REVIEW OF NOVEMBER.

Opposing influences and conditions held sway in financial circles and on the Stock Exchange during November. The settlement of the Northern Pacific embroglio between the Hill-Morgan interests on the one side and the Harriman-Kuhn, Loeb & Co. people on the other was of course a positive favoring factor of large importance. The features of the settlement were (1) the organization of the Northern Securities Company with \$400,000,000 stock to take over the control (by exchange of stock) of the Great Northern and the Northern Pacific companies; (2) the purchase by the Hill-Morgan interests of the Harriman-Kuhn, Loeb & Co. holdings of Northern Pacific preferred stock; (3) the retirement of this preferred stock by an issue of Northern Pacific convertible bonds having the privilege of conversion into Northern Pacific common stock, and (4) the lease of the Chicago Burlington & Quincy RR. to a new company called the Chicago Burlington & Quincy Railway with representation in the latter to the Harriman-Kuhn, Loeb & Co. interests. As against this favorable development, however, the continued demoralization and further sharp break in Amalgamated Copper stock, and the large outflow of gold at a time of year when gold imports are usually looked for, had a more or less disturbing effect.

At the same time the action of Mr. M. C. D. Borden in dropping the wages of the operatives at the Fall River Iron Works Cotton Mills to the old figures, coming so quickly upon his previous action in making two successive advances of 5 per cent each, had a distinctly unsettling influence in the cotton goods trade. The trouble in this last instance was aggravated by Mr. Borden's further course in offering print cloths at a reduction of $\frac{1}{8}$ cent from the figure previously bid by him and in making severe cuts in the price of certain lines of staple prints. Print cloths were quoted at only 3 cents per yard at the close of the month, against sales at the beginning of the month at $3\frac{1}{2}$ cents, notwithstanding that the price of the raw material—cotton—advanced in the interval $\frac{1}{8}$ cent per pound, middling uplands here in New York being quoted at 8 cents on November 30 against $7\frac{7}{8}$ cents November 1st. The cotton goods trade, however, was almost alone in displaying unfavorable symptoms. Industrial affairs generally gave evidence of continued activity and prosperity, and the iron and steel trades were positively buoyant. A development of the month indicative of the satisfactory condition of these trades was the return by J. P. Morgan & Co. to the members

of the syndicate which underwrote the plan for organizing the United States Steel Corporation of the \$25,000,000 in cash (12½ per cent of the \$200,000,000 subscribed) paid in when the syndicate was formed. The result of the municipal election in this city, if it cannot be said to have had a direct influence upon values, at least was an assuring fact.

The most conspicuously depressing influence, as already indicated, was the continued downward course of the price of Amalgamated Copper. This stock, which in June had sold at 130, in October had dropped to 83½. During the whole of November the shares remained weak, and towards the close of the month there came a further severe break, the price November 30 touching 72½. The only explanation offered for the collapse was that the condition of the copper trade was unsatisfactory and that the Amalgamated Company was carrying large accumulations of the metal, for which it was unable to find a market. Reports were current that the price of copper would shortly be sharply marked down from the nominal figure of 17 cents, and at the close there were rumors that the quotation had actually been shaded 2 or 3 cents. Through it all the company maintained its policy of absolute secrecy; no information was vouchsafed as to the company's condition, the amount of its unsold stocks, or its future policy.

Despite the collapse in Amalgamated shares, the stock market at times manifested great strength and in certain groups of stocks sharp advances were established. When the Northern Pacific settlement was definitely announced, the market responded the next day (the 14th) with a general decline in prices, which appeared to occasion surprise in certain quarters. The phenomenon, however, was a not unusual one, and was due simply to extensive realizing sales by those who had been waiting to dispose of their holdings (acquired at lower figures) when the favorable news should come out. The market later regained tone, and under the activity and strength of the anthracite coal properties and the shares of the Vanderbilt companies made considerable progress towards a higher level of values. The anthracite properties were in demand on the satisfactory condition of the anthracite trade, and the Vanderbilt shares were strong on renewed talk of a merger of the various separate companies. New York Central was a leader in the rise, touching 174½ November 25 on rumors of the cutting of a "melon" or the giving of valuable "rights" to the shareholders in connection with the suggested merger arrangements. The fact that the meetings towards the close of the month of the boards of directors of several companies brought no announcement bearing on the rumored scheme proved sorely disappointing, and there was a reaction to 170 by the close on November 30. This circumstance operated with the further break in Amalgamated Copper to leave the market generally weak on November 30.

January 1 to Nov. 30.....	786,779,875	1,046,652,530	778,495,230	910,500,607

The feature of the foreign exchange market was its sustained strength and the large outflow of gold to Europe which resulted from that condition. The exports of the metal from this port were in the neighborhood of 15 million dollars, all going to Paris except about \$2,000,000, which went to Germany. In explanation of this rather peculiar situation at the active season of our merchandise exports, the now familiar statement was repeated that large loans on American account were being carried in Europe, and that some of these had been called while others were being paid off as they matured. Nearly all through the month there were reports that commercial bills were not in plentiful supply, which, however, must have been due to the absorption of the bills before they could appear on the market, as our shipments of produce undoubtedly were on a large scale. The export value of cotton may have been \$10 a bale less than in the same month of last year, but we sent out about 210,000 bales more, so that the net loss in values, as compared with the extraordinary total of last year, could not have been material. Moreover, the aggregate value of this single item of our merchandise exports must have been not far from \$45,000,000. Our corn exports naturally were small, but here again there was an offsetting advantage in larger wheat exports. Nevertheless, as we have seen, the outflow of gold was of unusual volume, and it is quite a noteworthy fact that against most of these gold shipments no bills seemed to appear on the market; from this the inference was drawn that the metal was being forwarded in direct payment of money borrowed through exchange loans.

No disturbance in the money market resulted from the gold outflow, though full 5 per cent was frequently paid on call loans at the Stock Exchange. The large bond purchases by the Secretary of the Treasury, the payments at this point for the month aggregating \$14,662,676, operated to offset the gold shipments.

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The railroad securities which are active on the New York Stock Exchange are omitted from this list.

In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.

Table with columns: BONDS, Int. Period., Sales in November Par value, Price about January 2, 1901., PRICES IN NOVEMBER., RANGE SINCE JAN. 1. Lists various bonds like Amer. Bell Telephone 4s., Am. Telep. & Tel. coll. tr. 4s., etc., with their prices and ranges.
