Total all cities for week	\$970,664,323	\$1,362.721.407	-288		

The full details of clearings for the week covered by the above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the various clearing houses at noon on Saturday, and hence in the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night.

the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night. Our usual detailed figures for the previous week, covering the returns for the period ending with Saturday noon, January 5, as well as the comparative totals in 1893, are given below. The aggregate exchanges show an increase over the previous week of over two hundred and thirty-two million dollars, the gain at New York being one hundred and twentytwo millions. Contrasted with the corresponding period of 1893 all but nine of the cities record losses, and in the aggregate for the whole country there is a falling off of 25 6 per cent. The most important percentages of decrease this week have been at Spokane, 72:3 per cent; Nashville, 66:9; Helena. 67:3; Milwaukee, 56:4; Akron, 55:4 and Chattanooga, 54'7 per cent. Through the courtesy of the manager of the Scranton, Pa., Clearing-House that city is now included in our table.

# STATE AND CITY DEPARTMENT. See pages 90, 91, 92 and 93 for our State and City Department.

All advertisements with relation to State and City Bonds will likewise be found on the same and following pages.

# THE FINANCIAL SITUATION.

A notable indication of the improvement in affairs and recovery of confidence is given in our State and City department (page 90) this week. Our readers are aware that we publish in that department of THE CHRONICLE early in each month a compilation of the sales of city and State bonds reported by us during the previous month, with the prices obtained for them. To-day we give the transactions for December and the total will be found to have reached a considerably larger amount than the total for any month since we began to make these compilations; and more than that the prices are higher than at any time since before the panic. In July the aggregate sales were less than 13 million dollars, in August they were about 23 million dollars, in September they were still only about 33 million dollars, while in December they foot up \$17,-290,064. The largest month's sales reported by us on any previous occasion was \$12,249,000 for June 1892. Of course the unusual December aggregate has been in good measure due to an accumulation of financial wants deferred by municipalities during the recent period when bond negotiations proved so difficult, and indeed impossible except at low prices and in response to proposals by a very few of the best class of borrowers. That fact does not though detract from the striking character of the change which has relieved the pressure and made such sales practicable now. For as already stated none of these securities have been placed at a sacrifice, but all of them were disposed of at satisfactory rates, much better than those hitherto prevailing, as will be observed on examination.

With such clear evidence of reviving confidence and renewal of activity in so leading a class of securities which furnish money for many new undertakings and enterprises, it will be a source of disappointment that general trade does not afford better signs of new life. This slow progress, it will likewise be noted, is in face of continued announcements that textile, iron and steel factories which had suspended work have with the new year been starting up in various parts of the country. These no doubt are promising indications, and with the money market widening, ought to bear fruit sooner or later in a more rapid interchange of commodities. As yet however it appears to be a fact that none of the ordinary gauges of growth in business transactions afford signs of any considerable development. Clearings never answer quickly to enlarged operations, so lack in that direction is not remarkable, but railroad gross earnings ought to show some expansion soon after expansion in business occurs, and yet the latest reported, the totals for December, and later still those for the first week of January, given on subsequent pages, all fail to do so. December though was known to be the worst of an extremely unfavorable six months, and as it was the last of the old year little else than the results reached could be expected. Bat larger returns were looked for in January, and it is hoped, and it seems as if the hope ought to be realized, that better earnings will be secured from this time on. Disappointment has also been expressed that the report with but no flexibility in any of them.

reference to blast furnaces on the first of January shows no improvement over the December report. We have remarked upon the fact below in this article, but would state here that this lack of progress is not surprising. The development heretofore in that department was all that could be expected until more iron and steel works got into operation. Another month or two will be likely to tell a very different story with reference to furnaces in blast.

The rise of one cent in the quotations for foreign exchange has been the most suggestive alteration in the conditions this week. It is never possible definitely and positively to specify the influences which at any time are controlling the exchange market. Of course in a general way it may be said that rates go up because the demand for bills is in excess of the supply. But the reasons why this inequality exists are various. Tf there was an exact correspondence all through the year between our merchandise imports and exports, and nothing other than those transactions to influence the demand or supply, the market would be without feature, for the exports would week by week pay for the imports. In the present case our exports have been for months and at the moment promise to continue to be largely in excess of our imports; hence without doubt, were that the only difference, exchange would fall instead of rise. There is, however, in addition to the interchange of commodities, an unknown quantity, the movement of capital, which cannot be measured or clearly traced. It is that which is acting to-day to disturb the natural course and put rates up in face of a sufficiently large trade balance to at least prevent a rise. We say this movement of capital is unnatural because it is directly adverse to the normal flow of capital. It is due moreover to defects in our financial arrangements and laws. We showed one such defect in our article of Dec. 16th (page 1015) with reference to "Gold Exports and Currency Redemption." Is it not possible that the small and decreasing balance held in the Government treasury and the absence of legislation or of any progress towards initiating legislation to provide for a bond issue to cure this defect, has a like influence also ?

How long will what we call money continue to flow towards this centre ? The stream has swollen again this week, the paper is coming this way in larger volume once more, so the inquiry has a serious side to it. As there is no effective system of redemption provided in connection with any one of our currency devices, no method for temporarily retiring our surplus paper money when out of employment, the present situation is worth studying to learn whether this is not a defect that should be cured; whether when a new paper currency scheme is in preparation we do not want something different and better than any of those now in use. The banks last week reported \$83,796,650 surplus reserve and \$213,427,800 actual reserve with deposits about \$100,000,000 in excess of loans-the former standing at \$518,524,600, while the latter were \$418,807,600. This week these associated institutions will get another big addition to reserve and to deposits. By and by all this stuff mast be put out at interest on some kind of security. It cannot fail to encourage undesirable speculations. In about eighteen months thereafter at the crop-moving season rates of interest will be at premium. Then long senseless discussions will follow about the dearth of money and the per capita circulation! , All because we have paper money systems

Money, we repeat, continues to accumulate at this On call, representing banker's balances, it has centre. loaned at 11 and at 1 of 1 per cent, averaging 1 per cent. Renewals have been at 1 to 11 per cent, and banks and trust companies loan at 2 and at 24 per cent, according to the collateral and the circumstances of the case. Time money is in large supply. Offerings for fixed periods are liberal by banks, trust companies, other institutions and private lenders, but very few transactions are reported. The short interest in the stock market enables securities to be carried which would otherwise have to be used as collateral for loans, and the demand for time money is consequently insignificant. Rates are 2 per cent for thirty to sixty days, 21 to 3 per cent for ninety days to four months, and 3 to changes in rates of exchange by the leading dra 34 per cent for five to six months. The commercial paper market remains with conditions unchanged. There is a good demand for the best names and the inquiry is from every quarter, and there is also a fair demand for good, although a little lower grade paper. The supply is very limited. Quotations are 31 per cent for sixty to ninety day endorsed bills receivable; 4 to 4 per cent for four months commission house names, and 5 to 6 per cent for good single names having from four to six months to run.

There has been no financial feature of importance abroad this week. The cable reports discounts of sixty to ninety day bank bills in London 11 per cent, while the Bank of England rate remains unchanged at 3 per cent. The open market rate at Paris is 21 per cent; at Berlin it is 3 per cent, with a reduction by the Imperial Bank to 4 per cent, and the rate at Frankfort is 35 per cent. According to our special cable from London the Bank of England gained £964,401 bullion during the week, and held at the close £25,813,990. Our correspondent further advises us that the gain was due to receipts from the interior of Great Britain of £880,000 and to imports of £84,000, of which imports £53,000 were from the Cape of Good Hope, £20,000 from Portugal and £11,000 from other points on the Continent.

The market for foreign exchange has been strong this week influenced by a demand for remittance and for investment and by a light supply. The market is very narrow and, therefore, easily controlled, to which fact is due the comparatively sharp movements. There was, early in the week, an inquiry to remit for coffee and sugar, and as the supply of bills was small it was promptly absorbed and rates were advanced half a cent per pound sterling on Monday, compared with the close on Friday, and on Tuesday the bare condition of the market and evidence that the demand was unsatisfied caused a further advance of half a cent. On Wednesday it was reported that a commercial settlement was pending. The amount was not stated but it was said to be large and rates again moved upward. On Thursday the settlement was reported to have been made and in the afternoon the market grew easier. The arbitrage operations of the week have had little or no influence, indicating that whatever trading there has been was for a turn in the market. Some of the bankers are inclined to the opinion that the buying of long sterling for investment has been largely overestimated. They noticed some demand early in the week for this purpose, but it subsided as the market advanced, probably because rates were regarded as too high to admit of a profit. It is possible that this in-

quite difficult. It was reported on Thursday that gold exports were expected in the near future and that Austria was likely soon to renew efforts for the accumulation of gold for resumption purposes. This story was, however, set at rest by the statement that exchange will have to advance at least one cent and a half per pound sterling before gold can be profitably moved to Europe and there are no indications of a demand from Austria. There appears to be a feeling among the bankers that exchange will not fall much lower for the present. Rates are very largely influenced by the monetary situation and much less than usual by the trade conditions and therefore the market is somewhat abnormal. The following shows the daily

The market was steady at the close on Friday at 4854 to 486 for 60 day and 4871 to 488 for sight. Rates for actual business were 4 841 to 4 842 for long; 4 861 to 4864 for short; 4863 to 487 for cable transfers; 484 to 4841 for prime and 4831 to 4833 for documentary commercial bills.

Quite contrary to expectations, the statement of the "Iron Age" published this week shows no further increase in the weekly production of pig iron in the United States. It will be remembered that after the panic the number of furnaces in blast dropped from. 251 with a weekly capacity of 181,551 tons on May 1 to 114 with a capacity of only 73,895 tons on October 1, that then an upward movement began, so that on November 1 117 furnaces were reported in operation, producing 80,070 tons, and on December 1 130 furnaces producing 99,379 tons. As in the interval since December 1 a number of idle furnaces have resumed work, it was supposed that the report for January 1 would indicate a further advance in the totals. The "Age" however makes the number of active furnaces the same as at the beginning of December, namely 130, and the weekly capacity slightly less, or 99,087 tons against 99,379 tons. The explanation is found in the fact that while several furnaces have blown in, some others have stopped work. The falling off has been in the furnaces using anthracite as fuel and those using charcoal, where the "Age" in both instances reports the production the lowest on record for a great many years. In the coke furnaces there was an addition to the number in operation during December of 8, while the capacity per week rose from 78,241 tons to 81,997 tons. However, as the capacity of the anthracite furnaces dropped from 16,188.to 13,081 tons, and the capacity of the charcoal furnaces from 4,950 to 4,099 tons, the effect has been to keep total production stationary for the time being. It seems not unlikely, though, that an increase may occur again before long, as many iron and steel manufacturing establishments in different parts of the country are now starting up, after having been closed for some time. The result will be to augment the demand for iron, and this, if maintained, must eventually lead to an augquiry may be renewed should rates materially decline, mentation in the output of iron. The same remark for the employment of money in any other way is also applies to the accumulations of unsold stocks, which mentation in the output of iron. The same remark

57

the "Age" finds somewhat larger on January 1 than on December 1, the total now being 838,444 tons, against 818,987 tons a month ago.

In deciding to omit the customary semi-annual dividend the directors of the Louisville & Nashville have taken a step which is both wise and conservative. The country is passing through a period of great depression, and as yet there is nothing to encourage expectations of a decided change for the better. The Louisville & Nashville of course cannot escape the effects of the depression any more than other transportation lines, and though, through economies in expenses, the falling off in earnings is being offset as far as possible, yet net results are considerably smaller than a year ago. income statement shows that for the six months to December 31 the company earned a surplus for the stock of \$1,108,102, or over two per cent, but these six months usually form the best half of the year, and in the corresponding period of 1892 the surplus was as much as \$1,945,541. As even the reduced amount of surplus was possible only because of the economies practiced, and as the outlook for the future is not clear, the management have prudently concluded that a dividend would be inexpedient. By retaining the money which the dividend would call for, the financial condition of the company is strengthened. and this in turn will have the effect of raising the property in public estimation.

We give on another page our review of the gross earnings of United States railroads for the calendar year 1893. The new year does not open auspiciously, as for the first week of January the 31 roads which have thus far reported show a falling off of 13.90 per cent as compared with the same week in 1893. As regards the net earnings some further returns for November have come to hand this week. The Cleveland Cincinnati Chicago & St. Louis reports for that month gross of \$1,100,039 against \$1,235,339, and net of \$285,253 against \$332,439. The Illinois Central in the same month gained \$162,937 in gross and \$36,749 in net. For December this road reports a decrease in gross of \$101,022, which is the first loss shown by the company in a monthly statement for nearly a year. The Flint & Pere Marquette reports net of \$38,769 against \$74,948, the Toledo & Ohio Central \$50,069 against \$71,000, the Philadelphia & Erie \$110,697 against \$126,800, the Chicago & West Michigan \$41,-532 against \$30,508, the Detroit Lansing & Northern \$19,895 against \$26,073, the Kansas City Memphis & Birmingham \$41,803 against \$37,396, the Oregon Improvement \$80,351 against \$57,991, and the St. Louis Southwestern \$186,772 against \$137,543.

The following statement, made up from returns collected by us, shows the week's receipts and shipments of currency and gold by the New York banks.

\* The division (between gold and silver) given in our table of coin and bullion in the Bank of Germany and the Bank of Belgium is made from the best estimate we are able to obtain; in neither case is claimed to be accurate, as those banks make no distinction in their weekly returns, merely reporting the total gold and silver, but we believe the division we make is a close approximation.

NOTE.—We receive the foregoing results weekly by cable, and while not all of the date given at the head of the column, they are the returns issued nearest to that date—that is, the latest reported figures.

## THE PHILADELPHIA & READING REPORT.

Very properly the managers of the Philadelphia & Reading Railroad devote a great deal of space in their annual report to a discussion and explanation of the events which have occurred since the appearance of the last annual report, a year ago. At that time the company was still apparently in sound condition, and Mr. McLeod then announced that negotiations had just been concluded for liquidating the floating debt and to provide for the capital requirements of the immediate future. This was early in January. On the 20th of February, on motion of Mr. Thomas C. Platt, who lately also performed the same kindly office for the New York & New England, the property was placed in the hands of receivers. Such a sudden and complete transformation in the condition of the concern naturally calls for extended official notice, the moreso as the property still remains in charge of the Court, and the acts of the receivers have been criticised as well as the acts of the management which made the receivership a necessity.

While the general causes of the company's misfortunes have been well known for some time, the report brings out some facts which are new and throws additional light on others. The official statement is particularly interesting in view of the theories advanced for the company's downfall at the time of the announcement of the receivership. It will perhaps be remembered how the embarrassment was variously ascribed to the influence of the Pennsylvania Railroad, the enmity of the New Haven people, the designs of the Vanderbilt party, the antagonism of J. Pierpont Morgan, and the opposition of banking and moneyed interests. Friends of Mr. McLeod professed belief that as Mr. McLeod had become a growing power in the railroad world and had given offense to many interests, these interests had combined to crush him. All this sounds very ludicrous now that the facts are known. Mr. McLeod himself before he had been forced out of the management and before the real character of his acts stood revealed sought to cultivate the same idea, saying that the credit of the company had been attacked in a way that made it impossible for it to meet its charges, and that the income mortgages in compelling interest payments to the exclusion of proper repairs and renewals had proved a menace to the welfare of the property. We showed at the time that there was no basis for the latter part of this statement, since the income mortgages allowed the management unusually wide latitude in these respects, providing not only for ordinary repairs, renewals and replacements, but "such reasonable improvements" as might be necessary "for

the safe, proper and economical operation" of the property. As for the company's inability to borrow any more money, reckless and speculative methods and financiering fully explained that. If any one, however, still had any doubt on that point, it would be removed by the full and clear statement of the doings and results now furnished by the receivers.

The report points out that the contracts under which the Lehigh Valley and Central of New Jersey systems. with their allied coal companies, passed into the control of the Reading, created large additional obligations for rentals, for interest and for coal purchased, and it was not possible to make the Reading Company's revenues grow as rapidly as the obligations increased; " so that there were large advances made in 1892 which were not shown in the income account of the Reading Railroad Company as stated in the annual report for that year, being treated as indebtedness to leased and controlled lines, and it was largely from those advances that the excess of cash liabilities over cash assets of the Railroad Company increased during year 1892 \$2,182,196, while that of the the Coal & Iron Company increased \$3,961,507, the increase for the two companies being \$6,143,703. It is true that during this period the value of the coal on hand increased from \$2,355,179 to \$7,584,428, showing a gain in this item of \$5,229,249. This coal was of course a good asset, but as it had not been sold, it was not one immediately available to produce cash." The receivers state that the stock of unsold coal at that time (November 30, 1892,) was no less than 1,720,879 tons, and that in the income account of the Coal & Iron Company for that year an estimated profit of \$337,503 upon purchased coal was included, this profit being arrived at by valuing the unsold stock at the price ruling at the end of November, usually the highest price of the year, whereas had the stock been valued at the average price realized from sales for the whole year, said profit would have disappeared. In figuring the results for 1893 the average price has been taken and not the November price.

The total excess of cash liabilities over cash assets for the combined companies November 30, 1892, was \$6,520,958, but heavy as this burden was, says the report, the amount was very largely increased during the next three months. Mr. McLeod's speculations in Boston & Maine and New York & New England stocks netted a loss to the company of \$1,472,004, the Lehigh Valley for the three months was operated at a loss of \$616,351, the Philadelphia Reading & New England. or Poughkeepsie Bridge system, at a loss for these three months of \$130,567, while the Reading itself, with the Coal & Iron Company, for the same three months, by reason of bad weather and other causes, fell \$1,401,805 short of meeting the fixed charges accruing during that period. Under these accumulating losses the financial relief afforded by the loans negotiated early in the year of course proved entirely inadequate. And when the receivers had the accounts made up on February 28th, the Railroad Company had cash liabilities in excess of cash assets of \$6,946,823, and the Coal & Iron Company a further excess of \$2,981,546, making \$9,928,369 together-that is, nearly ten million dollars. During the next few months the demand for coal being light, by reason of the season, the situation grew still worse, and on July 31, 1893, the excess of cash liabilities over cash assets stood at over 124 million dollars-\$12,634,794. Since then, under the improved demand for coal incident to 'furnish an important extension of the Reading system,

the time of year, a considerable improvement has occurred. The accounts to November 30, 1893, have not yet been fully written up, but it is estimated that at that date the excess of cash liabilities for the two companies was \$8,220,231.

The report discusses quite at length the Lehigh Valley lease and the other matters which have been the subject of controversy and criticism. It says that while the Lehigh Valley Company controls a very important system of railways, and the alliance with the Reading was a natural one, and it is probable that if the Reading Company had been strong enough to carry the liabilities created by the lease for a year or two, the connection might have been profitable to the Reading Company, yet as a matter of fact the actual result of the operations under the lease during the year 1892 was a loss of \$1,412,419. It is only fair to say here that President Wilbur of the Lehigh Valley declares this estimate of the loss to be excessive. However, one of the first steps of the receivers was to have the rental reduced. At that time the Lehigh Valley's earnings were showing large increases, and it seemed to the receivers that there was good reason to hope that the modified rental would be earned in 1893. But as the year advanced, they say, business began to fall off very rapidly, so that whereas for the four months immediately succeeding their appointment the net loss under the lease had been only \$93,865, in July under the rapid decfine in business the loss amounted to \$253,771. There was therefore nothing to do except to abandon the lease. At the same time, the purchase of the coal mined by the Lehigh Valley Coal Company, and by a number of private coal operators, which was found to be unremunerative, and which required several million dollars capital, was also abandoned, the purchase contracts being abrogated.

These purchase contracts, it is found, were objectionable in a number of ways. The amount of coal to be handled under the contracts was so great, averaging 1,500,000 tons per month, that it was difficult to keep close mercantile supervision of the business, and as a consequence a number of bad debts were created. The receivers discovered furthermore that the price paid for the coal under the contracts was so high that the transaction as a whole was entirely unremunerative. Not only that, but the necessity of marketing such a volume of purchased coal made it impossible to sell at the same time the product of the Reading's own mines, so that the cost of producing coal was very considerably enhanced by the restriction of the output.

With reference to the Coxe Brothers' tonnage, for giving up which the receivers have been sharply criticised, it is pointed out that the division of the freight rate was wholly inequitable, Coxe Bros. being allowed an "average of about 73 cents per ton for gathering the coal, hauling it an average of about 12 miles to Roan Junction, and shipping it at Port Johnston, leaving for the Reading Company only 80 cents per ton for hauling the coal 168 miles to Bound Brook Junction." The receivers offered to transport the coal upon the same terms accorded in other similar cases, and this offer being refused the tonnage was abandoned. In regard to the Philadelphia Reading & New England, or Poughkeepsie Bridge route, which came under the control of the Reading in July, 1892, and which Mr. McLeod in his last report stated was "already earning more than the charges guaranteed," the receivers say that while the line promised for a time to

in practice the operations of the road have proved very unsatisfactory. "It traverses a mountainous country with numerous heavy grades, and as its line is a single track with but few sidings, it is not prepared to handle a large business, and during the snowy winter it became very badly blockaded." The loss to the Reading on the operations for the eight months ending July 31, 1893, averaged it is stated, including interest charges, \$48,600 per month.

In brief, then, it appears that besides a large floating debt, enormous stocks of coal, bad business methods, and huge speculations, the Reading was burdened with losing ventures in a great many of the new properties acquired. In fact, the whole policy seems to have been unfortunate and disastrous. The receivers go into a detailed explanation of the speculations in Boston & Maine and New York & New England shares, and give the reasons that influenced them in their treatment Their explanation will transactions. of those be accepted as showing that they have done what in their estimation was deemed to be for the best interests of the property. But while saying this, we are free to admit that the charges against Mr. McLeod are of such a serious character, and the transactions in which he was engaged so extraordinary, that it seems to us the matter should be made the subject of judicial inquiry, even though there may be doubts whether an action against him would lie. This also seems to be the opinion of Judge Butler, as he this week in the United States Circuit Court made an order directing the Special Master, George L. Crawford, to investigate the charges. American railroad history fortunately furnishes few cases analogous to that of the Reading, and if it can be shown that the culpable parties have committed acts punishable under the law, the full penalty should be visited upon them.

The report before us does not contain the balance sheet or any of the other yearly tables except the income account, the receivers stating that the time which has elapsed since the close of the year on November 30 has not been sufficient to prepare the same. From the income account it appears that the net income of the Reading and the Coal & Iron Company for the twelve months fell \$802,343 short of meeting the year's obligatory charges, including of course interest on the general mortgage bonds. But this is the result after providing for improvement expenditures to the amount of \$1,682,512, it having been necessary in 1893 to charge all expenditures on account of equipment and improvements to income, there being no other account out of which to pay them. For the previous year Mr. McLeod had reported a surplus above the charges of \$3,181,486, but this was without taking the improvement outlays into account. Making up the results for 1892 on the same basis as for 1893 and eliminating the item of \$337,503 for estimated profit on purchased coal, the surplus for 1892 would stand at \$677,622, as against the deficiency of \$802,343 now shown for 1895. This is the comparison just as furnished by the receivers, they having re-arranged the figures for 1892 in the way mentioned. The losses on the Lehigh Valley and other properties do not appear to be taken into account in either year, the idea evidently being to show the comparative results on the Reading property as it now exists freed from those leases.

The exhibit of earnings can hardly be regarded as unsatisfactory, considering the great depression in

port states that out of 50 anthracite furnaces located on the lines of the Reading Railroad which were in blast a year ago, only 23 were working at the end of the year, and that the business of the rolling mills and other allied industries shows a similar shrinkage, while the movement of breadstuffs also fell off considerably, the decrease in the amount of grain hauled to tide-water for export during the year being 222,730 tons. The coal business was more prosperous, especially after the company was relieved from the burden of carrying the purchased coal. The gross earnings of the Railroad company increased \$269,800 in the six months to May 31 but fell off \$427,201 in the six months to November 30. In the expenses there was an increase of \$853,169 in the first half and a decrease of \$290,297 in the second half.

One further point in the report deserves mention, as it shows so plainly the aims and purposes of the new management. After stating that they have no fear that the system will be crippled through the detachment of the roads and coal mines which lately formed a part of it, they say that "they find the management of the remaining property is sufficient to require their best efforts and all the capital they can command. They feel that no further acquisitions of railroads or mining property should be contemplated in the near future, and hope that if they can secure a reasonable share of the growth of the country's business, and can conduct it with economy and prudence, they will be doing all that is possible to build up the value of the securities of the two Reading companies."

## THE YEAR'S CROPS.

The Department of Agriculture at Washington on Monday of this week issued the final estimates of the cereal crops of the United States for the season of 1893. The figures come pretty close to the early indications of the results furnished several months ago, and therefore call for very little comment. There was some expectation that the Department would raise its estimate of the wheat crop, but the yield is put at less than 400 million bushels-396,131,725 bushels. In 1892 the crop was reported at 515,949,000 bushels and in 1891 at 611,780,000 bushels. It is now generally conceded that both these crops were under-estimated. With that fact admitted, with exports since July 1 but little s.naller than the heavy movement in the corresponding period of the year preceding, with the Produce Exchange reporting a visible supply of wheat in the United States of 80 million bushels, or nearly as large as a year ago, and against only 45,604,903 bushels two years ago and but 25,519,263 bushels in 1891, and with the price of wheat only 61 cents in Chicago and 67 cents in New York, there is naturally some disinclination to accept without qualification reports of a short crop. But the large visible stocks held really represent accumulations carried over from the previous crops.

While the wheat crop falls below that of either of the two years preceding, the corn crop and the oats crop also fall short, so that taking these three principal cereals together it cannot be said that the season has been a very productive one. And yet doubtless farmers would feel satisfied with the results if only they could obtain better prices for their products. There have been recent years when the yield was considerably smaller than in 1893. But to have extraordinarily low trade which has prevailed and the very heavy losses prices coincident with only an average harvest leaves of earnings reported by other leading roads. The re- the farming interest in an unfortunate plight. The

THE CHRONICLE.

following compares the 1893 estimates of the three crops mentioned with the corresponding estimates for the years immediately preceding.

Total Production.	1893.	1893.	1891,	1890,	1889.
Corn Wheat	Bushels. 1,619.496,131 396,131,725 638,854,854			399,262,000	490,580,000
Total.	2 854 452 708	2,805,448,000	3,410,328,000	3,412,853,000	3,854,907,100

CROPS OF WHEAT, CORN AND OATS

The aggregate for the three crops in 1893 is 2,654 million bushels, as against 2,805 million bushels in 1892 and 3,410 million bushels in 1891. With an allowance for the under-estimate of the wheat crop in 1892 and 1891, the difference against 1893 would be still greater. The 1891 aggregate, however, at 3,410 million bushels was extraordinarily large, that having been a year of phenomenal production ; the 1892 aggregate at 2,805 million bushels was considered fair, and sufficient for the country's ordinary requirements. The 1893 yield at 2,654 million bushels falls 151 million bushels short of this, but as the loss is mainly in the production of wheat, and as very large stocks of that grain were carried over from the preceding crops, the difference between the two years can hardly be regarded as important. In 1890, which was a short-crop year, the combined yield of the three cereals was given at only 2,412 million bushels, or 242 million bushels less than for the late year.

As regards corn, the crop, it will be observed, is reported nearly the same as for the preceding year, the figures being 1,619 million bushels as against 1,628 million bushels. There is, however, some irregularity as between the results in the different sections, some having fared much better than others. In Iowa, for instance, the yield is stated over 51 million bushels larger than in 1892-a favorable circumstance for Northwestern roads, which are greatly dependent upon the production of this cereal in their territory. Nebraska, another Northwestern State, is credited with a crop of 157 million bushels for both 1893 and 1892, which is a large yield for that State. In Missouri the crop is al-o placed somewhat higher than in the year preceding-158 million bushels against 152 million bushelswhile in Kansas the crop is estimated at million bushels against 145 millions. 139 On the whole, therefore, the corn yield in these parts of the country, though not up to the best of previous years, is satisfactory. In the following we show the production for five years in all the principal producing States. C

From the foregoing it is evident that it is the Middle Western States that have suffered most in the falling off in production-we mean Illinois, Indiana and Ohio. In Illinois the yield is only 160 million bushels, against 165 millions in 1892 and 234 millions in 1891 ; in Indiana 85 millions, against 103 and 123 millions respectively; and in Ohio 64 millions, against 83 and 94 millions.

# RAILROAD GROSS EARNINGS FOR DECEMBER AND THE YEAR 1893.

In railroad earnings the year 1893 will long remain memorable. The year had been looked forward to with pleasant anticipations by railroad managers. They had counted upon a very heavy business as a result of the World's Fair in Chicago, for which they had made very extensive preparations and spent enormous sums of money. Instead of the prosperity and large gains in earnings which had been expected, the year has been distinguished by losses which in magnitude and the wide extent of territory covered are without a parallel in the history of the country. The Fair did not fail to yield a great increase in passenger revenues upon the roads most immediately concerned-in fact was a markedly favorable influence at a time of general gloom-but notwithstanding its importance it was completely overshadowed by the commercial and financial panic which ran concurrent with it and which spread from one end of the country to the other, prostrating all industrial interests and leading to an extraordinary curtailment of the ordinary activities of the people.

Taking the year as a whole, the actual severity of the crisis is hardly reflected in the results, as the falling off in earnings for the twelve months is, all things considered, of only moderate proportions. This follows first from the fact that business did not become prostrated until the second half of the year, earnings for the first half of the year having been well maintained, and secondly from the fact that even in the second half of the year the effects of the depression were, as already stated, to an extent countervailed by the extra traffic from the Fair. In the first half our monthly statements showed a gain in every month except February, when the weather had been very severe and the month contained one less day than the corresponding month of the previous year. In the second half of the year, however, there was a loss in each and every month, and unfortunately the last month, December, makes the worst exhibit of any, though this is in part due to the circumthe month contained one stance that less working day, there having been five Sundays in it. The general industrial situation was no doubt at its worst in August, when cash commanded a large premium and merchants everywhere found it difficult to carry on their daily transactions. For that month our return recorded a falling off in the gross earnings of the roads reporting of \$6,344,348, or 13 per cent. After that, as the traffic from the Fair grew in importance and the monetary stringency abated and confidence revived with the passage of the silver repeal bill in the House of Representatives, the returns improved, so that the falling off in September was only 9.77 per cent and in October but 2.38 per cent. Then a change for the worse again began, this being accentuated by the disappearance of the Fair (which closed October 30) as a factor in the results. As against 2.38 per cent in October, the loss in November rose to 6.65 per cent, and now for December it is 13.83 per cent. The monthly record is given in the following.

"State of the state of the	Milsage.		Earn	ings.	Increase or	P. C.

December (127 r'ds).		94,369	40,819,048	and the second second	-6,474.337	

We have stated that the loss for the twelve months was of comparatively moderate proportions. Our state ment comprises 124 roads which have reported for the full period, and which operate in the aggregate 96,989 miles of line. On these 124 roads the loss amounts altogether to only \$11,261,040. Other roads, however, whose returns rever appear in time for our early statement of gross earnings are also known to have sustained considerable losses. If we take the figures of these roads for the latest reported period-that is for the eleven months ending November 30-we get a further loss of \$13,908,920. Combining these results with the others, we reach the following grand aggregates.

the of low, and	Gre	Miles of Road End of Period.			
-attra an or st	1893.	1892.	Decrease.	1893.	1892.
124 roads full year 59 roads 11 months	\$ 552,823,399 383,414,556	\$ 564,084,439 397,323,476		96,989 44,850	93,973 44,398
Grand tot. (183 r'ds).	936,237,935	961,407,915	25,169,960	141,839	138,371

We have here an exhibit covering 183 roads oper" ating 141,839 miles of line. These 183 roads it will be seen earned \$936,237,955 gross in 1893 against \$961,-407,915 in 1892, the loss being \$25,169,960, or less than three per cent-actually only 2.62 per cent. In December, as already stated, the decrease was 13 83 per cent, and had that been the ratio of decline for the whole period of twelve months, the falling off would be over 130 millions instead of only 25 millions as we now find it. Still even at 25 millions decrease the result furnishes a marked contrast with the exhibits for the years preceding, for in 1892 our figures showed a gain of 45 million dollars, in 1891 a gain of 44 million dollars, and in 1890 a gain of over 70 million dollars, as will appear by the following, which also furnishes a summary of the figures for December, the closing month, for several years past.

1893 (183 roads)	141,839	128,371			Dec 25,169,960

It might be supposed that in view of the heavy losses of earnings in the latter portion of the year there are few roads that are able to show any improvement for the twelve months. We find that out of the 124 roads which have reported for the full year 47 have larger earnings, and out of the 59 which have reported for the eleven months, 16 have larger earnings, making 63 altogether out of 183 which have done better in their gress receipts than in the year preceding. Some of these roads, too, have quite considerable gains. Thus the Illinois Central has added no less than \$2,702,- | prepared the following.

833 to its earnings, the Lake Shore \$1,271,136, the New York Central \$1,119,685, the Rock Island \$840,-470, &c., &c. It will be recognized at once that these are all roads which were greatly benefitted by the World's Fair, the Illinois Central having been especially favored by that event. Not a few of the other roads which have gains also owe their distinction to that circumstance, as becomes quite evident when we observe that the same roads nearly all have fallen behind in December.

Of course, however, the losses for the year greatly overshadow the gains. As showing the magnitude of some of these, we may note that the Northern Pacific has suffered a decrease of \$5,662,452, the Missouri Pacific a decrease of \$2,695,407, the Denver & Rio Grande a decrease of \$1,475,632, the Louisville & Nashville a decrease of \$1,382,535, the Atchison a decrease of \$1,258,464, the St. Paul a decrease of \$1,200,-188, and the Cleveland Cincinnati Chicago & St. Louis a decrease of \$1,108,037, while for the ten months to October 31 the Union Pacific has \$5,687,946 decrease, and for the eleven months to November 30 the Pennsylvania has \$2,438,874 decrease, the Chicago & Northwestern \$1,523,909 decrease, the Burlington & Quincy \$1,407,873 decrease, the Erie \$1,173,010 decrease, &c., &c.

\* Ten months.

The foregoing presents a formidable list of heavy losses, and obviously this feature would be still more marked except for the benefits derived from the Fair and the fact that business in the earlier months of the year was comparatively good. In the later months the falling off on some of the principal systems was of really appalling magnitude. Thus in the case of the Pennsylvania, the Northern Pacific and the Union Pacific the losses have run from three quarters of a million to one and a-half million dollars a month. For the purpose of bringing out this fact and furnishing a record of the decrease from month to month on the roads especially distinguished in that way, we have

\*Lines east and west of Pittsburg. + Figures here include Wisconsin Central up to and including Sept. 26, but not after that:

While the depression in business has transcended all other influences in importance, nearly every leading condition was unfavorable during the year, the Fair being indeed about the only important factor of a favorable nature. In the grain movement there was a falling off in both the East and the West. The 1892 crops were much smaller than those of the year preceding, while the [supplies carried over from the previous crops and already accumulated at the leading markets were so large that at times difficulty was experienced in finding storage room and elevator capacity for further arrivals. The cotton movement also fell off, and there was a great reduction in the iron ore traffic, the shipments from the Northern lake ports having been only 5,836,749 tons against 8,545,313 tons in 1892. Besides this, the silver-mining industry became greatly depressed after the closing of the Iadia mints to the coinage of silver, many of the mines shutting down for a time, while in the iron trade conditions already unsatisfactory became still more so, and furnaces went out of blast by the wholesale. Then also there was a contraction in the provisions movement at the West, and likewise a contraction in the deliveries of live stock. East bound rates between Chicago and the seaboard became utterly demoralized in the closing months, while trans-Continental rates were in bad shape all through the year, the opening of the Great Northern line to the Pacific Coast having led to sharp reductions in tariff schedules and precipitated a conflict with the Northern Pacific and other lines.

Going into the details of the grain movement, the receipts at the seaboard, according to the records kept by the Produce Exchange, were only 211 million bushels in 1893, against 277 million bushels in 1892, being a dedecrease of 66 million bushels; and the loss extended to all the different cereals, though corn and wheat furnished the bulk of it. By far the greater portion of the falling off occurred in the first six months, the receipts for this period having been only 86,599,043 bushels in 1893, against 141,307,007 bushels in 1892.

SEABOARD GRAIN RECEIPTS FOR FIFTY-TWO WEEKS.

	1893.	1892	1891	1890.
Flour, bbls	19,976,653	19,847,357	16,408,757	13,920,012

Total bush., 211,486,361 277,330,120 223,546,782 192,809,642

At the Western primary markets the falling off was also very marked, with this difference, however, that the loss occurred almost entirely in the last six months. At the end of the first 26 weeks the receipts of wheat, corn, oats, barley and rye aggregated 196,733,-808 bushels in 1893, against 203,186,586 bushels in 1892; for the 52 weeks the aggregate is 479,778,274 bushels, against 530,629,990 bushels, a reduction of 51

million bushels. The wheat receipts fell off 70 million bushels, but in corn and oats there was an increase.

[11,632,280/216,100,549] 130,539,4031 115151050 22,007,058 7,118,164 In addition to the above there was received at Kansas City during the four weeks this year 775,637 bushels of wheat, 120,878 bushels of corn and 5,213 bushels of oats. Since January 1 the receipts have been 11,197,455 bushels of

wheat, 2,003,800 bushels of corn and 197,031 bushels of oats. The loss in wheat fell heavily on nearly all the principal receiving points—Chicago, S: Louis, Toledo, Daluth and Minneapolis—but at Chicago the loss was nearly made good by the gains in corn and oats, so that in the aggregate that point received nearly as much grain as in 1892. The figures in the foregoing cover 52 weeks, beginning and ending on Saturday. In the following the movement at Chicago is shown for the even year.

Live hogs No	021 034	661,639			7,714,436		

It was stated above that there had been a contraction in the provisions movement and also a decrease in the live stock deliveries at the West. From the statement just given it will be seen that the receipts of lard and cut meats at Chicago were only 167 million pounds in 1893 against 247 million pounds in 1892 and 280 million pounds in 1891, while the deliveries of live hogs reached only 6,057,278 head, against 7,714,436 head in 1892 and 8,600,805 head in 1891.

As regards the cotton movement, there was a large increase in the receipts at the Southern ports during December, but nevertheless the total for the twelve months is smaller than for 1892, being 5,407,953 bales against 5,557,823 bales. The gross shipments overland for the twelve months reached 1,291,027 bales against 1,491,530 bales. RECEIPTS OF COTTON AT SOUTHERN PORTS IN DECEMBER, AND FROM ANDLARY 1 TO DECEMBER 31, IN 1893, 1892 AND 1891.

When we arrange the roads in groups we see the effects of the Fair reflected very strikingly in the exhibits of the trunk lines and the Middle and Middle Western roads. Most of the roads which show improved earnings for the year are found in those groups. If we take first the trunk line group, we actually have an increase over the year preceding, the 1893 total being the largest ever reached. This, however, is without the Pennsylvania, the Erie and the Baltimore & Ohio, which have not yet reported for December. With these included the gain would be converted into a loss, but the comparison would nevertheless be very satisfactory, all things considered.

Bringing together some of the other leading roads in the Middle and Middle Western States, we also have an increase, the total standing at \$69,711,279 for 1893, against \$66,775,429 for 1892. The Illinois Central is chiefly responsible for the favorable showing, but there are some other important gains.

In the Northwestern group the Rock Island is the only one of the large systems able to report an increase. The 10 roads in the following have aggregate earnings of \$83,914,965 for 1893, against \$90,960,739 for 1892. These roads had heavy gains last year, and in fact their earnings had been growing steadily and largely for a number of years past. Thus as against 91 million dollars in 1892, the amount of their earnings in 1891 had been only \$1½ million dollars, in 1890 only 734 million dollars and in 1889 but 68½ million dollars.

\* Fourth week of December not reported; figures taken same as last year.

In the Southwest, besides gains by some of the minor roads, the Missouri Kansas & Texas, the St. Louis Southwestern and the Texas & Pacific report improved earnings. The Missouri Pacific, Atchison, Denver & Rio Grande, etc., of course lost heavily.

Southern roads pretty generally fall behind, though the Norfolk & Western is an exception, and has a slight increase. Two minor roads in the same section, namely the South Bound and the Georgia Southern & Florida, also have gains. Some of the Southern roads showed losses even last year.

+ Does not include the Elizabethtown Lexington & Big Sandy road in this and preceding years.

\* Figures are approximate, same as for this year; actual earnings were larger, b Including Scioto Valley & New England and Shenandoah Valley for all the years.

c Last half of December not reported; figures taken same as last year.

The Pacific roads of course have done poorest of all. We have not the figures of the Union Pacific or the Southern Pacific for the full year, but the Northern Pacific, as already pointed out, has a very heavy loss, and even the Canadian Pacific falls half a million dollars behind.

September 26; not after that date.

For the month of December the showing as noted above is quite unfavorable. In the aggregate for the whole 127 roads from which we have secured returns there is a loss of \$6,474,337 or 13.83 per cent. Only 26 of the roads have gains, and in but one case does the gain amount to as much as \$30,000. The losses are n many instances very heavy, the St. Paul having a

# Monetary Commercial English Rews

## [From our own correspondent.]

LONDON, Saturday, December 30, 1893. The demand for short loans has been again active this week, and the Bank of England has done a fair business at 31/2 per cent. During the week ended Wednesday night the outside market appears to have borrowed from that institution nearly  $2\frac{1}{2}$  millions sterling; and it will be recollected that the week was a short one. Monday and Tuesday were Bank holidays, and on Saturday the Stock Exchange was closed. Since Thursday morning there has been further borrowing. As has been frequently pointed out in this correspondence, the withdrawals of gold since midsummer have been very large, and have lessened the supply of loanable capital here. The resumption of mining has lately caused a considerable in-crease in the circulation in the provinces. The usual requirements at the end of the year are now reinforcing the other causes of dearness, and on Wednesday morning the last Stock Exchange Settlement of the year began. The account to be arranged was a small one, but even so it led to some absorbtion of money. The Bank of England, as already said, has charged 31/2 per cent for all advances. In the open market the rates have ranged generally from about 3 per cent to 31/4 per cent, and sometimes a little higher, to discount brokers; borrowers for the Stock Exchange had to pay from 31/2 to 4 per cent. On the other hand, the discount quotation for sixty to ninety-day bills is rather weak, about 23% per centperhaps even less-as the general impression is that money will become cheap and abundant a week or so hence.

As yet there are no signs of an increased demand for the India Council's drafts. On Wednesday the Council offered as usual 50 lakhs of rupees but sold very little more than a tenth of a lakh. By private contract afterwards it sold about a third of a lakh more. At the same time the opinion is growing that the demand will now greatly improve. The exports from India have been exceptionally small up to the present. Now, however, the rice shipments from Burmah ought to be on a considerable scale; so ought the cotton exports from Bombay, while towards the end of March the wheat exports will begin. The demand for silver for India has fallen off this week, and the impression is growing that the Indian speculation is breaking down. Apparently there

\* These figures are for ten months, November statement not yet pub-lished, Appioximate.

were large "bear" sales in Bombay, and for a while the "bears" were in danger of being cornered. But the large receipts of late have enabled them to deliver what they had sold, and it is now thought that the speculation is nearly at an end. The price of silver this week has fallen to about 313/d. per ounce.

The Atchison and the New England receiverships and the rumors repecting the Louisville & Nashville have weighed heavily upon the American market here; it has obediently followed the movements in New York. At the same time there is more disposition on the part of the general public to buy than there has been for a considerable time past. Especially investors proper are being attracted by the low prices of many good securities. There is a fair inquiry even for second-The best class bonds and for sound dividend-paying shares. informed think that on any sign of a recovery in the United States there will be large buying here; certainly there is a more hopeful tone all over the Stock Exchange than there was. The expectation is strong that trade will now gradually improve, and it is believed that the trust crisis is nearly at an end. For the moment the prospect of very bad dividends on British railway stocks has a depressing effect, but investors are not inclined to sell. Some Stock Exchange operators are selling, believing that when the dividends are announced the public will be unfavorably impressed. The operators will probably be dissapointed, and after a while investment will overcome mere speculative selling.

There is a very good investment in what are here considered first-class securities. Consols are higher than they were a week ago; so are Indian sterling stocks, and so likewise are nearly all Colonial Government stocks, while British railway preference, debenture and guaranteed stocks are exceedingly scarce. The best informed are convinced that the long liquidation here is over, that trade now is likely to improve, that money rates will be easy for a considerable time to come, and that the new year, therefore, will be far better than the past two or three years. There is a better feeling likewise in the Argentine department. As stated last week, the Argentine Con gress has ratified the agreement for the settlement of the debt. concluded in June between the Government and the Rothschild committee. It is understood that the Government will now proceed to settle the railway guarantees, and the Government is pledged to contract considerably the excessive paper money. The reports concerning the economic condition of the country are very favorable.

Even Australia is believed to be recovering somewhat from the recent bank crash; late reports are certainly more favorable. Upon the Continent, on the other hand, there is a good deal of political uneasiness, while the condition of Italy inspires much apprehension. The Crispi ministry is regarded far less favorably than it was, and heavy selling of Italian Rentes both by French and Italian holders is going on day after day. The state of Spain, too, is very bad, and no progress has yet been made in the negotiations for a new loan in Paris. The arrangement of the Greek debt likewise hangs fire.

The rates for money have been as follows:

Messrs. Pixley & Abell write as follows under date of December 28:

Gold-As the year draws to an end there seems rather less domand for gold, but still there is little chance of the Bank receiving any arrivals. During the past week the Bank movements have been small,  $\pm$  4,000 having been purchased. Arrivals: South Africa,  $\pm$ 131,000; Bombay,  $\pm$ 29,000.

Silver-From Thursday last bars remained at 32'sd. until to-day, when a fall occurred to 31'dd., at which the market is d.t. there being little or no Eastern inquiry, and some New York selling orders. Ship-ments to Calentta, Dec. 22, £37,700. Arrivals: New York, £214,000; Chill, £37,000.

Mexican Dollars-This market is quite nominal, and there is no price quoted to day. Arrivals from New York, £15,000.

The quotations for bullion are reported as follows:

St. Louis & San Francisco .- The following committee is acting for the bondholders of this company: Louis Fitzgerald, Edward King, Isaac N. Seligman, Ernst Thalmann and Samuel D. Davis.

Samuel D. Davis. Thurber, Whyland Company.—The following announce-ment is made: "A large majority in interest of the holders of both preferred and common stock of the Thurber, Whyland Company, having assented to the plan and agreement of reor-ganization dated Dec. 18, 1893, and various stockholders hav-ing applied to the committee for an extension of time to en-the them to make the required payment, the Reorganization able them to make the required payment, the Reorganization Committee hereby extend the time within which stockholders may sign the agreement, deposit their stock with the Man-hatran Trust Company, and make the first cash payment, until and including the 20th day of January, 1894." John I. Waterbury, Edward H. Perkins, Jr., William A. Nash, David Hunt, Franklin W. Hopkins, Reorganization Committee.

Huht, Frankin W. Hopkins, Reorganization Committee.
Western New York & Pennsylyania.—At the annual meeting of this company in Philadelphia the following directors were elected: Samuel G. DeCoursey. Nicholas Thouron, George E. Bartol. Charles M. Lea, J. Rundlesmith, William C. Bullitt, John K. Barclay, E. W. Clark, Jr., E. L. Owen, P. P. Pratt, Isaac N. Seligman, Rudolph Flinsch, Frank G. Rogers. Resolutions were adopted recommending the approval of the plan of reorganization and the appointment of Receiver DeCoursey.

-After a very long and distinguished service Mr. George S. Coe retires from the presidency of the American Exchange National Bank. He is succeeded by Mr. Dumont Clarke, for many years Vice-President, and identified with the American Exchange Bank in different capacities for over thirty years. Owing to the ill-health of Mr. Coe, which necessitated his re-linguishing active work, the real charge of the bank has de-volved upon Mr. Clarke as Vice-President for some time past. Mr. Coe continues as director and Chairman of the Executive Committee. After a very long and distinguished service Mr. George Committee

-Stock Fluctuations, Mr. Joseph G. Martin's annual statistical publication, has been issued. As usual, it gives complete tables of the movements of securities of Boston interest for 1893; dividends and interest paid; money market review, &c. This is the twenty-first annual number. Copies may be obtained of Mr. Martin at No. 10 State Street, Boston, for fifty cents

\* At rate of 6 per cent per annum.

Note.-The Oregon Rallway & Navigation dividend which appeared in our last issue was erroneous.

WALL STREET, FRIDAY, JANUARY 12, 1894-5 P. M. The Money Market and Financial Situation. - There is a general inclination in financial circles to wait for favorable developments in Washington. There is a desire to see measures speedily adopted which will replenish the Treasury and restore the gold reserve at least to its former minimum of \$100,000,000. It is also of the utmost importance that the tariff question should be settled as soon as possible. However the final duty may be fixed on any specified article, the importers shape their business to suit it and go on with their engagements for the future ; but while the rate of duty is pend. ing and remains an unknown quantity, it is manifestly impossible to do business except from hand to mouth.

The report of the H. B. Claffin Company this week shows how heavily the crisis of last year bore upon the dry goods trade, and it may be wondered that the company went through such a severe test without greater losses than those actually shown.

The healthy investment demand which manifested itself here early in December last is now lacking, and for the first time in years we are without the "January boom," which usually begins with a demand for bonds to re-invest the money received from coupons and dividends; this year it is probable that owners of securities need most of their money

for living expenses. The railroad earnings may show proportionately better than last year in the net results if we have a light winter. Last winter was very severe and caused a large increase in operat-

winter was very severe and caused a large increase in operat-ing expenses, reducing in that way the net earnings. The open market rates for call loans during the week on stock and bond collaterals have ranged from 3/4 to 11/2 per cent, the average being 1 per cent. To-day rates on call were 1 per cent. Prime commercial paper is quoted at 31/2 to 41/2 per cent. The Bank of England weekly statement on Thursday showed an increase in bullion of £964,401 and the percentage of reserve to liabilities was 46.46 against 41.44 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows a decrease of 1,\$75,000 francs in gold and 2,750,000 francs in silver. The New York Ciry Clearing-House banks in their statement of January 6 showed an increase in the reserve held of \$6,003,200 and a surplus over the required reserve of \$83,796,-650, against \$80,815,150, the previous week.

Foreign Exchange .- The tendency of sterling rates was Foreign Exchange.—The tendency of sterling rates was towards increased firmness all the week until Thursday, when the tone relaxed. There was a remarkably good demand for bankers' bills, which appeared to be for the purpose of making settlements or some other definite object, and this, with only a moderate supply of commercial exchange, led to the firmer rates. To-day the market was steady and actual rates of exchange were as follows: Bankers' sixty days sterling, 4 84½@4 84¾; demand, 4 86¼@4 86½; cables, 4 86¾@4 87.

January 12. Sixty Days. Demand.

State and Railroad Bonds .-- Sales of State bonds this week State and Railroad Bonds.—Sales of State bonds this week included \$25,000 Va. 2-3s of 1991 at 55½-24; \$10,000 Ala. class "B" at 93; \$3,500 Tenn. settlt. 6s at 108; \$32,000 Tenn. settlt. 3s at 74; \$2,000 Louisiana con. 4s, new, at 95. Railroad bonds have been dull, or when there was any ac-

Railroad bonds have been dull, or when there was any ac-Railroad bonds have been dull, or when there was any ac-tivity it was generally at the expense of prices. The Northern Pacifics were especially weak on Thursday, with free sales of the third mortgage bonds, apparently by foreign holders, the price declining to 53 and the consol. 5s to 27<sup>1</sup>/<sub>4</sub>. Atchison bonds also lost something of their previous firmness and the consols remain dull around 75, not being affected much by the plan of reorganization, under which the new money required from holders is about 30 per cent of the present market value of their bonds—sav §900 on \$3,000. The Phila. & Reading bonds weakened a trifle on Monday after the an-nual report was published, though considering the gross re-ceipts of the property and the difference between the past and the present management, the document was rather a hopeful one. To-day the principal activity was in Northern Pacifics, the 1st 6s selling at 106, the 3ds at 52<sup>1</sup>/<sub>2</sub> and the consol. 5s at 27. To inspire confidence in our railroad bonds at home and

To inspire confidence in our railroad bonds at home and To inspire confidence in our railroad bonds at home and abroad, it is of much importance now that every plan of reor-ganization brought forward should be prepared with a just regard to the rights of mortgage bondholders, and the latter should not hesitate to appeal to the U.S. Courts for protec-tion of their interests whenever it is necessary. Those courts have always shown a spirit of equity and a purpose to give justice to all parties before them without much regard to mere technicalities. mere technicalities.

mere technicalities. Railroad and Miscellaneous Stocks.—The stock market has been very dull and without features of much interest. The tendency of prices has been rather downward than other-wise, but only a few stocks have marked any considerable de-cline. The passing of the Louisville & Nashville dividend on Thursday has been followed by a slight weak-ness in that stock, though it is plain that the company is strengthened by not paying any dividend at this time. Western Union Telegraph has been among the most active stocks, and has ruled very steady. Burlington & Quiney was again selected for bear attacks but yielded only slightly. Erie is very dull around 14, though it would probably rule higher if the proposed plan of reorganization was assured, as that plan is quite favorable for the stock-holders. Sugar was active at rising prices on Monday, but has been dull and lower since the adjournment of the annual meeting for lack of a quorum and the publication of no re-port, closing at 82½. The market is waiting for some im-provement in the condition of things at Washington and also in the railroad world. To-day there was a little better tone at the close with prices generally a fraction higher than at the morning Board, at the morning Board.

Net Earnings Monthly to Latest Dates.-The table fol-lowing shows the net earnings reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of December 23. The next will appear in the issue of January 20, 1894.

# Philadelphia & Reading Railroad.

(For the year ending November 30, 1893.) The annual report has been prepared by the receivers and the President for the fiscal year ending November 30, 1893. The balance sheets and the other more extended tables for the Railroad and Coal & Iron companies will be published later. The statement of earnings for two years is given as follows: COMPARATIVE STATEMENT OF THE OPERATIONS OF THE TWO COMPANIES

Total	
Leaving a deficit after such payments for the two Com- panies, as above stated	\$802,342

"This method of stating the business of the two companies for the year, showing a surplus over fixed charges of \$880,-168 93, approximates closely that used in the last annual re-port, which showed a similar surplus of \$3,181,486 52, but, as

in the present condition of the companies there is no other fund than that arising out of the income out of which to make payments on account of improvements and new equip-ment, the manner in which the account of the business for 1893 has been stated, which shows a deficit for the two com-panies of \$802,342 92, is believed to be the proper one. "In making up the comparative statements of the operations of the Railroad Company for the years 1892 and 1893, the figures for 1892 are changed from those reported a year ago in the following manner:

the following manner:

2.166.361

Profit for 1892, as re-stated on page 4 of this report ...... \$990.786

"These changes, of course, d) not affect the actual figures of the year's business, but only the manner of charging up the expenditures, it having been necessary in 1893 to charge all expenditures on account of equipment and improvements to income account, there being no other account out of which to pay them. The accounts of the two years are thus placed upon the same lines so that a direct comparison of the result of the business of the two years are thus placed

upon the same lines so that a direct comparison of the result of the business of the two years is rendered possible. "Similarly the operations of the Coal & Iron Company are re-stated as follows: "The statement on page 6 of the annual report for 1892 refers to the joint business of the Philadelphia & Reading Coal & Iron Company, the Lehigh Valley Coal Company and the Lehigh & Wilkesbarre Coal Company, and the statement on page 6 of this report refers for both years only to the operations of the first named of these companies.

\$24.339 337,503

\$313.163

"There is a large increase in the interest account arising from the losses incurred in the busidess of 1892 and 1893, as hereinafter detailed, which has swelled the floating debt, and from the excessive interest rates charged during the latter half of 1893.

half of 1893. "In the Coal & Iron Company's 'business the second half of the year also compares favorably with the first half. The first six months show a loss in net earnings as compared with the corresponding period of 1892 of \$235,629, while the second half of the year shows a gain in net earnings as compared with the same period in 1892 of \$404,179, showing that for both companies the results are unfavorably affected by the losses incurred in the early part of the year." \* \* \* \* The report then comments upon the disastrous events of 1893, as follows:

1893, as follows:

1893, as follows: "The annual report for the year 1892 showed that the Philadelphia & Beading RR. Co. and the Philadelphia & Reading Coal & Iron Co., after paying all obligatory charges, had a profit arising out of the oper-ations of the two companies of \$3,181,486 52. "The security-holders have naturally found it difficult to understand how it came that bankruptey followed, and that the property was taken possession of by the United States Court on the suit of its credi-tors in less than two months after the annual report was issued, and it seems fitting at this time that the circumstances that led to this disas-trous change in the company's affairs shall be plainly stated. "The last annual report stated (page 9) that the contract that had then been recently entered into with the Finance Co. of Pennsylvania to provide capital to carry on the coal business, and the negotiations then recently concluded for the sale of securities held in the treasury of the company, would provide for the liquidation of the floating debt, and cover the requirements for capital expenditures during the year 1893. The negotiations spoken of were in reference to the sale of cer-1893.

<text><text><text><text><text><text><text><text>

These increases aggregating ..... 1.604.395

Which, deducted from the increase of cash liabilities as above stated, leav s a sthe net result of the business for the five months an increase of current liabilities of .......\$1,102,030 "A corresponding statement of the cash assets and liabilities of the two companies for the close of the year ISS3 cannot be make with entire accuracy until the accounts of the year's business shall have been balanced but the accounting officers estimate that it will stand, as of November 33, 1893, as follows : Railroad Company: Cash assets States the

\$59,164

The report then discusses at some length the reasons for surrendering the Lehigh Valley lease, also the modification of the Coxe Brothers' contract for the transportation of coal. Of the Philadelphia Reading & New England road the report says:

report says: "The Philadelphia Reading & New England Railroad, which came maker the control of the Reading Company in July, 1892, promised for a time to furnish an important extension of the Reading Railroad gompany, or in friendly alliance with it, to the Connecticut River at Hartford, extending its railroad system northe stward from Bethlehem, Philadelphic and the state of the system of the state of the state and the state of the state of the system of the state of the with which southeastern Pennsylvania exchanges a great deal of phe early part of 1893 were disastrous. It traverses a mountainous ountry with numerous heavy rades, and as its line is a single track with but few sidings, it is not prepared to handle a harge husiness, and huring the snowy winter of 1892-93 it became very badly blockaded. Attra the world cease to involve the Reading Company in loss; sup the efforts which were made in those directions proved unavailing, showed an average loss, including interest charges, of \$48,600 per month, it was impossible to continue longer the operation of the road, out it of the of August, 1893." Of a financial plan the report says :

Of a financial plan the report says :

"It is greatly to be desired that some agreement shall be reached which shall permit the funding of the indebtedness of the two Reading companies, thus avoiding the present excessive interest charges for carrying temporary loans; and shall, by the temporary funding of the general mortgage interest or otherwise, provide a moderate sum to be used in necessary improvements, and in such additions to the equip-ment as increasing business may render necessary from time to thus if such a measure can be perfect d, it will permit the use of the income to pay at least the obligatory interest charges upon the liabilities of the two companies, for which it is thought to be sufficient." Of the Finance Company's contract it is remarked.

Of the Finance Company's contract it is remarked :

Of the Finance Company's contract it is remarked: "Under the contract of December 22, 1892, with the Finance Com-pany of Pennsylvania, that Company was only bound to advance \$1,000,000 as a loan upon the coal and coal accounts of the Coal & Iron Company, all of which are pledged as security for the loan, although their advances at the time of the appointment of the Receivers were coasiderably in excess of that sum. Nerotiations with the Finance Company resulted in securing that the minimum loan under the con-tract should be \$3,000,000. Negotiations with the holders of the unfunded obligations of the Reading companies have brought about such a readjustness of the loans as makes them much easiler to carry, the rates charged for the use of the mon-y having been very consider-ally reduced. The persons holding obligations of this company have without exception met the efforts of the receivers are greatly indebted to them for their courtesy and consideration. As to the purchase of shares of the Boston & Maine and the

& Co. by the receivers of the company except the \$100,000 as above stated. "After the sale of the shares of the New York & New England Rall-road Company, the balance of the account of Messes. Ervin & Co. amounted on June 10, 1803, to \$122,970, for which they held \$1,544,000 third preference bonds and \$283,000 trust bonds. As Messer, Ervin & Co. gave notice that it was impossible for them to continue to carry the account, and that they must sell the scentrifies, the receivers caused this balance to be paid, and recovered back the scentrifies of the company, which are now in their possession. "It will be seen that the substantial question which presented itself to the receivers and the present management in both of these cases was whether the collaterils which had been piedged by President MeLeod, and which piedge had been ratified by resolution of the board of managers, could be reclaimed, and if not whether they were worth more to the company than the dobts for which they were held." As to coal traffic it is said :

As to coal traffic it is said :

"Fears have been expressed lest the Reading Railroad Company was falling behind in its anthracite tonnage, or at least carrying less than

its share of the total anthracite production, but an examination of the official records of the trade shows that these fears are not well founded. The percentages of the total anthracite tonnage carried by the Phila-delphia & Reading Railroad Company for the last ten years are as follows:

Year.	Percentage.	Year	Percentage.
1004	01.71	1880	
1887	18.81	1893	
A CONTRACT MANAGEMENT AND A STREET	the state of the s		and the second second

1887. 21:81 1892. 20:94 1888. 20:94 showing that there has been no considerable variation in the propor-tion carried by the Reading Railroad in that period. It is true that in 1893 the proportion was not quite as largeas in the two preceding years, but this is due to a loss of tonnage in the earlier part of the year. In the three months preceding the receivership and ending February 28, 1893, the Reading Railroad carried 19:57 per cent of the total anthracite tonnage; in the next five months, ending July 31, at which in the three months preceding the cool purchase contracts were terminated, it carried 20:72 per cent; and the next four months, end-ing November 30, it carried 21:74 per cent. The mines of the Coal & tron Company are now in excellent condition, and the sales depart-ment is thoroughly well equipped, so that there is no reason to antici-pate that the Reading companies will not hereafter have their reason-able proportion of the anthracite business. "No considerable changes have been made in the last year, the supply of cars proving adequate to the business of the road, and it is prohable that, with the possible exception of some passenger coaches, there need be no considerable purchases of railroad equipment made for several years. The payments on account of the colupment pur-chased in the last few years are large, amounting to \$1,143,8390,31 in the year 1893, and they will period be fully as large in the year 1894, after which they will begin to fall off, the last of the existing obligations on that account maturing in 1899."

#### Lehigh Valley Railroad.

#### (For the year ending November 30, 1893.)

In advance of the pamphlet report the following summary is presented compiled from the press reports of the annual meeting.

is presented compiled from the press reports of the annual meeting. The annual report of the Lehigh Valley Railroad Co. for the year ending November 30, 1893, shows that the total tonnage over the road was 16,775,242 tons, against 16,529,485 in 1892, an increase of 248,757 tons. The results of the business during the eight months of the fiscal year in which the lessee was in possession as given in the monthly statements of the Pniladelphia & Reading Railroad Company, to which have been added the earnings of the Schuylkill & Lehigh Valley Railroad for the same per-iod, are as follows: Total gross, \$12,106,612; operating ex-penses, including rental of leased lines, \$8,599,427; net for 8 months, \$3,507,185. The tigures for the four months in which this company operated the line are as follows: Total gross, \$6,504,165; cost of operation, including leased lines, \$4,105,933; net for four months, \$2,398,232; total net earnings for the year, \$5,595.-417; other income, \$363,233; total income, \$6,368,650; against which should be charged general expenses, interest on floating debt, taxes, loss on Morris Canal, &c., \$522,377; in-terest on bonds (including interest on guaranteed bonds and stocks), \$4,179,860; balance, \$1,566,413. From which were paid dividends on preferred and common stocks, April and July, 1893, \$1,016,343, leaving a surplus of \$550,070. The resident Wilbur in his report says: "These results are gratifying when we take into consideration the decrease, as compared with last year, of 701,804 tons of miscellaneous freight, involving about \$450,000 in revenue, and from an-thracite coal freights of about \$85,000. There was also a direct loss of at least \$450,000 net revenue for November, due to the recent strike- net income for October, 1893, having been about \$775,000, and for November, 1893, was only about \$250,000. On Augurt 8 the indebtedness of the Philadelphia & Read-

\$325,000.

\$325,000. On August 8 the indebtedness of the Philadelphia & Reading Coal & Iron Co. to the Lehigh Valley Coal Co. was estimated at \$1,236,000. The amount of coal in our various stocking yards, the control of which was necessary in the conduct of the business, largely exceeded in value this debt. To secure this control and to discharge this debt, as well as to enable the coal company at once to meet the demands of its customers, all this coal was bought by the Lehigh Valley Coal Co. became payable monthly as the coal was sold. The larger part has already been sold, and the indebtedness to the Philadelphia & Reading Coal & Iron Co. for the excess value proportionately discharged. proportionately discharged.

#### The H. B. Claffin Company.

#### (For the half-year ending Dec. 31, 1893.)

(For the half-year ending Dec. 31, 1893.) The semi-annual report of this company says: "The season under consideration is the most disastrous of any in twenty years. Indeed, the panic of 1873 was proba-bly less severe and was certainly briefer. The panic of 1893 began in May, seriously affected trade in June, and produced almost a paralysis of industry and of trade during July, August and September. In October we notified our stock-holders that during the three preceding months our sales had fallen thirty-one per cent below the sales for the corresponding months of 1892, and we reduced the rate of dividends on the common stock to six per cent per annum. During October, November and December the improvement in general condi-tions was extremely slow; and we now find by inventory that profits for the half-year have barely sufficed to pay expenses and losses, leaving but the insignificant sum of \$6,522 as net

earnings toward dividends paid and to be paid on account of the half-year's business. After providing for interest on the preferred stock to December 31, 1893, and dividends on the the preferred stock to December 31, 1893, and dividends on the common stock at the rate of six per cent per annum, includ-ing the dividend payable January 15, 1894, our surplus will be reduced to \$301,600. Net earnings for the autumn of 1892 were \$511,725 and for the calendar year 1893 were \$870.006 as against \$323,786 for the calendar year 1893. Interest on the preferred stocks for the year 1893 amounts to \$284,251, leav-ing little more than one per cent earned on the common stock for the whole year."

for the whole year." The following, compiled for the CHRONICLE, compares the results of the half-year's business in three seasons:

INCOME 2	ACCOUNT	HALF-YEAR	ENDING	DECEMBER	31	L
----------	---------	-----------	--------	----------	----	---

1891. Net earnings, after paying all taxes. \$ salaries and expenses of every kind. 303.485 Interest on 1st pref. stock, half year 7,004	1892. \$ 511,725 65,007	1893. 6,523 65,007

549.248 301.601 The report gives the following summary:

"We have endeavored to inventory our merchand'se at

"We have endeavored to inventory our merchand'se at prices that will insure some profit for the spring. Our sales are now running nearly fifteen per cent below the average of the last three years, and the outlook for the time that may be spent in devising a new tariff is gloomy; but with expenses somewhat reduced we are confident that we shall be able for the year 1894 to tarn all dividends at present rates. "In view of the unpleasant experience of the autumn of 1893, it is fortunate that the business of the corporation for the three years ending June 30th. 1893, abundantly demonstrated the reliability of the figures of our prospectus as a basis of estimate. The average net earnings for four years given in the prospectus were \$737,000 per annum. The average net earnings for three years following the incorporation of the company were \$782,000 per annum. The lack of profit in the autumn of 1898 reduces the average for three and a-half years from the formation of the corporation to December 31st, 1893, to \$672,000 per annum. Even this latter average of \$672,000 to \$672,000 per annum. Even this latter average of \$672,000 per annum would suffice to cover all dividends on the pre-ferred stocks and to leave a little more than ten per cent per annum for the common stock.

Net earnings	96,509	140,182
Interest paid on 1st mtge, bonds	102,690	103,040
Balance	df. 6,081	sur.37,142

# GENERAL INVESTMENT NEWS.

American Sugar Co.-At the annual meeting in Jersey City there were only 273,000 shares represented according to City there were only 213,000 shares increased for a necessary majority of 369,000 shares. President Havemeyer said in regard to the inability to secure a quorum that the stockholders have increased from 4,000 in number last year to 7,400 this year. Of the 273,000 shares represented the management presented proxies for the entire amount with the exception of 4,500 shares. The meet-ing was adjourned for 30 days to Feb. 14. No annual report majority out of a necessary of 369,000 was presented.

Was presented. Atchison Topeka & Santa Fe.—The following committee representing holders of Atchison Topeka & Santa Fe bonds is announced: Edward King, of the Union Trust Company; Louis Fitzgerald, of Mercantile Trust Company; Edward W. Gibbs, of the New York Life Insurance Company; George F. Crane, of Baing, Magoun & Co. and Peter Geddes, of Geddes & Smith & Smith.

& Smith. The Boston committee to look after the interests of Atchi-son first and second mortgage bondholders consists of S. L. Thorndike. Walter Hunnewell, C. W. Amory, C. C. Jackson, H. L. Higginson and A. Lawrence Lowell. In London Jan. 11 a meeting of Atchison bondholders took place under the chairmanship of Mr. Herring. The meeting decided to appoint a committee of ten to confer with the American and Amsterdam committees in the hope of arriving at an amicable arrangement. at an amicable arrangement.

Called Bonds,-The following bonds have been called for payment; the numbers may be learned at the offices of the respective companies.

CLEVELAND & PITTSBURG RAILROAD CO.-61 construction nd equipment bonds, Series "A," will be redeemed July 1st, 1894.

WESTERN UNION TELEGRAPH Co. -Seven sterling bonds of £200 each and 7 of £100 each will be redeemed the first of March, 1894.

PENNSYLVANIA Co.-Twenty seven 6 per cent secured loan bonds due 1907 will be paid off at par on the 29th of January, 1894

Cape Fear & Yadkin Yalley.—It is again reported this week that the North State Improvement Company has sold to a foreign syndicate the control of the Cape Fear & Yadkin Valley road. The consideration is given as \$1,000,000. This report lacks confirmation by New York parties who are interested in the company.

Chicago Great Western.—In London, Jan. 10. a meeting of the debenture holders of this company was held. The Hon. Mr. Lidderdale said that the railroad had suffered from the condition of affairs that was telling more or less severely on all American railroads, and that had brought disaster to many of them. It might be possible to borrow the sum required for the held word dependence and story interest, but with the meeting of them. It might be possible to borrow the sum required for the half-year's decenture and stock interest, but with the present traffic returns and no provision secured for capital ex-penditures neither the committee nor the board of directors would support such a proposal. A motion was passed that the dividends on the debentures due January 15 should not be paid unless in cash.

Chicago & Northern Pacific.—A meeting of Chicago & Northern Pacific first mortgage bondholders is called for Wednesday the 17th inst. at the Central National Bank, Poil-adelphia. The committee, of which Mr. George M. Troutman is the chairman, announce that they are now prepared to sub-mit to bondholders much interesting information and to rec-ommend a definite course of action. The position of the com-mittee is stated at length in a circular which they have issued and which may be found in the advartising columns of the and which may be found in the advertising columns of the CHRONICLE.

Chicago Peoria & St. Louis-Jacksonville Louisville & Chicago Peoria & St. Louis-Jacksonville Louisville & St. Louis.- Messrs. Louis Fitzgerald, Thompson Dean, D. B., Hatch, Henry W. Putnam and Wm. D. Gutbrie, at the re-quest of the holders of a large amount of the bonds and stock of these companies, are acting as a committee for reorganiza-tion. A plan has been prepared and deposited with the Mer-cantile Trust Company and security holders are requested to sign the same and deposit their securities with that trust company on or before Feb. 15. Stockholders will be assessed \$5 per share, of which \$1 25 is payable on deposit of the stock and the remainder in three equal instalments on March 11, April 1 and June 1. April 1 and June 1,

The plan submitted provides that the two properties shall The plan submitted provides that the two properties shall be consolidated. New securities to be issued are \$5,000,000 first mortgage 5 per cent gold bonds, interest from July 1, 1894, first three years at 4 per cent and thereafter at 5 per cent; \$2,500,000 second mortgage 5 per cent income gold bonds, interest from Oct. 1, 1894, at such rate not exceeding 5 per cent as net earnings shall suffice to pay, the company having a right to reduce interest to 4 per cent as fixed charges; \$2,500,000 non-cumulative 5 per cent preferred stock and \$2,-500,000 common stock. The present bonded indebtedness of the two companies is \$5,501,000 and the capital stock \$5,000,-000.

000. Distribution of new securities-First mortgage bonds to be issued (\$5,000,000) to retire \$1,350,000 C. P. & St. L. first mortgage bonds at 90; \$936,900 to retire C. P. & St. L. first consol. 1st mort, bonds at 90; \$375,000 to retire J. L. & St. L. Ry. Co. first mortgage 6 per cent bonds at 125; \$1,242,000 to re-tire J. L. & St. L. consolidated mortgage at 90; \$400,000 to provide for floating debt and taxes, and \$696,100 to provide for car trusts, improvements, betterments, etc. Of the \$2,-500,000 second mortgage bonds, \$472,000 are to retire second consolidated bonds of the Chicago Peoria & St. Louis, \$784,200 to pay 20 per cent for funding interest, &c., on first mortgage bonds and first consolidated morgages of the Chi-cago Peoria & St. Louis and the first consol. bonds J. L. & St. mortgage bonds and first consolidated morgages of the Chi-cago Peoria & St. Louis and the first consol. bonds J. L. & St. L. and \$243,800 to apply for adjustment of claims. \$3,500,-000 preferred stock is to be applied as follows: \$690,000 to holders of Jacksonville first consol. mortgage; \$600,000 to first mortgage C. P. & St. L. bonds; \$416,400 to C. P. & St. L. first mortgage consolidated bonds; \$320,000 to C. P. & St. L. second consolidated mortgage; \$473,600 tor improvements, betterments, &c., and \$2,500,000 common stock to be divided pro rata to present holders, i. e., 50 per cent of present stock in new stock at par. Stockholders are to be assessed at \$5 per share and receive new preferred stock at 40. Colorado Midland.—The consolidated bondholders have an

Colorado Midiand,—The consolidated bondholders have ap-pointed Messrs. J. R. Busk, T. M. Davis, Wm. D. Sloan and Rt, Hon. Wm. Lidderdale, ex-Governor of the Bank of England, a permanent Committee to represent the intervsts of the bondholders in any necessary negotiations with the Atchison receivers.

Indianapolis Springfield & Western-Cincinnati Hamil-ton & Dayton.-The junior bondholders' committee of the Indianapolis Decatur & Western have renewed their contract with the Cincinnati Hamilton & Dayton and expect to com-

with the Cincinnati Hamilton & Dayton and expect to com-plete their bid for the property made at the foreclosure sale on May 3, 1893. The Court granted the committee an exten-sion of six months from Sept. 1, 1893, to complete their bid. Kansas City Wyandotte & Northwestern-Kausas City & Northwestern, -At Kansas City, Jan. 5, the Kansas City Wyandotte & Northwestern was sold to attorneys of the Missouri Pacific. The company will be reorganized as the Kansas City Northwestern, recently chartered by the State of Kansas for the purpose of buving the Wyandotte road. The price paid for the property was \$650,000. This road becomes part and parcel of the Missouri Pacific, and the route from Kansas City to Denver will be shortened forty six miles.

Louisville & Nashville .- The directors of the Louisville & Nash-ille Railroad Company met on Thursday and passed the following resolution :

Resolved, "That the board of directors deem it for the best interest of the company not to declare a dividend on the capital stock of the Louisville & Nashville Railroad Com-

"In explanation of passing the dividend in the face of a net surplus of about 2 1-10 per cent applicable thereto, the management state:

"Fi st. That this surplus is partly the result of economies prompted by a conservative appreciation of the danger of the decreased revenues, both past, and as far as discernible, to continue for some time to come. "Second. The company will require, when the general busi-

ness of the country resumes, to be thoroughly equipped and ready to avail itself of its strength and possess itself of its full share of the traffic which it can reach and control.

share of the traffic which it can reach and control. "Third. An active and improving property such as the N. RR. requires money for its development, which paying divi-dends on so small a margin of profit would only tend to delay "Fourth. It must be remembered that the first half of the fiscal year is usually the most remunerative, and it is not, in the present condition of affairs, to be depended upon that a rate of surplus earnings will be maintained which would materially increase the present surplus, while the possibility of its being encroached upon must be guarded against by () keeping it within reach in case of need." keeping it within reach in case of need."

# The Commercial Times.

# COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 12, 1894.

Operators in general merchandise adhere to the policy of avoiding unnecessary obligations, yet natural wants are compelling a gradual increase of demand for staple commodities. Retailers and small traders are carrying unusually light stocks of goods, and since taking yearly inventories have manifested a better disposition to obtain an addition to assortments. There is a growing tendency to accept moderate estimates of the cotton crop. During the early portion of the current week prices of wheat rallied sharply on Government report of moderate acreage of winter-sown grain, but soon reacted under attempts of holders to realize and the failure of support from foreign demand. Corn is coming from growers' hands with greater freedom than anticipated. Flour secures less inquiry from exporters and is only moderately active on home account. Receipts of swine are in excess of last year but stocks of cured meats small, which has served to enhance values somewhat. Weather conditions have been less favorable for winter wheat but no injury is reported. R cent ad-vices report universally good promise for the fall-sown crops of Europe. Lard on the spot has met with a slow trade, but owning to

the small supply prices were advanced and the close was steady at 814c. for prime City, 8.7214c. for prime Western and 9.10c. for refined for the Continent. The speculation in lard for future delivery has been quiet, but prices have advanced in sympathy with the West where packers have been buying, owing to the small supply in sight, closing firm.

DAILY CLOS	ING PR	ICES OF	LARD F	UTURES.		
	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
January	8.10	8.30	8.40	8.65	8.60	8.60
February	8.00	8.05	8.15	8:45	8.35	8:30
May	7.90	8 05	8.10	8.40	8.30	8.20

Pork has been in light request but prices have advanced and the close was steady at \$14 50 æ\$15 for mess, \$15 75 æ\$16 for family, \$16@\$17 50 for short clear and \$13 75@\$14 for extra prime. Cut meats have been dull but steady at 73/a 8c, for pickled bellies, 12@10 lbs, average 9@91/c. for pickled hams and 6@61/c. for pickled shoulders. Beef is quiet at \$3 a \$3 50 for mess, \$10/a\$10 50 for packet, \$11@\$13 for family and \$19/a\$20 for extra India mess. Beef hams have advanced to \$16 æ\$16 50. Tallow is scarce and higher at 53/s 51/c. Lard stearine is firmer at 71/c, Oleo-stearine is also bigner at 73/c. Cotton seed oil uns advanced with lard, closing firm at 31c, for prime crude and 33c for prime yel-low. Butter is quiet but steady for choice grad -s at 18@251/c.

low grades to manufacturers and 150 hhds, to exporters. Seed leaf tobacco has been in slow demand but steady. Sales for the week were 690 cases, as follows: 75 cases 1892 crop, New Ecgland Havana, 18@50c., 150 cases 1892 crop, Penn-sylvania Havana, 11@13c.: 100 cases 1892 crop, Zimmers, 12@ 14c.; 100 cases 1892 crop, Obio, 10c.; 225 cases 1893 crop, Wis-consin Havana, 7@10c., and 60 cases 1890 crop, 17c.; also 400 bales Havana fillers, 70@\$1 10, and 200 bales Sumatra, \$2 90@\$4 25. The succedation in Struits tin has been at a stand still and

\$2 90@\$4 25. The speculation in Straits tin has been at a stand-still and prices have further declined, closing at 20:20c. Ingot copper has continued in slow demand but prices were without change, closing steady at 10c. for Lake. Lead has been dull and the close was weak at 3:17%c. for domestic. Spelter has been without change and steady at 3:45c. for domestic. Fig iron is without change at \$11@\$14.50 for domestic. Fig iron is without change at \$11@\$14.50 for domestic. Refined petroleum is steady at 5:15c. in bbls, 2:65c. in bulk and 6:25c. in cases; crude in bbls. is quiet, Washington clos-ing at 6c. in bbls. and 3:50c. in bulk: naphtha 5%c. Crude certificates have advanced, closing steadv with buyers at 79c. Spirits turpentine has advanced, but the close was dull at 30% @81c. Rosin has been more freely offered and prices have

delic. Rosin has been more freely offered and prices have declined to \$1121/2@\$1 171/2 for common and good strained. Wool is sparingly offered and steady. Hops are in limited de-mand and steady.

# COTTON.

FRIDAY NIGHT. January 12, 1894.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 134,813 bales, against 190,702 bales last week and 230,140 bales the previous week; making the total receipts since the 1st of Sept., 1883, 4,482,775 bales, against 3,807.403 bales for the same period of 1892-3, showing an increase since Sept. 1, 1893, of 674,373 bales.

Speculation in cotton for future delivery at this market has again been active and conducted upon much the same general basis as during the preceding week. Local operators have to a large extent accepted the theory of a moderate yield in-fluenced thereto by the shrinkage of crop movement at inter-ior localities and reports of exhausted plantation supplies. Confidence has also been inspired by the very limited offerings from Southern holders and encouraging reports from Euro-pean markets. Domestic spinners, however, although show-ing greater interest have failed to place orders with the free-dom expected, and that, together with a noticeable absence of new investment by the outside trading public, led to realiz-ing profits on long engagements. During Saturday a net ad-vance of S@9 points was secured on demand stimulated by strong Southern advices and promising cable reports. Mon-day's business was quiet and stimulating in consequence of the Speculation in cotton for future delivery at this market has strong Southern advices and promising cable reports. Mon-day's business was quiet and stimulating in consequence of the aopearance of foreign buying orders, resulting finally in ad-ding 16.017 points to value. Of that gain about 10 points dis-appeared on Tuesday in consequence of less general demand and some securing of profits. The tone during Wednesday was stiffened by better Manchester advices and light crop figures, with 8 points gained, and yesterday the opening gave 10 points further advance but partly lost under selling out of long engagements. To-day the feeling has ruled firm with turther advance of 12 points, stimulated by light crop move-ment and evidence of increased attention from consumers. The dealing in cotton on the spot was light until the close, when demand from spinners increased and prices were firm when demand from spinners increased and prices were firm at 8 5-16c, for middling uplands. The total sales for forward delivery for the week are 1,305,900

	I Inniavilla fleness it not !! in both years	ŵ	)
-	This year's figures estimated. Last year's figures are for Sherman, Texas. Week's fi izoo City last year: Receipts, 1,765; shipments, 1,516; stoo	gures	for
I	The above totals show that the interior stocks have a	lecrea	ised
de	tring the most 20.856 balas and are to night 1.55	13 h	LIGH

The above totals show that the interior stocks have decreased during the week 30,356 bales and are to-night 1,583 bales less than at the same period last year. The receipts at all the towns have been 1,856 bales more than the same week last year and since September 1 they are 346,365 bales more than for the same time in 1892-93.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.— Below we give closing quotations of middling cotton at South-ern and other principal cotton markets for each day of the week.

Week ending	CLOSH	O QUOTA	CIONS FOR	MIDDLIN	3 COTTON	ON-
Jan. 12.	Satur.	Mon.	Tues.	Wednes.	Thurs.	Fri.

Columbus, Miss		Nashville		Selma	1
Enfaula	74	Natchez	7916	Shreveport	1

RECEIPTS FROM THE PLANTATIONS. The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Receipts at the Ports. St'k at Interior Towns. Rec'pts from Plant'ns. Week Ending-1891-92 1892-93 1893-94 1891-92 1892-33 1898-94 1891-92 1892-93 1892-94

 <t Jan.

The above statement shows: 1,—That the total receipts from the plantations since Sept. 1 in 1893 are 4.857,730 bales; in 1892-93 were 4,131,473 bales; in 1891-92 were 5,765,370 bales.

2.—That although the receipts at the outports the past week were 134,813 bales, the actual movement from plantations was 103,957 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 93,890 bales and for 1892 they were 160,242 bales.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1 .-OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.-We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Jan. 12 and since Sept. 1 in the last two years are as follows:

Q. 148	189	3-94.	1892-93		
January 12.	Week.	Since Sept. 1.	Week.	Since Sept. 1	
Shipped-					
Vla St. Louis	13,501	363,576	10,534	247,388	
Via Cairo	6,632	161.701	6,720	131.543	
Via Hannibal	196	13,255	2,892	113,705	
Via Evansville		5,897	438	11,594	
Via Louisville	2,627		2,493		
Via Cincinnati	3,102	69,832	1,818	62,801	
Via other routes, &c	2,108	78,885	6,948	1(5,077	
Total gross overland	23,169	757,658	31,843	757,799	
Overland to N. Y., Boston, &c	10,261	147,759	10,803	145.033	
Batween interior towns	623	19,093	293	16,691	
Inland, &c., from South	506	63,322	1,187	39,234	
Total to be deducted	11,390	230,174	12,283	200,958	
Leaving total net overland*	16.779	527,484	19,560	556 841	

\*Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 16,779 bales, against 19,560 bales for the week in 1893, and that for the season to date the aggregate net overland exhibits a decrease from a year ago of 29,357 bales.

In Sight and Spinners'	189	3-94.	1892-93		
Takings.	Week.	Since Sept. 1.	Week.	Since Sept.

e during we

It will be seen by the above that there has come into sight during the week 134,736 bales, against 127,450 bales for the same week of 1893, and that the increase in amount in sight to-night as compared with last year is 722,901 bales.

WEATHER REPORTS BY TELEGRAPH.-Reports to us by telegraph from the South to-night indicate that in some portions of the Atlantic and Gulf States the rainfall has been rather heavy during the week and the temperature above the normal. In the Southwest, however, the precipitation has been very light, as a rule. The movement of the crop continues quite free. Galveston, Texas.-

-It has been showery on four days of the

week, the rainfall reaching seventy-two hundredths of an inch. Average thermometer 61, highest 71, lowest 51. *Palestine. Texas.*—It has been showery on one day during the week, with rainfall to the extent of six hundredths of an inch. The thermometer has averaged 52, the highest be-

an inch. The information has averaged 52, the highest be-ing 73 and the lowest 30. *Huntsville, Texas.*—We have had light rain on one day of the past week, the precipitation reaching three hundredths of an inch. The thermometer has averaged 54, ranging from 34

to 74. Dallas, Texas.—Cotton estimates have again been reduced, and the small remnant of the crop in farmers' hands is be-ing tenaciously held. Small grain crops look well but need rain. There has been one shower during the week, the pre-cipitation being one hundredth of an inch. The thermom-eter has ranged from 24 to 74, averaging 49. San Antonio, Texas.—We have had one shower the past week, the rainfall being one hundredth of an inch. Average thermometer 53, highest 76, lowest 40. Luling, Texas.—There has been no rain during the week. The thermometer has averaged 55, the highest being 73 and the lowest 38.

The thermometer has averaged 55, the highest being 72 and the lowest 38. *Columbia, Texas.*—There has been one shower during the week, the precipitation being eight hundredths of an inch. The thermometer has averaged 62, ranging from 46 to 79. *Cuero, Texas.*—Dry weather has prevailed all the week. The thermometer has ranged from 50 to 76, averaging 63. *Brenham, Texas.*—We have had one shower during the week, the precipitation being five hundredths of an inch. A verage thermometer 56, highest 76, lowest 35,

Average thermometer 56, highest 76, lowest 35, Belton, Texas.—There has been no rain during the week. The thermometer has averaged 57, the highest being 78 and the lowest 36.

Fort Worth, Texas .- We have had rain on one day (mere

drizzle), the precipitation reaching one hundred h of an inch. The thermometer has averaged 52, ranging from 30 to 74. *Weatherford, Texas.*—The weather has been dry all the week. The thermometer has ranged from 28 to 73, averaging 50.

New Orleans, Louisiana .- It has rained on three days of the week, the precipitation reaching sixteen hundredths of an inch. Average thermometer 67. Shreveport, Louisiana.-We have had rain on four days

Shreeport, Louisiana. — we have had rain on roll days during the week, the precipitation reaching eighty-one hun-dredths of an inch. The thermometer has averaged 54, the highest being 68 and the lowest 39. *Columbus, Mississippi.*—There has been rain during the week to the extent of one inch and forty-eight hundredths, on three days. The thermometer has ranged from 30 to 83, averaging 53.

averaging 53. Leland, Mississippi.—The week's rainfall has been three inches and forty-one hundredths. Average thermometer 54, highest 67, lowest 39. Meridian, Mississippi.—Telegram not received. Helena. Arkansas.—It has rained on four days of the week,

the ranfall reaching one inch and thirty-five hundredths. The thermometer has ranged from 30 to 60, averaging 46 6. *Little Rock, Arkansas.*—We have had light rain on one day of the week, the rainfall reaching twenty-nine hundredths of an inch. The thermometer has averaged 46.2, ranging from 32 to 56 32 to 56

Memphis, Tennessee .- There has been rain on five days during the week, the precipitation reaching two inches and fif-teen hundredths, but the weather is now clear and cold, Average thermometer 46.1, highest 58 and lowest 32.1. *Mobile, Alabama.*—There has been rain during the week to the extent of one inch and seventeen hundredths on five days.

*Labolate, Alabolina.*—There has been rain during the week to the extent of one inch and seventeen hundredths on five days. The thermometer has averaged 65, ranging from 49 to 76. *Montgomery, Alabama.*—The weather bureau says that temperature here during the week has been as high as ever before during January, and only once in the last twenty-two years has it been as high in any January as in the past week. Rain has fallen on five days of the week, the rainfall reaching one inch and sixty-four hundredths. The thermometer has ranged from 58 to 64, averaging 59. *Selma, Alabama.*—There has been rain on four days of the week, the precipitation reaching one inch and twelve hun-dredths. Average thermometer 54, highest 78 and lowest 31. *Madison, Florida.*—Rain has fallen lightly on two days of the week, the precipitation reaching twenty-five hundredths of an inch. The thermometer has averaged 63, the highest being 74 and the lowest 43. *Columbus. Georgia.*—It has rained on four days during the past week, the trainfall being one inch and eighteen hun-dredths. The thermometer has averaged 54, ranging from 44 to 70.

to 70.

Augusta, Georgia.—There has been rain on five days during the week, the precipitation reaching seventy-six hundredths of an inch, but the close is clear and pleasant, Average ther-mometer 58, highest 73 and lowest 42. Savannah, Georgia.—It has rained on five days of the week, the rainfall reaching eight hundredths of an inch. The thermometer has ranged from 46 to 78, averaging 60.

Charleston, South Carolina.—Rain has fallen on five days of the week, to the extent of eight hundredths of an inch. The thermometer has averaged 57, the highest being 74 and the lowest 45.

Stateburg, South Carolina.—We have had rain on five days of the week, the precipitation reaching one inch and fifty-four hundredths. The thermometer has averaged 53.8, ranging hundredths. from 38 to 74.

Wilson. North Carolina. --Rain has fallen on four days of the week to the extent of two inches and fifty one hundredths. The thermomenter has ranged from 36 to 70, averaging 49.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock January 11, 1894, and January 12, 1893.

SEA ISLAND COFTON MOVEMENT, -- We have received this SEA ISLAND COTTON MOVEMENT. —We have received this (Friday) evening by telegraph from the various ports the details of the Sea Island cotton movement for the week. The receipts for the week ending to-night (Jan. 12) and since Sept. 1, 1893, the stocks to-night, and the same items for the corresponding periols of 1893-93, are as follows.

Townshield Benefit	189	3-94.	189	2-93.	Sto	ck.
Receipts to Jan. 12.	This week.	Since Sept. 1.	This week.	Since Sept. 1.	1894.	1893.
Sayannah Charleston. Florida, &c	1,647 2 439	1,849	41	5 697		10,332 1,731 75
Total	2.084	51 425	693	86 470	19 100	10 190

The exports for the week ending this evening reach a total of 3.189 bales, of which 2.862 bales were to Great Britain, 277 to France and — to Reval, and the amount forwarded to Northern mills has been 1,104 bales. Below are the exports for the week and since September 1 in 1898-94 and 1892-93.

Domanda	Week E	Inding J	an. 12.	Since	Sept. 1,	North'n Mills.		
Exports from—	Great Bril'n.	Fr'nce dec.	Total.	Great Brit'n	Fr'ncc &c.	Total.	Week	Since Sept.1.

Total	2,862	277	3,139	21,857		24,966	1,104	15,053
Tot 1892-93	1,432		1,632	10,429	1 3 -7	11,816	176	14,417

A considerable portion of the Sea Island cotton shipped to foreign ports goes via New York, and some small amounts via Boston and Baltimore. Instead of including this cotton for the week in which it leaves the Southern outports, we follow the week in which it leaves the Southern outports, we follow the same plan as in our regular table of including it when actually exported from New York, &c. The details of the shipments of Sea Island cotton for the week will be found under the head "Shipping News," on a subsequent page. Quotations Jan. 12 at Savannah for Floridas, common, 13c.: medium fine, 15<sup>3</sup>/<sub>4</sub>c.; choice, 17<sup>1</sup>/<sub>5</sub>c. Charleston, Carolinas, medium fine, 20 to 22c.; fine, 30 to 35c.; extra fine, 40 to 50c.

JUIE BUITS, BAGGING, &C.-Although the demand for jute bagging during the week under review has been limited, and bagging during the week under review has been limited, and the volume of bosiness consequently very small, prices have ruled steady and the close this evening is at the same figures as quoted last Friday, viz.:  $5\frac{1}{6}c$ . for  $1\frac{3}{4}$  lbs.,  $5\frac{5}{6}c$ . for 2 lbs. and  $6\frac{1}{6}c$ . for standard grades in a jobbing way. Car-load lots of standard brands are quoted at  $4\frac{1}{6}c$ . for  $1\frac{3}{4}$  lbs., 5c. for 2 lbs. and  $5\frac{1}{6}c$ . for  $2\frac{1}{4}$  lbs., f. o. b. at New York. The market for jute butts has been very quiet the past week on the basis of 1%c. for paper grades and 2%c. for bagging quality on the spot.

EAST INDIA CROP.-From Messrs. Lyon, Comber & Co.'s cotton report dated Bombay, December 8, we have the following:

lowing: Crop accounts are, generally speaking, satisfactory, as the weather has been fine, and accounts from the various districts are decidedly better than they were two weeks ago. The rain which feil recently has injured a small portion of the Oomra and Khandelsh crops, but the accounts to hand lately lead us to expect only slight damage com-pared with what was done last year by unseasonable weather, and prospects at present a ay be considered favorable and a larger yield than last year is generally expected; but it is early yet to put forward any definite estimate as to the size of the various crops. All we can say at present is that Broach looks like showing an increase on last year's figures, as also do the Oomra, Khandelsh and Bengal returns, while the Dhollers and Bhownuggar reports do not point to quite so large an out-turn as we had last year.

EGYPTIAN COTTON CROP.-The following is the report of the Alexandria General Produce Association for the month of November:

"Thacks to the temperature, which continued most providious throughout November, picking took place under very good conditions. It will be fluished by about the middle of December. Nearly all the bolls of the third picking, even those whose opening at one time seemed uncertain, have arrived at maturity. To this must be alded that the vield in glaniag of the second picking shows an incororement upon the first. Under the above circumstances we expect a flual re-sult of 4,750,000 cantars about."

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 177,991 bales. So far as the Southern ports are concerne, these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

# BREADSTUFFS.

FRIDAY, January 12, 1894.

Early in the week there was a moderate trade in the market for wheat flour, the local trade was a moderate buyer and prices ruled firm, but later, owing to a reaction in the market for the grain, buyers withdrew, but values held steady. Corn meal has sold slowly but prices have been unchanged and steady. Buckwheat flour has been without change and quiet. Rye flour has met with a slow trade, but prices have been quoted unchanged. To-day the market for wheat flour was dull but steady.

dull but steady. In the fore part of the week the market for wheat futures was stronger on moderate buying, stimulated by reports of severe weather West and the small acreage of winter wheat planted as reported by the Government; but later free selling by "longs" prompted by dull and weak foreign advices, selling for foreign account and the dulness of the spot trade, turned the market, and prices declined. Business in the market has been extremely slow, but prices have held com-paratively steady. The sales yesterday included No. 2 red win-ter at 68c. delivered. To day the market declined early in the day in response to weaker foreign advices, but subsequently advanced on buying by "shorts" to cover contracts, stimu-lated by an increas d export d-mand. The spot market was moderately active for export at steady prices. The sales inmoderately active for export at steady prices. The sales included choice red winter on private terms.

THE AGRICULTURAL DEPARTMENT'S REPORT ON CROPS OF THE YEAR .- The report of the Department of Agriculture for January was issued Jan. 8 as follows :

for January was issued Jan. 8 as follows: The estimates of area and product of the principal cereal crops-potatoes tobacco and hay for the yearlss3, as completed by the statis itelam of the Department of Arriculture, make the aggregate of corn area, 72,026,465 acres, product 396,131,725 bushels; otals, acres, 27,2036, 4.629,418 acres, product 396,131,725 bushels; otals, acres, 27,27,033, product, 638,554,550 bushels; rre, ac es, 2,038,485, product, 26,555,-446 bushels; barley, acres, 3,220,371, product, 69,569,495 bushels; buckwheat, acres, 813,614, product, 12,132,311 bushels; potatoes, acres, 2,605,186, product, 183,044,203 bushels; tobacco, 702,952 acres, product, 443,023,963 pounds; hay, 49,613,469 acres, product, 65,766,158 tons. The average yield of corn per acre was 22:5 bushels; wheat, 11:4 bushels; oats, 2:4 bushels; potatocs, 72,2 bushels; barley, 21:7 bushels; barley, acres, 14:9 bushels; potatocs, 72,2 bushels; tobacco, 687 pounds; hay, 133-100 tons. The returns of the corre-spondents of the Depariment make the acreage of winter wheat sown hast fail 93:2 per cent of the srea harvested in 1893.

#### Prairie. THE DRY GOODS TRADE.

NEW YORK, Friday, P. M., January 12, 1884.

New York, Friday, P. M., Jannary 12, 1884 A The market has presented a busier appearance this week, owing to the arrivals of a number of visiting buyers from various points, and some increase in business is recorded in both staple goods and fabrics as a result. The orders by mail have also increased somewhat in numbers, so that compared with recent weeks satisfactory progress has been made. The market is however still quiet when judzed by the aggregate sales, as the buying element at work is chiefly composed of the smaller class of traders, large operators putting in very few orders in keeping with their transactions on a normal market. The fact that the increased trade comes from the general run of buyers rather than from exceptional opera-tions is an encouraging indication that the consumptive re-quirements of the country are making themselves felt more tangibly in the primary market. There is no departure from late cautions policy on the part of buyers: purchases are still of a confined character so far as individual volume goes, with but rare exceptions, but there are more concerns buying. The tone of the market is somewhat more cheerful under these conditions, stocks continue in good shape and prices generally steady. generally steady.

generally steady. DOMESTIC WOOLENS, -- Most agents report some increase in the re-orders for spring weight woolens and worsteds, as the clothing manufacturers need to replenish their stocks some-what. The orders are as before, however, small in volume and of a scattering rature, and more for the lower than the higher cost varieties. New lines of heavy weights are still largely neglected, buyers not yet being prepared to contract for fall supplies, either in suitings or overcoatings to any extent. Further prices may this week show declines of from ten to fifteen per cent from last year's heavy weights. Satinets, union and cotton-warp cassimeres, doeskins and Kentucky jeans are inactive throughout. Cloakings in quiet demand. Some improvement is noted in woolen and worsted dress goods in point of reorders of both staples and fancies. Plannels and blankets quiet; more doing in carpets.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending January 8 were 14,525 packages valued at \$640,763, their destination being to the points specified in the table below :

NEW YORK TO JAN. 8.	<b>DEE</b>	1894.	1893.	
MEW TORA 10 SAN. O.	Week.	Year,	Week.	Year.

Total	16,705	16,705	5,327	5,327

\* From New England mill points direct.

The value of the New York exports for the year has been \$640,763 in 1894, against \$151,149 in 1893.

The demand for staple cottons has been more general. In brown sheetings and drills while business has as a rule been confined to medium-sized to small orders a few sales of some confined to medium-sized to small orders a few sales of some extent have been made to converters and exporters at slight concessions; but apart from these exceptional instances prices are steady. Bleached shirtings in all grades are in quite current request, as are cambric muslins, kid-finished cambrics, silesias and other linings. Wide sheetings in better delivery on back orders than in new demand. Colored cottons are generally quiet, the manufacturing trade still being decidedly moderate purchasers. White goods have sold rather more freely in both staples and fancies. Printed fabrics show more doing in both regular fancies and specialties in light work, but staples, indigo blues, shirtings, &c., quiet. Ginghams in all grades are in moderate demand only, but more doing than last week. Print cloths are practically down to 3%c. for 64 sq ares, with little doing except in wide goods. 1894. 1893. 1892.

# TERMS OF SUBSCRIPTION.

Commercial and Financial CHRONICLE con tains 40 to 64 pages published every week.

State and City Supplement of CHRONICLE contains 180 pages published periodically.

Investors' Supplement of CHRONICLE (a Cyclopædia of Railroad Securities) contains 160 pages published every other month.

Subscription to CHRONICLE for one year \$10.00. which includes every issue of both SUPPLEMENTS.

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the STATE AND CITY SUPPLEMENT. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the STATE AND CITY SUPPLEMENT to as near the current date as possible. Hence if every Subscriber will note in his SUPPLE-MENT on the page designated at the head of each item a reference to the page where the item in the CHRONICLE can be found, he will at all times possess a complete and fresh cyclopædia of information respecting Municipal Debts.

# REVIEW OF MUNICIPAL BOND SALES IN DECEMBER AND DURING THE PAST YEAR.

In view of the fact that the month of December is usually considered one of the dullest of the year in the municipal bond market, our table of sales given below shows that the year 1893 has proved a remarkable exception in this respect. The total amount of new State and city securities issued and sold last month was according to our returns \$17,290,064. This is the largest aggregate which we have reported for any one month during the two years that our records have been kept in this form. The large amount of the sales and the noticeable advance in the prices paid would indicate that these municipal securities are feeling the restoration of confidence more strongly perhaps than any other class of investment, and it is not surprising that such should be the case. The disasters of the year through which we have just passed have resulted in making capitalists extremely cautious, and it is but natural that the strongest signs of awakening activity should be noticeable first among investments having the greatest possible degree of safety.

In our statement below we give the prices which were paid for December loans to the amount of \$14,684,864, issued by thirty municipalities and the State of Massachusetts. The aggregate of sales for which no price was reported is \$2,605,200 and the total sales for the month, \$17,290,064. In the case of each loan reference is made to the page of the CHRONICLE where a full account of the sale will be found. DI

Total sales for December......\$17,290,064

# \* Less a commission of \$2,000.

It is interesting to note that Detroit's offering of 4 per cent thirty year bonds to the amount of \$850,000 called out sixteen bidders and that the securities went at 1041 and 105+, as it will be remembered that the city has been advertising some of these bonds from time to time ever since last May without receiving satisfactory proposals. The sale of 5 million Massachusetts 33s at 103.177 and the fact that the aggregate amount bid for was \$11,700,000 is another good indication, although of course the high credit of the State of Massachusetts would insure a market for her securities under almost any circumstances. New York City 3s offered in December brought bids of par and a fraction above for the first time during 1893, all the bonds previously offered having been taken by the city's sinking fund. Another large loan was marketed by the Sanitary District of Chicago, the securities being 5s to the amount of \$3,000,000, and the price paid 101.793.

In the CHRONICLE of December 9th, page 1005, we gave a list of the November bond sales, amounting to \$6,903,270. Since the publication of that statement we have received notice from Dallas, Tex., Hudson County, N. J., and Hillsboro, N. Dak., of the following loans sold in that month.

ADDITIONAL NOVEMBER SALES.					
Page. Location. Rate. M	aturity. Amount. Award	l.			
	3 or 1913 \$100,000 101.38				
1054. Hudson Co., N. J 412 191	18-1923 285,000 100				
1093Hillsboro, N. Dak 6 190	08-1913 12,500 100				

These additional loans will make the total sales reported in November foot up \$7,300,770 and the increase this month is consequently shown to be \$9,989,294.

As has already been said, the total amount of bonds reported as sold during last December is much larger than that which has been reported for any other month of the last two years. This fact is clearly shown by the following table, in which we give the total amount of bonds reported to us as issued and sold in each month of 1893 and 1892. The total sales last year show a fall ing off of \$6,418,742 as compared with those of 1892. TOTAL BOND SALES BY MONTHS.

January February March April May June July August. September October November December \$6,352,000 7,761,931 8,150,500 6,723,000 .856 12,249,000 4,139,1004,108,4916,242,9521,766,42011 Total sales for 1892.\$83,823,515

Total sales for 1893.\$77,404,773

While these figures do not cover all the little issues made by small towns and school districts, it is not probable that any important State or city loan has been omitted. /

Indianapolis, Ind .- Last Saturday the United States Circuit Court of Indiana rendered a decision in favor of Messrs, Coffin & Stanton of New York in their suit to recover a deposit made with the city of Indianapolis last May, when they were the successful bidders for \$621,000 of the city's refunding bonds. The bonds were issued to redeem \$600,000 of 7.3 per cents which fell due July 1, and to replace in the city treasury \$21,000 used on first of April to pay off 8 per cent bonds for that amount. It will be remembered that after the award was made the New York firm refused to accept the securities as they were informed by their attorney that the \$21,000 could not legally be included in the refunding issue. They signified their willingness, however, to take the issue as soon as the defect could be remedied. The city authorities held that the bonds were a legal issue in the original form and claimed the deposit made by Coffin & Stanton as a forfeit for not fulfilling their contract. The recent decision would indicate that Messrs. Coffin & Stanton were right in the matter and that their objection to the form of the bond issue was a valid one.

The refunders have not yet been placed and the New York Life Insurance Co. is carrying the old 7.3 p. cts. for the city.

Arkansas.—The holders of all the issues of Arkansas State aid bonds are asked to deposit them with the Knickerbocker Trust Company of 18 Wall Street, New York, and to sign an agreement to be found there which has already been signed by holders of more than \$1,000,000 of these securities. Application will be made to the New York Stock Exchange to list the negotiable certificates of deposit of the Knickerbocker Trust Company, to be issued in exchange for the bonds.

These securities to the amount of \$4,350,000 were negotiated by the railroad companies to which they were issued. The

interest was paid by the respective roads down to and including October, 1872, when default was made upon them.

It is understood that the present action of the bondholders is for the purpose of further enforcing their rights in the courts of Arkansas against the railroads and the S ate.

The Advisory Committee is composed of John P. Townsend, President of the Knickerbocker Trust Company, Chairman, Emanuel Lehman and Robert Maclay.

The Cherokee Indian Bonds Sold.—Messrs. R. T. Wilson & Co. confirm the purchase by them of the indebtedness of the United States Government to the Cherokee Nation, amounting to \$6,640,000.

The above indebtedness was created by the purchase by the Government from the Cherokee Nation of certain lands known as the Ckerokee Outlet, and which lands were thrown open by the Government to public settlement some time last summer.

The purchase money for this indebtedness is to be paid into the Treasury of the United States to the credit of the Cherokee Nation, which is to be held by the Treasury, subject to the action of the National Council of the Cherokee Nation, which is now in session, and which will pass an act making provision for an early distribution of this money on a per capita basis, which amounts to about \$300 per capita.

Bond Proposals and Negotiations.-We have received through the week the following notices of londs recently negotiated and bonds offered and to be offered for sale.

Babylon Union Free School, District No. 6, N. Y.-Bids will be received until January 17 by the Board of Education of this district, at Amityville, N. Y., for the purchase of 5 per cent school boards to the amount of \$20,000. Interest will be

payable semi-annually on January 6 and July 6, and \$1,000 of the amount will become due July 6, 1898; \$3,500 July 6, 1903; \$6,500 July 6, 1908, and \$9,000 July 6, 1914. Both principal and interest will be payable in gold. Each bid must be accompanied by a certified check for two per cent of the amount of bonds bid for.

Bartow, Fla.-The citizens of Bartow will vote on January 18 on the question of issuing bonds for water-works.

Birmingham, Ala.—(STATE AND CITY SUPPLEMENT, page 170.)—The City of Birmingham has sold \$150.000 of 6 per cent 30-year gold bonds to be dated January 15, 1894, and payable principal and interest at the Hanover National Bank of New York. The city's present bonded debt is \$1,480.000; assessed valuation, \$23,000,000; real valuation, \$60,000,000; population in 1892 was 35,000.

Brockton, Mass.-(STATE AND CITY SUPPLEMENT, page 22.) -Bonds to the amount of \$100,000 for the extension of water mains have been recommended.

Chariton, Mo.-(STATE AND CITY SUPPLEMENT, page 118) -Notice has been given that bond number one of Chariton township dated February 1, 1889, is called for payment.

Chicago, Ill.-(STATE AND CITY SUPPLEMENT, page 92.)-On January 6th \$60,000 of municipal bonds and \$130,000 of water bonds were sold to A. O. Slaughter & Co. of Chicago, at par and accrued interest. Both issues will be dated January 1, 1894, bear interest at the rate of 4 per cent per annum and fall due in twenty years. Principal and interest will be payable in gold at the American Exchange National Bank of New York.

Danville, Ky.—The people of Danville will probably vote on the question of issuing bonds for water works estimated to cost \$65,000.

Daytona, Fia — Mr, C. M. Bingham, Jr., Town Clerk, writes us that the \$6,500 of bonds have not as yet been disposed of. The loan is to be issued for the building of a sea-wall. The bonds will bear interest at the rate of 6 per cent, payable an nually on Jan. 2 at the Treasurer's office, will be dated Jan. 2, 1894, and will become due Jan. 2, 1904. The town has never had any debt of any kind, and its assessed valuation, which is one-third of actual value, for 1893 of real estate is \$227,713; personal property, \$33,160; total. \$265,873. The total tax rate for 1893 is \$19 50, including State and county tax, \$9 50, and city tax proper, \$10.

Delhi, Ohio.—Village Clerk F. D. Saunders writes the CHRONICL<sup>4</sup> that the \$2,867 86 of bonds which were offered for sale on January 9 were sold at a premium of 3 per cent. They are dated January 4, 1894, bear interest at the rate of 6 per cent, payable annually, and become due in from one to ten years. The bonds were issued for the improvement of Shady Avenue and Main Street.

Elmira, N. Y.- (STATE AND CITY SUPPLEMENT, page 47.)-E. J. Beardsley, Secretary of the Board of Education of Elmira, writes us that the \$16,500 of school bonds were sold some time since at par and accrued interest. The bonds bear interest at the rate of 4 per cent, payable semi-annually, and mature October 15, 1911.

Findlay, Ohio.—(STATE AND CITY SUPPLEMENT, page 81.)— Proposals were to be received until January 12 at the office of David Hosler, City Treasurer, for the purchase of \$5,000 of improvement bonds dated Dec. 1, 1893, and payable May 1, 1919; \$5,000 dated Jan. 1, 1894, and payable June 1, 1919, and \$5,000 dated Feb. 1, 1894, and payable July 1, 1919, The bonds all bear interest at the rate of 6 per cent, payable semiannually at the office of the City Treasury.

Hemingford, Neb.-Bonds of Hemingford to the amount of \$6,500 have recently been voted for water works.

Howard County, Mo.-(STATE AND CITY SOPPLEMENT, page 113).-Notice has been given by A. F. Willis, County Treasurer, that 5 per cent compromise and funding bonds dated February 1, 1889, and numbered from one to thirty inclusive, will be paid at the National Bank of Commerce, Fayette, Mo., on February 1, at which time interest will cease.

Louisiana.-(STATE AND CITY SUPPLEMENT, page 172.) Bids will be received until February 10 by the Board of Liquida-

tion of the State of Louisiana for the purchase and retirement of consolidated and constitutional bonds of the State, to an amount not exceeding \$425,000. All bids or offers to sell must be filed with the Auditor of Public Accounts and Ex-Officio Secretary of the Board.

New Orleans, La.—(STATE AND CITY SUPPLEMENT, page 173).—Sealed proposals will be received until February 13 at the office of the Board of Liquidation of the City Debt, Room 5, City Hall, New Orleans, and until February 10, at the bank-ing house of Winslow, Lanier & Co., No. 17 Nassau Street, New York, for the purchase for cash of \$540,000 of the con-stitutional bonds of the city of New Orleans, bearing 4 per cent interest, represented by coupons payable January 1 and July 1 in New Orleans and New York, and maturing in 50 years, the bonds to be delivered to the purchasers on February 21.

New York City .- (STATE AND CITY SUPPLEMENT, page 50.) Bills have been introduced in the Legislature authorizing the issuance of \$750,000 of bonds for the completion of Riverside Park and \$250,000 of bonds for the completion of Cathedral Parkway.

Onalaska, Wis.-The people of this city voted on December 26 in favor of issuing \$15,000 of bonds for water works.

Parkersburg Independent School District, Iowa.—Bids will be received until February 1 for the purchase of school bonds of this district to the amount of \$7,000. The bonds will be of the denomination of \$500 each, will bear interest at the rate of 5 per cent, payable semi-annually, and will mature in 10 years, subject to redemption after 4 years.

Parkersburg, Iowa — Town Recorder M. F. Edwards writes the CHRONICLE that the \$6,000 of water-works bonds recently voted will be sold at private sale, sealed bids to be received until February 1. The bonds will bear interest at the rate of 5 per cent, payable annually, will be of the de-nomination of \$500 each, and will become due in 20 years with an option of call after 10 years.

An election will be held at Pittsburg on February 20 to vote on issuing \$6,000,000 of public improvement bonds.

Quitman, Ga.-Water-works and electric-light bonds to the amout of \$20,000 have recently been voted.

San Bernardino Co., California.—Bonds of this county to the amount of \$250,000 for the improvement of public high-ways were proposed a short time since, and the Board of Supervisors petitioned to call an election to vote on the ques-tion. County Treasurer Truman Reeves writes us that the Board did send out blanks, but that so much opposition was encountered that the election has not been called and for the present the proposition has fallen through. The Treasurer states that the financial condition of the county is very good, there being a debt of only \$9,000.

Sandusky, Ohio. - (STATE AND CITY SUPPLEMENT, page 84.) -We are informed by A. W. Miller, City Clerk, that sewer bonds to the amount of \$2,000 were awarded on Jan. 10 to the Third National Bank of Sandusky at par, this being the only bid received. The bonds are dated Jan. 15, 1894, bear interest at the rate of 5 per cent, and become due at the rate of \$500 yearly from Jan. 15, 1896, to Jan. 15, 1899.

Scranton, Pa.-(STATE AND CITY SUPPLEMENT, page 70.)-An ordinance has been passed by the Council of Scranton pro-viding for the issuance of bridge bonds to the amount of \$250,000.

Tonawanda Village, N. Y .- (STATE AND CITY SUPPLEMENT, page 55.)-The water commissioners of the village of Tonawanda will offer \$65,000 of water bonds for sale at public auction on January 25 at the village office. The securities will be 20-year 5s dated January 1, 1894, with interest payable J. & J. at a place to be agreed upon with the purchaser. The bonds will be either registered or coupon. Further particulars are given in an advertisement elsewhere in this Department.
