### REVIEW OF OCTOBER.

Perhaps the two most conspicuous features during October were the distrust manifested in industrial securities on the Stock Exchange, leading to further sharp breaks in the prices of the same, and the anomalous state of our foreign exchange market. The distrust of the industrial securities grew out of the reduction the previous month in the dividend on Amalgamated Copper stock, with the attending revelations concerning the falling off in the consumption of copper, but was intensified by a number of other circumstances. Thus the annual reports of these companies for the year ending June 30 1901 proved decidedly unfavorable in a great many cases.

These poor reports did not come from concerns in any one branch of industry, but embraced a great variety of industries. As a result, confidence in this class of shares, not any too strong before, decreased more and more, and every untoward incident served further to increase the prevailing uneasiness. The collapse in the shares of the National Salt Co. will serve as an excellent illustration of the unsettled feeling created. The common stock of this company sold down on very light transactions from 40 Oct. 2 to 23 Oct. 3. The occasion for the shrinkage was the announcement of the terms of exchange of the securities into a new company, to be called the International Salt Company. In this instance there was nothing to show that the business of the concern was not satisfactory, but apparently the fact that the new company was to have a very much larger capital than the company to be absorbed made security holders and the public solicitous, and there was also some criticism of the methods of financing employed. Another disturbing incident of the month was the upholding by the Court of Appeals of the order granted by Justice Chase in the case brought against the American Ice Company under the Donnelly Anti-Trust law. The significance of this decision appears to have been greatly exaggerated, but coming at such a juncture it constituted an additional depressing influence.

The decline in the industrial stocks did not extend to the railroad shares except in the case of the highly speculative classes. The Atchison increased the semi-annual dividend on its common stock from 1½ to 2 per cent, and railroad earnings continued remarkably good. The group of stocks involved in the Morgan-Hill, Harriman-Kuhn, Loeb & Co. imbroglio developed unusual activity, and on occasions showed great strength on rumors that the matters in dispute

would be satisfactorily adjusted. Northern Pacific preferred, in which, since the contest for control, transactions had been very infrequent, suddenly showed tremendous dealings and the price Oct. 18 rose to 108 $\frac{1}{2}$ ; the close Oct. 31 was at 103 $\frac{3}{4}$ . Nothing definite developed regarding the prospects for an amicable settlement of the differences, though the belief was general that the interests at stake were too great to make any other outcome possible. Milwaukee & St. Paul common advanced sharply, touching 171 $\frac{1}{2}$  on the 26th, against 154 $\frac{1}{4}$  on the 7th, and it was hinted that that property was sought in the interest of one or the other of the parties to the contest. Later there was some reaction.

The Vanderbilt properties were also at times prominent in the market at rising prices. New York Central sold up from 154 on the 4th to 159 $\frac{5}{8}$  on the 23d. Another feature was a rise in Lake Shore stock, of which a comparatively small amount remains outstanding, from 275 to 325 (the highest previous price having been 250) on sales of only a few shares. Big Four common advanced to 100 $\frac{1}{4}$  on the 30th and Michigan Central also had a sensational rise.

January 1 to Oct. 31.....	708,532,825	981,214,730	713,290,480	864,285,607

A trade incident of the month was the action of M. C. D. Borden in announcing a further advance of 5 per cent in the wages of the operators at the mills of the Fall River Iron Works Co. after the announcement of a similar advance the month before. The motives underlying this move were not understood.

The course of foreign exchange has not been what might be looked for at a season of large merchandise exports such as distinguishes the autumn months. The tone of the market has been strong and rates of exchange have almost continuously advanced. While ordinarily gold imports are be counted as among the possibilities at this time of the year, an outflow of the metal actually occurred at the close of the month. The causes responsible for this peculiar situation are not all known or perfectly understood. A number of contributing circumstances however, are easily discernible. In the first place the European money markets have been decidedly firm. At Berlin the situation has been strained for a long time, owing to the depression prevailing in business and the collapse of industrial companies and the many bank failures. During the month just closed the Paris market also became disturbed. French investors appear to have sustained considerable losses through investments in foreign industrial enterprises—principally Russian; to this has now been added a great decline in copper stocks (which have always been favorites in the French markets) precipitated by the break here in Amalgamated Copper and the disclosures regarding the piling up of stocks of the metal.

One result of the disturbance in the French markets has been a sharp advance in the open market discount rate at Paris. On September 30 the rate for discounts was still 1 $\frac{1}{2}$  per cent. From this there was an advance to 2 $\frac{1}{2}$ @3 per cent in October. The rise led to the fear that a part of the enormous amount of French money

invested in trade and bank bills at London would be withdrawn from that market, and Paris exchange on London declined so as to make imports of gold from London profitable. At the same time Berlin also kept drawing gold from London. As a consequence of this double drain, open market discounts in London advanced from 2 3 16@2 $\frac{1}{4}$  per cent on September 30 to 3 $\frac{1}{4}$ @3 $\frac{1}{2}$  per cent October 31, and the Bank of England October 31 advanced its minimum from 3 to 4 per cent. The reduction in the gold holdings of the leading European banks was on a really noteworthy scale. Between September 26 and October 24 the holdings of the Bank of England dropped from £39,637,691 to £36,351,411, those of the Bank of France from £95,356,646 to £94,358,263, and those of the Bank of Germany from £31,073,000 to £26,462,000. This is a loss for the three institutions of £8,895,663, or \$44,478,000. In the week to Oct. 31 the Bank of England lost £696,888 more, but the Bank of France gained £671,000, and the Bank of Germany gained £1,683,000.

The high money rates abroad necessarily had their effect upon our exchange market. There were also reports of a dearth of cotton bills the early part of the month, and the cotton movement then undoubtedly was on a restricted scale; but later this was rectified, the cotton exports then becoming free, though the price of the staple remained lower than a year ago. Owing to the corn crop failure and the high price to which the cereal has advanced, corn exports have been very restricted. As an offset, however, the shipments of wheat are on a large scale. As to the other influences affecting the market, it is contended that leading financial interests here have been extensive borrowers abroad since last spring, that these loans have been maturing, and that some of them have been paid off. It should likewise be noted that the latter part of the month it was reported that there was a demand to remit for the instalment due November 7 on American subscriptions to the £60,000,000 British consol. loan issued last April.

# BOSTON STOCK EXCHANGE.

## MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.

## BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.

2. Quotations from all Stock Exchanges are as near as possible for the last day of October. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked thus (§) indicate that the purchaser must pay accrued interest in addition to the price given. The method of quoting on the New York Stock Exchange is to quote the prices flat (that is to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked thus (+) are per share. All others are per cent except bank stock prices.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "encl.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

7. The black-faced type in the letters showing the interest periods indicates in each case the month when the bonds mature.

⚡ We no longer affix a mark to prices quoted flat, but only to those which require payment of accrued interest in addition to the price. Designating mark in this instance is (§).

† Prices per share not per cent. x Ex-dividend. ‡ Sale price.

STATE AND MUNICIPAL BONDS.

Prices marked (\*) are flat prices—that is, the purchaser does not pay accrued interest in addition. In all other cases accrued interest must be added to the price.

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation.

† Prices are per share, not per cent. † Sale price. x Ex-dividend.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City, Brooklyn and Canadian bank stocks.

Prices marked thus (\*) indicate sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

Notice Change.—We now report surplus and undivided profits together (in the column designated Surplus and Profits) except where otherwise indicated.

Where names of the banks are printed in italics, fuller returns may be found in the advertising columns in the front part of the paper.
