REVIEW OF JUNE.

There was an unusual number of untoward or disturbing influences during June, and as a consequence values on the Stock Exchange continued their downward course. The decline was in progress until towards the close of the month and was participated in by the entire list, though the losses were heaviest in the case of special stocks. The last few days a somewhat better tone developed, and a portion of the previous losses was recovered.

The depressing influences, as already stated, were various. In the first place considerable uncertainty was manifested as to the immediate future of trade, both because of the impending Presidential campaign and because of the unsettled condition of industrial affairs arising out of the disclosure that the high level of commodity values previously ruling had led to over-production and accumulating stocks of goods in many different lines of trade. In the Presidential canvass the event of the month was the nomination of the Republican ticket. The ticket gave general satisfaction, President McKinley being renominated for the Presidency by an absolutely unanimous vote, and Governor Roosevelt getting the nomination for the Vice-Presidency, he receiving every vote but his own. The action of the Convention with reference to the standard of values was also all that could be desired, the platform containing a clear and unequivocal declaration in favor of the gold standard. The election of this ticket is regarded as beyond doubt, but the fact that the opposition party seems to be irrevocably committed to Bryan and Bryanism, and that for some months to come the pernicious doctrines associated with that name are to find serious advocacy in public, naturally has for the time being a dampening effect on business.

With reference to the influence of over-production and accumulating stocks of goods, many developments served to emphasize this feature of affairs. The only remedy of course for such a state of things was to be found in a readjustment of supply and demand through a lower level of values. Important declines in commodity prices had occurred during April and May. In June the downward movement made still further progress, the declines being in some instances violent. The general situation may be illustrated by reference to the course of two leading industries, namely the cotton goods trade and the iron

and steel trade. Steel billets were quoted as low as \$25 00 a ton. This compares with \$32 00 only a few weeks ago and with \$41 50 last October. In the cotton goods trade there was another drop in the price of print cloths—in the face, too, of a rise in the price of the raw material—the Fall River Association having further reduced quotations $\frac{1}{2}$ cent per yard, so that the quotation now is only $2\frac{1}{2}$ cents, against $3\frac{1}{2}$ cents at the beginning of May. In the case of both these great industries the reports have been that little business was being done notwithstanding the reduction in prices, consumers showing no very great inclination to buy even now. Obviously, however, buyers cannot hold off indefinitely, and the downward movement in prices, while temporarily disturbing, is certain in the end to bring lasting benefits.

Unfavorable crop news has also been a feature of the situation tending to increase the feeling of caution prevailing. The advices have been unfavorable with reference to both cotton and wheat, excessive rains affecting prospects in the one case and drought in the other. The coincident rise in the prices of these staples was suggestive of the existence of a pretty substantial foundation for the reports of damage in both instances. In cotton, speculative sentiment concerning values was completely reversed, and instead of the bearish tone which had been maintained since the failure of Price, McCormick & Co., in May, an active speculation for higher prices developed. The various options for future delivery rose sharply and the spot price for cotton was advanced fully a cent per pound, the middling upland grade here in New York being quoted at 10 cents a pound at the close of the month, against only 9 cents at the beginning of the month. In wheat there was a rise here in the September option from 73 cents on the 4th to $93\frac{1}{2}$ cents on the 23d, with a reaction to $86\frac{1}{2}$ cents at the close. The action of the Northern Pacific Railroad directors in deciding to withhold from the common stockholders the extra dividend of one per cent paid the previous February served to give prominence to some of the possible effects of crop shortage.

In the case of cotton it is manifestly too early to venture any estimate as to the outcome, since the maturity of the crop is still a great way off, and future weather conditions may modify the prospect very materially either for better or for worse. In the case of spring wheat there can be no doubt that much damage has been done which cannot be repaired. The damage, however, is more or less limited in area and extent. It seems to be confined mainly to the Red River Valley country and to North Dakota and the northern part of Minnesota. These are important spring-wheat areas, and as they have suffered severely there can be no doubt that the effect upon the total crop will be material. The shortage in these districts, too, we may suppose, will be felt in the traffic and revenues of the roads running through that part of the country, since wheat in the sections referred to constitutes the main crop, the region lying too far north for the raising of much corn. Outside of this area the shortage is not likely to prove serious. Whatever the amount of the shortage in spring-wheat, it will be offset in part by the enlarged production of winter-wheat.

The startling situation which has developed in China also had a repressing effect on speculation at the Stock Exchange. Among some of the incidents

of the Chinese situation were the sending by the Christian nations of a relief force to Peking under command of Admiral Seymour to protect the legations at that point, the failure of this force to attain its object, the subsequent rescue of the relief force (which had been much harassed and had suffered severely) by another force sent by the allied Powers, the cutting off of the Peking legations from all communications with the outside world and the assassination of some of the foreign envoys, the bombardment and capture by the allied Powers of the forts at Taku (after the Chinese had attacked the fleet), the taking by them of Tien Tsin and the ordering by President McKinley of a body of American troops from the Philippines to China, Gen. Chaffee being appointed to take command of the same.

The foreign exchange market developed an easier tone. The export movement of gold was resumed, both France and Germany offering inducements to attract the metal. In the week ending the 16th \$3,512,341 gold went to Europe from this port and in the week ending the 23d \$4,114,072 more was shipped. The offering of bills against these shipments and the comparatively limited inquiry for remittance had the effect of weakening sterling, under which rates declined and the export movement of gold ceased.

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.

GENERAL QUOTATIONS

—OF— BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.
 2. Quotations from all Stock Exchanges are as near as possible for the last day of June. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.
 3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest in addition to the price given. The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.
 4. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.
 5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.
 6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.
- Notice Change.**—We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend.

STATE AND MUNICIPAL BONDS.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. In all other cases accrued interest must be added to the price.

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation

† Prices are per share, not per cent. ‡ Sale price. x Ex-dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

Where names of the banks are printed in italics, fuller returns may be found in the advertising columns in the front part of the paper.
