

THE QUOTATION SUPPLEMENT

OF THE

COMMERCIAL & FINANCIAL CHRONICLE.

Entered according to Act of Congress in the year 1899 by WILLIAM B. DANA COMPANY, in office of Librarian of Congress, Washington, D. C.]

NEW YORK, APRIL 1, 1899.

THE QUOTATION SUPPLEMENT.

THE QUOTATION SUPPLEMENT, issued monthly, is furnished *without extra charge* to every annual subscriber of the COMMERCIAL AND FINANCIAL CHRONICLE.

THE INVESTORS' SUPPLEMENT, issued quarterly, is also furnished *without extra charge* to every subscriber of the CHRONICLE.

THE STREET RAILWAY SUPPLEMENT, issued semi-annually, is likewise furnished *without extra charge* to every subscriber of the CHRONICLE.

THE STATE AND CITY SUPPLEMENT, issued semi-annually, is also furnished *without extra charge* to every subscriber of the CHRONICLE.

Terms for the CHRONICLE, including the four Supplements above named, are Ten Dollars per year within the United States and Twelve Dollars (which includes postage) in Europe.

WILLIAM B. DANA COMPANY, PUBLISHERS,
PINE ST., CORNER OF PEARL ST., NEW YORK.

REVIEW OF MARCH.

The controlling influences in affairs during March were the state of trade and the course of the money market. To this should be added, as one of the important events of the month, the adjournment of Congress on the 4th of March. The present was the second or short (regular) session, so the date of adjournment was fixed in advance, and the event was of moment only because of the fact that the members succeeded in enacting all the legislation considered especially urgent, thus removing the necessity for the early calling together of the new Congress in extra session.

The course of trade continued in every way satisfactory, all reports indicating developments along the line of growing activity—and this, too, notwithstanding the serious obstacles imposed by bad weather during the preceding month and to a certain extent also during the early part of the month under review. The best evidence of the satisfactory nature of trade, not only in volume but in the matter of profits, was furnished in the many advances in wages, affecting large bodies of men, announced in many different lines of industry. The movement had been a feature of the month preceding, too, but became still more prominent during March. In some cases the advances took immediate effect, in others (as for instance the cotton goods trade in New England) they begin in April.

In the iron and steel trades the activity attained such dimensions that a very extraordinary situation developed. On account of the time necessary to

bring new furnaces in operation, and to arrange for added supplies of ore and other raw materials, a further large increase in the production of iron has not as yet been realized. On the contrary, the figures published by the "Iron Age" showed that there were fewer furnaces in blast at the beginning of March than at the beginning of February, and that the output had been reduced to 228,195 tons per week, against 237,639 tons February 1 and 243,516 tons January 1. At the same time stocks on hand, sold and unsold, underwent further contraction, after a continuous shrinkage in all the months preceding. The falling off in production did not necessarily indicate anything as to the future output, since extensive preparations were under way for adding new stacks and for bringing into operation furnaces previously idle; then also the falling off in the output was the result of wholly temporary causes—the bad weather for one thing, besides which there is necessarily always more or less blowing out of furnaces for the purpose of making needed repairs.

Nevertheless, the fact that for the moment the output was decreasing rather than increasing, and that in the case of all kinds of iron and steel it was difficult to place orders for goods for immediate delivery (current production going simply to fill orders given months ago), led to a sort of scare among consumers. As a result, an advance of unusual dimensions occurred in prices. We can give only a few instances. Steel billets at Pittsburg now sell at \$25.00 a ton, against \$18.00 early last month, while in March of last year the price was but \$15.25. Bessemer pig is quoted at \$15.15 at the same point, against \$11.50 in February and \$10.35 at the corresponding date last year. For foundry pig iron (No. 2) at Phil. \$16.00 is being asked; in February it could have been bought at \$12.00, and in March 1898 at \$10.50. What the effect of this appreciation in values is going to be on new domestic enterprises and on the export trade in iron and steel, it is too early to say.

In the money market materially higher rates have prevailed. This has followed naturally from the increasing activity in trade. But in addition several special circumstances worked to the same end. Thus some exceptional payments had to be arranged for in connection with a number of very large operations. In the first place \$11,799,657 was paid over to the Government by the Speyer syndicate as part of

the settlement between the Central Pacific and the United States; one-half of this amount was left with the depository banks, but the other half went into the Treasury. Then some disturbance to the money market was involved in connection with the payments for the purchase of the stock of the Chicago & Alton, which embraced altogether about \$24,000,000; there was a debit balance of \$17,413,862 at the Clearing House on the 16th due mainly to this transaction. The financing of the purchase of the corporations absorbed by the American Car & Foundry Company was another large transaction, calling, it is claimed, for about \$17,000,000. On the 27th 10 per cent had to be paid on the \$18,000,000 of new Manhattan stock. Furthermore, considerable money changed hands in connection with the consolidation of the Smelting concerns under the name of the American Smelting & Refining Company, and some other recently formed combinations.

On call at the Stock Exchange the rate for money on more than one occasion ruled at 6 per cent, and higher; on Monday the 20th, under the calling of loans preparatory to the payment of the \$17,000,000 referred to above by the American Car & Foundry Company, the rate temporarily advanced to 9 per cent. Again, on the 29th, 8 per cent was touched. On the 31st the extreme of 12 per cent was reached. Borrowers on industrial stocks have had considerable difficulty in securing accommodation, the more conservative banks insisting that these properties be taken only at a material reduction from ruling figures, and then be margined to the extent of 25 per cent to 30 per cent, while at the same time the borrower has been charged about one per cent higher interest than the prevailing rate on good mixed railroad stocks.

The appreciation in the value of money, however, has not been confined to the call-loan branch of the market. On time and for commercial paper rates have likewise been materially higher. The following shows the prices obtained each week for each class of loans. It should be understood that the rates in this table are on the same basis as they have always been, covering good mixed Stock Exchange collateral and not industrial stocks.

RATES FOR MONEY IN NEW YORK, WEEKLY.

Good 4 to 6 months..	4½-5½	4½-5½	4½-5½	5-6	5-6

Speculation on the Stock Exchange was made up to an unusual degree of dealings in the industrial properties, some new favorites, like Continental Tobacco, being comprised among these. The fluctuations in some cases were extraordinary. American Sugar Refining common, on reports that there was to be a settlement or combination with the independent refiners, rushed up from 136½ to 182, reacting, however, to 168 at the close, when no evidence was forthcoming of the truth of the statement. In the case of some other industrial stocks, variations of 10 points between sales were by no means rare. Continental Tobacco common (which first appeared on the list on the 15th) ranged between 43 and 64½, and

American Tobacco advanced further from 185½ to 227½. New York Air Brake made another sensational advance, and jumped from 150 to 200. In the railroad shares the speculation up to the last week was rather quiet, the main influences being the dearer rates for money and the probability of damage to the growing wheat crop by reason of the severe weather experienced during the winter. On this last point nothing definite developed, though the general belief was that the outlook for the crop was favorable. After the appearance of the Clearing House banks statement on the 25th, showing but a small further loss in surplus reserves, sentiment changed, and thereafter there was renewed activity, and indeed great buoyancy, in railroad shares, under the leadership of the Vanderbilt properties, like Chicago & North Western, New York Central, etc. Brooklyn Rapid Transit has moved in a path by itself all the month, and established a new high point, rising from 89½ to 136¾ on the acquisition of Brooklyn Elevated and various other local lines.

January 1 to Mar. 31.....	183,847,453	253,935,370	233,383,002	200,435,062

The foreign exchange market was of course largely influenced by the rise in money rates. Up to about the 24th the market was weak, and a material decline in the price of sterling bills occurred. Commercial drafts, both against cotton and grain, were only in limited supply, but the effect of dearer money was seen in a diminished demand for remittance. From the 24th on there was a sharp advance, leaving prices higher at the close of the month than at the opening.

STOCKS.

Main table for stocks with columns for 'SALES TO APR. 1.', 'Price about January 3, 1899.', 'PRICES IN MARCH.', and 'RANGE SINCE JAN. 1.' containing various stock names and their respective prices.

* All assessments paid. † First instalment paid. ‡ Second instal. paid. †† Third instal. paid. ‡‡ 4th instal. paid. § Less than 100 shares. a Trust receipts.

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a record of Boston Stock Exchange transactions in railroad securities for the past month and for the year 1899. Also a record of transactions in mining stocks for the past month and for the year 1899. The railroad securities which are active on the New York Stock Exchange are omitted from this list. We give the securities in alphabetical order under the three general headings, Railroad Bonds, Railroad Stocks and Mining Stocks. In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.

BONDS.

Main table for bonds with columns for 'Sales in March, Par value', 'Prices about Jan. 3 1899.', 'PRICES IN MARCH.', and 'RANGE SINCE JAN. 1.' containing various bond names and their respective prices.

BONDS. BOSTON STOCK EXCHANGE. Table with columns: Int. Period, Sales in March, Par value, Price about January 3, 1899., and PRICES IN MARCH (March 1, March 29, Lowest, Highest). Includes bonds like N. Y. & New Eng., 1st, 7s., 1905 J-J.

STOCKS. BOSTON STOCK EXCHANGE. Table with columns: SALES (In March, In 1899.), Price about January 3, 1899., and PRICES IN MARCH (March 1, March 29, Lowest, Highest). Includes stocks like Boston & Albany, Boston & Lowell, Boston & Maine, etc.

* Ex rights. † Assessment paid.

Table with columns: Bonds, Bid., Ask., Bonds, Bid., Ask., Bonds, Bid., Ask. Lists various railroad bonds with their respective values and terms.

§ Purchaser also pays accrued interest. ¶ In London

Table with 12 columns: Stocks, Par, Bid, Ask. It lists various stocks such as Pittsb. Ft. W. & Chic., Reading Co., and Toledo Peoria & Western with their respective prices.

Prices per share not per cent. In London. Sale price.

STREET RAILWAY SECURITIES.

Prices marked thus (\$) indicate that the purchaser has to pay accrued interest in addition to the price given. Prices not marked are flat prices—that is, the purchaser does not pay accrued interest in addition.

Table with 12 columns: Bonds, Bid, Ask. It lists various street railway bonds from cities like Albany, Allentown, Baltimore, Boston, and others, including their terms and prices.

§ Purchaser also pays accrued interest.

Table of stock quotations with columns for Stock, Par, Bid, Ask, and multiple columns for various stock categories including Hoboken, N. J., Holyoke, Mass., Indianapolis, Ind., Kansas City, Mo., Louisville, Ky., Minneapolis, Minn., Montreal, Can., Nashville, Tenn., Newark, N. J., New Bedford, Mass., New Haven, Conn., New Orleans, La., New York, N. Y., Rochester, N. Y., St. Louis, Mo., Scranton, Pa., Springfield, Mass., Toronto, Canada, Trenton, N. J., Troy, N. Y., Washington, D. C., Wilkes-Barre, Pa., Wilmington, Del., and Worcester, Mass.

† Prices per share not per cent.

x Ex-dividend.

MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. In all other cases accrued interest must be added to the price.

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation.

Table of municipal bond quotations with columns for Bonds, Bid, Ask, To Net, and multiple columns for various bond categories including Alabama, Arizona, Arkansas, California, Canada, Colorado, Connecticut, and others.

* Flat price.

Main table with columns: Bonds, Bid., Ask., To Net. for various cities including Hartford, Delaware, Dist. of Columbia, Florida, Georgia, Idaho, Illinois, Iowa, Kansas, Kentucky, and Newton Co. Includes bond descriptions like 'Police, Jan. '23 J&J' and 'Hospital Impt. June 1, 1906-1915'.

*Flat price

Table of Bonds with columns for Bonds, Bid, Ask, To Net, and multiple columns for various bond types and locations including Virginia, West Virginia, and Wyoming.

* Flat price.

MISCELLANEOUS SECURITIES.

Prices marked thus (§) indicate that the purchaser has to pay accrued interest in addition to the price given. Prices not marked are flat prices.

Large table of Miscellaneous Securities with columns for Bonds, Bid, Ask, and detailed descriptions of various securities and companies.

§ Purchaser also pays interest.

£ In London.

Table with columns for Bonds, Stocks, Bid, Ask, Par, Bid, Ask. Includes sections for GAS BONDS and MINING STOCKS, listing various companies and their financial details.

‡ Purchaser also pays accrued interest.

† Prices per share, not per cent.
