

(Entered seconding to Act of Congress, in the year 1898, by the WILLIAM S. DANA COMPANY, in the office of the Librarian of Congress)

VOL. 67.

SATURDAY, SEPTEMBER 3, 1898.

NO. 1732.

CLEARING HOUSE RETURNS.

For the month of August the clearings make a more satisfactory exhibit than for July. Eighteen of the cities included in our statement record losses from the corresponding month of 1897, but in the aggregate for the whole country the excess reaches 15 6 per cent. Outside of New York the increase is 9'4 p. c.

The week's total for all cities shows a gain of 15.2 per cent over 1897. The increase over 1896 is 62.7 per cent and the excess over 1895 is 35.2 per cent. Outside of New York the gain compared with 1897 is 7.2 per cent, the gain over 1896 is 37.2 per cent, and the increase over 1895 reaches 18.8 p. c

.

Two Supplements accompany the present number of the CHRONICLE, both forming complete publications in themselves :

(1) The QUOTATION SUPPLEMENT of 48 pages, being the regular monthly number of that invaluable publication.

(2) The BANKERS' AND TRUST SUPPLEMENT, an entirely new work, containing 80 pages, and devoted to a report of the proceedings of the Annual Convention of the American Bankers' Association held at Denver last week.

THE FINANCIAL SITUATION.

The Czar of Russia calls for disarmament and peace. No doubt the letter containing these proposals is a wise, earnest and convincing document. It states truly and clearly the alternative of bankruptcy confronting the nations to which a rejection of its suggestions will in time bring them all. And yet very few believe that an acquiescence in the request will be the result. The reasons for disbelief are that acquiescence is on its face surrounded by such grave difficulties that the proposition seems almost quixotic; furthermore the operation of disarmament would be likely to work to the advantage of some States and to the disadvantage of others. A cycle of peace to Russia would just now appear to be especially opportune. With its boundaries on the Pacific well rounded out through the recent acquisition of a part of China, and a perfect terminus for its trans-Continental railroad having been thereby secured, time to construct that terminus and work out in connection with it, and in connection with other aims, some pressing interior problems would seem to be what was most of all needful for that country. On the other hand, to France, with its lost provinces to recover-the absorbing and paramount purpose of the whole nation for so many years-disarmament would be almost synonymous with the abandonment of that purpose and confirming Germany in her possession. And yet what a glorious vista the mere proposal of universal peace opens !

Notwithstanding the quarrelsome nature Congress has had the reputation of showing in recent years, the introduction of this country into the councils of European nations is an event that cannot fail to make for peace. We have in mind the silent and yet powerful influence, not of a union, but of an always possible union, between. Great Britain and the United States as a make-weight for the settlement of any Continental differences. A compact, offensive or defensive, established between the two governments is a very unlikely event; either party would scarcely desire a general alliance or any alliance except when an emergency arose. Strong compacts between nations are not in any degree the product of gush. The fact that the two contracting parties had the same origin would have little if Self interest would be the first any weight. motive; common aims and interests another; and common language a kind of lubricator. When, if ever, we become a party to European questions, all these influences must come into play. They would necessarily drive two nations together that are not intent on war or revenge, or on territorial expansion, and who have no long-standing quarrels with their neighbors to adjust, but are seeking civil liberty, free commerce and trade development, which require the war has ceased and we have had nearly a full

above all conditions peace for best progress. With two nations of such power against war, would not the tendency set strongly towards the maintenance of peaceful relations everywhere?

The monthly Treasury figures issued this week for August disclose several features which will attract attention. Interest is felt in them chiefly because of the evidence they afford as to the productiveness of the war revenue law, August being the second month of its operation. It seems that the total receipts were \$41,782,708, against \$19,023,615 in August No one, however, should be misled by this 1897. comparison, as it is not a fair one; indeed no conclusion can be drawn from the difference shown, for the reason that a year ago the receipts from Customs and from internal revenue were abnormally small, being so because it was the first month under the 1897 tariff law. The Customs revenue last month was considerably better than in July, the new impost of 10 cents on tea showing its influence, the total received from that department of the revenue being \$16,249,699, against \$15,169,000 in July and \$13,-467,000 in May. As to the internal revenue receipts, they were only \$24,015,935 in August, or about one million dollars less than in July, the previous month. Altogether these results are very promising. They probably indicate not far from \$13,. 000,000 as the net product in August under the war revenue bill, which would mean about 156 millions of revenue for a full twelve months added to the productiveness of the old law. Another feature of interest is the disclosure in the debt statement that only \$74,845,020 out of the 200 millions sold of the new 3 per cents had been issued on the 1st of September. We notice also that of this amount of new 3s outstanding there were \$14,035,760 at the same date held by the Government, of which \$7,662,000 were as security for Government deposits in banks and \$6,373,760 as security for bank note circulation. Dealers in United States bonds tell us that a large amount of the new 3s have been sold over the counter, to savings banks and to other banks and institutions.

The hopeful feeling which pervades business circles is well illustrated by the report of mercantile failures for the month of August compiled by Col. W. M. Grosvenor for Dun's Review. The failures are found to have been the smallest of any month of the five years during which these excellent monthly records have been kept. The liabilities of the defaulted concerns aggregate only \$6,078,655. How much better this is than the average will appear when we say the total in August last year was \$8,174,428, that in August 1896 when the silver campaign was in progress it was \$28,008,637, that in August 1895 the amount was \$10,778,399 and in August 1894 \$11,322,345. What is particularly gratifying, from our point of view, is that the improvement also extends to the comparison as to the number of failures-which has not always been the case in the past. It seems only 748 concerns failed in August 1898, against 921 in August 1897, 1,107 in 1896 and 1,025 in 1895. Commenting on the favorable nature of the returns, Colonel Grosvenor says the record is not only a most cheering one, indicative of a very unusual state of health and commercial soundness, but it reflects conditions which do not seem likely to be disturbed by adverse influences for some time. He notes, too, that it is interesting, now that

month without that hindrance to improvement, to observe how distinctly the gain in business increases, showing that, though the war cannot be said to have caused any depression while it continued, it did in fact operate to hinder many important contracts and purchases and so retard in some degree the recovery of business.

It seems as if the effect of Leiter's wheat operations were never going to be removed as an influence depressing wheat values. The price has been down for some time to 67 cents in New York and 63 cents in Chicago, or fully thirty cents a bushel below the figure prevailing at the corresponding date last year. Yet developments are all the time reported which would seem to confirm the views of those who hold that our farmers should have no difficulty in disposing of all the wheat they may have to spare-and at fair prices too. On one day of this week there were three items of news encouraging to better prices which at other times would have exerted a perceptible influence on values, but which now pass unnoticed. In the first place there was a dispatch from Washington reporting that Minister Angell had written from Constantinople saying that on account of local needs the exportation of wheat from the Province of Scutari in Albania had been forbidden. Then there was a cablegram from St. Petersburg in the daily press which read: "Owing to the failure of harvest in seven districts, even the landed gentry are asking the Government for relief. The Government is adopting measures for assistance, but the distress is becoming more acute every day." Finally, a cablegram from Vienna was published reporting the annual estimate of the world's harvests of wheat by the Minister of Agriculture of Hungary. This estimate is always looked forward to with much interest and generally accepted as furnishing a useful forecast of the probabilities. It was a significant fact, therefore, that the Hungarian Minister should be found expressing the opinion that there would probably be a shortage of 13,800,000 to 15,100,000 metrical centners. The details in the cablegram are very meagre, and some of the figures are evilently mixed, so we shall not attempt to go into that branch of the subject. The important fact is the estimate of a shortage, even if only a small one, for such a condition would necessitate further trenching on stocks, already extraordinarily low. As said, however, all these events have had no influence on wheat values, and thus the farmer is obliged to accept a price which is far below what he should be able to get under natural and normal conditions.

The Pennsylvania Railroad report of earnings for July has been issued this week and makes an unfavorable comparison with last year; but there is nothing surprising in that. Our review of the country's railroad gross earnings for July showed that a good many adverse conditions existed during that month. There was in the first place a great contraction in the grain movement. In the second place July 1898 contained five Sundays while July 1897 had only four, giving one less business day the present year. We also know that on the trunk lines the rate situation was very unsatisfactory. As far as the Pennsylvania is concerned, possibly too the competition of the new Pittsburg Bessemer & Lake Erie has encroached somewhat on the mineral traffic of the road. On the lines east of Pittsburg and Erie the Pennsylvania reports \$318,100 decrease in gross and \$110,300 decrease in net, while on the lines west of

Pittsburg there is \$193,700 increase in gross with \$63,200 decrease in net. Last year in July the Eastern lines showed \$221,800 gain in gross and \$349,100 gain in net, and the Wertern lines \$160,800 loss in gross and \$75,100 loss in net. The following is a comparison for the Eastern lines for six years.

The Board of Directors of the Northern Pacific took important action yesterday with reference to future dividends on the preferred stock. They set aside \$3,000,000 out of surplus income as a reserve to be available, as may be found necessary, until the end of 1901, toward maintaining the regular quarterly dividends on the preferred stock if at any time prior to that date current net earnings should prove insufficient for that purpose. The step is simply a prudential one. A preliminary statement of the company's income for the fiscal year ending June 30 was submitted at the meeting and actually showed a surplus of \$2,897,874 on the operations of the twelve months above the amount needed for the 4 percent dividend paid on the preferred shares. But in view of the fact that the results have been so unexpectedly favorable-that the expansion in the revenues: of the system has been so extraordinary, so far beyond the expectations of the most sanguine-it is deemed wise to provide against the contingency of a possible reaction. The Directors consider that the business prospects of the company have never been better than they are at this time, and of course if current available earnings. continue as at present, the reserve provided need not be drawn upon. If not used by 1901 the fund may then, by vote of the Directors, be returned for the general purposes of the company. In view of the large earnings which the company has been making, there has naturally been some talk of possible dividends on the common stock. The action of the Board with reference to the reserve fund shows that no dividend is likely as far as past earnings are concerned. It is reported, however, that the President stated to the board yesterday that if present prospects. are maintained, of which he thought there was every likelihood, it would be proper for the board in the course of a few months to give consideration to the question of a dividend on the common stock from current earnings.

The bank return of last Saturday showed a loss of \$7,495,950 in surplus reserve, carrying this item to \$21,343,300, or within \$519,800 of the lowest of the year. Though this result of last week's movements in money was somewhat anticipated, the character of the statement was not fully realized until Monday. Then there was a general marking up of loans by the banks, which led to some shiftof contracts, and this created an early ing demand for money at the Stock Exchange that caused the rate on call to advance to 3 per cent. Later there came a report that \$2,250,000 gold had been engaged in London for shipment to New York, and though this report was not confirmed it had some slight influence upon money, the close being at 21 per cent after loans had been made at 13 per cent. On the

[VOL. LXVII.

following day there was a lighter inquiry, due to the liquidation of important speculative accounts, and at the same time foreign exchange fell off, indicating gold imports, and consequently the tone of the money market grew easier, and loans on call were made at 13 and at 24 per cent, closing at 2. On Wednesday and Thursday the rate ranged from 2 to 24 per cent and on Friday from 24 to 3 per cent. As above indicated, money on call, representing bankers' balances, loaned at 14 and at 3 per cent during the week, averaging about 24. Banks and trust companies generally quote 21 per cent as the minnimum, though a very few have standing loans at 2 per cent; but on Friday some marked their loans up to 3. Time contracts are in better request at 3 per cent for sixty days, 31@4 per cent for ninety days to four months and 4 for five to six months on good Stock Exchange collateral. The demand for commercial paper is limited, and not many of the banks or other institutions are buying. The supply is moderate, and rates are firm at 4 per cent for sixty to ninety-day endorsed bills receivable, 4@5 per cent for prime and 5@6 per cent for good four to six months' single names.

So far as is known, comparatively few of the banks have taken advantage of the offer of the Treasury to exchange small notes for those of large denomination. The reason assigned is that the supply of large notes is light and no more than sufficient for the current requirements of the banks. There are only about \$8,000,000 of legal-tender currency certificates held by the banks of this city. It is claimed that those of the banks which have a fairly good supply of legaltenders and other notes, which they have been accumulating in anticipation of the demand from their correspondents for crop purposes, are not willing to assist other banks in meeting deficiencies by turning over their large notes, and it is therefore thought that many of the banks will have to con-The Treastinue to ship gold to the interior. ary Department is seeking to relieve the situation and the announcement is made that the October interest on the 4 per cent Government bonds will be antioipated on the 10th instant. This interest amounts to \$5,596,467. The Treasury has made the provision, customary at this season, to meet a demand for small notes for crop purposes, and has caused to be printed large amounts of these notes, which can be speedily issued in exchange for notes of larger denominations whenever these shall be surrendered. Bankers who are in a position to judge as to the probable season's requirements for crop purposes are of the opinion that not much more than \$50,000,000 will be needed to satisfy the demand. The banks at the chief distributing centres in the West are unusually well provided with money, in consequence of the wide distribution in payment for war supplies, and there fore their drafts upon Eastern deposits will doubtless be comparatively small. Banks report a good though not urgent demand from their correspondents in the West and Northwest for re-discounts, and this inquiry is expected to increase as soon as the crops move more freely. Business is reported very good all through the agricultural sections and in the principal cities. One feature of the situation this week has been the rapid increase in the net gold reserve of the Treasury. This was reported on Thursday at \$217,-904,484. The highest net gold reserve on record was \$218,818,253 on March 31 1888. The payments for transfers remained unchanged. The market was a

bonds have recently been made almost wholly in gold, and this will very readily account for the increase in the gold reserve.

The feature in the European political situation this week has been the proposal by the Emperor of Russia for a general disarmament by all the Powers. The manifesto had only a slight influence upon the financial markets, and London was chiefly affected by the loss of gold to the Continent and by the prospective movement of the metal to America. The Bank of England minimum rate of discount remains unchanged at 21 per cent. The cable reports discounts of sixty to ninety-day bank bills in London 14 per cent. The open market rate at Paris is 13@13 per cent and at Berlin and Frankfort it is 34@38 per cent. According to our special cable from London the Bank of England lost £62,124 bullion during the week, and held £35,-003,218 at the close of the week. Our correspondent further advises us that the loss was due to the export of £65,000 (of which £40,000 was to Germany and £25,000 to the United States), to shipments of £161,-000 net to the interior of Great Britain and to an import of £164,000, of which £140,000 were from Australia, £15,000 from South America and £9,000 from Portugal.

The foreign exchange market has been lower this week, influenced mainly by the dearer rates for money here and also by higher discounts in London. Selling of long sterling, in the expectation of covering later in the season at lower rates, still continues, and there have been somewhat liberal offerings of cotton and grain futures. Spot bills against these commodities are, however, scarce. The unusually small visible supply of wheat at Chicago and at other Western distributing centres indicates that the movement of the staple has been and still continues light, probably owing to the absorption of the grain for milling purposes. The new cotton is coming to market slowly and the export demand does not appear to be urgent. About the only spot commercial bills of importance now on the market are those against provisions and flour, There have and these are promptly absorbed. been further arrivals of gold in transit to Cuba this week, the amount received being \$1,165,-413, making, with the consignment of \$433,009 last week, a total of \$1,608,422. The engagement of \$1,375,000 gold in London was announced by Lazard Freres this week. The arrivals from Europe thus far on this movement have been \$2,855,573. There has been an arrival of \$2,000,000 gold at San Francisco from Australia and \$3,000,000 more is reported in transit from Sydney, N. S. W. The range for nominal rates for exchange was, until Thursday, from 4 84 to 4 841 for sixty days and 4 85 for sight. Then a reduction in the long rate by Brown Bros. & Co. made the range for sixty day from 4 834 to 4 844. The tone was easy on Monday, but, with the exception of a reduction of one quarter of a cent in the rate for cable transfers, compared with the close on Friday of last week, to 4 854@4 851, there was no change in quotations for actual business, long remaining at 4 834@ 4 833 and short at 4 85@4 854. On Tuesday the market was weak for long and short, and rates for actual business were reduced to $4.83@4.83\frac{1}{2}$ for the former and to 4 843@4 85 for the latter, while cable transfers remain unchanged. On Wednesday rates for actual business in long sterling were further reduced to 4 823 @4 834, while those for short sterling and for cable

BANKERS' CONVENTION—HOW TO ADD TO ITS ATTRACTIONS.

We publish with this issue of our journal a Bankers' and Trust Supplement of eighty pages. The work was planned with the purpose of giving to our readers in attractive shape, while the matter was fresh and newsy, the entire proceedings of the National Bankers' Convention, held this year at Denver, August 23 to 25. We assumed that business circles would be gratified to have within a few days after its meeting the addresses, speeches and transactions of that important financial body. It is an interesting fact that another year this organization will attain its twenty-fifth anniversary. Why would it not be a pleasing idea to mark the event, not by any special celebration, but by some changes in methods which would give to the annual gathering wider interest?

First of all, a point worthy of consideration is whether the mid-summer is a suitable time for hold-

ing such a convention. That period was selected while financial and banking interests were less engrossing than now, and when the convention was looked forward to as a holiday affair more than a gathering for useful work. Perhaps it may still be considered the most acceptable time. It is not, however, the portion of the year in which such an undertaking naturally fits into the habits of many of the most successful and experienced representatives of financial circles. That class take as much as they can spare of the summer season for vacation and rest and do not care to give any more of it to business and work than their own banking offices and round of duties require. The motive of the more active members of the Association undoubtedly is to have at these annual meetings as many as possible of the best thinkers, speakers, and those eminent for practical skill and attainments, that the profession contains. We do not need to say those classes are largely represented now. There is of course no room for doubt on that point. The only question suggested for consideration is, would not some season other than the most trying of the year permit the convention to draw more largely on the same classes. There certainly are a great many of the highly-gifted in banking circles who are conspicuous by their absence, a goodly number of whom might be induced to be present if the date of its being held better suited their habits.

We may sum up then the argument for a change of date by saying that the summer is no time for traveling over the country a thousand or two thousand miles in hot dusty cars for a three-days' session of a financial convention. Such a journey to and back, with the thermometer at 90 or over, may be no serious obstacle. to some; but it is to the over-worked business class, as financial men of large interests are; it is, too, for those of advanced years, most of whom need quiet instead of the buzz of revolving wheels and the strain of blowing whistles. Of course the weary traveler this year had a decided relief in prospect, a strong attraction at the end of his journey, in the beautiful and comfortable city of Denver. But who would not prefer to go even to Denver in June or October, and keep nearer home in July or August? Then, too, a summer session calls for work in hot, sultry weather by those who are to make addresses or otherwise take an active part in the session. This is by no means desirable. It is hard on the writer to be given an extra task at a time when the burdens should be lightened; it is hard on the hearer because no writer can do his best work when weary.

What we have said suggests another important particular in which there is large opportunity for improvement; indeed, the change we have proposed above would help to bring to pass this other amendment. It will be noticed that the addresses have various merits; that within moderate limits would be natural. In this case, though, the extremes are wide apart. Some are excellent, but some by no means come up to the standard of work expected to proceed from a convention of banks and bankers of the United States. We do not take exception to any of them because they advocate what we may call unsound views. Both sides of every question affecting banking interests must, we suppose, be given a hearing; but ought not an address be required to have some merit before it is inflicted on the convention, and through it on the public?

In other words, should there not be more care in selecting the individuals to perform these duties, or may not their work be read and passed upon or edited by a committee before the convention gives it a place in its records. It has been urged by a very good judge that all stated addresses should be omitted. This is perhaps the easier way of getting out of a trying situation ; but is it a way out that would add most to the interest and usefulness of these conventions? We should propose rather that there be a smaller number of addresses, and with that decrease the greatest care be taken to have that smaller number worthy of the Association. What is desired is the best thought of the practical business man. There are very few speeches made or essays written, proceeding from whatever source they may, which strike the average hearer with the force of the words of one whose views are drawn from the experience of a business life as well as from a study of books. We should for many reasons be sorry to have this feature disappear from the proceedings of these conventions.

THE CZAR'S PEACE MANIFESTO.

Nothing more surprising or more seemingly out of tune with the prevailing spirit of the day could well be imagined than the letter from the Czar of Russia to the foreign envoys at St. Petersburg. This proposition for a formal conference to devise means to stop the European policy of continually increased armaments comes not only on the heels of our own notable demonstration of the power of a navy, but it is issued at the very hour when rumors are circulating of an impending armed collision between Russia itself and Great Britain. Perhaps no time could have been selected during the past thirty-five years when such a proposition would have been received with greater astonishment. Had the document come from any other source astonishment would at once have given place to incredulity. But the nature of the Czar's proposals, and the form in which they were made public by Count Muravieff, leave no possible doubt as to the genuineness of the Russian Emperor's purpose.

The perplexity caused by this wholly unprecedented move in diplomacy has been forcibly illustrated by the reception of the proposition. In some quarters, even in England, the idea is characterized as quixotic. In others, as is natural, the project is examined with distrust, the critics not being willing to believe that the Czar's purposes are sincere. In Germany, we learn from the despatches, the Emperor is believed to endorse the plan of his neighbor sovereign, but the political and military cliques treat the matter scornfully. Mr. Balfour remarks in the British House of Commons that in his judgment no such proposition could have been made with actual hope of practical results. Yet none of these authorities appears to have explained why, if wholly quixotic, the peace plan should have been contrived by the Czar of Russia, of all men; why, if his purposes were insincere. the Czar should have chosen a medium of introducing them which would eventually bring the stigma of bad faith home to him personally before the civilized world; or why, if the proposition could not be made with expectation of serious results, an Emperor should have deliberately chosen to make himself ridiculous. These criticisms seem to us on examination to reflect very little except the bewilderment of the critics.

We think that some of this bewilderment may be removed by an examination of the letter in which Count Muravieff communicates the wishes and convictions of his Imperial master. Perhaps it will be worth while to analyze this remarkable document in detail. In saying first that "the maintenance of general peace and the possible reduction of the excessive armaments which weigh upon all nations present themselves in existing conditions to the whole world as an ideal toward which the endeavors of all governments should be directed," the Czar says nothing more than he said in his farewell address to President Faure at St. Petersburg, exactly a year ago. "Our two nations," the Emperor Nicholas then declared, "are equally resolved to contribute with all their powers to the maintenance of the peace of the world." This sentiment has in fact been the burden of the young Czar's public and diplomatic statements since his accession to the throne. Doubtless, these earlier deliverances were regarded by many of their hearers. as conventional if not hypocritical. But the Czar was not to blame for such popular interpretation, and it is quite undeniable that both his utterances and his policy have thus far been consistent.

The excessive modern armaments, the letter continues, were founded and developed in order to guarantee peace, and they have apparently failed of their purpose. Labor and capital are alike diverted from their true channels by the maintenance of these enormous standing forces. The burden on the people has become too great to be longer borne; if therefore the system is to be continued, "it will inevitably lead to the very cataclysm it is desired to avert." These are the grounds on which the Czar appeals for a conference of governments.

Let us observe, to begin with, that not one of these statements of fact can be controverted. They are the plain truth, as every European statesman knows. We touched upon some of these phases of the modern military system recently in writing on the life-work of Prince Bismarck, and showed then the certainty that sooner or later the system would, for these very reasons, work out its own ruin. The enormous modern standing army was established in Europe, as the Czar's letter truthfully declares, for a guaranty of peace. In the result it is found that the system is a Frankenstein which cannot be controlled. It cannot stand still. Each nation, in order to ensure itself against possible attack, must endeavor to be a little stronger than its neighbor; but no sooner has it enlarged its own offensive and defensivearmament than its neighbor State, for precisely the same reason, makes the same increase with something more. The very nature of the theory renders such results inevitable. But the upshot is a heaping of Ossa on Pelion which must apparently continue tothe end of time, or until the resources of the States concerned are broken down (as has happened with half the Continental States already), or until, in sheer desperation, the trial of arms between the nations is invoked so that there may at least be something to show for this unheard-of waste of public treasure in time of peace. This, we say, is the conclusion of sober logic from the existing situation. Not one reputable statesman and not one intelligent thinker will question these conclusions. Yet because the same conclusions are publicly drawn by the Russian Emperor they are regarded by the initiated politician as something out of the usual run of human reasoning.

We suppose that the Czar reached his decision for the issuance of this manifesto because he was convinced that some international understanding of the sort was necessary to avert the ruin of his own State. It is well enough known what the system of modern armaments has done for Russia. Even in favorable years the income of that Government comes nowhere near meeting expenses. In the ten years of peace preceding 1897 the Russian public debt increased one billion and a-half roubles, or more than a billion dollars. The annual charge for interest on that debt is only a trifle less than the annual expenditure for the standing army, and the two sources of expenditure together make up nearly one-half the total annual outlay of the Government. Both have increased by leaps and bounds during the past few years, and there is not the slightest reason to suppose that both will not increase still more rapidly in the next ten years of standing armaments. Meantime all the enlightened economic and fiscal schemes of M. Witte, Russia's intelligent Finance Minister, are threatened with destruction. Is it, then, so remarkable that an intelligent Prince should ask where such a process is to end? Once this question is seriously considered, there is but one answer which any man can make, and that is precisely the answer made in this week's letter of the Czar.

It may perhaps be thought 'that we have simply discussed the theoretical merits of this notable royal communication and have ignored its practical possibilities. It is, indeed, painfully obvious that recognition of the evil by no means infers general willingness to adopt the remedy. There is only one remedy; for the alternatives of general bankruptcy of governments or of mutual destruction in war can hardly be called remedial processes, and if these alternatives are accepted there remains only the so-called "quixotic" proposition of the Czar. The first and abso-lutely essential step is to stop the annual increase in these armaments; this, from the very nature of the case, can be done only by formal agreement of the Powers concerned. It will be observed that out of the rather general chorus of skepticism from European critics of the Czar's proposals there has come one note of practical common sense : the suggestion that if Russia were to abandon its plans for new war-ships, Great Britain too might revoke the order for increased naval arma ment lately submitted by Mr. Goschen.

It is not to be supposed that disarmament of the nations could at this moment be seriously considered. But it will readily be recognized that much will have been accomplished if the nations merely agree to stop with such armament as they have to-day.

We have pointed out the peculiar reasons which Russia has for dreading the future under the system now employed. It may be thought-it has been argued in some quarters-that Russia's particular needs and embarrassments gave a motive to the Czar which need not exist with other sovereigns. But as a matter of fact it can only be a question of time, of relative endurance, when every State must reach the end of its rope under the remorseless strain of the modern military system. Greece, Italy and Spain gave way before the stronger financial nations made any sign of distress; Russia's finances might possibly collapse before those of France or Germany, but the Nemesis of the system must sooner or later, unless some halt is called, overtake every State. Indeed, if the situation. Fault has been found with every on

the question narrows down, as it certainly would appear to do, to the survival of the State with the strongest exchequer, it is obvious enough that Great Britain would eventually be left alone in the field of solvent Powers. Fortunately, England less than any other State is inspired by motives of international hatred and national ambition. If the Continental Powers were to call for a pause in the development of modern armaments, the assent of England's Government is assured beforehand.

MISMANAGEMENT IN THE ARMY.

We trust sincerely that the request for an investigation, as made by some of the army officers whose departments have been accused of mismanagement or neglect, will meet with an early and adequate response. We do not express this wish through a feeling that somebody must be punished because the soldiers have suffered, and we regret that a tone of personal vindictiveness has crept into the discussion of this question in the press. Least of all ought partisan political considerations to be allowed a moment's hearing. Once it should come to be generally believed that the attack on certain branches of the War Department is a covert demonstration by one political faction or party against another, intelligent popular interest in the matter would cool off immediately. At the moment we do not believe that the very general demand for an investigation has any such inspiration. It is a spontaneous movement of indignation, to be sure, for what is believed to be a grave wrong, but it is first of all an appeal for an impartial tribunal which can establish the facts and, if need be, fix the responsibility.

The impartial investigator is confronted at the start with several undeniable facts which qualify intelligent criticism. Sickness of soldiers at the front or in camp is an inevitable incident of war; the records of our Civil War, for instance, show that deaths in the army from disease were double the combined number of deaths in battle and from wounds, and by far the largest percentage of such deaths from disease were cases of typhoid fever. It is, moreover, perfectly obvious that conditions this year, at the front at all events, were more unfavorable than in the Civil War. The army was more hastily recruited and mobilized; its operations were more rapid and exacting; the hostile country was a fever-stricken district, and was invaded at the most dangerous season of the year. Finally the difficulties in the way of landing troops and stores before Santiago, and of bringing them to the front, were vastly increased by the lack of a serviceable harbor and the absence of anything like available military roads. These facts must not be overlooked, and ought to be fully weighed in fair criticism of the misfortunes of the army.

But it seems to us that these exceptional circumstances fall very far short of explaining the present decimation of our army by disease. The Secretary of War, declaring this week that he will order no investigation of the Quartermaster-General's Department, of the Commissary-General's Department, or of the Surgeon-General's Department, adds that "there is no fault to be found with them. If there has been any lack of supplies, food, medicine or clothing in any of the camps, it has been due to the officers in command or to unavoidable circumstances." But this in our judgment is an extremely ill-advised way of meeting

of these departments and with the War Department as a whole. The complaints are specific; they are emphasized a thousand times by the shocking spectacle presented by our returning regiments. They are the burden of popular discussion at this hour throughout the Union, and we greatly doubt if popular opinion will submit to an ipse dixit of this kind, whatever its source. Moreover, even Mr. Alger admits that if such neglect has been proved, the commanders are to blame, and it appears to us, since the bad conditions are no matter of doubt, that investigation is absolutely essential to fix the responsibility, even if it rests on other shoulders than those of the Department officers. If the medical and subsistence staffs at Washington are without blame in this matter, they themselves ought to be the first to demand investigation. Surgeon-General Sternberg has already asked for such investigation, and a refusal by the Secretary would, in our judgment, be as grave an injustice to him as to the public.

Granting the fact that sickness on a considerable scale was unavoidable, there are, it seems to us, five very serious matters which demand investigation. We refer to the lack of proper food and medical supplies during the attack on Santiago; the lack of proper and healthful transportation service for our soldiers on the way to Cuba and Porto Rico; the shocking neglect of the hospital ships returning with the sick; the bad judgment shown in selecting and managing the military camps in this country; and finally, the grave blunders in the camp arranged at Montauk for the returning soldiers.

The circumstances surrounding all these incidents are painfully well-known already to the newspaperreading public. We do not need to recite them. We wish to add a few words, however, by way of showing the need of an investigation-not only in justice to the officers now under popular censure but as an absolute necessity to the future remedy of existing defects. Mr. Alger has declared, regarding the lack of supplies at Santiago, that the troops sent to that point "took with them three months' supply of everything, especially medicine and food." This statement, so far as it goes, is confirmed by Surgeon-General Sternberg and by Surgeon Munson of the medical corps at Santiago. But Surgeon Munson, who is best qualified to speak, goes on to show, in his report of July 29, that the medical supplies thus forwarded, were for the most part perfectly useless to the army in its hour of need, because the medical officers were not allowed to unload them. Until a day or two after the fight at La Guasima, when the wounded were already crowding the hospital tent, the only facility allowed to the medical department for bringing tentage, appliances and medicines to the shore at Siboney was one row-boat, the order for which was revoked after a single trip from the supply-ship. Most of these medical supplies remained inaccessible a week after the heaviest fighting in front of Santiago. These are matters of official record, not questioned by anybody; what was involved by such neglect of decent provision for the wounded our people have learned in the heartrending accounts of the hospital makeshifts at the rear of the Santiago army.

It is quite useless to argue that nobody was to blame for such a situation, the result of which was death by the score of soldiers whose lives would have been saved by proper care and provision. Mr. Alger lays much stress on the fact that lighters sent down for use in

unloading were lost at sea, and hence that facilities for landing supplies were unavoidably cut off. This may be true; but Surgeon Munson's report clearly proves that boats were to be had, and that in the end, after a fatally long delay, they were obtained. Why there were no such boats specifically available for the supply ships, and under the orders of the proper officers, is not explained at all. We are perfectly well aware that Gen. Shafter's plan of campaign involved quick attack, and that the first requisite was debarcation of the troops and of the ammunition. But to say that this part of the unloading was necessarily the first is a very different matter from excusing total neglect of provision for the wounded, even when serious fighting had begun. The essential fact remains that there was neither proper provision nor proper organization for the landing of the army. The navy sent boats to bring the soldiers on shore ; why was no arrangement made for the navy to land the stores? We have seen that a simple row-boat served the purposes of the surgeons later on. As the "Army and Navy Journal" points out, the rules of the British Admiralty not only provide explicitly that "all troops, with their baggage, regimental stores and horses, are to be shipped and to be landed by the navy;" but that "boats, lighters and tugs" for landing stores "must in part, and should if possible entirely, be provided by the navy." A naval fleet lay close at hand during this chaos at the Siboney landing place. Does anyone suppose that the medical staff would have remained cut off from its supplies if intelligent co-operation of this sort had been arranged by our War Department ?

The suffering of our soldiers in the matter of water transportation has some excuse in the difficulty of securing sufficient transport vessels on short notice. But neither this argument, nor the stock argument that army transportation cannot insure personal comfort, wholly explains or excuses the overcrowding of some of these transports to such degree that disease broke out before the troops were even landed. It is, for instance, a matter now sufficiently well known that our Porto Rico troops were in large measure unfitted in advance for a serious campaign by such provision for their transportation. These bad results might have been avoided, even with the overcrowding, had food and water supplies been competently looked after. But the water supplies on several of these ships appear to have been so crudely arranged that contamination followed as a matter of course.

The defects of this regular transport service were however so far overshadowed by the scandals of the hospital ships that not much has been heard of them. It is not only the people at large who are bewildered at the show of incompetency in the equipment of such boats as the "Seneca" and the "Concho," but the official organs of the army frankly confess that individual responsibility ought to be and can be fixed. For the lack of adequate supplies the Secretary of War blames the captain of the "Seneca," and thus washes his hands of the matter. As to the over-crowding of the vessel, the Surgeon-General declares that an army officer transferred the sick soldiers to the "Seneca," and thus declares himself free of responsibility. Even the lack of proper medical attendance on the hospital boat's long trip is similarly waved aside. The regular medical corps, Dr. Sternberg goes on to say, "is not one-quarter big

plains not only the shocking lack of medical care on the hospital ships but the utter lack of adequate medical attendance in the hospital tents at Siboney. We cannot help thinking that the average citizen will brush aside these technicalities, and ask who was responsible for committing sick soldiers to a ship of whose capacity every one was ignorant; why such disposal of soldiers seriously ill was not made subject (as Surgeon Munson testifies it was not) to proper medical authorities, and who was so blind as to leave the medical corps short-handed in a campaign whose chief danger, as all the world knew, was disease in the invading army? Readers of history will remember that precisely similar excuses were made by the Brit ish War Department for the hospital and commissary scandals of the Crimean War, and these excuses have been rejected as promptly by the judgment of the last half-century as they were by the English public of 1855.

What we have said regarding the other phases of this matter applies with equal force to the condition of the army camps in the United States and to the deplorable mismanagement at Montauk Point. It is maintained by some competent judges that such yellow fever as did exist in the Santiago army was brought from the infected camp at Tampa. Be this as it may, the fact remains that our soldiers returning from the Southern camps, where they have had to face neither Cuban malaria nor Spanish bullets, are in almost as wretched physical condition as the soldiers from Santiago. We have never been able to understand why it was necessary to station Northern soldiers in a Southern climate during mid-summer ; but the climate does not explain the typhoid epidemic, which has put a good part of our volunteer army out of service. Nor, we think, is the matter satisfactorily disposed of by the easy retort that volunteer soldiers are always careless and that typhoid in crowded communities is very common. The very recognition of such facts ought to have led to scrupulous care in the selection of camps to shelter and officers to discipline the recruited troops.

We say again, therefore, that an official and impartial investigation of these incidents of the war is a positive necessity. If our methods of army management have been wrong, we certainly ought to learn both the evil and the remedy. If incompetent officers have mismanaged matters in any grade of the service, it is due to the country that it should be informed who were the culprits and how they obtained their offices. If appointments for political favor have done this mischief, it is of the highest importance that the evil should be exposed; for politics in an army, as France proved twentyeight years ago, leads in the end to demoralization and ruin. If, on the other hand, all these incidents were inseparable from a war such as has just been concluded, then, we should say, President McKinley owes it to his subordinates in the War Department to allow the facts to be brought forth in such manner as will convince and satisfy the American public.

A NEW OFFICIAL COMMERCIAL INTELLI-GENSE DEPARTMENT IN ENGLAND*. MANCHESTER, August 24th.

It is a significant indication of the growth of European official interest in the promotion of foreign trade that the governments of Germany, France and Great Britain have recently taken steps tending to increase

*Communicated by our Special Correspondent at Manchester.

and make more efficient the assistance which they severally render to the mercantile and industrial interests of their respective countries in connection with markets and commercial opportunities abroad. In Germany, the constitution and functions of Chambers of Commerce, which there as well as in France are semi-official bodies-partly supported by the Statehave recently been revised with this object in view. In France a new "Commercial Intelligence Bureau" has been established, and in England the report and recommendations of a Special Departmental Committee have just been published proposing some important changes in the official methods of collecting information in foreign countries and the British Colonies, and of disseminating it amongst the commercial and industrial community at home.

The Committee, appointed on July 26th, 1897, was composed of five representatives of the Foreign and Colonial Offices and the Board of Trade, and five nonofficial members, viz., the President of the Association of Chambers of Commerce, the President of the Imperial Institute, the Presidents of the Manchester and London Chambers of Commerce, and Sir James Mackay, who has had extensive business experience in India. Seventeen witnesses, including two from the Manchester Chamber, were examined, and the Committee was supplied with answers to a number of interrogatories which it had addressed to Chambers of Commerce throughout the kingdom.

The report of the Committee premises that the topics upon which it was specifically requested to advise were (1) the collection and prompt dissemination, amongst those interested, of accurate information upon commercial subjects, and (2) the official collection of samples, especially of goods of foreign manufacture competing with British productions, and the exhibition of such samples to manufactures and traders in the United Kingdom. In dealing with the first of these points the report sets forth, at the outset, the already existing methods of supplying commercial intelligence by the publications of the Foreign, Colonial and India offices and the Board of Trade. These include, of course, the Consular Reports, which were much criticised in the evidence-favorably and unfavorably-and the Committee admits that they might be improved. So far as their matter is concerned the only material suggestion offered is that Chambers of Commerce should from time to time indicate to the Foreign Office specific subjects for special investigation by Consular officers. Some such plan has for some time past prevailed in the United States. Every regular reader of American Consular Reports can testify to the frequency with which special investigations are made under instructions from the Department of Foreign Commerce at the instance of commercial bodies and even of individual firms. - Often, indeed, the results of such inquiries are of great interest and of practical value.

The report further recommends that in the British colonies where there is no representation analogous to that of Consuls in foreign countries, agencies for obtaining commercial intelligence should be established. In the Crown colonies these should be selected from Collectors of Customs or officers holding similar positions, and in the self-governing colonies it is suggested that the various administrations might be willing to appoint suitable men. Means of increasing the efficiency of the Consulates, as commercial reporters, are recommended. The addition of clerical or expert assistance in some cases is proposed. More important still, regarded as a new departure, is the proposal to dispatch, from time to time, properly qualified commissioners to particular countries to investigate and report upon the progress and condition of trade. "Thus, at intervals of say three years, a commercial expert would visit British North America, the Australian and the South African colonies, with a view to collecting and noting such developments as have taken place since the last visit." Similarly special agents are to be dispatched to foreign countries as occasion may require. One such agent is, indeed, already at work in the Argentine Republic, Southern Brazil and Chili. He left England about six months ago, and the results of his mission will doubtless afford guidance to the Government in following up this proposal of the Committee.

To one suggestion put forward in the evidence the Committee is entirely opposed. It was denied that British Consuls should furnish information as to the financial standing of business houses in their districts, that they should assist in the recovery of debts, and even that they should act as agents for advertising or selling British goods. The report observes that to undertake duties of this kind would be to expose Consular officers to responsibilities which they ought not to bear, and that their assumption would prove a fruitful source of jealousy between rival traders. It may be noted here, however, that to a very limited extent British Consuls do sometimes render services of this kind, but these are variously limited by the interpretation which each Consul is disposed to put upon the general instructions framed by the Foreign Office for his guidance.

But the most prominent innovation recommended by the Committee is the founding in London of a new official department under the control of the Board of Trade, to be called the "Commercial Intelligence Office." Its function is broadly described as that of meeting "the constantly increasing demand for prompt and accurate information on commercial matters, so far as it can be met by Government action." The opinion is expressed that "it is more than essential in these days that our manufacturers and traders should rely mainly on their own efforts to extend the area of their transactions and the amount of their business. The State may, however, usefully afford assistance in the interests of the trading community, as a whole, and may supply information from a broader point of view than that of the individual trader." The new department is not to take out of the hands of the Board of Trade, the Foreign Office, the Colonial Office or other administrative departments any of the duties with which they are now charged, except such as may from time to time be specifically indicated by Her Majesty's Government. Its chief work will be (1) to receive from these departments, and from other sourcespublic and private-all intelligence bearing upon the subjects committed to its care, and to digest, prepare and distribute such intelligence in ways most likely to be useful to persons engaged in commerce and industry; (2) to reply to all inquiries coming within the scope of its functions, orally as well as in writing, and (3) to direct applicants for special information, not at hand, to the proper sources from which it may be best obtained. One recommendation, quite original so far as British practice is concerned, evidently follows the German method of utilizing official commercial intel-

ligence. The Committee is to have power to withhold from general circulation such information as may appear to it more suitable for communication to Chambers of Commerce and other associations.

The composition of the new department, or rather of its controlling body, presents a feature which, though not quite without precedent, is novel in a permanently constituted British organism. It is to be a committee made up of one representative from each of the four chief Governmental departments concerned with foreign or colonial affairs, and six representatives of commerce and industry chosen, each for a definite period, by the President of the Board of Trade. The Chairman is to be the representative of that department, and the Secretary one of its permanent staff. The constitution of the Committee follows approximately that of the "Trade and Treaties Committee," which sat from 1890 to 1893 to consider guestions arising out of the European commercial treaties expiring at the beginning of 1892. Four or five years ago the establishment, in permanence, of some such joint official and non-official body, for commercial purposes, was earnestly pressed upon the attention of the Government by the Manchester Chamber of Commerce. The project has now received the approval of the Committee, though in a somewhat different form. The concluding portion of the report recommends the maintenance in London of a commercial museum, the contents of which should be circulated for inspection in the chief manufacturing and mercantile districts. The museum is to be formed on very much the same lines as the museums of Brussels, Vienna and Philadelphia.

It should be stated that although all the members of the Committee sign the report, two notes are appended, expressing a certain reserve on the part of two of them. Sir James Mackay doubts the utility of the proposed new department, pointing out that British industry and trade have attained their present vast importance entirely through private initiative and private effort, and he thinks that private enterprise may be trusted, with a minimum of Government assistance, to maintain and enlarge them. Mr. W. H. Holland, late President of the Manchester Chamber of Commerce, says: "It is a sound principle that governments should not be expected to do for the trader what he is able to do for himself." He supports, however, the proposal to set up a Commercial Intelligence Office as an experiment. He also thinks that "Brivish commerce should look for its expansion chiefly to individual energy and capacity."

ANTHRACITE COAL RATES AND THE ONTARIO & WESTERN.

We have on previous occasions directed attention to the growth which has occurred since 1890 in the revenues of the New York Ontario & Western and the great improvement in the position of the securityholders which has followed as the result. Analysis of past reports has shown that this improvement was due principally to the anthracite coal traffic developed with the building of the Scranton Division, but that at the same time the management have carefully looked after the other classes of business—building up the milk traffic, fostering the passenger traffic, and in various other ways seeking to add to the permanent e arning capacity of the property.

The annual report of the company for the fiscal year ending June 30 1898 is now in the press, and we have been favored with early proof-sheets of the same. In this period of twelve months there was no further expansion, gross and net being substantially the same as for the twelve months preceding ; but in being able to make such a record as this the company must be considered to have done remarkably well; for the conditions were not favorable to improved results. In the first place, industrial revival, from which much had been expected, was checked by the "Maine" disaster and the subsequent outbreak of the war with Spain: while the anthracite coal trade, from which the road derives its largest source of traffic, remained throughout the whole period. as is well known, in an exceedingly unsatisfactory state. Despite it all the net earnings fell but a trifle below the total for 1896-7, which was the best ever reached: in other words the road earned net of \$1,112,992, against \$1,113,906. And as reflecting the favorable character of its income exhibits, we may note that with net of \$1,112,992, the fixed charges amounted to only \$710,532, leaving a surplus balance of over four hundred thousand dollars-\$402,460. It should be borne in mind that the Ontario & Western is relatively a small road. There are systems several times its size whose surplus is no larger than this.

President Thomas P. Fowler in the present report enters into an extended discussion of the conditions prevailing in the anthracite coal trade; and this part of his remarks is of general interest in view of the fact that the topic is one of much concern to the whole anthracite carrying industry. After noting that extreme depression has prevailed, and citing the views pro and con as to whether an early improvement can be expected, he points out that the usual panacea has already been suggested, namely a reduction of the freight rate. The claim is made, he says, that it is manifestly unfair to charge higher rates for transporting anthracite coal to market than is charged for hauling bituminous coal. He demonstrates very clearly and very conclusively that this notion has nothing to support it.

In the first place he states, what will we are sure be a surprise to many, that the gross earnings from this branch of the Ontario & Western's traffic have averaged under seven mills per ton per mile from the time the Scranton Division was opened up to the present date. Furthermore, he says, it must be borne in mind that all coal traffic is one-way business—that is, the coal trains earn nothing whatever when returning from the markets to the mines. Then he clinches the argament by saying that were the rates paid for hauling bituminous coal applied to anthracite, the Ontario & Western would be one of those which would be obliged to retire from this branch of business, as it could not profitably haul coal to tide water or other points at a rate of three mills per ton per mile.

Mr. Fowler proves, too, that there is no reason why the rate for hauling anthracite coal should be as low as the rate on bituminous coal or lower than the present anthracite rates. The train loads are necessarily much lighter than those of the bituminous carrying railways, as all anthracite producing mines in this section of the country are located in the deep valleys of the State of Pennsylvania, and various summits and heavy gradients are encountered in moving the product of the mines to markets. The actual transportation cost is therefore heavier than it is on many of the low-grade bituminous roads, over some of which fifty-car trains may be hauled.

Another difference is that in the anthracite trade there are known nearly a dozen varieties or sizes of coal while there is no sizing or grading of bituminous. Soft coal is generally dealt in, unassorted and unclassified, and trains do not need to be broken up or divided so as to get a particular size, nor need there be any storing or side-tracking, the coal being generally delivered at regular intervals under contracts for large quantities. There is consequently much less switching and shunting, and cars are unloaded and returned much more promptly. On the other hand each of the different sizes of anthracite must be taken from chutes when the breaker is running and loaded into and carried in separate cars and side-tracked or stored until wanted. At different seasons of the year certain sizes are in demand, while other sizes may have no market whatever. Those sizes not required are dumped into storage places and thus remain until it is possible to dispose of them; or such sizes are carried in cars which are side-tracked sometimes for months at a time. Thus the anthracite carriers are in the position of having to render services not only as common carrier but also as warehouseman, factor and sometimes as financial agent.

Mr. Fowler also avers that rates in the case of bituminous coal are usually on the basis of a 2,000-pound ton, while those in the case of anthracite coal are on the basis of a ton of 2,240 pounds. Adverting to the claim frequently made that the operations of the Ontario & Western in this particular field furnish evidence that the anthracite coal traffic is unduly profitable, Mr. Fowler notes that the construction of the Scranton Division involved the building of only 54 miles of line. The Ontario & Western previously had had, for many years, 325 miles of main line admirably located for reaching the anthracite markets via the Lakes and tide-water, as well as at other interior rail and water points. As an entirely new operation, he says, from the coal fields to the markets, it could have offered no inducement to either the capitalist or experienced railway promoter, and in fact could not as such have been built.

We have in the foregoing given only an outline of Mr. Fowler's arguments and reasoning. His entire remarks must be read to appreciate what a strong case he makes out for the existing tariff charges of the anthracite roads.

GROSS EARNINGS FOR HALF-YEAR.

The improvement in the gross earnings of United States railroads during the first six months of the current calendar year was so marked that it seems desirable to know approximately the aggregate extent of that improvement as expressed in dollars. In other words, how much the roads added to their revenues in this period of time. In that way we get a better idea of the change which has occurred in the condition of this important industry.

We published a very comprehensive statement last week which showed a gain in gross earnings over the corresponding six months of last year of somewhat over 51 million dollars. This is a large amount, but it does not represent the full extent of the expansion which occurred. The statement referred to, while very elaborate and extensive, included only the roads which had made reports of *both* gross and net. Of course it is impossible to procure returns from every 460

road in the country. But there are quite a few which, while not reporting net, give out statements of the gross. Hence if we undertake to compile figures of the gross alone we can enlarge upon our statement of last week. Starting with the totals reported in that statement, we have in the following table added 46 other roads for which we have the comparisons as to the gross though not as to the net.

Miles of roads	164,161	163,095	1,066					
* For fire months			10 million					

* For five months.

Altogether, therefore, we have the results as to 232 separate roads, operating 164,161 miles of line. In this way, it will be seen, the increase is raised to over 61 million dollars, the 232 roads having earned 567 million dollars in the first six months of 1898, against only 506 million dollars in the first six months of 1897. In addition, however, there are, as already stated, a number of other roads from which it is not possible to secure returns. These, if they could be included, would still further swell the amount of increase. In the preliminary compilations published in our issue of July 16, we estimated the probable improvement in gross earnings on the railroad system of the United States as a whole for the six months at 65 million dollars. We are now inclined to raise this estimate, and say that the improvement was probably in the vicinity of 70 million dollars. We shall not attempt to dilate upon the meaning and significance of this expansion of 70 million dollars in the gross revenues of our railroad transportation lines in a period of six months. We wish simply to record the fact itself. In the following we furnish a list of the roads distinguished for large amounts of gain. The statement is the same as that published last week, with the addition of such roads as belong in the table now that the basis of the compilation has been extended. ,609 ,480 ,681 ,829 ,428 ,007

IMPORTS AND EXPORTS OF GOLD AND SILVER AT SAN FRANCISCO.

SILVER AT SAN FRANCISCO. The Collector of Customs at San Francisco has furnished us this week the details of imports and exports of gold and silver through that port for the month of July, and we give them below, together with the figures for the preceding months, thus completing the results for the seven months of the calendar year 1898. The imports of gold have been quite large, the amount received reaching \$2,039,735, of which \$1,903,628 was in coin. Of silver there came in \$852,315, of which \$70,730 was bullion. There has been received during the seven months a total of \$16,202,746 gold and \$881,394 silver, which compares with \$517,544 gold and \$1,200,470 silver in 1897. The shipments of gold during July were \$168,470 coin and the exports of silver have been \$612,980 coin and \$166,000 bullion. For the seven months the exports of gold have been \$384,483, against \$287,096 in 1897, and \$3,313,200 silver has been sent out, against \$50,53,223 in 1897. The exhibit for July and the seven months is as follows : IMPORTS OF GOLD AND SILVER AT SAN FRANCISCO.

Clearings by Telegraph. -Sales of Stocks, Bonds, &c.-Transactions of the Stock Exchange Clearing House. -The subjoined table, covering clearings for the current week, usually appears on the first page of the CHRONICLE, but on account of the length of the other tables is crowded out once a month. The figures are received by te egraph from the leading cities. It will be observed that as compared with the corresponding week of 1897 there is an increase in the aggregate of 8°1 per cent. So far as the individual cities are concerned, New York exhibits an increase of 14°1 per cent, and the gains at other points are : Boston 4°4 per cent, and New Orleans 1°1 per cent. Philadelphia records a loss of 2°1

per cent, Chicago 6'3 per cent, Baltimore 16'3 per cent and St. Louis 19'9 per cent.

Monetarn Commercial English News

[From our own correspondent.]

LONDON, Saturday, Aug. 20, 1898. The acceptance of the preliminaries of peace by Spain has naturally been followed by a 'great rise in American securities. But the general public is not buying very much and probably will not invest upon a considerable scale until political apprehension dies away. We are now in the very slackest time of the whole year. The heat for this country is very great and everybody who can get out of the city has either gone or is going.

Besides that the uneasiness respecting China continues. Nobody who is competent enough to form a good opinion believes that there is any serious danger of a war between this country and Russia. In the first place we have no wish to burden ourselves with the Government of China. And we all fear that if war were to break out the Chinese Government would collapse and that the Powers, or some of them, would have to take the Government of China into their own hands. Lord Salisbury and his colleagues have therefore been all along opposed to any policy on the part of the Continental Powers that might destroy the dynasty, and the Continental Powers themselves must see that it is for the present at all events desirable to keep China together. On the part of Russia it is perfectly evident that she is not prepared for war. Just now she could not convey troops enough to the Chinese frontier. While the Crimean War was going on the moving of reenforcements from the interior of Russia to Sebastapol caused greater mortality in the Russian Army by far than the bullets of the British and the French and exposure to the climate in the trenches and on the field. But if that was the result of marches in Russia itself what would be the consequence of attempting to move a very large Russian force to the Pacific? And even when the Siberian Railway is completed the difficulty of conveying a large army and keeping it reenforced and fully supplied with provisions and munitions of war will be so great that upless the Russian Government is mad it will not provoke war with a first-class Power.

Nobody then seriously believes that war is likely, but the Russian Government is undoubtedly trying to consolidate its power in Manchuria, and the corruption of the Chinese officers as well as the fears and weakness of the Emperor may possibly encourage them to go from one step to another, which will keep alive the apprehension that in the end war between this country and Russia will be unavoidable. At all events the policy pursued by Russia is causing so much uneasiness that nobody cares to engage in new enterprises.

Then the expedition to Khartoum is just about to start, and although we all hope for a speedy and successful termination, yet nobody can shut his eyes to the mortality likely to result at this season of the year in such a climate; and of course there are always possibilities of mistakes in war. The Soudan expedition, however, counts for very little so far as markets are concerned. The real cause of this stagnation is to be found in the state of China and the attitude of the three Continental Powers.

In other respects the political position has undoubtedly improved. The French Government is pursuing a moderate policy in China, while in Africa, by the settlement of the West African dispute, it has given assurance that it recognizes the danger of pushing too far its opposition to British interests.

Above all, the Spaniards have accepted with amazing apathy the result of the war. That they were utterly beaten is, of course, apparent even to the most ignorant Spaniard, and that the country was no longer in a position to continue hostilities is also clear. But that the people should accept so meekly the incompetence of their rulers, their generals and their admirals, the utter want of preparation, the gross corruption-all the signs, in short, of national decay, is surprising even to those who have been accustomed to look upon Spain as a dying State. Still, the apathy of the Spaniards indicates that there will be no serious troubles in that country, and consequently makes it possible that some kind of arrangement of the Spanish finances may be brought about which will prevent serious disturbance on the Paris Bourse. Furthermore the outlook in Italy-though it is disappoint-

ing enough-is not quite so dark as it was a little while ago. And lastly, hopes are again beginning to be entertained that a

satisfactory and peaceful settlement of the contemplated arrangements between Austria and Hungary will be brought about. In the Transvaal everything is quiet. In the Cape Colony the elections are being followed with great interest, but nobody can yet foresee what the result will be. So far the supporters of Mr. Rhodes have been victorious; but whether that means general or only very partial success we cannot yet say here.

In the meanwhile the mining companies in the Transvaal continue to increase the output month by month. It looks now as if the total production will exceed this year 12 millions sterling. The fact is eagerly seized hold of by the Boer Government to prove that no concessions are required by the mining industry. But it is to be recollected that the number of mining companies which are able to pay good dividendsis very small; that there is an immense number of companies which are unable to work at a profit, and that one of their great difficulties is the high taxation, the extravagant cost of living and the difficulty of obtaining labor, and all these are the result to a very great extent of the policy of Government.

The money market continues wonderfully easy. The supply is large and rates continue low in spite of all the banks and the discount houses can do. How long this condition of things will continue depends chiefly upon the course of the New York money market. If the demand for moving the crops becomes very great while trade is so good and the Government absorption so large, it is possible that a very considerable shipment of gold may take place. In that case rates will rise very sharply here. But if much gold is not shipped to New York it does not seem probable that there will be very much pressure in the market.

Germany, of course, will take some gold, and the usual requirements for the interior, for Egypt, South America and other colonies, that always occur in the autumn, will make themselves felt. But as far as can be seen at present there will be no great demand for gold such as would disturb the London money market unless the shipments to New York become large.

The general expectation here is that the shipments will be large and that either in September or October there will be a very sharp rise in rates here. In India, as usual in the rainy season, business is exceed-

ingly slack and the money market consequently is quiet. The Government has taken advantage of this to bring out the rupee loan that was announced in the Budget last March. The amount is smaller than was expected—only 120 lacs— and this week the minimum price has been fixed at $94\frac{1}{4}$. The general expectation is that the demand for the loan will be pretty active, especially as the total amount is so small, and that it will go at a considerable premium, say $1\frac{1}{2}$ to 2 above the minimum.

above the minimum. Meanwhile the India Council continues to sell its drafts-wonderfully well. It offered for tender Wednesday 25 lacs and the applications were for five times that amount. The Council, however, has disposed of its drafts so well since the beginning of April that it is now holding out for a higher price. Accordingly it refused to sell below 1s. 3 29-32d. per rupee, at which price it disposed of about 17 lacs. It could have sold the balance at a considerable amount more at 1s. 3%d., but refused. The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

WALL STREET, FRIDAY, SEPT. 2, 1898.-5 P. M.

The Money Market and Financial Situation.—Business in Wall Street has been more limited in volume this week than for several weeks past. Saturday's bank statement was in-terpreted to foreshadow a firmer, if not a stringent, money market, and this had a tendency to restrict aggressive opera-tions during the early part of the week. It is apparent, moreover, that the outside demand for securities has been so far satisfied as to make it much less urgent than it has re-cently been. On the other hand, it is reported that repre-sentatives of large financial interests have been steadily buy-ing securities at the lower quotations, which resulted from the conditions mentioned above, and as a consequence the markets are firmer as the week draws to a close. No change of importance has occurred in the general situa-tion. There continues to be almost no difference of opinion The Money Market and Financial Situation .- Business in

tion. There continues to be almost no difference of opinion as to prospects for the future, and investors with capital are freely taking desirable offerings. It is reported that the for-eign demand has also increased and that considerable purchases of American securities by London have been made for Continental account. The tendency of exchange has been downward this week, and unless a change in the conditions downward this week, and thiess a change in the conditions governing the foreign exchange market occurs gold imports must increase in the near future. In view of the probability of a considerable influx of gold and a falling off in the de-mand for currency from the interior, there is a good supply of funds in the money market, and rates, especially for time loans, are still relatively low. The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 1% to 3 per cent. To-day's rates on call were 2½ to 3 per cent. Prime commercial paper quoted at 4 to 5 per cent. The Bank of England weekly statement on Thursday showed a decrease in bullion of £62,124, and the percentage of reserve to liabilities was 48:30, same as last week; the discount rate remains unchanged at 2½ per cent. The Bank of France shows a decrease of 3,550,000 frances in gold and 560,000 francs in silver. The New York City Clearing-House banks in their state-ment of Aug. 27 showed a decrease in the reserve held of §8.-690,800 and a surplus over the required reserve of \$21,343,300, against \$28,839,250 the previous week. governing the foreign exchange market occurs gold imports

*This is the orice bid at the morning board: no safe was made. 1 D alings are in bonds "when issued" and represent transactions in the Unlisted Department of the Exchange.

State & Railroad Bonds,-Sales of State bonds at the Board are limited to \$427,000 Virginia 6s deferred trust recelpts, stamped, at 834 to 912, and \$10,000 District of Colum-bia 3-65s at 117.

The market for railway bonds has been less active this week, the average transactions per day being about \$1,000,-000 less than for the two weeks previous. In sympathy with the stock market there has been a tendency to weakness, but actual decline is limited to a few issues and is about offset by advance in others. Colorado Midland 1st and 2d 4s were conspicuous for activity and an advance of 8 and over 5 points, respectively. Wabash 2ds and debenture series B, Kansas City Pittsburg & Gulf and Standard Rope & Twine issues advanced from 1 to 2 points. Northern Pacific and Union Pacific bonds were notably strong. The active list in-cludes, in addition to the above, Atchison, Chesapeake & Ohio, Central Georgia, Erie, New York Central & Hudson, Lake Shore, Reading. Southern Railway, Texas & Pacific and U.-P. Denver & Gulf issues. The market for railway bonds has been less active this

Total...180,072 53,855 366,450 90,573 59,954 929,855 Railroad and Miscellaneous Stocks.—The stock market has been somewhat irregular this week. On Monday there were reasons for anticipating a firmer money market, which led to some liquidation by timid holders. The bear element took advantage of the situation to depress prices and were generally successful. Tuesday's market was steadier but without much change. Since Tuesday there has been an undertone of strength and some stocks have materially ad-vanced. The grangers and several high-grade issues, in-cluding Illinois Central. Pennsylvania, N. Y. Central and other so-called Vanderbilt shares, have been relatively steady, although, with a few exceptions, the active list has declined an average of between 1 and 2 points. The Northern Pacific and Union Pacific issues have been among the strong features of the market. The local traction stocks were erratic. Metro-politan Street Railway fluctuated over a range of 7 points, Manhattan Elevated over a range of 4 points. The miscellaneous list furnished material for active specu-lation and many securities of this class advanced or de-clined from 4 to 6 points, according to the varying success of manipulators. General Electric was notably strong on re-ports of extensive new contracts and Minnesota Iron and Illinois Steel advanced on further progress with consolida-tion plans.

tion plans.

THE CHRONICLE.

Investment AND Kailroad Intelligence.

RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month. The returns of the street railways are brought together sep arately on a subsequent page.

Net Earnings Monthly to Latest Dates. —The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of August 27, 1898. The next will appear in the issue of September 17, 1898.

Latest Gross Earnings.

\$

1897

Weekor Mo 1898.

• Includes Baltimore Traction and City & Suburban for both years. Street Ballway Net Earnings.—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street rail-ways, we adopt the same plan as that for the steam roads— that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of August 27, 1898. The next will appear in the issue of September 17, 1898.

In 1895 96 gross earnings were \$31,645,487; working e penses, \$33,719,403; net earnings, \$7,926,084.--V. 67, p. 221.

in the opinion of the board are not distinctly new property, and therefore are chargeable to operating expenses, and \$296,000 represents a reduction in the value of equipment still in service, but of a character not to be much longer economically used.

still in service, but of a character not to be much longer economically used. The property (roadway, structures and equipment) has been improved during the year, and is well adapted for the increased traffic which is expected from existing business conditions and abundant harvests in the territory served by the company. Included in the operating expenses is the cost of 37 locomotives and 370 cars purchased during the year to provide for equipment put out of service. *Reserve Fund.*—As stated above, the directors have set available, as may be found necessary, until the end of 1901, toward maintaining the regular 1 per cent quarterly divi-dends on the preferred stock, if at any time prior to that date the current net earnings should prove insufficient for that purpose. So far as not so used by that date, the fund may then, by vote of the directors, be returned to the general purposes of the company. In view of the comparatively short time which has elapsed since the organization of the company, and also of the fact that the unexpectedly favor-able results of the fiscal year just closed cannot safely be treated otherwise than as exceptional, the board have been led to adopt this conservative policy, which will, no doubt, commend itself to all who are interested in the company. Of course if current available earnings continue as at present, this reserve need not be drawn upon. Your directors may add that the business prospects of the company were never better than at the present time.—V. 67, p. 228. Mexican Central Railway Co. (Limited.)

Boston & Albany Railroad.

(Report for year ending June 30, 1898).

In the thirty-first annual report, President Bliss says :

In the thirty first annual report, President Bliss says: "The receipts from freight increased during the year \$167,205 and from other sources \$12,573; passenger earnings decreased \$52,835, leaving a net increase of \$126,943. The outlay during the year for expenses and improvements has increased \$136,926. "Traffic in the early months of the year gave promise of a considerable increase in earnings, but on the declaration of war with Spain the local business decreased, and the later months of the year show a large reduction in revenue. Owing to the sharp competition in all classes of freight traffic, the rate per ton per mile decreased from 9 2.10 mills in the fiscal year 1897 to 8 4.10 mills in the year 1898. Never before in the history of the road was the rate for transportation of freight so low nor the volume of traffic so great.

"Work on the separation of grade crossings has continued

"Work on the separation of grade crossings has continued throughout the year at a cost of \$450,192. There is no float-ing debt and there has been no charge to construction. The Improvement and Ware River funds have received \$31,204 div-idends and interest from the securities held by the Trustees, and they now stand charged with \$2,409,204." Tables in the report show the passenger traffic for a series of years. In 1896 the numbers of both through and way pas-sengers reached a maximum, namely, 123.072 and 12,665,255 respectively. In 1897 both classes of traffic decreased, and in 1898 the way passengers again decreased, while the through passengers increased somewhat. The totals for the late year were 111,930 through passengers and 10,551,865 way passengers. The way passengers, it will be observed, there-fore decreased in the two years over 2 millions, or over 16 p. c. The operations, earnings, charges, etc., for four years were as below given :

West Virginia Central & Pittsburg Railway Co.

(Report for the year ending June 30, 1898.)

West Virginia Central & Fittsburg Hallway Co. (Report for the year ending June 30, 1898.) President H. G. Davis says in part: General Remarks.—Mention has been made in the reports for the past few years of the decline in coal freight rates and the effect it has had on the revenues of the company. The net income for the past year was practically the same as the year before, but this was accomplished only by doing a larger volume of business, and in reducing the cost per ton per mile for hauling the same. The increase in coal was over 60,00) tons [from 1,058,694 to 1,123,270 tons, the latter forming about 70 per cent of the year's tonnage.—ED.], and yet the company received for this class of traffic \$38,000 less than it did for the preceding year. The increase in passen-ger traffic, miscellaneous freights, etc., made up the differ-ence. The prospects at this time are good for a continued increase in traffic. The coal companies report that they have engagements for the present year in excess of last year's business, and the indications are that the lumber plants, tanteries, etc., will increase their output. The company now owns over 2,000 freight cars, and their nee over foreign roads is a source of considerable revenue. Last year it amounted to \$30,733, an increase of \$9,191 over the preceding year. Of the entire equipment 34 per cent as automatic couplers and 24 per cent air brakes. *Huttonsville Extension.*—The valley of the Tygart River, especially its upper part, is one of the most fertile and pro-ductive in the State of West Virginia, and from Beverly south, 30 miles or more, the mountains are covered with heavy timber in its original growth. From Elkins south the West Va, Cent. & Pitts, has a branch six miles to Beveriv, and the company decided to extend it to Huttonsville, 11 miles be-

yond. The track is being laid and it is expected trains will be running to Huttonsville late in the fall. No new steps have been taken by this company since last report in the matter of the connection with the Chesapeake & Ohio. Bonds.—There were issued and sold during the year \$100,000 bonds to meet indebtedness incurred in making per-

manent improvements, building cars, purchasing locomo-tives, etc. These bonds were sold at a premium of 9%. *Physical Condition*.—As to this, the report says :

Physical Condition.—As to this, the report says:
To the "new improvements and betterments account" have been added during the year \$13,500. The expenditures under this heading expensive work necessary in the substitution of iron for wooden bridges, filling treatles, etc. has been accomplished. The roadbed is now in good condition and believed to be quite source against any ordinarily high water. There have been 469 miles of 70-pound steel is not in the main track, replacing that amount of 56-pound r ils, and the latter used for sidilar, the cost being charged to operating expenses. The road is now laid with 70-pound rails continuously for Piedmont to Hendri ks, a distance of 60 miles. Eleven miles of 35-pound rails have been 440 miles to the lighter rail, which will be used on the Huttonsville extension.
During the year th-company has built at its shops at Elkins and adde to its equipment 113 coal and c ke cars, and has also puthased from the Baldwin Locomotive Works three engines, the total coast being \$34,730, which amount has been charged to engineen the road being engreed to replace years as the year the cost being stronged to replace year the activity of these 30 were used to replace years and charged to operating expenses. Of these 30 were used to replace years now obsolete.

Jacksonville Tampa & Key West Railway.

(Report for the year ending March 31, 1898.)

(Report for the year ending March 31, 1893.) Receiver Joseph H. Durkee says in substance: General Remarks.—The country adjacent to the line is slowly improving agriculturally. During the winter of 1897 98 the weather was severe anough to set back the growth of the orange trees in many localities. The indica-tions are still that this year's crop will excel last season's at least fifty per cent. With favorable seasons the orange cul-ture will in a few years be restored to its former conditions. A few turpentine orchards have been opened along the line and every encouragement is given to this industry. Every economy consistent with the preservation of the property in good condition has been practiced. The physical condition of the road, roadbed, trestles, bridges, engines and all equipment is fully maintained. The total amount of receiver's certificates now outstand-ing is \$141,300 and their interest has been promptly paid. Interest on Unaerlying Bonds, Elc.—During the year the receiver has not paid interest upon bonds of the constituent.

companies by the consolidation of which the defendant railway company was formed. There are still outstanding equipment trust bonds, Series "B." to the amount of \$3,000, due, \$4,000 on May 1, 1896, and \$4 000 on Nov. 1, 1896. Earnings. - Under of court, Feb. 3, 1896, the earnings of the several divisions are now reported separately, viz.:

Metropolitan Street Railway Company of Kansas City, Mo. (Report for the fiscal year ended May 31, 1898.)

Walton H. Holmes, Vice-President and Gen. Manager, says: Watton H. Holmes, Vice-President and Gen. Manager, Says: Construction. - Duing the year the company has put in operation the double track electric line on Wyandotte St. from Second St. to the Southwest Boulevard and on the Southwest Boulevard from Main st. to the city of Rosedale. [In all 6 miles of road-12 miles of track.-ED.] It also converted the Prospect Ave. horse line [14 miles long], into a double track electric line from Fitteenth Street to Thirty first - treet. During this period also the Kansas City & Independence Air Line, a comp titor of the company, went out of the passenger business between Kansas City and Independence, and thus left Fairmount Park without transportation facilities. As the Washington Park lease was about to expire we abandoned Washington Park and built a double-

track extension to Fairmount Park. This line was put in operation the middle of May. (Park Connecting Ralway, Washington Park to Fairmount Park, 522 miles of double track.-ED.)
 The Riverview Power Station has been completed and put in successful operation, supplying electric power as far as possible from a central station. This station is modern in every particular.
 Trenses.-For the year the percentage of operating expenses has decreased to 54.83 per cent from 5655 per cent for the previous year, while the cost of carrying passengers has likewise decreased from 294 hundredthis cents per passenger to 285 cents per passenger. The policy of maintaining the company's physical property in first-class condition has been continued and rigidly followed throughout the year. For repairs on cars and tracks alone the gross sum of \$91,084 was expended, an increase of \$17,147 over the amount expended the performs year.
 Taupment.-The equipment includes: Cable cars, 474; electric cars, 105; sweepers and anow plows, 15; elevated rallway cars, closed motors, 30; closed motors (out of use), 8.
 Statistics-Various statistics of interest follow:

United States Glass Company.

(Report for year endingJune 30, 1898.)

President D. C. Ripley in his report congratulates the stockholders that the long-looked-for improvement in the company's affairs has arrived. Although prices of staples have declined, the present feeling is justified by recent sales that prices will now advance. The cost of glass has been reduced 14c. per 100 pounds. The sales for the past year show an increase of 19 per cent, and the loss for bad

Total telephones in use Aug. 20. 1898, 1,036,541, against 854,171 in August, 1897; increase, 182,870.-V. 67, p. 426.

American Debenture Co.--Foreclosure Sale Sept. 27.-Foreclosure sale of the collateral securing the bonds of 1883, series F, is advertised for Sept. 27. See list of collateral, etc., in notice of sale in the advertisement in last week's CHRONICLE.

Appleton (Wis.) Water Works Co.—Bondholders' Com-mittee.—Wm. H. Burrows, Charles L. Long and Granville C. Tyler, with W. W. Miller, of 30 Broad St., New York City, as Secretary, constitute a bondholders' committee represent-ing more than a majority of the first mortgage bonds. They have begun foreclosure proceedings and earnestly request all bondholders who have not already received the committee's bondholders who have not already received the committee's circulars immediately to communicate with the secretary of the committee.-V. 67, p. 426.

Badger Electric Co. (Lt'd).—Bonds Called.—Under terms of mortgage dated Oct. 1st, 1891, to the Atlantic Trust Co.,

Trustee, bond No. 76 for \$1,000 has been drawn for redemp-tion at 104 and accrued interest on Oct. 1st, 1898.

Baltimore & Ohio RR .- Time for Deposits Limited to Baltimore & Ohio RR.—Time for Deposits Limited to Sept. 15.—The reorganization managers announce that over 97½ per cent of the bonds and over 95½ per cent of the stocks-embraced in the reorganization plan (excepting the B. & O. preferred shares and Akron & Chicago Junction preferred shares) have been deposited under the plan of June 22, and that further deposits will be accepted only upon a cash pay-ment of 2 per cent of the par value of bonds and an addi-tional cash payment of \$2 per share of stock deposited until Sept. 15, after which date no further deposits will be accepted except in the discretion of the reorganization managers and upon such terms as they may impose.—V. 67, p. 426.

Bath (Me.) Gas & Electric.-Lewiston Brunswick Bath (Me.) Gas & Electric.—Lewiston Brunswick & Bath Street Ry.—Assignment.—A press dispatch from Bath, Me., Aug. 30, says: "Galen C. Moses, one of the wealthiest known of Bath's citizens, assigned to-day. This action is said to be caused by alleged financial difficulties of the Bath Gas & Electric Co. and the Richards Paper Company of South Gardiner, both of which concerns later assigned. The failure is thought to exceed \$200,000." Mr. Moses is Presi-dent of the Bath Street Ry. Co., and one of the syndicate pro-moting the Lewiston Brunswick & Bath Street Ry.—V. 66. p. 1001 66, p. 1001

Bear Valley Irrigation Co. of Redlands, Cal.—Reorgani-zation.—We enclosed a copy of the item respecting this com-pany recently published in the CHRONICLE to the Savings & Trust Company of Cleveland, O., the mortgage trustee, and requested further information. In response we have this:

requested further information. In response we have this: The clipping gives all the information that can be given at this time. We are interested only as trustees under a mortgage, and the clipping outlines a proposed basis of settlement between different parties in litigation. There has been no printed circulars gotten out, simply a proposition made and put in writing as a basis of settlement, which, if accepted by all parties in interest, contemplates reorganization. We have not heard as yeta as to whether proposition of settlement has been accepted by the water consumers and others to the extent of making it binding. Mr. A. G. Hubbard of Redlands, Cal, is Chairman of the bond and note holders' committee; also of the committee representing receivers' certificates.—V. 67, p. 369.

Brunswick Dock & City Improvement Co.-Additional Stock Listed.-The New York Stock Exchange has listed \$730.200 additional capital stock, making total amount listed \$5,000,000. The company has redeemed (and the trustee has canceled) \$169,200 of the \$180,300 first mortgage bonds outstanding and has made arrangements to pay off the entire bonded indebtedness of the company. See the Treasurer's statement in V. 67, p. 373.

Buffalo & Niagara Falls Electric Ry.—First Dividend. —The company has declared its first dividend, one per cent (quarterly), payable Sept. 15.—V. 63, p. 558.

Buffalo & Susquehanna RR.—Bonds Called.—First mort-gage five per cent, Series A, \$1,000 bonds, numbers 1223 to 1296, both inclusive, and Series B, \$500 bonds, numbers 113 to 116, both inclusive, and numbers 119 to 121, both inclus-ive. have been called for the sinking fund, and will be re-deemed at par and accrued interest on October 1, 1898, at the banking house of Messrs. Harvey Fisk & Sons, No. 29 Nassau Street, New York.—V. 67, p. 427.

Buffalo Tonawanda & Niagara Falls Electric Ry. Company, -This company has been incorporated with au-thorized capital stock of \$1,250,000 in \$100 shares, and has absorbed the Tonawanda Street RR. The directors are:

absorbed the Tonawanda Street RR. The directors are: Heary B Smith, Bay City, Mich.; H. M. Gillett, Bay City, Mich.; Timothy E. Elisworth, Lockport: James A. Roberts, Buffdo: George Sandrock, Buffalo: Clarence M. Howard, Buffalo: James Low, Ningara Falls: John A. Read, North Tonawanda; Benjamin L. Rand, North Tonawanda. The Tonawanda Street RR. was an electric line, bonded for \$50,000, and extending from Tonawanda to Gratwick, 2¾ miles. The present intention as reported is to build a double track road along the river front from Black Rock to Tonawanda, and from the latter point to Niagara Falls over private property. private property.

Chicago Cattle Loan Co.—Chicago Junction Railways & Union Stock Yards Co.—Object of New Company.—It appears that the Chicago Cattle Loan Co., whose incorporation was noted last week, was organized by interests identified with the Chicago Junction Railways & Union Stock Yards Co., for the purpose of loaning money direct to cattle feeders in the West, taking chattel mortgages on the cattle, and stipu-lating that the cattle when marketed shall be sent to Chicago. The Kansas City and Omaha Stock Yards, it is stated, have both organized cattle loan companies, and they have proved of great advantage to the stock yards of those cities.—V. 67, p. 427; V. 66, p. 1043. Chicago Great Western Ry.—Surveys.—This company

Chicago Great Western Ry.—Surveys.—This company is running a preliminary line from Hampton, Ia., to Omaha, Neb., not, however, with any present intention of building, but to secure information which may be useful in the future. (Official statement to "Railroad Gazette.")—V. 67, p. 423, 433.

Conclust statement to "Railroad Gazette.")—V. 67, p. 423, 433.
Chicago Peoria & Western RR.—Glucose Sugar Refining.
—Proposed Connecting Lane.—The Chicago Peoria & Western has been incorporated in the interest of the Glucose Sugar Refining Co., to connect its plants in Chicago, Peoria and Rockford, Ill., and Davenport, Ia. Surveys are in progress between Chicago and Peoria. The officers of the new company are those of the Sugar Refining Co., viz.: President, C. H. Matthiessen; Secretary and Treasurer, S. T. Butler; General Manager, W. J. Gorman.—V. 67, p. 319.

Columbus Hocking Valley & Toledo Ry.—Further Advance of 2 Per Cent for Interest on Consol. 5s Sept. 1.—J. P. Morgan & Co., referring to their circulars of Feb. 25, 1897, Ang. 31, 1897, and Feb. 28, 1898, give notice that they are prepared to make a further advance of \$20 on each \$1,000 J er cent consol, bond of 1881 now deposited with them .-- V. 66, p. 1044.

66, p. 1044. Commonwealth Electric Co.—Chicago Edison Co.— Prospectus—Description of Bonds and Property.—Agree-ment.—Of the \$2,000,000 of Commonwealth Electric bonds recently issued it is announced that \$500.00) have been placed in London with the London-Soottish American Trust, through Aldis, Aldis, Northcote & Wilson. In addition \$700,000, it is stated, have been placed in Chicago, \$3,0,000 more have practically been placed and N. W. Harris & Co. are offering the remaining \$500,000. A letter of President Insult to N. W. Harris & Co. gives the following facts regard-ing the company's property, its business, its bond issue and its agreement with the Chicago Edison Co.: Property Owned—The Commonwealth Company practically control

Its agreement with the Chicago Edison Co.: Property Owned — The Commonwealth Company practically control the entire electric lighting business in Chicago south of Thirty-ninth Street, north of Lincoln Park and west of Ashland Boulevard. It re-cently acquired at a cost of considerably more than \$2,600,000 the business and a sets of the following companies: SOUTH STDE.—People's Electric Light & Motor Power Co., Mutual Electric Light Co., Hyde Park Thomson Houston Light Co., Hyde Park Electric Light & Power Co., Baglewoo's Electric Light Co., People's Light & Power Co. Wusst STDE.—West Chicago Light & Power Co. NORTH STDE.—West Chicago Light & Power Co. NORTH STDE.—Western Light & Power Co.

<text>Light Co., Hyde Park Thomson Honston Light Co., Hyde Park Electric Light A Power Co., Englewore Pieter Light Co., People's Light A Power Co., Proplex Light A Power Co., Englewore To., New York, Co., Englewore Co., Englewore To., Start, Co., Englewore To., Start, A., Start, Start,

Month. May June	Gross inco no. \$25,914 27,474	Operating ex enses. \$19,077 18,(53	Net earnings. \$6.832 9.411	Av. per vear. \$92,089 112,984
July		17,771	9,746	116,952

The above figures are based upon the operation of the plants with-out the advantage of the operating contract made with the Edison Co., the advantages of which will increase as the business of the Com-monwealth Co. is extended. The total fixed charges under a bond issue of \$2,000,000, and including the interest on the underlying bonds, will amount to \$109,000. It is estimated the net earnings be-fore the lapse of a year's operation will be at the rate of \$140,000 per annum. annum.

Management.-The officers and directors are as follows:

President. Samuel Insuli: Vice Pres., Robert T. Lincoln: Sec. and Treas., Frank S. Gorton, Comptroller, Walter M. Anthony; Gene al Super., Louis A. Fergusor, Directors, Edward L. Brewster, Samuel Insuli, Joseph Leiter, Rob-ert T. Lincoln and John J. Mitchell.-V. 67, p. 370, 319.

Eastern Illinois Coal Co.-Payment of Coupons.-A Boston paper says :

ton paper says: "Treasurer J. M. Pendlcton announces that the coupon of Sept. 1 1898, will be paid on presentation at the Farmers' Loan & Trust Co. 1898, will be paid on presentation at the Farmers' Loan & Trust Co. The coupon of March, 1898, will be paid later on if it is possible to do so, but the condition of the soft coal trade has been such in the past few years that the company has been unable to make leases that would provide a revenue sufficient to meet the interest charges. It is hoped that the company will be able to meet the interest in the future, but it cannot be promised at this time." Editors Electric III muinefing Co. of Brooklyn -Kings

Edison Electric Illuminating Co. of Brooklyn,-Kings Edison Electric Illuminating Co. of Brooklyn.-Kings County Electric Light and Power.-Official Circular Graing Terms for Sale of Stock.-An official circular explains as fol-lows the plan under which the stockholders of the Edison Electric Illuminating Co. of Brooklyn can sell their holdings to the Kings County Electric Light & Power Co: Deposit of Stock.-'Edison stockholders are to deposit their configuration of stock to rether with an encoded of the second

Deposit of Stock.—"Edison stockholders are to deposit their certificates of stock, together with an agreement to de-posit an amount of cash equal to 25 per cent of their stock. with the Central Trust Co. (unless the right to subscribe for additional stock shall have been assigned), and are to assign to the trust company the shares represented by the certifi-cates, together with the shares of the additional stock to be acquired with the cash so deposited. The trust company

will issue negotiable certificates for the shares. The time allowed for such deposits is limited to Sept. 20." Description of New Purchase Money Bonds of Kings County Co.—"The trust company, after its receipt of two-thirds of the Edison stock, will assign the shares to the Kings County Co. and receive the purchase price therefor, which will (in-cluding the additional stock subscribed and paid for) be represented, par for par, by 6 per cent gold ninety-nine year purchase money coupon or registered bonds of the Kings County Co. The Kings County Co will, in addition, deliver to the stockholders' committee bonds of the same issue which will produce an income agreed to be sufficient to meet the expenses of the competent representation by the commit-

County Co. The Kings County Co will, in addition, deliver to the stockholders' committee bonds of the same issue which will produce an income agreed to be sufficient to meet the expenses of the competent representation by the commit-tee of the present and future intreests and rights of the Edi-son selling stockholders in the necessary details of the pro-ceeds of the further issue of Edison first consolidated mort-gage bonds and the investment of the guaranty fund pres-ently mentioned, and otherwise." "The purchase money bond of the Kings County Company will be scured by vendor's lien on the Edison shares to be reserved by the Cantral Trust Company and by a purchase money mor'gage, which, basides being a first lien on the Edison shares, will be a general lien on property, present and future, of the Kings County Company, subject only to its present first mortgage of \$2,50'.000. They will also be secured by the deposit with the Central Trust Company of \$1,000,000 cash to be invested in securities to be approved by the stockholders' committee." *Consolidated Mortgage of Elison Co. to be increased to be \$10,000,000 at A Per Cent Interest.*—"It is proposed that the Elison first consolidated mortgage, recently anthorized for \$5,000,000, in 5 per cent bonds, shall be authorized instead to an amount not exceeding \$0,00,000 in forty year 4 per cent bonds. This mortgage will be secured by a first lien on all the Edison property, subject only to the existing first mortgage bonds which will be paid off and can-celed in 1900. The Kings County Company will additionally secure these bonds by a mortgage of its own property, sub-ject to \$2,500,000 of its first mortgage bonds and the lien of its purchase money bonds to be received by the Edison sell-ing stockholders. The first issue of the Edison first consoli-dated bonds will be \$2,000,000, to provide funds to pay for the stock of the Municipal Company. Of the remainder, \$1,\$75,000 will be reserved to retire the \$1,500,000 of exist-ing first mortgage bonds, which will

1900 of subscribing for one \$1,000 bond at the price of \$550 and accrued interest." Extra Dividend of 2½ to 3 Per Cent from Profit and Loss Surplus.—"The holders of trust company certificates will also be entitled to their ratable shares of extra dividends to be declared by the Edison Company so as to distribute the amount to the credit of profit and loss on June 30, 1898, in-cluding the insurance fund, less the expenses of the company incident to the new mortgage and this transaction. The incident to the new mortgage and this transaction. The amount of this dividend cannot be known until such expenses are determined, but it will probably be between $2\frac{1}{2}$ and 3per cent.'

per cent." Stockholders' Committee.—"The duties of the stockholders' committee, George Foster Peabody, Ethan Allen Doty and Edwin M. Bulkley, will, it is contemplated, continue until investment shall have been made of the remaining \$6,125,000 of the E lison first consolidated bonds reserved for extensions and improvements. The membership of this committee will be in the control of the holders of a majority of the purchase money + onds to be received by the Edison selling stock-holders."

holders." Deposit of Two-Thirds of Stock Necessary.—" The agree-ment will become effectual upon deposit with the Central Trust Company of two thirds of the Edison stock. The time allowed for such deposits is limited to September 20." Capitalization of Kings County Company.—The Edison Company has outstanding \$4,000,000 of stock, which will be increased to \$5,000,000 and exchanged as above stated. If the entire issue is so exchanged, the capitalization of the Kings County Company will consist of the following:

East Middlesex Street Ry.-Payment of Bonds.-The \$125,000 bonds due Sept 1 are being paid at the National

Hide & Leather Bank, Boston. Estabrook & Co. recently purchased a like amount of 5 per cents issued to refund the maturing loan.

Gas Consumers' Association of the United States.—To Increase Capital Stock.—The stockholders will vote at the office of the company, 316 Post Street, San Francisco, on Oct., 20, upon a proposition to increase the capital stock from \$300,000 to \$500,000, divided into 25,000 shares of the par value of \$20 each. D. L. Randolph is President and George R. Kibbe Secretary of the company.

Hudson River Tunnel Ry.—Sale Ordered.—Chancellor McGill, at Jersey City, on Thursday signed the order direct-ing the foreclosure sale of the property. The date of sale will be fixed by Commissioner Randolph Parmly.—V. 67, p. 274.

Illinois Steel—Minnesota Iron—Lorain Steel—Elgin Joliet & Eastern RR.—Chicago Lake Shore & Eastern RR. - Federal Steel.—Official Statement as to Pending Consolidation .- On Tuesday Judge E. H. Gary gave to the press the following statement: "The committee on consolidation reports that it has been

decided to organize a new company, to be known as the Fed-eral Steel Co., under the laws of New Jersey. The capital stock will be about \$200,000,000, one-half in 6 per cent preferred and one half in common stock. A syndicate which will furnish the necessary working capital for the new com-pany will be managed by J. P. Morgan & Co.

'Arrangements for the purchase of the steel plants at Lorain, O., and Johnstown, Pa., have been consummated. A majority of the stockholders of the Minnesota Iron Co., the Illinois Steel Co. and the Elgin Joliet & Eastern RR. Co. have already signified their willingness to sell to the new

nave aiready signified their withingless to sell to the flew company. "It is expected that a circular embodying the plan of or-ganization will be sent to the stockholders of the different companies within a week. The transfers of stock will prob-ably be made by the Central Trust Co. It is expected that the new company will be ready to begin business on Oct. 1." The final details are to be left to a sub committee consist-ing of Robert Bacon of J. P. Morgan & Co, and Roswell P. Elower

Flower.

We are officially informed that the stockholders of the Minnesota Iron Co. will receive a cash dividend of 1½ per cent and for every \$10,000 par value of stock \$13,600 par value of new preferred stock. They will also have the privilege of subscribing for \$10,000 of new common stock at 25.—V. 67, p. 428.

428. Kansas City Pittsburg & Gulf RR.- Official Statement.-President Stillwell has made the following statement regard-ing the property: "The prospects for our road were never brighter than they are to day. I hear all sorts of rumors of receiverships, big floating debt, &c., but the facts in the case are that the Kansas City Pittsburg & Gulf is to-day earning its full interest and has the larger part of the money in the bank to meet its October coupons. It has no floating debt. Our August earnings (\$812,000) are the largest in the history of the road. The best previous month was November, 1897, with gross earnings of \$303,600. Our earnings are now \$11,-000 to \$12,000 a day. They should from now on be largely increased, for the cotton movement is just starting Five large lumber mills which have been in processs of construc-tion for nine months will soon be completed, and they should give us \$5,000 a day in freight. One of the mills is now giving us \$5,000 a day in freight. One of the mills is now giving us \$1,000 a day. The last week of July was the best week in the history of the road for the movement of lumber. We handled 564 cars from the 119 saw-mills located on the road." -V. 67, p. 222.

Kentucky & Indiana Bridge.—Bonds Sold.—Logan Mur-ray, who is liquidating the Kentucky National Bank, it is stated, has sold \$138,000 of the terminal bonds of the Bridge at 60 to the Southern Railway Co. It is thought the bridge will be foreclosed this fall and the company be re-organized.—V. 65, p. 976.

Mobile & Bay Shore Ry.—Mobile & Ohio RR.—New Pro-pect.—The Mobile & Bay Shore Ry. was recently incorporated by W. Butler Duncan, Adrian Iselin, Jr., J. H. Masson, James C. Clarke, and others, identified with the Mobile & Ohio, to build a railroad from Mertz Station, on the Duncan Branch, to or near Portersville and Alabama Port, a distance of 27 miles. All the rights of way have been scenared. Backs of 27 miles. All the rights of way have been secured. Books of subscription to the capital stock of the Mobile & Bay Shore Ry. Co. will be opened in the Cotton Exchange Build-ing, Mobile, on Sept. 28th, 1898.—V. 67, p. 271.

New Transfer Ticket Law in New York State.—Statute in Effect.—The law providing a penalty for the unlawful use of transfer tickets issued by the street railways of New York State went into effect on Thursday. The law is as follows: -Statute

State went into effect on Thursday. The law is as follows: "Section 619a. No transfer ticket or written or printed instrument giving, or purporting to give, the right of transfer to any person or persons from a public conveyance operated upon one line or route of a street surface railroad to a public conveyance upon another line or route of a street surface railroad, of from one car to another car upon the same line of street surface railroad, shall be issued, sold, or given, ex-cept to a persenger lawfully entitled thereto. Any person who shall is-sue, sell or give away such a transfer ticket or instrument as aforesaid to a person or persons not lawfully entitled thereto, and any person or offer for passage any such transfer ticket or instrument, or shall sell or give away such transfer ticket or instrument, with intent

to have such transfer ticket used or offered for passage after the time limited for its use shall have expired, shall be guilty of a misde-meanor."

New York & Harlem RR.—Stockholders to Vote Oct. 5 on Proposed Settlement of Refunding Controversy.—A special meeting of the stockholders will be held on Oc⁻, 5, 1898, at twelve o'clock, noon, "for the purpose of considering the final report of a committee appointed by the board of direct-ors to agree with the board of directors of the New York Central & Hudson River RR. Co. upon a settlement of the questions between the two companies arising out of the lease of April 1, 1873, and the refunding of the consolidated mort-Central & Induson Inverties Intervention, on the section of the lease questions between the two companies arising out of the lease of April 1, 1873, and the refunding of the consolidated mort-gage bonds of this company, and for the purpose of taking final action with reference to such proposed settlement and agreement." The terms of the proposed settlement were given in the CHRONICLE of Aug. 13, p. 321. They provide that of the saving from refunding the \$12,000,000 of 7s due May 1, 1900, at $3\frac{1}{2}$ per cent, \$220,00 is shall go to the Central and \$200,000 to the New York & Harlem, affording to the latter an amount equal to 3 per cent yearly on its stock. The Harlem stock is now receiving in dividends 13 per cent yearly, and after July, 1901, (when the rental from the Fourth Avenue line will be increased from $3\frac{1}{2}$ per cent to 4 per cent) and the refunding of the consols will have been accomplished, the annual distribution should equal $14\frac{1}{2}$, if not 15, per cent. See V. 67, p. 178 and 223, and also INVES-TORS' SUPPLEMENT.—V. 67, p. 321.

Northern Pacific Ry.—Master's Report Touching Lands.— Special Master Carey at Milwaukee, Wis., Aug. 25, filed his report, deciding that the preferred stock of the old company does not possess the lien which was claimed for it upon the 3,738,874 acres of land in Minnesota and North Dakota east of the Missouri River. The Master holds that there can be no such thing as preference of stock upon capital, in the sense that the stockholder shall be repaid that which he has contributed to the capital of the corporation before the credit. contributed to the capital of the corporation, before the creditors are satisfied.

Report.-An advance statement for the late fiscal year will

Report.—An advance statement for the late fiscal year will be found on page 477 of to-day's CHRONICLE. Dividend.—It is understood that at their meeting yesterday the directors took no action regarding any dividend on the common stock from the earnings of the past year, and that the annual report, as adopted, makes no mention of the sub-ject. The President stated to the board that if business prospects continue as at present, of which there seems to be every likelihood, it would be proper for the board in the course of a few months, to give consideration to the question of a dividend on the common stock from the earnings of the current year.—V. 67, p. 223.

Paducah (Ky.) Railway & Light Co.—Status of Consoli-dation.—New Lozn.—This company, as already announced, has been incorporated with a capital stock of \$200,000, and we are officially informed will be bonded for \$40,000, secured by a first mortgage, the only mortgage on the prop-erty. The purpose is to absorb the two streat railway companies and the two electric-light companies, all of which are now owned by the same people. The companies thus to be amalgamated are the Paducah Street Railway Co. and the People's Light, Power & Railway Co. the last-named company having already absorbed the General Electric Light & Power Co. There will be about 14½ miles of street railway, basides a

There will be about 14½ miles of street railway, besides a. large electric light and power plant. The new bonls are being sold through the American Trust & Savings Bauk of Chicago, Ill., and Mr. R. W. Vivian, broker, of the same city. The preliminaries are not yet completed, but it is hoped during the next few weeks to get everything in shape.— V. 67, p. 127.

Peoples Gas Light & Coke Co. of Chicago.—Cross Bill.— In the suit of James Livingston the company has filed a cross-bill designed to show that at the time of filing his bill Livingston was not the owner of the fifteen bonds in question, but was and is now a mere tool of certain persons who have caused to be instituted the action in furtherance of a design to injure the stock and bond holders of the company by de-preciating the market value of the company's assets and securities.--V. 67, p. 321.

Port Arthur Duluth & Western Ry.—Sold.—The Toronto General Trusts Co. has sold the control of the road to Macken-zie, Mann & Co. for a price said to be about \$250,000. The new owners, it is believed, will extend the road forty or fifty miles into Minnesota to connect with the railways of the Northwestern States and also to a connection with the Bainy River Railway, a charter for which Mackenzie, Mann & Co. have secured, and on the construction of which it is said they are now working. A description of the Port Arthur Duluth & Western was given in V. 64, p. 1002.

Quebec Montmorency & Charlevoix Ry.—To Purchase Power and Light Plant.—The stockholders will vote Sept. 30 on a proposition to purchase the Montmorency Power Com-pany, which supplies the motive power of the street railway and lights to the city streets. The price is said to be \$1,250,-000.—V. 67, p. 75.

Sedalia (Mo.) Railway Light & Power.—Sedalia Elec-tric Co. – Purchased.—A press dispatch from Sedalia says the Sedalia Railway Light & Power Co. and the Sedalia & Brown Springs Electric, embracing in all 15 miles of track

and an electric-light plant have been purchased by Stewart and an electric-light plant have been purchased by Stewart & Co., of New York, and will be consolidated under the name of the Sedalia Electric Co. The new officers are: S. H. G. Stewart of New York, President; John D. Crawford of Sedalia, Vice-President, and Calton H. Reeve of New York, Secretary and Treasurer. The directors are the above officers and A. C. Zimmerman of New York and W. H. Powell, Jr., of Sedalia.

Standard Rope & Twine .- Union Selling Co .- Selling-

Standard Rope & Twine,-Union Selling Co.-Selling-Agency.-The Union Selling Co. has been organized, with a capital of \$500,000. Mr. Thomas Russell, for thirty years agent of the Clark Mile-End Spool Cotton, is President and Mr. Charles E. Borden is Vice-President. Mr. Borden has been at the head of the sales department of the Rope & Twine Co. The other directors are Mr. Henry D. Cooper of J. F. White & Co., Mr. J. W. Spaulding of A. G. Spaulding & Co. and Mr. E. A. Walton of the Citizens' Insurance Co. We understand that the purpose of the Union Selling Co. is, in its relation with the Rope & Twine Co., to act as selling agents, and at the same time to finance the Rope & Twine Co.'s business to an extent which will enable it to run its fac-tories on full time and so place it in the position in the trade which it should occupy. Hitherto the Rope & Twine Co. has been unable to do what is now proposed to be done through the intermediary of the Union Selling Co., owing to lack of sufficient working capital. It will be seen that this arrange-ment will enable the Rope & Twine Co. to effect large econ-omies in its manufacturing expenses, and as the Selling Co. will assume the charge for selling, the net benefit to the Rope & Twine Co will be considerable, -V. 68, p. 951.

Staten Island Rapid Transit RR.—Over 92 Per Cent of Seconds Deposited—Penalty After Sept. 9.—Hallgarten & Co. announce that over 92 per cent of the 5 per cent second mortgage bonds guaranteed by the Baltimore & Ohio RR. Co. have been deposited with the Central Trust Co. under the July agreement. Notice is given that further deposits will only be accepted without penalty until September 9, in clusive, after which date there will be a penalty of \$20 per bond.—V. 67, p. 435.

Swift & Co.—Increased Dividend.—The company has increased the rate of its quarterly dividend from 6 per cent per annum, at which it has stood since April, 1895, to 7 per cent. Previous to 1895 the rate was 8% yearly.—V. 67, p. 321.

Terre Haute Electric Ry.—Majority of Bonds of 1892 De-feated—Further Deposits till Sept. 15.—The first mortgage bondholders' committee of the Terre Haute Street Railway Co. has prepared a bondholders' agreement and has secured the deposit of more than a majority of the bonds thereunder. The limit of time for receiving deposits at the Illinois Trust & Savings Bank has been fixed at Sept. 15.—V. 67, p. 323.

Torrington (Needle) Company -Excelsior Needle Co. of Connecticut-New Company -Securities Offered.-Kidder, Peabody & Co. this week offered for subscription at par \$1,000,000 first mortgage 5s, \$1,000,000 preferred stock and \$1,000,000 Class "A" stock of the new Torrington Company. The company is capitalized as follows :

Class "B" common stock, par value of shares, \$25....... 1,000,000 The subscription lists were opened on Thursday, Septem-ber 1, and were to be closed on or before September 3, 1898. The Torrington Company is incorporated under the laws of the State of Maine, and was formed for the purpose of ac-quiring and carrying on the business of the Excelsior Needle Co. of Connecticut, which has been in business since 1866. It will own directly and through ownership of the shares of subordinate companies the factory and plant at Torrington, Connecticut, where are manufactured sewing-machine and knitting-machine needles, and also bicycle spokes and nip ples and swaging machinery; also the factory at Springfield, Massachusetts, where are manufactured needles; and the needle factory in Redditch, England; also a considerable in-vestment in store supplies in Boston, New York, Philadel-phia, Chicago and London, England, and in its bicycle spoke factory in Leicester, England. The prospectus says: The officers of the old company state that it produces a large major-

factory in Leicester, England. The prospectus says: The officers of the old company state that it produces a large major-ity of all the sewing-machine needles and bioycle spokes and nipples produced in this country. The new company acquires all the old company, free of all incombrances, and will start with no outstand-ing liabilities except the above-mentioned bonds and with about \$175,000 cash on hand, beside cash assets. The books of the old com-pany have been examined by Messra. Deloitte, Devers, Griffiths & Co., chartered accountants of London and New York, who report as follows: "We have examined the accounts of the Excelsior Needle Co., Tor-rington, Conn., the National Needle Co., Springfield, Mass., and A. H. Smith & Co., New Haven, Conn., and we find the total profits for the three companies, before charging any depreciation and interest on capital, to be as follows: Year ended 30th June, 1896, \$460,074; year ended 30th June, 1897, \$398,640; year ended 30th June, 1898, \$465,725. These profits are arrived at after including the result of the transactions of the business in England and the various agencies in the United States. In the profits for the vear ended 30th June, 1898, there is included an amount of \$71,912, derived from the sale of pat-ent rights in Germany. We are assured that all depreciation is cov-

ered by the charges to operating expenses for renewals and repairs, and from the character of the machinery and plant we believe this to be the case." These profits, averaging over \$400,000 per annum, will leave a sur-plus after paying 5 per cent on bonds, 7 per cent on the preferred stock and 8 per cent on both classes of common stock. The new com-pany has arranged to continue for a pariod of years the present man-agement, and some of the former directors will remain as directors.

Third Avenue RR. (New York City).—Ready for Under-ground Trolley.—Edward Lauterbach, counsel and one of the directors of the company, is quoted as saying : "The underground trolley which is to replace the cable and other traction methods of the company will be in opera-tion in sixty days after the beginning of the work on the main Third Avenue line. Before the snow flies the cars of the 42d Street line will be operated by electricity and those of the 125th Street line in ninety days. The Dry Dock line will be left over until the spring. The change from cable to trolley will result in little, if any, interference with the operation of the Third Avenue system, except perhaps on the 42d Street line. When, seven years ago, the change was made from horses to cable traction there was no interference with opera-tions, and recently at Washington a change was made from cable to electricity without a hitch. "All the changes and improvements contemplated for the system will cost from \$12,000,000 to \$15,000,000. The new cars will be lighted by electricity, will be handsomely equipped and properly heated for the cold season. We are reaching out with the Union Railway Co. and improving its service steadily, and our relations with the Metropolitan Street Rail-

steadily, and our relations with the Metropolitan Street Rail-way Co. continue to be pleasant. The change on Third Ave-nue from cable to electricity was brought about by the force of sound logic and no considerations that involved delay were heeded.'

A statement of the earnings for the year ending June 30, 1898, is given under "Annual Reports."-V. 66, p. 1047.

United States Mortgage & Trust Co.—Listing of B mds on New York Stock Exchange.—Series G of this company's Real Estate first mortgage collateral trust bonds were listed last week on the New York Stock Exchange. In June last several of the previous issues were listed and the statement then made to the Exchange described very fully the nature of the Real Estate Bonds and their collateral, and also the financial standing of the company as shown by income account, bal-ance sheet, etc. This statement will be found at length on page 487 of this issue of the CHRONICLE.—V. 66, p. 1239.

United States Sugar Refining Co. Waukegan, III.—Com-petition in Glucose.—This company with a capital of \$2,000,-000 stock and \$1,000,000 6 per cent bonds has the following officers: President, C. M. Warner of Syracuse; Vice Presi-dent, Wm. H. Bartlett of Bartlett, Frazier & Co.; Treasurer, Thos. A. McIntyre of McIntyre & Wardwell. The directors are: Wm. A. Nash, President of the Corn Exchange Bank: E. R. Ladew, director of the U. S. Leather Co.; E. B. Wal-den; Herman W. Hoops, Timothy Hogan and Wm. J. Forbes. The "Wall Street Journal" says:

The " wan street Johrnar says: The plans of the company call for a factory with a daily capacity of 15,000 bushels of corn, which is about one-sixth of the capacity of the Glucose Co. It is stated by people connected with the new company that the factory will be in operation in October. The new company bases its plans on the expectation of a profit of 25 cents, which is re-garded as conservative. There are practically no patents covering the production of glucose, but it costs from \$1,500,000 to \$2,5000,000to equip a modern plant, and this fact is of itself a guaranty against destructive competition. It is not likely that the entry of a competi-tor in the glucose field will be productive of disturbance in the trade, as the Glucose Co. feels that it is desirable from various points of view that there should be a certain amount of independent competition in the trade.-V. 66, p. 617.

Union Suburban Telephone & Telegraph Co. of Cleve-land.—This company has been incorporated with \$1,000,000 authorized capital stock to operate from Painesville to Sandusky, with branches all over Ohio. H. A. Everett and J. B. Hanna are among the incorporators. The syndicate. of which Mr. Everett is at the head, it is stated has secured control of the Home Telephone Co. and is planning this extension

IItah & Pacific RR .- Oregon Short Line RR .- New Line. -The Utah & Pacific RR, has been incorporated in Utah to build a railroad from Milford southwest to the boundary line of Utah in Iron County, about 80 miles. The road will be virtually an extension of the Oregon Short Line, and will use the old grade, which was completed by the Union Pacific several years ago from Milford to Pioche. Nevada, 110 miles. A contract with the Oregon Short Line provide: that the lat-ter shall furnish the rails and equip the road. The contract A contract with the Oregon Short Line provide: that the lat-ter shall furnish the rails and equip the road. The contract with the Short Line, it is stated, also calls for the com-pletion of the road within one year from August 16; 40 miles to Sulphur Springs, it is hoped, will be ready for opera-tion by January 1. The capital stock is \$850,000, and the in-corporators are: Alfred W. McCune, of Salt Lake, Presi-dent; David Eccles, of Ogden, Vice-President; William L. Hoge, of Anaconda, Mont., Secretary; Chas. W. Niblev, of Baker City, Ore., Treasurer; Joseph F. Smith, Richard Mack-intosh, of Salt Lake; Thomas D. Dee, of Ogden, and Robert C. Lund, of St. George. The work of construction will be carried on by the Utah Construction Co., with Robert S. Campbell as President.—V. 67, p. 372.

1898	1,605,508	1.666.242 17

Within the last year the final payments on account of car trust indebtedness have been made, with the exception of three notes held by the Guaranty Trust Company and ma-turing August 15, 1898, (since paid), November 15, and Feb-ruary 15, 1899, amounting in the aggregate to \$17,500, when the last car trust obligation of the Company will have been discharged discharged

On or after June 1st, 1899, the Company has the right to pay off or refund by issue of its four per cent bonds \$5,-600,000 of Consolidated First Mortgage five per cent bonds. This matter is now having the careful consideration of the Board, and will be carried through when such a price for the fours can be had as, in the judgment of the Directors, they should and are likely in the near future to command. No bonds have been issued or disposed of during the last fiscal year. fiscal year

The contract with the Adams Express Company having expired, a new agreement, taking effect July 1st, was en-tered into for a period of five years, and thereafter to con-tinue until one year's notice shall be given, by either party to the agreement, of its termination. The Sleeping and Drawing-room Car contract with the Pullman Company terminated March 31st, 1898. A new

contract was thereupon made with the Wagner Company for running sleeping-cars only, for a period of ten years, the Railway Company reserving the right to operate its own drawing-room cars, the earnings from which will hereafter be included in the earnings of the Railway. In addition to the amount invested by the company in the stock and bonds of the Ontario Carbondale & Scranton Rail-way Company, further sums were necessary to complete that line, amounting at the close of the fiscal year to \$628,-\$94 76. While these advances have been carried as, and do constitute, an asset, enforcible by judgment against the subordinate company, should any necessity arise for such action, to protect the interests of the company or its secur-ity-holders, it is evident that the item is not a quick asset available for the purpose of discharging direct liabilities. Surplus earnings having been used in the completion of the line, the Board decided to charge the item against the profit and loss account and to credit the same account with the balances carried in the construction accounts of the latter being the portion of the O. C. & S. line in New York State), both which accounts are now closed. Warious other minor accounts have also been closed, un-collectible claims charged off and settlements of old claims

State, both which accounts are how closed. Various other minor accounts have also been closed, un-collectible claims charged off and settlements of old claims effected, making a further charge to profit and loss, the net result of all being a reduction of the profit and loss surplus from \$2,681,087 28 at June 30, 1897, to \$2,611,173 02 at June 30, 1898 The charges and credits referred to are set out in more detail in the Treasurer's report.

PASSENGER RECEIPTS.

PASSENGER RECEIPTS. In view of recent legislation obliging railway companies in the State of New York charging a rate of fare ex-ceeding two cents a mile to place on sale mileage books of 500 or 1,000 coupons, at two cents per mile, good in the hands of any person presenting them on trains, the officers of the Company, after mature reflection, concluded to make a uniform rate of two cents a mile for all distances traveled over the Company's lines, at the same time withdrawing all other forms of tickets, including the mileage books pre-viously issued. The use of such books led to abuses which the officers of the Company were unable to control or rec-tify. At several connecting points it was necessary to meet the two-cent rate established long since by the New York Central Company, and being confronted by these condi-tions, the plan of charging a uniform rate of two cents per mile was finally adopted. It is believed that for a time this concession may result in reduced passenger receipts, but the Board and officials of the Company have reason to expect that the reduction from three cents to two cents per mile will, in the end, stimulate passenger travel and develop the country adjacent to the main line and its branches, thus eventually augmenting the Company's revenues, both as to local freight and passenger earnings. local freight and passenger earnings.

LOCAL FREIGHT RECEIPTS.

LOCAL FREIGHT RECEIPTS. After a prolonged period of dulness and depression there were indications of an improvement in business conditions during the first months of the calendar year. The "Maine" disaster was, however, immediately followed by a period of uncertainty and serious mercantile depression, which has continued with more or less force since war was declared in April last. There are now, however, indications of a ma-terial improvement in business throughout the country, in which your company will be prepared to participate when peace shall have been declared and normal conditions hap-nily resumed. pily resumed.

MILK RECEIPTS.

MILK RECEIPTS. As stated in the last annual report, the rates on milk were re-adjusted in accordance with a decision of the Inter-State Commerce Commission, then recently rendered. While such rates were established, on the basis of the old uniform rate of thirty-two cents per can, as the maximum rate to be charged for the longest distance, a considerable reduction on the shorter hauls was made, which it was intended should benefit the shippers located in near-by districts. These re-ductions in the freight rate have not enhanced the price of the commodity, so far as the farming community is con-cerned. For example, while the rate on milk shipped by rail from Orange County stations was reduced from thirty-two to twenty-six cents per can, the price per quart received by the farmer has shown no material increase. The prices re-ceived for the months of April, May and June in the years 1896, 1897, and 1898 have been furnished by an Orange County shipper, and were as follows:

1896.	1897.	1898.
April 13 -112 cts. per qt.	112-134 cts. per qt.	2 cts. per qt.
May 112 ets. " "	11g cts. " "	12-134 " " "
June14-12 cts. " "	114 " " "	14 """"

June......14-14 to sum of the shipper may be found in the reduction of the rate he pays the railway for transporting his product. Experience shows that the reduction is in most cases absorbed by the middle man or consumer and that the producer fails to derive any great benefit from such concessions, while the loss falls entirely upon the carrier. Upon the prosperity of the agri-culturalist depends, in great measure, the financial success of the railway, and all proper concessions which the railway company can extend to the farming community along its lines are as a rule cheerfully made, because their interests are identical, and it is an elementary business proposition that facilities and rates which promote the prosperity of the

shipper also benefit the carrier to an appreciable extent. conditions apply to other branches of traffic as well as to milk. Uniform and just rates, giving no advantages what-ever to favored shippers, are of paramount importance, but the continual reduction of freight rates is of no material adwantage to the shipper, simply because the agents, factors, middlemen or consumers at the other end of the line are in-dividually or collectively astute enough to absorb the amount of such reduction, or as much of it as possible. This has been the case heretofore and is likely to continue to be so in the future.

The constantly increasing demand for milk shipped in bottles instead of cans, and the higher freight paid on bottled milk, are conditions which promise to reimburse the carrying companies to some extent for the reduction made carrying companies to some extent for the reduction made in the can rate. The superior quality of the milk produced in the country tributary to the main line and branches of your company, and the untiring attention given to the development of this traffic by the freight department and operating officials, promise a continuation of the satisfac-tory growth of this branch of traffic.

COAL TRAFFIC

COAL TRAFFIC. Again this year it is necessary to report extreme depres-sion in the anthracite coal trade, and consequently coal traffic earnings do not show that improvement which your officers had hoped to be able to place before you. For the first time in more than a decade the consumption of anthracite coal is not likely to show a material increase. It is believed by many well-informed persons, who are familiar with the trade, that these conditions are temporary and that there will be a revival of the demand and an im-provement in prices with a return of prosperity in other fields; that economy in the domestic uses of anthracite is to be looked for when in other branches of business unusual depression has led to similar conditions. On the other hand, there are also experienced and intelligent people who hold the view that the increasing use of bituminous coals, gas oil and electricity for domestic and business purposes has introduced a new factor of a most serious character, which the anthracite trade must promptly take steps to combat or the future is dark indeed for this great industry. The usual panacea has already been suggested, viz., a re-duction of the fraicht rate. It is claimed that it are mani-The usual panacea has already been suggested, viz., a re-duction of the freight rate. It is claimed that it is manifestly unfair to charge higher rates for transporting anthracite coal to the markets than are charged for hauling bituminous coal.

The earnings and details of the anthracite coal traffic have been very clearly presented by the General Manager, in this, as well as in former reports. The gross earnings from this branch of the Company's traffic may be said to have aver-aged under seven mills per ton per mile, from the time the Scranton Division was opened until the present time. It must be borne in mind that all coal traffic is one-way busi-per the time the coal traffic resonance way business, that is, the coal trains earn nothing whatever when returning from the markets to the mines. It may be stated ness, that is, the coal trains earn nothing whatever when returning from the markets to the mines. It may be stated as a further proposition that were the rates paid for hauling bituminous coal applied to a thracite, this Company would be one of those which would be obliged to retire from this branch of business, as it could not profitably haul coal to tide-water or other points at a rate of three mills per ton per mile or even less. The railways which regulate the prices of bituminous coal at tide-water and other markets haul large trains over low-grade lines to comparatively inexpen-sive terminal points, such as Norfolk, Va., for instance. The rates are abnormally low and the roads doing the busi-ness are not conspicuously prosperous. Bituminous coals are mined in various localities through-out the United States, easily accessible from the seaports

out the United States, easily accessible from the seaports and great manufacturing centres. Competition is keen and and great manufacturing centres. Competition is keen and the condition of the trade for a number of years has been unprofitable, and at times almost lamentable. Neither the owner of the fee, the operator or the miner have been at any time within the last ten or twelve years upon a basis even approaching prosperity. The old remedy of low rates has been applied with caustic severity; but without avail. To apply these conditions to the anthracite trade could in no way benefit the mine owner or operator. It is manifestly unreasonable to assume that the rail rate can be lowered and the high royalty and comparatively high price received for coal at the breaker at the same time be retained. The very low price received for bituninous coal at the mine, sometimes as low as sixty or seventy cents per ton, would not be possible in the case of the individual or Company operating an anthracite breaker, and yet it is clear that in operating an anthracite breaker, and yet it is clear that in order to compete with bituminous coal on equal terms, in the New England and other manufacturing markets, not the New England and other manufacturing markets, not only the rail rate but the cost at the mines must be reduced to the prices ruling on the bituminous product. The objec-tive point, the end to be arrived at, should be an increase in the freight rates on bituminous coal to a reasonably profitable point and not the reduction of the anthracite rate to the ruinous bituminous basis.

Aside from these considerations, there is no reason why the rate for hauling anthracite coal should be as low as the rate on bituminous coal, or lower than the present anthra-cite rates. The train loads are necessarily much lighter than those of the bituminous carrying railways, as all anthracite producing mines in this section of the country are located in the deep valleys of the State of Pennsylvania, and various computed here are distort or the country and and various summits and heavy gradients are encountered in moving the product of the mines to the markets. The The

actual transportation cost is therefore heavier than it is on actual transportation cost is therefore heavier than it is on many of the low-grade bituminous roads, over some of which fifty-car trains may be hauled. In the anthracite trade there are known nearly a dozen varieties or sizes, while there is no sizing or grading of bituminous. Soft coal is carried long distances, usually at regular inter-vals under contracts for large quantities, entered into at the beginning of each year. As it is generally run of mine coal which is dealt in, unassorted and unclassified, trains no not need to be broken up or divided in order to get a particular

need to be broken up or divided in order to get a particular size, nor need there be any storing or side-tracking. There is consequently much less switching and shunting, and cars are unloaded and returned much more promptly.

Each of these sizes of anthracite must be taken from chutes when the breaker is running and loaded into, and chutes when the breaker is running and loaded into, and carried in separate cars, and side-tracked or stored until wanted. At different seasons of the year certain sizes are in demand while other sizes may have no market whatever. Those sizes not required are dumped into storage places and thus remain until it is possible to dispose of them; or such sizes are carried in cars which are side-tracked sometimes for months at a time. As a car, in which twenty-two tons on the average can be carried, costs in the neighborhood of five hundred dollars, and as these cars are held on tracks, the average cost of which cannot be far from fifteen thous and dollars a mile, it will be seen that the accumulation of and dollars a mile, it will be seen that the accumulation of interest and cost increases at a somewhat alarming ratio. When carried at storage places, the re-handling, interest on cost of an expensive plant, and maintenance, constitute a very serious item of expense, all of which is borne by the

very serious item of expense, an of which is borne by the railway company. All of these facilities are provided, and services are in-cluded in the freight rate paid. It is also manifestly unfair to compare the freight rates paid for hauling and handling anthracite and bituminous coals without giving prominence to the fact that in the anthracite trade the custom is to deal with long or gross tons of 2,240 pounds, whilst generally in the bituminous trade only short tons are known. This difference will aver-age four thousand eight hundred pounds weight on every twenty tons carried in a coal car. twenty tons carried in a coal car.

It will thus be seen that the somewhat peculiar and complicated relations existing between the transportation com-pany and the shipper in this particular branch of traffic result in putting the railway company in the position of having to render services not only as common carrier, but also as warehouseman, factor, and sometimes as financial

The amount of capital required by an anthracite coal-carrying railroad compary to enable it to compete success-fully with other railway companies in the same territory, is therefore much in excess of the funds necessary merely to therefore much in excess of the funds necessary merely to construct and equip a line of railway. It is also a difficult task to introduce and find markets for the anthracite coals of a newly opened line. If an anthracite trade is to be conducted successfully and profitably, it is necessary to be able to reach the Northern and Western markets, as well as the tide water and Eastern consumer and costly and exten-ing the market is an extent of the Grant Lacks as well as the sive terminals are required on the Great Lakes, as well as at

sive terminals are required on the Great Lakes, as well as at tide-water points, and barges and vessels must be built or controlled, in the proper conduct of the business. The market value of the article transported bears some proper relation to the rate charged for carrying and caring for it. One must consider whether the rate charged is rea-sonable for the services performed and cannot justly com-plain because it may cost more to ship a bale of silk a cer-tain distance than it does a boy of boots. That the rate on

sonable for the services performed and cannot justly com-plain because it may cost more to ship a bale of silk a cer-tain distance than it does a box of boots. That the rate on anthracite coal is a reasonable rate there can be no doubt. In fact, that question has once already been passed upon by the Inter-State Commerce Commission and the Courts. The shipper undoubtedly would be entirely content to pay even a higher than the prevailing rate, as he has done in the past, provided he could realize more for his product at the mine. The price at the breaker and the freight rate are insep-arable factors, dependent one upon the other, and properly so. It is well known that in no other portion of the globe are freight and passenger rates so low as they are in this country, and there are no people anywhere who get the best of fuel at a costo slow. It may be authoritatively stated that last year the rates obtained by the London & North-western Railway of England for all coal handled over its lines averaged one and a quarter cents per ton per mile. The average distance was, no doubt, quite equal to the rail haul of anthracite coal to tide-water points and lake ports, It is undeniably true that competition reduces but never enhances the market price of a commodity or the rate for carrying it. It must that competition reduces but never enhances the market price of a commodity or the rate for carrying it. It must likewise be admitted that there are to-day engaged in the anthracite carrying trade too many lines competing sharply with each other for the traffic offered. In other words, there has not only been over-production in the out-put of the mines but in transportation facilities as well. The only possible remedy would seem to lie in the direction of the proper control of the product and its curtailment to the requirements of the trade. Such co-operation, if earn-est and honest, would probably lead to and secure to the producer reasonable prices and profits, and to the transpor-tation companies fair and stable rates. The officers of this Company have at all times and in all seasons, expressed this Company have at all times and in all seasons, expressed their willingness, even anxiety, to co-operate for these praise-worthy and desirable ends. As an indication that the an-

thracite coal traffic is unduly profitable, the operations of the Invacte coal traine is unutily productive, the operations of the New York Ontario & Western Railway in this particular field are frequently referred to. It may be proper to state in view of these assertions that the construction of the Scranton Division involved the building of only fifty-four miles of line. It connected with the upper coal field of Pennsylvania, three hundred and twenty-five miles of main this price has for more pear than in acting counting Pennsylvania, three hundred and twenty-five miles of main line, which had for many years been in active operation and which are admirably located for reaching the anthra-cite markets, via the lakes and tide-water, as well as at other interior rail and water points. As an entirely new operation from the coal fields to the markets it could have offered no inducement to either the capitalist or experienced railway promoter, and in fact could not as such have been built. It is not denied, on the contrary it has repeatedly been asserted in these reports and elsewhere, that the construction of the Scranton branch has been a projitable operation for your company and seems been a profitable operation for your company and seems likely to continue so, but only in connection with its then existing line and the natural advantages it possesses for reaching markets for other commodities than anthracite in all directions.

It is again a pleasant duty to state that all employes of the company have continued throughout the year to dis-charge their various duties in a faithful, efficient and satisfactory manner.

By order of the Board THOMAS P. FOWLER,

President.

UNITED STATES MORTGAGE & TRUST COMPANY.

APPLICATION TO LIST REAL ESTATE FIRST MORT-GAGE COLLATERAL TRUST BONDS ON THE NEW YORK STOCK EXCHANGE.

NEW YORK, June 18, 1898.

New YORK, June 18, 1898. The United States Mortgage & Trust Company, a corpora-tion duly organized under the laws of the State of New York, respectfully begs to make application to list its \$5,000,000 First Mortgage Trust Gold Bonds, and submits herewith a certified copy of its charter and by-laws, which shows in Section 2, Subdivisions 1 and 2, the authority of this company to loan money on bond and mortgage and to issue its bonds against such security, as follows :

Issue its bonds against such security, as follows: SECTION 2. -1. "To loan money on bond and mortgage on real estate situated within the United States, or upon the hypothecation of such real estate, or upon the hypothecation of bonds and mortgages on such real estate, for any period of credit, and repayable by way of an-nuity or otherwise." 2. "To issue bonds of said company, and to sell and dispose thereof; but the amount of such bonds outstanding at any time shall not ex-ceed the amount of moneys then owing to the said company upon the loans aforesaid; and such bonds may be payable to bearer, or may be registered bonds."

loans aforesaid; and such bonds may be payable to bearer, or may be registered bonds." In pursuance of such authority the company has loaned \$5,109,264 on first mortgage and has issued against these mortgages \$5,000,000 of its bonds. These bonds are the direct obligation of the company, and are additionally secured by the deposit with the Guaranty Trust Company of New York, trustee, of at least an equal amount of first mortgages on improved income-producing real estate in selected cities of the United States. Herewith is presented the certificate of the Guaranty Trust Company of New York, trustee, stating that these underlying mortgages have been duly deposited and assigned to it, together with all necessary certificates as to title, recording of mortgage, insurance policies as-signed, etc., etc. The amount of insurance so deposited with the Guaranty Trust Company of New York in connec-tion with these mortgages aggregates \$4,161,125, or 81 per cent of the total amount loaned. At and after the duly authorized date options of redemp-tion of bonds at par and interest may be exercised by giv-ing thirty days' prior notice to all registered holders of bonds, and by making a public advertisement once a week for four weeks previous to the date of call. The issuance of mortgage trust bonds by this company is limited by Article XV of the by-laws to ten times the amount of the capital and surplus, which now amounts to \$3,250,(00. In case foreclosure of any loan becomes necessary, it is

\$3,250,000.

In case foreclosure of any loan becomes necessary, it is withdrawn from the Guaranty Trust Company of New York, trustee, and other mortgages to an equal amount substituted therefor.

Series B-\$1,000,000,5 per cent, 5-20 years, dated May 1, 1894, re-deemable 189, due 1914; interest dates, May 1 and November 1; denominations \$1,000,\$500 and \$100; numbered from Al to A961 for \$1,000 each, B1, 2 and 4 to B72 for \$500 each, C3 to C37 for \$100each. The committee recommended that the above-described \$5,000,000 Real Estate First Mortgage Collateral Trust Gold

Coupon Bonds, Series "B," "C," "D," "E" and "F" be admitted to the list. Adopted by the Governing Committee, June 22, 1898.

SERIES "G" ALSO LISTED.

NEW YORK, August 25, 1898. At a meeting held this day, the Committee on Stock List, under authority from the Governing Committee, directed that on August 26, the \$1,000,000 Real Estate First Mortgage Collateral Trust Gold Coupon Bonds, series "G," Nos. A1 to A952 for \$1,000, B1 to B81 for \$500, C1 to C75 for \$100 each, to be added to bonds now listed, making total amount listed at that date of series "G," \$1,000,000, numbers as above above.

These \$1,000,000 bonds are originally secured by first mortgages aggregating \$1,024,660. The average amount of the several mortgage loans is \$12,495.

The properties covered are appraised by the company's own representative as follows :

\$2,440,195

Fire insurance amounts to \$954,200 and the rental of the properties is as follows :

Net income Interest on Series G bonds amounts to \$40,000.

Series G bonds are described as follows: \$1,000,000, four per cent, five-twenty years; dated August 1, 1898; redeem-able 1903, due 1918; interest dates August 1 and February 1; denominations of \$1,000, \$500 and \$100. Option for the redemption of the bonds, after five years, may be exercised by giving thirty days' prior notice to all holders of regis-tered bonds, and by making public advertisement once a week for four weeks previous to the date of the call.

Wall & Cortlandt Street Ferries Ry.-Fulton Wall Street & Cortlandt Street Ferries RR.-New Company Incorporated.-The Wall & Cortlandt Street Ferries Rail-way Co. has been incorporated, with a capital stock of \$1,000,000, to succeed to the franchises of the Fulton Wall & Cortlandt Street Ferries RR. Co., sold under foreelosure last week. The directors are F. D. Moffat, Charles Base, K. S. Hogg, E. L. Conant, H. W. Bean, M. E. Gill and J. P. Shef-field, of this city. A deficiency judgment for \$573,318 has been entered by the Central Trust Co. against the company foreclosed, to represent the amount remaining due on the mortgage. The franchise provides, it is understood, for a street railroad running as follows : From Fulton Ferry through South Street, Maiden Lane and Cort-

From Fulton Ferry through South Street, Maiden Lane and Cort-landt Street to West Street, thence along the latter to Liberty Street, and returning through Liberty Street to its junction with Maiden Lane. Also from the Wall Street Ferry to Cortlandt Street Ferry, via Wall, William and Pine Streets, Broadway and Cortlandt Street.

Wall, William and Pine Streets, Broadway and Cortlandt Street Ferry, via Wall, William and Pine Streets, Broadway and Cortlandt Street.
Rumors unconfirmed, but not lacking in probability, have suggested that the Metropolitan Street Ry. Co. will pres-ently be found in control.—V. 67, p. 428.
West Jersey & Seashore RR.—S367,008 Stock Offered at Par to Sharehelders.—" To provide a portion of the money required to pay for double-tracking the line to Atlantic City," the holders of the common capital stock are offered the priv-ilege of subscribing at par for new stock to the amount of 8 per cent of their holdings as registered on the books of the company at 3 P. M. Aug. 26, 1898. The subscriptions must be made between Sept. 1 and Sept. 15, inclusive, and payment must be made in full on or before Sept. 15, 1898. Receipts will be given exchangeable for new stock on or after Oct. 15, 1898. Sharcholders entitled to a fraction of a share may subscribe for a full share. The new issue will amount to \$367,008, and will increase the outstanding issue from \$4,587,-600 to \$4,955,608.—V. 66, p. 955.
Wheeling & Lake Erie Ry.—Coupon Payments.—On next

Wheeling & Lake Erie Ry .- Coupon Payments .- On next Thursday interest payments will be begun of two past-due coupons—a full year's interest—on all three issues of Wheel-ing & Lake Erie bonds underlying the consols. These payments will be as follows:

Wilkesbarre & Northern RR .- Sold, -This property, it is With espatric & Northern KR. -Sold. - This property, it is stated, has been sold by the Anthracite Savings Bank, as mortgage trustee, to J. W. Hollenback, E. Troxell, John Graham, John A. Schmidtt, George R. Bedford, Pierce But-ler and Thomas A. Barber. The motive power is being changed from steam to electricity, per plan in V. 66, p. 1190. Nack Southers BD. Man Officer David to W. J.

changed from steam to electricity, per plan in V. 66, p. 1190. **York Southern RR.**—New Officers — President W. F. Wal-worth of Cleveland, O., resigned Aug. 27, and D. F. Lafean of York was elected as his successor. The other directors elected are H. H. Weber, C. H. Dempwolf, H. C. Niles of York and George K. McGaw, C. I. Nes and M. H. House-man. Messrs. Niles, Nes and Houseman hold over from the former board. Pennsylvania RR. interests were recently negotiating for control, but the present election leaves it doubtful to what system, if any, the control has passed.—V. 67, p. 224. 67, p. 224.;

The Commercial Times. COMMERCIAL EPITOME.

FRIDAY NIGHT, Sept. 2, 1898.

The extreme hot weather experienced the past few days has had a tendency to interrupt business operations to some extent : still, trade conditions as a rule have been fairly satisextent; still, trade conditions as a rule have been fairly satis-factory, a moderate amount of merchandise changing hands. The retail trade has been a fair buyer of supplies to cover its wants for the fall season and in the main fair values. have been obtained. Reports received from the South stating that some effort is being made to have planters hold back their cotton at present low prices, has received some attention in the trade. A severe wind and rain storm was reported at Savannah and immediate vicinity on Wednesday. It did considerable damage to property. The Czar's proposi-tion for an international conference for the purpose of ob-taining real and lasting peace among the Powers has been a topic of considerable interest during the week.

Lard on the spot has had a fair shipping demand at the West, and locally there has been a moderate export demand from the West Indies. The tone of the market has been steady, and changes in prices have been unimportant, closing at 5:35c. for prime Western and 5:10c. for prime City. Re-fined lard has been quiet, closing at 5:60c. for refined for the Continent. The speculation in lard for future delivery has been quiet, and the tone has been unsettled, closing easy in sympathy with a decline in corn.

DAILY CLOSING PRICES OF LARD FUTURES.

DAILY CLOSING PRICES OF LARD FUTURES. Sat. Mon. Tues. Wed. Thurs. Fri. September delivery....c. 5:37 5:50 5:50 5:37 5:35 5:32 Pork has been in fair demand for export to the West In-dies but at easier prices, closing at \$9@9 50 for mess. Cut-meats also have had a fair sale to the West Indies and at steady prices. Tallow has been quiet but steady at 3% c. Cotton seed oil has been easier at 2314@2334 c. for prime yellow. Butter and cheese have been quiet but steady. Fresh eggs closed barely steady. Brazil grades of coffee have had only a limited distributing sale, but values have held steady. The market for invoices has been moderately active, business having been transacted on a cost and freight basis. Rio No. 7 on the spot closed steady at 67.16c. The West India growths have been firm but quiet, closing at 9½c. for good Cucuta. East India growths have been quiet at 24½@25c, for standard Java. Speculation in the market for contracts has been quiet and prices have weakened slightly in response to easier foreign advices. Rollowing are final aching reprices. advices

Following are final asking prices:

cases, The market for Straits tin has been easier in response to weaker foreign advices. The close was steadier at 16:10@ 16:15c. Ingot copper has continued in active demand and firm, closing at 12½c. for Lake. Lead has been quiet but steady, closing at 4:10@4:15c. for domestic. Spelter has been firm but quiet at 4:75@4:80c. for domestic. Pig iron has had a good sale at steady prices, closing at \$9 75@11 50 for domestic

Refined petroleum has been unchanged, closing at 6.50c. in bbls., 4c. in bulk and 7.15c. in cases ; naphtha unchanged at 6c. Crude certificates have been steady, closing at 99½c.; credit balances have been unchanged at \$1. Spirits turpen-tine has been firmer but quiet at 29½@30c. Rosins have been dull and lower at \$1 27½@ 1 30 for common and good strained. Wool has been dull but steady. Hops have been firm but quiet. Refined petroleum has been unchanged, closing at 6'50c. in

-

COTTON.

FRIDAY NIGHT, September 2, 1898. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 32,250 bales, against 40,278 bales last week and 8,872 bales the previous week, making the total receipts since the 1st of Sept., 1898. 11,396 bales, against 20,510 bales for the same period of 1897, showing a decrease since Sept. 1, 1898, of 9,114 bales.

Speculation in cotton for future delivery has been quiet. Special store in cotton for future delivery has been quiet. Both buyers and sellers have shown little disposition to make new ventures, holding back awaiting developments. The tone of the market has held steady and during the latter part of the week prices hardened a few points on buying by local shorts to cover contracts. The less favorable crop accounts from the Atlantic States and some talk of efforts part of the week prices hardened a tew plats on bights of local shorts to cover contracts. The less favorable crop accounts from the Atlantic States and some talk of efforts being made among planters to hold cotton back had a tend-ency to create a desire among bear operators to reduce their outstanding engagements. Saturday there was a dull but steady market. Monday prices weakened a few points early in the day in response to easier foreign advices. Subse-quently, however, heavy rains reported in the Atlantic States stimulated some buying and the early loss was recovered. Tuesday the market again opened lower. Foreign advices were disappointing and brought a few selling orders. Bear operators, however, were not aggressive, they generally hold-ing back awaiting developments. During the latter part of the day the tone was steadier. The weekly report by the Government's Weather Bureau was considered unfavorable and continued heavy rains were reported in the Atlantic States; this stimulated some buying by shorts to cover con-tracts. The close showed prices 2 to 3 points higher for the day. Wednesday there was a quiet market and under the favorable crop accounts from Texas and the Mississippi Valley prices eased off 1 to 3 points. Thurs-day the trading was more active. Both foreign and local shorts were moderate buyers to cover contracts, and there was considerable buying by a Wall Street commission house. Prices showed an advance for the day of 8 to 9 points. To day the market was easier. There was some selling for foreign account, and during the afternoon there was some selling by local account, prompted by a free movement of the crep in the interior. The close was quiet, with prices 6 to 7 points. Iower for the day. The spot market has been quiet; prices advanced 1-16c. on Thursday. The close was quiet and un-changed at 5 13-16c. for middling uplands. On the basis of the rates on and off middling as established by the Revision Committee, the prices for a few of the grades would be as follows:

BECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which for the merches the movement the outputts. finally reaches the market through the outports.

Week	Receipt	s at the	Ports.	St'k at Interior Towns.			Rec'pts from Plant'ns		
Ending-	1898.	1897.	1896.	1898.	1897.	1896.	1898.	1897.	1896.
July 29	9,728	3,207	5,539	121,674	28,743	78,164		181	723
Aug. 5	10,534	4,052	4,930	119.857	28,640	76,890	8,717	3,949	3,656
" 12	3.887	7,396	16,370	115,541	31,064	76,547		9,820	18,027
" 19	8.8.2	19,060	38,961	108,858	36,284	89,793	2,189	24,280	50,207
" 26	20 273	32,718	68,557	101,461	36,941	110,181	12,876	33,375	88,945
Sept. 2	38,250	51,271	116,990	101.730	49,890	125,827	32,519	64,220	132,536

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1, 1898, are 11,596 bales; in 1897 were 25,437 bales; in 1896 were 65,440 bales. 2.—That although the receipts at the outports the past week were 32,230 bales, the actual movement from plantations was 22,519 bales, the balance going to increase stocks at interior towns. Last year receipts from the plantations for the week were 64,320 bales and for 1896 they were 132,536 bales.

COTTON CROP CIRCULAR.-Oar Annual Cotton Crop Review will be ready in circular form about Thursday, Sept. 8. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to ensure early delivery.

WEATHER REPORTS BY TELEGRAPH.-Reports to us by telegraph this evening from the South denote that rain has been quite general during the week, but in the Southwest the precipitation was as a rule moderate and beneficial. Along the Atlantic and in portions of the Gulf States, however, the rainfall was excessive, especially so in sections of Georgia and South Carolina. Damage from various causes is claimed in Alabama and Georgia. Elsewhere the crop is doing well on the whole and cotton is opening rapidly. Picking is being retarded to some extent by the hot weather.

Galveston, Texas .- We have had rain on four days of the week, the rainfall reaching one inch and sixty-five hun-dredths. The thermometer has averaged 82, ranging from 74 to 90.

Palestine, Texas.—There has been rain on two days during the week, the precipitation being one inch and fifty-eight hundredths. The thermometer has ranged from 68 to 94,

hundredths. The thermometer has been rain on two days dur-averaging 82. *Huntsville, Texas.*—There has been rain on two days dur-ing the week, the precipitation reaching fifty-six hundredths of an inch. Average temperature 80, highest 91 and lowest 69. *Dallas, Texas.*—We have had rain on one day of the past week, the precipitation reaching twenty-four hundredths of an inch. The thermometer has averaged 86, the highest be-ter 95 and the lowest 67.

an inch. The thermometer has averaged 86, the highest be-ing 95 and the lowest 67. San Antonio, Texas.—We have had heavy rain on four days during the week, the rainfall reaching two inches and forty-four hundredths. Minimum temperature 70. Luling, Texas.—There has been rain on two days the past week, the precipitation reaching ninety-five hundredths of an inch. The thermometer has ranged from 69 to 92, averag-ing 84 ing 84.

Columbia, Texas.—It has rained heavily on five days of the week, the rainfall reaching nine inches and forty one hundredth of an inch. Average thermometer 80, highest 91 and lowest 68.

Cuero, Texas.—There has been rain on two days during the week and the rainfall reached thirty-one hundredths of an inch. The thermometer has averaged 83, the highest be-

Brenham, Texas.—Showers have fallen on four days of the past week, the rainfall reaching sixty five hundredths of an

inch. The thermometer has averaged 80, ranging from 70 to 94

Corpus Christi, Texas .- We have had rain on two days of the week, the rainfall reaching seventy-five hundredths of an inch. The thermometer has ranged from 74 to 92, averag-

inch. The thermometer ing 79. Weatherford, Texas.—We have had rain on three days dur-ing the week, to the extent of forty-one hundredths of an inch. The thermometer has averaged 79, the highest being

New Orleans, Louisiana.—Rain has fallen on five days of the week, the precipitation being one inch and twenty-nine hundredths. The thermometer has averaged 81.

hundredths. The thermometer has averaged 81. Shreveport, Louisiana.—Rain has fallen on two days of the week, to the extent of seven hundredths of an inch. The thermometer has ranged from 70 to 92, averaging 81. Columbus, Mississippi.—There has been rain on three days of the week, the precipitation reaching nineteen hundredths of an inch. Average thermometer 86; highest 98, lowest 70. Average thermometer 86; highest 98, lowest 70.

August rainfall two inches and forty-eight hundredths. Leland, Mississippi.—There has been no rain the past week. The thermometer has averaged 79.4, the highest being 91 and

The thermometer has averaged 79.4, the highest being 91 and the lowest 69. Vicksburg, Mississippi.—It has rained on three days during: the week, to the extent of ten hundredths of an inch. The thermometer has averaged 80, ranging from 70 to 90. Little Rock, Arkansas.—No rain during the week. The thermometer has ranged from 70 to 94, averaging 82. Helena, Arkansas.—Crops are spotted. Some are too rank from an excess of rain, while others have not had enough moisture. Rain has fallen lightly on two days of the week, the precipitation being sixteen hundredths of an inch. Av-erage thermometer 76, highest 84 and lowest 66. August rainfall three inches and fifty hundredths, on five days. Memphis, Tennessee.—The weather has been favorable and cotton is opening fast but picking is not general on account of the hot weather. Rain has fallen on two days of the ther-mometer has averaged 80.6, the highest being 90.3 and the lowest 70. August rainfall two inches and sixty-nine August rainfall two inches and sixty-nine lowest 70. hundredths.

hundredths. Mobile, Alabama.—Crop reports are gloomy. It is claimed's that very serious damage has resulted from rust, rot, shed-ding and worms. The week's rainfall has been two inches and seventy-six hundredths, on five days. The thermometer has ranged from 73 to 90, averaging 80. August rainfall twelve inches and thirty-five hundredths. Montgomery, Alabama.—Cotton crop reports are bad, owing to six weeks of almost continuous rain. All sorts of dam-age to the crop are reported, and the Agricultural Commis-sioner makes the condition at close of August 74. Rain has fallen on five days of the week, to the extent of one inch and seventy five hundredths. Average thermometer 80, highest 91, lowest 70. August rainfall seven inches and ninety-two hundredths. hundredths.

Selma, Alabama.—Cotton has been damaged considerably by continued rains. Too rapid growth is reported from bot-tom lands and the lower bolls are rotting on the stalk. Rust on uplands. It will require very favorable weather from now on to make an average crop. Rain has fallen on four days of the week, to the extent of one inch and seventy-four-hundredths. The thermometer has averaged 84, the highest being 97 and the lower 70

days of the week, to the extent of one inch and seventy-four-hundredths. The thermometer has averaged 84, the highest being 97 and the lowest 70. *Madison, Florida.*—It has rained on each day of the past-week, the rainfall being two inches and ten hundredths. Thermometer averaged 82, ranging from 72 to 92. *Leesburg, Georgia.*—Cotton rotting as a result of too much rain. The week's precipitation has been five inches and forty-three hundredths. The thermometer has ranged from. 68 to 88. averaging 73.

68 to 88, averaging 73. Savanah, Géorgia. - There has been rain on each day dur-ing the week, the precipitation reaching fourteen inches and thirty-four hundredths. Average temperature 78, highest 89 and lowest 69.

Augusta, Georgia.—There has been rain on each day during the week and the rainfall reached seven inches and twenty-six hundredths. The thermometer has averaged 78, the highest being 86 and the lowest 70.

Charleston, South Carolina.-There has been rain on six days during the week, to the extent of four inches and ninetynine hundredths. The thermometer has averaged 79, rang-

nine hundredths. The thermometer has averaged 79, rang-ing from 72 to 86. Stateburg, South Carolina.—There has been rain on each day the past week, the precipitation reaching three inches and twenty hundredths—too much rain. The thermometer has ranged from 67 to 83, averaging 76. August rainfall, eight inches and forty-eight hundredths. *Greenwood, South Carolina.*—There has been rain on six days of the week, the precipitation reaching four inches and nine hundredths. Average thermometer 76, highest 82, low-est 70. August rainfall, seven inches and eighteen hun-dredths

August rainfall, seven inches and eighteen hundredths.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock Sept. 1, 1898, and Sept. 2, 1897.

MANCHESTER MARKET. --Our report received by cable to-night from Manchester states that the market continues quiet for both yarns and shirtings. The demand for cloth is poor. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison.

		1898.						1897.

JUTE BUTTS, BAGGING, &C.— The market for jute bagging has continued steady during the week under review at unchanged quotations, the close this evening being at 6½ c. for 134 Hbs. and 6½ c. for 2 Hbs. of standard grades. Car-load lots of standard brands are quoted at 6½ c. for 134 Hbs. and 6½ c. for 2 Hbs., f. o. b. at New York. The market for jute butts has been dull. Quotations are nominally '80c. for paper quality and 1½ c. for mixing.

paper quality and 11/3 c. for mixing. From Messrs. Ira A. Kip & Co.'s circular we ascertain that the deliveries of jute butts and rejections at New York and Boston during August were 30,095 bales, against 50,785 bales for the same month last year, and since January 1 the deliveries have reached 339,107 bales, against 289,390 bales in 1897. The aggregate stock in the hands of importers and speculators in New York and Boston on August 31 was nil bales, against 1,000 bales at the corresponding date of 1897, and the amount afloat reaches 34,312 bales, against 56,503 bales last year.

PRIZE STEAMERS RELEASED.—The clearances from New York on Tuesday, August 30, included the two Spanish steamers Catalina and Miguel Jover, which were seized by the Government last April, but were recently released by order of a prize court. The steamers have on board the same cargoes with which they sailed from New Orleans April last, as follows: Catalina, 2,775 bales cotton for Barcelona and 400 bales for Genoa: Miguel Jover, 3,900 bales for Barcelona. THE STANDARD BALE.—A demand for a standard square bale of American cotton of uniform dimensions is now general throughout the United States and Europe. The movement among the cotton interest during the past summer has produced the endorsement of the bale of 24x54 inches, inside measurement of the country box as the standard by all the Cotton Exchanges of the United States as well as by the Liverpool Cotton Association, and the Havre and Bremen Cotton Exchanges. This action has brought about such a widespread interest that all branches of the cotton trade, from the planter to the shipper, have taken active measures in their respective territories to reach the result that upon the opening of the next season, 1898-99, cotton coming to hand will be principally packed in uniform standard boxes, 24x54 inside measurement.

The reasons for this movement are, first of all, the greatly reduced freight rate which is obtainable on packages of this size, due to the fact that they are capable of better compression, which is now brought down to 40 lbs. to the cubic foot, against 221/2 lbs. formerly.

Many shippers and steamship agents, as well as railroad carriers, appreciating this fact, have instructed their representatives to discriminate in freight in favor of the standard bale. Experiments made last season demonstrated that these standard bales could be carried with equal profit at a reduction of 40 per cent in the freight rate. While this applies to all carriers, it is a noticeable feature in the item of ocean freight; 40 per cent on present rates means from \$1 to \$1 25 per bale less than rates necessary to make a ship a profitable carrier under the old and irregular-sized bales that formerly came to hand. It does not require much thought to see where this advantage in shipping charges settles itself ; practically it is a gain to the farmer of not less than \$1 per bake according to the average of ocean freight rates prevailing during the last few years ; this gain applied to every bale of cotton he raises brings up the aggregate to say \$10,000,000 per annum, more or less, according to the size of the American crop.

In consequence of the uniformity of the package and the greater density obtained through this uniformity, the ship generally is enabled to load her dead-weight capacity, and as all shippers of cotton are familiar with the advantages of giving every ocean carrier a full cargo, competition to this end necessarily lowers the freight rate, which in turn enables the interior buyer to pay the farmer a higher price for his bale of cotton, which, especially at the present price, is most acceptable to him.

Another great advantage of the reduced measurements of the bale is that it allows the bagging to come well down over the sides of the bale, covering its contents entirely, thus reducing the chances of country damage and protecting the contents of the package from other exposure.

There is a saving also in insurance. The underwriters are prepared to make lower rates for both the fire and marine risk on account of greater density and more freedom from land damage of the standard bale.

Three years ago an effort was made in Texas to bring about a uniform standard bale. Meetings of various bodies, such as farmers, ginners and others interested in cotton, were held and resolutions passed leading to this end. At that time it was thought that a measurement of 28×58 was all that was necessary. This sized package became almost universal in the State of Texas, but later it was found that the movement was not radical enough. Consequently numerous experiments were made until it was demonstrated that the standard of a square bale as mentioned above, 24×54 , developed all the advantages desired in a square bale of cotton. Several shipments of cotton of this standard were made during the past season and reached their destination in good order, holding the density satisfactorily to all parties interested.

After the vigorous campaign of the past spring and present summer to bring about a uniform standard bale of American cotton, there is good reason for the belief that the results thus far obtained will continue to develop until the better condition in which American cotton is received has been extended to all our milling centres in this country as well as to those of all foreign countries, and that we have heard the end of the wretched way in which our great product of the South has been heretofore handled.

We wish the standard bale of 24x54 all the success that is claimed for it.

GOVERNMENT WEEKLY COTTON REPORT .- Mr. W. L. MOORE, Chief of the Weather Bureau of the Agricultural Department, made public on Tuesday the following telegraphic reports on the crop in the Southern States for the week ending August 29:

<text><text><text><text><text><text><text><text><text>

These reports on cotton are summarized by the Department as follows:

ment as follows: The week has been very unfavorable to cotton, especially over the greater part of the eastern portion of the cotton belt, where it has suffered from heavy rains, which have been continuous for the past month, causing rust, skedding and too rapid growth of stalk. In por-tions of North Carolina and over the central part of the cotton region conditions of the past week have been somewhat more favor-able and the crop is improved in Tennessee, Missourd and portions of Mississippi and Arkansas. Cotton has also improved in Central and Northern Texas, but insects are causing damage in many localities, and premature opening and shedding are reported from the central-and southern portions of the State. Picking is becoming general in the northern-portion.

the northern-portion. EGYPTIAN COTTON CROP.—Mr. F. Jao. Andres of Boston has received the following from the Cotton Department of the Anglo-Egyptian Bank, Alexandria: "Temperature during July has been hot. Worms and fogs have been very rare and have done no harm. These circumstances, so favorable to the plants, have been to a certain extent counteracted by the water difficulties. However, thanks to the great care and energy in the distributions the waterings strictly necessary have been obtainable over the greatest part of the Delta; bid he ex-tremely limited supply could not reach everywhere, the higher parts must have suffered considerably and the plants so situated are not therefore in a good condition. For some days past the Nile has risen and it is hoped by the 10th or 15th of August there will be no further plants is very satisfactory, they have in no way suffered from short-age of water. Flowering and the formation of pois is very advanced. From the Fayoum the news is nos quite so favorable."

SHIPPING NEWS.—As shown on a previous page, the exports of cotton from the United States the past week have reached 31,815 bales. The shipments in detail, as made up from mail and telegraphic returns, are as follows:

BREADSTUFFS.

FRIDAY, Sept. 2, 1898.

No improvement has been apparent in the demand for wheat flour. Bayers generally have been slow in placing orders for supplies, their purchases as a rule having been limited to small lots. In fact the trading has been almost Initied to small locs. In fact the trading has been almost exclusively of a hand-to-mouth character, and as there have been fairly free offerings of new crop flour to arrive, the tone has been essy and prices have weakened slightly. Rye flour has been in fair supply and as demand has been limited, prices have favored buyers a little. Corn meal was sold slowly and prices have weakened somewhat under fairly free effortment offerings

Slowly and prices have weakened somewhat under fairly free offerings. Speculation in wheat for future delivery has been quiet, but the tendency of prices has been towards slightly higher prices. The principal bull point has been crop damage re-ports from Russia, which have given a steadier tone to the foreign advices. Saturday prices advanced early in response to stronger foreign advices, accompanied by some buying orders, but later reacted under moderate offerings, prompted by a predicted free movement of the crop is the Northwest during the coming week. Monday prices advanced ½@¾c. There was moderate buying for both local and foreign ac-count, stimulated by the small world's shipments for the week and further talk of crop damage in Russia. The estimate by the Hungarian Minister that the world's production of wheat would be slightly below the consumption had apparently little or no influence upon the situation. Tuesday the market was easier early in the day under moderate offerings prompted by a large crop movement in the Northwest and weaker foreign advices. Subsequently, however, there developed a demand from shorts to cover contracts and the loss was recovered. Wednesday the

market was easier on weaker foreign advices, and continued large receipts at the Northwest prompted free offerings, and prices declined. Thursday the market was easier early in the day on Western selling. During the afternoon there was re-newed buying by shorts to cover contracts and prices advanced, closing ¼@½c. higher for the day. To day the market was weaker under the free movement of the crop in the North-west and easier foreign advices, closing at ¼@1½c. decline for the day. Business in the spot market was fairly active during the latter part of the week, the free movement of the crop in the Northwest causing the premiums on cash wheat to rapidly disappear. The export sales to day here and outports were 600,000 bushels. DAILY CLOSING FRICES OF NO. 2 RED WINTER WHEAT.

Indian corn futures have been moderately active and the Indian corn futures have been moderately active and the tendency of prices has been towards a higher basis; values have gradually hardened throughout the week on reports of crop damage by dry, hot weather. Early in the week the im-provement in prices was only slight, but later in the week, as the reports of crop damage by the dry, hot weather be-come more numerous, there was more disposition shown to buy and the advance in prices became more promounced. To-day the market was easier under more favorable crop ac-counts. The spot market was fairly active at lower prices. The sales for export were 350,000 bushels.

Oats for future delivery have been dull but in sympathy with the advance in the market for corn values have im-proved slightly. The crop movement has been moderately large. At the West some export business has been reported transacted. Locally, however, the volume of trading has been very moderate. To day the market was dull and easier, in sympathy with the decline in other grains. The spot market was more active. The sales for export were 270,000 bushels. bushels.

THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., Sept. 2, 1898.

NEW YORK, FRIDAY, P. M., Sept. 2, 1898. The chief feature of the week in the cotton goods division of the market has been the advance in print cloths in re sponse to the most active demand which has come forward for a long time past. This has had a modified sympathetic effect upon directly allied goods, but with that its influence has ended. In other directions the tendency has been, in fact, to favor buyers, for there the raw cotton situation still operates as chief factor. The general deman1 during the week has been well sustained at both first and sec-ond hands, and a considerable aggregate business has been recorded. The results for the month of August, so far as cotton goods are concerned, are significant of the liberal business doing throughout the country. The policy of buyers was uniformly conserva-tive; in no direction was there any trace of speculation; and yet a large aggregate business has been reported in nearly all descriptions as the outcome of steady day-to-day hand-to-mouth purchases. This character of buying is expected to keep up longer than usual, as trade at second hand is still good, and supplies held by jobbers must be quite moderate. The woolen-goods division of the market has continued inac-tive and disappointing.

tive and disappointing. WOOLEN GOODS.—The week's business in men's-wear wool-ens and worsteds for spring has been of very moderate pro-portions only and still leaves the light-weight situation very unsatisfactory. There are but few mills which have secured an average volume of business, while there are a number which have so few orders booked up to the present time that they are more likely to shut down than to continue ranning. In addition to slow new business, cancellations of early orders on serges are reported. The price situation is unsettled by these conditions, but agents will rarely quote openly any

lower prices than before. Both the overcoatings and cloak-ings divisions continue dull at previous prices. Dress goods have sold more freely but at generally easy prices. Flannels and blackets are firm, but the demand is light.

DOMESTIC COTTON GOODS.—The exports of cotton goods. from this port for the week ending August 29 were 4,218 packages, valued at \$128,595, their destination being to the points specified in the tables below :

Now Money and Lang 100		1898.	1897.

From New England mill points direct.

*From New England mill points direct. The value of the New York exports for the year to date-has been \$7,933,207 in 1893 against \$7,567,394 in 1897. In heavy brown sheetings and drills sellers have shown an easier attitude on both spots and contracts, and the tendency is in favor or buyers. The home demand is fair, but buying for export light. Fine yarn gray goods are mostly 1-16c. dearer. Bleached cottons still quiet, but low grades firmer under print cloth influences. Wide sheetings inactive at unchanged prices. Cotton blankets very firm and cotton fannels steady, with a quiet business. Den-ims dull and in favor of buyers. Ticks quiet and unchanged, plaids inmoderate request, and checks and stripes and cheviots slow at previous prices. Kid-finished cam-brics rather steadier Fancy prints in well-sustained re-quest and steady, and the demand for indigo blues, mourn-ings and other staple lines shows considerable improvement, ings and other staple lines shows considerable improvement, with a steadier tone in the market. Ginghams are in a well-sold condition with steady demand. Print cloths have sold largely and the market has alvanced 1-162., to 2 1-16c. for extras, at which price sellers are firm but the demand much unique quieter.

FOREIGN DRY GOODS.—Orders for fall lines of dress goods, silks, riobons, etc., have been numerons, but only small quantities individually called for. Demand readily met all around and prices irregular. No business of importance yet recorded for next spring.

Importations and Warehouse Withdrawals of Dry Goods

The importations and warehouse withdrawals of dry goods at this port for the week ending Sept. 1, 1898, and since January 1, 1898, and for the corresponding periods of last year are as follows:

MUNICIPAL BOND SALES IN AUGUST.

The total amount of municipal bond sales recorded in this Department during the past month was the largest total for any August since 1892, from which year our records date. In fact, the total is over three and one-half millions heavier than that for August 1895, which amount (\$8,464,431) prior to the present year was the highest total for any August ever reported. According to our records, the total of the sales of municipal securities marketed during the month of August was \$12,196,425. In this total we do not include \$1,302,600 temporary loans recorded, nor do we include the \$12,688,992 36 bonds of New York City, which, although awarded, the City Comptroller was prevented from delivering pending a decision of the Court as to the legality of the award. This decision, although expected daily, has not yet been handed down.

This total for August, as given above, compares with \$6,449,536 for August of last year and with \$7,868,563 for the month of July of the present year. Including the New York sale, eliminated from the table given below, the total would have reached \$24,-885,417, the highest for any month ever recorded, if we except November 1896—the month when the sound money cause triumphed in the Presidential election.

The decided increase in the amount of municipal securities sold during August, it is proper to say, is due partly to the sales of some large issues; there has been a decrease in the *number* of municipalities as compared with the previous month, there being 159 (emitting 188 separate issues), as against 179 (emitting 199 issues) for July. In August 1897, as it happens, there were also 159 municipalities and 188 separate issues recorded.

The month has been notable, too, for the high prices which the bonds have commanded, and the active competition indulged in by the intending purchasers of many of the issues floated.

The principal sales of the month were as follows: The Massachusetts \$1,000,000 3 per cent 30-year loan and \$2,900,000 3½ per cent 30 and 40-year loan, awarded to R. L. Day & Co. and Blake Bros. & Co., Boston, bidding jointly, at 101·309 and 110·459, respectively; Cincinnati, Ohio, \$500,000 3½ per cent 20-40-year (optional) water bonds, awarded to a syndicate, at 103·70; Essex County, N. J., \$500,000 4 per cent 40-year gold park bonds, awarded to Mason, Lewis & Co. and the Illinois Trust & Savings Bank, Chicago, bidding jointly, at 112·199; Salt Lake City, Utah, \$500,000 4 per cent 20-year refunding bonds, awarded to E. H. Rollins & Sons, Boston, at 100·575;

Washington County, Pa., \$500,000 4 per cent 3-28year Court House bonds, awarded to the Dollar Savings Bank, Pittsburg, at 109.74; Cleveland, Ohio, \$300,000 4 per cent 28-year water-works bonds, awarded to Estabrook & Co., Boston, at 113.91, also \$225,0004 per cent 10-year funded debt bonds, awarded to Whann & Schlesinger, New York, at 106.517; Norwalk, Conn, $$300,000 3\frac{1}{2}$ per cent 20-year funding bonds, awarded to Farson, Leach & Co., New York, at 101.10.

In the following table we give the prices which were paid for August loans to the amount of \$11,613,952 issued by 129 municipalities. The aggregate of sales for which no price has been reported is \$582,473, and the total bond sales for the month \$12,196,425. In the case of each loan reference is made to the page of the CHRONICLE where a full account of the sale is given.

These additional loans will make the total sales (not including temporary loans) as reported for July 1898 amount to \$7,868,563.

Kootenai County, Idaho.—No Action Taken to Test Le gality of Bonds.—Referring to our item in the CHRONICLE of May 21, 1898, p. 1010, where we stated that the Board of County Commissioners had ordered the County Treasurer to cease paying interest on the \$80,000 bonds issued in 1892, pending legal action to test the validity of the bonds, we are new advised that the case has not yet been taken into Court;

the present District-Attorney has done nothing as yet in regard to the matter, and as his term of office expires the coming fall, it will probably be left to his successor to attend to. Melrose, Mass. - City Charter. - At a special town meeting held recently the Town Moderator was instructed to appoint a committee of fifteen to draft a city charter, which com-mittee is to report at the town meeting to be held in November.

Mineral Ridge, Ohio.-Bon 1 Litigation .--The "Ohio State Journal" reports that the Council of Mineral Ridge has de-clined to pay \$10,00) worth of bonds which were issued to aid in the construction of the Mineral Ridge & Niles Electric Railway, and that the holders of the bonds (a Kansas City company), will begin suit in the United States District Court to recover on them.

New York City.-Outlying Bonds Declared Legal.-On August 26, 1898, the Corporation Counsel forwarded to the Comptroller opinions holding the following issues of bonds of outlying districts valid:

Village of Tottenville, \$30,000 rad bonds, dated December 1, 1897.

On August 31, 1898, the following bonds were declared legal:

Jamaica Union Free School District No. 7, \$125,000, dated September 10, 1897, and payable \$5,000 annually, commencing in 1950.
 New Lots, town improvement bonds, for paving Atlantic Avenue; balance of issueamounting to \$54,000, and dated May 19, 1856.

Oregon.—Status of Warrant Not Yet Determined.—We quote from the Portland "Oregonian" as follows: "The status of the \$25,000 warrant issued in payment for a branch asylum site in Eastern Oregon, yet to be determined by the State Treasurer, is a subject of interest to lawyers here. The Supreme Court rendered an opinion holding that the Treas-urer should be perpetually enjoined from paying it. Upon request of counsel for the holders of the warrant, the cause was remanded to allow the filing of an answer. The lower Court accepted stipulations and made an order authorizing the payment of the warrant. State Treasurer M-tschan has not yet passed on the matter. It is held by some that he will not be warranted in taking up the paper while the Supreme Court decision stands unreversed, notwithstanding the order of the lower court. The warrant and interest amount to about \$33,000."

Sacramento County, Cal.—Bonds Invalid.—On May 10, 1898, E. E. Gaddis, Superior Judge of Yolo County, handed down a decision in which he stated that the Board of Super-visors had not the power to levy and collect a tax for county road purposes on property situated in a municipality within a county. The Supreme Court recently affirmed this de-cision, which affects an issue of \$75,000 4% Fulsom Highway bonds sold last February. The Supreme Court finds that the powers of the Supervisors are restricted on road matters to the country portion of the county and not within the limits of municipalities, and the levy of the special tax would fall up on property-owners of the corporate cities as well as thos of the eountry districts. By levying a tax to pay for these bonds the Supervisors did indirectly what the law. prohibits doing directly—tax municipalities for road work of a district. San Francisco, Cal.—Bond Litigation.—We take the fol-lowing from the San Francisco "Chronicle" of Aug. 23, 1893: A decision rendered resterday by Judge Morrow in the United States Circuit

San Francisco, Cal.—Bond Litigation.—We take the following from the San Francisco "Chronicle" of Aug. 23, 1893:
 A decision rendered yesterday by Judge Morrow in the United States Circuit Court delays for a time the parment of interest due on the Montzomery Avenne to more, the entite amount involved being more than \$5,000400.
 The history of the bond issue and the suit in question is to the effect that on Appl 20,1872, an Act of the California Lexislature was approved which provide that the eity and county of San Francisco could issue bonds to meet the argents of the the property owners along the proposed to pay the interest on approved by the County Court, 1579, bond were issued, payable thirty years after date, unless otherwise redeemed, bearing interest at 65, payable semi-amunally. These bonds were suid to the highest bidders after being advertised. September 21, 1874, the Board of Pavolit Works, and an origin and interest and the arounty court, 1.579 bonds were issued, payable thirty years after date, unless otherwise redeemed, bearing interest at 65, payable semi-amunally. These bonds were sold to the highest bidders after being advertised. September 21, 1874, the Board of Public Works, Tabout Your, the bonds and, not correctiving any interest on them, brought a suit in equity in the United States of the work same fact of 15,000 theres, alleged to be owners of property on Montgomery Avenue. The suit was to compel the cit outidate in the bonds. The bond suit the fact has the bonds and, not correct wight and and the bonds, the bond suits of the same set of a suit reast the fact in the bond suits of the suit reast or and the the state set of the same set of a supervisors are called up to the same set of the site in the bond suits. The supervisors were called up to the same set of the site as a provided by the county of San Francisco. It reasures and the collector, and 15,000 theres, alleged to be owners of property on Montgomery Avenue. The sait was to compel the city off

Tacoma, Wash. — Warrant Litigation. — The Tacoma "News" on August 25, 1898, stated that another warrant suit had been commenced against the city and another petition filed asking that the City Treasurer be restrained from using

any of the city funds until plaintiff's warrants had been fully

any of the city funds that plant plant paid. The suit is brought by the Quaker City National Bank of Philadelphia, which holds about \$100,000 of the alleged ille-gal Boggs warrants. Substantially the same question is in-volved in all the suits recently filed, the effort being to have the courts compel the city to pay what, the city claims has once been paid. The injunction asked for against the Treas-urer will probably be heard Saturday, August 27, 1898.

Bond Calls and Redemptions.

Astoria, Ore.- Warrant Call.-City Treasurer Carney has

The County Treasurer has also called for payment warrants on General County Fund of Pierce County from No. 3701 to 5536, both inclusive, dated in 1896. Interest will cease after August 30, 1898. Also a number of warrants of various school districts in the county, interest on which will cease after September 1, 1898.
Seattle, Wash.—Warrant Call.—A. H. Foote, City Treasurer, has called for payment at his office August 31, 1898, the following warrants: Twenty-third Avenue South, Ordinance No. 4837, warrants Nos. 686 to 690, inclusive; Eighteenth Avenue, Ordinance No. 4737, warrants Nos. 702, 703, 704; East Jefferson, Twentieth and Twenty-first Avenues, Ordinance Arei, Setter August Call.—The following warrants No. 598. Babe Stockton, Cal.—Bond Call.—The following bonds of various

municipal improvement funds have been called for payment : No. 1, Bonds Nos. 38 to 40, Series 8, No. 2, Bonds Nos. 22, 23 and 24, Series 8, No. 3, Bonds Nos. 15 and 16, Series 8, No. 4, Bonds No. 22, 23 and 24, Series 8, No. 5, Bonds No. 23, 23 and 24, Series 7,

Interest on all of said bonds will cease September 10, 1898. Washington.—Warrant Call.—State warrants No. 26,651 to No. 26,930, inclusive, on the general fund, have been called for payment September 7, 1898. Amount of call, \$43,261 76.

Bond Proposals and Negotiations this week have been as follows:

Andover (Village), N. Y.—Bond Sale.—On August 24, 1898, \$20,000 4% refunding bonds were sold to W. W. Miller, Cashier First National Bank of Wellsboro, Pa., at 106:275. Other bidders were Comptroller of the State of New York, 105:875; W. J. Hayes & Sons, Cleveland, 101:41, and Peter Du Puy, Nunda, 106:25. Principal will mature \$400 yearly, from 1899 to 1918, and \$12,000 in 1918. Arkansas City, Kan.—Bonds Authorized.—The City Coun-cil has passed an order authorizing the issuance of the \$95,000 water-works bonds which were voted on August 12, as told in

cil has passed an order authorizing the issuance of the \$95,000 water-works bonds which were voted on August 12, as told in the CHRONICLE of August 20, p. 386.
Ballston Spa (N. Y.) School District.—Bonds Voted.—At an election held on August 24, 1898, the people voted to issue \$40,750 school bonds. The details of the issue will be determined later by the Board of Education.
Bellevue (Borough), Pa.—Bids.—As stated in the CHRONICLE last week, the \$45,000 4% sewer bonds were awarded to William Bell & Co., Pittsburg, at 103.03. The following bids were received:

were received:

Real Estate Savings Bank, Pittsburg, bid for \$10,000 bonds at 100.50.

Bennett, Pa.—Bond Election.—At the election to be held Nov. 8, 1898, the question of issuing \$25,000 of bonds for an additional pump and a larger engine and dynamo so as to in-crease the power of the electric plant will be submitted to a vote of the people. The question of building a town hall is also being considered.

Bountiful (Davis County), Utah.—Bonds Votet and Au-thorized.—At a special election held on August 20, 1898, this city was authorized by a majority vote of the qualified elec-tors thereof to issue \$10,000 6% conpon water-works bonds. Securities will be in denomination of \$500, dated September 1, 1898; interest will be payable March 1 and September 1 at

the Deseret National Bank, or its successors, Salt Lake City. Principal will be due and payable at the office of the City Treasurer of Bountiful September 1, 1918. Bonds will be free from taxation. Date of sale has not yet been determined.

free from taxation. Date of sale has not yet been determined. Breckenridge (Town), Col.—Bond Offering.—Proposals will be received until 8 p. m. September 6, 1898, by Jas. K. Darnell, Town Clerk, for the \$25,000 6% water bonds which were authorized at the election held on July 25, 1898. Se-curities will be in denomination of \$500, dated September 1, 1898; interest will be payable March 1 and September 1 at the office of the Town Treasurer. Principal will mature September 1, 1913, subject to call after September 1, 1908. Each bid must be accompanied by a certified check equal to 2% of the amount bid for. 2% of the amount bid for.

Cairo, III.—Warrants Not Yet Sold.—We are advised that none of the anticipation warrants maturing in 1900 and 1901, the offering of which we gave in the CHRONICLE of August 20, have yet been sold, nor have any bids been received above par and accrued interest.

The one-fine of which we gave in the CHRONICLE of Adgust 20, have yet been sold, nor have any bids been received above par and accrued interest.
Canton, Ohio.—Bond Offering.—Proposals will be received until 12 m, September 19, 1898, by Louis N. Ley, City Clerk, for \$15,000 coupon water-works refunding bonds. Securities will be in denomination of \$1,000, dated September 1, 1898; interest will be at not more than 5%, payable March 1 and September 1 at the banking house of Kountze Brothers in New York City, or at the office of the City Clerk of Canton, at the option of the buyer. Principal matures September 1, 1908. Bonds are issued pursuant to Section 2701 of the Revised Statutes of Ohio and an ordinance authorizing this issue August 8, 1898. Each bidder must accompany his bid with a certificate from the First National Bank of Canton, showing that he has deposited with said bank \$500 as a guaranty of good faith. Bids must be made on blank forms furnished by the city.
Cattaraugus (Village), N. Y.—Bond Offering.—Proposals will be received until 1 P. M. September 5, 1898, by F. S. Oakes, President of the Board of Water Commissioners, for \$6,000 4% water bonds. Securities will be in denomination of \$500, dated September 1, 1898; interest will be payable semi-annually at the Seaboard National Bank, New York City. Principal will mature \$500 yearly on July 1, from 1899 to 1910, inclusive. Bonds were authorized at the election held on March 15, 1898, and also by resolution of the Board of Water Commissioners passed at a regular meeting of said Board held on February 22, 1898. According to the official circular this village has never defaulted in the payment of any of its debts or obligations at their maturity.
Chicago, III.—Bond Offering.—Proposals will be received until 3 P. M. September 12, 1898, and mature October 1, 1918. They are in denomination of \$1,000, with interest payable April and October at the American Exchange National Bank, New York City. A certified check for 5% of the

and October at the American Exchange National Bank, New York City. A certified check for 5% of the amount of bonds applied for must accompany proposals. Cleveland, Ohio. – Proposed Bond Issue. – Local papers re-port that this city is considering the issuance of \$500,000 of river improvement bonds. Cohoes, N. Y. – Bond Offering. – On September 6, 1898, at 12 M., Miller W. Hay, City Chamberlain, will offer for sale, at his office in the City Hall, at public auction, a \$1,933 18 4% registered municipal bond of the city known as "Public Im-provement Bonds of the City of Cohoes," dated September 15, 1898; interest will be payable January 1 and July 1 at the office of the Central Trust Co., New York City. The prin-cipal of said bond will mature January 1, 1905. Terms made known at time and place of sale. This bond is issued pur-suant to Chapter 227, Laws of 1898. Columbia, Mo. – Proposed Bond Election. – An election will be held in this city on September 27, 1898, to vote on the proposition to issue \$25,000 of sewer bonds. Columbus, Ohio, – Bond Issue. – Relative to the proposed issuance of \$5,000 Third Avenue improvement bonds and \$3,500 Marshall Avenue bonds, mention of which was made in last week's CHRONICLE, we are advised that all city bonds have been tendered to the Trustees of the Sinking Fund and accepted.

accepted.

Condon, Ore.—Bond Election.—An election will be held to-day (September 3, 1898), to vote on the question of issuing \$3,(00 water-works bonds.

day (September 3, 1898), to vote on the question of issuing \$3,00 water-works bonds.
Conneautville (Borough), Pa.—Proposed Bond Issue.— The Borough Council has under consideration the issuing of water-works bonds. We are advised, however, that nothing definite has been settled in the matter.
Coshocton, Ohio.—Bond Offering.—Proposals will be received until 12 M. September 5, 1898, by F. F. Wagner, Village Clerk, for \$22,500 6% street-paving bonds. Securities will be in denomination of \$1,500, dated September 5, 1898; the first instalment of interest will be payable March 1 1900, and the remaining instalments thereafter on March 1 and September 1 at the Commercial Banking Company Bank, Coshocton. Principal will mature \$1,500 yearly on September 1 from 1900 to 1914, inclusive. Bonds are issued under authority of a city ordinance passed July 15, 1898, entitled "An Ordinance to improve Main Street," etc., and pursuant to sections 2267, 2704 and 2705, Revised Statutes of Ohio. Each bid must be accompanied by a certified check for 5% of the gross amount of bonds bid for.
Delphos (Village) Ohio.—Bond Offering.—Proposals will be received until 12 M. September 27, 1898, by W. R. Cochran, Jr., Mayor, for \$5,000 5% water-works bonds. Securities will

be in denomination of \$1,000, dated October 1, 1898; interest payable semi-annually at the Fourth National Bank, New York City. Principal will mature \$1,000 yearly on October 1, from 1916 to 1920, inclusive. Bonds are issued pursuant to sections 2835, 2836 and 2837 of the Revised Statutes of Ohio, and an ordinance passed the 9th day of August, 1898, author-izing their issue. These bonds were voted at an election held on August 8, 1898; the vote was 285 for and 60 hgainst their issuance. A deposit of 2% of the total amount of bonds will be required.

be required. Dexter, Me.—Bonds Proposed.—This town is considering the issuance of water-works bonds.
