VOL. 70.

SATURDAY, JUNE 9, 1900.

NO. 1824.

CLEARING HOUSE RETURNS.

For the month of May the clearings make a less satis-factory exhibit compared with a year ago than in April. Contrasted with the month of 1899, the aggregate for the whole country records a loss of 12.4 per cent. For the five months the decrease is 10.8 per cent.

The week's total for all cities, shows a loss of 9.8 per cent from 1899. The increase over 1898 is 13.8 per cent and the increase over 1897 is 46.4 per cent. Outside of New York the decrease compared with 1899 is 2.9 per cent, the gain over 1898 is 13.5 per cent, and the excess over 1897 reaches 31.5 p. c.

THE FINANCIAL SITUATION.

The event of the week has been the surrender of Pretoria to General Roberts. So ends one of the most notable campaigns in history. It has not been a campaign of brilliant battles, in which thousands were killed and wounded; but the campaign of a general skilful in measuring the occasion and its needs, tactful in the use of the forces at his command, and intent upon executing the work he had in hand at a minimum loss of life. The same day when the belief that the Boer war in its general character was substantially at its end had thus ripened into as assurance, news came that the complications in China had grown far more serious, threatening to embroil European Powers. Chief interest and the burden of anxiety were thus transferred from South Africa to China. Most likely the plans of the European Powers will not conflict, though at the moment Europe appears to be slightly hysterical. Judging from movements already in progress, we should say that the present situation has been anticipated and prepared for. At all events, it is satisfactory to know that Great Britain has now got itself in a measure free to use its influence, backed by the vigor and resources which a few months of war have made conspicuous, in helping to keep that vast Eastern empire, apparently falling to pieces, free to the industrial rivalry of the nations.

The interest in the impending election in the United States is waxing warmer. We may presume that the canvass will, as it progresses, cast something of a shadow over business interests and prevent this coun try for a time from sharing in the industrial relief and development which an end to the Boer war is likely to bring in Europe. At the same time political developments week by week are making it obvious that the opposition party is gathering no strength, but rather demonstrating its untrustworthiness. Forc ible illustration is found in the proceedings of the convention of the quondam great party now representing the opposition forces held in New York State Tuesday. Sound principle was nowhere in evidence there. Every member bowed the knee to Bryan, and, though not indorsing the Chicago platform, agreed that it would swallow it whole if told to do it at the coming national convention of the party at Kansas City. Such readiness in their truckling subserviency to the old idol is not the kind of dealing with the great issues of the day that attracts the vote of any one. It argues not only lack of principle but lack of manhood-not simply subscribing to what is known to be wrong, but a cowardly way of doing it. We cannot believe that any State or national nominee of a party which shows so little courage of its convictions can secure a majority of the votes in New York State for any office. This feeling will, we think, continue to develop, for it must soon become obvious that with its old candidate and with such dodging of principles a worse defeat awaits the opposition party than it suffered four years ago. What is to be the outcome is clearly illustrated by the election which took place in Oregon on Monday last.

to the altered situation. Much the same is true of our staple products, about the only exception being the wheat market. It appears that increased confidence is being given to the reports of damage to wheat which have been current for some time, and as a consequence the markets have been higher, being quite excited, with a rise on Thursday of over a cent and a-half for September wheat and a further rise on Friday of two and three-quarter cents. These reports of damage refer more particularly to the winter-wheat situation, though dry weather in the Northwest has been a complaint for some time, and for that reason a disposition has also developed to take a more serious view of the situation of spring wheat. No doubt a general rain would quickly bring the spring-wheat crop into good condition. We are inclined to give little credence to news of disaster to crops that is current about this time; almost always reports of that kind are a feature in May and early June. But as to winter wheat they have been so persistently repeated that they are receiving wider attention and more or less belief. No doubt Kansas farmers will gather a splendid crop of winter wheat, but Michigan, Indiana and Ohio, which have all along given promise of a short yield, have suffered recently further decided deterioration. The weather conditions are a feature now of special importance and will be carefully watched during coming weeks.

Some difference of opinion has developed with reference to the action of the Atchison Topeka & Santa Fe Railway Company in increasing the dividend this week on the preferred stock. The August dividend is to be $2\frac{1}{2}$ per cent, against only $1\frac{1}{2}$ per cent in February, placing the stock on a 5-per-cent basis instead of the previous 3 per-cent. In certain quarters this step has been severely and not altogether justly criticised. The amount of the outstanding preferred stock is \$114,199,530, so the additional 2 per cent per annum will call for an increase in the dividend payment of over $2\frac{1}{4}$ million dollars. Criticisms of course are based on the theory that it is not certain that the higher rate of distribution can be maintained, that earnings now are of exceptional magnitude, and that to raise the dividend only to have to reduce it again a short while hence would neither conduce to the advantage of the shareholders nor tend to promote the company's credit. As it happens, there are enough doubtful factors in the problem to furnish material for plausible arguments on both sides of the problem. Under such circumstances the directors must be assumed to possess superior knowledge to the outsider, and to have acted in accordance with this knowledge. One thing is perfectly evident : on the statement of earnings submitted the board could have had no alternative but to pay the full 5 per cent to which the preferred stock is entitled. From the statement referred to it appears that the results for the fiscal year now drawing to a close will show a surplus of over \$9,000,000 in excess of the requirements for all charges, including the interest on the Adjustment Incomes. The call for the 5 per cent dividends, large though it is, would take only about 5⁴ million dollars of this amount, still leaving, even after the payment of the dividend, a balance of 31 million dollars.

Industrial affairs remain in much the same condition as heretofore reported. Consumption of manufactured products continues to come short of expectations and prices are gradually adjusting themselves considerations enter into the matter, namely the

As to the outlook for the immediate future, two

probable course of expenses and the probable course The extraordinarily of traffic and gross receipts. favorable showing for the current fiscal year has followed very largely from the fact that the managers have been able to keep the expenses down. For instance, for the ten months to April 30, with an increase of \$4,529,654 in gross revenue there was actually a reduction of \$388,329 in expenses. The two together produced a gain of \$4,917,983 in net, raising the total of the net from \$10,430,531 in 1898-9 to \$15,348,514 in 1899-00. Thus the increase in the net in this one year has been almost 50 per cent. Of course in the earlier years, as we have frequently pointed out in these columns, expenses were above the normal, including considerable outlays for improvements and betterments, which work has now been brought to a close. But allowing for that, the fact that materials and supplies are costing much more than formerly, and that the volume of traffic has increased so materially, would incline us to the view that the ratio of experses must be expected to increase hereafter. Opposed to this view, however, we have the statement of President Ripley, who in an interview is quoted as follows: "The savings shown are largely due to reductions in transportation cost, the result of the improvement work we have been carrying out for the past four years. Our maintenance expenses have not been changed materially from those of the previous year." As to the likelihood of a falling off in gross earnings, the situation of the Atchison is much like that of the Rock Island, whose report we review to day on another page. It is possible that there may be a loss in the tonnage in merchandise and general freight as the result of the reaction now being experienced in trade, and it is conceivable also that there may be a falling off in the case of corn and some other agricultural products, concerning the prospects for which it is too early as yet to have any definite information. But either or both these contingencies would seem to be covered by the fact that the wheat crop presently to be harvested in Kansas is estimated at 85 million bushels, against only 36 million bushels in 1899.

highest since February 17, when it was \$24,015,675. As stated below in this article, the Treasury De-It is noteworthy that the loans are now larger than partment at Washington has this week made another ever before reported, exceeding by \$6,415,700 the call upon the depositary banks for a surrender of \$5,hitherto unprecedented maximum of \$793,852,900, 000,000 of the Government deposits held by them, the which was recorded July 8 last year. The specie payment to be made on or before June 25. This gives added interest to the monthly debt and Treasholdings are the greatest since August 26, the legal ury statements for the 1st of the month, showing that notwithstanding the premium payments made on year. The deposits are greater than have been rethe bonds presented for refunding, the Secretary is ported since July 8 1899. The call for \$5,000,000 of not able to reduce his cash holdings very materially. The aggregate of cash in Sub-Treasuries on the deposits of the public funds in the designated depository banks, issued May 22 for June 5, became June 1 was but little different from what it had effective this week. This week on June 8 another call been on May 1, the amounts being \$262,831,054, was issued for \$5,000,000 to become operative June 25. against \$262,646,440. It is true that as compared The applications for the exchange of fundable bonds with April 1, when the amount was \$276,667,056, for the new 2 per cents amounted at the close of there has been a reduction of nearly fourteen million business on Thursday to \$291,474,150, of which dollars. But if we go still further back, to March 1, before the time when the new law was enacted, we \$67,622,200 came from holders other than banks. find that then the total was \$264,795,086, which com-Money on call, representing bankers' balances, has pares with the present total of \$262,831,054 for June loaned at the Stock Exchange during the week at 2 1. The result therefore is that in the three months per cent and at $1\frac{1}{2}$ per cent, averaging about $1\frac{1}{3}$ per cash has been drawn down not quite two million dollars in face of premium payments reaching about 30 cent. Very little money has, however, been loaned below 14 per cent. The transactions on Monday and million dollars. on Tuesday were at 2 per cent and at 13 per cent, The net amount of the public debt now stands four million dollars larger than it did on March 1, being with the majority at 2 per cent. On Wednesday and

1,122 millions, against 1,118 millions, but owing to these premium payments, which are in the nature of a bonus or gift to the bondholders, this does not indicate the true relation of revenues to disbursements. Taking the monthly revenue statements and combining them, we find that aggregate receipts for March, April and May were \$139,116,000, while the ordinary disbursements of the Government during the same period were but \$113,544,000, thus showing an excess of receipts for the three months in the sum of over $25\frac{1}{2}$ million dollars. Of course the refunding operations have by no means been completed yet. According to the debt statement for March 1 there were outstanding at that time of the bonds which are accorded the privilege of refunding no less than \$839,182,220. Of this amount only \$284,228,050 had been exchanged up to and including May 31 (all but \$63,440,350 coming from the banks), and latterly the work of refunding has proceeded very slowly. As to the Government deposits in the banks, these have not fluctuated greatly at recent monthly dates, having been reported \$111,322,-418 June 1, \$110,851,902 May 1, \$110,642,115 April 1 and \$111,793,547 Mch. 1. Now, however, two calls for \$5,000,000 each have been made, the first of which had to be complied with on or before June 5, and the other just announced and which will have to be met not later than the 25th. The Secretary's purpose in making these calls is, as stated in our issue of May 26 (page 1028), to utilize the balances in the banks to provide the means to pay off the 25 millions of the old two per cents which are to be redeemed August 18.

The official rates of the European banks remain unchanged, and, owing to the political complications in China, there is some slight degree of firmness observable in the unofficial rates at the principal centres. The statement of the New York Associated Banks last week showed a gain of \$4,147,000 in cash, of which \$3,518,900 was in specie. The loans were increased \$7,347,600 and the deposits were augmented \$11,344,200, while the gain in surplus reserve was \$1,310,950, this item now standing at \$20,123,275, the tenders are the largest since March 12 1898, and the total cash has not been exceeded since June 24 last

on Thursday loans were made at 2 per cent and at $1\frac{1}{2}$ per cent, with the bulk of the business at 12 per cent. On Friday transactions were at 2 per cent and at $1\frac{3}{4}$ per cent, with the majority at 1³/₄ per cent. Banks and trust companies quote 2 per cent as the minimum. There were quite liberal offerings of longtime loans early in the week and considerable business was done at $3\frac{1}{2}$ per cent for from six to eight months on first-class collateral. After Wednesday, however, the cheap money seemed to have been absorbed, for offerings were less free, and as there was a good demand rates were advanced to 4 per cent for the above-noted periods. Quotations at the close of the week were 3 per cent for sixty to ninety days, $3\frac{1}{2}$ per cent for four and 4 per cent for six to eight months on good mixed Stock Exchange collateral. There has been a better demand for commercial paper this week and a good business has been done. The supply is, however, by no means equal to the inquiry, and rates are easier, especially for the short dates. Quotations are $3\frac{1}{2}@3\frac{3}{4}$ per cent for sixty to ninety day endorsed bills receivable, $3\frac{1}{2}@4\frac{1}{4}$ per cent for prime and $4\frac{1}{2}@5$ per cent for good four to six months' single names.

It was officially announced on Tuesday that General Roberts had then occupied Pretoria after defeating the Boers at Six Mile Spruit on the previous day, where they had massed probably in order to cover the withdrawal of General Botha from the Transvaal capital. The situation in China was reported early in the week to be grave, and it was said that the Japanese fleet was being mobilized to resist the movements of the Russians. The American forces in the Pei Ho River have been reinforced, and it is reported that, if necessary, troops will be sent to China from Manila to protect American interests. The Bank of England minimum rate of discount remains unchanged at $3\frac{1}{2}$ per cent. The cable reports discounts of sixty to ninety-day bank bills in London $2\frac{5}{8}$ @ $2\frac{3}{4}$ per cent, against 2 13-16 per cent on Tuesday. The open market rate at Paris is 24 per cent, and at Berlin and Frankfort it is $4\frac{5}{3}$ per cent. According to our special cable from London the Bank of England lost £816,210 bullion during the week and held £32,-337,745 at the close of the week. Our correspondent further advises us that the loss was due to shipments of £681,000 net to the interior of Great Britain, to the export of £140,000 (of which £121,000 were to France and £19,000 to Chili), and to an import of £5,000 from Portugal.

The foreign exchange market has been dull and almost featureless this week, and though there has been some some slight monetary tension at the European centres, owing to the situation in China, exchange does not seem to have been materially influenced thereby, and rates remained unchanged until Friday. There was quite liberal selling of securities early in the week for London account, but there did not appear to be any special demand for remittance in consequence of these sales, and the tone remained dull and steady. The few commercial bills which appear on the market are promptly absorbed. Gold received at the Custom House during the week, \$17,957. Tho Assay Office paid \$798,774 91 for domestic bullion. The S. S. Maona left Sydney, N. S. W., June 6, with \$750,000 gold for San Francisco.

Nominal rates for exchange were reduced by a few of the drawers on Monday, and the range thereafter was from 4 85 to $485\frac{1}{2}$ for sixty-day and from 4 88 to $488\frac{1}{2}$ for sight. Rates for actual business opened on Monday unchanged compared with those at the close of last week for long and for short, at $484\frac{1}{2}@484\frac{3}{4}$ for the former and $487@487\frac{1}{4}$ for the latter, but cables were reduced one-quarter of a cent, to $487\frac{1}{2}@$ $487\frac{3}{4}$. There was a steady tone, which continued until Friday, though on Wednesday cables were a shade stronger, but they grew easier on the following day. On Friday, however, the market was firm at an advance of one-quarter of a cent all around. The following shows daily posted rates for exchange by some of the leading drawers.

The market closed firm on Friday, with rates for actual business $4 84\frac{3}{4}@4 85$ for long, $4 87\frac{1}{4}@4 87\frac{1}{2}$ for short and $4 87\frac{3}{4}@4 88$ for cables. Commercial on banks $4 84\frac{1}{4}@4 84\frac{1}{2}$ and documents for payment $4 83\frac{1}{2}@4 84\frac{1}{2}$. Cotton for payment $4 83\frac{1}{2}@4 83\frac{3}{4}$, cotton for acceptance $4 84\frac{1}{4}@4 84\frac{1}{2}$ and grain for payment $4 84\frac{1}{4}@4 84\frac{1}{2}$.

The following gives the week's movements of money to and from the interior by New York banks.

Week Ending June 8, 1900.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Curreney	\$6,599,000	\$3,782,000	Gain. \$2,757,000
Gold		511,000	Gain. 495,000
Total gold and legal tenders	\$7,485,000	\$4,293,000	Gain. \$3,192,000

With the Sub-Treasury operations the result is as follows:

Week Ending June 8, 1900.	Into Banks.	Out of Banks.	Net Thange in Bank Holdings.
Banks interior movement, as above		\$4,293,000	Gain. \$3,192,000
Sub-Treasury operations	17,400,000	20,500,000	Loss. 3,100,000
Total gold and legal tenders	\$24,885,000	\$24,793,000	Gain. \$92,000

The following table indicates the amount of bullion in the principal European banks.

⁺ The Anstro-Hungarian Bank Statement is now issued in Kronen and Heller instead of Guideu and Kroutzer. The reduction of the former currency to sterling £ was by considering the Guiden to have the value of 50 cents. As the Krone has really no greater value than 20 cents, our cable correspondent in London, in order to reduce Kronen to £, has altered the basis of conversion by dividing the amount of Kronen by 24 instead of 20.

THE FIFTY-SIXTH CONGRESS.

The work of a legislative body must be judged from two points of criticism—what it has actually done and what it has refrained from doing. As a general rule the people, and particularly the business interests, are best satisfied when Congress does least. A busybody Congress is above all things the terror of conservative citizens. But there are necessarily occasions when Congress must act, and when delay or postponement will merely serve to complicate an already confused situation. At such times the work of a legislative session must be judged not merely by the wisdom or unwisdom of its final action, but by the promptness and efficiency with which it acted. The Fifty first Congress, which convened in December 1889, incurred the just reproach of rash and unnecessary legislation. Its wholesale cutting of revenue and heaping-up of expenses, followed by the dangerous silver-purchase law, sowed seeds of serious trouble for the next five years. A very little and very conservative fiscal legislation was all that the situation legitimately called for. On the other hand the Fifty-third Congress, whose first session immediately followed the panic of 1893, was at once confronted with the need for action. Repeal of the Act of 1890 was extorted from this body, chiefly through the co-operation of the Opposition. But when the Congress faced the demand for constructive legislation, in the shape of properly-increased revenue, scientific provision for the protection of the public credit, and readjustment of a greatly disorganized currency, it failed almost completely to discharge its duties, and history will not spare criticism.

The position of the Fifty-sixth Congress, whose first session closed its work on Thursday, has been somewhat peculiar. As usually happens, even at times of general contentment and prosperity, the committees were beset with plans and schemes for legislation in every possible direction. The enlargement of the nation's power and outside affiliations, as a result of the successful war with Spain, added to the pressure of this sort. It is therefore, we think, highly creditable to the record of this Congress that practically all of such schemes have failed. When reluctance to act, except where action is unavoidable, is adopted as a policy, some useful measures among the rest will always go by the board, and this session provides no exception. The business community would be better off with the bankruptcy law amended. The bill for the reform of the consular service would, if enacted, have been a most important step in a very necessary work of future reconstruction. The war revenue certainly ought to have been conservatively reduced on the lines proposed in the House bill and approved by Secretary Gage. It is possible that neglect of this last-named duty may make trouble before Congress convenes in its next session, and the failure to act is not made any more creditable from the fact that the bill was confessedly neglected through fear of offending some business interests on the eve of a political campaign. But the loss of really needed legislation through these several omissions has ample compensation in the refusal of Congress to act on such ill-judged or half-considered measures as the Ship Subsidy bill, the Anti-Trust bill, the bill to provide a new Cabinet Department of Commerce or the Nicaragua Canal bill. Some of these proposed measures involved grave departure from our traditional policy; others were merely the product of

restless inventiveness or of the spirit of agitation. Any one of them would have been an experiment in legislation so hazardous that Congress was wise in moving cautiously.

It was possible, then, for Congress to neglect the great bulk of the legislative measures placed before it and in the main to serve the country's interests by so doing. But there were two or three matters which could not be passed over. The question of the money standard and the currency had to be settled unless the controlling party was willing to go into a new Presidential campaign with the same series of contradictions and quibbles on the statute books which had confused the issue in every election for twenty years past. This done, it was absolutely essential that a frame-work of government should be provided for our new dependencies.

The problem of financial reconstruction has not been worked out as thoroughly as many of us had hoped. But when the magnitude of the problem is considered, the conflict of legislative opinion on the question, the temptations to compromise always present on the approach of a political campaign, and the ease with which a decided handling of the question might have been avoided, great credit must be conceded to Congress for what it has accomplished. The gold standard is explicitly affirmed, and by this act alone the confusing doubts that have existed ever since the Civil War are swept away. The gold reserve against outstanding notes is plainly defined and guarded, and neither its amount nor the measures to be taken for its protection are left subject to such legal uncertainties as harassed Secretary Carlisle in the troubled days of 1893 and 1894. There have long been misgivings among conservative critics of our financial policy, arising from the fact that Congress invariably refused to reform the currency in hard times because the agitators held control, and in good times because the financial machinery went so smoothly as to create no uneasiness in the legislative mind. There have not been wanting short-sighted advisers this year to dangle before Congress the comfortable argument that our position was now so impregnable that the dangers of 1884 and 1893 could never return. That the National Legislature has turned a deaf ear to these voices and passed a law making it not only the Government's option but its duty to maintain the public credit, is an act for which the first session of the Fifty-sixth Congress deserves grateful remembrance.

The matter of providing a practical government for our new possessions was a pressing business consideration. Wide differences of opinion existed as to how this provision should be made, but the main question to decide was, whether Porto Rico and Hawaii should have any settled government. At the last, it will be remembered, the Porto Rican citizens who had objected most strenuously to the imposition of duties on goods shipped from the island to the United States, joined in asking only for some permanent constitution and government under which trade could have a fair chance at revival. The plan adopted, open as it undoubtedly is to criticism in many particulars, is a practical working scheme, and is permanent in its nature. A better plan might conceivably have been constructed, but it was the alternative of legislative deadlock or shuffling indecision which the parties in interest had to face. From this danger the Fifty sixth Congress has delivered the United States and Porto Rico.

In what way our subsequent history will be affected by the establishment of the colonial principle in the case of Porto Rico and by the opposite arrangement in Hawaii, whereby the islands of that group may probably reckon on future incorporation as a sovereign State, is not an easy question to answer; but the salient point is that in both matters of legislation something had to be done at once, and that something has been done—in our opinion with reasonable foresight and conservatism. That the scheme for civil government in the Philippines has failed of enactment does not seem to us particularly a matter of regret. These islands may properly enough be kept under well-organized military rule until the military campaign now progressing in them has been brought to an end. Unfortunately this end was not clearly enough in sight to warrant the granting of a charter of government adapted to a peaceable community.

THE ROCK ISLAND REPORT.

The annual report of the Chicago Rock Island & Pacific Railway Company has been issued this week. It covers the year ending March 31 1900, thus coming down to quite a recent date. Even very casual reading of the report would suffice to reveal that the year has been one of prosperity and progress. In every direction the showing is about as satisfactory as could be wished. Whether we have regard to the revenue results, the traffic results or the operating results-the latter with reference to the economy and efficiency with which the property is being administered—the outcome is in each case in the highest degree gratifying, indicative of a property in excellent condition, ably and skilfully managed.

Take first the income exhibit for the twelve months. This shows a surplus in the large sum of \$2,462,475 over and above fixed charges and 4 per cent dividends on the stock. The surplus was large, too, in the preceding year, but amounted then to only \$1,812,725. The stock is on a 5 per cent dividend basis, but only 4 per cent has been allowed for, because the other 1 per cent is not dependent upon earnings, but comes out of a separate fund specially created for that purpose in the way noted in our review for the previous fiscal year. This fund ensures the payment of the one per cent extra up to and in_ cluding the 1st of January 1903—that is, for nearly three years longer; but even if the full 5 per cent dividends received by the shareholders had been deducted from earnings, the surplus for the twelve months would have been almost two million dollars. This two million dollars would suffice to pay 4 per cent more on the total of the outstanding stock. Stated in another way, while dividends were 5 per cent and only 4 per cent of the same came out of income, earnings were actually equal to 9 per cent on the shares. Of course this excellent showing is the result of further noteworthy improvement in traffic and revenues, and managers and stockholders alike have reason to congratulate themselves upon the way the business of the road is being developed. The increase in gross earnings, as compared with the twelve months preceding, fell but little short of two million dollars (\$1,982,690), while the increase in net was \$676,350. The gain of two millions in gross followed over a mil-

lion gain (\$1,119,331) in 1898-9, and nearly 21 millions gain (\$2,401,931) in 1897-8. This shows how large and uninterrupted the expansion has been, the aggregate of the gross having risen in three years from \$17,146,653 to \$22,650,604, an addition of 51 million dollars, or 32 per cent. The further improvement in the late year came in great measure from the freight department, which supplied \$1,529,437 of the increase; but there was also a considerable addition to the passenger revenues, namely \$487,455. In the previous year the gain in the passenger receipts had been larger than in the freight receipts, reaching \$736,764. We pointed out, however, at the time that this gain was the first substantial recovery recorded by the Rock Island in its passenger earnings, the increase in the same in 1897-8 having been only \$244,-690. As the passenger business is much slower in responding to industrial revival than the freight business, the indications then were that a continuance of this revival would bring a further expansion in the passenger department. The addition of another half million dollars to the total in the late year shows that this expectation has been realized. Nevertheless the total of the passenger receipts is not yet up to that of the best previous years. In 1893-4 these receipts were \$6,538,568. That, it is true, included the travel to the Chicago Exposition, but even in 1892-3 the amount was \$5,843,146. For the last year the aggregate of the passenger revenues was but \$5,541,036. It would hence seem as if the maximum in the present upward movement had not yet been reached.

In the freight traffic the further gain in the late year came in just the way looked for-that is, it came from an expansion in the tonnage of merchandise and general freight rather than from any very considerable added growth in the crop tonnage. In fact, some items of the crop tonnage fell off, just as the indications twelve months ago had made it evident would be the case. For instance, the fact that the wheat crop raised in Kansas in 1899 was but 36 million bushels, against 64 million bushels in 1898, is reflected in a wheat tonnage by the Rock Island of only 391,241 tons for 1899-1909, against 484,265 tons for 1898.9. As it happened, though, the corn crop in the same State in 1899 was 100 million bushels larger than in 1898, and hence the loss in the wheat tonnage was offset by a gain in the corn tonnage. Taken altogether the traffic in grain and farm products was somewhat larger than in the preceding year; but, as already stated, the bulk of the increase in the freight tonnage came from the classes of business dependent upon the state of trade. Aggregate freight traffic rose from 8,193,409 tons to 8,833,025 tons, and only 123,232 tons of the increase was contributed by the grain and live stock tonnage. This result is the more striking as it repeats the experience of the previous year, when, indeed, the grain and live stock tonnage actually fell off to a small extent. The fact is an important one to bear in mind, for the general public is inclined to lay chief stress upon the outturn of the crops, ignoring aitogether the part played by business revival in affecting the results. To bring out the distinction referred to we bring forward a table which we published a year ago, somewhat enlarged as to the number of items included and with the figures for 1899-90 added. We give, it will be observed, two groups or classes of tonnage, the first embracing the leading

items of traffic dependent upon the crop situation, and the second comprising the items chiefly dependent upon business activity and the state or course of trade.

TONNAGE OF LEADING ITEMS OF FREIGHT ON ROCK ISLAND.

The foregoing will repay careful study. It will be observed that the agricultural tonnage comprised in Group I., after showing marked expansion during the earlier part of the period here covered, has during the last two years remained substantially stationary. That is to say, the aggregate of Group I., after dropping from 2,073,616 tons in 1893-4 to 1,481,767 tons in 1894.5, rose to 1,619,255 tons in 1895.6, to 2,044,815 tons in 1896-7, and then to 2,609,705 in 1897-9; but in the two years since then there has been only a slight further advance made, namely, to 2,705,718 tons. Group II., on the other hand, has followed an independent and a totally different course. This group, as already stated, comprises the classes of freight which reflect the state of general trade, and which rise or fall according as trade is active or the reverse. Its aggregate kept declining even while the agricultural tonnage was rising, trade remaining dull and stagnant despite the large crops. Thus as against 3,858,548 tons in 1893-4, the total of that group in 1896-7 was but 3,364,589 tons. In the three years since then there has been marked recovery and expansion, the yearly addition having averaged nearly half a million tons, the total rising from 3,364,589 tons to 4,829,358 tons, an aggregate increase for the three years of nearly 50 per cent.

These comparisons are instructive in their bearing and efficiency with which the property is being adon the immediate future. The outlook at the moministered. On this point the record is one of steady ment is not as clear as it was twelve months ago. A growth and progress. We have room for only one il. reaction in trade is in progress, and when one considlustration in support of the truth of this statement. ers that the high level of mercantile prices recent'y Here is a little table showing freight-train mileage, ruling have had the effect of checking consumption in tonnage mileage, train-load, and freight-train earnings, many lines of trade, besides unduly stimulating profor the last seven years. duction, that values are now declining, and that we Av. train Train earn. Tons have ahead of us a Presidential election, with all the one mile. load. per mile \$1.75 1,605,225,704 177 ancertainties that this involves, the indications favor 1899..... 8,365,560 1,452,286,497 174 1.72 the idea that we must expect a period of rather dull 1.65 1,421,433,866 169 1898..... 8,387,650 trade for the next few months. We therefore have 1897..... 7,437,841 1,175,517,765 1581.51 presented to us a possibility (should the reaction be 143 1.48 1,078,846,776 1896..... 7,510,857 prolonged) of some falling off in the aggregate of 1,071,763,263 121 1.26 1895..... 8,866,103 118 1.18 1894.....10,898,552 1,288,576,685 tonnage in Group II. If the crops should coincidently Thus, by adding to its train-load the road has prove bad, we might have a repetition of the experisteadily enlarged its freight-train earnings, so that in ence of 1894-5, when there was such a sudden and large 1900 the trains earned \$1 75 per mile run, against shrinkage in the freight tonnage. But while nothing \$1 72 in 1899, \$1 65 in 1898, \$1 51 in 1897, \$1 48 in definite can as yet be said with reference to several of 1896, \$1 26 in 1895 and \$1 18 in 1894. There has the crops, we already know that such a complete failure been no break in the improvement, it will be obas occurred in the period referred to is the present year served, and the trains now earn almost 50 per cent out of the question. The wheat crop in Kansas is already assured. Whatever may be the outlook for more gross than they did six years ago.

that cereal in other parts of the country, in Kansas the yield will be of phenomenal extent. Reliable estimates say that the harvest in that State will be in the neighborhood of 85,000,000 bushels, against 36,000,-000 bushels in 1899. The Rock Island will hence have a large increase in its wheat traffic to offset any loss in the other items of the crop tonnage or a possible falling off in the aggregate of the tonnage in Group II. If to this we add the fact that in the late year the Rock Island earned two million dollars in excess of the call for the five per cent dividend, that it holds besides a special fund to ensure a portion of this dividend, it becomes evident that the position of the property is one of exceptional strength.

A word or two may be desirable with reference to the course of expenses. In 1898.9, out of an increase of \$1,119,331 in gross earnings, augmented expenses took \$1,080,145, leaving only \$39,186 gain in net. In the late year the addition to net was decidedly larger, reaching, as we have already seen, \$676,350, yet the course of expenses was much the same, they taking \$1,306,340 of the \$1,982,690 gain in gross. We showed in reviewing the figures for the previous year that the enlarged expenses represented in great degree exceptional outlays for improvements and betterments. In a measure this remark applies also to the further augmentation in the expenses during 1899-1900. Of course as the company had a much heavier traffic in both passengers and freight, there was necessarily a considerable increase in expenses on that account. A new factor also appeared in the circumstance that much higher prices had to be paid for nearly every item entering into the operating accounts. That this feature can not be lightly dismissed is evident when we note that 17,995 tons of steel rails laid in the track in 1899-1900 cost the company \$407,317, whereas 17,641 tons laid in 1898-9 cost only \$317,043. Making due allowance for all these things, however, study of the report makes it evident that the betterment outlays were again heavy.

The prices which may have to be paid for the supplies and materials needed in the operation of the road are obviously not within the control of the managers. They are, however, responsible for the economy

THE COTTON STAND AND ACREAGE IN 1900.

This season's cotton-planting furnishes a clear case of increased acreage. Last year the obvious situation was a decrease. We have always admitted that our figures of changes in the area planted are imperfect. We can easily tell which way the tendency is; so far the investigator is on safe ground, for the direction of the drift, whether towards expansion or contraction, can be told just as positively as it has been stated above. Besides that, it is possible to measure with a degree of accuracy the force of that tendency. But any one who claims that the percentage he may fix on and publish is accurate is self-deceived. The planters do not themselves know as a rule the number of acres they have under cultivation or even the comparative annual additions or deductions. Then, besides that, one has only to take in the size of the country; to call to mind the marvelous extent to which cotton-planting has been developed; to note the decided increase in the number of small producers in recent years and the corresponding decrease in the number of large plantations-to be satisfied that to obtain through correspondents, however numerous, an accurate count of acres, is an impossible feat.

It is desirable to keep this feature always in mind; but it is of particular interest on the present occasion because the large falling off in the yield of 1899 leaves a presumption that the percentage of decrease in acreage we gave a year ago was in some degree too small; in other words, that the crop of 1899-1900 was raised on a smaller acreage than we estimated it. Of course, if that is the case, it is an important fact to be included in our investigation to-day, as it serves to moderate expectations of yield the coming season; that is to say, we find an increase in the area under cotton the current year over last year of 9.76 per cent; but that increase must be reckoned on the true acreage of last year; that is, on the total acres after deducting whatever loss in acreage there may have been in 1899. If, for instance, the decrease in planting in 1899 was, say, 6 per cent in place of 3.20 per cent as we gave it, or was 8 per cent as the Agricultural Bureau estimated it, then in either case the comparison with two years ago, when the crop was so large (11,235,333 bales), or with three years ago when it was almost as large (11,180,960 bales), would not merely show a smaller average expansion in acreage this year compared with 1898 and 1897, but only a moderate average growth since 1897. 'Before leaving this point we should add that we do not make the changes in our tables to-day that would be necessary to bring previous years' figures of acreage into correspondence with the idea we have expressed above. The chief reason for not studying the point more fully and altering the fig ures is that the Census Bureau begins about this time its count of the cotton acreage, and in a few months at the most those data will be open to the public. After obtaining the Census results, which ought to be and presumably will be the most reliable that can be secured, each of our percentages of increase and decrease since 1890 will perhaps need some re-adjustment. At all events, it is clearly desirable to await the Census figures before disturbing the record.

also to have influence in reducing some of the more extravagant anticipations being expressed as a result of the enlarged acreage planted. What may be considered extravagant anticipations are those which take the estimated acreage in 1897 or in 1898 and base an estimate of total possible production on an assumption of the same yield per acre in 1900 as in those years. Of course no reference is intended in that remark to differences in weather conditions. We all know that the crop depends more upon them than upon acreage. Our reference is to a feature which, as we view the aids to the fruitfulness of the cotton plant, has a decided bearing on the problem of the possibilities of yield on this year's planting. Last June in our acreage report we warned our readers of the potency of the same influence. We have in mind the phenomenal overflow of the Mississippi in 1897 and the stimulating effect as a fertilizing agency it had on the productiveness of the plant in 1897 and 1898. No one questions the good that the use of commercial and home-made manures, in the Atlantic States chiefly, has done, year by year, in adding to the product per acre obtained from those lands; instead of raising a third of a bale of cotton to an acre, a bale of lint has become, through fertilization, not such a very uncommon result by the more successful planters in those States. Acreage figures, for instance, that show a planting in, say South Carolina, which afford no increase per acre during late years in the product of that State must be faulty. The Charleston phosphates, one of the best sort on the market, if not the best, for cotton, is a chief agency in securing that development for the State.

In view then of what fertilizers are doing for the poorer lands of the Carolinas and Georgia &c., can any one believe that the marvelous overflows in 1897 of the Mississippi and its tributaries, together with the other Southwestern rivers and the adjacent bayous had no special and decided influence on the size of the cotton crops in that year and the succeeding year? There has been no general overflow in the three years since 1897; what was the extent of the one in that year the reader will discover by turning to our acreage report for the year 1897 (June 12, page 1119,) and studying the map and facts given by us at that time. Never before was there an overflow in those sections when the waters were so high and when the extent of land covered was so great. The investigator, after having become possessed of the facts as to its size, must remember not only that no fertilization in any measure like it has occurred in those sections since, but that in the meantime that stimulus to an abnormal fruitage has been in good part do not mean that We of course used up. the land has become poor land. It is bottom land all the time and produces largely. But the

enriching deposit the overflow left, which materially helped to turn out the large crops of 1897 and 1898, has spent itself. This we must assume was one reason why the last crop, that of 1899-1900, was so much smaller than the two previous ones, and one reason why the planting of 1900 cannot be expected to afford as large a yield per acre as either of those two crops averaged.

since 1890 will perhaps need some re-adjustment. At all events, it is clearly desirable to await the Census figures before disturbing the record. There is another, and even more important, feature in the year's planting conditions which ought While what we have just said affords, we believe, a While what we have just said affords, we believe, a true account of the influence of the 1897 overflow on the productiveness of the soil in the richest sections of the cotton States, and consequently on the size of the cotton crops in 1897 and 1898, that influence un-

1125

fortunately does not admit of absolute measurement. One would naturally turn to the annual acreage figures and the yield of each State for confirmation. That method, however, is open to the difficulty that neither of those results can be accurately obtained except by means of a Census. The total crop of the United States as we give it each year in September is, though, as exact a statistical tabulation as can be in any way secured. Taking those figures and using our own reports of acreage, which we of course have more confidence in than in any others, we reach interesting results which are confirmatory of our contention. That is to say, they indicate a yield per acre in the two years named of 237 pounds in 1897 and 240 pounds in 1898, or a larger weight per acre than any other cotton crops have ever averaged.

Again, only a few years previous, the next most conspicuous spring overflows occurred. There were two of them, happening in consecutive years; both were much less in extent than was the flood of 1897, but they were so prolonged through the spring months and into June as to interfere materially with planting; for which reason and also owing to other adverse conditions later in most of the Southern States, the benefit they did was not observable in the total crop figures of either year. The first of these two overflows was in 1892 and the other in 1893; and, as already stated, the then inundated lands, because of the late subsidence of the water, had no opportunity to be fully cultivated nor the rich fertilizing deposits those floods left to be used until 1894; then the average yield per acre (in 1894) went up to 234 pounds (the third largest yield per acre ever known) from 177 pounds, the average for the two years 1892 and 1893.

We would not, however, have entire confidence in the teaching of these figures, as substantial proof of the correctness of our position, if they stood alone. But when taken in connection with what has been previously said, and especially with the fact not to be disputed that such floods always leave laminæ of fertilization over the ground their waters cover, we think the conclusion reached becomes quite irresistible-that the surprising large addition to the crops of 1897 and 1898 were not caused by greatly increased acreage but in considerable measure to the stimulus derived from the deposits the floods left in 1897. Growing out of the same conditions, we have the reason in part for the unexplained disappointment in the yield of 1899; the loss was to an important extent due to the circumstance that the two large crops had almost wholly exhausted the fertilizing power of the 1897 flood. Granting these conclusions are reliable, it follows, as already suggested, that the crops of 1897 and 1898 are not a safe standard from which to start an estimate of the possibility of the

eral situation, &c., on the first of June 1900 as these reports represent those matters.

FIRST.—As already said, the movement in 1900 has obviously been towards enlarged acreage. The reason for this year's radical expansion in area is not far to seek. It is found in the decidedly profitable return to the planter from his 1899 product. Instead of five cents or less per pound, realized for the previous crop, his cotton averaged him over seven cents, with the world's stock at time of the current season's planting less than in any year since 1890. A few months ago it almost seemed that there would be a cotton famine before the new crop began to move in sufficient volume to meet consumptive requirements. Now the outlook is quite different. It is of course true that the present season will end with smaller visible and invisible stocks of cotton than for many years past, but it is equally true that the high price for the raw material has checked the demand for the manufactured products and spinners' requirements are much less urgent than they were. This is true of the inquiry in the United States and also of the inquiry from Furthermore, merchants pretty Great Britain. much everywhere hold full stocks of many descriptions of goods.

These considerations appear to have been little in the mind of the planter of any section. Additions are not confined to a particular locality, they are general. So far as percentages go, the highest, of course, are reported in the States of smallest production and as a rule where the decrease in area planted was largest last year. Thus the greatest percentage of excess over 1899 is in Missouri 30 per cent, Oklahoma 25 per cent, and Virginia 22 per cent. But the larger producers also show material gains. North Carolina, for instance, reports 9 per cent, against a loss last year (as we estimated it) of 5 per cent; South Carolina, 11 per cent, against a loss of 6 per cent last year; Georgia, 11 per cent, against a loss of 5 per cent last year, and Florida, 15 per cent. Along the Gulf the increases have been 9 per cent in Mississippi, 9 per cent in Louisiana and 10 per cent in Alabama. Had it not been for the floods, it is certain that the augmentation in Texas would have been greater than the 8 per cent our reports indicate. The addition in Arkansas reaches 10 per cent; in the Indian Territory it is 15 per cent and in Tennessee it is 10 per cent. The changes this year, as we have made them up for each State, are shown in detail in the appended statement:

	1.0000000	Estimated for 1900.				
STATES.	<i>Acreage</i> , 1899.	Increase.	Decrease.	Acres, 1900.		
Virginia	43,650	22 per cent.		53,253		
North Carolina	\$62,600	9 per cent.		940,234		
South Carolina	1,972,120	11 per cent.		2,189,053		
Georgia	3,462,750	11 per cent.		3,843,652		
Florida	285,000	15 per cent.		327,750		
Alabama	2,958,620	10 per cent.		3,254,482		
Mississippi	2,916,540	9 per cent.		3,179,029		
Louisiana	1,203,000			1,311,270		
Texas.	6.187.720	8 per cent.		6,682,738		
Arkansas	1.426.92(10 per cent.		1,569,612		
Tennessee	611.415	10 per cent.		672,556		
Indian Territory	291,500	~		335,225		
Oklahoma.	154,860			193,575		
Missouri		30 per cent.		73,515		
Total		9.76 per ct.		24,625,944		

1900 acreage; to be safe, the estimate must be based on a smaller product of lint per acre than either of those years yielded.

CONCLUSIONS.

By applying the foregoing suggested modifications to this year's acreage results given below, a fair estimate of the possibilities of the season's planting can be obtained. Our details of information are from all sections of the South and as voluminous as usual. They afford wider differences of view than sometimes happens and in cases it has been found hard to reconcile them. The following statements however are, we believe, a fair reflection of the seeding, growth, gen- centage of increase or decrease in acreage or produc-

This shows a net increase compared with 1899 of 9.76 per cent, making the total 24,625,944 acres in 1900, against 22,433,245 acres in 1899. We add the totals of acreage for previous years for comparison, giving also the total crop for each year, with the pertion compared with the preceding year, and the product per acre.

COTTON ACREAGE, &C., FOR THE YEARS NAMED-(000s omitted).

* Decrease.

SECOND.—With regard to the maturity, cultivation and condition of the plant, the conclusions we reach are as follows:

(1) As to maturity, it is quite clear that the crop as a whole is a late crop. So it was said of last year's planting that it was late. This season the work, however, has been longer delayed and has been more backward over a considerable section than it was the previous season. Early in the year frequent rains with low temperature hindered work nearly everywhere. This was quite a general complaint at first, but more recently it has been confined mainly to Alabama, Mississippi, Texas and Louisiana, where excessive rains in many sections resulted in a very soggy condition of the low lands and in floods; the latter interfering with planting, especially in Texas, where the Brazos and other lands were twice inundated. In North Carolina and parts of South Carolina and Georgia a dry May has been the complaint, germination being delayed thereby so that some of our correspondents in the Carolinas and in Georgia, writing at the close of May, stated that seed was not up yet. The same is said to be true of portions of the flooded districts of Texas. We should add that as to Texas the contrast is decidedly more unfavorable compared with a year ago, when the crop, and especially the early plantings, was in such excellent shape and more forward than in previous years.

(2) Cultivation, where the plant is sufficiently advanced for working the ground, and where the rains have not been excessive to a late date, has been carried on successfully, all such fields being clear of weeds. But, as noted above, there is a large portion of North Carolina and of the other later producing sections, where cultivation has not been begun, the seed in numerous cases not being up or the plant not sufficiently advanced for cultivation. These are conditions though which more or less always prevail and which a week of favorable weather would repair. The purchase of fertilizers of course has increased wherever the commercial sorts are used; that use is, as heretofore, almost wholly confined to the Atlantic States and to Alabama. In estimating the effect of the increase on the size of the crop now, it should be remembered that there was a large decrease in the use of commercial fertilizers in 1899.

(3) Condition of the crop is indicated by what we have already said. The truth is that, as a rule, it is late, and in most sections later than last year, so that less can be said affirmatively of the excellence of the stand secured. On the other hand there is nothing in the condition which forbids good growth from this time on if the weather is satisfactory. With regard to Texas exact and accurate figures of planting and condition cannot be known as yet. In the Northeastern and Southwestern portions of the State the conditions have been favorable recently, but elsewhere there has been an excess of rain. It seems as if in any event the crop there must be considerably later than a year ago, when it was early.

VIRGINIA.—The planting season was later than last year, cool weather having delayed the beginning of farming operations. This same hindering influence, coupled with lack of moisture, interfered with germination, so that as a rule seed came up only fairly well. The latter part of May, however, brought more favorable conditions, and stands are, on the whole, fair and improving daily. Cultivation is satisfactory. Acreage.—The tenor of our advices is that land heretofore devoted to other crops has this year been put in cotton, resulting in an increase in the aggregate area of fully 22 per cent. Commercial fertilizers as well as homemade varieties have been more freely used. Last year we reported that the commercial sorts had been less freely taken.

NORTH CAROLINA.—The start in planting averaged later than last year in North Carolina, beginning over a limited area about the 12th of April, but not closing generally until the end of May. In some instances seed came up well, but on the whole the start was below the average, especially of late plantings, in consequence of cool weather at night and a drought all through May. Some early plantings were damaged by the very heavy rain of April 18 (stated to be the heaviest on record), which necessitated a moderate amount of replanting. Since development began, the weather conditions have not been wholly favorable; too low temperature was complained of almost everywhere up to near the middle of May, and over most of the State there has been very little rain. These adverse conditions served to check growth, although latterly in some districts of the State there has been marked improvement recently in both respects. The stand, where secured, varies according to locality, ranging from fair to good and averaging fairly good; considerable seed not having come up at the time our latest reports were written. The crop is consequently a late one, but with favorable weather would develop rapidly. Fields are in good condition. Acreage.-A tendency to add to acreage was very manifest this year, but the inclination of farmers was to some extent thwarted by the scarcity of cotton seed, and a few of our replies indicate that a supply had to be obtained from the cotton mills. Additions to area, therefore, while very general, have not been so radical as anticipated. A careful analysis of our returns, however, seems to warrant an increase for the State of 9 per cent. Fertilizers of the commercial sorts have been much more freely taken than in 1899, but no increase in the use of home-made manures is indicated, surplus cotton seed, which is an important ingredient, having been largely disposed of to the oil mills. Last year we reported that commercial fertilizers had been less widely used.

SOUTH CAROLINA.—Farm work was hindered during the early spring by rain, and as a result planting operations did not begin anywhere until near the close of March and were not active until well on in April. The season, on the whole, however, differed but little if any from last year. Firstplanted seed germinated well in most sections, but on account of low temperature and a drought in May, late plantings got a rather poor start. From the Sea Island districts quite favorable weather throughout is reported, but from other points our advices indicate that up to within at least the last week of May cool nights and lack of rain acted as a check to satisfactory growth. At the same time no injury has resulted which better weather will not repair. Very little replanting has been required. Stands.-Notwithstanding the hindrance of growth referred to above, stands averaged good, but naturally the plant is smaller than in a normal season. Cultivation, where the plant is up and large enough, has been carried on in a thorough manner, the weather favoring the work. Acreage.-In the older States, as well as in the newer sections, the prevailing high price for cotton has furnished a decided incentive for increasing the area. Almost without exception our replies indicate that where possible additional land has been put in the staple in South Carolina, and to us it would appear that the average addition has been about 11 per cent. Fertilizers.-A fair increase in the takings of commercial fertilizers is to be noted, and home-made sorts have received about the usual attention. Last year we reported a decrease in the use of commercial fertilizers in the State of 10 per cent. GEORGIA.-While wet weather retarded farm work in the early spring and caused a partial suspension of operations after planting had actively begun, the time of seeding

was about on a par with 1899. The cool and wet weather which furnished the basis for the complaints from many sections of the State during April does not seem to have had any materially adverse effect upon germination. In fact our replies upon this point are quite satisfactory. One states that seed never came up better, others say splendidly, and the remainder well to very well, though at the beginning of the last week of May some seed had not come up. Re-planting is scarcely referred to. Many of our correspondents report that the weather all along has favored development, but some complain that up to the 10th of May there was too much frain and not enough warmth in the air. Since that date, however, the advices have been almost uniformly favorable and indicate that the plant is doing exceedingly well. Stands.-From the foregoing the conclusion is that a good stand has been secured. We find no exception to this in our returns. Except in a few instances a perfect stand is reported, and in one or two cases some seed is stated as not having come up yet. Acreage has been added to quite largely in some districts, and a partial explanation of the increase is furnished by a correspondent who states that frost killed winter oats and the land was promptly prepared for cotton. This was of course a special occurrence, for the main factor in determining area this year has been the very avorable financial results from the last crop. Thirty per cent would seem to be an excessively large increase in any section of an old cotton-producing State like Georgia, but that is the figure given by one of our best informed correspondents. For the whole State, however, a fair average gain would be about 11 per cent. Fertilizers.-Commercial fertilizers show a decided increased use at some points. Home-made manures have also been more largely resorted to. We stated last year that commercial fertilizers showed a material falling off, "running as high as 25 to 30 per cent in some districts."

FLORIDA.-Taking the State as a whole, the planting season was a little later than in an average year-say about one week. Seed came up well generally-better than in the previous season—and aside from low temperature at times at night, conditions have favored the satisfactory development of the plant. This is equally true of Sea Island and upland sections. Little or no replanting has been done. Stands are good generally and the crop is flourishing, although somewhat small, owing to the late start Acreage. -The same cause which has brought about a larger planting of cotton in the States heretofore reviewed has been operative in Florida. The profitable nature of the 1899 crop has resulted in additions to area in about all sections, and the average for the State, we judge, has been as much as 15 per cent. Fertilizers receive very little attention in Florida.

ALABAMA,-The conditions which prevailed in Alabama during the planting season differed materially from those in the Atlantic States. Excessive rainfall in March interfered with the preparation of land over a considerable portion of the State and further heavy precipitation in April resulted in the overflowing of river plantations and a consequent delay in seeding. Planting operations on some of this bottom land were not completed until about the first of June. Where planting has been most recently completed sufficient time has not elapsed for seed to come up, but the area involved bears no important relation to that of the whole State. Elsewhere germination has averaged well, some saying poorly and others very well. The wet weather was responsible for some replanting but not so much as at first seemed probable; for the ground being already in an unfit condition from previous rains, the floods intervened before anything had been done on many river plantations. Since growth began and down to the 12th of May, cool nights were complained of as well as wet weather from time to time, but subsequent to that date more favorable conditions have prevailed. Stands are variable. On sandy lands they are reported as good to very good, on stiff lands only fair, and on some recently overflowed territory a stand is only now being secured. There is nothing discouraging in the situation, as with fairly favorable seasons from now on the plant should quickly recover and make good progress. Cultivation is being carried forward as rapidly as conditions permit. Acreage .- Our returns indicate a general inclination to add to cotton area this season. In some sections the tendency has been quite marked and in others only

moderate. Nevertheless for the whole of Alabama we fee warranted in putting the increase at 10 per cent. *Fertilizers.* —Official returns of sales of fertilizer tags denote that there has been a decided increase in the takings of commercial fertilizers, but our reports furnish no evidence of expansion in the use of home-made composts. We reported last year that fertilizers of the commercial sort showed "a decrease of about 20 per cent."

MISSISSIPPI.-The situation in this State has been very similar to that in Alabama, only that here the condition was somewhat worse. While, as in 1899 and 1898, there has been complete freedom from any overflow of the Mississippi River, heavy rains have been a decidedly adverse influence over a large section of cotton territory. In March they interfered seriously with farming operations, and in April they caused the tributary rivers to rise materially and much rich bottom lands were inundated. As a consequence planting was quite late in starting, little work being done before the 1st of April. But in May better progress was made and seeding finally completed before the close of the month. Despite, however, the drawbacks under which planting was carried on, the seed generally is said to have germinated well, although some of it is only just now up. More than the usual amount of replanting was entailed by the floods, especially in the vicinity of Meridian. There has been some complaint of cool weather at night, but more or less of this is heard almost every year, and in any event, unless long continued, it does little damage except to temporarily check development. On the whole, May conditions have been favorable, although at times a little more moisture would have been beneficial, and now reports are in the main quite satisfactory. Stands are, as a rule, good, but the plant is naturally not as well advanced as in an average year. Weeds and grass have not been troublesome since the heavy rains ceased and allowed the work of cultivation to proceed. Acreage.-It does not seem that acreage has been as greatly augmented as in other sections of the South. This result is ascribed to the failure to replant some of the submerged land. There has nevertheless been a fair addition to the previous year's area given to cotton, say about 9 per cent on the average. Fertilizers have never been extensively used in Mississippi, and this season is no exception to the rule.

LOUISIANA.-During the early season and up to the middle of March quite favorable conditions prevailed and farming operations made excellent progress, being in advance of an average year. Subsequent to that date low temperature at night and too much rain retarded work, and toward the close of April excessive precipitation resulted in the washing and flooding of cotton land. Thus it is that planting which started early did not finish until after the middle of May. The weather turned more favorable with the coming in of May and seed got a good start. Heavy rains were responsible for more than the usual amount of replanting. From Northern Louisiana there have been complaints of late of cool nights, but rainfall has apparently been as desired. Stands are reported good to very good, but the plant is said to be small and until very recently was making very slow growth. Our latest advices, however, furnish evidence that the meteorological conditions are satisfactory and that the plant is developing. We find no evidence in our reports that cultivation has not been fully attended to. Acreage .--In almost all sections of Louisiana the disposition has been to increase the amount of land in cotton, appreciably in most instances, so that for the whole State we estimate the

gain to have been about 9 per cent. *Fertilizers.*—The natural richness of the soil renders fertilization unnecessary in much of Louisiana.

ARKANSAS.—Frequent rains, after farming preparations were begun, delayed the work of putting in the seed, so that planting was not fully over until near the close of May, or somewhat behind an average year. The rains, however, were not heavy enough to cause overflow, although some damage from washing resulted in hill lands and creek bottoms. Furthermore, temperature was near the frost line on many occasions previous to the 10th of May, but nothing was killed. Our reports as to germination conflict somewhat, yet on the whole they indicate that the plant in most cases got a good start. The complaints received refer almost wholly to early plantings on wet lands, which came up rather poorly. Correspondents in Central districts of the State advise us that seed never came up better. Since growth began cool nights and too much moisture at times have been the complaints, but the net result of them has apparently been confined to checking development. The plant is below the normal as to Fize but in good condition and scarcely any replanting required. Stands are good and in some instances above the average, and except where recent rains have given grass and weeds a start, fields are clean and well cultivated. Acrease.-As has been the case all over the South, the planting of cotton has received increased attention this year in Arkansas. For the whole State the excess in area this year over last year is at least 10 per cent. Fertilizers of the home-made varieties seem to have been a little more freely used. Commercial sorts hardly receive any attention.

TENNESSEE.-There was practically no difference in the planting season this year and last, the start being about the 15th of April and the finish near the close of May. Earlyplanted seed came up well as a rule but late-planted was hindered in development by cool nights and too much rain and on the first of June some had only just come up Our correspondents agree pretty fully that up to the 10th of May the weather conditions were in the main unfavorable and even since that date temperature has at times been too low for satisfactory growth. We hear of no replanting. Stands are somewhat irregular at this date. Good in localities, poor in others, and some cotton has not yet been brought to a stand. The weather however has been latterly more favorable and the plant, though small for the season, is growing nicely. Acreage here has followed the universal trend and the percentage of increase averages for the State 10 per cent. Ferti'izers play no important part in Tennessee.

TEXAS.—The planting season has been less satisfactory in Texas this season than elsewhere at the South, and much less satisfactory than last year. Dry weather in the interior during the first half of March and excess of moisture the last ten days of that month in southeastern sections retarded farm work, but generally operations were well under way, and in South Texas planting was making good progress. But about the 7th of April, before seeding had been one-quarter completed, very heavy rains came which washed up or overflowed much of that already planted. Two or three weeks later further excessive precipitation resulted in a like condition again. Altogether, considerable bottom land along the Brazos. Colorado, Trinity and other rivers in Central and Western Texas were inundated, and much of it was too wet to plant until near the close of May. Under these circumstances our returns as to germination vary widely. From Northern, Eastern and Western districts of the State the reports indicate that seed came up well, but in Central and Southern Texas the start is stated to have been poor. Some seed, of course, is hardly up yet. In sections where floods occurred very much re-planting has had to be done, and elsewhere more than the usual amount has been required as a result of the washing rains, poor seed, etc., etc. Telegraphic reports, as we go to press, denote that more favorable weather has prevailed lately in Northeast and Southwest sections, but that elsewhere there has been too much moisture until within the last day or two. but low temperature at night has been complained of until very lately. Stands have improved within the last ten days, but for the whole State average only fairly good, being best in the territory least affected by the heavy rains. Fields which were badly in the grass are being cleaned as rapidly as the conditions permit. Acreage.-Texas was expected to

quired. There is a considerable divergence of opinion as to the weather conditions since development began. From most districts our advices are of a favorable character. "This has been an exceptionally good season as to rains, etc.," says one; and another states that the "season thus far has been better than average, just about enough rain to put ground in good shape; nights a little cool." There undoubtedly was an excess of rain in some localities prior to the 1st of May and cool nights have been a checking influence at times. But generally the meteorological conditions have been fairly favorable and for the past two or three weeks they have been about up to the average for the time of year. Stands are as a rule good, but the plant is a little backward; fields are in satisfactory condition. Acrease has been largely added to in a number of districts, in others the increase has been moderate, and there are localities reporting no change. The weight of evidence seems to indicate an average gain of 15 per cent. No commercial fertilizers are used and but slight attention is paid to home-made manure.

OKLAHOMA.-Taking Oklahoma as a whole, planting operations covered about the same period as a year ago, being, as then, somewhat delayed in their completion by wet weather. Some of the seed is said to have germinated well and the remainder poorly, both results being reported from the same locality. In explanation of this peculiar situation a valued correspondent writes: "Some complain about seed not coming up or rotting in the ground. Our farmers are mostly Northern corn growers and insist on planting deep Rotton seed is the result. Those who plant on bedded ground and shallow are all right; the others will learn." From the rotting of seed and damage by hail a small amount of replanting has been entailed. Development has of course been hindered somewhat by periods of low temperature, but since more favorable weather set in improvement has been in progress and the present promise is fair for a good yield. Stands range from fairly good to good, and fields have been well cultivated. Acreage.-There is a natural tendency here to increase the area in cotton as new territory is being opened up each season. This year an especial incentive to put much of the virgin soil in cotton has been the high prices prevailing. That Oklahoma farmers have taken that view of the subject is reflected in our replies, which disclose additions of thirty and forty per cent as well as others more moderate in proportion. The average increage has evidently been close to 25 per cent. Fertilizers are not required and are therefore not used.

MISSOURI. – Planting began about the usual time this season—the middle of April—and was completed about the 12th of May, or a few days earlier than in 1899. Germination was satisfactory, according to our reports, and barring spells of low temperature at night, the weather has been favorable since growth began. We have no advices that any appreciable amount of replanting has had to be done. A good *stand* has been secured and the crop is in good condition so far as cultivation is concerned. Acreage has been largely increased, the average addition for the State being at least 30 per cent. Fertilizers are rarely used. In fact the necessity for their utilization is avoided by rotating cotton with leguminous plants, generally cow-peas.

Our usual detailed statements of rainfall and thermometer are omitted on account of the crowded condition of our columns, but will be published next week in the Cotton Department.

contribute a greater percentage of increase to the cotton area than any of the other large producing States, but early intentions have been modified by the unfavorable conditions, and the net addition has not been over 8 per cent. Fertilizers are little used.

INDIAN TERRITORY.—Our correspondents' replies with regard to the planting season in the Indian Territory this year vary greatly. Some state that work was begun and finished very early, while others report that it was from one to two weeks later than a year ago. On the average we should judge that there was little or no difference between the seasons, especially as operations were in neither case finally completed until about the close of May. Seed is reported to have germinated well. In southwestern districts some fields have bad to be replanted on account of excessive rainfall, but elsewhere practically no re-seeding has been re-

ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S

—The sales of bank stocks this week reach a total of 325 shares, of which 315 were sold at auction and 10 at the Stock Exchange. Two sales of trust company stocks have been made, aggregating 116 shares, at prices considerably higher than those paid at the last previous sale. Fifty shares of the Farmers' Loan & Trust Co. sold at 1433, as against $1401\frac{1}{1}$ in April, and 66 shares North American Trust Co. at 201, comparing with 156 in March.

-It is a noteworthy fact that the aggregate of the loans of the national banks of the United States under the Comptroller's call of April 26 is larger than that recorded in any previous call. The amount now stands at \$2,566,034,990. The highest previous aggregate was on September 7 last, when the figure was \$2,496,751,251. The individual deposits, on the other hand, are not the heaviest on record. The present amount is \$2,449,212,656. The previous maximum of this item was on June 30 of last year, when it was \$2,522,157,508. It is interesting to observe that while the volume of deposits showed important contraction during the stringency of last summer and fall, and the full amount of the loss has not yet been recovered, the item of loans did not vary greatly at any of the dates for which returns were made under the Comptroller's call. Thus the loans stool 2,492 millions June 30, 1899; 2,496 millions September 7, 1899; 2,479 millions December 2, 1899; 2,481 millions February 13, 1900, rising now to 2,566 millions, as before stated. Contrariwise, the individual deposits were 2,522 millions in June of last year, 2,450 millions in September, and only 2,380 millions in December, from which the item moved up to 2,481 millions in February of this year and is now 2,449 millions for April.

—The monthly debt and treasury statements for the first of June have been issued this week by the various departments at Washington, and they make it clear that the increase in national bank circulation under the new financial law is still actively in progress. During the late month there was a net addition to the total of notes outstanding of \$15,210,563; in April the corresponding net addition was \$14,325,258, and in March it was \$21,518,190. In other words, in the three months there has been a net increase of over 51 million dollars, raising the total of outstanding notes from \$249.434,-878 to \$300,488,889. The Government on May 31 held \$370,-683,570 of United States bonds as security for bank circulation and public deposits combined, of which \$258,677,450 consisted of the new 2 per cents. These are the figures from Washington, which do not include \$18,742,100 of bonds held in the Sub-Treasury in this city against public deposits. On February 28 last the Washington total of bonds held was \$329,697,050, of which \$168,551,900 were 4 per cents of 1907. Of these 4 per cents there are now held only \$39,132,750. Of the 3 per cents \$31,730,100 were held last February and only \$26,244,820 are held now. The amount of the 5 per cents held has diminished in the interval from \$30,487,100 to \$7,13),-500. Of the 4 per cents due 1925, which are not fundable under the new law, \$26,351,800 were on deposit at the end of February and \$20,196,80) at the end of May. Of the extended 2 per cents, which have been called for payment in August, \$22,501,150 were held in February and \$19,226,250 are held now.

-Richard Delafield was on Tuesday elected President of the National Park Bank of this city, taking the place of Ed ward E Poor, who, as was announced in this department May 26, resigned in consequence of ill health. Mr. Delafield has been a director of the bank since December 26, 1890, and a Vice President since June 16, 1896, and during the illness of Mr. Poor he had the chief management of the institution. He is forty-six years of age; he was born at New Brighton, Staten Island, and was educated in New York City. In 1873 he began his business career as clerk, and in 1830 engaged in the California trade and he is now senior partner and capitalist of the firm of Delafield, McGovern & Co. in New York, St. Louis and San Francisco. He was formerly President of the New York Mercantile Exchange, is Vice President and a director of the Colonial Trust Co., and a director of the Plaza Bank, the Mount Morris Bank, of the National Surety Co., of the Frankfort American Insarance Co., and of the Thuringia American Fire Insurance Co. The National Park Bank was originally organized in 1856; it became a national bank in 1865, and it has been one of the most successful of the New York banking institutions. Its capital is \$2,000,000, the surplus and undivided profits are \$3,558,710 and its deposits May 24 were \$70,910,235. The officers are: Richard Delafield, President; Stuyvesant Fish and Albert H. Wiggin, Vice-Presidents; George S. Hickok, Cashier, and Eiward J. Baldwin, Assistant Cashier. The The officers are: Robert Goldthwaite, President; M. P. Le

directors are: Joseph T. Moore, Stuyvesant Fish, George S. Hart, Charles Sternbach, Charles Scribner, Edward C. Hoyt, Edward E. Poor, W. Rockhill Potts, August Belmont, Richard Delafield, Francis R. Appleton, John Jacob Astor, George S. Hickok, George Frederick Vietor and Herman Oelrichs.

It may be noted that Mr. Delafield is the eighth Precident of the bank. The first was Reuben W. Howes. Then came W. H. Fogg, W. K. Kitchen. J. L. Worth, George H. Potts, E. K. Wright and Edward E. Poor.

-The movement for the merger of the First National Bank of Chicago with the Union National Bank of that city, which was noted in this department last week, has made substantial progress. The directors of the First National have appointed James B. Forgan, George T. Smith and Otto Young a committee to confer with a recently-appointed committee of the Union National to arrange the details of the plan of merger. If these committees shall agree a definite proposition will be submitted to the stockholders of the two banks for ratification and the Union may be absorbed by the First National as early as September.

The plan of merger contemplates the exchange of one share of new First National stock for two shares of Union stock. The First will issue \$2,000,000 new stock, making the total capital \$5,000,000. One-half of the new stock will be used to acquire the Union stock and the remainder will be sold to present shareholders at par. The Union will, however, re tain about \$200,000 of its stock and a part of its surplus until all the assets of the bank can be liquidated and its considerable real estate holdings be sold.

-The directors of the Commercial National Bank of Chicago have decided to increase the rate of dividend from 10 per cent to 12 per cent, and such payments hereafter will be 6 per cent semi-annually. The increased dividend is due to the prosperous condition of the bank, as was noted in this department May 26.

-The North American Trust Co. will next week remove to new offices on the northwest corner of Broadway and Cedar Street.

-The National Bank of Commerce of Baltimore has issued a little statement card to show its progress during the ten years of its existence as a national bank. The bank was changed to a national institution on April 11, 1890. At that time it had deposits of only \$451,102. The deposits on the corresponding;date of the present year were \$1,332,149. The surplus and undivided profits have in the meantime risen from \$49,870 to \$187,520. Aggregate resources are now \$2,169,669 against \$900,973 at the earlier date. During the period mentioned the bank has continued to pay regular semi-annual dividends of 21/2 per cent, free of all taxes, giving 5 per cent per annum to shareholders.

-At Monday's election of the Baltimore Stock Exchange Mr. Derick Fahnestock was elected President for the thirteenth time. Clymer White was elected Chairman, Messrs. John M. Nelson, Alexander Frank and John Redwood members of the Governing Committee, and H. A. Orrick Trustee of the Gratuity Fund until 1903. Later, at a meeting of the Governing Committee, H. A. Orrick was made Vice-President, Eustis Thompson, Secretary and Treasurer, and H. B. Whitely, Clerk.

In his address reviewing the business of the past year, the President noted that there had not been a single failure on the Exchange, notwithstanding the enormous speculation of the past 12 months and the fact that many brokers were com-

pelled to carry securities for their clients at inflated values.

-Mr. William G. Mather, of Cleveland, President of the American Trust Co., and also President of the Cleveland-Cliffs Iron Cc., was on May 31st elected President of the Cleveland Stock Exchange, vice James Parmelee resigned.

-At a meeting of the Chicago Stock Exchange on Monday last Mr. A. L. Baker was elected President and Mr. J. J. Mitchell Treasurer. This was the only ticket in the field.

-The consolidation of two of the banks of Montgomery, Ala., namely, the Bink of Montgomery and the Merchants' and Planters' National Bank, went into effect on May 30. The new institution, under the name of the Merchants' and Planters' National Bank has a capital of \$250,000 and is located in the old quarters of the Bank of Montgomery.

Grand, Vice-President, and S. B. Marks, Jr., Cashier. Mr. Goldthwaite was President of the former Merchants' and Planters', while Mr. Le Grand held the same office in the Bank of Montgomery. Mr. Marks was Cashier of the Merchants' and Planters'. Before the merger, the two banks had capital stock of \$100,000 each, while their combined surplus amounted to \$115,000.

-The eighty-second annual meeting of the shareholders of the Bank of Montreal was held on Monday at Montreal, and on other pages will be found an extended report of the proceedings, together with the general statement of the accounts. The profits for the year, with the balance brought forward, enabled the directors to add \$1,000,000 to the "rest" account, which now stands at \$7,000,000, and to pay the usual dividend of 10 per cent on the \$12,000,000 of capital stock. Vice-President Drummond at the meeting made some interesting comparisons of the condition of the bank in 1884 with the present time. He said: "The liabilities of the bank had risen from 36 millions of dollars in 1884 to 59 millions in 1900. The number of agencies or branches, had [risen from 31 to 52. The number of the staff had increased from 299 to 562. The deposits had increased from \$22,588,000 to \$63,445,000, and the loans in Canada had increased from 30 millions to $53\frac{1}{2}$ millions. So that to earn approximately equal profits, double the business must be done and the cost of doing it proportionately increased. The public, therefore, is getting its banking business done for about half the prices ruling in 1884. No doubt this is a substantial benefit to all commercial and manufacturing business."

-At a meeting of the council of administration of the New York State Bankers' Association on Saturday it was decided to hold the seventh annual convention at Saratoga July 13 and 14. After the close of the session there will be an excursion to Lake George. Arrangements for the convention have been referred to a special committee, consisting of J. H. DeRidder, Saratoga; E. T. Johnson, Glens Falls; E. S. Schenck and A. C. Barnes, New York, and E. O. Eldredge, Owego.

-The following, constituting trustees of the second class, were elected at the annual meeting of the United States Trust Co. on Tuesday: D. Willis James, John Harsen Rhoades, John Crosby Brown, Charles Stewart Smith, William D. Sloane, James Stillman, John Claffin and Lewis Cass Ledyard.

-Seth Caldwell, Jr., who was President of the Girard National Bank of Philadelphia from 1892 until July, 1899, died in that city on Monday. Mr. Caldwell was born in Barre, Mass., in 1826. At the age of twenty he went to Boston and entered the employ of Noble & Co. In 1849 this firm opened a branch house in Philadelphia, placing it in charge of Mr. Caldwell. On the death of Mr. Noble in 1865 Mr. Caldwell retired from the business and became the sole executor and assignee of Mr. Noble's large estate, and for the next ten years he was executor and assignee of several large coal firms. In 1889, in consequence of the failing health of D. B. Cummins, President of the Girard National Bank, the office of Vice-President was created, to which Mr. Caldwell was elected, and upon the death of Mr. Cummins in 1892 he was chosen President, resigning therefrom in July last year.

-The receiver of the Globe National Bank of Boston, which suspended last December, regards it as probable that the depositors will be paid another dividend of 10 per cent about July 1, making the total dividends 40 per cent. It is also expected that the ultimate return from the settlement of the bank's affairs will be much more satisfactory than was at first anticipated. The indebtedness to the Boston Clearing House has been reduced to \$650,000, and it is thought that the securities which were turned over to the Clearing House against the certificates issued will be sufficient, when liquidated, to pay off the entire amount of these certificates and leave a balance of from \$200,000 to \$300,000 to the credit of the bank.

concerned, New York exhibits a loss of 10.6 per cent, and the declines at other points are: Boston 11.9 per cent and Baltimore 9.7 per cent. Philadelphia records a gain of 10.7 per cent, Chicago 9.3 per cent, St. Louis 2.0 per cent and New Orleans 7.9 per cent.

Clearings by Telegraph.—Sales of Stocks, Bonds, &c.— The subjoined table, covering clearings for the current week, usually appears on the first page of the CHRONICLE, but on account of the length of the other tables is crowded out once a month. The figures are received by telegraph from the leading cities. It will be observed that as compared with the corresponding week of 1899 there is a decrease in the aggregate of 6.4 per cent. So far as the individual cities are

Monetary Commercial English News

[From our own correspondent.]

LONDON, Saturday, May 26, 1900.

As the end of the war in South Africa approaches and the British troops are advancing nearer and nearer to Pretoria, the stock markets here become more and more stagnant. The amount of British capital invested in South African mines is so immense that very few people have not some in. terest in them; and the fear still exists that the Boers may attempt to do damage to the mines. Those who are in a position to be well informed believe that all the mines which have not been worked by the Government during hostilities are flooded, and it is impossible, therefore, to do any serious injury to anything under ground; but of course much damage; might be done to the machinery above ground, and until the public is reassured on that point there is not likely to be very much recovery in markets.

There are other reasons contributing to the general stagnation. One of these is undoubtedly the fear of a quarrei be-tween Russia and Japan. That the new position acquired by Russia in Corea is threatening to Japan is undoubtedly believed in Japan itself as well as in Europe, and that Japan is hastening forward her naval and military preparations is also notorious. Then there is renewed anxiety respecting the immediate future in France. During the Exhibition the impression is universal that nothing unpleasant will happen. But as soon as the Exhibition is over there are grave fears that there may be troubles at home and possibly foreign war. The present Government has the confidence of all the other governments of Europe. The Prime Minister is a man of the highest character and of great wisdom. As long as he is in power he will certainly govern like a statesman. But how long he will retain a majority in the Chamber seems to be doubtful.

Then again the opposition to the new taxation in Spain is disquieting French investors in Spanish securities, and therefore is having an effect upon the Paris Bourse. The general belief in Paris and London is that the opposition is confined to the wealthy classes, that the Government is supported by the great body of the public, and that the opposition will completely break down; but the French investors are nerv-ous for all that. The Spanish Government is showing won-derful determination in paying the interest, not only upon the Spanish debt proper, but upon all the colonial debts as well. This week it has issued a loan for the nominal amount of 48 millions sterling, bearing nominally 5 per cent, but really 4 per cent, as there is a tax of 20 per cent on the interest, and the issue price is 83. Already the loan is at a pre-mium of 2. It is intended to fund floating debt, which is almost entirely held by the Bank of Spain, and when that is effected there will still remain floating debt amounting to about 40 millions sterling more.

Over and above all this the plague in Egypt and the cattle disease in Argentina, as well as the famine in India, are all having an injurious effect upon markets; and, lastly, there can be no doubt at all that the dearness and scarcity of money, the extraordinary rise in the prices of coal, iron and other commodities, and the difficulties in the wool and the cotton markets, are all having a depressing effect.

The result of all is that business has scarcely been so dull for three years. Usually, if one market is inactive there is a fair amount of business going on in others. But at the present time the complaint is universal that speculation is absolutely stopped, and that even investment is on an unusually small scale.

The directors of the Bank of England unexpectedly lowered their rate of discount on Thursday from 4% to $3\frac{1}{2}\%$, and the next day the Bank of France reduced its rate from $3\frac{1}{2}\%$ to 3%. It is true that some people had been predicting that the Bank of England directors would do so. But the great majority refused to contemplate such a thing. For until a fortnight ago the Bank had been not only exerting itself to the utmost to retain control of the open market, but it had been charging as much as 5% for loans even on the security of consols and the new war loan. That the directors should change their minds so completely in about ten or twelve days is a remarkable instance of the inability to judge the future of those even most favorably placed. The change was brought about by the receipt a fortnight ago of a million sterling in gold from Russia, and by the re-sale by the Gover-

is understood that after the Czar's visit to the Exhibition there will be a Russian loan brought out in Paris of about 20 millions sterling. In the meantime funds have to be fur-nished for meeting the liabilities of the Russian Government, and of course it will be advisable also to prepare the market.

This year, in addition to the usual liabilities of the Russian Government, that Government has bought very large quantities of coal, especially of steam coal; also materials and locomotives, and various other things; and over and above all this she has been sending through London very large sums on account of her expenditure in China and Corea.

It has often been remarked as odd that the demand for India Council bills kept up so well during the past five or six months. Now it turns out that the Russian Government has been buying these bills very largely as a means of providing for its expenditure in the Far East. For all these reasons the sums that Russia has to pay in London and Paris this year are exceptionally great, and the belief is very general here at present that Russia, therefore, will send

more gold into the Bank of England. The India Council offered for tender on Wednesday 25 lacs, and the applications amounted to $102\frac{1}{2}$ lacs. A little over the amount offered for tender was sold at prices ranging from 1s. 4d. to 1s. 4 1-16d. per rupee.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c.

Messrs. Pixley & Abell write as follows under date of May 24: Messrs. Pixley & Abell write as follows under date of May 24: Gold-The most important movement in gold has been the release of $\pounds 500,000$ to the Bank which had been earmarked by the India Coun-cil; this, no doubt, means that an equivalent amount in sliver rupees which have recently been coined have been added to the circulation in India. This leaves $\pounds 1,000,000$ gold at the disposal of the India Council in London. Of $\pounds 188,000$ to hand from Australia, the Bank has so far only received $\pounds 50,000$, the greater part being kept to sup-ply Indian and Continental demands. Gold is being shipped from Australia to the Cape. Bank receipts, including above, $\pounds 560,000$; withdrawals for the Cape, $\pounds 200,000$. Arrivals: Australia, $\pounds 188,000$; Chili, $\pounds 3,000$; River Plate, $\pounds 23,000$; total, $\pounds 219,000$. Shipments to-day, nll.

Chill, £3,000; River Plate, £23,000; total, £219,000. Shipments to-day, nll. Silver—The market has remained very steady. A Continental order came on the top of the existing Indian inquiry, and this caused an ad-vance to as high as 271_{16} d.; but with a cessation of this inquiry the price dropped to 279_{16} d., at which there is none offering. The Indian price is Rs. 70^{1}_{2} per 100 tolahs. Arrivals: New York, £306,000; Chili, £3,000; Australia, £18,000; total, £332,000. Shipments: Bombay, £127,000. Mexican Doliars—No business has been done in these coin. Arriv-als: New York, £16,000. The quotations for bullion are reported as follows:

nor of India to the Bank of Eogland of half a million sterling in gold, which was held in the bank specially "ear-marked" as the property of the Indian Government.

Apparently the directors of the Bank have now reason to believe that the Indian Government will set free more of the gold held by the Bank for that Government. India has been receiving considerable amounts of gold from Japan, and if the imports continue it will be possible for the Government to set free the gold it holds in the Bank of England. There is also an impression in the City which is shared by the directors of the Bank of England that more gold will come from Russia. Russia has usually (after allowing for the excess of her exports over her imports) to pay in Western Europe, that is to say, London, Paris, Berlin and Amsterdam, about 15 millions sterling annually, and formerly she has been able for the most part to avoid sending much gold to do this because she was able to borrow what she wanted in Paris and Berlin. Now, however, money is so scarce in Berlin that it is impossible to borrow there, and apparently there is a temporary difficulty about borrowing in Paris. It Mexican dollars.oz. 27316 27316

BANK OF MONTREAL.

PROCEEDINGS AT THE EIGHTY-SECOND ANNUAL MEETING.

(From the Montreal Gazette of June 5th, 1900.)

The eighty-second annual meeting of the shareholders of the Bank of Montreal was held in the Board Room at one o'clock yesterday. There were present: Hon. George A. Drummond, Vice-President; Sir William C. Macdonald, Messrs. A. T. Paterson, E. B. Greenshields, R. B. Angus, A. F. Gault, James Ross, R. G. Reid, directors; Donald Macmaster, Q. C.; John Crawford, G. F. C. Smith, R. W. Shepherd, F. T. Judah, Q. C.; B. A. Boas, E. Rawlings, W. J. Buchanan, M. Burke, F. S. Lyman, Q. C.; J. Try-Davies, F. H. Simms, A. W. Hooper, H. Mason, Richard White, A. T. Taylor, W. R. Miller, H. R. Drummond, Bartlett McLennan, M. S. Foley, James Tasker, H. Gordon Strathy, David Morrice, Henry Dobell, Sir Thomas Hughes, Hector Mackenzie, Nicholas Murphy, Henry Barbeau, David McFarlane, Charles M. Holt, W. H. Evans, John Morrison.

Nicholas Murphy, Henry Barbeau, David McFarlane, Charles M. Holt, W. H. Evans, John Morrison. On the motion of Mr. John Crawford, Hon. George A. Drummond, Vice-President, was unanimously voted to the chair, in the absence of the President, the Right Hon. Lord Strathcona and Mount Royal. On the motion of Mr. G. F. C. Smith, seconded by Mr. Henry Dobell, it was agreed: "That the following gentlemen be appointed to act as scrutineers: Messrs. F. S. Lyman, Q. C., and W. J. Buchanan, and that Mr. James Aird be the Secretary of the meeting."

THE REPORT.

The report of the Directors to the Shareholders at their eighty-sec-ond annual general meeting was then read by Mr. E. S. Clouston, 4eneral Manager, as follows: The Directors have pleasure in presenting the eighty-second annual report, showing the result of the Bank's business of the year ended 30th April, 1900:

Balance of Profit and Loss Account, 30th April, 1899...\$1,102,792 72 Profits for the year ended 30th April, 1900, after de-ducting charges of management, and making full provident for all back and doubtful dabts

provision for all bau and doubtful douts	. 1,024,000 00
	\$2,627,180 80
Dividend 5 p. c., paid 1st December, 1899\$600,000 Dividend 5 p. c., payable 1st June, 1900 600,000	
	1,200,000 00
Amount credited to Rest Account	1,000,000 00
	0100 100 00

Balance of Profit and Loss carried forward...... \$427,180 80

All the offices of the Bank, including the Head Office, have been in-spected during the past year.

past year. STRATHCONA AND MOUNT ROYAL, President.

BANK OF MONTREAL, Head Office, 4th June, 1900.

THE GENERAL MANAGER.

Mr. Clouston then said :

Mr. Clouston then said: In the statement submitted to you to-day the principal changes which have taken place during the past year are: the liabilities col-umn shows an increase in circulation of \$700,000, and an increase of 6,500,000 in deposits bearing interest; while on the other side there is a decrease of \$3,800,000 in the reserves held in Great Britain, and an increase of \$10,600,000 in loans. A considerable percentage of the latter increase represents a legitimate demand from commercial cus-tomers for advances arising from the more active and expanding conditions of trade. The remainder is employed in special operations of a temporary character which will probably be closed out in the next few months. Canada has good reason to be well satisfied with the results of bust-

next few months. Canada has good reason to be well satisfied with the results of busi-ness for the last twelve months. From every province of the Domin-ion, with the exception of British Columbia, come reports of universal prosperity, active trade, good crops, and generally speaking satisfac-tory prices. The lumber trade never was in better condition; while the dairy exports have only been limited by the extent of the cold-storage accommodation, which is still insufficient for the growing wants of the trade. Railtoad earnings were the largest in the history of Canada, and the year ends in a blaze of universal self-congratulation. For the coming year there are some indications of over-production. Stocks in the merchants' hands are too large, and in some districts collections are disappointing. In fact, at the moment there is some-thing of a check, which, however, may prove highly salutary if the commercial community will only proceed with caution till the new crop is assured and matters have adjusted themselves on a more sat-isfactory basis.

crop is assured and matters have adjusted themselves on a more sat-isfactory basis. British Columbia has not shared in the general prosperity to the same extent as her sister provinces, owing to the effect of injudicious and ill-considered legislation. This has created a feeling of distrust abroad, and the inflow of foreign capital, so necessary to the develop-ment of her immense natural resources, has been seriocsly checked. The Finance Minister of Canada has introduced a number of amend-ments to the Bank Act, which are now before the House. They are the outcome of ten years' experience of the working of the present Bank Act, and will, no doubt, materially strengthen it, and make it a more workable measure. Full details of these amendments have ap-peared in the papers, and it is not necessary for me to refer to them here.

here. If there are any questions respecting the business of the Bank, I shall be pleased to answer them.

THE VICE-PRESIDENT.

THE VICE-PRESIDENT. Hon. George A. Drummond said: I do not doubt you will receive with satisfaction the statements now laid before you and the explanations of the General Manager. The profits have enabled the Directors to add one million of dollars to the Rest, and pay the usual dividend of ten per cent for the year. This rate of dividend has continued unbroken for twenty years, sup-plemented, however, in four of these years by a bonus. The addition to the Rest is fully justified, I think, by the changed conditions since the year 1884, when capital and Rest first attained the proportions so long maintained of twelve and six millions respectively. In 1884 the combined capital, Rest and Profit and Loss account aggregated \$18,306,000; in 1900 they were \$19,130,000. But the total liabili-ties to the public, which in 1884 were \$25,941,000, had risen in 1900 to \$58,822,000. I by no means desire to convey the impression that the ability of the Bank to meet its engagements depends on the size of its Rest, but obviously an increase of the Rest is quite in order, and no doubt will meet with your approval, as an increased Rest not only gives additional stability but helps to steady the dividend. A further comparison of our condition in the year 1884 with the present time is interesting and instructive. As already said, the liabilities of the Bank had risen from 26 millions of dollars in 1884 to 59 millions in 1900. The number of Agencies or Branches had risen from 31 to 52. The number of the staff had increased from 299 to 562. The deposits had increased from \$22,588,000, to \$63,445,000, and the loans in Canada had increased from \$22,588,000, to \$63,445,000, and the loans in Canada had increased from 32,538,000, to \$63,445,000, and the loans in Canada had increased from 32,538,000, to \$63,445,000, and the loans in Canada had increased from 32,588,000, to \$63,445,000, and the loans in Canada had increased from 32,588,000, to \$63,445,000, and the loans in Canada had increased from 32,588,000, to \$63,445,000, and the loans

and the loans in Canada had increased from 30 millions to 53¹/₃ millions. So that to earn approximately equal profits, double the business must be done and the cost of doing it proportionately increased. The public, therefore, is getting its banking business done for about half the prices ruling in 1884. No doubt this is a substantial benefit to all commercial and manufacturing business. The melancholy collapse of La Banque Ville Marie in this city does not reflect on our banking system, which could not provide for a series of gross frauds, revealed in the trials of the unhappy officers; its fail-ure had no commercial effect, but caused much distress among its de-positors, many of whom could ill-bcar their losses, and whose case rightly excited much public sympathy The Board has had occasion during the year to lament the sudden and unexpected death of two of its members, Mr. Hugh MeLennan and Mr. W. W. Ogilvie, and has recorded its deep sense of the loss which the Bank has experienced in being deprived of their prudent counsels. The Board considers itself fortunate in having been en-abled to fill these vacancies by the election of Mr. James Ross and Mr. R. G. Reid. In the general trade and commerce of the country we find evidences

abiled to fill these vacancies by the election of Mr. James Ross and Mr. R. G. Reid. In the general trade and commerce of the country we find evidences of the period of prosperity into which we have entered. Good har-vests and good prices, especially for dairy products, have caused prosperity throughout the country. Immigration has been less rapid than can be wished, but with the activity in all branches of trade and manufacture in the Mother Country, nothing else could be antici-pated. The lumber industry has been prosperous and prices much above the average; the great detsruction of sawed stuff at Ottawa has no doubt temporarily affected prices. The consumption of a special class of timber for the manufacture of paper pulp promises to have important effects on some districts. It appears to me that enor-mous waste is going on in this matter, and that some process of re-covery whereby this indispensable material can be used more than once is looming in the future. Enormous strides are being taken in this country towards the production of iron and steel, and when the developments now in progress reach completion, we may hope that Canada will not only supply her own wants, but become a factor in the supply of foreign markets. Fuel has advanced materially in price, though to a smaller extent in this country than in Great Britain. This is due to a considerable rise in wages and materials and supplies of all kinds, and like the other advances already noted has an important influence in checking expansion of business. It appears to me that the fact that steam coal of similar quality to Nova Scotian is costing more in Glasgow. Scotland, than in Montreal, may very well be recorded to the credit of our protective duty on the article, the Montreal coal having been ear-ried nearly one thousand miles. At the pit head, Canadian coal is very much cheaper than at any point in Great Britaln. No better evidence of business activity can be had than the work done by our great carrying coupanles. Taking the returns of the Gra

these figures:

these figures: The gross earnings for the years 1895 and 1899, under the following heads, compare as follows: Passenger traffic, 1895, \$10,133,000; 1899, \$12,836,000; an advance of 26 per cent. Freight, 1895, \$23,-129,000; 1899, \$32,809,000; an advance of 42 per cent. Mail and ex-press, 1895, \$1,804,000; 1899, \$2,268,000; an advance of 25 per cent. Miseellancous, 1895, \$1,570,000; 1899, \$2,764,001; an advance of 70 per cent. The totals of the foregoing in these years are \$36,c36,000 and \$50,677,000, respectively, or an advance of 38 per cent. The North American steamship companies have had a fairly pros-perous year; many of their vessels have found profitable employment

1135

in the various transport services connected with the South African war, and the decreased tonnage thus available for their regular trade has tended to enhance freightrates, more especially on export cargoes. The volume of imports carried by the Canadian lines was somewhat less than during the previous twelve months, the freight rates were somewhat dearer and the number of vessels fewer. The volume of exports was smaller, and the average of freight rates, more especially on grain and provisions, was higher. The current season has opened favorably and the volume of export traffic is likely to be fully equal to the available tonnage during the next two or three months. The passenger traffic was moderately satisfactory and the companies an-ticipate a free movement, both east-bound and west-bound, during the year. They complain of the large advance in the price of coal and of the enhanced wages, but their profits are, nevertheless, said to be year. They complain of the large advance in the process, said to be the enhanced wages, but their profits are, nevertheless, said to be

As regards the port of Montreal, the last two years compare as fol-lows: The total value of merchandise entered for consumption in the year ending 30th April, 1899, was \$54,282,140; and for the year end-ing 30th April, 1900. \$59,997,767; an increase of 10⁴2 per cent. On the other hand, the value of goods produced and otherwise exported in the former year was \$62,170,354, and last 3 car \$65,107,222, or an increase of 4.7 per cent The accreate trade of Canada by years is as follows:

The aggregate trade of Canada by years is as follow	3.
Entered for	
Consumption	. Exported.
1895\$105,252,500	\$113,638,800
1898	
1899	

In the last five years, therefore, the excess in value of total exports over total imports has been \$44,153,300, and this excess of exports over imports has happened on'y once before in the history of Canada,

over imports has happened on'y once before in the history of Canada, i. e., in 1880. One important evidence of better times is to be found in the com-parative immunity from losses by business failures, which in the re-spective years are as follows: 1896, \$17,300,000; 1898, \$10,000,000; 1899, \$10,727,000. If we except the reigning stagnation on the Stock Exchange, due to a general pause in speculation, and dearer money. the indications are of a continuation of good times. It is probable that some revival will be consequent on a decilne in the cost of staple raw materials, which appears probable. It is impossi-ble to follow the progress of all branches of trade, but the general result, with some special exceptions, is the same, full employment, press of business, good prices, advanced wages. In the middle of all this we are apt to forget that bad times will recur; there are evidences already, however slight, of a reaction. The high prices of lumber and labor are causing a cessation of building and iron and steel are getting cheaper.

already, however slight, of a reaction. The bigh prices of lumber and labor are causing a cessation of bullding and iron and steel are getting cheaper. One important factor which may affect our maoufacturing indus-tries is the evidence of a spirit of aggression in outside markets by the great American combinations and trusts; this may develop into proportions which will produce consequences now unforeseen. Mothing in recent times has excited so intense an interest in this conntry as the war in South Africa, now happily drawing to an end. Its progress day by day, indeed hour by hour, has been watched with feverish anxiety. The successive relief of the heroic beleaguered gar-risons of Ladysmith, Kimberley and Mafeking, and the capture of the Boer centres, have given occasion for general rejoicings. That a con-siderable body of Canadian volunteer soldiers sent out by the Dom-inion of Canada has, for the first time in our history, been fighting on another continent, side by side with the best soldiers of the Empire, and proving themselves by courage and soldierly qualities equal to the honor, has intensified our interest. To ourselves it is a source of pride that among them is a corps of mounted infantry, consisting of 589 men, equipped, armed and carried to the seat of war through the princely liberality of the President of this Bank. Heavy as is the nations not hitherto accorded them, and can realize as never before that their country is part and parcel of the Empire, while the most distant shore where our flag flies is but a portion of our heritage. No one who has made himself acquainted with the facts can doubt that the war was not only a just and most righteous, but also an un-avoidab'e, one, or only to be escaped by Great Britain confessing her-self unable to protect her citizens and abandoning all pretensions to imperial power. I hall the resolve that the territories now con-quered at such a heavy price shall be held under the British flag, with the security to life, liberty and property which it

antees. This Bank, departing in some measure from precedent, has contributions having the eare of this bank, departing in some measure from precedent, has contrib-uted liberally to Imperial and home organizations having the eare of our soldiers and their dependents for their object; for this I do not doubt you will give your approval. Our duty would not be done if we fail to recognize to the full how much this iittle force has accom-plished for the credit and best interests of Canada and prove our gratitude by deeds.

I will move: "That the report of the Directors now read be adopted and printed for distribution among the Shareholders." The motion was seconded by Mr. A. T. Paterson.

<text><section-header><text>

than doubled its responsibilities since the date at which \$6,000,000 was considered a sufficient Rest. It appears to me to be a perfectly obvious proposition either that \$6,000,000 were too much in 1884, obvious proposition either that \$6,000,000 were too much in 1884, when the responsibilities were about \$25,000,000, or they are too little now, when the responsibilities were more than doubled. Conse-quently I do not agree with him about the rest; and If he will cast his memory back to the last meeting he will remember he asked my opinion about the Rest, whether it should exceed 50 per cent or not, and I, earefully guarding myself against committing the Board, which considered and the destination of the should be applied by the should be the should be applied by t memory back to the last meeting to will reach and the which is a may opinion about the Rest, whether it should exceed 50 per cent or not, and f, carefully guarding myself against committing the Board, which I could not do, expressed my own opinion that it was insufficient, and ought to be added to. I am still of that opinion, and I think the addition to the Rest is a wise and conservative measure which will increase the public confidence in the Bank. With regard to the publication of the gross profits, an item Mr. Crawford referred to, it is an old story comparatively. Some ten years ago, when the Banking Act was being revised, Mr. Crawford brought up the question, and as the incledent is likely to be forgotten now I may say that he persuaded the House of Commons to pass, unanimously, a clause calling for a declaration of the gross profits. I had the honor of opposing it in the Senate, and I also was the only speaker on that occasion, and the Senate and I also was the only speaker on that occasion, and the Senate and I also was discarded unanimously in the Senate. I am improper disclosure to the public and likely to do a good deal of harm. I need not take up your time with a lengthy argument on that point. While it is true railways and other institutions disclose their gross profits, in many cases there is a special feature about credit, which is a very delicate thing, and which makes it improper in a bank to have to declare how much is written off for bad debts or anticipated bad debts, the first effect produced on the mind of every critic would be ''Who is likely to fail ' What in the world are they expecting ' What is going to have perf.'' the whole heaven add out off debts or anticipated bad debts, the extense of the about doubting debts in the world encet was above the average. There is nothing in the nature of finality about the perfect produced on the with enater of the allow as the every foundation. That is my view of the result which would legitimately and logically follow the stating of how much we wr

Mr. John Crawford explained that he had not alluded to gross losses at all; only gross profits and gross expenses. He could quite understand that if a bank published a large amount of loss, it might affect

eredit. The Chairman then put the motion for the adoption of the report, and it was carried unanimously.

VOTES OF THANKS.

Mr. Donald Macmaster moved: "That the thanks of the meeting be presented to the President, Vice-President and Directors for their attention to the interests of the Bank.

This was seconded by Mr. F. T. Judah, Q. C., and adopted, and was briefly acknowledged by the Chairman. Mr. John Crawford moved:

Mr. John Crawford moved: "That by-law No. 9 be amended by striking out the word 'fifteen' in the second line of the by-law, as printed, and inserting in its place the words 'twenty-five.'" He explained that it was simply adding \$10,000 to the remunera-tion glven to the Directors under the by-law. He made the motion with a great deal of pleasure, and spoke a few kindly words of the President of the Bank. The motion was seconded by Mr. B. A. Boas and was carried. Mr. James Ross moved: "That the thanks of the meeting be given to the General Manager, the Inspector, the Managers, and other officers of the Bank, for their services during the past year." The motion was seconded by Mr. R. G. Reid, and having been unan-imously concurred in, was acknowledged by the General Manager. Mr. E. Rawlings moved: "That the ballot now open for the election of Directors be kept open until 3 o'clock, unless fifteen minutes elapse without a vote being cast, when it shall be closed, and until that time and for that purpose only, this meeting be continued." This was seconded by Mr. Angus W. Hooper, and unanimously agreed to. On the motion of Mr. John Craw-

agreed to.

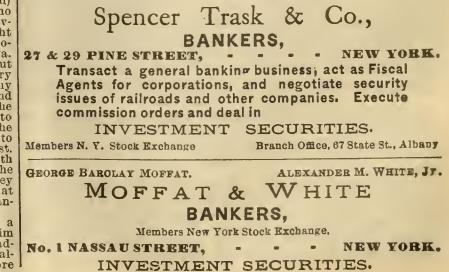

On the motion of Mr. John Morrison, seconded by Mr. John Craw-ford, a hearty vote of thanks was accorded to the Chairman for his conduct of the business of the meeting, and he acknowledged the same.

THE DIRECTORS.

The ballot resulted in the election of the following Directors :

R. B. ANGUS, ESQ., HON. G. A. DRUMMOND, A. F. GAULT, ESQ., E. B. GREENSHIELDS, ESQ., SIR WILLIAM C. MACDONALD,

A. T. PATERSON, ESQ, R. G. REID, ESQ., JAMES ROSS, ESQ., RT. HON. L' RD STRATHCONA AND MOUNT ROYAL, G.C.M.G.

WALL STREET, FRIDAY, JUNE 8, 1900.-5 P. M.

The Money Market and Financial Situation .- The improved tone of the security markets noted at the close last week was doomed to a short existence. The announcement on Monday that several departments of the Illinois Steel Company's plant at South Chicago had shut down caused a general decline of the industrial stocks. In addition to this, news of the disturbances in China had a depressing effect, which has continued through the week. The London markets appear to have been more affected by the conditions in China than our own. British consols declined, as well as American securities, notwithstanding the fact that South African news has continued to be most encouraging.

The domestic situation is practically unchanged. The shutting-down of a few iron and steel plants has been fore-shadowed by high prices and over-production. The political campaign now being inaugurated no doubt sufficiently explains the cautious attitude of investors, and the "outside public," always an important factor in Wall Street activity, has not yet forgotten the experiences of last year. Moreover, besides the shortage now apparent in the winterwheat crop, there is some apprehension in certain sections of the spring-wheat belt regarding results of present drought.

In view of the situation as thus outlined, those familiar with Wall Street history are not surprised at the present state of inactivity in financial circles.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from $1\frac{1}{2}$ to 2 per cent. To-day's rates on call were $1\frac{3}{4}$ to 2 per cent. Prime commercial paper $3\frac{1}{2}$ to $4\frac{1}{4}$ per cent. The Bank of England weekly statement on Thursday showed a decrease in bullion of £816,210 and the percent-

age of reserve to liabilities was 43.22, against 44.37 last week; the discount rate remains unchanged at 3½ per cent. The Bank of France shows an increase of 13,600,000 francs in gold and 2,700,000 francs in silver. The New York City Clearing-House banks, in their state-

ment of June 2 showed an increase in the reserve held of \$4,147,000 and a surplus over the required reserve of \$2),123,275, against \$18,812,325 the previous week.

* This is the price bid at the morning board; no sale was made. † Prices are quotations in "Unlisted Dep't" for bonds "when issued."

State and Railroad Bonds.-Sales of State bonds at the Board include \$33,200 Tennessee settlement 3s at 96 to 965/8; \$4,000 Virginia fund. debt 2-3s of 1991 at 93; \$3,000 North Carolina consol. 4s at 1061/2, and \$2,000 Louisiana consol. 4s at 1081/2.

The market for railway bonds continues dull and almost featureless. Transactions in this department were limited to an average of less than \$1,300,000 par value per day, of

which a few issues formed a conspicuous part. In a few cases there has been a fractional advance in prices, but such gains are fully offset by declines. Western New York & Pennsylvania general 3.4s were exceptionally active and sold up to 92, a gain of nearly 3 points. Toledo & Ohio Central 1st 5s were in request and advanced 1 point. Wabash debenture, series B, on the other hand, declined.

Note.-Returns of separate banks appear on page 1032 and 1033.

Foreign Exchange.-The market for foreign exchange has been dull and generally steady. No new feature has developed.

To-day's actual rates of exchange were as follows: Bankers' sixty days' sterling, 4 843/@4 85; demand, 4 871/@4 871/2; cables, 4 873/@4 88; prime commercial, sixty days, 4 841/4@ 4 841/2; documentary commercial, sixty days, 4 831/2@4 841/2; grain for payment, 4 841/4 @4 841/2; cotton for payment, 4 831/2 @4 831/4; cotton for acceptance, 4 841/4 @4 841/2.

Railroad and Miscellaneous Stocks.-The stock market has been depressed throughout the week. Transactions at the Exchange on Thursday were smaller than for several months past, amounting to less than 200,000 shares, and on no day reached an aggregate of 300,000 shares.

An almost entire absence of investors from the Street left the market largely in the hands of board-room operators, with the above result. With rare exceptions prices have declined. The anthracite coal shares were the strong features of the railway list, under the lead of Central of New Jersey, which advanced 4 points and held about half the gain. The buying of this stock was accompanied by rumors of Pennsylvania control and a closer trade compact. Otherwise a decline of from 2 to 4 points was the rule.

The iron and steel stocks were adversely affected by re-ports on Monday that some of the large plants controlled by the Federal Steel Company had been closed down. This and other depressing influences led to special weakness and a large percentage of decline in the miscellaneous list.

THE CHRONICLE.

Juvestment and Kailroad Jutelligence.

RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns oan be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month. The returns of the street railways are brought together separately on a subsequent page.

* Figures for April and May are for the railroad only.
 † Mexican currency.
 § Covers results of lines directly operated east of Pittsburg.
 † Includes Chesapeake & Ohio 80'western, Ohio Valley and Chicago and Texas for both years.
 b Does not include the Austin & Northwestern, the San Antonio & Aransas Pass or Houston & Texas Central system.
 e Results on Montgomery Division are include i in 1900, but not for 1899

Latest Gross Earnings by Weeks .- The latest weekly earnings in the foregoing are separately summed up as follows:

For the fourth week of May our statement covers 59 roads and these show 9.55 per cent increase in the aggregate over the same week last year.

Net increase (9.55 p. c.)			1,086,641	

For the month of May 90 roads (all that have fur-nished statements for the full month as yet) show aggregate results as follows :

Month of May.	1900.	1899.	Increase.	Per Oent.
Gross earnings (90 roads)	\$ 49,165,214	\$ 44,867,874	\$ 4,297,340	9.58

It will be seen that there is a gain on the roads reporting in the amount of \$4,297,340 or 9 58 per cent.

Net Earnings Monthly to Latest Dates .- The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of May 19, 1900. The next will appear in the issue of June 23, 1900.

STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads-that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

ANNUAL REPORTS.

Annual Reports.—Last index, see issue June 2, page 1092, Chicago Rock Island & Pacific Railway.

(Report for the year ending March 31, 1900.)

The annual report in pamphlet form has been issued this week, and the remarks of President W. G. Purdy, with the income account and balance sheet, will be found on pages 1152 and 1153.

The comparative statistics for four years, made up in the usual complete form for the CHRONICLE, are given below:

Chicago & North Western Railway Co.

(Advance report for the fiscal year ended May 31, 1900.)

The advance statement for the late fiscal year is reported

Street Railway Net Earnings.—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that weeF, but once a month (on the third or the fourth Saturday), we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of May 19, 1900. The next will appear in the issue of June 23, 1900.

RAILROADS, INCLUDING STREET BOADS.

Contributions.—Subscribers and others will contribute materially to the completeness and value of this department, if they will send us prompt information as to all matters coming within their personal knowledge affecting the financial status of any company whose securities are held by the public, particularly facts as to new stock and bond issues, leases and consolidations, defaults in interest or dividends, protective committees, reorganization plans, etc. Copies of official circulars, readjustment plans or notices, financial reports of every kind and brokers' offerings of new securities will also be appreciated.

The dividend of 2½ per cent calls for about \$2,855,000. The dividend of 11/2 per cent paid in February last calling for about \$1,713,000 was paid from the surplus of the preceding fiscal year.

Chairman Aldace F. Walker says in substance :

Chairman Aldace F. Walker says in substance: Kansas will raise a splendid whea crop this year-between 85,000,-000 and 95,000,000 bushels, the largest crop since 1892. Nothing can now affect its quantity, though the quality may be injured With these prospects. we could afford to lose considerable of the merchan-dise traffic and earnings would not be materially affected. As a matter of fact, the heavy increase in Atchison's earnings this year has been made with a short wheat crop in Kansas and a short cotton crop. The savings in operating expenses shown during the current fiscal year are largely due to reductions in transportation cost, the result of the improvement work we have been carrying out for the past four years. Maintenance of equipment is costing more than in the pre-vious year and maintenance of roadway less. We have been adding largely to our equipment the past year, and this has helped our operating results. The transportation results this year have been very satisfactory. The management has in the last eighteen months expended in the aggregate a considerable amount for which general-mortgage bonds can be drawn and issued. These include the retirement of old equip-ment notes, extensions, construction of branches, reductions of grades and various other permanent improvements on all parts of the system. Among the more recent improvements were the outting-down of grades on the Texas lines, as well as the new branches in Oktahoma. The company cannot always issue bonds just when improvements

Oklahoma

The company cannot always issue bonds just when improvements are required, so pays for them in cash and later issues and sells bonds to reimburse itself, as is permissible under the reorganization plan. The company has not nearly reached the authorized limit. The company will issue 33,600,000 of bonds in the present fiscal year, in order to reimburse the treasury in part for various expenditures that have been made for the uses stated.—V. 70, p. 1095, 944.

Atlantic & Danville Railway.—New Mortgage.—This company, whose property is leased to the Southern Railway, has made a first mortgage to the Mercantile Trust Co. of New York, as trustee, to secure an issue of fifty-year 4 per cent gold bonds.

The issue is limited to \$4,425,000. Of this amount, \$500,000 can be issued only for improvements, the remainder will be used to retire the \$1,238,000 of 5 per cent bonds called for payment June 29, and for the partial retirement of pre-ferred stock. The first issue of bonds will be \$3,175,000. The Southern Ry. Co., under the terms of the lease, agrees to pay until June 30, 1904, as rental, an amount equal to the interest on all the outstanding bonds secured by the mortgage; from June 30, 1904, to June 30, 1909, the annual rental will be \$31,000 in excess of the interest charge, and from June 30, 1909, to 1949, \$61.000 in excess of the interest charge. The lease is for fifty years till July 1, 1949, with the privilege of renewal for successive periods of 99 years.

The old bondholders will presently be offered by F. J. Lisman & Co., 30 Broad St., the privilege of exchanging for the new issue.-V. 69, p. 1246.

Atlantic & Lake Superior Ry.—Sheriff's Sale.—The Sheriff of the County of Bonaventura, Quebec, gives notice that on July 19 he will sell the portions of the road extend-ing from Metapedia to the Township of Hamilton, 60 miles, and from the Township of Hamilton to New Carlisle, 12 miles. The sale of the former parcel is made at the instance of Alex. F. Riddell and Thomas Watson, curators, to the property of Henry and George Macfarlane, of Toronto, and of the latter at that of Bellhouse, Dillon & Co., of Montreal, -V. 68, p. 329.

Beaver Valley Traction Co. — Merger. — A press des-patch from Beaver, Pa., says this Company, the People's Electric Street Railway of Rochester, the College & Morado Railway and the Beaver & Vanport Electric Railway have been purchased by a syndicate which will unite them under one management and build extensions to Conway, etc.

Boston & Albany RR.-Bill to Permit Lease.-In the Massachusetts Senate yesterday Senator Soule, Chairman of the Committee on Railroads, was to present a bill adopted by the committee authorizing the lease of the property to the New York Central & Hudson River RR. The bill reserves to the State the right to reduce rates and fares, to compel service, etc., and stipulates that no more shall be charged for export freight from any point to Boston than is charged to New York; also, that the New York Central shall not diminish the facilities for travel and business over the Boston & Albany. Not less than \$250,000 per year, beginning July 1, 1901, until the full sum of \$2,500,'.00 shall have been expended, must be used in improving Eist Boston terminals and double-tracking the Grand Junction railroad. In case at any time it shall appear to the Railroad Commissioners that the provisions of the Act are not complied with they shall transmit a statement to the Attorney General, who shall institute proceedings to obtain compliance. The Supreme Judicial Court of Massachusetts is given full juris. diction to act on the petition of the Attorney General, and to enforce its decree against the lessee. The term of the lease is for ninety-nine years, and the Act takes effect July 1, 1901. -V. 70, p 893.

Atchison Topeka & Santa Fe Ry.-Dividend Inc cased.-The directors on Tuesday declared a semi-annual dividend of $2\frac{1}{2}$ per cent on the preferred stock, payable Aug. 1 to stock of record July 10. The February dividend was $1\frac{1}{2}$ per cent, while the two dividends paid in 1899, in which year distributions to the stockholders began, were 1 per cent in January and 11/4 per cent in July.

The directors issued the following:

Statements were submitted showing that the reported earnings for eleven months and the estimated earnings for the relualning one month of the present fiscal year, over and above all taxes, rentais and interest charges, including interest on adjustment bonds, will amount to more than \$9,000,000. Voted, that a semi-annual dividend of \$250 per share, being divi-dend No. 4 on the preferred stock of this company, be and it is hereby declared out of surplus net carnings for the fiscal year ending June 30, 1900, payable on August 1, 1900, to the holders of preferred stock as registered at the close of the transfer books on July 10, 1900.

Bucks County (Pa.) Railway.—Successor Company.—See Doylestown & Willow Grove Ry. below.—V. 70, p. 229.

Canadian Pacific Rallway.—Called Bonds.—Five per cent land grant bonds of 1831 to the amount of \$249,000 have been drawn for redemption, and will be paid at 110 with accrued interest to date of redemption at the office of the Treasurer of the company, at Montreal, up to July 30, on which date all interest will cease.-V. 70, p. 995.

Central Branch Ry.—*Earnings*.—The earnings for the calendar year 1899 were, gross, \$1,263,053; net, \$358,797; other receipts, \$7,416; deduct interest, \$226,830; taxes (including

\$39,189 prior to 1899), \$86,611; miscellaneous, \$417; balance, surplus, \$52.356. not a deficit as stated in the April number of the Investors' SUPPLEMENT, V. 70, p. 279.

Central Massachusetts RR.—Possible Sale to Boston & Maine.-Preliminary negotiations have been begun looking to the purchase of the Central Massachusetts by the Boston & Maine, the present lease being unsatisfactory.-V. 69, p. 905.

Central RR. of New Jersey.-Control of Lehigh Navigation.—It is commonly reported that the compary has pur-chased a majority of the capital stock of the Lehigh Coal & Navigation Co.—V. 70, p. 893, 841.

Chicago City Ry.-New Stock.-An official circular offers the \$500,000 new stock for subscription at par to the shareholders of record Sept. 15, who may purchase one new share for each 26 shares of old stock held by them. The new stock must be paid for on or before Oct. 1.-V. 70, p. 1695.

Chicago & North Western Railway.—Annual Meeting.— The stockholders at the annual meeting on Thursday adopted the proposition to purchase the proprietary lines mentioned in V. 70, p. 841. The advance statement of the year's opera-tions is given on page 1147.—V. 70, p. 841, 739.

Cincinnati New Orleans & Texas Pacific Rv.-Action Postponed.—The trustees representing the City of Cincinnati, the owner of the Cincinnati Southern RR., have indefinitely postponed the consideration of President Spencer's proposi-tion to lease the property. The trustees are said to favor accepting the terms offered, but consider the present time inopportune.-V. 70, p. 1095.

Doylestown (Pa.) & Willow Grove Railway.-New Company.-This company recently took over the Bucks County Railway, foreclosed, operating a trolley line between Doyles-town and Willow Grove. The capital stock is \$500,000, in shares of \$50 each. The company has made a mortgage to the Land Title & Trust Co., as trustee, to secure \$500,000 first mortgage 4 per cent gold bonds maturing 1930, denomi-nation \$1,000, coupons payable semi-annually. The President is C. P. Weaver, and the Secretary, Percy S. Bickmore, both of Philadelphia.—V. 70, p. 229.

Erie & Central New York Ry.-Trustee in Possession. John R. Bland trustee under the mortgage made by this company Aug. 1, 1895, assumed control on May 12, 19(0, of the property. The officers continue as before, Charles O. Scull being President.—V. 67, p. 319.

Erle RR.—Payment of Bonds.—The first mortgage 7 per cent bonds of the Suspension Bridge & Erie Junction RR., which mature on July 1, 1900, with the interest due on the same, will be paid on presentation at the Treasurer's office, No. 21 Cortlandt St., New York, on and after July 2, 1900.-V. 70, p. 945.

Georgia Pacific Rallway.—Called Bonds.—Fifty three (\$53,000) equipment mortgage bonds, dated July 17, 1889, have been drawn for the sinking fund and will be paid at par with the coupons due Aug. 1, 1900, at the Central Trust Co. on and after the 1st day of Aug., 1900.

Grand Rapids (Mich.) Railway.—Bonds Offered.—N. W. Harris & Co. are offering at 103 and interest \$2,500,000 of the company's \$3,500,000 first mortgage gold 5s, dated June 1, 1900, due June 1, 1916, denomination \$1,000, interest paya-ble J. & D. in New York. The New York Security & Trust Co. is the mortgage trustee. The capital stock is, preferred, \$1,500,000: common, \$2,000,000. A circular says in part: \$1,500,000; common, \$2,000,000. A circular says in part:

\$1,500,000; common, \$2,000,000. A circular says in part: In connection with this issue of \$2,500,000 bonds, provision is made for the expenditure of \$325,000 in cash for improvements to the prop-erty which it is expected will add to its net earning capacity. The bonds above offered are secured by a first lien on the entire street rail-way system of the city consisting of over 50 miles of single elec-tric track. The mortgage authorizes a total issue of \$3,500,000 bonds, of which \$1,000,000 are held in escrow by the trustee, to be issued to reimburse the company for 85 per cent of the actual cash cost of per-manent additions and improvements; and such escrow bonds can only be issued when the net earnings for the preceding year are equal to the interest charge on the total amount of bonds outstanding, in-cluding those to be issued. The mortgage provides for a sinking fund commencing with the year 1905 of 1 per cent upon the total amount of the bonds outstand-ing in each and every year for five years, and this amount beginning with the year 1910, will be increased to 2 per cent upon all bonds out-standing in each and every year thereafter, until 1915. These sink-ing funds are to be invested in the bonds of the company if same can be purchased in the open market at a price to yield at least 4 per cent; otherwise, with the consent of the company in mortgage. Steam of the provides in the open market at a price to yield at least 4 per cent;

purchased in the open market at a price to yield at least 4 per cent; otherwise, with the consent of the company, in mortgage, steam or street railway bonds listed on the New York or Philadelphia Stock Exchanges, or in State or municipal bonds.

Hartford Street Railway.-New Mortgage.-The stockholders will meet at the company's office, 115 State St., Hartford, Conn., on June 11, to vote on the question of authorizing a mortgage secured by the property and fran-chises of the company. This is probably preliminary to refunding all the outstanding debentures. See V. 70, p. 1095, 531.

Hudson Tunnel Railway.—Plan.—The printed plan of reorganization is now at hand. The committee consists of F. B. Jennings, John Young and Horace E. Golding. The plan says :

Estimates made by Charles M. Jacobs, C. E, which have re-cently been confirmed by the Engineering Contract Co. of New York, show that an expenditure of about \$2,303,872 must be incurred before the North Tunnel can be completed and equipped for the effective transit of passengers. Since these estimates have been made the shaft and tunnel have been pumped clear of water and a careful inspection made by the engineer, who reports that the present condition of the works under the river is entirely satisfactory.

The committee proposes to organize a new company, under the laws of New York or New Jersey, to be known as Hudson Tunnel Railroad Co., or by such other name as the com-mittee may select, with authority to issue the following :

Common stock, in shares of \$100 each, issuable forthwith to purchasing committee.....\$3,500,000

Preferred stock, in shares of \$100 each, entitled out of	
any and all surplus net profits, whenever ascertained	
and declared by the board of directors, to non-cumula-	
tive dividends at the rate of and not exceeding 6 per	
cent per annum, in preference and priority to the pay-	
ment of any dividends upon the common stock. Total	
amount issuable forthwith to purchasing committee	3,500,000
First mortgage 5 per cent bonds, to be subject to call at	
110 and interest upon three months' notice. Total is-	
sue in no case to exceed	6,000,000
Of which to be issued to raise \$2,500 000 cash for com-	
pletion of tunnel; also in settlement of claims, etc	3,500,000

To be reserved and not to be issued except for construc-tion of the South Tunnel if it shall subsequently be deemed advisable to build a second tunnel.....

2,500,000

The plan provides in part as follows :

The plan provides in part as follows : There shall be used for the purpose of settling with the holders of the £300,000 of old bonds and \$425,000 of debentures issued in Eng-land and the claim of S. Pearson & Son, sise for the purpose of pump-ing out and testing the tunnel and the maintenance of the works pending the new issues, and for the purpose of raising the sum of \$1,-250,000 to be raised in England, \$1,315,000 of first mortgaze bonds. \$1,857,500 of preferred stock and \$1,000,000 of common stock; and for the purpose of settling with the holders of £250,000 of old first mortgage bonds held in America, and other parties in America, hav-ing claims which the committee in their full discretion may deem en-titled to recognition by reason of moneys actually expended in build-ing the tunnel, or for other reasons, and for the purpose of raising \$1,250,000 in cash to be raised in America, \$1,370,000 in first mort-gage bonds, \$1,200,000 in preferred stock and \$1,325,000 in common stock. stock.

The exchange of securities held in England is to be on the following basis :

Old securities, with unpaid coupons attached. Old £300,000 1st 6s. per \$1,000 principal......\$150 Old \$425,000 debentures, per \$1,000 principal.... 100 There are a security of the security \$500 350

There are also £250,000 old first mortgage bonds held in America as security for loan, to take up which securities are reserved. See also other facts in V. 70, p. 996.

Kansas City Southern Ry.—Committee.—The Executive Committee has organized by electing E. H. Harriman its permanent chairman. The committee includes:

E. H Harriman, J. W. Gates, William Edenborn, John Lambert, O. H. Kahn, and Max Pam, as general counsel ex-officio.

Max Pam, Counsel for the American Steel & Wire Co. as well as for the Kansas City Southern, will be an active member of the Executive Committee during the absence in Europe of John W. Gates. The new securities will be ready in about three weeks.—V. 70, p. 945.

Lake Street Elevated RR. of Chicago —Settlement with Ziegler Interest.—Blair & Co. have bought the bonds of the Ziegler party for \$610,000, their face value, and has paid the accumulated interest, viz, \$172,000. This, it is thought, will end further litigation and leave the way clear for some read-justment of the company's finances, which, it is reported, will involve a consolidation of the elevated railroad systems will involve a consolidation of the elevated railroad systems of Chicago.-V. 70, p. 1049, 894.

Long Island RR.-Operation by Pennsylvania.-The Pennsylvania RR. will take over the operation of the road within the next two weeks.—V. 70, p. 996, 945.

Earnings.-The earnings of the property are reported for the years ending April 30 as follows, the interest shown being the present fixed charge, viz., 5 per cent on the \$2,500,-000 bonds now offered:

 Net.
 Interest.

Great Northern Ry.-Merger.-A press despatch says that a deed has been filed with the Secretary of State at Pierre, S. D., transferring the road and franchise of the Sioux Falls Terminals Railway Co. to the Willmar & Sioux Falls Rail way Co. for \$300,000.-V. 70, p. 996, 945.

Gulf & Ship Island RR.-New Mortgage.-The company has filed a new mortgage for \$1,000.000, the Colonial Trust Co., of New York, being trustee.-V. 69, p. 1011.

Los Angeles Ry.—Purchase.—See Pasadena & Mt. Lowe Ry. below.—V. 68, p. 85.

Louisville Evansville & St. Louis Consolidated RR.-Settlement with Rockport Bonds.-The settlement with the committee representing the Evansville Rockport & Eastern bonds was announced in last week's issue. As then stated, the holders will receive new Southern Railway 4s for the principal and a cash sum to represent the overdue interest. The correct amount, however, of the cash payment is \$150, the adjustment of interest being made as of April 1, 19(0. On that date the interest accrued aggregated \$165 per bond, but the bondholders agreed to throw off \$15, leaving the net amount as above.-V. 70, p. 1095, 1049.

Lynn & Boston (Street) RR.-New Steek.-The company recently asked the Massachusetts Railroad Commission for authority to issue \$1,500,000 new stock, the proceeds to retire a part of the floating debt and to pay for new equipment, roadbed improvements, etc. An adjourned hearing on the matter was held June 5.—V. 70, p. 1049.

Metropolitan Street Ry .-- Quarterly .- Earnings for the quarter and the nine months ending Mar. 31 were :

1898-9.... 8,850,222 4,468,364 530,627 3,212,322 1,786,669 The balance sheet shows bills payable March 31, 1900, \$7,306,736, against \$2,406,736 on June 30 last, with no change in the funded debt; stock, \$44,959,500, against \$39 938,500. The stock was on May 17 authorized to be increased from \$45,000,000 to \$52,000,000 (see V. 70, p. 996).-V. 70, p. 1049.

Minneapolis & St. Louis RR.-New Certificates. -It is the purpose of the company to substitute in lieu of the existing certificates of second preferred stock and common stock, respectively, new stock certificates to be known as the preferred stock and the common stock. In doing this there is to be no change in the amount of capital stock as now issued. The first preferred stock was retired last year with the pro-ceeds of the First and Refunding bonds. Until Sept. 1, 1900, contracts on the New York Stock Exchange may be settled by delivery of either the new or the old form of certificates; on and after that date the new form of certificates only will be a good delivery.--V. 69, p. 1244.

Norfolk & Western Ry. -New Director.-S. M. Prevost, Third Vice-President of the Pennsylvania RR., was this week elected a director in place of W. E Glyn, resigned. Three more Pennsylvania directors, is is said, will be elected shortly. -V. 70, p. 687.

Northwestern Elevated RR. of Chicago.-In Operation.-The company began running its regular service on May 31. Express trains will be added as soon as the third dynamo is installed in the power house which, it is expected, will be within the next two weeks.—V. 70, p. 1049, 946.

Omaha Council Bluff & Suburban Street Ry.—East Omaha Street Ry. Acquired.—The formal transfer of the East Omaha Street Railway to this company was made May 31.-V. 70, p. 382.

Omaha & St. Louis RR.—Majority Assent.—Holders of a majority of the first mortgage 4 per cent bonds have assented to the bondholders' agreement prepared by the committee consisting of W. Emlen Roosevelt, Cornelius B Gold and Francis Smith. Legal proceedings to enforce the bondholders' rights are in progress, and the immediate deposit with the Union Trust Co. of all outstanding bonds is urgently re-quested. The committee reserves the right to impose a penalty on any bonds not deposited before June 15.-V. 70, p. 946.

Pasadena & Mt. Lowe Ry.-Sold.-This road, which has been sold to the Hellman-Huntington syndicate, controlling the Los Angeles Ry., was on June 1 taken over by the new owners. The property, it is said, will be greatly improved, the bond issue being increased from \$375,000 to \$500,000 and the stock from \$400,000 to \$600,000.-V. 68, p. 673.

Peoria Decatur & Evansville RR.—Sale Confirmed in Illinois.—Judge Allen, in the United States Circuit Court this week at Springfield, Ill., overruled the exceptions of Emerson Chamberlin, of New York, a stockholder, to the master's report of the foreclosure and confirmed the sale under the second mortgage of the Illinois division of the under the second mortgage of the Illinois division of the road. The case in the United States Court of Appeals at Chicago is still pending.—V. 70, p. 1049, 997.

Quincy Omaha & Kansas City RR.—Interest Paid; Not Purchased.—An official advertisement announced last week the purchase of the coupons which matured June 1, 1900. This wording was incorrect and was afterwards changed to read "will be paid," instead of "purchased." The coupons were therefore paid and canceled.—V. 70, p. 1096.

St. Louis & San Francisco RR.-New President.-The di-rectors on Thursday elected B. F. Yoakum President and General Manager; Alexander Douglas, Vice-President and General Auditor; C. H. Beggs, Vice-President and Assistant to the General Manager. Mr. Yoakum succeeds D. B. Robinson, who resigned because of ill health. Mr. Yoakum has been Vice-President and General Manager of the company since Mr. Robinson's accession to the Presidency; he was previously associated with Mr. Robinson in a number of other Western roads.--V. 70, p. 1096.

shortly. Surveyors are now going over the route for the proposed line to Utah, but nothing definitely has been settled about that as yet.-V. 70, p. 1096, 842.

Southern Railway.—Approved.—The stockholders on June 1 duly approved the execution of a fourth supplement to the first consolidated mortgage to permit the issue of bonds bearing less than 5 per cent interest, and accepted the amendment to the charter providing that the common stock may be reduced one half.-V. 70, p. 947.

Tiffin Fostoria & Eastern (Electric) Ry.-Sold.-The con-trol of this company, which owns a line between Fostoria and Tiffin and about six miles of track in Tiffin, has been sold by the Cleveland interests to F. B. Sneath of Tiffin, Pres-ident of the Tiffin Commercial Bank. The capital stock of the road is reported as \$175,000, bonded debt as \$175,000.

Toledo St. Louis & Kansas City RR.—Meeting June 12 to Approve Sale .- The holders of first mortgage bonds subscribing to the bondholders' agreement of Aug. 4, 1893, and the holders of certificates issued by the Continental Trust Co. for bonds deposited under said agreement, will meet June 12, at 10:30 A. M., in room 1634, No. 30 Broad St., to act upon the offer made to the bondholders' committee as stated last week, namely:

To purchase the first mortgage bonds and coupons deposited under said bondholders' agreement, by an assignment of the bid of the com-mittee for the premises sold under foreclosure of the first mortgage of said railroad company, at a price, net, equivalent to 130 per cent. for each first mortgage bond deposited with the coupon maturing June 1, 1893, and subsequent coupons, and interest on said purchase price at the rate of 4 per cent per annum from June 1, 1900, to the date of payment of the purchase price to the committee.

The reorganization plan prepared by the Vermilye-Hall-garten syndicate will be announced next week. As already stated, this plan will permit the holders of junior securities who pay the prescribed assessments to participate in the reorganization.

The proposed transfer of the property to the syndicate, we understand, is the outcome of negotiations begun at the time of the foreclosure sale, when Mr. Untermeyer bid the prop-erty up to \$12,150,000, being the equivalent of 130 and re-organization expenses. This bid was in the interest of F. J. Lisman & Co., who subsequently obtained an option from the bondholders' committee to take their bonds at a price to net 130 to the holders. This option was assigned to the syndicate, which, it is stated, will reorganize the com-pany as an independent property. The new reorganization committee is composed of F. P. Olcott, H. Budge, J. Kennedy Tod and Wm. A. Read.—V. 70, p. 1096, 843.

Union Traction of Philadelphia.—Payment of Bonds.— The principal and interest of the first mortgage 7 per cent bonds due July 1, 1900, issued by the Empire Passenger Rail-way Co. will be paid on and after that date, by the Land Title & Trust Co., Philadelphia.—V. 70, p. 431.

Western New York & Pennsylvania Ry.—Payment for Deposited Securities.—Oa and after June 15 Speyer & Co. will pay the \$9 per \$50 share for shares and \$300 per bond for income bonds represented by their negotiable receipts, and a like proportion on deposited stock and bond scrip.—V. 70, p. 1096, 896.

INDUSTRIAL, GAS AND MISCELLANEOUS.

American Bridge Co. - Contract. - The company has secured the contract to furnish the structural iron and steel for the underground rapid transit railroad of this city. -V. 70, p. 1050, 896.

Atlantic Tube Co. of Pittsburg.—Mortgage.—The com-pany has made a mortgage for \$100,000 to the Fidelity Trust Co. of Philadelphia, as trustee. The company was incor-porated in April, 1899, and in November increased its capital stock from \$250,000 to \$750,000.-V. 69, p. 1105.

Cheyenne (Wyo.) Light Fuel & Power Co.—Consolidation. -The company, it is understood, is a consolidation of the Brush-Swan Electric Light Co. and the City Gas Co. A new plant is proposed.—V. 70, p. 1097.

Chicago Elevator Co.-Wabash Elevator Transferred.-The company's Wabash elevator has been transferred to the Wabash RR. Co. for a sum said to be \$275,000. Of the pro-ceeds about \$100,000, it is stated, will go to pay advances obtained in 1898, and \$148,000 in settlement of grain certificates irregularly outstanding, the grain held to secure them having been disposed of without their being paid.-V.70,

Southern Pacific Co.—Dividend Prospects.—President C. P. Huntington says :

P. Huntington says: It is true that the earnings of the Southern Pacific now are con-siderably in excess of the fixed charges and operating expenses, but I do not thing it likely that dividends will be paid for twelve months to come. We shall probably begin paying dividends within the next two years, however. The property is in a higher state of efficiency now than it ever was before, and surely ought to be, for we have expended very large sums of money in straightening the roadbed by taking out ourves and in reducing the grades, and I expect very soon there will be no grade over one per cent between the eastern base of the San Jacinto Mountains and New Orleans, a distance of 1,900 miles. The eastern base of the San Jacinto Mountains is about 100 miles from Los Angeles. I expect the Coast Line between San Francisco and Los Angeles will be completed and cars running by September next. When everything is completed and it is reasonably certain that the road can earn something for its stockholders right along, we shall be-gin to pay dividends. I do not want to begin dividend-paying and have to stop after a year or two. The conservative policy pursued by the company for the past several years has kept it out of bankruptcy and enabled it to get into a condition as near perfect as such a great system can be. As stated, the work of grade reduction, which has been in progress for half a dozen years at a cost of \$12,000,000, is now about completed and important extensions will also be finished

p. 431.

City Water Co. of Cedar Rapids, Ia.-New Company.-This company has been incorporated, with a capital stock of \$770,000, by John H. Brown, B. O. Mayer, John M. Terry and F. H. Juckett, all of Chicago., Ill., to build and operate the proposed works. The City Council last November voted Mr. Brown a franchise for a new plant to be turned over on completion to the city, payment therefor to be made in yearly instalments. The City Water Co. recently purchased 16 acres of land as the site for the new works. The Cedar Rapids Water-Works Co., the old company, proposes to spend about \$25,000 in improving its works.-V. 69, p. 1064.

Consolidated Gas Co.-Decision.-Justice Smyth of the Supreme Court this week denied the motion of Charles C. Bull, a stockholder, for an order declaring the election held on Jan. 22 last null and void. It is said the case will be appealed.-V. 70, p. 1051, 1097.

Daylight Prism Co. of Pennsylvania.—Listed in Phila-delphia.—The Philadelphia Stock Exchange has listed the

JUNE 9, 1900.]

company's \$500,000 common stock, the \$75,000 preferred stock having been previously listed.-V. 69, p. 908.

Delta Cotton Oll Co.—Incorporation.—This company, with authorized capital stock of \$1,000,000, in shares of \$100 each, has filed articles of incorporation in New Jersey. The incorporators are: George W. Mark, Alfred G. Brown and Edward B. Hawkins. The company, it is said, will consolidate six or seven Southern cotton-seed mills, and, it is said, may bond them for \$1,000,000.

Erie Telegraph & Telephone Co.—Bonds Offered.—An advertisement offering at 1031% and interest \$1,250,000 of the company's collateral trust funds will be found on page x. See also notice at end of this page.

Controlled Company.—The Northwestern Telephone Exchange Co., one of the controlled companies, has increased its capital stock from \$4,000,000 to \$6,000,000.—V. 70, p. 1093, 1098, 1100.

Federal Steel Co.—Joliet Steel Co. Dissolved.—The Joliet Steel Co., one of the companies merged in the Illinois Steel Co., has been formally dissolved.—V. 70, p. 1052.

Hartford Electric Light Co.-Merger.-See Hartford Light & Power Co. below.-V. 70, p. 742.

Hartford Light & Power Co.—Company to Dissolve.—The stockholders on June 2 voted to dissolve the company, practically all of the \$225,000 capital stock having been acquired by the Hartford Electric Light Co.—V. 70, p. 586.

Hudson River Telephone Co.—Control Acquired.—C. H. Edwin and C. A. Tinker, of New York, have been succeeded as directors of the Troy Telephone & Telegraph Co. by James H. Manning and John G. Myers, of Albany, both directors of the Hudson River Telephone Co., Mr. Manning being the President of the Hudson Company.—V. 70, p. 1098, 586.

Knoxville (Tenn.) Gas Light Co.—Change of Control.— A majority of the capital stock, it is stated, has been purchased by Isaac Baxter and others, of Detroit and Chicago.

Lehigh Coal & Navigation Co.—Control.—It is generally understood that a majority of the capital stock has been acquired in the interest of the Central RR. of New Jersey.— V. 70, p. 948.

National Cash Register Co. of Dayton, O.—*Earnings*, Etc. —The net earnings for the year 1899 are reported as \$590,135. The interest on the \$800,000 of 7 per cent preferred stock amounts to \$56,000; balance, \$534,135. E. H. Rollins & Sons are offering a small amount of the preferred at \$110 per share.—V. 69, p. 593.

National Sugar Refining Co.—Organized.—The company's organization was effected on June 2 under the laws of New Jersey, the authorized capital stock being \$10,000,000 of common and a like amount of 6 per cent cumulative preferred. The officers are: President, James H. Post; Vice-President and Treasurer, F. D. Mollenhauer; Secretary, H. D. Cory. President Post says:

President Post says: In a general way it may be said that the preferred stock represents the value of the three properties and of the cash paid in. The value of these properties is not represented by their present capitalizations. For instance, the Mollenhauer and National are each capitalized at \$1,000,000, while the works have cost much more. The New York Sugar Refining Co. is capitalized at \$600,000 stock and \$2,400,000 bonds. These bonds will be canceled. The new company will have no bonds and no outstanding liabilities except the \$10,000,-000 of preferred and \$10,000,000 common stock. It is the present intention to keep the common stock off the market. Some of the preferred stock will be placed on the market, no one could prevent him from getting an interest in this way. However, the stock will probably be held very closely. A provision in the charter allows the company to engage

A provision in the charter allows the company to engage in the coffee business but, it is said, there is no present intention of availing of this right.

President Havemeyer, of the American Sugar Refining Co., says the new company does not concern him, but that the firm financing it is composed of good business men and he hopes they will do well. He further says:

The advances in sugar have nothing to do with the new company. This is the busy season in our trade, activity will continue until November. Our board decided that this was our time to make money. So it raised the price of the product, and we are going to make money -not too much-but we are entitled to a fair profit, and it looks as if we were going to get it.-V. 70, p. 1098.

we were going to get it.—V. 70, p. 1098. National Tube Co.—Open-Hearth Plant.—The report is confirmed that the Tubular Steel Co., in which the National Tube Co. is interested, will build at Benwood, near Wheeling, W. Va., an extensive open-hearth steel plant and rolling mill, the cost of which is reported at about \$3,000,000. The National Tube Co. will use the entire product in the manufacture of tubular goods. It is reported that the weekly capacity of the steel plant will be about 5,000 tons. The work of construction has begun and will probably be completed some time next year.—V. 70, p. 999, 844.

Paterson & Passaic Gas & Electric Co.—Listed in Philadelphia.—The \$3,317,000 outstanding consolidated gold 5 per cent bonds, due 1949, have been regularly listed on the Philadelphia Stock Exchange.—V. 68, p. 430.

Pure Oll Co.—Stock in Trust.—Output.—A majority of the capital stock-is held by trustees to prevent the control of the company being acquired by the Standard Oil Co. The Pure Oil Co., it is claimed, handles over 60,000 barrels daily of the 90,000 barrels known as Pennsylvania oil.—V. 70, p. 1099.

Richmond (Va.) Passenger & Power Co.—Bonds Offered. —E. H. Gay & Co. offer at 100 and interest \$100,000 of the \$3,600,000 first consolidated mortgage 5 per cent gold bonds, due Jan. 21, 1925.—V. 70, p. 947, 842.

St. Louis Terminal Cupples Station & Property Co.— Stock Presented to Washington University.—Samuel Cupples and Robert S. Brookings have presented the entire capital stock, consisting of \$2,000,000 common and \$1,000,000 preferred, to Washington University, St. Louis, Mo. The stock will be held in two funds of a million and a-half each, to be known by the names of their respective givers.—V. 70, p. 1048.

Southern States Lumber Co.—Call2d Bonds.—Seventeen first mortgage bonds, Nos. 8, 85, 114, 127, 151, 185, 187, 205, 246, 266, 280, 326, 332, 437, 438, 458 and 497 have been drawn for the sinking fund and will be paid at the rate of \$1,025 per bond, with accrued interest, at the Knickerbocker Trust Co., 66 Broadway, on July 1, 1900, on which date interest will cease.—V. 69, p. 1197.

Swift & Company.—Bonds Authorized.—The stockholders last week duly authorized the \$5,000,000 5 per cent bonds. Holders of the old 6s, which are called for payment at 105 July 1, can exchange their old bonds for new at 105 for the old and 102½ for the new. The remaining 5s will be taken by stockholders at the same price, namely, $102\frac{1}{2}$. The new bonds are described as follows:

To be dated July 2, 1900, bearing interest at the rate of 5 per cent per annum, payable semi-annually, January 1 and July 1, at the American Trust & Savings Bank of Chicago, or at the National Bank of the Republic in New York, the principal and interest of said bonds to be payable in gold and to be secured by a deed of trust to the American Trust & Savings Bank on the property of the company. Said bonds to become due on the first day of July, 1914, and to be redeemable at the option of the company on and after July 1, 1910.—V. 70, p. 1053, 1000.

Vicksburg (Miss.) Water Supply Co.—Foreclosure Sale.— The sale of the property under foreclosure of the \$250,000 mortgage, Farmers' Loan & Trust Co., trustee, is advertised to take place Aug. 8. An election will be held by the city on July 3 to vote on the question of issuing water-works bonds for the purchase of the plant. (See V. 70, 1116.)

Union Cotton Manufacturing Co. of Fall River.—Extra Dividend.—The company, it is stated, is about to pay as a distribution of surplus a cash dividend of 15 per cent as well as the stock dividend of 60 per cent.—V. 70, p. 1053.

Welsbach Company.—Consolidation.—Notice is given that the Welsbach Company accepts the delivery of the shares of the Welsbach Light Co. and the Welsbach Commercial Co. made for its account to the Provident Life & Trust Co. at Philadelphia under the agreement dated May 1, 1930, and elects the purchase of same under the terms of said contract. Elmer Smalling is President and F. H. MacMorris Secretary. Office, northwest corner of Broad and Arch Sts., Philadelphia.—V. 70, p. 898.

-\$1,250,000, the balance of \$2,000,000 five per cent collateral trust gold bonds of the Erie Telegraph & Telephone Company, are offered for sale by Wilson & Stephens, 41 Wall Street, New York; H. W. Poor & Co., Boston, and Town-send Whelen & Co. and Toland Brothers & Co., both of Philadelphia. Statements of earnings and other facts of interest are contained in the advertisement on page x of this issue of the CHRONICLE, and a circular more fully descriptive of the bonds and the operations of the Erie Company, and also containing a résumé of the telephone industry gen-erally, will be sent upon request. Copies of the opinions of attorneys on legality of this issue, as well as of the indenture securing the bonds, may be had upon application. A letter trom Charles J. Glidden, President, states that the Erie Company owns a majority of stock in the following operating companies: The Cleveland Telephone Co., The Northwestern Telephone Exchange Co., The Southwestern Telegraph & Telephone Co., Michigan Telephone Co. and Wisconsin Tele-phone Co. These operating companies have the exclusive and perpetual right to operate in their respective territories under the Bell patents and to enjoy besides the nse of the long-distance lines and those of neighboring Bell Companies in a territory with an estimated population of 12,000,000. The number of subscribers is given at 62,850 in December, 1898, and at 127,397 in May, 1900. In addition to the issuing firms, subscriptions will also be received by City National Bank, Buffalo, N. Y.; Springfield Safe Deposit & Trust Co., Springfield, Mass.; Portland Trust Co., Portlaud, M².: Divis & Dexter, Providence, R. I.; H. C. Warren & Co., New Haven, Conn.; Francis R. Cooley, Hartford, Conn. -Attention is called to a list of municipal, county and town bonds advertised in our municipal department by Wm. C. Thompson Co., Chicago.

New York & Boston Dyewood Co.—Called Bonds.—Twenty-five bonds drawn for redemption will be paid at 105 on presentation at the office of the trustee, the Washington Trust Co., New York, on and after July 1.

Nicaragua Canal.—Bill to be Considered Dec. 10.—The Senate has made the so-called Hepburn Nicaragua Canal Bill the special order for consideration at 2 P. M. on Dec. 10, the second Monday of the next session.—V. 70, p. 1052, 897.

Otis Falls Pulp Co.—Called Bonds.—Twenty-four first mortgage 6 per cent gold bonds, due May 1, 1916, have been drawn for redemption, and were paid at 105 and accrued interest by the Old Colony Trust Co., trustee, in Boston, on June 1, 1900, on which date interest ceased.

Reports and Documents.

CHICAGO ROCK ISLAND & PACIFIC RAILWAY COMPANY.

TWENTIETH ANNUAL REPORT-FOR THE YEAR ENDING MARCH 31, 1900.

Statement showing the details of Earnings and Percentage The Board of Directors submits the following report for of Operating Expenses as compared with the previous fiscal the year ending March 31, 1900: year: \$22,650,604 91 Year ending Year ending Gross earnings-March 31, 1900. 44	Enid & Tonkawa Railway	214,513	28
	_		

\$1,200,602 70

LAND, LAND DAMAGES.—The more important purchases for this account were for dock property at South Chicago, Ill, and for additional yard and terminal facilities at Chicago, Ill., Davenport and Des Moines, Iowa, Kansas City, Mo., and Armourdale, Kan.

MASONRY, BRIDGES AND CULVERTS.-Pile, Trestle and Wooden Span Bridges, aggregating in length 15,184 feet, or 2 c8-100 miles, have been replaced by permanent structures or filled with earth at a cost of \$2.3,135 11, which amount has been charged to Operating Expenses.

FENCES, CROSSINGS AND SIGNS — An Interlocking Plant has been erected at crossing with Pennsylvania Company at Englewood, Ill.

An Electric Train Block System has been established on the line between Beverly and Stillings, Mo.

Additional Fencing has been constructed along the line of road in Colorado.

SIDE TRACKS .- New Side Tracks aggregating 11 81-100 miles have been constructed on various Divisions of the road.

EQUIPMENT.—Two (2) Parlor Cars and Eight (8) Coaches have been purchased during the year, and the cost charged to Construction.

The following Equipment has been built at Company's Shops or purchased during the year, and the cost of same

charged to Operating Expenses. Four (4) Passenger Locomotives.

Twelve (12) Freight Locomotives.

Two (2) Switching Locomotives. Four (4) Reclining Chair Cars.

Seven (7) Passenger Coaches.

One (1) Post Office Car.

Two (2) Baggage, Mail and Express Cars. Two (2) Baggage and Express Cars. One Hundred (100) Fifty-foot Furniture Cars.

Two Hundred and Twenty-six (226) Box Freight Cars.

Twenty-nine (29) Stock Cars. Five Hundred and Forty-eight (548) Flat and Coal Cars.

1899.

One (1) Caboose Car. Two (2) Miscellaneous Cars. TRACK ELEVATION IN CHICAGO.—Track Elevation was extended during the year from 71st Street to 78th Street, a distance of $\frac{3}{4}$ of a mile, at a cost of \$220,970 07. This completes the track elevation as provided for in ordinances passed by the City Council. The total length of road now elevated is 7 32-100 miles, equal to 29 42-100 miles of main and side tracks, the proportion of cost paid by this Com pany being \$1,378,114 68. ENID & TONKAWA RAILWAY COMPANY.—Under authority

of the Board of Directors dated March 16th, 1899, this company advanced to the Enid & Tonkawa Railway Com-pany funds for the construction of a line from North Enid to Billings, Oklahoma Territory, a distance of 26 74-100 miles. On December 22d, 1899, the property was purchased by this Company and is now a part of the System.

CHICKASHA BRANCH. - An extension of this line is in process of construction a distance of about 40 miles west from Mountain View, O. T. Of the amount expended during the

INCOME ACCOUNT.

year, \$154,749 90 represents the completion of the mileage, Chickasha to Mountain View, 51 22-100 miles, included in last year's report. and \$81,434 14, the amount expended on the line west of Mountain View, the mileage of which will be included in next year's report.

1153

FORT SILL BRANCH.-A line is in process of construction from Anadarko to Fort Sill. Oklahoma Territory, which, when completed, will be about 32 miles in length. No portion of this line is at present ready for operation. About 15 miles of grading has been done; the amount expended to date is \$43,917 60.

ADDITION AND IMPROVEMENT ACCOUNT .- There has been distributed to Stockholders during the year from Addition and Improvement Account, as a special dividend, \$499,-896 59, being one-quarter per cent quarterly on May 1st, August 1st, November 1st, 1899, and February 1st, 1900, on full shares of stock outstanding (no dividend being paid on fractional shares), as authorized at the Annual Meeting held in Chicago, June 1st, 1893, and referred to in last Annual Report.

WISCONSIN MINNESOTA & PACIFIC RAILROAD COMPANY.-In 1885, 1886 and 1887, this Company advanced to the Wisconsin Minnesota & Pacific Railway Company funds for the construction of lines from Red Wing to Man-kato, Minn., and from Morton, Minn., to Watertown, South Dakota, in all about 217 miles of main track. This Company was secured by the entire issue of bonds of that Company, amounting to \$3.228,000 00, which bonds were deposited with the United States Trust Company of New York as collateral for an equal amount of Chicago Rock Island & Pacific Extension and Collateral 5 per cent Bonds. On May 1, 1894, following upon a fore-closure of the mortgage securing said \$3,228,00,00 Bonds, the Wisconsin Minnesota & Pacific Railway Company was reorganized under the name of the Wisconsin Minnesota & Pacific Railroad Company, and stock issued to the amount of \$5,205,000 00, no bonds being issued by the reorganized Company. All of the said stock was owned by this Company and on the execution of the 4 per cent General Gold Mortgage of this Company was deposited with the Central Trust Company of new York as collateral.

The Directors decided to dispose of the property, and all the interest of this Company therein was accordingly sold during the past year.

The Directors of the Company take pleasure in expressing their appreciation of the faithful services rendered by the Officers and Employes during the past year.

By order of the Board of Directors.

W. G. PURDY, President.

COMMERCIAL EPITOME. FRIDAY NIGHT, June 3, 1900. Although the volume of business transacted in most lines of merchandise has been very moderate, there has developed, nevertheless, a more general feeling of confidence in the commercial outlook, with the result that prices after the declines experienced the past few months are beginning to show renewed steadiness. Reports from the iron and steel trade indicate that the reaction in prices is being followed by a curtailment in the production. No important changes have occurred in the dry goods trade. There has been a further decline in prices for hides. Cotton has held steady. Coffee has been fairly active at advancing prices. There has been a revival of speculation in wheat, and prices have advanced sharply on unfavorable crop prospects. The disturbances in China have received considerable attention, and have been of especial interest to the silk and tea trades.

Commercial Times.

Lard on the spot has had only a limited sale, but offerings have been light and prices have advanced. The close was firm at 7.20c. for prime Western and 6.621/c. for prime Cit7. Refined lard has advanced, but at the higher prices business has been quiet, closing at 7.40c. for refined for the Continent. Speculation in lard for future delivery has been moderately active and during the latter part of the week prices advanced on light receipts of swine and in sympathy with the advance in the grain market. The close was firm.

DAILY CLOSING PRICES OF LARD FUTURES.

Sat. Mon. Tues. Wed. Thurs. Fri. 6'90 7'02 7'05 7'05 7'20 7'25 Pork has been in moderate demand, and prices have advanced to \$12@12 75 for mess. Cut meats have been in good demand and firmer. Tallow has been dull but steady at 43%c. Cotton-seed oil has sold slowly, and prices have weakened to 35@35%c. Butter has been in full supply and easier. Cheese closed quiet and easier. Fresh eggs have weakened slightly.

Brazil grades of coffee have been in active demand and prices have advanced sharply on the continued small crop movement, the lateness of the new crop and the strong local statistical position. The large roasters of package coffee have advanced prices ½c. per pound. The close was steady at 85% c. for Rio No. 7 on the spot. West India growths have been in active demand and prices have advanced, closing firm at 10¼ c. for good Cucuta. Speculation in the market for contracts has been fairly active and there has been a sharp advance in prices on buying by shorts to cover contracts and buying for investment account. The close 'was easier under realizing sales. Final asking prices were:

June. 7.400. Sept. 7.400. Dec. 7.550. July. 7.450. Oct. 7.400. Jan. 7.600. Aug. 7.450. Nov. 7.400. March. 7.650.

Raw sugars have been in fairly active demand; offerings have continued limited and prices have advanced to 45% c. for centrifugal, 96 deg. test, and 41% c. for muscovado, 89 deg. test. Refined sugar had a fairly large sale early in the week, but the close was quiet at 5.45c. net for granulated. Teas have been steadier.

Kentucky tobacco has been quiet and stocks are increasing; prices, however, have held fairly steady. Seed leaf_tobacco has been quiet. Sales for the week were 750 cases.

The market for Straits tin has been dull and prices have weakened slightly, closing at 29.75c. Ingot copper has had only a small sale, but there has been a moderate movement of supplies on contracts; prices have weakened slightly, closing at i6½c. extreme for Lake. Lead has sold slowly and prices have declined, closing at 3.85@3.90c. for domestic. Spelter has declined to 4.40@4.45c., closing dull. Pig iron has been quiet but fairly steady at \$17 50@22 00 for domestic.

Refined petroleum has been easier, closing at 7.85c. in bbls., 5.30c. in bulk and 9.15c. in cases. Naphtha unchanged at 9.55c. Crude certificates have been neglected. Credit balances have weakened to \$1.25. Spirits turpentine has been freely offered, and prices have declined to 47c. Rosins have been steadier, closing at \$1.60 for common and good strained. Hops have had a limited sale at steady prices. Wool has been quiet but steady.

THE CHRONICLE.

In addition to above exports, our telegrams to-night also give us the following amounts of ootton on shipboard, not cleared, at the ports named. We add similar figures for New York, which are prepared for our special use by Messrs. Lambert & Barrows, Produce Exchange Building,

Speculation in cotton for future delivery has been quiet. The holiday character of the past week in the English mar-kets, they being closed on Monday and also to-day, Friday, and to-morrow, Saturday, has had a tendency to hold specu-lative operations in the local market in check. The fluctuations in prices have been within a comparatively narrow range, and for the week they showed no decided changes. Early in the week heavy rains were reported in Texas and through the Mississippi Valley; with these rains came com plaints that the condition of the crop was unfavorable, owing to too much moisture, which stimulated buying by shorts to cover contracts, and prices advanced slightly. A squeeze of shorts in July contracts at New Orleans also had a strengthening influence. Subsequently, however, weather conditions in the southwest section of the cotton belt improved, under which prices reacted. The CHRONICLE'S acreage report, issued on Thursday, showing an increase of 9.76 per cent over last year, or slightly larger than generally expected, also had a tendency to weaken values. To-day there was a quiet market but prices advanced slightly on buying by shorts to cover contracts and absence of sellers. The close was steady at a net gain in prices for the day of 4@16 points for this crop and 1@3 points for the new crop de-liveries. Cotton on the spot has been quiet and easier; prices declined 1/8c. on Tuesday, and to-day prices were 1-16c. lower, closing at 8 13-16c. for middling uplands.

The rates on and off middling, as established Nov. 15, 1899, by the Revision Committee, at which grades other than middling may be delivered on contract, are as follows.

Fair	. 310 OR
Middling Fair 34 on Good Middling Tinged	Even
Strict Good Middling 716 on Middling Tinged	12 01
Good Middling	14 off

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all European figures are brought down to Thursday evening. But to make the total the complete figures for to-night (June 8), we add the item of exports from the United States, including in it the exports of Friday only,

WEATHER REPORTS BY TELEGRAPH.—Our telegraphic reports from the South this evening indicate that rains have fallen in almost all sections during the week, and that in some districts, particularly in Arkansas, Mississippi, Louisiana and Tennessee, the precipitation has been heavy. A number of our correspondents report that as a result of too much rain, work has been interfered with and crops are grassy. Scarcity of labor is complained of in portions of Alabama. From Texas we are advised that, while for the past two days fair weather has prevailed over practically the whole State, the ground is yet too wet to work. Tempera-ture has in general been satisfactory.

Galveston, Texas -There was rather too much rain during the early part of the week, but the past two days fair weather has prevailed over pretty much the whole State. The ground, however, is too wet to work in most localities. We have had showers on five days during the week, the precipi-tation being one inch and sixty-five hundredths. The thermometer has averaged 77, the highest being 84 and the lowest 70.

Abilene, Texas.-We have had a trace of rain on one day of the week. The thermometer has averaged 79, ranging from 62 to 96.

Brenham, Texas.-There has been rain on three days during the week, to the extent of one inch and ninety-nine hundredths. The thermometer has ranged from 69 to 91, averaging 80.

Cuero, Texas.—There has been rain on four days of the week, the rainfall being two inches and ninety-five hundredths. The thermometer has averaged 79, highest 94 and lowest 64.

Corpus Christi, Texas.-We have had showers on three days of the week, the rainfall reaching fifty hundredths of an inch. The thermometer has averaged \$1, the highest being 92 and the lowest 70.

Dallas, Texas.—There has been heavy rain on two days during the week, the rainfall reaching one inch and seventy-two hundredths. The thermometer has averaged 80, ranging from 62 to 97.

Henrietta, Texas.-Dry weather has prevailed all the week. The thermometer has ranged from 64 to 95, averaging 8).

Huntsville, Texas.—There has been rain on three days of the week, the rainfall reaching ninety-three hundredths of an inch. Average thermometer 84, highest 99 and lowest 69. *Temple, Texas.*—There has been rain on two days during

the week, the rainfall reaching five hundredths of an inch. The thermometer has averaged 78, the highest being 95 and the lowest 61.

Longview, Texas.-Rain has fallen on five days of the week, to the extent of ninety-nine hundredths of an inch. thermometer has averaged 83, ranging from 68 to 98. The

Paris, Texas.-It has rained on two days of the week, the precipitation reaching seventy-seven hundredths of an inch.

The thermometer has ranged from 65 to 94, averaging 80. San Antonio, Texas.—It has rained on one day of the week, the rainfall reaching six hundredths of an inch. Average thermometer 83, highest 96, lowest 68. New Orleans, Louisiana. —There has been rain every day

rain every day

in 1895 was 16,907 bales. The totals since Sept. 1 in the same years were 10,722,609 bales in 1897-98; 8,254,979 bales in 1896-7; 6,834,942 bales in 1895-96 and 9,631,832 bales in 1894-95.

of the week, to the extent of two inches and four hundredths. The thermometer has averaged 78.

Shreveport, Louisiana.-It has rained on five days of the week. The rainfall has been three inches and forty-five hnndredths. The thermometer has averaged 79, ranging from 70 to 92.

Columbus, Mississippi.-Crop has been considerably damaged by the rain and an overflow of the Tombigbee is threatened. It has rained on six days of the week, the precipita-tion reaching six inches and forty hundredths. The ther-mometer has averaged 77, and has ranged from 69 to 85.

Leland, Mississippi .- It has rained during the week, the

rainfall reaching three inches and fifty-one hundredths. Average thermometer 75.4, highest 83, lowest 67. Vicksburg, Mississippi.—There are complaints of too much rain and grassy crops. There has been rain on six days of the week, to the extent of four inches and forty-two hun-dredths. The thermometer has averaged 75, the highest being 84 and the lowest 67 being 84 and the lowest 67.

Greenville, Mississippi.-Rain has fallen heavily during the week.

Little Rock, Arkansas.—No farm work done the past week. It has rained on six days, the precipitation reaching two inches and eleven hundredths. The thermometer has ranged from 65 to 89, averaging 77.

Helena, Arkansas.-Excessive rain is claimed to have dam-aged crops. It has rained on six days of the week, the rainfall reaching five inches and sixty-six hundredths, and more

is indicated. Average thermometer 76, highest 87, lowest 69. Memphis, Tennessee.—Crops are grassy and in need of cul-tivation. We have had rain on each day of the past week, the precipitation being one inch and seventy four hun-dredths; now clearing. The thermometer has averaged 74.6, the highest being 85 and the lowest 67.8.

Nashville, Tennessee.-The cotton crop is very backward. We have had heavy rain during the week, to the extent of three inches and ninety-four hundredths, causing a suspen-sion of farming operations. The thermometer has averaged 70 ranging from 66 to 84.

Mobile, Alabama.—Complaints of too much rain come from some sections. We have had rain on five days of the week, the rainfall being one inch and seventy-nine hundredths.

The thermometer has ranged from 70 to 84, averaging 77. Montgomery, Alabama.—It has rained on four days of the week, including one severe thunder storm, to the extent of two inches and eighty-three hundredths. Average thermom-

eter 77, highest 92, lowest 65. Selma, Alabama.—Crops are getting grassy and farmers complain of a scarcity of labor. We have had rain on three days during the week, the precipitation reaching seventy-five hundredths of an inch. The thermometer has averaged 79, the highest being 92 and the lowest 69.

Madison, Florida.-It has rained on one day of the week, the precipitation reaching ten hundredths of an inch. The thermometer has averaged 82, ranging from 70 to 95. Savannah, Georgia.—We have had rain on five days of the

week, the precipitation being eighty eight hundredths of an The thermometer has ranged from 68 to 89, averaginch. ing 77.

Augusta, Georgia.—Frequent rains hinder field work. Cotton and grass are growing rapidly. There has been rain on five days of the week, the rainfall reaching one inch and ninety-four hundredths. Average thermometer 76, highest 86 and lowest 65.

Stateburg, South Carolina.—The weather has been more or less cloudy all the week, with light rain on two days, the precipitation reaching fifty-one hundredths of an inch. Crops are progressing well. The thermometer has averaged 75.8, ranging from 64 to 88.

Charleston, South Carolina.-There has been rain on four days the past week. The rainfall reached thirty-six hur-dredths of an inch. The thermometer has averaged 78, the highest being 84 and the lowest 71. *Greenwood, South Carolina.*—There has been rain on three days of the week, the rainfall being one inch and eighty-nine

hundredths. The thermometer has ranged from 65 to 86, averaging 75.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock June 7, 1900, and June 8, 1899.

GOVERNMENT WEEKLY COTTON REPORT.-Mr. James Berry, Chief of the Climate and Crop Division of the U.S. Weather Bureau, made public on Tuesday the following telegraphic reports on the crops in the Southern States for the week ending June 4:

VIRGINIA.-Week generally favorable for work and growth; cotton good stands.

NORTH CAROLINA.—Warm, favorable week with insufficient showers latter part; ootton improved, chopping nearly finished, stands good, early planted forming squares in south portion. SOUTH CAROLINA.—Weather favored cultivation; cotton small and stands full, but lousy, some dying and some grassy, early forming squares; sea island cotton needs rain. Grouped a Showery weather in porthern and middle sections favor

stands full, but lousy, some dying and some grassy, early forming squares; sea island cotton needs rain.
GEORGIA.-Showery weather in northern and middle sections, favorable for growing crops; rain needed in southern counties; cotton growth slow, some complaint of injury by lice.
FLORIDA.-Showers needed, some crops suffering on uplands; cotton nearly free of grass.
ALABAMA.-Ample warmth, rainfall favorable, except excessive in few localities and deficient in east-central counties; late cotton coming up; stands good; early cotton clean, healthy and growing rapidly. MISSISSIPI.-Rains, excessive in places, prevented farm work and washed out some crops; vegetation growing rapidly, especially grass and weeds; cotton improved, good stands, needs warmer nights and sunshine, lice reported in southern section.
LOUISIANA.-Copious rains, excessive in central and southern partishes, no serious damage, improved cotton.
TEXAS. -Weather favorable in extreme northeast and southwest portions; excessive rains elsewhere very unfavorable; cotton planting not completed; some cotton land too wet for cultivation since March; first cotton, where free of pests and clean, improved, but many fields badly in grass.
ARKANSAS.-Heavy rains general, excessive in localities; farm work retarded; warmer weather induced rapid growth of vegetation; cotton improving, stands good, except late planted, well cultivated in localities but needs cultivation in others.
TENNESSEE.-Except in northeastern portions good rains greatly benefited growing crops and restored failing conditions; cotton goowing crops and restored failing conditions; cotton goowing well.
MISSOURL.-Cotton growing well.
MISSOURL-Cotton growing well.
MISSOURL-Cotton growing well.

tion in progress.

These reports on cotton are summarized by the Department as follows:

Over the central and eastern portions of the cotton belt there has been a general improvement in cotton, although slow growth is re-ported from Georgia and South Carolina, where rain is needed. In Texas planting is not yet completed and the crop has suffered much from excessive rains, is much in need of cultivation, and is being damaged by insects. damaged by insects.

NEW YORK COTTON EXCHANGE-NEW COMMISSION RULE ADOPTED.—The members of the New York Cotton Exchange on Wednesday, by a vote of 152 to 66, adopted the amend-ment to the by-laws of the Exchange (see CHRONICLE, May 12 and 26) establishing a minimum rate of commission of \$10 for contract for buying and selling 100 bales of cotton for non-members, and \$5 for the round turn in buying and sell-ing for members. The rate which brokers will charge each other member, where one gives another's name on the con-tract or where another name is substituted for the original, is 50 cents. The above-mentioned rates, aside from being the minimum commission which may be charged by any member of the Exchange, shall be absolutely net and free of all and any rebate, and no bonus or pro rata percentage of commis-sion shall be given or allowed to any clerk or individual for business procured or sought for any member of the Ex-change. The law goes into effect September 1.

JUTE BUTTS, BAGGING, &C.-The demand for jute bagging during the week under review has been better and prices are $7\frac{3}{4}$ c. for $1\frac{3}{4}$ lbs. and 8c. for 2 lbs., standard grades. Carload lots of standard brands are quoted at 8@81/4 c., f. o. b., according to quality. Jute butts continue very dull at 2c. for paper quality and 3c. for bagging quality, but none obtainable.

^{*} A cantar is 98 pounds. † Of which to America in 1899-1900, 69,948 bales; in 1898-99, 46,913 bales: in 1897-98, 49,933 bales.

NEW YORK COTTON EXCHANGE-ANNUAL ELECTION.-The annual election of officers and managers of the New York Cotton Exchange was held on Monday, June 4. The regular ticket was elected without opposition. President, Samuel T. Hubbard; Vice-President, J. Temple Gwathmey; Treasurer, George Brennecke. Board of Managers: George W. Baily, E. A. Fachiri, H. Hagedorn, George F. Jones, R. P. McDougall, James F. Maury, David H. Miller, Herman Norden, M. J. Parrott, Edward E. Moore, H. H. Wheeler, William Ray,

SHIPPING NEWS.—As shown on a previous page, the exports of cotton from the United States the past week have reached 43,944 bales. The shipments in detail, as made up from mail and telegraphic returns, are as follows:

provement in demand. Jobbers as a rule had only light stocks, and in a number of instances they entered the market as fairly free buyers. With the improvement in the demand and following the rise in the grain, prices have showed a hardening tendency and advances have been established. City mills have been in fairly active demand and firmer. Demand for rye flour has been quiet, but with light offer-ings prices have been well maintained. Corn meal has had a fair sale and at firm prices.

Speculation in wheat for future delivery was quiet during the first half of the week, operators generally being indifferent, and only slight changes occurred in prices. On Wednesday, however, there was a decided turn for the better. Although some rain has fallen in the Northwest, numerous reports continued to be received, particularly from the Dakotas, saying that the crop was in a poor condition, owing to the lack of sufficient moisture. Advices from the winterwheat belt also have reported further deterioration in the condition of the crop. The continued unfavorable crop accounts received increased attention in speculative circles and on more active buying for investment account and buying by shorts to cover contracts, prices advanced 7/8@1c. Thursday the market was active and buoyant. Crop accounts continned unfavorable and foreign advices came decidedly stronger, following the rise in the domestic markets. Advices from the interior stated that prominent operators had taken an aggressive stand on the bull side of the market, and this, to-gether with fairly free buying by commission houses for outside investment account and continued buying by shorts to cover contracts, advanced prices 11/2@15% c. Business on the spot market has been quiet, the advance in prices check. ing the export demand. To day there was an active excited and higher market on general buying. Foreign advices were stronger and crop news from the Northwest continued un-favorable, rains being needed. The spot market was firmer but quiet; sales. for export here and at outports were 88,000 bushels.

66¹8 67 7034 6818 7234 Indian corn futures have received only a limited amount of attention, but prices have advanced. largely in sympathy with the advance in wheat. Early in the week advices from the interior reported fairly free country acceptances, which had its influence against the market. Tuesday, however, there was an advance on more aggressive buying, and this created a demand from shorts to cover contracts. Wednesday and Thursday the tendency of prices continued upwards. Foreign advices were stronger, and this, together with light country cfferings, stimulated buying on the part of nervous shorts to cover contracts, on which prices gradually improved. Business in the spot market has been only moderately active. exporters being less free buyers at the advances in prices. To-day the market was fairly active and higher, in sympathy with the advance in wheat and renewed buying for investment account. The spot market was moderately active and firmer. Sales for export here and at outports were 325,000 bushels.

Oats for future delivery at the Western market have been quiet, but there has been a fractional advance in prices in sympathy with the rise in wheat and corn. Receipts have been moderately large, and at the advance there has been some selling by the elevator interests. Locally the spot market has been moderately active, there being some buying by exporters. Prices have advanced slightly, particularly for white oats. To-day the market was more active and higher on shorts covering. The spot market was moderately active and firmer. Sales for export here and at outports were 100.000 bushels.

PRODUCE EXCHANGE ELECTION.-The annual election on the Produce Exchange, held Monday, June 4, resulted as follows: President, Elliot T. Barrows; Vice President, F. H. Andrews; Treasurer, E. C. Rice; Managers: F. I. Maguire, H. M. Bogert, D. D. Allerton, O. Sanderson, J. Valiant, J. S. Thayer; Trustee of the Gratuity Fund, Perry P. Williams.

GOVERNMENT WEEKLY GRAIN REPORT.-Mr. James Berry, Chief of the Climate and Crop Division of the U.S. Weather Bureau, made public on Tuesday the telegraphic reports on the grain crops in the various States for the week ending June 4, as follows :

June 4, as follows: WEATHER.—The drought conditions existing at the close of the pre-vious week over a large part of the Lake region. Ohio Valley and por-tions of the Middle Atlantic and Central Gulf States have been gener-ally relieved by abundant rains, and the severe drought in the Dakotas and Minesota has been partially broken. The northern and western portions of Wisconsin and Eastern Minnesota continue to suffer seriously, and more rain is needed over portions of the Middle and South Atlantic States. Unusually heavy rains fell over a large part of the Central and West Gulf States, and in the Ohio Valley, por-tions of Alabama, Mississippi, Louisiana and Texas receiving from 2 to 14 inches. These excessive rains retarded farm work and caused damage by washing out crops in the districts named. The tempera ture conditions of the week, as a whole, were favorable. CORN.—Generally the reports indicate that corn has made satisfac tory advancement, but the crop continues somewhat late in some sec tions, and cutworms are causing damace in Iudiana, South Dakota Kansas, Toras, South Carolina and Maryland. In the States of th Central valleys, excepting Ohio, the crop is generally well cultivated WINTER WHEAT.—Winter-wheat harvest has begun as far north as Southern Kansas, and wheat is ripening in the southern portions of Missouri and Illinois. The heavy rains in Texas have seriously inter-fered with harvesting and injured wheat in shock. The crop has made satisfactory progress in the States of the Central Mississippi and Lower Missouri valleys, but reports of injury by fly continue from the Middle Atlantic States, the heads are filling well, except in Pennsylvania. In California harvesting continues, with large yields, and the crop has made favorable progress in Washington and Oregon. although rust is reported from portions of Washington and Oregon. Brens WHEAT.—Rains have improved the conditions of spring wheat in the Dakotas and Minnesota, but the general condition of the crop in

OATS. - In South Dakota, Minnesota and Southwestern Missouri oats have suffered from drought, while too rank growth is reported from lowa and Nebraska. The reports respecting oats, however, are more favorable than in the previous week. Harvesting continues in the Southern States and as far north as North Carolina. HAY.-The rains of the past week have somewhat improved the out-look for hay in the Ohio Valley, but the crop in these States, as well as in the Middle Atlantic coast districts, Wisconsin, Minnesota, Northern Iowa, South Dakota and Southern Missouri will be short. In Ne-braska, Kansas and Colorado and on the Pacific Coast a good crop is promised, and having is now progressing under favorable conditions

promised, and having is now progressing under favorable condition in portions of these districts. TOBACCO.—The week has been exceptionally favorable for trans planting tobacco in the Ohio Valley and Middle Atlantic States, th balk of the crop in Kentucky having been set. FRUIT.—The general fruit outlook, except for apples, which and framework and the states of the

dropping extensively, continues promising.

For other tables usually given here see page 1133.

THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., June 8, 1900

The indifference of the general run of buyers toward business in all descriptions of dry goods has been as marked during the past week as at any time of late. The order coming forward have been moderate in number and in a instances for moderate to small quantities. The situation i other respects has not undergone any change of momen Supplies of cotton goods in first hands are smaller that usually carried at this time of the year, and are not so far in creasing to any extent in spite of indifferent new business but the general tendency of prices in staple lines at all event is in favor of buyers. The latter are looking for the marke to settle down to a lower level of values than has recentl

plain-faced overcoatings, without change in prices. Cloak-ings are inactive and irregular. Woolen and worsted dress goods are dull thronghout and prices are in favor of buyers in most directions. Flannels and blankets quiet at previous prices. Carpets in fair demand.

Domestic Cotton Goods .- The exports of cotton goods from this port for the week ending June 4 were 1,145 packages, valued at \$89,127, their destination being to the points specified in the tables below :

NEW YORK TO JUNE 4		1900.	1899.		
	Week.	Since Jan. 1.	Week.	Since Jan. 1.	
Great Britain. Other European. China. India. Arabia. Africa. West Indies.	81 503	949 1,102 110,487 7,857 17,779 2,201 11,366	28 8 1 4 900 113 761	$1,060 \\ 459 \\ 107 356 \\ 1,498 \\ 22 298 \\ 6,340 \\ 13,448$	
Mexico. Central America. South America. Other Countries. Total.	44 266 214 37 1,145	1,596 5,801 20,048 3,573 182,759	68 209 1,783 93 3,968	2,145 4,498 22,945 4,323 186,370	

The value of the New York exports for the year to date has been \$7,563,276 in 1900, against \$6,591,381 in 1899.

Small sales of heavy brown cottons are reported on home account, with the export demand checked by the serious po-litical conditions in China. There has been no material change in prices but the market is irregular. In light weight and fine brown sheetings the demand has been dull at pre-vious prices. Orders for bleached cottons are small in all grades. Leading makes are in limited supply and prices unaltered. In some outside lines there is more or less irregularity, particularly in medium and low grades. For wide sheetings the demand is limited and only small business reported in cotton flannels and blankets at previous prices. Coarse, colored cottons, such as denims, ticks, plaids, etc., are in indifferent request and the tendency of the market is in favor of buyers. Kid-finished cambrics and other cotton linings dull and irregular. New fancy prints for fall are selling slowly, but printers have not all made prices yet. Light fancies irregular, with small sales. Staple prints steady; demand moderate. There has been no change in ginghams of any description. Regular print cloths have been neglected at 3½c. at Fall River and at 3c. in outside markets. Odd goods slow and easy.

FOREIGN DRY GOODS,-Business has again been on a limited scale in all lines of imported merchandise. Dress goods, silks and ribbons are barely steady. Linens steady, with light sales. Burlaps in slow request and in favor of buyers. Importations and Warehouse Withdrawals of Dry Goods

The importations and warehouse withdrawals of dry goods at this port for the week ending June 7, 1900, and since January 1, 1900, and for the corresponding periods of last year are as follows:

			_	_			_	-

ruled, and until a basis is reached which they may regard a stable their operations are hardly likely to expand. The attitude is well illustrated by the fact that the lower pric made by the Fall River Committee last week has not elicite any demand whatever simply because the impression pre vails here that the reduction was not radical enough to mee market conditions for finished fabrics. The jobbing trad continues quiet, but a liberal retail distribution is again re ported this week.

WOOLEN GOODS .- In men's-wear woolens and worsteds th fancy-goods division is in an irregular condition. There ar some good-sized stocks of these in the market unsold, upon which sellers are making comparatively low prices in the hope of attracting buyers, but without much success. These offerings have an unsettling influence, even in connection with staple goods, which are better situated than fancies The re-order demand continues limited in the aggregate on such lines as cheviots, serges and other plain fabrics, and is insignificant for fancies. In cotton-mixed varieties only a small business is reported. A quiet business is passing in

[VOL. LXX,

STATE AND CITY DEPARTMENT.

MUNICIPAL BOND SALES IN MAY.

That the total of the municipal bond sales recorded during the month of May (\$9,623,264) is larger than the average for that month for the last eight years (\$8,974,255) is partly due to the fact that we include in the sales for the month the \$1,200,000 funding bond issue of Tacoma, Wash., the sale of which the city has been negotiating for several months past. This total for May 1900 compares with \$14,157,809 for April 1900 and \$7,897,642 for May 1899. We do not include in our figures for the month \$4,098,000 of temporary loans negotiated.

The number of municipalities placing bonds, as well as the aggregate of the separate issues floated, is in excess of that for any other month this year, the figures being 174 and 213, respectively, against 134 and 193 for April 1900. In May 1899 the number of municipalities was 169 and the number of issues 189.

We made mention last month of the proposed annexation to the city of Cincinnati of numerous villages and hamlets surrounding that city. The Board of Legislation subsequently passed the necessary ordinance providing for the annexation, but has since then repealed the same on account of the fact that the various corporations to be included in the consolidation had authorized the issuing of bonds, the making of corporate contracts and the granting of franchises not contemplated when the proposition was first taken up. The repeal practically kills the annexation project for the time being.

No issues for very large amounts were made during The State of Utah on May 31 sold the month. \$300,000 31 per cent 20-year refunding bonds to E. H. Rollins & Sons, Boston, at par. Cleveland, Ohio, sold two issnes on the same day to Allen, Sand & Co., New York City, as follows: \$300,000 4 per cent 20-year water bonds at 112.172 and \$219,000 4 per cent 10-year sewer bonds at 106.89. The city of Detroit was able to sell on May 28 \$250,000 $3\frac{1}{2}$ per cent 30-year school bonds on a basis of 3.086 per cent, the purchaser being W. J. Hayes & Sons, Cleveland. The State of Maryland received a bid of 102.66 on May 31 for an issue of \$300,000 3 per cent 10-15-year (optional) bonds, but deemed it best to reject the same and place the bonds in the sinking fund as an investment.

In the following table we give the prices which were paid for May loans to the amount of \$7,830,747, issued by 145 municipalities. The aggregate of sales for which no price has been reported is \$1,792,517, and the total bond sales for the month \$9,623,264. In the case of each loan reference is made to the page of the CHRONICLE where a full account of sale is given.

Total additional sales for April..... \$55,600

These additional loans will make the total sales (not including temporary loans) as reported for April 1900 amount to \$14,157,809.

New York State.-Savings Banks May Invest in Bonds of Chicago & Alton Railroad.—Attorney-General Davies re-cently advised Superintendent of Banks F. D. Kilburn that the savings banks of New York State might lawfully invest in the new 2 new termination of the Chicago & in the new 3 per cent refunding bonds of the Chicago & Alton Railroad Co. under the law passed at this year's session of the State Legislature

Anaconda School District No. 10, Deer Lodge County, Mont.—Bond Offering.—The Board of School Trustees—E. J. Nadeau, Clerk—will sell at public auction at 2 P. M. July 2 \$17,000 4% 10-20-year (optional) refunding bonds. Securities are in denomination of \$1,000, dated June 21, 1900. Interest will be payable semi-annually at the office of the County Treasurer.

Andover, Mass.-Bond Sale.-On May 31 the \$15,000 4% 5. year sewer bonds were awarded to Estabrook & Co., Boston, at 107.069. There would appear to be some mistake made in this bid, as at the price given the bonds would net only 2.50% interest. Following is a full list of the bids received :

For description of bonds see CHRONICLE May 26, p. 1061. Ashland, Wis.—Maturity of Bonds Extended.—This city has had the maturity of \$63,000 paving bonds now due ex-tended so that they will mature \$8,000 yearly. Interest on the extended honds will be at the mature of 46 the extended bonds will be at the rate of 4%.

the extended bonds will be at the rate of 4%. Athens, Ga.—Certified as to Genuineness.—The \$30,000 4% 1.30.year (serial) gold sewer bonds advertised for sale on July 2 will be certified as to genuineness by the United States Mortgage & Trust Co., New York City. A full description of these bonds was given last week on page 1111. Big Stone City (S. Dak.) School District.—Bond Offering. —This district will issue in July or August \$6,000 school-house bonds. D. Post, President of the district, is offering these bonds for sale, and it is desired to place them at as low a rate of interest as will enable them to be floated at par. Blackfoot School District No. 8. Bingham County, Idaho

Blackfoot School District No. 8, Bingham County, Idaho. —Bond Offering.—Proposals will be received until 2 P. M., June 16, by Percy Jones, Clerk of the School Trustees, for \$4,000 6% school bonds. Securities are in denomination of \$400, dated July 1, 1900. Interest will be payable annually at Blackfoot. Principal will mature \$400 yearly on Jan. 1 from 1911 to 1920, inclusive. Bond Hill Obio —Bond Sale —On May 18 Seasongood &

Bond Hill, Ohio.-Bond Sale.-On May 18 Seasongood & Mayer, Cincinnati, were awarded the \$25,0005% 20-year sewer bonds at 122.82 and the \$40,0005% 20-year curb and gutter bonds at 132.81. At these prices the bonds will net about $3.41\frac{1}{2}\%$ interest. A full description of the securities will be found in the CHRONICLE April 21, page 805.

Bridgeport, Conn.-Bond Offering.-Proposals will be received until 3 P. M., June 23, by Wm. E. Seeley, for \$120,000 31/2% refunding bonds. Securities are in denomination of \$1,000, dated July 2, 1900. Interest will be payable January 1 and July 1. Principal will mature \$6,000 yearly on July 2 from 1901 to 1920, inclusive.

The official notice of this bond offering will be found among the advertisements elsewhere in this Department.

Bucyrus, Ohio.—Bond Offering.—Proposals will be re-ceived until 12 M., June 26, by W. C. Franz, City Clerk, for \$5,8(0 6% 1-5-year (serial) Galion Street bonds. Securities are in denomination of \$1,160, dated July 1, 1900. Interest will be payable semi-annually at the office of the City Treas-urer. A certified check for \$50 must be deposited with the City Clerk by all bidders. Buffulo County Nab — Bond Sala —The \$45,000, 31(2,5,20)

Buffalo County, Neb.—Bond Sale.—The \$45,000 3½% 5-20-year refunding bonds mentioned in the CHRONICLE April 7 have been sold to the State Treasurer at par. Securities were

* And accrued interest. For full description of bonds see CHRONICLE May 12, p. 958. Cambridge, Ohio, -Bond Sale, On June 4 the \$8,000 4%

The sinking fund amounts to \$1,406,973, leav-ing \$2,946,095 as the net indebtedness. The assessed valua-

Ing \$2,946,095 as the net indebtedness. The assessed valuation is \$24,478,800, and the population is estimated at 57,000.
The value of corporation property is placed at \$2,611,500.
Palmer, Mass.—Bond Offering.—Proposals will be received until 7 P. M., June 16, by James B. Shaw, Town Treasurer, for \$32,000 3½g grammar school bonds. Securities are dated July 1, 1900. Interest will be payable semi-annually at the First National Bank, Boston. Principal will mature \$1,600 yearly on July 1 from 1901 to 1920 inclusive. yearly on July 1 from 1901 to 1920, inclusive.

Pawnee, Okla.—Bond Sale—Bond Election.—This city has sold an issue of \$20,000 6% 30-year water-works bonds at 103. This sale is subject to the result of an election which will be

held on July 10 to authorize the bonds. Peabody (Kan.) School District.—Bond Sale.—This district has sold an issue of \$6,000 bonds which were authorized at a recent election.

Philadelphia, Pa.—Bond Offering.—Proposals will be received until 12 M., June 25, 1900, by Samuel H. Ash-bridge, Mayor, for the purchase of \$5,800,000 bonds, as follows

\$2,800,000 of the \$5,600,000 remaining unsold of the \$11,-200,000 improvement loan authorized by the City Councils and approved June 17, 1898. Securities will be issued in series of \$560,000 each, lettered from "K" to "O," and ma turing one series yearly on December 31 from 1918 to 1923, inclusive. Interest will be at a rate not exceeding $3\frac{1}{2}$ %, pay-able January 1 and July 1.

\$3,000,000 of the \$12,000,000 30-year water loan authorized by ordinance approved March 15, 1900. Interest will be at a rate not exceeding 3%, payable January 1 and July 1 at the city's fiscal agency.

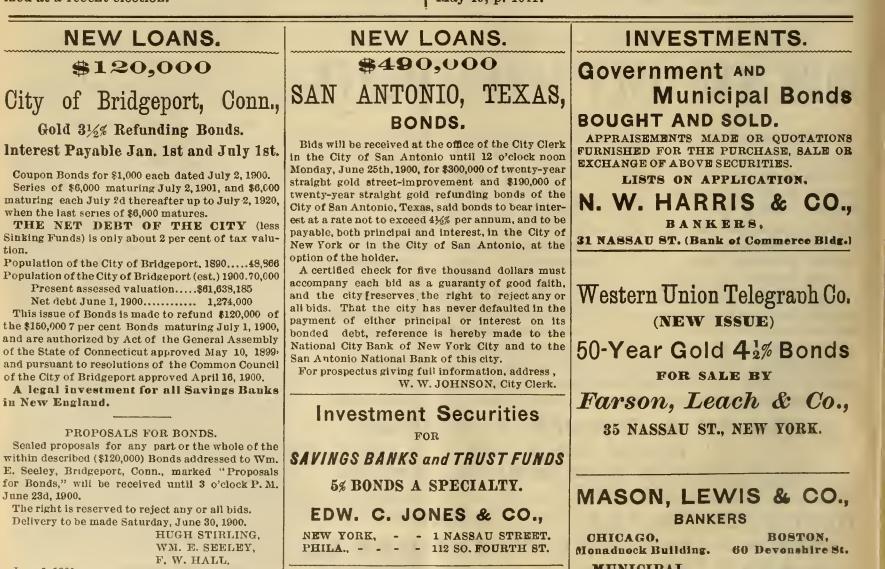

Securities will be issued in denomination of \$100 or multiples thereof and are free from all taxes. A certified check for 5% of the amount of the bonds bid for, payable to the Mayor, must accompany proposals, which must be made on blanks obtained from the Mayor.

Pittsfield, Mass.—Temporary Loan.—The City Treasurer on May 28 borrowed \$25.000 from the New England Trust Co., Boston, at 2.95%, in anticipation of the collection of taxes. A loan of \$9,000 has also been made in anticipation of the issuance of school bonds.

Plainview (Neb.) School District.—Bonds Defeated.—This

district on May 28 voted on the question of issuing bonds for school purposes. The proposition failed to carry. **Portland**, Me.—Loan Offering.—Sealed, telegraph or tele-phone proposals will be received until 2:30 p.m., June 12, by Geo. H. Libby, City Treasurer, for \$50,000, for \$75,000, for \$100,000, for \$150,000 or for \$200,000 notes. Securities will be issued in denomination of \$1,000 or multiple thereof and will mature Nov. 1, 1900 will mature Nov. 1, 1900.

Portsmouth, Ohio.—Bond Sale.—On May 31 the \$20,000 4% street improvement bonds were awarded to Rudolph Kley-bolte & Co., Cincinnati, at 103.39. At this price the bonds will net the investor 3.32% if the option to call yearly is exercised and about 3.60% if the whole issue is allowed to run to maturity. They mature June 1, 1910, subject to call \$2,000 yearly. For further description of securities see CHRONICLE May 19, p. 1011.
