ma-chine Company, in the Morris Building, at Beaver and Broad streets, for the purpose of harmonizing interests, advancing prices, and forming some kind of an association—possibly a National Cordage.-On account of the continued stringency

prices, and forming some kind of an association-possibly a trust.

prices, and forming some kind of an association—possibly a trust. Mr. John Good, President of the John Good Company, pre-sided and made an address. He said that the object of the meeting was to place the industry on an equitable and per-manent basis. A business for which there was yearly a de-mand amounting to \$25,000,000 must enter widely as an ele-ment of prosperity or deprivation into the lives of many people. It should therefore receive the protection of economic laws. Mr. Good said that during the past ten years the prices of sisal hemp varied from 3 15-16 cents to 11 cents a pound. From January 1 to July 1 of the present year they varied from 6¼ cents to 4% cents a pound. The cause of this extreme variation was the ruinous competition and antagonisms of the manufacturers who had sought to control the fibre market outside of the natural laws of supply and demand. "I hold that this evil can be and must be remedied," declared Mr. Good, "or the entire cordage industry will leave this coun-try. For if the price of raw material is raised by unnatural reauses, in like manner must the price be raised on the con-sumer, and what is left but for Congress to apply the usual remedy for all such evils, viz.: to lower the tariff upon the manufactured article and admit foreign competitors to supply the demand of this country?" Mr. Good, in conclusion, sub-mitted this proposition : (1) Let the manufacturers of cordage form a mutual protective and incorporated association, with constitution and he heave a con-

(1) Let the manufacturers of cordage form a mutual protective and incorporated association, with constitution and by-laws; each member of the association to file a suitable bond, or make a deposit of a certain amount of the stock of his company as a forfeit; (2) let this Associa-tion appoint a board of control, consisting of five members receiving salaries from the Association, each member of the board to give a suit-

able bond to the Association for the faithful performance of his duties; (3) this Board of Control shall be emnowered and it shall be its duty to have cognizance of and to regulate the price and the manner of pur-chase of all fibre used by the manufacturers of the United States belong-ing to this association; (4) this board of control shall have the power, and it shall be its duty to fix the prices of all manufactured products, and to provide such a system for the sale of such pro-ducts as will necessarily exclude the cutting of prices and the giving of rebates in the trade; (5) this board shall have the power and it shall be its duty to judge of violations of the constitution and by-laws of the Association, and to impose fines and penalties when necessary for such violations; (6) the board of all manufactured products, to condemn or to approve the same, and to require at least a standard of excellence required by foreign nations in the perfection of our manufactured products. But neither the board nor the Association should have the power to juditors of any manufacturer beyond fixing the prices and classifying the goods as specified above; (7) it should be the duty of the Association to take into consideration and to provide for the enactment of such measures and laws as may be necessary to meet the ends of the Association to the products of the products of the products of any manufacturer beyond fixing the prices and classifying the goods as specified above; (7) it should be the duty of the Association to take and laws as may be necessary to meet the ends of this Association to take into consideration and to provide for the enactiment of such measures and laws as may be necessary to meet the ends of this Association, to promote its harmonious growth and welfare, and to secure the protec-tion and prosperity of the great cordage industry of this country.

After discussion by other manufacturers, the following resolution was unanimously adopted :

Resolved, That in view of the disorganized condition of the cordage trade, it is the sense of this meeting that steps should at once be taken to place the business upon a more stable and profitable basis, and that with that end in view, and in order to effect concert of action in the trade, a committee be appointed to devise plans, to confer with con-cerns not here represented, and to submit the result of their action at an adjourned meeting; and that said committee shall consist of five and that they be appointed by the chairman.

The National Cordage Company was not represented, nor were the Tubbs nor Fitler companies represented at the meet-

ing. The meeting finally adjourned to meet again at the call of the President for the purpose of making this a permanent or-ganization. It was also resolved that an invitation to attend the next meeting be extended to those interests which were

not present. With reference to the non-representation of Not present. With reference to the non-representation of the National Cordage Company at the meeting of cordage manu-facturers in the office of the John Good Company the *Evening Post* reports that it was said authorita-tively that "the entire meeting, including Mr. Good, represented an ownership of not more than 1,000 of the 10,000 spindles engaged in the industry. The National Cordage Company owns about 6,200 spindles, and the remaining 2,800 are divided between four companies, as fol-lows: Edwin H. Fitler & Co. of Philadelphia, 800 spindles; the Tubbs Company of San Francisco, 500 spindles; the Pearson Company of Massachusetts, 600 spindles. These four compa-nies were unrepresented at the meeting yesterday. They are the only companies outside of itself that the National Cordage cares anything about, or wishes to combine with. A combi-nation with them is exceedingly probable. It is likely that the first thing the reorganized National Cordage Company will do after leaving the hands of the receiver will be to take steps to bring about this consolidation. It will then control about 90 per cent of the industry." the National about 90 per cent of the industry.

Texas & New Orleans.—The application of this railroad company for the listing of its consolidated mortgage bonds refers to its application dated December 3, 1883, for listing

first mortgage bonds, Nos. 1 to 1,620, secured by first mort-gage upon the company's main line from Houston to Ocange, 105'10 miles in length, and its first mortgage Sabine Division bonds, Nos. 1 to 2,075 (forming part of an authorized issue of \$2,575,000 of bonds) secured by first mortgage on the Sabine Division, extending from Sabiae City via Beamont to Rosk-land, 103'78 miles; also to the apolication dated April 21, 1893, for listing the balance of \$500,000 par value of said Sabiae Division bonds. It then states that this company under date of August 1, 1893, executed a consolidated mortgage upon its main line from Houston to Orange, and its Sabine Division or August 1, 1993, executed a consolidated mortgage upon its main line from Houston to Orange, and its Sabine Division from Sabine City via Beaumont to Rockland (making a total mileage of 203.88 miles), to secure consolidated mortgage bonds to be issued thereunder, and also as further security for the \$2,575,000 par value of Sabiae Division bonds above ra-ferred to. There are authorized to be issued under this, con-solidated mortgage:

The consolidated mortgage bonds are payable, principal The consolidated mortgage bonds are payable, principal and interest, in gold, at the office or agency of the company, in the city of New York, are dated August 1, 1893, due August 1, 1943; interest 5 per cent per annum, payable February 1 and August 1; total authorized issue, \$4,195,000; Nos. 1 to 4,195. Bonds have privilege of registration. Transfer office, Mills Building, 23 Broad Street, New York City. The said \$1,620,000 consolidated mortgage bends above re-

ferred to (being the bonds of this issue other than those ex-changeable against Sabine Division bonds) have been already sold and disp sed of by the company.

Gates, Assistant-Secretary and Assistant-Treasurer. The application was made to have \$1,620,000 consolidated mortgage bonds, Nos. 1 to 1,620, for \$1,000 each place1 upon the regular list, and this was approved by the Committee on Stock List.

Union Pacific —An important meeting of the Union Pa-cific Railroad directors was held this week at the office of Mr. George J. Gould. The meeting was called to consider the measures to be adopted for meeting the sinking fund 8 per cent bonds soon to mature. These bonds appear to be abund-antly secured by a surplus of land assets, but in the present silver-panic times ordinary assets are not immediately avail-able. The sinking fund 8 per cent bonds, amounting to more than \$5,000,000, will mature on September 1. A plan was agreed upon which gives to the present holders of the sinking fund bonds the opportunity to renew under present condi-tions and rate of interest for six years, the company reserving the right for the trustees to draw the bonds at par after the Union Pacific - An important meeting of the Union Pa-

first year or for the company to redeem the whole amount of the bonds after September 1, 1894. The matter was placed in the hands of a special committee, consisting of A. E. Orr, George J. Gould, E. F. Atkins and the Government director, E. Ellery An lerson. Subscriptions have been received from the directors for a considerable amount of the extended bonds on the terms mentioned. The company reserves the right to re-ject subscriptions in excess of \$3,500,000. Circulars have been issued to the bondholders. The company will anticipate the payment of the interest due on September 1 on all bonds presented for extension before that dats. The following state-ment was presented, showing the status of the bonds: Union Pacific Company usinking fund bonds outstanding January 1, 1893: first year or for the company to redeem the whole amount of

 500,000

 Balance \$3,369,902 Add estimated value of uasold land January 1, 1893...... 3,079,000 Total\$6,448,902

The amount \$6,448,902, less the amount \$3,771,334; shows the surplus of security in excess of the amount of indebted-ness to be provided for, namely, \$2,677.567.

The circular says: "No allowance has been made in the foregoing statement for the possible failure of purchasers to complete the pay-ments provided for in their contracts. It is believed, how-ever, that not more than \$400,000 in amount will ultimately be defaulted. But even if default be made, the lands under contract will again become subject to sale and will exceed in value the sums due upon them.

contract will again become subject to sale an I will exceed in value the sums due upon them. "Under the present mortgage the title to all unsold lands (and to lands already sold but still under contract), is vested in the mortgage tructees. The proceeds of all land sales are remitted directly to the trustee, and are applied, as in the trust indenture is provided, to the purchase and cancellation of the bonds secured thereunder. They do not pass into the company's treasury. Meanwhile, the tax so the unsold lands, the expenses of advertising or marketing the lands, and the interest on the outstanding bonds, have oeen paid, pursuant to the terms of the trust indenture, by the railway company, and will continue to be paid by the railway company under the extension agreement." * * * "The \$500,000 to be collected from January 1 to September 1, 1938, has in the greater part been received. The amount would have been materially larger were it not for the finan-cial troubles in the West, which have made collections for the past sixty days exceedingly difficult. "In view of the preceding statements, the company desires to enter into negotiations for an extension of the debt to run at the rate of eight per cent, as at present, the bonds to be payable in United States gold coin of the present weight and fineness, the holders of the bonds thus extended debt to have the benefit of all the security which they now enjoy. All moneys derived from the sales of land, the payment of inter-est on contracts, or otherwise, now covered by the mortgage shall still be remitted to the Trustee, and from time to time applied in the purchase of the extended bonds at not to exceed par and interest; or when bonds cannot be purchased within that limitation, then in the redemption of bonds to be drawn applied in the purchase of the extended bonds at not to exceed par and interest; or when bonds cannot be purchased within that limitation, then in the redemption of bonds to be drawn by lot by the Trustee thirty days prior to September 1st, 1894, and every six months thereafter, drawn bonds to be redeem-able at par and accrued interest at the due date of the coupon first maturing after such drawing, interest to cease on drawn bonds from and after such date. "The company reserves the right to pay off all outstanding bonds, with interest a crued thereon, on September 1, 1894, or at the date of the maturity of any coupon thereafter, by advertising for thirty days prior to such payment, interest on all bonds to cease after the date for payment, as advertised. "The Land Commissioner estimates that the trustee will re-

"The Land Commissioner estimates that the trustee will re-ceive during the period of the proposed extension, from par-tial payments on outstanding contracts or notes and from in-terest on such notes (excluding the sums to be derived from any sales made during that period), the following sums :

Year. Sept to Dec., 1893, and 1894 1895. 1896. 1897. 1898.	350,000 250,000 225,000 225,000	Interest. \$260,000 100,000 85,000 70,000 55,000 40,000	Total. \$1,450,000 450,000 335,000 295,000 280,000 265,000
1899	\$2,465.000	\$610,000	\$3,075,000

"An agreement providing for the extension of the sinking fund bonds on the general plan herein set forth has been made between the Union Pacific Railway Co. and the Union Trust Co. of New York, the trustee under the mortgage. Copies of the agreement may be had on application to the railway company or the trust company."

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, August 11, 1893.

The volume of business in staple commodities has continued unusually small. Unsettled financial conditions was the principal disquieting influence. and has led operators generally to confine all deals within the limit of the most imperative necessity. A further large number of manufacturing concerns has shut down in consequence of the poor sale for their products. The commercial community, however, is disposed to entertain a feeling of hope that the increasing import of gold and successful legislation by the specially convened session of Congress assembled this week will soon modify the existing monetary strain. The extreme dull condition of home trade is in part balanced by a very fair expert demand for agricultural products, although it requires the attraction of very low prices to secure foreign orders. Speculative dealing in leading articles of merchandise is practi-cally confided to protection of outstanding engagements. Generous rains are reported to have benefitted growing crops in the Scuth and Southwest, but in portions of the middle and Northern latitudes continued drought still excites apprehension.

Lard on the spot was in fair demand for export in the fore part of the week, but after prices had passed 81/2c. for prime Western the market became quiet. The close was steady at 8@8.25c. for prime City, 8.80c. for prime Western and 9.50c. for refined for the Continent. The speculation in lard for future delivery at this market has been quiet, but prices have advanced, owing to stronger advices from the West and small receipts of swine at primary points, closing steady.

DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
August delivery c.			8.30	8.60	8.90	8.65
September delivery c.		7.92	8.30	8.60	8.90	8.65
October delivery c.	8.02	7.85			8.80	8.50

for prince y choices is dull and weak at 7½c.@9½c. for State factory full cream. Fresh eggs are quiet and easy at 15½c.@
16c. for Western. Coffee has continued dull, almost to complete stagnation, Coffee has continued dull, Bio quoted at 16c. for No.

and prices were heavy all around. Rio quoted at 16c, for No. 7, good Cucuta 20@2014c. and interior Padang 23@2314c. Contracts for future delivery have failed to attract invest-ment demand; there was no baste to cover against short sales, and with further liquidation cost inclined to lower level. To-day some covering orders against sales in Europe gave a slight advance and steady tone slight advance and steady tone.

Raw sugars were shaded a fraction in cost, inducing more

Raw sugars were shaded a fraction in cost, inducing more trade, though purchases are made only against early wants. Centrifugals quoted at 3% c. for 96-deg. test and muscovado at 3% c. for 89 deg. test. Refined sugars have sold slowly and at generally steady rates; granulated quoted at 5% c. Teas again in buyers' favor; other staple groceries dull. Kentucky tobacco has been in slow demand but values hold firm; sales 150 hhds. to exporters and 50 hhds. to the home trade. Seed leaf tobacco has been without change and dull; sales for the week were 450 cases, as follows: 100 cases 1891 crop, State Havana. 12@20c.; 50 cases 1891 crop, New England Havana, 25@60c.; 100 cases 1892 crop, Ohio, 6@7c.; 100 cases 1891 crop, Wisconsin Havana, 9@11% c.; 50 cases 1891 crop, Zimmer's, 11@12c., and 50 cases 1891 crop, Dutch, 12@13c.; also 450 bales Havana, 70c.@\$1 10, and 125 bales Sumatra, \$2 85@\$4 25. \$2 85@\$4 25.

\$2.50@\$4.25. For straits tin the market has continued dull and prices have further declined, closing easy at 18:35c. bid. Sales for the week were about 100 tons. Ingot copper is dull at a further decline, closing at 9:65c. for Lake. Lead was without change and dull, closing at 3:00c. for domestic. Pig iron was dull and unchanged at 12:75c.@15:50c. Refined patterners without change and dull at 5:15c. in

unchanged at 12'75c.@15'50c. Refined petroleum is without change and dull at 5'15c. in bbls., 2'65c. in bulk and 5'85c. in cases; crude in bbls. is un-changed, Washington closing quiet at 4'85c. in bbls. and 2'35c. in bulk; naphtha 5½c. Crude certificates have been dull and the close was easy at 58¼c bid. Spirits turpentine has made a slight further decline, but the close was steady at 25½@25c. Roeins are dull and easy at 90@97½c. for common and good strained. Wool is dull and nominal. Hops are firm but quiet.

FRIDAY NIGHT, August 11, 1893. THE MOVEMENT OF THE CROP, as indicated by our telegrams THE MOVEMENT OF THE CROP, as indicated by our telegrams-from the South to-night is given below. For the week ending this evening the total receipts have reached 9,243 bales, against 10,713 bales last week and 10,205 bales the previous week, making the total receipts since the 1st of Sept., 1892, 5,070,710 bales, against 7,110,664 bales for the same period of 1891-2, showing a decrease since Sep. 1, 1892, of 2,039,954 bales.

Speculation in cotton for future delivery at this market remains within narrow bounds. During the current week there was at times a display of animation, but only temporary in character, and representing simply an effort among regular operators to attract outside attention to the market. They met with practically no success, however, the monetary strain still acting as a check for investing ventures, as well as greatly curtailing the handling of cotton for ordinary trade purposes. Additional mills have shut down or curtailed production, spianers in numerous cases refused to negotiate upon any reasonable basis, and some claim supplies enough under control to off set probable wants until late fall. Meanwhile old cotton has been available at receding cost, and new growth offering to s ome extent for this month's delivery, while the construction placed upon the week's crop advices was more favorable. Under the influence of the features noted the general tendency of values was downward despite advices, in consequence of observance of bank holidays in Liverpool. During that period weather reports were mending, and with moderate fluctuations prices gradually fell off. On Wednesday offerings were less free and a slightly better tone prevailed. Yesterday the tone was weak again in consequence of a somewhat better showing of crop condition in the Government report than had been expected, the compilation covering the dry period of July, and after a momentary struggle for steadiness the value line dropped about $\frac{1}{6}$ c. under selling out of local holders of long engagements. To-day's market opened easy but recovered and made a small gain over rates of last evening on rumors of more demand from European custom. Cotton on the spot has sold slowly at a further decline but closes steady. Middling uplands 7 11-16c.

 The imports into Continental ports the past week have

been 26,000 bales.

The above figures indicate a *decrease* in the cotton in sight to night of 378,100 bales as compared with the same date of 1892, an *increase* of 642,704 bales as compared with the corresponding date of 1891 and an *increase* of 1,238,104 bales as compared with 1890.

AT THE INTERIOR TOWNS the movement-that is the receipts for the week, and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1891-92—is set out in detail in the following statement.

* Louisville figures "net" in both years. † This year's figures estimated.

The above totals show that the interior stocks have decreased during the week 6,984 bales and are to-night 63,286 bales less than at the same period last year. The re eipts at all the towns have been 1,371 bales more than the same week last year and since Sept. 1 they are 1,192,219 bales less than for the same time in 1891-92.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.-Below we give closing quotations of middling cotton at South-ern and other principal cotton markets for each day of the week.

Week ending	-		and the second		and the second		
August 11.	Satur.	Mon.	Tues.	Wednes.	Thurs.	Ers.

The closing quotations to-day (Friday) at other important Southern markets were as follows:

Atlanta	7	Little Rock	738	Newberry	74
Columbus, Ga.		Montgomery	7	Raleigh	719
Columbus, Miss		Nashville	74	Selma	74
Eufaula		Natchez	7116	Shreveport	634

RECEIPTS FROM THE PLANTATIONS.—The following table Indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week Ending—		Receipt	satthe	Ports.	Stikat	Interior	Towns.	Rec'pts from Plant'ns,			
		1891.	1892.	1893.	1891.	1892.	1893.	1891.	1892.	1893.	
July	7	8,907	12,874	18,381	93,845	174,544	125,780		4,794	6,771	
**	14	11,172	16,176	15,762	86,677	165,696	120,466	7,004	7,328	10,418	
**	21	8,902	12,075	11,091	71,763	159,289	110,269		5,668	894	
**	28	7,330	5,979	10,205	66,676	155,507	97,788	2,243	2,197		
Aug.	4	6,850	8,656	10,713	61,586	152,473	91,651	1,760	5,622	4,576	
34	11	7,881	6,101	9,243	57,237	147.953	81.667	3.535	1,581	2,259	

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1 in 1892-93 are 5,026,743 bales: in 1891-92 were 7,202,688 bales; in 1890-91 were 6,958,247 bales.

2.—That, although the receipts at the outports the past week were 9,243 bales, the actual movement from plantations was only 2,259 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 1,581 bales and for 1891 they were 3,535 bales.

WEEKLY OVERLAND.—In consequence of the smallness of the cotton movement, the detailed statements of weekly over-land will be omitted until the beginning of the new crop year.

AMOUNT OF COTTON IN SIGHT AUG. 11.-In the table below we give the receipts from plantations in another form, and add to them the net overland movement to Aug. 11, and also the takings by Southern spinners to the same dite, so as to give substantially the amount of cotton now in sight.

	The state of the s	1892-93.	1891-92.	1890-91.
	Receipts at the ports to August 11 Interior stocks on Aug. 11 in excess of	5,070,710	7,110,664	6,915,580
1	September 1	*43,967	92,024	42,667
	Total receipts from plantations Net overland to August 11 Southern consumption to August 11	\$17,728	7,202,638 1,183,012 617,000	
	Total in sight August 11	6,531,471	9,002,700	8,567,511

Northern spinners' takings to August 11 1,709,657 2,178,092 2,000,406 * Decrease from September 1.

It will be seen by the above that the decrease in amount in sight to night, compared with last year is 2,471,229 bales and the falling off as compared with 1890-91 is 2,036,040 bales.

sight to night, compared with last year is 2,471,229 bales and the falling off as compared with 1890-91 is 2,036,040 bales. WEATHER REPORTS BY TELEGRAPH.—Our telegraphic re-ports this evening indicate that there have been good rains over about one half of the State of Texas, and that in many other sections there has been sufficient moisture. On the other hand, the drought continues in a considerable portion of Texas, and at points in Arkansas and Tennessee rain is needed. The effect of the rain in Texas has been principally to arrest further damage, as the prospects of yield are said to be already much reduced. Picking is becoming more general and a number of new bales are reported this week. There are com-plaints of boll worms and caterpillars in some districts. *Galveston, Texas.*—Sixty-one bales new cotton received this week, making 341 bales for season to date. Over about half of the cotton region of Texas there have been good rains, greatly benefitting crops. But over the other half there has been no adequate rain. Both corn and cotton are irreparably cut short already and the yield will fall far short of last year. We have had rain on two days of the past week, the rainfall reaching eighty-eight hundredths of an inch. The thermome-ter has averaged 80, ranging from 71 to 83. *Palestine, Texas.*—There have been splendid rains on five days of the week, arresting the damage to cotton, although it is irreparably injured. Rain was too late for corn. The precipitation reached three inches and two hundredths. The thermometer has ranged from 63 to 90, averaging 79. *Huntsville, Texas.*—We have had magnificent rains on four

days of the week, helping cotton much, but the already ac-crued damage ca not be retrieved. All late corn is ruined and not worth gathering. The rainfall has been four inches and five hundredths. Average thermometer 84, highest 96 and lowest 72.

and rive hubbends. Average distributient of a highest so and lowest 72. Datas, Tzzas.—It has rained finely on four days of the week, but the rainfall was insufficient. Both corn and cotton are injured past recovery. The week's rainfall has been one inch and sixty eight hundredths. The thermometer has aver-aged 80, the highest being 90 and the lowest 68. San Antonio, Texas.—The weather has been dry all the week, and crops are suffering from drought again about as bad as ever. Croos are injured very badly. The thermome-ter has averaged 85, ranging from 74 to 96. Luling, Texas.—It is no : too late for rain to do any good. Cotton is very badly cut short and all late corn is ruined. We have had one scalding shower during the week, with a pre-cipitation of but two hundredths of an inch. The thermom-eter has ranged from 72 to 96, averaging 84. Columbia, Texas.—There has been no rain during the week and crops are suffering. Average thermometer 84, highest 96

and crops are suffering. Average thermometer 84, highest 96 and lowest 72.

Ouero, Texas .- One insignificant shower the past week has done no good, and crops are suffering as badly as ever. The yield will be very short. Picking is active. The precipita-tion reached thirty-nine hundredths of an inch. The thermometer has averaged 87, the highest being 100 and the lowest 74.

Brenham. Texas.—We have had beneficial showers on three days of the week, the rainfall reaching eighty-seven hun-dredths of an inch. Not enough rain yet. Picking is active. The thermometer has averaged 86, ranging from 72 to 100.

Belton, Texas.—There have been welcome rains on three days of the week, greatly helping cotton, but corn is past all help. The precipitation reached one inch and ten hun-dredths. The thermometer has ranged from 60 to 94, aver-

aging 77. Fort Worth, Texas.-We have had gool showers on days of the week, to the extent of seventy-five hundredths of an inch, but not near enough. Crops are suffering badly and are injured beyond recovery. Average thermometer 80, high-est 95, lowest 66.

Weatherford, Texas.—We have had showers on five days of the past week, doing some good, but nothing will do much good now, as both corn and cotton are injured past redemp-tion. The rainfall reached eighty-seven hundredths of an inch. The thermometer has around \$1 the block of an The thermometer has averaged 81, the highest being 94 and the lowest 68.

94 and the lowest 68.
New Orleans, Louisiana.—Rain has fallen on three days of the week, to the extent of sixty-nine hundredths of an inch. The thermometer has averaged 81.
Shreveport, Louisiana.—Worms are becoming troublesome. Cotton has been damaged by drought on hill lands. There has been rain on two days of the week, the rainfall being twenty-two hundredths of an inch. The thermometer has ranged from 69 to 96, averaging 81.
Lake Charles, Louisiana.—There has been abundant rain and sunshine the past week and everything is growing vigorously. Average thermometer 72.7, highest 88, lowest 58.
Cclumbus, Mississippi.—Boll worms and caterpillars are reported in prairies, but no damage as yet. Rain has fallen on three days of the week to the extent of thirteen hundredths of an inch. Thermometer has averaged 82, the highest being 102 and the lowest 66.

102 and the lowest 66.

Meridian, Mississippi.—The cotton crop is opening nicely. Rain has fallen on two days of the week. The thermometer has ranged from 67 to 97.

Leland, Mississippi .- Caterpillars are reported all over county and there are some boll worms. But very little damage has been done as yet. It has rained on one day of the week, the precipitation reaching forty-five bundredths of an inch. The thermometer has averaged 79, ranging from 65 to 91

to 91. Little Rock, Arkansas.—On Tuesday evening we had a show-er and there have been light sprinkles on two other days of the past week. This moisture has done good to corn and gardens, but hardly sufficient for the purpose. Rain enough for cotton and the crop in this section is good to date, with promise of satisfactory results if there are a few more rains between this and the middle of September. Rainfall thirty-eight hundredths of an inch. Average thermometer 80.7, highest 94 and lowest 70. Helena, Arkansas.—There has been one sprinkle the past

highest 94 and lowest 70. Helena, Arkansas.—There has been one sprinkle the past week, the rainfall reaching two hundredths of an inch. Heavy rains are reported in the neighborhood, but rain not extensive. Some planters think this section will make an average crop, or more than last season. The thermometer ranged from 68 to 94, averaging 80. Memphis, Tennessee.—The weather has been dry and hot all the week, except one miserable shower on Thursday, but heavier rains bave fallen in other sections. Crops generally need a soaking rain. The rainfall reached three hundredths of an inch. The thermometer has averaged 82.7, the highest

of an inch. The thermometer has averaged 82.7, the highest being 95.9 and the lowest 69.8. Nashville, Tennessee.—The cotton crop is in good condition.

The thermometer has averaged 79, ranging from 61 to 91. Mobile, Alabama.—Crop reports are very satisfactory and picking is in progress in some sections. Five new bales have been received to date. We have had rain on four days of the week, the rainfall being eighty-seven hundredths of an inch. The thermometer has need for an order of an inch. The thermometer has ranged from 72 to 90, averaging 81.

Montgomery, Alabama.—We have had rain on four days of the week, the rainfall reaching one inch and fifty-four hun-dredths. Average thermometer 80, highest 88, lowest 72. Selma, Alabama.—The maturity of the crop has been de-layed by the frequent rains, but as yet no damage has oc-curred. Caterpillars are being poisoned in some sections. We have had rain on four days of the week, the rainfall being three inches and fourteen hundredths. The thermometer has corrected 81, the highest baing 90 and the lowest 71.

three inches and fourteen hundredths. The thermometer has averaged 81, the highest being 90 and the lowest 71. *Madison, Florida.*—Crop reports continue favorable. Rain has fallen on three days of the week to the extent of eighty-six hundredths of an inch. The thermometer has ranged from

70 to 89, averaging 81. Columbus, Georgia.—We have had showers on two days, the precipitation reaching fifty-eight hundredths of an inch. Av-

erage thermometer 83, highest 90 and lowest 77. savannah, Georgia.—There has been rain on six days of the week, the precipitation reaching one inch and nineteen hundredths. The thermometer has averaged 80, the highest being 92, and the lowest 70.

being 92, and the lowest 70. Augusta, Georgia.—Accounts from the crop are not good. Warm days and cool nights have caused rust and shedding to a considerable extent. First new bale reached here on Monday. Two received to date. It has rained lightly on three days of the week, the rainfall reaching fifty-five hun-dredths of an inch. The thermometer has averaged 79 and ranged from 66 to 89. Charleston, South Carolina.—There has been rain on four days of the week, the rainfall reaching three inches and twenty-five hundredths. The thermometer has ranged from 70 to 90 averaging 79.

twenty-five hundredths. The thermometer has ranged from 70 to 90, averaging 79. Stateburg, South Carolina.—Cotton is doing well. We had rain on four days in the early part of the week, the precipita-tion reaching two inches and twenty hundredths. Average thermometer 75'9, highest 84. lowest 66. Wilson, North Carolina.—Telegram not received. The following statement we have also received by telegraph s owing the height of the rivers at the points named at 3 o clock August 10, 1893, and August 11, 1892.

A cantar is 98 pounds.

This statement shows that the receipts for the week ending Ang. 9 were — cantars and the shipments to all Europe 8,000 bales.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market is dull but steady for yarns but firm for sheetings. The demand for India is poor, but for China is good. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison: comparison:

		1893.		1892.

COTTON CROP CIRCULAR.-Our Annual Cotton Crop Review will be ready in circular form about Thursday, the 7th of September. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to ensure early delivery.

JUTE BUTTS, BAGGING, &C .- The demand has been very light for jute bagging during the week under review. The close to night is at 4½c. for 1¾ lbs., 5c. for 2 lbs. and 5½c. for standard grades. Manufacturers are pretty well stocked up, and jute butts have been very quiet. Quotations are 1 1-16c. for paper grades and 1%@1¾c. for bagging qualities.

THE AGRICULTURAL DEPARTMENT'S AUGUST REPORT.-The following statement, showing the condition of cotton, was issued by the Department of Agriculture on August 10:

The condition of cotton is reported at 80.4, a decline of a little over two points since last month. This is the lowest average for August ever given out by the Department. The averages by States are: For Virginia, 88; North Carolina, 84; South Carolina, 75; Georgia, 83; Florida, 92; Alabama, 79; Mississippi, 81; Louisiana, 89; Texas, 72; Arkansas, 89; Tennessee, 83. The general averages in August for several years are as follows: 1892, 82.5; 1891, 88.9; 1890, 89.5; 1889, 89.3; 1888, 87.3, and in 1887 it was 93.3.

it was 93.3. The present low condition is the consequence of an excess of rain in the early part of the season, followed by hot, dry weather during the month of July. Rust is reported as a cause of injury to the crop in the States of Alabama and Mississippi, and the boll worm and cater-pillar have damaged the crop more or less throughout the States of Alabama, Louisiana, Texas and Arkansas. Shedding is also reported as occurring in some localities. Since the 1st of August the drought has been broken and rain has visited the cotton belt, excepting parts of Tennessee, Mississippi and Texas, where it is badly needed. In some portions of Mississippi and Alabama too much rain for the good of cotton is announced. Collecting the three monthe', Gaurers of the present

Collecting the three months' figures of the present season, and comparing them with the reported condition for the same months of last season, we have the following results:

		1	893.		1892.

SELMA'S FIRST BALE.—Our correspondent at Selma tele-graphs us this evening that the first bale of new cotton reached that point to day. Last year the earliest arrival was on August 12, or one day later. In 1891 the first bale was re-ceived on August 6 and in 1890 on August 4.

EAST INDIA CROP.-The following is from the Bombay Prices Current of July 14:

Current of July 14: Telegrams to hand from the cotton-growing districts on Monday morning reported a further fall of rain-ranging from 5½ inches at Agra to ¼ fuch at Dhollera-over the whole of the area since the pre-vious Thursday. In the latter district sowing had not commenced, owing to too much rain; and at Broach field operations were inter-rupted, and the crop will have to be re-sown; but generally the plants were doing well in the seasonable weather, though a break was needed in parts of the B+ngal circle. Meantime the fall has been only partial, and this morning's messages state that the plants were flourishing in nearly all the districts, or that sowing was making good progress, more rain, however, being needed at Khangaum, in the Oomra circle. Re sowing had begun at Broach.

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per latest mail returns, have : eached 20,659 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday. NEW YORK-To Liverpool, per steamers Holbein, 1,185 1 517

BREADSTUFFS.

FRIDAY, Aug. 11, 1893.

The market for wheat flour during the past week has been a very dull and stupid one ; buyers are quite indifferent, and the fancy grades of spring patents have declined under a pressure to sell. The low grades of winter flour, however, are steady in consequence of limited supplies. Rye flour has met with a moderate trade at steady prices. Cornmeal has sold slowly, but values are without change and steady. Today the market for wheat flour was a trifle steadier in response to the advance in wheat, with a moderate business done in winter straights and spring patents.

The excitement noticed in the market for wheat futures last week has entirely disappeared. Immediately after our last prices made a moderate advance on unfavorable crop advices from the West and the belief that the Sherman law would be speedily repealed; but subsequently the improvement was lost under better crop accounts from the Northwest and a slight tinge of disappointment among some operators over the President's message. Yesterday, however, in anticipation of an unfavorable report by the Agricultural Bureau prices again advanced. In the spot market the inquiry from shippers is less brisk, but the purchases still reach a fair total, and yesterday the sales in_ cluded No. 2 hard winter at 1c. under September in elevator, and No. 2 red Toledo and Detroit at 11/2c. under September delivered. To-day the market was fairly active and higher on buying by "shorts" to cover contracts, stimulated by a much more unfavorable Government report than expected, better domestic exchange and stronger foreign advices. The spot market was firmer but quiet. The sales included No. 2 red winter at 11/2c.@11/2c, under September delivered and No. 2 hard winter to arrive at 81/2c, under December delivered. DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT

Early in the week the market for Indian corn futures was firm and prices scored a moderate advance on a demand from firm and prices scored a moderate advance on a demand from "shorts" to cover contracts on reports of damage to the crop by dry, hot weather. Later, advices from the West, stating that rains had fallen caused a reaction, but yesterday the market was again stronger on a renewal of crop damage re-ports by drouth and an expected unfavorable Government report. The spot market has been dull, but supplies are limited and values hold firm. Yesterday the sales included No. 2 mixed at 48%/gd481%c. delivered. To-day, despite the unfavorable report by the Agricultural Bureau, the market eased off a trifle on reports of rain West. The spot market was firmer but dull. Sales included No. 2 mixed at 47%/c. in elevator and 48%/gd481%c. delivered.

AGRICULTURAL DEPARTMENT'S AUGUST REPORT, -The report of the Department of Agriculture for August 1 respecting cereal crops was issued on August 10, as follows :

State 6-rowed..... @ ...

port of the Department of Agriculture for August 1 respect-ing cereal crops was issued on August 10, as follows : The August report of the Statistician of the Department of Agri-culture shows that the condition of corn has declined a little over 6 points during the past month, the average for the entire breadth be-ing 87, as axainst 93.2 for the month of July. This decline is due in the main to the drought which has proved both extensive and persis-tent. While in some parts of the country the continued dry weather has injured the crop beyond recovery, it is nevertheless true as to the larger portion of the area devoted thereto that improvement is not only possible but with a sufficient rainfall through the month of An-gust will be assured. The averages in the principal States are: Ohio 85. Indiana 79, filinois 81, Iowa 102, Missouri 95, Kansas 82, Ne-braska 84. There has been a considerable falling off in the condition of spring wheat since last month, amounting to something over 10 points, the average condition the present month being 67, as against 72.4 for the month of July. The condition by States is as follows: Wiscomain 70, Minnesota 67, Iowa 77, Nebraska 78, South Dakota 63, North Dakota 66. This decline of 10 points is the result of the too high temperature and deficient rainfall in the spring-wheat States. The drought has provalied over extensive areas and has done much damage. Much injury also has been due this crop by the chinch bug and rust in several of the States. The condition of spring rye in August for many years, and is during the latter part of June and the whole of July. The lowest teordition at 88-2 is at month, while in August 1892, it stood at 86-2. The August returns for barley show a slight decline in condition from that of last month, being 84-6, against 85-3 in July, and precisely the same as it was in the month of June. The August returns for barley show a slight decline in condition from that of last month, being 84-6, against 80-3, as compared with 1892, and condition at 88-3

cause of this failing off, and rain is needed badly to prevent further disastrous losses. The condition of the timothy erop is 89.6, as compared with 93.2 in 1892.

1892. The hay crop on the whole is large and has generally been secured in good condition, although in some important regions unfavorable conditions caused a reduction of the crop. The general average of tobacco fell from 93 on July 1 to 82.2 on the 1st instant.

Ist instant. A still further decline in the condition of apples is made evident by the roturns of August. The indication that the commercial crop would be very light is confirmed at this date. In many of the States a complete failure is reported. The drought has done damage to peaches in the Atlantic peach belt. Complaints are frequent of prema-ture ripening. Conditions still point to a large crop in this section, however, and local showers have benefited some localities. A further decline is noted in Michigan, where fruit has dropped severely. Call-fornia has a good crop of excellent quality. An abundant crop of grapes is promised at this date. The percentages of July have generally been well maintained. Dry weather has tended to check the spread of rot and mildew.

The movement of breadstuffs to market is indicated in the York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending Aug. 5, 1893, and since August 1, for each of the last three years:

THE DRY GOODS TRADE.

NEW YORK, Friday, P. M., August 11, 1893. New YORK, Friday, P. M., August II, 1893. Reports of business at first hands fail to reveal any material improvement on late experiences. Although the presence of more buyers in the market seems to indicate an increasing interest in the situation, actual results do not show an ex-pansion in the business passing. Orders are uniformly small for all descriptions of merchandise, and there is still but little provision being made for future requirements. Road busi-ness is just as indifferent as spot trade. The tone of the market is weak and prices irregular, but no further reduc-tions in open quotations have been made. The stoppage of textile fabrics by some twenty-five per cent. Stocks are fairly large, but are not likely to increase abnormally under present conditions. In the jobbing trade a better demand has been noticeable than at any time since the opening of the season. Individual purchases seldom show any expansion, but there are more buyers operating. Collections at first hands are without improvement, but slightly better with job-bers. The failure of James A. Walker & Co. of Chicago at the close of last week was hardly a surprise to the market, upon which it exercised singularly little influence. Domestric WoolEns.—This department has passed through Reports of business at first hands fail to reveal any material

which it exercised singularly little influence. DOMESTIC WOOLENS.—This department has passed through another exceedingly dull week. Buyers show, if anything, less disposition than before to place orders for goods not ab-solutely required, and these requirements are evidently abnormally small. Prices are weak and irregular but apparent cheapness is no temptation to either jobbers or wholesale clothing manufacturers. A number of the largest mills have cut down their production materially while others have closed entirely, but this does not so far impart any steadiness to values in men's-wear materials. More business is doing in dress goods by jobbers and occasional small dupliis doing in dress goods by jobbers and occasional small dupli[VOL. LVII.

cate orders are reported by agents. Carpets, flannels and blankets are all inactive.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending August 8 were 1,302 packages, valued at \$104,945, their destination being to the points specified in the table below:

NEW YORK TO AUGUST 8.	pars-7	1893.	1892.

From New England mill points direct.

[•] From New England mill points direct. The value of the New York exports since January 1 have been \$5,012,027 in 1893 against \$6,801,953 in 1892. Orders for staple domestics continue small, and the business recorded in brown sheetings, bleached shirtings, wide sheet-ings and colored cottons of all kinds has not risen above previ-ous restricted dimensions. Prices are unchanged all round so far as open quotations go, but with actual business in view sellers are easy to deal with, and much quiet irregularity exists. All other staple cotton goods are entirely without change from last report. More business in dark prints is re-ported by jobbers, but the demand at first hands continues slow in the extreme. Ginghams are neglected all round. The print cloth market is stagnant. Prices are nominal on the basis of 234c. for 64 squares. The current production of Fall River mills has been reduced by stoppages of machinery by some 100,000 pieces per week, but stocks show a further increase. increase

FOREIGN DRY GOODS.-A slight increase in small orders for dress goods and silks is reported in this department, but business is much below seasonable dimensions. The stock of unsold foreign merchandise is considerable, having been in-creased by numerous cancellations of import orders. Prices are unchanged in the absence of general demand.

Importations and Warehouse Withdrawals of Dry Goods. The importations and warehouse withdrawals of dry goods

STATE AND CITY DEPARTMENT.

TERMS OF SUBSCRIPTION.

Commercial and Financial CHRONICLE contains 40 to 64 pages published every week. State and City Supplement of CHRONICLE con-

tains 180 pages published periodically.

Investors' Supplement of CHRONICLE (a Cyclo pædia of Railroad Securities) contains 160 pages published every other month.

Subscription to CHRONICLE for one year \$10.00, which includes every issue of both SUPPLEMENTS.

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the STATE AND CITY SUPPLEMENT. In other words, with the new facts we shall give, the amplifications and corrections we shall publisb, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the STATE AND CITY SUPPLEMENT to as near the current date as possible. Hence if every Subscriber will note in his SUPPLE-MENT on the page designated at the head of each item a reference to the page where the item in the CHRONICLE can be found, he will at all times possess a complete and fresh cyclopædia of information respecting Municipal Debts.

NEW ASSESSMENTS AND APPROPRIATIONS.

We give below a number of statements showing the results of recent assessments for taxation, the newly fixed tax rates in many municipalities, and in a few cases the amount of the appropriations made to meet the expenses of the coming year. For convenience of reference the statements are arranged alphabetically.

BOSTON, MASS-The Assessors' report of tax valuations in this city for 1893 rates the real estate at \$707,763,300, a gain of \$27,482,200 on the 1892 valuation, and personal property is valued at \$216,372,000, showing an increase of \$2,676,200. The total increase in both real and personal property is \$30,-158,400. The tax rate for 1893 has been fixed at \$12 80 per \$1,000, including the county tax, \$0.75; State tax, \$0.92, and city tax proper, \$11.13. The following statement gives the assessed valuation and tax rate at various periods since 1870.

	A	sessed Valuation	n Ral	e of Tory
Years-	Real	Personal.		\$1,000.

umber of polls this year is 139,757, against 136,375 in 1892.

BRAINTERE, MASS .- According to the report of Braintree Assessors recently made public the valuation of real estate for the year 1893 is \$3,329,025; personal property, \$1,096,125; total assessed valuation, \$4,425,150. These figures show a gain of \$202,350 over the total valuation last year and an increase of \$975,500 since 1890. The tax rate for this year has been fixed at \$16 80 per \$1,000.

BROOKLYN, N. Y .- The Brooklyn assessments for this year show an increase of \$19,384,804 on the valuation of real estate in 1892 and an increase of \$2,907,223 in the valuation of personal property. The 1893 figures are given in the following table, in comparison with those for previous years, which are taken from our STATE AND CITY SUPPLEMENT.

			A REAL PROPERTY OF A REAL PROPER	
	AI	ssessed Valuatio	om	Rate of Tax

According to the recent report of the Board of Assessors, only five wards out of the city's twenty-eight show a decrease in the valuation of real estate during the past year, and in three of these cases the decrease is accounted for by the reapportionment of property since the 1892 assessment was \$51,404,543 and the increase for the year \$10,579,863.

made. A part of the Eighth Ward has been included in the Twenty-second, a part of the old Twenty-second Ward has been taken into the Ninth, and the present Twenty-third Ward includes a part of the old Twenty-fifth. The Fourth and Nineteenth wards include the same territory as last year, and their real estate valuation has been decreased by \$769,347 and \$170,670 respectively. The ratio of assessed valuation of improved real estate to actual value is quoted at about 70 per cent, while in the case of unimproved real estate the ratio is about 50 per cent. The total valuation of property exempt from, taxation, as made by the Brooklyn Board of Assessors, is \$78,213,875, divided as follows: Navy Yard, \$24,000,000; church property, \$13,207,000; cemeteries, \$7,320,-000; Pratt Institute, \$1,200,300; Kings County property, \$2,-170,300; church parsonages, \$134,700; ministerial exemptions, \$101,700; New York State armories, \$557,600, and public buildings, fire stations, police stations, parks and bridges, \$21,954,030. The city's tax budget for 1894 amounts to \$11,-165,835, an increase of \$557,453 on the total amount allowed for 1893. A part of the increase this year is necessitated by deficiencies which occurred last year.

DENVER, COL.-Property within the limits of the city of Denver has been valued for taxation this year at \$76,556,090, this being an increase of \$3,005,675 on the valuation for 1892. In reporting the figures for 1893 to Mayor Rogers, the County Assesssor writes as follows : "The limits or boundaries of the city of Denver for assessment purposes for 1893, according to my construction of the law, are the limits or boundaries as they existed on January 1, 1893, when the assessment commenced."

The city attorney has been instructed by the council to take steps to have the recently-annexed portions of the city assessed. Real estate is said to be valued for taxation at about 1-5 to 1-3 of its actual market value.

FITCHBURG, MASS.-The Fitchburg Common Council has passed this year the largest appropriation bill which has ever been presented in that city. The total amount is \$370,255, including \$71,482 for interest and sinking funds and \$80,080 for school building and school support. The total valuation of real and personal property last year was \$17,065,545 and the tax rate was \$16 40 per \$1,000. The valuation for this year has not yet been reported.

HOLYOKE, MASS .- Holyoke's tax rate for 1893 has been fixed at \$15.80 per \$1,000 and the tax-payers are well pleased that at this period of depression in the money market the assessors should be able to determine upon a much lower rate than has been levied in a number of years past. The assessed valuation of real estate for 1893 is \$19,032,550; personal property, \$6,090,850; total assessed valuation, \$25,123,400; and the gain on last year's assessment is \$1,150,110. In the following table the figures for this year are given in connection with the valuation and tax rate in previous years, as reported in our STATE AND CITY SUPPLEMENT.

	A.	sessed Valuatio	n	Rale of Tax
Years-	Real	Personal	Total	per \$1,000.
1893	\$19,032,550	\$6,090,850	\$25,123,400	\$15:80
1892	18,231,520	5,741,770	23,973,290	17.50
1890	16,914,870	5,158,955	22,073,825 16,874,635	18.00 18.20
1886			13.374.005	15.40

The tax levy for 1893 amounts to \$425,039, of which \$366,-961 is for city purposes, while in 1893 \$445,489 was raised, of which \$399,080 was for city use. The assessed valuation of real estate is reported to be about 60 per cent of its actual cash value.

HUDSON COUNTY, N. J .- The Hudson County Tax Board has completed its tables for 1893-94, the result showing \$130,-209,002 of real estate and \$11,382,210 of personal property; total, \$141,591,212. This rating makes the increase in the valuation of real estate \$6,821,366 since the rolls for 1891-92 were made up, the increase in personal property valuation being \$1,274,792. Hudson County, it will be remembered, includes the cities of Jersey City, Hoboken and Bayonne.

JERSEY CITY, N. J.-Jersey City's tax budget for 1893-94 amounts to \$1,979,693, which is a decrease of \$148,458 on the amount allowed last year. The tax rate will probably be \$27 56 per \$1,000 against \$28 40 in 1892.

KANSAS .- The State Board of Railway Commissioners in Kansas have reported the total valuation of railway property for the year 1893 at \$61,984,407, the 1892 valuation being

MISSOURI .- The State Board of Equalization has completed an assessment of railroad, telegraph and bridge property for taxation the present year and the result is as follows . Railroad property, \$62,023,417 19; bridge property, \$2,450,000; telegraph property, \$923,510 90; total, \$65,396,828 09. This is a total increase over last year's assessment of \$1,511,870 11.

NATICK, MASS .- The Natick Assessors have finished their work and the tax rate for 1893 is to be \$18 40. The city's total valuation is \$5,514,650, real estate being \$4,545,100 and personal property \$969,550. The decrease is \$67,830.

NEWPORT, R. I.-According to the report of the tax assessors in Newport the present valuation of real estate is \$27,-757,000 and of personal property \$7,096,800, a total of \$34,853,800. The tax rate is ninety-two cents on each \$100, and the amount of tax assessed is \$320,654 96. The following includes the new figures and those for previous years, taken from our STATE AND CITY SUPPLEMENT:

	As	Rate of Tax	1		
Year.	Real.	Personal.	Total.	per \$1,000	1
1893	\$27,757,000	\$7,096,800	\$34,853,800	\$9.20	
1892	27,311,400	7,035,900	34,347,000	9.40	
1891		6,890,250	33,044,150	9.60

Bond Proposals and Negotiations,-We have received through the week the following notices of londs recently negotiated and bonds offered and to be offered for sale.

Amora, Neb.—The citizens of Amora have recently voted in favor of issuing bonds for an electric-light plant.

Arlington Heights, Ohio.—We are informed by one of the city officials of Arlington Heights that at an election held on July 31, to vote on issuing \$5,000 of water-works bonds, the proposition was defeated.

Boston, Mass.—(STATE AND CITY SUPPLEMENT, page 21.) | Notice is given that Alfred T. Turner, City Treasurer, offers for sale bonds of the city of Boston as follows :

Registered certificates, payable 1912 and 1913, at.... Coupon bonds, payable 1913, at.... Registered certificates, payable 1923, at... Coupon bonds, payable 1923, at. .103

Special rates may be made for lots of \$15,000 or over, but the bonds will not be sold for less than par, and the right is reserved to change the above rates or withdraw the offer without notice.

The above-mentioned bonds were previously advertised for sale on August 2, at which time only one bid was received, that being for \$10,000 of public park bonds at par and accrued interest. The total amount includes five issues, which are described below :

LOANS- When Due. HIGHWAYS-4s, J&J, \$250,000....July 1, 1913 IMPROVED SEWERAGE-4s, J&J, \$50,000....Jan. 1, 1912 4s, J&J, \$50,000....July 1, 1913 HUBLIC PARK-FUBLIC PARK-4s, J&J, \$50,000....July 1, 1912 4s, J&J, \$50,000....July 1, 1913 HUBLIC PARK-HUBLIC PARK-

The bonds for sewerage and municipal purposes will be registered; the others may be registered or coupon, as desired. Interest will be payable at the office of the City Treasurer.

Ballard, Wash.-Water-works bonds of this city to the amount of \$60,000, sewerage bonds to the amount of \$40,000

and electric-light bonds to the amount of \$11,000 have recently been voted by the Council.

Bellaire, Ohio .- (STATE AND CITY SUPPLEMENT, page 78.) It is reported that improvement bonds of this city to the amount of \$25,000 are being offered for sale.

Cincinnati, Ohio.—(STATE AND CITY SUPPLEMENT, page 78.)—Street improvement bonds of the city of Cincinnati to the amount of \$90,000 have recently been authorized, the bonds to bear interest at the rate of 4 per cent.

Columbus, Ohio.—(STATE AND CITY SUPPLEMENT, page 80.) —Sealed proposals will be received until Sept. 6 at the office of John M. Doane, City Clerk, for the purchase of avenue im-provement bonds to the amount \$18,000; interest at the rate of 6 per cent will be payable semi-annually, and the bonds will become due Sept. 1, 1903, but may be redeemed in their numerical order at any time after Sept. 1, 1894.

Elbert County, Ga.—An election will be held in this county on August 23 to vote on the queston of issuing court-house and jail bonds to the amount of \$40,000.

Elyria, Ohio.—City Clerk L. C. Kelsey writes the CHRON-ICLE in reference to \$11,417 28 of street improvement bonds offered for sale on August 5, that no bids were received for the loan. The bonds are dated August 1, 1893, bear in-terest at the rate of 6 per cent per annum and mature at the rate of \$1,902 88 yearly from August 1, 1895, to August 1, 1900 1900.

Franklin County, Ohio.—(STATE AND CITY SUPPLEMENT, page 81.) Bids will be received until August 19, at the office of Henry J. Caren, County Auditor, for the purchase of \$8,000 of Pleasant Corners and Stringtown free turnpike bonds. The bonds will be dated August 19, 1893, will bear interest at the rate of 6 per cent per annum, payable semi-annually, and will mature at the rate of \$1,000 semi-annually from September 1, 1896, to March 1, 1900. Bids will also be received at the County Auditor's office, un-til August 21 for the purchase of \$40,000 of North Fourth

Bids will also be received at the County Auditor's office, un-til August 21, for the purchase of \$40,000 of North Fourth street improvement and extension bonds. The loan will be dated July 1, 1893, with interest at the rate of 6 per cent, pay-able semi-annually, and will become due at the rate of \$2,000 yearly from January 1, 1894, to January 1,1913. Both princi-pal and interest will be payable at the office of the County Treasurer, Columbus.

Henrietta, Texas.—This city will issue water-works im-provement bonds to the amount of \$15,000.

Hingham, Mass.—Authority has been granted this town to issue notes or bonds not exceeding \$50,000 for an electriclight plant, the bonds to bear interest at the rate of 4 per cent or less.

Hoquiam, Wash.—The people of this town have recently voted in favor of issuing bonds to the amount of \$24,000 for a supply of water from Fry Creek. Town Treasurer W. O. Bradbury writes us that the bonds will bear interest at the rate of 6 per cent, payable M. & S., at Hoquiam, or in New York, and will become due September 1, 1913. He also states that the town has at present only a floating debt of \$10,288. Its assessed valuation for 1893, which is one-half of actual value, of real estate is \$375,640; personal property, \$110,231; total, \$485,871.

\$110,231; total, \$485,871. **Hudson, N. Y.**—(STATE AND CITY SUPPLEMENT, page 48.)— We are informed by R. M. Shults, one of the city officials, that no bids were received for the \$55,000 of bonds which were offered for sale on August 1. The sale has now been postponed until September 1. The above amount includes \$25,000 of street improvement and \$30,000 of school-house bonds, all bearing interest at the rate of $3\frac{1}{2}$ per cent. Inter-est on the street improvement bonds is payable annually, and the loan matures at the rate of \$1,000 yearly from August 1, 1908, to 1912, and then at the rate of \$2,000 yearly from August 1, 1913, to 1922, the City Treasurer reserving the right to redeem the whole or any part of the loan after August 1, 1903. 1903.

Kern County, Cal.—The citizens of this county will vote on Sept. 12 on the proposition of issuing bonds for new roads, a county hospital and a hall of records. The amount of the bonds will be about \$250,000.

Kingsley, Iowa.—J. A. Ingalls, one of the city officials, writes the CHRONICLE concerning the 6 per cent water-works bonds which were offered on August 7 that no sale was effected.

Meridian, Miss.-(STATE AND CITY SUPPLEMENT, page 72). -The people of this city will vote on the proposition of issuing sewer bonds to the amount of \$250,000.

Methuen, Mass.—Bonds of this town to the amount of \$150,000 will be issued for water works.

Milwaukee, Wis.—(STATE AND CITY SUPPLEMENT, page 102.) —It is reported that school bonds of this city to the amount of \$250,000, water-works bonds to the amount of \$125,000 and street improvement bonds to the amount of \$50,000 will be issued at once.

Mount Vernon, N. Y.—(STATE AND CITY SUPPLEMENT, page 50.)—Bids will be received until August 15 by the Common Council of Mount Vernon for the purchase of \$6,432 91 of assessment bonds. Interest on the loan will be payable semiannually at the rate of 5 per cent per annum, and \$3,000 of the amount will mature July 8, 1896, and the remaining \$3,432 91 July 8, 1898. Principal and interest will be payable at the Bank of Mount Vernon. By statute the bonds cannot be sold for less than par and accrued interest, and they will be delivered on or before August 30, 1893.

Nelsonville, Ohio.—A letter received from Even Wilson, Village Clerk, states that no bids were received for the \$60,000 of water-works bonds and \$20,000 of sewer bonds which were offered for sale on July 28. The bonds are dated May 1, 1892, and bear interest at the rate of 5 per cent, payable semi-annually. They are issued as provided for by an act passed by the General Assembly of Ohio, March 17, 1891.

Nevada, Mo.-An election which recently took place in Nevada to vote on issuing school bonds resulted in favor of the proposition.

New York City.-(STATE AND CITY SUPPLEMENT, page 50.)-Comptroller Myers reports to the CHRONICLE that the \$319,214 64 of consolidated stock of the City of New York, known as school-house bonds, was awarded on Aug. 7 to the Commissioners of the Sinking Fund at par, theirs being the only bid received. The bonds will be exempt from city and county tax, will bear interest at the rate of 3 per cent, payable M. and N, and will mature Nov. 1, 1911.

Norwood, Ohio.—Bids will be received until August 25 by W. E. Wichgar, Village Clerk, for the purchase of street im-provement bonds to the amount of \$23,089 87. The loan will be dated July 26, 1893, will bear interest at the rate of 6 per cent per annum, and will mature part yearly from July 26, 1894, to July 26, 1903.

North Platte, Neb.—City Clerk John Sorenson will receive bids until August 21 for the purchase of \$10,000 of electric-light bonds. The bonds will bear interest at the rate of 6 per cent per annum, payable annually on September 1, and will mature September 1, 1913, with an option of call after Sept. 1, 1903. A tax of two mills on the dollar has been levied to pay the interest falling due September 1, 1894. The city's present outstanding indebtedness is composed of warrants and unpaid bills to the amount of \$9,000. Its as-sessed valuation in 1892 (which is one-fifth of actual value) of real estate was \$310,000, personal property \$115,500, total

\$425,500; State tax (per \$1,000) \$6.0875, county tax (per \$1,000) \$16.20, city tax (per \$1,000) \$17, average school tax \$20.

Oakmont, Pa .- School district bonds to the amount of \$32 .-000 will soon be issued.

Oregon City, Ore.-(STATE AND CITY SUPPLEMENT, page 147.)-It is reported that bids will be received for the purchase of water-works bonds to the amount of \$10,000.

Paterson, N. J.-(STATE AND CITY SUPPLEMENT, page 62.) -Bids will be received until Aug. 23 for the purchase of \$50,-000 of 5 per cent school bonds and \$75,000 of 5 per cent City Hall bonds. Interest on the bonds will be payable semi-annually, the school bonds falling due at the rate of \$25,000 each year on Aug. 1, 1908 and 1909, and \$5,000 of the City Hall bonds falling due April 1, 1907, the remainder being payable at the rate of \$10,000 yearly thereafter. These loans were previously advertised for sale on July 26, at which time, it is reported, no bids were received.

on the proposition of issuing water-works bonds to the amount of \$12,000. Pender, Neb .- An election will be held in this city to vote

Philadelphia, Pa.—(STATE AND CITY SUPPLEMENT, page 69.) Notice has been received from Mayor Edwin S. Stuart that §823,000 of the §875,000 serial loan of the City of Philadelphia, offered for sale on August 7, was awarded to the Girard Estate at 100%, \$50,000 to the City of Philadelphia Police Pension Fund Association at 100%, and the remaining §2,000 to Emory, Freed & Co. at 104. The loan (which is ex-empt from all taxes) will bear interest at the rate of 4 per cent, payable J. and J., and \$175,000 of the amount will mature yearly from December 31, 1918, to December 31, 1922. This is the last of a loan of \$3,500,000 authorized by or-dinance of Councils, approved February 6, 1893. Phillipsburg, Pa.—The citizens of Phillipsburg have voted

Phillipsburg, Pa.-The citizens of Phillipsburg have voted in favor of issuing bonds for paving and sewerage.

Piedmont, W. Va.-Bids will be received until August 13 for the purchase of water-works bonds to the amount of \$37,000.

Lamprecht Bros. & Co., 45 WALL ST., NEW YORK. BOSTON. CLEVELAND.

Pontiac, Ill.—(STATE AND CITY SUPPLEMENT, page 95.)— Bids will be received until August 21 by J. A. Hoover, Secretary of the Board of Education, for the purchase of \$30,000 of school bonds. The bonds are dated August 1, 1893, bear interest at the rate of 5 per cent per annum, payable annually, and mature at the rate of \$3,000 yearly from August 1, 1898, to August 1,1907.

Provo, Utah.—(STATE AND CITY SUPPLEMENT, page 138.)— City Treasurer T. Beesly writes the CHRONICLE that an election which took place in Provo on July 25 to vote on the question of issuing \$15,000 of bonds to pay off the indebtedness of the school district resulted in the defeat of the proposition.

Puyallup, Wash.—City Clerk Wm. M. Seeman writes the CHRONICLE that the election held on August 1 to vote on issuing \$60,000 of 6 per cent 20-year water-works bonds, failed to carry. The people voted 160 for and 123 against the proposition, but the city clerk states that it required a three-fifths vote to authorize the issue.

St. Louis, Mo.-(STATE AND CITY SUPPLEMENT, page 115.)-Bids will be received at the office of Mayor Walbridge until September 2d for the purchase of 4 per cent 20-year gold renewal bonds of the city of St. Louis. The bonds will be dated October 2, 1893, and interest will be payable semiannually thereafter.

The bonded debt of the city aggregates \$21,376,021 05. This amount includes the bonded debt of the former county of St. Louis, assumed by the city at the time of separation of county and city, amounting to \$6,111,000, and the bonds issued for water works purposes, amounting to \$5,808,000, leaving the bonded debt of the city proper \$9,457,021 05.

The city has no floating debt. On April 10th, 1893, the close of the fiscal year, there were in the treasury, after charging against the same all liabilities, except the bonded debt, unappropriated surpluses to all the revenue funds amounting to \$412,902. The assessment for the taxes of 1893 shows a valuation of taxable property in the city of \$284,260,790, which represents, it is estimated, between three-fifths and two-thirds of the real value. The rate of taxation per \$1,000 valuation is \$20 50.

An advertisement giving full particulars regarding the sale of new securities will be found elsewhere in this Department.

Santa Ana, Calif.—The people of this place will soon vote on the question of issuing electric-light and city-hall bonds.

Stevens County, Wash.—(STATE AND CITY SUPPLEMENT, page 149.)—Bids will be received until August 28 for the purchase of \$65,000 of county bonds, same to be issued to pay current expenses.

The county's total debt on July 1, 1893, was \$85,290, including funding bonds, \$35,000, and outstanding warrants, \$50,-290; cash on hand, \$11,836; net debt, \$73,454.

Summer, Wash. — Water-works bonds of this city to the amount of \$17,000, recently voted, will be offered for sale until August 23. The bonds will bear interest at the rate of 7 per cent and will run 20 years.

Texarkana, Texas.—City Hall bonds to the amount of \$10,000 and school building bonds to the amount of \$12,000 will soon be issued.

Will soon be issued. **Trigg County, Ky.**—We are informed by John C. Dabney, County Attorney, that the election to vote on issuing \$15,000 of Court House bonds will take place in Trigg County on November 14. The bonds will bear interest at the rate of 5 per cent, payable semi-annually, and will become due in from 2 to 20 years. The county has at present no debt of any kind and its assessed valuation (which is four-fifths of actual value) for 1898 is \$2,477.589; State tax rate (per \$1,000) \$4*25; county tax rate (per \$1,000) \$3*75. Wella Walla Wash — City Clark Honey Kelling writes the

Walla Walla, Wash.—City Clerk Henry Kelling writes the CHRONICLE that the election which took place in Walla Walla on July 27, to vote on issuing 5 per cent 20-year gold bonds to the amount of \$160,000, for the construction of a gravity supply of water works, resulted in favor of the proposition by a vote of 793 to 245. The date for offering the securities has not yet been decided upon.
