up by the various clearing houses at noon on Saturday, and hence in the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night.

We present below our usual detailed figures for the previous week, covering the returns for the period ending with Saturday noon, October 6, and the results for the corresponding week in 1899, 1898 and 1897 are also given. In comparison with the preceding week there is a an increase in the aggregate exchanges of two hundred and forty one million dollars, the gain at New York being one hundred and fifty three millions. Contrasted with the week of 1899 the total for the whole country shows a decline of 23.2 per cent. Compared with the week of 1898 the current returns record an increase of 14.5 per cent, and the excess over 1897 is 28.5 per cent. Outside of New York the decrease from 1899 is 7.0 per cent. The excess over 1898 reaches 19.3 per cent, and making comparison with 1897 the gain is seen to be 28.9 p. c.

THE BANKERS' AND TRUST SUPPLEMENT.

In our BANKERS' AND TRUST SUPPLEMENT to-day, a copy of which is sent to every subscriber of the CHRON-ICLE, we present to our readers a complete report of the proceedings of the annual convention of the American Bankers' Association held last week at Richmond. The SUPPLEMENT contains 116 pages, and, as the reader will notice, is very handsomely gotten up. The American Bankers' Association now has a membership of 4,500 whose aggregate capital, surplus and deposits (not counting the private banks) amount to 6,580 million dollars, and its doings are hence engrossing more and more attention each year.

The SUPPLEMENT embraces the proceedings of the Trust Company Section, a distinct department of the Association. The discussions in that section deal directly with matters affecting this class of financial institutions, and no trust company, whether a member of the Association or not, can afford to neglect to give attentive consideration to the same.

As showing the esteem in which the BANKERS' AND TRUST SUPPLEMENT is held, we may be pardoned reference to the extensive amount of advertising patronage of the very highest class which it commands. We are not exaggerating, we think, when we say that a choicer and stronger list of financial advertisements cannot be found anywhere.

THE FINANCIAL SITUATION.

Our stock market has continued in the same apathetic state it has so long maintained, with prices dur. ing the most of the week irregular. Tuesday there was a firmer tone. This was due primarily to the fact that the low rates for foreign exchange were in the afternoon of that day followed by the withdrawal of a small amount of gold at London and Paris for shipment to New York. The truth is our money market had reached a point which made stock operations somewhat risky; consequently, evidence of fresh supplies of gold from Europe, though small, were made much of. A few hundred thousand dollars were for the moment construed as the harbinger of many millions coming, and a steady 2 per cent money market restored was believed to be almost in sight. Since then there have been other amounts taken in London, Paris and Berlin for shipment to New York, including \$3,500,000 yesterday; all the details are given below in our remarks upon foreign exchange. Europe will let no gold come this way upless it cannot be avoided. Tuesday's withdrawal of £50,000 from the Bank of England for New York was followed by the announce. ment that the Bank had advanced its price for American gold coin to 76s. 9d. from 76s. 8d. The suc ceeding day the open market rate for bar gold advanced 1d., to 77s. 11d. London dispatches also stated that any considerable shipments of that metal at this time to America would lead to an advance by the Bank in the minimum rate of discount. The public knows, even without these announcements, that Europe, deprived of the large monthly contributions of gold from Africa for a year or more and involved in working out grave international political problems, is not in condition to willingly part with any important proportion of its reserves.

clearly evident every now and then, is a common belief in the better political outlook. This state of public opinion is no doubt a fact, although we sometimes think it an unfortunate condition, fearing it may weaken effort. The election of Mr. Bryan would be such a fearful result, fraught with hopeless disaster to almost every industrial interest, that to entertain a feeling of confidence in his defeat before it is accomplished is not easy and seems hardly to be safe. It needs to be kept in mind that the battle is not won until the votes are cast and counted. Moreover it cannot be too often stated that what is most to be desired at this election is not simply success, but a success so overwhelming as to leave no chance of the survival of Bryanism. Industrial affairs cannot afford to be interrupted every four years by a contest pivoted on our standard of values or to be disturbed by a hysterical young gentleman who has no more conscience than to go around the country striving to stir up illwill between capital and labor. The public stamp of approval of our gold standard and disapproval of communism should be so emphatic on this occasion as to make the trial final. Otherwise we shall not have gained much.

The question arises whether the re-election of Mr. McKinley is to be the occasion of a large general advance in the stock market? There is certainly a wide feeling prevailing; that the buoyancy which followed the defeat of Mr. Bryan in 1896 will, in considerable measure, be repeated in case of his defeat in 1900. Indeed there were statements current on the market last week, which were repeated with an air of faith, that capitalists were gathering in funds to invest in stocks as soon as the election result should become known. We do not need to say that the reports were mere fabrications. Men with money to invest do not flock together like birds in the autumn, and so make themselves conspicuous in what they are about to do. If a victory is the outcome of the election contest, and if it proves to be so decided as to make it tolerably certain that the fight will not have to be renewed again, of course the effect on all branches of our industrial system would be much greater than if the results should turn out to be less complete. That is so, because the stability of contracts and reliance upon the future of our standard of values would be absolute, and the enterprising and investing classes could go to work knowing, not only that during the coming three or four years but presumably during all time, the basal factor in their plans was put beyond the power of any demagogue to trifle with. Should, on the other hand, the victory be less sweeping, the public, after the experience had, could not again trust the situation fully. This difference would be likely to have most influence on the immediate course of stock values. In either case supposed, does it not seem as if the events of 1896 could not be repeated ? Prices are already high-not low as four years ago; so that a like opportunity for advance is lacking. Moreover, the prospect for increased earnings the next four or five months is admittedly not as promising as it was on the former occasion, and especially last year. Hence reliance would have to be placed on the slower development of general industry, and that response would come quicker and be much more decided if the expression of the opinion of the people was emphatic.

A further feature that helps to impart an undertone of firmness to security values, which becomes so

The crop report of the Agricultural Bureau at Washington for the 1st of October, issued this week, does not change materially the indications previously furnished of the probable extent of the year's harvests. The condition of corn is placed 2.4 points lower than in September, being put at 78.2, which compares with 82.7 on October 1 1899, 82 at the same date in 1898 and 81 the mean of the October averages for the last ten years. Nevertheless these figures are still taken to mean a crop closely approaching 2,000 million bushels. Last year the corn yield was 2,078 million bushels. No further report on the wheat crop is made. The estimates of the yield vary from 500 to 525 million bushels. Last year the crop was 547 million bushels, while in 1898, when the yield was of extraordinary extent, it was 675 million bushels. In the case of oats the Department gives the product per acre for each State, from which it appears that the crop will slightly exceed 810 million bushels. In 1899 the oats harvest was 796 million bushels and in 1898 730 millions. A feature of this month's report is that the Department makes a smaller decline in the condition of cotton than operators on the Cotton Exchange had looked for. The condition now is given 67, as against 68.2 on the 1st of September and against 62.4 in October of last year.

Not too much stress should be laid upon the continued lack of activity in the iron and steel trades, nor upon the reports showing a further contraction in the production of iron, attended at the same time, despite the diminished output, by a continued increase in furnace stocks. The figures of the "Iron Age" are generally accepted as authority in this respect, and they indicate that 15 more furnaces went out during the last month, involving a decrease of 8,609 tons per week in the production, which now stands at 223,169 tons per week, against 296,376 tons on June 1, no less than 80 furnaces having in the interval become idle. Stocks October 1 are reported 661,998 tons, against 625,157 tons September 1 and 334,680 tons June 1. But all this really signifies very little at this juncture. Everybody knows that the Presidential campaign, involving Bryanism, hangs as a pall over all industries. After the election there will no doubt be a different story to tell. At all events before that issue is determined no change can be expected.

While there has been no change in the official rates town banks. The offerings seem to be increasing, of discount by any of the European banks this week, though not to such an extent as to cause an accumulathe open market rates at the chief centres have been tion of names, but it is expected that next month there will be a much more liberal supply. Rates are quite firm. In order to protect their stocks of gold the Bank of England and the Bank of France have been $5@5_{4}$ per cent for sixty to ninety day endorsed bills recompelled to resort to an advance in the selling ceivable, $5\frac{1}{2}@6$ per cent for prime, and 6 per cent and price of the metal. The Bank of England on above for good four to six months single names. Some Tuesday raised its selling price for Eagles 1 penny of the banks report sales of short endorsements at 6 per per onnce, to 76 shillings 9 pence, and gold bars cent by merchants desiring to obtain accommodation were held by the Bank at 78 shillings half a until after the election. penny. On Thursday it was reported that the price of gold bars in the open market at London had The Bank of England minimum rate of discount been advanced half a penny, to 77 shillings 11 pence remains unchanged at 4 per cent, but the Bank per ounce. The Bank of France holds its gold at a in lieu of advancing its rate has resorted to the premium. The statement of the New York Associexpedient of raising its selling price for gold, as ated Banks last Saturday was exceptionally unfavornoted above. The cable reports discounts of sixty able, showing a reduction of more than one-half in to ninety-day bank bills in London 4 per cent. The the surplus reserve compared with the return of the open market rate at Paris is 3 per cent and at Berlin previous week. The specie fell off \$5,752,300 and and Frankfort it is 44 per cent. According to our

the legal tenders decreased \$2,822,400, while the surplus reserve was reduced by \$6,700,700, to \$6,241,900. The redemptions of extended 2 per cent bonds have thus far amounted to \$22,021,300, while the applications for the exchange of fundable bonds for the new 2 per cents amounted at the close of business on Thursday to \$341,235,050.

Money on call, representing bankers' balances, has been active this week, influenced by the bank statement of last week and also by the continued drain of currency to the interior. But the higher rates seem to have brought into the market, at least in the last hour each day, fairly liberal offerings of money by commission houses, who have sought thus to secure temporary employment for their surplus funds. This will account for the wide range of 4 to $1\frac{3}{4}$ per cent in the rates for the week at the Stock Exchange. The average until Thursday was about 3 per cent, but on that day loans which had been standing at 3 per cent were marked up to $3\frac{1}{2}$ per cent, making the average for the week about $3\frac{1}{4}$ per cent. On Monday loans were made at $3\frac{1}{2}$ per cent and at 2 per cent, with the bulk of the business at 3 per cent. On Tuesday the transactions were at $3\frac{1}{2}$ per cent and at $2\frac{1}{2}$ per cent, with the majority at 3 per cent. On Wednesday loans were at 4 per cent and at 2 per cent, with the bulk of the business at $3\frac{1}{2}$ per cent. On Thursday transactions were at $3\frac{1}{2}$ per cent and at $1\frac{3}{4}$ per cent, with the majority at $3\frac{1}{2}$ per cent. On Friday loans were at $3\frac{1}{2}$ per cent and at $2\frac{1}{2}$ per cent, with the bulk of the business at $3\frac{1}{2}$ per cent. Banks and trust companies quote $3\frac{1}{2}$ per cent as the minimum, some of the institutions, however, obtaining 4 per cent. Though time loans are quoted by brokers at 5 per cent for all periods, from sixty days to six months, there appears to be plenty of money offering and no special urgency in the demand by commission houses, who seem to have made ample provision early in the season for their requirements at this period of the year. Banks report some loans on grain and other merchandise at 6 per cent for sixty to ninety days and contracts for four months at $5@5\frac{1}{2}$ per cent on collateral consisting of all railroad properties without any admixture of industrials. These institutions also report some demand for thirty to sixty day stock collateral loans at 6 per cent, borrowers desiring to tide over the election period. The commercial paper market is quiet, with very little buying by local institutions; the business is chiefly with near-by out-of-

THE CHRONICLE.

special cable from London the Bank of England lost $\pounds 1,371,457$ bullion during the week and held $\pounds 33,-599,845$ at the close of the week. Our correspondent further advises us that the loss was due to exports of $\pounds 873,000$ ($\pounds 531,000$ to Germany, $\pounds 192,000$ to Egypt, $\pounds 50,000$ to America, $\pounds 50,000$ to Roumania and $\pounds 50,-000$ destination unknown) and to shipments to the interior of Great Britain of $\pounds 498,000$ net.

The foreign exchange market has again been influenced this week by a pressure of cotton bills supplemented by drafts against grain and provisions drawn not only upon London but upon the chief continental centres, and consequently the tendency has been almost uninterruptedly downward and only temporarily arrested by buying to cover and for remittance. The offerings of cotton bills were quite large on Monday, reflecting an accumulation in the mails since the close of the previous week, and these bills had no sooner been absorbed than there came a fresh supply, which proved to be largely in excess of the inquiry. This was followed by a natural reaction in the tone, though without any recovery in rates, and the market was a shade steadier for long, though heavy for short and for cables thereafter until Friday, when the whole market grew steady. The feature of the week has been the first important importation of gold for the season. The Bank of British North America inaugurated the movement, procuring on Tuesday a consignment of £50,000 sover. eigns from the Bank of Eagland in exchange for bank notes, and on the same day it was announced that the National City Bank had obtained 1,000,000 francs in gold at Paris for shipment hither. The Bank of England, as above noted, on Tuesday advanced its selling price for American Eagles to 76 shillings 9 pence per ounce, holding gold bars at 78 shillings half a penny, and bars were then quoted in the market at London at an advance of half a penny, to 77 shillings $.0\frac{1}{2}$ pence; subsequently it was reported moving upward to 77 shillings 11 pence. These prices for gold coin and for bars prohibited the import of the metal from London at the then ruling rates for sight sterling, and it was reported that applications at the Bank of France for gold for export had caused an advance in the premium on gold by that institution. On Wednesday the cable announced the withdrawal of £100,000 gold from the Bank of England for shipment to New York, but the consignees were not disclosed. The importation of sovereigns by the Bank of British North America gave rise to the suggestion that larger amounts of these coins might be obtained from the Bank of England, in exchange for its notes, and imported without loss. It was said, however, that while the Bank could not refuse to part with sovereigns were application to be made for them for export, an attempt to procure them in round amounts would probably result to the disadvantage of the applicant in his future transactions with the Bank, and therefore bankers in London would be unlikely to resort to this method for obtaining gold. It was also reported that it would really be more advan. tageous for importers to procure American coin in London, even at the high price demanded by the Bank, than to seek to obtain sovereigns, for the reason that the latter were more or less abraded while the American coin would most likely be of nearly a full average weight. On Friday it

was announced that Lazard Freres had engaged \$2.000,000 gold for shipment hither, \$1,000,000 of which, in American gold coin, was obtained from the Bank of France, for export on the Bretagne, and \$1,-000,000 in gold bars was procured from the Bank of England for shipment on the S⁺. Louis. It was also announced that Kuhn, Loeb & Co. had bought \$500,-000 American gold coin in the open market at Paris for export to New York, and that Seligman & Co. had procured \$1,000,000 gold in Berlin for shipment hither. The National City Bank obtained a consignment of gold on that day, but the officers of the bank declined either to state the amount, the kind of gold, whether coin or bars, or the source whence The engagements thus far anit was obtained. nounced this week amount to \$4,450,000, exclusive of the gold secured by the National City Bank on Friday. The Bank of British North America reports the arrival at Seattle of \$910,000 gold bullion from the Yukon, which will be transferred to this city through Assay Office checks, and the Canadian Bank of Commerce reports \$150,-000 in such checks, representing bullion deposited at Seattle and San Francisco, which will arrive early next week. The Assay Office paid \$767,352 52 for domestic bullion, and the gold received at the Custom House during the week amounted to \$26,-094.

minal rates for exchange fell from 4"811@4'82 for sixty day and 4 85½@4 86 for sight on Monday, to $4.81@4.81\frac{1}{2}$ for the former and $4.84\frac{1}{2}@4.85\frac{1}{2}$ for the latter by W. dnesday. Rates for actual business opened on Monday quite weak at a decline of threequarters of a cent all around, compared with those at the close of Friday of last week, to 4 801 @4 803 for long, $4\ 84@4\ 84\frac{1}{4}$ for short and $4\ 84\frac{2}{4}@4\ 85$ for cables. The tone was a shade steadier at the decline on the following day, with lighter offerings of bills, and rates at the close remained unchanged. On Wednesday the market was weak again and rates for actual business for long fell half a cent, to 4 80@4 804, while those for short and for cables declined one-quarter of a cent to $4\ 83\frac{3}{4}@4\ 84$ for the former and $4\ 84\frac{1}{2}@4\ 84\frac{3}{4}$ for the latter. The market continued weak on Thursday, but though sales of long sterling were made at 4 79%, this class of bills closed at a reaction and at unchanged figures, compared with those on the previous day. Sight sterling and cables, however, fell one quarter of a cent to 4 832 @4 832 for the former and 4 $84\frac{1}{4}@4$ $84\frac{1}{2}$ for the latter. The market was steadier on Friday at a recovery of one-quarter of a cent for short and cables. It may be noted that while rates for sterling have been generally weak those for continental exchange have likewise fallen, indicating liberal offerings of bills and a light inquiry. The following shows

daily posted rates for exchange by some of the leading drawers.

THE COAL STRIKE.

As we write, the striking mine workers are in conference at Scranton, deliberating in open convention on the proposition of their employers. The outcome of the conference, if it is not known to the reader when these pages meet his eye, will be known very shortly. It is only possible to say at the moment that for almost the first time in our industrial history an offer of so considerable an advance in wages as ten per cent is being scrutinized by the employes on the ground that possibly, by holding out and re fusing to work even at that increase, they may secure still larger concessions from the companies.

A few cardinal principles in this coal strike controversy ought to be kept in mind. One is, that because a laborer does not get as high wages as he wishes, it does not follow that he is getting less than he deserves and as much as his employer can afford. This proposition would ordinarily seem self-evident; but the sentimental view very commonly taken of the labor question actually seems at times to suggest a different supp sition. There is a class of people that habitually assumes that a striking laborer is necessarily protesting against injustice. One other hardly less important principle is that an arbitrary raising of wages means an arbitrary advance of prices. The public therefore, if it agrees that wages ought to be increased, thereby agrees also that it ought itself to pay more for the product of such labor. The anthracite episode is likely to lead, later on, to some sober thinking on this phase of the question.

putable. It is as clear as the right of a manufacturer to demand a higher price for his goods and to refuse to sell if he does not get it. Both the laborer and the manufacturer, however, take under such conditions certain risks, and are bound to lose eventually if their demands are unreasonable. If the manufacturer asks a price which the consumer cannot afford to pay, the consumer will stop buying and the business will be ruined. If the laborer asks for wages which his employer cannot afford to pay, the manufacturer will refuse further employment, and, in an emergency, go out of business. This risk clearly confronts either class in submitting its ultimatum.

It is quite conceivable that manufacturers might so band together that the most extortionate price might be exacted, under the penalty of preventing the consumer from buying any goods except at an unfair price. The law is apt to deal with a monopoly of this sort, and what the civil law does not accomplish the working of economic law will do; for at a given point the consuming community as a whole will simply give up buying. It has correspondingly been the dream of certain labor leaders to band together the laborers so that if the employer will not pay the price demanded by a union's representatives, he shall be denied the privilege of obtaining labor at all. It is clear that if such a project could be carried out efficiently in the case of a labor union, the price of labor might conceivably be placed at figures as unjust and irrational as those imposed by the manipulator of a corner.

The civil law which interferes to restrict and regulate extortion by a producer has no recognized place in restricting a similar undertaking by a laborer. This is undoubtedly due to the fact that in the past it has been assumed that the employer could fight his own battles. But we are much mistaken if the same economic laws do not operate with a combination of laborers as with a combination of producers. The profit to the producer and the wages of the laborer are two co-ordinate factors which go into the cost of goods placed on the market. Nobody doubts that artificial and unreasonable expansion of the producer's gains will force such a price for the finished product that the consumer will be driven from the market. But the laborer's pay, which makes up an even greater part of the final price of an article, cannot be arbitrarily manipulated without a similar result.

This is the experience through which producer, laborer and consumer are destined to pass in the matter of the wage readjustment in the coal trade. There had been some effort, months before the strike began, to advance the price of anthracite on the bald plea that coal ought to move up when iron, copper, lumber, cotton, tin ard a score of other commodities already had been advanced rapidly. No such advance was made, and the reason was that producers of coal believed that a higher price would restrict the buying capacity of the public, and hence defeat its own purposes. Now comes the miner with a peremptory demand which points to the same result. The operators have yielded; but in yielding they of course propose that the higher wage cost shall be added to the price, and paid by the consuming public. But if the mineowners were right six months ago in assuming that a higher price created by themselves would restrict consumption, it must be true that a higher price with his existing arrangements, is of course indis- created by the laborers will have the same result. If

The right of a laborer to strike for better wages or for better conditions of industry, if he is not satisfied the proposed move of the one was unwise economic policy, the accomplished move of the other can have been nothing different.

The chief argument for voluntary arbitration lies in this fact. Demands for higher wages are frequently warranted by circumstances. The demands of the tin-plate workers last fall, and of laborers in other industries where the high tide of industrial demand had brought exceptional prices, were probably in most cases justified. When the employers granted their laborers' demands as readily as they did, it is likely that an arbitration board would have made a similar This cannot be said of the present coal award. strike. There had been, in the first place, no such rise in prices as marked out the reasonableness of higher wages in the metal trades last year. But beyond this, a much more suspicious incident of the whole matter was the refusal of the miners of G. B. Markle's colliery to submit their case to the arbitration already pledged in writing as a recourse. That the miners broke their explicit promise in this matter at a time when the mine-owners publicly declared their willingness to abide by their agreement, is admitted with cynical frankness. The arbitration agreement was the miners' own proposition; therefore their refusal cannot have arisen from dislike to the principle of arbitration. The only obvious alternative lies in the inference that the miners broke their pledge because they feared that unbiased arbitrators might decide the case against them.

What the outcome of this whole matter will be we do not pretend to guess. It is perfectly well known that the shrewd selection of a Presidential campaign season by the Miners' Union for carrying out their strike has given them a peculiar advantage. They calculated that their employers, remembering the violence and bloodshed of the Homestead strike of 1892, would shrink from invoking a similar outbreak at a time when it might turn to the candidate of agitation all the sentimental sympathizers for the workingman. That the Miners' Union is itself aware of the manner in which it forced acquiescence is seen in the demand submitted this week, that the mine owners pledge absolutely the maintenance for a year from now, and with no regulation of a sliding scale, the higher scale of wages demanded. In other words, even if to day's demands were to turn out excessive and even if the price of anthracite, from natural causes, were to fall materially below the recent level, wage payments must remain unchanged. Coming from a body of laborers a part of whom have already violated their own signed contract with their employers, this proposition may at least be described as curious.

the late year's gain as were noted in the gains of previous years-that is, the improvement came more largely from the merchandise traffic than from the coal traffic, while at the same time the passenger traffic has also continued to expand. There was this difference, however, in the late year, that the coal traffic, the revenues from which previously had been stationary or declining, recorded a substantial increase. The increase amounted to \$1,285,502 over the total of the year preceding. But though the coal receipts rose \$1,285,502, the earnings of the Railway Company from merchandise traffic increased \$1,925,712, and the passenger earnings increased \$425,121. Including revenue from mail and miscellaneous sources, aggregate gross earnings in 1899-1900 were \$26,-109,733, as against \$22,456,192 in the year preceding; the increase in the whole total was thus \$3,653,541, of which hence only 11 million dollars was contributed by the coal traffic.

The progress made in enlarging the merchandise business is still more striki ngly brought out if we extend our comparisons a few years further back. In 1894 95 the coal traffic yielded earnings of \$9,759,037. In the late year the earnings from that source were \$11,371,203, so that the increase for the five years has been, roughly, $1\frac{5}{8}$ million dollars, or only about 16 per cent. On the other hand, the earnings from the merchandise traffic have, in the same interval, risen from \$6,402,666 to \$9,750,601, an increase of over $3\frac{1}{3}$ million dollars, or more than 50 per cent.

To understand properly the significance of these comparisons, it must be borne in mind that the growth in revenues has occurred in face of a decline in rates—that is, that the rate per ton per mile though having improved somewhat in the late year, remains very much less than a few years ago, so that a given revenue now represents a very much larger tonnage than the same revenue at the earlier date. It is to be remembered, furthermore, that the coal traffic includes bituminous coal as well as anthracite, and that special effort has been made to develop the trade in soft coal so that the company might not be so exclusively dependent upon the tonnage in hard coal as it had during antecedent periods of its career. The anthracite tonnage for 1899-1900 was 10,672,556 tons. This compares with only 9,533,693 tons moved the previous year. Going back, however, to 1894 95 we find that the anthracite revenue-earning traffic then amounted to 10,575,712 tons (year ending November 30), so that notwithstanding the large increase in the late year the tonnage now is only a trifle larger than it was five years ago.

Taking, on the other hand, the bituminous tonnage (revenue freight only), this aggregated in 1893-94 no more than 1,652,565 tons, but for 1899-1900 the amount of the same was 4,539,719 tons, showing that in the five years the soft coal traffic has almost trebled.

THE REPORT OF THE READING CO. As indicated by us last year, the Reading property is being developed along two important lines-first, in enlarging and diversifying the traffic of the road, and second, in raising its standard of condition and thus adding to the efficiency of its operations. Both features are manifest in the report just submitted for the fiscal year ending June 30 1900, and it is evident from a study of this report that further decided progress was made during the twelve months in the one direction as in the other.

With reference to the growth and diversification of)

The noteworthy expansion in the business of the road here outlined, and the ability to handle the traffic with economy and dispatch, have been possible only because of the large expenditures which have been made on the property and which have been paid for in the main out of earnings. The present report, like the reports for preceding years, abounds in statements showing the nature and character and the large extent of these various improvements. As indicating in a general way how earnings have been applied in the traffic, the same characteristics are revealed in the making of improvements and betterments, we

OCTOBER 18, 1900.]

may note that the amount spent upon maintenance of equipment in 1899-1900 was \$3,690,370, as against only \$2,890,568 in 1898-99 and but \$2,330,625 in 1897-98. In like manner \$2,017,174 was spent upon maintenance of way and structures, against \$1,485,979 in 1898-99 and \$1,586,340 in 1897.98. These amounts are entirely independent of the large extra sums directly appropriated from earnings and included under the head of "Other Expenses." Thus, in the late year no less than \$1,903,797 was charged for improvements and renewals and \$593,288 more for equipment renewals, making, roughly, 21 million dollars together. In the previous year there was a like contribution for these purposes of \$1,503,240, and the year before a contribution of \$1,202,003, making for the three years $5\frac{1}{4}$ million dollars.

In the foregoing we have been dealing simply with the affairs of the Railway Company; a precisely iden. tical policy has been pursued in the case of the Coal & Iron Company. In 1899-1900 \$750,498 was spent for new work at the collieries and included in expenses; in the previous year \$377,926 was so spent and in 1897-98 \$630,623. The effect is seen in the improved results from the working of the collieries. President Harris points out what has been done towards reducing the number of separate workings and of increasing the average output of the collieries, thereby lessening the cost of each operation. He reports that 40 collieries in the late year produced a daily average of 47,849 tons, or 1,196 tons per colliery per day, whereas in June 1893 54 collieries produced a daily average of only 38,160 tons, or 706 tons per colliery per day. There was an increase of 7 8-10 cents in the cost of the coal mined and purchased in 1899-1900 as compared with 1898-99, but this was chiefly due to the increase in the cost of labor and the higher prices paid for the materials used.

As a result of the enlarged amount of coal mined and the greater economy with which it is being got out of the ground, the Philadelphia & Reading Coal & Iron Company in the late twelve months was able to pay some interest on the Reading Company's "Loan Account" representing investments in the property of the Coal & Iron Company. It is significant of the extent of those investments (made almost wholly in the past) and the difficulty of realizing direct returns from them that the amount paid on the same, namely \$884,850, was only $1\frac{1}{8}$ per cent on the total of the indebtedness, which stands at \$78,653,349. Of course and (4) \$1,903,797 for improvements. in the consolidated income statement of the three companies, namely the Reading Company, the Philadel-THE ERIE'S PROGRESS. phia & Reading Railway Company and the Coal & Iron Company (the form in which the general results are reported and the only form in which it is possible to show what the combined properties are doing), this payment of interest on an old indebtedness does not affect the year's outcome, since it is simply transferring money from one account to another. In other words, while the sum appears as a payment by the Railway Company, it necessarily also appears as a receipt by the Reading Company. Still, it is pleasing to know that the Coal & Iron Company is by itself showing improved results. After spending \$750,498 for colliery improvements and allowing \$750,154 for depletion of coal lands, there was a profit on the operations of tons. the Coal & Iron Company for the year of \$1,201,913 before deducting charges. This compares with a profit of \$901,735 for the previous twelve months when no allowance was made for depletion of coal lands.

Both the methods of accounting and the methods of management are sound and conservative. The charge for depletion of coal lands is a new item, and covers the last two years. It is calculated on the basis of 5 cents per ton on the coal mined from the company's lands in the two years. President Harris states that this is a charge that should be made every year, as each year's mining depletes the estate. It should be understood that the allowance is independent of the sum which the Reading Company under the terms of the General Mortgage was obliged to pay to the Trustee of the Mortgage when it began dividends last March on the 1st preferred stock. This latter payment was 5 cents per ton on the anthracite mined for the preceding year on lands pledged under the mortgage. The sum called for was \$383,-525 and was applied by the trustee to the purchase and cancellation of \$433,000 of the General Mortgage bonds. The first preferred stock is now on a 3 per cent basis, $1\frac{1}{2}$ per cent having been paid in March and a dividend of similar amount having been paid last month. It will be remembered that some of the stockholders had looked for a higher rate of dividend. Mr. Harris makes a strong point as against those who were urging an increased distribution by showing that, after the allowances referred to, the surplus remaining for the whole period since the reorganization of the property up to June 30 1900 over the first one of the two dividends paid, is only a little over 2¹/₄ million dollars—\$2,253,498. He refers to the fact that the monthly working expenses of the three companies during the last twelve months averaged \$3,664,378, so that the surplus represents only about two-thirds of a month's expenses.

The outcome for the year must of course be considered very satisfactory. The surplus for the twelve months is \$1,938,001, which compares with \$1,165,209 for the preceding twelve months. The call for the 3 per cent dividend on the first preferred stock is \$749,470. The contribution to the General Mortgage Sinking Fund, we have seen, called for an additional \$383,525, making \$1,132,995 together, thus leaving a final surplus balance for the year of a little over \$800,000. While this does not appear large for a company of the size of the Reading, the amount remains, it should be remembered, after charging (1) \$750,499 for new work at collieries, (2) \$750,154 for depletion of the coal estate, (3) \$593,288 for equipment renewals

We have often referred to the great improvement and wonderful transformation that has been effected in the case of many railroad properties during the last few years. We have, perhaps, no better illustration of this than is furnished by the results now being attained on the Erie Railroad. The report of the company for the late fiscal year shows that with an addition of 323 million tons, or 6.68 per cent, to the tonnage movement one mile, the train mileage was not increased at all, but actually reduced 1,299,613 miles, or 8.51 per cent. The effect is seen in an addition of 53 tons, or almost 17 per cent, to the average train load, bringing it up to the high figure of 369 The fact that the Erie, whose name was formerly a by-word in the railroad world, should have been brought to a state where its trains average 369 tons per mile run, is striking testimony to the rehabilitation that has been effected in the physical condition of the property. The figure, moreover, covers merely revenue tonnage. Including freight carried for the company's own use, the average is brought up to 392 tons. In three years there has been an increase from 291 tons to 392 tons. The Erie of course has a large tonnage in coal, which is an element in high train-loads, but its grades are notoriously unfavorable, making the average attained all the more marked. One gets a better idea of the nature of this showing by recalling that the New York Central for the same twelve months reported an average train-load (including company freight) of 398 tons, and the Norfolk & Western, whose traffic consists to a preponderating extent of coal and other minerals, a revenue load of 435 tons.

Obviously the Erie was under the same necessity to reduce the cost per unit of work in the transportation service (a large train-load being an important factor in the problem) as the other leading systems, but the fact that such great success has attended the effort speaks well for the way the property has been managed. Steadily declining rates made a lower cost per unit of work an absolute necessity. It is gratifying that this tendency towards lower rates was in the late year not only arrested, but reversed, a very substantial improvement being for the first time in a long while recorded. The prosperity and activity of trade in the United States permitted, and the maintenance of harmony among the trunk lines made possible, an improvement in the rate. The improvement was less than half a mill per ton per mile, being in fact but 42 hundredths of a mill, but it is a significant fact, illustrative of the importance of a small addition to the rate realized in rendering transportation services when applied to a large tonnage, that this increase of 42 hundredths of a mill is responsible for \$2,011,984 of the gain in freight earnings for the year. The gain from this source, as it happens, was heavier than the gain arising from the expansion in tonnage, which gain amounted to \$1,806,580, the two together making up the \$3,818,564 increase in the freight revenues. By including the earnings from passengers and other sources, the gain in total gross earnings is brought up to \$4,540,327. Though so large a part of the expansion in revenues has resulted from a betterment of rate, it is well enough to bear in mind that this betterment leaves the rate only about where it was a couple of years ago.

The two operations here outlined, namely, the addition to the train-load and the improvement in the tures and conditions. average rate realized, have, working together, enlarged profits from operations in a noteworthy way. In brief, the revenue per freight train mile was raised from \$1 64 in 1898.9 to \$2 06 in 1899-1900, the addition having been no less than 42 cents per freight train mile run-almost 26 per cent. The effect upon net revenues must have been marvelous, except that, like all other roads, only a little more so perhaps, the Erie management found itself obliged to appropriate a considerable part of its new revenue in strengthening and improving its property. As indicating what was done, we need only observe that while total operating expenses increased in the large sum of \$3,278,-679 (thus leaving \$1,261,649 gain in net for the twelve months), only \$601,219 of the augmentation was in the cost of conducting transportation; on the other hand, \$2,615,810 represented enlarged outlays upon maintenance of way and equipment.

The same condition of things forces upon the management the necessity of applying surplus net earnings in a similar manner—that is, towards strengthening the property and promoting its efficiency and economy of operations, rather than in undertaking to make a return on the shares. Laboring under the burden of a heavy capitalization, the Erie could not hope to cope successfully with its neighbors and rivals if it paid for improvements and additions by new capital creations while these neighbors and rivals were providing the money from earnings. When this is said, there is really no occasion for further remarks as to why, notwithstanding the improvement in business and in revenues and notwithstanding the improvement in operating efficiency and results, stockholders still find themselves without a return. The income account shows a surplus of \$1,663,430 over and above all charges, which amount might have been paid to the shareholders if prudence and necessity had not dictated a different course.

President Thomas points out that altogether the surplus accumulated since the reorganization (including the \$1,663,430 for the late year) aggregates \$3,454,-874 to June 30 1900, and he shows how the money has been applied, \$1,553,166 being used for new construction work. For these construction outlays the company is entitled to receive, or has received, prior lien or general lien bonds. These might have been sold, but at what the management regard as unsatisfactory prices. It was considered better policy to make no sale until by the development of the business of the road as the result of the expenditures made for construction, the continuing ability to pay regular dividends shall have been assured by the accumulation of a larger surplus. This is evidently a wise and prudent as well as enlightened policy. Messrs. Haskins & Sells have made an audit of the accounts of both this company and the Reading and certify to their accuracy.

RAILROAD GROSS EARNINGS FOR SEPTEMBER.

Our compilation of the gross earnings of United States railroads for the month of September (so far as it is possible to procure the returns so soon after the close of the month) shows only a small increase, namely \$1,316,472, or 2.21 per cent. It is not an. likely that this increase may be wiped out alto. gether when further returns are received. The month has been marked by a number of adverse fea

Trade, as is known, has continued less active, the cotton movement in the South and the grain move ment in the West have both fallen behind last year while at the same time there has been an extra Sun day in the month in 1900, thus giving one less work ing day. The cyclone which destroyed so much prop erty and so many lives at Galveston seriously inter fered for a time with the business of nearly all the Texas roads. On the 17th of the month the strike o the anthracite coal miners was begun and is still i progress. This strike, we may suppose, is makin havoc with the earnings of all the anthracite carriers None of these roads are included in our statement, & the New York Ontario & Western (the only one c the anthracite carriers furnishing weekly report has decided to withhold the figures while the troub lasts. On the other hand, the bituminous coal ros to the seaboard, like the Chesapeake & Ohio and the Norfolk & Western, are embraced in the compilation, and help by their large gains to make the showing more favorable than it otherwise would be.

For the first time in many months there is a formidable array of roads reporting a falling off in earnings. The largest number of these comes from the Northwest. Those who had hoped that the springwheat shortage in that part of the country had been exaggerated, or if not exaggerated that its effects might be overcome in revenues by gains in other classes of traffic, find their expectations disappointed. The Great Northern system reports a decrease for the month of \$236,422; the Northern Pacific with 389 road more miles of (owing to the operation of the St. & Duluth) reports a Paul decrease of \$173,475; the Soo road, a comparatively small road, has \$124,984 decrease; while the Burlington Cedar Rapids & Northern, the Chicago Great Western, the Canadian Pacific and the Iowa Central have all sustained larger or smaller losses. The Wisconsin Central stands in the same class, having fallen \$69,479 behind, the decrease, however, following mainly from a contraction in the ore traffic. No doubt some of the other Northwestern roads have suffered in the same way. The decrease of \$62,239 on the International & Great Northern is, of course, mainly due, we may suppose, to the Galveston hurri. cane, while the loss of \$77,556 on the Louisville & Nashville reflects, presumably, the smaller cotton movement and the diminished activity in the iron and steel trades. The following is a full list of all gains and losses exceeding \$30,000.

PRINCIPAL CHANGES IN GROSS EARNINGS IN SEPTEMBER.

Increases.		Decreases.

Hocking Valley.	41,522		
Pitta. Bess, & L. Erie.	40,694		

Total (representing 20 roads)...... \$2,377,482

It is hardly necessary to say, as qualifying somewhat the conclusions to be drawn from the less favorable showing upon this occasion, that comparison is with heavy earnings a year ago. For example, in September last year our table showed \$6,081,159 increase, or 11.08 per cent, which followed \$2,790,805, or 6.04 per cent, improvement in September 1898, and \$6,385 823, or 14.14 per cent, gain in September 1897. The following gives the totals for the month and the nine months for five years.

the Western primary markets were in the aggregage a trifle heavier the present year than they were last year, the total for the four weeks to September 29 being 29,861,105 bushels, against 29,746,400 bushels. The apparent anomaly is explained, however, when it is found that there has been a great increase in the winter-wheat deliveries, thus offsetting the loss in spring At the distinctively spring wheat markets wheat. the loss has been heavy; Minneapolis shows deliveries of 7,400,180 bushels in the four woeks this year, against 9,600,140 bushels in the same four weeks last year, while at Duluth the deliveries were but 2,827,-043 bushels, against 10,614,282 bushels. In addition to the loss from a smaller wheat movement, there was also for many roads a loss from a falling off in the corn movement; in this last particular the contraction was very decided, the corn receipts for the four weeks footing up only 17,524,363 bushels this year, against 26,244,602 bushels last year. Here are the details.

July 1900-14111

-It is officially announced that the Girard Trust Company has been appointed Registrar in the City of Philadelphia of the stock of the Pennsylvania Railroad Company, to take effect December 1.

-While bank clearings generally show a falling off from the large totals of a year ago, the Southern cities are proving a conspicuous exception to the rule. There are a few pointa in the South which show losses, but the great majority of places record very considerable increases. There is one city, however, that is distinguished beyond the rest in this particular. We refer to Savannah, where the clearings for the month of September this year aggregated \$30,580,047, against \$12,232,879 in September, 1899, and \$11,028,865 in September, 1898. This year's total is not only the largest October aggregate ever reported, but the largest of any month of any year. The reason for the expansion is of course found in the prosperity which the South is enjoying, and also in the higher price of its main staple-cotton.

-The Western National Bank is taking advantage of the increase in the number of its directors which was recently anthorized by the stockholders. The latest addition to the Board, which was made on Wednesday, is David H. Moffat, President of the First National Bank of Denver, Col., and for many years a Director of the Equitable Life Assurance Society. Mr.Moffat was also at one time President of the Denver & Rio Grande Railroad Co.

-The new uptown financial institution called the Fidelity Bank, which, as was noted in this department May 19, was organized under the State law about six months ago, will begin business Nov. 1 with a capital of \$200,000 and a paidin surplus of \$100,000. Charles R. Henderson, who accepted the position of Acting President solely for the purposes of organization, has retired, and Dr. Edward H. Peaslee has been elected President. James Stillman, President of the National City Bank, is the Vice-President, and Frederick Fowler, who for the past seven years has been employed in the National City Bank in a confidential capacity, and who for thirteen years previously was connected with Southern banking institutions, is Cashier. The Directors are Seth M. Milliken, the well-known dry goods merchant of this city; Robert Olyphant, of Ward & Olyphant, coal dealers; Jacob H. Schiff, of Kuhn, Loeb & Co.; Ewald Fleitmann, President of the Citizens' Bank, and a large importer; Eric P. Swenson, of Swenson & Sons, bankers; Benjamin Aymar Sands, of Bowers & Sands, lawyers; Hugh J. Grant, ex-Mayor of the City of New York; James Stillman, President of the National City Bank; Charles R. Henderson, of Henderson & Co., bankers; Edward H. Peaslee, President, and prominently connected with State charities, and Thomas P. Fowler, President of the New York Ontario & Western Railroad Co. The institution will be located on the southwest corner of Madison Avenue and Seventyfifth Street, which has been especially prepared for the purpose, and it will clear through the National City Bank, stockholders and officers of which are largely interested in it. The Fidelity will occupy a very promising field for business, in the wealthiest residential section of the city; and it is expected that it will not only enjoy the patronage of these families, but also of manufacturing concerns located in the upper East Side of New York, which have hitherto been deprived of convenient banking facilities. This will be the fourth bank in New York more or less controlled by National City Bank interests.

-The Bowery Bank of this city has made preparations for the erection on its present site, the northwest corner of The Corn Exchange are the Astor Place, the Queens County, the Broadway, the Home, and the Hudson River.

-Amzi L. Barber, the head of the Barber Asphalt Co. of this city, was on Thursday elected a trustee of the Trust Co. of America, of which Hon. Willis S. Paine, is President.

Bowery and Grand St., of a six-story building. This bank is a State institution with a capital of \$250,000 and surplus and undivided profits of \$718,241, and it is one of the most successful banks on the east side of the city.

-Notice has been posted at the Stock Exchange of the intended transfer of the seat of the late Abraham Wolff, the board member of Kuhn, Loeb & Co., to Mortimer L. Schiff, of this firm.

-The Corn Exchange Bank will, on or about Nov. 15, open another branch institution in this city, to be located in the active business section at the corner of Fifth Avenue and Nineteenth Street. This will make the sixth branch of the Corn Exchange Bank which has been established by it since it was enabled, through the action of its stockholders, to take advantage of the new State law anthorizing State institutions to organize branch banks. The other branches of the New York City Clearing House Banks.—Statement of condition for the week ending Oct. 6, based on average of daily results. We omit two ciphers (00) in all cases.

Breadstuffs Figures Brought from Page 772.—The statements below are prepared by us from figures collected by N. Y. Prod. Exch. Receipts at Western lake and river ports for week ending Oct. 6 and since Aug. 1, have been:

WALL STREET, FRIDAY, OCT. 12, 1990.-5 P. M.

The Money Market and Financial Situation.-Conditions that usually exist when investors and the public generally are not interested in the security markets have prevailed this week in Wall Street. There continues to be very little disposition to sell securities of any kind by the owners thereof, and the amount of capital now seeking investment is exceedingly small. The consequence is a dull and uninteresting market, with fluctuations almost wholly without significance as to real values. Operators working for a decline were assisted by reports of railway earnings in the Northwest which, owing to recent floods in that section and the poor spring-wheat crop, are less favorable than they otherwise would be.

So far as there is evidence of any change in the political outlook, it seems to have improved. Arguments most used by the opposition have thus far failed to create any consid-erable public sentiment in their favor, and from a Wall Street standpoint the chances of President McKinley's reelection are better.

Foreign exchange has further declined, and gold to the amount of \$4,050,000 or more has been engaged abroad for shipment to New York, notwithstanding the fact that the Bank of England has advanced its price for United States gold coin and bullion. At the same time the local money market is firmer and rates have advanced. The open market rates for call loaps on the Stock Exchange

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 1³/₄ to 4 per cent. To-day's rates on call were 2¹/₂ to 3¹/₄ per cent. Prime commercial paper 5 to 6 per cent. The Bank of England weekly statement on Thursday showed a decrease in bullion of £1,371,457 and the percent-age of reserve to liabilities was 43.22, against 44.41 last week; the discount rate remains unchanged at 4 per cent. The

the discount rate remains unchanged at 4 per cent. The Bank of France shows a decrease of 5,350,000 francs in gold and 6,675,000 francs in silver.

The New York City Clearing-House banks, in their statement of Oct. 6 showed a decrease in the reserve held of \$8,574,700 and a surplus over the required reserve of \$6,241,90, against \$12,942.600 the previous week.

* This is the price bid at the morning board; no sale was made. † Prices are quotations in "Unlisted Dep't" for bonds "when issued."

State and Railroad Bonds.—Sales of State bonds at the Board are limited to \$47,000 Virginia fund. debt 2-3s at 89½ to 91; \$3,000 Alabama class A at 1091/4 and \$3,000 Alabama class B at 109¹/₄. The railway bond market has been less active than last

week, unusually featureless, and in many cases prices are fractionally lower. As the investment demand was nominal, a large proportion of the transactions was in low-priced speculative issues, and included Atchison, Baltimore & Ohio, Mexican Central, Northern Pacific, Reading, &c.

Stock and Bond Sales.—The following shows the volume of business in stocks and bonds on the New York Stock Exchange for the past week and since Jan, 1:

Railroad and Miscellaneous Stocks.-The stock market has been dull, daily transactions averaging only a trifle over 200.000 sbares, and on at least three days of the week were less than that amount. Owing largely to a lack of demand, operators on the short side of the market have been successful in their efforts, and the result was a decline of the active list averaging between 1 and 2 points. A spurt near the close carried the volume of business above the average to-day, and substantial advances from the lowest prices were recorded in several cases. Naturally, in such a market the transactions were relatively heavy in the specu-lative issues throughout the week.

In only a few cases was the tendency of the market resisted, including the anthracite coal stocks, which although neglected were steady to strong, and Manhattan Elevated and Great Northern preferred, which close higher than last week. People's Gas was a conspicuous feature, both for activity and erratic movement. It declined to $81\frac{5}{8}$, the lowest quotation recorded in recent years, and subse-quently recovered a large part of the loss. Consolidated Gas, American Sugar Refining, New York Air Brake and the iron and steel stocks were weak.

Foreign Exchange.-The tendency of the market for foreign exchange has been downward, and new low rates for the season were made. The supply of cotton bills continues large.

To-day's actual rates of exchange were as follows: Bankers' sixiy days' sterling, 4 80@4 80¼; demand, 4 8334@4 84; cables, 4 84½@4 84¾; prime commercial, sixty days, 4 79½@ 4 7934; documentary commercial, sixty days, 4 7834@4 8014; grain for payment, 4 80@4 8014; cotton for payment, 4 7834@4 8014; @4 79; cotton for acceptance, 4 7912@4 7934.

Posted rates of leading bankers follow:

$\begin{array}{c} 4 & 79 \\ 4 & 79 \\ 4 & 79 \\ 4 & 79 \\ 3 \\ 22 \\ 9 \\ 0 \\ 21 \\ 78 \\ \end{array}$	5 20 05 1938*

CHRONICLE. THE

Investment and Kailroad Intelligence.

RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month. The returns of the street railways are brought together separately on a subsequent page.

	Latest Gross Earnings. Jan. 1 to Latest Date.			Latest Gross Earnings.			Jan. 1 to Latest Date.

* Figures for August are for the railroad only. 1 Mexican currency. 5 Covers results of lines directly operated east of Pittsburg.
* Includes Chesapeake & Ohio So'western, Ohio Valley and Chicago and Texas for both years.
* Includes Paducah & Memphis Division from July 1 in both years.
* Does not include the Austin & Northwestern, the San Antonio & Aransas Pass or Houston & Texas Central system.
* Results on Montgomery Division are included in 1900, from Jan. 1 and in 1899 after July 1.

THE CHRONICLE.

Latest Gross Earnings by Weeks.-The latest weekly earnings in the foregoing are separately summed up as follows: For the first week of October our statement covers 43 roads and these show 4.67 per cent increase in the aggregate over the same week last year.

Net Earnings Monthly to Latest Dates .-- The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of September 22, 1900. The next will appear in the issue of October 20, 1900.

a Net earnings here given are after deducting taxes.

b Net earnings here given are before deducting taxes.

c Deducting other expenditures for repairs, replacements and general expenses, net income applicable to interest on bonds in August was \$106.114, against \$114,889 last year, and from January 1 to August 31 \$1,061,258, against \$1,030,468. This is the result in Mexican dollars treated (according to the company's method of keeping its accounts) as equivalent to 80 cents in United States money—that is, depreciation beyond 20 per cent has shready been allowed for beyond 20 per cent has already been allowed for.

t After deducting "reserve fund for repairs of steamers" there was a deficit in August, 1900. of \$13,610, against a surplus of \$106,005 in 1899, and from May 1 to Aug. 31, 1900. there was a surplus of \$69,302, against \$249,415 in 1899. The reserve fund for depreciation and general and extraordinary repairs of steamers has been increased to the standard of the English companies, *i. e.*, five per cent upon the value of the steamers value of the steamers.

! Includes Baltimore & Ohio Southwestern for all periods.

Interest Charges and Surplus.-The following roads, in ddition to their gross and net earnings given going, also report charges for interest, &c., with the surplus above or deficit below those charges.

Street Railway Net Earnings .- The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads-that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday), we bring together all the roads furnishing re-turns, and the latest statement of this kind will be found in the CHRONICLE of September 22, 1900. The next will appear in the issue of October 20, 1900.

tion) and of \$42,274 for ties, bridges, buildings and fixtures, and of a large amount for repairs incidental to the floods of the latter part of the year. The aggregate total am unt expended in maintenance of roadway and structures amounted to \$1.018 per mile, as against \$916 per mile during the previous year. This increase rep esents the gradual improvement of road way. etc., which has been going on for reveral years and which was somewhat increased the past year. The local business for the latter half of the fis al year was

seriou-ly dim nished by the disastrous flood, which at one time covered nearly 200 miles of track and mide operations possible only by means of temporary track and structures, many miles of roadbed and several thousand feet of trestle having been repeatedly washed away. The road was kept open, however, with the exception of a few days.

Eighty miles of track south of the Obio R ver have been partially ballasted with gravel and 343 481 cross-tie- were put in track, as compared with 296,279 for the year ending June 30, 1899.

Collateral Trust Bonds .- By means of the issue of collateral trust 4 per cent bonds for \$2,500,000, of which \$3,17000, at the rate of a bond of \$1,000 for each \$3,000 of sock, is set aside to exchange for \$6.500,000 stock of the Sr Louis & Cairo RR., entailing an annual fixed charge of \$84,800, the holders of all except 674 shares out of a total of 65,000 hares of this stock have agreed to surrender their stock in ex-change for said bonds, which will thereby becom - the property of the Mobile & Ohio RR. Co., and be he'd by the trustee of the collateral trust as security for that is ue, without, how ver, depriving the St. Louis & Ca ro bondbolders of any of their security or relieving the Mobile & Ohio RR. Co. from any of its obligations und or the present lease.

Equipment.—There have been purchased 34 locomotives, 300 fru t ex ress cars, 500 gondolas, 25 box, 15 way and 50 bal-last cars, under equipment agreements, series "A" and "B."

Montgomery Division.—This division comprising 1881/2 miles road, which was taken over from the co tractor in March, 1898, was incorporated into the system on July 1, 1899, and its construction account then closed. The peruliar physical characteristics of the country through which the line runs largely increased the exp-nses of maintenance, but these difficulties are being gradually overcom. The revenue of the line shows steady improvement. The local freight and passenger business is increasing and prosperous small towns are growing up at local stations. Ther- are indica-tions pointing to the development of a mineral traffic of some magni ude. The addition of this division to the system has materially contributed to the increase in the earnings of the main line.

Earnings - The results for the four years past and the balance sheet follow, the Montgomery division-188 milesbeing included in 1899 00.

Mobile & Ohio Railroad.

Total liabilities \$94,430,081 \$94,051,599 \$93,817,996

(Report for the year ended June 30, 1900.)

President E L. Russell says in part:

-V. 71, p. 288.

Results on Main Line.-The comparative statement of the Mobile & Ohio RR, including the St. Louis & Cairo RR., shows the growth of the business of the main line, Mobile to East St. Lonis, and pr-vi usly existing branches as follows: Gross earnings. \$4,893,233 in 1899-0, against \$4 123.389 in 1894 99; incr-ase 18:53 per cent; net carnings, \$1,666.815, against \$1,451.631; increase, 14:82 per cent; surplus from year's operations after paying interest and rentals, \$488,171, against \$307.104, increase, 45.90 per cent. The amount expended for maintenance of way and struc-

tures increased in 1900 \$70,233 as compared with 1899, there being included in this an increase of \$24,067 for rail renewal (during the past three years 20,757 tons of steel rails have been purchased at a cost of \$468,189, which am uut, with the cost of fastenings, relaying, etc., less the value of the old rail released, has been charged in expenses of opera-

* From St. L. & O. RR. Co. for additions to property charged to income. † Out of the accumulated surplus paid \$53,205 (1 p ct.) on Stock.

Western Union Telegraph Company.

(Report for the year ending June 30, 1900.)

President Thomas T. Eckert says in part:

General Results.—The increase of \$8: 4.257 in the revenues for the year was made up principally of \$457.865 from regu-lar commercial messages, \$76 628 from press dispatches and \$197,665 from leased wires. The several items of expenses increased: For operating and general expenses, \$265,244, incident to the larger number of messages transmitted and delivered, and to the operation of more offices; for maintenance and reconstruction of lines, \$206,586, partly for cable repairs in the Atlantic, but chiefly for the replacement of old and defective lines with new poles and copper wires; and for the equipment, \$48,163, on account of new wires and offices.

The average toils received were 30.8 cents per message, and the average cost per message was 25.1 cents, these figures being the same as for 1899. The number of messages transmitted was 1,769,626 greater than for 1899.

Bonds.-At a special meeting of the stockholders of the company, held March 14, 1900, the issue of \$20,000 000 41/2 per cent funding and real estate mortgage fifty year gold bonds was authorized. The amount of the interest payable on all bonds now outstanding is \$956,160, or an increase of \$59,854 per year.

Construction, Etc. – During the year 1,199,587 was expended for the purchase of sundry lines and the construction of new property, and 70,000 was paid out for patents. The lines were increased by 2,849 miles of poles and 28,520 mlles There was also an increase of 615 offices. of wire.

Outlook.—The weekly reports of receipts continue to show a healthy condition of business, and indicate that we may expect satisfactory returns for the current year, if no unlooked for set-back occurs.

Earnings, Etc - The results for three years were as follows, compiled for the CHRONICLE:

RECEIPTS AND DISBURSEMENTS.

\$30,000,'00. The factory bonds and mortgages, which at consolidation aggregated \$193,457, have since Sept. 1, 1899, been reduced to \$121,000. The snrplus account stood Oct. 1, 1899, at \$1,362.915; it has been increased to \$1.968,495 by adding the net profit, \$605,580, for the ten months ended July 31. 1900. The results are thought to be satisfactory, con-sidering they cover the first year's operations.

President R. Lindsay Coleman, speaking of the economies effected since the organization of the company, and also of the manufacture of automobiles, says:

The manufacture of automobiles, says: We immediately began to effect economies by concentrating the selling in erests and also the manufacturing of goods, closing certain small factories where the cost of production of goods was excessive, and by various other methods. The full benefit of this, however, has come to the company for only a short period during the latter part of our fiscal year. The policy adopted in marketing goods has had a good effect, and we believe that during the coming year the trade will be on a more stable basis than it has for some years. The manufacture and sale of automobiles have had much attention by the executive of the company, and as our facilities are unequaled for the manufacture and sale of such goods, we believe that the com-pany is in a most excellent position to prosecute this branch of the business. [See also V. 71, p. 391.] The condensed balance sheet as of Aug. 1, 1900, follows:

Year.	earnings.	earnings.	charge.	purchase.	su+ptus.
1899-00	\$812,778	\$228,582	\$120,886	\$21,294	\$86,402
1898-99	697,538	191,42 8	121,265	798	69,365
-V. 70, p.		191,428	121,265	798	

Anthracite Coal Roads.-Miners' Convention.-Representatives of the United Mine Workers met in convention yesterday at Scranton, Pa., to consider the advisability of accepting the offer of 10 per cent net increase in wages, to which nearly all the leading anthracite companies have agreed. The decision, if any, reached by the convention was not known in the city at the hour of our going to press yesterday.—V. 71, p. 697, 645.

Austin (Tex.) Dam & Suburban Railway.—Sale.—The District Court at Austin has anthorized the receiver to sell the property. Judgments of \$10,000 were granted in favor of J. H. Raymond & Co., local bankers, and \$40,000 in favor of the First National Bank of Austin, the intervenors.

Baltimore & Ohio RR.-Equipment -The company has ordered from the Pullman Company 3,000 freight cars to cost \$1,865,000. This is in addition to the 6,000 cars ordered from the Pressed Steel Car Co. last week (see V. 71, p. 718), and will increase the road freight equipment to about 80,-000 cars, of which 12.000 are steel. Payment for this new equipment will be made with company assets and not by the issue of car trusts as has been reported. Speaking with ref-erence to the order for 6,000 steel cars, President Cowen says: The order for cars has been given simply on account of the impera-tive necessity for them. We could place every car of the order in use now with the freight traffic offering, although they will give us an additional carrying capacity of 280,000 tons. The cars are to be constructed and delivered as soon as possible. The coal cars are not intended specially for the export business, but for transportation to tide-water and the domestic market. The great bulk of the fuel is going to various industries in the United States.—V. 71, p. 697, 645.

Bangor & Aroostook RR.—Earnings.—The results for the years ended June 30, 1899 and 1900, compare as follows:

Fiscal	Gross	<i>Net</i>	Fixed	Better-	Balance,

American Bicycle Company.

(Report for 10 months ended July 31, 1900.)

For the ten months ended July 31, 1900, the net profits of the business, after deducting interest on bonds, etc., was \$605,590. The value of the plant, per balance sheet, has been reduced \$1,168,015, to represent depreciation. and \$334,746 on account of factories and machinery sold, making it now

New Treasurer ..- Assistant Treasurer Herbert E. Fisher has been appointed Treasurer to succeed Amos Blanchard, who resigned recently after more than thirty years' service. -V. 71, p. 390, 340.

Brockton (Mass.) Street Railway.—Proposed Purchase— New Securities .- The company proposes to purchase the West Roxbury & Roslindale and the South Shore & Boston street railway companies, and is seeking authority to issue \$1,665,-000 additional capital stock to be exchanged for their stock; also to issue \$400,000 bonds.-V. 68, p. 672.

Central of Georgia Ry.-Earnings.-The results for the two years ending June 30, 1899 and 1900, compare as follows: Net Earnings. \$1,879,858 1,800,634 SS. Elc., Fixed Income. Charges. \$231,463 \$1,940,355 215,218 1,956,964 Fiscal Gross Year. Earnings. 1899-00....\$6,986,263 1898-99..... 5,767,346 Balance, [Interest on Surplus. \$130,966 59,888 Incomes. (314\$)\$130,000 (2%) \$0,000]

On June 30, 1900, the total credit to surplus account was \$131,086. Since then (on Oct. 1) the interest on the first preference incomes, 3¼ per cent, for the year 1899 00 has been paid, calling for \$130,000.—V. 71, p. 437.

Central Massachusetts RR.-Exchange of Stock.-See Boston & Maine RR. above.-V. 71, p. 134, 83.

Central Vermont Ry .- Earnings .- The results for two years are reported in the daily press as follows:

Fiscal Gross		Other	Fixed	Balance,
Year. Earnings.		Income.	Oharves.	Surplus.
1899-00\$3,382,723		\$10,845	\$665,435	\$128,849
1898-99 3.151,719	664,630			

The new company took possession May 1, 1899.-V. 71, p. 697, 390,

Chicago Burlington & Quincy RR.-Listed.-The New York Stock Exchange has listed \$10.048,000 additional Illinois Division 3½ per cent bonds of 1949, making the total amount listed to date \$26,214,000. This additional issue has been used for the following purposes:

To acquire \$4,568,000 of the 'Consolidated' Mortgage 7s, due July 1, 1903, which have been canceled...... Sold to provide a part of the funds for the purchase of the securities of the Keokuk & Western RR. Co., costing \$4,972,000

And for the construction of about 250 miles of railroad west of the Missouri River, estimated to have cost \$3,400,000.
-V. 71, p. 710, 697, 596. 5,076,000

Chicago & Grand Trunk Ry.—Sale Oct. 31.—The fore, closnre sale will take place at Port Huron, Mich., on Oct. 31-after which the Grand Trunk Railway of Canada will reor-ganize the company under the name, as reported, of the Grand Trunk Western Railway, per plan in V. 69, p. 954, as modified by V. 71, p. 27. The sale will take place under the first mortgage of 1880, and no bid will be accepted for a sum less than the total amount of the principal thereof (\$5,437,000) and the interest due and accrued at 6 per cent per annum and the interest due and accrued at 6 per cent per annum from Jan. 1, 1900.-V. 71, p. 602.

Chicago Great Western Ry.—See Wisconsin Minnesota & Pacific Ry. Co. below.--V. 71, p. 436, 441.

Chicago Terminal Transfer RR.-Listed.-The New York Stock Exchange has listed \$400,000 additional mortgage 4 per cent gold bonds of 1947, making total amount listed to date \$13,400,000. These bonds have been sold on account of a portion of the following expenditures, for which the company was entitled to be reimbursed:

Track elevation. Chicago, \$39,644; extensions: Franklin Park to Mayfair (about 6.5 miles, 1.89 completed), \$195,272, and Harvey to Chicago Heights (9.24 miles), \$313,842; second tracks, \$37,493; spurs and sidings at various places, \$63,592; stations, warehouses and shops, \$32,534; equipment, \$57,548; real estate, \$10,287; total, \$752,-712.-V. 71, p. 642, 651.

Cincinnati Hamilton & Dayton Ry.—Earnings.—The comparative results for the two years ended June 30, 1899 and 1900, are reported as follows:

Fiscal	Gross	Net	Oharges &	Balance,
Year.	Earnings.	Earnings.	Dividends.	Surplus.
1899-00	\$5,735.530	\$1,728,847	\$1,418,294	\$310,558
1898-99	5.241.503	1.582.097	1,411,737	170,360
-V. 69, p. 130	00.		_,,	

Concord & Montreal RR.—Bonds for Electric Branch.-The stockholders on Tuesday authorized the construction of a branch to be operated by electricity from Concord, N. H., to Hudson, N. H., there to connect with the Nassau electric system; also a bond issue not to exceed \$1,000,000.-V. 71, p, 698.

Detroit Mackinac & Marquette RR.-Usual Interest.-Oct. 15 the Central Trust Co. will pay 1 per cent interest on the income bonds to registered holders of Oct. 10 as interest for the six months ended Sept. 30 ult.-V. 70, p. 686.

Eel River RR.-Dividend Passed.-Treasurer Prosper W. Smith, under date of Oct. 1, makes the following announcement to stockholders:

The Eel River RR. has been leased to the Wabash RR. Co. for the last twenty years, and the rental paid by the Wabash Company has furnished the money for the payment of dividends to the Eel River stockholders. The Supreme Court of Indiana has declared the lease to be in violation of law and has annulled the same The rental due to-day, which should have been paid by the Wabash Company, has not been paid, and consequently the usual dividend payable on the 5th inst. will be passed. The directors are working for some arrangement which will make the property of value to its stockholders, and every exertion will be made to protect your interests.-V. 70, p 1048.

Milwaukee Benton Harbor & Columbus Ry.—Report Denied.—A. A Patterson Jr., President and General Man-ager. writes as follows under date of Ost. 8: "Ia reply to your favor of the 5th inst., regarding the enclosed clipping, there is no foundation for the reported lease or sale of our road to the 'Vandalia,' or to any other road. No negotia-tions of that nature are under consideration.—V. 65, p. 572.

Minneapolis & St. Louis RR.-Earnings.-The earnings for the year ending June 30, 1900, compare as follows:

Other Net Interest, Divid'nds Bal'nce, Fiscal Gross Fiscal Gross Net Other Interest, Divid nas Bal'nce, Year. earnings. earnings. July 14, 1900, \$90,000; on preferred 5 p. c. \$200,000.-V. 70, p. 1249.

New Orleans & North Eastern RR.-Report.-For the years ending June 30 the results were:

Fiscal Gross Year. earnings. 1899-00\$1,856,200 1898-99 1,545,687 -V. 69. p. 1008.	Net earnings. \$519,615 399,591	Interest charges. \$379,200 379,200	Net Land purchasc. \$1.004 9,214	Balance. surplus, \$13,411 11,177
--	--	--	---	--

New Orleans & Western RR.-Not Sold.-No bidders appeared at the sale Oct. 6, and the property will be offered for sale again. The upset price of \$1,500,000, it is expected, will be reduced.-V. 71, p. 437, 288.

New York Susquehanna & Western RR.-In Charge of Financial Affairs.-J. A. Middleton has been elected Third Vice President, with office at No. 21 Cortlandt St., New York. He will have charge of the financial and accounting affairs of the company.-V. 71, p. 698, 236.

Pere Marquette RR.-Listed.-The New York Stock Ex-change has listed \$250,000 additional first consolidated mortgage 5 per cent gold bonds of 1939, making the total amount listed to date \$2,850,000. The additional bonds were issued for construction and new equipment.-V. 71, p. 698, 646.

Reading Belt RR .- New Line and Bonds .- See report of Reading Company on page 758.

Seaboard Air Line Ry.—Official Statement.—On pages 765 to 767 will be found an official statement giving the facts about this new system, its mileage, earnings, capitalization, etc.-V. 71, p. 699, 646.

Southern Indiana Ry.-Earnings.-The company reports as follows for the year ended June 30, 1900:

Olher Fixed charges. Balance, income. Interest. Kentals. Taxes. surplus. \$1,313 \$62,232 \$17,500 \$16,814 \$53,852 Gross Net earnings. earnings. \$343,019 \$148,583 -V. 69, p. 591.

Toledo St. Louis & Kansas City RR.-Fourth Instalment. -The fourth instalment of the payment due on the stocks, viz., \$5 a share on the preferred stock and \$3 per share on the common stock, is called for payment at the Central Trust Co. on or before Oct. 25, 1900.-V. 71, p. 544, 438.

Vicksburg Shreveport & Pacific RR.—Report.—For the year ended June 30:

Fiscal Gross Net	Land	†Interest	Balance,
Year. earnings. earnings.	sales, elc.	accrued.	aeficit.
1894-00\$691,531 \$183,219	\$56,807	\$40×,889	\$1+8,863
1898-99 678,384 205,387	33,639	409,526	170,500

t Includes in 1899-00: On prior lien bonds, \$79,380; first mortgage, \$240,000; third mortgage, \$89,509.-V. 70 p. 1292.

Wisconsin Minnesota & Pacific Railway.-Mortgage.-The company has made a mortgage for \$2,000,000 covering the 95.7 miles of road between Red Wing and Mankato; the Mercantile Trust Co. of New York City is mortgage trustee, This line was purchased from the Chicago Rock Island & Pacific Ry. Co. in 1899 by parties identified with the Chicago Great Western Ry.

INDUSTRIAL, GAS AND MISCELLANEOUS.

American Tobacco Co.-See Blackwell Durham Tobacco Co.-V. 71, p. 237.

American Tin Plate Co.-Work Resumed.-After an interval of more than three months, the company resumed manufacturing operations on Oct. 8. The mills were closed

pending a settlement of the wage scale, which was effected recently. (See V. 71, p. 664.)-V. 71, p. 289.

Grand Trunk Ry .-- Plan Approved .- In London on Tuesday the stockholders, by a large majority, approved the plan to reorganize the Chicago & Grand Trunk, with a guaranty of interest on its bonds.—V. 71, p. 390, 341.

Great Northern Ry.—Listed.—The New York Stock Ex-change has listed \$102,000 additional St. Paul Minneapolis & Manitoba Railway, Montana Extension first mortgage 4 per cent gold bonds of 1937, making total amount listed to date \$7,907,000.-V. 71, p. 643,654.

Horking Valley Railway.- Listed.-The New York Stock Exchange has listed \$600,000 additional first consolidated mortgage 4½ per cent gold bonds, making total amount listed to date \$9,108,000. The proceeds of the additional bonds were applied to the payment of the Columbus & Toledo second 7s on Sept. 1, 1900.—V. 71, p 698, 436.

Leominster (Mass.) & Clinton Street Rallway.-Consolidation .- The Massachusetts Railroad Commission has authorized the purchase of the Worcester & Clinton and the Clinton & Hudson street railway companies and the issue of \$310,000 capital stock in exchange for their stock.

Blackwell Durham Tobacco Co.-Sale Ordered.-Judge Simonton, of the United States Circuit Court at Charlotte, N. C., on Sept. 6, ordered the sale of this company's prop-erty as requested by the American Tobacco Co. the principal stockholder. The upset price is \$4,000,000.-V.70, p. 896.

Boston Steamship Co.-Bonds.-Kidder, Peabody & Co. of Boston have arranged to sell about \$650,000 bonds of this new company. Two freight steamships of about 11,500 tons cargo capacity each, it is said, have been ordered from the Maryland Steel Co. They will run, it is said, not on any regular line, but wherever there are cargoes to be carried.

Colorado Fuel & Iron Co,-Status.-President Osgood is quoted as saying :

"Our coal and coke business is the largest in the history of the com-pany. Our steel business has doubled in the past 50 days. The ten-dency of prices is stiffer. Western roads will be large purchasers of rails; their hesitation is due to the election. We have completed 200 coke ovens and have 300 more under way, while another 100 will probably be built next spring. Our new blast furnace will be ready March 1. Our steel plant is being improved and enlarged."—V. 71, p. 600. 544. 600, 544.

For other Investment News see Page 767.

Reports and Documents.

ERIE RAILROAD COMPANY.

EXTRACTS FROM THE FIFTH ANNUAL REPORT-FOR THE FISCAL YEAR ENDING JUNE 30, 1900.

NEW YORK, October 2d, 1900.

To the Bond and Shareholders of the Erie Railroad Co.:

The Board of Directors respectfully submits the following report of the operations of your property for the year ending June 30, 1900:

EARNINGS AND EXPENSES.

The following statement shows the gross earnings, expenses and net earnings from operations for the fiscal year of the entire system (excepting the New Jersey & New York Railroad and the Coal Companies, for which latter see next page), including the Union Steambout Line. Union Dry Dock, dining cars and restaurants, and for comparative purposes similar figures are also given for the fiscal year of **1899**:

Earnings..... 74·29% 74.57%

The company's gross revenue from transportation, as is shown above. amounted to \$38,293,031 87, which was an in-crease of 13.45 per cent, or \$4,540.327 95, over the preceding twelve m nths; while the operating expenses amounted to \$28,448,605 14, an increase of \$3,278,678 86, or 13.03 per cent, as compared with the year 1899, resulting in net earnings of \$28,444,2673 an increase of \$1,261,649,09 or 14.70 per cent \$9,844,426 73, an increase of \$1,261,649 09, or 14.70 per cent, over last year.

The ratio of Expenses to Earnings was 74.29 per cent, being a decrease, compared with the last fiscal year, of 0.28 per cent.

MERCHANDISE FREIGHT.

The transportation of merchandise freight produced a revenue amounting to \$20,153.762 44, being \$2,334,820 68, or 13.10 per cent greater than last year.

The tonnage moved equaled 14,246,636 tons; as compared with last year an increase of 693,332 tons, or 5.12 per cent.

The number of tons carried one mile amounted to 3,259,-789,754 ton miles, an increase of 2.20 per cent, or 70,054,805 ton miles.

The average rate received per ton per mile was 6.18 mills, an increase, as compared with the year 1899, of 0.59 mills, or 10.55 per cent; but the average haul decreased 6.52 miles, or 2.77 per cent, falling from 235.35 miles to 228.83 miles.

While there was more tonnage transported, the very satisfactory increase of over 13 per cent in the revenue is largely due to the improvement in the average rate, reflect-ing the general prosperity which existed throughout the country for the greater portion of the year.

COAL.

The coal tonnage transported by the Company for the year

The coal tonnage of the Company represented over 47 per cent of the total tonnage handled.

As a whole, the coal business for the year was satisfactory, revenue as well as tonnage showing an increase; and while the average rate per ton per mile is an improve-ment over the year 1899, it continues lower than any of the preceding years, and lower than the traffic warrants.

GENERAL FREIGHT TRAFFIC.

The entire freight traffic of the Company, including both merchandise and coal, amounted to 26,947,892 tons, being an increase over the preceding twelve months of 2,030,948 tons, or 8.15 per cent.

The tons carried one mile equaled 5,157,955,975, an in-crease of 6.68 per cent, or 323,180.692 tons. The revenue derived from this business was \$28,827,988 53,

an increase over the year 1899 of \$3,818,564 94, or 15.27 per cent.

The general average freight rate per ton per mile in-creased 0.42 mills, or 8.12 per cent, being 5.59 mills, as against 5.17 mills; but the average haul decreased from 194.04 miles to 191.41 miles, being 1.36 per cent, or 2.63 miles.

The generally prosperous condition of affairs enabled the Company to secure an improvement in its freight rates, as shown; but even so the average rate is only about the same as it was for the year 1898.

In addition to the above tonnage Company's freight amounting to 2,801,266 tons was transported, making a grand total tonnage handled 29.749,158 tons. In transporting this total tonnage 13,978,134 train miles were run, a decrease of 8.51 per cent, or 1,299,6.3 train miles,

as compared with the preceding year; while the volume of tonnage increased, as shown, 8.15 per cent. The revenue per freight train mile was \$2.06 as compared with \$1.64 last year, an increase of 25.99 per cent, or 42 cents. The average train load of revenue freight was 369 tons, an increase of 52.54 tons, or 16.60 per cent, the train load last year being 316.46 tons. Including Company's freight, the average train load reached 392.32 tons as against 335.46 last year, an in-crease of 56.86 tons, or 16.95 per cent. The average number of tons of freight in each loaded car was 16.73 tons, an in-crease of 0.95 tons, or 6.02 per cent. Including the Company's freight, the average car load on the system was 17'79 tons, or 1.06 tons greater than 1899.

The average cost of carrying a ton of freight one mile was 4.27 mills, being 0.30 mills, or 7.56 per cent, greater than last year. Excluding taxes, which can hardly be considered a part of the cost of transportation, it was 4.12 mills. This increased cost per ton is to some extent due to the increase in the volume of business handled. The large expenditures made for improvements and betterments and charged to operating expenses also materially increased the cost per ton.

It is worthy of note, however, that a larger tonnage was handled with a smaller train service, the effect of which is reflected in the net results of the year. Of the increase in the revenue \$1,806,580 07 is due to the increase in tonnage, while \$2,011,984 87 is due to the increase in the average rate per ton per mile.

The Company's freight business, therefore, both as to volume and revenue, shows a satisfactory growth under all the circumstances surrounding the transportation industry. The general industrial prosperity that this country has experienced during the past year should have produced greater benefits to the railroads; but unfortunately it seems that the transportation industry is the last to feel the effects of prosperity.

PASSENGER TRAFFIC.

The Company's passenger traffic continues to show a very encouraging growth, and the results for the year exhibit a

amounted to 12,701,256 tons, an increase of 1,337,616 tons, or 11.77 per cent over the previous year.

The tons carried one mile increased 15.39 per cent, or 253,-125,887 ton miles, the total being 1,899,166,221 ton miles.

The total revenue received amounted to \$8,675,226 09, being an increase of 20.63 per cent, or \$1,483,744 26.

The average rate per ton mile shows an increase of 4.58 per cent, having been 4.57 mills as against 4.37 mills for the previous year.

The average haul increased from 144.76 miles to 149.45 miles, being 3.23 per cent, or 4.69 miles.

Of the coal tonnage transported, 6,687,301 tons were anthracite coal, being 655,583 tons, or 10.87 per cent, greater than the previous year.

The bituminous tonnage amounted to 4,432,434 tons, being an increase of 10.53 per cent, or 422,129 tons, over last year.

The coke tonnage equaled 1,581,521 tons, an increase of 259,904 tons, or 19.67 per cent.

gratifying increase over the previous twelve months.

The total number of passengers transported during the year amounted to 16,527,876, traveling 446,190,767 miles, and producing a gross revenue of \$6,905,224 28. The average fare paid by each passenger was 41.8 cents. The average distance traveled was 27 miles, resulting in an average revenue of 1.55 cents for each mile traveled.

The general results of the passenger traffic for the year as compared with the preceding year are as follows: The number of passengers increased 1,305,523, or 8 58 per

cent.

The miles traveled increased 36,203,550, or 8 83 per cent. The revenue increased \$594,780 41, or 9.43 per cent. The average revenue per passenger increased 0.3 cents, or 0.72 per cent.

The average revenue per passenger mile increased 0.009 cents, or 0.58 per cent.

The average distance traveled increased 0.063 miles, or 0.23 per cent.

The miles run by passenger trains amounted to 8,106,198, a decrease of 0.86 per cent.

The earnings per passenger train mile were \$1 01, an increase of 10.25 per cent.

The average number of passengers in each train was 55.04, an increase of 0.97 per cent.

The average number of passengers in each [car was 16.89,

an increase of 7.37 per cent. As in the case of freight tonnage, so also with the passen-ger business it will be observed that a larger volume of traffic was handled with a smaller train service.

Of the total number of passengers handled, 15,969,500 were local and 558,376 were through passengers, both classes of travel showing a very gratifying increase.

The increase in the average revenue per passenger per mile was in the local business, the through rate being a fraction lower than the previous year. The average distance traveled by the local passengers shows a slight increase, while the average distance traveled by the through passengers shows a decrease of nearly five miles; but the revenue in both classes of travel shows a satisfactory increase.

The travel across the North River, handled by the Pavonia Ferry, amounted to 14,263,813 passengers, an increase of 744,-118 over the number handled during the year 1899.

The Company's suburban passenger traffic in the territory adjacent to New York continues to grow, and, as stated in last year's report, the steadily increasing volume of this business justifies the expensive service demanded, and results in a fair return in revenue, although the rates continue very low, being in some cases only about street car fare. Although the competition in the through business, both in respect to fares and service, has been sharp, yet the Company has been able to increase its volume of this traffic, resulting in a very satisfactory addition to its revenues.

EXPENSES.

MAINTENANCE OF WAY AND STRUCTURES.

There were expended during the year for the Maintenance of Way and Structures \$3,974,618 01, being an increase of \$900,300 56, or 29.28 per cent, as compared with the previous year

This increase is due to heavy expenditures for the im-provement of the physical condition of the permanent way, made necessary by the use of heavier power and trains, as well as by the requirements of an increasing business, demanding improved and additional service.

The work of replacing wooden and light iron bridges with heavier modern steel structures, to accommodate the heavier equipment, has been actively conducted throughout the year.

MAINTENANCE OF EQUIPMENT.

Expenditures to the sum of \$6,889,647 42 were made for

the maintenance of the Company's equipment during the year, being an increase of \$1,715,510 62, or 33.16 per cent. This increase is due to the purchase of new and heavier equipment, and the remodeling of lighter engines and cars, as well as the application of air-brakes and couplers in conformity with the National and State laws.

CONDUCTING TRANSPORTATION.

The sum of \$15,806,021 02 was expended in Conducting Transportation during the year. an increase of \$601,219 48, or 3.95 per cent, as compared with the previous year.

The increase is due to the greater amount of business handled, the freight ton mileage increasing 6.68 per cent, and the miles traveled by passengers 8.85 per cent.

CONSTRUCTION.

The Construction Account for the year is charged with \$1,161,831 45, representing expenditures for additions and betterments made to the property. These improvements consist chiefly of :

Removal of grade crossings at Buffalo.

Balance of the cost of elevation of tracks at Jersey City.

Reducing grades.

Removing grade orossings.

Enlargement of yards.

From December 1st, 1895, to June 30th, 1900, the sum of \$8,081,583 15 has been expended for new equipment, and is represented by :

104 Locomotives, 4,000 Box cars, 5,000 ('oal cars, 200 Retrigerator cars, 6 Milk cars, 6 Horse express cars,

These expenditures are regarded by the management as an absolute necessity in order to maintain the volume of the Company's traffic and enable it to be handled at a minimum cost. As stated in previous reports, the Company has been and still is handicapped by the large number of small, inadequate cars that it received upon taking possession of the property. Much of this equipment has been worn out, and while the tonnage capacity has been replaced out of the Expense Account, the increasing business of the country, the continued demand for larger cars, and the importance of increasing the train load, has made necessary additional equipment of more powerful engines and larger cars

As stated elsewhere, equipment trusts, covering fifty locomotives, 1,000 coal cars and six horse express cars, were made during the year, and in addition thereto, as is also shown elsewhere, large expenditures were made and charged to Operating Expenses, for both engines and cars, in addi-tion to those necessary to maintain the Company's equip-ment. It is more than probable that still further expenditures in this direction will be required to enable the Company to maintain its position in respect to tonnage, as well as in its efforts to further reduce the cost of handling the traffic.

In compliance with the laws of the United States and of the several States through which the road passes, the work of applying air brakes and automatic couplers to the freight equipment has been continued during the year, the sum of \$423,737 91 having been expended for that purpose and charged to Current Operating Expenses. These laws have now been obeyed and the Company relieved of this very heavy expense. Hereafter the expenditure on this account will be for maintenance only.

COAL COMPANIES.

The net result of the operation of the Coal Companies for the twelve months ending June 30, 1899, was the sum of \$236,641 56, which amount has been credited as shown by the Income Account published herewith. The decrease in the Company's income from this source. as compared with the year 1898, is due to the rather unsatisfactory condition of the coal trade which prevailed during the year 1899, and which, it is gratifying to note, has somewhat improved during the year just ended. It is probable that the year ending June 30, 1900, will show somewhat better results, although the accounts are not yet closed, and therefore the figures for the year cannot now be definitely stated or in-cluded in the statement herewith.

EQUIPMENT TRUSTS.

Of the equipment trusts assumed by your Company from the New York Lake Erie & Western Railroad Company,

made covering 50 locomotives, 1,000 coal cars and 6 horse express cars, .\$1,777,989 90 Amounting to Upon which payments have been made to June 30, 1900. 4,664 98 1,773,324 92 Leaving a balance on that date of..... Making the total equipment trusts out-standing as of June 30, 1900..... \$4,652,284 13 The total payments on account of equipment trusts made during the year amounted to \$949,026 45.

- - 2 Derrick cars, 2 Lake steamers, 1 Tug boat,
 - 1

Rotary snow plow, Shop tools.

Construction of second track. On the New York & Greenwood Lake Division, \$28,269 10 has been expended for additions and improvements to that property, for the removal of grade crossings, purchase of additional property, etc., in addition to the above amount. This amount has been charged against the Special Construction Fund of the New York & Greenwood Lake Railroad Company, which now amounts to \$319,647 28, as shown in the balance sheet herewith.

From December 1, 1895, the date of the organization of this Company, to the end of the fiscal year. June 30, 1900, the sum of \$3,547,549 10 has been expended in improve-ments and additions to the property, consisting principally of second, third and fourth tracks, the reduction of grades, removal of grade crossings, additional real estate at terminals, etc.

EQUIPMENT.

The Capital Account has been charged during the year with \$1,758,060 19, representing the purchase of :

е.

50 Consolidation freight loco-	6	Horse express cars,
1,000 Pressed steel coal cars,	1	Rotary snow plow, Fifty-ton wrecking cran

CAPITAL STOCK AND FUNDED DEBT.

The Company's outstanding Capital Stock has been in-creased during the year by the issue of 227 shares of First Preferred and 767 shares of Common, making the Capital Stock account at the close of the year stand as follows :

Authorized Issue.	Issued.
Non-cumulative 4 per cent First Preferred	\$42,882,800,00
Non-cumulative 4 per cent Second Preferced	16,000.000 00
Common 113,000,000 00	112,357,400 00
Total\$172,000,000 CO	\$171,240,200 0

The increase in the First Preferred and Common Stock represents the purchase of similar amounts of Preferred and Common stock of the New York Susquehanna & Western Railroad Company.

Of the Prior Lien Bonds secured by the Company's First Consolidated Mortgage deed, an additional \$1,000,000 00 has been issued and sold during the year.

The total amounts of bonds issued under that mortgage, now outstanding, are :

Prior Lien bonds......\$32,452,000 00 General Lien bonds 32,954,000 00

The statements published herewith show in detail [in pamphl.t report] the Company's entire funded debt rentals of leased lines and other fixed obligations as of June 30, 1900.

INCOME ACCOUNT.

The Income Account, Table No. 2 in pamphlet. shows the sources of the Company's income for the year, and from which it will be seen that the

Gross Revenue from operations amounted to\$38,293,031 8 Operating Expenses and Taxes	7
Net income from operations	
Total income	2
Interest and rentals	3

Leaving a balance to credit of Profit and Loss of ... \$1.663,430 34

The Company's fixed charges for the year were \$114,548 74

greater than the previous year. During the year the Company has made earnings sufficient not only to meet all charges, but also to carry to the Profit and Loss account a surplus of \$1,663,430 34. This surplus for the year, added to that earned during the previous three years and seven months, gives as the total surplus earned from December 1, 1895, the date of the Company's organiza-tion, to June 30, 1900, \$3,454,873 66, as is shown by the Gen-eral Balance Sheet, Table No. 3 in pamphlet. The disposition of this accumulated surplus has been sub-

stantially as follows:

Advanced to the Chicago & Erie Railroad Company for payments made to the Chicago & Western Indiana Sinking Fund. This amount will ultimately be charged off against the Profit and Loss account, but will, by reason of the retirement of the Chicago & Western In-diana bonds, be represented by the increased value of the Chicago & Erie Railroad Company's investment in the stock of the Chicago & Western Indiana Railroad Company and the ultimate reduction of the rental paid to a nominal sum.

\$248,946 98

356,972 98 319,647 28

Company and the inimate reduction of the rental paid to a nominal sum. Advanced on account old New York Lake Erie & West-ern Car Trusts, for which amount this Company will eventually receive General Lien bonds. Advanced to the New York & Greenwood Lake Railway Company for construction purposes... Invested in materials in excess of the amount received by this Company December 1, 1895, from the Re-ceivers.

994,733 03 ceivers... Amount expended for construction work done, car-trust payments, etc..... 1,553,166 00

Total.....\$3,473,466 27

For the amount expended for construction, etc , stated in the last item, the Company has received or is entitled to re-ceive Prior Lien bonds or General Lien bonds. If these bonds had been sold, the proceeds would now be available for the treasury in the form of cash; but the prevailing prices of the Prior Lien bonds and the General Lien bonds have been so much below their intrinsic value that the Directors have not deemed a sale of the bonds would be for the interest of the shareholders. In view of these condi-tions, as well as of the fact that the steady growth of the Company's business demands for its conduct an increasing working capital, the Board of Directors thinks it better policy to make no sale of the bonds until by the development of the business and as a result of the expenditures made for construction, the continuing ability of the Com-pany to pay regular dividends shall have been assured by the accumulation of a larger surplus. The credit of the Company would thus be so firmly established that its bonds should readily command a fair market price.

FINANCIAL.

struction Account, which represents obligations to the city of Buffalo for the removal of grade crossings, and which amount is shown in the Company's liabilities, item "Con-struction Obligations."

The amount due by the New York & Greenwood Lake Railroad Company for construction work on that road has been increased by \$28,269 10, as heretofore explained, mak-

ing the total charged against that Company \$319,647 28. "Miscellaneous Securities owned" by the Company show a decrease of \$406,860 76, as compared with June 30, 1899, due to the redemption of Car Trust Certificates owned, less the cost of stocks of subsidiary companies purchased

The increase in the "New York Susquehanna & Western Railroad Capital Stock" is due to the purchase of additional stock of that Company.

The increase in the "Chicago & Western Indiana Sinking Fund" is due to additional payments made as required by that Company's mortgage, and, as previously stated, proportionally increases the value of this Company's stock in that corporation.

The increase in "Materials and Supplies on Hand" is largely due to the increased cost of material and to some extent to the additional volume of supplies waich the Company has found it necessary to carry in stock on account of slow deliveries by manufacturers. The changes in "Capital Stock" and "Bonded Debt" have

been heretofore explained. The increase in "Construction Obligations" represents the

Buffalo grade crossing account, heretofore referred to, less payments of \$ 2,000 made on "Construction Notes" of the

Notes of the New York Lake Erie & Western Railroad Company. "Mortgages on Real Estate" have been reduced to \$431,-725 by net payments amounting to \$7,775 The increase in "Equipment Trusts Outstanding" is accounted for as stated under "Equipment Trusts," repre-senting the purchase of additional equipment, less payments made during the year made during the year.

The Company has a credit to its Reserve Fund of \$292,-496 04, representing the cash value of depreciations charged to the expenses of the year and available for operating expenditures hereafter. The decrease in this item as compared with the preceding year is due to the use of the fund for renewals and replacements as contemplated.

The current assets amply take care of the current liabilities.

Of the securities for Construction purposes turned over by the Erie Reorganization Committee, \$2,750,655 22, there have been converted into cash the following:

Value as placed on the Books, Jan-uary, 1897. Cash Realized from Sale. \$115,200 00 Buffalo & Southwestern RR. Second Lien Bonds.
 405,000 00 Erie Railroad Company's Prior Lien \$126,720 00 Bonds. 364,055 22 New York & Greenwood Lake Railway 414,000 00 Prior Lien Bonds...... 1,034,400 00 Erie Railroad Company's General Lien 385,570 22 630,000 00 Eris Railroad Company's General Lien Bonds. 630,000 00 Delaware & Hudson Exclusive Car Trust Certificates. 10,000 00 Car Trust of New York Certificates.... 1,214,908 93 630,000 00 10,000 00 \$2,558,655 22 \$2,781,199 15

In addition to these securities there have been certified by the Trustee and turned over to the Erie Railroad Company, to reimburse it for expenditures already made or to be made in the future, the following :

\$2,452.000 00 Erie Railroad Company's Prior Lien Bonds and \$1,000,000 00 Erie Railroad Company's General Lien Bonds.

Of these securities there have been converted into cash the following:

Par Value.

Cash Realized from Sale.

\$2,452,000 00 Erie Railroad Company's Prior Lien \$2,181,761 26 Bonds.....

leaving owned by the Company securities for construc-tion purposes as follows:

Total......\$1,192,000 00

The Erie Railroad Company has received cash from all

The Company's financial condition at the close of the fiscal year is shown by the General Balance Sheet, Table No. 3 in pamphlet report.

Of the Prior Lien bonds, amounting to \$5,000,000 00, reserved under the General Consolidated Mortgage deed for construction and equipment purposes, \$2,452,000 00 have been obtained from the Trustee and sold, \$1,000,000 00 during the fiscal year and \$1,452,000 00 prior thereto, leaving a balance of \$2,548,000 00 still available for these purposes.

No additional General Licn bonds reserved for the redemption of bonds of subsidiary companies, the purchase of simi lar stock and the payment of certain Equipment Trust obligations have been issued during the year; but the Company is entitled to \$961,673 33 of these bonds, which will be obtained from the Trustee and used to reimburse the Company for its outlays made during the year on the above accounts.

The increases of \$1,435,893 52 to "Construction" and of \$1,758,060 19 to "New Equipment" have been heretofore explained, with the exception of \$274,052 07 in the Con-\$10,767,178 04

sources for construction and equipment purposes from December, 1895, to June 30, 1900, as follows:

- \$500,000 00 From sale of Erie & Wyoming Valley Railroad stock as stated in report for the year ended June 30, 1898.
- 500,000 00 Cash received in settlement with the National Transit Company on account of an old claim.
- Cash turned over by the Erie Reorganization Com-4,343,850 13 mittee.
- 2,781,199 15 Cash realized from sale of securities turned over by the Erie Reorganization Committee.
- Cash realized from the sale of securities obtained from the Farmers' Loan & Trust Company, Trustee. 2,181,761 26
 - 2,500 00 Received from sale of P. C. & Y RR. bonds, turned over to the Erie Railroad Company by the Re-ceivers of the New York Lake Erie & Western Railroad.
- 457,867 50 Cash realized from sale of Capital Stock of the Northern Raliroad Company of New Jersey orig-inally paid for by the Erie Reorganization Com-mittee from Construction Funds and sold June 1 1899, by the Erie Railroad Company.

which amount has been expended for the purposes below mentioned:

	For purchase of Northern Railroad Company of New Jersey stock, as explained above.
3,273,497 03	New construction.
5,948,258 23	New equipment.
	Old New York Lake Erie & Western Car Trusts.
	Payment of Mortgages on Real Estate.
348,364 11	Disbursed on account of Union Steamboat Company
	In liquidating its affairs and in building or acquir.
	ing additional property
119.657 27	Liquidating Receivership, New York Lake Erie &
	Western Railroad Company.

\$11,922,255 82

The Company has, therefore, expended from its current cash to June 30, 1900, \$1,155,077 78, for which it is entitled to be reimbursed from the sale of Prior Lien or General Lien Bonds. Such bonds will be obtained from the Trustee

and used for the above purpose in due course. The Board has had the Company's accounts for the year examined by Messrs. Haskins & Sells, Certified Public Accountants, in accordance with the usual practice. The result of this examination is stated in the Accountant's certificate published herewith.

GENERAL REMARKS.

All the grade crossings of streets in Jersey City with the main tracks of your Company have been abolished, and there are now seven tracks between the Tunnel and Henderson Street, for a distance of 3,700 feet, resting upon solid embankme ts retained by first-class masonry within the limits of the Company's property, and carried over the streets by plate-g rder bridges with solid floors, making al together a permanent structure; besides these seven tracks, a new passenger coach yard with a capacity of fifty-six coaches has been built upon the new elevation, together with a commodious supply storehouse, provided with a heating plant for the warming of passenger cars. A twostory-brick freight house has been constructed, in connection with the track elevation, upon the site of the old house, between Henderson & Grove streets; the lower st ry of this house is upon the street level and the upper one upon that of the elevated tracks. The Jersey City terminus is now completed, and every available foot of ground owned by the Company is usefully occupied to the best advantage for rail road purposes

The third and fourth tracks between Ramseys and Suf-fern, including the reduction of the first and second tracks at the Mahwah grade from forty-two to twenty-six feet per mile has been completed; by this improvement a serious impediment to the east-bound traffic has been removed; the heavy trains on the New York Division now pass over this part of the line without difficulty, and the frequent delays to trains by stalling at this point are entirely avoided.

In conjunction with the Bergen County Railroad there are now virtually four independent tracks between the west end of the Bergen Tunnel and Suffern, a distance of 28.7 miles, there only remaining a short distance of four and one-half miles from Ridgewood Junction to Allendale with only the two tracks; a part of that distance is now being graded for additional tracks.

In order not to interfere with the very heavy traffic of last fall and winter, the work incident to the improvement of the grades of the main line near Howells, N. Y., was suspended. This work has now been resumed and is being rapidly completed.

By filling several sharp depressions and by cutting down the adjoining elevations, all the short heavy grades of the Allegheny Division have been reduced to twenty-six feet per mile, thereby enabling an increase in the east-bound train loads of from four to five cars.

The very heavy traffic of the year emphasizes the necessity of additional main tracks, as well as additional side tracks and increased yard room at termini, especially so on the Ohio Division. Second tracks were constructed between Shenango and Pymatuning, 5.4 miles; between Kent and Tallmadge, 6.90 miles; between Ontario and a point one

The gravity yard at Ararat Summit has been extended, at a cost of \$21,607 14. charged to Construction account, thereby permitting the more economical handling of cars as well

as reatly facilitating the movement of trains. The introduction of large metal cars with a carrying ca-pacity of fifty tons in the lake ore and coal trade necessitated the reconstruction of the coal transfer machine at Cleveland, the old one not being large enough to accommo-date the new cars. This new machine went into successful operation in April. The old machine is being reconstructed upon a new site as an auxiliary and to enable the more rapid fueling of vessels.

In compliance with the Grade-Crossing Law of the State of New York, the crossings at Ireland Road and Jamestown Street, near Randolph, and of Dunham Avenue at Celeron have been completed and those of Woodlawn Avenue at Elmira and Chenango Street, at Binghamton. are now under construction, and several others are under discussion

To accommodate the heavier power used on the Ohio Di-vision a number of bridges on that line should be rebuilt; one on the Mahoning Division, six on the Meadville Division and six on the Cincinnati Di ision. These structures were contracted for during the past year, but owing to the diffi-culty in getting the metal from the mills only one bridge is now completed and in place, but the others will be erected during this year.

The expenses in all departments of the road were affected in a very large degree by the continued increased prices of material which prevailed throughout the year. A careful estimate shows that these increased prices have amounted to an average of fully thirty-three and a third per cent over former prices.

Payments amounting to \$643,284 81 in the shape of mileage for the use of their cars were made to owners of private cars during the year, who control the loading and routing of the tonnage. This is an abuse which seems to be without remedy.

The total amount paid for taxes was \$997,522 94, being \$6,591 45 more than the preceding year, or 2.60 per centum of the Company's gross earnings, and equaling 0 19 mills on every ton of freight transported one mile.

Of the total operating expenses for the year \$15,507,855 97, or 54 51 per cent of the total expenditures, was paid by the Company directly to labor, being distributed among some thirty thousand employes.

The operations of the New Jersey & New York Railroad for the year are not included in this report, but they have been satisfactory, and that property is taking care of itself.

The general conditions surrounding the transportation industry have shown a marked improvement during the year. Although competition has been strong, the universal prosperity of the country finally reached the railroad companies, enabling them to obtain a more adequate compensation for the work performed and ensuring a greater stability of freight rates.

The Company's operations for the year are shown in detail by the accompanying tables. The general results of the year may be summed up as

follows:

The Company has earned all of its charges and placed a surplus of \$1,663,430 34 to the credit of its Profit and Loss Account.

The volume of freight tonnage increased over 2,000,000 tons, or over 8 per cent.

The volume of passenger traffic increased over 1,300,000 passengers, or over 8½ per cent. The average freight rate per ton per mile increased 0.42

mills, or 8.12 per cent.

The average rate per passenger per mile increased 09 mills, or 0.58 per cent.

The average freight train load, including Company's freight, increased 56.86 tons, or 16.95 per cent, the average load being over 392 tons, but on the Erie Division (1,237) miles) it reached 448 tons.

The average cost per ton of freight per mile increased 0.30 mills, or 7.56 per cent, but the difference between the average revenue and cost per ton per mile was 1.32 mills, as against 1.20 mills for last year.

It is with great regret that the Board announces the death during the year of one of its members, Mr. Charles H. Coster. Mr. Coster was the Chairman of the Committee which reorganized your property and took an active interest in the Company's affairs. His wise counsels and assistance

mile west of Galion, 8.4 miles.

The second track between Galion and Ontario was constructed upon an improved grade for the eastbound traffic; by reducing the maximum grades of sixty feet per mile, varying with lighter ones to a uniform grade of thirty-five feet per mile, it being the intention, ultimately, to reduce all the eastbound grades between Meadville and Galion to that rate as a maximum.

Using the Buffalo & Southwestern Railroad between Waterboro and Jamestown as part of the Ohio Division, we now have 35.8 miles of second track between Salamanca and

Galion on the main line of the Nypano On account of the large increase of the capacity of the plant of the Ohio Steel Company at Youngstown, Ohio, it became necessary to construct an entirely new supply yard in connection with those works, and a contract was entered into with the Pennsylvania Company, under which the necessary connection and sidings were constructed at joint expense. These improvements are now completed and in operation.

are greatly missed by the Board. Mr. Charles Steele has been elected a member of the Board in place of Mr. Coster.

The Company also lost by death the faithful and efficient services of Mr. W. J. Holmes, Superintendent of Telegraph, who had been in the service of the Company and its predecessors for the past forty-four years.

The results of the year are due to the hearty and loyal work of the officers and employes of the Company, and the Board takes much pleasure in publicly announcing its appreciation of their efforts and thanks them for their faithful service.

Respectfully submitted by order of the Board,

E. B. THOMAS, President.

THE CHRONICLE.

READING COMPANY.

THIRD ANNUAL REPORT-FOR FISCAL YEAR ENDED JUNE 30, 1900.

The Reading Company submits, for the information of its stockholders, the following report, not only as to the affairs of that Company, but also as to those of the Philadelph a & Reading Railway Company and the Philade phia & Reading Coal & Iron Company, of which corporations substantially all the stock is owned by the Reading Company.

The joint operations of the three Companies for the twelve months, July 1, 1899, to June 30, 1900, resulted in net earnings which were sufficient after meeting all interest and other charges, all expenditures for betterments and for the maintenance of equipment, to leave a surplus of earnings of \$1,938,000 83. The purposes to which this surplus was appropriated will be stated subsequently.

In this report he business of the three Companies will be discussed as in previous reports, with ut constant reference to the fact that each of the three Companies above named is entirely distinct from the other has a distinct organization, and is engaged in a distinct occupation.

Eliminating all duplication of accounts between the three Companies, the resu ts for the past fiscal year may be stated in their simplest form as follows:

Year Ended June 30.	1899-	1900.	1898-1 8 99.		
RECEIPTS: Reading Company I hitadelphi & Reading Railway Company. Phitadelphia & Reading Coal & Iron Company.	\$ 1,158,303 53 2',902,987 19 27.8 - 4,644 06	\$ 55,945,934 78	\$ 236.482 53 23,002,587 63 23.613,837 76	\$ 46,882,9 07 9 2

THE PHILADELPHIA & READING RAILWAY COMPANY.

The receipts of the Railway Company arising from the several classes of business compare as follows for the last six years, the period in each case being the twelve months ended June 30:

	Year Ended June 30.						
	1899-1900.	1898-1899.	1897-1898.	1896-1897.	1895-1896.	1894-1895.	
Ooal Traffic. Merchaudise Traffic. Passenger Traffic. Miscellaneous. Mall	\$11,371,202 77 9, 50,601 77 4,437,849 70 436,084 32 113,994 97	\$10,08 ⁺ ,700 82 7.824,888 41 4,0 ⁺ ,728 77 4,0 364 58 112,510 23	7.163.169 +8 3,877.546 68 389,951 21	\$9,535,676 77 6,4*5 030 63 3,763 890 07 377,539 21 103,157 51	\$9,706,230 28 7,141,240 22 3,994,425 60 382 182 17 100,750 15	\$ ³ ,7;9,037 02 6,402,646 63 4,011.71 * 59 68,060 61 97,731 86	
Total	\$26,109,733 53	\$22,456,192 81	\$21,475,241 64	\$20,285,294 19	\$21,324,761 42	\$20,639,209 71	

The tonnage of anthracite carried increased from 9,533,-693 tons in 1898-9 to 10,472,556 tons in 1899- 900, a gain of 1,138,863 tons, or 12.0 per cent, and the tonnage of bituminous coal increased from 4,201,622 tons to 4,539,719 tons, a gain of 338,097 tons, or 8.0 per cent. The revenue from coal traffic increased from \$10,085,740 82 to \$11,371,202 77, a gain of \$1,285,50 95, or 12.7 per cent.

Merchandise traffic increased from 11,385,92° tons to 14,-192,019 tons, a gain of 2,806,091 tons, or 24.6 per cent, and the earnings therefro u increased from \$7,824,888 41 to \$9,-750,601 77, a gain of \$1,923,713 36, or 24.6 per c-nt.

The number of passengers increased from 19.689,787 to 21,-910,349, a gain of 2.220,562, or 11.3 per cent, and the passen ger revenue increased from \$4,012,72877 to \$4,437,84970, a gain of \$425,12093. or 10.6 per cent.

Comparing these earnings with those of the five previous years, the total is the largest for six years; and in each of the four principal classes they are larger than ever before in the history of the company, or of its predecessor, The Philadelphia & Reading Railroad Company.

The policy of is creasing the efficiency and promoting the economical operation of the railway Company's several departments, to which reference was made in the last report, was continued throughout the year. Considerable sums of money have been spent in this way, which, with the exception of thos- spent for additional equipment, have been charged to Operating Expenses.

difficulty in moving trains at those points on account of the grades being steeper than the ruling gradient on this section of the railroad.

The passing sidings at Rupert, McAuley, Krebs and East Mahanoy Junction, on the Catawissa Road, have been extended to a length sufficient to allow the passage of two treight trains.

At Haucks Crossing, on the Catawissa Road, a yard has been built for the exchange of freight cars with the Central Railroad Company of New Jersey, this exchange of cars having been made hitherto at three separate yards.

New sidings have been built at St. Nicholas and Locust Spring collienes to accommodate the increased production of coal at these collieries.

A second track has been built from Port Clinton to Drehersville, a distance of 5.4 miles; and another has been nearly finished between New Ringgold and Reynolds, a distance of 5.2 miles. The building of this section of track included the construction of several new double-track steel bridges across the Little Schuylkill River. As soon as the latter se tion of road is completed, we shall have a double track road from Philadelphia to East Mahanoy Junction via the Main Line and the Little Schuylkill Railroad, a distance of 104.1 miles. The double track work required the re-arrangement of the existing tracks at Port Clinton, where the Little Schuylkill Railroad joins the Main Line, and the building of a new station at that point. The facilities for sorting and distributing cars at Tamaqua have proved inadequate to the increased business passing over the Little Schuylkill Railroad, and an extension of the yard tracks at that point has been made. Additional tracks have been built at Thomaston, Wadesville and William Penn collieries, each of these improvements being required to accommodate the increased production of the collieries named. On the Main Line the lay-off sidings at Mohrsville, Royersford, Aramingo, Perry, Stony Creek and Port Kennedy, which were insufficient to pass two freight trains of the ordinary length, have been extended. A large yard, embracing 9.7 miles of track, has been built at Woodlane, 12.2 miles above Philadelphia, this being the nearest point to the City at which cars can be yarded, to be distributed as they may be required to various points in and contiguous to the City.

EXTENSION OF TRACKS.

The principal items of improvements and extensions of traoks are as follows:

The yard at Newberry Junction, where business is exchanged with the Erie, Fall Brook and Beech Creek railroads, has been completed.

A section of double track 2.8 miles in length has been built from Newber y Junction to Williamsport, to avoid the congestion of traffic which frequently occurred upon that section of road.

A section of double track 2.5 miles in length has been built from Milton eastward—an important "meeting and passing" point, being the junction of the Catawissa and Shamokin Sunbury & Lewisburg railroads, at which trains were liable to delays.

At Pottsgrove, Dougal and Christian's siding, on the Catawissa Road, a reduction of grade has been made, their being At Birdsboro additional tracks have been constructed to accommodate the increasing business of the Iron Works at that point.

At Port Richmond tracks have been built to reach the new freight pier and the new car-repair shop and to increase the storage room for freight destined for ocean shipment.

On the Lebanon Valley Division a second track has been laid between Robesonia and Myerstown, a distance of 9 miles, closing the only gap that existed in the double track on the Lebanon Valley Road, and making that road doubletracked from Reading to Harrisburg; the business on this Branch having become so great that its movement was seriously impeded by having to pass over a section of single track.

On the New York Division new tracks have been built at Janney, Parkland, Jonkintown, Woodbourne, Somerton, Bethayres, Weston, Hamilton, Skillman, Glenmoore, Ewing and Yardley, the business having grown so large on that Division as absolutely to require these facilities.

These are the principal additions that have been made to tracks during the year. There are other minor ones, and wore all required to enable the read to handle its business with safety and economy. Some of them were commenced in the provious year, and a few of them were not completed during the last fiscal year, but the great bulk of the outlay was then made

was then made The total expenditures for new tracks during the year amounted to \$797,520 68.

TERMINAL IMPROVEMENTS.

The larger items of improvements to buildings and road equipment are as follows:

At Port Richmond, Pier "G," intended for the handling of heavy freight, has been widened to 142 feet, and extended 240 feet to the Port Warden's Line, and partly equipped with electric lighting and electric oranes. This work is nearly completed.

A new covered freight pier "C," 150 feet wide and extending 630 feet to the Port Warden's Line, has been built.

Anoth r pier on the Delaware River at the foot of Noble Street, 150 feet wide and extending 550 feet to the Port Warden's Line, has been built to accommodate ocean shipping. Some of the work on these piers was commenced before the beginning of the fiscal year, and some of the work was not completed at its close, but the work was mostly done during the year.

AUTOMATIC ELECTRIC SIGNALS.

During the last fiscal year automatic electric signals have been extended from Bethayres to Trenton Junction, a distance of 17.8 miles, from Trenton Junction to Bound Brook, a distance of 27.3 miles, and along the Philadelphia Subway, and at all such other points on the Main Line between Philadelphia and Pottsville as had not been previously guarded in this way.

viously guarded in this way. The traffic has increased so much on several sections of the Reading System of railroads that it has been found necessary to its safe and economical handling to continue the extension of the system of automatic signals, which we have pushed as rapidly as was practicable. We have expended on this work in the last 6 years to June 30, 1900, \$553,189,29, of which amount \$294,554 43 was spent during the last fiscal year, and we have now the equivalent of 476.6 miles of single track thus protected. We shall make further extensions of the system during the coming year, carrying the signals to Bethlehem, on the North Pennsylvania Railroad, a distance of 32 miles; and to Harrisburg, on the Lebanon Valley Railroad, a distance of 56 miles; and will co tinue this work wherever by so doing, gains can be made in safety of travel and in proper handling of traffic.

An air shaft with ventilating fan has been crected to clear Mahanoy Tunnel of noxious gases, that tunnel being now used so constantly that improved ventilation is imperatively required.

A number of minor items of improvements of this class were constructed during the year, the total cost being \$624,009 82.

BRIDGE CONSTRUCTION.

The larger items of bridge construction were the renewal of the bridge over the Susquehanna River, at Rupert, on the Catawissa Road, to replace the old wooden bridge at that point. Six other bridges were built on the Catawissa Road between West Milton and Danville, and a bridge was erected at the crossing of the Richmond branch at Fair Hill Junction in Phi.adelphia. The total expenditure for these items during the year was \$127,425 55; but this expenditure was mostly for the renewal of bridges, and not for the erection of additional bridges.

At Wayne Junction, where we have a great and growing passenger and freight business, our facilities are no longer adequate to the proper conduct of our traffic, and improvements have been commenced looking to the completion of a four-track railroad from Reading Terminal to Wayne Junction; to the reconstruction of the interlocking system in use at that point, and to the building of a passenger station with adequate facilities. The work should be completed within the present fiscal year.

Our facilities for transacting passenger and local freight business at Harrisburg have teen inadequate for a number of years. It has been difficult to improve them properly because the question of getting rid of a grade crossing by the main business street of the City, of the Pennsylvania Rnilroad, and our Lebanon Valley Railroad, which are there close together, has been one about which the railroad authorities and city authorities could never arrive at an agreement. It is possible that such an agreement can now be reached, and if so we propose to erect station buildings which shall represent us not inadequately at the capital of the State.

Harrisburg is one of our largest freight interchance points. The business exchanged by us with the Pennsylvania Railroad and that coming from the Baltimore & Ohio Railroad and the Western Maryland Railroad via our Peiladelphia Harrisburg & Pittsburg Railroad, as well as that of the industrial establishments about Harrisburg, is all handled there, and our yards do not offer facilities for the business.

As the immediate vicinity of Harrisburg offers no opportunity to make a proper yard, ground has been bought at Rutherford, four unles east of Harrisburg, and a yard has been commenced which will be completed so as to accommodate our present business during the present year. We have provided ample room to extend this yard when it shall become necessary.

Some progress has been made in reducing the grades on the western end of the Philadelphia Harrisburg & Pittsburg Railroad, but the work of bringing the whole road to more moderate grades need not be completed for two or three years more.

There is a great and growing interchange of freight business at Allentown between our system of railroads and the Central Railroad Company of New Jersey. This traffic has outgrown the provision that had been made for it, and the construction of increased yard facilities was undertaken during the past year and will be finished this year.

These are the leading items of the expenditures for contemplated improvements within the year 1900-1901.

What has been done in the past few years has enabled us to handle a business which it would have been impossible to move over the road with the facilities that existed five years ago, and these improvements must continue if the business is to grow. There are, however, but few single improvements in contemp'ation of the magnitude of those which have been undertaken in the last few years, and we hope soon to be able to say that we have brought the Reading Railway up to thoroughly good modern practice.

OOEAN BUSINESS.

The Philadelphia Trans Atlantic Line trading to London has now four new steamers, each of 7,500 tons dead weight capacity, in its line, and two more are under construction and far advanced. The owners are so well satisfied with the prospects of the line that they are contemplating the construction of still larger and faster boats for the service.

The line to Avoumouth, Bristol, is now well established and growing in efficiency and popularity.

The Cosmopolitan Line maintains weekly sailings to Rotterdam by means of six steamers, and has a successful line to Leith and one to Amsterdam.

The Hamburg-American Line has considerably increased its business during the year, and the Allen Line to Glasgow also has done a much larger business by our railroads than heretofore. The steamers of these lines sail regularly from our piers, and we have also a considerable amount of trafflo which is lightered from our tracks to steamers lying at other berths on the Delaware River.

Besides these regular lines large shipments go from our Grain Elevator in tramp steamers, and large importations of iron ore and lumber come to us from foreign and domestic ports. We have no ownership in vessels of these lines—some of the vessels are under charter by us, but for the most of them we have no responsibility. The following statement shows the growth of the business shipped from Port Richmond, whether to domestic or foreign ports, in several of the leading items :

IMPROVEMENTS CONTEMPLATED.

The work of bringing the Reading Railway system up to modern requirements so as to enable it to move its very large tonnage with the greatest economy has not yet been completed; but the work now in progress, with that completed during the last fiscal year, should equip the system fairly well with yards and sidings, and the principal in crease that may be required in these items will arise from further growth of business. There is still work to do, reducing grades on our lines of principal traffic, and building sections of second or third track as they may be required, but there is not much of this work imperatively needed at the present time

During the same years t'ere were shipments as follows from Port Richmond to rail points, mostly on the lines of the Philade phia & Reading Railway:

Vear ended June 30— 189 '-0', 1808-9. Merchandlse and Iron Ore—tons 2,000 152,652,069 271,: 84 =

1808-9. 1897-8. 1896-7. 271,284= 265,8 9 381,030

The large decrease in business from Port Richmond in the years 1897-8 and 1898-9 was due mainly to the greatly les ened importation of iron ore.

The wharves and piers on the Delaware River water front, which have been heretofore reported as under construction, have been nearly completed, and most of them are now in use; ocean business still presses upon us in excess of our capacity to handle it, and as there is yet much unused water front at Port Richmond, we have commenced the construction of an additional freight pier, which will enable us to accommodate two additional lines of steamers.

PHILADELPHIA SUBWAY.

The Philadelphia Subway was so far completed before the close of the fiscal year that regular passenger service, which had not passed over this route since November 14, 1896, was resumed on May 20, 1900—the principal freight station on the line, that at the crossing of Broad Street, having been closed October 2, 1896, and reopened September 16, 1899. The work of constructing this Subway, which was done on plans which were agreed on in general and in detail by the engineers of the City and the Reading engineers, but executed by the engineers of the City with our co-op-eration, has been throughout well, economically and quickly done, and it is as well suited to our uses as it was possible to make it. The work is not quite completed, but it is so nearly finished as to render it probable that its cost will be considerably less than the estimate of \$6,000,000. Our agreement requires us to pay one half of the cost, our contribution not to exceed in any case \$3,000,000; and our burden will be reduced in proportion as the cost is less than the estimate. This cost is to be repaid by us in twenty an-nual instalments, bearing about 31/2 per cent interest, the first payment to be made December 31, 1904. We have on deposit, bearing interest, \$500,000, which is held as security for the bond we have given to the City for the faithful performance of our obligation under the Subway contract. This, of course, will be available in course of time toward extinguishing our indebtedness; and we have further commenced since the close of the last fiscal year to create a fund for this purpose by setting aside in monthly instal-ments \$100,000 per year, which with interest will provide the necessary means to discharge our obligations on this score as they mature. The contribution to this fund will be charged to expense account, as the construction of the Philadelphia Subway created no new asset.

WILMINGTON & NORTHERN RAILROAD STOCK TRANSFER.

The purchase of a controlling interest in the stock of the Wilmington & Northern Railroad was reported in 1898. The efforts which were made to develop the business, and the economies that were made in operating that railroad, were so successful that it was determined to offer to pur chase the remaining stock upon the same terms as were paid for the majority interest. The offer brought in nearly the whole of the capital stock, and the road has been leased to the Philadelphia & Reading Railway Company upon a guaranteed payment of its fixed charges and dividends of three and one-half per centum per annum on the capital stock. The stock purchased by us has been deposited with the Girard Trust Company as the basis of an issue of four per cent Stock-Trust Certificates to the amount of about 87 per cent of its par value. A contract has been made for the sale of these certificates, and the treasury of the Company will be thus reimbursed for the outlay in making the purchase, leaving the stock in our control. The interest upon the Stock-Trust Certificates will be provided out of the rental under the lease, which, from our past experience, should be amply earned. The road is in good condition, requiring only ordinary repairs, and is sufficiently equipped for its present business.

READING BELT RAILROAD.

On several occasions during the last eight years there has been great difficulty in promptly moving freight and coal over the Reading Main Line. It is doubtful whether any line of double-track railroad in the world passes much more traffic than moves over this road in the fall months. The busiest part of the road is in the City of Reading, where the traffic of the Lebanon Valley, Reading & Columbia, Wilmington & Northern, Schuylkill & Lehigh and East Pennsylvania railroads is exchanged with the Main Line and with each other. To this traffic is added the movement through the City of the fuel, raw material and finished products, as well as the miscellaneous freight, required, by a prosperous indus rial City of 80,000 people, and the interchange between our own locomotive and general machine shops in the lower part of the City and our car shops two miles above. Our tracks cross a number of the principal streets

.

of Reading at grade, and the delays to the street traffic which occur many times a day have grown to be almost intolerable interruptions to the business of the City; and if the business of the Philadelphia & Reading Railway shall grow in the future as it has grown in the immediate past, the time is not far distant when it will be impossible to pass our business satisfactorily over our two-track road through Reading.

through Reading. The question of relieving this blockade has been under con-ideration for a number of years, and was the subject of exhaustive study last winter, when every possible plan was carefully studied and estimated upon. As the result of these studies it was decided to be necessary to build a Belt Railroad around the City, leaving the main line two miles north of the centre of Reading, crossing by high bridges over th- Schuylkill River and the Tulpehocken Creek, passing under the Lebanon Valley Railroad, with which a connection will be made, passing through West Reading and crossing the Schuylkill River a second time. Here the road will fork, the south bound traffic passing over the Wilmington & Northern Railroad and joining the main line at Brdsboro, while the north-bound traffic will continue on the main line to a point about four miles north of Birdsboro, where it will leave the main line and after passing under the Pennsylvania Schuylkill Valley Railroad tracks will join the other tracks of the Belt Railroad near the lower crossing of the Schuylkill River.

The conditions of the problem were that no grade adverse to south-bound movement should be encountered on the Belt Railroad as there is none on the main line, and that there should be no grade opposing the north bound movement exceeding fifteen feet per mile. Both of these requirements have been met. The line will be about 7.4 miles long, and the whole work is estimated to cost about \$1,500,000. It should be completed before the end of the year 1901.

The "Reading Belt Railroad" has been organized to build this line with a capital stock of \$750,000, which has been provided for, and the balance of the money needed will be provided out of an issue of an equal amount of mortgage bonds bearing four per cent interest, which have been sold

bonds, bearing four per cent interest, which have been sold. The construction of this line will relieve the main line of the movement of all the through freight and coal trains through the busy part of Reading, and will permit the interchange outside of the city of the business of the main line and the Lebanon Valley Ra lroad, which interchange is very large. The growth of West Reading, which is rapidly enhancing the value of property there, would, in a few years, make the ground required for the construction of the Belt Railroad very costly. This was another reason why the building of the Reading Belt Railroad could not be delayed.

LOCOMOTIVE SHOPS.

The need of some radical improvement of the principal locomotive and machine shops of the Reading Railway at Reading has long been recognized. Shops for the construc-tion and repair of cars, roundhouses for locomotives, a coaling station, storehouses and a number of minor structures have been erected in the northern part of Reading, but the locomotive and machine shops, with their allied indus-tries, have always remained two miles away, in the lower part of the city. These shops have been improved and extended somewhat, though no large amount of money has been spent on them for many years. Some of the tools are antiquated, and the processes employed are necessarily un-Last year it was found impossible to keep up economical. the locomotive repairs, and a large number of engines had to be sent away for reconstruction. Our room in this part of the city is quite limited, and to obtain more ground would be very costly, while the contour of the ground and the position of the streets are such as make a satisfactory reconstruction of the shops on the present site impossible; and after thorough examination it was decided that it would be necessary to build new shops on another site. Work has therefore been commenced upon new shops on ground in the northern part of the city, adjacent to the car shops, and when they shall have been completed we shall have, for the first time in many years, a modern and eco-nomical plant for the repair of a'l of our railroad equipment. It will take two years to complete this work, and we can continue to use the old shops while we are constructing and equipping the new ones.

EQUIPMENT.

The rolling and floating equipment has been fully kept up, the valuation and the capacity being both larger than when the reorganization was made, as the following statement will show;

	June 30, 1900.			December 1, 1896.		
	No.	Oapacity, Lbs.	Valuation.	No.	Capacity, Los.	Valuation.
Locomotive Engines and Tenders. Revenue Freight Cars. Passenger Cars: Work Cars.	827 31,524 775 940	14,004,288 1,679,946,400 17,3 8 0,400	\$4,350,467 00 14,138,929 86 2,227,868 92 352.224 87	28,204	12,295 946 1,336,049,600 9,281,760	\$3,880,190 19 10,781,322 00 2,108 344 00 221,00 00
Total Rolling Equipment			\$21,069,488 65			\$16,990,856 19
Steam Colliers and Tugs Coal Barges, eto	22 91		970,550 00 1,488,6^8 00	15 103		6/3,000 00 816,850 00
Total Floating Equipment			2,459,208 00			1.439,850 00

This increase of average value of the several items has come from the fact that in each class of equipment the new locomotive, car, tug or barge is larger and more costly than the old ones were. The average value of all locomotives has increased from \$4,906 to \$5,260; the average value of has increased from \$4,500 to \$5,500, the average value of freight cars producing revenue has grown from \$383 to \$444; the steam colliers and tugs, whose average value in 1896 was \$41,533, is now \$44,116, and the average value of barges, which was \$7,930, has increased to \$16,358. The de-crease in numbers of the last item has been caused by put-ting out of service 49 canal boats of a capacity of 200 tons each; to offset which loss there have been added to the fleet each; to offset which loss there have been added to the fleet 18 barges, each of 1,500 tons capacity. The total value of the rolling equipment in our possession, including that owned and that leased, has increased from \$16,990,856 19 as of December 1, 1896, to \$21,069,488 65 as of June 30, 1900; and the value of floating equipment has increased during the same period from \$1,439,850 00 to \$2,459,208 00, making a total increase of value of \$5,097,990 46.

This increase has been contributed:

By the Reading Co. from proceeds of Sale of Securities	\$1,735,990 00
By Reorganization Committee	91,000 00
By Car Trusts	2,299,907 00
By Wilmington & Northern RR. Equipment under Lease	347,227 33
By Philadelphia & Reading Railway Co	623,866 13
-	and the second s

\$5,097,990 46

The above stated sum of \$623,866 13 was as much money as could properly be taken from the ordinary revenues of the Philadelphia & Reading Railway Company to purchase new equipment, but as the demands of the business required a further large increase, arrangements were made to have about \$4,000,000 worth of new equipment pu: chased. The purchasers have agreed that upon our payment of ten per cent of the cost in cash, they will lease the whole equipment thus purchased to the Philadelphia & Reading Railway Company under an agreement to pay them \$252,000 semi-annually on account of the principal sum, with interest at the rate of four per cent per annum, until the whole shall be repaid, when the equipment will become the property of the Reading Company. About one-half of the equipment purchased in this manner, being the equipment above stated as having the value of \$2,299,907, was delivered before the close of the fiscal year, and the balance is now being received.

The work of equipping locomotives and cars with automatic couplers and air-brakes as required by Act of Congress was completed within the limit of time allowed by the National authorities. This work was commenced in 1893 and has cost to June 30, 1900, \$1,988,075 73, of which \$765,816 97 was expended in the last fiscal year.

INSUBANCE.

All losses resulting from fire or from marine disaster have been paid out of the Insurance Fund, and the balance out-standing to its credit at the end of the year, \$167,332 15, is on deposit and bearing interest.

THE PHILADELPHIA & READING COAL & IRON COMPANY.

The total production of anthracite coal from lands owned and leased by The Philadelphia & Reading Coal & Iron Company in the year 1899-1900 was 9,219,764.10 tons, an increase of 1,036,120.10 tons over the production of the previous year, or 12.7 per cent, the production of the whole region having increased in the calendar year 1899 about 13.8 per cent over the production of the year 1898.

The coal purchased aggregated 1.125,467 tons, a decrease of 69,914 tons, or 5.9 per cent, and the sales amounted to 9,379,427 tons, an increase of 1,076,083 tons, or 13.0 per cent over the previous year. The coal mined and the coal sold in this fis al year were larger than in any previous year in the Company's history.

The cost of coal mined and purchased for the year was \$1 66 7-10, which is 7 8 10 cents higher than the cost for the previous year. This increased cost resulted principally from the following causes, viz.: the increased cost of labor, due to the basis of wages paid being higher than during the year 1899; the much higher prices paid for materials used, and to the lawely increased emeunt expended for colliery and to the largely increased amount expended for colliery and other improvements.

All work done at the collieries and all additions made to the

leaving a balance still outstanding of Divisional Mortgage^S \$400,000, the larger part of which mature in 1904; of Collateral Sinking Fund Loan. \$1,555,000; and of bonds and Mortgages on Real Estate, \$117,146 80.

In accordance with the plan of reorganization the Divi-sional Mortgage Bonds and the Bonds and Mortgages on Real Estate were paid off by the issue of an equivalent amount of 4 per cent General Mortgage Bonds. The additional amount of cash required in this transaction was furnished as provided in the plan of reorganization. General Mortgage Bonds will be drawn for the balance of the Sinking Fund Collateral Trust Loan as required. The transac-tion resulted in an annual interest saving of \$26,270.

From the revenues of the Coal & Iron Company there was set aside the sum of \$750,154 12, arising out of a charge of five cents per ton on all coal mined from the Company's lands in the two years ending June 30, 1900. This charge should be made in every year, as each year's mining depletes the Company's estate.

READING COMPANY.

The amount of Reading Company General Mortgage Bonds outstanding was increased during the year \$2,434.000, making the total bonds outstanding on June 30, 1900, \$64,994,000, as shown by the balance sheet of Reading Company. This increase is accounted for as follows:

Drawn to retire Divisional Coal Land Bonds of the Philadel-
phia & Reading Coal & Iron Company, which matured
during the year\$1,327,000
Delivered to Reading Company in pursnance of the terms
of the General Mortgage, for new acquisitions and better-
ments, and in the treasury of the Company, as stated
above
Drawn under the terms of the General Mortgage, on ac-
count of an equal amount of the Philadelphia & Reading
Railroad Company 10-year Sinking Fund Bonds, which
has been paid and canceled during the year out of the
proceeds of the sinking fund of that loan
Drawn under the terms of said Mortgage, on account of
mortgages on real estate and ground rents which have
been paid off and extinguished 15,000
\$2,867,000
Loss amount of Conorol Mostgage Bonds numbered and

General Mortgage Bonds purchased 433,000 canceled out of the proceeds of the sinking fund.....

\$2,434,000

Of the General Mortgage Bonds above referred to as having been issued during the year, the \$1,327,000 drawn to retire the Philadelphia & Reading Coal & Iron Company Divisional Mortgage Bonds were delivered to the Reorganization Syndicate, who provided the funds to take up the maturing bonds; while the \$25,000 drawn to retire The Philadelphia & Reading Railroad Company 10-year Sinking Fund Bonds and the \$15,000 drawn to retire mortgages and ground rents, as well as the \$1,500,000 delivered for new acquisitions and betterments are in the treasury of the Company.

GENERAL MORTGAGE BONDS.

Reading Company on October 18, 1899, certified, as pro-vided in the General Mortgage, to the Trustee thereof, to the application of the proceeds of the sale of the \$1,500,000 General Mortgage Bonds which, as stated in the annual re-port of 1899, were delivered to it for new acquisitions and betterments. These new acquisitions and betterments consisted of:

Equipment	\$1.870.609 28
For Construction upon Properties of Reading Company	
For Construction upon Philadelphia & Reading Termi-	
nal RR	7,500 00
For Construction upon Port Reading Railroad	
	\$1,983,934 46
Less proceeds of sale of Junction Railroad Company	•
stock, and of Equipment not required	. 482,700 00
•	\$1 501 234 46

r structures have been charged to cost of coal.

The work, which has been carried on for several years with the purpose of reducing the number of separate workings and of increasing the average output of the collieries, and thus lessening the cost of each operation, has been car-ried so far that whereas in June, 1893, fifty-four collieries produced a daily average of 38,160 tons, or 706 tons per col-liery per day, in June, 1900, forty collieries produced a daily average of 47.849 tons, or 1,196 tons per colliery per day. The decrease in the number of collieries has been caused by the closing of worked-out collieries, and of collieries of which the working was excessively costly, and by the con-solidation of contiguous collieries. The collieries have still a capacity of daily production in excess of the maximum amount that they are likely to be called upon to produce. and they and all their appliances are in thoroughly good order.

The funded indebtedness of the Coal & Iron Company has been reduced \$1,374,000 this year by payments on account of the principal of the following loans:

Thereupon the Trustee delivered to the Reading Company the \$1,500,000 additional General Mortgage Bonds stated in the preceding paragraph to be used for further acquisitions and betterments.

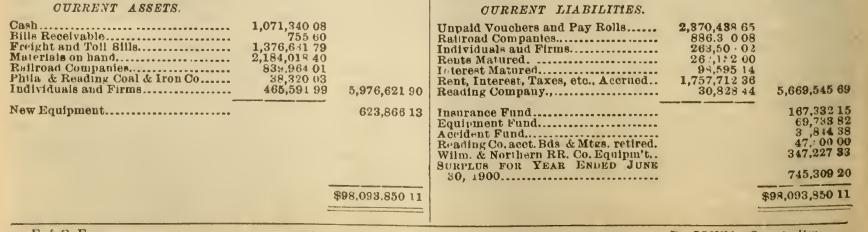

DIVIDENDS.

On February 6, 1900, the Board of Directors declared out of the surplus earnings a dividend of $1\frac{1}{2}$ per cent upon the First Preferred Stock, which was paid on March 8, 1900. Under the terms of the General Mortgage, simultaneously with the declaration of the dividend the Company was obliged to pay to the Trustee a sum equal to five cents per ton on all anthracite coal mined from lands owned by The Philadelphia & Reading Coal & Iron Company and pledged under the General Mortgage during the preceding year. This sum, which was also paid out of the surplus earnings, amounted to \$383,525 21, and was applied by the Trustee to the purchase of \$433,000 General Mortgage Bonds, which have been canceled.

THE CHRONICLE.

The surplus funds of the several Companies at the closeof the fiscal year were as follows:PHILADELPHIA & READING RAILWAY CO.:Surplus for year 1899 1900	service of the several Reading Companies. 10 their faith- fulness, loyalty and energy are due a great share of such success as the Management has been able to achieve during the period to which this report relates. By order of the Board,

-The October issue of the "Street Railway Journal" is a special number issued in honor of the convention of the American Street Railway Association at Kansas City, to be held Oct. 16 h-19th. It is called an international engineering number, since containing articles by prominent authorities regarding electric railway interests throughout the world.

An article on the Metropolitan Street Railway of this city is of special importance to the financial public.

-Attention is called to the offering of stock of the Vulcan Copper Mining & Smelting Co. This is the Nevada copper company with which the Siegel-Cooper Co. is identified. Particulars will be found in the advertisement.

ST LOUIS & SAN FRANCISCO RAILROAD COMPANY.

FOURTH ANNUAL REPORT-FOR THE FISCAL YEAR ENDED JUNE 30, 1900.

75:100

The following report of the operations of the St. Louis & San Francisco Railroad Company, for the year ended June 30th, 1900, is respectfully submitted:

Income Account; the former showing a profit of \$30,671 95 and the latter a deficit of \$8,065 72.

The Earnings, Operating Expenses and Statistics of these two branches are not included in the statistical tables of this report, as they were incorporated into the system at the close of the fiscal year.

FINANCIAL CHANGES.

The net increase in the Bonded Debt of the Company during the year was \$3,305,875, and is made up as follows:

ing the year was \$3,305,875, and is made up as follows:
\$2,994,000 in Kansas City Division Bonds, issued for the purchase of the road of the Kansas City Osceola & Southern Railway (Kansas City to Bolivar), 146.9 miles.
\$300,000 in Consolidated Mortgage 4% Bonds, issued for expenditures account of improvements, new equipment and construction, including the cost of the Blackwell Extension, 17.87 miles, but retained in the treasury of this Company.
\$59,375 in Consolidated Mortgage 4% Bonds, issued in accordance with the provisions of the Consolidated Mortgage (also retained in the treasury of this ' ompany), against the following underlying lien bonds, which were redeemed and canceled during the year:
\$10,000 Trust Mortgage of 1880, 6% Bonds.
\$17,500 2nd Mortgage (now 1st) 6% "B" Bonds.
\$15,000 Ft. Smith & Van Buren Bridge 1st Mortgage 6% Bonds.
Total underlying lien 6% Bonds redeemed and canceled

Total underlying lien 6% Bonds redeemed and canceled during the year, \$47,500. The amount due the American Loan & Trust Company on Equipment has been reduced \$43,087 50 by the monthly payments made during the year; and \$40,000 of the \$200,000 Consolidated Mortgage 4 per cent Bonds originally pledged with the equipment have been released and placed in the treasury of this Company.

The Company has now in its treasury \$1,120,625 of Consolidated Mortgage 4 per cent Bonds received, from time to time, for capital expenditures and against the payment and cancellation of underlying lien bonds; none having, so far. been sold.

The mineral lands held by the Granby Mining & Smelting Company under lease from this Company were sold to the Granby Company in June for \$200,000, and that amount, less expenses incurred, was credited to Property Account. The Granby Company will no doubt now develop the prop-erty much faster than if the lease had continued, and will thereby add to the traffic of this Company.

MILEAGE ACQUIRED.

KANSAS CITY OSCEOLA & SOUTHERN RAILWAY.

This Company on June 1st, 1900, purchased the railroad and equipment of the Kansas City Osceola & Southern Rail-way Company, owning the line of railroad between Bolivar and Kansas City, 146.9 miles, heretofore operated by this Company under an operating contract, and issued in pay-ment therefor \$3,300,000 St. Louis & San Francisco Railroad Company, Kansas City Division Bonds, dated June 1st, 1900, and bearing interest; \$976,000 at 3% and \$2,324,000 at

4% per annum. The agreement in respect to the purchase provides for a sliding scale of interest on the \$2,994,000 bonds during the first four years; \$60,000 for the first year, beginning Novem-ber 1, 1900; \$72,500 for the second, \$85,000 for the third and \$97,500 for the fourth, after which payment of interest will be made at the stated rates.

In order to put the property in first-class condition, to take care of the increasing business, the Kansas City Osceola & Southern Railway Company has agreed to expend \$953,000 for needed improvements, including re-laying road with

70-lb. steel rail and additional equipment. The reconstruction of the road is being rapidly pushed, and will no doubt be completed by December 31, 1900.

Of the \$3,300,000 of bonds issued there have been reserved and deposited with the Trustee \$306,000 4% bonds, to be used for future improvements and additional equipment.

KANSAS MIDLAND RAILWAY.

By an understanding with the committee representing the First Mortgage Bondholders of the Kansas Midland Ry., this Company on April 1, 1900, assumed all the responsibility for the operation of that road, Wichita to Ellsworth, 106 40 miles. Prior to that date the road was operated by this Company for account of the Receiver of the Kansas Midland Railway. The Committee of Bondholders have agreed to turn over the property to this company prior to Nov. 1, 1900, free of all encumbrances, in consideration of receiving \$1,300,000 of St. Louis & San Francisco RR. Northwestern Division Bonds, bearing interest from April 1, 1900, at rate of 4 per cent per annum, and being a first lien on the property. \$200,000 of said \$1,300,0 0 bonds, are to be placed with the Continental Trust Company of New York, to be delivered after January 1, 1901, on the order of this Company, at a rate not exceeding \$75,000 in any calendar year, to provide for future improvements and betterments, to be made to the property and for the purpose of additional equipment.

* Decrease.

The increase in Gross Earnings for the year was \$756,583; 47% of this increase was in freight, and 53% in passenger, mail and express.

The increase in Operating Expenses was \$351,336, or 46% of the increase in Earnings, and left an increase in Net Earnings of \$405,247, or 54% of the increase in gross.

There was a decrease in the percentage of Operating Expenses to Earnings, as compared with previous year, of 1.29%, due to economy in Transportation and Traffic and General Expenses, and not at the expense of Maintenance of Road and Equipment, as shown in detail in table "K."

The results of operating the Kansas City Osceola & Southern Ry., between Bolivar and Kansas City, Mo., 150.70 miles, and the Kansas Midland Ry., between Wichita and Ellsworth, Kan., 106.40 miles, are shown separately in the

The Bondholders' Committee is also to receive \$964,800 of this Company's Common Stock Trust Certificates.

This branch furnishes considerable traffic to the main line, and is the connecting link between this line and valuable connections.

BLACKWELL EXTENSION.

The road from Cale, O. T., to Blackwell, O. T., 17.87 miles, was completed to the latter point in August, 1899, at a total cost of \$112,950 10, and was on November 15, 1899, deeded to this Company, and thereby became subject to the lien of the Consolidated Mortgage. The cost of the extension was transferred at June 30, 1900, to Property Account. The net earnings of this extension exceed the interest on

the cost.

SALEM BRANCH.

The Salem Branch mileage decreased 1.31 miles during the year by reason of 5.50 miles of the Plank Branch having been taken up and an extension of the Smith Branch of 4.19 miles having been made.

The iron ore banks on the Plank Branch having been exhausted and new ore banks having been opened up on the extension of the Smith Branch accounts for this change in mileage.

ST. LOUIS OKLAHOMA & SOUTHERN RAILWAY.

For some time past this Company has been considering the advisability of building a line of railroad from a point on its road in the Indian Territory to Denison, Texas. After full examination of this subject, it was deemed advisable to construct such line.

Messrs. Johnston Brothers & Faught, contractors, having secured a Congressional charter for the St. Louis Oklahoma & Southern Railway Company to construct the road from Sapulpa, I. T., to Denison, Texas, a distance of about 198 miles, this Company on January 10, 1900, entered into a contract with that firm to build the line, this Company to receive the entire capital stock, and to guarantee the bonds of the St. Louis Oklahoma & Southern Railway Company, issued to the contractors for its construction and equipment. The total authorized issue of bonds is \$5,500,000, but of this amount \$1,000,000 is to be reserved for the purposes of ex-tension, betterments and new equipment. The bonds are to bear 4% interest and are redeemable at the pleasure of

this Company after 1905. In addition to the road of 198 miles, the contractors are to furnish new equipment costing \$325,000.

The road is being built under the supervision of the engi-neers of this Company. It will be built with 65-pound rails, and will be in all respects of standard construction, with ample sidings, standard depots, stock pens and section houses. In short, the contract provides for a fully com-pleted road ready for operation when received from the contractors.

It is confidently expected that all of the mileage acquired during the year will add to the earnings of the Main Line, as well as take care of the interest charges on the cost price of the properties.

TRAFFIC.

The following is a comparison of freight and passenger traffic with the previous year:

FP	EIG	HT.
r n	EIG	LT.

	1900.	1899.	Inc. or Dec.
Earnings	\$5,520,998 52	\$5,166,180 41	I. \$354.818 11
Tons Carried	2,865,1-1 -1	2,587,829.1	I. 277,352
Ton Mileage		506,999,422	<i>I</i> . 14,616,174
Rate per Ton		\$1·9963	D. \$0.0694
Rate per Ton per Mile	1.038c.	1·0 1 90.	<i>I.</i> 0.039c.
Average Haul	182.05 miles	195·92 miles	D. 13.87 miles

There was an increase in the ton mileage of 14,616,174, or 2.8 per cent, and an increase in the ton inneage of 14,010,114, of 25.13 tons, or 19 per cent; while the freight train mileage decreased 539,463 miles, or 13.8 per cent. The average car-load was 12.59 tons, as against 10.96 the previous year, being an increase of 1.63 tons, or 14.8 per cent.

It is gratifying to note that the average rate per ton mile increased '039 of a cent, indicating to some extent a. more stable condition of the rate situation than in the previous year.

The average haul shows a decrease of 13.87 miles and is on account of the larger increase in the local business as compared with the through or long-haul tonnage, and which is also partly the reason for the increase in the average rate per ton per mile.

PASSENGER.

EQUIPMENT.

Liberal expenditures were made during the year for re-pairs to equipment. There was an increase of 19.21% in the charges to Maintenance of Equipment Expenses over those of the preceding year.

The following new equipment was purchased and added during the year:

3 Postal Cars,	200 Coal Cars,
2 Chair Cars,	100 Box Cars,
6 Caboose Cars.	

the total cost of which was \$205,691 62, of which there was charged to Operating Expenses the value of all equipment destroyed and sold during the year, amounting to \$152,247 25. The equipment received with the Kansas City Osceola &

Southern and Kansas Midland railways was as follows:

	K. C. O. & S.	Kan. Mid	,
Locomotives	12	11	
Passenger Cars		4	
Freight Cars		99	
Road and Tool Cars	3	1	
he following old cars, viz.:			

The following old	cars, viz.:	
82 Coal,	148 Stock,	7 Short Ore,
449 Box,	13 Flat,	2 Tool,

were turned over to the American Car & Foundry Company, in exchange for 100 new 30-ton box cars. The difference of \$54,965 21 between the book value (\$130,673 21) of the old cars and amount realized for same (\$75,708) was charged

to Operating Expenses. When any equipment is wrecked, sold or taken out of service, the book value of same is charged to "Operating Expenses—Maintenance of Equipment;" and credited to a "Replacement Fund;" and when additional equipment is purchased, the cost of the new equipment is charged to that fund.

PHYSICAL CONDITION AND IMPROVEMENTS.

The physical condition of the property has been fully maintained.

The expenditures for maintenance of way and structures

for the year increased \$63,927, or 7.9% over previous year. Forty five miles, or 4,974 tons, of new steel rail were laid during the year, of which 3,205 tons were of 70 lb., 1,767 tons of 75 lb. and 2 tons of 85 lb. per yard. This rail was contracted for two years ago at the low price then prevail-ing and cost \$95,479 84. The net cost. after deducting the yalue of old rails taken up was \$44,579,60

value of old rails taken up, was \$44,579 60. The usual renewals of cross ties were made during the year. 496,039 cross ties and 90 sets of switch ties, all of white oak, were put in track, at a total cost of \$140,- $445 \,\, 53$

Sixteen bridges were renewed with solid masonry foundations in place of wooden structures, and the total cost

charged to operating expenses. 85.98 miles of track were ballasted with crushed rock and gravel, during the year, at a total cost of \$97,279 28 of which \$33.739 71 was charged to operating expenses.

There were 96.98 miles of new wire fencing built during the year, where none previously existed. 23.7 miles of new sidings and switches were laid during

the year. These were found necessary in order to accommodate the increasing volume of business, and to connect with new industries tributary to our lines.

All improvement work not appearing in table "E" [pamphlet] was charged to Operating Expenses.

LAND DEPARTMENT.

The net receipts of the Land Department for the year, including royalties on mineral lands, were \$18,802 53.

86,459 24 acres and 546 town lots remained unsold at June 30, 1900, the estimated value of which, together with the balance due on outstanding contracts, amounted to \$230,-402 79.

GENERAL.

The materials and supplies of this Company are carried in the balance sheet at cost, and as the same are used are charged into Operating Expenses at cost. This Company is without floating debt, and as before stated has paid for all improvements, betterments and new

	190 0.	1899.	Increasc.	
Earnings\$	1,835,566 79	\$1,507,062 47	\$328,504 32	
Passengers Carried	2,301,365	1,917,156	384,209	
Passengers Carried 1 Mile.	88,228,897	72,943,145	15,285,752	
Rate per Passenger	\$0.7976	\$0 7861	\$0.0115	
Rate per Pass'ger per Mile.	2·080c.	2.066c.	0.0140.	
Average Haul	38.34 miles.	38.05 miles.	00 ·29 miles.	

The increase in passengers carried one mile was 15,285,-752, or 20.9 per cent, and there was an increase of 4.18 in the average number of passengers carried per train. The passenger train mileage increased 164,342 miles, or 7.6 per cent.

The rate per passenger per mile increased .014 of a cent, and the average distance each passenger was carried in-creased .29 of a mile. The increase in the passenger rate per mile is accounted for by reason of the larger increase of the regular local passenger business, as compared with the increase in the suburban and inter-urban and the through traffic. The local passenger traffic increased 25.94 per cent and the through 12.93 per cent.

equipment, since its organization, without having had to sell any securities.

Bonds have been issued for new mileage only; and the only equipment notes outstanding are those held by the American Loan & Trust Company, Boston, Mass., amount-ing on June 30th. 19 0, to \$150,206 25, payable in monthly instalments to April 30th, 1904.

By direction of the Board, Mr. Stephen Little was re-quested to examine the accounts of this Company for the

past year, and his certificate appears on the next page Owing to continued ill-health, Mr. D. B. Robinson resigned the Presidency of this Company in April last. Mr. Robinson had been President of the Company since the reorganization in 1896, and it was with deep regret that the Board acce ted his resignation. At the same time a resolu-tion of the Board was passed in appreciation of Mr. Robinson's services, and spread upon the minutes.

> B. F. YOAKUM, President.

SEABOARD AIR LINE RAILWAY.

OFFICIAL STATEMENT REGARDING MILEAGE, EARNINGS, CAPITALIZATION, ETC.

In June, 1900, the Seaboard Air Line System completed the construction of the more than 200 miles of new connecting lines built during the past fiscal year, and on July 1st began its new fiscal year with 2,600 miles of road in operation, extending from Richmond and Norfolk on the northeast to Jacksonville and Tampa in the South, and Tallahassee, Montgomery and Atlanta in the Southwest, reaching also the seaport cities of Wilmington, N. C., Savannah, Ga., and Fernandina, Fla.

This system also reaches the capital cities of each of the six States which it traverses, and its lines also extend to nearly every important city as well in these six States.

The Seaboard Air Line System is now operating through trains between New York and Jacksonville and other Florida points, and between New York and Atlanta. From Richmond to Quantico it uses the lines of the Richmond Fredericksburg & Potomac RR., 80 miles, and from Quantico to Washington and New York, its trains run over the Pennsylvania System on the same terms as those under which the trains of the Southern Railway, the Chesapeake & Ohio and the Atlantic Coast Line are operated.

and the Atlantic Coast Line are operated. The completion by the Seaboard Air Line of the short cut from Columbia, S. C., to Hamlet, N. C., opened up a new through line between the North and the South, reducing the distance from New York or Washington to Tampa and Cuba, as compared with the Southern Ry. and its connecting lines, by 110 miles, and as compared with the Atlantic Coast Line and its connections by 70 miles. The saving in distance effected by the Seaboard Air Line

The saving in distance effected by the Seaboard Air Line between other important points, as compared with its competitors, is equally as great.

petitors, is equally as great. The Seaboard Air Line is the only system whose own tracks extend all the way from Richmond to Jacksonville and Tampa, Florida, and it is the shortest and quickest thoroughfare between the North and East and Florida and our new West Indian possessions.

our new West Indian possessions. The business of the System is growing rapidly, especially since the consolidation of the lines on July 1st, 1900, became effective.

Approximate Earnings since July 1st, 1900, thus far received show an increase of 15 per cent over same period a year ago.

To accommodate this expanding business the Comoany has within t he past it neo v months found 164 to purchase fifty new locomotives and 2,200 freight cars, in addition to a large number of cars which have been built during the past year at the shops of the various divisions of the system. These are not, however, sufficient for the Company's immediate wants, and orders are soon to be placed for additional locomotives and six full trains of passenger cars. This system enjoys in a remarkable degree the good-will and popularity of the merchants and shippers at all points reached by its lines, which is a matter of no small consequence.

* These 36 miles were built by the Seaboard Air Line for account of the South Bound Division of the Florida Central & Peninsular System SHORTEST OF ALL LINES BETWEEN NORTH AND SOUTH

The following tables show the distances between Washington and various Southern cities by the Seaboard Air Line on the one hand and by the Southern Railway and the Atlantic Coast Line RR. and the two latter Companies' connections, on the other.

By the completion of the Seaboard Air Line System, the distance between the North and the South has been materially shortened.

Upon the opening of the road which is now being surveyed between Athens and Charleston (the terminals for which have already been purchased in Charleston and Augusta), the Seaboard Air Line System reaches every one of the cities mentioned in the following tables, over its own rails, with the single exception of the distance between Richmond and Washington (13 miles), over which the thorough trains of the Seaboard Air Line run under close traffic arrangements with the R. F. & P. and Pennsylvania Railroads^{*}

MILEAGE.

The mileage on July 1st, 1900, of the several systems which now compose the greater Seaboard Air Line Syst-m, which systems had previously been operated separately, was as follows:

Owned. Leased. Total.

OLD SEABOARD AIR-LINE SYSTEM.

Comprising fourteen separate corporations and is ciuding 958 6 miles in operation during the last flacal year, and 157.4 miles just completed. 1,116 1,116

Of the twer ty railway companies embraced in the greater Seaboard System, the Seaboard Air Line Railway already controls the entire capital stock of thirteen of the Companies; between 99 and 100 per cent of the capital stock of four more, and nearly the entire capital stock of the Florida Central & Peninsular and Georgia & Alabama Rys. Of the capital stock of the remaining company-the Sea-board & Roanoke (81 miles in length)—the Seaboard Air

Line Ry. owns from 75 to 80%.

NEW LINES.

The development of industries everywhere along its lines is constantly necessitating the extension of the Company's sidings and the building of spur tracks, and the heavy growth of traffic is requiring the replacement of much of the 60-lb rails with the Company's standard of 80 lbs. to the yard.

The new main line mileage constructed during the past fiscal year was as follows:

Richmond, Va., to Ridgeway, N. C	102	miles.
Cheraw, S. C., to F. C. & P. Junc., S. C	. 91	66
Georgia & Alabama Ry., Meldrim to Savannah, Ga	. 17	66
	210	
Georgia & Alabama Terminals		
	219	66
To this should be added the Suwanee River extension of the F. C. & P. System, recently acquired, but the earnings	1	
of which were not included in the F. C. & P. earnings of the last fiscal year	ť	66
	2 59	

The cash expenditures made by this System during the past eighteen months for the construction of new mileage and for Terminals and new Equipment exceed Six million dollars.

The new line between Columbia, S. C., and Cheraw, S. C., connecting the F. C. & P. System with the Seaboard Air Line System, was opened for operation on May 10th, 1900,

and the new road from Richmond to Ridgeway Junction was opened for business on June 3d, 1900, although the operation of through freight trains was not commenced until July 1st, 1900. The operation of the new line Meldrim to Savannah, 17 miles, and of the Savannah Terminals was also begun July 1st, 1900.

FIRST MORTGAGE 4 PER CENT BONDS.

The new Seaboard Air Line Ry. First Mortgage 4s become a first and only lien upon some 287 miles of road, nearly all of which are a part of the main stem, including the line from Richmond, via Petersburg, to Ridgeway, N. C., and from Hamlet, N. C., to Columbia, S. C. These bonds also become a first lien upon 73 miles additional. subject only to \$150.000 old prior lien bonds still outstanding.

The First Mortgage 4s of the Seaboard Air Line Ry. may therefore be practically regarded as an essential First Mortgage on some 370 miles of road (at the rate of, say, \$50,000 per mile), but they also become a Consolidated Mortgage on some 2,172 miles additional, so that they will represent a Total Bouded Debt (including an average of about \$11,000 per mile of prior liens) on the entire System of 2,542 miles of road owned, at the rate of about \$19,000 per mile, which is considerably lower than the bonded indebtedness of any other system of equal mileage in the United States.

CAPITALIZATION.

The Securities of the Seaboard Air Line Ry., unlike any other S uthern System, are principally owned in the South, and the direct personal interest which this fact alone engenders on the part of the people in the various communi-ties through which the railway passes is a material benefit to the system.

The total amount of bonds and stock, including all new bonds and all prior lien divisional bonds of the consolidated system outstanding and in the hands of the public, and exclusive of the securities held in the respective freasuries of the different roads of the system, is as follows:

Main Line of

Bonds. Preferred Stock.	<i>Total.</i> \$49,256,000 16.695,100
TOTAL BONDS AND PREFERRED STOCK COMMON STOCK	\$65,951,100 29,107,650
TOTAL BONDS AND PREFERRED AND COM- MON STOCK	\$95,058,750

The capitalization of the Seaboard Air Line Sy-tem is lower than that of any other railroad system of equal size in the United States.

The following table gives a comparison as to bond and stock indebtedness between the Seaboard Air Line System and six other important systems in the South Atlantic and Gulf States, which is most favorable to the Seaboard.

There is no reason why the earnings of this system, which has now become the short line from Washington and the Chesapeake Bay to the South Atlantic, the West Indies and the Gulf, should not hereafter equal, or surpass, the earnings per mile of any other system in the same territory. It possesses great and unquestioned advantages, which time will demonstrate.

Name of Road.	Milcage Operated.		Bonds and Cifs of Ind. per mile Owned.	Preferred Stock per mile Owned.	Bonds and Preferred S'ock per mile Owned.	Oómmon Slock per mile Owned.	Total Bonds Preferred and Common Stock per mile Owned.
SEABOARD AIR LINE RAILWAY Southern Railway*. Louisvi le & Nashville Railroad Missouri Kansas & Texas Railway. Atlantic Coast Line Railroad Norfolk & Western Railway. Chesapeake & Ohio Railway	1,789 1,547	2,542 4,960 3,312 1,865 1,704 1,547 1,238	\$1°,000 24,000 3°,000 40,000 1°,000 31,000 53,000	\$6,500 12,000 7,000 11,000 15,000	\$25,500 36,000 47,000 26,000 46,000	\$11,500 24,000 16,0(0 30,000 10,~00 42,000 50,000	\$37,000 60,000 49,000 77,000 36,000 85,000 103,000

* Of the 6,431 miles operated by the Southern Railway June 30, 1900, 3,618 miles are owned outright and 1,342 miles additional are controlled by the ownership of all or nearly all of the capital stock of the component companies; 351 miles are operated under trackage rights, and the remaining mileage is operated under leases or agreements.

Of the 2,600 miles composing the Seaboard Air Line System nearly all are main line, the proportion of branch lines being only about 20 per cent, which is especially small as compared with the other trunk-line systems in the same ter-

The marvelous development of the Atlantic Coast Line may be judged when it can be shown that a block of 5,000 shares of the stock of the parent company of that system, which was purchased in 1880 at 50 cents per share, or \$2,500 for the entire lot of stock, is worth at to-day's quotations more than \$1,500,000 to the fortunate holders.

ritory. Of the 4,960 miles owned by the Southern Railway some 30 per cent are branch lines, and of the 1,704 miles owned by the Atlantic Coast Line 630 miles, or 37 per cent, are branches.

The gross earnings per mile of the Southern Railway in 1897 were less than \$4,000 per mile, being less than the gross earnings per mile of the Seaboard Air Line at the present The earnings per mile of the Southern Railway are time steadily growing with the development of the South, and its earnings for the fiscal year 1900 are very close to \$5,000 per mile.

The earnings per mile of the Louisville & Nashville RR. have increased very greatly since 1894

The earnings of the Chesapeake & Ohio Railway have advanced uniformly year by year from \$7,000 per mile in 1894 to nearly \$10,000 per mile for the year which has just closed.

The earnings of the Norfolk & Western Railway have increased from \$6,000 per mile in 1895 to about \$9,000 per mile in 1900.

EQUIPMENT.

The Company's rolling-stock at the present time, including cars and engines recently purchased, and which are now being delivered, embraces 297 Locomotives, 258 Passenger Cars and 8,419 Freight Cars.

The Seaboard Air Line Railway controls, through the Baltimore Steam Packet Co. (nearly the entire capital stock of which it owns), a magnificent fleet of steamers on Chesapeake Bay, plying between Baltimore and Norfolk, Ports-mouth, and Old Point Comfort, Va. The Company's terminals at Norfolk, Portsmouth and

Baltimore are immensely valuable, and it would be impossible to duplicate them.

The terminals of the Seaboard Air Line at Savannah are by far the most important on the South Atlantic Coast. Its terminals at Jacksonville, Fernandina, Fla., and Wilmington, N. C., are extensive and valuable, and productive of large revenue to the Company.

EARNINGS.

The NET EARNINGS of the several properties now embraced in the consolidated system (including the Bay Line), representing a total of 2.358 miles of railroad operated for the year ending June 30, 1900, while the several prop-erties were isolated one from another, and before the com pletion of the links which have united them, were.......\$2,634,061

The interest on the entire amount of outstanding bonds of the Seaboard Air Line Railway, including the \$2,000,000 Guaranteed Gold 5s and the G. & A. Terminal 5s, will amount to only \$874,000, so that even on last year's business, before the System had had the opportunity of deriving any of the benefits which will follow the expenditure of the more than six million dollars which has just been paid out for new construction, etc., the Net Earnings of the System were some \$300,000 more than its total bond interest and rentals will be after consolidation.

The total Car Trusts outstanding on the entire System September, 1900, amounting to about \$1,100,000, are being

paid off. principal and interest, in monthly payments out of the current earnings of the System, and are not embraced in the above statement of Fixed Charges. These Equipment obligations will be increased by the orders recently placed for new Cars and Engines necessary to accommodate the rapidly growing business of the System.

RATIO OF EARNINGS TO CAPITALIZATION.

The following table is instructive. It shows that the Sea-board Air Line Railway is not only capitalized at an ex-tremely low figure, but that its gross earnings per mile, as

compared with its capitalization per mile, are greater than those of any other railroad in the comparison, with the single exception of the Louisville & Nashville. The earnings given below for the Seaboard Air line are for the year ending June 30, 1900, but the earnings of the other roads are for the fiscal year 1899. As it is impracticable as yet to get the earnings for the fiscal year ending June 30, 1900 for all the other roads mentioned in the comparison 1900, for all the other roads mentioned in the comparison,

the figures for 1899 were used for the sake of uniformity. The earnings of the roads named in this table, whose operations for 1900 have thus far been given out, show a material increase over last year.

Name of Road.	Gross Earnin gs per mile Operated.	Ratio of Gross Earn- ings per mile to Total Binds and Stock per mile.	Market Value per mile.	Ratio of Gross Earn- inus per mile to Market Value per mile.
SEABOARD AIR LINE RAILWAY. Southern Railway. Louisvill* & Nashville Railroad. Missouri Kansas & Texas Railway. Atlantic Coast Line Railroad. Norfolk & Western Railway. Chesapeake & Ohio Railway.	5,400 3,600 7.600	11.0% 7.4% 16.0% 7.0% 10.0% 8.6% 8.0%	\$21,200 32,700 44,200 44,700 33,900 55.600 66,000	18:8% 13:6% 17:8% 12:0% 10:6% 13:7% 12:t%

The figures in the third column—"Market value per mile"—are arrived at by adding to the par value of the bonded indebtedness per mile of each system the product of the capital stock per mile multiplied by the market value thereof, in each case. This column, taken in connection with the fourth column, which gives the "Ratio of gross earnings per mile to market value per mile," tends to show that the present market value of the securities of the Seaboard Air Line Ry. is abnormally low as compared with other Southern trunk lines, the ratio of gross earnings per mile to market value per mile in the case of the Seaboard Air Line being forty per cent more than the average of the other six railroad systems with which the comparison is made.

ESTIMATE FOR 1901.

A fair and conservative estimate of the Gross Earnings of this System for the year 1901, under reasonably favorable business conditions, would be as follows: ACTUAL GROSS EARNINGS YEAR ENDING JUNE 30, 1900.... \$9,504,000 ADD 10% INCREASE. Being the average increase of the combined earnings of the respective properties for the past two years. With the growth of the country and the increase which will inevitably result from consolidation, actual results are more likely to be above than below this estimate. 950,000 ESTIMATED EARNINGS RICHMOND DIVISION, from Rich-mond, via Petersburg, to Ridgeway...... Based on one-half of the earnings per mile for the year 1899 of the Atiantic Coast Line from Richmond to Weldon. 630,000

City & Suburban [Bell) Telegraph Association of Cin-cinnati.—Increase of Stock.—The shareholders will vote Nov. 1 on a proposition to issue \$1,500,000 additional stock, increasing the capital from \$2,500,000 to \$4,000,000.-V. 69, p. 827.

Edison Electric Illuminating Co. of Boston.—Earnings. —The results for the year ended June 30, 1900, compare as follows: Gross, \$1,131,758, against \$1,002,261 in 1898 99; net, \$406,221, against \$338,243. The capital stock has been in-creased to \$4,144.000, on which dividends at the regular rate of 8 per cent per annum call for \$331,520. The company this week declared an extra dividend of 1 per cent in addition to week declared an extra dividend of 1 per cent in addition to the quarterly 2 per cent.-V. 70, p. 282.

Brought forward	\$11,084,000
ESTIMATED EARNINGS OF THE LINE FROM HAMLET, N. C., TO COLUMBIA, S. C., at \$3,000 per mile ESTIMATED ADDITIONAL EARNINGS to result from the com- pletion of Savannah Terminals As this amount is less than last year's actual ter- minal revenue paid on Georgia & Alabama and Florida Central & Peninsular business at Savannah, which revenue will hereafter principally accrue to the Georgia & Alabama Terminal Co., this estimate may be considered entirely conservative.	330,000 200,000
TOTAL ESTIMATED GROSS EARNINGS for 1901	311,610,000 7,740,000
NET EARNINGS INTEREST ON OUTSTANDING BONDS AND RENTALS	\$3,870,000 2,337,000

ESTIMATED SURPLUS over Bond Interest and Rentals. \$1,533,000

Should these results be realized, the Company would be able to pay 4% dividends on Preferred Stock, and have a sur-plus large enough to call in and retire one third of the principal and interest of all Car Trust obligations on the entire System, including those to be issued for rolling stock contracted for and not yet delivered.

off consumers who refuse to pay more than the 40 cents per 1,000 cubic feet which is charged by the Municipal Company, (See that company below). Yesterday, however, there were

rumors of an impending settlement. Early in the week President C. K. G. Billings of the People's Gas Company was examined by a Master in the suit of Nathan M. George to prevent the company from selling gas at 40 cents. He said that there was no secret agreement between the company and the Municipal Company, and no understanding to prevent the latter from building mains, making gas or selling it to the customers of the People's Company; his company, therefore, was not responsible for the acts of the Municipal Company.—V. 71, p. 506, 438.

Municipal Gas Co. of Chicago.—Increase of Stock—New Directors—At a meeting on Oct. 8th the shareholders author-ized an increase of the capital stock from \$500,000 to \$5,000,-000, and elected the following as members of the board of directors, J. M. Smyth, J. R. Walsh, J. A. Spoor and A. S. Trude, of Chicago; H. M. Whitney and W. R. Addicks, of Boston.-V. 71, p. 392.

New England Gas & Coke Co.—Supplying Charlestown.— The company on Oct. 6 began supplying gas to the Charles-town Gaslight Co., the amount being 300,000 feet per day. The total output is now stated to be 1,300 tons of coke and 5,200,000 feet of gas per day.-V. 71, p. 664, 604.

People's Gas Light & Coke Co. of Chicago.—The gas situation continues uncertain. The Ogden Company has been preparing to extend its mains into the People's territory, and the Municipal Gas Co., which is generally thought to be allied with the People's Company, has authorized an increase of stock from \$500,000 to \$5,000,000, presumably to take retaliatory measures. Many temporary injunctions have been granted to prevent the People's Company from cutting

Tennessee Coal, Iron & RR.-New Furnace.-The fifth of the new furnaces at Ensley has been put in operation, making with the other four a plant with a total daily capacity of 1,200 tons of pig iron.-V. 71, p. 713, 37.

West Dulnth Water Co.—Negotiations.—A press dispatch states that E C. Severance of St. Paul, representing the bondholders, has offered to sell the plant to the city for \$156,000 in 4 per cent bonds at par. The amount first asked was \$186,100.

Western Union Telegraph Co.-Directors.-E. H. Harriman and Charles Lockhart have been elected directors in the places of Alonzo B. Cornell and the late C. P. Huntington. The annual report is on page 750.—V. 71, p. 557.

Youngstown (1.) Gas & Electric Co.-Change in Owner-ship.-A press despatch states that the property has been transferred to the purchasers, "Messrs Penhale and Fisher of New York and Devitt, Tremble & Co of Chicago," who have also purchased the Youngstowa & Sharon Electric Reilway and propose to put it under construction at once Railway, and propose to put it under construction at once.-V. 71, p. 506.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Oct. 12, 1906

According to the reports from most lines of trade there has been a moderate amount of activity to the distributing business. The small trade in most instances has been a steady buyer, but as a rule of on y such supplies as have been needed to meet current wants. The requests for prompt shipments have been general, indicating light stocks on hand. The coming Presidential election is having its influence in holding in check operations in a large way, buyers preferring to hold off, awaiting developments. The only important changes in prices for staple products has been in cotton, which has turned weaker, reflecting the Bureau report, which indicated a larger crop than generally expected. Weather conditions in the West and South have been favorable for fall ploughing and seeding and the late maturing crops.

Lard on the spot has been unsettled, closing moderately active at easier prices, with both exporters and refiners buying. Final prices for prime Western were 7 5% and 7.25c. for prime City. Refined lard his been quiet, and the close was lower at 7.80s. for refined for the Continent. Speculation in lard for future delivery was fairly active. During the week buying by shorts to cover contracts advanced prices, but at the close general selling weakened the market, and the tone was easy.

DAILY OLOSING	PRICES	OF	LARD	FUTURES.
---------------	--------	----	------	----------

	Sat.	Mon	Tues.	Wed.	Thurs.	Frs
October	7.65	7.80	7.80	7.65	7.70	7 50

Pork has held firm, reflecting the squeeze in the Western market. The close, however, was quiet a' \$14@15 for n ess. \$16 50 a 17 for family and \$14 50@16 75 for short clear. Cut meats have had a fair sa'e at firm prices, closing at $6\frac{1}{2}@6\frac{3}{4}c$ for pickled shoulders, $9\frac{1}{2}@11\frac{4}{4}c$ for pickled hams and $9\frac{1}{2}@10\frac{3}{4}c$. for plckled bellies, 14@10 lbs, average. Beef has been in fair demand and firm at \$3 50@9 00 for meas, $$95^{\circ}@$ 10 50 for packet, \$10 50@12 for family and \$14 25@15 25 for extra India mess. Tallow has been quiet and easier, but the close was steady at $4\frac{3}{4}c$. Stearines have been quiet, closing at $8\frac{3}{4}c$. for lard stearine and $7\frac{3}{4}c$ for ole o stearine. Co to n-seed oil has held firm with demand moderate, closing at $37\frac{0}{6}37\frac{1}{2}c$. for prime yellow. Butter has had a fair sale at full values, closing at 16@21c. for creamery. Cheese has been in fair demand and steadier, closing at $9\frac{1}{2}@$ 11c. for State factory, full cream. Fresh eggs have met with a fair demand at steady prices, closing at 20c. for choice Western.

Brazil grades of coffee have continued to meet with a moderate distributing trade, but it has been at slightly easier prices. The demand for invoices has been quiet. Buyers have beld off awaiting developments. The close was steady at 83% for Rio No. 7. W st India growths have been quiet, but owing to comparatively small stocks and light receipts prices have hold s'eady. East India growths have been steady. Speculation in the market for contracts has been quiet. At the opening of the week prices advanced on firmer European advices. Subsequently, however, under a continued large movement of the Brazil crop the advance was lost. The close was steadier. Following are closing asked prices:

Offerings of raw sugar for immediate delivery have continu d sm-ll and prices have held steady at 434c, for centrifugals, 96-deg. test, and 414c, for muscovado. 59-deg. test. Refined sugar has been dul and unchanged. Other staple groceries have been steady.

Kentucky tobacco has held st ady and reports from the interi r report a fair business doing. Seed leaf tobacco has been in moderately active d-mand and steady. Sales for the week were 2,300 cases, as fo lows: 200 cases 1897 crop, Penn sylvania seed leaf, 13c.; 500 cases 1899 crcp, Pennsylvania seed leaf. 12@13c; 200 cases 1899 crop, N-w England seed leaf, 22@35c.; 250 cases 1899 crop. New Englant Havana seed, 18@5'c; 400 cases 1899 crop. Zimmers, $14\frac{1}{2}@15\frac{1}{2}c$; 150 cases 1899 crop. flats, 11@16c; 500 cases 1899 crop. Wisconsin Havana, private terms and 100 cases 1898 crop. Wisconsin Havana, 13½c; also 700 bales Havana at 50c.@\$1 00 in bond and 180 bales Sumatra at 80c.@\$1 70 in bond. Bu-in-ss in the market for Strats tin has been dull, and with moderate (ffering- and casier foreign advices prices have declined, cl. sing at 28@28.45c. Ingot copper has been in moderate demand and steady at 163/4 @17c. for Lake. L. ad has been unchanged and steady at 4.371/c. for dom stic. Spelter has held steady, closing at 4'1' @4'121/2c. for dom-stic. Pig iron has been quiet and easy at \$13 00@16 00 for domestic. Refined pet ol-um has b en steaty, (1 sing at 7 45c. in bbls., 4.90c. in bulk and 8.75c in cases. Naphtha unchanged at 9 55c. Crude certificates have been neglected. Credit balanc s have been uncranged at \$1 10. Spirits turpentine has advanged on light offerings and following S uthern markets closing at 42 a 42 1/2 c. Rosins have been strady at \$1 45@1 471/2 lor common and good strained. Wo I has been dolt and easy. Hops have been in fairly active demand and firm.

COTTON.

FRIDAY NIGHT, October 12, 1900. THE MOVEMENT OF THE CROF, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 329,121 bales, against 509,879 bales last week and 279.748 bales the previous week, making the total receipts since the 1st of Sept., 1900, 1.226,995 bales, against 1,282,308 bales for the same period of 1899. showing a decrease since Sept 1 1900, of 55,313 bales.

tobe, showing a decrease since det b i 100, or 50.515 bales.

THE CHRONICLE.

In addition to above exports, our telegrams to-night also give us the following amounts of cotton on shipboard, not cleared, at the ports named. We add similar figures for New York, which are prepared for our special use by Messre Lambert & Barrows. Produce Exchange Building.

	ON SHIPBOARD, NOT CLEARED FOR-

Speculation in cotton for future delivery has been more active. At the opening of the week the feature was predicted frosts in the Sou hwest. This, coupled with an $\exp \epsilon c' ed$ bullish Bareau report, brought shorts into the market as free buyers to cover contracts and prices for all options advarced to atove 1°c. per pound. The predicted frosts failed to materialize, but as the trade generally expected that the Bureau report would show an average condition of not better than 62, and possibly 60, little of the advance was lost. On Wednesday at roon the Bureau report was issued. During the morning trading prices showed a sagging tendency, refl-cting weaker foreign advices The Bureau report made the average condition 67, or 5 per cent better than was generally expected: in fact, it took the entire trade by suprise, and immediately following its publication prices declined equal to about \$100 per bale. Considering the increased screage over last year and the average condition being 4.6 per cent better than reported for October 1 a year ago, the trade calculates that the present crop will reach at least 10.000,000 bales. Thursday the advices from the English markets came decidedly weaker, showing the effect of the more favorable Bureau report than expected, and large exports of cotton from the Southern ports to the United Kingdom. Reflecting the weaker for-eign advices the local market opened lower, but during the day buying by shorts to cover contracts turned the market firmer and the loss was recovered. To day there was an easier matket. The opening was at a fairly sharp de-cline, refl-cting unexpectedly weaker foreign advices. Moderate buying then steadied the market, but during the day the large crop movement for the week and favorable weather South prompted renewed selling, and prices again sagged. The close way steady at a net loss for the day of 21(a3) points. Cotton on the spot has been easier, closing at 10 7 16c. for m doling uplands.

On the basis of the rates on and off middling as established by the Revision Committee, the prices for a few of the grades would be as follows:

UPLAND8.	Sat.	Mon	Tues	Wed	Th.	Fri.	
Good Ordinary. Low Middling. Middling. Good Middling. The imports into Continental ports the past week have been 60,000 bales.

The above figures indicate a decrease in the cotton in ight to-night of 1,215,507 bales as compared with the same ate of 1899, a loss of 832,671 bales from the corresponding date of 1898 and a decline of 169,323 bales from 1897,

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to-night, and the same items for the sorresponding period of 1899—is set out in detail below.

In Sight and Spinners'	1 9/1000	

last year, and that some planters have finished picking. From portions of Alabama there are complaints of damage by worms and caterpillars and seed sprouting in the bolls. The The marketing of cotton has made excellent progress.

Galveston, Texas.-We have had rain on two days of the week. The precipitation reached fifty-four hundredths of an inch. The thermometer has ranged from 60 to 90, averaging 75.

Brenham, Texas.-We have had light rain on one day of the week, the precipitation reaching two hundredths of an inch. The thermometer has averaged 72, the highest being 93 and the lowest 50.

Cuero, Texas.--There has been rain on two days of the week, the rainfall being seventeen hundredths of an inch. The thermometer has ranged from 46 to 92, averaging 69.

Dallas, Texas.—The weather has been dry all the week. Average thermometer 67, highest 90 and lowest 44.

Huntsville, Texas. - We have had no rain during the week. The thermometer has averaged 70, ranging from 50 to 90.

Longview, Texas.-There has been rain on one day of the week, the rainfall being two hundredths of an inch. The thermometer has ranged from 48 to 91, averaging 65.

Temple, Texas.-We have had no rain the past week. The thermometer has averaged 66, the highest being 91 and the lowest 46

New Orleans, Louisiana -It has rained on three days of the week. The precipitation reached one inch and fifty nundredths. The thermometer has averaged 69.

Shrevepart, Louisiana.—There has been rain on one day during the week, the rainfall being one hundredth of an inch. Average thermometer 68, highest 89, lowest 49.

Columbus, Mississippi.-Picking has been retarded by bad weather. We have had rain during the week to the extent of four inches and twenty-two hundredths, on five days. The thermometer has averaged 73, the highest being 88 and the lowest 48.

Leland, Mississippi.-Dry weather has caused rot. The average yield is only eight grown bolls to the stalk. There has been rain during the week, the precipitation being eighty-one hundredths of an inch. The thermometer has aver-ag d 67 4, ranging from 45 to 89.

Vicksburg, Mississippi.-The week's rainfall has been one inch and twenty-nine hundredths, on three days. mometer has ranged from 46 to 81, averaging 66. The ther-

Meridian, Mississippi.—Many planters have finished pick-ing and have sold all their cotton. The yield in this section will be fifty per cent less than last year and the crop will soon all be marketed. It has rained heavily on three days of the week.

Little Rock, Arkansas.—The State report for the week end-ed Monday indicated that cotton was nearly all open in most sections, the general outlook being for slightly over a half crop. Locally the crop is turning out a little better than expected. We have had rain on two days of the past week, to the extent of forty-eight hundredths of an inch. The thermometer has averaged 65, the highest being 84 and the lowest 47.

Helena, Arkansas.-As picking progresses the shortage in the crop becomes more apparent. In fact the yield promises to be even less than heretofore expected. Wet weather has interfered somewhat with gathering. We have had rain on four days of the week, the precipitation being one inch and twenty two hundredths, and there are indications of more.

The thermometer has averaged 65'3, ranging from 46 to 84. Memphis, Tennessee. — Wet weather is interfering with We have had rain on two days during the week, picking. and rain is now falling. The rainfall reached one inch and twenty-two hundredths. The thermometer has ranged from 46 to 82.3, averaging 63.6.

Nashville, Iennessee. - The weather has been unfavorable for gathering the crop. We have had rain the past week, to the extent of two inches and sixty one hundredths. Average thermometer 60, highest 82 and lowest 48.

Mobile, Alabama.—Reports indicate damage to the crop by worms, and there are some complaints of seed sprouting in the open bolls. Picking has been interrupted by wet weather. We have had rain on six days of the past week, to the extent of three inches and forty hundredths. The thermometer has averaged 71, the highest being 82 and the lowest 54. Montgomery, Alabama.—There has been rain on two days during the week, the rainfall reaching one inch and twenty-

The thermometer has averaged 70, rangtwo hundredths. ing from 55 to 85.

WEATHER REPORTS BY TELEGRAPH.-Telegraphic advices to us this evening from the South indicate that rain has fallen in most sections the past week, interrupting to a material extent the work of gathering the crop. The tempera-ture has been lower. Reports as to the crop from many of our correspondents continue seemingly of an unfavorable character. From Helena, Arkansas, we are advised that the crop is turning out shorter than heretofore expected, while Meridian, Miss., says the yield will be fifty per cent less than the thermometer has ranged from 54 to 85, averaging 70.

Selma, Alabama.—The crop is moving freely. There is no improvement in the outlook in this section. In fact late cotton has been destroyed by caterpillars, and in many helds there is nothing left to gather. It has rained here on four days during the week, the precipitation being two inches and fifty hunaredths. Average thermometer 70, highest and 88 lowest 49.

Madison, Florida.-There has been rain on three days of the week, to the extent of one inch and thirty hundredths. The thermometer has averaged 76, the highest being S7 and the lowest 64.

Savannah, Georgia.-There has been rain on five days of the week, to the extent of seventy-nine hundredths of an inch. The thermometer has averaged 74, ranging from 58 to 86.

Augusta, Georgia.—Rain has fallen on four days of the week, to the extent of one inch and fifty-five hundredths.

Charleston, South Carolina .- We have had rain on three days during the week, the precipitation reaching seventy hundredths of an inch. Average thermometer 72, highest 82 and lowest 59.

Stateburg, South Carolina.-There has been rain on two days of the week, to the extent of twenty-eight hundredths of an inch. The thermometer has averaged 71, the highest being 89 and the lowest 50.

Greenwood, South Carolina.-It has rained on two days of the week, the rainfall being two inches. Average thermometer 68, ranging from 61 to 75.

TEXAS WEEKLY REPORT.—The State report on cotton for the week ended Monday, Oct. 8, was in part as follows:

The week ended Monday, Oct. 6, was in part as follows: Picking is well advanced for this season of the year. Cotton has been damaged on low land along the rivers over Central and North Texas by the recent overflows. The correspondent at Grayrock states that the army worms are cleaning up late cotton; other cotton pests are reported from some sections. Cotton is better in some localities than anticipated, but the crop is almost a total failure in many places. The yield of cotton as a whole will be considerably below an average. It is believed that picking will be completed earlier than usual, not-withstanding the crop is from two to three weeks late.

MANCHESTER MARKET .- Our report received by cable to-night from Manchester states that the market is quiet for yarns and easy for shirtings. Spinners are considered to be well under contract. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison.

THE AGRICULTURAL DEPARTMENT'S REPORT FOR OCTOBER.-The Agricultural Department's report on cotton for October,1 is given below:

Is given below: The monthly report of the Statistician of the Department of Agri culture shows the average condition of cotton on October 1 to have-been 67, as compared with 68°2 last month, 62°4 on October 1, 1899, 75°4 at the corresponding date in 1898, and 71°6, the mean of the Oc-tober averages of the last 10 years. With the exception of North Car olina and Tennessee, where there is no appreciable change in the condition of the crop, there has been a decline during September throughout the whole of the cotton States east of the Mississippi River. This decline amounts to 2 points in Virginia. Georgia and Alabama, 3 points in South Carolina, 4 in Mississippi and 8 in Flor-ida. Louisiana also shows a decline of 4 points. On the other hand, there has been sufficient improvement in Northern/Fexas to make the general average of that State 1 point higher than last month, and there is also an improvement of 1 point in Oklahoma, 5 p ints in Indian Territory and 4 points in Missouri, the crop in Arkansas about holding its own. holding its own.

The averages for the different States are as follows:

Virginia 71	Alabama 62	Tennessee
North Carolina 64	Mississippi 56	Missouri 68
South Carolina 57	Louisiana 66	Oklahoma
	Texas	
Florida 63	Arkansas	

A special report on the effects of the recent storm on agriculture in Southern Texas will be issued in a few days. All counties in Texas are, however, included in the present report.

SHIPPING NEWS,-As shown on a previous page, the exports of cotton from the United States the past week have reached 268,494 bales. The shipments in detail, as made up from mail and telegraphic returns, are as follows:

BREADSTUFFS.

FRIDAY, Oct. 12, 1900.

An easier market for the grain has been reflected in a dull, dragging market for the grain has been reflected in a dull, dragging market for wheat flour. In some instances mills have lowered their limits, but the lower prices named have failed to stimulate the demand. Locally buyers have been indifferent, making low bids and keeping their purchases close to their immediate requirements. The export demand also has been quiet. City mills have been quiet and easier. Rye flour has continued in light supply. The demand has been very moderate, but prices have held firm. Corn meal has had only a jobbing sale and prices have been barely maintained.

Comparatively little speculative interest has been shown in wheat for future delivery, and there has been a gradual sagging of values. Weather conditions in the Northwest have been more favorable, and there has been a freer movement of the spring-wheat crop. The European advices have reported quiet and declining markets, influenced by the tame advices from the United States markets and also by favorable crop news from Argentine. During the latter part of the week there were rumors of damage to the Argentine crop by frost, which, temporarily, had a strengthening influence. Sub-sequently, however, these reports were denied. The statistical position has continued a factor against bull speculation. The United States visible supply as reported Monday showed an unexpected small decrease, but this was offset by the large world's shipments, those from Russia being exceptionally heavy. The Burean report issued on the 10th inst. indicates a crop of 508,733,000, or a decrease of about 40,000,000 bushels from last year. Business in the spot market has been less active, as exporters have been only limited buyers; prices have declined with futures. To day the market opened slightly easier, reflecting larger Argentine shipments and weaker foreign advices, but during the day turned firmer on buying, largely by shorts to cover contracts, stimulated by a more active demand. The spot market was more active and firmer. The sales for export at the seaboard were 160,000 bushels, with rumors of 500,000 bushels sold in the interior markets.

Indian corn futures have been quiet. Prices have shown some irregularity. The near by deliveries have been firmer. There has appeared to be a scattered outstanding short interest, with sellers indifferent. Despite fair receipts there has been no appreciable increase in the available supply, owing to a continued good export demand; consequently nervous shorts have been buyers to cover (o tracts. The more distant months have held about steady. The Bureau report. issued on the 10th inst., had a sustaining influence. It showed a decrease in the average condition during the month of September of 2.4 per cent, and indicated a yield of 1,957,550,000 bushels. The spot market has weakened slightly, and at the lower basis of values exporters have continued free buyers. To-day there was a firmer market in sympathy with advance in wheat values. Speculation was quiet. The spot market was fairly active. The sales for export here and at outports were 450 000 bushels.

AGRICULTURAL DEPARTMENT'S OCTOBER REPORT .--- The report of the Department of Agriculture for October 1 respecting cereal crops was issued October 10, as follows:

The monthly report of the Department of Agriculture shows the average condition of corn on October 1 to have been 78.2, as com-pared with 80 ° 6 last month, 82.7 on Oc'ober 1, 1899, 82 at corre-sponding date in 1898 and 81 the mean of October averages of the last ten years. While the decline during September was not serious, it extended to almost every important corn-growing State, the crops of Ohio, Missouri, Nebraska and Virginia alone holding their own. There was a decline of 1 point in Indiana, 3 points in Illinois, Kansas and Texas, and 4 in Iowa. and Texas, and 4 in Iowa.

No further report on wheat will be issued pending the receipt of annual returns of individual producers and the final reports of the annual returns of individual producers and the final reports of the Department's special agents. The preliminary estimate of the yield per acre of oats is 29.6 bushels, as compared with 30 7 bushels last year. 27.8 bushels in 1898, and a ten-year average of 26.2 bushels. Of the States having one million acres or upward in oats, Ohio and Illinois show an aver-age yield per acre of 38 bushels, Iowa 34 bushels. Indiana 32.7, Wisconsin 32, Kansas 31.6, Pennsylvania 31.1, New York 27.9, Minnesota 25.2 and Nebraska 21.8 bushels. The average for quality is 89.2, against 89.5 last year and 83.3 in 1898. [The indicated crop is 810,113,000 bushels. against 796,177,713 bushels in 1894 and 730,-006 643 bushels in 1898 i 906,643 bushcis in 1898.] 906,643 busines in 1898.] The preliminary estimate of the yield per acre of barley is 20.4 bushels, as compared with 25.5 bushels last year, 21.6 bushels in 1898 and a ten-year average of 23 5 bushels. The present indicated yield is the lowest, with one exception, since 1887. It is due mainly to the low yield of 16.7 tushels per acre in California, which is 4.6 bushels per acre below that State's ten-year average In New York the indi-cated yield per acre (22 bushels) corresponds almost exactly to the ten-year average, while the yields in Iowa and Kansas are somewhat above and those of Wisconsin and Minnesota somewhat below the reabove and those of Wisconsin and Minnesota somewhat below the re-spective ten-ye, raverages. The average for quality is 82:1, against 88:4 last year and 90 6 in 1898. [The indicated crop is 59,06-,000 bushels, against 73,381,563 bushels in 1899 and 55,792,257 bushels in 1898.]

The preliminary estimate of the yield per agree of rye is 15.1 bushels as compared with 14.4 bushels last year, 15.6 busnels in 1890 and a ten-year average of 14 bushels. The average for quality is 92, against 90 last year and 9.2 in 1898. [The indicated erop is 24,028,000 bushels, against 23,961,741 bushels in 1899 and 25,657,522 bushels in 1898.]

bushels, against 23,961,741 bushels in 1899 and 20,057,522 bushels in 1898.] The average condition of buckwheat on October 1 was 72'8, as com-pared with 80'5 last month, 70'2 on October 1, 1899, 76'2 at the cor-responding ate in 1898 and 22'2 the mean of the October averages for the last ten dears. There has been a decline during the month in New York and Pennsylvavia, the States of principal production, of 10 points and 8 points espectively.

THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., Oct. 12, 1900. There has been little alteration in the general character of the market for cotton goods this week. The demand has not expanded beyond present requi ements to any xtent in staple lines. Nor have sel ers been any more disposed to accept orders for forward delivery. The volume of business in progress is sufficient, however, to keep stocks in a straitened condition and to cause sellers in a number of instances to name still higher prices than before. Print cloths, which were advanced 1/3 c. this week, are an instance of a rising market with a limit-d business doing Although raw mat rial is a strong incentive to manufacturers to put up the price of their merchandise, and although some of them have undoubtedly gone to a limit beyond what buyers will pay as yet, still inside market con litions are on the side of sellers and such as to fairly warrant at least a mintenance of values until such time as the spring requirements should demand fuller attention, or, what is considered about the same thing, until after the elections. The Fall River mills are now turning out close to full production, but the curtail-ment in the South is still extensive. The woolen goods division con'inues dull. In silks the chief feature has been an auction sale of about 9,000 pieces, value about \$350,000, which was well attended and fairly successful on staple lines.

DOMESTIC COTTON GOODS,-The exports of cotton goods from this port for the week ending Oct. 8, were 2,626 packages, valued at \$162,052, their destination being to the points specified in the tables below :

NEW YORK TO OCT. 8.		1900.	1899.		
NEW TORK TO OUT. 8.	Week.	Since Jan. 1	Week.	Since Jan. 1.	
Great Britain	42	1,804	89	1,703	
Other European	12	1.329	5	749	
China		140.445		185.214	
India	110	10.584		2,040	
Arabia		25,441	100	37.318	
Africa	14	3 536	03	12,905	
West Indies	812	22.238	671	23,650	
Mexico	64	2,450	142	3.527	
Central America.	343	9.433	86	8.337	
South America	1.160	34,778	447	34.699	
Other Countries	67	7,176	166	6,125	
Total	2,626	259,214	1,756	316.267	

The value of the New York exports for the year to date has been \$11,456.413 in 1900, against \$11,488,572 in 1899.

In bleached cottons business has been fuller than of late, wi h 1/4c. advance in such medium grade tickets as Hope, Black-tone, Gold Medal, etc. The finer grades are firm and well sold up, with low counts occasionally 1/8c. higher. In one or two makes of wide sheetings prices have been ad-vanced 5 per cent. Heavy brown cottons are selling in small quantities as a rule; for forward business most sellers' prices are above buyers' ideas. Light and five brown sheetings firm. Ducks are quiet but well held. Desims difficult to purchase in any position, and most quotations are nomi-nal. Ticks and plaids strong but quiet. Other c arse, colored cottons are in limited supply and prices tend up wards. Kidfinished cambrics also show a hardening tendency. Staple prints are $2\frac{1}{2}$ per cent dearer in some instances, and indications point to a general advance in open quotations. Stocks are limited and demand fair. Fancy calicoes are quiet and unchanged. The gingham demand is moderate but fully equal to available supplies, and the market rules very firm throughout. Print cloths have advanced to 3¼c. for regulars, with an indifferent demand. Wide goods are firm, with fair sales.

WOOLEN GOODS.-The weather has still been against business in men's-wear woolen and worsted fabrics, and between that and ante-election influences the market has failed to show any improvement over last week's conditions. The demand has been very irregular and only limited in the aggregate for either staple lines or fancies. The anxiety on the part of sellers to secure orders has been marked in a number of directions, and some very low prices as compared with the opening of the season have been named to possible buyers. Medium and low-grade fancy woolens have ruled particularly weak in a number of lines. There has been no material change in the overcoating or cloaking situation. Business in woolen and worsted dress goods for spring has been on a fuller scale with the opening of a number of new lines, but the general tone of the market continues easy. For flannels and blankets the demand is slow and prices without material change. FOREIGN DRY GOODS -Business in dress goods has been moderate, with fine staples and novelties steady in price. Silks and ribbons show a firmer tendency under foreign ad-vlces. Linens are against buyers. Burlaps continue in very small supply and tend upwards.

8

D

STATE AND CITY DEPARTMENT.

News Items.

Michigan.-Special Session of the State Legislature.-The State Legislature convenet in special session on October 10, pursuant to a call issued by the Governor last week. The object of this special session is to provide for levying in-creased taxes on the railroads. For this purpose an amendment or amendments to the State Constitution are to be submitted to a vote of the people at the November election giving the Legi-lature the necessary authority to that end. It is also sought to repeal special charters of railroads granting exemption from taxation.

Bond Proposals and Negotiations this week have been as follows :

Alexandria, N. Y.—Sale of Utica & Black River RR, Stock. -The Railroad Commissioners of the town of Alexandria, N. Y., will receive bids up to October 26 for 100 to 150 shares of Utica & Black River RR. guaranteed 7% stock. The proceeds of the sale will be used to retire \$52,100 7% bonds maturing this year.

The official notice of this offering will be found elsewhere in this Department.

Allegheny, Pa.—Bond Election.—At the general election November 6 the question of issuing \$1,098,000 bonds for various improvements will be submitted to a vote of the people.

Amesbury, Mass.—Note to be Issued. - The Town Treasurer will have discounted about November 1 a street-widening

note for \$3,600. Lean will mature in one year. Antelope, Ore.—Bonds Not Sold.—We are advised by the City Recorder that there were no bids received on October 1 for the \$1,500 6% water bonds the offering of which was pub-

lished in the CHRONICLE Sept. 15, p. 564. Arcanum, Ohio.—Bond Sale.—On October 3 the \$13,000 5% 2.14 year (serial) street improvement bonds were awarded to the First National Bank, Arcanum, at 108-an interest basis of about 3.83%. Following are the bids:

First Nat. Bank, Arcanum...\$14,040 00 | Lamprecht Bros. Co., Cleve..\$13,800 50 P. S. Briggs & Co., Cincin.... 13,975 00 | W. J. Hayes & Sons, Cleve... 13,756 01 R. Kleybolte & Co., Cincin.... 13,900 00 W. R. Todd & Co., Cincin.... 13,750 00 Seasongood & Mayer, Cin... 13,900 00 Denison, Prior & Co., Cleve.. 13,669 00 Feder, Holzman & Co., Cin... 13,819 00 | First Nat. Bank, Barnesville, 13,231 00

For description of bonds see CHRONICLE Sept. 15, p. 564.

Belle Fourche (S. Dak.) School District.—Bonds Voted.— This district has voted in favor of issuing \$6,000 schoolhouse bonds.

Bloomfield, Conn.—Bonds Authorized.—At a special town meeting held recently, it was voted to issue \$32,000 31/2% refunding bonds.

Brewster County, Texas.—Bonds Approved.—The Attor-ney-General has approved an issue of \$93,000 4% 5-20 year (optional) bonds. Securities are in denomination of \$1,000, dated Sept. 1 1900. Interest will be payable annually. We

are advised that the State will probably take the bonds. Brookline, Mass.—Loan Authorized.—The Selectmen have authorized a loan of \$100,000 in anticipation of the collection of taxes.

School District.—Bonds Voted.—At the election held September 18 the issuance of \$20,000 school tonds was authorized by a large majority. The details of th se bonds will be fixed later. Ilion, N. Y.-Bond Offering. - Proposals will be received until 11 A M., October 20, by C. S Jepson. Village Treasurer, for \$30,000 electric light bonds. Securities are in denomination of \$1,000, dated Oct. 20, 1900. Interest will be at a rate not exceeding 4% payable semi-annually at the Ilion National Bank. Principal will mature \$1,000 yearly on October 1 from 1901 to 1930, inclusive. A certified check or bank draft for 10% of the par value of the bonds, payable to the Village Treasurer, must accompany proposals.

Johnstown, Pa.—Bonds Authorized.—It is stated that an issue of \$60,000 city-hall bonds has been authorized.

Kansas City, Mo.—Bond Offering.—Proposals will be received until 2 P. M., October 24, by Geo. E. Kessler, Secretary of the Board of Park Commissioners, for \$703,668 66 7% 20-year "Series H" Park Fund certificates. These certificates are issued by the City Treasurer, under provisions of Article X. of the City Charter, and the proceeds will be used to pay for land taken for Penn Valley Park, in West Park District. Securities are in denomination of \$1,000. Interest will be payable in January and July at the City Treasurer's office. A deposit of \$10,000 will be required with each bid. Accrued interest must be paid by the purchaser from July 11, 1900, to the date of delivery of the certificates. The official circular states that there is no litigation pending or threatened concerning the validity of these certificates. and that principal and interest on all previous issues of Park Fund certificates have been promptly paid. Assessed valuation of land and improvements in West Park District is \$17,-671,250, which is on a basis of about 33½% of the actual value. This is the first issue of Park Fund certificates in this district. There is no floating debt.

Kearny, N. J.—Loan Authorized.—The Common Council has authorized a school loan of \$5,000 in anticipation of the collection of taxes.

Kirkland Union Free School District No. 4, Onelda Co., N. Y.—Bond Sale.—On October 8 the \$5,500 4% bonds were awarded to Isaac W. Sherrill, Poughkeepsie, at 102'506. Securities mature \$500 yearly on June 15 from 1901 to 1911, inclusive. For further description of bonds see CHRONICLE Oct. 6, p. 722.

Lafayette County, Mo.—Bond Sale.—On October 3 the \$560,000 3% refunding bonds were awarded to W. A. Rule, Kansas City, Mo., at par, less a sufficient commission to make the bonds net 3.24% interest. The only other bid received was from the Mississippi Valley Trust Co., St. Louis, which offered to take the securities at $3\frac{1}{2}\%$, less a "liberal" commission. For full description of bonds see CHRONICLE August 18, p. 357.
