The full details of clearings for the week covered by the above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the various clearing houses at noon on Saturday, and hence in the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night. We present below our usual detailed figures for the previous week, covering the returns for the period ending with Saturday noon, S-ptember 8, and the results for the corresponding week in 1899, 1898 and 1897 are also given. In comparison with the preceding week there is a an increase in the aggregate exchanges of six and a quarter million dollars, the loss at New York being twenty millions. Contrasted with the week of 1899 the total for the whole country shows a decline of 15.6 per cent. Compared with the week of 1898 the current returns record an increase of 7.6 per cent, and the excess over 1897 is 3.8 per cent. Outside of New York the increase over 1899 is 1.7 per cent. The excess over 1898 reaches 26.7 per cent, and making comparison with 1897 the gain is seen to be 21.6 p. c.

THE FINANCIAL SITUATION.

Accounts of the terrible disaster which visited the Gulf coast towns Saturday and Saturday night, and especially the important city of Galveston and its environs, have filled the columns of the daily press during the week. The storm began with wind and rain early Saturday morning, both rain and wind increasing through the day until towards night the rain fell in torrents and the wind had become a hurricane, blowing at the rate of about 90 miles an hour and bringing the sea water in great waves over the city and country. The storm was at its height in Galveston from about 9 to 10 P. M., when the water in the lowest sections was probably over ten feet high, and in the houses and streets of the main portions of the town it was from four to six feet high. Not long after midnight the water began to recede and at sunrise but little was left. Very many buildings were undermined and destroyed. To use the words on that point in the report to Washington of General McKibbin, commanding officer of the Department of the Gulf, "with few exceptions every building in the city of Galveston is injured. Hundreds are entirely destroyed." Of those destroyed the occupants as a rule were either killed in them or drowned in the flood; for one hardly had a chance of escape if one went out of his house or was deprived of its protection. Not only did he have the flood to contend with, but he had the storm and wind and abso lute darkness also, the electric-light and gas plants having become inoperative. With regard to the deaths in Galveston, the reports differ; probably the number is not far from two to three thousand. The material loss can hardly be estimated; it consists not only in buildings, &c., actually destroyed, but the effect of the disaster on business, credits, mortgage debts, &c. Many think that the city is forever ruined as a shipping port. We do not believe it. There are too numerous and large interests centering there to permit such a result. Of course capital cannot venture to go into fixed forms in Galveston again at all freely if it is liable to be washed out of existence every few years. But the latter is, we assume, a part of the problem the General Government will remedy. If there is a way to protect the city we believe that Congress will be ready to use the means for its discovery and construction; for if there ever was a just and unquestionable claim for harbor improvement, Galveston will be in position to present it.

Under the influence of this disaster there has been a new and important rise in cotton. There are several reasons for an advance. One class of reasons relates to the effect of the storm upon the early supply, and another to its effect on the year's total crop. The argument advanced is, that even where the plant recovers from the wind and rain the open cotton must have been in considerable part lost. Moreover, the arrangements for picking, baling and getting the staple to market have been deranged, and that will in some measure be a hindrance to an early movement. Besides these is the important fact that the crop is a very late one, so that this loss to the earliest portion of the crop is the more serious. But there is another class of reasons offered in part explanation of the higher price; these latter reasons are based upon the claims of a permanent material injury done to the crop

and a consequent decrease in the year's total yield. At present it is of course impossible to measure this loss accurately. One cannot fail to acknowledge that all such disasters to the cotton plant are at first overestimated; and when they occur at the present stage in the development of the plant their ultimate harm depends in a larger measure than injury at any other season upon the weather in the immediate future.

The cotton crop the current season has been thus far noted for its set-backs. Plans were laid at the start for a large acreage, but bad weather all through the planting season interfered with that purpose. In no State was this apparently truer than in Texas. It was amid severe and repeated floods in many sections of that State that the seed was finally got into the ground; and now the picking season has been signalized by a phenomenal disaster. These facts added to the present extremely low condition of the visible supply, the backwardness of our crop, the erroneous estimate of yield widely adopted last season and the consequent harm done thereby to a large body of spinners, especially in Europe, have made buyers terribly nervous with reference to the final outcome. This week, too, besides the Galveston disaster there has been another uncertainty thrown into the problem. The monthly condition reports of the Agricultural Department have, it seems, since July 1 1900 fallen from an average of 75.8 for all the cotton States to 68.2 September 1 1900; furthermore this September average compares with 68.5 September 1 1899, which was followed by a commercial crop of 9,-439,559 bales. The monthly condition figures for the last three years will be found to-day in our Weekly Cotton Report, and we need not repeat them here. What we have said sufficiently presents the new uncertainty and its effect on sentiment when we add to it the fact (1) that this 1st of September report (though issued on the ordinary day of the Department's monthly publications) happened to fall on Monday afternoon of this week, and (2) that its average for August did not accord with our weekly reports or with general opinion at this centre. Indeed, the prevailing idea has been that the average condition of the crop improved in August, and that the prospect of the total yield has on the whole risen since July 1. We do not wish to criticise the Department's report or to express an opinion as to the size of the crop. It is only for the purpose of explaining the extreme nervousness of buyers, that is of consumers of cotton, and of the week's market, that we refer to the facts.

We have had another election this week. Probably no one needs to be told that it was in Maine. All we wish to remark about the result is that its teaching is in character precisely like that of Vermont and only differed in one particular, which was in being a little more emphatic. The two States tell the same story, (1) that there are substantially no anti-imperialist Republicans in the East that are to be found voting against their party this year, and (2) that the voters classed as Gold Democrats in 1896 have only in small part returned to the Bryan organization. There is one further lesson both the political contests which have been fought in these States teach-one that we did not refer to a week ago in our remarks about Vermont, and yet it is one to be kept in mind and heeded. It is that these States were not apathetic when election day came. The report was early in

the canvass that the people took but little interest in the result, and that the vote would be light. In the end it turned out that the people felt deeply the gravity of the issue, that they were full of enthusiasm in each State, and the vote was large. It is only this same sense of danger and this same earnestness in the rest of the country that will save the election. If they are present in a like degree the result in Vermont and Maine tells us there is not a doubt that the victory will be a decided and a lasting one.

The negotiations which were under way for some days for the placing of a German loan in the United States have been concluded. They cover a purchase by Kuhn, Loeb & Co. and the National City Bank of 80,000,000 marks 4 per cent treasury notes of the German Empire, maturing in equal proportions in 1904 and 1905. There is no syndicate, the purchasing bankers taking over the loan upon their own initiative from the German Reichsbank (the Imperial German Bank) through the Disconto Gessellschaft of Berlin and Messrs. M. M. Warburg & Co. of Hamburg. A public offering of the loan will shortly be made both in the United States and in Germany; preference in allotments is to be given to American subscriptions. Payments for the loan will be distributed over a considerable period, and will be made entirely in bills of exchange, no gold shipments being contemplated; the money market is therefore not likely to become affected through payments for the loan. It is stated on good authority that large subscriptions for the loan have already been received by the American bankers from individuals and institutions in this country and in Europe, the New York Life Insurance Company, for instance, taking \$5,-000,000.

It is evident from the monthly report issued this week by the Agricultural Bureau at Washington that the country the present season is to have fair rather than very large crops. The Department confirms the statements of a decline in the condition of corn during August as the result of the hot weather, and makes the general average for the country only 80.6 on September 1, against 87.5 on August 1 and 85.2 on the 1st of September last year. The average is reported 1.1 points below the mean of the September averages for the last ten years. Nevertheless as the acreage is larger the present year than it was in 1899, these indications are accepted by the grain trade as promising a production of 2,000 million bushels. Last year the harvest was estimated at 2,078 million bushels. The condition of winter and spring wheat com bined is put a little lower than a year ago, namely 69.6, against 70.9. Estimates of the yield of this crop range from 510 to 525 million bushels; the production of wheat last season was reported 547 million bushels and that of 1898 675 million bushels. The condition of oats is placed at 82.9, against 87.2 in September of last year. The acreage being larger, however, the general expectation is that the crop will fall only 25 to 30 million bushels below that of last year, which reached 796 million bushels. In respect to corn, it is well to bear in mind that parts of the corn-belt have been favored beyond others and will have an unusually large yield. This is particularly true of the Central Western States, namely Ohio, Indiana and Illinois, and of Iowa. In the lastmentioned State the condition of the crop is reported

104 against 83 on September 1 last year, in Ohio 95 against 87, in Illinois 84 against 89, and in Indiana Missouri, too, has a pretty 99 against 95. good promise, with an average of 84 against 85. In Nebraska, on the other hand, the condition is put at only 73 against 85, while in Kansas the further decline has reduced the average to only 55, which compares with 97 at the same date in 1899. Kansas, it will thus be seen, has been undoubtedly the worst sufferer from the period of severe hot weather. As has been previously pointed out in these columns, however, that State has had a phenomenally large yield of winter wheat, and hence is in position to view a reduction of its corn yield with considerable equanimity.

The annual report of the New York Ontario & Western, issued this week, shows that this property's record of growth and prosperity is still being maintained. The way traffic and revenues are being enlarged year by year in the case of this road, which a dozen years ago appeared to have absolutely no future, constitutes one of the noteworthy incidents of railroad affairs during the last decade. Of course the building of the Scranton Extension effected a complete transformation in the character of the road's business, and yet growth has not been confined to the coal tonnage, but has extended to all branches of the service, as may be seen by consulting the various tables in the report. Great care has evidently been taken to develop traffic of all kinds and in every direction. Comparing results for the fiscal year 1900 with those for the fiscal year 1890, ten years before, we get a rough idea of what has been accomplished in the interval. Gross earnings are now \$4,963,483; for the earlier period they were \$2,200,446. Net earnings stand at \$1,548,565 against but \$432,404, while the surplus above charges is \$359,024, whereas in 1890 it was no more than \$146,442. The fixed charges for the late year were but \$689,541 as against the net revenue of over $1\frac{1}{2}$ million dollars. It is important to note, too, that in accordance with the policy inaugurated July 1 1899 net earnings as now stated allow for the inclusion in expenses of "every expenditure save only the cost of such extensions as may hereafter be made of the main line or branches, or such actual additions to the motive power and equipment as increase the earning capacity of the company or produce new revenue therefor." As a result of this policy the capital charges for the year under review amounted to only \$135,744. The balance standing to the credit of profit and loss account on June 30 1900 was \$4,152,513, and this represents surplus earnings (above expenses and charges) applied in

improvements and additions and in making investments designed to strengthen and increase the earning power of the property. The road is likewise being operated with increasing economy and efficiency, as is evident from the fact that the train-load is being steadily enlarged, and for the late year averaged 287 tons, against 276 tons in 1898-9 and but 132 tons in 1889-90.

The appalling disaster at Galveston, referred to above, had more or less influence upon money and a deranging effect upon the foreign exchange market this week. The movement of currency to the South and the Southwest, which had actively begun last week, was accelerated this week by the disaster, and

520

not only were transfers through the Treasury large, but direct shipments by express and by registered mail were heavy. The effect upon foreign exchange was quite marked, and after a weak tone, caused by liberal offerings of cotton bills, there came a partial recovery due to a demand for sterling to cover sales of cotton in Liverpool for September delivery. This temporarily brought about a reaction which was later fol lowed by a decline.

There has been no change this week in the official rates of discount by any of the European banks, but there was a reduction on Wednesday by the Bank of Bombay at Bombay of its rate of discount from 4 per cent to 3 per cent. The statement of the New York Associated Banks last week showed a loss of \$323,600 cash, caused by the decrease of \$2,711,100 in legal tenders and by an increase of \$2,387,500 in specie. The loans were expanded \$1,959,000, to the highest on record, and the deposits were increased \$2,794,500. The surplus reserve fell off \$1,022,225, to \$26,056,250. Total redemptions of extended 2 per cents up to the close of business on Thursday, as reported from Washington, were \$18,606,250. Applications for the exchange of fundable bonds for the new 2 per cents have thus far amounted to \$332,117,850.

Money on call was a shade more active this week, owing to the heavy movement of currency to the South and the Southwest, and loans representing bankers' balances were at 2 per cent and at 1 per cent, with the bulk of the business and the average $1\frac{1}{2}$ per cent. On Mon day loans were made at 2 per cent and at $1\frac{1}{2}$ per cent, with the majority at 12 per cent. On Tuesday trans actions were at 2 per cent and at $1\frac{1}{4}$ per cent, with the bulk of the business at 13 per cent. On Wednesday loans were at $1\frac{3}{4}$ per cent and at $1\frac{1}{2}$ per cent, with the majority at $1\frac{1}{2}$ per cent. On Thursday transactions were at $1\frac{1}{2}$ per cent and at 1 per cent, with the bulk of the business at 1¹/₂ per cent. On Friday loans were at $1\frac{1}{2}$ per cent and $1\frac{1}{4}$ per cent, with the majority at $1\frac{1}{2}$ per cent. Banks and trust companies have loaned at $1\frac{1}{2}$ per cent as the minimum; each day more or less money has been loaned by them at 2 per cent. Time contracts are freely (ffered, but little business is re ported, and rates are 3 per cent for sixty days, $3\frac{1}{2}$ per cent for ninety days and 4 per cent for four to six months on good mixed Stock Eschange collateral. Commercial paper is inactive, and the city banks are again out of the market as buyers and many of them find it more profitable to discount paper for their customers and their correspondents at 5 per cent. The business reported by dealers is chiefly with buyers in the interior. The supply is good and a little more than sufficient to meet requirements; consequently there is some accumulation. Not much increase in the volume of paper is looked for before next month and in November, when it is expected that there will be liberal offerings, which will be made to take advantage of the trade discounts. Rates are 4 per cent for sixty to ninetyday endorsed bills receivable, 43@51 per cent for prime and 5@6 per cent for good four to six months, single names.

whence he is expected to proceed to Europe. Gen. Botha is also represented to be negotiating for terms of surrender. Matters in China are in suspense awaiting negotiations with Li Hung Chang and Prince Ching, who have been commissioned by the Chinese Government to treat with the Powers for the settlement of all pending questions. The Bank of England minimum rate of discount remains unchanged at 4 per cent. The cable reports discounts of sixty to ninety day bank bills in London 38@34 per cent. The open market rate at Paris is 25 per ce-t and at Berlin and Frankfort it is 48 per cent. According to our special cable from London the Bank of England gained £349,961 bullion during the week and held £36 416,712 at the close of the week. Our correspondent further advises us that the gain was due to the import of £265,000 (of which £200,000 were from Australia, £35,000 from Germany, £20,000 from China and £10,000 from India), and to £85,000 net receipts from the interior of Great Britain.

The foreign exchange market has been quite active this week, though generally lower. There was a liberal supply of cotton and grain bills on Monday, which caused a sharp decline in long sterling, and there was some speculative selling, based upon the rise in the price of cotton caused by the Galveston disaster. Then came the cancellation of contracts for September deliveries of cotton in this market a d a demand for cables to close such contracts in Liverpool. At the same time there was an inquiry for cables to remit. to London in connection with the maturing instalment of 25 per cent, payable September 14, of the Exchequer loan negotiation, and the market had a firmer tone until Wednesday, when it yielded to the renewed pressure of bills, some of which were reported to have been drawn against the shipment to London of certificates for British Exchequer bonds. The tone was easy thereafter. Receipts of gold at the Custom House for the week, \$17,687. The Assay Office paid \$916,757 49 for domestic bullion. The Bank of British North America has received \$500,000 and the Canadian Bank of Commerce a like amount of drafts, representing Klondike gold deposited at San Francisco, and the last-named bank has advices of the deposit for its account at Seattle of \$500,000 gold bullion, which will be transferred through drafts to this city. One incident of the week was the application on Monday at the Assay Office for \$5,000,000 in gold bars, haif of which were intended to be shipped. on Tuesday and the remainder on Wednesday to London to meet the September instalment on the British Exchequer bonds which had been bought by the Morgan syndicate in August. On Monday afternoon the

The indications now almost unmistakably point to the speedy ending of the war in South Africa. Presi dent Paul Krüger, of the Transvaal Republic, has, with his Cabinet, found refuge at Lorenzo Marquez,

order for the gold was canceled, the bankers deciding to remit through cable exchange.

Nominal rates for exchange have been 4 84 to 4 $84\frac{1}{2}$ for sixty day and 4 $87\frac{1}{2}$ to 4 88 for sight during the week. Rates for actual business opened on Monday at a decline of half a cent for long, compared with those at the close of business on Friday of last week, to 4 $83\frac{1}{4}@4$ $83\frac{1}{2}$, while rates for short were reduced one quarter of a cent, to 4 $86\frac{3}{4}@4$ 87. and those for cables remained unchanged at 4 $87\frac{1}{2}@4$ $87\frac{3}{4}$. The tone was weak but it grew steadier on the following day in consequence of the above-noted demand for cables, becoming easier on Wednesday, though without quotable change. On Thursday rates for actual business for short and for cables declined one-quarter of a cent, to $4\ 86\frac{1}{2}@4\ 86\frac{3}{4}$ for the former and to $4\ 87\frac{1}{4}@4\ 87\frac{1}{2}$ for the latter, while those for long remained unchanged. The tone was weak, but it closed steadier on Friday. The following shows daily posted rates for exchange by some of the leading drawers.

MR. M°KINLEY'S LETTER OF ACCEPTANCE.

It has become usual of recent years for Presidential candidates to defer their letters of acceptance until the active work of the campaign was about to begin, some eight or nine weeks after nomination. Mr. Mc-Kinley has followed this practice in his formal ac-

specific form the party's attitude in regard to them. Not seldom a political issue presented as "paramount" in July will be almost wholly ignored by the campaign writers and speakers in October. This was certainly true of the protective tariff plank in the political platforms of 1896-a plank whose discussion would have emptied audience halls in the autumn, when the attention of everyone was confinancial issue. The same the centrated on fate has this year befallen the "trust plank." Very little interest has been excited in this topic of partisan discussion. The people, with rather unexpected common-sense, have apparently grasped the fact that the trust problem is not, as in 1888, a question of attempted monopoly and extortion, but is an economic and industrial question so interwoven with our commercial prestige that inquiry into the proper regulation of such combinations must supersede discussion as to the quickest way to annihilate them. The remarks both of Mr. Bryan and Mr. McKinley on this question have been perfunctory. The only real effort to revive the controversy has been in the somewhat comic attempt of one group of politicians to argue that a young man has now-a-days no chance of making a living except through affiliations with a given party.

Mr. Bryan, we dare say, would have been glad to have the financial question meet a similar fate. His letter accepting the Democratic nomination issued on August 9 ignored the question altogether. Unfortunately, he was fettered with a political ball and chain in the shape of the populist nomination, and to this erratic body of voters he was forced, hardly a week later, to address a second letter of acc+ptance given up almost wholly to the question of the silver standard and fiat money. This rather ostrich-like performance naturally had the effect of preventing any possible obscuring of the financial issue. Mr. McKinley has been more straightforward-or, perhaps, in charity to his opponent, we ought to say more fortunate-in being able to speak his mind freely on all the issues of the canvass; with particular view, of course, to those on which public interest is plainly concentrated.

Mr. McKinley's assertion that if the "Imperial" issue is paramount, the currency issue is immediate, is a shrewd and, in our opinion, correct statement of the case. Granting the worst interpretation that the opposition can place upon the expansion theories, real or fancied, of the Administration, the facts remain that the purposes alleged cannot be accomplished without the support of Congress, that Congress is certain not to be one-sided on the question—last winter's proceedings proved this unmistakably—and that each subsequent move must be made in the face of a vigorous, alert and well-informed opposition, sustained by a powerful public sentiment. On the other hand, the financial question must be decided largely by the arbitrary acts of an Executive who is pledged for or against the policy in which the nation is now engaged. We have read with some interest the controversy between Secretary Gage and Mr. Carl Schurz on this question-a controversy which bears directly on the President's attitude. Mr. Schurz holds the opinion that the new gold standard law of last March, though defective in many respects, would at least prevent Mr. Bryan, in case of his election, from plunging the country into a depreciated currency, and that in any case the present Republican Congress might easily, in

ceptance of the Republican candidacy published last Monday. A powerful public sentiment. On the other hand financial question must be decided largely by t

There are some distinct advantages in this plan, not the least of which is the opportunity it gives for the candidate to devote his attention to the issues of the canvass which have been shown in the intervening period to be closest to the interests of the voters. Everyone knows that a June or July convention platform can by no means be relied upon for defining the principles on which the electoral struggle will really converge. It is rather an effort to gather up and present all the issues which may later on attract the attention of voters and to declare in more or less its closing session this winter, so clinch, by supplementary legislation, the provisions for maintaining the gold standard as to render its removal impossible. Mr. Gage contends that a President opposed to the gold standard might, by merely declaring his intention of paying the public debt in silver, stop gold payments to the Government and create the possibility of a silver basis; and as regards the outlook for action by the next session of Congress, he points out the improbability that such legislation could be secured with the hostile verdict of the country passed upon it.

But both Mr. Schurz and Secretary Gage omitted to emphazize a further and highly important consideration, that if Mr. Bryan were to be elected he would hold office until 1905, and conditions three or four years from now may conceivably have altered from 1899 or 1900 as the conditions of 1883 and 1884 did from those of 1880. This is a possibility that must always be kept in mind, and it is plain enough that the automatic sufeguards surrounding the Treasury under present circumstances would hardly exist under trade reaction and stagnation.

Such conditions, involving decline in public revenue, return of money from trade circulation and outflow of gold from city reserves would need to be met under the best of financial legislation by a firm, discreet and sound-minded Executive. We hardly need to remind the reader that Mr. Bryan in no respect answers the test, and the proposition to place him in control of our national finances for the next four years on the ground that conditions will stay his hand from doing mischief now seems to us most extraordinary. This possibility, it will be observed, is quite independent of any chance that Congress itself might undertake, in the event of Mr. Bryan's election, to threaten and tamper with the existing It is these facts which make pertinent law. Mr. McKinley's query in his letter of acceptance, whether the American people will, "through indifference or fancied security, hazard the overthrow of the wise financial legislation of the past year and revive the danger of the silver standard with all of the inevitable eyils of shattered confidence and general disaster which justly alarmed and aroused them in 1896."

Mr. McKinley's remarks on the Philippine question, though not placed first, occupy much the larger part of his letter, and are dealt with somewhat extensively, as was natural in a case where he had not to argue for a general policy but to defend specific Executive acts. For the most part this portion of the letter is a review of the earlier proceedings in the case. It adds little to what the public already knows, but it makes clear, what we have frequently stated as our own belief regarding the Philippine matter, that circumstances forced the war on our Government, and that there has been no escape from the subsequent chain of unfortunate events, except through abandonment of the Philippines to anarchy. The concluding language of the Schurman Commission's report, that "the Commission is of the opinion that there has been no time since the destruct tion of the Spanish squadron by Admiral Dawey when it was possible to withdraw our forces from the islands either with honor to ourselves or with safety to the inhabitants," and that "should our power by any fatality be withdrawn, the Commission believes that the government of the Philippines would speedily lapse into anarchy, which would excuse, if it did not

necessitate, the intervention of other Powers and the eventual division of the islands among them," are the real matter of expert judgment on which the student of the question has to rely. There will continue to be some difference of opinion as to whether the policy pursued towards the Filipinos pending the ratification of the Spanish treaty was or was not the wisest. But the practical question, what an administration can do under the circumstances which have since arisen, is now the chief matter for decision. The citations from unbiased authority in Mr. Mc-Kinley's letter of acceptance, even though not new to the reader, are worthy of fresh examination as an antidote to Mr. Bryan's off-hand pledge to summon Congress at once on his inauguration, and insist on our Government's instant withdrawal from the Philippines.

THE ILLINOIS CENTRAL AND ITS PROGRESS.

There are several noteworthy features in the annual report of the Illinois Central Railroad Company, which has come to hand this week. Perhaps the fact to which chief prominence will be given is the further increase in the extent of road embraced in the system. The new road acquired during the twelve months ending June 30 comprises in the aggregate 317 miles, and embraces some decidedly important extensions. For instance, through the building of the Fort Dodge & Omaha Railroad, the company gets an entrance into Council Bluffs and Omaha, and through the acquisition of what is called the Litchfield Division (acquired from the St. Louis Peoria & Northern Railroad Company) the company gets an independent line of its own into St. Louis by way of Springfield. The company formerly used 94 miles of the track of the "Big Four" in order to reach St. Louis.

The extensions and acquisitions of the late year are simply a continuation of the policy which has dominated the management of the property for a good many years past. It is gratifying to note that great success has attended the carrying out of this policy of expansion up to the present time. The evidence of such success is found in many different directions. The excellent credit of the Illinois Central Company, due to its continued prosperity and progressive management, has been a decided help in making the new ventures successful, for the company has been able to borrow the necessary money to finance such undertakings at very low rates of interest—say 3 and 3½ per cent. It appears, too, that these ventures have been independently profitable aside from what they have contributed to the general prosperity and development of the system.

It is not often that one finds in a railroad report

statistics that enable one to ascertain whether the results from a given piece of new road are proving profitable or the reverse. But in the case of the Illinois Central great pains are taken to set out the exact facts. The largest two ventures of recent years are what are termed the St. Louis Division, comprising the old S:. Louis Alton & Terre Haute lines, and the Louisville Division, comprising the Chesapeake Ohio & Southwestern and allied lines. Tables are given to show that the St. Louis Division in the late twelve months earned net, in excess of expenses and taxes, \$672,114, while the fixed charges were only \$507,525, thus leaving a surplus of \$164,589, or 32.43 per cent in excess of charges. Similarly the Louisville Division earned net for the twelve months \$1,-135,738, while the requirements for charges were only \$820,619, leaving a surplus of no less than \$315,119, or 38.40 per cent in excess of the year's charges. We might also refer to the still more profitable results at. tending the operation of the Yazoo & Mississippi Valley road, which was an earlier venture of the company. That road in the late year earned \$959,299 in excess of its obligatory interest requirements.

Some further new road is under construction, and parts of the Peoria Decatur & Evansville have recently been acquired. Taking, however, the mileage as reported June 30, we find that the company then operated 3,996 miles of road. This is independent of the Yazoo & Mississippi Valley Railroad, which is operated as a separate and distinct property and comprises 1,001 miles. The Illinois Central system, therefore, may be said to embrace, roughly, 5,000 miles of road. The accounts in the report are based only on the 3,996 miles directly operated. The average number of miles for the twelve months ending June 30 was 3,845. If we compare the figures of earnings for the late year with those of some of the earlier years, when the mileage was much smaller, we see that the Illinois Central shows splendid progress in its earning capacity. In the twelve months ending December 31 1886 the company operated 2,089 miles of road and received therefrom gross of \$12,529,493. In the year under review the company operated, as already said, an average of 3,845 miles of road, and the gross receipts therefrom were \$32,611,967. In the whole of the period between these two dates gross receipts steadily rose, year by year, with but one solitary exception. Moreover, the gross receipts per mile in the late year were \$8,482, as against only \$5,722 per mile in the fiscal year 1890. Tables given in the report bring out the fact that the property from having had in 1890 receipts per mile which were \$1,003 less than the average of all the railroads in the United States, in 1899 had receipts exceeding that average by \$654 per mile. As is well known, the Illinois Central, under its charter, pays to the State of Illinois 7 per cent of the gross receipts on the 706 miles of line originally built by the company. It is significant of the great increase of traffic on this portion of the road, as the result of the extension of the system and the development of local traffic, that the yield of the percentage referred to for the late year at \$762,438 was the largest amount ever paid in that way by the company in any year, not excepting even the year of the World's Fair.

A striking fact with reference to the traffic of the The income account for the late year shows that Illinois Central was brought out recently by President out of the revenues for the twelve months the com-Stuyvesant Fish in his testimony before the Indus pany was able to meet all its charges, pay dividends trial Commission. The fact we refer to is that, in of $5\frac{1}{2}$ per cent on its slock ($2\frac{1}{2}$ per cent March 1900 face of the great extension in the mileage of the and 3 per cent September 1900) and make besides system, the bulk of the traffic of the system remains a contribution out of earnings of \$2,416,674 for betlocal. Mr. Fish pointed out that of the 13,517,161 terments and even then carry forward a slight surplus tons of freight carried in 1898-99, 83 6-10 per cent balance. While only \$3,300,000 was appropriated out was local and only 16 4-10 per cent through. Of of the year's income in payment of dividends, the the 1,840,719 tons of freight carried in the same year amount actually available for dividends had it not by the Yazoo & Mississippi Valley Railroad, 83 9-10 been deemed best to make the contribution referred to per cent was local and 16 1.10 through. He said that for betterments would have been \$5,757,274. This latwhen he entered the se:vice of the Illinois Central ter amount is equivalent to 9.59 per cent on the present Company in 1871 the ratio of local to through freight outstanding stock of \$60,000,000. Another fact was almost exactly the same as at present. In all the should be borne in mind, viz., that this is entirely inyears since then it has varied within narrow limits, dependent of the results of the operation of the Yaalthough the tonnage has increased more than tenzoo & Mississippi Valley Railroad. The Illinois Cenfold. This is a very striking showing, and the fact tral owns the second mortgage bonds of this road, and

that the local traffic so largely preponderates is of importance in its bearing on the traffic operations and results of the road.

For one thing, we get an idea of the splendid service the Illinois Central is rendering as a public carrier to all the communities tributary to its lines. Its immense tonnage of the late year, viz., 16,020,836 tons carried and 3,425 million tons transported one mile, was moved at an average charge to the users of the road of only 65 hundredths of a cent per ton per mile. The rate is lower even than it was in the year preceding, though tariff schedules in Illinois Central territory, on account of the increased harmony among the roads, were very much better maintained than in the year preceding. If the traffic of the Illinois Central were largely through, or if it were composed mainly of minerals and other bulky lowclass freights, an average of 6 5-10 mills per ton per mile might not be considered exceptionally low. But when it is remembered that, as just shown, through traffic forms only a very small portion of the tonnage, and that furthermore a considerable part of the mileage of the system runs through thickly populated and important manufacturing districts yielding a large amount of merchandise freight, the fact that no more than 6½ mills per ton mile has been realized from the traffic shows at once the degree of efficiency attained in the management of the property and the careful way in which it is being administered so as to promote the interests of the sections of country tributary to the system. As recently as 1892 the average rate per ton per mile was over 9 mills. The comparatively light loading of the trains and the short average haul obtained on the traffic follow directly from the same circumstance. From Chicago to New Orleans over the Illinois Central is 912 miles, yet the average haul obtained by the system on its freight for the late year was less than 214 miles. The company is steadily adding to its average train-load, and as a result of this is increasing its gross receipts per train mile, notwithstanding the lower average rates obtained. For instance, in the late year the receipts per train mile were \$1 29.62, against only \$1 26.18 in 1898-99 and \$1 25.94 in 1897-98. At the same time, however, and for the reasons mentioned, the management have not yet found it possible to make any "record" train-loads, such as some of the other large companies have recently established. After the increase the average load now is 221 tons, this comparing with 209 tons in 1899 and 206 tons in 1898.

nearly all the Land Grant bonds, and if the directors of the Yazoo & Mississippi Valley Railroad had seen fit to apply the net earnings, over and above the fixed charges of that company, to the payment of interest on these bonds, there would have been coming to the Illinois Central almost \$1,000,000 (\$959,299) from that source. We might also say there would in the same way have been coming to it \$340,921 from the operation of the Yazoo & Mississippi Valley Road for the year preceding. The income of the Illinois Central for the twelve months ending June 30, 1900, included nothing received on the second mortgage bonds of the Louisville New Orleans & Texas Ruilway Company (Yazoo & Mississippi Valley line), whereas the income of 1898.99 included] \$463,265 derived from that source.

It has been the policy of the company in recent years, as we have several times pointed out in these columns, to devote large amounts out of earnings each year for betterments. Besides the \$2,416,674 applied in that way in the late year, there was a similar contribution of \$1,475,094 in 1898-99 and \$1,-726,451 in 1897-98. Altogether apart, however, from the sums taken specifically from earnings, the com pany has been spending very large amounts upon maintenance of way and maintenance of equipment. In 1899-1900 operating expenses increased, as com-But \$1,764,445 pared with 1898 99, \$3,174,333. of this increase appeared under the heads of "maintenance of way and structures" and "maintenance of equipment," the total spent under the former head being \$5,568,697, against \$4,283, 497, and the total spent for maintenance of equip. ment being \$3,675,182, against \$3,195,936. The Illinois Central applied 28.34 per cent of its gross receipts in the late year upon maintenance account, and 26.60 per cent in the year preceding. According to the report of the Inter-State Commerce Commission for the year ending June 30 1899, the percentage of gross receipts spent by all the railroads in the United States on maintenance account in that year was only 25.22per cent. The Illinois Central in the late year paid out \$1,448 per mile for maintenance of way and structures and \$954 per mile for maintenance of equipment, making \$2,402 together. This compares with \$2,038 spent on maintenance account the previous year, and with \$1,767 spent in the same way per mile by all the railroads in the United States in 1898 99, and with only \$1,471 spent by the railroads in Group V and VI in that year, these being the groups in which the lines of the Illinois Central are situated. Such contrasts give an idea of the liberal way in which the Illinois Central property is being improved out of earnings.

From the company's balance sheet, we see that cur-

in the holdings of Yazoo & Mississippi Valley Railroad Company gold improvement bonds of 1934, which now stand at \$4,775,658 against \$3,324,000 a year ago. A mortgage for \$5,000,000 has been executed on the Fort Dodge & Omaha Railroad (or Omaha Division), and it is expected to sell presently $4\frac{1}{2}$ millions of these bonds to reimburse the company for advances made. The Omaha Division is 131 miles in length. The report points out that including this division no bonds had, up to the close of the year, been issued by the Illinois Central Company in respect to 314.76 miles of road.

THE CHESAPEAKE & OHIO RAILWAY.

The annual report of the Chesapeake & Ohio Railway Company shows a continuance of the noteworthy work for which the property has been so long distinguished. Perhaps this is not surprising seeing that Mr. George W. Stevens, who is now the President of the Company, was for many years the General Manager under Melville E. Ingalls, the former chief executive, and to whom so much of its progress and success is owing. Mr. Stevens is evidently imbued with the same spirit and committed to the same policy as was Mr. Ingalls.

It will be remembered that in the spring of the present year a change occurred in the ownership of the Cheseapeake & Ohio Railway, which is now controlled jointly by the Vanderbilt and Pennsylvania Railroad interests. The change was made with the view to promoting harmony among the trunk lines, the Pennsylvania Railroad being given an ownership and a representation in the property for this purpose. As soon as announcement of the dual ownership was made, Mr. Ingalls, who had always been looked upon as a distinctively Vanderbilt man, tendered his resignation both as President and director. As is well known, he retains his position as chief executive of the Big Four, which forms part of the Vanderbilt system, and to which, together with the New York Central, have been assigned the Vanderbilt holdings in the Chesapeake & Ohio. These matters deserve to be recalled, as the omission in the late report of the Big Four company of allusion to the acquisition of shares in the Chesapeake & Ohio has been referred to in certain quarters in a way implying belief in a purpose to withhold hidden information. As it happens, the facts are all well known and no one need be in ignorance of them. Those who understand the circumstances attending the change in ownership of the Chesapeake & Ohio will have no difficulty in discerning the reason why the Big Four report contained no comment on the event. The chief executive of the Big Four was averse to discussing a matter which so immediately concerned himself. The part played by Mr. Ingalls in the development and upbuilding of the Chesapeake & Ohio can hardly be exaggerated. It is evidence of the broad and catholic spirit dominating those now administering the property that this indebtedness is freely and graciously acknowledged. At the time when Mr. Ingalls tendered his resignation last January the board of directors of the Company adopted a resolution expressive of their recognition and appreciation of his services during the twelve years in which he directed the company's affairs. The resolutions declare that "under his management and through his foresight and energy the Uhesapeake & Ohio

rent liabilities now exceed current assets in amount of \$1,551,414, whereas on June 30 of the previous year the assets exceeded the liabilities in amount of \$1,006,755. The item of advances to railroads under construction has increased, however, during the twelve months from \$2,052,090 to \$5,149,857. All the \$60,000,000 of authorized stock is now outstanding, the $7\frac{1}{2}$ millions held in the treasury twelve months ago having, as is known, been disposed of. The funded debt has been reduced from \$107,262,925 to \$104,639,925, mainly through the retirement, as announced in the last report, of the \$2,622,000 Two-ten 4 per cent gold bonds. The aggregate of bonds owned has increased from \$34,615,230 to \$36,209,889, the increase being chiefly and inefficient line of insignificance to a prosperous and thoroughly efficient trunk line." These words are none too strong, and President Stevens, who was so intimately associated with Mr. Ingalls, has had them reproduced in the present pamphlet report. The report also prints the deserved tribute paid by the board to the late Charles H. Coster of the firm of J. P. Morgan & Co. That great banking house reorgan. ized the Chesapeake & Ohio and placed it on its feet, and Mr. Coster was the instrumentality through which the work was accomplished. No praise of him can be too high.

We have stated that the present report shows a con tinuance of the noteworthy work of previous years. This becomes strikingly evident when the operating results are examined. It was considered a great achievement when the report for the previous year showed an average train-load of 425 tons. But during the late twelve months this average was increased by 63 tons, bringing it up to the remarkable figure of 488 tons. What an element of economy this is will appear when we say that with an addition of 440 millions, or 18 per cent, to the tonnage movement one mile, the increase in freight train mileage was less than 153,000 miles, or only about $2\frac{1}{2}$ per cent. It results from the same circumstance that the management were able to bring up the earnings of the freight trains from \$1 53 per mile to \$1 67, notwithstanding a further decline in the average rate realized in moving the tonnage.

Such economies of management in the case of the Chesapeake & Ohio are absolutely necessary. The annual report of the Norfolk & Western last week showed a slight recovery in the rate received per ton per mile. Not so the Chesapeake & Ohio. Here there has been a further decline, and moreover the average has now got down to the phenomenally low figure of 3.43 mills per ton per mile. In other words, the good income results of the late year were obtained on an average freight rate for the entire tonnage but little larger than a third of a cent per ton per mile. When the coal tonnage is separated from the total tonnage and treated as a distinct item by itself, we get figures which are perfectly astonishing and which but a short time ago would have been considered inconceivable. We quoted President Fink of the Norfolk & Western as having said that rates on tidewater bituminous coal in the late year had reached the lowest level in the history of that road. The Chesapeake & Ohio report furnishes convincing testimony to the truth of this statement, for the average on coal is seen to have dropped over 25 per cent during the twelve months, falling from 2.74 mills to 2.02 mills. The reader should not fail to observe that this latter is only one fifth of a cent per ton per mile, and that hence on its coal traffic the road was obliged to move five tons of freight a mile in order to earn one cent! Owing to the increasing efficiency with which the property has been managed, the income results are better than for the previous year. The gross earnings of course were the largest in the company's history, having further increased \$1,392,231 over the total of the preceding year, which previously had been unexceled. The net increased \$381,976 or almost 10 per cent. After providing for all charges there was left a surplus of \$1,156,-582 against a similar surplus in 1898 9 of \$706,131. Out of this, \$348,695 was set aside winter wheat. The following is our usual table.

for extraordinary expenditures for real estate and new equipment, but even then there was left \$807,886, a sum larger than the surplus of \$706,130 for the previous year, when a dividend of 1 per cent was paid. We notice, however, that the whole amount of the discount on sales of general mortgage 41 per cent bonds, aggregating \$1,103,513, has been charged off in a lump sum against profit and loss. The previous practice had been to charge a proportionate amount against income each year.

GROSS EARNINGS FOR RAILKOAD AUGUST.

As expected, gains in railroad gross earnings are now smaller both in amount and ratio. And yet, all things considered, the improvement continues remarkably large. We present below our compilations for the month of August, and they show an increase on somewhat more than 101,000 miles of road of \$3,-460,551, or 6.14 per cent. This is the result in face of a smaller corn movement in the West, a smaller cotton movement in the South, and at a time, too, when trade has been noticeably slackening and when enterprise has in a measure been held in check by the Presidential canvass. Of course some of the separate roads reflect the presence of one or another of these adverse influences, but collectively the results are surprisingly good.

A fact which should not be overlooked, either, is that the improvement this year follows particularly noteworthy improvement last year and improvement, too, in the two years previous. In August 1899 our statement showed \$6,815,170 gain, or 13.48 per cent, while in the same month of the two preceding years the increase was respectively $2\frac{1}{4}$ and 5 million dollars. Here are the comparisons back to 1896, both for the month and the calendar year to date.

The grain movement on the whole was irregular, both as between the various cereals and as between the different primary markets. In corn, as already stated, there was a falling off, the receipts at the West for the five weeks ending September 1 being 13,214,137 bushels in 1900 against 20,504,874 bushels in 1899. In oats, likewise, there was a decrease of about two million bushels, besides which there were smaller decreases in barley and rye. In the wheat movement, on the other hand, there was a very marked expansion, the receipts aggregating for the five weeks 33 million bushels against 20 millions last year. The gain, however, was almost entirely in winter wheat, though Minneapolis, a spring-wheat point, also enlarged its total. The augmentation at Kansas City and St. Louis was very large, reflecting the excellent winter wheat crop raised the present year in the Southwest; the gain at Chicago (which receives both winter and spring wheat) was also, we are able to say, entirely in

The foregoing figures, as already stated, cover the five weeks ending Sept. 1. At Chicago we have the results for the even month, and there we find the deliveries of wheat, corn, oats, rye and barley aggregated 24,866,691 bushels in August this year, against 28,766,294 bushels in 1899, 27,042,208 bushels in 1898, and no less than 44,341,544 bushels in 1897. The live-stock movement at Chicago, it is proper to say, was heavier than a year ago. From the table which follows it will be seen that 617,760 head of hogs were brought in in August this year against 572,091 head in August last year. We may add that the receipts of live stock as a whole at Chicago aggregated 23,110 car-loads this year, against 21,896 carloads in 1899.

RECEIPTS AT OBICAGO DURING AUGUST AND SINCE JANUARY 1.

The cotton movement in the South is never large in August. This year, on account of the shortage in last season's yield, it was smaller than usual. At the Southern outports the receipts were only 40,807 bales against 106,511 bales, and the shipments overland were 17,517 bales against 45,170 bales.

In the case of the separate roads, decreases are ob servable in a number of cases, but they are smaller and less numerous than might have been supposed likely. Out of the 111 roads contributing returns, there are only 27 decreases, large and small. They come mainly from the Northwest, where the spring-wheat

t Incindes the operations of the St. Louis Alton & Terre Haute for all the years. The Chesapenke Ohio & Southwestern and Ohio Valley are included for 1900, 1894, 1898 and 1897, and Chicago & Texas for 1900, 1899 and 1898. Results on Vazoo Branch aro not included for 1900, 1899 and 1898. These figures are simply the totals on the Chicago & West Michigan, De-troit Grand R spids & Western, Flint & Pere Marquette and Saginaw Tuscola & Unrow

Hurou. * August 1930, not reported; takeu same as 1899.

ITEMS ABOUT BANKS, BANKERS AND TRUST CO'?.

-The sales of bank stocks at the Stock Exchange this week aggregate 62 shares. No sales of either bank or trust company stocks were made at auction.

Shares. BANKS-New York.	Price.	Last Previous Sale.
32 Butchers' & Drovers' Bk., Nat.	85	Mar. 1900- 94 ¹ 8
19 Commerce, Nat. Bank of	250	Aug. 1:00- 271
11 Oriental Bank	185	Aug. 1900– 188

-The Western Reserve Trust Company of Cleveland, a new institution to which we alluded in our issue of June 16, has now moved into its permanent quarters on the first floor of the Williamson Building. The company has a capital of \$1,000,000, which is larger than that of any other trust company in Cleveland, or for that matter in Ohio. It is stated that the company already has deposits in the neighborhood of \$1,000,000, though it has been open for business only three months. The officers are: Calvary Morris, President; Edward W. Moore, H. Clark Ford and H. W. King, Vice-Presidents. M. H. Wilson is Secretary and Treasurer; T. E. Borton is Assistant Secretary and Fred, R. Fuller is Assistant Treasurer.

-The directors of the Ninth National Bank on Tuesday accepted the resignation of J. K. Cilley as President, and elected Alvah Trowbridge his successor.

-On Tuesday Oakleigh Thorne was elected President of the North American Trust Company to fill the vacancy occasioned by the resignation of Alvah Trowbridge. As a recognition of his services Mr. Trowbridge was elected Honorary Vice-President; he likewise remains a director of the company.

-Louis M. Schwan has been elected President of the Mount Morris Bank, filling the vacancy caused by the resignation of Thomas L. Watt. Mr. Watt will remain a member of the board of directors of the bank. This institution, it may be not ϵd , is controlled by interests identified with the

National Park Bank.

-Albert H. Wiggin, Vice-President of the National Park Bank, has been elected a director of that bank to fill the vacancy caused by the death of Mr. Edward E. Poor.

-Application has been made under the laws of Pennsylvania for a charter for a new trust compony, to be known as the Real Estate Trnst Company of Pittsburg. The incorporators are Joseph Wood, Tnird Vice-President of the Pennsylvania lines west of Pittsburg; Charles McKnight, President National Bank of Western Pennsylvania; George B. Motherall, David P. Black and J. Ledlie Gloninger. The undertaking is being promoted by the firm of Black & Gloninger, and the new company is expected to do a large real estate and insurance business, besides a general trust company business. The capital is to be \$1,000,000.

-Mr. J. Horace Harding, of the firm of Charles D. Barney & Co., has been elected a member of the board of directors of the Corn Exchange National Bank of Philadelphia.

-The State Street Trust Company of Boston has increased its semi-annual dividend from 2 per cent to 21/2 per cent, thus placing the stock on a 5-per cent basis.

-Mr. William Skinner Jr., of the William Skinner Manufacturing Company of Holyoke, Mass., has been elected a director of the Mercantile National Bank of this city.

-We referred in our issue of Sept. 1 to the contemplated action of the Missouri Trust Company of Sedalia, Mo., in proposing to re-incorporate as a St. Louis institution. The re-incorporation took place this week and the company expects to remove to St. Louis in a short time. It appears that the stock is to be \$500,000, of which \$200,000, it is reported, has actually been subscribed. The change to St. Louis is made in order to enlarge the business of the concern.

-Notice is published in the Pittsburg papers that application is to be made to the Governor of Pennsylvania, under the State Banking Act, for a charter of an intended corporation, to be called the Allegheny Valley Bank of Pittsburg. The amount of the stock is to be \$50,000, with the right to increase it to \$150,000.

-The Trust Company of New York has been designated by the Comptroller and Treasurer of the State a depository of the funds of the State of New York. The company is already depository of the moneys of the City of New York and of the Cotton, Produce and Coffee Exchanges of New York. It has also been appointed by the Bank Superintendent a depository of lawful money reserve for the banks and individual bankers of the State of New York. Mr. Willis S. Paine, formerly of the State Banking Department, is President.

Monetary Commercial English News

[From our own correspondent.]

LONDON, Saturday, September 1, 1900.

There is a much better tone in the stock markets this week, although business is as slack as ever. Every one who can get away from the city is holiday-making, and the few who remain have no inclination to engage in new risks. Still, there is a more cheerful feeling and a greater confidence that in a very few weeks business will expand.

Mainly the better feeling is based upon the belief that the advance of Lord Roberts at present going on will bring the war to a conclusion. Until now Sir Redvers Baller has not co-operated with the army under Lord Roberts. He is in command of a very considerable force, and yet that force has contributed practically nothing to the results of the operations; but at last Sir Redvers's army has joined Lord Roberts, and has taken an active part in the attack upon the Boers. The latter have fought with their usual gallantry; and so far do not appear to have lost courage or to have been obliged to abandon many guns. Still, every defeat must demoralize some portion of their forces, and they are being driven into the very corner of their territory. At all events, the Stock Exchange now hopes that the war will be completely ended within a few weeks, and that then goldmining will be resumed, and that before the end of the year gold will once more begin to be received from South Africa. The various gold mining companies are now issuing notices to their shareholders that the machinery is uninjured, and that they can begin work again as soon as the military operations allow of their doing so, and they have been able to collect the necessary native labor.

Less attention is given just now to the troubles in China. The feeling here is strongly in favor of closer co-operation with the United States and Japan than with the other gov-ernments for the purposes of maintaining the integrity and independence of China. Everybody feels that a policy of "grab" would be wrong from every point of view, and yet without the active co-operation of the United States and Japan it would probably be difficult to restrain some of the Continental Powers from playing for their own hand. Still, the hope exists that the dauger of a great war will keep everybody from breaking up the harmony that now exists. In the meantime it can no longer be doubted that trade in this country has received a check. This is mainly due to the extraordinary rise in the price of coal. Other commodities have risen materially and thereby have impaired the purchasing power of the working classes; but it is the rise in coal that is the serious factor. Practically everybody is buying coal only from hand to mouth. Many industries are suffering because they cannot realize profits at the present quotations for coal, and in the shipbuilding industry in par-ticular new orders have ceased to be given for some time. The railway companies have suffered most visibly from the * Frice per share.

rise in coal, the dividends for the first half of the year having been very disappointing; and now the men employed on the railways are agitating for shorter hours and higher wages. Strikes appear to be impending on the Great Eastern Railway and on the Taff Vale Line, and there are fears that others may follow. Undoubtedly the well-being of the working classes has diminished of late. Rents are abnormally high, clothing has risen in price, and coal is almost at famine quotations. If coal continues as dear during the coming winter the prospect will become serious. There is, therefore, a good deal of unrest and discontent amongst the working classes, and there is a very general fear that the autumn will see many strikes.

In spite of all this, however, the Stock Exchange is hopeful of better times for itself, because it argues that trade is perfectly sound, that credit is unimpaired, and that consequently if trade falls off much, money now employed in it will be available for Stock Exchange purposes. Upon the Continent there is almost as little doing as there is here. The chief matter of interest so far as Paris is concerned is the rumor that a great Russian loan of 20 millions sterling will be brought out shortly. Early in the year there was no donbt that such a loan would be brought ont provided the Czar visited the Exhibition, and it was understood that his visit had been arranged for the month of September. Then the fear arose that in the present political condition of the world such a loan could not be floated; but the fact that the Russian Finance Minister is just about to visit Paris has revived the old rumors, it being said that his visit is for the purpose of negotiating the loan. In Germany matters are quiet for the moment; but as September advances there is a general expectation that money will become scarce and dear, and towards the end of September stringency would not be surprising.

The Bank of England is doing its utmost to obtain control of the open market and thereby to maintain rates. The re-ceipt of so much gold lately naturally led to a sharp fall both in interest and in discount, and the Bank for the moment seems to be unprepared to meet the emergency. Since then, however, it has borrowed a very large amount, and if it goes on borrowing it will soon be able to make it; own rate quite effective. Indeed, this week the Bank has been able to lend some amounts at 4 per cent and 4½ per cent. There are rumors that a considerable amount of gold is about to be sent from St. Petersburg to London; but the Russian Government is very careful to conceal its financial operations, and nobody is able to ascertain whether the rumor is or is not correct. All that is certain is that the ex-penditure of Russia is very large, and that it needs funds in London to meet its expenditure, especially in the Far East. If the loan is brought out in Paris it may be that the Paris bankers will advance sufficiently; but on the other hand it is possible that the gold may have to be sent. Meantime, money is exceedingly abundant in Paris. In Germany, as already said, there is comparative quiet for the time being; but there are fears that as the month advances the money

market will become exceedingly stringent. Meanwhile money continues easy in India, and the India Conncil is not selling its drafts quite so well. It offered for tender on Wednesday 20 lacs and the applications amounted to $377\frac{1}{2}$ lacs; but the prices offered were not considered altogether satisfactory, and in consequence only $12\frac{1}{2}$ lacs were allotted at 1s. 331-32d. per rupee.

WALL STREET, FRIDAY, SEPT. 14, 1900.-5 P.M.

The Money Market and Financial Situation.-Wall Street has been but little affected by the stirring events of the week, and business has continued to be largely of a profes-sional character. The appalling disaster at Galveston and vicinity, which caused a sharp advance in the price of cot-ton, had almost no effect at the Stock Exchange.

The Maine State election, following so soon after the Vermont election and emphasizing the political sentiments then expressed, also passed apparently unheeded in the circle where every influence, favorable and otherwise, is usually made much of. As a result of this apathy the volume of business in the security markets has been very near the smallest of the season. Prices were generally steady until Thursday, when the anthracite coal shares began to decline on the aunouncement that a miners' strike had been ordered to begin on Monday next. This decline continued to-day, and had a depressing effect upon the entire market. the strike apparently being the feature of the week.

The foreign exchange market is easier as the week draws to a close, on the liberal offerings of cotton and grain bills. There has been an effort to advance rates by lenders in the money market, with poor success. The demand for funds from the West is still limited and the local supply is abundant.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 1 to 2 per cent. To-day's rates on call were 1¹/₄ to 1¹/₅ per cen². Prime commercial paper 4 to 5¹/₄ per cent. The Bank of England weekly statement on Thursday showed an increase in bullion of £349.¹61 and the percent-

age of reserve to liabilities was 53 \$3. against 50.89 last week; the discount rate remains unchanged at 4 per cent. The Bank of France shows a decrease of 4.400,000 francs in gold and 5.600,000 francs in silver.

The New York City Clearing-House banks, in their statement of Sept. S showed a decrease in the reserve held of \$323.600 and a surplus over the required reserve of \$26,056.250, against \$27,078.475 the previous week.

* This is the price bid at the morning board; no sale was made. † Prices are quotations in "Unlisted Dep't" for bonds "when issued."

State and Railroad Bonds .- Sales of State bonds at the Board are limited to \$1.000 Alabama class C at 1023_4 and \$200 Tennessee settlement 3s (small lots) at 90 to 94.

The railway bond market has continued dull and narrow. The volume of business was a trifle larger than last week. and prices were generally well sustained, but in the absence of any investment demand the market was sluggish and for the most part featureless. St. Louis & San Francisco gen-eral 6s advanced over 3 points, on limited sales. Metro-politan Elevated also advanced sharply. Kansas City Southern 3s recovered nearly all the decline noted last week. Chesapeake & Ohio con. 5s and Western New York & Pennsylvania 1st ös were strong features. St. Louis Southwestern, Missouri Kansas & Texas and Wisconsin Central issues were inclined to weakness.

Stock and Bond Sales .- The following shows the volume of business in stocks and bonds on the New York Stock Ex-

stock market has been very near low-water mark this week Transactions at the Exchange averaged only about 115,000 hares per day, and were almost whol T mm have, with few exceptions, been well maintained, however. especially in the rai way list.

arplus reserve 26.056.250 Dec 1.022.225 2.435.925 7.076.775 NOTE.-Returns of separate banks appear on pace 529.

Foreign Exchange .- The market for foreign exchange was firm early in the week, owing to a demand for sterling

bills, but has become easier on an increased supply of commercial offerings

To-day's actual rates of exchange were as follows: Bank ers' sixty days' sterling, 4 3314 @4 3316; demand, 4 3616 @4 3634; cables. $4 \times 1_4 \otimes 4 \times 1_2$: prime commercial, sixty days, $4 \times 2_4 \otimes 4 \times 3_4 \otimes 4 \times 3_4 \otimes 3_4 \otimes$

Central of New Jersey advanced 4 points early in the week, but declined later with the other anthracite shares in anticipation of a miners' strike which is ordered for Monday. Chicago & Eastern Illinois sold 314 points below its last previous sale. Kausas City Southern preferred was irregular. covering a range of 3 points, and closes with a net gain of 112 points. The grangers and local traction issues have been generally steady. Baltimore & Ohio, Missouri Pacific and Sonthern Pacific were weak. Louisville & Nashville and Northern Pacific were relatively strong.

Stocks on the miscellaneous list supplied a large propor-tion of the daily transactions, but in only a few cases did the movement of prices attract attention. International Paper declined 21, points and American Tobacco was weak. American Sugar Refining and the iron and steel stocks were generally dull and steady until to-day, when they followed the general tendency of the market downward.

No Bedreede and als

RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns oan be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month. The returns of the street railways are brought together separately on a subsequent page.

Gross Earnings

a Net earnings here given are after deducting taxes.

b Net earnings here given are before deducting taxes.

t After deducting "reserve fund for repairs of steamers" there was a deficit in July, 1900. of \$9,898, against a surplus of \$62,285 in 1899, and from May 1 to July 31, 1900, there was a surp us of \$92,912, against \$143.409 in 1899. The reserve fund for depreciation and general and extraordinary repairs of steamers has been increased to the standard of the English companies, *i. e.*, five per cent upon the value of the steamers.

‡ Includes Baltimore & Ohio Southwestern.

Interest Charges and Surplus.—The following roads, in addition to their gross and net earnings given in the foregoing, also report charges for interest, &c., with the surplus above or deficit below those charges.

STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

Net Earnings Monthly to Latest Dates.—The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of August 18, 1900. The next will appear in the issue of September 22, 1900.

Street Railway Net Earnings.-The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday), we bring together all the roads furnishing re-turns, and the latest statement of this kind will be found in the CHRONICLE of August 18, 1900. The next will appear in the issue of Sentember 29, 1900. in the issue of September 22, 1900.

Wheeling & Lake Erie Railroad.

(Report for year ended June 30, 1900.)

The report signed by Chairman Myron T. Herrick and President Robert Blickensderfer says in substance:

The report signed by Chairman Myron T. Herrick and President Robert Blickensderfer Says in substance: Lines Acquired -On May 1, 1899, the nurchasing committee under the plan of reorganiz-iton delivered to the company that part of the line now known as the Toledo Division (248 s miles, being the old Wheeling & Lake Erle Railway). On Ang, 15 the Cleveland Division (173'7 miles), including the Cleveland Beit & Terminal RR, the line from Cleveland to Coshocton, the Sherodeville branch and the Can-ton & Waynesburg RR., was taken over, and on July 1, 1900, the Cos-hocton & Southern and the Zanesville terminal of the Cleveland 'an-ton & Southern and the Zanesville terminal of the Cleveland 'an-ton & Southern and the Zanesville terminal of the Cleveland 'an-ton & Southern and the Zanesville terminal of the Cleveland 'an-ton & Southern (these aggregating 28.9 miles), having been acquired by purchase, were added to the Cleveland Division. In addition to these properties, the company operates two short lines to coal properties, known as the Canton & Wooster RR. and the Massillon RR.; also the Chagrin Falls branch (8 miles) which is being operated under contract with its receiver. Improvements.-During the year a considerable sum of money has been expended in improving the property, more particularly in the reduction of grades from Va'ley Junction to Navarre and from Massillon to Orrville; also in the erection of several new steel bridges and other improvements, 10 new consolidated freight locomotives, 250 box cars of 60 000 ; ounds capacity, 800 gondolas of 50,000 pounds capacity, 6 passenger coaches, 3 combination passenger and baggage cars and 3 parlor buffet cars were purchased in the early part of the year 1900. A new freight station has been erected at Cleveland, and an unber of new industries have been located for a series of years on favorable terms. Our dock property at Cleveland is good and capable of loading coal rapi liy by means of a Browu hoist The dock & Coal Company's property at Toledo has been leased

The operations and balance sheet are shown below:

x This amount is to be increased to \$72,277,100 through the issue of \$13,648,-800 subsc iben for by the s ockholders at \$150 per share and of \$4,033,100 to be used on and after Sept. 20, 1900, at \$190 per share, to retire the \$7,62,900 debontures issued or issuable for the stock of the New Amsterdam Gas Co. see also "V" below.

y This \$6,584,754 of debenture bonds includes \$5,112,754 issued in payment of the common and preferred stock of the New Amsterdam Gas Co. The bon s so issued are to be redeemed on and after Sept. 20, 1900 by the increase of stock.

stock. z this amount, when \$20,473,200, the proceeds of the subscriptions to 136,488 shares have been paid in, will be increased by \$18,116,967 (being \$20,473,20) less \$2,356,233, the amount of "loans and bills payable"), and accordingly the item of \$2,356,233, loans, bills payable, e c, on the other side of the balance sheet will disappear altogether therefrom. -V, 71, p. 438, 344.

GENERAL INVESTMENT NEWS.

RAILROADS, INCLUDING STREET BOADS.

Anthracite Coal Roads.—Strike Ordered.—At Iodianapolis on Sept. 12 President Mitchell and Secretary Wilson of the United Mine Workers of America issued a circular calling upon the "officers and members of the United Mine Workers of America and all other miners and mine workers of the anthracite region of Pennsylvania" *** "to cease work on and after Monday, Sept. 17, 1890, and remain away from the various collieries, strippings and breakers until the demands of the Hazleton Convention have been acceded to by the coal companies."

The demands of the Hazleton Convention, as formulated at the meeting held Aug. 27, include the following :

Abolition of the company stores; reduction in the price of powder to \$1 50 a keg; abolition of company doctors; semi-monthly payment of wages; abolition of the sliding scale; wages paid in cash; 2,240 pounds to the ton; an advance of 20 per cent in wages less than \$1 50 and not exceeding \$1 75 a day; that all classes of day labor now re ceiving \$1 50 and not exceeding \$1 75 shall receive 15 per cect over present wages; that all day labor now receiving \$1 75 shall be advanced 10 per cent; that no miner shall have at any time more than one breast, gang or other class of work, and shall get only his legal share of cars.

The men employed in the anthracite fields of Pennsylvania are said to number about 142 000, of whom 91,000 are employed inside and 51,000 are employed outside of the mines. Of the entire number the miners claim 80 per cent are union men; but the officials of the anthracite companies assert that only a small percentage of the men are likely to strike. The closing of the mines, it is claimed by some, would reduce the regular coal production about 74 per cent, povided the Reading Coal & Iron Company's production of 20.5 per cent of the total output is not cut off. The executive officers of all the coal mining companies are unanimous in declaring that they will receive committees of their own employes whenever they have any grievances to make known, but that they will not recognize outside inter-ference in any manner. Especially at the present time they will not recognize the right of any organization subject to outside influence to dictate the policy under which they will conduct the business of operating their mines. No demands, it is said, have been made or grievances presented by the employes of the several companies to their employers.-V. 69, p. 1102.

Baltimore & Ohio RR.—Washington Branch.—The company has filed an answer to the suit of the State of Maryland to enforce the payment of dividends on the stock of the Washington Branch RR. Co. and for the distribution of \$914,707 claimed to be due to the stockholders. The company states that whatever surplus there is resulting from operations is being held to pay for the company's share of the terminal improvements at Washington, D. C. The total estimated cost of these terminals is \$5,599,408, of which the United States and the District of Columbia will pay \$1,500 000. The Washington Branch Co. under its charter is not permitted to increase its bonded indebtedness.—V. 71, p. 340, 287.

Birmingham Alabama & Georgia RR.—Kelly Estate Not Interested.—The representative of the Kelly estate at 5 Beekman St. states that Edward and James H. Kelly, whose names were mentioned last week as incorporators of this company, have no knowledge of the enterprise. The East & West RR. is entirely owned by the Kelly estate and has no securities in the hands of the public.—V. 71, p. 491.

Cincinuati Georgetown & Portsmouth. RR.—New Mortgage.—The company has filed a mortgage to the Union Savings Bank & Trust Company of Cincinnati, as trustee, to secure \$500,000 4 per cent bonds of \$1,000 each, dated Jan. 1, 1900, and payable Jan. 1, 1950. The new loan, it is understood, provides for the retirement of the \$252,000 first mortgage 6s due next April, and for the extension of the railroad through Clermont, Brown and Adams counties to the city of Portsmouth, O. The mortgage covers all the real estate and personal property of the railroad company.—V. 70, p. 739.

Chicago Burlington & Quincy RR.—To Purchase Leased Lines — The stockholders will vote at the annual meeting on Nov. 7 on the question of purchasing a number of lines in Iowa and Missouri, now held under lease.—V. 71, p. 491.

Cincinnati Street Ry.—Called Bonds.—Bonds Nos. 151 to 200, inclusive (\$1,000 each), issued by the Mt. Adams & Eden Park Inclined Railway Co., have been called for redemption Oct. 1.—V. 71, p. 181.

Columbus Railway.—Called Bonds.—Twenty Columbus Consolidated Street RR. first mortgage 5 per cent gold bonds, dated July 1, 1889, have been drawn by lot, and will be paid at the Central Trust Co. on or after Jan. 1, 1901, at 110 per cent, together with the coupons maturing Jan. 1, 1901 (\$1,125 per bond).—V. 69, p. 743.

Dakota Nebraska & Southern RR.—Proposed Road.— This company, we are informed, proposes to construct a line extending from Grand Island, Neb., to Aberdeen, S. Dak., with branches, aggregating in all about 600 miles. Preliminary construction work, it is stated, is now progressing, and rights of way are being secured. The securities intended to be issued are : Stock, \$12,000,000, all of one kind, in \$100 shares, and \$13,500,000 five per cent 50-year gold bonds (\$1.000 each), due Jan. 1, 1951. Of the binds, \$1,500,000 will represent the cost of a bridge across the Missouri River at Pierre, S. D. The President is John H. Bowman; Secretary, John T. Dailey; Treasurer, Jonas A. Johnson; General Counsel, James M. Kerr. Office, Bee Building, Omaha, Neb.

Fitchburg RR.—Lease Ratified.—The stockholders yesterday ratified the lease of the road to the Boston & Maine by a vote of 95,623 against 227.—V. 71, p. 338, 341.

Forty-Second Street Manhattanville & St. Nicholas Avenue RR. of New York City.—Purchase of Minority Stock.— The minority stock, which amounts to about \$828 9.0, the entire issue being \$2,500,000, is being purchased for the Metropolitan Street Ry. Co. by the City Trust Co. at \$75 per \$100 share, less 20 cents expenses. The majority stock is pledged as part security for the new bonds of the Third Avenue RR. —see page 62 of STREET RAILWAY SUPPLEMENT.—V. 70, p. 1291.

Honghton County (Mich.) Street Ry.—Mortgage, Etc.— The stockholders have voted to increase the capital stock from \$25,000 to \$750,000, and have authorized a mortgage for \$750,000. Construction is making fair progress. Officers are:

Atlantic & Danville Ry.-Listed.-The New York Stock Exchange has listed the Atlantic & Danville Ry. \$3,175,000 first mortgage 4 per cent gold bonds of 1948.-V. 71, p. 181.

F. J. Bawden of Houghton, Mich., President; William O. Ohapman, Boston, Vice-President; W. Cameron Forbes, Boston, freasurer, and Elict Wadsworth, Boston, Secretary.

Illinois Central KR.—Purchase—New Bonds.—At the annual meeting on Sept. 26 the stockholders will vote on the following propositions:

a. To purchase the line of railway lately belonging to the St. Louis Peoria & Northern Railway Co. and now in the possession of the Illinois Central, extending from Springfield, Ill., to East St. Louis. b. To issue thereon 3 per cent mortgage gold bonds, payable in 1951, to an amount not to exceed \$4,000,000, for the purchase of said property and to provide for additions thereto and improvements and betterments of the same.-V. 71, p. 492, 287.

Jackson (Mich.) Street Ry.—Sold.—This property was sold on S. pt. 13. at Commissioner's sale, for \$155,000, to Wm. A. Boland of New York.

Kansas City Mexico & Orient RR.—Directors.—Robert H. Law, a Chicago capitalist, and William H. Baker, Vice-President and General Manager of the Postal Telegraph Cable Co., have been elected members of the board of directors.—V. 71, p. 29.

Nashville Chattanooga & St. Louis Ry.—Lease Approved. The stockholders at Nashville on Sept 12 ratified the lease of the Paducah & Memphis Division of the Louisville & Nashville by more than a two thirds vote. The lease runs for 99 years from $D_{c}c.$ 14, 1895. E. B. Wesley of New York has been elected a director to succeed E. L. Jordan, deceased, and Major J. W. Thomas has been re-elected President.-V. 71, p. 286.

Norfolk (Va.) & Atlantic Terminal Co.-Line Formally Opened.—This new electric railway from Norfolk to Sewali's Point was formally opened for business on Sept. 8. See STREET RAILWAY SUPPLEMENT, page 64.—V. 71, p. 492.

Northampton & Amherst Street Ry.—Mortgage.—The company has made a mortgage to the Old Colony Trust Co. of Boston, as trustee, to secure \$300,000 bonds, present issue, \$75,000.

Northern Pacific RR.—Objection to St. Paul & Duluth Sale Withdrawn.—A press dispatch from St. Paul states that the State Railroad & Warehouse Commission has withdrawn all objections to the operation of the St. Paul & Duluth RR. by the Northern Pacific Company.-V. 71, p. 236, 342.

Panama RR.—Subsidy Bonds Called.—One hundred and thirty six (\$186,000) sinking fund 6 per cent subsidy bonds have been drawn by lot and will be paid at par at the office of the company on Nov. 1. The numbers of these were given on page viii of advertisements in last week's CHRONICLE.--V. 71, p. 492.

Portsmouth River Front Ry.—Lease.—See Portsmouth Street Ry. below.—V. 71, p. 288.

Portsmouth (Va.) Street Ry.-Lease.-A press dispatch from Portsmouth says that this company, owned and con-trolled by Philadelphia capitalists and of which H. G. Williams of that city is President, has "leased the existing lines and those to be constructed by the River Front RR. Co. of this city. Under the terms of the lease the River Front RR. Co. reserves the right to operate exclusively the steam loco-motive service over the lice conveyed, and also to fix the tolls for service by the lessee and which are to be collected by the lessee. In return the River Front Company binds itself to construct such extensions and improvements, in cluding double-tracking, as the lessee may find necessary for the proper operation of the line." The new line to Gilmerton, about seven tenths of a mile, it is stated will be built at once and operated by the lessee. (See also Ports-month River Front Ry., V 71, p. 288; V. 71, p. 343, 183.).

Quincy Omaha & Kansas City Ry.—Interest.—Checks for interest due on Sept. 12, 1900, on the Guaranty Trust Co.'s certificates of deposit for non-preferred bonds were mailed to the holders of record Sept. 12.-V. 71, p. 288.

Toledo St. Louis & Western Ry.—See Toledo St. Louis & Kansas City R.R. above.-V. 71, p. 438, 343.

United Traction Co. of Albany, Etc.-Earnings.-The earnings for the six months from Jan. 1, when the operations of the consolidated company began, to June 30, 1900:

6 mos. Gross. Net. Oth.inc. Charges. Dividends. Surplus. 1900..\$638.063 \$215,217 \$4,106 \$117,264 (114)\$50,000 \$51,459 -V.71, p. 343.

Waycross Air Line RR.—New Bonds.—The company has made a mortgage to the Farmers' Loan & Trust Co. of New York, as trustee, to secure \$1,400,000 twerty year first mortgage 5 per cent gold bonds, due July 1, 1920, including \$150,000 bonds having a "prior lien in security and payment of both principal and interest," the company reserving as to the latter the right to call the same after five years at 110 per cent and accrued interest, and issue a like amount of bonds having no prior lien in their place under the mortgage. Of the bonds \$500,000 (including the \$150,000 prior liens) have been issued, and the balance can only be issued at the rate of \$5,000 per mile of completed line above 70 miles. Of the \$1,000,000 capital stock, \$504,000 has been issued. The road extends from Waycross, Ga., to Vickers, of

which 9 miles were completed on Aug. 31, and 20 miles additional from Vickers to Fitzgerald are to be completed in Dec., 1900. Extensions are also projected from the last-named place to Macon, Ga., 91 miles, and from Waycross to the Atlantic coast, at Brunswick or St. Mary's, or both, about 85 miles, making in all about 250 miles. The Presi-dent is Capt. W. G. Raoul, also President of the Mexican National RR.: Sec., W. B. Albertson; Treas., J. E. Wadley; Vice-Pres. and Gen. Mgr., Geo. V. Wadley.

Western New York & Pennsylvania Ry.—Lease Ratified. —The stockholders on Thursday ratified the lease of the property to the Pennsylvania RR Co.—V. 71, p. 339, 343.

York County Traction Co -- Mortgage-A copy of the om-pany's mortgage at hand shows that capital stock of the constituent companies in the amounts indicated below is owned and pledged with the Real Estate Trust Co. of Philadelphia as security for the new loan.

	Oapilal	stock	Par of	Shares
	Authorized.	Issued.	shares.	pledged

York Steam Heating Co	1,000	3,000	10	67

Not. -- The York Light Heat & Power Co. owns \$182,630 of the \$183,440 stock of the Edison Electric Light Co. of York, Pa. (authorized capital, \$2.0,000; par of shares. \$10) and \$25,800 of the \$26,210 stock of the Westinghouse Elec-tric Light & Power Co. of York, Pa. (authorized capital, \$50,000; par of shares. \$10).

"Also, all the additional shares of the capital stock and all bonds of the said above named corporations, or any of them, which may hereafter be purchased or acquired," as set forth in the mortgage. The total authorized issue under the new mortgage is limited to \$1,500,000, but of this \$500,000 is reserved in trust for extensions, betterments and equipment. The remaining \$1,000,000 bonds are issuable as follows:

INDUSTRIAL, GAS AND MISCELLANEOUS.

American Agricultural Chemical Co.-Report.-The company reports for the six months ended June 30, 1900: Total (arnings, \$1,179,199; from which reserved for renewals, bad debts, repairs, allowances of all kinds, etc., \$339,879; net earnings, \$339.320; previous surplus, \$40,699; balance undi-vided profits June 30, 1900, \$380,019. - V. 70, p. 585.

American Cotton (Round Bale) Co.-Status.-The following statement has been revised for the CHRONICLE:

Towing statement has been revised for the CHRONICLE: On Aug.1,1900, the company was free from debt, and had nearly \$300,-000 cash and about \$600,000 bills receivable (equivalent to cash in a few days). The company owns the Walburn-Swenson Machine plant in Chicago, valued at about \$400,000, at which plant all the machines are manufactured. The company's plants and machines located in the South are valued at \$1.500,000, besides which it has sundry other assets. Its patents are valued at between \$4,000,000 and \$5,000,000. The company will have this year 700 presses in operation, as against 400 last year. Its production last year with 400 machines amounted to 400,00 "round lap" bales.

Santa Fe & Grand Canyon RR.—Receiver.—At Prescott, Ariz., on Aug. 28, Judge Sloan appointed E. D. Gage of Prescott receiver of this property. The operation of the road is suspended pending a report by the receiver as to the possi bility of operating the line without loss.-V. 70, p. 229.

Seaboard Air Line Ry.—Equipment Trust.—The company has purchased 2,000 freight cars through Blair & Co. at a cost of \$1,354,000. A cash payment of 15 per cent is made. and for the balance the company issues its five per cent equip ment notes, payable in \$50,000 quarterly instalments.-V. 71, p. 391, 343.

Schenectady Railway.-Albany Line.-The company is proposing to build a line connecting its system with the United Railway of Albany, and a contest has arisen with the new Albany & Schenectady Traction Co. (see V. 71, p. 390) as to which shall have the franchise.—V. 67, p. 321.

Toledo St. Louis & Kansas City RR.—Third Instalment. —The third instalment due on the preferred and common stocks, viz, \$5 a share on the preferred and \$3 per share on the common, is called for payment at the Central Trust Co., 54 Wall St., on or before Sept. 25, 1900.-V. 71, p. 438, 237.

The \$3,000,000 of preferred stock is receiving dividends at the rate of 8 per cent per annum. Common stock is \$4,000,-000; no bonds. John E. Searles is President.-V. 70, p. 793. Asphalt Co. of America. — Terms of Exchange. — See Na-tional Asphalt Co. below. — V. 71, p. 438, 344.

Colorado Fael & Iron Co.-Dividend.-The company has declared a dividend of 8 per cent on its preferred stock for the fiscal veac ended June 30, 1899, payable Oct. 10 to stock of record Sept. 20. This leaves only 8 per cent in dividends overdue on the preferred stock .- V. 71, p. 289.

Consolidated Gas Co. of New York.-New Stock.-The company's authorized capital stock, of which \$54,595.200 is outstanding. was recently increased to \$80.000,000. Of the new issne \$13,648,800 was subscribed for at \$150 per share by

the company's shareholders, and this amount under anthority of the Stock List Committee will, so far as issued, be added on Oct. 2 to the amount already dealt in on the New York Stock Exchange. A further amount not exceeding \$4,033,100, is issuable at \$190 per share in exchange for the \$7,662,900 debentures issued or issuable under agreement of May last to retire the entire capital stock of the New Amster dam Gas Co. Over 80 per cent of the New Amsterdam stock has so far been acquired, and on account of the same \$6,436.598 debentures have been issued. These debentures are subject to call at par, without interest, at any time prior to Dec. 1, 1900, in exchange for capital stock of the Consoli dated Gas Co. at the rate of \$190 per share. In pursuance of this right the company has called for payment the said deben-tures on and after Sept. 20, 1900, and the New York Stock Exchange has authorized the listing of such additional stock as shall be issued in making the exchange. The amount of capital stock listed, including such additional issues, it is provided, shall not exceed in the aggregate \$72,277,100. The balance sheet of July 1, 1900, is on page 543. The debentures should be presented at the office, No. 4 Irving place, on Sept. 20 -V. 71, p. 438, 344.

Cuban Steel Ore Co.-Option.-See Pennsylvania Steel Co. below.-V. 71, p. 392.

Distilling Company of America.-See page 557.

Industrial Companies.—Results to Underwriters.—The following tables, which appeared first in the "Journal of Commerce and Commercial Bulletin," have been revised for the CHRONICLE by the original compiler. Knickerbocker Telephone & Telegraph Co. of New York. Mortgage.—The company has made a mortgage to the City Trust Co., as trustee, to secure \$5,000,000 of 5 per cent 50-year \$1,000 gold bonds, dated Sept. 1, 1900. President William H. Eckert is quoted as saying:

We are going ahead with the work as quickly as possible, but it will probably take a year to get the entire system in operation. Our lines in Manhaitan are not widely placed as yet, but in Queens, as far as the trunk lines are concerned, the work is almost complete. We will go ahead with the work in Manhattan as quickly as we can get the material we require. In Nassau also we have laid many lines. We are already operating our Broome St. and Twenty-third St. exchanges, though with a limit-o number of subscribers.

The company is one of those in which the Telephone, Telegraph & Cable Co. is interested.—See V. 70, p. 1052.

Long Beach Land Co.-Change of Control.-The company has been reorganized with the following directors :

President, John L. Young of Atlantic City; Secretary and Treasurer, Joseph Thompson of Atlantic City. Directors: Congressman John J. Gardner of New Jersey and W. H. Ford and G. H. Ford of New York.

The new directors represent a syndicate which it is unofficially reported has recently secured an option upon \$360,-000 first mortgage bonds, held by J. P. Morgan & Co., trus-tees, covering the hotel and other assets of the old Long Beach Improvement Co. The syndicate has also purchased for \$25,000 the beach itself, $4\frac{1}{2}$ miles in length, from the town of Hempstead.

Lower Merion Gas Co.-Stock Increased.-The stockhold-ers on Sept. 5 voted to increase the capital stock from 4,000 to 5,(00 shares, par value \$50.-V. 71, p. 137.

Marion (0.) Water Co.-Receiver.-William E. Scofield has been made receiver of the company, on application of the Knickerbocker Trust Co., the first mortgage trustee.-V. 71, p. 33.

National Asphalt Co.-Plan of Union.-A oircular, signed by President Amzi L. Barber and Secretary and Treasurer Arthur W. Sewall, has been issued from the office, No. 11 Broadway, giving the facts regarding the organization of the company and the terms offered to holders of the capital stock of the Asphalt Co. of America.

The National Company has been organized under the laws of New Jersey, and in case this plan is adopted "has expressly assumed and agreed to guarantee and pay all of the obligations of the Asphalt Company of America, including its \$30,000,000 gold certificates (see description, underlying securities, etc., in V. 70, p. 993; V. 69, p. 387). The last-named company has no debts and has issued no securities except its collateral gold certificates and stock."

The sinking fund of the Asphalt Co. of America will be increased to \$300,00) per annum, and its collateral gold cerficates will be further secured, as will be stated another week. The National Company is authorized to issue its own se-

curities as follows:

Curities as follows: *Collateral gold* 5% 50-year certificales, to draw interest from Jan. 1, 1901, and to be secured by the deposit with the Equitable Trust Co. of Philadelphia, as trustee, without individual liability, of all the shares of the Asphalt Company of America (total issue \$30,000,000, 20 per cent paid in) purchased under this agreement. A sinking fund of not less than \$50,000 per year is provided. No semi-annual pay-ments on these certificates and no payments of principal thereof shall be made until all interest and principal of the \$30,00°,000 collateral gold certificates of the Asphalt Co. of America at the time actually matured shall have been met; and "in case of the liquidation of the assets of the National Asphalt Co., other than shares of etock of the Asphalt Co. of America deposited with the trustee, the principal and semi annual payments of the collateral gold certificates of the Asphalt Co. of America shall be paid preferentially. Total issue, \$6,000,000 [All as part consideration for stock of Asphalt Co. of America] *Preferred stock*, 6 p. c. cumulative, in shares of \$50

Reports and Documents.

ILLINOIS CENTRAL RAILROAD COMPANY.

FIFTIETH REPORT-FOR THE YEAR ENDED JUNE 30, 1900.

On June 30, 1899, the Illinois Central Railroad Company had in operation	3,678·74 miles
There have since been added :	
On Deo. 1, 1899, The Litchfield Division (St. L. P. & N. RR.)	317-12 miles
Length of railroad in operation June 30, 1900.	3,995.86 miles
On June 30, 1900, there were in operation:	
Of First Main Track	
Total of Main Tracks	4.244.03 miles 1,209.50 miles
Total Tracks of all kinds	5,453•53 miles
The average number of miles of railroad operated by this Company during the year ended June 30, 1 3,845 miles, against an average of 3,671 miles operated in the preceding year; this is, for each year, exclusive road owned and operated by the Yazoo & Mississippi Valley RR. Co. The following is a summary of the Illinois Central Railroad Company's business for the year ended June	ve of the Rail- e 30, 1900.
\$21.377.615.49	.\$32,611,967 35

Total Fixed Charges and Rent	6,427,107 78
Leaving Available	
This was disposed of as follows: Dividends paid March 1, 2 ¹ ₂ per cent, and payable Sept. 1, 1900, 3 per cent, on \$60,000,000	\$3,300,000 00
Betterments as more fully explained below. Carried forward to Surplus Dividend Fund as of June 30, 1900, and set apart as applicable to Future Dividends.	2,416,674 42 1,046,226 92
	\$6.762,901 34
As compared with the preceding year :	
The average number of miles of railroad operated increased	or 4.74 per cent
Gross Receipts from Traffic increased	r 17.44
The man in an an and 132 ≿00.52 C	r 9.77 "
Taxes increased. 1,190.143 71 of	or 9.96 "
Excess of Income over Expenses of Uneration and Taxes increased	r 9'44
The sum available for Fixed Charges and Dividends increased 1,094,837 78 of 374,896 64	r 5.51 (
The amount available after deducting fixed charges increased	or 27.77 " or 63.84 "
Surplus Dividend Fund has been augmented by	or 4.04 "

DIVIDEND, INSURANCE AND SINKING FUNDS.

The sum of \$40,600, derived from interest on securities in the Surplus Dividend Fund, has been added to that Fund, which now amounts to \$1,046,226 92, and is well and safely invested. The Insurance Fund, after the payment therefrom of all losses by fire, was augmented during the year by \$122,327 04, to \$1,214.620 58, which is well and safely invested. The Trustees of the Cairo Bridge Fund hold \$441,555 12, invested in securities authorized by the mortgage, being \$46,344 40 more than they held at this time last year. The Trustees of the Western Lines Sinking Fund hold \$259,162 72, invested in securities authorized by the mortgage, being \$56,014 93 more than they held at this time last year.

being \$56,014 93 more than they held at this time last year.

TAXES.

The charter of the Company reserved to the State of Illinois, in lieu of taxes, 7 per cent of the gross receipts of the 706 miles of railroad originally built thereunder. The sum so paid has this year been \$762,438, which, if capitalized at 3½ per cent, would give \$21,783,949 as representing the proprietary interest of the State of Illinois in the Illinois Central Railroad. This is the largest amount ever paid in this respect in any one year, not excepting even that of the World's Fair, 1893-1894.

Other Taxes bring the sum paid as taxes up to \$1,491,780 16. This exceeds the sum paid last year by \$132,800 52, or 9.77 per cent, although the number of miles of railroad operated has increased by only 4.74 per cent.

ST. LOUIS DIVISION.

The Gross Receipts of the railways subjected to the lien of the Mortgage securing St. Louis Division Bonds were	,878,484 03 1,206,369 14
And the Excess of Receipts over Operation, Expenses and Taxes. The rent of those rallwa's, including the interest on the St. Louis Division Bonds, and on such bonds of the old Companies as had not yet been funded, amounted to.	\$672,114 89 507,525 00
The Earnings of the St. Louis Division have exceeded the Charges by 32.43 per cent, or	\$164,589 89
The cost of the St. Louis Division has been augmented by \$53,432 07, of which \$23,238 43 was for betterment remainder in satisfaction of underlying liens and charges.	ts, and the

THE CHRONICLE.

LOUISVILLE DIVISION.	
The Gross Receipts of the railways subjected to the lien of the Mortgage securing Louisville Division Bonds have been The Expenses of Operation, including faxes.	\$4,393,346 64 3,257,608 01
And the Excess of Receipts over Operation Expenses and Taxes. There has been paid, in respect to those railways, as Rent, and for Interest on Bonds	\$1,135,738 63 820,619 70
The Earnings of the Louisville Division have exceeded the Charges by 38.40 per cent, or	\$315,118 93
There was brought forward on June 30, 1899, at credit of the Louisville Division Fund. Charges have since been made against that Fund : For betterments, acquisitions and additions to Louisville Division. *891,888 50 For the distributive share of the proceeds of the sale at foreclosure of the Chesapeake Ohio & Southwestern Railroad, paid in respect to \$234,000 of Second Mortgage B nds of that Company which were not owned by the Illinois Central R R. Co. and set aside in respect to the remaining \$56,000 Bonds not owned. 110,827 71 For the cost of preferred liens and securities bought, the compensation of the Reorganization Committee, 25,251 13	
Total	1,027,967 34
And there remained on June 30, 1900, at the credit of the Fund	\$700,313 46

CHICAGO & TEXAS RAILROAD.

The cost of the Chicago & Texas Railroad has been augmented by \$55,933 84, of which \$12,233 84 was for betterments, and the remainder for additional securities purchased.

ADVANCES ON ACCOUNT OF RAILROADS IN CONSTRUCTION.

Further advances on railroads in construction have been made to the amount of \$3,097,767 64, making the total of such advances to June 30, 1900, \$5,149,857 41. No bonds of the Illinois Central Railroad Company had, up to the close of the year, been issued in respect to any of these railroads, of which the Effingham District, 88.51 miles; the Omaha Division, 131.02 miles; the Canton Aberdeen & Nashville Railroad in Alabama, 7.84 miles, were then in operation; nor in respect to the Chicago & Texas RR., 74.70 miles; the South Chicago RR., 4.76 miles, and the Stacyville RR., 7.93 miles. The total length of railroad operated by the Illinois Central Railroad Company on which it had issued no bonds, therefore, was 314.76 miles.

EFFINGHAM DISTRICT.

As stated in the last Annual Report, the Railroad of the St. Louis Indianapolis & Eastern RR. Co., extending from Effingham Station in Illinois eastward to Switz City, Indiana, was, after July 1, 1899, bought in at foreclosure sale by Mr. J. C. Welling, as Trustee for the Bondholders. The property was thereafter reorganized, and on January 1, 1900. its operation was undertaken by the Illinois Central RR. Co. as the Effingham District. In the Betterment of this property there has been expended during the year \$70,803 49, making the total advances

thereon \$744,184 34.

OMAHA DIVISION.

The railroad, 131 miles in length, which was built by the Ft. Dodge & Omaha Railroad Company from Tara to Council Bluffs, Iowa, has been bought by the Dubuque & Sioux City Railroad Company. This railroad, which will be known as the Omaba Division, has been leased by the Illinois Central Railroad Company, on substantially the same known as the Omaba Division, has been leased by the Innois Central Railroad Company, on substantially the same terms as the rest of the Dubuque & Sioux City Railroad, viz.: for its net earnings after deducting interest on bonds secured by mortgage thereon and a sinking fund. On July 20, 1900, this property was mortgaged by the Dubuque & Sioux City Railroad Company to secure an authorized issue of \$5,000,000 of Three Per Cent Bonds of the Illinois Central R.R. Co., of which \$4,500,000 will be presently issued and may be sold to reimburse the advances made by the Illinois Central R.R. Co. to the Ft. Dodge & Omaha R R. Co., including interest thereon and proper charges for material furnished and work done. The remaining \$500,000 of bonds are reserved for betterments and additions to the property montgaged mortgaged.

TERMINALS IN OMAHA AND COUNCIL BLUFFS.

Under a favorable contract with the Omaha Bridge & Terminal Railway Co. the right to use its bridge over the Mis-souri River at Omaha, its freight houses in that city and in Council Bluffs, and all of its well-located freight yards and facilities in Omaha have been secured. A viaduct connecting the tracks of the Omaha Bridge & Terminal Railway with those of the Missouri Pacific Railway in Omaha is approaching completion. This will afford, on satisfactory terms, an access to the packing-houses and other industries in South Omaha.

Arrangements have also been made with the Union Pacific RR. Co. for the use of its new Union Passenger Station at Omaha, and of the tracks leading thereto.

LITCHFIELD DIVISION.

The railroad from Springfield by way of Litchfield to East St. Louis, Illinois, formerly owned by the St. Louis Peoria & Northern Railroad Company, has been leased from December 1, 18*9, for a fixed annual rent of \$90,000. It is 97.59 miles in length, and traverses a rich farming country, much of the soil being underlaid with valuable deposits of coal which are being rapidly developed.

A proposition will be submitted to the Stockholders at their next Annual Meeting on September 26, 1900, to buy this railroad for \$3,000,000 of Bonds of the Illinois Central Railroad Company, maturing in 1951 and bearing interest at the rate of three per cent per annum, which are to be secured by a First Mortgage on the property purchased. These bonds will form part of an authorized issue of \$4,000,000. The proceeds of the remaining \$1,000,000 of Bonds are to be used for outlays made since December 1, 1899, and to be made, in bettering, extending and adding to the property mortgaged. This road is being thoroughly ballasted and in other respects brought up to standard as rapidly as possible. The contract for running rights over the tracks owned by another railroad company from Pana to East St. Louis, to which reference was made in the Report for the year ended June 30 1896, has been terminated. The sum paid that Company during the year ended June 30, 1899, for the joint use of 94:4 miles of its track, was \$79,762. The distance from Chicago to St. Louis by the new route is 292:96 miles, which is slightly (6:38 miles) less than by by way of Pana. While it is confidently expected that the earnings of the Litchfield Division will from the outset exceed the charges proposed to be incurred, the chief value of this road lies in its providing, with our existing lines, an independent railroad of our own from Chicago to St. Louis 575,238. ALBEET LEA & SOUTHEEN BALLEOAD A proposition will be submitted to the Stockholders at their next Annual Meeting on September 26, 1900, to buy this

ALBERT LEA & SOUTHERN RAILROAD.

The Albert Lea & Southern Railroad is in effect an extension of the Mona Branch of the Dubuque & Sioux City Railroad, from its terminus, Lyle, on the boundary between Iowa and Minnesota, to Albert Lea. in the latter State. The length of this line is approximately 25 miles, and its cost is estimated at \$425,000, of which \$109,720 32 was advanced dur-The . ing the year under report.

TERMINALS AT NEW ORLEANS.

The Yazoo & Mississippi Valley RR. Co. has provided at Harahan Station, near New Orleans, a Terminal Yard which is readily accessible from the main tracks of that Company and of the Illinois Central, which, at that point, are used by both railroads as a double-track road. This Yard is used by both Companies and contains 24 miles of track, with a similar but more extensive system of gravity tracks for sorting cars than we have as yet found it necessary to provide at the Fordham Yard in Chicago.

In order to further accommodate the rapidly growing foreign commerce of New Orleans, there has been under-taken the construction of a double-track railroad, from the yards above Louisiana Avenue, along or near to the River bank, for approximately five miles, to the upper limits of the City, and thence to a connection with the main tracks of both of the railroads last mentioned. This work is estimated to cost approximately \$1,000,000, and there has been expended on it during the past year \$180,959 90.

On the completion of this work the single track hitherto maintained in Louisiana Avenue, which, since that track was laid twenty years ago has become a much traveled street, will be removed.

TERMINALS RENTED TO OTHER COMPANIES.

To the Wisconsin Central Railway Company there have been rented a part of our Terminal Freight Yard in Chicago, together with the right to use our tracks leading therefrom westward, for some fourteen miles, and the right to use, with our other tenants, the Central Passenger Station in Chicago and some other facilities.

The amount of rent to be paid by the Wisconsin Central will vary from time to time with the facilities furnished and the amount of business transacted. It is therefore impracticable to state in advance the sum to be derived from this source.

To the Choctaw Oklahoma & Gulf Railroad Company there has been rented the use of the Passenger Station at Caloun Street in Memphis,

As the Wisconsin Central is operating some 700 miles of railroad in the Territory immediately north of that served by he Illinois Central, and as the Choctaw Oklahoma & Gulf runs from Memphis westward for nearly 600 miles, through rkansas and the Indian Territory, it is reasonable to expect that the already considerable interchange of business be-ween those roads and ours will increase steadily to the mutual profit of the companies directly interested. To the Kentucky Western Railway there has been rented the right to use a short piece of the track of the Louisville

ivision and the station facilities at Blackford, Kentucky.

CHARACTER AND WEIGHT OF RAILS.

All of the main tracks and all of the side tracks, excepting 31.66 miles, are laid with steel rails. The average weight of rails in main tracks is 69.41 pounds per yard, or 109.08 tons to the mile of single track. Exclusive of the rails in 1,209.50 miles of side tracks, the total weight of all the rails in the main tracks on June 30, 399, was 416.121, and on June 30, 1900, it was 462,960 tons. The increase during the year was 46.839 tons. During the year 46.74 miles were relaid with new 75-pound rails, and 213.98 miles with new 85-pound rails. Total elaid with new rails, 260.72 miles. No new rails of a lighter section than 75 pounds were laid. Of the new mileage taken over during the year, the Omaha Division, 121.02 miles and the new how how the later of the section than 75 pounds.

Of the new mileage taken over during the year, the Omaha Division, 131.02 miles, and the second track from Otto to ilman, Illinois, 21 miles, are laid with new 85-pound rails. The lightest rails in main tracks weigh 50 pounds to the yard, and the heaviest weigh 100.

There are laid with rails weighing less than 60 pounds	355.61 mlles.
1th 60-pound rails	1.223.79 miles.
ith 60-pound rails	593.00 miles.
1th 75-pound rails	1.578.42 miles.
1th 85-pound ralls	489.13 miles.
1th 100-pound rails	4.08 miles.
Total of Main Tracks	

BETTERMENTS.

For betterments to the railroads in operation, and additions to their equipment, there was expended during the ear \$4,265,618 76. Of this there was paid from the current income of the year, \$2,416,674 43, which sum exceeds the ost of all the additional new engines and cars bought, which was \$2,370,555 50. The remainder was provided for by harging, as above shown, to the Louisville Division Fund \$891,888 50, and by charging to Capital Account \$957,055 84. The character of the betterments and the parts of the railroad on which they were made are set forth in detail in ne of the tables which follow.

DOUBLE TRACK.

The traffic has in several places reached the limit of economic operation by means of a single track, and is constantly rowing. During the year 21 miles of new second track were put in service between Otto and Gilman, Illinois, and the uilding of 84 miles of additional second track undertaken. It seems so certain that a double track will next year be re-uired over the whole distance of 200 miles from Chicago to Effingham that authority has also been given for doing the eccessary grading on the 81 miles of that distance, for which a second track has not been provided. Should business ontinue to increase, this will be ballasted and track laid thereon next year. The single-track railroads of the Illinois Central and of the Mobile & Ohio Railroad Companies parallel each other row the end of the Cairo Bridge southward for six miles. An arrangement has been made whereby these tracks are to

rom the end of the Cairo Bridge southward for six miles. An arrangement has been made whereby these tracks are to e used jointly by the two Companies as a double-track railroad. This, with the work already authorized, will furnish or our use a double-track railroad from Carbondale, Illinois, to Fulton, Kentucky, which will be continuous for the whole distance of 98.35 miles, excepting only the Cairo Bridge itself, which is to remain single track.

MAINTENANCE OF EQUIPMENT.

It has been customary for some years past to provide for replacing the engines and cars worn out, destroyed or sold y making monthly charges to Maintenance of Equipment (Operation Expenses), and corresponding credits to Renewal unds, and from time to time to buy with the avails of those Funds new engines and cars of greater capacity. Over and bove the cost of current repairs there was so charged to Maintenance of Equipment during the year \$681,000. With a art of this sum, and the proceeds of the sale of old engines and cars, 14 new locomotives and 964 new freight cars were ought to replace a like number disposed of, and a balance of \$9,237 56 was carried forward on June 30, 1900, at credit of he Renewal Funds. These fourteen new locomotives are capable of hauling rather more than could thirty-eight of the ld ones such as they replaced ld ones such as they replaced.

ADDITIONS TO EQUIPMENT.

With the new railroads acquired there were received 17 locomotives, 2 passenger cars, 1,076 freight cars, 15 cabooses nd 7 work cars.

The following additional new equipment was also bought during the year: 33 locomotives, 40 passenger cars, 1 test ar, 1,953 freight cars, 20 cabooses and 101 work cars. There were re-built as cabooses 18 freight cars and 2 work cars.

INCREASED CARRYING CAPACITY.

From the new locomotives having a much greater tractive power than the old ones, it results that while the number f engines increased by 50, from 763 to 813, or by 6½ per cent, their capacity to haul on a level and straight track in-reased by 237,928 tons, from 2,376,844 tons to 2,614,772 tons, or by 10 ger cent. From the new freight cars having a much greater capacity than the old ones, it results that while the number of reight cars increased by 3,011, from 29,428 to 32,439, or by 10 per cent, their capacity to carry freight increased by 29,440 tons, from 769,305 tons to 898,745 tons, or by 17 per cent. This increase in the capacity of freight cars during the past year exceeds the capacity of all of the 8,897 freight cars which were owned by the Company on January 1, 1886, which was 127,747 tons. On June 30, 1900, the average tractive power of each locomotive was 3,216 tons, and the carrying capacity of each evenue-earning freight car was 27.7 tons. DIVIDENDS.

DIVIDENDS.

It is not quite fifty years since, by an Act approved February 10, 1851, the State of Illinois incorporated the Illinois Sentral Railroad Company. Changes made from time to time in the date of the Annual Meeting of the Stockholders and a the term of the Fiscal Year make this the Fiftieth Report of the series. The Dividend paid September 1, 1900, formed the Ninety-first Semi-Annual Distribution made to the proprietors in

ash

Omitting various distributions of scrip of one kind or another, but including the income taxes paid by the Company or the stockholders on dividends declared and the premium on the dividend paid in gold in 1871, the gross sum paid in ash as Dividends amounts to \$88,977,094 80.

This represents an average payment at the rate of 6'722 per cent per annum upon the capital in respect to which the everal cash dividends were from time to time declared.

Eight cash dividends were paid prior to 1860, at somewhat irregular intervals, upon the then partially paid in shares f the subscribed Capital.

On January 1, 1860, the practice of regularly paying semi-annual dividends in cash on all of the full paid shares was egun, and that practice has ever since been adhered to.

On January 1, 1863, the final payments on all of the first Seventeen Million Dollars of the Share Capital were made. Four per cent was paid thereon in 1863. With the single exception of the year 1877, when a like dividend was made, he proprietors have ever since received annually at least five per cent and often much more. During the first ten years of its corporate existence, ending December 31, 1860, the Company paid in cash as divi-

ends \$739,993 73.

From January 1, 1861, to December 31, 1870, \$18,200,608 09.

From January 1, 1871, to Decemb r 31, 1880, \$20,871,492 98. From January 1, 1881, to December 31, 1890, \$23,240,000 00. Since January 1, 1891, \$25,925,000.

Throughout the past ten years the dividends have been uniformly at the rate of five per cent per annum, excepting hat the last semi-annual payment, made September 1, 1900, was at the rate of six per cent.

While the return yielded by the shares has not of late been commensurate with what might have been expected from nvestments made so many years ago in a territory which has developed so amazingly, it must be remembered that the arning power of Fixed Capital in the United States is now much less than formerly, and, as is so well known, the

physical condition of your property has been vastly improved during the past ten years. Moreover, no other large rail road company in the United States maintained a uniform rate of dividend during the trying times through which we have passed, and only four of them – the Pennsylvania, the New York New Haven & Hartford, the Lake Shore & Mich-igan Southern and the Chicago & Alton—paid dividends on their Common Stock which averaged five per cent or more throughout the past ten years.

REVENUE AND REVENUE PER MILE OPERATED.

Except in the year ended June 30, 1895, the Gross Receipts from Operation have, for many years past, invariably exceeded those in any preceding year. Although a considerable part of this increase has been due to the operation of added mileage, as most of the new railroads when taken over had been earning much less per mile than the average of the Illinois Central System, it is gratifying to observe, from the table which follows, that, with one further exception, there has been in each of the past eleven years an equally invariable increase in the Receipts Per Mile Operated. Your property, from having had in 1890 Receipts Per Mile which were \$1,003 less than the average of all the railroads in the United States, had in 1899 receipts exceeding that average by \$654 per mile. The figures for all the railroads for the year ended June 30, 1900, are not as yet obtainable, but in that year the Gross Receipts Per Mile of the Illinois Central RR. showed a further increase of \$823. further increase of \$823.

THE YAZOO & MISSISSIPPI VALLEY RR. CO.

The following extracts from the Report of the President to the Board of Directors of that Company for the year ended June 30, 1900, show the condition and growth of that property:

"The number of miles of railroad operated by the Yazoo & Mississippi Valley Railroad Company throughout the past year has been 1,001, as again t an average of 955 miles operated in the preceding year, »n increase of 46 miles, or 4.82 per cent. "The following is a summary of the Company's business for the year ended June 30, 1900:

Gross Receipts from Traffic	\$5,300,889 55
Gross Receipts from Traffic	3,395,713 50
Excess of Gross Receipts over Operation Expenses and Taxes	\$1,905,176 03 363 44
Income from the year's business	
From this there has been paid, for Interest on: \$2,800,000 Y. & M. V. First Mortzage Bonds	
3,324,000 Y. & M. V. 4% Improvement Bonds	1
Total of Absolutely Fixed Charges	946,240 00
Surplus carried to Profit and Loss June 30, 1900	\$959,299 49

The following table shows the revenue of the Company from Traffic in each of the past eight years:

Years Ended June 30.	Average Number of Miles Operated.	Gross Receipts.	Expenses of Operation.	Taxes.	Excess of Gross Receipts over Expenses of Operation and Taxes.	Total Income Including In- terest on Investments.	Fixed Oharges Exclusive of Interest on Second Mortgage Income Bonds and on Land Grant Income Bonds of the L. N. O. & T. Ry. Oo.

"The surplus above shown is stated without providing in any way for the interest on either the Second Mortgage Bonds, or the Land Grant Income B nds, of the Louisville New Orleans & Texas Railway Company, of which \$9,104,000 and \$10,000,000 are respectively outstanding."

All of the Second Mortgage Bonds and all but \$96,000 of the Land Grant Bonds of the Louisville New Orleans & Texas Railway Company are owned by the Illinois Central Railway Company. Stockholders who may desire a copy of the report of the Yazoo & Mississippi Valley R.R. Co. are requested to write

to the Secretary therefor.

The attention of the Stockholders is invited to the accompanying Balance Sheet and to the Abstracts explanatory thereof, as well as to the various tables showing in detail the workings of the Company's business. By order of the Board of Directors,

NEW YORK, Sept. 7, 1900.

THE CHESAPEAKE & OHIO RAILWAY COMPANY.

TWENTY-SECOND ANNUAL REPORT-FOR THE FISCAL YEAR ENDING JUNE 30, 1900.

RICHMOND, VA., September 6, 1990.

To the Stockholders of the Uhesapeake & Ohio Railway Company.

The Board of Directors submit herewith their report for the fiscal year ending June 30. 1900:

MILEAGE OPERATED.

Main Line-Fort Monroe, via Newport News-	1899.	Inc'se.
to Cincinnati	664.1	
James River Line – Richmond to Clifton Forge 231.5	231.8	
Louisville Line-Ashland to Louisville	208 4	
ton	93.5	
Branches owned. 247:	235.2	12.3
Branches operated for account of owners 30.9	11.8	19.1
Total	1,444.8	31.4
Second track. 128.	98·2	30.4
Sidings	494.4	33.2
owners	3.0	2.9
Total all tracks	2,040.4	97.9

84.5 miles of the Washington Line is operated under trackage agreements with the Southern Railway and the Washington Southern Railway, and 9.0 miles under a lease

from the Southern Railway. 105.7 miles of the Louisville Line is operated under track-age agreements with the Ashland Coal & Iron Railway and the Louisville & Nashville Railroad.

General Mortgage 41/24 bonds amounting to \$1,000,000, reported in the treasury at the date of the last annual report, together with \$1,250,000 additional bonds, were sold to pro-vide funds for payment on new work in progress. The additional \$4,000 bonds issued during the year were in exchange for Preferred Stock.

The increase in Greenbrier & New River Railroad bonds (\$52,000) is the amount expended for construction on that line to June 30th.

The decrease in the Manchester bonds is due to the sale of the Manchester water power, and the assuming of these bonds by the purchaser. In addition your Company received \$160,000 in cash for this property, which has been deposited with the Trust Company, the same to be applied toward the improvements in Richmond.

The sale of \$1,500.000 additional General Mortgage 41/2% bonds has been regotiated, these bonds to be delivered September 1st, making an aggregate issue of \$4,750,000 since July 1st, 1898—\$1,250,000 for the purpose of construct ing fifty miles of second main track (the directors having authorized twenty miles additional during the past year), the balance, \$3,500,000, for the construction of additional terminals at Newport News; elevated double track and station at Richmond, and the Piney Creek Branch, also for the purchase of the securities of the Guyandot Valley Rail-way: the Obio River & Charleston Railway of Kentucky and way; the Ohio River & Charleston Railway of Kentucky, and the Coastwise Steamship Compan'. Including the \$1,500,000 bonds sold for delivery Septem-

ber 1st, the fixed interest charge for the year will be \$3,331,281 24.

REMARKS.

A dividend of one per cent was declared from the net income June 30, 1899, payable October 25, 1899, for which the sum of \$605,278 was required.

The two new piers and grain elevator at Newport News have been completed. Your terminal facilities at that point, consisting of a passenger pier, four merchandise and three coal piers, two grain elevators and 65 miles of yard tracks, are amply adequate to handle the present business. The substructure of the elevated line through Richmond,

connecting the three divisions centering in that city, is nearing completion. The superstructure, as well as the union passenger station, should be completed in June, 1901. The latter is being constructed jointly with the Seaboard Air Line Railway, each company assuming one-half of the total cost.

The completion of the Richmond improvements will provide your company with adequate facilities for handling the growing business, and make possible a substantial reduction in the expense of operating the terminal. The Piney Creek Branch (16 miles in length) diverging from your main line at Prince, W. Va., is still under con-struction, but should be completed before the close of the calendar year. The bridge across New River and seven miles of track have been built miles of track have been built. The Guyandot Valley Railway (28 miles in length), leav-ing your main line at Barboursville, W. Va.—a station nine miles east of Huntington-is also under construction and should be completed in November, 1900. The extension of the Greenbrier & New River Railroada coal branch located on the south side of New River (5.8 miles) to a connection with your main line near Hawk's Nest station-is in progress and should be completed in December, 1900, thus providing a duplicate line from Thurmond to Hawk's Nest, a distance of 18.4 miles. This extension will develop additional coal properties, as well as provide additional facilities for the movement of the coal

CONDUCTING TRANSPORTATION.

Rental of joint track, heretofore deducted from income ... \$120.647 85

Grand Total......\$1,356,582 30

In addition to the Equipment charged to Operating Expenses there has been purchased and charged against income as extraordinary expenditure the following :

20 Locomotives	\$257.987.00
o rassenger Cars.	66 755 30
I Duing Car	13.6 0 18
Real Estate at Charlottesville	10.323 1

Total.....\$318,695 58 Your Company owns and has fully paid for 12,371 freight cars, and it has in its possession partially paid for 4,800 ad-ditional cars, costing \$2,361,485 00, the title of which is vested in the car-building company until final payments are made made.

traffic originating in that vicinity. Greenbrier & New River 5% bonds (guaranteed by your Company) to the amount of \$185,000 have been authorized and are being issued as the work progresses: \$52,000 were issued during the year to cover advances made by your Company and are now in the treasury

The Greenbrier Railway Company is building a line up the Greenbrier River from Whitcomb (a station on your main line three miles east of Ronceverte) to a connection with the West Virginia Central & Pittsburg Railway at the forks of Greenbrier River, a distance of 96 miles About 25 miles are completed, and the grading on the re-maining portion far advanced. It is proposed that its 4 per cent first mortgage bonds shall be guaranteed by your Company, running forty years, with a sinking fund provision, and be issued to the amount of \$2,000,000; from the sum realized by the sale thereof your Company's treasury will be

reimbursed for advances made for construction purposes. Your Company has acquired by purchase the securities of the Ohio River & Charleston Railway of Kentucky, covering 8.1 miles of road, extending from Richardson, on your Big Sandy Division, to White House, and has also purchased the entire capital stock (1,000 shares) and the first mortgage bonds (\$636,800) of the Coastwise Steamship Company, which owns three ocean tugs and fifteen barges, and leases three steamers engaged in the coal carrying trade between Newport News and New England.

In accordance with the contract with the Chesapeake & Ohio Steamship Company, Limited, your Company has advanced during the year the sum of \$48,850 00 for the purchase of bonds for cancellation and \$71,645 80 to recoup the steamship company for loss in operation, a total of \$120,-495 80 baving been deducted from your gross earnings for this purpose.

Heretofore, when sales of your General Mortgage 4½ per cent bonds have been made at less than par, the discount was carried as an asset under head of "Discount on $4\frac{1}{2}$ per cent bonds sold," and annually a proportionate amount thereof has been charged against Income Account. Believing that a more conservative course would be to the interest of the Company, your Directors have decided that the sum of \$1,103,513 01, representing the balance of discount on all bonds sold to June 30, 1900, should be taken from the assets of your Company and charged to Profit and Loss Account.

Your Directors call attention to the increase of about 20% in the tonnage moved and the decrease of over 5% in the revenue per ton mile, the latter having reached the low figure of 3.43 mills per ton mile. Notwithstanding this extremely low rate, freight trains earned \$1 67 per mile run, an increase of 8.5% as compared with the previous year, due to the better loading of cars and larger trains. The average tons of revenue freight per train was 488 tons,

an increase of 14.8% as compared with the previous year. There were laid 17,747 tons of new steel rails in the main tracks and new second track during the year equal to 143.4 miles. The main lines are laid with 70, 75 and 100-lb. rails, with the exception of about 50 miles, which are now being renewed. At the close of the year there were in the main tracks 147 miles of 100-lb., 821 miles of 75 lb. and 115 miles of 70-lb. rail.

There were used in maintaining existing tracks 630,307 ties, an increase of 141,214 as compared with the previous year. In addition 156,205 were used in the construction of

sidings and new second track. There was purchased for use in maintaining the main tracks 284,725 yards of ballast, an increase of 74,658 yards as compared with the previous year.

The wooden structures spanning water ways in the main line between Gordonsville and Cincinnati have been practically eliminated, but eight culverts (aggregating 308 feet) remaining in the track at the close of the year, for which permanent structures are being substituted. The elimina-tion of structures of this character on the Peninsula, James River and Levington divisions is in promote River and Lexington divisions is in progress.

A new passenger station was erected at Hot Springs at a cost of \$9,949 and a coaling station at Clifton Forge at a cost of \$15,394 30. The placing in service of the latter has reduced the cost of handling fuel coal at that point fifty per cent.

New station buildings and block signal cabins were erected at several other places.

Your Company joined with the city of Newport News in the erection of two overhead bridges at 25th and 34th streets, the expense being divided equally; the Railway Company's proportion being \$31,327 97. There is one additional street (28th) to be provided for, the cost of which will appear in the expenses for the ensuing year.

raised in capacity five tons each. The total cost was \$69,104 93.

Your freight cars are now equipped with automatic couplers and 65% with air-brakes. No charge to Capital Account has been made to cover this expenditure.

The average capacity of your revenue freight cars is now twenty-nine tons.

Mr. M. E. Ingalls, who for a period of nearly twelve years had been a director and the President of your Company tendered his resignation at a meeting of the Board held January 31st, 1900. The resignation was accepted with regret, and a resolution adopted, which appears in this report, expressive of the appreciation by the Board of his de-votion to the interests of the Company during the period in which he had acted as its chief executive officer.

Mr. Geo. W. Stevens, the General Manager, was elected a Director and President to succeed Mr. Ingalls, the position

of General Manager remaining vacant. On the same date Mr. Geo. T. Bliss resigned as First Vice-President, and Mr. Decatur Axtell, Second Vice-President, was elected in his stead, and the office of Second Vice-President abolished.

On the 13th day of March, 1900, your Board lost a valuable member in the death of Mr. C. H. Coster, who had been identified with the Company since its reorganization. At a subsequent meeting of the Board a resolution was adopted with reference to Mr. Coster's death, which appears in this report.

At a meeting of the Board on the 28th day of March, 1900, Mr. H. McK. Twombly was elected to fill the vacancy caused by the death of Mr. Coster; Messrs. Geo. T. Bliss, W. S. Horn, Samuel Spencer and Chas. D. Dickey Jr. resigned as members of the Board of Directors, and Messrs. S. M. Pre-vost, H. J. Hayden, Samuel Rea and N. Parker Shortridge elected in their stead.

The General Balance Sheet is appended hereto and also other statements and statistics, to which attention is directed.

The accounts of the Company, as has been the custom heretofore, have been examined by Messrs. Patterson, Teele & Dennis, certified public accountants, and their certificate

appears in this report. The Board makes acknowledgment to the officers and employes for the fidelity and efficiency with which they have discharged their duties during the past year.

By order of the Board,

GEO. W. STEVENS, President.

RESOLUTION ADOPTED BY THE BOARD OF DIRECTORS JANUARY 31, 1900.

At a meeting of the Board of Directors held in New York Wednesday, Jan. 31, 1900, the following resolution was adopted :

"That in accepting the resignation of Mr. Melville E. Ingalls as the President and as a Director of this Company, this Board deems it fitting to put on record its recognition and appreciation of his devotion to the interests of the company during the twelve years in which he has been its President. Under his management and through his foresight and energy, the Chesap-ake & Ohio Railway Company has risen from a discredited and inefficient line of insignificance to a prosperous and thoroughly efficient trunk line.

"The relations between Mr. Ingalls and his Board have always been especially cordial and friendly, and their sev-erance is accompanied by sincere regret on the part of the Directors. They desire to express to Mr. Ingalls their kindly personal remembrances of their long association with him, and also their best wishes for his continued welfare."

RESOLUTION ADOPTED BY THE BOARD OF DIRECTORS MARCH 28, 1900.

At a meeting of the Board of Directors held in New York Wednesday, March 28, 1900, the following resolution was adopted :

" In the death of the late Charles Henry Coster this Board has suffered a very serious loss —a loss that is almost irre-parable for those of us who for so many years have found in him a colleague and adviser, gifted with unusual sagacity, quickness of apprehension and ability of execution.

New poles were furnished for 120 miles of telegraph line and 200 miles of new wire strung.

Extensive repairs were made to 223 engines, an increase of 41 over the previous year. The average amount expended for repairs per engine owned was \$1,412 12. There are 32 engines in the shop undergoing repairs at the end of the year and none awaiting shop. All are equipped with airbrakes and automatic couplers, twenty-one having been equipped during the year.

An average of \$653 35 per car was expended for repairs on the 221 passenger cars and \$18 60 per car on the 17,170 freight cars owned.

Air-brakes were applied to 403 and automatic couplers to 1,253 freight cars at the Company's shops; 322 cars were deepest sympathy to the members of his family.

As a member of our Executive Committee for twelve consecutive years, he has shown a marvelous grasp of the many improvements and changes which from time to time have become necessary, and we feel that it is in a great measure due to his unequaled ability and untiring energy that this Company now occupies its present high position among the railroads of this country.

'Though always careful and conservative, he was, when the occasion demanded, courageous and far-sighted to a remarkable degree.

'As a friend he inspired confidence and esteem, and it is as a friend as well as a colleague that we deeply mourn the loss that we have suffered by his death.

"It is hereby resolved that this expression of our feelings be duly entered upon the minutes of this meeting, and that the President of the Company be instructed to have a copy of the same suitably engrossed and forwarded with our

In the last annual report full details were presented of the contract and arrangement made with the Scranton the contract and arrangement made with the Scranton Coal Company, which secured to your Company the trans-portation of all the coal from the mines purchased by the Scranton Company from the Lackawanna Iron & Steel Company. The operation of the contract has fully justified the policy of the Board. During the year 610,284 tons were shipped and the Coal Company has promptly met all the maturing notes issued by this Company for its account and also made a substantial payment upon the second mortgage also made a substantial payment upon the second mortgage on its property held by your Company. During the last three months considerable prominence has been given in the press to the controversy before the

Jervis & Monticello road from Summitville, would form a tbrough route from Port Jervis to Kingston.

In February, 1898, the Board of Railroad Commissioners. after a public hearing upon the application of the Kingston & Rondout Valley Railroad Company, certified that the conditions of the Railroad Law had been complied with by that Company, and that public convenience and a necessity require the construction of the railroad proposed in the articles of association of the Company.

Your officers had long contemplated an extension of the road from Ellenville to Kingston, and when the Delaware & Hudson ('ompany early in 1899 announced their inten-tion to abandon their canal, advantage was taken of an op-portunity offered to purchase on favorable terms and all portunity offered to purchase on favorable terms nearly all the debt and about three-fourths of the stock of the Port Jervis & Monticello Road, and all the rights of the Kingston & Rondout Valley Company. The road of the Port Jervis & Monticello Company consists of 22 miles from Port Jervis to Summitville, with a branch from Huguenot to Monticello —19 miles—in all 41 miles; the Ellenville Branch is 8 miles in length, and the distance from Ellenville to Kingston is in length, and the distance from Ellenville to Kingston is about 27 miles.

For many reasons no public announcement was made of this acquisition nor of the intention to extend to Kingston under the charter and certificate of the Kingston & Rondout Valley Company; but the officers of the Company were perfecting plans to push the work as early as practicable, with the expectation that the line would be in operation

late this or ϵ arly in the next year. The Delaware Valley and Kingston project was, therefore, strenuously opposed by your Company acting in concert with the Erie Company, upon the ground that their pro-posed line would parallel lines already in operation, or whose construction had been authorized by the Board of Pailwood Commissioners and which were fully canable of Railroad Commissioners, and which were fully capable of handling all the traffic that might be offered in the terri-tory traversed or coming from connecting lines. The Rail-road Commissioners granted the application, but from that decision an appeal was taken to the Appellate Division of the Supreme Court, where the matter is now pending. Meantime the Port Jervis & Monticello Road (which was

in bad condition) was put in order for safe operation, much of the right of way for the extension from Ellenville to Kingston was purchased, with ample terminals at both places; rails, ties and bridges provided for, and considerable grading done.

While a line from Port Jervis and Monticello to Kingston would not, probably, prove remunerative as an independent road, we believe that, if operated as part of your system and furnished with the train facilities that could thus be economically provided, it would develop traffic, prove a valuable feeder, and yield eventually a fair return upon its cost. The valleys traversed and intersected by the line between Ellenville and Kingston are particularly adapted to dairy products, but that industry has not been developed because of the lack of railroad facilities.

As Monticello is only about twelve miles from Liberty, which is the centre of the summer travel on your line, the road to that point can be utilized to advantage in further development of that class of traffic.

During the last four months of the fiscal year milk shipments have been somewhat retarded through the efforts of an organization which was formed with the avowed pur-pose of withholding milk from the market until a more remunerative price could be obtained for the product. The increased demand and higher prices for butter and cheese have resulted in the construction of cheese factories at various points, while factories which had been closed have reopened, and much of the product has been used at such factories instead of being shipped.

While these conditions are thought to be temporary, it may be remarked that a more profitable price to the farmer will, in the end, operate to the advantage of the railroad as well.

The best interests of a railroad company whose lines tra-

Board of Railroad Commissioners over the application of the Delaware Valley & Kingston Railroad Company for a certificate that the provisions of the Railroad Law had been complied with, and that public convenience and a necessity require the construction of the railroad proposed in the articles of association of that Company. The Company was organized in November, 1899, for the purpose of building a railroad from Lackawaxen to Kingston on the Hudson, fol-lowing substantially the line of the abandoned Delaware & Hudson Canal between those points.

The proposed road would parallel the Erie Rrailroad from Lackawaxen to Port Jervis, and from the latter place also parallel the Port Jervis Monticello & New York Railroad to its connection with your road at Summitville, the Ellenville Branch of your road, and the proposed road of the Kingston & Rondout Valley Railroad Company, a company organized in 1897 by persons interested in the Port Jervis & Monticello Company to build a line from Ellenville to Kingston, which, with the Ellenville Branch and the Port

verse an agricultural country, are necessarily closely interwoven with the welfare and prosperity of the farmer, and whatever may contribute to his prosperity, or better his condition, results favorably to a railway which exists largely upon the patronage of the locality served by its lines.

The question of rates for carrying milk, having recently been regulated by the Inter-State Commerce Commission, is one which is not likely to be reopened for some time in the future, nor, so far as can be ascertained, is there any dissatisfaction on the part of the shipper as to railroad rates.

In the annual report presented last year, the policy of the Company was announced in reference to including in operating expenses "every expenditure save only the cost of such extensions as may hereafter be made of the main line or branches, or such actual additions to the motive power and equipment as increase the earning capacity of the Com-pany, or produce new revenue therefor." (Report of 1899, lage 4.)

Acting on the principle then adopted by the Board, the capital charges for the year under consideration have

amounted to only \$135,744 67, itemized as shown in table 5, on page 36 of pam; hlet.

The attention of the stockholders is directed to the report of the General Manager and the financial and statistical statements of the Treasurer, herewith appended.

Following the method prevailing in railroad accounting and the system prescribed by the State and Inter-State commissions, the surplus earnings, over expenses and charges, since the organization of your Company, have gone to the credit of the "Profit and Loss" account. The balance to the credit of that account, therefore, represents the aggregate of surplus reported during the twenty years of the corporate life of the Company.

When the present management took charge, there was no cash surplus in the treasury, but on the contrary the Com-pany was heavily in debt. What has been accomplished in the way of establishing the credit of your Company, im-proving the road and equipment, acquiring new property and securing new business, has been related from year to year, and is well known to all interested in the property.

In achieving these results the Board has pursued a steadfast policy of using surplus earnings for improvements and additions, and investments designed to strengthen and increase the earning power of the property, and the surplus is, therefore, represented in the various items on the asset side of the balance she-t. There are in the treasury of the Company unsold bonds to the amount of \$678,000, issued for additions and improvements, but these, with other bonds which the Company is entitled to have issued for expenditures for similar purposes, should not be sold unless the proceeds are required and can be used to advantage in enlarging the property or increasing its traffic.

The following statement has been compiled, showing the gross receipts of the treasury from all sources, including the proceeds of all sales of bonds from October 1st, 1885, to June 30th, 900 and the disbursements during the same period for all purposes :

Distilling Co. of America - Distillers' Association. - Secretary T. H. Wentworth is quoted as follows regarding the trade conf-rence held at Ciucinnati last week and the formation of the Distillers' Association:

The agreements reached at the Cincinnati conference are the results of months of careful negotiations, in which all the producers and all the prominent distributing factors of the country took part. No detail of the business has been neg coted, and so long as the producers are sat-isticd with moderate profits the business should continue to show more than satisfactory results. The position of both rye and bourbon whisky is b-coming very strong, as the demoralization caused by the over-production which ended with the crop of 1893 is now at an end, the consumption having finally overtaken the production.-V. 71, p. 392, 184. 392, 184.

National Salt Co.—On "Unlisted."—The \$7,000,000 common and \$5,000,000 preferred stock have been placed on the "innlisted" list of the New York Stock Exchange.-V. 70, p. 798.

National Sugar Refluing Co.- First Dividend.-The company has declared a dividend of 11% per cent on its preferred stock, payable Oct. 2.-V. 70, p. 1151.

New Haven Iron & Steel Co.-Annual Report -The annual report for the year ended Aug. 31 shows: Gross sales, \$833,019; net earnings, \$159,875; dividends paid, \$90 000; surplus, \$79.875. The capital stock is \$509,000; accounts payable, \$6,403. The company manufactured 18,000 tons of bar iron and sold 17,600 tons. The highest received per ton was \$50.85, lowest \$35.75, averaging \$45.50. The average profit was \$9.85 - V. 70, p. 636.

New York Shipbuilding Co.-Report Denied.-President Henry G. Morse writes as follows :

In reply to your favor of Sept 4, beg to state we have not pur ohased nor are we negotiating for the Gloucester Iron Co.'s property. Our capital stock was increased to \$6,000,000 last winter, all common. -V. 71, p. 493.

Oskalousa (Ia.) Water Co.-New Stock -The action referred to last week was not, it seems, a re incorporation but only an increase of the capital stock to \$450,000, the City Council of Oskaloosa having granted an extension of 20 years of its contract with the water company for hydrants and water service and the voters of the city having ratified the contract at the general election held March 26, 1900. Messrs. Gamble and Bowen have no interest in the company now, lough . M. Colston of Baltimore (P. O. box 1110) is President. The other directors are well-known citizens of Oskaloosa. - V. 71, p 506. Pennsylvania Steel Co.-Amalgamation Plan in Abey-ance.-In our issue of August 25 under the heading Cuban Steel Ore Co. (page 392) reference was made to a plan for the amalgamation of Cuban mining iron companies with the Pennsylvania Steel Co. This plan, we understand, has been dropped for the present, but the option on the shares of the Cuban Steel Ore Co. runs until July 1, 1901, and may still be exercised to give the Pennsylvania Steel Co. a controlling interest in that property, provided the development of the Cuban mines shall in the meantime be found to justify the purchase. A maj rity in interest of the Cuban company's shareholders have deposited their stock under the voting trust agreement. This votiog trust will expire by limitation in 1915, but it is expected will be dissolved at a much earlier date.-V. 71. p 393.

That the policy of the Board was sound and has been justified by results, is demonstrated by the table given previously which shows an increase in the last elev. n years of more than 100 per cent in gross earnings, 300 per cent in net rev-enue, 600 per cent in surplus, and necessarily a decrease in the percentage of working expenses.

All of the Company's employes have, as heretofore, con-tinued efficiently and faithfully to discharge their duties and obligations to the Company.

By order of the Board,

THOMAS P. FOWLER, President.

tiring directors being Samuel Thomas, George N. Clark, S. J. Llewellyn and J. G. Caldwell.-V. 71, p. 436, 453.

Sioss-Sheffield Steel & Iron Co.-Earnings.-The estimated results for the three months ending Aug. 31 were : Profits of operation, \$199,753; deductions for depreciation and charges to extraordinary repair and renewal fund, \$27,377; net earniogs, \$172 375, applicable as follows:

3 mos. ending Ang. 51. 19:0	Net earnings. \$172,375	Bond interest. \$50,644	Taxes. \$6,202	Pref. dividend. \$.14,000	Surptus. \$1,529

Telephone, Telegraph & Cable, Co.—See Knickerbocker Telephone Co. above.—V. 71, p. 88.

Torrington Co.-Supplementary Mortgages .- The stockholders adopted at Portland. Me., on Sept. 11 a motion confirming the sale of the Standard Spoke & Nipple Co., and the spoke and nipple business of the Excelsior Needle Co.

We have been favored with the foll wing:

We have been favored with the foll wing: The change is simply a matter of detail, and in no way affects the security behind the bonds. Briefly, it is that a new company has been formed, which has taken over the spoke and nipple part of the Excel-sior Net de Co.'s business, together with the business of several other smaller companies. For this the Excelsior Needle Co has received stock to the new company, holding to day more than a majority of this stock. This stock is now pledged as collateral behind the Tor-rington bonds instead of the Standard spoke & Nipple Co. property. The amount of the Forrington securities outstanding remains un-chinged, viz.: \$1,000,000 bonds and \$1.(0),000 each of Class A, Class B and Preferred Stock.-V. 67, p. 454.

United States Leather Co.-Purchase.-The company, it is understood, has contracted to purchase the "Shaw tanner-i-s." of which Fayette Shaw is the principal owner, comprising a number of large tanneries in Wisconsin, also bark lands, etc. The transfer has not yet been completed, but will, it is reported, take place as soon as inventories are made and other details accomplished. A million dollars, it appears, was asked at the outset, but the price paid is understood to be somewhat higher. -V. 70, p. 428.

Republic Iron & Steel Co.-Directors.-W. E. Taylor and A. W. Houston have been elected directors, and the boori has been reduced from twenty to eighteen members, the re

-Messrs. F. J Lisman & Co. have just issued their quotation list for unlisted and inactive steam railroad bonds. This list is accepted as a standard authority on quotitions, and may be had on application. In this list are also quoted for the first time practically all the large issues of car trust bonds. Of late years a number of the larger systems have made considerable issues of car trusts.

-Messrs. Pfaelzer, Walker & Co. have issued a special circular analyzing the Western New York & Pennsylvania Railroad first mortgage gold 5 per cent bonds, which now come under the Peunsylvania Railroad system. The above firm is giving special attention to the market for these bonds, and is prepared at all times to purchase or sell them.

The Commercial Times.

COMMERCIAL EPITOME. FRIDAY NIGHT, Sept. 14, 1900.

The general outlook for business has undergone no radical changes. As the fall season advances there is some broadening of the demand for seasonable goods. The speculative buying, however, which was a pronounced feature in nearly all lines a year ago is now almost wholly missing, tuyers generally operating on very conservative lines; consequently, as compared with last year business is quiet, but with an average season it is fair. Reports from the iron and steel markets indicate a fair business doing, although the buying does 1 of appear to be general, being more of a spasmodic character. The upward tendency to cotton prices has continued, accompanied by a wild bull speculation. The outcome of the strike ordered in the authracite coal-fields of Pennsylvania is awaited with considerable interest. The country has stood aghast at the featful loss of life and propeity at Galveston. Texas, resulting from the hurricane which struck that city on Saturday the 8th inst. Liberal contributions are now being received for the relief of the sufferers.

Lard on the spot has been in slow demand from both refiners and exporters. Early in the week prices advanced, but the close was dull and easier at 7.15c. for prime Western and 6.75c. for prime City. Refined lard had been advanced in price, but business has been quiet, closing at 7 50c. for refined for the Continent. Speculation in lard for future delivery was quiet, but early in the week prices advanced on small receipts of hogs. The close was weaker, the coal strike being a factor.

DAILY CLOSING PRICES OF LARD FUTURES.

Pork has had a slightly better sale locally and prices have held steady, closing at \$12 25@13 75 for old mess, \$13@13 75 for new mess, \$15 50@16 for family and \$13 50@15 50 fcr short clear. Cut-meats have been dull and rather easier, closing at $6\frac{1}{2}$ c. for pickled shoulders, $9\frac{1}{2}$ @10 $\frac{1}{2}$ c. for pickled hams and $5\frac{3}{4}$ @10c. for pickled bellies, 14@10 lbs. average. Beef has been quiet and easier for extra India mess, closing at \$9@9 50 for mess, \$10@11 for packet, \$10 50@11 50 for family and \$14 25@15 75 for extra India mess in tierces. Tallow has advanced slightly, closing at $4\frac{1}{2}$ c. Stearines have held steady, closing at $8@6\frac{1}{4}$ c. for lard and $7\frac{1}{2}$ c. for oleo. Cottonseed oil has been more active and higher, closing at $36@36\frac{1}{2}$ c. for prime yellow. Butter has held steady for desirable grades, with the demand moderately active, closing steady at $16\frac{1}{2}$ @21c. for creamery. Cheese has been sparingly offered and firm, closing at $9\frac{1}{4}$ @10 $\frac{7}{3}$ c. for State factory, full cream. Fresh eggs have advanced, closing at 10c. for choice Western.

Brazil grades of coffee have continued to meet with only a very moderate distributing sale, and the tone of the market has been unsettled. The close was steady at 85% c. for Rio No. 7. Offerings of West India growths have been limited and prices have held steady at 10½ c. for good Cuenta. East India growths have bad a limited jobbing sale at steady prices. Speculation in the market for centracts has been quiet, both buyers and sellers being indifferent, awaiting developments. The close was firm on limited buying for local account. The following are the closing asked prices:

Raw sugars have been in small supply and prices have ad vanced, closing at 5c. for centrifugals. 96-deg. test, and 41/4@ 4 5 16c. for muscovado, 89-deg. test. Refined sugar has been firm but quiet at 6 15c. for granulated. Rice has been in more active demand and firmer. Teas have been dull and easier.

Kentu ky tobacco has been in moderately active demand and firm. Seed leaf tobacco has had a fairly large sale at and firm. Seed leaf tooacco has had a fairly large sale at full values. Sales for the week were 4.655 cases, as follows: 1,100 cases 1899 crop, New England Havana seed, 16@60c.; 575 cases 1899 crop, New England seed leaf, 18@50c.; 1,000 cases 1898 crop, Wiscensin Havana seed, 12@13c.; 480 cases 1899 crop, flats, 13@16c.; 200 cases 1898 crop, Pennsylvania seed leaf, 12@12½c.; 500 cases 1899 crop, Pennsylvania seed leaf, 121/2@13c.; 600 case + 11 99 crop. Zimmers. 14@151/2c., and 200 cases 1898 crop, Zimmers, 14@15c.; also 575 bales Havana at 50@98c. in bond and 250 bales Sumatra at from 80c.@\$1 80 in bond. Straits tin has been in slow demand ; under increasing supplies and freer offerings, prices have declined, closing at 29.50@30c. Ingot copper has been in moderate demand and firm, closing at 1634@17c. for Lake. Lead has had a moderate jobbing sale, closing firm at 4.3.1%c. for domestic. Spelter has been dull, closing at 4.10c. for domestic. Pig iron has had a moderate sale but prices have continued to show a sagging tendency, closing at \$13@16 50 for domestic. Refined petrolenm has been steady, closing at 8 05c, in bbls., 5.50c. in bulk and 9.35c. in cases. Naphtha unchanged at 9.55c. Crude certificates have been neglected. Credit balances have been unchanged at \$1 25. Spirits turpentire has been firmer, closing at 39@39½c. Rosins have been quiet at \$1 50 for common and good strained. Hops have been unsettled. Wool has continued quiet.

COTTON.

FRIDAY NIGHT, September 14, 1900.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached \$4,869 bales, against 52.365 bales last week and 24,261 bales the previous week, making the total receipts since the 1st of Sept., 1900, 137.234 bales, against 283,788 bales for the same period of 1899, showing a decrease since Set t. 1, 1900 of 146,554 bales.

Speculation in cotton for future delivery has been of an unusually wild character, the market throughout the week being of a panicky nature, and the advance in prices has been sensational. The hurricane which struck the Texas coast at the close of last week and resulted in the fearful disaster at Galveston also damaged the Southern Texas cotton crop. As the advices received from this section of the country since the hurricane have been meagre, the extent of the damage done is not as yet definitely known, although it is variously estimated at from 100,000 bales upward. Owing to the nervousness existing in the market previous to this disaster, due to the present small supply of cotton, particu-larly in Europe, the reports of the loss to the Texas crop, which at first were grossly exaggerated, gave fresh impetus to the bull speculalion, and active buying, both to cover short sales and for investment account, advanced prices sharply. On Tuesday there was a slight reaction. The reports received from the South indicated that the first estimates of the loss to the Texas crop were excessive and this prompted selling by longs to realize profits and also induced more ag. gressive operations on the bear side of the market. On Wednesday and Thursday, however, the market was again buoyant, based on the prognostications of a prominent crop estimator, that the maximum yield of the present crop will be 9,750,000 bales. During the late trading on Thursday there was a moderate reaction under realizing sales, based on the reports that English spinners had decided to shut down their mills into October, awaiting increased supplies of American cotton. To day there was an active and lower market. Liverpool advices were much weaker than ex-pected, and this, together with the weekly interior receipts indicating that the crop is beginning to move freely, prompted increased pressure to sell, largely from longs to realize profits, and prices declined sharply, closing at a net loss for the day of 24@30 points. Cotton on the spot has ad-vanced, but to-day reacted 1/4c., closing at 10%4c. for middling uplands.

On the basis of the rates on and off middling as established by the Revision Committee, the prices for a few of the rrades would be as follows:

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Continental stocks, as well as those for Great Britain and the afloat, are this week's returns, and consequently all European figures are brought down to Thursday evening. But to make the total the complete figures for to-night (Sept. 14), we add the item of exports from the United States, including in it the exports of Friday only,

WEATHER REPORTS BY TELEGRAPH. - Telegraphic advices to us this evening from the South are on the whole less favorable. R ports from Alabama indicate that rainfall in that State has been excessive, and damage from that cause and from caterpillars as well is claimed in some sections. Oar correspondent at Columbus, Mississippi, states that the crop in his vicinity is failing. Where rain has not interfered, picking and marketing have made excellent progress. In consequence of interruption to telegraphic communication

no advices from Texas have reached us to-night. New Orleans, Louisiana.—There has been rain on five days during the week, to the extent of two inches and fitty-eight

hundr dths. Average thermomover 79. Shrevep rt, Louisiana.—We have hal a trace of rain on two days of the week. The thermometer has ranged from 72 to 95 averaging 83.

Columbus, Mississippi.-The crop is failing rapidly. We have had rain on one day during the week, the precipitation being five hundredths of an inch. The thermometer has averaged 81. the highest being 94 and the lowest 70.

Leland, Mississippi.—The week's rainfall has been sixty-six hundre ithe of an inch. The thermometer has averaged 81.3 ranging from 69 to 94

Vicksburg, Mississippi-We have had rain on one day during the week, the rainfall being severteen hundred hs of an inch. The thermometer has ranged from 68 to 93, averaging 81.

Greenville, Mississippi.-The weather has been clear and

pleasant the past week. Little Rock. Arkansas.—It has rained on three days of the past w.ek. the rainfall reaching eighty five hundred hs of an inch. The thermometer has averaged 80, the highest being 90 and the lowest 70.

Helena, Arkans is.-Crop reports vary. The week's rainfall has been seventy five hundredths of an inch, on one day. The thermometer has averaged 81.4, ranging from 70 to 93.

Mobile, Alabama.-A heavy rain storm occurred in the interior vesterday. Crop reports are irregular bat generally unfavorable Picking and marketing are making slow progress We have had rain on three days of tu-week. to the extent of three inches and eighteen hundredths. The thermometer has averaged 82, the highest being 92 and the lowe t 72.

Montgomery, Alabama.-The rainfall since last night has b en excessive all over this section and the State as well. There has been rain on two days the past week, the rainfall reaching sixty hundredths of an inch. The thermometer has averaged 81, ranging from 68 to 94.

Selma, Alabama.-The h-avy rains of the past two days have damaged open cotton considerably. Late co ton is being de-stroyed by caterpillars. There is a decided falling off in the outlook f r c tton. Think the yield in this section will fall short of last year Rain has fall n on two dass of the we-k, to the extent of two inches and ninety hundredths. thermometer has ranged from 67 t > 90, averaging 74. The

Madison, Florida.-Rain has failen on four days of the week, to the extent of ninety hundredths of an inch. Average thermomber 84, hignest 93. lowest 73.

Savannah, veorcia. We have had rain on three days of the past week, the rainfall being one inch and three hun-The thermometer has averaged S1, the highest dredths. being 91 and the lowest 69. Augusta, Georgia.-The gathering and marketing of the crop is p ogressing rapidly. There is an active export de-mand. Partial shut down of local mills beginning next week. We have had no rain during the week. The thermometer has ave aged 82, ranging from 70 to 95 Charlest n, South Carolina.-There has been rain on three days ouring the week, to the extent of sixty-eight hundredths of an inch. The thermometer has ranged from 74 to 85, averaging 82. Greenwood, South Carolina.-Cotton is opening fast and is of fair staple. Farmers are marketing at present prices. We have had no rain during the week. The thermometer has ranged from 69 to 91. aaverging 80. Stateburg, South Corolina.-There has been no rain during the week, but the weather is now threatening. Rain, how-ever, could not help cotton now. The yield will not go beyond one-third to one-half a crop. Average thermometer 83-7, highest 95 and lowest 69.

THE AGRICULTURAL DEPARTMENT'S REPORT FOR SEPT. 1.-The Agricultural D partment's report on cotton for September 1 is given bel w:

ber 1 is given bel w: The monthiv report of the Statistician of the Department of Agri-culture shows the average condition of cotton on September to have been 68.2, as compared with 76 on August 1, 19.4, 68.5 on Sep-tember 1, 1899, 79.8 at the corresponding date in 18.38, and 76.6 the mean of the September averages of the last ten years. Except in Mississippi, where there is no appreciable change in condition there has been a decline during August throughout the entire cotton bet. The loss amounts to two points in Oklahoma, 3 in Alabama and Florida, 4 in Virginia, 6 in Texes, 7 in Louislana, 8 in Georgia, 13 in Tennessee, 14 in South Catolina, 16 in North Carolina, 18 in Arkan saa. 1 in Iudian Territ ry and -0 in Missouri. As on August 1, a condition below the O year average is almost overywhere rehorted, the defict ney being 4 points in Louislana, 9 in Georgia, 10 in Florida, 14 in Virginia and Arkansas. 15 in Tennessee, 17 in North Carolina and 18 in south Carolina and Mississippi. Only in Texas, where the condition is 6 points above the ten-year average, and in Oklahoma, where it corresponds excelly to the average of the four years for which statistics are available, is the o ndition other than distinctly and more of less seriously unfavorable. As compared with septem-ber 1, 18.9, present conditions are less favorable in North Carolina, South Carolina, Alabama, Mississippi, Louisiana and Tennessee to the extent of 9, 6, 12, 18, 4 and 12 points, respectively, and more fav r able in lexas, Arkan-as, Indian Territory and Oklahoma to the ex-tent of 16.4, 19 and 18 points, respectively. In Georgia the general condition on September 1 corresponded as closely as it was possible to estimate it to what it was on sept. 1 of last year. The condition in the different States on September 1 was

The condition in the different States on September 1 was as follows:

Virginia	Alabama	Tenneasee
North Carolina 61	Mississippi	MI880Url
South Caro ina 60	Louisiana	Oklahoma
Georgia	Texas	Indian Territory 72
Florida	Arkansas 65	

Two special agents have received telegraphic instructions to pro-ceed at once to the devastated region in Texas, and a special report will be issued as soon as possible.

That the reader may have for comparison the condition, according to the Agricultural Department, for September 1 for a series of years, we give the following, collated from i.s reports:

GOVERNMENT WEEKLY COTTON REPORT. - Mr. James Berry, Chief of the Climate and Crop Division of the U.S. Weather Burean, made public on Tuesday the telegraphic reports on the crops in the Southern States for the week ending Sept. 10, summarizing them as follows:

In the eastern part of the cotton belt the greater part of the crop is now open and poking is progressing rapidly, b t has been delayed by showers in Florida. Complaints of rust, shedding and premature opening continue, and some damage from rain has resulted to the open staple in Georgia, while the bolls are small and difficult to pick. No serious injury to cotton from the recent tropical storm is reported from the central section: in Louisiana the first nicking is visible. No serious injury to cotton from the recent tropical atom is reported from the central section; in Louisiana the first picking is yielding fairly well, but the prospects for a top erop in that State, as well as in Mississippi at d N rth Carolina, are unfavorable. Slow progress was made in picking in Arkansas and Mississippi, due to hot weather and scarcity of pickers in the first-named State. Owing to the prostration of wires by the tropical storm which recently devastated Texas, no reports concerning cotton have been received from that State.

BREADSTUFFS.

FRIDAY, Sept. 14, 1900.

The volume of business transacted in the market for wheat flour, although reaching only moderate proportions, has shown something of an increase from that recently noted. An advance in prices for the grain has had a stimulating influence, and the local trade has been a freer buyer, in some instances taking moderate sized lines. Quoted values have +hown little change, but the actual trading prices have been slightly more favorable to sellers. City mills have had a limited ale at steady prices. Rye finr has been quiet, but offerings have been small and prices have been well main-tained. Corn meal has continued to meet with only a small 608 sale, but prices have been well held.

Speculation in wheat for future delivery has been slightly 9,985 112 more active, and the tendency of prices has been towards a.

VOL. LXXI

higher basis. The character of the foreign advices has been a pronounced bullish factor in the situation; they showing more stability than has been expected. Statistically the position in the United Kingdom appears to be a strong one, it being estimated that the yield of the United Kingdom crop will be about 12,000,000 bushels less than last year, and the old reserves are figured to be at least 8,000,000 bushels smaller than a year ago. The movement of the crop in the Southwest has continued large, but the movement in the Northwest has been comparatively light, reflecting the short yield of the spring-wheat crop. Further reports have been received of damage to the crop in the Northwest in the shock and stack. An active cash demand for wheat also has been a factor fav orable to the market. Accounts from the interior have re-ported large sales to both exporters and millers, and at the seaboard there has been a large export business transacted. The monthly Bureau report, although about as expected, was of a character to give encouragement to the bull interest. To-day the market was firmer early, reflecting strong advices from the Northwest, but later in the day, under real-izing sales, prices weakened slightly. The spot market was fairly active. The sales for export here and at outports were 300,000 bushels.

Indian corn futures have been quiet, but there has been a fractional advance in prices. The feature of the market is the strength of the statistical position, the visible supply being about 2,000,000 bushels smaller than last year. The movement of the crop has increased some-what latterly, reflecting the premiums being paid for cash corn; nevertheless the receipts are smaller than a year ago and demand is sufficiently large to pre-vent an accumulation of supplies. Weather conditions as to the maturing crop have been favorable and the yield is estimated at about 2,000,000,000 bushels. A large business has been transacted in actual corn, including big purchases of new crop for delivery up to January, exporters have been conspicuous buyers, and firm prices have been paid. To day the market was firmer, particularly for the near-by deliveries. The spot market was fairly active and higher. The sales for export here and at outports were 459,000 bushels.

Oats for future delivery at the Western market have received a limited amount of attention and the tendency of prices has been towards a slightly higher basis. The movement of the crop has been somewhat under expectations, and this, coupled with a fairly good cash trade, has stimulated some speculative buying for investment account. Locally the spot market has been steady, with the home trade a moderate buyer. The export business has been checked by the high ocean freight rates ruling. To day the market was steady. The spot market was unchanged.

The monthly report of the Statistician of the Department of Agri-culture states that the average condition of corn on September 1 was 80.6. There was a decline during August amounting to 6.9 points, and the condition on the first of the present month was 4.6 points lower than on September 1, 1899, 3.5 points lower than at the corresp nding date in 1898, and 1.1 point below the mean of the September averages for the last ten years. The dectine during August amounted to 1 point in Iowa and Texas, 2 in Illinois and Kentucky, 3 in Ohio, 10 in Fennessee, 12 in Nebraska, 15 in Pennsyl-vania and Missouri and 16 in Kansas. Notwithstanding the general decline, several important cor 1 States still report a condition con-siderably above their respective ten year averages, such excess amounting to 12 points in Illinois, 14 in Ohio, 15 in Indiana and 23 in Iowa. On the other hand, Pannsylvania. Tennessee, Kansas and Texas report 10, 19, 15 and 8 points below their respective ten year Texas report 10, 19, 15 and 8 points below their respective ten year averages.

The condition of corn on July 1, August 1 and September 1 in each of the last three years is shown in the following: RN.

Average U. S. 80.6 87.5 89.5 85.2 89.9 86.5 84.1 87.0 90.5 The condition at harvest of winter and spring wheat combined was 69.6, against 70.9 on September 1. 18.9, 88.7 at the corresponding date in 1898, and 80.9 the mean of the September averages for the last ten years. The conditions in Vissouri, Kansas and Texas are 18, 32 and 26 poir te above the respective ten - ea. averages. On the other hand, Illinois and Iowa are 1 Wisconsin 6, Nebraska and Wash-ington 7, Pennsylvania 15, California 18, Minnesota 24, South Da-kota and Oregon 26, Michigan 43, Indiana 49, North Dakota 57, and Ohuo 60 points below their respective ten-year averages. The average condition of oats when harvested was 42.9, against 85 on Aug set 1, 1900, 87.2 on Septe - ber 1, 1899. 79 at the corresponding date in 1898 and 79.8 the mean of the September averages for the last ten years. Since August 1 there has been a decline of 1 point in New York, Pennsylvania and Illinois. 3 points in Iowa and Missouri, 4 points in Michigan and 16 points in Nebraska. On the other h and, there has been an improvement of 1 point in Wisconsin and Kansas, and of 4 points in Minuesota, with no above table oha ge in Ohio and Indiana Of the States having one million acres or upward in oats, New York reports 2, Pennsylvania 3, Nebraska 8, Wisconsin 9, and Minresota 26 points below their respective ten-year averages. while Iowa repor s 6, Ohio 10 Indiana 12, Illinois 19 and Kansas 24 points above their respective ten-year averages. The average condi ion of barley when harvested was 70.7, ag sinst 71.6 on August 1, 1900, 86.7 on September 1, 1899, 79 2 at the corres-ponding date in 1898, and 83.9 the mean of the Septer ber averages for the last ten years. Since August 1 the condition of barley has improved 1 point in New York and Minnesota, 2 points in Wisconsin, and 3 in Sou h Dakota It has declined 1 point in North Dakota, Iowa and Kansas and 3 points in California. In New York and Iowa the condition at harv st corresponded with the ten-year averages. In Kansas

consin, South Dakota, Minnesota and North Dakota it was 10, 14, 17, 26 and 59 points below. The condition at harvest of winter and spring rye combined was 84.2, against 82 on Sept. 1, 18.94, 89.4 at the corresponding date in 18.98 and 86.5 the mean of the September averages for the last ten years. Kansas is the only State having 10.0,00 acres or upward in rye reporting a condition exceeding its ten-year average. The average condition of buckwheat on September 1 was 80.5, as compared with 87.9 on August 1, 1900; 75.2 on Sept. 1, 1899; 83.8 at the corresponding date in 1898 and 86.3 the mean of the September averages for the last ten years. In New York and Pennsylvania, which together produce about five-sevenths of the entire crop, there was a decline of 11 points and 5 points, respectively, during August.

The condition of the various crops on September 1 for a series of years is as follows:

AGRICULTURAL DEPARTMENT'S SEPTEMBER REPORT,-The report of the Department of Agriculture for September 1 respecting cereal crops was issued Sept. 10, as follows: Buckwheat.......80.5 75.2 83.8 95.1 93.2 87.5 69.2 GOVERNMENT WEEKLY GRAIN REPORT .- Mr. James Berry, Chief of the Climate and Crop Division of the U.S. Weather Burean, made public on Tuesday the telegraphic reports on the grain crops in the various States for the week ending

Sept. 10 as follows :

Sept. 10 as follows: WEATHER — Hot and dry weather has been a marked foature of the reports from the greater number of the States east of the Ricky Mountain slope, excepting the Northwest and the upper peninsula of Michigan, where rains have retarded work and caused some damage to outstanding crops. Ben-floial rains occurred in Florida, New Mexico and portions of Alabama Louisians. Itilinois, Ohio, New York and Pennsylvania. Droughty conditions, however, prevail in New England, the Atlantic Coast States, the central valleys, northern por-tion of the Gulf States, and the southern plateau region Generally favorable weather conditions prevailed on the Pacific coast, although rains caused some delay to farm work in Oregon, and slightly dam-aged late fruit in California CORN.—The hot, dry weather has rapidly matured corn, and under

aged late fruit in California CORN.—The hot, dry weather has rapidly matured corn, and under existing conditions the crop should be practically safe from frost by September 15. Outling is in progress in all sections, and an excellent crop is assured in the principal corn-producing States. Late corn is drying in Central Kansas, is seriously injured by drought in portions of Kentucky, and will be short in West Virginia, Virginia, portions of Peunsylvania and the South Atlantic States.

and the second

The movement of breadstuffs to market as indicated in the statements below is prepared by us from the figures collected by the New York Produce Exchange. The receipts at Western lake and river ports for the week ending Sept. 8, and since Aug. 1, for each of the last three years have been:

THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., Sept. 14, 1900.

Up to a week ago buyers of cotton goods, if not indifferent to the course of the cotton market, showed little indication of alarm and were still moderate purchasers outside of print cloths. This week has shown an entire change in their attitude towards all descriptions and the volume of business, while large, would have been much greater had sellers met the demand as freely as it came forward. Staple cottons as long as available at old prices were speedily taken up, and as sellers advanced prices buyers followed with little hesitation so long as quick deliveries could be secure 1. The market at the close is in an extraordinary position. Stocks on hand have been reduced to famine point in many lines, while for forward delivery most sellers are refusing to entertain bids, having, under instructions from their manufacturers, withdrawn from the market for the time being. The stock of about 1,500,000 pieces of cloth reported carried in Fall River at the beginning of the month is said to be nearly all disposed of. Bids at 1/2 c. advance for the balance of "pool" goods are declined at the close, with the committee refusing to make quotations for contracts. Even the improvement here noted is decidedly inadequate compared with the rise in the price of cotton, and a heavy curtailment of production is regarded as certain in the near future, the movement in that direction having already made considerable progress.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending Sept. 10 were 2,723 packages, valued at \$172,820, their destination being to the points specified in the tables below :

	1900.	1899.		
Week. Since Jan. 1.		Week.	Since Jan. 1.	
32 1	1,593 1,266	78 2	1,550 723 179,595	
	8,889 23,259	224 2,051	1,880 34 539	
618	19,328	38 631	$\begin{array}{r} 11,321 \\ 21,606 \\ 2.998 \end{array}$	
263 1,390	8,516 30,926	108 555	7,392 32,389	
385	$\frac{6,572}{246,412}$	86	5,836	
	32 1 9 618 25 263 1,390 385	Week. Since Jan. 1. 32 1,593 1 1,266 140,445 8,889 23,259 9 2,879 618 19,328 225 2,239 263 8,516 1,390 30,926 385 6,572	$\begin{array}{c c c c c c c c c c c c c c c c c c c $	

The value of the New York exports for the year to date has been \$10,764 426 in 1900, against \$10,790,024 in 1899.

Heavy brown sheetings may be quoted on an average about $\frac{1}{2}$ c. per yard higher than a week ago for spot goods, with little to be had. Prices for goods to be made are not quotable as there are so few sellers open for forward business that buyers have no general opportunity to show what they are willing to pay. Fine brown sheetings and fine grey goods are strong and $\frac{1}{4}$ c. to $\frac{1}{2}$ c. higher to buy. A good business has been done in duck with most makes advanced $\frac{1}{2}$ c. Advances of $\frac{1}{2}$ c are also frequently reported for such colored cottons as denims, ticks, checks, etc., and only limited quantities available thereat. Wide sheetings have advanced $\frac{7}{2}$ to 10 per cent and some makes withdrawn alt gether. Bleached cottons are generally well sold up but not quotably higher; orders for goods to arrive are taken at value only. Kid-finished cambrics advanced $\frac{1}{6}$ c. per yard. Staple pints have been in much improved demand for all varieties and close the week with a hardening tendency. Fancy prints are being rapidly cleaned up in fall work. Spring specialties selling well. Staple ginghams broke $\frac{1}{6}$ c at the close of last week but on large sales have recovered the decline Dress ginghams are quiet. Print cloths have been in extensive request and sa es for the week large; latest business shows $\frac{3}{6}$.

WOOLEN GOODS .- The only variation from the previous dull condition of the woolen goods market has been a fair demand for some of the new lines of staple goods put on the market lately at lower prices than the standard goods of clays, serges, etc., for men's wear. Regular lines have continaed in indifferent request and outside of "guaranteed" goods show considerable irr-gularity in prices in both staples and fancies. Heavy-weight fancies for quick delivery are weak and selling slowly. Complaints of cancellations are still heard in a number of quarters. There has been no improvement in the demand for overcoatings and the martet is easy to buy in. Cloakings in fair r quest at previous prices. Dress goods are generally steady in staples, but weak and irregular in most descriptions of fancies. An auction sale during the week of some 3,500 pieces was without marked influence. Flancels and blankets unchanged. FOREIGN DRY GOODS .- General business in this division has been without material change this week. Dress goods in moderate domand for fine staples and specialties at previous prices. Silks and ribbons continu, quiet and irregular. L nens dull but steady. Burlaps tending upwards, with more doing.

STATE AND CITY DEPARTMENT.

News Items.

Elyria, Ohio.-Bond Litigation.-We are advised that the \$300,000 water bonds advertised for sale on September 11 were not sold, as a petition had been filed in Court asking for an injunction against the sale of these bonds. The hear-ing has been set for S-ptember 28. Our informant states that the probabilities are that the case will go to the higher courts before it is settled.

Texas .- Southern Texas Storm Swept -The southern part of Texas was swept by a hurricane on Saturday, September 8, resulting in a great loss of life and property. The full force of the storm was centred over the city of Galveston, which was completely inundated by the waters of the Gulf of Mexico. The loss of life in Galveston alone is estimated at from two to three thousand, while the property loss runs high into the millions. While the magnitude of the disaster at Galveston eclipses that of other cities in Texas, many other places along the coast suffered greatly in both life and property. An account of the disaster will be found in an article under Financial Situation in our editorial columns.

Bond Calls and Redemptions.

San Antonio, Texas.-Bond Call.-The following bonds have been called for payment October 1 at the National Bank of Commerce, New York City:

\$40,000 refunding bonds, Nos. 1 to 80, inclusive. Denomination, \$500; date, Sent. 1, 1881.
