REVIEW OF APRIL.

Noteworthy though the preceding months of the year have been for buoyancy and activity in Stock Exchange speculation, the month of April has surpassed them all in these particulars. There appeared to be no limit either to the volume of business or the advances in prices. The speculation gained in force and ascendancy the further it progressed. No sooner was a new record made than it was itself eclipsed by a still heavier volume of business, and all the time the rise in prices steadily continued. Thus on Friday, the 19th, the sales aggregated 2,174,280 shares, surpassing the record made on January 7th, when 2,127,503 shares were dealt in and when for the first time the two-million mark was reached. But the following Monday (the 22d) the business comprised no less than 2,355,301 shares. Then for a few days the totals hovered close to or exceeded two million shares. On Monday, the 29th, the aggregate reached the extraordinary figure of 2,619,736 shares. The next day this total was itself surpassed with sales of 3,281,226 shares. The month also has to its credit the largest Saturday half-day business ever known, the transactions on Saturday, the 20th, footing up 1,182,936 shares, thus going ahead of the total for January 5th, which was 1,152,793 shares.

The month contained only 23 business days, Good Friday, April 5, and Saturday, April 6, being observed as holidays and the Exchange being closed on Saturday, April 27, preparatory to removal to the Produce Exchange, where dealings will be carried on during the next twelve months, pending the erection of the new Stock Exchange building on the present site. Nevertheless the sales for the month reach the extraordinary amount of 41,719,086 shares, comparing with 30,285,055 shares last January, the former maximum, and with 24,251,983 shares in January 1899, the previous high record. A better idea of the magnitude of these transactions will be obtained when we say that for the whole of the calendar year 1894 the sales were only 49,075,032 shares.

The latter part of the month prices advanced almost continuously, but in the early part occasional severe breaks were noted, which served to test the market, only however to reveal its strength. One of these breaks occurred after the Good Friday holiday, lasting from Thursday, April 4, to Monday, April 8. The market had closed strong on Thursday, and a buoyant opening had been looked for on Monday.

Instead of that, opening transactions were generally lower than the close the previous Thursday, and the first few minutes declines of several points were recorded by a number of stocks. Stress was laid upon the possibility of a strike on the Central Railroad of New Jersey (which however was averted), on the poor bank statement of the previous Saturday, and on the further fact that Mr. J. P. Morgan had sailed for Europe. Besides this the call loan rate for money advanced to 6 per cent. There also appeared to be extensive realizing sales. Altogether the tone was decidedly weak, and not a few persons argued that the upward movement had definitely culminated. The next day, however, the market proceeded on its upward course as if nothing had happened.

The stimulating influences in the rise in prices during the month were the new combinations effected or talked about in the railroad and industrial world, and the generally favorable course of events. At the beginning of the month it appeared that both the American Bridge Co. and Lake Superior Consolidated Iron Mines Co. were to form part of the United States Steel Corporation. There were also rumors of the absorption of other companies. United States Steel stocks, however, were inclined to be weak until the latter part of the month. From 49½ and 97½ for common and preferred, respectively, on the 2d there was a decline to 45¾ and 93½ on the 22d; then came a change and on enormous transactions the price advanced, reaching 55 and 101¾, respectively, on the 30th. Colorado Fuel & Iron, an independent property, rose from 55½ April 1 to 108½ April 30 on the advent to control of John W. Gates. Amalgamated Copper on arrangements for consolidation with the Boston & Montana Copper & Silver Mining Co. and the Butte & Boston Consolidated Mining Co. and the restoration of friendly relations with the American Smelting & Refining Co. advanced from 99½ on the 1st to 128½ on the 20th; litigation had the effect of causing a reaction, and the close on the 30th was at 123½.

In the railroad list the most potent influence was the definite announcement of the arrangement for the absorption of the Burlington & Quincy by the Great Northern and the Northern Pacific, the terms being \$200 in joint 4 per cent bonds for \$100 of Quincy stock. Out of this combination there grew rumors of various other and perhaps still larger combinations. It was recognized that the consolidation of the three roads named might make necessary important changes among the remaining systems in that part of the country, and there were intimations of a union between the Milwaukee & St. Paul, the Chicago & North Western and the Union Pacific. Rumor was just as busy in other directions. There was talk of a combination of all the Gould roads in the Southwest, of the amalgamation of these roads with other Southwestern roads, of the absorption of one or all of the Mexican roads by the Rock Island or the St. Louis & San Francisco, of the probable acquisition of the Atchison by the Pennsylvania Railroad, of purchases of different stocks in the market for control, besides various other stories and reports too numerous to mention. The high-priced stocks were in special favor, though the upward movement extended to the entire list. Burlington & Quincy rose from 172¼ to 199¾, Northern Pacific common from 93½ to 119½, Union Pacific common from 89½ to 120, Milwaukee & St. Paul common from 151¼ to 175, North West. com-

mon from 183 to 212, Rock Island from 135¼ to 165, Baltimore & Ohio common from 90¾ to 106¾, New York Central from 146¼ to 164½, Chicago & Eastern Illinois common from 114 to 135¾, Atchison common from 61¼ to 78½, &c., &c., the highest price being in nearly all cases recorded on the very last day of the month.

Of course such phenomenal advances would not have been possible except that concurrently other conditions were extremely favorable. Trade remained active, railroad earnings extremely good, and strikes and labor troubles were averted. Then, also, reports regarding the growing winter-wheat crop were very encouraging. An event of the month was the negotiation of an issue of £60,000,000 new British consols (of which one-half had already been placed) and the participation of American bankers in the same, with resulting large subscriptions from this country. Apprehensions concerning the future of the money market were relieved by the action of the Secretary of the Treasury in purchasing bonds. The same circumstance no doubt also accounts for the indifference with which the resumption of gold exports the latter part of the month was regarded.

VOLUME OF BUSINESS ON THE STOCK EXCHANGE.

Month of April—	1901.	1900.	1899.	1898.
