above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the various clevring houses at noon on Saturday, and hence in the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night. We present below our usual detailed figures for the previous week, covering the returns for the period ending with Saturday noon, March 24, and the results for the corresponding week in 1899, 1898 and 1897 are also given. In comparison with the preceding week there is an increase in the aggregate exchanges of seven and a half million dollars, the gain at New York being twenty-two and threequarter millions. Contrasted with the week of 1899 the total for the whole country shows a decline of 9.4 per cent. Compared with the week of 1898 the current returns record a gain of 58.5 per cent, and the excess over 1897 is 87.8 per cent. Outside of New York the gain over 1899 is 0'7 per cent. The excess over 1898 reaches 35.6 per cent, and making comparison with 1897 the gain is seen to be 56.9 p.c.

# THE FINANCIAL SITUATION.

Strength and buoyancy have characterized the course of the stock market the past week. The sales on the Exchange for the five days ending last night aggregate 4,452,194 shares, an average not far from 900,000 shares a day. This large volume of business has been attended by a pronounced and very general rise in prices, the advances in the case of the more active properties running from 4 to 10 points. The continued improvement in values is the more noteworthy as there have been some unfavorable developments involving special classes of properties, and which ordinarily would have adversely affected the Thus, the high valuations placed by whole list. the State Tax Commissioners upon the franchises of local corporations have been disturbing both per se and as evidence of a determination to make such corporations bear an undue share of the burdens of Again, the war between the American taxation. Sugar Refining Company and the independent refiners has this week entered upon a still more virulent phase, and President Havemeyer has taken pains to state that under prevailing conditions the dividend on Sugar stock might have to be further reduced. As a consequence the price of this stock has several times broken badly, though the declines were subsequently recovered. Yet the effect on the general market has been almost nil. After the extreme advances which have occurred there have naturally been recessions, but confidence in the character and course of the market has continued unimpaired.

Perhaps overmuch can be made of this week's buy-The impetus to the upward movement was given ing for foreign account. Of the fact that there has last week, as stated by us at the time, in absorption of the Third Avenue Railroad been such buying there can be no doubt. It is conthe firmed on every side. Its character and extent, howby the Metropolitan Street Railway. This week ever, are matters on which opinions differ. The daily there has been an additional stimulus in very extenpapers have reported purchases of 50,000 to 100,000 sive buying of stocks for European account. The shares per day on European account. These figures Third Avenue transaction grows in importance the more it is studied, and hence it is not surprising find few believers, but where definite information is out of the question, one man's guess is as good that with the advent of another week its influence in reviving speculation and promoting confidence has as another's. The buying has included some increased rather than waned. We indicated in this high-priced investment shares in small lots, as is evident from the fact that the transfer offices of sevcolumn last Saturday some of the numerous ways in eral leading companies report the breaking-up of which the occurrence was beneficial and encouraging. In addition the fact should not be overlooked that large certificates into small ones in making shipments many moneyed people and institutions had large to the other side. The buying has been most noticeable, however, in the low-priced shares of the better The amounts directly at stake in the property. class. Even if the movement has not been greatly ex. credit of the Third Avenue Company had remained aggerated, there is reason to think that the speculative good until a short time before its final embarrasselement has been more prominent in such takings than ment, and it had obtained loans from many different the investment element. Moreover, as is noted furparties and, as we know, for a very large aggregate amount. With the property in receiver's hands and ther below in our foreign exchange market, there has also been selling here for foreign account, the outlook for its successful rehabilitation somewhat the high prices inducing sales. It is a rather problematical, the integrity of these loans was put in significant fact that notwithstanding the reported jeopardy, and there can be no doubt that in the event of the complete failure of the concern the conselarge European purchases, our foreign exchange market has sharply advanced, the price quences to those who had given credit to it would of cable transfers and sight bills standing yesterday have been serious. But besides the loans made direct three-quarters of a cent higher than at the close of to the company the leading shareholders in the property had borrowed largely on their own account, last week. The truth is, conditions at the moment pledging their stock as collateral. The position of are not altogether favorable to a flow of capital this way. The Transvaal war is still a disturbing inthese lenders was even more precarious than those fluence, while money rates are high all over who had advanced money to the company. Out of it all grew that feeling of anxiety and uneasiness which Europe, discounts in the open market, London, having this week risen to 4 per cent. Very nathad weighed down the markets, and which was removed as if by magic, and in the twinkle of an eye, respond to the influence of our Gold Standard law. when the Metropolitan people by their action breathed

new life into the concern, restored value to the stock, and assured the payment of every claim against the company.

As to the revival of European interest in our shares, this can hardly occasion surprise. It is the direct result of the enactment by Congress week before last of the Gold Standard law. Competent observers have all along insisted that such a step was an indispensable prerequisite to the complete restoration of foreign confidence in American investments. Foreign bankthis fact, ers never ceased laying stress on and Americans who made visits to the other side and had a chance to understand the feeling prevailing in that regard invariably added their testimony to the same effect. No large flow of new capital this way, they have one and all said, could be expected until by legislative act all doubt as to the standard of values had been removed. Foreign investors and capitalists did not accept the sound money victory in the Presidental campaign of 1896 as conclusive on the point in question. While not underestimating the importance of that event, they contended that if the verdict meant what popular interpretation in this country said it meant, it must be followed by legislation of a positive affirmative character, giving effect to the public wish. In their estimation this was necessary not only as evidence of sincerity and good faith, but so as to make it impossible to open up the question again in the future. The required legislation was a long time in coming, but now that we have it on the statute books Europe is quick to respond to the news.

urally, speculative sentiment has been the first to

The full measure of its inportance will only be known when monetary and political conditions assume a favorable complexion. Certainly its beneficial effects in the long run can hardly be exaggerated.

Returns of railroad earnings continue to add to the strength of the stock market. Many statements of gross and net for February have been received this week, and with few exceptions they are highly encouraging. As we have so many times explained, the comparison for February is with the period of the blizzard last year, when railroad operations were so seriously interrupted and expenses so decidedly increased. But making due allowance for this circumstance, the improvement is of striking proportions. Take the Pennsylvania Railroad, that system of marvelous earning capacity and of unexcelled management. That road shows an increase for this one month, on the lines directly operated east of Pittsburg, of over 1<sup>1</sup>/<sub>2</sub> million dollars (\$1,584,500) in gross and of a full million (\$1,009,900) in net. On the lines west of Pittsburg there is an additional increase of \$903,800 in gross and of \$191,200 in net. In other words, for the combined system the improvement for this period of twenty-eight days has been almost  $2\frac{1}{2}$  million dollars in gross and not far from 14 million dollars in net. The loss last year in February was but \$189,100 in gross and \$457,500 in net. We will repeat what we have said on previous occasions, namely that none of these figures embrace the lines controlled but separately operated. If these were included, the results would be yet more striking. We furnish below a six-year comparison for the Eastern lines directly operated, being the only portion for which we can make such a comparison. This statement is useful in showing how very much the 1900 earnings exceed those for all previous years.

The quarterly report of the Bureau of Labor Statis-European discount rates in the open market remain tics for New York State has been issued this week, giving statistics as to employment for the quarter ending December 31. It affords further testimony to the activity of trade and the generally satisfactory state of the laboring classes. Some stress has been laid upon the fact that a somewhat larger number of unemployed is shown than at the end of the September quarter. But this signifies nothing. It is merely incidental to the season. There is always more or less stoppage in the closing days of the year, partly on account of the holidays, partly on account of the weather. As Commissioner McMackin points out, though the recent season was unusually mild, contractors had arranged to suspend building operations during the winter and could not readily alter their plans. The clothing trade is proverbially dull at this season. In other industries, he says, many laboring people were thrown out of work by the customary shut-down at the end of the year for taking an inventory of stock. This was notably the case in woodworking establishments, stove works and cigar factor-

ies. The only true test is to compare with corresponding periods of other years and see what the result is. In this way it is seen that conditions in the December quarter of 1899 were very much better than in the corresponding quarter of other years, and this whether the figures showing the amount of idleness at the end of the year are considered or those which deal with the extent of idleness for the whole quarter. In the latter case the results are favorable in the extreme, it appearing that only 4.7 per cent of the members of labor unions were without employment for the whole period, this comparing with 9.00 per cent in the December quarter of 1898.

The Pittsburg Cincinnati Chicago & St. Louis annual report, issued this week, should be satisfactory even to those who are contesting the policy of the Pennsylvania Railroad in the management of the property. The report is a very encouraging document and shows that Pennsylvania methods have brought the system to a high state. President Cassatt points out that the aggregate volume of tonnage transported during the year was over  $23\frac{3}{4}$  million tons (23,782,258), an increase of 18 per cent, while in the case of the ton mileage the ratio of growth was even larger. He states that the same conservative policy was continued that has resulted in building up the property and putting it in strong physical and financial condition. To that end the sum of \$306,963 was charged against income on account of extraordinary expenditures in revision of grades and alignment and other work not properly chargeable to capital account; and the further sum of \$200,000 has been set aside, one-half to meet similar outlay in the current year and the other half, as was done the previous year, toward providing for the retirement on January 1 1905 of the bonds of the Dayton & Western RR. After charging up these outlays and allowing for the  $3\frac{1}{2}$  per cent dividends paid on the preferred shares, a balance of \$917,084 remained on the operations for the twelve months, and this has been transferred to the credit of profit and loss. The conditions which have to be met in the management of the property will be understood when we say that a further decline in the rate the late year has carried the average per ton per mile down to only a little over half a cent per ton mile, the exact figure being 5.6 mills.

firm, and no change has been made this week in the official rates at any of the chief centres. It may be noted, however, that the Bank of Bombay has reduced its rate of discount from 7 per cent to 6 per cent. Last week, it will be remembered, there was a reduction by this Bank from 8 per cent to 7 per cent. The statement of the New York Associated Banks on Saturday was, as was foreshadowed in our table on Friday of last week indicating the movements of money, more favorable than preceding returns. Though there was a loss of \$1,030,700 in specie, the legal tenders showed a gain of \$670,000, making the net loss of cash only \$360,700. A reduction of \$12,-560,700 in loans, the first which has been reported since January 13, in great part accounted for the loss of \$13,966,300 in deposits, and the surplus reserve consequently increased \$3,130,875, the first increase in said item since February 3. As a result of this bank exhibit and also because the Sub-Treasury has this week been quite freely disbursing cash for

premiums on the refundable bonds, the money market has been easier. The refunding operations are progressing quite favorably, and up to Thursday \$176,-675,800 refundable bonds had been received at Washington for exchange for 2 per cents, of which \$157,-801,250 was from banks and \$18,874,550 from individuals.

Money on call, representing bankers' balances, has loaned at the Stock Exchange during the week at  $4\frac{1}{2}$ per cent and at 2 per cent, averaging about  $3\frac{1}{2}$  per cent. On Monday loans were made at  $4\frac{1}{2}$  per cent and at  $3\frac{1}{2}$  per cent, with the bulk of the business at  $3\frac{1}{2}$  per cent. On Tuesday the transactions were at 4 per cent and at 2 per cent, with the majority at  $3\frac{1}{2}$ per cent. On Wednesday and on Thursday loans were at 4 per cent and at 3 per cent, with the bulk of the business at  $3\frac{1}{2}$  per cent. On Friday the transactions were at 4 per cent and at  $3\frac{1}{2}$  per cent, with the majority at  $3\frac{1}{2}$  per cent. Banks and trust companies have loaned quite generally during the week at 3 per cent, some, however, obtaining  $3\frac{1}{2}$  per cent. Time contracts are freely offered but the demand is only fair, the majority of borrowers being inclined to wait for still lower rates. Quotations are 4 per cent for sixty to ninety days and  $4@4\frac{1}{2}$  per cent for four to six months on good mixed Stock Exchange collateral. Makers of commercial paper are not pressing their offerings, and consequently the supply of notes is only moderate. At the same time the demand is good, and on the whole improving, buyers being desirous of securing paper at current rates, which are  $4\frac{1}{2}$ @5 per cent for sixty to ninety-day endorsed bills receivable,  $4\frac{3}{4}$ @ $5\frac{1}{2}$  per cent for prime and  $5\frac{1}{2}$ @ $6\frac{1}{2}$  per cent for good four to six months' single names.

The Boers have this week sustained a severe and doubtless an irreparable loss in the death on Tuesday of Gen. Petrus Jacobus Joubert, in the 69th year of his age. He was the chief organizer of the Boer army, and the early successes of the Boers in the present campaign were largely due, it is believed, to his strategy. It is reported that General Roberts has begun a movement against the Boers from Bloemfontein and that the Boer army is strongly entrenched near Kroonstadt. The Bank of England minimum rate of discount remains unchanged at 4 per cent. The cable reports discounts of sixty to ninety-day bank bills in London 4 per cent. The open market rate at Paris is  $3\frac{1}{2}$  per cent and at Berlin and Frankfort it is  $5\frac{1}{4}$  per cent. According to our special cable from London, the Bank of England lost £370,833 bullion during the week and held £35,129,997 at the close of the week. Oar correspondent further advises us that the loss was due to the shipment of £538,000. net, to the interior of Great Britain and exports of £50,000 to Cape Colony, offset by imports of £103,000 from Holland, £10,000 from Australia and £104,000 bought in the open market.

tributed by some drawers to a demand to remit for April interest payments abroad. Quite large arbitrage operations in stocks and in other securities are noted this week, and some of the recent purchases for European account are reflected in shipments of the securities and in a demand at railroad trans-That fer offices for small share certificates. this buying of our stocks by European specunot resulted in augmenting lators has the supply of exchange to any appreciable extent is sought to be explained, as stated further above, by some close observers of the market by the statement that concurrently with the buying of low-priced speculative stocks there has been large selling by Europeans of some of the high-priced properties. It is suggested as another reason for the absence of exchange resulting from security purchases that the properties bought have been forwarded to only a limited extent, and that as the buying has been chiefly for the purposes of speculation the purchases are being carried here, and that they will be so retained until such time as they can be resold at a profit. The moderate supply of commercial bills, above noted, is chiefly observable in cotton drafts, which have largely decreased in volume. There are some grain bills in the market and about the usual amount of offerings of drafts against provisions, petroleum and manufactured articles. Gold received at the Custom House during the week amounted to \$5,152. The payments at the Assay Office for domestic bullion were \$1,155,295 82 and for foreign bullion \$287,679 92.

Nominal rates for exchange quite generally advanced after Tuesday, from  $4\ 83@4\ 83\frac{1}{2}$  for sixty-day and 4  $86\frac{1}{2}@4$  87 for sight, to 4  $83\frac{1}{2}$  for the former and 4 87 for the latter. Rates for actual business opened on Monday at an advance of one-quarter of a cent all around, compared with those at the close on Friday of last week, at  $4.82\frac{1}{4}@4.82\frac{1}{2}$  for long,  $4.85\frac{1}{2}@4.85\frac{3}{4}$ for short and  $4 86\frac{1}{4}@4 86\frac{1}{2}$  for cables. The market was firm, though only moderately active. On the following day there was a further advance of onequarter of a cent in rates for actual business for short sterling and for cables, to  $4.85_4^2@4.86$  for the former and  $4.86\frac{1}{2}@4.86\frac{3}{4}$  for the latter, while long sterling remained unchauged. The tone was strong and it so continued on Wednesday, when there was a rise in rates for actual business of one-quarter of a cent all around, to  $4\ 82\frac{1}{2}@4\ 82\frac{3}{4}$  for long,  $4\ 86@4\ 86\frac{1}{4}$ for short and 4 863 @4 87 for cables, and at the same time Continental exchange moved upward. The tone was strong and it so remained on the following day, though then no change was made in rates. The market was firm on Friday. The following shows daily posted rates for exchange by some of the leading drawers.

DAILY POSTED RATES FOR FOREIGN EXCHANGE.

The foreign exchange market has been strong this week, influenced by easier rates for money in our market and by the firm tone for discounts at the European centres. It is claimed in some quarters that there has been buying recently of long sterling for investment, and that this, together with the only moderate supply of commercial bills, probably accounts for the higher price for sixty-day exchange. The rise in short sterling and in cable transfers is at-

+ The Austro-Hungarian Bank Statement is now issued in Kronen and Hel ler instead of Gulden and Kreutzer. The reduction of the former currency to sterling £ was by considering the Gulden to have the value of 50 cents. As the Krone has really no greater value than 20 cents, our cable correspondent in London, in order to reduce Kronen to £, has altered the basis of conversion by dividing the amount of Kronen by 24 instead of 20.

\* The division (between gold and silver) given in our table of coin and bullion in the Bank of Germany and the Bank of Belgium is made from the best estimate we are able to obtain; in neither case is it claimed to be accurate, as those banks make no distinction in their weekly returns, merely reporting the total gold and silver, but we believe the division we make is a close approximation.

Note.-We receive the foregoing results weekly by cable, and while not all of the date given at the head of the column, they are the returns issued nearest to that date-that is the latest reported figures

# THE FRANCHISE-TAX HEARINGS.

After prolonged delay-made necessary by the always been to learn the salable value of the property. vague and indefinite nature of their task-the Tax Commissioners have fixed the valuations for the va-This ascertained, they assessed it either at its "full and true value," as prescribed in the general tax law, rious New York corporations under the Special Franor at one-half or two-thirds that value, as has become chise-Tax Act. As was expected, the fixing of these rather generally customary. The salable value was assessments has caused on one hand some consternation in the market for the securities affected (though discovered by comparison with actual transfers of adjacent property—a reasonably sure and sound basis of they advanced yesterday on buying in of "short" contracts put out in expectation of the news), and on estimate. the other hand it has drawn forth a storm of protest. Except for Senator Ford's fantastic plan of using This particular tax-levy, indeed, bids fair to be more stock-market valuations, less the value of the tangifruitful of litigation than any public act in this State ble assets, as an absolute basis for assessment, no suggestion has been made as to a uniform method of during many years. The new taxation laid on many of the companies is extremely heavy. The Metropolappraisal. The final objections to the Ford plan are itan Street Railway, for example, assuming last year's familiar. But public franchises are not sold intact; therefore the methods used in real-estate assessment tax rate of 2.48 per cent, would have to pay in taxes \$1,500,000 more than it paid last year-its franchise were impracticable. This fact at once reduced the assessment being \$62,068,930. The Manhattan Eleappraisal, on any other basis, to a mere matter of vated whose franchise the Commissioners assess at guesswork. A public grant or franchise might have \$55,499,300, would have to pay \$1,380,000. an apparently great value. But the value might be The Third Avenue, with a franchise assessment of \$19,potential merely, in which case a just assessment 728,100, would be called on for \$492,000. The Conwould be guided by no known rules; or the franchisesolidated Gas Company would pay an almost equal might prove on experiment to have no earning power,

sum; the Brooklyn Heights Street Railway system would pay something over \$700,000.

We do not mention these sums as measuring certainly the new charges which the companies will have to bear. The assessments are announced as tentative, and the companies will have their formal hearing at Albany within the next few days. The point of interest in these appraisals, however, is that in each of the street railways named this additional tax, if imposed without qualifying offset, would exceed considerably the amount left over annually in recent years after the payment of present dividends. In the case of one of the companies named above the tax imposed would more than have exhausted the surplus over fixed charges in either 1899 or 1898. The most extraordinary part of the whole affair is that nobody, so far as we are aware, knows how or why these particular figures were arrived at by the Tax Commissioners.

When the New York Legislature a year ago enacted the Ford Franchise-Tax law, we pointed out that the . most serious obstacle in the way of the statute was the impossibility of applying a uniform and equitable method of assessment. The hearings which the Tax Commissioners have thus far held in New York this week on the assessments fixed for the various New York. City corporations have pointedly illustrated the hope-. lessness of such an undertaking. The chief difficulty. has been found to exist exactly where all observant critics predicted. The tax law classes all public franchises as real estate. It prescribes that "the terms 'land,' 'real estate' and 'real property,' as used in this chapter, include \* \* \* all surface, underground or elevated railroads, including the value of all franchises, rights or permission to construct, maintain or operate the same in, under, above, on or through, streets, highways and public places." The same classification is made to cover rights granted to private companies to operate through or under public streets "any mains, pipes, tanks, conduits or wires, with their appurtenances, for conducting water, steam, heat, light, power, gas, oil or other substances; or electricity for telegraphic, telephonic or other purposes."

Now the valuation of real estate, for purposes of taxation, has been made along certain well-defined lines. At bottom, the effort of the Tax Assessors has

and therefore no actual value, which would make an assessment clearly inequitable.

In their New York valuations the Assessors have encountered both obstacles, and others in addition. On the New York Steam Company, for instance, they had fixed a valuation of \$732,500, but the statement of the company's representative showed that it was a losing enterprise, which was in debt to the estate of its projector. A valuation of \$10,000 was fixed on the franchise of the Ocean Electric Railway of Far Rockaway, which does not pay interest charges. The franchise of the Amsterdam Electric Light, Heat & Power Company, which has virtually passed out of existence, was assessed at \$47,000. One small Brooklyn street railway company, whose franchise is valued by the Commissioners at \$74,000, has been unable to earn dividends. These are but several among many instances. It is of course possible that these especially objectionable points will be smoothed over. But the fact that such gross misjudgments were possible, even on a first appraisal, is sufficient comment on the hodge-podge law which has left so grave a matter in a condition of such complete uncertainty.

When the companies were heard before the Governor last year, ex Senator Hill, though protesting against the proposed system of assessment, declared in behalf of the companies that they had no wish to evade their share of taxation, and intimated that they would readily assent to a percentage tax on gross earnings as a return for franchise privileges. This plan had already been tried with good results by various municipalities, and it has since been placed among the New Jersey statutes, which now levy 2 per cent of gross earnings, less any local franchise tax already paid.

The advantages of the plan, as distinguished from the project of assessment in arbitrary sums, are obvious. Unfairness to the corporation is avoided because a struggling company whose franchise privileges are bringing it little or no return will have its burden adjusted to its capacity to bear it. A worthless franchise will not be subject to such haphazard guesses as have been made public this week. On the other hand, an exact and automatic measure will be provided for the relative value of franchises held by rich and powerful corporations; but the system will in the long run equally inure to the benefit of the State; for it must be remembered that, since assessors are fallible, they are at least as likely to err by underrating the true worth of a valuable public franchise as by overestimating its actual value. What is a matter of almost equal importance, a mass of troublesome litigation inevitable under the existing law would be avoided almost entirely and the State would be able to reckon in advance substantially what it could look for from the

# MEXICAN NATIONAL—ITS GROWTH AND ITS NEEDS.

We have often directed attention to the wonderful growth and development that is taking place in the traffic and revenues of the Mexican railways. The fact is emphasized anew with the appearance of every succeeding annual return giving the results for a year later. The Mexican National Railroad has this week issued its report for the calendar year 1899. It is significant of the growth that has been established in the case of this property, and the likelihood of continued expansion in the future, that the management should be driven to discussing quite at length what means can be adopted for making the property equal to the probable demands upon it.

Ordinarily the problem how to provide for an enlarging traffic is not a very difficult one. In the Mexican National case the matter is complicated by the fact that the road is narrow-gauge. This has been considerable of a handicap in the past, and the drawback is becoming an increasingly serious one now that the traffic is expanding to really large proportions. As is well known, narrow-gauge roads are not well adapted for moving economically a heavy volume of traffic. As concerns the Mexican National, there is this further disadvantage that the other principal roads in Mexico, more particularly the Mexican Central, the Mexican International, the Mexican Railway and the Monterey & Mexican Gulf are all standardgauge.

The report before us shows that in the late year the gross earnings were added to in amount of over threequarters of a million dollars (\$756,755) and the net earnings in the sum of \$418,613, both stated in Mexican currency. The increase in the one case is 11.95 per cent and in the other case 13.99 per cent. If this improvement stood by itself-that is, were not additional to noteworthy gains in the years preceding—it might be possible to attach too much importance to it. As it is, the improvement is progressive and cumulative, the increase for 1899 being simply one of a series of increases extending back a good many years. If we compare with 1891 we find that in that year the gross was only \$4,206,423, while for 1899 the total is \$7,087,675; the net in the interval has increased from \$1,159,021 to \$3,410,402. In other words, in eight years the gross has risen about 70 per cent and the net has nearly trebled. In order more clearly to indicate the steady growth from year to year, we present the following summary of the yearly figures. The only break in the upward movement, it will be observed, occurred in 1893, and this followed mainly from the circumstance that in 1892 traffic was swollen by extraordinarily heavy imports of corn into Mexico from the United States, owing to the complete failure of the Mexican corn crops in that year. The Mexican crops proving satisfactory in 1893, these importations were not repeated.

### tax.

We have not opposed the scientific and reasonable taxation of really productive public franchises. But we have contended from the first, and still believe, that the present law is neither scientific nor reasonable. We think that, as the experiment continues, even its authors will learn that a haphazard system of taxation is an injury and annoyance to both parties, and that the State is probably not the least sufferer. Eventually, we imagine that the whole question will go, as it ought to have gone in the beginning, and as it would have gone but for the impetuous haste of Governor and Legislature, into the hands of a trained and competent commission.

The second se	Gross	Net
Year-	Earnings.	Earnings.
1899	\$7,087,675	\$3,410,402
1898	6,830,919	2,991,789
1897	6,080,663	2,986,237
1896	5,299,025	2,525,957
1895	4,513,206	2,071,403
1894	4,329,078	1,891,962
1893	4,224,804	1,638,437
1892	4,756,029	1,700,613
1891	4,206,422	1,159,021

1889		666,692

future is whether there is a probability of this growth being continued, and if so whether the Mexican National can handle the additional traffic so as to make a profit out of it. On the first part of this question President Raoul gives some interesting statistics which leave no room to doubt that the growth recorded by the Mexican National has extended also to the other leading Mexican roads, and hence is to be regarded not as exceptional but as a normal condition, indicative of Mexico's progress and advancement. For instance, he points out that in the five years from 1893 to 1898 the earnings per mile of the Mexican Central increased 60.76 per cent, or 12.15 per cent per year; the Mexican National increased 52.19 per cent, or 10.43 per cent per year; the Mexican International, 48.27 per cent, or 9.65 per cent per year; the Mexican Railway, 45.23 per cent, or 9 05 per cent per year; and the Monterey & Mexican Gulf, 41.48 per cent, or 8.29 per cent per year. The statistics of the country's external trade tell the same story. In the year ending June 30 1894, the imports into Mexico were valued at \$30,-270,000; in the year ending June 30 1899 the amount had increased to \$50,369,000. The exports from Mexico rose from \$79,320,000 in the fiscal year 1894 to \$138,478,000 in the fiscal year 1899.

The foregoing record is obviously very satisfactory

as far as the past is concerned. The question for the

After citing various statistics of this kind, Capt. Raoul is moved to say: "In view of the foregoing testimony of the quick and continued response of business and enterprise to increasing transportation facilities, the established sound conditions under which all departments of business are being conducted in Mexico to day, the enormous extent of the yet undeveloped resources of the country, and the large and wide range of opportunities for profit yet open to capital and energy, it would be hazardous on the part of owners of railways in laying plans for fitting their properties for future demands to conclude that these favorable conditions are not to continue in approximately the same ratio for many years to come."

This is a perfectly valid conclusion and it rests upon sound premises. What, however, is equally important is that the President of the Mexican National feels impelled to add that if this forecast be true the northern and southern ends of the system, which comprise the older sections taken over at its purchase in 1887, will be unequal to carrying the traffic which will soon be offering, and the road's limit of net earnings may be expected to be reached at no very distant day. The gross earnings, he states, may and doubtless will continue to expand for some time to come, but under such a pressure of increasing in tensity as to subject them to the operation of that economic law known as the law of diminishing return. The system in 1899 earned gross per mile of \$5,705. Eliminating the Texas Mexican Railway and the Matamoros Branch, and making allowance for the light traffic branches, the main stem, he declares, has borne a traffic of little less than \$8,000 per mile, and that of the Southern or Mexico Division has much exceeded this, making it, he thinks, the heaviest of any narrow-gauge line in the world. He has studied the returns of the India railways and finds that at \$7,056 per mile (the average of the Mexican system of the Mexican National) the latter earned more per mile than any of the India lines, while in the average

ing the road from narrow gauge to standard gauge, his remarks make it evident that he does not think the security-holders can be prevailed upon togive their sanction to such a comprehensive scheme.-In fact, he states that the matter was presented to the consideration of the majority interest in the Second Mortgage "A" and "B' bonds, and that these holders, though deeming the change desirable, concluded it was impracticable of being carried out. The estimated cost of the change (including the building of a standard-gauge cut off from a point on the El Salto line to a point south of San Miguel, shortening the through route about forty miles) was about 5<sup>1</sup>/<sub>2</sub> million dollars at the prices prevailing early in 1899, after deducting salvage on discarded prop-Discussion of the subject seemed opportune erty. because the time had come when the growth of traffic made large additions to the rolling stock essential, and the period was also approaching when extensive rail renewals would be called for. It was thought that this work might be done contemporaneously with the change of gauge, thus effecting a saving all around.

As the security-holders have failed to give their adhesion to this scheme, President Raoul now offers an alternative proposition, involving a smaller outlay and which seeks to add to the carrying capacity of the road without altering the gauge of track. The idea is to provide merely for absolutely necessary improvements to take care of and encourage the growing business. The plan contemplates changes of alignment at various points, reduction of grades, the laying of heavier rails, the ballasting of track, the replacement of light iron bridges with heavier structures, the substitution of iron or masonry for wooden trestles, and kindred work. The management have evidently given the matter much thought and consideration. They estimate that the capital requirements for these purposes will foot up \$1,056,000 in gold. Even if nothing is done about changing the gauge, this much will have to be spent in any event to enable the road to handle an increased business with due economy.

We think, however, that the security-holders will make a mistake if they do not reconsider their determination and adopt the larger scheme and arrange at once for converting the road to standard gauge. In no other way can full efficiency in operations be attained. In no other way can the ultimate needs of an increasing traffic be provided for. In no other way can the road hope to overcome the disadvantages now existing in its competition with rival lines. In no other way can the traffic possibilities be developed to the utmost and the maximum of profit be attained from the business handled. It is everywhere admitted that the change will have to be made sooner or later-if not now, then a few years hence. To spend a million dollars in improving, the system while leaving its main defect uncorrected will be at best only a makeshift-a temporary expedient to tide over present needs, while leaving the future still uncared for. It looks very much, too, like a wasteful method, since when the change of gauge is finally determined upon (as it eventually must), the improvement work now to be undertaken will in great part have to be done all over again.

A narrow-gauge road is at many disadvantages as

compared with a standard-gauge line. For one thing, it is not possible to operate such powerful locomotives or such large cars over it. Because of this, very heavy train-loads are out of the question. And yet, as every one knows, all the efforts of railroad managers in recent years have been directed towards increasing the train-load, so as to diminish the cost per unit of work. With the great decline in rates which has occurred on United States roads, general bankruptcy must have ensued except for the contemporaneous reduction in the cost of rendering the service. The Mexican roads still obtain quite high rates. The figures are not usually contained in the reports, but from a statement given this time by President Raoul we see that on the Mexican National the average per ton per mile in the late year was 2.49 cents. It may be noted that the Denver & Rio Grande began changing its gauge (in 1886) when its rate was as high as 2.60 cents. Conditions in Mexico are in many respects different from those in this country. It seems certain, however, that a gradually decreasing average rate must be looked for. With such a result in prospect the expense per unit must likewise be reduced. We have already indicated how this will have to be done. It is true that, thanks to the excellence of the management, very good results have been obtained even with the present narrow-gauge road. But it will not be safe to presume too much or too long on the continuance of this condition.

A point has been reached where the traffic is growing too heavy to handle economically under present arrangements. As Capt. Raoul states in the remarks quoted by us above, further gains will be subject to the law of diminishing returns—which means that the profit will finally reach the vanishing point. The competitors of the Mexican National, being standard gauge, will not have this difficulty to overcome. It would seem the part of wisdom, therefore, for the security holders of the National to authorize the im. mediate taking of steps for placing their road on a planc of equality with the other leading Mexican roads rather than rest content with some slight improvement work in changing grades, alignments, etc. The advantages will consist not alone in securing economy of operation (though that is all important), but also in being able to interchange traffic with the United States lines. At present, on account of the difference in gauge, traffic cannot be transferred without breaking bulk-an immense drawback, as every one will understand. If at the same time stability in the price of silver should be maintained (the price has not fluctuated widely during the last eighteen months) the outlook for the property would

# THE SITUATION IN FIRE INSURANCE.

To the present prosperity of this country there is one notable and lamentable exception, for fire underwriting is in a bad way. It is generally assumed that, roughly speaking, 55 per cent of premiums will go for losses and 35 per cent for expenses; yet this proportion, which is undesirably large, has been far outrun in 1899. The expense ratio falls a little below this (33.33), but the loss ratio reaches the extraordinary figure of 92.77, making a total of 126.10. This is the net result—the extremes are much worse. The net excess of losses incurred and expenses paid over premiums is \$5,070,121; of a total of 168 companies doing business in this State, 46 did save a fragment of premiums, and when the figures of the 46 are taken out the loss above premiums less expenses rises to \$5,348,928.

Yet even this does not show the result at its worst. For no year is complete by itself, and the increase or decrease in liabilities—mainly in unearned premium or "reserve" but also including unpaid losses and some other liabilities—has to be considered in order to arrive at the change in financial condition. Any remainder of premium above expenses paid and losses incurred, plus any decrease or minus any increase in liabilities, or on the other hand any deficit of premium minus any decrease or plus any increase in liabilities, will show how the underwriting balancesheet has changed during a year. Thus it might be that the year's losses had more than consumed the year's net premiums, and still a decrease in liabilities might produce an underwriting betterment. Taking the stock companies reporting in this State—and using losses paid and including fire-marine and inland premiums, which are not large enough to materially affect the result—it appears that in six of the last twelve years there was an aggregate underwriting gain of nearly 44 millions, but that in the other six years there was an aggregate loss of nearly  $51\frac{3}{4}$  millions. The year 1893 came out badly with an underwriting loss of over 10 millions, followed by four years of gain; then 1898 showed loss again with nearly two millions, and 1899 came out thus:

Premiums received	\$134,450,639
Losses pald\$91,031,676	
Expenses	
	143,881,005
Deficit	\$9,430,366
Add increase in liabilities	8,998,526
Loss	\$18,428,892
This shows the effect of the year's operat	
1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	a of lawson

the underwriting balance-sheet, but the ratio of losses incurred and expenses paid goes as high as 200 in one case, it exceeds 100 in some forty cases, and in eight cases the losses alone exceed the premiums. Losses in the old city of New York were about 3 millions in 1897 and 4 millions in 1898, but increased by nearly 150 per cent of the latter in 1899, and in the entire country the loss increased nearly 141 millions. This is absolute loss, and the relative loss of the companies is enhanced by the fact that unrestrained competition has been pushing down the average premium rate. As compared with life insurance, fire insurance has the difficulty which inexactness of conditions presents over exactness. Particularly during the last twenty years, and in cities, the conditions of building, of occupancy, of manufacturing and of lighting have been greatly changing; new materials, new industries, new processes and new habits have so affected the

be exceedingly bright.

There is very little to say as to the income account for the year. After providing for the cost of exchange and replacements and improvements, a balance of \$1,212,314 remained in U. S. currency on the operations of the twelve months. Interest on the first mortgage bonds called for \$667,400, leaving a surplus of \$545,414. A dividend of 4½ per cent has just been declared on the \$12,265,000 of second mortgage "A" bonds. The rate paid on these bonds has been gradually increasing. In 1899 and 1898 holders received only 3½ per cent each year, in 1897 3 per cent, in 1896 1½ per cent and in 1895 but 1 per cent, while in 1894 nothing was paid and in 1893 2 per cent. conditions of hazard as to largely put underwriting to the costly task of making a new experience. This is temporary, for readjustment to changes must be expected to come to its natural end; but there must always be a difficulty of inexactness. To insure life is simply to accumulate funds against fixed average dates of payment, and therefore minimum rates are known; to drop materially below these would be certain insolvency, and nobody dares do it. But in fire insurance the fluctuations off the line of average are vast, and moreover there is no certainty about the result in any particular case; the most hazardous risk at the rashest of cut figures may go through unscathed, and the most gilt edged risk may prove a loss. Herein is wide margin for guess and "luck," and therefore great temptation to take chances on a cut-rate in order to get the business.

It is, therefore, just and necessary to admit the enormous difficulties in rate adjustments. Yet after all allowances have been made it is the certain dictum of necessity that there must be a rate, to wit, what the best collocation of experience has decided to be the minimum consistent with safety. This cannot be arbitrary; it can be obtained only from experience, and it can best be obtained from joint experience. All notions and statutes to the contrary notwithstanding, it should not be sought in any other way than by the pooling of experience into a joint common fund. But however obtained, it must be a particular rate to be maintained, not a nominal one subject to the haggling of competition. Either with or without a compact, maintenance of some definite schedule is the very essence and foundation of safety; hence the serious question is not so much whether any man is wise enough to make a rate tariff which is neither too high nor too low, as whether men are firm enough to adhere to one.

This is merely elementary. Put it to test and we find underwriting practice has consisted of a succession of gradual descents in rates followed by a desperate reaction, and of rate compacts made only to be secretly broken, then openly abandoned, and the abandonment followed by more reckless cutting. Compacts have been signed with a mental reservation—to wit, that others must be expected to cut and that those who cut first would score a temporary point in getting the business.

Currency, credit, transportation and insurance are clearly four essential factors in commercial life; their relative importance need not be discussed, but every one of them is indispensable to that life as it exists in modern times. Not having been taught by being deprived of insurance, we are, however, liable to come short of appreciating the gravity of the situation when its vigor if not its existence seems to be menaced. But early in the year the President of the National Board of Underwriters issued a circular letter to the companies, and in pursuance of that he was authorized to appoint and did appoint an advisory committee of twenty five to report in April. Here are some sentences from this letter.

fierce strife for supremacy goes on with the most reckless disregard of our obligations to the public and to those who have placed us in positions of trust and responsibility. While prosperity is attending almost every branch of business in this country, we are not in a position to command or to be benefited by it. We seem to be competing with each other in an effort to increase the expense of the business without making any earnest effort to increase our revenue to meet this increased expense.

The conditions that confront us are certainly susceptible of improvement, and as thoughful, honest and responsible men we owe it to the public, to our stockholders and to ourselves to use our experience under the sense of duty which we must realize to nnite our efforts to restore our business to a position of safety and place it on a plane of ordinary business prudence.

Now here is a large number of corporations dealing in a commodity which is absolutely indispensable. Subject only to the fresh competition which would be attracted into a perfectly open field by any really high-handed exactions, the underwriters hold the situation themselves; it is theirs to name the price, and the public must pay. So all discussion comes around to one position: they must make their sufficient price, jointly or separately, and then jointly or separately they must adhere to it. Each company that would be saved must allow others to take the business rather than recede from the position. This is elementary? Yes. It is difficult; very easy to say and very hard to do? Yes; but a twelvemonth of discussion could not reach any other alternative.

It must also be clear—and if not so no argument can make it so—that no vendor can get credence with the public when he protests that rates which he still accepts are ruinously low, so long as he has liberty to refuse them, and still more when it is entirely in his power to make them. There is too manifest an inconsistency in such a position, and action will always carry more weight than word. The figures given above show that rates are indeed too low, and it seems certain that they will be raised again; but still the insurance buyer will pay only what he must—it is not his part to stand on both sides of the counter.

It must also be clear, too, that the underwriters and the public are not in touch. There is fault on both sides. The treatment of insurance, especially by legislatures, is unwise in the utmost degree, and there is very much to be said concerning the need and the method of bringing about a better mutual understanding; but the underwriters greatly need to take themselves seriously (as the phrase goes) and to take themselves wisely as well. To arrive at a schedule; to explain it publicly and frankly, with the reasons; and then to stand rigidly upon it, visibly determined to do so even if the year goes by without writing a dollar of business—how could this fail to clarify and reform the situation? And is there anything else which can?

# ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S

-The sales of bank stocks this week aggregate 337 shares, of

It must be apparent to all thoughtful underwriters that the fire insurance business of this country is in a most deplorable condition and is rapidly approaching a crisis which will test severely the resources of the strongest corporations; that by reason of our mistakes and our unwisely directed efforts we are menaced with the distrust of the public, and that in consequence of our antagonisms and conflicts we are bringing upon ourselves most hostile and dargerous legislation.

The situation thus briefly stated has been met with apparent appathy by fire insurance companies of all kinds, and a

which 20 shares were sold at the Stock Exchange and the remainder at auction. The sales of trust company stocks reach a total of 134 shares, all sold at auction. The prices paid were in nearly every instance higher than those recorded for recent transactions, the greatest advances being Trust Company of America, 20 points; National Park Bank, 14 points, and Bank of the Manhattan Co., 15 points.

-The Brooklyn Trust Co. has prepared for distribution what might appropriately be termed a miniature atlas, giving maps of all the various States and Territories, and also of foreign countries. Though the maps are of fair size the book is not at all bulky, but convenient for either the pocket or the desk. We advise the reader to write for a copy.

On April 28 General Christian T. Christensen will retire from the presidency of the Brooklyn Trust Company, after an active business life of nearly half a century. He was born in Copenhagen in 1832, and in 1850 he came to this country and entered the employ of Pepoon, Nazro & Co., note brokers, in which firm he in 1855 became a partner. In 1861 he raised a company of Scandinavians and joined the army as First Lieutenant of the First New York Volunteers. He served through the war, and at its close held the rank of Brigadier General. In 1865 he became connected with the coffee house of B. G. Arnold & Co., remaining with that firm eleven years. In 1877 he went to California as cashier of the Nevada Bank, returning to this city in 1879 to found a branch of that institution. From 1880 to 1890 he was the manager for Drexel, Morgan & Co., leaving that firm in the last-named year to become President of the Brooklyn Trust Co. He is a director of the American Exchange National Bank and of the Schermerhorn Bank of Brooklyn, a trustee of the Brooklyn Savings Bank, and director and Treasurer of the Brooklyn Warehouse & Storage Co.

-J. S. Morgan & Co. of London announce that Mr. Robert Gordon and Mr. Frederick William Lawrence, having decided to retire from active business, withdraw from their firm to-day. Mr. Clinton Edward Dawkins, heretofore financial member of the Viceroy of India's Council, has been admitted as partner, and Mr. Edward Charles Grenfell has been authorized to sign the name of the firm.

-We alluded last Saturday to the tribute to the memory of Mr. Coster paid by the directors of the Lehigh Valley Railroad Company at their meeting on the 21st. The following is a copy in full of the minute adopted on that occasion:

Charles H. Coster, a director of this company since July, 1897, and a member of its Executive Committee, died on the 13th inst. at his residence in the City of New York after a few days' illness.

Though his interest in the property and participation in its management covered a period of less than three years, the time and intelligence devoted to it, his quick insight into intricate business problems, and his large experience in the rehabilitation and development of other railroad properties, made his work as a director of this company exceptionally effective. He had a rare judicial faculty, and in judging of the merits of questions in which the several corporations in which he was interested were involved, he did so with eminent fairness and wisdom. Gifted with large capacity for details, and indefatigable in working them out, he was capable of broad views on questions of policy, and was at once conservative and liberal. The loss of his connsel is keenly felt by his associates.

-Messrs. Whitney & Stephenson, of Pittsburg, who are members of the New York Stock Exchange, as well as of the Pittsburg Stock Exchange, have issued, in attractive form, a "Blue Book" containing statistics of and

Charles A. Feick, Jerome Taylor, William H. Staake, Forrest F. Dryden, Henry S. Redmond and Uzal H. McCarter.

-The New Hampshire bank commissioners have applied to the Supreme Court of the State for the appointment of an assignee for the Keene Guardian Savings Bank and for the Keene Five-Cent Savings Bank of Keene, N. H. Neither Bank has received deposits recently, owing to the belief that the banks have sustained losses through Western investments. The Five-Cent Bank is reported to owe \$1,449,058 and the Guardian Bank \$718,873 to depositors.

-The Mercantile National bank has made arrangements to increase its circulation to \$1,000,000, the amount of its capital. It has already taken out \$205,000, making the present circulation \$250,000. The remainder of the \$1,000,000 circulation will be procured when conditions shall justify such a movement.

-The National Bank of the Republic has ordered additional circulation to an amount sufficient to increase its notes to \$1,200,000. The circulation now is \$1,028,500.

-The law permitting the merger of the Morton Trust Co. and the State Trust Co. having been signed by the Governor, the directors of the Morton Co. on Tuesday unanimously voted in favor of consolidation. The merged corporation will bear the name of the Morton Trust Co., and the capital will be \$2,000,000. The stockholders of both companies will be called upon to ratify the proposition of consolidation.

On Wednesday the directors of the State Trust Co. voted in favor of the merger with the Morton Trust Co. The action will doubtless be ratified by the stockholders.

-The State Bank of Chicago, capital \$1,000,000 and a reserve liability of stockholders of an equal amount, and \$100,-000 undivided profits, does a varied business. It has a general banking, a savings, a trust, a foreign exchange and a bond department. The institution has recently issued some attractive pamphlets, one of which gives detailed information relating to the special functions as well as to the advantages of a trust company. This publication also contains the text of the Trust Companies Act of the State of Illinois, which became effective July 1, 1889. Another pamphlet contains illustrations of scenes abroad, which is intended to present to tourists the advantages of the travelers' letters of credit issued by the bank. The pamphlet also contains a table of the equivalents of all foreign money, and useful suggestions to visitors to Paris. The officers of the bank are H, A. Haugan, President; John H. Dwight, Vice-President; John R. Lindgren, Cashier, and Frank I. Packard, Assistant Cashier.

—It may be noted that the Hanover National Bank of this city was the first institution to send to Washington an application for the exchange into 2 per cents of the refundable bonds held by it as security for circulation.

-At a meeting of the directors of the American Loan & Trust Co. of Boston held on Wednesday, S. Endicott Peabody resigned the Presidency to accept the Chairmanship of the board of directors. N. W. Jordan, who since the organization of the company, has been its Actuary, was elected President. The Executive Committee is composed of Samue<sup>1</sup> Carr, N. W. Jordan, David P. Kimball, S. Endicott Peabody and N. W. Rice.

-Mr. C. H. Imhoff, who has been engaged in handling investment securities in this city for the past year, has just been elected a director and Vice-President of the Ninth National Bank. For fifteen years prior to his residence in this city Mr. Imhoff was engaged in the banking business in the West, during which time he was for several years manager of the Clearing House in Lincoln, Neb.

other useful information concerning financial institutions in Pittsburg and in other cities in Pennsylvania, and also of fire insurance companies. It likewise contains a list of members of the Pittsburg Clearing House Association, of the stock and bond brokers in that city, of the Pittsburg and the Alleghany school districts, of the passenger railway companies, besides many other facts of interest.

-The Fidelity Trust Co., of Newark, N. J., have elected as new directors, James W. Alexander and James H. Hyde, the President and Vice-President of the Equitable Life Assurance Soc. of this city; J. Herbert Ballantine, William N. Coler, Jr., Thomas N. McCarter, Jr., and Edgar B. Ward, counsel of the Prudential Life Insurance Co. The other directors are John F. Dryden, Leslie D. Ward, Thomas N. McCarter, senior, William Sheerer, Schuyler B. Jackson,

-The death was reported yesterday of Benjamin B. Comegys, President of the Philadelphia National Bank. Mr. Comegys was also a director of the Pennsylvania Railroad and a member of the Board of City Trustees of Philadelphia. He was very highly esteemed. His death was caused by pneumonia.

# Monetary Commercial English News

[From our own correspondent.]

## LONDON, Saturday, March 17, 1900.

Attention in the city has been monopolized during the week by the war loan. On Saturday, Monday and Tuesday the Bank of England was besieged by intending subscribers,

and everywhere the greatest interest was taken in the matter. The subscriptions have amounted to over £330,000,000, being over eleven times the amount offered. They were large from America. The lock-up of 3 per cent of this im-mense sum in the form of deposits has made money very scarce during the week. The Bank of England has done everything possible to meet the requirements of the market; but it has not been able, naturally, to succeed completely. One institution, indeed, could hardly be expected to do so. Besides, the Stock-Exchange settlement, which ended on Wednesday evening, added to the ordinary demand, although it is true that the amount of business doing is small, and consequently the Stock-Exchange demand has not been great. Still it added to the need for accommodation, and this increased the general dearth.

Apart from the loan very little has been doing Lord Salisbury's reply to Presidents Krüger and Steyn has been warmly approved of here at home; but on the Continent it has tended to discourage operations, as people fear the war will be protracted. Everything just now seems to show that the Free State is thoroughly sick of the war, and the people are inclined to accept any terms that may be offered; but the Boers of the Transvaal are possibly more obstinate and more determined, and the Continent fears that they may not only fight on for a long time yet, but that in their desperation they may attempt to destroy the machinery of the mines. In France, too, there is a curious suspicion that as soon as

the war is over this country means to compel France either to accept its terms with regard to Newfoundland and other questions or to fight. There is not the slighest foundation for such a theory, and probably it has been hatched by those who wish to discredit the Republic and bring about a revolution. Certainly there is no intention in this country to pick a quarrel unprovoked with France. The publication of the correspondence between the British and the German governments respecting the seizure of German mail vessels off South Africa has added to the general uneasiness. The tone of the German correspondence is most unfriendly, and is unusually aggressive; and, lastly, there have been alarmist rumors as to Russian designs in the Far East. All these alarms, however, will pass away. The German Government probably penned its notes rather to make a desired impres sior at home than for the purpose of influencing the British Government, and there is no reason to suppose that the Russian Government has meditated a great war.

One other influence has tended to check business. It is now certain that when the war is brought to an end a very considerable revenue will have to be raised from the gold mines in South Africa, and people are holding aloof from the market, while the amount of the taxation is uncertain. Then, again, the old fear is reviving that when the Boers are driven to their last defence they will in their desperation at-tempt to wreck the mines. To actually injure the mines themselves is, of course, impossible, but the mines might be flooded and the machinery might be seriously damaged, and people, therefore, are unwilling to buy just at present. Upon the Continent there is as little doing as here at home.

In Germany there is a disinclination to touch anything except industrial securities. They are not now buying manu-factures as they were, but most of the new industrial concerns are doing well, and they are being held firmly by investors. All over the Continent generally trade is very active, but speculation, especially in stocks, is checked. In France al-most all attention is given now to the success of the Exhibition; but there are signs of reviving interest in the Stock Exchange, although the uncertainty as to how long the war may last and as to the amount of taxation that will be im-posed deters most people from buying South African securities.

Money, as already said, has been very scarce and dear dur-ing the week, and probably will continue so for some little time longer, although it is presumed that very soon now the Government expenditures will largely exceed the revenue. In Germany money, likewise, is in strong demand. The Imperial Bank maintains its rate at 5½ per cent, and there is little probability that the rate will be reduced. There is some doubt whether the expected loan for the navy will be issued for some time yet; but whether or not, the smaller States of Germany are all preparing to borrow. Trade is exceedingly active, and as little accommodation is to be got in this country, the United States or anywhere, in-deed, except at Paris, there are complaints that the capital

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c. &c., compared with the last three years :

needed is not forthcoming as readily as formerly.	The	same
complaint is made in Belgium.		

In France, on the other hand, money is very abundant, and there are signs of some revival in trade, mainly due, no. doubt, to the Exhibition. In Russia the crisis has not yet come to an end, although the Government has given very large and very free assistance to all persons in difficulties. Much will depend on the coming harvest. If it is abundant, probably the crisis will come to an end before long. If it is bad, matters will become very grave; and the same may be said in respect to Roumania. Outside of France, in short, business is so active in every department that money even now is scarce and dear, and the prospect is that it will grow dearer and will become very scarce and dear in the autumn. The India Council has no difficulty in selling its drafts.

It offered for tender on Wednesday 50 lacs and the applica-tions amounted to nearly 52 lacs. The whole amount was allotted at prices ranging from 1s. 4d. per rupee to 1s. 41/d. per rupee.

\* Price per share.

WALL STREET, FRIDAY, MARCH 30, 1900.-5 P. M. The Money Market and Financial Situation.-Since Third Avenue Railroad affairs have ceased to be a disturbing fac tor in Wall Street and there is a general expectation that the money market will be easier as a result of recent Con-gressional legislation, the security markets have been decidedly buoyant and interest in them has broadened. The volume of business has been larger this week than for many months past under similar conditions, and recalls the early months of last year.

A considerable portion of the activity is attributed to transactions for foreign account. However this may be, the firm condition of the foreign exchange market indicates that the amount of securities sent abroad cannot as yet be greatly in excess of the receipts.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 2 to  $4\frac{1}{2}$  per cent. To-day's rates on call were  $3\frac{1}{2}$  to 4

per cent. Prime commercial paper  $4\frac{1}{2}$  to  $5\frac{1}{2}$  per cent. The Bank of England weekly statement on Thursday showed a decrease in bullion of £370,833, and the percentage of reserve to liabilities was 44.18, against 45.01 last week; the discount rate remains unchanged at 4 per cent. The Bank of France shows an increase of 3,850,000 francs in gold and a decrease of 3,325.000 francs in silver.

The New York City Clearing-House banks, in their statement of March 24 showed a decrease in the reserve held of \$360,700 and a surplus over the required reserve of \$5,917,300, against \$2,686,425 the previous week.

\* This is the price bid at the morning board; no sale was made. † Prices are quotations in the "Unlisted Department" for bonds when issued."

State and Railroad Bonds.-Sales of State bonds at the Board are limited to \$6,000 Virginia fund. debt 2-3s of 1991, at 891/4 to 891/2.

The railway bond market has been unusually strong and broad. Daily transactions were much above the recent average, and included issues not active of late. Prices generally advanced, and although there has been a recession from the highest quotations of the week, the active list closes an average of about one point higher than last week.

Stock and Bond Sales.-The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since Jan. 1:

Railroad and Misce	llaneou	s Stocks	On a v	olume o	of busi-

ness which averaged about 900,000 shares per day, the stock market was decidedly strong through the early part of the week. Interest in several hitherto neglected stocks, in-cluding Pere Marquette, Kanawha & Michigan, St. Louis Southwestern, Missouri Kansas & Texas and Kansas City Pittsburg & Gulf issues was a feature, and the first-named advanced nearly ten points. In connection with this movement there were rumors of consolidation plans. Baltimore & Ohio was in request and the common sold up to 823/4, a gain of over nine points. Chicago & Eastern Illinois made a similar record on the transfer of a few shares. Reading 1st preferred, in sympathy with the bonds, advanced nearly seven points. Union Pacific and Northern Pacific moved up over five points. There was some reaction on Thursday, an irregular tendency to-day, and the best prices have not been maintained in all cases. This was due largely to statements from official sources to the effect that present trade conditions indicate that the dividend rate on American Sugar Refining may be again reduced, followed by heavy sales and a de-cline of 12 points in Sugar stock on Thursday, nearly all of which was recovered to-day. The gas stocks fluctuated rather widely, closing at about the best prices, and the tobacco shares were weak.

# RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month. The returns of the street railways are brought together separately on a subsequent page.

	Latest	Gross Ear	n <b>ing</b> s.	Jan. 1 to L	atest Date.		Latest	Gross Earn	nings.	Jan. 1 to 2	Latest Date.

\* Figures for February are for the railroad only. 
<sup>†</sup> Mexican currency. 
<sup>§</sup> Covers results of lines directly operated east of Pittsburg.
<sup>†</sup> Includes Chesapeake & Ohio 80'western, Ohio Valley and Chicago and Texas for both years. Results on Yazoo Branch excluded in 1899,
<sup>§</sup> Does not include the Austin & Northwestern, the San Antonio & Aransas Pass or Houston & Texas Central system.
<sup>e</sup> Results on Montgomery Division are included in 1900, but not for 1899.

For the third week of March our preliminary statement covers 66 roads and shows 10.41 per cent increase in the aggregate over the same week last year.

a Net earnings here given are after deducting taxes.

b Net earnings here given are before deducting taxes.

\* After allowing for expenditures for improvements, total net in February, 1900, was \$136,358, against \$87,140, and from July 1 to February 28 \$1,366,646, against \$1,251,705.

† For Feb., 1900, taxes and rentals amounted to \$155.393, against \$145,419, and from July 1 to Feb. 23, \$1,233,155, against \$1,133,288, after deducting which net for Feb., 1900, was \$1,1~9,611, against \$788,615. From July 1 to Feb. 28, 1900, net after deducting taxes and rentals is \$10,921,327, against \$7,046,790.

† After allowing for other income received, total net from July 1 to Feb. 28 was \$456,911 against \$402,349.

Interest Charges and Surplus.—The following roads, in addition to their gross and net earnings given in the fore going, also report charges for interest, &c., with the surplus above or deficit below those charges.

# STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads-that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

Street Railway Net Earnings .- The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week but once a month (on the third or the fourth Saturday), we bring together all the roads furnishing re-turns, and the latest statement of this kind will be found in the CHRONICLE of March 17, 1900. The next will appear in the issue of April 21. 1900.

### Mexican National Railroad,

(Report for the year ending Dec. 31, 1899.)

The annual report of President Raoul will be found on pages 641 to 644 of to-day's CHRONICLE. The company has adopted an arbitrary rate of 80 cents on the dollar as a basis of converting its Mexican dollars into United States gold, but the actual loss of late years has been much greater, and this loss is charged in the item of "Interest, discount and exchange." In 1892 this item amounted to \$248,622 in gold, in 1993 to \$434,242, in 1894 to \$708,120, in 1895 to \$689,345, in 1896 to \$793,408, in 1897 to \$1,156,792, in 1898 to \$1,180,000 and in 1899 to \$1,281,851. these sums representing mostly the loss in converting into gold that portion of the silver dollars

needed to meet its gold payments, etc.

### Sacramento Electric, Gas & Railway.

2,349,444

(Report for the fiscal year ending Jan. 31, 1900.)

On Aug. 17, 1899, President L. P. Drexler died, and on-Aug. 23, 1899, Thomas Addison was elected as his successor. Mr. Addison says in substance:

Total.....103,304,878 102,520,651 100,988,957

\* Includes amounts for other companies' atoeks not exchanged. † Includes accrued interest and matured interest unpaid. •V. 70, p. 430, 176.

Yuba Electric Power Co.'s Contract.-On account of the rapid increase in our power and lighting load at Sacrameoto, a thirty-year contract has been closed with the Yuba Electric Power Co. to supply power to the extent of 2,000 H. P., for immediate delivery, and to the extent of 5,000 H. P., if needed, allowing this company to use its own power to the fullest extent. Said contract provides for a minimum guaranteed paymontmuch less in amount than the cost of operating the auxiliary steam plant during the low-water period of 1898. The contract, there-fore, obviates the necessity of the steam plant, and insures against shortage of power for the future.

fore, obviates the necessity of the steam plant, and insures against shortage of power for the future. Bonds.-By exchange for and sale of our 5 per cent bonds, all of the \$150,000 Folsom Water Power 7s, due Feb. 1, 1899, have been ac-quired and canceled, and the mortgage discharged. Capital Gas Co.-By exchange of stock this company has acquired 9,53212 shares out of a total of 10,000 shares (par \$50) of stock of the Capital Gas Co. [The company had outstanding at last accounts \$150,000 of 6 per cent bonds.-ED.]

The financial report of General Manager Albert Gallatin shows an increase in gross business of 19'6 per cent and a decrease in expenses of 8'9 per cent. It says: Light and Power Department.—The business increased about 20 per cent during the past year. The distributing lines have been extended and several hundred horse power in motore have been added in the Southern Pacific shops and elsewhere. We have contracts already

closed, but the machinery not yet installed, with the Sperry Flour Co. for about 300 H. P.; with the New England Exploration Co. for operating a dredger, jabout 400 H. P.; with the Southern Pacific Co. about 150 H. P.; also other small contracts aggregating about 1,000 H. P. At the time of the original installation of our plant, while thore was furnished 4,000 H. P., in generating capacity, only 3,000 H. P. At the time of the original installation of our plant, while thore was furnished 4,000 H. P., in generating capacity, only 3,000 H. P. in step-up and step-down transformers was furnished. Orders have been placed for an additional 1,000 H. P. transformers, thus bringing the total capacity of the plant up to 4,000 H. P. *Oapital Gas Co.*—The electrical portion of the business, which has been operated at a loss, has been turned over to our company. The price of gas has been reduced from \$250 to \$175 per thousand cubicfeet. and the introduction of gas ranges, etc., has increased the con-sumption of gas about 25 per cent. The canvass is still going on, and it is expected that in the near future it will make the gas com-pany self-sustaining.

#### American Bell Telephone Company.

(Report for year ending Dec. 31, 1899.)

President John E. Hudson says in part:

Operating Companies-Subscribers, Etc,-The Long Distanc Co. had, on Jan. 1, 1900, 12,007 miles of pole lines and cable, and 150,380 miles of wire, connecting 323 offices, a gain during the year of 1.928 miles of poles and cables, 27,105 miles of wire and 38 offices.

The Long distance Company had invested, up to Dec. 31, 1899, in line construction, franchises, equipment and supplies, \$17,118,509. The company shows an increase in gross earnings in 1899 over 1898 of 27.17 per cent, the amount for 1899, gross, being \$2,805,012.

In all there are 39 companies whose systems furnish our long line terminals. These companies report a total of 557,-979 stations, of which 311,129 (55.76 per cent) are equipped with metallic circuits, and of these 311,129 stations 26,132 are equipped with long distance cabinet sets.

The increase in number of subscribers has been more than double that of any previous year. While this has been due in some small part to the introduction in certain localities of unremunerative rates, to meet similar rates set up by competitors, it is believed that in the main the growth has been healthy and will be permanent.

Extensions and Improvements.—A leading feature of the modern development of the business is the use of measured service in connection with metallic circuits. Large extensions of the properties of the operating companies have been made, and the construction has been of high standard. More than 150,000 miles of toll line wire has been added, the larger proportion being of copper, besides upward of 240,000 miles of exchange conductors, more than half of which was placed underground. The work of equipping the large exchanges with central energy switchboards is going forward rapidly. More than 60 per cent of all the exchange stations in the United States are now connected by metallic circuits. Much of the development of recent years, not only in the large cities, but in places of moderate size, has been upon the plan of underground construction, with permanent buildings especially adapted to the requirements of exchange operation.

The expenditure to provide for the increase of business during the past year has been large, and it is believed that substantially the same rate of investment must be main-

#### American Linseed Co.

### (Official Statement of Dec. 8, 1899.)

The \$1,275,000 additional preferred stock and \$1.275,000 additional common stock [issued last December, V. 69, p. 1249,] was used to acquire plants as follows: Griswold Linseed Oil Co., Warren, Ohio, two mills containing 28 presses, 4,400 bushels flaxseed daily capacity; Western Linseed Oil Co., Minneapolis, Minn., one mill containing 30 presses, 6,000 bushels flaxseed daily capacity; Wright & Hills Lin-seed Oil Co., Chicago, Ill., one mill containing 24 presses, 4,800 bushels flaxseed daily capacity. The American Lin-seed Co. has no bonded indebtedness or fixed charge of any kind excent about \$44,000 bonds of the old National Linseed kind, except about \$44,000 bonds of the old National Linseed Oil Co., to retire which is held \$245,500 pref. and \$246,-000 common stock; and \$176,000 of 6 per cent bonds issued by the Wright & Hills Linseed Oil Co., and assumed by the American Linseed Co. These last-named bonds are subject to call on six months' potice and are due in 1901 to call on six months' notice and are due in 1901

This company virtually began business on March 1, 1899, with \$5,000,000 working capital and no indebtedness. No indebtedness has been incurred except as described above and current bills, and the company has, in addition to its working capital as above stated, an amount in excess of \$60**0,0**00,

LIST OF PLANTS AND WHERE LOCATED.

tained for several years to come, to keep pace with the con-tinued public demand. The new construction completed in 1899 by companies operating under our licenses amounted to \$24,036,822. Of this sum \$15,949,463 was expended upon exchange construction and equipment, and \$8,087,359 upon toll lines. In addition to the above, \$2,066,311 was invested in real estate to be utilized for exchanges and company offices. The entire expenditure for construction, including real estate, to the close of last year has been \$137,262,443.

Plant.-The statistics for the Long Distance Co. and also for all the licensee companies follow :

### Electric Storage Battery Co.

(Statement for year ending Dec. 31, 1899.)

Vice-President Lloyd, at the annual meeting, is reported by the Philadelphia "News Bureau" as saying in substance:

by the Philadelphia "News Bureau" as saying in substance: The gross sales in January and February, 1900, were \$700,000, against \$200,000 for the same month in 1899. From Jan. 1, 1900, into March the company has booked \$1,100,000 of business. The di rectors will probably consider the question of a dividend during the current year. The company has recently received large orders from the Detroit Street Railway and from traction companies in Minneap-olis and Cincinnati. The company gets annually about \$100,000 of business from the Boston Edison Electric Light Co., and has installed thirteen large stations of the New York Edison Co. Four plants have been installed for the Metropolitan Street Railway. These are to be increased. The Manhattan Railway is being worked upon and event-ually it will order large quantities of batteries. Four large batteries were installed for the Union Traction Co. last fail, representing \$200,000 of business. The company has installed 7,000 cells for the Electric Boat Co. Batteries have been installed for traction companies in Washington, Baltimore, Pittsburg and Buffalo, these representing some of the largest traction contracts. In the next two or three years the company will begin to experience profitable business for plate renewals on contracts previously filled. The Englewood (Chicago) Traction Co. has been operated under the storage battery system very satisfactorily. The territory was new country and the revenue not large, but the cost of operation com-pared very closely with that of the trolley system. The total cost was 10 to 12 cents per car mile; many millions of car miles have been run. The plates have been in operation about four years without renewal. One of the fundamental patents expires in three years, but many ad-

renewal.

One of the fundamental patents expires in three years, but many ad-ditional patents on improvements essential to a battery have been taken out.

President Day states that the company has acquired a lead mine, the company being the second largest user of lead in the United States.

President George H. Day read the following :

	1899.	1898.	Increase.
Orders booked	\$3,500,996	\$1,340,987	\$2,160,009

### Union Bag & Paper Company.

(Balance Sheet March 1, 1900.)

The following statement as of March 1, 1900, has been filed

# GENERAL INVESTMENT NEWS.

### RAILROADS. INCLUDING STREET BOADS.

Alabama & Vicksburg RR.—Increase of Stock.—The stockholders at Jackson, Miss., on March 20 voted to increase the capital stock from \$700,000 to \$1,050,000.—V. 70, p. 327.

Arkansas & Oklahoma RR.-Mortgage.-This company, which proposes to build a road extending from Rogers, Ark., on the St. Louis & San Francisco, northwest to Southwest City, Mo., and thence to Indian Territory and Oklahoma, a total of 175 miles, has authorized a mortgage on the entire property at \$10,000 a mile to secure 30-year 5 per cent gold bonds, interest being payable January and July. The mort-gage has not yet been filed, but the Bankers' Trust Co. of New York, it is understood, will be trustee. The road is now in operation from Bagers. Ark to Southwest City. Mo now in operation from Rogers, Ark., to Southwest City, Mo., 361/2 miles, and 16 miles additional are under construction between Southwest City and Grand River, Ind. Ter. J. M. Bayless of Bentonville, Ark., is President.

Atlanta & Charlotte Air Line Ry.—Payment of Income Bonds.—The \$750,000 of 6 per cent income bonds of 1877, due April 1, will be paid at maturity at the Guaranty Trust Co., 65 Cedar Street, New York, together with the semi-annual interest due April 1, 1900. The bonds will be extended by arrangement to Jan. 1, 1907, at 4 per cent interest. - V. 64, p. 286 p. 286.

Baltimore & Ohio RR.-Listed.-The New York Stock Ex-change bas listed an additional \$1,116,000 Southwestern Division first mortgage 3½ per cent gold bonds, making the total amount listed to date \$40,990,000. Of the additional bonds \$116,000 were issued on account of underlying bonds retired (\$11,000 O. & M. consol. 4s and \$105,000 Cin. & Balt. 7s—see V. 69, p. 905) and \$1,000,000 are a portion of the \$5,000,000 bonds reserved under the mortgage to be delivered only at a rate not exceeding \$1,000,000 par value yearly for only at a rate not exceeding \$1,000,000 par value yearly, for improvements, extensions, etc. *Pittsburg Cleveland & Toledo.*—See that company below.—

V. 70, p. 429, 327.

Boston & Maine RR.—To Vote April 5 on Fitchburg Lease.—The stockholders will vote in Lawrence, Mass., on April 5 on a proposition to take a lease of the Fitchburg RR. upon the terms and conditions agreed to by the directors of the company, and to "authorize the issues of such bonds as may be necessary to carry such terms and condi-tions into full effect."—V. 70, p. 279, 175.

Carolina & Northwestern Railway.—New Mortgage, Etc. —Nearly all of the stock and a majority of the bonds have been acquired and are now owned by a syndicate of individuals who propose to extend and develop the property. The management of the road was changed on Dec. 15 last. Plans for refunding the existing indebtedness and issuing securi-ties with which to change the gauge of the road and build extensions are now being perfected, and a stockholders' meeting for the purpose of increasing the capital stock and extensions are new mortgage has been called to be held at executing a new mortgage has been called to be held at Chester, S. C., on April 24. The statement that the property was purchased by R. F. Hoke and associates is entirely erroneous; they have no interest whatever in the enterprise. Wm. A. Barber, with office at 35 Nassau St., N. Y., is President.-V. 69, p. 383, 333.

Chattanooga Rome & Southern Ry.—Purchase.—See Rome & Carrollton below.—V. 70, p. 528.

Chesapeake & Ohio Ry.—New Directors.—On Wednesday S. W. Prevost, Samuel Rea and N. Parker Shortridge were elected directors to represent the Pennsylvania RR. and Chauncey M. Depew, H. McKay Twombly and H. J. Hayden for the Vanderbilts. The other directors are Geo. W. Stevens, President, Decatur Axtel and H. T. Wickham, of Richmond, Va.

President Callaway, of the New York Central & Hudson River RR., says: "A majority of the stocks of the Chesa-peake & Ohio Ry. is owned by the New York Central and the Pennsylvania railroads and there are to be no further 'deals' involving that property. The Chesapeake & Ohio, being a natural feeder of the 'Big Four' system it was neces-sary for the Vanderbilts to have a voice in its management." -V. 70, p. 279, 175.

Citizens' Traction Co. of Oshkosh, Wis. -Sold. - This to Emerson McMillin & Co 'no n property na Deen sold reorganized it as the Winnebago Traction Co., which see below.—V. 69, p. 1147.

with the Massachusetts Commissioner of Corporations :

Assets-

Plants, land and water power and buildings	\$21,859,082
Machinery and fixtures	1.830.244
Cash and debts	2.012.146
Manufactures, merchandise and material	1.266.375
Patent rights.	1,000,000
Miscellaneous.	31,953

Total assets.,.....\$27,999,800 Liabilities.

Capital stock (including \$11,000,000 7 per cent preferred) .\$27,000,000 Balance profit and loss..... 999,800

'Total liabilities.....\$27,999,800

"The company began business about March 1, 1899, so that the statement covers a year. Three preference dividends of \$192,500 each were paid during the year. Deducting the fourth, payable April 2, the balance of profits applicable to the common stock would be \$807,300, which would be 5 per cent on the \$16,000,000 outstanding."—"Chicago Economist." -V. 69, p. 182.

.

Cleveland Electric Ry.-Dividend Increased.-The company has declared a quarterly dividend of 1 per cent, pay-able April 5. The previous dividend was  $\frac{3}{4}$  of 1 per cent, paid in January, 1900.—V. 69, p. 851.

**Cornwall & Lebanon RR.**—*Call*—Car trust certificates of \$1,000 each, Nos. 8, 18, 44, 45, 77, 92, 98, 104, 106, 110, 141, 168, 247, have been drawn and will be paid April 2 at the office of the Pennsylvania Company for Insurances on Lives & Granting Annuities, 517 Chestnut Street, Philadelphia.-V. 65, p. 571.

Coshocton & Southern RR.—Foreclosure Sale May 4.—This property is advertised to be sold under foreclosure at Coshoc-ton, Ohio, on May 4. The sale will enable the Wheeling & Lake Erie RR. to get a clear title.-V. 70, p. 531.

Dayton Springfield & Urbana Electric Ry.-Line Opened. -The line was formally opened from Dayton to Springfield

on March 25, the first car covering the 26 miles, it is said, in exactly an hour. A map of this road will be found in our STREET RAILWAY SUPPLEMENT.-V. 68, p. 330.

Detroit Lake Shore & Mt. Clemens (Electric) Ry.—Sold.— See Rapid Railway, Detroit, below.

Ironton (Ohio) Electric Light & Rallway Co.—Sate.—At the auction sale on March 14 the property was purchased by a syndicate headed by ex-Senator Camden, and it is said will be made part of a pending consolidation.-V. 70, p. 230.

Kanawha & Michigan Ry.—Listed.—The New York Stock Exchange has listed \$129,000 additional 4 per cent guaran-teed gold bonds of 1990, making total amount listed to date \$2,469,000.—V. 65, p. 1021.

Kansas City & Sonthern Ry.—President.—Silas W. Pettit of Philadelphia is to be President until May 5.

Line to Galveston.-A Kansas City dispatch states that the reorganization committee has purchased the Gulf & Inter state Road, extending from Beaumont, Texas [about 20 miles north of Port Arthur], southwesterly 70 miles to a point on Galveston Bay, opposite Galveston, which is reached by a five-mile ferry.-V. 70, p. 584, 429.

Lebanon Springs RR.—Sale Adjourned.—The foreclosure sale of the Vermont end of the road was adjourned from March 21 until April 25.—V. 69, p. 695.

Lock Haven Traction Co.-Sold.-At the foreclosure sale on March 28 the property was purchased by the receiver, W. B. Given, of Columbia, for \$34,700. An extension to Salona is said to be proposed.—V. 65, p. 685.

Louisville & Nashville RR.-Called Bonds.- At the office of the Union Trust Co., 80 Broadway, will be paid at par and interest on Sept. 1 \$40,000 of the Cecilia branch bonds of 1877.—V. 70, p. 584, 280.

Manhattan Railway.—*Extension*.—Work on the extension from 177th St. and Third Ave. to Fordham, a distance of  $1\frac{1}{2}$ miles, will begin on Monday, and is to be completed within the A new yard for cars will be established on Lafonyear. taine Ave., covering the two blocks between 179th and 181st streets. These improvements, it is said, will cost nearly \$3,000,000. The laying of the third rail on the Third Ave. line and the construction of the new power house are progressing.-V. 70, p. 430.

Metropolitan West Side Elevated Railway of Chicago.-Listed .- The New York Stock Exchange has listed the company's first mortgage 4 per cent 40-year gold bonds (\$10,000,-000), 5 per cent non cumulative preferred stock (\$9,000,000) and certificates of Central Trust Company of beneficial in-terest in the common stock (\$7,498,700).—V. 70, p. 328.

Milford Attleboro & Woonsocket Street Ry.—New Securities.—The company has applied for permission to increase its stock to \$500,000, to issue \$500,000 bonds and to extend its system by purchase, lease or otherwise.

National Railway of Tehuantepec.—Payment of Mexican Loan.-By virtue of the power conferred to the Executive of the United States of Mexico by the law of the Congress of June 2, 1899, notice is given that the bonds of the  $\pounds 2,700,000$ loan issued in 1889 and since by the Mexican Government and still in circulation and not tendered for conversion will be paid at par in cash on or after April 1, 1900, in London by Seligman Brothers, 18 Austin Friars. The loan was originally placed at about 77½.--V. 70, p. 125.

Northern Central Railway.—Payment of Bonds.—Notice is given that the mortgage currency bonds for \$1,126,000, due April 1, 1900, will be paid at maturity at the company's office, corner Calvert and Centre streets, Baltimore, Md.-V. 70, p. 430, 380, 332.

Pittsburg Cleveland & Toledo RR.-Option.-Simon Borg & Co. give notice to the holders of the certificates of the City Trust Co. issued against deposit of the first mortgage bonds under agreement of Aug 25, 1899, that a proposition for the sale of the bonds, or, in case a plan of reorganization is offered, giving the certificate holders the right to participate therein. at their option, has been approved of by the firm, and such approval, with a copy of the agreement, lodged with the City Trust Co. of New York and with A. Keyser & Co. of London, England. Until further notice the City Trust Co. will continue to receive deposits of said bonds; certificates issued therefor will have assent and approval of such agreement stamped thereon.

Terms Offered .- The Baltimore & Ohio RR. Co. agrees that

erties will be merged into a system which will control all the electric line between Detroit, Mt. Clemens and Port Huron, a distance of 60 miles.-V. 63, p. 602.

Rapid Transit in New York City.—Work on Tunnel Be-cun.—In front of the City Hall at about 1:30 P. M. on March 25 Mayor Van Wyck broke ground for the new tunnel road. On March 27 the first actual work was started in Bleecker

St. with preparations to lower the Bleecker St. sewer. Bill Passed.—At Albany on March 26 the Assembly passed the Kelsey Rapid Transit bill, extending the powers of the Commission to lay routes for proposed roads, including the carrying of the same under and over waterways and rivers and giving it the same jurisdiction in the Boroughs of Brcoklyn, Richmond. Queens and the Bronx that it originally Los-

sessed in New York City. Tunnel to Brooklyn.-Controller Coler hopes that the extension of the Rapid Transit tunrel under the East River to Brooklyn will be placed under construction in six or eight months. The expense of this line is estimated at about \$6,-00',000 ; it is expected this amount, along with the cost of the main tunnel and the extension from the City Hall to the Bat-tery, will not exceed the \$50,000,000 the board is permitted to expend.—V. 70, p. 481, 430.

Richmond Fredericksburg & Potomac RR.—Change in Method of Voting.—Heretofore a holder of twenty shares or less has been entitled to one vote for each share; a holder of shares in excess of twenty up to 100 shares entitled to one vote for each share up to twenty, and one vote for every four shares in excess of twenty up to 100; a holder of more than 100 shares entitled to one vote for every ten shares in excess of 100. This scale increased the voice of small shareholders. At the meeting on the 14th, approximately 15,000 of the 17,-660 shares of common and preferred stock being represented, the proposition to change the method of voting, making each share represent a vote without reference to the holdings of

share represent a vote without reference to the holdings of individual shareholders, was endorsed unanimously. Change of Status.—The "New York Evening Post" says: It may be stated, on excellent authority, that the operation of the Richmond Fredericksburg & Potomac will be taken over by the Penn-sylvania and Baltimore & Ohio RR. companies. Whether the latter will act separately or jointly is not yet settled, but the Rich-mond line will hereafter be dominated by these two companies, which heretofore have used it as a connection from Richmond north to Quantico, Va., 80 mlles. The line is also used by the Atlantic Coast Line and the Seaboard Air Line, as part of their Washington lines. There is a possibility that the new control of the property will make it possible to effect some arrangement by which the building of a paral-iel line by the Seaboard Air Line system will not be undertaken. The way was prepared for the change outlined above at the recent annual meeting of the shareholders, when the system of voting stock was changed. The Atlantic Coast Line, as a considerable owner of the common shares, will be a party to the new arrangement.—V. 69, p. 1246. Rio Grande Western Ry —Increase of Stock.—The

Rio Graude Western Ry -Increase of Stock.-The shareholders will vote April 30 at Salt Lake City on the question of amending the articles of incorporation by in-creasing the common capital stock by \$5,000,000 making a total authorized common capital stock of \$15,000,000. An official circular says:

official circular says: To provide additional capital when required, as set forth in the cir-cular dated March 7, 1899, a first consolidated mortgage was author-ized last year. Issues of bonds have been made thereunder, the pro-ceeds of which have enabled the company to make very valuable ad-ditions to the property. The continuing prosperity of the country served by your road has resulted since that date in further large de-velorment of its local business, accompanied by the steady growth of traffic to and from the now rapidly developing Pacific Coast, and has greatly increased the earnings of your company, as also the standing of its securities. It is the judgment of your directors that it will be now to your advantage to make additional provision for new capital in the form of stock, not calling for fixed or prior charges, and it is therefore recommended that there be authorized an additional issue of the common capital stock to the extent of \$5,000,000.-V. 69, p. 1194. 1194

Rome & Carrollton RR.-Sold.-At the foreclosure sale on March 29 the property was purchased for the Chattanooga Rome & Southern, which had acquired substantially all the first mortgage bonds.-V. 66, p. 473.

Seaboard Air Line Ry.-Progress with New Construction. -The eight-span bridge over the James River was finished this week, and the line from Richmond to Petersburg will be completed in the next few days. It is expected to have the entire road in operation from Richmond to Tampa, Fla., by April 10 -V. 70, p. 584, 481.

Seattle & San Francisco Railway & Navigation Co.-In-terest Payment.-President John Leary announces that the coupons due April 1, 1900, of the first mortgage gold bonds will be paid on and after April 2, 1900, at the Metropolitan Trust Co., Trustee, New York City.-V. 69, p. 852. Taxation in New York State.- Valuations of Franchises. The State Board of Tax Commissioners announces the following proposed valuations of franchises for New York City, these being subject to revision after the hearings, which will begin April 1. With these valuations are shown below the assessments made by the local authorities upon property in the streets:

if the holders of at least 70 per cent in amount of the \$2,400,-000 bonds shall assent to the proposition above named, and shall cause their bonds to be stamped, it will, on or before Feb. 1, 1903, purchase such stamped bonds for \$1,250 per bond and accrued interest (in cash) to date of payment, at the office of the trustee, the Central Trust Co.; but in case any plan of reorganization embracing the Pittsburg Cleveland & Toledo shall be arranged by or with its approval prior to Feb. 1, 1903, the assenting holders shall have the option to accept in lien of cash payment new securities de-liverable in exchange for the bonds under such reorganization plan. This proposition appears to have met with the general approval of the bond-holders, who have reason to be satisfied, as the bonds have recently sold at about 108.

-V. 69, p. 1248. Rapid (Electric) Railway Co. of Detroit.—Merger.—A press dispatch from Detroit, under date of March 25, says that the Detroit Lake Shore & Mt. Clemens Railway has been absorbed by the Rapid Railway Co. and that both prop-

Texas & Pacific Ry .- Correction .- In the balance sheet on page 582 of last week's issue foot note "a" should refer to the stock of the New Orleans Pacific Co. and not to the item "bonds owned."-V. 70, p. 581, 533.

Third Avenue RR.—Receivership—Hugh J. Grant has been appointed permanent receiver of the Forty-second Street Manhattanville & St. Nicholas Avenue RR. The hearing on the application to issue receiver's certificates on the Third Avenue RR has been adjourned till April 10. Judge Lacombe has authorized Receiver Grant to complete portions of the construction and equipment of the road.-V. 70, p. 585, 533.

Toledo St. Louis & Kansas City RR.-Sold.-At the foreclosure sale in Toledo on March 27 the property was pur-chased for \$12,200,000 by the bondholders' committee. The sale developed, what had before been rumored, that there were two powerful interests seeking control of the property, one represented by the bondholders' committee, and the other by the old ownership of first mortgage bonds now known as preferred stock. These latter are understood to own about a third of the present firsts, and represent substantially the entire second lien. Mr. Samuel Untermyer, of Guggenheimer, Untrmeyer & Marshall, ran the bids up from \$7,500,000 to \$12.150,000. The property was sold for \$12,200,000 to Morton S. Paton and R. B. Hartshorne, repre-senting the bondholders' committee. This price is equivalent to nearly 140 for the bonds.—V. 70, p. 383, 231.

United Power & Transportation Co.-Dividend Period.-A director is quoted as saying that the dividend period will be made semi-annual, and that 50 cents or more will be declared in July, making at least \$1 for 12 months.-V. 70, p. 481, 431.

United Railways of St. Louis.—Syndicate Agreement— Proposed Modification.—Brown Brothers & Co., under date of March 24, have made the following proposition to the holders of subscription certificates of beneficial interest in the St. Louis Street Railways syndicate, viz.: (a) To distribute on April 12 to the holders of record March 28 the \$10,654,415 first mortgage 4s [equal to about 46 per cent a certificate] which remain unsold; (b) to extend the syndicate agreement respecting the unsold stock, namely, the \$9,255.357 preferred stock United Railways and the \$14,-011,227 common stock St. Louis Transit Company, on the same terms as now until April 1, 1901. These terms permit the firm to dispose of any part of the preferred stock at \$95 a share and the common stock at \$26 a share, and to receive on the face value of the stock sold a 1 per cent commission. The St. Louis "Globe Democrat" says:

The holders of certificates of beneficial interest under the plan for each \$10,000 subscribed were to receive \$9,943 in 4 per cent gold bonds of the United Railways Co. of St. Louis, fifty shares (\$5,000) of its preferred stock and \$7,500 common stock of St. Louis Transit Co. On the common stock, however, a payment of \$11 a share was to be made. The circular mentions a declaration to the subscribers up to the present of 56:58 per cent. This is made up of the 15 per cent cred-ited on the certificates to make them full paid, 8<sup>1</sup>4 per cent also cred-ited on the certificates for the payment of the \$11 a share on the com-mon stock above referred to and 33<sup>1</sup>3 per cent in money, paid in February. [V. 70, p. 481, 126.] At the present time the investment for the original subscribers is considered a good one, as the market price of the certificates to-day,

considered a good one, as the market price of the certificates to-day, adding to it the cash dividends so far paid, will make each \$10,000 certificate worth \$11,300. The whole investment amounted to only \$8,500.

and stock have been retired and a new first mortgage for \$1,-000,000 authorized. Under this mortgage have been issued \$550,000 5 per cent thirty-year bonds. The balance of the bonds will be reserved for future purposes. The company owns 30 miles of road, 15 miles in Oshkosh and 15 miles of interurban road running to Neenah and Menasha. The latter was completed in September, and the entire 30 miles is prac-tically new, the line in Oshkosh having recently been changed from horse to electric power. The issue of stock is \$650,000. The reorganization was perfected by Messrs. Emerson McMillin & Co.

Winona & Western Ry.-Status.-The company has re-cently completed and put in operation an extension from Simpson to Rochester, Minn., about  $7\frac{1}{2}$  miles. An officer of the company writes : "The owners of the stock and bonds are the sole owners of the line and, instead of paying themselves interest or dividends, are applying the net earnings in betterments and extensions."—V. 61, p. 518.

#### INDUSTRIAL, GAS AND MISCELLANEOUS.

American Air Power Co.-New President.-President H. H. Vreeland has decided to resign from the presidency, owing to the pressure of his other duties. It is understood he will be succeeded by Henry D. Cooke of the Compressed Air Motor Co. (which see below). The Metropolitan Company, it is stated, not only retains its large interest in the American Air Power Co., but has recently ordered 125 air-motor cars to be used on various cross-town lines. It is understood that when the consolidation of the leading air power companies of the United States is effected, Mr. Cooke will be Presi-dent of the consolidated corporation.-V. 69, p. 1060, 1064.

American Alkali Co.-Construction.-An officer of the company, confirming the statement made in our INVESTORS' SUPPLEMENT, writes: "We hope to have our preliminary plant of 1,000 h. p. in operation next month or the month after. We are doing everything that is possible to hurry the completion of this plant the delays having been caused by completion of this plant, the delays having been caused by the makers of the equipment necessary for a plant of this kind."—V. 70, p. 177.

American Bell Telephone Co.-Transfer Authorized.-The stockholders on Tuesday ratified the transfer of the real estate and other property to the American Telephone & Telegraph Co., and authorized the exchange of two shares of American Tel. & Tel. stock for each share of stock in the American Bell Telephone Co. (see V. 70, p. 585.) The annual report is cited on a preceding page.—V. 70, p. 585, 431.

American Sheet Steel Co.-Incorporated-Consolidation. -This company was incorporated at Trenton, N. J., on March 28, with \$52,000,000 of capital stock, of which half is to be 7 p. c. cumulative preferred, to effect the consolidation of sheet steel mills which has been arranged by W. H. Moore of Chicago. It was Mr. Moore who successfully launched the American Steel Hoop Co., the American Tin Plate Co. and the National Steel Co., three affiliated concerns. Mr. Moore has an office at 71 Broadway, New York, and the First National Bank of this city is receiving payment for sub-scriptions from the New York underwriters. The present iss re of stock will be \$16,000,000 of each class.

Officers, Etc.—The officers and directors are :

Directors-D. G. Reid, W. T. Graham, Wm. B. Leeds, Wm. H. Moore, Henry Wick, R M. Gilbert, W. E. Reis, J. A. Topping, R J. Beatty, J. G. Batteile, M. I. Arms, Jas. H. Moore, A. W. Brown, F. S. Wheeler. Three unfilled.

Three unfiled.
Officers-D. G. Reid, President; J. G. Battelle, Vice-President; M. I.
Arms, Vice-President; A. W. Brown, Vice-President; J. A. Topping,
Vice-President; F. S. Wheeler, Treasurer; H. B. Wheeler, Assistant
Treasurer; H. B. Wheeler, Secretary; Mr. Scott, Auditor; R. J. Beatty,
General Western Manager.
Executive Committee-Wm. H. Moore, W. B. Leeds, D. G. Reid, W.
T. Graham. Three unfilled.-V. 70, p. 332.

American Snuff Co.-Purchase.-The company is reported to have purchased the snuff business of the P. Lorillard Company, together with the real estate and machinery appertain ing thereto, for about 11,000 shares of its 6 per cent preferred stock and about 35,000 shares of its common stock. The total issued capital of the American Snuff Co. is stated as \$12,000,000 preferred and \$11,000,000 common stock.-V. 70, p. 585, 533.

American Sugar Refining Co.—Prices—Dividends.—Pres-ident H. O. Havemeyer on Wednesday said: "A competitor this morning reduced the price of refined sngar on an ad-vancing raw market. This further diminishes the margin between the raw and refined, in which to us there was no profit. The American Company will not meet the prices while the raw market remains as it is. The condition of the business since January 1, to say nothing of this morning's development, has not been such as to warrant any further dividend at the rate of 6 per cent, and if existing conditions continue, the rate will be much further reduced if my recommendations prevail."

First Dividend.-The first quarterly dividend of the United Railways Co. on its preferred stock was declared March 23, amounting to \$1 25 a share, and the same will be paid over to the certificate holders on such preferred shares as they are entitled to under the certificates.—V. 70, p. 481.

United Traction Co. of Albany.-New Secretary.-James McCredie has been elected Secretary. He was Secretary of the Albany Ry. prior to the consolidation .- V. 70, p. 431, 383.

West Chicago Street RR .- Called Bonds .- One hundred

The "New York Evening Post" on Thursday quoted a responsible dealer in sugar as saying :

West Chicago Street RR.—Called Bonds.—One hundred and fifteen certificates of indebtedness dated Dec. 1, 1894, for \$1,000 each, amounting to \$115,000, have been drawn and will be paid on presentation at the office of the company, interest ceasing June 1. See numbers of the bonds called on page vi. of advertisements.—V. 69, p. 78.
Winnebago Traction Co.—Oshkosh, Wis., Street Railway.
—The Citizens' Traction Co. of Oshkosh, Wis., has been reorganized as the Winnebago Traction Co. The old bonds
Sponsible dealer in sugar as saying: Now, after the cut by the Arbuckle people yesterday, the situation is this: The American Sugar Refining Co. has a price of \$4 95 per hundred on granulated sugar, while the Arbuckles are quoting the same product at \$4 90. Both pay \$4 44 a hundred for the raw material, so that the American Company has a margin of 51 cents, while the Arbuckles' margin is only 46 cents. According to the accepted standard of 50 cents as the cost of refining, the American Company has a one cent profit balance on the hundred. For some time the advance in the price of raw sugar was going up at 64-cent bounds, refined

went up at the rate of 5 cents a hundred pounds only. About March 19 the last rise in both occurred, when the prices, \$4 95 for refined and \$4 44 for raw sugar, went into effect.—V. 70, p. 582, 482.

American Telephone & Telegraph (Bell) Co.-Increase of Stock.-The stockholders will vote April 7 at the office, 15 Dey St., New York, upon a proposition to increase the capi-tal stock from \$75,000,000 to \$100,000,000, in shares of \$100 each. Among the directors are:

John E. Hudson, Edward J. Hall, Melville Egleston, Joseph P. Davis, W. D. Sargent, Henry S. Howe, Alexander Cochrane and E. P. Meany.

This increase of stock is in line with the plan mentioned last week for making the company the parent corporation of the Bell system. The report of the American Bell Telephone Co. is on page 631.-V. 70, p. 586, 232.

Asphalt Co. of America.—Profits.—The statement recently published (see V. 70, p. 530), we are officially informed, "includes the charges for six months and such income as came in after the stocks were acquired."-V. 70, p. 530.

Boston Quicksilver Mining Co.-Dividend Passed.-The directors have decided not to pay a dividend at this time. Two dividends of 10 cents each per share have been paid, the first largely from the cleaning up of material. The second dividend was not fully earned when declared, but the trustees believed that the prospects warranted the payment. Since then the unusually heavy rains have flooded the lower opened levels. A second furnace is about ready for firing up and the trustees hope that before the end of the year the dividend now passed will be made up. Current assets are stated as \$69,096; current liabilities only \$6,833.-V. 69, p. 129.

Boyce City (La.) Ice & Waterworks .- Bonds Offering .-J. E. Blackburn, proprietor and General Manager, is offering an issue of \$22,000 first mortgage 5 per cent gold bonds, dated April 1, 1900, and due Dec. 31, 1909. In a letter he says: Total cost of plant will be \$33,500. The city has voted a 5 mill tax for ten years, and at the end of the 25-year franchise is to buy the entire system at its then full valuation, as determined by arbitration.

Camden & Burlington (N. J.) Gas & Electric Co.-Officers, Etc.-The officers of this company, mentioned last week, are stated as: Colonel A. R. Kuzer, of Trenton, President; Frank Bergen, of Elizabeth, Vice-President; Maitland F. Griggs, of New York, Treasurer, and A. H. Spencer, of New-ark, Secretary. F. A. Downes, of Merchantville, who was President and controlled several of the local companies, is a director. Of the \$1,000,000 bonds, only \$600,000 will be put out at present, as further extensions are contemplated. The bonds are gold 5 per cents interest M&S. denomination bonds are gold 5 per cents, interest M&S., denomination \$500 and \$1,000. They cover the properties mentioned in V. 70, p. 482, except the Burlington plants, which it seems are not embraced in the consolidation.—V. 70, p. 482.

Carnegie Co.-New Company Incorporated.-This company was incorporated at Trenton, N. J., on March 24, in ac-cordance with the plan announced last week. The capital stock is \$160,000,000, all of one class and all subscribed. The par value of shares is \$1,000. The principal stockholders and the amount of stock subscribed by each are:

Andrew Carnegie, New York, \$86,379,000; Henry Phipps, Plttsburg, \$17,226,000; H.C. Frick, Pittsburg, \$15,484,000; Chas. M. Schwab, Brad-dock, Pa, \$18,929,000; Francis T. F. Lovejoy. Pittsburg, \$7,024,000; Lawrence C. Phipps, Pittsburg, \$2,653,000; William H. Singer, Alle-gheny, \$2,829,000; Thomas Morrison, Braddock, \$884,000; D. M. Clemson, Pittsburg, \$884,000; James Gayley, Pittsburg, \$884,000; Andrew M. Moreland, Pittsburg, \$810,000; John Walker, Allegheny, \$703,000; remainder subscribed by 23 persons, each of whom holds less than \$500,000. [It is said that Mr. Schwab's personal interest, stock and bonds will be \$7,500,000 and that of the \$18,929,000 stock subscribed by him all except \$3,500,000 was for account of absent stockholders.]

The charter permits the company to acquire the existing Carnegie companies; also to mine, transport and market coal, iron, steel and all other metals and metallic compounds, coke and coal, and all products and by-products thereof, and to construct, acquire, manage and develop on lease or agree-ment and sell, lease or otherwise dispose of, railroads (outside of the State of New Jersey) pipe lines, quays, wharves,

docks, hydraulic works, gas works, gas wells, mills, dwell-ings for employes and other works. The Pittsburg "Gazette" says: "A board of appraisers, consisting of three stockholders, will be appointed, and when any stockholder wishes to retire and sell his stock, by mutual agreement, he will first acquaint the corporation of the fact, and these appraisers will declare its value. The Carnegie Steel Co. will then purchase the stock. If the com-pany should not desire to do this, the stockholder will be at liberty to sell to the highest bidder." Bonds.—It is understood in Pittsburg that the Carnegie Company proposes to create an issue of \$160,000,000 bonds. These, with the capital stock, would make a total capitaliza-tion of \$320,000,000, which, it is said, is represented by the value of the assets of the Carnegie Steel Co. (\$250,000,000) and those of the H. C. Frick Coke Co. (\$70,000,000). Mr. Carnegie's interest in the new concern is believed to be \$86,-379,000 full-paid stock and a like amount of bonds. Mr. Frick, it is said, will receive, besides the \$15,484,000 of cap-ital stock, an amount of bonds bringing his total interest up to about \$30,000,000. The new bonds, it is said, will be 5 per cent 50-year collateral trust, gold debentures, \$1,000 each, interest J.&J. The amount of the issue, it is possible, may not be \$160,000,000, as generally reported.

Officers: President, Charles M. Schwah; First Vice-President, Law-nee C. Phipps; Secretary, Andrew M. Moreland; Treasurer, William 7. Blackburn; General Counsel, Knox & Reed and James B. Dill.

The Carnegie Steel Co. of Pennsylvania also has the directors named above, except that Alexander R. Peacock is in place of Henry Phipps. The officers are the same as the

officers of the Carnegie Steel Co., Limited. The Carnegie Company, it is stated, will assume formal control of the Carnegie Steel Company and its constituents April 1.-V. 70, p. 586, 533.

Cincinnati Leaf Tobacco Warehouse Co.-Reorganization Plan.-The "Cincinnati Enquirer" says :

The plan calls for a reduction of the total capital stock from \$2,-500,000 to \$1,850,000, to be all of one kind of stock, with equal rights, and in shares of \$100 each. The capital has been impaired over \$290,-000, and even with estimated net earnings of \$125,000 per annum, which can be realized by careful and energetic management, neither the preferred nor the common can, on the present basis, expect divi-dends before three and one-half years. Because of these conditions and the fact that the tax laws of Kentucky make it burdensome for a company incorporated in that State and doing business outside to continue under these laws, it is apparent that a reorganization is ad-visable. visable.

The agreement between the stockholders and President James C. Ernst provides for the transfer of the stock to him as trustee and to the Central Trust & Safe Deposit Co. of Cincinnati, to be voted, how-ever, as the majority of the common stock shall determine. Presi-dent Ernst is then, as trustee, to proceed to organize a new company, the Cincinnati Leaf Tobacco Warehouse Co., under the laws of a State other than Kentucky, with the additional power to purchase and sell tobacco on its own account. The new company shall have a capi-tal stock of \$1,850,000, all of equai rights. It is also stipulated that before the payment of dividends there shall be set aside each year a surplus fund not less than \$12,000. Of the new stock there shall be is-sued 14,850 shares to the holders of the [\$1,650,000] preferred shares in the old company at the rate of 90 per cent of their holdings. The holders of the [\$950,000] common stock shall receive 3,650 shares pro rata, according to their holdings of stock in the old company. The absolute worthless accounts are estimated at \$233,112; net loss after doubtful collections, \$11,330; loss on county estate, \$14,818; loss for December, \$10,000; total estimated lose, \$369,261. The plan will be operative only on the acceptance by all-

The plan will be operative only on the acceptance by all the stockholders, and if these consents are not received by the fourth Monday in September, then those that have signed will be released from their agreement. The business isstated as good and the larger stockholders are anxious to put the concern on a permanently sound basis.

Colorado Fuel & Iron Co.-Listed.-The New York Stock. Exchange has listed \$2,000,000 additional common stock, making total amount listed to date \$17,000,000. (See official statement, V. 69, p. 652.)-V. 70, p. 431, 232.

Commercial Cable Co.—Listed.—The New York Stock Ex-change has ordered that on April 6, 1900, \$3,333,300 additional capital stock be added to the amount now on the list, making total amount listed at that date \$13,333,300.-V. 70, p. 479.

Commonwealth Electric Co. of Chicago.-New Bonds.-The directors, it is said, have authorized an additional issue of \$500,000 of bonds, of which \$150,000 to be issued at once for extensions.—V. 69, p. 1149.

Compressed Air Motor Co.—New Stock.—This Chicago company, it is understood, has decided to increase its stock from \$1,250,000 to \$2,000,000 in order to purchase patents, etc. The company's motors have been in use on North Clark Street, Chicago, since May 31, 1899. President Cooke, on Dec. 2, 1899, said:

Since this service commenced, May 31, 1899, there have been no-breakdowns, and it has proved uniformly satisfactory. The cost of superintendence, labor, coal, waste, oil, interest on cost of power plant, charges for depreciation, wages, conductors and motormen and labor of charging and repairing motors make the cost of operating per car mile, in units of not less than 100 cars, \$0.0756 per car mile. This does not include general expenses, such as interest on cost or repairs and maintenance of roadbeds, or salaries of general officers, damage suits and the like.

The motors are described as belonging to the Hardie-Hoadley-Knight type, being in this respect like those of the American Air Power Co. An amalgamation of the two com-panies is believed to be impending. See American Air Power Co. above.-V. 70, p. 482.

Consolidated Gas. Co. of Baltimore.-Price of Gas.-The Maryland Senate on Tuesday passed the bill reducing the price of gas in Baltimore from \$1 25 to \$1 10 per 1,000 feet. The Governor is expected to sign it.—V. 70, p. 431.

Consumers' Brewing Co. of Philadelphia.—Reorganiza-tion.—Holders of the stocks and bonds are requested to deposit their certificates and bonds with the Investment Co. of Philadelphia, No. 310 Chestnut Street, and to become parties to the plan of reorganization, which has already received the approval of the holders of a majority of the bonds. The Investment Company will advance, on and after April 2, to depositing bondholders, \$20 upon each bond on account of the interest maturing April 1. The committee consists of Richard H. Rushton, Chairman; Francis E. Bond, Evans R. Dick, J. Horace Harding, J. R. McAllister. President Henry Hess has been appointed receiver. The sinking fund payment, \$25,000, due March 1 is in default, and the coupons due April 1 will go unpaid.

Directors, Etc.-The directors and officers are:

Directors: Charles M. Schwab, Henry Phipps, George Lauder, Wil-liam H. Singer, Andrew M. Moreland, Thomas Morrison, James Gayley, Thomas Lynch, Lawrence C. Phipps, Daniel M. Clemson and James B. Dill.

Plan.—The reorganization plan, it is stated, provides :

*Plum.*—The reorganization plan, it is stated, provides: A new company shall be organized with authority to issue \$1,600,-000 common stock, \$1,600,000 preferred stock and \$1,600,000 of 5 per cent bonds. The present mortgage indebtedness, \$1,640,000 of 6s, will be exchanged for 75 per cent in the new 5s and 35 per cent in the new preferred stock. The old pref. stock will be assessed \$10 per share, receiving therefor new bonds at par, and will be exchanged for 25 per cent in new preferred and 35 per cent in new common stock. The old common stock will be assessed \$8 per share, for which will be given new bonds at par, and will be exchanged for 10 per cent in new preferred stock and 40 per cent in new common. The assessment will produce \$342,000 to pay the floating debt of \$300,000, and for other purposes. This floating debt is described as consisting of loans secured purposes. This floating debt is described as consisting of loans secured

by collateral valued at \$500,000. Of the new stock, 361,000 preferred and \$175,000 common will remain in the treasury.

The new stocks will be held in 5-year voting trust. The minimum annual profits are estimated at \$125,000; interest charge of new company, \$80,000. The plan, it is stated, has been underwritten.

Continental Gin Co.—Mortgage.—The company has made a mortgage to the Old Colony Trust Co. of Boston, as trustee, to secure \$750,000 bonds to be issued for improvements, etc., in connection with the seven cotton-gin factories recently acquired.—V. 70, p. 127.

(William) Cramp & Sons' Shipbuilding Co.—Purchase —The company has purchased, for a price said to be about \$25,000, subject to two mortgages aggregating \$65,000, the Charles Hillman Ship & Engine Building Company's unoperated plant adjoining the property of the Cramps in Philadelphia. A Cramp director is quoted as saying:

I consider the property cheap at the price. The company organized last summer to float the concern was capitalized at \$600,000 (see V. 6), p. 553.) The yard lies alongside our dry dock, and will be used for repair work, and will relieve our main yard. Though small, the Hillman plant is a good one, and is in good physical condition.—V. 68, p. 1073.

Cuban Steel Ore Co.—Instalment Called.—A third instalment of 25 per cent, or \$2 50 per share, upon the subscriptions to the preferred stock has been called, payable on or before April 25 at the office of the Investment Company of Philadelphia.—V. 69, p. 1195.

Fulton Coal Co.—Reduction of Stock.—The stockholders will vote at the company's chief office, Reading Terminal Building, Philadelphia, on April 11, 1900, on a proposition to decrease the capital stock from \$360,000 (par value of shares \$5) to \$320,485 50. William G. Brown is Secretary.

General Electric Automobile Co.—Reorganization.—A committee consisting of G. M. Dodge, No. 1 Broadway, New York City, George Tracy Rogers, New York City, and J. S. Arndt, J. M. Butler and Thomas Earle White, Philadelphia, gives the following notice:

gives the following notice: Recognizing that it is to the interest of the stockholders that the affairs of the corporation be readjusted either by consolidation with other automobile companies or by providing adequate working capital, holders of a large amount of the stock have requested the undersigned to act as a committee to acomplish such purpose under an agreement dated March 14, 1900, and filed with the Investment Co. of Philadelphia, depository. The stockholders are requested to deposit their stock with the Investment Co., No. 310 Chestnut St., Philadelphia. on or before April 10, 1900. Negotiable trust certificates will be issued for the deposited stock, and any stockholder will have the privilege of withdrawing his stock if the plan to be submitted does not meet with his approval. -V. 68, p. 524. Hocker, Longe, Lowell Milling Co. — Receiver's Certificates

Hecker-Jones-Jewell Milling Co.—Receiver's Certificates. —Vice-Chancellor Pitney on Tuesday authorized the isone of \$100,000 receiver's certificates to pay interest and taxes, and granted a rule to show cause, April 9, why certificates for an additional \$200,000 should not be issued. An inventory prepared by the receivers shows assets, exclusive of goodwill, \$3 357,146, and liabilities \$3,274,882. R. V. Harnett made affidavit estimating the value of the real estate at \$1,554,000. Interest Payment.—The Receivers announce that the cou

pons due March 1, 1900, on the first mortgage bonds will be paid at the office of the Receivers, No. 207 Produce Exchange Building.--V. 70, p. 586, 432.

(Charles) Hillman Ship & Engine Building Co.-Sold.-See (William) Cramp & Sons' Shipbuilding Co. below.-V. 69, p. 553.

Illinois Electric Vehicle Transportation Co.—Official Circular.—A circular touching the proposed reduction of the capital stock says :

The company, after meeting all expenditures incurred to date, has to its credit in bank \$418.355. This amount is deemed adequate to meet all present and immediate requirements. By the proposed re duction of the authorized capital stock from \$25,000,000 to \$2,500,000and of the par value from \$100 to \$10 per share the company, in addition to the cash and other assets in hand, will have the right to hereafter call the unpaid \$5 still owing on all of the unpaid subscribed stock. Thus the company will be provided with a large additional fund whenever required.-V. 70, p. 586, 178.

Laclede Gas Light Co. of St. Louis.—New Stock.—The \$1,000,000 new common stock, raising the total issue of common to \$8,500,000, we are informed, will be distributed from time to time as paid up, the subscribers having until Sept. 15, 1901, to make full payment, though some pay in full at once.—V. 70, p. 534, 483.

(P.) Lorillard Co.—Snuff Business.—See American Snuff Co. above. 000,000 bond issue, provided the stockholders approve the arrangement at their meeting on April 10. At that meeting also the capital stock is to be increased from \$5,000,000 to \$10,000,000; of the new stock, it is supposed about \$2,500,000 will be issued as bonus, etc., in connection with the sale of bonds. The company has been selling gas at 90c. a thousand cubic feet, contrasting with the \$1 of the People's Company, and is proposing to extend its system. There has been a renewal of the rumors that the People's Company is seeking control; the price asked is stated as \$6,500,000.—V. 70, p. 483.

Oskaloosa (Ia.) Water Co.—Franchise Extended.—At a city election held Dec. 26, 1899, the proposition to issue city bonds for a water-works system was defeated, and on March 26, 1900, it was voted by a large majority to extend the franchise of the Oskaloosa Water Co. for twenty years. Wilson, Colston & Co. of Baltimore, it is understood, are interested in the enterprise.

Pacific American Fisheries Co.—New Plants, Etc.—E. B. Deming of Chicago, the newly-elected General Manager of the company, and the President of the brokerage and commission firm of Deming & Gould Co., Chicago and St. Louis, is quoted as saying:

The consumption is steadily increasing, and the pack to-day is no greater than the demand. If the demand increases at the same rate, it will be difficult to supply it. We shall build one new plant at Fairhaven; in fact we have already begun driving the piles. Its capacity will be 2,500 cases a day. The capacity of the present plant there will be made 5,000 cases a day, and the Friday Harbor plant will be increased to 1,500 cases a day. This will make our capacity in all plants 9,000 cases a day. The Blaine plant, which we had under lease last year, has been sold, and therefore will, not hereafter be controlled.

Ronald Onffroy, the promoter of the company and until recently its General Manager, is interested in a scheme to organize a new salmon-canning combine to unite a majority of the canneries and traps on Paget Sound not owned by the Pacific-American Fisheries Co. and the Alaska Packers' Association. The Portland "Oregonian" says that if the plan goes through the result will be to place "almost the entire salmoncanning industry of Puget Sound in the hands of three wealthy companies, the operations of all being practically equal in extent." B. A. Saaborg, President of the Aberdeen Packing Co., is interested in the new enterprise. T. B. Mc-Govern of New York writes: "I know nothing whatever about the alleged Onffroy organization."—V. 68, p. 673.

Peninsular Electric Light & Power Co. of Houghton, Mich.—New Stock.—The company has voted to increase its capital stock from \$250,000 to \$300,000 by the sale of new stock at par for additions, etc.

Shove Mill of Fall River.—Bonds Authorized.—The plan for bonding the property was approved by the stockholders by a vote of 2,646 to 179.—V. 70, p. 537.

Topeka (Kan.) Water Co.—Municipal Plant.—It is likely that bids for the new works to cost about \$450,000 will be received late in the fall. The source of supply will be from wells. Plans are not yet prepared. The Topeka Water Co. values its works at \$700,000, and this the city will not pay.— "Engineering News."—V. 66, p. 339.

Union Switch & Signal Co.-First Dividend on Common Stock.—This Westinghouse company has declared the first dividend, 1 per cent, on its \$997,950 common stock. The rate on the \$497,600 preferred was advanced from  $1\frac{1}{2}$  per cent quarterly to 2 per cent. The last annual statement was in V. 70, p. 428.

United Electric Co. of New Jersey.—Consolidation.—The People's Light & Power Co., controlled by the United Electric Co., has absorbed by consolidation the following subsidiary concerns:

Newark Electric Light & Power Co., the Thomson Houston Electric Co. of Newark, the Essex County Electric Co., the Suburban Electric Light & Power Co., the Montclair Light & Power Co., the Central Power Co., the Consumers' Electric Light & Power Co., the Excelsior Electric Light Co. of Harrison, the Kearney Electric & Power Co., the Hudson County Electric Co., the Jersey City Electric Light Co. and the Newark-Schuyler Electric Light Co.

Capital stock of People's Company, \$20,000,00); issued, \$5,500,000.-V. 70, p. 483.

Westinghouse Air Brake Co.—Dividend—Decision.—Mr. Humphries Miller of Pittsburg, in his weekly circular, says : "Westinghouse Air Brake declared the same rate as in January, namely, 2½ per cent regular and 5 per cent extra. The same day the dividend was declared the Supreme Court of the United States rendered a decision which practically shut off the reopening of litigation which had been decided in favor of the New York Air Brake Co. a year ago. This decision caused a temporary decline in the market price of Westinghouse Air Brake stock, but when the public appreciated the fact that the status of the two companies is practically unchanged from that of 1898, when the litigation began, and that in the meantime the earnings of the local company have been the largest; in its history, a recovery in price took place." The Pittsburg "Gazette" of March 20 said: The Westinghouse Airbrake Co. was yesterday notified from Washington that its petition to the United States Supreme Court for a writ of certiorari in its suit against the New York Airbrake Co. had been refused. The Circuit Court of Appeals for the Second Circuit in July, 1899, rendered a decision against the Westinchouse claim of intringement (see V. 69, p. 181), and it was to secure a review of the decision that the Pittsburg company applied for the writ. The refusal of the supreme Court to entertain the petition places the trouble in the same position that it has been for the last two years. It virtually defeats the Westinghouse Company on the one complaint, but it is asserted in Pittsburg that several other claims against the New York Company still remain, and that they will be tested at the first opportunity. v. 69, v. 854. Waman's Hotel Co.—Incormorated —The company wee

Muncle (Ind.) Water Works Co.—Called Bonds.—Consol. mort. bonds of 1889 and 1893 have been called and will be paid at the Farmers' Loan & Trust Co. as follows: Nos. 1 to 76 and 126 to 215, all inclusive, consols of 1889, on May 24; Nos. 201 to 298. both inclusive, consols of 1893, on May 10. These, it is understood, include all the outstanding bonds of both issues.

New Haven Iron & Steel Co.—Dividend Reduced.—The company has reduced its quarterly dividend rate to 15 cents per share. The first quarterly dividend, 30 cents, was declared in October, 1899, and in December, just before the proposed merger, a dividend of 20 cents was declared, making 50 cents for 5 months, or 30 cents quarterly. The net earnings for the five months ending Dec. 31, 1899, are reported as \$80,-000.—V. 70, p. 534, 483.

New York Air Brake Co.—Decision.—See Westinghouse Air Brake Co. below.—V. 69, p. 647.

Ogden Gas Co. of Chicago.—Bonds.—A New York syndicate, it is stated, has contracted to purchase \$5,000,000 of the \$10,-

Woman's Hotel Co.—Incorporated.—The company was duly incorporated at Albany on March 23.—V. 69, p. 1259. Fo

# PITTSBURG CINCINNATI CHICAGO & ST. LOUIS RAILWAY COMPANY.

EXTRACTS FROM THE TENTH ANNUAL REPORT-FOR THE YEAR ENDING DECEMBER 31, 1899.

PITTSBURG, March 27th, 1900.

To the Stockholders of the Pittsburg Cincinnati Chicago & St. Louis Railway Company:

The Board of Directors herewith submit their report for the year ending December 31, 1899, with such data relating to the lines embraced in your system as will give a clear understanding of their physical and financial condition.

#### SINKING FUND.

Under the provisions of the Sinking Fund established for the redemption of the First Mortgage 7 per cent Bonds of the Jeffersonville Madison & Indianapolis Railroad Company, one of the constituent organizations of the Pittsburg Cincinnati Chicago & St. Louis Railway Company, \$1,527,000 of those securities have been redeemed and canceled to December 31, 1899, leaving \$1,416,000 outstanding. No further redemptions could be made of the Consolidated Mortgage Bonds of the Pittsburg Cincinnati Chicago & St. Louis Railway Company.

There was an increase in freight earnings of 1,278,668 11, or 11 37-100 per cent. The average rate received was 5 3-10 mills, as compared with 5 9-10 mills in 1898, and there was a decrease of 3-10 of a mill in the cost of movement, making a decrease of 3-10 of a mill in the net profit as compared with 1898. There was an increase of nearly 24 per cent in the ton mileage, mostly in the through traffic.

the ton mileage, mostly in the through traffic. There were carried 6,193,470 passengers, as compared with 5,620,813 in 1898, an increase of 572,657, mainly in the local travel. There was an increase in passenger mileage of 9 82-100 per cent, and in revenue of 13 16-100 per cent. The average rate received was 2 6-100 cents, as compared with 2 cents in 1898, an increase of 6-10 of a mill, and the cost having decreased 1 1-10 mills. there was an increased profit of 1 7-10 mills.

There was a further increase in the average number of tons per car and per train, and an exceptional increase in the interchange of traffic with connecting lines.

The condition of the motive power was fully maintained; 11 engines were sold and condemned, and to replace these There were 16,364 tons of new steel rails and 458,600 crossties used in renewals during the year, and 7,135 tons of new and partly worn rails and 175,273 ties in the construction of second tracks, sidings and yard tracks. 100 miles wereballasted with gravel, 31 with stone and 44 with cinder. The actual increase in second tracks, sidings and extensions was 51.09 miles.

The improvement of the bridges was steadily continued in order to adapt them to the requirements of your traffic. Wooden Howe trusses were replaced by steel spans, old metal structures were renewed, trestles filled, and much important work done in that direction toward bringing your line up to a high standard. This extended over all the divisions, one of the most important renewals being that on the Louisville Division north of Columbus, Indiana, where a bridge 293 feet long was entirely rebuilt. Progress was somewhat delayed by the failure to deliver material, so that the replacement of five spans of the bridge over the Monongahela River at Pittsburg, and of the three-span structure over the Tuscarawas River at Gnadenhutten, Ohio, had to postponed until this year.

The volume of business pressing upon your lines also necessitated the extension and re-arrangement of your yards at various points, notably at Sheridan, Columbus, Indianapolis, Loganport and Chicago.

The second track on the Pittsburg Division, 19.44 miles in length, between Port Washington and Coshocton, referred to in your last report, was completed and put in service in August last. That between Coshocton and Black Run, a distance of 21.9 miles, is now under way, and will probably be completed by the end of the year.

be completed by the end of the year. On the Indianapolis Division the 8.24 miles of double track between the Scioto River and Hayden was also finished during the summer. This work involved the replacement of the single-track bridge over that river by a new doubletrack steel structure.

On the Chicago Terminal Division, owing to delays in the construction of the swing bridge over the Calumet River, the double track, 8.56 miles in length, between Calumet and Lansing, was not completed until the middle of November.

In connection with the work on the double track on the Pittsburg Division, the interlocking plants at New Comerstown, Morgan Run and Coshocton were remodeled and enlarged, as also that at Dolton in connection with the line between Calumet and Lansing.

between Calumet and Lansing. A new interlocking plant was erected at Uhrichsville to protect the crossing of the Cleveland Lorain & Wheeling Railroad, at Central City on the line between Newark and Columbus, and at Covington at the crossing of the Cincinnati Hamilton & Dayton Railway.

The work upon the stations was not important. Improved freight houses were completed at Carnegie and New Comerstown, and the passenger stations at those points improved. A new brick passenger station was constructed at Eaton, on the Richmond Division, and work is now being prosecuted on a new freight house at Halstead Street, Chicago, where the two old houses are also being improved.

The extension of the New Cumberland Branch to Chester, West Virginia, is being steadily prosecuted, and a considerable sum was expended thereon during the past year.

11 engines were sold and condemned, and to replace these as well as fill 17 vacant numbers existing at the beginning of the year, 28 new engines were purchased, which will be delivered early in the current year. Slight changes were made in the passenger equipment, as a result of which there was a decrease of 2 passenger coaches and an increase of 2 combination cars.

Through the maturity of Series I. of the Pennsylvania Equipment Trust, 500 box cars which had been leased under the usual Car Trust arrangement became the property of your company, and were added to your regular equipment. Provision was also made under similar arrangements for 300 flat and 1,900 long gondolas, and for substituting 310 box and 200 gondola cars for a like number of cars of small capacity, which by reason thereof could no longer be run with advantage to the service.

There were 521 freight, 2 derrick and 38 cabin and miscellaneous cars built to replace 283 destroyed during the year, and to fill vacancies existing at the beginning thereof. The earnings increased \$272,043 49, and the expenses \$67,-824 20, the net earnings showing a gain of \$204,219 29.

The tonnage carried was 2,181,190 tons, as compared with 1,632,590 tons in 1898, an increase of 548,600 tons, or 33 6-10 per cent. There was an increase, with but slight exceptions, in all articles transported, the largest items of increase being grain, live stock, anthracite and bituminous coal, stone, sand, lumber, pig and bloom iron, steel rails, castings and machinery, bar and sheet metal, cement and brick, and miscellaneous merchandise. The average rate received per ton per mile was 7 3-10 mills, as compared with 7 9-10 for 1898, a decrease of 6-10 mill, or 7 6-10 per cent; but the average cost having decreased 1 3-10 mills, the net profit showed a gain of 7-10 of a mill.

There was an increase of 4 32-100 per cent in the number of passengers carried, and an increase of 2 44-100 per cent in the mileage, all in local travel. There was an increase of 5 88-10 per cent in the revenue. The average earnings increased 6-10 of a mill, and the cost decreased 2-10 of a mill, the net loss being 1 7-10 mills, as against 2 5-10 mills in the preceding year.

There were 3,441 tons of new steel rails and 74,109 ties used in renewals, and 357 tons of new and partly worn rails and 9,846 ties used in construction of sidings and yard tracks. Fifteen and a half miles of track were ballasted with gravel and eight with cinder. An interlocking plant was erected

at Rendcomb Junction to protect the movement of trains at that point, and another is practically completed at London at the crossing of the Cleveland Cincinnati Chicago & St. Louis Railway. Repairs were made to bridges at various points, the old structure near West Jefferson, 123 feet long, being replaced by a new steel span, and the condition of the roadbed was thoroughly maintained.

The line shared in the prosperity growing out of the favorable commercial conditions that prevailed throughout the greater part of the year, while the economical movement of the increased traffic was largely due to the increased load per car and per engine. In order to facilitate the handling of your business at Cincinnati, your yard facilities were increased at that point by the construction of tracks on the river bank to accommodate the transfer of grain. and of additional storage tracks, and the capacity of your storage warehouse at that point further extended. A fruit warehouse is now under construction in the new yard at Front and Broadway streets to take care of that branch of your traffic.

The new union station at Dayton is progressing and will he completed during the year. There was expended on Capital Account the sum of \$60,355 27, almost entirely in connection with the improvement of your facilities at that point.

The condition of the motive power and equipment is about the same as for the preceding year.

### INCOME ACCOUNTS OF COMPANIES IN THE PITTSBURG CINCINNATI CHICAGO & ST. LOUIS RAILWAY COMPANY SYSTEM OPERATED UNDER THEIR OWN ORGANIZATIONS

FOR THE YEAR ENDING DECEMBER 31, 1899, AND COMPARISON WITH THE YEAR 1898.

Mile- age.		Gross Earn- ings.	Operat- iny Ex- penses.	Net Earn- ings.	Gross Income.	Interest and other Oharges, includ'g Extraordinary Expenditures.	Net Income.	Divi- dend.	Surplus or Deficit.	Increase or De- crease.

### GENERAL REMARKS.

The prosperous condition of the manufacturing interests of the country is strongly reflected in the increased traffic moved over your lines. The aggregate volume of tonnage so transported was 23,782,258 tons, a gain over the preceding year of 3,577,575 tons, or about 18 per cent, the ton mileage showing an even larger percentage of increase. Notwithstanding the high prices realized for iron and steel, and generally for all manufactured products, there was a further reduction in the compensation paid the railway companies, so that the average rate per ton per mile upon the lines of your system was but 5 6-10 mills, against 6 2-10 mills in 1898. The advanced prices for railway supples not having gone fully into effect until the latter part of the year, and the exceptional volume of the traffic having facilitated economy in movement, a slight reduction was effected in the cost of transportation, so that the net profit per ton per mile was 1 3-10 mills, as against 1 5-10 mills in the preceding year.

The passenger traffic shows a further improvement in volume and a slight improvement in the gross and net rate. The entire number carried was 8,574,610, an increase of 765,761, or nearly 10 per cent, and there was a corresponding gain in the mileage.

ing gain in the mileage. The aggregate revenue of the entire system was \$21,969,-564 54, an increase over 1898 of \$2,289,986 66, of which the larger portion, or \$1,867,444 32, was on your main line. The same conservative policy was continued that has resulted in building up your property and putting it in strong physical and financial condition. To this end the sum of \$306, 963 26 was charged against your income on account of extraordinary expenditures in revision of grades and alignment and other work not properly chargeable to Capital Account; and the further sum of \$200,000 has been set aside, one-half to meet similar outlay in the current year and the other half, as was done last year, toward providing for the retirement of the bonds of the Dayton & Western Railroad Company which mature January 1st, 1905, and which, under the terms of the lease of that portion of your property, your Company has covenanted to pay at their

solidated Mortgage. The 3½ per cent bonds referred to form part of a series of \$12,000,000, designated Series E, and run for 59 years from August 1, 1899.

By virtue of an agreement, under date May 1, 1899. certain amendments have been made in the lease of the Little Miami Railroad to your Company which are in the mutual interest of both parties. These amendments mainly cover the retirement of sectional bonds that had matured, and the acceptance in payment for betterments and improvements made by your Company of  $3\frac{1}{2}$  per cent non-convertible bonds of that company in lieu of 7 per cent bonds convertible into the stock of the Little Miami Railroad Company.

The various lines controlled by your Company, and operated either directly or through their own organizations, all show improved results for the year.

show improved results for the year. The Chartiers Railway increased both its gross and net earnings, but temporarily reduced its dividend in order to defray out of its revenues a portion of the cost of the double track made necessary by its increasing business. The Waynesburg & Washington Railroad, which is practically an extension of the Chartiers Railway, continues to show satisfactory results.

factory results. The Pittsburg Chartiers & Youghiogheny Railway, of which your Company has a joint ownership with the Pittsburg & Lake Erie Railroad Company, carried a large coal tonnage, and earned a satisfactory surplus above its fixed charges.

The Pittsburg Wheeling & Kentucky Railroad, which connects your main line with Wheeling, West Virgina, shows a large surplus above all liabilities.

The Cincinnati & Muskingum Valley Railroad was able, after providing for the interest on its funded debt, to carry a material surplus to the credit of its Profit and Loss Account.

The contract with the Pullman's Palace Car Company being about to expire, a new agreement was made with that company, taking effect January 1st, 1900, and running for 15 years, under which a considerable saving in expenses will inure to your benefit.

The Chicago Terminal Division having been constituted so as to embrace the operation of that portion of your main line between Bernice and Chicago and of the Pittsburg Ft. Wayne & Chicago Railway between Clarke Junction and Chicago, and the terminal branches connected therewith, Mr. C. H. Walton was appointed Superintendent thereof August 1st, 1899. The title of the Chicago Division having been changed to the Logansport Division, Mr. P. A. Bonebrake was transferred thereto from the Indianapolis Division and Mr. W. C. Loree, formerly Engineer of Maintenance of Way, was promoted to fill the vacancy thus created. In pursuance of the revised organization taking effect November 1st, 1899, the offices of General Superintendent of Motive Power and Assistant General Superintendent of Transportation were created, Mr. G. L. Potter being promoted to the former position and Mr. A. B. Starr to the latter. Mr. Charles D. Law was also appointed Real Estate Agent March 29, 1899, in accordance with the provisions of the organization.

maturity.

It will be noted that the net earnings of the company enabled the Board to declare dividends during the past year amounting to  $3\frac{1}{2}$  per cent upon the preferred stock. An examination of the accounts will show that your financial condition is being steadily strengthened by the retirement of bonds bearing high rates of interest, the cost of making these exchanges being charged against your surplus income. Taking advantage of the favorable state of the money market in May last, a negotiation was effected covering the sale of  $3\frac{1}{2}$  per cent bonds under your Consolidated Mortgage to meet the 7 per cent bonds of the Pittsburg Cincinnati & t. Louis Railway Company which mature on the 1st of August next. Of the \$6,863,000 of those securities then outstanding, \$3,022,000 have been retired, and the balance will be paid at or before maturity out of the funds so provided.

Further issues have also been made of these 3½ per cent bonds in exchange for \$880,000 of 4 per cent and \$1,835,000 of 4½ per cent bonds issued under prior series of your Con-

Your Board have to record with the deepest regret the death on the 5th of June last of your late President, Mr. Frank Thomson Mr. Thomson's long connection with your lines and his life long identification with the Pennsylvania Railroad system has made his name so familiar to the shareholders of the Company that but a brief reference is needed here to recall the signal service rendered by him in promot-ing the welfare of your property. As a Director for ten years and as your Executive head since February 4, 1897, he had watched over and protected your interests with marked ability and success. And it was while inspecting the lines west of Pittsburg that he was seized by the illness that so soon terminated fatally. The Board publish with this re-port the minute adopted by them in the belief that it will be approved by the shareholders as a brief but fitting tribute to one devoted to their service and eminent in the discharge to one devoted to their service and eminent in the discharge

of the responsible duties that devolved upon him. To fill the vacancy caused by Mr. Thomson's death, Mr. Alexander J. Cassatt was elected Pres dent June 21, 1899.

The Employé's Voluntary Relief Department shows an increased membership at the close of the year, the gain being 608, or about 7.1 per cent.

The amount contributed by the members was \$162,779 96; the receipts from interest were \$4,605 61, and the amount contributed by the Pittsburg Cincinnati Chicago & St. Louis Railway Company was \$32,638 92, which, added to the balance on hand at the beginning of the year, viz., \$113.384 29, makes a total of \$313,405 77. Out of this amount there was paid to families of members in death benefits and for sickness and accident the sum of \$181,331 04, and for operating expenses \$27,544 21, leaving a balance of \$104,533 52, from which should be deducted \$49,559 03 to cover amount of outstanding and unadjusted claims, leaving a surplus of \$54,974 49. The amount contributed by the Pittsburg Cincinnati Chicago & St. Louis Railway Company was, as stated above, \$32,638 92, of which \$27,544 21 was used for payment of operating expenses of the Department, and \$5,094 71 for payment of extra benefits to members whose disability continued over 52 weeks, and were therefore no longer entitled

to regular benefits from the Department. During the year there were 8,120 benefits paid. viz., 7,999 account of sickness and accident and 121 death benefits.

The General Balance Sheet is hereto appended.

It affords the Board great pleasure to acknowledge the efficiency of the officers and employes during the past year. By order of the Board, A. J. CASSATT, President.

rupt and at times suspend traffic. The traffic thus far has been light; but naturally this short and interrupted pe- ried of operation can give but little indication of what the	64-ft. plate-girder iron bridge, #llo. 422 \$2,063 87
riod of operation can give but little indication of what the influence of the road will be in developing business in the new territory.	8 additional stalls, stone construction, added to Acambaro Round House \$5,590 98

The extension construction account has been credited Additional tools bought and placed in the with the first instalment of \$12,000 paid by the State of Michoacan upon the subsidy obligation and with \$1,000, the proceeds of Federal Government subsidy bonds drawn and paid during the year, leaving the balance as shown in the Treasury Balance Sheet of \$949,955 91. The balance of the subsidy bonds due by the Federal Government has been delivered and sold since the close of the year, realizing \$198,085, which will be applied to the further reduction of construction account of the line. Mention was made in the last Annual Report of a suit in-stituted by the State of Texas against the Texas Mexican Railway Company for forfeiture of charter and enforcement of other penalties for alleged non-compliance with the law of the State. It was then stated that it was believed that this suit had been instituted through a misapprehension of the facts. The Attorney-General, after making a thorough investigation of these facts, dismissed the suit.

# THE CHRONICLE.

MARCH 31, 1900.]

#### OPERATION.

The following statement gives a comparison of the results of operating with the year 1898:

Replacement of Rails- 500 tons new 45-lb. steel rail, less credits from sale of old rail	14,000 0 <del>0</del>
Balance of cost of 200 new freight cars, built in 1898	152,178 34
Payment on 6 locomotives bought in 1898 \$4,120 69 Payment on 6 locomotives bought in 1899 19,812 48	33,932 57
Total Reduced to U. S. Currency at arbitrary rate of exchange =	\$259,466 90 207,573 52
The \$14,000 above stated as having been pai	id for rails

various shops.....

was for account of the Texas Mexican Railway. In addition to this, \$24,000 has been expended for repairs and renewals in Mexico and charged to Operating Expenses.

It will be observed that these Extraordinary Expenditures are considerably more than the previous year, but no more than absolutely needed to maintain the road in a position to meet the requirements of the traffic; and unless some way can be found to provide capital for increasing its strength and carrying capacity, a heavier draft may be expected against income in future years for this purpose.

pected against income in future years for this purpose. Six additional locomotives were purchased during the year and early put in service, but these proved insufficient for the traffic and ten more were contracted for; but, owing to pressure of work upon the locomotive builders, delivery could not be had until shortly after the close of 1899. These are not meeting the present traffic promptly. These additional engines were purchased on the same terms as to payment as those of the year previous.

Engine No. 7 was sold, being too light for any service in which we could put it.

We had at the close of the year 131 locomotives, all in very fair condition, as shown more in detail in the engine statement at the end of this report.

The cars built in the shops during the year and charged out to Operating Expenses have been something more than sufficient for the replacement of those wrecked, worn out, or otherwise parted with, thus fully maintaining the capacity and condition of the existing car equipment out of expenses.

During the year we have added to our freight equipment 100 box cars of 20 metric tons capacity. These were built in the Company's shops at a cost of \$55,223 13, and charged out in Extraordinary Account. There was also charged out in the same account the balance of the cost of 200 box cars built in 1898, \$66,519 54. Finding that these additions were proving inadequate for the traffic, an order for 100 cars has been taken in hand since the close of the year.

Taking what we have provided and the work in hand, our equipment will not be sufficient for the traffic, and it seems clear that some way should be found to supply it faster than can be done out of the income of the road. 35 locomotives and 5°0 cars should now be arranged for, half to be supplied as early as practicable.

In view of the existing situation of the Company's funded debt and the necessity for large expenditures for strengthening the permanent way, the funds for this purpose can possibly best be provided by an equipment mortgage.

Having been brought by experience to a realization of the inadequacy of a narrow-gauge road to develop a thoroughly satisfactory transportation service for a large volume of business, the disadvantage at which it is placed in competition with its standard-gauge rivals, and the comparatively early period in which it may be expected, under a rapidly growing traffic, to reach the limitation of its carrying ca pacity, induced your management to take up some years ago a study of the practicability and desirability of changing the track to a standard gauge. In view of the fact that the time had come when the growth of traffic made large additions to the rolling-stock necessary, and the period fast approaching when large rail renewals would be necessary, it was thought desirable to bring to a conclusion the study for the change of gauge, so that in the event of an affirmative determination these heavy outlays might be utilized to contribute to the expenses of the change through the purchase of rails of such weight and equipment of such character as would be suitable for a standard-gauge line.

Therefore in 1899 a plan outlining the general scheme was prepared and estimates made of the cost of the undertaking which, after deducting salvage on discarded property, amounted to about five and a half million dollars gold, at the prices then prevailing.

This scheme and estimate contemplated and included the building of a standard-gauge cut-off from some point on the El Salto Line to a point south of San Miguel, shortening the International Line about forty miles, avoiding the 4 per cent grade on mountain section near Mexico and opening up additional territory, but leaving the Southern Division of 230 miles and its branch towards the Pacific slope of 142 miles (difficult if not impracticable to change) to remain a narrow-gauge upon which could be utilized to its full value the light rails and unchangeable rolling-stock which would otherwise be discarded by the change of gauge.

In consequence of the arrears of interest on the Series "A" Bonds of your Company, and the large outstanding issues of income bonds, and owing further to the fact that the execution of the plan would require either a reorganization of the funded debt of the Company or the consent of the holders thereof to some plan for providing acceptable security for the new capital that would be required, the stockholders were powerless to act independently. Therefore the scheme proposed for carrying out the work, and an estimate of its financial requirements, was submitted to and discussed with holders of a large majority of the bonds junior to the Prior Liens. After considering the subject in all its bearings carefully and at length, the holders of the majority interest in the Second Mortgage "A" and "B" Bonds, while deeming the change desirable, concluded it to be impracticable of being carried out. This information is given as a matter of general interest and as a preface to some observations deemed desirable to be made relative to the future policy of the company. In the opinion of nearly, if not quite, all persons intimately acquainted with the physical and traffic conditions of the property, the change of its track to standard-gauge is only a question of time, and postponement will not only increase

the cost of making it but defer the period in which the line may be brought to its highest state of efficiency and the development of its earning power to the point its location fairly entitles it.

Yet, if it is the conclusion, as it now seems to be, that so large an undertaking as a change to the standard-gauge is for the present impracticable and must be indefinitely postponed, it becomes of the utmost importance that you should inaugurate at once a policy looking to the strengthening of the present line to meet and keep pace with a traffic so clearly seen to be seriously pressing upon the capacity of existing facilities and giving every indication of its continued growth.

An intelligent opinion as to what this growth may be in the next ten years may best be formed by a review of the past history and traffic statistics of the leading railway lines in Mexico. In dealing with these statistics the gross earnings per mile will be adopted rather than total gross earnings, for the reason that, with the exception of the National, the mileage of the several lines increased from time to time during the period under discussion.

In treating the statistics of the National, only the Mexican system proper will be dealt with, leaving out the Texas Mexican Railway and the Matamoras section because the Texas Mexican is in the United States and not subject to the influence of conditions governing Mexican traffic.

The Matamoras line of 75 miles is located in the extreme northeast corner of the Republic. The line is not connected with the main stem and is not subject to any of the influences affecting traffic in other parts of the country, and does only a small local business in a section of country in itself fertile and desirable, but so entirely unprovided with transportation facilities to connect it with markets that no development has taken or can take place. This is also left out of consideration. Neither this nor the Texas Mexican Railway furnishes a basis for estimating the growth of traffic in the Republic supplied with railroad facilities, and any conclusions based upon their traffic history would be misleading.

The Mexican Central was open for international traffic for the whole year 1885 and earned \$2,798 per mile of road operated in that year. From that time to 1889, at which time the Mexican National was operating for international traffic, the Central's earnings increased to \$4,335 per mile, being 54.88 per cent increase for the period, and equal to an average increase of 13.72 per cent per year.

average increase of 13.72 per cent per year. From January 1, 1889, the Central increased its mileage each year from 1,316 miles in 1888 to 1,846 in 1893. The miles of the Central increasing so much faster than the country's productive capacity could be developed kept down the per mile earnings of the line to practically the same figures as obtained for the year 1889.

figures as obtained for the year 1889. The gross earnings of the system, however, increased from \$6,337,225 in 1889 to \$7,981,768 in 1893, an increase of 25.95 per cent for the period, or 5.19 per cent per year.

The Mexican National was opened for international traffic late in 1888. In the year 1889 it earned \$3,426 per mile of road and increased to \$4,100 in 1893, 19.67 per cent for the period, equal to a yearly average of 4.92 per cent. The Maxican Control was a pioneer road in Northern Max-

The Mexican Central was a pioneer road in Northern Mexico, which explains the low earnings in 1885 and 1886. Its operation stimulated both local traffic in Northern Mexico and international traffic, and prepared the conditions for the opening of the National on a much higher level of earnings.

The Mexican Railway was opened from the port of Vera Cruz to the City of Mexico many years before any of the other lines herein discussed were even projected The conditions under which it worked were such that a study of its early traffic statistics furnishes little or no aid in forecasting the probable influence on future progress of the recent commercial and industrial development, and no consideration has therefore been given its history prior to 1893.

In the year 1893 the six leading lines in the Republic were in full operation for both local and international traffic, and the following is the increase from 1893 to the close of 1898 of their earnings per mile of road :

The Central increased 60.76%, an average of 12.12% per year. The National increased 52.19%, an average of 10.43% per year.

The International increased 48.27%, an average of 9.65% per year.

The Mexican Railway increased 45.23%, an average of 9.05% per year.

The Monterey & Gulf increased 41 48%, an average of 8.29% per year.

The Interoceanic increased 39'27%, an average of 7'85% per year.

The advancing trade of the country is likewise indicated by the imports and exports.

For the year ending June 30, 1894, the value of goods imported through all ports was \$30,270,000, and of exports \$79,320,000.

For the year ending June 30, 1899, value of imports was \$50,369,000 and of exports \$138,478,000, an increase of 66% of imports and of 74% of exports, making an increase in the five years of about 13% per year in imports and 15% in exports.

In view of the foregoing testimony of the quick and continued response of business and enterprise to increasing transportation facilities, the established sound conditions under which all departments of business are being conducted in Mexico to day, the enormous extent of the yet undeveloped resources of the country, and the large and wide range of opportunities for profit yet open to capital and energy, it would be hazardous on the part of owners of railways in laying plans for fitting their properties for future demands to conclude that these favorable conditions are not to continue in approximately the same ratio for many years to come.

If this forecast is true, the northern and southern ends of your line, which comprise the old sections taken over at its purchase in 1887, will be unequal to carrying the traffic that will soon be offering, and its limit of net earnings may be expected to be reached at no very distant day in the future. The gross earnings may, and doubtless will, continue to

expand for some time to come, but under such a pressure of increasing intensity as to subject them to the operation of that economic law known as the law of diminishing return.

The limit of the carrying capacity of a single track narrow-gauge road in good condition is not known; but for the two old divisions of your line, in their present state, it may be approximately stated as not far beyond its present tonnage. For 1899 the traffic for the whole system reached an earning of \$5,705 per mile. Eliminating the Texas Mexican Railway and the Matamoras branch, and making allowance for the light traffic branches, the main stem has borne a traffic of little less than \$3,000 per mile, and that of the Southern or Mexico Division has probably much exceeded this-probably the heaviest of any narrow-gauge line in the world.

The Denver & Rio Grande Railroad, the most important and notable of the narrow-gauge roads of the United States, began changing its gauge to standard in 1886, in which year it was operating 1,317 miles and earning from all traffics \$5,116 per mile on an average rate of 2.60 cents per ton per mile, and was bearing a ton-mile traffic on the basis of the National's length of 142,705,840 tons.

Your Mexican system earned for 1899 from all traffics \$7,-056 per mile under an average rate of 2.49 cents per ton per mile and bore a ton-mile traffic of 202,389,217 tons.

A table is printed at the end of this report showing the freight traffic of a few of the narrow-gauge lines in India and the United States, which, so far as the information is obtainable, are carrying the heaviest tonnage.

It is not likely that any very considerable tonnage beyond the present can be successfully and economically handled with your present strength of line and facilities, and whatever that limit may be will be the limit of your earnings on the main stem.

To rest where you are would be throwing away opportuni-ties of profit, and allowing a property capable of indefinite expansion to fail in the fulfilment of its possibilities.

If the line could be converted to standard-gauge, the problem would be solved effectively and for all time; but if that is financially or otherwise impracticable, your true interest imperatively demands that sufficient capital be found to strengthen and improve the present line to take care of

and encourage the growing business : By changing alignment, by enlarging the radii of difficult curves, by reducing gradient at many points where short and difficult sections limit the bauling capacity of engines for whole divisions;

On those divisions where the location is of such a nature that no improvement in gradient can be effected, relief must be obtained by relaying with heavier rails and by thoroughly ballasting the track in order to make practicable the use of the heaviest engines rossible for a narrow-gauge road;

By the replacement of many of the original iron bridge structures and many of the wood trestle bridges too weak to sustain the material increase in the weight of load which the proposed improvement contemplates; and,

By increasing terminal and shop facilities at Mexico, Monterey and Laredo.

The largest of the proposed undertakings will be the improvement in alignment and gradient. For several years past, anticipating that the growth of traffic would ulti mately force such improvements, careful studies have been made of the difficult points of the line, and up to this time surveys and estimates of cost have been completed for those sections most urgently requiring relief. The estimated cost of this reaches \$700,000, Mexican currency.

The total cost for the heavier rails will be \$522,000 gold, f which \$356,000 would be chargeable to renewals and \$166,-000 to capital.

It is believed that beginning with 1901 about 2,000 tons of rails should be annually put down on the line to keep fully up with deterioration during the next ten years. At this rate of renewals the mountain divisions in question would be relaid in six years.

In order to advance the work of strengthening the line rapidly enough to meet improved traffic and secure at once the economy these proposed improvements will insure, the renewals should be anticipated and this work completed as early as practicable.

The capital requirements for these undertakings foot up \$1,056,000, gold. The whole work should be undertaken with a view to its completion within a period of five years.

By taking first in hand those points which now give the greatest embarrassment to conducting transportation and accomplishing the greater part of the whole within the first half of the period, it is believed that the carrying capacity of the line will grow apace with the traffic.

The Company is authorized, with the consent of the Mexican National Construction Company and a majority of the Second and Third Mortgage Bondholders, to issue an addi-tional million of the Prior Lien Bonds, and it is submitted that from this source the money can be most easily and cheaply found for these improvements. Since and including 1890 there has been expended for bettering and strengthen-ing the old part of the line an average of about \$84,000, gold, per year. At that rate the line cannot be brought up rapidly enough to take economically the increased traffic that may be expected. These outlays amount to consid-erably more than the interest on the proposed bond issue, and unless these improvements can be carried out with new capital, the annual draft upon income for such purposes may be expected to increase rather than diminish, and a limitation to traffic, and consequently of earnings, imposed at the same time.

Aside from the object of making provision against the annual use of such large sums from income for capital purposes, the prompt carrying out of this work will materially improve the position of your company in every way, and it is confidently believed so largely increase the net earnings of the property that a comparatively early day will see a beginning made towards reducing the arrears of interest upon the Series "A" Bonds.

Under these circumstances it would seem reasonable to expect no difficulty in obtaining the needed consents for the The issue was provided for the purpose of meeting a issue. possible emergency, and surely none can arise more urgent than this.

Some question may be made of the accuracy of the forecast that looks to the same increase of traffic in the future as in the past. A complete answer to this will be that even if the traffic is not materially increased, the greater economy in working the line will more than provide the interest on the bonds, and that it is a far safer and sounder prin-ciple to provide facilities in advance of traffic than to get the traffic in advance of facilities, and have to face all the evils and losses consequent upon its conduct with an inadequate strength of line.

#### TRAFFIC.

Traffic agreements between the several roads in Mexico, in the Mexican Traffic Association have been well maintained and have worked as smoothly and satisfactorily as could well be expected. The general average of rates per ton per kilometer shows a slight decline from the average of the previous year, but this is traceable to the influence of existing conditions rather than to the effects of undue competition.

The large gains have been through increased volume of business, induced by increased activity in trade and production.

These total gains have been \$756,755 22, or very nearly 12 per cent. Of this gain \$131,48) 10 has been derived from passengers, and miscellaneous service performed by passenger trains.

Stated approximately and in round figures, the gains from freight traffic have been, from Imports \$130,000. from Exports \$30,000, and from local distribution of both national and foreign products about \$460,000.

The proposed re-locations and gradient changes not yet surveyed or finally studied out are roughly estimated to cost about \$500,000, Mexican currency.

There should be spent upon terminal facilities and shops

about \$80,000, Mexican currency. The replacement of the light iron bridges with heavier structures and the wood trestles with iron or masonry will cost about \$250,000, gold.

The mountain sections required to be relaid with heavier rails are, between Mexico and Toluca, 45.6 miles, 28.6 of which is 4% grade, and;

Between Monterey and Carneros, a distance of 92 miles, of

2% grade. The permanent capital investment in this part of the undertaking will not be large. It will in large part constitute rail renewals properly chargeable into expenses as cost of maintenance of the property, and only the excess in weight of rails over those taken out of the line can constitute a legitimate capital charge.

FIRST MORTGAGE BONDS AND SUBSIDY

The usual statement of the Trustee of the Subsidy showing the money collected and its application is published herewith.

The following gives the number of bonds which has been drawn up to the close of 1899.

Drawn fo	r redemption in	1891	\$319,000 00
61	6 6 F	1892	305,000 00

Leaving	yet to be patd an	d canceled	\$9.000 00

In the Ninth Annual Report, made for the year 1895, a statement was made of the terms upon which the Subsidy Certificates, then in the custody of the Trustees of the First Mortgage and the Subsidy Pledge, as additional security for the payment of principal and interest of the First Mortgage Bonds, were converted at the instance of the Mexican Government into five per cent bonds of the Interior Redeemable Debt. The Trustees of the First Mortgage and the Subsidy Pledge held the opinion that the conversion of the Subsidy Certificates into Government Bonds did not change the terms of the Pledge requiring the Trustees to apply the proceeds from the Subsidy Certificates to the redemption and cancellation of First Mortgage Bonds; and they believed that it was obligatory upon them to sell the Govern-ment Bonds received for Subsidy Certificates and apply the proceeds to said redemption. This view was not shared by the Maximum National Construction Company which prothe Mexican National Construction Company, which protested against the application of the bonds in this way and insisted that they should be held as a continuous security for the First Mortgage Bonds, and that interest from these Government Bonds only should be applied to the redemp-tion of First Mortgage Bonds.

While efforts were being made to harmonize these con-flicting interpretations of the pledge, a suit was instituted in England in July, 1896, in the High Court of Justice, Chancery Division, Mr. Justice North, by "John Williams, Esq., on behalf of himself and all other holders of six per cent First Mortgage bonds of the Mexican National Rail-road Company," against the Trustees of the First Mortgage and the Subsidy Pledge, the Mexican National Railroad Company, and the Mexican National Construction Company, asking that a declaration be made requiring the Trustees to sell the bonds and apply the proceeds to the redemption of the said First Mortgage Bonds.

This action came to trial, and on January 17th, 1899, was decided adversely to the plaintiff. Appeal was taken to the Court of Appeals and came to trial in November, 1899, at which time the decision of the lower court was reversed and the Trustees directed to sell the Government Bonds and apply the proceeds to the redemption of First Mortgage Bonds. The Mexican National Construction Company appealed from this decision to the House of Lords and the cause is now pending there.

Respectfully submitted,

W. G. RAOUL,

President.

-John Moody, of 27 Pine Street, has prepared a 150-page "Reference Book of American Gas and Electric-Light Securities." Mr. Moody has had considerable experience in con-nection with the preparation of financial statistics, and in his present production furnishes in attractive and brief, yet comprehensive, form a large amount of valuable information heretofore difficult to obtain. The book is to be issued an-nually; price, \$2. Publishers, O. C. Lewis & Co., 10 Wall St.

-\$200,000 Gila Valley Globe & Northern first mortgage gold fives, unconditionally guaranteed as to principal and in-terest by the Sonthern Pacific Co., are offered for sale by F. J. Lisman & Co., to pay  $4\frac{3}{4}$  per cent. On page viii. will be found a statement of earnings and other details bearing on the bonds.

-Malcom & Coombe, 6 Wall Street, deal in bonds, stocks and reorganization certificates of the Cincinnati Jackson & Mackinaw, Cincinnati Northern and Detroit Toledo & Mil-waukee railroads. On pages 581 and 583 of last week's CHRONICLE will be found statements concerning the plan, etc.

-Attention is called to the offering by Bond & Goodwin, Boston, of 1,500 shares of the guaranteed 4 per cent stock of the Hereford Railway Co. The road is leased to the Maine Central, which guarantees the dividend. Full particulars will be found in the advertisement.

-Messrs. Frank Seabury & Bro. are distributing circulars containing tabulated information regarding New England manufacturing companies, namely their location, capital, dividends, market value, nature of products, treasurer, selling agents, etc.

# The Commercial Times.

### COMMERCIAL EPITOME. FRIDAY NIGHT, March 30, 1900.

Reports relative to the condition of trade have continued to show some irregularity. In certain lines merchants state that they are having a satisfactory trade, with prices well maintained, while in others increasing complaint of a disappointing demand have been heard. Reports from the iron market have continued to show business as only moderate, and in some instances, to effect sales, slight concessions in prices have been made. Business in dry goods circles has been quiet, both manufacturers and jobbers reporting a comparatively light run of orders. Refined sugar has been unsettled, owing to an unexpected cut in prices by one of the independent refiners. Provisions have been firm and higher, and there have been steadier markets for breadstuffs. Backward weather conditions in the Sonth have delayed Backward weather conditions in the Sonth have delayed preparations for planting the next cotton crop, and have had a steadying influence in the market for the new crop deliver-ies. Advices received from Washington say that the Puerto Rico tariff question is nearing a close, and that a vote on the measure will probably be taken by the Senate early next week.

Lard on the spot has had a moderate sale, and as offerings have been limited prices have advanced, closing steady at 6.75c. for prime Western and 6.30c. for prime City. Refined lard has advanced, but the close was quiet at 7c. for refined for the Continent. Speculation in lard for future delivery at the Western market has been fairiy active, and on buying by shorts to cover contracts, purchases for investment account and light receipts of hogs, prices have advanced. The close was firm.

#### DAILY OLOSING PRICES OF LARD FUTURES.

Mon. Tues. 6.55 6.57 Sat. 6.55 Wed. 6·80 Thu**rs.** 6.75 Fri 6.75 March..... Pork has advanced sharply, but at the higher prices business has been quiet, closing at \$13 00@13 50 for mess, \$13 50@ 13 75 for family and \$12 75 a14 25 for short clear. Cut meats have advanced, but the close was quiet at  $6\frac{1}{2}$ c. for pickled shoulders,  $10\frac{1}{2}$ a10 $\frac{3}{4}$ c. for pickled hams and  $6\frac{3}{4}$ a7 $\frac{1}{4}$ c. for pickled bellies, 14@10 lbs. average. Beef has had a slightly better sale at steady prices, closing at \$10 00@10 50 for mess, \$11 00@11 50 for packet, \$11 50@13 00 for family and \$17 50@ 18 00 for extra India mess in tcs. Tallow has been quiet but steady at  $5\frac{1}{4}c$ . Lard stearine has advanced to  $7\frac{1}{2}c$ . Oleostearine has been in moderate demand and steady at 63/4c. for prime City. Butter has been quieter, and the close was easy at 20@25c. for creamery. Cheese has had a fair sale at firm prices, closing at 10½@13½c. for creamery. Fresh eggs have been weaker, closing at 12c. for choice Western. Brazil grades of coffee have been in slow demand, and

despite small receipts and improving statistical position and steady primal markets, prices have declined, as there has been slightly increased pressure from discouraged holders to sell. The close was dull at  $7\frac{3}{4}$ c. for Rio No. 7. West India growths have been quiet and without important changes, closing at  $10\frac{1}{4}$ c.@ $10\frac{1}{5}$ c. for good Cucuta. East India growths have been quiet but steady. Speculation in the market for contracts has been on a very moderate scale only, and prices have declined under absence of support and aggressive selling by bear operators. Final asking prices were:

Raw sugars have been in moderate demand and slightly higher, closing at 4½c. for centrifugal 96-deg. test and 4c. for muscovado 89-deg. test. Refined sugar was fairly active and firm early in the week, but became demoralized owing to a cut in prices by Arbuckle Bros., closing at 4.95@5c. net for granulated. Other staple groceries have been unchanged.

Kentucky tobacco has been quiet but steady. Seed leaf tobacco has had a limited sale at unchanged prices. Sales for the week were 990 cases, as follows: 100 cases 1898 crop, New England Havana, 15@50c; 75 cases 1899 crop, New England Havana, 15@50c; 75 cases 1899 crop, New England Havana, forced sweat, 20@50c.; 150 cases 1898 crop, Zimmers, 9½@14c.; 100 cases 1897 crop, Wisconsin Havana, 11c.; 225 cases 1898 crop, Wisconsin Havana, 11@13c.; 100 cases 1897 crop, Pennsylvania seed leaf, 13c.; 140 cases 1898 crop, Dennsylvania seed leaf, 13c.; 140 cases 1898 crop, Pennsylvania seed leaf. 11@11½c., and 100 cases sundries, 7@16c; also 800 bales Havana at 50@95c. in bond and 100 bales Sumatra at 80c @\$1 50 in bond. Early in the week there was an easier market for Straits tin. Subsequently, however, in response to stronger foreign advices, prices advanced, and the close was firm at 32.60c. Ingot copper has had a fairly large sale at fair prices, closing at 17c. for Lake. Lead has been in fair demand and firm, closing at 4.70@4.80c. for domestic. Spelter has been quiet and easier, closing at 4.50@4.60c. for domestic. Pig iron has had a moderate sale at about steady prices, closing at \$19@23. for domestic. Refined petroleum has been unchanged, closing at 9.90c. in bbls. 7.25c. in bulk and 11.10c. in cases. Naphtha unchanged at 10.65c. Crude certificates have been neglected. Credit balances have been unchanged at \$1 68. Spirits turpentine has been quiet but steady, closing at 55½@56c. Rosins have been quiet and unchanged at \$1 70 for common and good strained. Wool has sold slowly and prices have been easy. Hops have had a fair sale at steady prices.

-Messrs. Spencer Trask & Co., 27 Pine Street, have prepared a table of a number of railroad preferred stocks in which is shown the surplus earnings above fixed charges and the percentage equivalent of this surplus on the several preferred stocks.

-Pfaelzer, Walker & Co. have just issued their sheet con-taining quotatious for 600 steam RR bonds. The firm endeavors to devote this sheet to quotations which are not easily obtainable, and consequently the sheet is of value to investors.

-F. J. Lisman & Co. offer a block of Toledo & Ohio Central general mortgage gold 5 per cent bonds, due in 1935, to pay over 5 per cent. The bonds are described in their advertisement on page viii.

-A New York Stock Exchange house desires Baltimore correspondents. Private wire facilities are offered. For details see the advertisement on page viii.

# COTTON.

#### FRIDAY NIGHT, March 30, 1900.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 80,579 bales, against 104,023 bales last week and 112,432 bales the previous week, making the total receipts since the 1st of Sept., 1899, 5,956,215 bales, against 7,652,362 bales for the same period of 1898-9, showing a decrease since Sep.1, 1899, of 1,696,147 bales.

Speculation in cotton for future delivery has been moderately active, but at irregular prices. Values for this crop have shown a tendency to sag, while those for the new crop have held steady. The continued reports from both Manchester and the local cotton goods trade of difficulty in making sales for fnture delivery, even at concessions, have had an unfavorable influence, particularly as they have been borne out by advices received from the South reporting almost a stagnant demand for cotton from both exporters and spinners. As a consequence, speculative holders in some instances have become discouraged, despite the continued strength of the statistical position and a small crop movement, and have been gradually liquidating their accounts. The feature of the market for the new-crop deliveries has been the backward weather conditions, which, the advices received from the South report, have delayed preparations for planting, etc.; this has induced some buying by nervous shorts to cover contracts, and there also has been considerable transferring of long accounts in this crop to the new crop deliveries, attracted by the discounts at which they have been selling. To-day the market opened quiet but steady, and then advanced on buying by local operators, largely to cover short sales. The close was steady at a net adyance in prices for the day of 4@11 points. Cotton on the spot has been quiet, and on Thursday prices were lowered  $\frac{1}{4}c$ . To-day the market was quiet and unchanged at  $9\frac{5}{8}c$ .

The rates on and off middling, as established Nov. 15, 1899, by the Revision Committee, at which grades other than middling may be delivered on contract, are as follows.

Fair	n
Middling Fair 34 on   Good Middling Tinged Eve	n
Strict Good Middling 716 on   Middling Tinged <sup>1</sup> 8 0	ff
Gcod Middling 516 on   Strict Middling Stained 14 0	11
Strict Low Middling 316 off Low Middling Tinged 516 0	ff
Low Middling	11
Strict Good Ordinary 34 off Strict Low Mid. Stained 1	п
Good Ordinary1116 off Low Middling Stained 138 0	n

On this basis the official prices for a few of the grades for the past week—March 24 to March 30—would be as follows.

UPLANDS.	Sat.	Mon	Tues	Wed	Th.	Fri.

10 13 THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Continental stocks, as well as those for Great Britain and the afloat, are this week's re-turns, and consequently all European figures are brought down to Thursday evening. But to make the total the complete figures for to-night (Mcb. 30), we add the item of exports from the United States, including in it the exports of Friday only.

	1900.	1899.	1898.	1897.

WEATHER REPORTS BY TELEGRAPH.— Reports to us by telegraph from the South this evening denote that rain has been quite general there during the week, the precipitation being rather heavy in some sections, and that in consequence farm work has not as a rule made good progress In fact, our advices from various points indicate that, as a result of continuous wet weather, crop preparations are very backward. Our Meridian, Missiesippi, correspondent states that there is a scarcity of labor, the railroads and saw mills having absorbed much of the supply.

Galveston, Texas.—There has been heavy rain on three days of the week, the precipitation reaching three inches and eighty-three hundredths. Average thermometer 57, highest 70 and lowest 44.

Palestine, Texas. — It has rained on two days during the week, with rainfall to the extent of one inch and fiftyseven hundredths. The thermometer has averaged 61, the highest being 74 and the lowest 48.

Corpus Christi, Texas. — We have had rain on three days of the week, to the extent of seventy-seven hundredths of an inch. Thermometer has averaged 57, ranging from 40 to 74.

San Antonio, Texas.—We have had rain on two days during the week, the precipitation reaching one inch and fortyeight hundredths. The thermometer has ranged from 50 to 80, averaging 65.

80, averaging 65. Abilene, Texas.—No rain the past week. Average thermometer 60, highest 78, lowest 42.

New Orleans, Louisiana. - We have had rain on three days during the week, to the extent of one inch and sixty-four hundredths. Average thermometer 62.

Shreveport, Louisiana.—We have had rain on two days of the week, the rainfall reaching two inches and one hundredth. The thermometer has averaged 62, the highest being 75 and the lowest 50.

Columbus, Mississippi.—Farming operations are very backward. There has been rain on three days of the past week, to the extent of ninety-seven hundredths of an inch. The thermometer has averaged 64, ranging from 40 to 86.

Leland, Mississippi.—Rainfall for the week ninety hundredths of an inch. The thermometer has ranged from 41 to 74, averaging 56.3.

Meridian, Mississippi.—It has rained heavily on three days of the week, delaying preparations for planting, which are now a month late. There is, furthermore, a scarcity of labor, as hands are working on the railroads and in the saw mills of the great pine lumber section of Mississippi. Hundreds of saw mills have been built within the past year or so to supply the great demand for lumber.

Vicksburg, Mississippi.—Rain has fallen on two days of the week, the precipitation reaching thirty-eight hundredths of an inch. Normal planting conditions now prevail. The thermometer has averaged 60, the highest being 76 and the lowest 48.

Little Rock, Arkansas.—We have had rain on four days during the week, the precipitation reaching forty-three hun-dredths of an inch. The thermometer has averaged 60, ranging from 48 to 72. Helena, Arkansas.-First part of the week was too wet for farm work. It has rained on three days during the past week, to the extent of seventy-eight hundredths of an inch. The thermometer has ranged from 40 (this morning) to 75, averaging 57 Memphis, Tennessee.-Preparations for the new crop are becoming active, but are very much behind. Rain has fallen on four days of the week, to the extent of seventy-Rain has Average thermometer 58.4, four hundredths of an inch. highest 74.8 and lowest 47.5. Nashville, Tennessee.-We have had rain the past week, the rainfall reaching seventy-nine hundredths of an inch. The thermometer has averaged 59, the highest being 72 and the lowest 43. Mobile, Alabama.-Field work has made little progress and preparations for planting are very backward. There has been rain on five days of the past week, the rainfall The therreaching four inches and twelve hundredths, mometer has averaged 61, ranging from 50 to 74.

Montgomery, Alabama.—The early part of the week was rainy, but latterly the weather has been warm and dry. Ground on lowlands, however, is too wet for work. Rain has fallen on three days, to the extent of two inches and twenty-three hundredths. The thermometer has ranged from 36 to 77, averaging 53.

Selma, Alabama.—Rain has fallen on three days of the week, to the extent of one inch and sixty-fight hundredths. Average thermometer 61, highest 79 and lowest 41. Madison, Florida.—We have had rain on three days during

the week, the precipitation reaching two inches and ninetyfive hundredths. The thermometer has averaged 67, the highest being 76 and the lowest 54. Savannah, Georgia.—We have had rain on four days of the

Savannah, Georgia.—We have had rain on four days of the week, the precipitation being one inch and seventy-four hundredths. The thermometer has averaged 61, ranging from 50 to 73.

Augusta, Georgia. -Crop preparations are very backward, as a result of the continuous rains during March. We have had rain on three days of the week, the precipitation being one inch and thirty hundredths. The thermometer has ranged from 42 to 74, averaging 57.

Charleston, South Carolina.—Rain has fallen on six days of the week, to the extent of one inch and eighty-six hundredths. Average thermometer 57, highest 72 and lowest 49.

Stateburg, South Carolina.—Plowing and corn-planting have been delayed by the inclement weather. We have had rain on three days during the week, to the extent of one inch and forty-five hundredths. Thermometer has averaged 56, highest 74, lowest 41.

Greenwood, South Carolina.—It has rained on three days of the week, the rainfall reaching one inch and fifty one hundredths. The thermometer has averaged 52, ranging from 44 to 61.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock March 29, 1900, and March 30, 1899,

	Mch. 29, '00.	Mch. 30, '99.

--Our Manchester correspondent, under date of the 21st inst., states that there is a distinct pause in business in the Manchester cotton goods and yarn market. The advanced prices, he says, are checking the demand, the plague is rather depressing the Calcutta market, and in other directions large quanties previously bought at lower prices than those now current have yet to be worked off, he states. A further motive for cantion is found in the prospect of extensive planting for the next American cotton crop and the possibility cf a drop in the prices of cotton.

He also says that Mr. Neill's influence among English spinners has been greatly shaken by the course of the receipts of American cotton within the last three or four months. While Mr. Neill's honesty is not questioned, his system of estimating the crop will not again receive the confidence hitherto accorded to it, our correspondent thinks.

DOMESTIC EXPORTS OF COTTON MANUFACTURES.—We give below a statement showing the exports of domestic cotton manufactures for February and for the eight months ended Feb. 28, 1900, and for purposes of comparison like figures for the corresponding periods of the previous year are also presented:

Total.... 53,444 14,685 31,285 4,132 15.985 75 15,853 135,459 To Japan since Sept. 1 shipments have been 16,790 bales from New York, 4,147 bales from Baltimore, 43,240 bales from Galveston, 35,359 bales from New Orleans, 9,650 bales from Pensacola, 14,352 bales from Savannah and 160,594 bales from Pacific Coast. To China, 6,974 bales from New York, &c.

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, &c.

- GATE CITY, steamer, from Savannah for Boston, ashore at Moriches, L. I. The condition of wrecked steamer Gate City remains the same, with exception of a portion of the deck, which had been blown up with dynamite to enable the divers engaged in locating the cargo to work to better aivantage. The cotton has all been removed from the forward part of the steamer. The work is now being done amidships and in the after part of the wreck As fast as the cotton is removed it is stored on deck and then transferred to a lighter.
- PAULLAC, steamer (Fr), from New York, Feb. 5, for Havre. &c., before reported, has not yet been heard from, and is now believed to have been lost.

Cotton freights at New York the past week have been as follows.

SAVANNAH MOVEMENT FOR UNIFORM BALES —A circular letter has been sent out this week by the Savannah Cotton Exchange respecting the size of coton bales and giving a new rule which is to go into effect at Savannah with the beginning of the next cotton year. The circular states that on and after September 1, 1900, "all sales of cotton in square bales shall be based on packages of standard size (24x54inches), and when bales of other dimensions are tendered for delivery an allowance of 25 cents per bale shall be charged to the buyer by the seller on such cotton.

Copies of the rule have been sent to the various exchanges of the United States, requesting their co-operation, and to farmers, ginners, merchants, newspapers and others interested in the general adoption of a uniform-size cotton bale. The rule has practically been adopted by the Galveston Cotton Exchange.

## BREADSTUFFS.

FRIDAY, March 30, 1900.

No. No.

18

A moderate volume of business has been transacted in the market for wheat flour. An upward tendency to prices for the grain has had a tendency to stimulate the home trade to some extent and there has been a slightly more active inter-est shown by exporters. No advances have occurred in quoted prices for wheat flour, but buyers have found that sellers have not been disposed to accept bids showing any concessions from prices named. City mills have been in medarate demand and fairly firm. Bue flour has had only moderate demand and fairly firm. Rye flour has had only a slow sale and there has been a slight weakening of values. Corn meal has been in moderately active demand and firmly held.

Speculation in wheat for future delivery has been slightly more active and prices have shown an advancing tendency. Early in the week stronger foreign advices gave the market a better undertone, although large receipts in the Northwest and only a very moderate export demand held an advance in check. On Wednesday, however, prices took a decided turn for the better, prices for the day advancing 1@1¼c. per bushel. The principal item of news on the day's market was the renewed reports of damage to the French crop, estimates of a material reduction in the yield being received. The political news from Europe also had a tendency to make shorts somewhat nervous over the situation. Despite the bear-ish statistical position, which it is claimed has been largely discounted, there developed considerable buying by bear operators to cover their recent sales and prices steadly advance. Thursday the market was higher during early 'Change, reflecting stronger foreign advices, and on continued buying to cover shorts and a decreasing movement of the crop in the Northwest. Subsequently, however, under realizing sales the advance was lost. Business on the spot has been moderately active and advices from the interior have reported fairly large sales for exports; prices have followed futures. To-day there was a fairly active and higher market on mod-erate buying, stimulated by further crop-damage reports from France and stronger foreign advices. The spot market was firmer, with rumors of large export sales at outports. Known sales here and at outports were 120,000 bushels.

Indian corn futures have been moderately active, and there has been a fractional advance in prices. There has been some aggressive buying by bull operators, and stronger foreigh  $\epsilon$  dvices, wet weather at the West and the comparative strength of the statistical position have been the favorable factors in the market. The movement of the crop the past week, however, has been heavy, and this, together with profit-taking by recent buyers, has had a tendency to hold the advance in prices in check. Business in the spot market has teen fairly active at firmer prices. To-day there was a moderately active and firmer market. The spot market was fairly active. Sales for export here and at outports were 465,000 bushels. eigh advices, wet weather at the West and the comparative

Oats for future delivery at the Western market have been moderately active and prices have advanced. Moderate buying by the country, presumably on the weather condi-tions, was a strengthening factor, and prices also advanced in sympathy with the advance in other grains. There has been a revival of the speculation in the local market and prices have been steady. The spot market has been moderately ac-tive and fairly steady. To-day there was a steadier market in sympathy with the advance in other grains. The spot market was steady market was steady.

\* Exclusive of New Orleans, Galveston, Ft. William and Port Arthur, but including Albany, Oswego and Cincinnati, now omitted. NOTE.-Beginning July 1, 1899, the New York Produce Exchange has changed its Visible Supply Statement by including stocks at New Orleans, Gaiveston, Ft. William and Pt. Arthur (previously omitted) and leaving out Albany Oswego and Cincinnati, formerly included.

### THE DRY GOODS TRADE. NEW YORK, FRIDAY, P. M., March 30, 1900.

The dry goods market has been quiet throughout this week so far as business at first hands has gone. The demand for all descriptions of cotton goods has been on a moderate scale, and in the woolen goods division men's-wear fabrics have been in indifferent request, with less doing in dress goods than for several weeks past. Buyers of cotton goods on home account are acting conservatively. Their purchases seldom go beyond immediate requirements, but on these they are quite willing to pay full prices. There has again been a marked indifference towards business for forward delivery in the general run of staple cottons on the part of buyers, and sellers have not shown much more anxiety to sell further ahead to any extent. Here and there a mill is willing to take orders on brown cottons for late delivery under present quotations, but this is not a prominent feature, the majority

There is no change in flanne or blankets, supplies limited and prices firm.

DOMESTIC COTTON GOODS - The exports of cotton goods from this port for the wee ending March 26 were 10,698 packages, valued at \$446,748 heir destination being to the points specified in the table elow :

NEW YORK TO MARCH 26		1900.		1899.
	We	since Jan. 1.	Week.	Since Jan. 1.
Great Britain Other European China	5,1	341 286 80,601	26 47	608 206 <b>52,109</b>
India. Arabia. Africa. West Indies	1,	4,638 8,346 1,128 5,556	975 402	978 9,779 2,226
Mexico. Central America. South America.	2,	844 3,500 12,213	222 366 559	7,262 1,302 2,109 14,304
Other Countries Total	10,	1,861 119 314	326 2,923	2,663 93,546

The value of the New Yo exports for the year to date has

been \$4,595,931 in 1900, aga t \$3 294,516 in 1899. Heavy brown sheetings d drills have ruled slow; the home demand has been indirent, and for export there have been no orders from the chie oreign markets. Prices are un. changed for spots and nes leliveries, but on more distant positions concessions would made in some quarters, par. ticularly to exporters. No ange in prices can be reported in ducks or brown osnabu . Bleached cottons also are without change in quotatio Buyers have evidently come to the conclusion that any uther advance in these in the immediate future is unlike and are buying only moderate quantities in any grade. Change in wide sheetings, for which the market is very fin The scarcity of coarse, colwhich the market is very fine the scarcity of coarse, col-ored cottons causes a number of orders to go unfilled, even though the demand has been prices of all description form. No change in kid-finished cambrics or other cotton line gs. Business in printed cali-coes has been chiefly in staps varieties, for which full prices are paid. The demand for the fabrics in moderate request. All napped fabrics of desire is character strong. Ginghams quiet but firm Becular int cloths continue neglected quiet but firm. Regular int cloths continue neglected. unchanged at 31/2c. Dema for old goods limited and market slightly easier.

FOREIGN DRY GOODS.-IL oolen and worsted dress goods business has been chiefly | staple lines of blacks at firm prices. Silks are quiet t steady. Ribbons and laces steady, moderate business ng. Linens firm but demand moderate. Barlaps firmer tone but not quotably higher.

Importations and Wareh se Withdrawals of Dry Goods

The importations and was nonse withdrawals of dry goods at this port for the week ding March 29, 1900, and since January 1, 1900, and for t corresponding periods of last year are as follows:

1								_

being well enough sold ahead to await developments. The jobbing trade has shown a slight improvement this week and, as a rule reports of retail business are satisfactory in spite of generally unfavorable weather for spring trade.

WOOLEN GOODS .- The orders coming forward for men'swear woolen and worsted fabrics this week have shown buyers in very indifferent mood. There has been no call for any quantities of importance, and transactions have been limited in number. Where sellers have their production for the fall season well covered, this condition has no effect upon prices, but there are some who are anxious to secure further orders and are easy to deal with, the irregularity referred to last week being more pronounced this. Fine grades of fancy worsteds have proved a disappointment so far with some sellers. The business doing in overcoatings has been lim-ited, and only a light demand is reported in cloakings. The demand for fancy dress goods has been on a quiet scale this week without quotable change in prices. The market is strong for staple varieties, but buying is on a moderate scale.

# News Itms.

Alexandria, La.-Bonds Ille:1.-The State Supreme Court has decided that the \$71,00 mprovement bonds voted at the election held Nov. 20, 1899are Illegal. Another election will probably be held to vot bonds, this time for \$73,-000, of which \$30,000 will b fc sewers, \$23,000 for street paving and drainage, \$10,000 fo high school building and \$10,000 for the improvement of electric-light and water. works system.

Ellsworth, Kan.-Bonds Val -On March 17, 1910. Judge Hoak, in the Federal Court, d led that \$9,000 bonds is. sued in 1886 for permanent red n grounds for the Grand Army of the Republic were a val obligation of this city. Massachusetts.—Savings Ba Bill Defeated.—We learn

that House Bill No. 822, anthoring savings banks to invest their funds in the first morthe bonds of street railway companies, and to which refer was made in the CHRONI-CLE of Feb. 17, page 342, was, u n the recommendation of the Committee on Banks and anking, rejected in both branches of the General Court

New Jersey.-Legislature A urns.-The State Legislature adjourned on March 24.

New York State.-Special Fr chise Tax Valuation.-The State Board of Tax Commissions this week has announced the special franchise valuatio s the various corporations in New York, Buffalo, Roches, Gloversville. Jamestown and Ithaca. The figures will ound in our Railroad Department on a preceding page this issue. Oskaloosa, Iowa.—Water Frachise Extended.—On March

26, 1900, it was voted by a larg najority to extend the fran-chise of the Oskaloosa Water Conpany for twenty years. As stated previously, the city on Lo. 26, 1899, voted against the issuance of bonds to build a w -works system.

San Francisco, Cal.-Bond it.-A suit has been insti tuted in the Superior Court to t the validity of the bonds voted last December for the x sion of the Park Panhandle. The suit was brought by Eu e N. Fritz (who voted for the bonds and still favors their ince) in order to set aside all doubts as to their validity. T main points brought up are that the call for the election lid not state what kind of money the bonds were to be put in and that only two-thirds of the votes cast were in f o of the binds and not two-thirds of the registered vote i he city. It is also contended that the notice of election hould have segregated the amounts for the various parke o that each item could have been voted upon separat ly.

# **Bond Proposals** d Negotiations this

#### week have been as follows

Albany, N. Y.-Bonds Autl ized.-The Board of Aldermen has passed an ordinanc oviding for the issuance of \$10,000 bonds for the improvent of bonds.

Alford, Mass.-Loan Auth zed.-At a recent town meeting the Treasurer was authoued to borrow such sums as

may be necessary in anticipa in of the collection of taxes. Allegheny (Pa.) School Dirlet.—Bond Sale.—The high-est bid received on March 26 ir the \$100,000 31/2% 5 14 year (serial) bonds was that of Dic Bros. & Co., Philadelphia, at 102.91. Following are the bl :

Dick Bros. & Co., Philadelphia. 1 3 V. W. Harris & Co., New York..101\*651 Dollar Sav. Bank, Pittsburg... 10 5 W. J. Hayes & Sons, Cleve....10.3 Edw. C. Jones & Co., Phila.....10 2

For description of bonds s CHRONICLE March 17, p. 546. Allenhurst, N. J.-Bord e.-On March 26 \$44,500 41/2% 20.30 year (optional) electric ght plant bonds were awarded to Isaac W. Sherrill, Poug eepsie, at 105.37. Following are the bids:

I. W. Sherrill, Poughkeepsie, ... 105'8 F. D. Shepard & Co., N. Y..... 10'1 Edw. C. Jones & C., New York.10<sup>-7</sup> Geo. M. Hahn New York.... 104'7 Walter Stanton & Co., N. Y.....104'69 Farson, Leach & Co., New York.104'26 R. B. Smith & Co., New York...10'-9 Seasongood & Mayer, Cincin....10126

Alton (Ill.) School Dist ct.-Bids.-Following are the bias received on March 16 the \$8,000 4\$ 5.8-year (serial) bonds:

For full description of bonds see CHRONICLE March 3, p. 444. Baton Rouge, La.—Bond Sale—Bond Offering.—We are advised by L. F. Hart, Secretary of the Board of Public Works, that \$9,000 of the \$80,000 4% improvement bonds offered for sale (but not sold) on March 1 were sold on March 15 to a local investor at  $101\frac{1}{8}$  and accrued interest. The remaining \$71,000 bonds are now offered for sale at 101 and accrued interest. For full description of bonds see CHRON-ICLE Feb. 24. p. 393.

Beverly, Mass.—Bonds Proposed.—The city will petition the State Legislature for authority to issue \$100,000 sewer bonds.

Bridgeport, Conn.-Description of Bonds.-The \$120,000 bonds recently authorized to refund securities maturing July 1, 19.0, will bear 3½% interest, payable in gold by the City Treasurer. Principal will mature \$6,000 yearly on July 1 from 1901 to 1920, inclusive. Date of sale has not yet been fixed

Bristol, N. H.-Bonds Authorized.-A bond issue of \$21,000 for highway purposes was authorized at a recent town meeting

Bristol, R. I.-Loan Authorized.-The Town Treasurer may anticipate the collection of taxes to the amount of \$40,000.

Buckland, Mass.-Bond Sale.-At a recent town meeting it was voted to issue \$15,000 31/2% 30-year bonds for a new school house. These bonds have been sold to Adams & Co., Boston, at 105.32.

Butler County, Mo.-Bond Offering.-Proposals will be received until 1 P. M. to-day (March 31) by Geo. C. Orchard, County Clerk, for \$30,00 4% 10 20 year (optional) refunding bonds. Securities are in denomination of \$500, dated April 1, 1900. Interest will be payable semi-annually.

Butler County, Ohio.—Bond Bill Passes House.—The \$70,-000 funding bond bill has passed the House of the State Legislature.

Camden, N. J .- Bonds Authorized .- The City Council on March 29 authorized the issuance of \$35,000 repaying bonds.

Canton, Ohio.-Bond Sale.-On March 24 \$7,000 1-10-year (serial) North Cherry Street paving bonds were awarded to W. R. Todd & Co., Cincinnati, at 102 25 for 4% bonds. Following are the bids:

 For 4% Eonds.
 For 4% Bonds.

ination of \$500. Principal will mature \$500 yearly from 1902 to 1909, inclusive, and \$6,000 in 1910. The town has no in-debtedness at present. The assessed valuation is \$104,000.

Toledo, Ohio.—Bond Election.—An election will be held on April 2 to vote on the question of issuing \$150,000 boulevard bonds.

Towns County, Ga.-Bond Sale.-We are advised that this Towns County, Ga.—Bond Sale.—We are advised that this county has sold at par the \$8,000 5% 1-30-year (serial) bonds mentioned in the CHRONICLE Nov. 18, 1899. Of this issue \$1,333½ was taken by Geo. A. Letford, Chicago; \$5,866⅔ by W. M. Stafford & Co., Chattanooga, and \$800 by Joe Town-send of Fain, Union County, Ga. Bonds are in denomination of \$266 66⅔ and are dated Dec. 1, 1899. Travis County, Texas.—Bond Sale.—This county sold and delivered to the State on March 21 an issue of \$133,000 4% 5-40-year refunding bonds. Securities are in denomination of \$1,000, and the interest will be payable annually on April 10 of each year.

10 of each year.

Utica, N. Y.—Bonds Proposed.—A bill providing for an election to vote on the question of issuing \$20,000 school bonds is before the State Legislature.

Virginia.—Bond Purchase.—On March 21, 1900, the Com-missioners of the Sinking Fund purchased from Scott & Stringfellow, Baltimore, \$115,000 "century bonds," issued under the Act of Feb. 20, 1892. The prices paid by the Com-

missioners for the bonds ranged from 90.20 to 90.75. Warsaw (N. Y.) Union School District No. 10.—Bond Offering.—This distr ct will sell at public auction at the law office of Botsford & Botsford, in the village of Warsaw, at 10 A. M., April 2, an issue of \$6,000 5% bonds. Securities are in denomination of \$500 or multiples thereof, dated April 2, 1900 Interest will be payable annually at the office of the 1900. Interest will be payable annually at the office of the District Treasurer. Principal will mature \$2,000 yearly on Oct. 1 from 1901 to 1903, inclusive.

Wellington, Kan.-Further Details of Bond Offering.-As stated in the CHRONICLE of March 10, proposals will be re-ceived until 12 M., April 10, by A. B. Cheever, City Clerk, for \$50,000  $4\frac{1}{2}$ % 10-20-year (optional) water-works bonds. We are now advised that the city will also issue \$14,000 4½% 10-20-year (optional) electric-light bonds, which will be taken by the State School Fund Commission. All of these bonds will be issued pursuant to Chapter 82, Session Laws of the advertisements elsewhere in this Department.

1897. They are in denomination of \$200, dated May 1, 1900, Interest will be payable semi-annually at the fiscal agency of the State of Kansas in the city of New York. Proposals for the water bonds must be accompanied by a certified check for \$2,500, drawn upon some national or State bank, payable to the order of the City Treasurer or Mayor. The official circular states that there is no litigation pending or threatened affecting the validity of these bonds.

Westport, Mass.-Loan Authorized.-The Town Treasurer has received authority to borrow not more than \$12,000 in anticipation of the collection of taxes.

Whitman, Mass.-Loan Authorized.-The citizens of this town have given the necessary authority to borrow not more

than \$80,000 in anticipation of taxes. Wilbarger County, Texas.—Bonds Approved—The At-torney General has approved an issue of \$3,000 refunding bridge bonds.

Williamson County, Texas.—Bonds Not Sold as Yet.—It has been stated in some of the papers that an issue of \$20,000  $3\frac{1}{2}$ % 2-20-year (optional) jail bonds had been sold by this county. In reply to our inquiries we are informed by S. K. P. Jackson, County Treasurer, that this county has not sold any bonds recently. The Commissioners' Court, however, has passed an order to refund \$20,000 bonds at 31/2% interest,

but the terms of the order have not yet been complied with. Woodbury County (P. O. Sioux City), Iowa.—Bond Offer-ing.—Proposals will be received until 2 P. M., April 5. by the Board of Supervisors for \$175,000 :0 year judgment bonds. Interest to be at the rate of either  $3\frac{1}{2}$ % or 4%, payable semi-annually.
