REVIEW OF SEPTEMBER.

The controlling factors in the financial and security markets during September were the tightness of money and the increasing tension in the relations between Great Britain and the Transvaal. In both directions the situation presented varying aspects from week to week—at times wearing a more assuring look, at others apparently furnishing renewed occasion for anxiety. On the whole, no real, substantial relief from the feeling of apprehension prevailing was experienced in either particular up to the end of the month. On the contrary, the Transvaal difficulty took a decided turn for the worse at the close, and the indications pointed strongly towards an early outbreak of war between the two countries.

The money market was of course the dominant, the immediate influence. But obviously even here the possibility of war in South Africa was a factor whose importance in its bearing upon the future could not be ignored. Aside from the general disturbance in the markets which usually attends the announcement of hostilities, the matter was in this instance complicated by a variety of considerations. With the enormous amounts of English capital invested in South African mining shares and the inability of investors to realize upon such investments except at a heavy loss in the event of war, the question as to the effect upon other classes of investments held by the British public, and whether there would be a further considerable return flow of American securities from abroad, was of considerable importance. Of more moment than anything else, however, was the question of our ability to command gold in the European markets. Substantial relief to our money market must come in

large part from gold imports. But with the British supply of gold from South Africa (heretofore such an important item) cut off, and England instead forced to send gold to that point to victual and equip troops, and with the necessity existing on the part of the Bank of England at such a time of keeping its position strong, the difficulty of our obtaining the needed supplies of gold would naturally be greatly increased. Thus the outcome of the Transvaal situation was of as much consequence from a money-market standpoint as it was in any of its other aspects.

At no time during the month did money market conditions here improve. There were occasions when rates eased off a little, and when as a consequence a more confident feeling developed, but as far as the position of the Clearing-House banks was concerned there was no change for the better. It is true that in one week there was a recovery in the aggregate of the surplus reserve of the associated banks, but this was brought about entirely by a vigorous contraction in the loan account—that is by a curtailment of accommodation to borrowers—a process which, while it may be wholesome in some aspects, could hardly be viewed as very assuring. Indeed all through the month this drastic process of loan contraction went on, and yet the ultimate position of the banks, as already stated, did not improve. The Clearing House statement of September 2d showed a reduction in surplus reserve from \$12,378,525 to \$9,191,250; September 9th the amount was reduced to \$2,458,925, and September 16th saw it down to only \$275,450; September 23d there was a recovery to \$2,963,700, but September 28th (the 29th and 30th being holidays) there was a drop again to \$1,724,450. Loans were decreased \$3,126,900 in the week ending September 2d, \$6,016,700 in the week ending September 9th, \$7,854,400 in the week ending September 16th, \$17,866,500 in the week ending the 23d, and \$7,752,700 in the week ending the 28th, making no less than \$42,617,200 for the five weeks. The deposits fell \$8,341,300 September 2d, \$15,354,700 September 9th, \$15,055,700 September 16th, \$20,793,000 September 23d and \$13,226,200 September 28th, or altogether \$72,770,900 for the five weeks.

Notwithstanding the shrinkage in deposits, however, the money holdings of the banks were drawn down so heavily that the surplus reserve, as already shown, was steadily depleted, and at one time, as we

have seen, almost exhausted. The holdings of gold and legal tenders were diminished \$5,272,600 September 2, \$10,571,000 September 9, \$5,947,400 September 16, \$2,510,000 September 23 and \$4,545,800 September 28—that is, in the five weeks the loss in the money holdings was but little less than twenty-nine million dollars—in exact figures \$28,846,800. With the explanation of this heavy loss of cash by the banks our readers are tolerably familiar, as the facts have been repeatedly set out in the CHRONICLE. There was a large outflow of currency to the interior each week, this reflecting in part the activity of trade all over the United States, but being mainly due to the extra demand incident to the season to move the crops. In addition, Government operations took large amounts out of the market. After increasing its cash holdings \$19,148,041 between June 1 and Sept. 1, the Treasury further depleted the supply of cash in the banks to the extent of \$3,795,260 during September. This was simply due to revenues in excess of the disbursements, with no means of getting the excess back into the channels of circulation. The Secretary of the Treasury, to be sure, began the pre-payment of the October interest on the Government debt (on the coupon bonds Sept. 18 and on the registered bonds Sept. 21), but this did not suffice to check the growing accumulations.

Very naturally, under such a state of things, money rates kept advancing, and ruled higher than for a very long time past. Six per cent on call at the Stock Exchange was reached very early in the month; in the week ending the 15th some loans were made as high as 9 per cent; in the week ending the 22d as high as 10 per cent; while in the last week some borrowers had to pay 20 per cent, and 12@15 per cent were not uncommon figures. The weekly average on call loans steadily advanced. For the week ending on the 1st it was still as low as 3½ per cent, the next week it went up to 5 per cent, the following week to 6 per cent, in the week ending the 22nd to 6½ per cent, while the last week the average was fully 8 per cent. Time loans rose to full 6 per cent for all periods.

The only prospect of relief in sight came from the possibility of gold imports. Some gold engagements on the other side for shipment to New York were announced the latter part of the month. This calls attention to the course of our foreign exchange market. On the 21st the cable reported that bankers in London admitted that £100,000 in bar gold had been purchased in the open market. The next week \$2,350,000 more gold was reported taken in London for export to the United States. As is usually the case with the beginning of such a movement, doubts were expressed as to whether the first engagements were justified as regular exchange operations. The continuance of the movement and the further drop in exchange afforded the best evidence of the nature of the transactions. As a matter of fact as money rates advanced to the extreme figures noted above, the money market completely dominated

the course of foreign exchange. The Bank of England did not make any advance in its discount rate, which remained at 3½ per cent, but in the open market the rate ruled at 4 per cent at the close. [On Tuesday of this week (Oct. 3) the rate was raised to 4½ per cent.] The tendency of sterling was almost uninterruptedly downward throughout the month. As money here became increasingly dear, there were free offerings of sixty day bills against sterling loans, and there were also sales of demand bills and cable transfers, the proceeds of which were loaned here.

The stock market naturally was more or less depressed under the growing stringency in money—in truth it was at times pretty badly demoralized. The standard stocks, however, as a rule held up remarkably well. The weak features were the industrial shares and other specialties like the local traction stocks. Among the latter Brooklyn Rapid Transit sold down from 107½ on the 6th to 75½ on the 20th, Metropolitan Street Railway from 211¾ on the 6th to 187½ on the 18th. Among the industrial shares American Ice common and preferred, American Malting common, Consolidated Ice preferred, Glucose Sugar Refining preferred, International Paper common and preferred, Knickerbocker Ice (Chic.) com., National Lead pref., and Republic Iron & Steel preferred, all sold at the lowest points of the year. In many cases considerable recovery occurred towards the close. United States Flour Milling, a new candidate for favor, which was placed on the list during the month, had a sensational break, and the common, on comparatively few transactions, dropped from 58¼ on the 15th to 24 on the 20th. The reason assigned for the break was that inside support had been withdrawn. The death of Cornelius Vanderbilt had comparatively little influence on the stocks of the Vanderbilt roads. The failure of the St. Paul Company to increase its dividend had an adverse effect on some of the granger shares.

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the last day of September. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (\$) indicate that the purchaser must pay accrued interest in addition to the price given. The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M." for mortgage; "g." for gold; "g'd." for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

Notice Change.—We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (\$).

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. In all other cases accrued interest must be added to the price.

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

† Prices are per share not per cent.

‡ Sale price.

x Ex dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.
