### REVIEW OF DECEMBER.

The course of the stock market during December was much the same as in all the other months since the May panic. That is, while there were some disturbing events which kept the market weak or unsettled for a time, and seriously depressed particular stocks, the market quickly regained tone, and the general list manifested much strength, many stocks indeed moving sharply upward. The unsettling influences were tight money, and the further break early in the month in the price of the stock of the Amalgamated Copper Company. The latter made a second cut in its dividend, bringing it down to a basis of 4 per cent per annum, against the former 8 per cent, and the company at the same time had to abandon its policy of keeping the price of copper pegged at 17 cents a pound. There were successive reductions in the price of the metal until Lake copper got down to 13 cents, and even this price, it is claimed, has been shaded. It is well to add that on the 30th the Calumet & Hecla quarterly dividend was reduced from \$15 a share to \$10, that is from 60 per cent to 40 per cent.

On the 17th Amalgamated Copper stock sold down to 60½, which compares with 130 just six months before, on June 17. As usually happens, when the worst news was out improvement in the price occurred, and the rest of the month the stock ceased to be a disturbing influence in the market. American Sugar Refining was another stock which suffered a sharp decline on unfavorable trade conditions. From 126½ on the 2d the price of the common dropped to 103½ December 24. On the 3d of last June this same stock sold at 153. Here, too, a sharp recovery ensued the latter part of the month, the stock rising from 103½ on the 24th to 118½ on the 28th, and closing at 116½ on the 31st.

As soon as these main depressing influences ceased to act, the general market again manifested much strength, and it is a noteworthy fact that quite a large number of stocks attained their highest points of the year in December. The anthracite coal stocks particularly were in active demand at improving prices, the reason in this case being found in the extremely satisfactory condition of the anthracite trade. The production of anthracite has been by far the largest of any twelve-month period in the history of the country, and at the same time the companies have been working together in complete harmony, and prices have been better maintained than for a long

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City, Brooklyn and Canadian bank stocks.

Prices marked thus (\*) indicate sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

**Notice Change.**—We now report surplus and undivided profits together (in the column designated Surplus and Profits) except where otherwise indicated.

Where names of the banks are printed in italics, fuller returns may be found in the advertising columns in the front part of the paper.
