#### THE FINANCIAL SITUATION.

The crops are becoming week by week of increasing importance as an influence affecting the industrial situation. They will soon hold a first place among the forces operating either favorably or unfavorably on general business. We say soon, because the early growth is such a very important factor in the final result. Every one knows what added vitality all plants gain through a strong and healthy start ; how they thereby become able better to resist every ill in later life they are subject to. An abundant harvest is not assured because of a vigorous early growth ; but that is an incident of great promise in the progress towards that end. What has given rise to the hopeful feeling recently entertained respecting the crop outlook relates to just this point; that is to say, seeding is finished under favorable circumstances for spring wheat, corn and oats, and all the plantings have thus far done well, and in most sections much better than a year ago. The only drawback anywhere reported is that in some districts the growth has reached a position where rain would be beneficial ; no harm from lack of moisture has as yet been done.

This favorable crop situation, some decisions of the Supreme Court limiting the power of the Inter-State Railroad Commission over freight rates about which we have written elsewhere, and a respite from speeches in the Senate on irritating subjects added to a start by the same body on tariff legislation, have given a more hopeful tone to affairs in Wall Street this week. As a consequence of this changed mood all events current and prospective have been interpreted favorably. Prominent among these naturally enough is tariff revision. The work having been begun, a speedy end to it is the first thought and desire of the business public. There seems to have been no actual evidence in support of the assumption, the information coming mostly over private wires from Washington, yet every one claimed that final action by the Senate was to occur much earlier than has recently been anticipated. To be sure our legislators have been engaged on the bill only a few days and none of the most important schedules have been disposed of. At the same time, some little ground for the assumption is to be found in the fact that the party having the bill in charge proposes to talk itself as little as possible, while up to this time no factious opposition has been disclosed on the part of the opposing party; then, too, it lends hope to the wish, when the public recalls to mind how easily the bill skipped into the Senate gaining two or three weeks of time and sparing the tired merchant and banker that amount of additional discussion in committee. As a result of these suggestions and feelings, what we all want to believe had become early in the week the general verdict, that a very few weeks more would see the present attempt to change the Customs law finished.

On this occasion still another idea is aiding the more hopeful feeling or sentiment now prevailing. A large class of our people is fully convinced that nothing more is needed to ensure prosperity but the passage of a high protective tariff measure; that as soon as Customs revision is completed a revival of business, if not a boom, will be the unquestionable outcome. Even those who do not accept that view know that Customs legislation in progress is a hindrance to industrial development, and that the closing of the

would be a removal of that hindrance. With then the high tariff people taking the broader view and most others seeing in a completed law an obstacle to industrial revival removed, no wonder that the developments of this week have created a better sentiment, leading to almost a buoyant movement at one time. On the other hand, when one looks at the situation and sees how depressed all the leading trades are nowespecially those we are wont to look at as indicators of the state of general business, such as iron, coal, dry goods and the like -when one notes the low condition of those industries, the proposal, stated in its naked shape, of giving wings to business by increased taxation, does not look especially promising. Considering the marvel involved, one seems almost forced in a faithless sort of way to ask, "Shall these dry bones live?"

Another circumstance of this week which, as we look at it, is extremely satisfactory and in its tendency helpful, has been the discharge of Mr. Havemeyer by Judge Bradley; if now the prosecution of the coal roads could be brought to an abrupt end we should begin to think our overweighted industries might have a much better chance than they now have of revival. Dramatic efforts of politicians to make a display of zeal in the feigned interest of the poorer classes by the persecution of men simply because they are conspicuous for their wealth has been carried so far that apparently to be industrious and thrifty and clever is rated almost as a stigma. Did we think that any Constitutional principle was at stake in Mr. Havemeyer's trial, we should not feel as we do. The question raised, as we understand it, is not one that necessarily touches the honesty or dishonesty of any member of the Senate, but relates simply to the contributions of the Sugar Trust to political party funds. Those contributions could be large without rightfully injuring in the least the good name of any one. If they bore the same proportion to the capital of the donor that small men's contributions do, they would be large, and being large they might-in the opinion of a numerous class of readers who believe that to be rich is to be sinful-be used to reflect on the donor's own honesty or the honesty of members of the Senate without reason. We may, perhaps, assume that man-ufacturers as a class—not sugar refiners alone—gave last year and four years before, and generally give, good round sums in a Presidential election to help their party; also that people who believe in freer trade act in a similar manner. In a word, whenever there is an important principle at stake the liberal among the rich do what they can to help the side they believe to be right. Probably the result in 1896 was in great part produced through just such liberality which in the main was used to enlighten the public mind, making the people see and feel that free silver is synonomous with industrial cataclysm. Is it to be the practice hereafter to prosecute criminally any wealthy man and hold him up to public reproach and scorn as "a millionaire on the way to the common jail" for the dreadful crime of having subscribed liberally to the party funds ?

President Stuyvesant Fish of the Illinois Central made some interesting observations recently bearing on the forces at work in the railroad world and which are working to the detriment of the roads. The portion of the remarks relating to the utility of traffic associa tions and agreements for the maintenance of rates has work by the enactment of the proposed law special application and pertinency just now, when, ac cording to common report, the chances of the passage by Congress of a measure permitting some form of pooling among the roads have been greatly improved through the Supreme Court decisions this week. Mr. Fish says that it was to prevent ruinous competition that traffic associations were brought into being. The multitude of interests, diverse interests, of the roads made it necessary for the autonomy of each that agreements be entered into to prevent working in the dark, to avoid competition that would not advance anything but demoralization, and to give the adherents of commerce the benefits of a stability of tariffs upon which they could base a selling price for their commodities. The action of the courts in breaking up these agreements, the gradual reduc-

in breaking up these agreements, the gradual reduction of earnings incumbent upon the enforcement of lower rates than are compatible with paying operation, and the adverse action of legislatures and of Congress, make it apparent that the small roads must go to the wall. They cannot afford to exist. The refusal to permit pooling, Mr. Fish observes, must result in the formation of great traffic lines, which will extend over vast distances and bring the roads in the various sections of the country under one management, and thus control in a manner the railroad situation. "Some persons might be inclined to class these systems as monopolies, and yet, if they do become so, who or what is to blame?"

The Wabash makes a very encouraging showing as to net earnings in its return for the month of April. In the gross earnings there had been a loss as compared with the same month last year of over one hundred thousand dollars-\$100,852-but this was met by a still larger reduction in the expenses, the saving here having been \$148,013, so that the net earnings actually record an increase of \$47,161. It is now certain that the results for the fiscal year to June 30 next will be much better than seemed likely a few months ago. For the seven months to January 31 net earnings had shown a loss as compared with the corresponding period in the previous fiscal year of \$272,893. But this loss has been reduced each month since then, and for the ten months to April 30 the shortage as compared with 1895-6 is now only \$197,498.

The Cleveland Cincinnati Chicago & St. Louis for the same month reports comparatively small changes -\$32,870 increase in gross, \$1,799 increase in net. Southern roads show various results. The Southern Railway has \$86,614 increase in gross, \$70,816 increase in net; the Chesapeake & Ohio, with \$78,824 increase in gross, has only \$369 increase in net; the Central of Georgia, with \$1,351 decrease in gross, has \$27,758 increase in net, and the Cincinnati New Orleans & Texas Pacific has \$36,439 increase in gross and \$38,173 increase in net. In the Southwest the St. Louis & San Francisco has added \$29,776 to its gross and \$19,849 to its net, and the San Antonio & Aransas Pass respectively \$53,200 and \$21,159. The Atchison, with \$307,228 increase in gross, has sustained \$124,072 decrease in net. In the Northwest the Milwaukee & St. Paul falls behind \$162,820 in the gross and \$35,750 in the net, and the Minneapolis & St. Louis, while having suffered a reduction of \$6,155 in the gross, has succeeded in enlarging its net by \$4,822. The Chicago & North Western does not give out the net, but in the gross there is a contraction of \$232,076. Among the anthracite coal roads, the Central of New Jersey has \$21,038 decrease in gross but \$15,224 increase in net. The New York Susquehanna & Western has \$12,063 decrease in gross, \$4,973 decrease in net. The Reading, on the combined operations of the various companies, shows slightly improved net (in amount \$10,011), but this follows almost entirely from a great contraction in the expenses of the Coal & Iron Company attending a large falling off in the gross receipts of that company.

Money on call, representing bankers' balances, has loaned at the Stock Exchange this week generally at 11 per cent, with moderately large transactions at the end of the day at 14, making the average for the week about 18 per cent. It was reported on Wednesday that \$1,000,000 had been borrowed by a Boston brokerage firm in this market on call at 1 per cent. This cannot be regarded as establishing a 1 per cent rate for call money, as it was a special matter. It is said that the Boston firm will probably be largely interested on the 1st of June in some Eastern city loans made in anticipation of the collection of taxes, and though the money was in form borrowed on call it will probably not be disturbed until the negotiations for these city loans are completed. Banks and trust companies loan at the rate current on the Stock Exchange. Some moderately large time loans have been made this week at 3 per cent for the remainder of the year, and there appears to be a good inquiry for money for long periods, but very little for less than four months. Quotations for time money are 2 per cent for thirty to sixty days; 21 per cent for ninety days to four months; 3 per cent for five to seven, and  $3\frac{1}{2}$  per cent for eight months on good Stock Exchange collateral. Banks having large correspondence with the South report a good inquiry from Southern bankers preparatory to an expected demand for cotton and fertilizers, but as yet no money is moving to that section in response to such inquiry, though it is regarded as probable that the demand for funds for re-discounts will be fully as great as it was last year, and perhaps larger. The supply of commercial paper is good but by no means equal to the demand, which is sufficiently great to absorb all offerings. Quotations are 31 per cent for sixty to ninety-day endorsed bills receivable; 33@41 per cent for first-class, and 41/05 per cent for good four to six months single names. A comparatively large amount of very choice four months single-name paper has been bought by one of the banks this week at  $3\frac{1}{2}$  per cent.

Some slight influence upon the European security markets this week has been caused by the varying aspect of peace negotiations, and also by a rumor regarding the health of Barnato, the South African mining operator; but the London market for money has not been disturbed and the tendency is towards ease. The Bank of England minimum rate of discount remains unchanged at 2 per cent. The cable reports discounts of sixty to ninety-day bank bills in London 1 per cent. The open market rate at Paris is 1<sup>3</sup>/<sub>4</sub> per cent, at Berlin it is 28 per cent and at Frankfort 21 per cent. According to our special cable from London the Bank of England lost £147,075 bullion during the week and held £36,531,749 at the close of the week. Our correspondent further advises us that the loss was due to the imports of £210,000 (of which £60,000 were from Australia and £150,000 from the Cape), to £3,000 net sent to the interior of Great Britain and to £354,-000 sold in the open market, which report says was principally for Russia and Austria.

The foreign exchange market was easy on Monday, growing weak on Wednesday, influenced by offerings.

of bills drawn against exports of gold and also by drafts against shipments of provisions and flour, and it was steady at the decline on Thursday and quite dull. The gold exports for the week were \$500,000 by Baring Magoun & Co. for Kidder, Peabody & Co. of Boston, \$1,250,000 by Lazard Freres and \$600,000 by L. Von Hoffmann & Co., on Tuesday, and \$500,000 by Lazard Freres on Thursday. All of this gold went to France, and as sight sterling ruled below the point at which the shipment could be made as a direct exchange operation, it follows that the export was facilitated by a triangular movement based upon the condition of sterling at Paris on London. Not all of the gold was taken from the Sub-Treasury, \$1,510,000 of it coming from banks, where it had been accumulated from various sources by the shippers. It was reported on Wednesday that more gold would go forward on Saturday, but none was engaged. The posted rates for exchange were 4 87 for sixty day and 4 88 to 4 884 for sight until Tuesday, when Brown Bros. reduced both long and short half a cent, making the range for the remainder of the week 4 861 to 4 87 for sixty day and 4 88 to 4 881 for sight. Rates for actual business opened on Monday easy at a reduction of one-quarter of a cent, compared with the close on Friday of last week, for short sterling and cable transfers, at 4 87@4 871 for the former and 4 871@4 871 for the latter, while the rate for long sterling was unchanged at 4 86@4 864. There was no alteration in the rates on the following day, the market being dull and steady, but on Wednesday the tone grew weak and rates for actual business were reduced onequarter of a cent, to 4 853@4 86 for long, 4 863@4 87 for short and 4 87@4 874 for cable transfers. There was no change on Thursday or Friday and the market was steady at the decline. The following table shows the daily posted rates for exchange by some of the leading drawers.

DAILY POSTED RATES FOR FOREIGN EXCHANGE.

The market closed firm on Friday with the posted rates at  $4.86\frac{1}{2}@4.87$  for sixty day and  $4.88@4.88\frac{1}{2}$  for sight. Rates for actual business were  $4.85\frac{3}{4}@4.86$  for long,  $4.86\frac{3}{4}@4.87$  for short and  $4.87@4.87\frac{1}{4}$  for cable transfers. Prime commercial bills were  $4.85\frac{1}{4}@4.85\frac{1}{2}$ and documentary  $4.84\frac{3}{4}@4.85$ .

The following statement gives the week's movements of money to and from the interior by the New York banks.

## THE SUPREME COURT AND THE INTER-STATE COMMERCE COMMISSION.

After the decision of the United States Supreme Court in the Trans-Missouri Freight cases, it is refreshing to have its decisions this week in the cases involving the duties and powers of the Inter-State Commerce Commission. The Court decides that under the Inter-State law the Commission has no power to fix rates; and furthermore, it so construes and interprets the law that it can be made an instrument for the protection of security holders as well as of shippers.

There were decisions in a number of cases bearing on the construction of the Inter-State law, but the most important one was that against the Cincinnati New Orleans & Texas Pacific Railway and other Southern roads in suits originally instituted by the Chicago Freight Bureau and the Cincinnati Chamber of Commerce. It will be remembered that a little over a year ago the Court delivered several important opinions, and that in one of these (the Social Circle case) it overruled the Commission in an attempt to lower rates, and laid down the doctrine that that body had no power to fix rates. It was seen at the time that this doctrine was of farreaching importance. Since then the circuit courts in the various actions that have come before them have cited that opinion as a ground for denying to the Commission the right to have its orders prescribing rates enforced. The Commission sought, however, to give the language of the Court a more restricted meaning, arguing that the remarks were intended to cover only cases where the Commission sought to fix rates on its own motion or without a previous hearing. The decisions this week completely sweep this plea aside.

The opinion was by Judge Brewer, and he said that the power to prescribe a tariff of rates for carriage is a legislative and not an administrative or a judicial function, and is a power of extreme delicacy and importance. It is not to be presumed, he declared, that Congress has transferred such power to any administrative body. The words and phrases necessary to make the delegation of power are well understood, and if Congress had intended to grant the power to the Inter-State Commerce Commission, it would have used language to do so. He pointed out that incorporating into a statute the obligation to make all charges reasonable and just, and directing the Commission to execute and enforce that statute, does not invest it with the power to exercise the legislative function of prescribing rates which shall control in the future. Furthermore the right of the carrier to fix rates is recognized in the clear language of section six.

Answering the query whether the Commission then has any function to perform in respect to the matter of rates, the Court says unquestionably it has, and

eral duty of inquiring as to the management of railroad companies and to keep itself informed, &c. It has a right to compel complete and full information as to the manner in which carriers are transacting their business. With this knowledge it is charged with the duty of seeing that there is no violation of the long-and-short-haul clause ; that there is no discrimination between individual shippers; that nothing is done by rebate or device to give preference to one as against another; no undue preference to one place or individual or class of individuals; but that in all things the quality of right, which is the great purpose of the Inter-State act, shall be secured to all shippers. The Commission must see that that publicity which is required by section six of the act is observed by the railroads. The Court quotes Commissioner Cooley to the effect that holding the railroad companies to strict compliance with all these statutory provisions, and enforcing obedience to all these provisions, tends both to reasonableness and equality of rates as contemplated by the Inter-State law.

It is not to be supposed, argues Justice Brewer, that Congress could ever authorize an administrative body to establish rates without inquiry and examination, "to evolve, as it were, out of its own consciousness the satisfactory solution of the difficult problem of just and reasonable rates for the various roads in the country." The opinion points out that the Commission is not limited in an inquiry to rates in which a formal complaint is made, but under section 13 may institute any inquiry on its own motion. "There is nothing in the act requiring the Commission to proceed singly against each railroad for every supposed or alleged violation of the act. In the case now at hand, if the fact exists as claimed there would be no escape from the conclusion that it would be within the discretion of the Commission of its own motion to suggest that the inter-State rates on all roads in the country were unjust, and to notify the several roads of such opinion, direct a hearing, and make one general order reaching every road and covering every rate. It will never do to make a provision prescribing the mode and manner applicable to all investigations and all occasions equivalent to a grant of power in reference to some specific matter not otherwise conferred."

Justice Brewer quotes the Commission against itself in the case of Thatcher against the Delaware Road, where the Commission said : "It is therefore impossible to fix them (rates) in this case, even if the Commission had the power to fix rates generally, which it has not." After noting that nowhere in the act is there any suggestion of any maximum or minimum rate, the Court makes the important declaration that "a rate may be unreasonable because it is too low as well as too high-in the one case unreasonableness to the stockholder, in the other to the shipper." The Court also repeats its declaration in the Covington turnpike case, that in determining the question of reasonableness the duty is to take into consideration both the interests of the public and the owner of the property. Summing up, the Court says: "Our conclusion then is that Congress has not conferred upon the Commission the legislative power of prescribing rates, either maximum or minimum or absolute. As it did not give the express power to the Commission, it did not intend to secure the result indirectly by empowering that tribunal to determine what, in reference to the past, is reasonable and just, whether

in the second

most important duties. It is charged with the general duty of inquiring as to the management of railroad companies and to keep itself informed, &c. It has a right to compel complete and full information as to the manner in which carriers are transacting

It should be noted that the decision in this case is not that of a divided, but that of a nearly unanimous Court, only one of the judges (Justice Harlan) dissenting. The ruling is noteworthy and important not only because it so clearly and unequivocally denies to the Commission the power to fix rates, but also (and perhaps still more) because it lays down the doctrine that rates may be unreasonable in being too low as well as in being too high, and that the interests of the owners of the property are entitled to consideration equally with the users. This is all that any one can ask; and had the Inter-State Commerce Commission in its various rulings acted on that idea, the law might have proved a very beneficial enactment. But the Commission chose to act on the opposite theory-to make the law a one-sided affair, to be used against the roads but never in their favor.

There is likelihood that indirectly great good may result from this decision. The ruling in the Trans-Missouri Freight cases has left the railroads in a very precarious situation in the matter of rates, so that new legislation is necessary to prevent general chaos. But such legislation the Inter-State Commerce has opposed, having recently written a long letter showing hostility to the proposed pooling bill now under consideration in the Senate. The denial to the Commission of the right to fix rates changes the whole aspect of things. The Commission finds that its powers have been curtailed. It will presum bly therefore now co-operate with the roads in having the law amended: and in view of the importance of the railroad industry we cannot believe that the interests and requirements of the roads will be entirely ignored in a new scheme of legislation.

#### THE QUEEN'S JUBILEE.

On the 20th of next month will be celebrated with due ceremonial the sixtieth anniversary of Queen Victoria's accession to the British throne. The occasion will be in many ways remarkable. Merely as marking a reign exceptionally long in the annals of sovereignty, this sixty-year continuous occupancy of the throne of a great nation is an event in history. Her reign has already extended over a longer period than that of any previous English sovereign. The long reign of George III. lacked nine months of the sixty years which his granddaughter's reign has now nearly completed, and in his last nine years of sovereignty King George was incapable of ruling. The other long reigns of English history-Henry III.'s fifty-seven years upon the throne and Elizabeth's, forty-four-fall materially short of the present Queen's extraordinary record. Louis XIV. of France, who inherited the throne in 1643 and died in 1715, may be said to have reigned the longest of any sovereign in history. But Louis was only five years old at his father's death and until 1661 France was virtually governed by a regency. The present Queen of England, though only nineteen years of age when she succeeded to the throne, exercised from the first the constitutional attributes of sovereignty. It is doubtful whether history records a parallel instance in continuous royal administration.

The importance of precisely such a reign, by precisely such a sovereign, in Great Britain since 1837 is beginning to be recognized. It is the commonplace of criticism to compare the power of the titular head of England's Government with the power of our Chief Executive and to contrast these powers to the disadvantage of the Crown. The President of the United States is the nation's actual ruler; he is the actual commanderin-chief of its armies and navies; the appointing power and the veto power, under their Constitutional restrictions, rest absolutely in his hands; his ministers are in all respects his personal choice. None of these powers is actually exercised by the English sovereign. The Queen does not even name, except by empty form, the commanders of the British forces; her power of appointment in the civil service practically exists no longer; theoretically she may veto Parliamentary measures; in actual fact she has never done so and would probably not be recognized in doing so; her ministers are chosen on the nomination of a party cancus in the Commons, and the nomination thus submitted is to all intents and purposes appointment. Yet in spite of this apparent lack of real authority the Queen's influence on the political history of her time has been very great; not less so, it may properly be affirmed, through what she has refrained from doing than through what she actually has done.

Even sixty years ago it was long since the British sovereign had exerted any direct influence on legislation. Her two predecessors had repeatedly submitted to Parliamentary measures strongly repugnant to them personally, and though they had submitted with bad grace enough, they had confirmed the precedent. But in the British governmental system the policies initiated by a cabinet, especially in foreign affairs, are apt to shape indirectly the action of Parliament, and it has never been impracticable for the sovereign, under certain conditions, to influence or control these cabinet policies. George II. forced out of office the ministers whose plans did not suit his purposes. George III., in the words of the historian of England in the Eighteenth Century, "assumed the position not only of a prime minister but of a cabinet, superintending, directing and prescribing, in all its parts, the policy of the government." George IV. and William IV. came into repeated collision with their ministers. Had either been a sovereign of force and ability, the royal prerogative might have become a different matter in their reigns, and this notwithstanding the gradual loss of power by the Crown over the electorates. In 1837, when the sovereignty devolved upon the present Queen, it is a matter of history that public opinion in many quarters looked forward with distrust to a possible ministry of royal favorites.

The influence of the Crown was in fact by no means so far diminished at that time that a struggle of some sort was impossible. In such a struggle Parliament and the people would undoubtedly have won, but unfortunate results might conceivably have followed from their very victory. The English legislators have been self-restrained at nearly all great crises in the country's history ; yet the general movement of reaction from a centralized power which occurred throughout Europe during 1848 was severe and thorough, and might have had very disturbing influence on England but for the already well-defined attitude of the Queen. It is, in fact, the high merit of Victoria's career that she has

tendencies of the time, and has adapted her own position to them. In this there has been no struggle and surrender, as with the earlier sovereigns of her family, nor any sullen submission similar to that of her immediate predecessors. The Crown retained its normal prestige, the People and the Parliament the rights which developed with the needs of the day. Only on one occasion, in her famous rebuke to Lord Palmerston in 1850, has the Queen ever taken issue with a Minister; and in that case fault was not found with the Minister's public policy, but with his practice of altering a policy, already agreed to by the sovereign, without submitting his alterations to the Queen. Personal likes and dislikes, which not unnaturally had been the weak point in the career of previous English queens -even of one as cool and sagacious as Elizabethhave played no part whatever in this reign. It was thought at Victoria's accession that she preferred Lord Melbourne above any other councillor; it has been said in recent years that her political choice was centred in Lord Salisbury; and it has been believed. that neither Palmerston nor Gladstone was a premier altogether to her liking. But except for the episode already noticed, there has been no proof of any feeling of the sort; the Queen has uniformly carried out with dignity the real purposes of the English constitution.

Being moreover by no means a weak or mediocre character, the Queen has become a quiet but essential factor on a good many occasions of importance. The restless young Emperor of Germany has more than once hurried his country almost to the verge of war by saving or doing something which in itself did not exceed the privilege of a constitutional sovereign. The Queen of England, or a King who might have occupied. her place, could in the same way have done equal mischief; for these are days when words count for as much at times, in the intercourse of nations, as formal legislative action. But the Queen's opportunities in this regard have been used with rare discretion. History has recorded the very great influence exerted by the Queen and the Prince Consort in the critical days. of 1861 towards maintaining friendly relations with the United States. This was an instance all the more noteworthy from the fact that the Ministry of the day was infinitely less conciliatory. Taking a period of more recent date, there is the best of reason to believe that the personal good offices of the Queen did much in the early stormy days of 1896 to smooth away international friction. The pains taken by Lord Salisbury within a month to arrange a personal interview between his sovereign and the President of the French Republic showed that at least one experienced statesman had not lost faith in the influence of the Queen.

It may in fact be said without exaggeration that Queen Victoria's character has been as fortunately adapted to the genius of the Nineteenth Century as was that of her great predecessor to the Sixteenth. Victoria would possibly have made but small impression on the world of absolute government and collision of uneasy States which existed three hundred years ago. But Elizabeth would be as strangely out of place in 1897; indeed, the Elizabeth of history would to-day be utterly impossible. Neither of these two remarkable women can be considered apart from the conditions. and circumstances in which their characters found development. It is the supreme merit in the character of each that they comprehended the tendency and recognized even in advance of actual demonstration the spirit of the time and adapted their own careers to it.

Three European sovereigns since the close of the Napoleonic wars have left the impress of their personality on an epoch of distinct and abiding national achievement. These three are Emperor William I. of Germany, King Victor Emmanuel of Italy and Queen Victoria of England. It is not without significance that each of these sovereigns has been remarkable, first for discerning the true movement of national sentiment and aspiration, and second for co-operating cordially with such ministers as best interpreted this movement. None of the three achieved distinction as an autocrat; all recognized the limitations which the Nineteenth Century had placed upon their office. Compared with such spectacular charac-ters and reigns as those of Charles V., Louis and Napoleon I., their history XIV. may seem commonplace. But the three notable sovereigns last mentioned left their States at the end of their careers in ruin or decay. In recent times the almost equally powerful political careers of the Third Napoleon and of Alexander II. of Russia ended with the condition of their people very little bettered, and with nothing contributed to history except some changes in the map of Europe. Such times as ours demand something different from their rulers; it is therefore a true instinct which celebrates the quiet, orderly and progressive reign of Queen Victoria. A succession of sovereigns with similar methods and purposes, in the European States east of the Rhine, would solve the Continental problem which sometimes nowadays seems insoluble. Certainly nothing else will solve it.

## CANADIAN CUSTOMS TARIFF POLICY-MANCHESTER COTTON GOODS MARKET.\* Manchester, May 19.

The new departure in Canadian Customs tariff policy has excited singularly little attention in the United Kingdom. Partly no doubt because its importance and its far reaching consequences are as yet very im. perfectly comprehended and partly because the public mind is too full of more exciting questions, the significance of the movement remains so far unrevealed. Even those who knew the strength of the desire in Canada for what is called an Imperial Customs Union were not prepared for an unconditional offer of preferential treatment at the Dominion Customs Houses of British productions. Still less were they prepared for its announcement by a Liberal Administration, since the backbone of the Canadian advocacy of the Customs Union was furnished by the Conservatives.

It will be remembered that at the Congress of Chambers of Commerce of the Empire held in London last June the series of motions in favor of a Customs Union on a preferential basis—which were not adopted—proceeded from Canadian representatives and some of them were the outcome of the Ottawa conference, previously held. Of the popularity and sincerity of the present movement no doubt whatever is entertained here, although it is imagined that it owes some of the earnestness with which it is supported to the Dingley Bill and the readiness with which this was passed by the House of Representatives. But however gratifying the project may be, and however welcome on various grounds, political and commercial, those who have given close

\*Communicated by our special correspondent at Man--chester. attention to it recognize that it must necessarily raise a question of great interest and magnitude, in view of the British treaties of 1862 and 1865, concluded respectively with Belgium and Germany. Clause 15 of the former says: "Articles the produce or manufacture of Belgium shall not be subject in the British colonies to other or higher duties than those which are, or may be, imposed upon similar articles of British origin." A clause of like purport is contained in the German treaty. In several other treaties subsequently concluded by the British Government "most favored nation" provisions are inserted with reference to the colonies, which, by implication, convey the same privilege.

For the last 13 or 14 years this stipulation has always been omitted. There can be no doubt, however, that the German and Belgian governments will claim that the preferential rates of duty in Canada shall be applied to the productions of their respective countries. This claim the Canadian Administration is not disposed to admit, except upon condition of reciprocal terms in the German and Belgian tariffs being accorded to Canadian produce. The solution of the problem thus emerging will have to be found at the Colonial Office, and there can be no doubt that it will form the subject of very earnest conference between Mr. Laurier, when he visits England next month, and Mr. Chamberlain, the Secretary of State for the Colonies.

There appear to be only two modes of dealing with the difficulty. The two Continental governments may be asked to make some modification of their tariffs so far as Canadian produce is concerned which will warrant the extension to the productions of Germany and Belgium of the preferential tariff; or, failing the success of such a proposal, twelve months' notice may be given to terminate and revise the treaties of 1862 and 1865 with a view to the excision of the clauses relating to the colonies. The first course is very likely to involve the revision of the German treaties concluded in 1892 with Austria, Italy and other European States and that of a later date made with Russia. Hence arises a new possible difficulty. The second is clearly easy enough (as a matter of right), but it can hardly be unattended by the risk of some sort of retaliation or threatened retaliation on the part of Germany and Belgium. So far as this country is concerned there can be no doubt that such action, or even the threat of it, would be very reluctantly adopted by either country, for the policy of unconditional free trade in England and the large market here which is open to the whole world are highly appreciated throughout Europe. They have proved sufficient, for example, in France to secure the voluntary concession of most favored nation treatment for British productions, this being there not the subject of treaty but of special statute passed by the French Parliament in 1882.

It is apparent, therefore, that some very interesting, and perhaps not altogether easy, diplomatic work has been cut out for Lord Salisbury's Government by the new Canadian departure. Meanwhile British goods are entering Canada under the preferential rates of duty, and certificates of origin are being issued by the Chambers of Commerce for such goods.

The state of the Manchester market for cotton goods and yarns can hardly be described by a weaker word than that of "depressed." Rarely, in recent years, have the scantiness of the demand and the lowness of prices in relation to the cost of production been so widespread. Producing, as they do, an incalculable variety of goods for all markets, the spinners, manufacturers, calico printers, dyers and bleachers of Great Britain are nover altogether under a cloud. In the worst of times some exceptional instances are met with in which they are able to keep, their machinery fully employed and to earn some profit. Just now, however, such instances are very rare, and the complaining is almost general. True, the distribution of goods in the home trade continues fairly abundant, but this department, important as it is, does not take off quite one-fourth of the production of the spindles and looms of the country.

The demand for India is appreciably reduced, not so much by the famine as by the continued effects of the pestilence and the scarcity of money in India. The grain trade and the relief operations in the dependency absorb a much larger proportion of its currency than in normal years, and since the mints are closed the supply of money for other purposes is much lessened. Hence the native distributers of piece goods and other merchandise are greatly hampered by the high rates of interest—often from 14 to 16 per cent—which they have to pay for loans and discounts. Exports of goods to India have consequently fallen off considerably, and seem likely to be lessened still futher, if one may judge from the scantiness of the new contracts now being concluded.

Then, too, the demand for the South and Central American markets is weak, particularly those of Brazil and the Argentine Republic. In the last-named country the effects of the destruction to crops caused by locusts last year are added to other causes of depression.

Exports to Turkey have shown a gratifying improvement during the last few months, and for a longer period those to Syria, in particular, have been very liberal. Indeed merchants trading with Beyrout have enjoyed, for at least a year, an excellent and profitable trade, the country served from that port having been, on the whole, prosperous and free from the disturbances which have devastated Armenia. The Egyptian market has also been encouraging, and it is still regarded as a promising one.

On the whole, however, the immediate prospect in Manchester is far from being hopeful, and it is certain that the quantity of weaving machinery standing idle or working short-time is increasing, although in relation to the entire industry it cannot be called large. The spinning branches have for more than a year been relatively in a better state than the weaving, and even now spinners are, as a rule, able to avoid accumulations of stocks. Their condition, though, in this respect is becoming slowly worse, and they can hardly keep so firm a hold upon prices as they could a few weeks ago.

## THE UNION PACIFIC REORGANIZATION SCHEME.

In the United States Circuit Court at St. Paul, Minn., last week, the petition of the Credits Commutation Company for leave to intervene in the Union Pacific foreclosure suits was dismissed. The petition was not considered of any consequence, as it was difficult to see how the petitioner had any standing in the case. Still the decision is interesting as marking the disposal of another one of those proceedings which, as Mr. Winslow S. Pierce puts it (in answering the order of the Court to show cause), have come to be almost inevitable at a certain stage of railway foreclosure and reorganization.

As regards the reports which have this week come from the other side, saying that there was considerable dissatisfaction with the reorganization plan on the part of the foreign holders of Union Pacific securities, and suggesting the possibility of some opposition, we think they possess little importance. We are sure they would have received no notice whatever except for the coincident appearance of an article in "The Economist" of London criticizing the plan. Fully 80 per cent of all the bonds embraced in the plan and over 95 per cent of the stock have given their adhesion to the plan ; so it is evident that the material out of which to organize an opposition is in any event very slender. Of course the position of "The Economist" is such as to invest its criticisms with much weight, and hence even though the work of reorganization has progressed so far that it is only a matter of a few months before it will be altogether completed, it seems desirable to consider very carefully what "The Economist" says and see if its conclusions are supported by the facts.

The "Economist" speaks without reserve, and after urging a number of objections to the plan it concludes its article in these words : "That scheme, as we have already said, is one out of which the reorganizers may make money, but it will benefit no one else, and it would be well if even at this, the eleventh hour, it could be defeated." This is strong language, and for ourselves we must say it does not seem justified. The writer of the article thinks the stockholders should have been accorded better treatment-that the assessment of \$15 a share is too onerous and that the scheme puts an unnecessarily large and greatly inflated amount of securities ahead of the stock. He says the plan "involves the issue of \$100,000,000 of 4 per cent gold mortgage bonds, to replace about \$90,000,000 of existing bonds bearing from 5 to 8 per cent interest; \$75,000,000 of 4 per cent preferred stock, chiefly to be used as compensation to the bondholders converting, and \$61,000,000 of common stock to replace the present shares, which, under the scheme, would be assessed at \$15 apiece.'

The "Economist" regards such drastic proposals doubly objectionable in the light of the company's report for 1896, showing "a debit balance of no more than \$1,091,000." In view of that statement a reorganization should certainly be possible, it contends, "without having recourse to such a gigantic inflation of the capital of the undertaking." It criticizes particularly that part of the scheme allotting to the present mortgage bondholders a large amount of new preferred stock as an inducement to them to accept the new bonds in exchange for their present bonds. On this point it says: "Seeing, however, that other American railroads are at present converting their high-rated bonds into 31 per cent securities, the mortgage bondholders of the Union Pacific might very well be content to renew their bonds upon a 4 per cent basis without receiving such a bonus in preferred stock."

At the outset we may remark that the "Economist" has overlooked one very important fact, namely that last January after the making of the contract with the Government the amount of first mortgage bonds to be issued under the plan was reduced from 100 million dollars to 75 millions. This makes a difference of 25 million dollars in the amount of the securities to be put ahead of the stock and a saving of \$1,000,000 a year in the fixed charges preceding the stock. Fur-

1025

thermore we cannot see that there is anything particularly encouraging in the fact that the deficiency in earning charges (on the main line mileage) in 1896 was "no more than \$1,091,000", especially when it is remembered that the Government requirement deducted in reaching that result fell three-quarters of a million dollars short of meeting the interest paid by the Government in that year on the subsidy bonds issued to the road. Of course this is better than the result in 1894, when the deficiency was \$1,862,733; but a loss of a million dollars (\$1,091,587) is certainly a large amount; the deficiency in 1895 was not quite as heavy as this, being \$823,788.

As to the difference in capitalization between the old company and the new, it is not as great as might be supposed. The new company will have an aggregate capital of \$211,000,000, supposing the securities provided under the reorganization plan are all issued -that is, it will have \$75,000,000 of 4 per cent 1st mortgage bonds, \$75,000,000 of non-cumulative preferred stock and \$61,000,000 of common stock. The old company, according to the statement contained in the reorganization plan under date of October 1895, had a bonded indebtedness of \$87,386,350 (always excepting of course the debt on the branch and auxiliary lines), and owed the United States \$33,539,512 on the principal of the subsidy loan and \$19,500,000 on the unpaid accumulations of interest (in excess of the estimated value of the sinking fund assets in the Government Treasury), making a total debt of \$140,425,862. From this we may deduct \$8,708,850 of main line bonds not actually outstanding but held in the various sinking funds, leaving the amount of the debt roughly \$131,717,000. Adding the \$60,868,500 of stock, we have an aggregate capitalization for the old company of \$192,585,000, against the \$211,000,000 for the new company. To be sure the 1921 million dollars of present debt embraces about 20 million dollars of various issues of collateral trust bonds not comprehended in the reorganization (though a part of the reserve of preferred stock will, we suppose, ultimately go to take up some of these issues), but this 20 million dollars of bonds is now actually in existence ahead of the stock, and therefore cannot be excluded in comparing the position of the stock before and after reorganization.

As to the standing of the stock with reference to the yearly fixed charges, the call for interest on the bonds in 1896 was \$4,548,470, the United States requirement was \$1,244,286, and the sinking fund charge was \$697,970, making the total fixed requirement for the year ahead of the stock \$6,490,726. In 1895 the total of the same three items was \$6,577,955, and for the five years from 1890 to 1894 inclusive, the average yearly amount of the fixed charges or deductions from net earnings was \$6,802,001. After the reorganization the obligatory yearly interest requirement will be only \$3,000,000 per year. The four per cent dividend on the \$75,000,000 of preferred stock would take \$3,000,000 more, but this and the bond interest together only make \$6,000,000 per annum. against much larger amounts, as we have seen, of charges ahead of the present common stock. On this showing, therefore, the prospect for the stock will be better rather than worse after reorganization, notwithstanding a somewhat increased capitalization.

As to whether the terms allowed the bondholders are not more liberal than was needful, that must be a matter largely of opinion. Most of the bonds have tively so small. Besides, as the Government was

already matured, or will shortly mature, so an allowance of preferred stock to compensate for the retirement of the bonds in advance of maturity was not necessary. On the other hand, an exchange on an even basis, bond for bond, without any bonus, was unquestionably not within the range of probabilities. The comparison which the "Economist" makes with the companies that have recently negotiated 31 per cent bonds seems to us quite inapt. It is given to very few companies in this country to float bonds on a  $3\frac{1}{2}$  per cent basis. Only dividend-paying corporations of long standing and exceptional credit can hope to borrow on such terms. Mere solvency is not enough. There must be in addition all the other advantages possessed by companies like the New York Central, the Lake Shore and the Illinois Central, which have lately been successful in their attempts to place 34 per cent issues.

Even a 4 per cent rate is not always attainable to an ordinarily solvent company. But in the case of the Union Pacific we are not dealing with a solvent property but with an insolvent one, and one too whose future it was exceptionally hard to determine, by reason of the complications arising out of the indebtedness to the Government and various other causes. We have no doubt the new first mortgage bonds will in time be shown to be a very desirable investment, but that fact must be incontrovertibly established before investors can be got to take them at a figure and on a basis such as a prime 4 per cent bond should command. As there was this element of doubt, affecting alike the value of the new bonds and the value of the new preferred stock, and as the success of the scheme depended on getting the assent of the bondholders and in making a satisfactory settlement with the Government, it was obviously necessary to offer very liberal inducements so as to tempt the bondholders to come in. The bonus given the bonds amounts in certain cases to 50 per cent, and that certainly seems large. But the many letters we have received from bondholders here and in Europe during the last eighteen months, asking whether it would not be better to accept payment of the bonds in cash rather than assent to the reorganization scheme and take the new securities offered in exchange, make it clear that any smaller allotment of new securities to the old bondholders would have jeopardized the success of the scheme. It is to be remembered, too, that the situation of the company has improved somewhat since the scheme was first promulgated.

As to the treatment of the stock, it was of course within the power of the reorganizers to exclude it al-That, however, we together from participation. should have regarded as in every way a misfortune. Many of the holders bought the shares at high figures and it was desirable that their equity should be preserved if possible. On the other hand, as it was under the management of the stock that the disastrous condition of the property was brought about, the stockholders obviously were called upon to bear their share of the burdens necessary to rehabilitate the property. Nor can the assessment of \$15 00 per share be regarded under the circumstances as unduly heavy, especially as preferred stock is to be given for the assessment, which stock ought to command a much better price than preferred shares of reorganized properties usually do, since the amount of fixed charges ahead of the preferred shares in this case is to be rela-

Ene

called upon to make such important sacrifices, it was hardly to be expected that the stock could escape without some considerable penalty. Indeed, in view of the bitter feeling in Congress against the road, it may well be questioned whether an arrangement with the Government would have been possible under a scheme which did not provide for a considerable cash contribution from the stock.

It would seem, therefore, that the reorganization plan so far from being inequitable was the best that could be devised under the circumstances. We cannot help thinking too that it is of benefit to every interest-to the stock, the bonds, the Government and the public. The conclusion of an arrangement with the Government was in every way a notable achievement. Previously, on account of the attitude of Congress, it appeared as if no way out of the difficulty could be found, and as if as a consequence a long period of doubt and suspense would have to be encountered. What is particularly commendable in the arrangement is that while insuring to the Government a minimum bid of \$45,754,000 for its interest in the property, it leaves the field open to other bidders, so that if any one feels willing and able to pay more there is nothing to hinder him from doing so and the Government from getting the increased sum. The formation of a syndicate pledged to raise \$65,000,000 to \$75,000,000 on thirty days' notice is an equally noteworthy achievement. We understand that it is expected to bring the property to a sale this summer. When this shall have been done and the relations with the Government terminated, a long-standing reproach to American finances will have been removed.

#### THE BRITISH IRON AND STEEL INDUSTRY AND AMERICAN COMPETITION.\*

#### MANCHESTER, May 16, 1897.

Within the last twelve months thoughtful men connected with the British iron and steel industries have given much attention to the incipient competition of American iron and steel in the European markets and to the prospects of its increase. For some time past United States pig iron has been quoted on the Manchester Exchange, delivered by steamer direct at the ship canal docks, and numerous small shipments have been disposed of. The monthly official foreign trade statistics of the Kingdom do not state the amount of imports of iron and steel from each country, and the more fully detailed volume, the "Annual Statement" for 1896, will not be issued until June or July. In previous volumes it appears that in 1894 the imports of American pig iron were 1,330 tons and in 1895 3,668 tons. These trifling quantities came, however, it may be confidently assumed, merely as ship's ballast. The business has now reached the regular commercial stage, and the Permanent Secretary of the Board of Trade affirmed a few days ago that the quantity received from the United States in January last was 9,000 tons and in March 4,000 tons.

Even more important is the fact that steel billets were imported from the States to the extent of 3,000 tons in January, 7,000 tons in February and 2,000 tons in March. American pig iron has also gone in small quantities into the North European ports, and German iron producers are beginning to consider their significance. The question of American competition held a conspicuous place in the proceedings of the British

\* Communicated by our special correspondent at Manchester.

Iron & Steel Institute and the Iron Trade Association, which occurred in London last week, and it was treated very seriously by both bodies; yet without any manifestation of alarm. The papers and speeches show that the whole subject of the relative cost of production in the United States and in Great Britain has been minutely investigated. The net results of the discussions fall into two classes, those connected with the methods and management of the industry in the two countries, and those attributable to natural advantages and facilities of transport. It was freely acknowledged that American blast furnace practice has made great strides within the last two or three years towards more economical production, and already it is being followed, though tardily, in this country.

The performances of the Duquesne blast furnace plant of the Carnegie Steel Company received, of course, full attention. Its largest out-turn of 4,110 tons of pig iron in a single week contrasts very strikingly with one of 1,600 or 1,700 tons which is considered a satisfactory production from the better class of furnaces at present working in this country. The superiority rests partly upon constructural arrangements designed to save labor, but largely also upon the use of a greater pressure of blast. One leading English firm, Messrs. Bolckow, Vaughan & Co., of Middleborough, is now putting down six pairs of new engines for the purpose of attaining this object, and there can be no doubt that the stimulus given by these American improvements will before long be found to have brought about almost a revolution in the making of pig iron in this country. But American ingenuity and energy are also leading the way in lessening the cost, by increasing the amount of the out-turn, in the production of steel rails and billets, and in this respect also their example is not likely to be neglected on this side the Atlantic.

The second class of advantages possessed by the American iron and steel producer presents obstacles far more difficult to overcome by his British competitor. Among these the cost of railway transport stands foremost. Ocean freights are competitive, and there is no complaint of the cost of bringing to our shore<sup>8</sup> the iron ore, amounting now to nearly 5,000,000 tons annually imported from Spain, Algeria, Greece, Italy, Sweden and other countries, to supplement the indigenous supply. But the cost of railway transport of minerals and metals on British lines is, notoriously, veiy much greater than that on American lines, and this difference is a series disadvantage because the utmost that it is possible at present to hope for is a lessening of it, not its elimination.

The story of the struggle against high railway freight rates in England is a long one, and all that need now be said is that the prospect of appreciable reduction is not bright, except perhaps so far as it can be looked for in the adoption of bogie trucks carrying very much heavier loads than the antiquated one now all but universal in this country. The greater cost of fuel in Great Britain than in the United States is a further disability under which the British iron and steel manufacturer labors. It was stated by Sir Alfred Hickman at the meeting of the British Iron Trade Association, on the authority of Mr. W. R. Sterling, of the Illinois Steel Company, that coal is obtained by the American iron producer at 2s. per ton, whilst in England the price is from 6s. to 8s. per ton. He quoted, as at least a partial explanation of this wide difference, a statement of Mr. Sam Woods, M. P., the well-known

miners' representative in Parliament, that he found colliers working a full day of eleven hours in American mines for wages of 3s. to 4s. per day, whilst in England the earnings were from 5s. 6d. to 6s. per day of seven hours.

It is, of course, perfectly true that in industries where machinery and organizations play a predominant part, low rates of wages do not necessarily mean low cost of production. Usually, indeed, they mean high cost. But in coal mining, where pure physical labor, incapable of much abridgement, is the chief element of production, the view taken by Sir Alfred Hickman is by no means, obviously, unfounded, at least if the data furnished by Mr. Woods are correct.

But however interesting and important these discussions as to the relative efficiency of the American and British iron and steel industries, there is one consideration hardly touched upon by most observers, which goes a long way toward explaining the present import of raw and manufactured iron from the United States. On your side of the Atlantic trade is very bad, and the kind of enterprise which is directed to investment in works of long duration is feeble. On this side confidence is just now much stronger, and the iron and steel industry in particular is more active than it has been for years. The demand for these metals in their countless manufactured forms for all sorts of purposes in both the home and the foreign markets is exceedingly active. In the case of the latter the activity is measurable in the official statistics of exports. Here are the figures showing, under three heads, the shipments of iron and steel during the first four months of this and each of the two preceding years :

1897.	1896.	1895.
Iron and steel £8,146,914	£7,274,206	£5,673,488
Steam engines 1,150,906 Machinery 4,689,963	948,282 4,311,207	753,168 3,723,383
	4,011,207	0,120,000
Total £13,987,783	£12,533,695	£10,150,039
Increase 1896-7	£1,454,088,	or 11.5 per cent
Increase 1895 7	3,837,744,	or 37.8 per cent

These figures do not include the value of the iron and steel consumed in the large amount of shipping built for foreign owners, which embraces a considerable tonnage for the war vessels constructed for foreign governments. But at home also the demand for railway material and equipment, for tools and machinery, and for structural iron and steel has during the last nine or twelve months been larger than for several years previously.

Whilst, therefore, forces tending to depress prices inordinately have been in operation in the United States, those working in the opposite direction have prevailed here. In these circumstances it is not at all surprising that the current of iron and steel should move eastward, induced by the widely different conditions of general trade and enterprise on the two sides of the ocean, and the consequent wide variations of prices. A striking illustration of the advance of prices on this side is afforded in the quotations for steel rails. Little more than eighteen months ago they were sold in Lancashire at £3 2s. 6d. per ton; now the price is £4 12s. 6d., and the mills are busily employed in execution of contracts previously entered into, although at the moment there is not much new business. With reference to this particular commodity, Mr. Alexander Armour of Liverpool, speaking at the meeting of the British Iron Association, warned English makers of rails that they would not long be able to maintain their existing quotations, since "the time is not far distant when they will have to face the

competition of America for the rail trade of the whole world."

#### STATUS OF NON-ASSENTING BONDS IN REORGANIZATIONS WITHOUT FORECLOSURE.

We are pleased to make room for the following letter concerning our article of two weeks ago under the above caption. It explains itself and calls for no comment.

NEW YORK, May 20th, 1897.

Editor of the Commercial and Financial Chronicle:

NEW YORK, May 20th, 1897. Editor of the Commercial and Financial Chronicle: DEAR SIR-My attention has been called to your report, and editorial thereon, in your issue of May 15th instant, concerning the decision of the Appellate Division of the New York Supreme Court, in the case of Simon Rothschild, a holder of ten first mortgage bonds of the Denver & Rio Grande Western Railway Company. Having been the at-torney for the Rio Grande Western Railway, the successor of the obligor company, throughout the litigation, and being conversant with all the facts of the case, permit me to state, through the columns of your journal, that while your report and editorial in the main correctly state the facts of the case, yet the language of the caption of your editorial, "Status of Non-assenting Bonds in Reorganizations With-out Foreclosure", is, in my opinion, calculated to convey to the mind of the casual reader the impression that the deci-sion in that case is an authority for the proposition that notwithstanding the provisions of a mortgage securing an issue of corporate bonds to the contrary, a bondholder can have recourse to his legal remedy for recovery of principal and interest upon the bonds. Such an impression would clearly be erroneous, for the decision cannot be regarded as a precedent upon such an abstract proposition. The special facts and circumstances appearing in the case the two salient questions were, first the true interpretation of article VIII. of the trust deed or mortgage securing the bonds, and second whether the offer of proof of the funding plan made at the trial was sufficient under the technical rules of evidence to admit of proof of the plan.

under the technical rules of evidence to admit of proof of the plan.

under the technical rules of evidence to admit of proof of the plan. As to the first question, Mr. Justice Andrews upon the first trial, construing the provisions of said article VIII. of that mortgage, held that their true meaning and legal operation were such as to bar Mr. Rothschild, the bondholder, of any legal remedy by action to recover upon his coupons and non-suited him. Upon appeal taken by Mr. Rothschild the General Term of the Court, for the reasons stated in your editorial, reversed the decision of Justice Andrews and directed a new trial of the action. It was upon the second trial that the other question as to the sufficiency of the offer of proof of the funding plan arose, and the recent decision of the Appelate Division, which your editorial refers to, was rendered upon the appeal taken by the company from the judgment entered upon a verdict directed by the Court for Mr. Rothschild upon the second trial. We thus have two conflicting decisions as to the true interpretation of article VIII. of the mortgage in question—one of Justice Andrews in favor of the railway company and another by the late General Term of the Supreme Court in favor of Mr. Rothschild. Which is correct? It must not be overlooked that the Appel-late Division in its recent decision (per curiam) expressly says that the the the supressly says late Division in its recent decision (per curiam) expressly says

late Division in its recent decision (per curiam) expressly says that: "We are not at liberty to consider anew the provisions of Article VIII. of the mortgage in connection with the con-tention of the defendant that the terms of that article ob-struct the right of the plaintiff to maintain an action upon the coupons; that question having been determined also upon an appeal to the General Term (84 Hun, 108)" As far as the technical question of proof in the case al-luded to is concerned, it is a positive fact that the funding plan has received the assent in binding form of all the hold-ers of the entire issue of \$6,900,000 in bonds, excepting only twenty bonds, including the ten held by Mr. Rothschild. It yet remains to be seen whether Mr. Rothschild, as the holder of an insignificant amount of the issue of \$6,900,000 in bonds, will ultimately succeed in his efforts and gain the

holder of an insignificant amount of the issue of \$6,900,000 in bonds, will ultimately succeed in his efforts and gain the advantage he seeks in this instance over the vast majority of assenting bondholders; for an appeal from the decision of the Appellate Division to the Court of Appeals has just been taken and perfected by the Railway Company, upon which appeal the true meaning and construction of Article VIII. of the mortgage will doubtless be determined, and it is confi-dently believed in favor of the contention of the company, barring Mr. Rothschild of any remedy by his present action. You are certainly correct, therefore, in your observation that "the existence of these special features (above alluded to) controlling the determination (of the Appellate Division) greatly limit and restrict its significance", and it seems to me that you might have ventured further by stating that the present decision affords no precedent of general appli-cation. Yours, &c., THEODORE F. H. MEYER.

## IMPORTS AND EXPORTS FOR APRIL.

The Bureau of Statistics has issued a detailed statement of the foreign commerce of the country for the month of April, 1897 and 1896, and for the ten months ending April 30 in 1896-97 and 1895-96, as follows :

MERCHAND	18E.	
		10 mos. end. Apr. 30.

#### IMPORTS AND EXPORTS OF GOLD AND SILVER AT SAN FRANCISCO.

We have received this week from the Collector of Customs at San Francisco the details of imports and exports of gold and silver through that port for the month of April, and they are presented below, together with the figures for the preceding months, thus completing the results for the ten months of the fiscal year 1896-97. The imports of gold were a little less than in March, the amount received reaching \$92,689, of which \$86,789 was in bullion, and of silver there came in \$106,178, of which \$77,527 was bullion. There has been received during the ten months a total of \$9,454,448 gold and \$1,790,239 silver, which compares with \$848,854 gold and \$1,672,039 silver in 1895-96. The shipments of gold during April were \$51,390 coin and \$100 bullion, and the exports of silver have been \$49,012 coin and \$372,644 bullion. For the ten months the exports of gold have been \$972,376, against \$569,619 in 1895-96 and \$8,046,086 silver has been sent out, against \$10,263,335 in 1895-96. The exhibit for April and the ten months is as follows :

#### Monetary Commercial English Rews

LONDON, SATURDAY, May 13, 1897. [From our own correspondent.]

The new Greek Government intimated at the end of last week that it would gladly welcome intervention by the Powers, but did not officially apply for mediation. All the Powers were willing to act at once with the exception of Germany, which insisted that the Greek Government should first withdraw its troops from Crete and acknowledge its autonomy; in other words, give up all claim to the island; whilst the Greek Government was also required to commit its case without reservation to the Powers. The Greek Government feeling itself powerless to resist the Turks further, and anxious to avoid useless bloodshed, submitted to the harsh terms of Germany, and intervention was immediately undertaken.

The attitude of the Sultan is somewhat in doubt. He recalled Ghazi Osman Pasha from Salonica because of the warm reception everywhere accorded to the Hero of Plevna, and there is a general belief that already the Sultan is beginning to fear the military influence of Edhem Pasha. The best hopes, therefore, are founded upon the timidity of the Sultan. On the other hand, the Mohammedans are naturally elated, and are much irritated by the intervention of the Powers.

It is to be feared that the conclusion of a satisfactory peace will be difficult. This country, France and Italy are anxious to protect Greece from loss of territory and from an oppressive war indemnity. Russia, it is thought now, likewise wishes to protect Greece. She was not sorry that the Greek pretensions to Salonica and Constantinople should be destroyed, but now that she is not able to play a great part in the Balkan Peninsula, it is everywhere believed that Russia is anxious to come forward as her protector. On the other hand, Germany is so eager to favor the Turks in every possible way that she will probably insist upon a large indemnity.

Germany wants large concessions for railway building and the like in Turkey, and she desires likewise to gain political influence, so that she may play off Turkey against Russia if an occasion should arise. Probably, likewise, she hopes to deprive this country of some of its commercial importance in Turkey. At all events, Germany has been consistently hostile to Greece from the beginning, and ostentatiously friendly to Turkey. At the same time, it is believed in the best political circles and in the highest financial circles, that the concert between the Powers will be maintained and that a reasonable peace will be secured. The Hungarian Prime Minister in the Hungarian Parliament on Wednesday declared that the aims of Russia in the East are identical with those of Austria-Hungary; that both are striving for tranquillity and order. If that be so, Germany will not be able to defeat the friendly desire of the other five Powers to protect Greece, though no doubt she may make serious difficulties.

The condition of Austria-Hungary itself is giving rise to much uneasiness. The present Government has no majority; Austria proper and Hungary have not yet arranged the ten-years term of union which ought to be at once renewed, and there are grave dissensions between the Germans and the Czechs in Bohemia. All that, however, is calculated to make the Emperor Francis Joseph exert all his great influence to preserve peace abroad.

The condition of Italy too, is disquieting. The Rudini Cabinet is determined not to abandon altogether its African colony, and it is evident that this will result in a very sharp struggle of parties. What the consequence might be if the

Pope were to instruct Roman Catholic voters to take part in the next election nobody can foresee. The famine and plague in India, unfortunately, are not much abating, and New South Wales, Victoria and the southern part of Queensland are threatened with a third year in succession of drought. Happily, the prospect in South Africa seems to be clearing. There is a very general expectation amongst all those connected with South Africa that the Boer Government will make very great concessions to the Uitlanders.

As a result of this and the universal opinion that peace will be restored almost immediately in Europe, there has been a wonderful revival in the stock markets this week. In many cases prices have risen 100 per cent and in one or two cases even more. The most active day was Monday, when the crowds surrounding the Stock Exchange reminded one of the wild times of the boom of 1895. Tuesday and Wednesday were quieter but there was a rush to buy again on Thursday. There was also a much larger business done in American securities than for a long time past. If the tariff bill were only settled in some way or other we should probably see a considerable increase in American investment.

All the intelligence received here is that President McKinley is in full sympathy with Mr. Gage and that the latter is preparing efficient measures for restoring order in the currency. If that is done, European investment will prove very large. There has not been much business in South American securities. It is evident that the failure of the crops is telling severely upon Argentine trade. The insurrection in Uruguay continues, and the condition of Brazil is anything but promising. Continental markets are all strong and hopeful, and both French and Germans are buying South African shares here upon a large scale.

The Bank of England on Thursday reduced its rate of discount from two and a-half per cent to two per cent. It has hesitated for some weeks because of the threatening state of politics and of the consequent desire of the Continental banks to strengthen their gold reserves. Now, however, that political apprehension has so much abated, the Continental demand for gold has practically ended, and New York seems to be supplying Austria with all she wants.

Japan, it is true, is still buying gold, and as she is about to bring out a loan for four millions sterling, she will no doubt take a considerable amount during the course of the year. But the Japanese demand standing alone is not very important. At all events rates in the open market have fallen away so completely that the Bank of England has not found it possible to keep up its rate any longer.

The silver market is without life, but the India Council has this week sold the full amount of drafts offered, that is 35 lacs, about 30 in bills and about 5 in transfers. The average price of the bills was a trifle over 1s. 21/2d. per rupee.

The long-expected sterling loan is announced. It is for  $3\frac{1}{2}$  millions sterling, is to bear interest at  $2\frac{1}{2}$  per cent and the minimum price is 951/2.

The "Railway News" of London reports the traffic receipts for the week ending May 9 of 55 railways of the United Kingdom which make weekly returns at £1,664,788, against £1,584,349 in the corresponding week of last year, an increase of £80,439. For the nineteen weeks of the current half-year receipts were £29,169,736, an increase of £841,477.

Messrs. Pixley & Abell write as follows under date of May 13:

May 13: Gold—Prices of a week ago are maintained, and although there is at present no inquiry for the East, the demand for Austria has absorbed all arrivals. The Bank has received £73,000 in sovereigns, and has sold £15,000 for Vienna. Arrivals: River Plate, £45,000; South Africa. £85,000; New Zealand, £146,000; West Indies, £33,-000; total, £309,000. Shipments to Bombay, £18,000. Silver—The price gradually fell to 271/ad. when, with America holding off, recovery ensued, and the market closes steady at 277gd. The Bombay price to-day is 77½ rupees per 100 tolahs. Arrivals: New York, £219,000; West Indies, £27,000; total, £246,000. Ship-ments: Bombay, £72,400; Calcutta, £7,500; total, £246,000. Ship-mearest price is their silver value of 27/sd. Shipments to Penang, £1,900<sup>4</sup>

WALL STREET, FRIDAY, MAY 28, 1897-5 P. M.

The Money Market and Financial Situation .- There is a more favorable sentiment in Wall Street regarding railway securities as a consequence of the Supreme Court decision h anded down on Monday denying the right of the Inter-State

Commerce Commission to prescribe railway traffic rates. It is hoped that this decision foreshadows other legal and possible legislative action which will result in establishing the railroad traffic of the country on a more satisfactory basis than it has recently occupied.

Sentiment was also favorably affected by the beginning of work on the tariff bill in the Senate and the prospect of a conclusion of that matter within a reasonable time. When this is done the chief hindrance to industrial and commercial activity will have been removed.

Because of these and other less important reasons, including more favorable reports of railway earnings, especially those from the South and Southwest, business at the Stock Exchange has been better distributed this week than of late. showing an increase in commission house transactions and some buying of a more substantial character than has recently been common. Naturally enough under these conditions the tendency of prices has been upward, and except in a few cases, for reasons which are noted under our review of the stock market, quotations for railway securities are generally higher than last week. Little notice was taken of t he fact that early in the week gold was engaged for export. The movement has been limited to \$2,850,000 and not all the amount was taken from the Sub-Treasury, as a part of it was supplied by the banks.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 11/4 to 11/2 per cent. To-day's rates on call were 11/4 to 11/2 per cent. Prime commercial paper is quoted at 31/2 to 41/2 per cent.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £147,075 and the percentage of reserve to liabilities was 51.54, against 51.37 last week; the discount rate remains unchanged at 2 per cent. The Bank of France shows an increase of 9,625,000 francs in gold and a decrease of 525,000 francs in silver.

The New York City Clearing-House banks in their statement of May 22 showed an increase in the reserve held of \$1,488,100 and a surplus over the required reserve of \$45,998,950, against \$44,490,500 the previous week.

Foreign Exchange.-The foreign exchange market has been weak on a limited volume of business, and rates are fractionally lower than our last quotations.

To-day's actual rates of exchange were as follows: Bankers, sixty days' sterling, 4 853/4 @4 86; demand, 4 863/4 @4 87; cables, 4 87@4 871/4.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling par; Charleston, buying par, selling 1/8 premium; New Orleans, bank, \$1 50 premium; commercial, 25c. premium; Chicago, 60c. per \$1,000 premium; St. Louis, 70c.@90c. per \$1,000 premium.

State and Railroad Bonds.—Sales of State bonds at the Board are limited to \$1,000 Virginia fund. debt 2-3s of 1991

Board are limited to \$1,000 Virginia fund. debt 2-3s of 1991 at 64%. The market for railway bonds has improved as the week advanced. The volume of business has increased and in most cases prices are better. Prominent among the excep-tions are Central of New Jersey gen. 5s, which suffered a fur-ther decline of over 2 per cent. These bonds have recovered somewhat to-day, however. Some of the Baltimore & Ohio issues sold on Thursday from 8 to 10 points or more below re-cent quotations, on reports that interest coupons maturing June 1st will not be paid. The list of active issues which have advanced from 1 to 2½ per cent includes Atchison ad-justment 4s, Erie 4s, prior and gen. lien 3s, Southern Railway, Kansas Pacific 1sts, Missouri Kansas & Texas 2ds and St. Louis & San Francisco 4s. Among the most active have been the Atchison, Northern Pacific, Erie, Chesapeake & Ohio, Missouri Kansas & Texas, St. Louis & San Francisco and Texas & Pacific issues, many of which close higher than at our last quotations.

Railroad and Miscellaneous Stocks.—A more hopeful tone has characterized the stock market this week than has recently been noted and with an increase in volume the business has been somewhat better distributed. The active business has been somewhat better distributed. The active railroad list has been especially firm, having advanced an average of nearly 2 points. Lake Shore, Burlington & Quincy, Central of New Jersey, Northern Pacific preferred and Rock Island have advanced more than the average men-tioned. The granger group and some of the Southern and Southwestern stocks have been notably strong on current traffic reports and future prospects. Central of New Jersey has been the most active stock on this list and made its low-est record on Monday, when it sold at 68¼. It rallied to 74½ on Wednesday and closes at 74½. The other coalers were weak. Baltimore & Ohio declined rapidly on rumors that interest due June 1st will not be paid, selling on Thurs-day at 9½, a decline of 3 points from the opening price on Wednesday. Cleveland Cincinnati Chicago & St. Louis pre-ferred dropped 5 points below the last previous sale on the offering of a few shares accompanied with the rumor of a possible reduction in the dividend rate. Chicago Gas has continued the active feature of the mis-cellanceus list bet her active feature of the mis-

possible reduction in the dividend rate. Chicago Gas has continued the active feature of the mis-cellaneous list but has fluctuated within a narrow range. American Sugar advanced 3 points on what was considered favorable tariff prospects. American Tobacco, Western Union and United States Leather preferred have each ad-vanced from 1 to 2 per cent. United States Rubber, both common and preferred, declined sharply on the execution of selling orders and a change in the executive officers of th company. company.

STREET BAILWAYS AND TRACTION COMPANIES. STREET BAILWAYS AND TRACTION COMPANIES. The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

Street Railway Net Earnings.—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railthis week. In reporting these net earnings for the street rail-ways, we adopt the same plan as that for the steam roads-that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday), we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONIOLE of May 22, 1897. The next will appear in the issue of June 10, 1807 19, 1897.

#### Peoria Decatur & Evansville Railway.

(Report for the year ending Dec. 31, 1896.)

General Remarks .- Notwithstanding the general depression

General Remarks.—Notwithstanding the general depression in business throughout the country, the volume of traffic has been about the same as in 1895, Receiver Hopkins saying: The general business condition has had a very depressin ; effect upon the movement of pig iron, building material, merchandise, coal and other products and commodities which go to make up the tonnage handled by this road, outside of products of agriculture. An increase in grain handled has assisted us to a great extent in overcoming the loss in earnings due to the light movement of other commodities. This grain, however, has been handled a longer distance than usual on account of the demand in the South, but, as is usual with long hauls, the rate per ton per mile for such haul is much less than for short haula. The outlook now is that the business condition as to the move-ment of grain will continue during the year 1897, although there is every reason to believe that with the revival of business movements of other products will increase. Maintenance of Truck.—But six miles of steel have been purchased during the past three years, which has been insufficient to give neces-sary rail for side track purposes, much of the rati in sidings being trains. There is also more or less new siding being demanded each year. As much as ten miles of steel should be purchased during 1897.

The gross earnings decreased \$47,722, operating expenses decreased \$9,513, leaving a decrease in net of \$38,209, or 13 per cent.

Equipment.—There was spent for repairs to cars in 1896 \$43,158, against \$48,748 in 1895. During the year 103 cars were dismantled as not worth repairing. "This condition has Waterblack Stone ... April..... 4,208 4,105 14,554 13,623 Waterbury Traction. April..... 18,537 18,199 72,545 74,400 Wheeling Ballway... April..... 12,342 13,688 49,031 50,761 Wilkesb. & Wy. Valley April..... 35,537 37,722 147,366 149,705 \* Includes results on North Side Traction Company, which was leased February, 1897 to the Second Ave. Traction Co an expenditure of approximately \$60,000. The sge, size and condition of the remainder of the equipment (900 cars) is such that it will not be economy to equip them after this manner.

Condition of the remainder of the equipment (300 cars) is such that it will not be economy to equip them after this manner. Coupons Paid.—The first mortgage coupons paid with interest during the year were : Evansville division, due Sept. 1, 1895, and March, 1896, \$00,620, Peoria division of January and July, 1806, \$79,472; total. \$170,292
 Finances.—Principal of P. D. & E. bills payable remains the same as in the last report, viz.: \$808,591, interest thereon due and accrued, \$175,295; there are also \$25,000 of receiver's bills payable; equipment obligations were slightly reduced, leaving \$12,330 outstanding; no additional receiver's certificates were issued, \$13,017 only being outstanding. The report states also that since January, 1897, to May 1, the property suffered from severe floods, which will necessitate an increase in operating expenses for 1897.
 Statistics—Earnings and charges on whole line have been: 1896, 1895, 1894, 1893.

-V. 64, p. 664 Pacific Mail Steamship Company.

(Preliminary report for the year ending April 30, 1897.)

The company submits the following preliminary statement of earnings and expenses for the year ending April 30, 1897, to be followed (as soon as practicable) by the customary au-

to be followed (as soon as practicable) by the customary an-nual report, covering in detail the operations of the company. President C. P. Huntington signs the report, which says: "As compared with the operations of the previous year there has been a decrease in gross earnings of \$82,789 and a de-crease in expenses of \$88,665, resulting in an increase in net earnings of \$8,877.

net earnings of \$3,877. "The sum of \$150,000, charged to expenses for "general and extraordinary repairs of steamers", is carried to the credit of the fund set aside for that character of repairs, to which ac-count has been charged the sum of \$280,165 expended on its steamers during the year, leaving a balance to the credit of this fund April 30, 1897, amounting to \$123,878. "In addition to above expenditure for extraordinary repairs the sum of \$136,770 has been paid during the year and charged to "steamer expenses" for ordinary repairs to the company's fleet.

"The company's fleet. "The company is free from indebtedness, except for current expenses, and had available loans and cash on hand in New York, San Francisco and London April 30, 1897, the sum of \$1,108,146."

#### GENERAL INVESTMENT NEWS.

Reorganizations, Etc. - Latest Data as to Defaults, Reor-ganization Plans, Payment of Overdue Coupons, Etc. - All facts of this nature appearing since the publication of the last issues of the INVESTORS' and STREET RAILWAY SUPPLEMENTS may be readily found by means of the following index. This index does not include matter in to-day's CHRONICLE.

Memphis & Charleston. Jorect. stay 195 " Kings county intracted in the stock-Albany Railway.—New Mortgage.—On June 1, the stock-holders will vote on the proposition to authorize a mortgage for \$750,000 of 5 per cent 50. year gold bonds, of which \$375,000 will be used to pay for the extension to Cohoes, etc., and the balance reserved for future needs.—V. 64, p. 841.

and the balance reserved for future needs.—V. 64, p. 841. American Bell Telephone.—Proposed Union of Inde-pendent Exchanges.—At a meeting or independent telephone interests at Fort Wayne, Ind., on Monday, fourteen States being represented, a provisional committee to take steps to-ward the organization of a national association was appointed as follows: W. L. Holmes, President Detroit Telephone Co.; J. M. Thomas, President Ohio Telephone Association; Burt Hubbell, Secretary of Pennsylvania Telephone Association, of Pittsburg; J. C. Duncan, President Southern Telephone Co. of Knoxville, and George M. Beers, President Home Telephone Co. of Fort Wayne. The objects in view are stated as follows: as follows :

1. A national association of the independent telephone exchanges of the United States for mutual protection and development. 2. Long distance toll lines by connection of the independent ex-

2. Long distance for fine any service, connecting the great com-changes. 3. An independent long distance service, connecting the great com-mercial centres in a field now occupied exclusively by the Bell Co 4. At opposition telephone exchange in Chicago, for which purpose a company has already been organized. 5. Co-operation for resisting any action the Bell Company may take in the courts in reference to the Berliner decision.

On Thursday, Friday and Saturday of this week about two hundred representatives of independent companies met in Chicago for further consideration of the matters above indi-cated.—V. 64, p. 950.

American Grocery .- Injunction Against Sale .--At Trenton, N. J., May 24, Judge Kirkpatrick issued an order restrain-ing the company from disposing of its business under a reso-lution adopted by the stockholders authorizing the sale of the

Intering the company into the spond of the business of the company upon such terms as the directors shall deem for the best interests of the company.
The restraining order was granted on the application of David A. Hunt, a stockholder, and is directed to T. L. Marsalis, President. It specifies that nothing therein contained is to be construed as prohibiting the company from transacting its business in the usual way.—V. 64, p. 950.
Anthracite Coal Companies.—Hearing Adjourned.—The hearing before Judge Chester, on the application for an order vacating the order issued on May 11 for an inquiry under the new anti-trust law into the affairs of the alleged Coal Trust, was adjourned on Thursday until Tuesday, June 8 An order was made postponing the hearing before the referee until after the determination of the pending motion to vacate the order.—V. 64, p. 999.
Baltimore & Ohio R.R.—Coupon Payments and Defaults.—

Baltimore & Ohio RR.-Coupon Payments and Defaults .-The following notice is made regarding the interest due June 1 : "The receivers of the Baltimore & Ohio RR, will pay inter-

"The receivers of the Baltmore & Ohio RR, will pay inter-est upon the following securities on June 1, viz.: Schuylkill River East Side RR, first mortgage bonds; receivers' certifi-cates issued June 1, 1896, \$5,000,000; receivers' certificates is-sued Dec. 1, 1896, \$956,000. They will not at that time pay the interest on the Terminal mortgage bonds, 2¼ per cent on \$8,500,000, nor will they at the same time pay the interest on the Chicago Division sterling loan of 1877." The following statement made by the receivers on Thurs-

The following statement made by the receivers on Thurs-day clearly indicates that the above-mentioned defaults may be only temporary:

be only temporary: These properties will have been in the hands of the receivers for fif-teen months to June 1, and they have received the earnings thereof only for that period, while interest falling due June 1 on the Chucago Division bonds will be the third interest instalment, making eighteen months' interest to be met out of fifteen months' earnings. The re-ceivers will have in their hands surplus earnings for this division ap-plicable to the payment of the interest \$50,000, or possibly more, but not sufficient to pay the \$166,000 interest at that time, and they do not feel that they can pay this interest until the same is earned by the division. Therefore it will necessarily remain in default for a limited period of time. period of time.

For the same reason the receivers do not intend to pay the interest upon the Terminal mortgage bonds which fall due June 1. The rentals of the Terminal properties are \$375,000 per annum. Out of the fif-teen months' rentals in the receivers' hands they have already paid out two interest instalments, amounting to \$352,000, and they have not now sufficient of thes- rentals in their hands to meet the third in-stalment on June 1. In other words, fifteen months' rentals are not sufficient to pay eighteen months' interest, and consequently these bonds must wait until the rentals of the respective properties are equivalent to the interest upon the bonds. The figures show that the Chicago division is about earning its in-terest. The rentals of the Terminal bonds. - V. 64, p. 999.

Capital Traction Company (Washington, D. C.)-Listed on New York Stock Exchange. -The New York Stock Exchange has listed this company's \$12,000,000 of capital stock. The company is remarkable in that it has no bonded or other in-debtedness except current accounts.-V. 62, p. 137.

Central Branch Union Pacific RR.—Atchison & Pike's Peak RR.—New Mortgage Trustee.—An application will be made by the company to the Supreme Court of New York State on June 7, 1897, for an order confirming the appoint-ment of Oakes A. Ames to be trustee under the Atchison & Pike's Peak mortgage of 1865 and trustee under the funded coupon agreement of 1879, to fill the vacancy occasioned by the death of Oliver Ames.-V. 62, p. 908.

Central Pacific RR.-Protective Measures by Stock and Central Facilic KK.—Protective Measures by Stock and Bond Holders — As no arrangement has been made with the United States Government regarding its claims against the company, Speyer & Co., in c.-operation with their corre-spondents in England, Germany and Holland, propose to call for a deposit of Central Pacific R silroad bonds. This step, it is stated, is not taken because of any apprehension regarding the company's ability runnaturally to meet its obligation the company's ability punctually to meet its obligations, as heretofore, but because it is desired to secure effective repre-sentation of the holders, and thereby facilitate satisfactory adjustment with the Government. Notice giving the con-ditions of deposit will be published shortly. It is understood also that the shareholders' London committee intends asking the stockholders to deposit their shares in New York, London and Amsterdam, with the view of securing proper repre-sentation and unity of action.

The company claims that its sinking fund assets which have been heretofore sold by the Government, together with the moneys reserved in the bond and interest account with the Government, were more than sufficient to offset the amounts Government, were more than sufficient to offset the amounts owing for principal and interest of the subsidy bonds due to and including January 1, 1897. The Government, how-ever, in March made a formal demand for \$9,605,210, the balance which it claims to be due and unpaid as of Jan. 1, 1897. The subsidy bonds still to mature are as follows: Cen-tral Pacific, \$10,614,120 on Jan. 1, 1898; \$9,197,000 on Jan. 1, 1899; Western Pacific, \$1,650,560 on Jan. 1, 1899. It is in view of this condition of affairs that it is thought well for the security holders to unite and so place themselves in a position to facilitate the consummation at an early day of an amicable adjustment of the Government claims.—V. 64 p. 884, 897.

p. 884, 897.

**Central RR. of New Jersey.**—Official Statement as to Floating Debt.— She New York "Sun" on May 22 printed the following letter from President J. Rogers Maxwell :

DEAR SIR-Answering yours of to-day, I would say one of the causes of the decline in the price of our stock is the persistent attack on the company in some of the daily papers and the repeated and misleading statements of the floating debt of the Lehigh & Wilkesbarre Coal Co., in which company the Central RR. Co. of New Jersey is the principal owner.

in which company the Central RR. Co. of New Jersey is the principal owner. We deem it but right to make the following statement: The Lehigh & Wilkesbarre Coal Co., excepting \$375,000 borrowed money, has no floating debt other than that due the Central RR. Co. of New Jersey. The Central RR. Co. of New Jersey has \$1,100,000 borrowed money. The two companies have coal on hand, coal accounts, cash in bank and cash items in excess of both the above-named amounts. We are suffering from the reduced volume of freight and coal busi-ness caused by the general business depression. Your roadway and rolling stock are in good condition and capable of handling a largely increased business without any outlay of new capital. The net earn-ings of the years of ar of the two companies takes together are in ex-cess of the same period last year, and if business improves later in the year should show considerable gains. Yours respectfully, J. ROGERS MAXWELL, President. New YOEK, May 21, 1897.

NEW YORK, May 21, 1897. -V. 64, p. 706.

Chickamauga, Coal & Coke.—Chattanooga & Durham R.R. —Reorganized Company.—The Chickamauga Coal & Coke, which owns all of the Chattanooga & Durham R.R., has made a mortgage that is about to be filed, securing \$400,000 of 6 per cent 20-year gold bonds, interest payable April 1 and Oct. 1 in New York. The bonds mature April 1, 1917, but are subject to call for the sinking fund at par and interest. The mort-gage is secured on coal lands and other real estate and prop-erties at and near Chickamauga, Ga., including the Chattanooga & Durham RR. (all the bonds and capital stock of the latter being deposited under this mortgage), &c. The Conti-nental Trust Co. N Y., is mortgage trustee.—V. 64, p. 706.

**Columbus & Hocking [Coal & Iron Company**—Receiver's Certificates.—Receiver J. O. Moss, has been authorized to issue receiver's certificates for \$\$5,000 in view of a contract with the Philadelphia & Reading Coal & Iron Company to deliver to them at West Superior 50,000 tons of coal. The proceeds of the certificates, it is stated, will be used to pay miners' wages and freight bills —V. 64, p. 1000.

Columbus Hocking Valley & Toledo BR.—Notice to Holders of General Mortgage 6s of 1884.—The Knickerbocker Trust Co. of New York, as mortgage trustee, in place of John H. Devereaux, resigned, requests holde s of the 6 per cent

general mortgage gold bonds of 1884, for protection of their interests, to communicate with the company, stating the amount of their respective holdings.—V. 64, p. 842.

**Dry Dock East Broadway & Battery RB.**—Quarterly.— Earnings for the quarter and the nine months ending March 31 have been reported as follows :

3 mos. end. Mar. 31— 1897 1896 9 months—	Gross earnings. \$154,965 170,129	Net earnings. \$24,795 37,347	Other income. \$23,982 4,511	Interest, taxes, etc. \$33,890 32,730	Balance, surplus. \$14,886 9,128
1896-7		\$124,394	\$29,288	\$102,197	\$51,485
1895-6		135,391	10,765	99,658	46,498

In November, 1896, a dividend of 1½ per cent, calling for \$18,000, was paid, and in February, 1897, paid 1½ per cent, but in May, 1897, no dividend was declared.—See V. 64, p. 843.

Duluth & Iron Range RR .- Dispute as to Land Grant .-The land grant from the State of Minnesota was for about 506,000 acres, of which 201,790 acres have been patented. To prevent the selection of the remaining acres the Legislature at its recent session passed two bills, one forfeiting the grant and the other appointing a commission to push the claims of the State against the road. A suit to test the constitution-ality of the forfeiture bill has now been brought by a Chicago capitalist, who holds \$500,000 bonds of the company which are secured on the land grant. The State contends that the road forfeited the grant because it did not comply with the requirements of its contract with the State in regard to build-ing its road. The company claims that it did comply with the contract, alleging that the topography of the country was responsible for the road not being built in as direct a line as the State believes it should have been constructed.—V. 63, p. 228

Erie RR.—Listing of Extended Bonds.—The New York Stock Exchange has listed the \$2,482,000 New York & Erie bonds, extended at 4 per cent till May 1, 1947. Each old bond is bound up with an engraved extension contract duly signed by the officers of the Erie RR. Co., under its corporate seal. The contract, after providing for the extension till 1947 at 4

per cent interest, says :

per cent interest, says: This extension at the reduced rate of interest is made and accepted upon coudition that payment of the principal and interest of such bond, as extended, shall be made in United States gold coin of the present standard of weight and fineness, without deduction for any taxes which the company may lawfully be required to retain there-from; and the Eric Railroad Company covenants to make such pay-ment accordingly of interest as it accrues and of principal upon May 1, 1947. The security of said bond remains unimpaired, and no part of this contract shall be construed to affect its priority or validity.--.Y. 64, p. 952.

Fourth Street & Arsenal Street By., St. Louis.—Fore-closure Sale June 29.—The date of the foreclosure sale has been fixed for June 29. The sale will be made subject to the first mortgage bonds for \$50,000.—V. 64, p. 611.

Galveston La Porte & Houston Ry.—Southern Pacific Company.—Mr. Huntington's Ierms Accepted.—A press dis-patch from Houston, Texas, says that Mr. Huntington's offer of \$1,000,000 in guaranteed 4 per cent gold bonds for the Galves-ton La Porte & Houston Railway was accepted on Saturday last at a meeting of a committee of the creditors.—V. 64, p. 610. 889 p. 610, 889.

Georgia & Alabama Ry.-Eight Miles Extension.-An extension of eight miles on the Fitzgerald branch to Ocilla has been completed and will be put in operation June 1. The new road opens up a timber section.—V. 64, p. 947.

Harriman & Northeastern RR.-Receiver Appointed.-Harriman & Northeastern KK.—Receiver Appointer.— George W. Chandler has been made temporary receiver of this road on petition of S. W. Murray and the Pittsburg Lo-comotive Works. Two coupons are now in default. The road is 22 miles long, running from Harriman Junction to Petros, Tenn., with a branch from James Ferry to Iron Mines, Tenn., 7 miles —V. 62, p. 40.

Kansas Central RR.-Sale Postponed.-The sale has been postponed until June 15.-V. 64, p. 799.

Kansas City Pittsburg & Gulf RR.-Abstract of Mortgage. Kansas City Pittsburg & Gulf RR.—Abstract of Mortgage. —An abstract of the Kansas City Pittsburg & Gulf mortgage will be found on subsequent pages of this issue. The earn-ings of this road, which are reported from week to week in the CHRONICLE, indicate a large and growing business, which will be largely increased by the opening very shortly of the line through to Port Arthur on the Gulf of Mexico. The company's first mortgage four per cent bonds will be listed at once on the New York, Boston, London and Berlin Stock Exchanges. They are already listed on the Philadelphia Stock Exchange.—V. 64, p. 953.

Kansas City & Southwestern RR.-St. Louis & San Francisco RR.—Decree Value of Bonds.—The Kansas City & Southwestern bonds of 1886 are entitled from the oroceeds of foreclosure sale to receive the sum of \$222 from Master Com-missioner Dillon at the Central National Bank Building, Topeka, Kansas.—V. 64, p. 567.

Kings County Elevated Ry.—Quarterly.—This road, which is in the hands of a receiver, and about to be reorganized, has just reported its earnings for the quarter and the six months ending Dec. 31 as follows:

3 mos. end. Gross Dec. 31. earnings. 1896	Net earnings. \$18,139 '80,957	Other income. \$4,142 3,293	Interest, taxes, &c. \$96,285 88,918	Balance, deficit. \$34,004 4,668
1896 \$347,538	\$85,570	\$8,244	\$192,077	\$98,263
1895 382,722	132,163	6,555	179,809	41,091

Loans and bills payable Dec. 31, 1896, \$217,500: interest on bonds due and accrued, \$196,016; accrued taxes, \$164,411; due for wages and supplies, \$60,833; due on open accounts, \$29,838. Cash on hand, \$42,357; open accounts receivable, \$147,943.— V. 64, p. 798.

Lake Shore & Michigan Southern RR.-Quarterly-Earn-ings for the quarter ending March 31 were:

3 mos. end. Gross Net Other Mar. 31. earnings. earnings. income. 1897......\$4,742,177 \$1,811,267 \$83,010 1896.......5,046,870 1,864,356 98,713 Interest, Balance taxes, elc. \$1,118,010 1,103,713 \$776,20, 859,356

Dividends of 3 per cent (amounting to \$1,483,995) are paid each February and August. Report for the year 1896 was given in CHRONICLE of May 8.-V. 64, p. 1001.

Lehigh Valley RR.—Earnings in New York State.—The lines in New York State now include: Lehigh Valley in New York, 283 miles; Lehigh & New York (formerly Southern Central), 115 miles; Rochester Southern, 30 miles; Elmira Cortland & North. (since Feb. 20, 1896), 139 miles, and Mid-dlesex Valley (since Dec., 1895), 30 miles; total, 597 miles. Earnings for the quarter and the nine months ending March 31 have been reported as follows:

1896	Gross	Net	Interest,	Balance,
	earnings.	earnings.	taxes, etc.	surplus.
	\$1,120,576	\$323,340	\$267,506	\$55,834
	1,101,246	256,809	229,613	27,196
9 months- 1896-7 1895-6 -V. 64, p. 754.	\$4,399,941 3,871,622		\$803,764 695,830	\$865,858 588,926

Louisville Evansville & St. Louis Consolidated RR .- Old Receivers' Certificates to be paid June 1.—All receivers' cer-tificates, whether due or not, issued by E. O. Hopkins and James J. Wilson, former receivers, will be paid on and after June 1, 1897, at the National Bank, Evansville, Ind., and the Fidelity Trust & Safety Vault Company, Louisville, Ky. In March, 1897, receivers' certificates for \$324,500 were authorized, of which \$280,000 were to retire these old receivers' certificates now to be paid, \$40,000 for 100 new cars and \$4,500 for interest on Venice & Carondelet bonds.--V. 64, p. 799.

Metropolitan Street Ry.—Central Crosstown BR. (New York City.)—Transfer Arrangements Changed.—Since the Metropolitan got control of the Central Crosstown Line, the Third Avenue Railroad has been informed that its transfer arrangements with the Crosstown line will be abrogated on Line 20 V 64 c. 1001 June 22.-V. 64, p. 1001.

Milwaukee Benton Harbor & Colambus -St. Joseph Valley.—The first-named company, which is a reorganization of the St. Joseph Valley, proposes to build a road from Ban-ton Harbor, Mich., to Nappanee, Ind The old St. Joseph Valley, extending from Buchanan to Berrien Springs, Mich., 1134 miles, is being rebuilt, and work is in progress on an ex-tension from Berrien Springs to Benton Harbor, 16 miles. A. A. Patterson, Jr., Benton Harbor, Mich., is President.

Missouri Pacific Ry.-St. Louis Iron Mountain & Southern

Missouri Pacific Ry.—St. Louis Iron Mountain & Southern Ry.—Payment of Cairo Arkansas & Texas Bonds due June 1, —As already announced the \$1,450,000 first mortgage bonds of the Cairo Arkansas & Texas Railway Co., maturing on June 1st next, will be paid in cash on and after that date at the office of the Mercantile Trust Co. Listing of Extended Iron Mt. Bonds.—The New York Stock Exchange has listed the \$4,000,000 first mortgage of the St. Louis & Iron Mountain RR. Co., dated Angust 1, 1867 (Farmers' Loan & Trust Co., trustee), which fell due May 1, 1897, and have been extended to the first day of May, 1947, at 4½ per cent per annum, the coupons being payable in February and August. The first coupon, due August 1, 1897, is for three months interest only. The original bonds are bound in with the extension contracts and new coupon sheets. The extension contract provides that the bonds may be retired by the company on six months' notice at 105 and interest. The statement to the Exchange says: The property covered by this mortgage is the railroad and fran-chiese lowated in the State of Missouri extending from B. Lowbit.

The property covered by this mortgage is the railroad and fran-chises located in the State of Missouri, extending from St. Louis to Pliot Knob; also the branch from Mineral Point to Potosi, and from Bismarck to Belmont, in all about 210 miles, together with the lands, buildings and other property belonging to this company. --V. 64, p. 843, 800, 708.

Nassan Electric RR. (Brooklyn, N. Y.)-Quarterly.-Earnings for the quarter ending March 31, 1897, have been reported as follows. The lines of the Atlantic Avenue RR., including Brooklyn Bath & West End, were leased in April, 1896, and their results are included below:

1896-97-	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
3 mos. to Mar. 31.	\$334,539	\$112,408	\$30,736	\$142,771	\$373
3 mos. to Dec. 31.	367,782	130,417	17,300	145,806	1,911
3 mos. to Sept. 30.	551,170	242,088	18,656	177,868	82,876

Total 9 months.\$1,253,491 \$484,913 \$66,692 \$466,445 \$85,160

The six months ending March 31 are of course the poorest half of the year. No full comparison with the corresponding periods of last year is possible, as the Atlantic Avenue lines were not leased till April, 1896. For the nine months of 1895 96, however, the combined gross earnings of the three roads above mentioned were \$1,044,967. The increase for the increase for the second term of \$200,000. This result is nonroads above mentioned were \$1,044,967. The increase for the current year is therefore over \$200,000. This result is con-sidered very satisfac ory, and, with warm weather, earnings are expected to show a growing surplus over all charges. A map of the company's lines will be found in the current issue of the STREET RAILWAY SUPPLEMENT, --V. 64, p. 798.

New York Central & Hudson River RR.—New Mortgage Authorized. -At Albanv on May 26 the new \$100,000,000 re-funding mortgage was duly authorized by a vote of \$70,069,200 of the company's \$100,000,000 of capital stock.—V. 64, p. 1001.

New York New Haven & Hartford RR.—Favorable Deci-sion in Bridgeport Grade-Crossing Case.—At New Haven, Conn., May 26, the Connecticut Supreme Court handed down a decision sustaining the lower court in its finding against F. J. Mooney, who sought to restrain the city of Bridgeport from paying its share—about 16 per cent—under the contract with the company for four-tracking its lines through that city. The proposed improvement, which will cost about \$2,500,000, it is understood, can now be proceeded with when-ever the company is so disposed. Blectric Line Opened.—The new electric railway between Hartford and New Britain was opened to the public on Mon-day, 3,237 passengers being carried on the opening day. The

day, 3,237 passengers being carried on the opening day. The cars were run regularly at half-hour intervals, covering the ten miles in twenty minutes. The time in transit it is thought will soon be reduced to fifteen minutes, the electric trains at present using only one of the two tracks, a turnout midway permitting the trains bound in opposite directions to pass.— V. 64, p. 953.

Northern Pacific. Ry.—Bonds Called.—In our advertising columns are published the numbers of 382 Northern Pacific general first mortgage bonds called for payment, interest ceasing July 1.—V. 64, p. 843.

Omaha Minneapolis & Buffalo RR.—Mortgage for \$15,-000,000 Filed.—A \$15,000,000 mortgage has been filed at Omaha by the Omaha Minneapolis & Buffalo RR. Co. of Neb-Taska to the Missouri Kansas & Texas Trust Co., as trustee. The line is projected to run from Omaha northeasterly through Iowa and Minnesota, and also to Buffalo, N. Y., by way of Southern Canada, forming northern and eastern connections for the Kansas City Pittsburg & Gulf RR.

**Oregon Improvement Company.**—Amy Committee Offers to Cash First Mortgage Coupons.—The Amy Committee gives notice that holders of first mortgage bonds who deposit the same on or before June 15, 1897, under the agreement dated Nov. 18, 1896, will receive from the committee cash for the coupon maturing June 1, 1897, attached to such bonds. The offer of the Waterbury Committee to cash the first mort-gage coupons was mentioned last week.—V. 64, p. 1000.

Oregon Short Line RR.—New Securities.—The mortgage securing the B Income bonds having been authorized by the new company and the trust accepted by the State Trust Co., the securities of the reorganized company, the Oregon Short Line RR. Co., will be issued as soon as the legal formalities in connection with the recording of the mortgage can be per-fected.—V. 64, p. 841.

**People's Railway (St. Louis).**—*To be Sold June 29.*—The Court has ordered the foreclosure sale of this road for June 29 next. The property is known as the Fourth Street Cable Line.—V. 64, p. 611.

Pittsburg Bessemer & Lake Erie RR.—New Equipment. —This company has ordered 600 fifty-ton steel cars and ten large locomotives. The old road-bed has been largely recon-structed so that the new line will have grades that will permit of heavy train loads. It is expected to have the road in oper-ation from the Carnegie works near Pittsburg to Conneaut harbor on Lake Erie by the middle of August.—V. 64, p. 800,

Peoria Decatur & Evansville RR.—Reorganization Plan. —First Mortgage Coupons.—The committee, consisting of Moses L. Scudder, Charles S. Fairchild, Jenkins Van Schaick, R. Suydam Grant and William H. Payne, has prepared a plan for the reorganization of the company. Copies of the plan can be obtained from the New York Security & Trust Co., 46 Wall Street. Holders of first mortgage bonds are in-vited to deposit the same and to receive an advance of \$25 in cash for one past due coupon and thereafter \$25 for each ma-turing coupon, being in effect 5 per cent. per annum until the turing coupon, being in effect 5 per cent per annum until the new bonds begin to draw interest. If the plan is declared in-operative the first mcrtgage bonds can be withdrawn without

charge. *The Plan.*—The chief feature of the plan is that the first mortgage bondholders are asked to consent to a reduction of mortgage bondholders are asked to consent to a reduction of interest from six to five per cent, exchanging their bonds for a new first mortgage bond bearing that rate of interest in con-sideration of the second mortgage bondholders and stock-holders contributing in cash \$543,000 for the payment of past-due interest on the firsts, the receiver's debts and for im-proving the property at a cost of \$260,000. The operation of the property under the receiver for the three past years shows the small average deficiency of \$795 per annum below interest on the first mortgages at 6 per cent, but net earnings have been more than sufficient to meet the interest payments called for under the recoranization

the interest payments called for under the reorganization plan.

The road is 238 miles long and runs from Evansville to Pekin. The first mortgage bonds are now divided—\$1,287,-000 are secured on the Peoria division, 110 miles long, and \$1,470,000 on the Evansville division, 128 miles long. It is proposed to create a new mortgage for \$3,000,000, covering the entire line and the interest of the company in the Peoria Terminal, and to make the new bonds run forty years, where-as the didicional honds expire in 1990

as the old divisional bonds expire in 1920. If the firsts will not accept this proposition the alternative is foreclosure of the first mortgages, a suspension of interest

for some time and finally raising the money to put the property in order. The new securities proposed are as follows:

2,757,000	First mortgage 5 per cent 40-year gold bonds
	To acquire Peoria & Pekin Union stock Temporary second mortgage, due in twenty years but subject
500,000 417,600 82,400	to call when drawn by lot Of which for second mortgage bondholders' subscription In treasury
2,550,000 2,088,000 417,600	Preferred stock, 5 per cent non-cumulative Cf which for old second mortgage bonds """""""""""""""""""""""""""""""""
44,400	In treasury.
1,670,400	Ommon slock. Of which for second mortgage subscription

In treasury. 140.0 00 To provide the cash required, the second mortgage bond-holders (amount outstanding \$2,088,000) are expected to con-

tribute \$200 per bond in five monthly instalments. For each \$1,000 of this cash contribution they are to receive: \$1,000 temporary mortgage bond; \$1,000 new preferred stock, and \$4,000 new common stock. In addition to this there is to be given \$2,088,000 new preferred stock in exchange for the old second mortgage bonds. Holders of common stock in the new company (amount

second mortgage bonds. Holders of common stock in the new company (amount outstanding \$8,400,000) are to be allowed to acquire stock in the new company to the extent of one-fifth of their present holdings on paying \$7 50 per share of the new stock. As an inducement to the first mortgage bondholders to deposit their bonds under this agreement, the committee proposes to advance to each bondholder \$25 on each past-due coupon or maturing coupon until the new 5 per cent bonds begin to draw interest, in order that the first mortgage bond-holders may receive interest past due at once and interest holders may receive interest past due at once and interest during reorganization on regular interest payment days. The terms of exchange of old for new securities will there-

fore be as follows :

Reading Company-Philadelphia & Brading Coal & Iron. Reading Company—Philadelphia & Krading Coal & Iron. —Payment of Coal Company Bonds June 1.—The \$739.000 bonds of the Coal & Iron Company maturing June 1, 1897, secured upon lands known as the Reed tract, Wood estate, Hartman & Meyer, &c., tract, Forbes & Delano, &c., tract, will be paid at maturity either by J. P. Morgan & Co., New York, or Drexel & Co., Philadelphia.—V. 64, p. 955. Bickered Traction Destination Company The Dick

**Richmond Traction.**—Results Since Opening.—The Rich-mond Traction Co. has just issued an approximate statement of its operations for the first eleven months of its existence, of its operations for the first eleven months of its existence, or say from date of the opening of its first section, June 20th, 1896, to May 31st, 1897, showing gross earnings of \$106,00°; operating expenses, taxes and accident insurance, \$70,000; net earnings, \$36,000. Interest on outstanding bonds June 30th, 1896, to May 31st, 1897, \$18,000. Surplus earnings (ap-plicable to stock), \$18,000. The company completed and began the operation of its entire system April 10th, 1897, and during the period above referred to the company had only about 75 per cent on an average of its mileage in operation. That the company should have earned full interest charges and also a dividend at the rate of over 6 per cent on its capital stock under these circumstances is regarded as most promis-ing.—V. 61, p. 1179.

Saginaw Consolidated Street Ry.—Union Street Ry.— Receiver Appointed.—At Saginaw, Mich., May 22, Homer Loring of Newton, Mass., was appointed receiver of these companies.—V. 64, p. 954.

St. Louis & San Francisco RR.—Old Receivers Held Liable for Branch Line Rentals,—At St. Louis, May 24, Judges San-born and Thayer, in the U. S. Circuit Court of Appeals, af-firmed the decree of the lower court holding the receivers of the old company under the contracts with the branch lines liable for the routely scenario, The the old company under the contracts with the branch lines liable for the rentals accruing during the receivership. The amount involved is \$225,000, which was deposited with the Trust Company by the Reorganization Committee pending a settlement of the suit. Two of the branch lines waived the claim when they were taken into the reorganized company, and the amount named above goes to the Kansas Midland and the St. Louis Kansas & Southwestern companies, the two branch lines which were not taken over by the Frisco.— V. 64, p. 567.

South Brooklyn Railroad & Terminal Company.—Judg-ment Entered for \$60,767.—Judgment for \$60,767 was entered Tuesday against this company, of which John W. Ambrose is President, in favor of W. Bayard Cutting. The claim is for \$11,824, advanced Sept. 10, 1891, and the balance is on eleven notes made between Feb. 9, 1892, and May 3, 1894.

eleven notes made between Feb. 9, 1892, and May 3, 1594. Springfield (Vt.) Electric Ry.—Town Offers Stock Bonus. At a special town meeting the town of Springfield, Vt., on May 22, voted to give its \$30,000 worth of stock in the un-completed Springfield Electric Railway to any responsible party who will complete the road and put it in running con-dition. Of the \$120,000 capital stock only \$53,300 has been paid in, and of this amount this town paid \$30,000. The road has built about 5 miles f track but no work has been done

since December, 1896. It is estimated that about \$100,000 is needed to put the road in operation. There are \$100,000 of bonds authorized but none sold, though some are held by the contractors.

Sunbury & Erie RR.—Fennsylvania RR.—Offer to Pur-chase Bonds Due Oct. 1, 1897.—The Pennsylvania RR. Co. gives notice that from June 1 until July 1 it will purchase at \$1,022 50 per bond the Sunbury & Erie first mortgage sevens maturing Oct. 1, 1897 .- V. 64, p. 465, 470.

Sevens maturing Oct. 1, 1897.--V. 64, p. 460, 470. Sunbury & Lewistown Ry.-Bonds Listed.-The New York Stock Exchange has listed \$500,000 of this company's authorized issue of \$600,000 first mortgage 4 per cent gold bonds of 1896, due July 1, 1936. The mortgage covers spe-cifically the road from Lewistown, Pa., to Selins Grove Junc-tion, Pa., 43½ miles. The underlying mortgages have been satisfied of record. The bonds are payable, principal and interest, tax free. The earnings are reported as follows: Year. Gross. 1896......\$414,885 -V. 63, p. 561. Net. Oth. Inc. Int., etc. Bal. Supreme Court Decisions.—Inter-State Commerce Com-mission have no Power to Make Rates.—Several cases involv-ing the construction of parts of the Inter-State Commerce law were decided in the Supreme Court this week. The most important was that of the Inter-State Commerce Commission vs. the Cincinnati New Orleans & Texas Pacific Railroad Company and others upon a question asked by the Court of Appeals for the Sixth Circuit, viz., "Has the Inter-State Commerce Commission power to fix rates." The question was answered by the Court, said Justice Brewer, in the opinwas answered by the court, said Justice Brewer, in the opin-ion announcing the judgment, in the case to which the Com-mission and the Cincinn ati Southern Railway Company were parties last year, when the Court said: "We do not find any provision of the act that expressly, or by necessary implica-tion, confers such a power." A fuller report and a review of the decision will be found in our editorial deartment.

our editorial department.

our editorial department. Taxation of Bonds in Pennsylvania.—New York Susque-hanna & Western RB.—Recent Ruling.—Auditor-General Mylin of Pennsylvania has ruled in the case of the New York Susquehanna & Western that the Treasurer of the company shall hereafter take it for granted that all the bonds of the company are held in Pennsylvania unless he can prove other-wise. A circular setting forth the necessity of getting informa-tion as to the residence of bondholders has therefore been sent out by Treasurer Moore. Heretofore it has been the custom to collect the Pennsylvania tax on coupons only from bonds known to be held in that State, returning the rest as "resi-dence unknown." The company owns in fee but very little mileage in the State of Pennsylvania.—V. 64, p. 664. Terre Hante & Logansport RR.—Interest Payment.—M.

Terre Haute & Logansport RR.—Interest Payment.—M. L. Scudder, chairman of the First Mortgage Bondholders' Committee gives notice to the holders of New York Security & Trust Company certificates for first mortgage bonds that they have collected the interest which fell due on said bonds last January, with interest thereon to May 24, being \$30 72 for each coupon, which can be collected at the New York Security & Trust Company.—V. 64, p. 467.

Union Pacific Ry.—Western Union.—*Telegroph Arrangement to End Sept. 1.*—Judge Munger, in the United States Court at Omaha, on May 24, ordered that the arrangement by which the Western Union Company has had exclusive tele-graph privileges along the railroad lines of the Union Pacific graph privileges along the railroad lines of the Union Pacific system must cease Sept. 1. Judge Munger suggested that the question of adjusting the property rights of the two corpora-tions would be brought before Judge Cornish, special master in chancery in the Union Pacific case. The decision of the United States Supreme Court, which led up to the present order, was cited in the CHRONICLE of Nov. 30, 1895, page 968; see also p. 926. —V. 64, p. 1002, 758.

## KANSAS CITY PITTSBURG & GULF RR. CO

ABSTRACT OF FIRST MORTGAGE, DATED APRIL 1, 1893, SECURING 5 PER CENT GOLD BONDS DUE APRIL 1, 1923.

#### PARTIES.

The KANSAS CITY PITTSBURG & GULF RAILROAD COM-PANY, organized under the laws of Missouri, and hereinafter called "The Company", party of the first part, and the Missouri KANSAS & TEXAS TRUST COMPANY, of Kansas City, Missouri, and THE STATE TRUST COMPANY, of New York, hereinafter, for brevity, called "Trustees", parties of the second part, and holders of the bonds hereinafter de-scribed, parties of the third part.

#### PREAMBLE-DESCRIPTION OF BONDS.

PREAMBLE-DESCRIPTION OF BONDS. WHEREAS, the Company, for the purpose of meeting the expense of the completion, construction, repair and equip-ment of its line of road and branches, and the purchase and acquisition of the stocks and first mortgage bonds of other railroad companies, if necessary to maintain said road or any part thereof, has resolved to issue its bonds to an amount not exceeding \$25,000 per mile of completed single main track and of yard and terminal tracks, and \$15,000 addi-tional per mile of parallel completed main or double track of said line of railroad or railroads, its extensions and branches, not to exceed at any time the capital stock of said Company, except as authorized by the laws of the State of said line of railroad or railroads, its extensions and branches, not to exceed at any time the capital stock of said Company, except as authorized by the laws of the State of Missouri. All of the said bonds to be dated April 1, 1893, and to be payable in gold coin of the United States of America, of the present standard of weight and fineness, at the Company's office, or the agency in the city of New York, on the first day of April, 1923, of the denomination of \$1,000 each, negotiable in form, and to pass by delivery unless registered, as specified in said bonds; to bear interest at the gold coin; and to have interest coupons attached, executed by the *fac simile* signature of the Treasurer, the said cou-pons to be payable at the agency of said Company in New York on the first days of April and October in each year. Said bonds to be numbered consecutively from one to the highest number thereof issued, and all to be ratably secured by said deed of trust or mortgage, without discrimination or preference in respect to the time or times of their issue or negotiation or in any other manner whatsoever; and, WHEREAS, the stockholders and directors of the company have duly authorized the making of this mortgage to secure

have duly authorized the making of this mortgage to secure the bonds above described, said bonds to be of the following form :

#### FORM OF BOND. \$1.000. UNITED STATES OF AMERICA.

President.

#### PROPERTY COVERED.

Now, THEREFORE, THIS INDENTURE WITNESSETH: That the Company, in consideration of the premises and of one dollar (\$1 00), etc., etc., by these presents does transfer unto the Trustees all and singular its said line of railroad, constructed or hereafter constructed or acquired as follows :

#### LINE CONSTRUCTED AND TO BE CONSTRUCTED.

LINE CONSTRUCTED AND TO BE CONSTRUCTED. Kansas City, Mo., southerly to a point at or near Fort Smith, Ind. T. Also all other lines that may be built by the Company in the States of Missouri, Kansas, Arkansas and in Indian Territory. Also all interest which the Company may obtain by acquisition of stock and bonds of other railroad companies or by construction, pur-chase or lease of the continuation of said line from Fort Smith, pass-ing through the States of Arkansas, Texas and Louisana via Shreve-port to Sabine Pass and to any other point on or near the Gulf of Mexico. Also any other lines in the States of Arkansas, Texas and Louisiana. The total length of the various lines projected being 1,000 miles.

The above statement is condensed from the mortgage.

which was drawn when only a small portion of the road had been constructed.

The completed road July 1, 1897, covered by the mortgage will be as follows:

ROAD OWNED AND COVERED BY MORTGAGE JULY 1, 1897.

Miles. 

Total mileage covered by mortgage (exclusive of trackage)... 786

To conform with State laws, portions of the road have been built and are owned under the title of the Texarkana & Fort Smith Railway Company and the Kansas City Shreveport & Gulf Railroad Company. The stock and bonds of these subsidiary companies, however, being pledged to secure the bonds of the Kansas City Pittsburg & Gulf Railroad Com-pany, as provided in the mortgage, the latter bonds possess a first lier on the antire line as above described — En l

bonds of the Kansas City Pittsburg & Gulf Rairoad Com-pany, as provided in the mortgage, the latter bonds possess a first lien on the entire line as above described.—ED.] Also all rights-of-way, depot grounds and other lands, all tracks, bridges, stations, freight-houses and shops, and all other structures and buildings now held or hereafter ac-quired in either of said States of Missouri, Kansas, Arkansas, Texas and Louisiana, or in said Indian Territory, for use in the construction, maintenance or operation of the above mentioned lines of railroad. Also all locomotives, rolling-stock and equipment whatsoever, and all machinery, tools and implements, and all fuel, supplies and materials now or hereafter acquired in connection therewith. And all the capital stock and bonds of any other rail-road company which the said party of the first part may hereafter acquire or own, whose lines of railroad either form a part of said main line, or any extension, continuation or branch thereof, in the said States of Missouri, Kansas, Arkansas, Texas, Louisiana and said Indian Territory. And all revenues arising from said railroads and premises ; and all rights and exemptions, and all corporate and other franchises now owned or hereafter acquired relating to the said main line of railroad, its extensions, continuations and branches. Also all leases and traffic contracts, etc., etc.

No.

# ISSUE OF BONDS SHALL NOT EXCEED \$25,000 PER MILE OF COMPLETED MAIN LINE OR TERMINAL TRACKS AND \$15,000 PER MILE OF SECOND TRACK-OTHER PROVISIONS.

Article First .- The bonds shall be certified by the Trustees Article First.—The bonds shall be certified by the Trustees to the extent of not to exceed at the date of any certifica-tion \$25,000 per mile for each completed single main track and for each mile of yard or terminal tracks, and \$15,000 per mile additional for each mile of parallel completed main or double track of the said line of railroad of the company theretofore completed and equipped, or by it theretofore purchased or acquired or leased, and completed and completed and

purchased or acquired or leased, and completed and equipped. The Trustees shall also certify bonds to an amount not to exceed \$25,000 per mile for each completed single main, yard and terminal tracks, and \$15,000 per mile for each mile of parallel completed main or double track, as aforesaid, of any railroad company of said main line, its ex-tensions or branches, the stock and first mortgage bonds of which may before or at the date of said certification be owned or possessed by said party of the first part, and which shall have been transferred and delivered to said Trustees as security for the payment of all the bonds certified here-under.

LIMITATIONS REGARDING ISSUE OF BONDS UPON BASIS OF STOCKS AND BONDS DEPOSITED.-OTHER PROVISIONS.

But in no such case shall the said bonds so certified upon the basis of such stocks and bonds of any other railroad company exceed \$25,000 per mile of completed single main track of such railroad companies, and \$15,000 additional per mile of completed main double track, as hereinbefore recited; nor exceed in the aggregate per mile the first mortgage bonds of such other railroad com-pany so transferred to said Trustees as security. Nor shall the bonds so certified exceed at the time of certification the

pany so transferred to said Trustees as security. Nor shall the bonds so certified exceed at the time of certification the authorized capital of the Company, party of the first part, except as authorized by the laws of the State of Missouri. *And proviled, further*, that whenever bonds are certified hereunder, upon the basis of ownership of the stock and bonds of other railroad companies, the Company shall at the date of such certification own and have transferred to the **Trustees as security at least a majority of the first mortgage** bonds theretofore issued by said other railroad companies; and also, as like security, such amount of their capital stock

bonds theretofore issued by said other railroad companies; and also, as like security, such amount of their capital stock as may be sufficient to control such other companies. And provided, further, that in the issuance of bonds here-under upon the basis of the mileage of leased lines no greater amount of bonds shall be issued than the Company shall have expended in cash in the construction or equip-ment. or both, of said leased lines or portion thereof.

VERIFIED STATEMENTS REQUIRED BEFORE BONDS SHALL BE CERTIFIED.

It shall be the duty of said Trustees, upon the request of the directors or the executive committee thereof of the Company, to deliver the foregoing bonds in the manner hereinbefore provided, upon being furnished with a state-ment and request of the Company in writing and under its seal, with the certificate of the President (or Vice-President) and Chief Engineer that such statement is true. Such statements shall give the amount of miles theretofore con-structed, acquired or leased, and in the case of issuance and certification of bonds on the basis of stocks and bonds of other railroads, also the number of miles of road of such other company theretofore conveyed and mortgaged as security for the payment of such first mortgage bonds of such other company. Said statement shall also contain stuch other recitals of facts as may from time to time be required by the Trustees. ALSO PROPERTY ACQUIRED TO BE DULY CONVEYED TO

ALSO PROPERTY ACQUIRED TO BE DULY CONVEYED TO TRUSTEES. Article Second.—This article provides that the company shall from time to time, before the certification of bonds thereon, transfer to the Trustees by proper conveyance the lines of railroad constructed, purchased or leased, and also the stock and bonds on account of which it is desired to issue bonds hereby secured issue bonds hereby secured.

COUPONS PURCHASED TO HAVE NO LIEN.

Article Third. — Coupons of said bonds taken up, purchased or paid at time of maturity, or subsequently, for the accom-modation of the company, shall cease to be a lien on any portion of said property herein conveyed. COVENANTS TO PAY PRINCIPAL, INTEREST, TAXES, ETC. Article Fourth The Company company and truly

Article Fourth.—The Company covenants well and truly to pay the principal of each of the said bonds secured hereby and the interest thereon, as the same shall from time to and the interest thereon, as the same shall from time to time become due and payable, and also to pay, when due, all taxes and assessments and other charges which may be law-fully levied upon the property, or upon the Company, or the earnings thereof, and which, if left unpaid, might become a lien on the property superior to the lien of this indenture. If the Company shall at any time make any lease of the said railroad the same shall be expressly made subject to this indenture, and all agreements herein contained. COMPANY TO ENJOY PEACEABLE POSSESSION.

COMPANY TO ENJOY PEACEABLE POSSESSION.

Artic e Fifth —Unt.1 default in the performance of some covenants herein the Company shall be suffered to have undisturbed possession of the property.

DEFAULT FOR SIX MONTHS, TRUSTEES MAY TAKE POSSES SION AND OPERATE PROPERTY.

ance of any covenant herein contained, then, upon requisition and indemnity, as hereinafter prescribed in Article Eleven of this indenture, it shall be lawful for the Trustees to enter upon, all and singular, the said lines of railroad, and to operate the same, making all useful alterations, additions to operate the same, making all useful alterations, additions and improvements, and applying the income of the property, after deducting the expenses of operating, and of all repairs, alterations, additions and improvements, and all payments for taxes, assessments, charges or liens prior to the lien of these presents, to the payment of the accrued interest on the bonds hereby secured, in the order in which such interest shall have become due, ratably, to the persons entitled thereto, and of any other moneys in respect to which the Company shall be in default.

#### OR MAY SELL THE PROPERTY AT AUCTION.

Article Seventh.—In case default as aforesaid, or in case of default on the principal of any of said bonds when due, it shall likewise be lawful for the Trustees, upon requisition and indemnity as in Article Eleven prescribed, to sell the lines of railroad, with appurtenances, together with the stocks and bonds of other railroad companies which may have been theretofore assigned to the Trustees, to the highest and best bidders at public auction in the city of New York, or in the city of Philadelphia, or in Kansas City, as may be determined by said trustees, or a majority in interest of the holders of said bonds, having first given public notice of the sale by advertisement published not less than five times a week for eight consecutive weeks in New York, Philadelphia and Kansas City. After deducting all necessary expenses of the sale and of Article Seventh .- In case default as aforesaid, or in case of

After deducting all necessary expenses of the sale and of operating said railroad, the residue of said proceeds of sale shall be applied, first, to the payment of the interest of such of the aforesaid bonds as may be at such time due and un-paid, and, second, to the payment of all unpaid bonds, whether the same shall have, by their terms, become due and payable, or not, without discrimination or preference, but rate but but ratably

# PROVISIONS HEREIN IN THE EVENT OF DEFAULT ARE ADDITIONAL TO THE ORDINARY REMEDIES ALLOWED BY LAW.

All provisions in this indenture contained which specify remedies in the event of default are cumulative to the ordinary remedy by foreclosure in the courts.

AT ANY SUCH SALE TRUSTEES MAY PURCHASE FOR THE BONDHOLDERS.

Article Eighth.-At any such sale of the mortgaged premises the Trustees may purchase the same in behalf of the bond-

the Trustees may purchase the same in behalf of the bond-holders in the proportion of the respective interests of the bondholders, at a reasonable price if but a portion of the property be sold, or if all the property be sold at a price not exceeding the total amount of such bonds secured by this instrument outstanding, with interest accrued thereon, and the expenses of said sale or sales. The purchasers shall be entitled, in making settlements of the purchase money, to turn in any of the bonds or coupons secured by these presents, and held by the said purchasers, towards the payment of the purchase money, but not exceeding that which would be payable out of the net proceeds of said sale if made wholly for money, to the purchaser or purchasers, as the holder or holders of said bonds or coupons, for his or their just share or proportion in that character of such net proceeds. that character of such net proceeds.

UPON DEFAULT FOR SIX MONTHS IN PAYMENT OF INTER-EST, THE PRINCIPAL OF ALL THE BONDS MAY BE DECLARED DUE AND PAYABLE-POWER OF A MAJORITY IN INTEREST OF THE BOND-HOLDERS TO WAIVE OR ENFORCE THIS RIGHT.

Article Ninth. —In case of default for six months in the payment of any instalment of interest on any of the bonds hereby secured, the payment having been duly demanded, then in such case the principal of all the bonds secured by these presents shall, at the election of the said Trustees, become immediately due and payable. But a majority in interest of the holders of said bonds then outstanding may, be instrument or concurrent instruments in writing, under by instrument or concurrent instruments in writing, under their hands and seals, or by vote of a meeting duly held, as herein provided, instruct the Trustees in such case to declare the said principal to be due, or to waive their rights to so declare, on such terms and conditions as such majority shall deem proper, or may annul or reverse the said election of the said Trustees.

#### RIGHT TO RELEASE PROPERTY FROM LIEN HEREOF.

RIGHT TO RELEASE PROPERTY FROM LIEN HEREOF. Article Tenth — The Trustees may in their discretion re-lease from the lien of these presents any portion of the property appurtenant to the said railroad lines which, in the judgment of the Trustees, may be unnecessary for the use in connection therewith, and which shall have been acquired or held for stations, or other buildings, or for a supply of fuel, gravel or other material. Also to release, as aforesaid, any lands which may become disused by reason of a change of the location of any station-house or other build-ing connected with the said railroad. They may also con-sent to any changes in the location of the track, or of sta-tion-houses, or other buildings, which in the judgment of the Company shall have become expedient; but the title to the Company shall have become expedient; but the title to any lands, premises or property which may be acquired for permanent use, in substitution for any so released, shall at Article Sixth.—In case of default for six months in the payment of interest on any of the bonds or in the perform- to the Trustees hereunder. The power of release hereby

given shall be exercised, only in case of the Company congiven shall be exercised, only in class of the Company con-tracting to sell the property so to be released, and only upon the written request of the President of the Company show-ing sufficient reason therefor, accompanied by an affidavit, satisfactory to the Trustees, of the Chief Engineer, or other proper officer of the Company, stating the facts upon which man request is made. such request is made.

# A MAJORITY IN INTEREST OF THE BONDHOLDERS MAY REQUIRE THE TRUSTEE3 TO ENFORCE THE REMEDIES IN CASE OF DEFAULT.

REQUIRE THE TRUSTEES TO ENFORCE THE REMEDIES IN CASE OF DEFAULT. Article Eleventh.—In case of default in any manner as above described, it shall be the duty of the Trustees, upon requisitions in writing signed by the holders of a majority in amount of the bonds then outstanding, and upon adequate indemnity against all costs, to proceed to enforce the rights of the bondholders under these presents, either by the exer-cise of the powers granted by Articles Six and Seven of this indenture, or any of said powers, or by a suit or suits in equity or at law, as the Trustees, being advised by counsel, shall deem most effectual to enforce such rights, subject to the power hereby declared of a like majority in interest of the holders of said bonds then outstanding to instruct in writing the Trustees to waive any such default, or to en-force the rights of the bondholders by reason thereof. *Provided* that no holders of any bonds secured hereby shall have the right to institute any suit, action or proceed-ing for remedy hereunder or hereupon without first giving notice in writing to the Trustees of default having occurred and continued, as in this article aforesaid, and requesting the Trustees, and affording them a reasonable opportunity, to institute such action, suit or proceeding in their own name, and also offering to them adequate in-demnity.

demnity.

# TRUSTEES MAY BE REMOVED BY A MAJORITY IN INTER-EST OF THE BONDHOLDERS.

Article Twelfth.—Any Trustees may be removed by a majority in interest or amount of the holders of all said bonds hereby secured and then outstanding by concurrent instruments in writing under their hands and seals, or by a vote of a meeting duly held as herein provided. But in the case of a resignation of one of the Trustees the other Trus-tees shall be vested with the title, rights and powers of both until another shall be chosen and be subject to the liabilities and obligations of both and obligations of both.

<text><text><text><text><text><text> or Philadelphia.

#### BONDHOLDERS' MEETINGS.

BONDHOLDERS' MEETINGS. Article Thirteenth.—Whenever a meeting of the bond-holders shall be expedient for any of the purposes mentioned in this indenture, it shall be the duty of the President of the Company, on the written request of the holders of not less than one *fifth* in the amount of said bonds to call a meeting of the holders of all the then outstanding bonds or Philadelphia, by advertisement to be published twice a week for three successive weeks in two daily newspapers of good circulation published in said cities. In default of such weiting being called by the President of the Company within thirty days after request as aforesaid, it shall be competent for the holders of one-fifth in amount of said bonds then outstanding to call such meeting in the manner aforesaid. At any such meeting the bondholders shall be by these presents; *provided*, that the majority in interest or amount of the outstanding bonds, in person or by proxy, shall be required to constitute a quorum at any such meeting.

#### DEEDS OF FURTHER ASSURANCE.

Article Fourteenth-The Company covenants to deliver all such further deeds and assurances for the better transferring to the Trustees the said property, etc., as by the Trustees or their counsel shall be reasonably required.

BONDS TO BE APPLIED TO CONSTRUCTION AND EQUIPMENT OF ROAD, ETC.

Article Fifteenth-The Company covenants that it will use the said bonds to pay for the construction, completion, re-pair, equipment and acquisition of said lines of road and leased portions (if any) or the acquisition of the stocks and bonds of other railroads, as hereinbefore provided.

PROVING OF BONDHOLDERS' INSTRUMENTS.

Article Sixteenth—The execution of any instruments exe-cuted by a majority in interest of the holders of said bonds hereby secured shall be deemed sufficiently proved if cer-tified by a notary public or other person authorized to take acknowledgements of deeds, with their seals of office. COMPANY'S RIGHT, PRIOR TO DEFAULT, TO VOTE ON STOCKS PLEDGED.

Article Seventeenth—The Trustees at any time prior to de-fault hereunder, when requested by the said Company, shall deliver to its representatives so many shares of the stocks of any other railroad company held hereunder as may be necessary to qualify persons to serve as directors; but all proxies to vote the stock held by the Trustees shall contain a provision subtraction as the stock held by the Trustees shall contain a provision substantially as follows :

a provision substantially as follows: "This proxy shall not be used to authorize any increase of the bonded indebtedness per m le of the said railroad (here naming same), nor shall the said proxy be voted in favor of an extension or continu-ation of said railroad, or any other branch thereof, unless the bonds to be issued on such extension or continuation shall be limited per mile as hereinbefore recited, and unless it be agreed that the stocks and bonds, if any to be issued against or upon, or on account of, such extension or continuation, shall be transferred and de ivered to the said trustees, or their successors, to be held for the same purposes and the same security as the stock so to be voted upon may be held."

#### BONDS TO BE REGISTRABLE IN NEW YORK OITY.

Article Eighteenth.—The Company covenants at all times hereafter to keep in its office in New York a "Registry of Bonds", where any bondholder may register his bonds upon presenting the same. [For further provisions respecting registration of bonds, see the copy of the bond on a preceding page.]

# THE TRUSTEES TO KEEP A BOOK OF RECORD REGARDING CERTIFICATION OF BONDS.

Article Nineteenth.—The Trustees, or one of them, shall keep a record book of all bonds certified under the provi-sions of this indenture, their numbers, and a brief reference to the facts, certificates or statements of the President or Vice-President and Chief Engineer of said Company, authorizing such certification of said bonds as provided by this indenture

INTEREST PAYMENTS DURING FOUR YEARS ENDING APRIL 1, 1897.

A: ticle Twenty-This article refers merely to the right (now terminated) during the first four years to pay the interest only in so far as earned.

COMPANY TO MEET EXPENSES OF TRUSTEES IN ADMINIS-TRATION OF TRUST.

Article Twenty-first.—The Trustees may employ such assistants as they deem necessary for the administration of the trusts herein, and the Company agrees to reimburse them for the cost.

WAIVER OF ALL APPRAISEMENT, REDEMPTION, ETC., LAWS. WAIVER OF ALL APPRAISEMENT, REDEMPTION, ETC., LAWS. Article Twenty-second. -The Company irrevocably waives the benefit of all appraisement, extension or redemption laws, and of all laws requiring mortgages to be foreclosed by action therefor now existing or which may hereafter exist in any State wherein the property to be sold hereunder may be situated, and covenants that it will not in any manner seek to take advantage of such laws, any statutes to the contrary notwithstaning the contrary notwithstaning.

#### RIGHT TO HAVE PROPERTY SOLD AS AN ENTIRETY OR IN PARCELS.

Article Twenty-third —The Company expressly waives all right to have the assets marshalled upon any foreclosure, and agrees that the Trustees herein shall have the right to sell the entire property as a whole or in parts, as they may think fit. A majority in interest of the holders of said bonds may, in writing, direct the Trustees to sell the prop-erty either as an entirety or in parts.

#### TREATMENT OF COLLATERAL SECURITIES.

Article Twenty fourth. - In case of default to pay the col-lateral bonds or the interest thereon, the Trustees shall have lateral bonds or the interest thereon, the Trustees shall have the power to take all the needful proceedings to foreclose said mortgages and enforce the covenant thereof upon re-quest of the Company or of majority in interest or amount of holders of bonds certified hereunder. But until default is made in the payment of the bonds secured hereby, or the interest on the same, the Company shall have the power and right to collect all interest and dividends on the collateral teacher and here stocks and bonds.

#### FINANCIAL AGENCY IN NEW YORK CITY.

Article Twenty-fifth. — The Company will maintain a finan-cial agency in the city of New York, and if the Company fails to maintain such agency, then the coupons and bonds issued hereunder shall be payable at the office of the STATE TRUST COMPANY in New York.

# The Commercial Times.

COMMER IAL EPITOME. FRIDAY NIGHT, May 28, 1897.

Now that the proposed new tariff bill has been taken up in open debate in the Senate the progress of the measure is being closely followed. Trade has continued slow, but the general outlook for business has been considered more encouraging, developments thus far in the Senate leading merchants to believe that there will be less delay in the tariff legislation than has been latterly thought probable. Weather conditions have been against trade, as the season has continued backward, the temperature being too cool to permit of extensive operations in summer goods. The European political situa-tion has not attracted especial attention, satisfactory progress being reported on the peace negotiations in the Far East.

The volume of business transacted in the market for lard on the spot has been small. Local refiners have been indifferent buyers and the export demand has been flat. There has been some pressure to sell and prices have further de-clined, closing dull at 3 85c. for prime Western, 3 55c. for prime city and 4 10c. for refined for the Continent. There has been city and 4:10c. for refined for the Continent. There has been no trading in the local market for lard futures and at the West business has been quiet. Packers, however, have offered supplies freely prompted by heavy receipts of swine, and prices have declined, closing dull.

#### DAILY CLOSING PRICES OF LARD FUTURES.

Coffee of Brazil growth has had only a limited call, and as Coffee of Brazil growth has had only a limited call, and as the offerings have been moderately large prices have weak-ened slightly, closing at  $7\frac{5}{3}c$ . for Rio No. 7. The mild grades have had only a limited call, but prices have not changed, closing steady at 14c. for good Cucuta and 25c. for standard Java. Speculation in the market for contracts has been quiet, and as neither buyers nor sellers have been ag-gressive the change in prices has been unimportant. The close was steadier on reports that an amendment has been introduced into the Senate placing an import duty of 2c. per bound on coffee. pound on coffee.

The following were the final asking prices :

JuneJuly	7.250.	Sept	7.300.	Dec	7.350.
Aug	7.300.	Nov.	7.350.	Feb.	7.400.

Raw sugars have had a fair sale at steady prices, closing at 3½c. for centrifugal, 96-deg. test, and 2% c. for muscovado, 89-deg. test. Refined sugars have been in more active de-mand and steady, closing at 4½c. for granulated. Teas have been quiet but steady. Kentucky tobacco has continued to meet with a slow sale, but values have held steady. Sales 125 hbds. Sand heaf to

Kentucky tobacco has continued to meet with a slow sale, but values have held steady. Sales 125 hhds. Seed leaf to-bacco has been quiet but steady. Sales for the week were 650 cases, as follows: 100 cases 1895 crop, New England Hav-ana, 16@22½c.; 50 cases 1895 crop, New England seed, 13@ 17c.; 100 cases 1893 crop, Wisconsin Havana, 9¼c.; 100 cases 1895 crop, Wisconsin Havana, 5½c.; 200 cases 1894 crop, Zim-mers, p. t., and 100 cases 1895 crop, Zimmers, 15@16c.; also 700 bales Havana at 85c. to \$1 15 in bond and 150 bales Sumatra at 90 to \$2 25 in bond. Ibe demand for Straits tin has continued fairly active

The demand for Straits tin has continued fairly active and prices have further advanced, closing firm at 13.60@13.70c. and prices have further advanced, closing firm at 13 000/13 70c. Ingot copper has had a moderate sale and prices have been unchanged at 11@11/4c. for Lake. Lead has had only a limited call but values have held steady, closing at 3.25@3.30c. for domestic. Spelter has advanced and the close was firm at 4.20@4.25c. for domestic. Pig iron has been dull at \$9.25@ \$12.00 for domestic.

Refined petroleum has been lowered, closing at 6'15c. in bbls, 3 65c. in bulk and 6'60c. in cases; naphtha quiet at 5'50c. Crude certificates have been neglected; credit balances have been lowered to 87c. Spirits turpentine has had a slow sale and prices have declined to 27@2714c. Rosins have been in fair request and firmer. Wool has been quiet and barely steady. Hops have been in slow demand and weak.

FRIDAY NIGHT, May 28, 1897. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 16,152 bales, against 20,632 bales last week and 32,067 bales the previous week, making the total receipts since the 1st of Sept., 1896, 6,628,167 bales, against 5,127,619 bales for the same period of 1895-6, showing an increase since Sep.1, 1896, of 1,500,548 bales.

Speculation in cotton for future delivery has continued quiet. The fluctuations in prices have been within a narrow range and the net change in values for the week is unimportant. Crop advices from the South have been the principal factor in the market. As a rule they have been of an encouraging nature, although during the latter part of the week advices of cooler weather stimulated buying by a few week advices of cooler weather stimulated buying by a few shorts to cover contracts. Saturday foreign advices were better than expected and prices strengthened slightly, closing at an advance of 1 to 3 points. Monday the market opened at a decline under moderate offerings prompted by favorable prospecs at the South for the crop and dull and easier foreign advices. Toward the close rumors, which have not been confirmed, that a large export business for future shipments had been traces-acted stimulated buying by shorts to cover contracts, and part of the early loss was recovered, closing unchapped to 4 part of the early loss was recovered, closing unchanged to 4 points lower for the day. Tuesday the market was firmer during early 'Change, reflecting unexpected stronger foreign advices. Subsequently, however, prices reacted slightly un-der moderate offerings, induced by the favorable weekly re-port of the Government's Weather Bureau on the condition of port of the Government's weather bureau on the contains of the crop. Wednesday foreign advices were dull and easier, but advices from the South reported weather conditions slightly less favorable and prices held about steady. Thurs-day there was a quiet and irregular market. The near-by anguly less havorable and prices held about steady. Thurs-day there was a quiet and irregular market. The near-by deliveries eased off a trifle, while the next crop futures were slightly higher on further reports of cool weather. The close showed prices 2 to 4 points lower to unchanged to 2 points higher for the day. To day the market was quiet and easier. The opening was at a decline of 1 to 3 points and prices fur-ther weakened 2 to 5 points during the day in propose to The opening was at a decline of 1 to 3 points and prices fur-ther weakened 2 to 5 points during the day, in response to dull and easier foreign advices. The close was quiet at a decline of 2 to 4 points for the day. Advices were received from Southwestern Texas stating that cool weather and insects had done some damage to the crop, but they had little or no influence upon the market. Cotton on the spot had only a limited sale. Monday prices declined 1-16c., but Tuesday the loss was recovered. To day the market was un-changed and steady, middling uplands closing at 734c. The total sales for forward delivery for the week are 550,400 bales. For immediate delivery the total sales foot up this week 14,774 bales, including 5,888 for export, 5,386 for consumption, — for speculation and 3,500 on contract. The following are the official quotations for each day of the past week—May 22 to May 28. On the basis of the rates on and off middling as established

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly novement from the plantations of that part of the crop which finally reaches the market through the outports.

Week		Receipt	s at the	Ports.	St'k at.	Interior	Towns.	Rec'pts from Plant'ns.			
Endin	0-	1897.	1896.	1895.	1897.	1896.	1895.	1897.	1896.	1895.

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1, 1896, are 6,608,864 bales; in 1895-96 were 5,242,356 bales; in 1894-95 were 7,825,695 bales.

2.—That although the receipts at the outports the past week were 16,152 bales, the actual movement from plantations was only 4,461 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 2,310 bales and for 1895 they were 15.789 bales.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1. We give below a statement showing the overland movement We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending May 28 or define Sent 1 in the last two years are as follows and since Sept. 1 in the last two years are as follows.

It will be seen by the above that there has come into sight during the week 29,642 bales, against 33,700 bales for the same week of 1896, and that the increase in amount in sight to-night as compared with last year is 1,432,976 bales.

WEATHER REPORTS BY TELEGRAPH.-Reports to us by telegraph this evening denote that dry weather has prevailed in a large part of the cotton belt the past week and that at some points rain is needed. Along the Atlantic the crop has been benefited in a number of sections by the rains which have fallen. In Texas coton is promising, and while pests are reported in some localities the damage has been unimportant as yet. Alabama advices indicate that cotton is doing better. Our Helena correspondent states that the crop is doing much better on recently submerged land than on uplands. The Mississippi River is steadily falling. Cold nights are complained of in some districts.

Galveston, Texas .- The scattered showers, while not needed very much, were beneficial to cotton, and the crop continues promising. Some cotton pests were reported in localities, but they have not done much damage as yet. A calities, but they have not done much damage as yet. A poor stand in some places over North Texas has necessitated much replanting. Warm, sunshiny weather would be ben-eficial to cotton in many sections. We have had rain on one day the past week to the extent of four hundredths of an inch. Average thermometer 75, highest 82 and lowest 68. *Polestine. Trans.*—There has been rain on one day of the week, the precipitation being ten hundredths of an inch. The thermometer has averaged 74, the highest being 88 and the lowest 60.

the lowest 60. Huntsville, Texas.—It has been dry all the week. The thermometer has averaged 75, ranging from 59 to 91. Dallas, Texas.—We have had rain on one day during the

week, the rainfall reaching seventy-five hundredths of an inch. The thermometer has ranged from 64 to 91, averaging 78.

San Antonio, Texas.- The weather has been dry all the week, only a trace of rain. Average thermometer 77, high-est 88 and lowest 66.

Luting, Texas — There have been showers on three days of the week, the precipitation reaching forty-seven hundredths of an inch. The thermometer has averaged 76, the highest

being 90 and the lowest 63. Columbia, Texas.—We have had rain on two days of the past week, to the extent of twenty-five hundredths of an inch. The thermometer has averaged 72 and ranged from inch. 7 60 to 85.

-There has been rain on one day during the Il reaching one hundredth of an inch. The Cuero, Texas.-

Cuero, Texas.—There has been rain on one day during the week, the rainfall reaching one hundredth of an inch. The thermometer has ranged from 62 to 90, averaging 76. Brenham, Texas.—We have had rain on one day of the week, to the extent of fourteen hundredths of an inch. Average thermometer 76, highest 92 and lowest 60. Fort Worth, Texas.—Rain has fallen on one day of the week, to the extent of eighty hundredths of an inch. The thermometer has averaged 76, ranging from 63 to 90. Weatherford, Texas.—We have had rain on two days dur-ing the week, the rainfall reaching sixty-one hundredths of an inch. The thermometer has ranged from 62 to 89, aver-aging 76. aging 76.

New Orleans, Louisiana .- We have had rain on one day of the week, the rainfall being four hundredths of an inch. Average thermometer 77. Shreveport, Louisiana.—There has been rain on one day

during the week, to the extent of six hundredths of an inch. The thermometer has averaged 75, the highest being 89 and lowest 63.

during the week, to the extent of six hundredths of an inch. The thermometer has averaged 75, the highest being 89 and the lowest 63.
Columbus, Mississippi.—There has been no rain during the week. Moisture is needed. The thermometer has averaged 69, ranging from 58 to 89.
Leland, Mississippi.—There has been no rain all the week. The thermometer has ranged from 58 to 87, averaging 73\*4.
Wicksburg, Mississippi.—We have had dry weather all the week. A verage thermometer 73\*3, highest 56 and lowest 58.
Little Rock. Arkansrs.—No rain all the week. Average thermometor 73, highest 89, lowest 54.
Helena, Arkansus.—There has been no rain since the 18th of May. Crops on high lands are suffering from drought and worms. The river has fallen eighteen feet from the highest mark, but some land is not yet free of water. Cotton is better on recently overflowed lands than on uplands. The thermometer has averaged 69, ranging from 54 to 84.
Memphis, Tennessee.—With the exception of a few cool nights the weather has been favorable for farm work during the week, but moisture is badly needed. We had a shower on Sunday, the rainfall being two hundredths of an inch. The thermometer has ranged from 51 6 to 68, averaging 72.
Mashville, Tennessee.—It has rained on one day during the week, the precipitation reaching eight hundredths of an inch. Average thermometer 67, highest 85, lowest 49.
Mobile, Alabama.—The crop is making slow progress, on account of cool nights and dry weather. We have had rain on one day of the week, to the extent of twenty-six hundredths of an inch. The thermometer has averaged 74, the highest being 87 and the lowest 55.
Motogenery, Alabama.—The weather has been warm and dry during the week, there having been but a trace of rain. Gross are doing much better. The thermometer has averaged 74, ranging from 62 to 86.

Savannah, Georgia .- We have had no rain during the week. The thermometer has averaged 75, ranging from 60 to 92.

Augusta, Georgia .- The rainfall during the has week

Augusta, Georgia.—The rainfall during the week has reached ten hundredths of an inch, on one day. The ther-mometer has ranged from 54 to 90, averaging 73. *Charleston, South Curolina.*—There has been no rain dur-ing the week. The thermometer has averaged 74, the high-est being 92 and the lowest 62. *Stateburg, South Carolina.*—Crops have been much ben-efited by the rain but nights have again been too cool. We have had rain on one day of the week, the precipitation reaching forty-four hundredths of an inch. The thermom-eter has averaged 72.6, ranging from 52 to 90.

eter has averaged 72'6, ranging from 52 to 90. Greenwood, South Carolina.—It has rained on one day of the week, the precipitation reaching five hundredths of an inch. The thermometer has ranged from 58 to 82, averthe week, the precipitation reaching from 58 to 82, aver-aging 70. Wilson, North Carolina.—We have had rain on one day of the week, the rainfall being, forty-three hundredths of an inch. Average thermometer, 70; highest, 90; lowest, 51. The following statement we have also received by telegraph, showing the height of the rivers at the points named at 8 o'clock May 27, 1897, and May 28, 1896.

OUR COTTON ACREAGE REPORT .- Our cotton acreage report will probably be ready about the 9th of June. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to ensure early delivery.

CANADIAN CUSTOMS TARIFF POLICY-THE MANCHESTER COTTON GOODS MARKET .- In our editorial columns to-day, under the above caption, will be found an article by our special Manchester correspondent.

JUTE BUTTS, BAGGING, &C .- Jute bagging has been in light demand during the week under review, but prices are un-changed at  $5\frac{1}{4}$ c. for  $1\frac{3}{4}$  lbs.,  $5\frac{5}{3}$ c. for 2 lbs. and  $6\frac{1}{3}$ c. for standard grades. Car-load lots of standard brands are quoted standard grades. Car-load lots of standard brands are quoted at 5½c. for 1½ lbs., 5%c. for 2 lbs. and 6%c. for 2½ lbs. f. o. b., at New York. Jute butts have; been very quiet at 1.03c. for paper quality, 1.25c. for mixing and 1¾c. for bagging, all to arrive.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to May 27.

ROMPAY	PROBIPTS	AND	SHIPMENTS	FOR	FOTR	VEADS
BUMBAI	RECEILIS	ARD	SHIPMENIS	LOR	LOOP	IDARS.

	Shipm	ents thi	s week.	Shipm	ents since	Receipts.		
Year	Greal Brit'n.		Total.	Great Britain	Oonti- nent.	Total.	This Week.	Since Sept. 1.
'96-7 ,95-6 ,94-5 ,93-4	5,000 5,000	16,000	31,000 21,000 6,000 30,000	69,000 22,000	483,000 638,000 325,000 651,000	707,000 347,000	63,000 74,000	1,383,000 1,962,000 1,274,000 1,543,000

According to the foregoing Bombay appears to show a decrease compared with last year in the week's receipts of 13,000 bales and an *increase* in shipments of 10,000 bales, and the shipments since Sept. 1 show a decrease of 198,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of September, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

3022311	Shipme	nts for th	e week.	Shipma	Shipments since Sept. 1.				
	Great Britain.	Oonti- nent.	Total.	Great Britain.	Continent.	Total.			
Calcutta-			-	198991	1.22	312			
1896-97		2,000	2,000	6,000	53,000	59,000			
1895-96		3,000	3,000	10,000	62,000	72,000			
Madras-	a state of the second se								
1896-97				6,000	14,000	20,000

A considerable portion of the Sea Island cotton shipped to foreign ports goes via New York, and some small amounts via Boston and Baltimore. Instead of including this cotton for the week in which it leaves the Southern outports, we follow the week in which it leaves the Southern outports, we follow the same plan as in our regular table of including it when actually exported from New York, &c. The details of the shipments of Sea Island cotton for the week will be found under the head "Shipping News," on a subsequent page. Quotations May 28 at Savannah, for Floridas, common, 8c.; medium fine, 10c.; choice, 13½c. Charleston, Carolinas, medium fine, 15@17c.; fine, 18c.; fully fine, 19@20c.; extra fine, 25@33c. GOVERNMENT WEEKLY COTTON REPORT .- Mr. W. L. Moore, Chief of the Weather Bureau of the Agricultural Department, made public on Tuesday the following telegraphic reports on the crops in the Southern States for the week ending May 24:

made public on Tuesday the following telegraphic reports on the crops in the Southern States for the week ending May 24: VIRGINIA —Cotton up and being worked.
North CAROLINA.—Favorable week for work, with excess of sunshine and deficiency of precipitation, but cool nights retarding growth; stand of cotton fair, plants small but healthy.
South CAROLINA.—Favorable week for work, with excess of sunshine and deficiency of precipitation. but cool nights retarding growth; stand of cotton fair, plants small but healthy.
South CAROLINA.—Too dry and cool for rapid growth; fields clean and well cultivated; corn and cotton continue small but healthy; cotton chopping progressing rapidly.
GEORGIA.—No rain and abundant sunshine during the week were favorable for farm work, but rather detrimental to growing crops; early part of week too cool, last half more favorable; cotton and dorn improving slowly and nearly all worked.
FLORINA.—Rain needed for corn, cane, cotton, &c.; cutworns continue bad in some localities; dry weather, rather cool nights, retarding growth of cotton.
ALBMA.—Week dry, but very favorable for cotton and corn, which are much improved; cutworms not so numerous; cotton chopping nearing completion.
MISSISSIPI.—Cotton and corn improving, although lice, worms and cool nights have injured the stand in some places and some land has been replanted; planting on lowlands progresses as water recedes.
LOUNAIA.—Week favorable for field work and chopping cotton; the prevailing cool nights retarded growth of all vegetation; cotton forming squares and bolls, some lice reported from southern portion forming squares and bolls, some lice reported from southern portion forming squares and bolls, some lice reported from southern portion, crop clean, except in scattered localities where too much rain for proper enditivation.
MKANA.—Week dry cover suble for and the graviton detrimental to growing crops ilght rains friday in east and middle s

The Department summarizes these reports as follows:

Cotton has experienced general improvement in Texas and has made rapid advancement over the southern part of the State, where squares and bolls are forming. Decided improvement is also reporte from Alabama, with favorable reports from Arkansas and Georgia. Cool nichts have proved injurious in Tennessee, and but slight improve-ment is reported from Louisiana, where the plant is sickly and is being injured by lice. While cool nights have unfavorably affacted the crop in Mississippi it shows improvement. In the Carolinas the plant is small but healthy.

STATE WEEKLY COTTON REPORTS.-We give below summaries of the reports for the week ending May 24 issued by the various States, under the auspices of the Weather Bureau of the United States Department of Agriculture, so far as they apply to cotton.

apply to cotton. VIRGINIA — The warm and showery weather which prevailed during the greater portion of the week has done much to counteract the un-tavorable effects of the previous cool and dry weather. A larger acceage than usual has been put to cotton in the counties where this-staple is grown, and the product is up and being worked. NORTH CAROLINA.—*Eastern District.*—The past week was sunny and warm during the day, but the nights were quite cool, and, excepting scattered showers one or two days, the weather was quite dry. Crops of all kinds have made some improvement and are clear of grass. Cotton ohopping is progressing; cotton small but fair stand; too cool for cot-ton, which does not look as well as it might. *Central District.*—The reports from this district are generally favorable. Cotton and eorn continue to grow slowly, but though backward are looking healthy. Cotton chopping going or; growth very irregular; some replanting still necessary. *Western District.*—The week has been generally favor-able, although the nights were too cool. Crops made considerable progress the latter hall of the week, though all growth has been more or less checked by cool nights. Cotton has good stand, being chopped out; growth backward. BOUTH CAROLINA.—Cotton has improved somewhat, and no com-

out; growth backward. BOUTH CAROLINA.—Cotton has improved somewhat, and no com-plaints are received of poor stands, except from Abbaville, Green-wood, Edgefield, Barnwell and Saluda, where on certain lands the plant is dying. The plants, while small, are healthy, and although somewhat irregular as to size, stands are otherwise nearly perfect, and require very little "patching" by replanting, over the State generally. "Chopping out" is progressing rapidly and is nearing completion in the more easterly counties, while in the northwestern counties is only well begun, as cotton is not all up yet. The plant is in a satisfactory condition and in excellent shape to respond to more favorable weather for growth. Sea Island cotton made slow growth and stands in need of rain. for growth. of rain.

of rain. GEORGIA.-During the week just ended the weather has been very dry. Unseasonably low temperature at night characterized the early part of the week, and as a consequence vegetation had its growth somewhat retarded. The cool nights were especially unfavorable to cotton. More favorable temperature conditions prevailed during the last half of the week, and a steady though slow improvement in all growing crops was the result. Cotton generally is not as good as-usual; it is about two or three weeks late and much of the crop has been injured by bugs; some fields have been entirely destroyed. It has been well worked, and is now ready for and wanting good rains-and seasonable temperature. FLORIDA-Bains needed for corn, cane, cotton, &c. Cutworms con-

FLORIDA.-Rains needed for corn. cane, cotton, &c. Cutworms con-tinue bad in some localities. Rather cool nights are retarding the growth of cotton.

growth of cotton. ALABAMA.—There was an entire absence of rainfall in this section, and while the week opened with continued cool nights, the last half was warm, forcing and particularly beneficial to cotton and corn, and materially lessened damage by cutworms. Cotton has improved steadily under recent warm weather, and while stands are poor and it is about two weeks late, it is looking well and is generally clean, and many a good cotton crop has been made with a worse start; damage by worms is steadily decreasing and chopping out is being pushed to completion; there is some complaint of damage by lice in southeastern counties counties.

MISSISSIPT — The week was dry and sunshiny, with about normal temperature for the season. Cotton and corn are improving, although much injury is reported to date by cutworms, lice and cool nights, and s me replanting has been necessary. Planting continues on the lowlands as the water recedes. Rain would be beneficial to all crops.

Louisiana.-Field work progressed rapidly under the favorable weather conditions, and all crops and vegetation show a general improvement, except cotton, which has become lousy, and continues

dying out, with broken stands over areas in the northwest. Worms are also injuring the stands of cotton, and the crop is reported small and backward from nearly all sections. The cotton is nearly all chepped cut. Reports are somewhat more favorable regarding the cotton group over the northeastern and central portions of the State. Plasting on overflowed lands from which water has receded, in the northeastern parishes, is progressiog. TEXAS.-The weather during the week was generally favorable for families operations and much farm work was done. The showers at the cheese of the week were not needed very much for general farming inter-ests and will delay work to some extent. Cotton planting is completed except some late fields over the northwestern portion of the State, and a great deal of replanting has been done in localities over North Texas. Much of the crop has been chopped and worked out, but some fields are besinning to show weeds and grass, and more dry weather would enable farmers to clean out the entire crop and put it in an excellent worms are not working on cotton as much as they were at last report, but it is reported from the western portion of the State that worms are to tworking on cotton as much as they were at last report, but it is reported lice are doing some damage to the crop in places over the southern portion. Early planted cotton is not so promising over North Texas, while over the southern portion it is growing rapidly and has commenced fruiting.

late planting from lack of moisture. TENNESSEE.—The early part of the week was cool and dry, and the latter part warmer, with light showers in the eastern and middle sec-tions. These favorable conditions enabled farmers to advance rapidly the work of completing the later plantings and of cultivating the young crops of corn and cotton. The nights were too cool for the healthy growth of the young corn and cotton, besides promoting the continued depredations of the cutworms and the budworms on these erops and gardens. The first plantings of cotton developed such bad stands that much of the area was plowed up and planted over. Good rains are much needed in all parts of the State.

Missouri.—The past week averaged considerable warmer than usual except in the southeastern section, where the temperature was about normal. Up to Saturday noon the rainfall was very light in all sec-tions, and over the greater portion of the State there was none, but during Saturday afternoon and night good showers fell in many of the central and nothern counties and were of great benefit to all growing trops. The week has been very favorable for work in the fields, but in most sections crops suffered to a greater or less extent from lack of molsture.

OKLAHOMA AND INDIAN TERRITORY.—Except a few light, local showers, no rain fell, and every day was clear and pleasant. This has been by far the best growing week of the season, and crops of all kluds have made remarkable growth. Cotton, too, shows a better growth and looks better than form-rly, especially throughout the southern section. Although a good stand is rare, a great deal of replanting has been done throughout central sections, and some fields planted to cot-ton have been plowed and planted to other crops.

EXPORTS OF COTTON GOODS FROM GREAT BRITAIN. -Below we give the exports of cotton yarn, goods, &c., from Great Britain for the month of April and since October 1 in 1896-97 and 1895-96, as compiled by us from the British Board of Trade returns. It will be noticed that we have reduced the movement all to pounds.

The foregoing shows that there has been exported from the United Kingdom during the seven months 712,720,000 lbs. of manufactured cotton, against 750,348,000 lbs. last year, or a decrease of 38,628,000 lbs.

A further matter of interest is the destination of these exports, and we have therefore prepared the following statements, showing the amounts taken by the principal countries during April and since October 1 in each of the last three years:

SHIPPING NEWS .- The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 52,309 bales. So far as the Southern ports are concerned these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

## BREADSTUFFS.

FRIDAY, May 28, 1897.

0

Early in the week a fair volume of business was transacted in the trade brands of wheat flour, but at slight concession from quoted prices, and moderately large export sales of the low grades were made at steady values. Subsequently, however, owing to a weaker turn to the wheat market the de mand, both from the home trade and shippers subsided, and prices turned easier, declining 10 to 15c. per bbl. The demand for rye flour has continued quiet and prices have weakened slightly, \$2 65 now being the outside prices. Only a moderate volume of business has been transacted in corn meal but prices have been without changes and fairly steady.

There has been only a limited speculation in the market for wheat futures. Early in the week prices made fractional advances on buying by a few shorts to cover contracts, stimulated by reports from Europe of crop damage. Subsequently, however, the market turned weaker in response to easier foreign advices and favorable crop accounts from the West, accompanied by selling orders. Saturday the market was firmer, prices advancing ½@1½c. on unfavorable crop ac-counts from France. Monday prices further advanced during early 'Change on poor crop accounts from abroad. Toward the close, however, there was seling for West-ern account and the improvement was lost. Tuesday the market was easier, in response to weaker foreign advices and under selling for foreign account, closing at a de-cline of ¾@54c. for the day. Wednesday there was a further break of ¾@4c. in prices under general selling, induced by weaker foreign advices and favorable crop advices from the West. The market was slightly stronger during early 'Change, owing to small receipts in the Northwest. Later in the day, however, favorable crop accounts and dull and easier foreign advices caused a reaction and the close showed prices ¼@½c. lower for the day. To-day the market was weaker in response to foreign advices and on crop news. Toward the close, however, there developed a demand from shorts to cover contracts and prices rallied, closing steady. In the spot market a fair business has been transacted, but at lower prices. To-day the market was moderately active but at slightly lower prices. No. 1 hard Duluth was quoted at foreign advices and favorable crop accounts from the West,

801%c. f.o.b. afloat; No. 1 Northern Duluth at 791%c. f.o.b. afloat; No. 1 Northern New York at 783%c. f.o.b. afloat and No. 2 hard winter at 761%c. f.o.b. afloat.

The market for oats for future delivery has been dull and The market for oats for future delivery has been dull and prices have declined in sympathy with the weakness of other grains and under a large movement of the crop at the West. In the spot market shippers have been fairly active buyers, but prices have declined with futures. The sales for the week amounted to 750,000 bushels. To day the market was fairly active and steady. The sales included No. 2 mixed at 21½ c. in elevator and No. 2 white at 25½ c. in elevator.

Rye and barley have had only a limited sale and prices have been easy

#### THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., May 28, 1857.

The market during the past week has been of a monotonous character. The day-to-day attendance ruled moderate and spot business pronouncedly quiet, whilst neither from sales men on the road nor from customers direct were there order. of importance received. Reports from various markets indi cate a very quiet general condition in both the retail and job bing trades, a condition ascribed in some measure to the ab sence of the warm weather, which is much needed to s'imu late the distribution of seasonable and summer merchandise The inactivity in the primary markets of staple cotton goods is severely testing the firmness of sellers, but so far they have stood it fairly well. There are unquestionably considerable stocks on hand in the aggregate, but prices are on such a low level that in most instances the preference is to carry them rather than make further concessions, the more so as there appears to be some prospect of important mills resorting to a curtailment of production in the near future. The woolen goods division has been inactive in both men's-wear fabric and dress goods at previous prices.

WOOLEN GOODS.—The effect of the strike in the local tailoring trades has been quite evident in the arrest of repeat orders from local purchasers and in the suspension in some instances of the delivery to them of merchandise already purchased. There has not been anything in the way of better business from cutside markets to make amends for this, and a very quiet week in men's-wear woolen and worsted fabrics, in both staple and fancy lines, has resulted. This has not had any influence over prices, which are well maintained, but the market does not present any hardening appearance. Overcoatings have been in slack request at previous prices, and cloakings have sold fairly without change in values. There has been no demand of any moment for satinets, cotton-warp cassimeres, etc. Sales of dress goods have been limited in volume in both plain and fancy lines. Flannels and blankets are steady but inactive; carpets firm.

DOMESTIC COTTON GOODS-The exports of cotton goods from this port for the week ending May 24 were 7,087

packages, valued at \$272,598, their destination being to the points specified in the tables below:

NEW YORK TO MAY 24.		1897.	1896.

\* From New England mill points direct.

The value of the New York exports for the year to date hasbeen \$4,384,465 in 1897 against \$4,184,039 in 1896. There has again been but a quite indifferent interest taken

There has again been but a quite indifferent interest taken in brown sheetings and drills beyond immediate requirements by home buyers, and exporters have been light purchasers also. The demand has been confined almost entirely to spot goods and has come forward at fairly steady prices. Sellersare still reserved in committing themselves to forward business, even where afforded the opportunity. The coarse, colored cottons market has shown no change of moment. The demand for denims, ticks, &c, has been on quite a moderate scale but sellers have been able to realize former prices in nearly all instances. Bleached cottons have been in light general request in all grades without change in prices. Wide sheetings slow and unchanged. Cotton flannels and blankets generally well sold but current demand slow. Kid-finished cambrics sell in small lots at previous prices. Prints of all descriptions and printed specialties have been in light request, and the demand for ginghams has been on a limited scale. Print cloths continue firm at 27-16c, for extras with email sales. Odds in quiet demand on that basis. 1897. 1896. 1885. 1894.

Slock of Print Oloiks— May 22. At Providence, 64 squares. 495,000 At Fall River, 64 squares. 803,000 At Fall River, odd Sizes 803,000	1896. May 23. 284,000 900,000 539,000	1885. May 25. 155,000 23,000 69,000	1894. May 26. 263,000 451,000 138,000
--	---	---	---

Total stock (pieces)....1,300,000 1,723,000 247,000 852,000 FOREIGN DRY GOODS. -- Cleaning up has been the feature in seasonable business, but has not been productive of marked results. The demand for fall lines of dress goods, silks, ribbons, etc., has been indifferent, but the general tone of the market continues steady.

Importations and Warehouse Withdrawals of Dry Goods. The importations and warehouse withdrawals of dry goods at this port for the week ending May 27, 1897, and since January 1, 1897, and for the corresponding periods of last
