

# THE Commercial & Financial Chronicle

Quotation Supplement (Monthly) Street Railway Supplement (Semi Annually)  
Investors Supplement (Quarterly) State and City Supplement (Semi Annually)

[Entered according to Act of Congress, in the year 1902, by the WILLIAM B. DANA COMPANY, in the office of the Librarian of Congress.]

VOL. 74.

SATURDAY, JUNE 14, 1902.

NO. 1929.

## The Chronicle.

PUBLISHED WEEKLY.

Terms of Subscription—Payable in Advance:

For One Year	\$10 00
For Six Months	6 00
European Subscription (including postage)	13 00
European Subscription Six Months (including postage)	7 50
Annual Subscription in London (including postage)	\$2 14s.
Six Mos. do. do. do.	\$1 11s.

Above subscription includes—  
BANK & QUOTATION SUPPLEMENT | STREET RAILWAY SUPPLEMENT  
INVESTORS' SUPPLEMENT | STATE AND CITY SUPPLEMENT

Terms of Advertising—(Per Inch Space.)

Transient matter	\$4 20	Three Months (13 times)	\$29 00
STANDING BUSINESS CARDS.		Six Months (26 " )	50 00
Two Months (8 times)	22 00	Twelve Months (52 " )	87 00

London Agents:

Messrs. EDWARDS & SMITH, 1 Drapers' Gardens, E. O., will take subscriptions and advertisements, and supply single copies of the paper at 1s. each.

**WILLIAM B. DANA COMPANY, Publishers,**  
Pine Street, Corner of Pearl Street,  
Post Office Box 958. **NEW YORK.**

## CLEARING HOUSE RETURNS.

The following table, made up by telegraph, etc., indicates that the total bank clearings of all the clearing houses of the United States for the week ending to-day, June 14, have been \$1,902,401,347, against \$2,104,307,355 last week and \$2,314,274,961 the corresponding week last year.

Clearings—Returns by Telegraph. Week Ending June 14.	1902.	1901.	P. Cent.
New York	\$894,168,821	\$1,245,513,291	-28.2
Boston	106,103,679	118,833,003	-6.4
Philadelphia	83,803,121	109,941,488	-23.8
Baltimore	18,062,955	19,558,717	-7.6
Chicago	131,311,802	135,470,043	-3.1
St. Louis	41,406,101	36,966,457	+12.0
New Orleans	8,861,084	8,501,322	+4.2
Seven cities, 5 days	\$1,283,722,063	\$1,659,289,317	-22.6
Other cities, 5 days	280,971,413	240,411,813	+16.9
Total all cities, 5 days	\$1,564,693,476	\$1,899,700,930	-17.1
All cities, 1 day	337,707,871	414,574,031	-18.5
Total all cities for week	\$1,902,401,347	\$2,314,274,961	-17.8

The full details for the week covered by the above will be given next Saturday. We cannot furnish them to-day, clearings being made up by the clearing houses at noon on Saturday, and hence in the above the last day of the week has to be in all cases estimated, as we go to press Friday night.

We present below our usual detailed figures for the previous week, covering the returns for the period ending with Saturday noon, June 7, and the results for the corresponding week in 1901, 1900 and 1899 are also given. Contrasted with the week of 1900 the total for the whole country shows a loss of 23.5 per cent. Outside of New York the increase over 1901 is 1.5 per cent.

Clearings at—	1902.	1901.	1902.	1900.	1899.

### OUR RECORD OF BOSTON STOCK EXCHANGE PRICES ENLARGED.

Our compilations of Boston stock and bond prices have been greatly extended, and now appear in a new form. They will be found on pages 1244 and 1245.

### THE FINANCIAL SITUATION.

A new feature in the coal strike has been the introduction as an investigator of Carroll D. Wright, United States Commissioner of Labor, who has visited and interviewed the leading parties interested. At first it was announced that he came as a kind of intermediary between the mine workers and the operators. Mr. Wright soon made it known that he had no such mission; that he was merely acting under the law which "charged him to investigate the causes of and facts leading to all controversies and disputes between the employer and the employe as they may occur, and which may tend to interfere with the welfare of the people;" authorizing him also "to make reports on particular subjects whenever required to do so by the President or either House of Congress, or when he shall think the subject in his charge requires it."

A very good result has already been attained in taking action under the provisions of this statute. The public had been from the first in no little uncertainty as to just what the differences were which led up to the withdrawal of the men from their work. That doubt has now been cleared away, and what the contention of each party is has become apparent, first by the letters which passed between the operators and the representative of the mine workers, and next by the statements of the presidents of the leading coal companies, showing the impossibility of their yielding to the demands of the labor union. We cannot go into these matters in detail to-day; but if there were no other differences than those involved in the demand made for higher wages, the facts show that it would be impossible for the operators to yield to the labor requirement or to submit the dispute to arbitration. The demand was for the coal companies to join in a conference with the labor union for a wage scale.

This, we repeat, the operators could not respond to favorably—(1) because a uniform wage scale for all anthracite mines is wholly impracticable on account of radical differences between such mines; it is also true that a wage scale may be workable in the bituminous regions but not in the anthracite. (2) Moreover, the method of disturbing relations between employer and employe once a year through a convention of miners' delegates (not having the technical knowledge of the varying conditions at each colliery), which assumes authority to fix a new wage scale and enforce it upon operators, is subversive of a wise management of any industrial enterprise and of carrying through any settled business plans or operations. (3) This wage scale has been tried the past year and has likewise proved destructive of discipline, because it creates a divided allegiance which destroys operators' authority where discipline is essential; as a result the efficiency of the mines has decreased, the contract miners having worked only four and a-half to six hours a day the past twelve months, and the product of the mines having thus shown a material loss. The foregoing suggestions were all given with so much detail in the papers submitted to Mr. Wright that we only refer to them very briefly.

There is still another important difficulty in the way of the acceptance or even in the way of a serious consideration of another advance in wages by the anthracite operators at this time, and that is because it would enforce further advance in the selling price of their product. A higher price for anthracite coal cannot be submitted to by the public; it would be a severe tax on the poorer classes who have to use coal for fuel; then again a higher price would decrease the consumption of anthracite. The decreased consumption would be induced in two ways. Anthracite coal all the time has to compete with bituminous. Every rise in price consequently tends directly to lessen its use wherever the two kinds are competitive. Moreover a rise in price tends to shut out all foreign shipments. It is with low prices, large production and large consumption that almost every properly-conducted enterprise secures to-day a return to the capital employed. Consequently if in the ways mentioned consumption is contracted, and if use is not otherwise enlarged, the market price of anthracite would have to be further advanced unless we would deny to capital any share in the product of its work.

Among the good work done at this session of Congress must be reckoned the action the current week of the House in striking out, by a vote of 116 to 77, the enacting clause of the Corliss Pacific Cable bill. That summary transaction will secure no record among the "Acts of Congress." But does not this incident suggest that a truer judgment might most any year be reached of any Congress or legislative body if it were known more by the legislation killed than by the laws passed. One often hears our statute books spoken of as including a large mass of poor stuff. Only think how much larger a proportion might be subject to that criticism were it not for the diligence and good sense of members who are every year defeating a host of other pernicious proposals. If our readers will turn to the CHRONICLE of February 22, page 399, they will find a short review made of the majority report of the House Committee on Inter-State commerce when this Government cable measure was introduced. Its purpose was to authorize the United States Government to lay a cable across the Pacific to Hawaii and to the Philippines. The reasons the committee gave for passing the bill appeared to us at that time as coming very far from making out a case in its favor. There were also, it was said, when the bill was introduced, three private cable companies ready to lay cables to the points designated, without asking any grant from the Government. One of them it seems, the Commercial Cable Company—as Mr. Richardson of Alabama stated on Wednesday of this week in addressing the House—has since then gone forward under the Post Roads Act in lack of other authority. Mr. Adamson of Georgia read a cablegram from London dated the same day, certifying that 1,065 nautical miles of the cable to be laid between San Francisco and Honolulu had been already completed, and that the work was proceeding at the rate of 26 miles a day; thereupon he made the motion to strike out the enacting clause of the bill introduced by the Inter-State Commerce Committee. At this juncture Mr. Cannon of Illinois threw the weight of his influence against the bill, and the motion passed as noted above. With that vote the Government was saved from the espousal of a per-

nicious principle, from 10 to 20 million dollars first cost, and from an annual deficit thereafter.

The monthly report of the Agricultural Bureau at Washington issued the present week, and showing the condition of the country's growing crops on the first of the present month, reflects on the whole a decidedly satisfactory agricultural outlook. With the single exception of winter wheat every leading crop at the date named had a better promise than on the first of June last year. Quite contrary to expectations the Bureau shows no improvement in the condition of winter wheat as compared with a month ago, placing the figure at 76.1 on June 1, against 76.4 on May 1. All private accounts agree in saying that under the favorable weather conditions which prevailed during May (the districts which had previously suffered from drought having received abundant moisture), a great change for the better occurred in all the large producing States of the Central West. So the Bureau's figures must be accepted as the very lowest indication of the possibilities of yield. At 76.1 the present year's condition compares with 87.8 last year on June 1, 82.7 in 1900 and 67.3 in 1899. As an offset, however, to this lower average of the fall-sown crop, the general condition for the spring-wheat crop is put at 95.4, against 92.0 in 1901 and 87.3 in 1900. What the aggregate yield of winter and spring wheat combined the present year will be cannot of course be foretold at this date. Very confident estimates have been put forth to show that the total crop must fall 100 million bushels below last year's total crop. In the nature of things, however, such estimates now are mere conjecture, as weather conditions between now and harvest time (which in the case of spring wheat at least is a good ways off yet) may greatly modify present prospects either for better or for worse. It is proper to say though, that should the estimate of 100 million bushels reduction in yield prove correct, it would still leave the crop a large one, for comparison is with the very heaviest yield ever harvested in this country; that is the crop would be in the neighborhood of 650 million bushels. On only one other occasion besides 1901 (namely in 1898) has the crop in this country reached as much as 650 million bushels, if we take the figures of the Agricultural Bureau as a guide. It is to be remembered, too, that a part of last year's yield of 748 million bushels was used for feeding purposes, recourse to wheat in certain sections of the West having been made necessary by the almost complete failure of the corn crop. It seems safe enough to conclude, therefore, that whatever the final result as to the present growing crop of winter and spring wheat we will have an ample surplus of wheat for export—probably all the world will need.

It is unusually difficult to determine what the acreage planted to wheat has been the present year and what figures to compare with for last year. The trouble arises in a measure out of the revision of last year's figures of acreage by the Agricultural Bureau, made necessary by the appearance of the Census returns. This year's area under wheat is undoubtedly smaller than a year ago. In the case of winter wheat a part of the area (as previously shown in these columns) had to be plowed up, while in the case of the spring-wheat area the amount sown to wheat has been reduced, owing to a very marked tendency towards a greater diversification of crops, and also owing to bad weather in the

Red River Valley at sowing time. The Agricultural Bureau estimates a reduction of 12.8 per cent in the spring-wheat area, or about 2,511,000 acres. This added to the reduction in winter wheat acreage seems to point to a total reduction in the wheat area of between 4 and 5 million acres. On an average yield of 15 bushels per acre this would mean a reduction on that account of between 60 and 75 million bushels. We have already indicated that such a reduction, if it should occur, could easily be borne. Some discussion has taken place as to whether the decrease in acreage must not be further enlarged by reason of the great change which has been going on in Nebraska from spring wheat to winter wheat. But we do not see how this can affect the result in any way, since the total acreage in wheat in that State (spring and winter combined) will actually be a little larger the present year than the total acreage in that State last year. The winter-wheat area is put at 1,643,202 acres, and the spring-wheat area at 832,979 acres, making 2,476,181 acres together, as against 2,456,543 acres last year.

In the case of all the other leading crops the promise, as already stated, is unusually favorable. The Bureau does not this month issue any figures as to corn, but it is known that conditions for this crop thus far have been extremely auspicious. In the case of oats the Bureau puts the status June 1 90.6, as against only 85.3 on June 1 1901, the acreage being at the same time a trifle larger. Barley is not an important crop, but it is interesting to note that the acreage has increased 8½ per cent and that the condition is 93.6, against 91.0 on June 1 1901. And generally speaking the Agricultural promise the present year, in sharp contrast with the conditions a year ago, is highly encouraging.

Iron production in the United States continues on a phenomenally large scale. To be sure the blast furnace statistics issued the present week by the "Iron Age" of this city show that the capacity of the active furnaces on June 1 1902 was not quite up to the unprecedented figure reached on May 1, the comparison being 344,748 tons per week, against 352,064 tons per week. But this falling off is declared to have been entirely temporary and is ascribed to labor troubles in the Shenango and Mahoning valleys, which led to the banking and blowing out of a number of furnaces in the last days of May and the first day of June. Since then the majority of these furnaces, we are told, have resumed work. Moreover, the "Age" finds that the actual output of iron during the month of May, notwithstanding the restriction mentioned, was 1,570,243 gross tons, which compares with 1,503,326 tons in April and 1,473,423 tons in March. Furthermore the opinion is expressed that the output of the current month will also be up to the 1,500,000-ton mark. Stocks of iron are still dwindling, showing that consumption keeps well ahead of the extraordinary production. The "Age" finds that on June 1 the total of furnace stocks, sold and unsold (not including the holdings of the steel works producing their own iron and which are never included in the figures), were down to only 62,616 tons, as against 83,859 tons May 1, 125,348 tons March 1, 218,084 tons January 1 and very much larger amounts in previous months.

There was no change in the official rates of discount by any of the European banks this week. The

Bank of Bengal, however, reduced its rate of discount from 5 per cent to 4 per cent. Hon. Edwin H. Conger, the United States Minister at Peking, has announced in a cable to the State Department that the representatives of the Powers have reached an agreement on the basis of Secretary Hay's proposition, which was that this Government would reduce its indemnity claims against China from \$25,000,000 to \$24,000,000 if most of the other Powers would reduce their shares proportionately. The total reduction will be about \$10,000,000, thus making the total indemnity to be paid by China \$433,000,000. There remains to be settled, however, the important question of the demand of some of the Powers that the indemnity be paid on the basis of exchange at the present time instead of that on the date of the signature of the treaty. The Chinese Government contends that the indemnity payments are to be made on the latter basis, and in this contention the United States Government joins. Owing to the depreciation in the value of silver since the treaty was signed, if the demand of the other Powers should be sustained, the indemnity payment would be increased by about \$70,000,000.

The statement of the New York Associated Banks last week showed comparatively unimportant changes. The reduction in cash reserve was \$1,250,900. Loans were decreased \$1,325,700 and deposits were \$2,429,900 lower. The reserve requirements were reduced \$607,475; this sum deducted from the \$1,250,900 loss in cash left \$643,425 as the decrease in surplus reserve, making this item \$11,285,575.

Money on call representing bankers' balances loaned on the Stock Exchange during the week at  $3\frac{1}{2}$  per cent and at  $2\frac{1}{2}$  per cent, averaging about  $2\frac{1}{2}$  per cent. On Monday loans were at  $3\frac{1}{2}$  per cent and at  $2\frac{1}{2}$  per cent, with the bulk of the business at  $3\frac{1}{2}$  per cent. On Tuesday and on Wednesday transactions were at 3 per cent and at  $2\frac{1}{2}$  per cent, with the majority at 3 per cent. On Thursday and on Friday loans were at 3 per cent and at  $2\frac{1}{2}$  per cent, with the bulk of the business at  $2\frac{1}{2}$  per cent. Banks and trust companies have loaned at 3 per cent as the minimum. Time contracts have been more firmly held, and there has been some business for short periods, borrowers seeking to make provision for possible stringency during the semi-annual settlement. Rates are  $4\frac{1}{4}$  to  $4\frac{1}{2}$  per cent for thirty to ninety days and  $4\frac{1}{2}$  to 5 per cent for four to seven months on good mixed Stock Exchange collateral. Some transactions are reported at 4 per cent for ninety days on choice security, these loans being made by foreign bankers. Commercial paper is in moderate supply, while the demand is chiefly from the East, and rates are  $4\frac{1}{4}$  to  $4\frac{1}{2}$  per cent for sixty to ninety day endorsed bills receivable,  $4\frac{1}{2}$  to 5 per cent for prime and  $5\frac{1}{2}$  per cent for good four to six months' single names.

The Bank of England minimum rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety day bank bills in London  $2\frac{1}{2}$  per cent. The open market rate at Paris is 2 per cent and at Berlin and Frankfurt it is  $2\frac{1}{4}$  per cent. According to our special cable from London the Bank of England gained £760,964 bullion during the week and held £37,311,830 at the close of the week. Our correspondent further advises us that the gain was due to imports of £524,000 (of which

£239,000 were bought in the open market, £207,000 were from Egypt and £78,000 were from sundry points), to receipts of £257,000 net from the interior of Great Britain and to an export of £20,000 to Argentina.

The foreign exchange market has been generally firm this week, with fluctuations within a remarkably narrow range. The changes have been so slight as not to be quotable by fractions, and even quotations by decimals show small variation. One feature of the market, which was observable early in the week, was the offering of sixty to ninety day bankers' bills representing sterling loans. Later there were some of this class of drafts speculatively sold in the expectation of covering or re-buying in August or September at a profit. These bills were promptly taken and their offering seemed to make no impression upon the market, for there was not the least change in rates. The only indication of activity was in sight sterling. There appeared to be a good demand for it on Monday for the next day's mail, but when this inquiry was satisfied, the tone grew a shade easier, recovering, however, on Thursday. Some business was done in cable transfers, which were firmly held throughout the week. Bankers reported that there were few commercial bills except futures against grain exports, and there were not many drafts offered against securities, and none, so far as could be traced, representing transfers of collateral to the European centers. The Assay Office paid \$778,638 32 for domestic bullion. Gold received at the Custom house during the week, \$80,815.

Nominal rates for exchange were  $4\ 85\frac{1}{2}$  to  $4\ 86$  for sixty-day and  $4\ 88$  to  $4\ 88\frac{1}{2}$  for sight. The market for actual business opened on Monday unchanged, compared with that at the close of last week, at  $4\ 84\frac{1}{2}$  to  $4\ 85$  for long, though decimally stated the rate was  $4\ 8485$  to  $4\ 8490$ , a decline of five points on the asking price. Short was also unaltered at  $4\ 87\frac{3}{4}$  to  $4\ 87\frac{1}{2}$  to  $4\ 8735$  to  $4\ 8745$ . Cables were the same as on Friday, at  $4\ 87\frac{3}{4}$  to  $4\ 88$ ; decimally expressed they were  $4\ 8785$  to  $4\ 8795$ , against  $4\ 8790$  to  $4\ 88$  on Friday. As above noted, there were some offerings of long bills on Monday and again on Tuesday, and an inquiry for short on the first-named day, but with these exceptions the market was without feature, and it so continued until Thursday, there being no change either in fractions or in quotations decimally expressed. On the above-named day, however, short advanced to  $4\ 8740$  to  $4\ 8750$ , fractional quotations remaining at  $4\ 87\frac{3}{4}$  to  $4\ 87\frac{1}{2}$ , and the tone was firm. The market was steady on Friday at  $4\ 8490$  to  $4\ 85$  for long,  $4\ 8740$  to  $4\ 8750$  for short and  $4\ 8790$  to  $4\ 88$  for cables. The following shows daily posted rates for exchange by some of the leading drawers.

### CIVIL GOVERNMENT FOR THE PHILIPPINES.

We think it a reasonable conclusion, drawn from the various indices of public opinion, that the chief anxiety of the American people in the Philippine affair is to have the situation so defined that both the United States and the islanders shall know what their future relations are to be. Even if there were no other consideration, people who have looked to the Philippines as a promising field for development by American capital must be impatient over a situation where contracts and franchises would be left in so doubtful a position that investment capital finds nothing to induce its presence.

These feelings have not taken the shape of a general and popular protest against the war. The great majority of our people, quite irrespective of party, have regarded the fighting as inevitable. Some may think a different policy at the beginning would perhaps have shortened the contest; it could hardly, conditions being what they were, have averted it. But the sentiment which, in our opinion, is rather rapidly crystallizing, is the belief that the time has come to give some definite promise of self government to the natives, so far at least that the chief remaining ground of appeal for insurrection may be removed.

It must be remembered that from our occupation of the Philippines to the present time the islands have been administered by military rule. What the Philippines Commission did in the line of establishing courts and schools and organizing provincial governments was done to all intents and purposes under the shelter of the army. In the nature of things the arrangements had to be temporary, and their founders had no right to guarantee continuance. Hence it was

always possible for a restless insurgent leader to allege that the United States did not intend to make such grants.

The arrival of an hour when a civil grant of permanent character might be made has not been unforeseen. Since the early part of April, two measures with such an end in view have been pending in Congress. They are likely to come to a vote in the not very distant future, and it is now our purpose to review them. We shall refer, first, to the statements of Governor Taft of the Philippine Commission, in a recent very interesting article. "The present condition of the Christian Filipino provinces," writes Mr. Taft, "is that of peace." He had previously said that the insurrection hitherto had "been maintained only by the Christian Filipinos;" hence the force of his further statement that the provinces in question "are ripe for the establishment of civil government," and that when this is effected and "the troops are withdrawn to separate posts and the people see them but occasionally," the Filipinos will not only be satisfied of the benevolent intentions of our country, but "convinced of the real power of civil government." In this striking expression of opinion, such of the provincial governors as have thus far spoken appear to concur.

Of the two bills pending in Congress on this question, one—the Senate measure—was introduced on January 7. As since amended, it provides that all Filipinos who were Spanish subjects prior to the Spanish cession, and their children, shall be deemed citizens of the Philippines. Whenever "the existing insurrection shall have ceased and a condition of general and complete peace shall have been established," the Commission shall certify the fact to the President, who shall then institute a census. The Commission, after such a Census, shall report to the President "whether or not all or certain of the Philippine Islands are capable, fit and ready for the establishment of a permanent popular representative government." Pending such action, the Commission, in their discretion, are to "continue to establish additional municipal and provincial governments, with popular representative government," and to add to the electorate, in their judgment, "with the purpose of gradually extending to municipalities and provinces permanent popular representative government."

With this, the Senate provisions for government by the Filipinos stops. The House bill, introduced on April 8, goes further. It provides that whenever insurrection shall have ceased "and a condition of general and complete peace shall have been established," and the same shall have been certified by the Commission, that Commission shall "call a general election for the choice of delegates to a popular assembly of the people of said islands, which shall be known as the Philippine Assembly. After such election all the legislative power heretofore conferred on the Philippine Commission"—that is, government of the Christian provinces, subject to the Executive at Washington and the general laws of Congress—"shall be vested in a legislature consisting of two houses—the Philippine Commission and the Philippine Assembly."

This provides an Upper House appointed by the President and a Lower House elected by the natives. The Assembly is to hold office for two years, to meet annually, and a majority shall constitute a quorum. If it fails to pass appropriation bills those of the pre-

vious session shall be deemed to have been again appropriated. All subjects of legislation not withheld by the Act of Congress shall be within the power of this House. It shall make no enactment "which shall deprive any person of life, liberty or property without due process of law;" no money shall be paid out except through appropriations.

In criminal prosecutions the accused shall have the right to be heard by himself or counsel, to have a speedy public trial, meet the witnesses face to face, and compel the attendance of his own witnesses. Taxation shall be uniform, contracts shall be respected by the law, the habeas corpus privilege shall not be suspended outside of rebellion, slavery shall not exist, free speech and a free press are guaranteed, and in general the personal rights guaranteed by our Constitution are affirmed. Finally, all Philippine residents owing allegiance to the United States "shall receive the same protection from the United States in respect to their relations to foreign governments as is accorded to citizens of the United States."

These are the two plans between which Congress must make its choice. It is plain, on the face of things, that the House bill, while it takes some risks of premature granting of civil rights, will on the other hand answer more conclusively complaints that the United States is giving no formal guarantee of its full intentions toward the Filipinos. This Mr. Lodge's Senate bill, a more cautious measure, does not do, except by its intimation of a general purpose. The upshot of the two diverging propositions may be compromise; fortunately there is little sign of failure of all legislation. It is important to notice that even the qualified pledges of the Lodge bill would have undoubted value as a partial solution of the existing situation.

### THE RAILROADS AND COMMERCIAL EXPANSION.

The address which Mr. James J. Hill of the Great Northern Railway Company delivered in Chicago on Wednesday of last week at the dinner of the Illinois Manufacturers' Association has attracted a good deal of attention, and deservedly so. The address is full of interesting thoughts and suggestions. Moreover, Mr. Hill shows a clear insight into the conditions which have raised this country to its present prominence and prosperity, and which must govern its future growth and advancement. He possesses the faculty of lucid statement, and by means of facts and figures is able to bring these governing conditions into view in such a way as to make their bearing and effect obvious even to the minds of those who have not made a study of the subject.

A large portion of the address was necessarily devoted to showing the part played by our railroad transportation interests in promoting the industrial progress of the United States, for these arteries of commerce lie at the basis of our national achievements. In discussing railroad matters, Mr. Hill is dealing of course with a branch of human endeavor of which he is master. But he has no narrow conceptions. His horizon is an extensive one, and he takes large and broad views of things. Mr. Hill makes a statement which no one can controvert when he says that next to certain fundamental things which he mentions (such as religion and common

schools) no other single work enters into the welfare and happiness of the people of the whole country to the same extent as the railway; no other work could have made it possible to occupy the enormous stretches through the interior of our country, and people them with cities, towns and villages. His other statement also cannot be controverted, namely that while mistakes of judgment or of intent may have been made in the management of the railroads, the result on the whole has been to create the most effective, useful and by far the cheapest system of land transportation in the world.

He gives figures to illustrate the truth of this latter declaration. In England the average amount paid by the shipper for moving a ton of freight 100 miles is \$2 35; in France, \$2 10; in Austria, \$1 90; in Germany, where most of the railways are owned and operated by the Government, \$1 84; in Russia, where there is also Governmental ownership and where the shipments are carried under conditions more similar to our own than in any other country as respects long haul, \$1 70. On the other hand, in the United States the average charge paid by the shipper is only 73 cents or less than 40 per cent of the average cost in Europe. This difference in favor of the American shipper is the more noteworthy as every article used by the railroads, including labor, costs more in this country than it costs in Europe, with the exception of coal and right of way. Wages in the United States are as a rule more than twice as high. Furthermore, the cost of the things used by the railroads is constantly rising. Mr. Hill takes as an instance the material in an ordinary box-car, the cost of which has increased in the past three years over 20 per cent. The manufacturer, when the cost of production is increasing, is able to find compensation by raising the selling price of his wares; not so the railroad, rates of transportation in the United States having gone steadily down from year to year. The latest report of the Inter-State Commerce Commission shows that in the fiscal year ending June 30 1900 the average rate received per ton per mile by the railroads of the United States was only 729 thousandths of a cent, as against 911 thousandths ten years before in 1890.

Mr. Hill's analysis naturally brings him to a consideration of the proposition of Government control of the railroads. The great reduction in transportation rates just noted has been brought about entirely by the railways themselves in the effort to serve the public and promote their own interests—not by legislation or Government interference. It is now seriously proposed to hand these large transportation interests over to Government control. Two propositions are suggested—Government ownership or an increase in the power of the Inter-State Commerce Commission. Mr. Hill is equally emphatic in his condemnation of both propositions. The reader has doubtless noticed that every now and then covert insinuations appear in the newspapers hinting that the great railroad combinations which have been the feature of the last two or three years are preliminary to a movement in favor of Government ownership—that the syndicates behind these combinations, while ostensibly opposed to Government ownership, are secretly in favor of it, hoping thereby to dispose of the properties to the Government at a high price. If any one has been inclined to credit these statements, Mr. Hill's remarks will certainly serve to disabuse the mind. For while Mr. Hill has been very active in

railroad consolidation work, he sets out the dangers of Government ownership in such trenchant words that it is difficult to see how any one can be found to argue in favor of the proposition after reading his remarks. The mere suggestion of the proposition, as he well says, arouses in the mind of almost every thoughtful man the fear that such power would end in the destruction of the Government itself. Aside from all economic questions and the increased cost to the public, either in direct advance of rates or indirect cost of increased taxation, it would mean the political appointment of an additional million of public officials and the exercise of a power sufficient to imperil, if not to destroy, free Government in the United States.

As to the other proposition, namely to increase the power of the Inter-State Commerce Commission, he demonstrates that that would be no less dangerous. He believes that all public service should be regulated by fair and reasonable laws. Existing statutes furnish shippers full redress against the railways for any grievances they may have or for any damage inflicted upon them. In common with all practical railroad men of large experience, and with railroad students, he finds the existing powers of the Inter-State Commerce Commission as adequate and ample for the purpose. Giving the Commission the authority to fix rates, either in the first instance or the last instance, is a suggestion which cannot be defended. The only difference between a commission of five men fixing the rates on all the railways of the country and a commission operating under Government ownership is a difference in name. In either case the business of the country would be face to face with the worst financial crisis our people have ever been called upon to meet. "Because difficulties have arisen in the enforcement of the law growing out of failure to prove its violation, it is proposed to amend the law, not in such way as to make it less burdensome under given competitive conditions or to make proof of the violation of the law less difficult, but by conferring upon five men, or three, if the five do not agree, the power to regulate the earnings of railway companies by fixing rates. This is in effect to give to the Commission, a political body, power to make or break railway companies, to send their stocks or bonds up or down in the market, to control importations, to limit exportations, to build up or ruin cities by establishing differentials, to array one section against another."

Mr. Hill truthfully says that should the Commission be given rate-making power, it would have absolute dominion over the commerce of the country and over all interests dependent upon such commerce. Compared with the evils which would result from the granting and exercise of such power, existing evils or alleged evils would be as nothing. He points out that it is to the interest of the railroad to build up the territory tributary to it. The prosperity of the people served by the railway is the only path to prosperity for the railway. The railway and its patrons must always prosper together or suffer together. Moreover, the greater the volume of business the lower the rates can be made. If, for instance, a railway has to raise one million dollars on a traffic of 1,000,000 tons, a simple calculation shows that its profits must be \$1 a ton; if there are 2,000,000 tons 50 cents a ton; and if there are 4,000,000 tons 25 cents a ton will bring the same profit. In order to secure this additional ton-

nage, intelligent railway management is constantly called upon to secure for the producers on its various lines a market for their production, and if possible a return load for the car carrying such product to market.

Mr. Hill gives an interesting illustration of how this principle has been observed from the very beginning on his own system of roads, namely the Great Northern. On that point we cannot do better than to quote his own words: "We have on the Pacific Coast the largest body of first-class saw timber left in the United States. When I first visited that country, with a view to extending our lines to the coast, I saw at once that unless we could carry their lumber to market at a price that would enable them to manufacture and ship it with a profit, our railroad would have no business. The first and great crop of that country is its lumber. We made a rate of 40 cents a hundred for 2,000 miles, or four mills a ton per mile, on this lumber, in order that we might load back the cars that carried out the merchandise to the West. This rate was necessarily met by other roads, and the result was the expansion of the lumber trade of Washington and Oregon, so that to-day it is over ten times what it was nine years ago, and in place of seeking additional loads for our cars from the West, we are now seeking additional loads for our westbound cars going out to be loaded with lumber for the great treeless States of the Middle West, and the development of this Pacific Coast lumber traffic will work a greater change in the Oriental trade of the country than all the efforts of all the men engaged in that traffic."

In connection with this phase of the matter Mr. Hill made some announcements that have an immense bearing on the future commercial expansion of the United States. He says that it was in order to keep pace with the enormous demand for the lumber of the Pacific Coast States that he has built the largest ships in the world. He then goes on to state that in that way he hopes to be prepared this fall to meet not only the rates of other trans-continental lines, both in the United States and in Canada, but the rates made by steamer from the Atlantic ports via the Suez Canal. In other words, every manufacturer reached by any railway in the United States will be able to ship his goods, Mr. Hill says, to the Orient by rail to the Pacific Coast and thence by steamer at rates that will compete with water transportation from the Atlantic seaboard to the East by way of the Mediterranean and Suez Canal. "Were it not for the certainty that there is a car load of lumber waiting for every empty car we can furnish on the Pacific coast we could not carry the Oriental business at twice the rates we will offer."

He then dwells on the great opportunities there are for developing our commerce with the East. Twenty years ago the foreign trade of Japan was not to exceed \$1 per capita of the population; to-day this trade is equal to \$6 or \$7 per capita of its population. In 1890 the entire foreign trade with China amounted to about 90 cents per capita. With a good stable government which will protect the Chinaman in the fruits of his own labor and enterprise, there is no reason, Mr. Hill thinks, why the Chinese trade should not increase as rapidly as that of Japan has increased. The Chinaman he considers the better merchant of the two. Should the Chinese trade increase to three or four dollars per capita, it would amount to more than the

entire exports of the United States, and surely this trade is worth striving for. With Manila as an American port in the East, and the best ships that can be built, we should be able to maintain ourselves as a nation in the control of a large share of this traffic of the Orient.

The address also contains some pertinent observations on the need of combinations of capital in carrying on the enormous undertakings so essential in a country as large as ours. But that is a matter we need not touch upon on the present occasion.

### THE GREAT SIBERIAN RAILWAY.\*

ST. PETERSBURG, RUSSIA, May 22, 1902.

The closing quarter of the last year has witnessed an event which will remain memorable in the annals of Russian history and memorable also in the progress of human enterprise in general. I refer to the driving of the last spike to the Great Siberian Railway.

Although this great trunk line, cutting across two Continents, will hardly be open in its entire length for freight and passenger service before the fall of 1903, the Russian people can well be congratulated upon the success of having substantially finished such a gigantic task. Thus the much cherished plan of the late lamented Czar Alexander III. has now been crowned with success, in spite of difficulties which, in view of the climatic conditions prevailing through the whole of Siberia, seemed almost insurmountable to a good many even of the wiser heads.

But the final achievement of this greatest of highways built of steel has been due to that great feature of the Russian character, the almost fatalistic patience—a doggedness “never to be discouraged.”

#### EXTENT OF THE RAILROAD.

Connecting at Tscheljabinsk with the railway system of European Russia, the Great Siberian Railway now absorbs and unites what was formerly known as the Western and Central Siberian systems, and properly ends at the city of Irkutsk on Lake Baikal, having a length of 3,048 werst† on its passage through Siberia alone.

Its northernmost point is situated at Krassnojarsk and the most southerly one is at the terminus, *i. e.*, at Irkutsk.

Near the latter place begins the Transbaikal Road of the Great Siberian System. About 60 werst from this city the trains are transferred to ferryboats—such as are common on the Great Lakes of the United States as well as in New York Harbor—which land passengers and freight on the eastern border of Lake Baikal.

Although the Russian Government has spent a great deal of money to provide the strongest and most perfect ice-breakers possible, human ingenuity has had at times to yield to its stronger adversary—Nature. The cold has at times been so intense that the transport of freight and passengers has been more expeditious by sleigh across the frozen cover of Lake Baikal.

But in order to cope with all emergencies a short loop around the Southern border of Lake Baikal is in course of construction.

At the Station Kaidalowskaja the Transbaikal System of the Great Siberian Railway is split into two branches; the one leading east to Nertschinsk and

Stretensk, having its terminal on the banks of the River Schilka, a distance of 1,096 werst from Irkutsk, on the eastern side of Lake Baikal, remaining all the time on Russian territory, known as the Northern part of the Maritime Provinces.

The other branch also stretches in an easterly direction, but further on turns down to the Chinese border line, which it crosses at a distance of about 325 werst from its starting point, Irkutsk.

On the Russian side we have the station Sibir, and across the border line, Mandschouria, or Nagadan, as the Chinese call it.

From the latter place the Eastern Chinese Railway, equipped with American locomotives—from the Quaker City, I believe—leads its way over Chailar, Zizikar and Charbin (Sungari), 1,440 werst from its starting point to the station, Pogranitschnaja.

The Eastern Chinese Railway has a second branch line—with a length of 980 werst—from Charbin towards the Southwest via Mukden to Daljni and Port Arthur, now the most Southerly port of the Russian possessions on the Chinese Sea.

The main line of the Ussuri Railway leads from Wladiwostok, the largest Russian port on the Pacific, to Chaborowsk on the Amur, having a total length of 721 werst.

Thus the Great Siberian Railway has a total length of 5,372 werst on Russian territory, and the Eastern Chinese Branch, with the Southern Mandschouria Railway, having 2,420 werst on Chinese territory, which makes a total length of 7,792 werst, distancing all previous records established by the Pacific trunk lines crossing the new world.

Or, measured from the most western point on the European border of the Russian Empire to the easternmost point on the Pacific coast, the traveler will have to cover not less than 9,220 werst of railway to Port Arthur and 9,877 werst on a stretch to Wladiwostok—that is, in accordance with the schedules for the express trains.

This figure well illustrates the vastness of this Great Northern Empire and this figure may at the same time indicate—to the uninitiated—what difficulties had to be surmounted before this gigantic task could be put to a successful end; especially difficult became the work on the Eastern Chinese and on the Mandschourian Railway, as these two lines were hardly finished when the Chinese troubles began.

#### USEFULNESS AS A MILITARY OR WAR MEASURE.

It is a good proof for the efficiency of the road that during the Chinese troubles the Russian Minister of War was able to direct about 220,000 men over the Great Siberian Railroad to the theatre of the Boxer rebellion, although at that time the road was only in course of construction and part of the troops had to be transported down the Schilka and Amur rivers on barges.

The cost of this Transcontinental trunk line is at present exceeding the figure of 780,000,000 roubles,‡ which will be further considerably enhanced by the construction of the Loop around Lake Baikal, because the territory in its neighborhood—on account of the high mountains surrounding the lake—will offer many technical difficulties to the engineers called upon to solve this problem.

Another expense in view will probably be the purchase of heavier rails and the latter may be necessary

\* Communicated by our Special Correspondent at St. Petersburg.

† One English mile equals one and one-half werst, Russian.

‡ One dollar equals about 1.95 roubles.

before the whole system has had a fair chance to show its earning capacity.

The Siberian Railway is of great importance to the welfare of the Russian Empire in political, or rather military respects, chiefly through the fact that Russia can transport as many troops as she likes in perfect safety from her Western frontier on the Baltic Sea to her Eastern outpost on the Pacific Ocean. All this time the troops would remain upon her own territory, as at the end of the Nertschinsk and Stretensk Branch, proper connections are made with steamer lines down the rivers Schilka and Amur via Blagowjetchensk to Chabarowsk, from where steamers can be had down the Amur, going straight north to its mouth with Nikolajewsk as port on the Sea of Ochotsk; in a southerly direction the Ussuri Railway leaves Chaborowsk, following upstream the river Ussuri for Wladiwostok, the great Russian port on the Japanese Sea.

But of greater importance are undoubtedly the advantages which Russian commerce and industries expect to derive from the great highway.

#### HOW THE RAILROAD WILL DEVELOP COMMERCE.

These are at first of local character, of course, *i. e.*, to say that Siberia and the Russian Maritime Provinces (on the Pacific) will come into closer touch with each other; then we must further consider the better commercial relations and quicker transportation facilities which will be offered buyers and sellers in Russia proper and in her Asiatic dependencies.

In the second place we must view the advantage which Siberia herself derives from the railway in her relations as an exporting country—exporting her agricultural products to the great consuming centres of England and Continental Europe as well.

As far as Western Siberia is concerned, her efforts in placing dairy products, especially butter, on the principal English markets have been successful, and it is expected that meat, provisions, timber, lumber and grain will follow later on in larger volume than heretofore.

The fact that for the current year the production of Siberian butter is expected to be about 50 per cent larger than for the past year must be accepted as a conclusive proof that the policy pursued by the Russian Minister of Finance, M. de Witte, has been a highly beneficial one to the empire at large.

The third and much-contested point amongst the advantages to be derived from the Great Siberian Railway is the capacity of the road to carry freight from the Far East in transit to Western Europe and vice versa.

As soon as the earnings of the Great Siberian Railway will admit the putting on of express trains for the freight service, I think that there is a good chance for the road to carry the more valuable freight, such as silk, tea, etc., which especially suffer somewhat by the sea voyage and, through their intrinsic value, can afford to pay a higher freight than steamer rates.

The advantages of rapid transit across two continents are already shown in the far better mailing facilities; when about two years ago it took almost 50 days for a letter from Wladiwostok to reach the capital of all the Russias, such letters are delivered in 21 to 23 days, and that even now in the winter time.

The mail from other important places in the far East has lately required

23 days from Newchwang	} to St. Petersburg.
24 days from Port Arthur	
19 days from Chailar (Mandschouria)	
28 days from Yokohama	

When the various governments of Western Europe will next consider mail subsidies, it is quite within the cards that the fast steamers will have to make their first surrender to the Fast Siberian Express, *i. e.*, as far as mail deliveries to Japan and China—with Hong Kong as the most southerly point—are concerned.

I hear that the Japanese are making the most strenuous efforts to secure for their steamship lines the carrying of mails from the terminal points of the Siberian Railway to other ports on the Chinese and Japanese seas, and even across the Pacific Ocean.

As far as the fast-freight possibilities are concerned, it is rumored here that Australian papers have been ventilating the question of establishing a line of steamers from a port in Queensland, say Brisbane, or from a point in Northern Australia to Port Arthur; this trip to require only about 8 days—which line would then make direct connections with the Siberian route, and could possibly deliver freight in quicker time than on the long ocean trip from Sidney or Melbourne via the Suez Canal to the London docks.

#### PASSENGER TRAFFIC.

As soon as this superiority of the Great Siberian Railway is established, it would be quite natural to suppose that the passenger traffic must follow.

But here I must put a little damper on the joyful thoughts of the Russian patriot and of those European and American tourists who ventured their opinions upon the subject, and who have made the trip in the summer-time.

Just here is the rub. Through the international passenger traffic this line will probably profit, only, however, through the spring, summer and fall; but as for the six months of winter it will be another affair altogether.

It takes a Russian constitution to go through a winter at the capital, the present one having lasted not less than 5 months and 28 days; and here at the capital comfort and luxury are certainly not lacking; but the long winter in Siberia, with its Arctic night, will probably not tempt many travelers outside of Russia to undertake a trip across the Asian Continent on the Great Siberian route, with all the risks to health that would involve, excepting perhaps those who have direct business in Siberia during the winter time, such as fur dealers, for instance.

The Ministry of Finance has worked out time-tables which—provided the limit can be kept up—would make remarkably good connections.

They are based on an average speed of 50 wersts an hour—which would not represent an exceedingly high speed—and on this basis the stretch from Moscow to Port Arthur would not require more than 8½ days, whereas at present it requires about 20 days.

Such splendid results, however, could only be obtained after the finishing of the loop around Lake Baikal and the laying of heavier rails wherever necessary.

And then again there will be difficulties in the winter time, which an engineer on any other road in Europe or America has hardly ever to cope with.

In the summer time the schedule could be kept up with comparative ease; the more we approach the lands of the midnight sun—those clear nights, when evening and morning dawn melt into one, would be extremely favorable to the running of fast trains and would offer a new sensation to the fastidious globe-trotter never to be enjoyed anywhere else.

At present there are three weekly express trains, leaving Moscow for Irkutsk to provide the necessary

transportation facilities for the passenger traffic between Russia proper and Siberia in both directions; no special provisions have as yet been made for transit passengers from Western Europe to the two principal ports in the Far East, situated on Russian territory, i. e., Wladiwostok and Port Arthur.

The "train de luxe," however, which leaves Moscow once a week is considered "up to the mark" in every respect, but thus far it can not proceed beyond Irkutsk.

In order to draw part of the annual passenger traffic away from the steamer lines, say about 50,000 passengers each way, two express trains a day would be necessary, with a change of cars at Moscow and Irkutsk for passengers from or to Western Europe.

As soon as the necessary rolling stock can be supplied for the road—which, of course, is a State railway, being built, managed and owned by the Imperial Government of Russia—the advisability and practicability, at the proper seasons, of the overland route will impress themselves upon all likely passengers on account of the extremely cheap rates, Russia having the passenger tariff "by zones," i. e., on a sort of a wholesale principle, the further you go the lower the rate per verst (or mile).

I expect to revert to this subject at length in a special article later on in the season, the subject having been treated by one of your former Treasury officials in one of your monthlies towards the end of last or the beginning of the present year.

As far as the carrying of the mails is concerned, we run up against the remarkable fact that the treaties between Russia and her Western neighbors, principally Germany and Austria, do not provide for any money consideration in exchange for the carrying of the mails, i. e., the contracting parties transport all mail matter free of charge for each other, which is quite easy, as the three States enumerated above own all their principal trunk lines and the charters of all private lines, which might be called upon to carry mail matters, contain, I believe, a clause which calls for the free carriage of the mails.

Whether Russia would be willing to carry mails free which are directed from a foreign country to a foreign country is a question which will probably be approached in the future, but at any rate I believe that the carrying of the mails by the overland route will not be as costly as that practiced upon at present by steamers, which upon the long voyage to China and Japan make too many stops, on the way out at least.

These are about all the principal tasks which the Great Siberian Railway will have to face, and as the Ministry of Communications is subject to the final control of the Minister of Finance, M. de Witte, there is no doubt that the prospects are good ones.

Once the Great Siberian Railway, placed on a sound footing, its projected parallel line in a more southerly latitude, the Taschkent-Peking Railway, a continuation of the Central-Asiatic Railway, and the Kjachta-Peking Railway, connecting the former with the Great Siberian route, will receive proper consideration by the highest Russian Government circles.

This intention to approach the various sections of Asia with each other has clearly been set forth through the projected Orenburg-Taschkent Railway, to which the first spade has been driven a few months ago. This line will connect the Russian possessions and protectorates in Central Asia (Turkestan, Bokhara, etc.,) with the sections in the neighborhood on the

Eastern side of the Ural Mountains, thus forming a well designed step towards the development of Siberia, about which I expect to entertain your readers later on in the season.

#### INTER STATE COMMERCE COMMISSION— ITS POWER TO MAKE RATES.

We have received the following answer to Mr. E. P. Bacon's communication in the CHRONICLE of May 31st on the proposed grant of power to the Inter-State Commerce Committee to make railroad rates. While not by any means closing the discussion, the communication contains in definite shape information upon points touched by Mr. Bacon which is of decided interest in this controversy.

JUNE 3 1902.

The Editor of THE COMMERCIAL AND FINANCIAL CHRONICLE,  
New York City:

DEAR SIR—I have read with a great deal of interest the various editorials in the CHRONICLE upon the proposed amendments to the Inter-State Commerce Act designed to confer the rate-making power upon the Commission, and also Mr. E. P. Bacon's communication of May 20th last, published in your issue of May 31st. Thinking it may possibly be of interest, if not of assistance, I take the liberty of submitting some observations on Mr. Bacon's communication.

Mr. Bacon says that railways are public highways, and that railway corporations are performing a public service, which should, therefore, be performed in the same manner as if done by the Government itself.

This generalization, being incorrect, naturally proves misleading. Neither in this country nor in Great Britain, from which we derive the principles of our government, has it ever been regarded as a governmental function—except in rare and temporary cases—to operate railways or other means of transportation. It has been deemed a governmental function to provide ordinary highways, but never to operate vehicles upon them. Not even the highway has ordinarily been provided by the government in the case of railways. The provision of the highways, as well as the operation of the conveyances upon it, has been left to private capital and enterprise.

It would no doubt require an amendment to the Constitution of the United States before the United States could operate railways. This is simply another evidence that such operation is not a purely governmental function.

It is, therefore, unwise to reason from such faulty premises. The declaration that railway transportation service must be performed in the same way as if performed by the Government itself is without foundation, and, moreover, makes no progress toward a solution of the question. If a governmental function and performed by the Government, the Government would have absolute discretion as to how it would perform it.

Perhaps the only substantial principle deduced by Mr. Bacon from the fallacy with which he starts out is that railway service must be performed at rates no greater than are necessary to afford a reasonable return upon the capital honestly invested in the property used for the purpose. This is a very startling proposition. It seems the Government has never exercised the right, if it has it, to operate the railways. I know of no reason, therefore, either in law or in morals, why the Government should prevent the individuals who choose to invest their money in these enterprises from realizing a return commensurate with the risks incurred and the energy and skill employed, and from realizing enough in prosperous years to carry them through years of depression. I do not understand that Mr. Bacon's rule makes allowance for these considerations. A corollary to his proposition would seem to be that if the railroad in performing this alleged public service shall not realize more than a reasonable return, it shall likewise be guaranteed by the Government at least a reasonable return. This feature, however, seems to be lacking in Mr. Bacon's plan.

Perhaps the most vital objection is that Mr. Bacon is dealing in a purely theoretical way with an essentially practical subject. By the application of false theories he arrives at an unjust and unworkable rule. Owing to the infinite complications of modern railway transportation, it is utterly im-

possible to estimate the cost of performing any given service or to estimate in advance the cost of performing the aggregate service rendered by a railway company. Hence, the proposition that rates should be fixed on the basis of cost of service, plus a reasonable profit, is wholly impracticable. Moreover, no shipper's satisfaction or dissatisfaction with the rate charged him has any relation whatever to the aggregate income or profits of the company, and it can have no relation to the profits upon the particular service performed for him, because those profits cannot be ascertained.

Mr. Bacon is likewise purely theoretical in his arbitrary assumption that rates are paid by consumers except in case of agricultural products, where they are paid by producers, and that they are not paid by the middle men. The obvious truth is that the distribution of both the cost and the profits of industrial and mercantile activity is affected by so many factors that it is impossible to lay down any rule on the subject. I understand that several years ago the rates on milk from a considerable section to New York City were very materially reduced, but that thereafter the dairymen got no more for their milk and the consumers paid no less than before, *i. e.*, the middle men absorbed the reduction.

Mr. Bacon simply adds confusion to the discussion by saying that the rate-making power is in effect a tax-levying power. A railroad rate is not a tax, differs from a tax in many more ways than it resembles a tax, and cannot possibly be regulated according to principles of taxation.

The simple, practical truth, fully recognized by the railroad companies, is that the railway business is a business affected with a public use just as is a warehouse business, and is therefore subject to governmental regulation to prevent unjust discriminations and extortions, and the question of course is what evils exist in these respects and what are reasonable and proper method of remedying them. I am not aware that any of the arguments by Mr. Bacon, or any of those co-operating with him can be reduced to this practical plane.

Mr. Bacon's implication that the Inter-State Commerce Commission was designed as a tribunal for affording summary relief is at variance with the report of the Senate Select Committee of 1888, from which he quotes, as that report distinctly indicates that the Commission was simply designed as an auxiliary tribunal to aid the shippers and to aid the courts, and was not intended to have any independent power whatever or to do anything more than obtain information and set in motion the processes of the courts. That report shows, moreover, in the plainest possible way, that the Commission was not designed to have any rate making power.

Mr. Bacon in effect alleges that the power of the Commission to make rates was not questioned until 1897, when the Supreme Court decided that the Commission did not have that power. In 1887 the Commission itself announced that it had no power to fix rates generally. In 1889 and 1890 Judge Jackson, holding the United States Circuit Court, indicated that the Inter-State Commerce Act did not contemplate the making of rates. In 1891 the Lehigh Valley Railroad Company denied in court the Commission's authority to make rates. In 1893 the Commission itself stated in one of its decisions that some carriers continued to deny its power to fix rates upon complaint. In 1893 the Louisville & Nashville Railroad Company challenged the Commission's power to make rates in the first case affecting that company in which the Commission assumed to exercise that power. In 1895 the Commission in its annual report asserted that its power to make rates had been denied, that this dissenting view was not unsupported by argument, and asked Congress to confer the rate-making power upon it. In 1896 the Supreme Court decided in the Social Circle case that the Commission had no power to make rates. That Court's decision in 1897 in the "maximum rate" case was simply an approval of its decision to the same effect the year before.

Mr. Bacon's statement that the exercise by the Commission of the rate-making power for the first ten years of its existence produced the most satisfactory conditions in transportation affairs that have ever existed in the history of the railroad service of the country, is not supported by, but is inconsistent with, the facts. The principal evils existing now and in the past have been those incident to secret concessions in rates. There is nothing to indicate that these same evils did not exist during the first ten years of the life of the Inter-State Commerce Act to the same extent as at present, if not

to a greater extent. There has been a steady downward tendency in rates which was in no way arrested by the decision in the maximum rate case. Much stress has been laid upon certain increases in rates by changes in classification about two years ago, but though numerous complaints were filed with the Inter-State Commerce Commission, and though it has the undoubted authority under the present law to declare those increases unreasonable, and to take steps to prevent their continuance, the Commission has not in a single instance declared any of those increases to be unreasonable. Certainly complaints as to unjust discriminations between localities are no more numerous or serious than in the past.

Mr. Bacon's statement that the Corliss bill does not contemplate empowering the Commission to issue a schedule of rates is incorrect. In the Cincinnati and Chicago freight bureau cases the Commission undertook to exercise precisely the power conferred upon it by the Corliss bill, and in those cases it in effect prescribed a schedule of rates on upwards of two thousand articles from Cincinnati and Chicago to practically all points in the Southern States. This is a practical illustration, not merely of the authority conferred by the bill, but of the extensive use the Commission will make of it.

Mr. Bacon's reference to the average delay of four years in enforcing the Commission's orders under the present procedure is misleading. According to the present procedure it is the duty of the Circuit Court to afford a speedy hearing of the proceedings instituted by the Commission or others for the enforcement of the Commission's orders, and to enforce all lawful orders of the Commission. No appeal taken by the carrier from a decision of a Circuit Court enforcing an order of the Commission can suspend the enforcement of that order pending the appeal, unless the Circuit Court affirmatively permits such suspension. The only delay, therefore, there need ever be in the enforcement of a lawful order of the Commission is the time which it takes for a Circuit Court to render a decision upon it. Of course, if the Circuit Court, upon a consideration of all the circumstances of the case, believes it will be more just to suspend the enforcement of the order pending an appeal, it is obviously proper that the order should be suspended.

Moreover, an examination of the numerous cases which the Commission has taken into the courts will show that only in one out of all of those cases, probably fifteen in number, was the Commission finally sustained by the Court. The fact is, therefore, that practically all the Commission's orders which it attempted to enforce in court turned out to be unlawful and were never enforced at any time. The duration of the litigation over these unlawful orders, therefore, throws no light on the time it would take to secure enforcement of the Commission's lawful orders. The fact is that the Commission's lawful orders are almost without exception promptly complied with by the carriers without the necessity of going into court at all.

Mr. Bacon states that as a matter of fact no ruling made by the Commission during the ten years when it was its practice to prescribe the rate to be substituted for one found to be wrong has ever been set aside by the courts on the ground of its being inequitable or unreasonable. If by this he means to imply that the courts have always approved of the reasonableness and propriety of the Commission's orders, his statement is altogether misleading. Most of the cases involving orders of the Commission have, with greater or less emphasis, pointed out that the orders were inherently unreasonable and improper, aside from the question of the Commission's power to make the orders. See especially the following cases: *K. & I. Bridge Co. vs. L. & N. RR. Co.*, 37 Fed. 567; *I. C. C. vs. B. & O. RR. Co.*, 45 Fed. 37, 145 U. S.; *I. C. C. vs. D. L. & W. RR. Co.*, 64 Fed. 724; *I. C. C. vs. Ala. Mid. Ry. Co.*, 69 Fed. 227, 74 Fed. 715; *I. C. C. vs. L. & N. RR. Co.*, 73 Fed. 409; *I. C. C. vs. Lehigh Valley RR. Co.*, 74 Fed. 784; *I. C. C. vs. W. & A. RR. Co.*, 88 Fed. 186, 93 Fed. 83, affirmed by Supreme Court; *I. C. C. vs. C. B. & Q. RR. Co.*, 98 Fed. 173, 103 Fed. 249, just affirmed by Supreme Court.

Mr. Bacon's assumption that investors have ample protection in the power of the courts to set aside rates fixed by the Commission, if too low, is unwarranted. It is clear that the courts would not be disposed to exercise any control in the premises, even if they had it, except in cases where the Commission had been guilty of a palpable abuse of power and had fixed rates which practically amounted to confiscation. Thus,

for practical purposes, virtually the entire margin of profit would be subjected to the absolute discretion of the Commission, a tribunal not fitted either by experience or temperament to make rates, and wholly incapable of coping with the almost infinite factors and details which would be involved.

Mr. Baker assumes that the rate-making power assumed by the Corliss bill would be of a very limited character, and that there is at present no substantial control over railroad rates. There is now adequate power and reasonable procedure for correcting any rates which are unreasonably high or unjustly discriminating. Under the Corliss bill the Commission would virtually become traffic manager of every railroad in the country to whatever extent it might choose to assume that position, and there would be far less judicial restraint upon the acts of the Commission than there now is upon the acts of the railroad companies, for the restraint upon the railroads is adequate and the restraint upon the Commission would not be.

Yours truly, B. B.

### RAILROAD GROSS EARNINGS FOR MAY.

There is nothing new to record concerning the gross earnings of United States railroads. As for so long past, the returns are encouraging in the extreme. In face of a smaller grain movement and a smaller cotton movement, the totals keep steadily increasing. A few roads lying in the section where the crop shortage last season was most pronounced, and where the carriers are more exclusively dependent upon the agricultural yield than elsewhere, have fallen somewhat behind in their earnings as compared with a year ago; but speaking of the railroad system of the country as a whole, continued improvement in receipts is still the most conspicuous feature.

The compilations which we present to-day cover the month of May. They embrace the results of 84 roads operating 91,858 miles of line. On these roads there is a gain in earnings over the same month last year in the sum of \$4,619,227. The length of road at 91,855 miles compares with 90,262 miles in the previous year. Hence we have an increase in revenues of 9.18 per cent, with an increase of only 1.76 per cent in mileage. The May statements of earnings have been strikingly good for several successive years, making the further expansion in receipts the present year the more significant and important. Thus this year's improvement of \$4,619,227, or 9.18 per cent, follows an increase of \$5,236,185, or 10.04 per cent in May 1901, which in turn followed an increase of \$4,934,647, or 10.30 per cent, in 1900, and this in turn succeeded \$2,708,016 increase in May 1899 over 1898, which latter had itself recorded \$5,648,580 gain over 1897. In the following we show the May figures back to 1893.

	Mileage.		Gross Earnings.		Increase or Decrease.

NOTE.—We do not include the Mexican roads in any of the years.

Of course the continued activity of general trade in the United States accounts for these uninterruptedly favorable reports of earnings. The prosperity of all classes with the large consuming capacity of the population resulting from that cause adds on the one hand to the volume of the freight traffic and on the other hand stimulates travel over the railroads, while in addition railroad rates are well maintained at fairly good figures. In one part of the country there was an adverse feature which must have had considerable influence in reducing the revenues of the roads directly affected. We refer to the strike of the miners in the anthracite region. This strike began May 12 and lasted throughout the month. Our present statement, however, does not include returns from any of the anthracite roads, none of which furnishes early preliminary figures. It is hence likely that when the statements of these roads are received later in the month, the favorable result now disclosed may to some extent be modified.

The grain movement was notably small. A few typical illustrations will serve to indicate the situation in that regard. Of wheat the receipts at the Western primary markets for the five weeks ending May 31 were only 7,872,789 bushels, against 12,245,810 bushels in the same five weeks of 1901; of corn the deliveries were only 8,681,898 bushels, as against 19,723,501 bushels; of oats 13,281,540 bushels against 17,249,355 bushels; in the case of barley the receipts ran about  $\frac{1}{2}$  million bushels larger than last year, but taking wheat, corn, oats, barley and rye together, we get a total of receipts for the five weeks the present year of only 31,535,123 bushels, as against 50,732,773 bushels. The loss, therefore, was over 19 million bushels, representing, say, roughly, half a million tons of freight. The following gives the details of the grain movement in the usual form. It will be observed that even the wheat receipts at Minneapolis and Duluth were smaller than last year notwithstanding that the spring-wheat crop of 1901 ran much ahead of that of 1900. Because of this larger wheat yield it is to be presumed that the railroads in that part of the country had an increased wheat traffic, even though the shipments to the points mentioned fell below a year ago.

At Chicago, which is the largest receiving port, the shrinkage was naturally most pronounced. Taking the figures at that point for the even month we find that the receipts the present year in May were only 10,448,127 bushels, against 22,829,676 bushels in 1901. As showing how continuous has been the shrinkage throughout the current year it is interesting to note that the grain receipts at Chicago for the five months ending with May 31 were only a trifle over 48 million bushels in 1902, as against 101½ million bushels in the five months of 1901. There was also some falling off at Chicago in the deliveries of live hogs in May, these having aggregated only 675,826 head in 1902, against 737,127 in 1901.

On the separate roads there are some gains for very large amounts. The most conspicuous of these come from the transcontinental lines on the North, the Great Northern system reporting \$609,718 increase, the Canadian Pacific \$549,153 increase and the Northern Pacific \$415,237 increase. But in other parts of the country the results are only slightly less gratifying. Thus the Illinois Central in the Middle West reports \$266,362 gain, the New York Central in the East \$179,747, the Southern Railway in the South \$264,377, the Louisville & Nashville \$213,247, the Norfolk & Western \$283,466 and the Chesapeake & Ohio \$131,225. Even in the Southwest, where some of the crops last year were almost a complete failure, we have such additions to last year's total as \$108,825

by the St. Louis & San Francisco; \$97,820 by the Missouri Pacific; \$85,897 by the Missouri Kansas & Texas, etc. The Texas & Pacific is one of the roads in the Southwest which sustained a considerable shrinkage, it reporting a decrease of \$85,485. But it and the Chicago Great Western in the Northwestern section, which sustained a loss of \$38,606, are the only two roads having losses for as much as \$30,000 or over. The decreases of all kind, large or small, number 11 out of the 84 roads reporting. In the following we show all changes in excess of \$30,000, whether increases or decreases.

\* Three weeks of the month only.

To complete our analysis we present the following six-year comparisons of the earnings of all leading roads arranged in groups. It will be noticed that in the Southwestern group the total runs only slightly larger than in 1901, and that the Trunk Line group (which also we must suppose suffered seriously from the shrinkage in the movement of agricultural products) likewise shows a relatively small addition. In the case of the other groups, however, and particularly of the Northwestern and North Pacific group, the further expansion in earnings in 1902 has been very large.

#### EARNINGS OF NORTHWESTERN AND NORTH PACIFIC GROUP.

May.	1902.	1901.	1900.	1899.	1898.	1897.

#### ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S

—The public sales of bank stocks this week aggregate 102 shares and were all made at auction. The transactions in trust company stocks reach a total of 58 shares. Stock of the West Side Bank, of which there had been no sale since November, 1899, when the price was 400, was sold to the extent of 20 shares at 500-524. The first public sale of stock of the new Eastern Trust Co. was made this week at 212½. In the "curb" market the sales included National City Bank rights at 270, Corn Exchange Bank rights at 26 to 26½, International Banking Corporation stock at 200 and Eastern Trust Co. stock at 215 to 217.

—The Fourteenth Street Bank of this city is now located in its handsome new banking rooms on the corner of Fifth Avenue. The business of this institution has been steadily advancing, as can be seen by comparing the new statement just issued with that of June 3 1901. Deposits are now \$2,969,653, while in 1901 they footed up only \$1,728,349. Surplus and profits at the same time increased from \$72,876 to \$93,585, while total resources have risen from \$1,901,374 to \$3,163,349. The President, Mr. R. Ross Appleton, was formerly Collector of Taxes for the City of Brooklyn. Associated with him in an official capacity are George F. Vail and John F. Carroll, Vice-Presidents; Irving C. Gaylord, Cashier, and Louis V. Ennis, Assistant Cashier.

—It was reported from Chicago early in the week that a plan had been devised by the North American Trust Company of New York to form—through the American Bankers' Corporation which, it was said, had been chartered in New Jersey with a capital of \$5,000,000 and with provision for a surplus of \$45,000,000—a chain of banks throughout the country through purchase of existing institutions. The report was promptly denied by Oakleigh Thorne, President of the North American Trust Company, who said that his company had nothing to do with the scheme. Upon inquiry it was ascertained that a concern called the American Bankers' Corporation had been chartered at Trenton, New Jersey, July 12 1901, with an authorized capital of \$100,000 and a paid-up capital of \$1,000. It further appeared in a statement by Silas D. Scudder, Treasurer of the North American Trust Company, that before he became connected with the trust company he devised the plan above noted, and secured a charter for the purpose of being prepared to organize an institution of this character should there be a favorable opportunity. The plan was embodied

by Mr. Scudder in a private letter to a friend in Chicago, and through this letter the scheme became public. The North American Trust Company, it would appear from the above, is in no way interested in the proposition either directly or indirectly.

—It was stated on Thursday by James G. Cannon, Vice-President of the Fourth National Bank, that at the request of the one hundred and three banks and institutions throughout the country which have loans upon Rutland preferred and St. Lawrence & Adirondack stocks as collateral, he, individually, had undertaken to bring about an adjustment of these claims. The notes of Offenbach & Moore and of Arthur L. Meyer, which are secured by this collateral, and also the collateral itself, are to be placed in the hands of Mr. Cannon with the understanding that arrangements will be made to pay the loans at maturity. He has already received considerable amounts of both notes and collateral.

It is announced that James G. Cannon, Vice-President of the Fourth National Bank; William H. Porter, Vice-President of the Chemical National Bank, and Samuel Woolverton, President of the Gallatin National Bank, have consented, at the request of holders of stock of the Dominion Securities Co., to make an investigation into its condition and to formulate plans for the reorganization or readjustment of the company's business. Stockholders are invited to deposit their stock with the Metropolitan Trust Co. under the terms of a preliminary agreement, copies of which may be obtained at the office of the Trust Company.

—Baron Georg von Bleichroder, a special partner in the firm of Ladenburg, Thalmann & Co., and also a member of the banking house of S. Bleichroder of Berlin, died on Wednesday, at his residence in Cologne, as the result of an accident.

—Lawrence O. Murray who, since the organization of the Trust Company of America July 1 1899, has been the Trust Officer of that corporation, has resigned to take the position of Trust Officer and Secretary of the newly-organized Central Trust Company of Illinois at Chicago. The directors of the Trust Company of America, on the occasion of his resignation, passed resolutions expressive of their high appreciation of his services, and the President, Ashbel P. Fitch, endorsed these resolutions with his expression of regret at parting with him. Mr. Murray was for two years chief of the organization division in the office of the Comptroller of the Currency under Mr. Eckels and he was Deputy Comptroller under Mr. Dawes.

—The subscribers to the stock of the Empire State Trust Co. of New York, capital and surplus of \$500,000 each, have selected as directors Arthur Brown, J. R. Walsh, C. M. Higgins, Leroy W. Baldwin, D. D. Parmly, Edgar Van Etten, Robert E. Jennings, Ira L. Bamberger, Thomas N. McCauley, F. K. Curtis, William E. Nichols, O. G. Villard, Henry P. Talmadge, Clement A. Griscom Jr., Silas W. Burt, Adolph O'brig, Milton J. Warner, Walter T. Rosen, R. M. Parmly, Amos D. Carver, Manuel Lopez, H. H. Harrison, J. C. Kelley, A. E. Wallace and J. F. Talcott. The laws of the State, requiring four weeks' advertising of the intention to organize the company, will have been complied with by the end of this week. A call will then be issued for the payment of stock subscriptions, and the organization will afterward be completed as fast as compliance with the legal formalities will permit. It is stated that the stock has been over-subscribed 75 per cent.

—The negotiations by the Corn Exchange Bank for control of the Union Square Bank, which, as noted in this department last week, were then in progress, have been completed, and the Union Square will be made a branch, the thirteenth, of the Corn Exchange.

—The Van Norden Trust Co. has opened its branch at 321 Grand Street.

—The Williamsburg Trust Company of Brooklyn has increased its semi-annual dividend to 4 per cent, payable July 1. The first dividend, 3 per cent, was paid Jan. 2, 1901, the same amount being paid on June 29, 1901, and Jan. 2, 1902.

—Preparatory to consolidating with the Second National Bank and the State Banking Company of Newark (under the name of the Union National Bank), the stockholders of the German National Bank of Newark voted this week to increase the capital from \$200,000 to \$1,500,000. The final step of changing the name of the German National to the Union

National was taken on Thursday. The officers were also elected on that day. Mr. William Sheerer was made President; Dr. Leslie D. Ward, First Vice-President; Uzal H. McCarter (President of the Fidelity Trust Company of Newark), Second Vice-President; Archibald W. Conklin, Cashier; Albert Haefeli and Erwin D. Farnsworth, Assistant Cashiers. The new institution begins business on Monday. The existence of the Second National Bank terminates today, the State Banking Company continuing several weeks longer. Fidelity and Prudential interests are largely interested in the project.

—The absorption of the Union Bank of Buffalo by the German Bank of that city was effected on the 3d inst. The absorbed bank had a capital of \$200,000. In July last, at the time of the closing of the Niagara Bank of Buffalo, the Union experienced a run which, however, was met through the support of the Clearing House. The German Bank, it will be recalled, took over the paper and obligations of the Metropolitan Bank of Buffalo, when, in August of last year, that bank went into voluntary liquidation. Plans for the reorganization of the Union to relieve it of its large real estate holdings had been under way for some time, but had never reached any definite shape. Then negotiations with the German Bank were opened, with the result above.

—The life of the Schenectady Bank of Schenectady, N. Y., capital \$100,000, ended on Saturday last, when the institution became merged in the new Schenectady Trust Company. The latter opened its doors on Monday of this week. It has a capital of \$200,000 and surplus of \$100,000.

—The Boston News Bureau states that the present management of the Massachusetts National Bank of Boston has secured absolute control of the bank through the purchase of 4,200 shares from the Carver-Sinclair estate at \$129 per share.

—Mr. A. B. West, who formerly held the position of Cashier of the Chicopee National Bank of Springfield, Mass., has been elected President to succeed the late A. J. McIntosh. Mr. Edward Pynchon has become Cashier.

—The settlement of the affairs of the failed Pynchon National Bank of Springfield, Mass., is now nearing completion. The directors' plan for the taking up of the \$577,000 bonds of the American Writing Paper Company by the stockholders of the bank has, it is announced, been agreed on. These will be exchanged on the basis of three \$1,000 bonds at 95 for every 10 shares (par \$100) of bank stock. The stockholders have been asked to take up their shares of the securities by the 14th—to-day. Receiver Pepper expects with the proceeds to be enabled to pay a dividend to depositors of between 60 and 70 per cent.

—The directors of the Stamford Trust Company of Stamford, Conn., on June 2d voted to increase the capital from \$100,000 to \$200,000. This will be accomplished by the issuance of 1,000 shares (par \$100) to be sold to the shareholders at \$125 each. Subscriptions are payable on or before August 1, 1902, when the new stock will be ready for delivery. The company's deposits are very close to the two-million-dollar mark, reaching on April 30 last \$1,893,459. It is officered by John A. Brown, President; Walton Ferguson, Vice-President, and Walter D. Daskam, Treasurer.

—The control of a majority of the shares of the German-American Title & Trust Company of Philadelphia by a syndicate of which Mr. William Diston was the head resulted in the reorganization of the institution on Thursday. Mr. Diston was elected to the Presidency, succeeding Mr. Samuel Biddle, who has become a Vice-President. Mr. Lewis R. Dick, of the Tacony Savings Fund, Safe Deposit, Title & Trust Company, was also made a Vice-President. Mr. Frederick H. Hahn was re-elected Secretary and Treasurer and Mr. George E. Schlegelmilch appointed title and trust officer.

—The Comptroller has approved the application to organize of the Mellon National Bank of Pittsburgh, previously mentioned in these columns.

—The board of directors of the Colonial Trust Company of Pittsburgh has been increased from 10 to 14 members. The additions are: Mr. James D. Callery, Vice-President of the Philadelphia Company of Pittsburgh, and formerly President of the City Trust Company of Pittsburgh, recently acquired by the Colonial Trust; Mr. John A. Bell of the Freehold

Bank of Pittsburgh, also taken over by the Colonial; Mr. John C. Reilly (also of the City Trust), and Mr. Charles L. Taylor.

—An offer of \$140 per share has been made to the Mechanics' National Bank of Pittsburgh (capital \$500,000) for its stock by the First National Bank of Pittsburgh. The directors of the Mechanics' have sent their stockholders a circular recommending the acceptance, and saying that they personally have agreed to the offer, provided 6,700 shares shall be delivered at this price. The shares are of a par value of \$50 each.

—The Fort Pitt National Bank of Pittsburgh will, it is stated, increase its capital from \$200,000 to \$1,500,000. A portion of the new stock is for the purpose of taking over two other Pittsburgh banks—the Fourth National, capital \$300,000 and deposits of \$443,980, and the Fifth National, capital \$100,000 and deposits of \$748,291.

—The reorganization of the Erie Dime Savings & Trust Company of Erie, Pa., under the name of the Erie Savings Bank & Trust Company, will, it is reported, be completed in a few days. Pittsburgh capital is largely interested in the new institution, the stockholders including Mr. James H. Willock, President of the Second National Bank of Pittsburgh; Mr. W. H. Graham, President of the Mercantile Trust Company of Pittsburgh; J. D. Fraser, Cashier of the Monongahela National Bank of Pittsburgh; J. Guy McCandless and Stephen Stone of Pittsburgh. The company has been capitalized at \$500,000, with a surplus of \$250,000.

—When the steamer "City of Mackinac" left Detroit on Wednesday afternoon, June 4, over 260 bankers were registered to participate in the convention of the Michigan Bankers' Association, which was held on board from June 4 to 7, while steaming to Mackinac Island, Saulte Ste. Marie and back to Detroit. A thoroughly enjoyable time was the result of this somewhat unusual device for an annual meeting. No business was transacted until Thursday morning, when Mr. William Livingstone, President of the Dime Savings Bank of Detroit, opened the proceedings with an address of welcome. Then came the usual reports of the officers of the association. These were followed by a lengthy discussion by Mr. A. J. Frame, President of the Waukesha National Bank of Waukesha, Wis. Mr. Frame's subject was "Branch Banking and Assets Currency Means Revolution and Retrogression." Mr. James R. Branch spoke on the American Bankers' Association, of which he is Secretary. Mr. E. A. Sunderlin, Auditor of the State Savings Bank of Detroit, also contributed to the programme his paper on "The State Banking Law," arguing in favor of an amendment giving the State Commissioner of Banking the power to appoint receivers of State banks that fail. The officers who will serve the Association for the ensuing year are: President, Mr. George B. Morley, President of the Second National Bank of Saginaw. First Vice-President, Mr. William Livingstone, President of the Dime Savings Bank of Detroit; Second Vice-President, Orrin Bump, President of the Old Second National Bank of Bay City, Mich.; Treasurer, H. V. C. Hart, Cashier of the Lenawee County Savings Bank of Adrian, Mich., and Secretary (re-elected), Mr. F. E. Farnsworth, Cashier of the Union National Bank of Detroit, Mich.

—The vacancy in the presidency of the National City Bank of Grand Rapids, Mich., occasioned by the death of Mr. R. C. Luce, has been filled by the election of Mr. James R. Wylie, heretofore Cashier.

—The question of increasing the capital of the Mechanics' National Bank of St. Louis, from \$1,000,000 to \$2,000,000 will be submitted to the stockholders on June 26. The directors recommend the issuance of 10,000 new shares, par \$100, to be disposed of at not less than \$275 per share to stockholders of record June 20. This will net the sum of \$2,750,000. One-half of the purchase price is to be paid on July 15 and the remainder on October 2, 1902. The increase is deemed advisable in order to meet the requirements of the increasing business of the bank.

—The regular quarterly dividend of the Merchants' Laclede National Bank of St. Louis, Mo., heretofore  $1\frac{1}{2}$  per cent, has been increased the present quarter to 2 per cent. The bank has a capital of \$1,400,000 and deposits of over \$12,000,000.

—The banking firm of Messrs. Tootle, Lemon & Co. of St. Joseph, Mo., went into voluntary liquidation on May 31,

being succeeded on June 2 by the Tootle-Lemon National Bank. The new institution has a capital of \$200,000. Much strength is given the bank through the fact that Mr. E. H. Harriman, of New York, has acquired some of the stock. The other shareholders are Mr. John S. Lemon, Milton Tootle Jr., Mrs. Kate M. Tootle, Graham G. Lacy and W. T. Van Brunt, the latter President and General Manager of the St. Joseph Railway, Light, Heat & Power Company. The management of the bank is made up of Mr. John S. Lemon, President; Milton Tootle Jr., and Graham G. Lacy, Vice-Presidents; E. H. Zimmerman, Cashier, and W. A. Evans, Assistant Cashier.

—But one more instalment now remains to be paid by the First National Bank of Austin, Texas, in settlement of its obligation to the State. The sixth instalment of \$50,000 was paid on June 2.

—At a stockholders meeting of the new Central Trust Company of Illinois on the 9th inst., the following officials were elected: President, Charles G. Dawes; Vice-President, W. Irving Osborne; Second Vice-President, A. Uhrlaub; Trust Officer and Secretary, Lawrence O. Murray; Cashier, William R. Dawes; Assistant Cashier, Charles T. Wegner; General Counsel, Max Pam. Vice-President Osborne is a prominent corporation attorney; Vice-President Uhrlaub has been for some time Assistant Cashier of the Chicago National Bank; Secretary Murray was formerly United States Deputy Comptroller of the Currency; Cashier Dawes has for three years been Cashier of the Chicago Post Office, and Asst. Cashier Wegner was for 11 years Paying Teller of the Metropolitan National Bank. The Central Trust Company will begin business some time in July in the banking room corner of Dearborn and Monroe streets formerly occupied by the Chicago National Bank. Among the largest New York stockholders are George F. Baker, President First National Bank; Charles S. Fairchild, President New York Security & Trust Company; George W. Perkins of J. P. Morgan & Co.; Charles M. Schwab, President United States Steel Corporation; New York Security & Trust Company; James Stillman, President National City Bank; Jacob Schiff of Kuhn, Loeb & Co.; F. A. Vanderlip, Vice-President National City Bank. Among the Boston stockholders are John W. Weeks, President of Massachusetts National Bank; Alfred Hemenway, attorney, and D. G. Wing, Vice-President of the Massachusetts National Bank. Among other stockholders are F. G. Bigelow, President of the First National Bank of Milwaukee; Washington Becker, President of the Marine National Bank, Milwaukee; G. H. Russel, President State Savings Bank, Detroit; A. H. Brown of St. Louis; Leslie D. Ward of Newark, N. J.; John R. McGinley of Pittsburg.

—At the stockholders' meeting last week of the National Bank of the Republic, Chicago, the recommendation of the board of directors to increase the capital stock \$1,000,000 and the surplus \$500,000 was ratified. Of the original allotment of new stock to old shareholders at 150, about 10 per cent was withheld, at the suggestion of the bank officials, to be disposed of to outside capitalists, whose identification with the bank would greatly strengthen its position and influence. The stockholders also voted to increase the number of directors to sixteen. The old directors retained on the board are: Mr. Frank O. Lowden, Louis F. Swift, Henry Siegel, John A. Lynch, J. B. Greenhut, E. B. Strong and W. T. Fenton. The new names are: Mr. Rollin A. Keyes, J. V. Farwell Jr., Robert Mather, Second Vice-President Chicago Rock Island & Pacific; Charles R. Crane, Herman B. Butler, H. W. Heinrichs, John R. Morron, F. E. Vogel and C. H. Conover. The dividend rate of the National Bank of the Republic was recently advanced from 5 to 6 per cent.

—The stockholders of the Colonial Trust Company of Chicago, at their first meeting last week, chose directors, who then elected the following officers: President, H. H. Rose; Vice-President and Cashier, L. C. Rose; Assistant Cashier, A. S. Boos; Manager Bond and Mortgage Department, G. H. Coney. The President and Vice-President have for many years constituted the successful mortgage banking firm of Rose & Company in Chicago. Assistant Cashier Boose was long connected with the Merchants' Loan & Trust Company. Mr. Coney has had large experience in bonds and mortgages. The capital of the Colonial Trust is \$200,000; its surplus \$50,000. It will open for business June 16 in the bank-

ing room corner of La Salle and Washington streets just vacated by the Western State Bank.

—By vote of its directors \$100,000 has been transferred from the undivided profits of the State Bank of Chicago to the surplus account. By reason of the rapid increase in the State Bank's business its stock is now quoted at 265 to 275. A  $1\frac{1}{2}$  per cent quarterly dividend has been declared, payable July 1.

—At a meeting on the 10th inst. of the directors of the Garden City Banking & Trust Company of Chicago, a vote was passed recommending the increase of the bank's capital from \$500,000 to \$750,000. The regular 3-per-cent semi-annual dividend was declared.

—About forty members of the executive board of the Illinois Bankers' Association, at a banquet in the Grand Pacific Hotel last Tuesday evening, accepted the invitation tendered by the Peoria Clearing House to hold their next general meeting in that city in September.

—J. S. Pomeroy, who has for 10 years been connected officially with the First National Bank of Winona, Minn., has been appointed Cashier of the new National Bank of North America, Chicago. This institution opens for business on Monday the 16th inst.

—A report of the proceedings at the eighty-fourth annual meeting of the Bank of Montreal will be found on pages 1235 and 1236. The report includes a balance sheet and interesting remarks by Hon. Geo. A. Drummond, the Vice-President, and Mr. E. S. Clouston, the General Manager. The business for the year shows very substantial growth, the deposits on April 30 being \$86,825,633, an increase of \$14,139,000 over the corresponding date in 1901. The surplus was increased \$1,000,000, making that account \$8,000,000, and the combined capital and surplus \$20,000,000.

—The statement of the Gansevoort Bank of this city, under the call just made for June 10 1902, shows that this State institution is now enjoying noteworthy growth. The deposits are up to \$1,804,596, surplus and profits to \$42,909 and total resources to \$2,047,505. On June 3 1901 deposits were only \$1,314,720, making a gain of nearly \$500,000 in the short space of a year. The item of surplus and profits has also nearly doubled, having been a year ago only \$21,712, against \$42,909 now. The officials are: T. Albeus Adams, President; Charles W. Morse, Vice-President; H. M. Sheire, Cashier, and H. F. Meehan, Asst. Cashier.

## Commercial and Miscellaneous News

**IMPORTS AND EXPORTS FOR THE WEEK.**—The following are the imports at New York for the week ending for dry goods June 5 and for the week ending for general merchandise June 6, also totals since beginning first week January.

## FOREIGN IMPORTS.

For week.	1902.	1901.	1900.	1899.
Dry Goods...	\$1,636,686	\$1,491,201	\$1,521,408	\$1,181,204
Gen'l mer'dise	6,991,806	11,415,989	7,769,789	7,458,787
Total.....	\$8,628,492	\$12,907,190	\$9,291,177	\$8,639,991
Since Jan. 1				
Dry Goods...	\$57,292,352	\$48,394,079	\$59,361,416	\$48,526,567
Gen'l mer'dise	190,203,246	206,899,056	196,055,263	189,987,988
Total 23 weeks	\$247,495,598	\$254,793,135	\$255,416,679	\$238,514,555

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending June 9, and from January 1 to date.

## EXPORTS FROM NEW YORK FOR THE WEEK.

	1902.	1901.	1900.	1899.
For the week.	\$10,732,865	\$11,103,761	\$11,690,912	\$9,637,557
Prev. reported	207,111,096	222,759,805	225,430,448	194,901,474
Total 23 weeks	\$217,843,961	\$233,863,566	\$237,121,360	\$204,539,031

**NOTE.**—As the figures of exports as reported by the New York Custom House from week to week frequently show divergence from the monthly totals, also compiled by the Custom House, we shall from time to time adjust the totals by adding to or deducting from the amount "previously reported."

The following table shows the exports and imports of specie at the port of New York for the week ending June 7 and since Jan. 1, 1902, and for the corresponding periods in 1901 and 1900.

## EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

Banking and Financial.

BANK OF MONTREAL.

ANNUAL GENERAL MEETING HELD SECOND OF JUNE, 1902.

(From the Montreal Gazette, June 8rd, 1902.)

The eighty-fourth annual meeting of the shareholders of the Bank of Montreal was held in the Board Room of the institution at 1 o'clock yesterday.

There were present: Hon. George A. Drummond, Sir William C. Macdonald, Messrs. R. B. Angus, A. F. Gault, E. B. Greenshields, Alex. T. Paterson, R. G. Reid, James Ross, Hon James O'Brien, G. F. C. Smith, Donald Macmaster, K. C.; F. E. Meredith, K. C.; H. Dobell, George R. Hooper, Henry Spragge, Thomas Irving, B. A. Boas, George Filer, C. M. Holt, C. J. Fleet, G. A. Greene, M. S. Lonergan, A. E. Ogilvie, Bartlett McLennan, M. S. Foley, A. T. Taylor, W. R. Miller, J. B. Learmont, W. J. Morrice, Alex. McArthur, Huntley Drummond, W. H. Evans and John Morrison.

On the motion of Mr. John Morrison, Hon. George A. Drummond, Vice-President, was unanimously voted to, the Chair, in the absence of the President, the Rt. Hon. Lord Strathcona and Mount Royal.

On the motion of Mr. B. A. Boas, seconded by Mr. H. Dobell, it was agreed: "That the following gentlemen be appointed to act as scrutineers: Messrs. G. F. C. Smith and F. E. Meredith, K.C., and that Mr. James Aird be the Secretary of the meeting.

DIRECTORS' REPORT.

The report of the Directors to the Shareholders at their 84th annual general meeting was then read by Mr. E. S. Clouston, General Manager, as follows:

The Directors have pleasure in presenting the 84th annual report, showing the result of the Bank's business of the year ended 30th April, 1902.

Balance of Profit and Loss Account 30th April, 1901.....	\$764,703 19
Profits for the year ended 30th April, 1902, after deducting charges of management and making full provision for all bad and doubtful debts.....	1,601,152 90
	<u>\$2,365,856 09</u>
Dividend, 5 per cent, paid 1st December, 1901..	\$600,000
Dividend, 5 per cent, payable 2d June, 1902....	600,000
	<u>1,200,000 00</u>
Amount credited to Rest Account.....	1,000,000 00
	<u>\$165,856 09</u>

Since the last annual meeting a branch of the Bank has been opened at Glace Bay, N. S., and suitable premises for its occupation are now being erected at that point.

The premises which were announced at the last annual meeting as in course of erection at Point St. Charles, are now completed, and occupied by the Bank.

The Head Office and all the branches have passed through the usual inspection during the year.

STRATHCONA AND MOUNT ROYAL,  
President.

BANK OF MONTREAL, Head Office, 2nd June, 1902.

GENERAL STATEMENT, 30TH APRIL, 1902.

LIABILITIES.		ASSETS.

			<u>\$114,670,653 26</u>

BANK OF MONTREAL, MONTREAL, 30th April, 1902.

E. S. CLOUSTON, General Manager.

THE GENERAL MANAGER.

Mr. Clouston then said:

There is nothing of unusual interest calling for comment in the statement we lay before you this year. It shows a steady increase in our business and a corresponding increase in our profits. The following are the principal changes as compared with last year. Our circulation has increased \$525,000 and the deposits \$14,139,000, making our total deposits here and in other countries \$86,825,633; quite a respectable amount, but still not large as compared to the deposits of banks with smaller capital in Great Britain and the United States. Our readily available assets have increased about \$10,000,000, and our loans and discounts \$4,360,000. The overdue debts, secured and unsecured, are \$77,000 greater, but we believe that we have amply provided for any possible loss. The profits show an increase of \$63,630, after paying all charges of management, all additions and repairs to our bank premises, and making provision for bad and doubtful debts. I think you will agree with me that the statement is a fairly satisfactory one.

Nor have I anything of importance to say on matters outside our own statement. Generally speaking, the past year has been a prosperous one for Canada, and so far the hand of the commercial barometer still stands at "fair." The revenues of the country are large; railway earnings are steadily increasing; farmers are prosperous; the outlook for lumber is improving, and the tide of immigration has set in with

greater volume, ensuring to Western Canada, and indeed to the whole country, more rapid progress in population and material prosperity. The natural resources of the country are being steadily developed; the output of coal is increasing, and it looks as if we were on the eve of important results in the iron and steel industry. There are indications also that the recent consolidation of Atlantic steamship lines by an American syndicate will compel Canada, in self-defence, to take up the question of a fast Atlantic service, and if we wish to secure immigration, retain the traffic properly belonging to our own ports, and safeguard the interests of our commerce, we must see that the service, both passenger and freight, is second to none in speed and equipment. There have been exceptions, and some industries have not shared in the general prosperity, but these can in most cases be traced to undue competition and bad management. Mining in British Columbia is still highly unsatisfactory, and it may be some time yet before it recovers from the collapse of the last two or three years.

The Stock Exchanges of Canada have shown an activity unexampled in the history of the country, and though speculation has been rife, there has been a certain foundation for the advance in the quotations of securities, and it is not entirely the wild, reckless state of affairs that foreign critics profess to believe exists here. Still, there is danger of speculation being carried beyond legitimate bounds, and we have probably reached a point where investors and lenders would do well to look more closely into the intrinsic value of the securities they purchase, or accept as collaterals.

If there are any questions relative to the business of the bank on which the shareholders wish explanation, I shall be pleased to answer them.

#### THE CHAIRMAN'S ADDRESS.

Hon. George A. Drummond then said:

GENTLEMEN:—The statements presented by Mr. Clouston will, no doubt, be received by you with satisfaction, showing as they do the prosperity and progress of the bank.

That it has made substantial progress you may gather from the figures periodically submitted to you.

In 1873, when the capital was raised to its present amount of \$12,000,000, and the rest stood at \$5,000,000, the assets were about \$35,250,000.

In 1880 they were nearly 45 millions (\$44,661,681).

In 1890 they were over 46 millions (\$46,166,448).

In 1900 they were nearly 79 millions (\$78,852,197).

And in the present year over 100 millions (\$114,000,000).

The keen competition among banks necessitates a greatly enlarged business to maintain dividends, and the public gets its financial business done much more cheaply now than formerly.

The increase of our rest by one million of dollars will, no doubt, commend itself to your judgment as a prudent step, and should enhance the value of our property.

The large office building, now in progress, was rendered necessary by the inconvenient overcrowding of our present premises. The addition is on a considerable scale, and will, it is hoped, suffice for the wants of the bank for years to come. Large as it is, however, it is not more in advance of our present wants than our present structure was when erected to the conditions then existing.

The beautiful facade of our present building will not be impaired; but the interior will be remodeled to adjust it to the new premises and make it fireproof.

The marked increase in the general banking business of the Dominion is an evidence of the prosperity of the country. Since April, 1897, the total assets of all the banks have increased from \$243,400,000 to \$448,300,000; the deposits alone having risen from \$196,700,000 in the former year to \$339,000,000, and the note circulation from \$30,800,000 to \$50,700,000.

The Bank of Montreal has fully shared in the great improvement in business above noted, the general increase in the public deposits in the last five years being equal to 72½ per cent, and that of our bank alone considerably exceeds 100 per cent.

The conservative course of your directors in continuing to strengthen the resources of the Bank will, I am sure, meet with your approval, for while the general prosperity of the country shows no sign of abatement, it seems an undeniable proposition to say that bad times may be expected sooner or later.

In commercial matters generally nothing is so striking as the growth of the foreign commerce of the Dominion. In the first nine months of the current fiscal year, that is to March 31st, the aggregate foreign trade has reached \$302,500,000, as compared with \$282,300,000 in the corresponding period of the preceding year, while only five years ago our foreign commerce for the entire period of twelve months barely reached \$249,000,000, a figure which, in the fiscal year ending this month, will probably be exceeded by more than 50 per cent. This expansion covers both exports and imports.

The most gratifying feature of the trade returns is the increased sales abroad of Canadian products, which from 1st July to 1st April amounted in value to \$144,547,000, and for the full period of twelve months will probably exceed \$190,000,000; whereas six years ago the value of our shipments was only \$110,000,000.

Products of the soil still constitute much the largest portion of this trade, but it is satisfactory to note that in manufactures the increase is about 30 per cent, or as \$12,000,000 to \$9,800,000; and I need scarcely refer to the enormous activity in the production of iron, steel, nickel, etc., to say nothing of the extraction of the precious metals, which for the present is under a cloud.

Meanwhile the carrying trade of the country has been in an unprecedented state of activity and prosperity; the great railways are spending liberally on track improvements and rolling stock to meet the demands on them, and new trunk lines are under construction.

Immigration is increasing rapidly, and will have a favorable influence in every direction. Lands, especially in the Northwest, which have for years been in little demand, have latterly been actively sought for and taken up.

Turning to general conditions outside of the Dominion, the immense aggregations of capital in the hands of corporations and individuals is bringing about economic results of the most startling character. The control of railway lines, the absorption of ocean transports, the consolidation of industries, all fly directly in the face of economic theories based on unlimited competition, and he would be bold who attempted to predict the outcome.

No fewer than four new banks were incorporated during the present session of Parliament.

Questions of vital importance to ourselves and the Empire are to be considered by the Imperial Government and the premiers of the colonies, at the conference to be held in London; its decisions will be watched with absorbing interest and involve momentous possibilities.

The present moment seems to be most favorable for securing an independent line of steamships to a Canadian port. They should in speed and equipment be equal to any afloat, and the prospects of financial success for the undertaking were never, in my opinion, so bright as now, while its realization would be of enormous benefit to this country.

It is with the highest satisfaction and gratitude that we receive today the news of peace in South Africa.

Compared with the proud satisfaction we feel at having had a share in bringing the harassing and protracted struggle to a successful termination, all the sacrifices made by the country are trivial. But the gratitude we owe to those who fought and bled for us will never, I trust, be forgotten. The glorious record of courage and endurance made by her sons has lifted Canada into a higher plane of national life.

The auspicious visit last autumn to this country of Their Royal Highnesses the Duke and Duchess of Cornwall and York was the occasion of the unanimous display of loyal welcome from one end of the Dominion to the other, and was happily marked by the absence of misadventure of any kind.

The approaching coronation of our Gracious Sovereign will, we trust, be succeeded by a long and prosperous reign.

I move that the report of the Directors be adopted and printed for distribution among the shareholders.

#### THE REPORT ADOPTED.

Mr. A. T. Paterson, in seconding the motion for the adoption of the report, said that it was quite unnecessary to add anything to the remarks which had fallen from the Chair, and to the statement made by the General Manager, beyond stating that he entirely concurred in them, and endorsed them. There was one thing, however, to which he might refer, and that was that on that day he had come of age, not personally, but as a director of the Bank, and he wished to take the opportunity of thanking the shareholders for their long-continued confidence in him. He also wished to say that his many years' experience as a director enabled him most thoroughly to endorse the statements made as to the improvement in the position of the Bank.

After a few remarks by Mr. John Morrison, the motion for the adoption of the report was unanimously agreed to.

Hon. James O'Brien moved:

"That the thanks of the meeting be presented to the President, Vice-President and Directors for their attention to the interests of the bank."

This was seconded by Mr. Donald Macmaster, K. C., and having been adopted unanimously, was acknowledged by the Chairman.

Mr. E. B. Greenshields moved:—

"That the thanks of the meeting be given to the General Manager, the Inspector, the Managers and other officers of the bank, for their services during the past year."

The motion was seconded by Mr. James Ross, and the Chairman having added that he fully concurred in it, and thought it was exceedingly well deserved, it was unanimously carried, and was acknowledged by the General Manager.

Mr. George R. Hooper moved:—

"That the ballot now open for the election of Directors be kept open until 3 o'clock, unless fifteen minutes elapse without a vote being cast when it shall be closed, and until that time, and for that purpose only, this meeting be continued."

This was seconded by Mr. C. J. Fleet, and unanimously agreed to.

On the motion of Mr. John Morrison, seconded by Mr. A. F. Gault, a hearty vote of thanks was accorded to the Chairman for his conduct of the business of the meeting, and he acknowledged the same.

#### THE DIRECTORS.

The ballot resulted in the election of the following directors:

R. B. ANGUS, ESQ.,	A. T. PATERSON, ESQ.,
HON. GEORGE A. DRUMMOND,	R. G. REID, ESQ.,
A. F. GAULT, ESQ.,	JAMES ROSS, ESQ.,
E. B. GREENSHIELDS, ESQ.,	RT. HON. LORD STRATHCONA
SIR WILLIAM C. MACDONALD,	AND MOUNT ROYAL, G.C.M.G.

At a meeting of the new Board on Tuesday, the 3rd inst., The Right Hon. Lord Strathcona and Mount Royal, G. C. M. G., was re-elected President, and Hon. Geo. A. Drummond, Vice-President.

## WALL STREET, FRIDAY, JUNE 13, 1902.—5 P. M.

**The Money Market and Financial Situation.**—The security markets have continued inactive and for the most part featureless under conditions practically the same as were noted last week.

The labor situation in the anthracite coal regions remains unchanged in general feature and it still appears likely that when the strike is ended the miners will have returned to work or their places have been filled by others. In the meantime there is ample evidence of general business activity, and this promises to be augmented by abundant harvests. The money market continues easy and the demand for foreign exchange is limited.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 2 1/2 to 3 1/2 per cent. To-day's rates on call 2 1/2 to 3 per cent. Prime commercial paper quoted at 4 1/4 @ 5 per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £760,964, and the percentage of reserve to liabilities was 52.00, against 50.08 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows a decrease of 4,650,000 francs in gold and 325,000 francs in silver.

NOTE.—Returns of separate banks appear on page 1134.

**Foreign Exchange.**—The foreign exchange market has been dull on a limited demand for bills. Tone steady during early part of the week and slightly firmer toward the close.

To-day's actual rates of exchange were as follows: Bankers' sixty days' sterling, 4 84 1/2 @ 4 85; demand, 4 87 1/2 @ 4 87 1/2; cables, 4 87 1/2 @ 4 88; prime commercial, sixty days, 4 84 1/2 @

4 84 1/2; documentary commercial, sixty days, 4 84 @ 4 85 1/4; grain for payment, 4 85 @ 4 85 1/4; cotton for payment, 4 84; @ 4 84 1/4; cotton for acceptance, 4 84 1/2 @ 4 84 1/2.

Posted rates of leading bankers follow:

	June 13	Sixty Days	Demand
Prime bankers' sterling bills on London.	4 85 1/2	@ 4 86	4 88 @ 4 88 1/2
Prime commercial	4 84 1/2	@ 4 84 1/2	-----
Documentary commercial	4 84	@ 4 84 1/2	-----
Paris bankers' (Francs)	5 18 1/2	@ 5 18 1/2	5 16 1/2 @ 5 16 1/2
Amsterdam (guldens) bankers	39 1/2	@ 40	40 1/2 @ 40 1/2
Frankfort or Bremen (reichmks) bankers	94 7/8	@ 94 1/2	95 1/4 @ 95 1/4

\* Less 1/16. † Less 1/32.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 75c. discount, selling 75c. premium; Charleston, buying par, selling 1/8 premium; New Orleans, bank, \$1.00 premium; commercial, 25 @ 50c.; Chicago, 25c. premium; St. Louis, par; San Francisco, 15c. per \$100 premium.

**United States Bonds.**—Sales of Government bonds at the Board are limited to \$3,000 3s, coup., at 107 1/2; \$5,000 4s, coup., 1907, at 111, and \$10,000 4s, reg., 1925, at 136. The following are the daily closing quotations; for yearly range see third page following.

\* This is the price bid at the morning board; no sale was made.

**State and Railroad Bonds.**—Sales of State bonds at the Board are limited to \$1,000 Virginia fund. debt 2-3s at 96 1/4.

The market for railway bonds has been generally steady on a volume of business averaging about \$1,750,000, par value, per day.

**Railroad and Miscellaneous Stocks.**—The stock market has continued exceptionally dull, but the tone has improved day by day, and there has been a slight advance in many cases. The transactions on Monday were less than 174,000 shares, establishing a new low record, and for the week averaged only 275,000 shares per day. The grangers have been strong on current traffic reports and crop prospects. The anthracite coal stocks have been dull and firm on hopes of an early termination of the miners' strike. The Southwestern issues have been prominent. Chicago & Eastern Illinois made a sensational advance of nearly 15 points on a demand which brought out only a few shares. N. Y. Central, Del. & Hudson, Reading, Hocking Valley, Illinois Central and Manhattan El. show net gains of from 1 to 3 points.

With the exception of International Power, which advanced 30 points, the miscellaneous list has been generally steady and featureless.

For daily volume of business see page 1246.

The following sales have occurred this week of shares not represented in our detailed list on the pages which follow.

	June 7.	June 9.	June 10.	June 11.	June 12.	June 13.	Sales
Butterick Co.	43 44 1/2	45 1/2 49 1/2	49 50	50 1/2 50 1/2	-----	50 1/2 50 1/2	2,243
Can. Pac. Sub.	130 130	130 130 1/4	129 129 1/2	128 1/2 129 1/4	129 129	-----	1,300

Do pref.	-----	-----	-----	65 1/2 65 1/2	-----	64 64	200

**Outside Market.**—Owing to the unusual activity in the copper stocks, the general aspect of the outside market has improved somewhat. Apart, however, from the copper shares, few sales of special importance have been recorded, though prices reveal more or less substantial advances throughout the list. Tennessee Copper was dealt in to the greatest extent, and, though dropping to 12 on Tuesday, thereafter rose to 17 3/4, reacting to 16 to-day. Greene Consolidated was in good demand at 27 1/2 @ 28 1/2; Montreal & Boston ranged between 2 and 2 3/4, and United Copper reached 35 1/4 on small sales, against 34 3/4 last week, while Union advanced to 4 3/4. San Francisco subscriptions have been a prominent feature, closing at 102 3/8, against 103 last Friday. The preferred stock rose to 64 1/2, reacting to 63 3/8, the closing figure. United States Steel new 5s sold at 94 1/2 @ 94 5/8, and there was considerable inquiry early in the week for United Railways of St. Louis 4s, which held stable at 87 5/8. Northern Securities closes at 102 1/2, 1 point above the previous week's final price; on one occasion it sold at 103. Bay State Gas changed hands extensively at 1 3/4 to 1 5/8. On Thursday Borden's Condensed Milk preferred advanced to 107 1/2 (which is claimed to be a record price) on a minor transaction. Standard Oil ranged between 62 1/2 and 62 5/8, and American Chicle remained dull at 102 1/4 @ 102, against 101 1/2 last week. The prospect of a settlement of some of the loans of the Webb-Meyer Syndicate has advanced Dominion Securities 3 1/2 points, to 14, the sales, however, being of no great volume. Two new introductions to the curb were Camden & Trenton Ry. stock at 4 1/4 @ 4 1/2, and Toledo Rys. & Light Co. at 28 1/2. For outside quotations see page 1246.

## Investment and Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from July 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

Notice Change—Our yearly totals now all date from July 1.

ROADS	Latest Gross Earnings			July 1 to Latest Date		ROADS	Latest Gross Earnings			July 1 to Latest Date

**Net Earnings Monthly to Latest Dates.**—The table following shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of May 24, 1902. The next will appear in the issue of June 21, 1902.

## STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

These are results for properties owned.

Results now include the Pittsburgh Railway Co., operating the Consolidated Traction and all the other controlled properties in Pittsburgh.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week; but once a month (on the third or the fourth Saturday), we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of May 24, 1902. The next will appear in the issue of June 21, 1902.

Roads.	Gross Earnings.		Net Earnings.	
	Current Year.	Previous Year.	Current Year.	Previous Year.

## ANNUAL REPORTS.

## Burlington Cedar Rapids &amp; Northern Ry.

(Report for the year ended Dec. 31, 1901.)

President C. J. Ives says in substance:

**EXTENSION.**—The main line was extended from its terminus, about 3 miles north of Owatonna, to Erin, a distance of 19 miles, and an agreement has been under negotiation with the Chicago Milwaukee & St. Paul Ry. Co. for the joint use of its tracks and stations from Erin to Rosemount, Minn., 27 miles, and from Newport to Minneapolis, 18 miles. We have also purchased all the stocks and bonds of the South St. Paul Belt Ry., which consists of 3½ miles of track extending from the South St. Paul stockyards to Newport, and forming a connecting link in the line between Rosemount and Newport.

Ample grounds have been secured at West St. Paul and at Minneapolis for freight terminals. The Union passenger station at St. Paul and the passenger station of the Chicago Milwaukee and St. Paul Ry. Co. at Minneapolis will be used for all passenger trains. While the track connections are completed, it has not been thought best to operate over the line leased from the Chicago Milwaukee and St. Paul Ry. Co. until the freight terminals of your line are completed, which we expect may not be later than July, 1902.

**GENERAL RESULTS.**—The receipts from freight traffic, considering the extent our territory has been invaded by the lines of competing railways and the shortage of crops due to drought, are especially gratifying. The corn crop suffered the most from drought condition; for the whole line 60 per cent of a normal crop is a conservative estimate of the yield. No perceptible loss of revenue resulted from the shortage of corn, but this should be reflected in the earnings of 1902. Our shipments of live stock were greater than for any previous year. Passenger earnings show an increase of \$134,789 over those of the preceding year. Liberal expenditures have been made for the improvement of the property. There has been expended for 500 box cars of 60,000 lbs. capacity, 7 locomotives and 3 postal cars, \$412,058, of which \$106,470 was charged to operating expenses.

**Statistics.**—The fiscal results and balance sheet for several years compare as follows:

	1901.	1900.	1899.	1898.

## Philadelphia Electric Company.

(Official Statement of Jan. 31, 1902.)

The recent statement to the Philadelphia Stock Exchange affords the following:

The Philadelphia Electric Co. was incorporated in New Jersey Oct. 5, 1899 (see V. 69, p. 797, 853), with \$25,000,000 authorized capital stock in \$25 shares, of which \$12,250 is in the treasury and the remainder is outstanding, and upon payment of instalment of \$1 25 due Sept. 2, 1902, will have \$7 50 per share paid up. The company owns the following amounts of stock of other companies, part of which, as indicated, is pledged as security for an issue of "Philadelphia Electric 4 per cent 50-year gold trust certificates" issued Oct. 16, 1899, by the Land Title & Trust Co. and guaranteed by the Philadelphia Electric Co. The authorized issue of these certificates is \$17,500,000, of which \$14,982,200 is outstanding (see V. 74, p. 215) and \$2,485,858 reserved to acquire stock of other companies in Philadelphia.

## STOCKS OWNED BY PHILADELPHIA ELECTRIC CO.

(Trust 4s authorized, \$17,500,000, outstanding \$14,982,200.)

	Stock issued.	Paid up.	Total owned.	Pledged for trust 4s.
Pennsylvania Mfg. Light & Pow. Co.	\$15,000,000	10 p. c.	\$14,994,100	\$14,950,000
National Electric Co. (incorp. 1899)	17,500,000	25 p. c.	17,500,000	17,496,700
Kensington Elec. Co. (incorp. 1893).	160,350	all	146,375	-----

NOTE.—None of the above has bonds outstanding.

The National Electric Co. was incorporated in New Jersey May 1, 1899 (see V. 68, p. 1077); it has no funded debt. It owns the following:

## STOCKS OWNED BY NATIONAL ELECTRIC CO.

(No trust certificates issued.)

	When incorp.	Stock issued.	Stock owned.	Bonds outst'nd'g.
Southern Electric Light & Power Co.	1891	\$500,000	\$198,800	none
Cheltenham E. Light Heat & Power Co.	1890	50,000	49,990	none
Overbrook Electric Co.	1893	10,000	10,000	none
Beacon Light Co. of Chester, Pa.	1896	115,250	115,250	-----

NOTE.—The last-named company leases the property of the Chester Electric Light & Power Co. for 999 years from Oct. 30, 1896, and guarantees 7 p. c. yearly on its \$132,450 stock and the interest on its \$100,000 20-year sinking fund 5 per cent bonds due March 1, 1916, Delaware County Trust Co., Trustee. Sinking fund now amounts to \$16,750.

The Pennsylvania Manufacturing, Light & Power Co. was incorporated Feb. 3, 1898 (see V. 66, p. 237), under the laws of New Jersey, and owns the stock of the following companies, of which the amounts named are pledged to secure an issue of Philadelphia Electric 5 per cent gold trust certificates made under agreement dated Apr. 1, 1898, by the Land Title & Trust Co. and guaranteed by the Pennsylvania Mfg. Light & Power Co., "which in turn, through the ownership of the stock deposited, is also guaranteed by the Philadelphia Elec. Co." The total authorized issue of these certificates was originally \$15,000,000. "This amount was subsequently, under agreement dated Oct. 12, 1899, made between the Philadelphia Electric Co. and the Land Title & Trust Co., reduced to \$11,275,000 (under the terms of which agreement \$2,000,000 were purchased in the open market and destroyed); of this amount there is outstanding \$11,266,700."

# STOCKS OWNED BY PENNSYLVANIA M'FG LIGHT & POWER CO.

(Trust 5s originally authorized, \$15,000,000; reduced to \$11,275,000.)

	When incorp.	Stock issued.	Stock owned.	Stock pledged.
Northern Electric Light & Power Co.	1885	\$650,000	x\$325,000	x\$328,550

Keystone Light & Power Co.	1886	124,950	124,950	.....
Penn Elec. Light Co.	1887	882,248	818,486	.....

NOTE.—The above companies have no funded debt aside from \$70,000 10-year 6s of West End Elec. Co., of which Penn. M'fg Light & Power Co. owns \$69,500.  
 x Penn. Heat Light & Power Co., as below stated, owns the remainder. y Of this, \$5,000,000 common stock was issued full paid for certain patent rights, real estate and securities; and \$5,000,000 preferred has \$35 per \$50 share paid up. z Only 10 p. c. paid up.

The Pennsylvania Heat, Light & Power Co. was incorporated Feb. 18, 1895 (see V. 62, p. 320), under the laws of Pennsylvania, and owns the stock of the following companies, of which the amount indicated is pledged to secure an issue of Edison Electric Light stock trust certificates, 5s. The authorized issue of these certificates is \$2,000,000; outstanding, \$1,994,300, guaranteed by the Pennsylvania Heat, Light & Power Co., which in turn, through the ownership of the stock deposited, is also guaranteed by the Pennsylvania Manufacturing, Light & Power Co. and the Philadelphia Electric Co.

## STOCK OWNED BY PENN. HEAT, LIGHT & POWER CO.

## Brooklyn Ferry Company.

(Statement for year ended Dec. 31, 1901.)

The following data were given out at the recent annual meeting (compare V. 69, p. 1102):

## INCOME ACCOUNT 1901.

Profit & loss sur. Jan. 1.	\$314,772	Interest on bonds.....	\$112,500
Gross income.....	\$1,263,302	Rental leased lines.....	77,500
Oper. exp & rent. to city	698,372	Balance for year....	\$79,930
Net income.....	\$569,930	Profit and loss Dec. 31.	\$394,702

The cash balance Dec. 31, 1901, was \$102,480, contrasting with \$306,972, as shown in balance sheet of Dec. 31, 1900, V. 72, p. 773, the decrease, after adding the year's surplus of \$79,930, being accounted for as follows:

Construction, \$154,561; loans and bills payable (net), \$16,755; other items (net), \$13,106; total said payments, \$184,422.

The balance sheet of Dec. 31, 1901, is not furnished, but there was no change in the capitalization during the year.—V. 73, p. 1162.

## GENERAL INVESTMENT NEWS.

### RAILROADS, INCLUDING STREET ROADS.

**Anthracite Coal Roads.—Strike.**—The strike situation in the anthracite region has continued without material change. Yesterday, however, there were reports that the non-union "fire bosses" might yield to persuasion, and leave their posts. The most important development in the dispute was the publication in the daily papers on Wednesday of the correspondence between the United Mine Workers and the coal operators preceding the strike. In the "Financial Situation," on page 1218, we recite some of the leading points disclosed by these exhibits.

The strike order in the case of the bituminous coal miners of West Virginia went into effect at the appointed time on June 7, but was variously obeyed. In the Pocahontas, Flat Top and New River (Norfolk & Western) regions, coal-mining operations have been largely interfered with; in the Fairmount-Clarksburg district on the other hand the strike has amounted to relatively nothing.—V. 74, p. 1194, 1138.

**Barre (Vt.) RR.—Stock Increased.**—The shareholders on June 5 voted to increase the capital stock from \$80,000 to \$400,000. The road is leased to the Montpelier & Wells River RR.

**Buffalo Rochester & Pittsburg Ry.—Conversion of Bonds.**—The company's common stock will be increased on July 1 from \$6,000,000 to \$7,000,000, the holders of \$1,000,000 of de-

bentures of 1897 having notified the company that they will exercise the right to convert their bonds on that day into common stock. There still remain in the treasury \$2,000,000 debentures of 1897, interest reduced to 4 p. c. from Jan. 1, 1902, convertible into common stock at par, and subject to call at 102½, available for cost of construction of extensions.—V. 74, p. 935, 829.

**Burlington Cedar Rapids & Northern Ry.—Option of Exchange.**—The holders of the outstanding capital stock are offered the privilege of exchanging it from June 21 to July 1, both inclusive, share for share, for stock of the Chicago Rock Island & Pacific Ry., at the latter's office, No. 13 William St., New York. The C. R. & P. has long controlled a majority of the stock; recently friends of the company acquired the extensive holdings of the Chicago Burlington & Quincy at \$160 a share, increasing the amount controlled to over \$5,000,000, the total issue being \$7,150,000. As the stock of the Rock Island is now selling above 170, the terms of the present offer are more favorable than those obtained by the C. B. & Q. See V. 74, p. 1194.

**Notice to Minority Stockholders.**—A committee consisting of Benjamin Griffen, Irving K. Taylor and J. U. Brookman, with Lloyd Taylor as Secretary, 29 Broadway, New York, request shareholders who object to the terms offered to communicate with them.

**Listed.**—The New York Stock Exchange has listed \$553,000 additional consolidated first mortgage and collateral trust 5s of 1934, making the total \$7,803,000. There have been deposited with the mortgage trustee \$553,000 Cedar Rapids Iowa Falls & Northwestern bonds, issued under mortgage dated 1884, covering 37 miles recently completed, from Lake Park to Worthington, Minn., and extending to Hardwick, Minn.—V. 74, p. 1194, 93.

**Canadian Northern RR.—Status.**—An exchange gives the following information regarding this important enterprise:

This company is a consolidation of the Winnipeg, Great Northern Ry., the Lake Manitoba Railway & Canal Co. and other companies, and was formed in 1898. Wm. Mackenzie, of Toronto, who built the Canadian Pacific, is at the head of the enterprise, and he has associated with him Senator George A. Cox, of Toronto, and the Canadian Bank of Commerce people. Mr. Mackenzie's ambition is to build another Canadian transcontinental line. At first he was laughed at by the Canadian Pacific people, but in less than four years he has in operation 1,500 miles of road and is adding to his system at the rate of 500 miles each summer.

Mr. Mackenzie has built the road for 400 miles from Port Arthur to Winnipeg through the great wheat fields of Manitoba. It has a grade of but ½ of 1 p. c. as against a 2 p. c. grade on the Canadian Pacific line. He is planning this summer to build 500 miles of road in the province of Saskatchewan. It was the Mackenzie people who influenced the Province of Manitoba to contract for the purchase of the Northern Pacific lines in Manitoba for \$6,000,000 cash. Upon the completion of this deal the Canadian Northern leased the properties for 50 years from the Province of Manitoba and so obtained a network of lines through the great Manitoba wheat district.

The Canadian Pacific built its lines to the coast nearly on the United States line in order to secure a right of way through the mountains. This left the whole Canadian northwestern country without suitable railroad transportation, although Saskatchewan and Alberta provinces contain magnificent wheat lands and abound in mineral resources. Mr. Mackenzie has succeeded in finding a pass through the mountains and has surveyed a right of way to the coast, a distance of about 1,500 miles from the present western terminus of the Canadian Northern. He has also surveyed a line from the eastern terminus through Northern Ontario and if, as now seems possible, he has secured an interest in the Canada Atlantic, he is in line for his transcontinental road, for he would have no difficulty in securing traffic arrangements with the Intercolonial Ry. for the eastern end.

The Cox-Mackenzie people have already put up between \$12,000,000 and \$14,000,000 in the scheme, having sold their bonds mostly in England.—V. 74, p. 882, 477.

**Chicago & Eastern Illinois RR.—Called Bonds.**—Indiana Block Coal RR. bonds. Nos. 127, 161 and 166, for \$500 each, and Nos. 32 and 56, for \$1,000 each, drawn for the sinking fund, will be paid, principal and interest, upon presentation at the Farmers' Loan & Trust Co., interest ceasing July 1.—V. 74, p. 936.

**Chicago Indianapolis & Louisville Ry.—Compromise Expected.**—The "Louisville Times" says that the company has suggested to the committee representing the Richmond Nicholasville Irvine & Beattyville bonds, the guaranty of which by the Louisville New Albany & Chicago has long been in litigation, that the suits be terminated by a compromise. Swager Sherley and St. John Boyle, attorneys for holders of about \$425,000 of the bonds, have accordingly offered to settle at twenty cents on the dollar. (Regarding the case see V. 70, p. 686; V. 71, p. 83, 599, 1119; V. 73, p. 611).—V. 74, p. 1138, 1083.

**Chicago & North Western Ry.—Advance Report.**—The results for the fiscal year ending May 31 (May estimated) compare with those for the preceding year as follows:

Fiscal year—	Gross earnings.	Net (over taxes).	Other income.	Fixed charges.	Bal. for dividends.
1901-02.....	\$43,534,836	\$16,630,044	\$377,080	\$6,610,733	\$10,565,391
1900-01.....	43,098,587	15,863,538	577,080	6,624,331	9,821,287

From the surplus as above, were paid dividends of 7 per cent (\$2,737,870) on the common and 8 per cent (\$1,791,600) on the preferred stock in 1901-02, against 6 per cent (\$3,346,744) and 7 per cent (\$1,567,650) on the respective stocks in the earlier year, and \$4,696,665 for real estate, construction, etc., against \$4,169,526, leaving balance, surplus, of \$1,340,255 in 1901-02, against \$1,737,367.—V. 74, p. 1193, 326.

**Chicago Rock Island & Pacific Ry.—Option.**—See Burlington Cedar Rapids & Northern Ry. above and Rock Island & Peoria Ry. below.—V. 74, p. 1139, 1193, 1201.

**Chicago St. Paul Minneapolis & Omaha Ry.—Dividend Increased.**—A semi annual dividend of 3 per cent was declared on Monday on the common stock, payable Aug. 30.

This increases the annual rate from 5 to 6 per cent, the previous payments having been made annually in February, as follows: In 1897, 2 p. c.; 1898, 2 p. c.; 1899,  $3\frac{1}{2}$  p. c.; in February, 1900, 1901 and 1902, each 5 p. c.—V. 74, p. 637.

**Chicago Union Traction Co.—Injunction Denied.**—Judge Tuley at Chicago on May 31 denied the application of this company and the Consolidated Traction Co. for an injunction restraining the collection of taxes assessed against them for the year 1901. See V. 74, p. 775.

**No Jurisdiction.**—Judge Seaman, of the United States Circuit Court at Chicago, on June 5 again refused to take jurisdiction in the 99-year lease case. See V. 74, p. 1037, and V. 73, p. 81.

**Master's Report.**—See Franchise Tax in Illinois below.—V. 74, p. 1037, 775.

**Cincinnati Lebanon & Northern Ry.—Purchase.**—The shareholders will vote July 10 on the proposition to purchase the Middletown & Cincinnati RR.—V. 74, p. 1195.

**Cincinnati New Orleans & Texas Pacific Ry.—Lease Signed.**—The extended lease of the Cincinnati Southern was formally signed and delivered on June 7. The mortgage of Oct. 11, 1881, securing the original lease, was also confirmed. The "Cincinnati Enquirer" of June 7 contained the new contract in extenso. See terms in V. 73, p. 722.—V. 74, p. 829, 727.

**Coal & Coke Ry.—Extension for West Virginia Central.**—This company, incorporated in West Virginia on May 14 with \$5,000,000 authorized capital stock by officers of the West Virginia Central & Pittsburg, is building a line from a point about ten miles north of Elkins westerly through the counties of Randolph, Upshur, Lewis, Braxton & Gilmer, to open up coal properties. H. G. Davis is President; Arthur Lee, Treasurer; C. M. Hendley, Secretary.

**Dayton & Troy Electric Ry.—Lease.**—This company has taken over under a 99-year lease the Miami Valley Ry. at an annual rental of \$9,600.

**Detroit & Toledo Shore Line RR.—Status.**—An issue of \$425,000 receiver's certificates is being put out to meet the expense of building 1 1-10 miles of track connecting the company's track with the Detroit Southern at Trenton, Mich., and for the purchase of rolling stock. The report is confirmed that the line will be operated as a steam road, as originally planned, connecting the nine railroads entering Toledo with the six railroads at Detroit, and not as an electric line, as recently intended. The road is about ready to be placed in operation.—V. 73, p. 899.

**Dominion Securities Co.—Reorganization Committee—Deposits.**—James G. Cannon, Vice-President of the Fourth National Bank; William H. Porter, Vice-President of the Chemical National Bank, and Samuel Woolverton, Cashier of the Gallatin National Bank, have consented to act as a reorganization committee. Stockholders are asked to deposit their shares with the Metropolitan Trust Co., under a preliminary agreement, before July 3. Mr. Cannon says:

The Fourth National Bank is not interested in any of the so-called Webb-Meyer loans or securities, but at the request of the 103 banks and institutions throughout the country who are interested, I have undertaken to bring about some kind of an adjustment. All parties are heartily co-operating. Many of the properties have merit, and I feel that the situation can be measurably cleared up.—V. 74, p. 1139, 1038.

**El Paso (Tex.) Electric Co.—Bonds Offered.**—Jackson & Curtis of Boston are offering \$100,000 of the company's \$600,000 gold 5s, due Jan. 1, 1932, at 97 and interest. The company "does all the street railway business and a large part of the lighting of El Paso, Texas, and Juarez, Mexico."—V. 74, p. 381.

**Franchise Tax in Illinois.—Masters' Report.**—Masters in Chancery Henry W. Bishop and Walter Allen, on June 9, reported that in addition to the \$852,308 already paid, \$597,034 is still due on account of the tax of 1900. The amounts paid and due, according to this report, are as follows:

Peoples' Gas Light & Coke Co. paid \$257,147, due \$279,997; Chicago Union Traction Co. paid \$239,097, due \$134,350; Chicago City Ry. paid \$152,472, due \$133,947; Chicago Telephone Co. paid \$79,570, due \$7,216; Chicago Edison Co. paid \$33,949, due \$41,337; Chicago Consolidated Traction Co. paid \$33,664, due nothing; South Chicago City Ry. paid \$6,408, due \$185.

The report has yet to be passed on by Judge Grosscup. See decision in V. 74, p. 775.

**Great Northern Ry.—Lease.**—This company has taken a lease of its subsidiary company, the Eastern Minnesota Ry.—V. 74, p. 883, 829.

**Gulf & Ship Island RR.—Bonds Listed.**—The New York Stock Exchange listed this week the \$2,931,000 first refunding and terminal 5 per cent bonds of 1952. The company has been refunding through Fisk & Robinson of this city its old bonds, of which all except \$16,000 have now been retired.

An extensive system of piers, docks, etc., in connection with a ship canal at Gulfport, is now being constructed, and will be completed within the next year. In the meantime the results from operation show a notable increase, the gross for nine months ending March 31 being \$1,012,522, against \$727,453 for the corresponding months of last year. From September, 1901, to April 1, 1902, there were handled 52,340 bales of cotton, as against 24,460 bales last year.

On pages 1257 and 1258 we publish at length the official statement just made to the Stock Exchange, which gives much information, and on page 67 of our INVESTORS' SUPPLEMENT will be found a map of the road.—V. 74, p. 425, 426.

**Havana Electric Ry.—Bonds Offered.**—Subscriptions will be received at 98 through Edward Sweet & Co. until 4 P. M. June 16 for \$7,500,000 of this company's consolidated mortgage 50-year \$1,000 gold bonds, part of an authorized total issue of \$10,000,000, the remaining \$2,500,000 being left in the treasury for future capital expenditure; Central Trust Co. of New York, Trustee. Bonds dated Feb. 1, 1902; interest payable Feb. 1 and Aug. 1 in New York. Principal payable by sinking fund at 105, either by purchase at or under that price or by yearly drawings to commence January, 1906. The issue is also redeemable in whole or in part at 105 per cent at the option of the company on Feb. 1, 1907, or on any Feb. 1 or Aug. 1 thereafter on giving six months' previous notice. An advertisement says in substance:

These bonds are issued partly to take up the following obligation of the company: \$3,000,000 first mortgage bonds; \$768,000 second mortgage bonds; \$582,000 coupon notes, etc., practically all of which, except about 20 per cent of first mortgage bonds, have already agreed to exchange the same for the consolidated bonds. The balance of the issue will be used for payment of the floating debt, for extensions, and for the acquisition of new property. Applications will also be received simultaneously by Hanson Bros. in Montreal and Glyn, Mills, Currie & Co., London. The first mortgage bonds being exchangeable at the rate of \$105 of the consolidated bonds for \$100 of the first mortgage bonds, and the other bonds at par, the amount of the consolidated bonds required to discharge the existing secured debts will be \$6,600,000. An amount of this consolidated bond issue equal to the amount of the first and second mortgage bonds remaining unconverted will be retained in the hands of the trustee, and such outstanding bonds will be converted or redeemed at as early a date as possible.

The company was incorporated under the laws of New Jersey and acquired from the Havana City Ry. & Omnibus Co., organized in 1876, its concession, which expires in 1958, and practically constitutes a monopoly, as under its provisions the concessionaire has a preferential right to construct any extension or branches for which concessions may be granted within the limits of the municipality. The company is now in its first year of operating, already carrying at the rate of 26,000,000 passengers per annum and earning a gross revenue at the rate of between \$1,100,000 and \$1,200,000 per annum. For the purpose, however, of meeting the competition of the stage coaches, the company temporarily fixed its fare at 5 cents Spanish silver, equal to about  $3\frac{1}{2}$  cents American gold, and added trailers to its equipment, which carry second-class passengers at 3 cents Spanish silver; as a consequence, the gross revenue above referred to is in Spanish silver. The object for which the decrease in fare was established has been successfully accomplished, and the company is now discussing a change in the fare from 5 cents Spanish silver to a rate equivalent to 5 cents American gold. This step will result in net earnings sufficient to provide for depreciation, interest and sinking fund, with a considerable surplus for dividends on share capital. The capital stock is \$12,500,000, of which \$5,000,000 is 6 per cent non-cumulative preferred stock. Directors:

Edwin Hanson (President), Montreal; W. L. Bull (1st Vice-Pres.), New York; N. Gelats (2d Vice-Pres.), Havana; A. Marcus (Treasurer and Secretary), New York; J. M. Andreini, Edward J. Berwind, Evans R. Dick, Thos. P. Fowler, Eugene Griffin, Geo. B. M. Harvey, Alex. Laird, H. C. Perkins, R. A. C. Smith, all of New York, and Sir Wm. C. Van Horne and Wm. L. Doull of Montreal.—V. 74, p. 778.

**Honolulu Rapid Transit & Land Co.—Bonds Offered.**—E. H. Rollins & Sons are offering at 107 $\frac{1}{4}$  and interest \$315,000 of this trolley company's authorized issue of \$1,000,000 6 per cent sinking fund \$1,000 gold bonds, dated May 1, 1902, and due May 1, 1927, but subject to call May 1, 1917; interest payable May 1 and Nov. 1 at Union Trust Co. (mortgage trustee), San Francisco; National City Bank, New York, or company's office, Honolulu. Further facts:

Capital stock authorized, \$1,000,000; issued, \$236,300 common and \$209,000 preferred. Authorized bond issue of 1902, \$1,000,000; outstanding, \$315,000; reserved to retire \$145,000 6s of 1900, due 1920, \$145,000; issuable only at \$15,000 per mile for new construction, etc., \$540,000. In operation 8 miles in Honolulu; building to Waikiki Beach, etc., 8 miles; 85 lb. rail, rock ballasted; 35 vestibuled cars. Operations begun Sept. 1, 1901; gross receipts for April, 1902, \$12,976; net, \$5,119; interest charge, \$2,300; taxes and insurance, \$379. President, L. A. Thurston. Only competition, single track horse car line, forbidden to use trolley. Population, Honolulu, 1900, 39,306, increase in 10 years 71 $\frac{1}{2}$  p. c.

**Indiana Illinois & Iowa RR.—Listed.**—The New York Stock Exchange has listed \$350,000 additional first mortgage 4s, making the total \$4,850,000. Of these new bonds \$152,000 represents new equipment, the remainder additional side-tracks, shops, etc. In January last the Lake Shore & Michigan Southern Ry. Co. acquired \$4,436,200 of the capital stock.—V. 74, p. 205, 41.

**Indianapolis Northern Traction Co.—Acquisitions.**—This company, recently organized by the McCulloch Syndicate (which controls the Union Traction Co. of Indiana, see page 7, STREET RAILWAY SUPPLEMENT), to build a trolley line from Indianapolis northerly to Kokomo 60 miles, has acquired by purchase the franchises of the Lau & Stoneman Co., for a line from Kokomo to Logansport, 25 miles, and by merger the Logansport Rochester & Northern Traction Co., for a line to extend from Logansport northeasterly to Rochester, Warsaw and Kendallville, 101 miles, with branches 20 miles, making in all 200 miles of franchises. Arrangements have also been made to merge the LaFayette Street Ry., and to build a line from LaFayette to Logansport, via Delphi.—V. 74, p. 835, 428.

**Kansas City Mexico & Orient Ry.—Important Track-  
age Agreement.**—A ten-year agreement has been entered into with the Chihuahua & Pacific RR. Co. giving the Kansas City Mexico & Orient RR. Co. full trackage rights over the C. & P. from Chihuahua southwest to Minaca, 125 miles, forming part of the proposed line to Port Stilwell. The Kansas City Mexico & Orient Company has large sections of roadbed graded, and rail laying is under way in Kansas, Texas and Mexico. Some \$4,000,000 has already been expended, and it is believed that within three years the entire line from Kansas City to Port Stilwell, a distance of 1,500 miles, will be in operation.

**Kansas City Terminals.**—The Kansas City terminals will involve an expenditure of about \$3,000,000, and will give the company direct connection with practically every road entering Kansas City except the Chicago & Alton. The plan includes a four-track terminal, two tracks for steam and two for electric traffic, and will require the building of two new bridges, one a five-span iron structure across the Missouri River. The Kansas City Outer Belt & Electric RR. has been incorporated with \$1,500,000 capital stock to provide the terminals.—V. 74, p. 1038.

**Lake Superior & Ishpeming Ry.—Called Bonds.**—The Farmer's Loan & Trust Co. will pay at 105 and accrued interest, on July 1, 1902, forty-five first mortgage bonds of 1896.—V. 73, p. 1207.

**Little Falls & Dolgeville RR.—Sale July 24.**—The foreclosure sale will take place at Herkimer on July 24.—V. 74, p. 577.

**London United Electric Ry.—New Tunnel Project.**—The Underground Electric Railways Co. of London, in which Charles Yerkes is interested, and which the Speyers and the Old Colony Trust Co. will finance, was described in the CHRONICLE of April 12, page 777. The London United Electric Ry. is the deep-level electric road which J. S. Morgan & Co. and the capitalists back of the London United Tramways Co. are proposing to build. This new tunnel road (the third in London to interest American capitalists, the Central London being the first) is described by the "Railway News" of London as follows:

The London United system (including the Northeast London Ry., the Piccadilly & City Ry. and the London United Ry.) comprises as finally passed by the House of Lords, tube schemes commencing at Hammersmith Broadway and giving facilities for the interchange of traffic with the 100 miles of [surface] line constructed [16 miles], authorized or proposed of the London United Tramways Co. From Hammersmith the route followed is under the main road along Kensington High St., the south side of Hyde Park, to Piccadilly Circus, and from there to Charing Cross, and via the Strand and Fleet St. to Ludgate Circus and the Monument. At the Monument the line bears away in a northerly direction by way of the Kingsland Road, Stamford Hill, to Tottenham, and then northwest by way of Lordship Lane to Palmer's Green. The scheme includes an important north and south connection between Marble Arch, where facilities will be provided for interchange of traffic with the Central London Company's system, and Clapham Junction, where there will be interchange of traffic with the London & Southwestern system, and the services of the Brighton Southeastern & Chatham, and District, which also use that station.

The London United group has thus secured, so far as the House of Lords is concerned, a magnificent system, which its financial strength can easily construct. The House of Commons is hardly like to do London so ill a turn as to throw away the chance of having such a splendid service provided.

The estimated cost of the land, works, electrical equipment and rolling stock for the complete scheme, of some 21 miles, with a 13 ft. 6-in. tunnel throughout, is about £11,000,000 in the aggregate. The London United Tramways (the allied surface road) includes a network of lines in West London reaching to Teddington, Surbiton and Wimbledon, Southall, Cranford, Hanworth, etc., and representing a proposed outlay of some £3,000,000.

**Long Island RR.—Atlantic Avenue Improvement Payments Enjoined.**—Justice Clarke, in the Supreme Court in this city on Thursday, on application of Robert W. Holmes, granted a temporary injunction restraining city comptroller Edward M. Grout from making any payments on account of the Atlantic Avenue Improvement.—V. 74, p. 1196, 1139.

**Metropolitan Street Ry. New York.—Injunctions Denied.**—The Appellate Division of the Supreme Court on June 6, affirming the order of Justice Gildersleeve, declined to grant an injunction to Harry Content and Isidor Wormser restraining the lease of the property to the Interurban Street Railway Co. pending the trial of the case. See V. 74, p. 776.—V. 74, p. 1196, 1139.

**Metropolitan West Side Elevated RR., Chicago.**—The directors have sold to the First National Bank of Chicago \$1,500,000 4 per cent extension bonds of 1901 to meet the cost of construction of branches.—V. 74, p. 828, 577.

**Miami Valley Ry.—Lease.**—See Dayton & Troy Electric Ry. above.

**Missouri Kansas & Texas Ry.—No Guaranty.**—See Orange & Northwestern.—V. 74, p. 1139, 1039.

**Nashville (Tenn.) Ry.—Receiver's Certificates.**—The consolidated bondholders' committee in a circular says:

The city authorities disputed the right of the company to consolidate with the Cumberland Electric Light & Power Co. The lower court has decided in our favor, but the case has been appealed and will have to go through two courts more, with no final decision until probably the spring of 1903. Our attorneys are confident that the final decision will be in favor of the company. In the meantime the new city administration is friendly, a reduction of taxes is assured, and new privileges have been granted.

The committee found that an expenditure of at least \$500,000 was required to put the railways and electric-light plant in condition to accommodate the present business and the increase practically within sight. The principal expenditure will be on the additions to the electric-light system, which is running to its full capacity. About \$200,000 has already been expended, being borrowed temporarily from the Baltimore Trust & Guarantee Co. by the committee upon the hypothecation of the bonds controlled by them. An issue of \$500,000 in 6 p. c. receivers' certificates is proposed, which will be a lien on the property ahead of the \$2,300,000 of consolidated bonds and an obligation of the electric-light company, so far as the same are to be used for that company. Of these \$500,000 certificates the committee has already placed \$350,000 and the balance can be placed as wanted. It has been determined to change the location of the power plant, and it is possible that the total expenditure may have to exceed the \$500,000 mentioned.

The gross earnings for the six months ended Dec. 31, 1901, were \$391,456, and for the three months ended March 31, 1902, show an increase of \$17,891 over same period in 1901. It is safe to say that the gross earnings, even on present plant, can be calculated at \$350,

000 a year and the net earnings at \$340,500. Deduct the interest on the underlying bonds of the railway and the fixed charges on the electric light plant, \$146,020; 6 p. c. on \$500,000 receivers' certificates, \$30,000; taxes in 1901 (abnormally large), \$78,716; total deductions, \$254,736; balance, surplus, \$85,764. To which can be added, in reasonable expectation, 40 p. c. of \$100,000 additional gross earnings in near future, \$40,000; total, \$125,764. This would be applicable towards payment on the \$2,300,000 of consolidated bonds, on which the February, 1901, coupons are unpaid. It is the opinion of our experts that the plant can be run for 55 p. c. of gross earnings when all the contemplated improvements are made. This would add \$47,500 to the net earnings in the above statement.

'It will take at least the balance of this year to complete the work now ordered and contemplated, and not until that is done can a proper plan of reorganization be considered, but the above gives, we think, a fair statement of the position and prospects of the company as at present revealed.'—V. 73, p. 1061.

**National RR. of Mexico.—One Section Standard Gauge.**—The portion of the main line from Alice to Laredo, Texas, a distance of 68 miles, has been made standard gauge and laid with 70-lb. steel rails.—V. 74, p. 1139, 1039.

**New Jersey & Staten Island Junction RR.—Stock Transactions.**—The reported information regarding this company, whose shares excited interest on the curb this week by an advance from 120 to 205 at the hands of two brokers, was given in V. 73, p. 32; V. 72, p. 137.

**New Orleans Railways.—Called Bonds.**—New Orleans City & Lake RR. consolidated first mortgage bonds due January 1st, 1903, to the amount of \$103,500, have been called and will be paid at 110 ex January, 1903, coupons, at the Columbia Finance & Trust Co., Louisville, Ky., on January 1st, 1903.

**Deposits.**—The time for deposits under the plan of amalgamation expired on Wednesday.—V. 74, p. 1139, 1039.

**New York & Harlem RR.—Mortgage Satisfied.**—The \$12,000,000 mortgage of 1873 was discharged of record on June 9.—V. 71, p. 1220.

**New York New Haven & Hartford RR.—Bonds.**—See Old Colony RR. below.—V. 74, p. 1196, 1038.

**Northampton RR.—Guaranteed Bonds Offered.**—Bartol & Co., Philadelphia, are offering at 101 and interest the remaining \$50,000 of this company's \$300,000 first mortgage 50-year 5 per cent \$1,000 gold bonds, dated Jan. 1, 1902, guaranteed principal and interest by the Lehigh & New England RR., lessee. The proceeds will be used for an extension connecting with the Pennsylvania RR.—V. 74, p. 478.

**Northern Pacific Ry.—Listed.**—The New York Stock Exchange has listed \$2,024,000 additional prior lien bonds of 1907, making the total \$98,868,500. These bonds represent new construction, equipment, etc.—V. 74, p. 1140, 937.

**North Shore RR., California.—Bonds Sold.**—The Mercantile Trust Co. of San Francisco, has placed at par and accrued interest, \$750,000 of the \$6,000,000 first mortgage 5 per cent sinking fund 40-year gold bonds of \$1,000 each, dated May 1, 1902, interest being payable May 1 and Nov. 1 in San Francisco or New York City. Of the bonds, \$1,498,000 are reserved to retire at or before maturity the North Pacific Coast 5 per cent bonds of 1912, and the balance are issuable from time to time as required for extensions and improvements. The following improvements, calling, it is understood, for an expenditure of \$1,375,000 in the new bonds, are now proposed, \$625,000 of the bonds having already been so applied, viz.:

1 new steam ferryboat (contracted for); 25½ miles standard-gauge track (60-lb. steel), ballasted and electrically bonded, from Sausalito to Mill Valley, Fairfax and San Rafael, electric trolley or third rail to be used with necessary feeders; 1 large steam electric generating station; necessary freight and passenger cars and electric motors; renewals of 35-lb. old iron rails with 50-lb. steel on upper division, with necessary new ties and ballast, all the above to be completed before May 1, 1903; also a cut-off, consisting of 2½ miles of single track and one tunnel 3,100 feet in length, which will eliminate 5 miles of the present roadbed, effect a reduction of 104 feet in maximum elevation and 2,295 degrees of curvature, and the abandonment of 7 very high trestles, and shorten the track over 2 miles.

An annual sinking fund beginning May 1, 1912, ranging from one half to two and one-half per cent of the outstanding bonds, is provided for, the same, together with all interest or other income derived therefrom, to be invested in bonds of this issue or otherwise; any bonds so purchased to be kept alive and continue to bear interest. The San Francisco Stock and Bond Exchange has listed the outstanding bonds.—V. 74, p. 1140, 1039.

**Old Colony RR.—New Bonds.**—The Massachusetts Railroad Commission has approved the issue of \$1,000,000 of 3½ p. c. bonds to reimburse the New York New Haven & Hartford RR. for the amount paid for the Commonwealth flats in South Boston.—V. 73, p. 1208.

**Orange & Northwestern RR.—No Guaranty.**—H. W. Poor & Co. inform us that this company's bonds have not been guaranteed by the Missouri Kansas & Texas, as has been reported in a number of papers.—V. 74, p. 937.

**Oskaloosa Traction & Light Co.—Incorporated.**—This company was incorporated in Iowa on June 4 with \$300,000 authorized capital stock. The stockholders include Calvin Manning, Major Mahon and other Ottumwa capitalists.

**Panama RR.—Listed.**—The New York Stock Exchange has listed \$1,000,000 additional first mortgage 4½s of 1917, making the total \$2,526,000. The entire proceeds of the sale of these additional bonds is to be applied to the payment of an indebtedness incurred on account of the new terminal at the Port of La Boca, in the Bay of Panama, which was

completed at a total cost of \$3,150,000, and opened to traffic on Jan. 1, 1901. The balance of the cost was met by expenditures from the company's earnings.

*New Contract Signed.*—See Pacific Mail Steamship Co. on page 1255.—V. 74, p. 1090, 827.

**Philadelphia Co. of Pittsburg.**—*Listed.*—The Philadelphia Stock Exchange has listed \$1,350,000 additional common stock, making total, \$28,952,550. This additional stock has also been listed on the New York Stock Exchange. Of the new stock, 25,500 (half) shares have been sold for cash and from the proceeds \$107,197 has been applied to the purchase of 12,417 shares of the stock of the South Side Gas Co., being a controlling interest in said company; \$250,000 of the proceeds along with 1,500 shares have been issued to the owners of the shares of a large number of companies organized under the laws of Pennsylvania for the purpose of building underground and overhead street passenger railways in the cities of Pittsburg and Allegheny, no part of which road has been built. The remainder of the cash received for said shares has been paid into the treasury of the company and is to be used for the general purposes of the company.—V. 74, p. 988, 1036, 1039.

**Pittsfield (Mass) Electric Street Ry.**—*New Securities.*—The Massachusetts Railroad Commission has sanctioned the sale at 110 of \$70,000 new stock, making \$200,000 outstanding, and has under consideration the application to issue \$200,000 in bonds. The extension from Dalton to Hinsdale, 4 miles, has been approved.—V. 73, p. 900.

**Presidio & Ferries RR., San Francisco.**—*Called Bonds.*—Ten bonds have been called for redemption.

**Rock Island & Peoria Ry.**—*Option of Exchange.*—The holders of the outstanding capital stock are offered the privilege of exchanging it from June 21 to July 1, both inclusive, share for share, for stock of the Chicago Rock Island & Pacific at the latter's office, No. 13 William St., New York. The C. R. I. & P. has long owned about two thirds of the company's capital stock. See V. 74, p. 1197.

**Savannah Union Station Co.**—*Bonds.*—The shareholders on June 3 authorized the issuing of \$600,000 of 50-year 4 per cent first mortgage gold bonds.—V. 74, p. 1039, 207.

**Southern Ry.**—*Called Bonds.*—The Central Trust Co. will pay at par on Aug. 1, \$61,000 equipment mortgage bonds of the Georgia Pacific Railway Co.—V. 74, p. 1090, 1039.

**Staten Island Electric RR.**—*Reorganization.*—The new company to be formed under the plan of reorganization will be known as the Richmond Light & RR. Co. The reorganization committee, referring to the plan published May 24 (page 1091), says in substance:

The complexity of the situation appears from the following: The New York & Staten Island Electric Co. owns all the Railroad Company's stock, but is indebted to the Railroad Company [to the extent of \$134,057—Ed.], while the Railroad Company buys from the Light Company all the power needed for the electric railway. The Light Company stock is mostly owned by the Richmond Borough Co., a corporation formed to carry the floating debt of the three companies first named, and the Light Company is indebted to the Borough Company to the extent of about \$350,000. Again, the Light Company, being in urgent need of machinery to transact its business, was assisted by the formation of the Richmond County Power Co. (with bonds \$500,000 pledged as collateral and stock \$500,000). About \$300,000 cash is needed to secure unencumbered title to the power plant fully completed for the new company. The balance of the (\$138,000) cash to be raised will be used to pay arrears of taxes, complete the commercial system of the lighting plant, secure control of other property and for the expenses of reorganization, and any unexpended amount will be turned over to the new company.

The floating debts of the companies (except that of the Power Company) are practically all held by the Borough Company [to a total of \$623,186 on Dec. 31, 1901—Ed.] and are substantially represented by the cash subscriptions made to the stock of the latter. Such of the balance of their floating debts and such of the debt of the Power Company as may be approved by the committee, will be discharged by the funds under the control of the committee or assumed by the new company. The plan recognizes the obligation of these floating debts and deals with that owned by the Borough Company by offering to those entitled to \$743,000 of the preferred stock and \$2,972,000 of the common stock of the Borough Company agreed to be issued for \$743,000 subscribed and paid in cash, stock of the new company to the amount of \$928,750, which is 125 per cent upon the amount of the cash subscriptions to the Borough Company.—V. 74, p. 1091.

**Texas & Pacific Ry.**—*New Line.*—The company on June 8 began operating the Natchitoches & Red River Valley Ry. (V. 74, p. 626) and the extension thereof to Lake End, in all 30 miles.—V. 74, p. 1039, 626.

**Toledo Railways & Light Co.**—*New Interests.*—A large block of this company's \$12,000,000 capital stock has been purchased from the Everett-Moore syndicate by interests represented by Kean, Van Cortlandt & Co. The Everett-Moore people still retain a considerable amount of the stock, and their holdings, together with those of Kean, Van Cortlandt & Co., constitute considerably more than a majority of the share capital. The board of directors will be increased in order to give representation to the new interests in the property.—V. 74, p. 1197, 885.

**Twin City Rapid Transit Co.**—*Three-Cent Fares.*—The City Assembly of St. Paul on June 5 appointed a committee to investigate whether the company is amenable to the city tax of 5 per cent of gross earnings and whether a three-cent fare would not be reasonable.—V. 74, p. 1039, 989.

**United Railroads of San Francisco.**—*Title Taken.*—On June 5 four deeds were placed on record covering the final transfer to the company of the Market Street, Sutter Street, Sutro and San Mateo railways. The property transferred in-

cludes roadbed, rolling stock, franchises and real estate of the four corporations.—V. 74, p. 1091, 1039.

**Venango Power & Traction Co., Venango County, Pa.**—*Bonds Offered.*—Frank T. Harrington, 66 Broadway, is offering at 103½ and interest \$660,000 of this company's \$1,000,000 first lien 5 per cent \$1,000 gold bonds, dated July 1st, 1901, and due July 1st, 1931, but redeemable at any interest period prior to 1911 at 115 and interest, thereafter at 105 and interest. Interest payable Jan. 1 and July 1 in New York City by the Colonial Trust Co., the mortgage trustee. A circular says:

Total bonded debt, this issue, \$1,000,000; capital stock, \$1,000,000. A consolidation of all the electric railways in Venango County, Pa., embracing Citizens' Traction Co., Oil City Street Ry. Co., Oil City Rouseville & Franklin Ry. Co., Station Ry. Co., Franklin Electric Ry. Co., which are operated as one continuous road of 32 miles, serving a population of 30,000, and the Citizens' Light & Power Co., which, when extension under construction shall have been completed, will serve a population of 17,000. Since consolidation all of the above properties have undergone improvements and extensions. President, Daniel J. Geary, Oil City, Pa.

**West Virginia Central & Pittsburg Ry.**—*Extension.*—See Coal & Coke Ry. above.—V. 74, p. 989, 777.

## INDUSTRIAL, GAS AND MISCELLANEOUS.

**American Car & Foundry Co.**—*Negotiations.*—K. K. Bixby, Chairman of the Board, is quoted as saying that talk of a merger of the company with the Pressed Steel Car Co. has not reached the form of a definite proposition by either company.—V. 74, p. 938, 729.

**American Ice Co.**—The shareholders, it is announced, have the right to June 19 of subscribing to the new 5 per cent collateral trust bonds at 95 and interest from April 1.—V. 74, p. 885, 729.

**American Screw Co.**—*New President.*—Samuel M. Nicholson, President of the Nicholson File Co., has been elected President of the American Screw Co., to succeed Clark Thurston, resigned.—V. 72, p. 673.

**Associated Merchants' Co.**—See Hahne & Co., below.—V. 74, p. 1091, 476.

**Bay State Gas Co. of Delaware.**—*Time for Deposits.*—Lawson, Arnold & Co. give notice that the time for deposit of stock with the Standard Trust Co. of New York and the American Loan & Trust Co. of Boston, under call of April 29, 1902, has been extended until further notice.—V. 74, p. 939, 886.

**Beaver Valley Water Co.**—*Called Bonds.*—See Union Water Co. below.—V. 74, p. 1091.

**Bloomington (Ill.) & Normal Ry., Electric & Heating Co.**—*Bonds Offered.*—Devitt, Tremble & Co. and the Thompson, Tenney & Crawford Co., both of Chicago, are offering for sale this company's \$500,000 first mortgage sinking fund 5 per cent \$1,000 gold bonds, dated June 2, 1902, maturing June 1, 1927; interest payable June and Dec.; Illinois Trust & Savings Bank, Chicago, trustee. An advertisement says:

The company owns and operates all of the street railway lines in and between the cities of Bloomington and Normal and also furnishes power and does commercial lighting in Bloomington. The total population served is in excess of 30,000. The net earnings for the year ending April 30, 1902, were equal to over 6 per cent of the entire capital stock of \$600,000 over and above the total interest charges (\$25,000) on the outstanding bonds. The company operates under perpetual franchises. An unusually strong sinking fund provision has been incorporated in the trust deed.

See also statement on page 12 of STREET RAILWAY SUPPLEMENT.—V. 67, p. 318.

**Boston & Philadelphia Steamship Co.**—*Re-incorporation.*—The Massachusetts Steamship Co., which was recently granted a charter by the Massachusetts Legislature, is being organized to effect a re-capitalization and afford broader powers for the Boston & Philadelphia Steamship Co., whose name it will subsequently assume. The stock of the old company consists of \$500,000 six per cent non-cumulative preferred and \$212,600 common stock, both selling at \$165. The new corporation will have a capital of \$1,500,000, all of one class, in \$100 shares, and the Boston & Philadelphia Steamship Co., after declaring a cash dividend of 15 p.c., will transfer its property to the new corporation for \$712,600, a basis of one share of stock of the new corporation to each outstanding share. Each stockholder may subscribe at par for \$783,860 additional stock of the new corporation on the basis of 1.10 shares new stock for each share owned; \$3,540 of new stock is to be sold for the benefit of the new corporation making a total of \$1,500,000. The new corporation will thus realize in cash about \$787,400. A circular says:

The recent purchase of wharves in Philadelphia and Providence \$700,000 and the lengthening of the Farthian at a cost of \$100,000 require an addition to cash capital of about \$300,000. The company's present charter restricts the amount of real estate to \$500,000 and limits the business to two lines, between Boston and Philadelphia and between Providence and Philadelphia. The transfer is to seek freedom from these restrictions.

**Cambria Steel Co.**—*Called.*—All the outstanding bonds and scrip of the Cambria Iron Co., amounting to about \$200,000, have been called and will be redeemed at par on July 1.—V. 74, p. 324, 270.

**Chicago Edison Co.**—*Officers.*—The number of directors has been reduced from eleven to nine, obviating the necessity of electing successors for A. F. Seeberger, deceased, and Frank S. Gorton, resigned. W. A. Fox is now Secretary and Treasurer. Joseph Leiter has retired from the executive committee, which is now constituted as follows: Edward L.

Brewster, Samuel Insull, Robert T. Lincoln, Erskine M. Phelps and A. A. Sprague.—V. 74, p. 984, 529.

**Citizens' Electric Light & Power Co.**—See Union Electric Light & Power Co. of St. Louis below.—V. 73, p. 959.

**City Lighting of St. Louis.**—See Union Electric Light & Power Co. below.—V. 73, p. 89.

**Colorado Fuel & Iron Co.**—*Listed.*—The New York Stock Exchange has listed \$37,000 additional general mortgage 5s, and has authorized the listing from time to time, but prior to Dec. 1, 1902, of \$689,000 additional of said bonds, on notification that they have been issued to take up the remaining bonds of the Colorado Fuel Co., making in all \$6,000,000 general mortgage bonds outstanding.—V. 74, p. 1036, 939.

**Commonwealth Electric Co., Chicago.**—*New Officer.*—W. A. Fox has been elected Secretary and Treasurer, succeeding Frank Gorton, resigned.—V. 74, p. 1198, 1137.

**Consolidated Gas Co. of Baltimore.**—*Examination.*—Humphreys & Glasgow of this city are examining into the condition of the property on behalf of a syndicate of Baltimore and New York stockholders, which will, it is said, if the examination results satisfactorily, undertake to obtain control. Wilson & Stephens of this city sold their interest in the stock, and Mr. Wilson and Frank Tilford retired from the board some time ago.—V. 74, p. 832.

**Consolidated Lake Superior Co.**—*Listed.*—The Philadelphia Stock Exchange has listed \$2,165,412 additional preferred and \$542,900 additional common stock, making the totals of each respectively \$23,214,400 and \$72,150,100.—V. 74, p. 1040, 990.

**Consolidated Rubber Tire Co.**—*New Officers.*—Isaac L. Rice having been made Chairman of the board, Van H. Cartnell has succeeded him as President, and will also act as General Manager.—V. 74, p. 1198, 1092.

**Cramp Steel Co.**—*Mr. Webb Resigns.*—W. Seward Webb has resigned as a director.—V. 74, p. 480, 208.

**Cuyahoga Steel & Wire Co.**—See Cuyahoga Wire & Fence Co. below.—V. 73, p. 1063.

**Cuyahoga Wire & Fence Co. of Cuyahoga Falls, Ohio.**—*Merger.*—This company recently acquired all the properties of the Cuyahoga Steel & Wire Co. of Cuyahoga Falls (see V. 73, p. 1063) and the Hartman Mfg. Co. of New Castle, Pa. (V. 73, p. 1316). The capital stock is \$1,100,000 and the bond issue \$450,000, part of each being in treasury. The officers of the Wire & Fence Co. are:

E. A. Henry, Cuyahoga Falls, President and General Manager; Wm. Logan (Cashier Hanover National Bank), New York, Vice-President; F. J. Miller, Cuyahoga Falls, Asst. Secretary and Asst. Treasurer. The above officers and the following are directors: C. D. Backus, Cashier First National Bank, New York; G. F. Baker Jr., First National Bank, New York; S. H. Miller, Doylestown; A. A. McClanahan, Continental National Bank, Chicago; George C. Allen, Akron, and R. A. Parker, Vice-President Second National Bank, New York.

**Detroit City Gas Co.**—*Improvements.*—At the recent annual meeting it was decided to spend about \$600,000 for improvements, including the construction of a new coal gas generating plant and the extension of gas mains. There was an increase in the manufacture of artificial gas last year, but no dividend was declared, owing to the improvements, which are being made from earnings and treasury cash.—V. 73, p. 1315.

**Dominion Coal Co.**—*Lease.*—See Dominion Iron & Steel Co. below.—V. 74, p. 1092, 832.

**Dominion Iron & Steel Co.**—*Lease Ratified.*—The lease of the property of the Dominion Coal Co. (V. 74, p. 832) was ratified by the shareholders of both the contracting parties on Thursday, the agreement of June 30, 1899 (V. 69, p. 79), being at the same time annulled. The lease is for 99 years and guarantees 8 per cent annually on the coal company's common stock and the payment of a royalty of 7½ cents per ton on all coal mined in excess of 3,500,000 tons per year. Last year, it is said, the coal company earned \$1,550,000, and for the months of February and March of the present year the earnings were \$250,000 in excess of the same months last year. The entire output of the present year has been sold. The first dividend on Dominion Coal common stock will, it is stated, be paid in July, and will amount to 2½ per cent, the subsequent dividends to be 2 per cent quarterly. We understand that the bonds and the preferred stock of the Coal Company will not be disturbed at present.

*Officers.*—James Ross has been elected President and George A. Cox of Toronto and Senator Forget of Montreal Vice-Presidents of both the Iron & Steel and the Coal companies.—V. 74, p. 1092, 990.

**Eureka (Cal.) Water Co.**—*Successor Company.*—Control of the Ricks Water Co. (capital stock \$150,000) has been acquired for a sum rumored as \$130,000 by Eastern capitalists, who on June 5 incorporated the Eureka Water Co. with \$500,000 capital stock, to take over the property. Frank Rogers, of New York City, holds 665 shares of the new company's stock.

**Fargo (N. D.) Edison Co.**—See Union Light & Power Co. Fargo (N. D.) Gas & Electric Co.—See Union Light & Power Co. below.

**Fire Brick Consolidation.**—See Harbison-Walker Refractories Co. below.

**Fox Typewriter Co., Grand Rapids, Mich.**—*Reorganized Company.*—The Fox Machine Co. was recently succeeded by the Fox Typewriter Co., which filed articles of incorporation at Grand Rapids, Mich., on April 30. The authorized capital of the new company is \$1,000,000, of which \$400,000 is pre-

ferred. Of the latter, \$250,000 remains in the treasury and the remainder is being issued to obtain working capital. Directors:

William R. Fox, Clay H. Hollister, James Wylie, Fred Macey and George Clapperton.

**General Electric Co.**—*Stock Dividend.*—The stock dividend of 66⅔ p. c. will be paid July 15 to stockholders of record June 25, by the Farmers' Loan & Trust Co., New York, or the American Loan & Trust Co., Boston, who will also buy or sell fractional shares at the market price. The 2 per cent quarterly cash dividend will be paid July 15, as usual.—V. 74, p. 1199, 1142.

**Giant Powder Co., San Francisco.**—*Dividend Reduced.*—The monthly dividend paid June 10 on the capital stock (20,000 shares) was only 50 cents per \$100 share (\$39.36 paid in), contrasting with 75 cents a share, the rate established in February, 1900.

**Hahne & Co. (Department Store), Newark, N. J.**—*Incorporated.*—The firm of Hahne & Co., control of which was recently acquired personally by John Claffin, President of the Associated Merchants' Co., was incorporated under the same title in New Jersey on June 5 with \$1,800,000 of capital stock, of which \$800,000 is preferred. The Hahne Realty Co., incorporated at the same time with a capital of \$300,000, will own the real estate now used by the firm and will lease it to Hahne & Co.

**Hall Signal Co.**—*Dividend Increased.*—On Wednesday a quarterly dividend of 1½ per cent was declared on the \$1,900,000 common stock, contrasting with 1 per cent quarterly in 1901 and since. In 1900 1 per cent was paid in May and the same in October. There is \$100,000 non-cumulative 6 per cent preferred stock. No bonds. See V. 73, p. 1359, 842.

**Harbison-Walker Refractories Co.**—*Fire Brick Consolidation.*—Thomas L. Chadbourne Jr., of Chicago, who is arranging the consolidation of the leading fire brick interests of the country, informs us that it has been deemed advisable by the financial people concerned to call the new corporation the Harbison Walker Refractories Co., on account of the strength and age of the present Harbison Walker concern, and its long identification with the fire brick business. Mr. Chadbourne represents a syndicate of capitalists which has underwritten the new company's securities. The consolidation, it is said, is assured by the fact that the manufacturers have oversubscribed the allotment to them under their options by some \$2,000,000.

The new company will acquire the following corporations, with works and daily capacity (number of brick) as shown:

Harbison-Walker Company.	Capacity.
Constituent properties with total daily capacity: Clearfield, Pa., (2) 65,000; Hay Station, Pittsburg, Pa., (3) (one operating in magnesite and chrome), 90,000; Harburg, Pa., (2) 60,000; Mt. Union, Pa., 60,000; Gramplan, Pa., 30,000; 22nd Street, Pittsburg, Pa., 40,000; Woodland, Pa., (2) 50,000; Olive Hill, Ky., 35,000.	430,000
Clearfield (Pa.) Fire Brick Co. (2)	45,000
Isaac Reese & Sons Co. (Manorville, Pa., Cowanshanock, Pa., and Retort, Pa., (2)	55,000
Philipsburg (Pa.) Fire Brick Co.	55,000
Wallaceton (Pa.) Fire Brick Co.	22,500
Basic Brick Co., Johnstown, Pa.	50,000
Clinton County Fire Brick Co., Lock Haven, Pa., (Millhall, Pa., 22,500, and Monument Run, Pa., 15,000)	37,500
Fredericks, Munro & Co., Farrisville, Pa.	45,000
American Fire Brick Co., Lock Haven, Pa., (works at Millhall, Pa.)	30,000
Layton plant of Fayette Manufacturing Co.	20,000

Total (27 works) daily capacity.....790,000

Regarding the foregoing, Mr. Chadbourne says:

Two-thirds of the twenty-seven plants are of brick and iron construction, all containing costly and heavy machinery; 16 of them have been constructed within 5 years. The buildings, machinery, 50 miles of tram and railroads and 325 employes' houses could not be duplicated at the present time for less than \$7,000,000 cash, in addition to which the company will have \$1,900,000 quick assets consisting of stock on hand at cost, guaranteed book accounts and cash. Besides these items the company will hold in fee and under favorable lease some 52,000 acres of fire clay, ganister and coal lands on which it is difficult to put a correct estimate of value, because it would be impossible for any amount to duplicate the lands in quality and location. There is no business in existence in which more time, care and attention is necessary to establish a high reputation, as fire brick linings and blast furnaces should run from four to eight years and blast furnace stoves from 10 to 16 years, and a good many records are necessary to establish the quality of material turned out for the heat such material is to be subjected to.

The proposed total issue of bonds and stock for the acquirement of the aforesaid property will be approximately:

Five per cent twenty-year first mortgage and collateral trust sinking fund gold bonds.....	\$3,500,000
Six per cent cumulative pref. stock in \$100 shares.....	8,000,000
Common stock in \$100 shares.....	14,250,000

Of the bonds \$1,500,000 will be issued for the purpose of refunding the present bond issue of this amount of the Harbison-Walker Co.

The following, with others, will be the directors:

H. F. Bigler, H. W. Croft, F. H. Wigton, George Reese, S. C. Walker, R. W. Fredericks, Alexander Paterson, Moore Fredericks, S. P. Harbison, F. H. Seeley, W. N. Stanton, T. L. Chadbourne Jr.

The companies to be absorbed embrace about 90 per cent of the high-grade fire brick manufacturers of Pennsylvania.

**Hartman Manufacturing Co.**—*Sold.*—See Cuyahoga Wire & Fence Co. above.—V. 73, p. 1316.

**Helena (Mont.) Power & Light Co.**—*Sold.*—At the foreclosure sale on May 20 the property was bid in by Thomas A. Marlowe, President of the National Bank of Montana, as trustee, for \$300,000, the upset price. The sale has been approved by the United States Circuit Court, and reorganization will probably take effect before July 1.—V. 74, p. 778.

**Imperial Electric Light, Heat & Power Co.**—See Union Electric Light & Power Co. of St. Louis.—V. 73, p. 794.

**Indiana Water Co.**—*Lease*.—See New Albany Water Co. below.—V. 74, p. 990.

**International Steam Pump Co.**—*Directors*.—Samuel Untermyer and E. C. Converse have been elected directors, succeeding Charles N. King and T. L. Herrmann.

*Dividend*.—A dividend of 4 per cent from the year 1901-02 has been declared on the common stock, payable in four quarterly instalments beginning July 1.—V. 73, p. 1114.

**Jones & Laughlin Steel Co.**—*Incorporated*.—The company having received its new charter has selected the following directors: B. F. Jones Jr., W. L. King, W. L. Jones, J. B. Laughlin and I. B. Laughlin. Possession of the various properties will probably not be taken before August. See V. 74, p. 1142.

**Kings County Gas & Illuminating Co.**—*Change in Control*.—A majority of the \$750,000 stock has been purchased by Anthony N. Brady and Hugh J. Grant and associates. The company, which has outstanding \$600,000 of 5 per cent bonds, supplies the former town of New Utrecht, now part of Brooklyn. Mr. Brady is President and he and Mr. Grant are both directors in the Kings County Electric Light & Power Co.

**Leavenworth City & Fort Leavenworth Water Co.**—*Protective Measures*.—A bondholders' committee consisting of Charles S. Fairchild, James A. Blair and N. W. Jordan, makes the following announcement to the bondholders:

The city of Leavenworth having commenced proceedings for the acquisition of the properties of the company in alleged compliance with its rights in such case, and having in the meanwhile defaulted in the payment of its water rentals, it is imperative that the bonds should be promptly deposited with the Continental Trust Co., 30 Broad St., New York, under the terms of a bondholders' agreement.

All communications should be sent to Hornblower, Byrne, Miller & Potter, counsel, 30 Broad Street.

The company has outstanding the following bonds:

First mortgage, dated 1882, due Feb., 1912, interest at 6 p. c., authorized issue, \$250,000, of which outstanding, \$200,000; consolidated mortgage, dated 1887, due June, 1927, interest 5 p. c., authorized issue, \$600,000, of which outstanding \$36,000; consolidated mortgage to the New York Security & Trust Co. dated 1892, due Jan., 1912, interest 6 p. c., authorized issue \$750,000, of which outstanding, \$306,000; total outstanding, \$592,000.

**Lincoln Water, Light & Power Co.**—*Foreclosure*.—The U. S. Circuit Court at Springfield, Ill., on June 3 entered a decree of foreclosure in the suit brought by the Atlantic Trust Co. as mortgage trustee. The upset price is fixed at \$100,000.—V. 74, p. 940.

**Martin's Creek Portland Cement Co.**—*Bonds*.—The shareholders were to vote at 1523 Real Estate Trust Building, Philadelphia, on Monday, June 9, on the question of increasing the bonded indebtedness to \$250,000. D. Charles Murtha is Secretary.

**Montreal Light, Heat & Power Co.**—*Listed*.—The company's \$17,000,000 capital stock has been listed on the New York Stock Exchange.—V. 74, p. 1199, 940.

**National Asphalt Co.**—*Petition Denied*.—Judge Kirkpatrick, in the United States Circuit Court at Trenton, on June 9, denied the petition of William C. Bullitt for the removal of John M. Mack as one of the receivers.—V. 74, p. 940, 887.

**National Telephone Co. of New York.**—*Incorporated*.—This company was incorporated in Delaware on June 6 with \$3,000,000 authorized capital stock.

**Nebraska (Bell) Telephone Co.**—*Status*.—A block of the stock was recently offered by H. W. Poor & Co., who say:

Licensed by the Bell Company to operate in Nebraska; in Pottawattamie County (including Council Bluffs), Iowa, and in the Black Hills, South Dakota. Capital stock, \$1,500,000, of which 6 per cent owned by the Am. Telephone & Telegraph Co. Cash dividends for seven years past, 6 per cent per annum, payable quarterly from January 10. No bonds. Gross receipts in 1901, \$754,971; net, \$137,626. Subscribers Dec. 31, 1901, 15,169, against 11,743 Dec. 31, 1900.

**New Albany (Ind.) Water Co.**—*Injunction Dissolved*.—The United States Circuit Court of Appeals at Chicago on June 5 dissolved the injunction restraining the company from leasing its property to the Indiana Water Co. Receiver William Brooks has also been discharged. The injunction remains suspended until the appeal is determined, which will probably not be until October or November. See V. 74, p. 990.

**New England Consolidated Ice Co.**—*Consolidation*.—This company, incorporated in New Jersey several weeks ago, has increased its authorized capital stock from \$125,000 to \$14,000,000, of which \$3,000,000 is preferred 6 per cent non-cumulative. There will also be an issue of \$3,000,000 5 per cent 30-year bonds. The company is intended to take over the ice business of several New England cities, including the Commonwealth Hygienic Co. of Boston, the Providence Co., the Brockton Co., the Taunton Co., etc. Clarke & Culver, 135 Broadway, are in charge of the legal and financial side of the consolidation.

**Ogilvie Flour Mills Co.**—*Securities Offered*.—The Bank of Montreal is offering for subscription \$1,000,000 of 6 p. c. 1st mort. gold bonds and \$1,600,000 of 7 p. c. cumulative preferred stock. The company has 61 elevators in operation in Manitoba and the Northwest, and some 20 more, it is said, in course of construction.

**Omaha (Neb.) Packing Co.**—*New Stock*.—Ira M. Cobe, of the Chicago Title & Trust Co., is arranging to re-capitalize

the Omaha Packing Co. with \$2,000,000 7 per cent cumulative preferred and \$1,000,000 common stock; subscribers to the preferred, it is said, will receive 50 per cent of the common as a bonus. The company's bonds, amounting to \$340,000, will be retired. Fowler Brothers, it is understood, have sold their interest in the company to the other stockholders, who will probably elect as directors E. F. Robbins, James Viles Jr., S. L. Underwood, John A. Lynch, Ira M. Cobe and E. A. Shedd.

**Pacific Mail Steamship Co.**—*New Contract with Panama RR.*—An agreement has finally been reached with the Panama RR. for a resumption of the traffic relations which were terminated in December, 1900. The new agreement was signed on Wednesday and is to continue for three years. By its terms the Pacific Mail is given sole control of traffic originating at and destined to points on the Pacific Coast north of Panama, in British Columbia, United States, Mexico and Central America. The agreement takes effect at once with respect to coastwise traffic on both the Atlantic and the Pacific coasts to and from points in the United States covered by the company's lines. With respect to other traffic, the agreement becomes effective in 90 days from June 11. It is understood that the agreement is equally satisfactory to both companies.—V. 73, p. 845.

**Pennsylvania Steel Co.**—*New Bonds*.—The stockholders will vote August 12 upon a proposition to issue \$7,500,000 of 5 per cent bonds to cover the cost of the extensive ore mines and furnaces at Cornwall, Lebanon County, Pa., the purchase of which was arranged some months ago. The new bonds, it is said, have already been sold.—V. 74, p. 881, 883.

**People's Gas Light & Coke Co., Chicago.**—*Decision*.—The Appellate Court at Chicago on June 5 reversed the decision of the lower court, which dismissed the bill filed in Dec., 1900, by citizens of Hyde Park in the suit brought to restrain the company from charging more than 72 cents for gas at that place. The case, it is understood, will now be tried on its merits.

*Acquisition*.—Friends of the company are reported to have obtained the Blue Island gas franchise and other gas interests of the Calumet Gas & Electric Co., which was incorporated several months ago by Rufus Dawes, John R. Walsh and others.—V. 74, p. 1041, 778.

**Plymouth (Mass.) Cordage Co.**—*Business*.—See Standard Rope & Twine Co. below.—V. 74, p. 941.

**Port Hood Coal Co., Halifax.**—*Preferred Stock Offered*.—This company has recently been offering at par, through the Imperial Trusts Co. of Toronto, \$250,000 of new stock, ranking as 6 per cent cumulative preferred stock, until June 30, 1917 (with right to additional dividends at such rate as may be declared on the common shares), and on and after said date either to rank as common stock or to be redeemed at 110 in cash at option of holder. Further facts:

Common stock is \$750,000; 6 p. c. coupon bonds, with sinking fund of 10 cents per ton of coal sold, \$750,000. Coal areas somewhat exceed 10,000 acres; colliery in Inverness County, Cape Breton, present equipment equal to at least 1,000 tons per day. President, Geo. E. Faulkner, Halifax.

**Pressed Steel Car Co.**—See American Car & Foundry Co. above.—V. 74, p. 991, 941.

**Sloss Sheffield Steel & Iron Co.**—*Earnings*.—The results for the three months ending May 31 (May estimated) were: Earnings from operations \$307,617; deductions for depreciation and charges to extraordinary repair and renewal fund, \$35,648; net earnings, \$271,974; applicable as follows:

3 mos. end.	Net	Int. and	Legal	Prof.	Balance,
May 31—	earnings.	taxes.	bond exp.	dividend.	surplus.
1902.....	\$271,974	\$60,000	.....	\$114,000	\$97,974
1901.....	211,551	57,469	\$10,322	114,000	29,760
6 mos.					
1901-02....	\$518,240	\$120,000	.....	\$228,000	\$170,024

—V. 74, p. 888, 732.

**Standard Rope & Twine Co.**—*Status—Competition*.—The "Philadelphia News Bureau" quotes a gentleman familiar with the trade as follows:

The Spanish war and subsequent closing of the Philippine ports prevented the exportation of hemp, which action resulted in an advance in that product from 4½ cents to 15 cents, sisal advancing in price from 3½ to 12 or 13 cents. As the nature of the rope business demands that large quantities of raw material be carried in stock, the enhancement in the value of hemp and sisal proved a veritable boon to all companies.

The Plymouth Cordage Co. is now doing a larger business than the Standard Rope & Twine Co. The former has a capital of \$20,000,000, of which about one-half is bonds, whereas the Plymouth Company has a capital of but \$1,500,000. The Plymouth Company is doing a business of between 65,000,000 and 75,000,000 pounds of rope and twine per annum. The Standard Rope & Twine Co. practically operates but two factories now, the Waterbury plant in Brooklyn and the Sewall & Day plant in Boston. The Standard is paying a commission of 7½ per cent for the sale of its goods through the Union Selling Co. No concern can afford to pay 7½ per cent commission in competition with such concerns as the Plymouth Cordage Co. and the McCormick and Deering companies. The two last-named companies have forced the Standard entirely out of the binder, twine business.—V. 73, p. 1364.

**Standard Underground Cable Co.**—*New Stock*.—The shareholders voted on June 3 to increase the capital stock from \$1,500,000 to \$2,000,000, to provide for extensions of the new plant at Perth Amboy, N. J. In addition the company has plants at Pittsburg and at Oakland, Cal. Its output includes cables insulated with rubber, paper and jute fibre, for electric light, electric railway, telegraph and telephone purposes.—V. 74, p. 888, 430.

**Steamship Amalgamation.**—*Agreement with German Lines*.—The shareholders of the North German Lloyd Steamship Co. will vote June 23 on resolutions ratifying the con-

tract with the Morgan syndicate. The Hamburg-American Company unanimously approved the agreement on May 28. A translation of the circular sent out by the last-named company regarding this agreement was published in the "Journal of Commerce and Commercial Bulletin" on June 7. The main points are as follows:

1. The syndicate is forbidden to acquire shares in the German companies, either directly or indirectly, and vice versa.
2. To enable each of the contracting parties to have a direct interest in the business of the other, the two German companies undertake to pay over annually to the syndicate a portion of their dividends which would correspond to the ownership of at least 20,000,000 marks (\$1,000,000) in shares. This arrangement was made at a time when the capital of each of the two companies in shares amounted to 80,000,000 marks (\$4,000,000). In the event of an increase in the capital such as has since taken place, the syndicate has the right to raise the amount on which its quota of the dividend is reckoned to 25 p. c. of the share capital. Per contra, the syndicate undertakes to pay the two German companies from its own funds an interest of 6 p. c. upon the same amount—that is to say, upon at least 20,000,000 marks (see capitalization and dividends of German lines in V. 74, p. 888).
3. To secure advantageous co-operation a committee consisting of two representatives of the syndicate and two representatives of the German companies, is to be appointed.
4. The contracting parties undertake to support one another against outside competition.

5. The right to supply each other's temporary needs for chartered vessels is reserved to the contracting parties on certain conditions.
6. The syndicate undertakes not to send its vessels to a German port without the consent of the two German companies. On the other hand, the German companies undertake to observe certain restrictions in respect to British ports. These obligations do not, however, prevent—

- (a) the maintenance of connections already established; (b) the future inclusion of British ports for any connections to places to which the syndicate itself has not liners running from England; (c) the future adoption of British ports for the lines of the German companies to South America, Mexico or the West Indies, even if the syndicate buys lines to those places from England.
7. The syndicate undertakes not to let more than two of its vessels per week touch on the outward or homeward voyage at any French port. Reciprocally, the German lines undertake not to call at Belgian ports with their vessels that ply to and from North America; and they promise that neither of them shall let their vessels plying to and from North America call at English ports more than 75 times in the year on the outward and 75 times on the homeward voyage—that is to say, not more than 300 times in all. If the German companies increase their sailings from French ports, as they are at all times at liberty to do, the syndicate is likewise entitled to make a proportionate increase in its sailings.

8. The establishment of new steamship lines, or the extension of an existing connection when considerable enough to represent the doubling of the number of sailings (Expeditionen), shall, before being carried into effect, form the subject of deliberation by the committee mentioned in Clause 3. And in case of such extensions each party to this agreement is bound to offer the other the option of participation to the extent of a third of the enterprise, on the following basis: The participating party shall pay the party which undertakes the enterprise interest at the rate of 5 p. c. on the third part of the capital required for the extension; and in return it shall participate to the extent of one-third in the profit or loss derived from the extension.
9. The North Atlantic saloon-passenger traffic will be regulated by a separate agreement, having in view a pool, and the pool arrangements regarding third-class passengers will remain in force.
10. Similar arrangements with reference to freights are not for the present contemplated beyond existing agreements.
11. Differences which the joint committee are unable to settle shall be referred to a commission chosen by both parties, or to an impartial court of arbitration.
12. The agreement is to cease during any war between Germany, the United States and England, or any two of them.
13. The agreement is for a period of twenty years; but each party shall have the option of proposing a revision at the end of ten years, and of withdrawing at the end of the ensuing year if the revision cannot be effected in a satisfactory manner.
14. The Hamburg-American Line—without prejudice to the provisions of Clause 8—shall have exclusively the traffic between New York and East Asia and between New York and the West Indies.

The shareholders of the White Star and Dominion lines have agreed with practical unanimity to the terms of the merger, and the shareholders of the Holland-American line, it is understood, have also resolved to enter the combine.—V. 74, p. 1200, 1093.

**Stanley Electric Manufacturing Co.—Sold.**—A majority of this company's \$3,000,000 capital stock has been purchased by a syndicate largely interested in the street railways of New York and Philadelphia, among them William C. Whitney, Thomas F. Ryan, Thomas Dolan, William L. Elkins and P. A. B. Widener. The capacity of the plant, it is said, will be largely increased in order to supply the needs of these and other street railways.—V. 74, p. 785, 732.

**Sweetser, Pembroke & Co., New York.—First Dividend.**—A dividend of 3 per cent will be paid on the preferred stock on July 1 to stockholders of record June 20.—V. 73, p. 1212.

**Texas & Pacific Land Trust.—New Trustee.**—Edwin Einstein has been elected trustee to succeed the late William Strauss.—V. 74, p. 941, 725.

**Topeka (Kan.) Water Co.—Correction.**—President C. F. Street calls attention to the fact that the letter of General Manager O'Neill, as printed in a Topeka newspaper and reprinted by us last week, contained a typographical error. The directors have voted to recommend the bondholders to accept \$650,000, not \$550,000 for the property.—V. 74, p. 1200, 430.

**Trenton Potteries Co.—Funding Dividends.**—From July, 1894, to January, 1900, there accumulated 44 per cent of unpaid dividends on the \$1,250,000 of 8 per cent preferred stock. Since Jan., 1900, the preferred dividends have been paid in full. The company is now asking the preferred shareholders to sign an agreement with the Trust Company of the Republic by which they surrender the cumulative feature of their shares and receive in settlement for the accumulated dividends 44 per cent (\$550,000) in 4 per cent income certificates. These certificates will rank ahead of the preferred shares as regards interest payments, and will be subject to call at par for a sinking fund of \$25,000 yearly beginning in January, 1903, and payable out of net profits, if

any, after payment of interest on certificates and dividends on preferred shares, but not cumulative. The agreement is to be binding if accepted on or before July 1 by the holders of two-thirds of each class of stock.—V. 74, p. 583.

**Union Light & Power Co., Fargo, N. D.—Consolidation.**—This North Dakota corporation, with \$600,000 authorized capital stock, has been formed by consolidation of the Fargo-Edison Co. and the Fargo Gas & Electric Co. Officers:

President, William Mainland, Green Bay, Wis.; Vice-President, J. W. Smith, Fargo; Secretary, O. G. Barnes, Fargo; Treasurer, Sinclair Mainland, Oshkosh, Wis.

**Union Water Co. of Beaver Falls, Penn.—Called Bonds.**—The Franklin Trust Co. of Brooklyn will pay on July 1 at a premium of \$50 each the following first mortgage and collateral trust 6 per cent 30-year gold bonds, viz., Nos. 237, 238, 239, 269 and 270. The property is now controlled by the Beaver Valley Water Co.—See V. 74, p. 1091.

**United Button Co. of New York.—Consolidation.**—This Delaware corporation, with \$3,000,000 authorized capital stock, has taken over the property of the Newell Bros. Manufacturing Co., of Springfield, Mass.; the Boston Button Co., of Boston, and the Williston & Knight Co., of East Hampton, Mass. These are three of the largest and oldest manufacturers of buttons in the United States. In addition the company controls the product of several other manufacturing plants. Of the authorized capital \$1,500,000 is 8 per cent cumulative preferred. The directors make the following statement:

At the time of beginning business on June 9 the issue was \$1,007,700 preferred stock and \$798,900 of common stock. The corporation has also a bond issue of 30-year collateral trust mortgage 6 per cent gold bonds of \$525,000, dated June 1, 1902; trustee Security Trust & Safe Deposit Co. of Wilmington, Del.; interest payable June 1 and Dec. 1. No other indebtedness. Quick assets aggregate over \$800,000 consisting of mer chandise, material and cash, real estate and buildings, machinery and fixtures about \$1,000,000.

Directors: William McCleery, of Boston Button Co. (President); Frank P. Tenney, of the Williston & Knight Co. (Vice-Pres. and Manager of Sales); Horace L. Clark (Secretary), Albert W. Newell (Treasurer), William C. Newell, John P. Nields, George B. Hanford.

**Union Electric Light & Power Co. of St. Louis.—Consolidation.**—Under this title were consolidated on May 17 the Imperial Electric Light Heat & Power Co. and the Citizens' Electric Lighting & Power Co., both of St. Louis. The authorized capital stock is \$10,000,000, in \$100 shares, of which \$2,000,000 is 5 per cent preferred. A large, if not a controlling, interest is held by the North American Co. of this city. A bond issue for \$10,000,000 is proposed, of which \$2,000,000 will be issued about Sept. 1. The Imperial Co. recently absorbed the City Lighting Co., which had control of the Seckner Lighting Co., holding the contract for city lighting. The capitalization and electric capacity of the companies in and out of the combine are stated unofficially as follows:

Included—	Stock.	Bonds	H.P. capacity.	See also
Citizens'.....	\$3,000,000	.....	\$3,000	V. 73 p. 959
Imperial.....	1,500,000	\$1,000,000	7,000	V. 72, p. 778
City Lighting....	600,000	600,000	.....	V. 72, p. 89
Seckner.....	25,000	.....	.....	V. 72, p. 89
Not included—				
Missouri Edison.	4,000,000	4,000,000	15,000	V. 65, p. 571
Laclede Power....	600,000	.....	1,200	V. 71, p. 289
Laclede Gas.....	11,000,000	10,000,000	2,000	INV. SUPP'T.

The consolidated company, whose franchise covers the entire city, will hasten the construction of the large power plant in North St. Louis, begun by the Citizens' Co., but will hardly have it ready for operation until next May. The directors and officers are:

Julius S. Walsh (President), C. W. Wetmore (Vice-President), Breckenridge Jones (Treasurer), H. P. C. Coates (Secretary), C. W. Wetmore, George R. Sheldon and W. F. White.

**United Fruit Co.—Debentures.**—The company on June 1 issued an additional \$1,000,000 of its debenture 5s of 1901, making outstanding \$4,000,000 of the \$5,000,000 authorized.—V. 74, p. 1095.

**United Gas & Electric Co. of New Albany and Jeffersonville, Ind.—Bonds Offered.**—Trowbridge & Niver Company of Chicago and Boston are offering for sale, at 101 and interest, by advertisement on another page, \$400,000 first mortgage bonds covering this company's property and franchises. The company was incorporated in Indiana on May 10 with \$1,000,000 authorized capital stock and absorbed by consolidation the two electric light plants and the gas plant in New Albany and the gas plant in Jeffersonville, four miles from New Albany. The company has a contract for a period of years to supply the electric power for the street railway of the last-named city. A first mortgage for \$750,000 has been made to the American Trust & Savings Bank of Chicago, as trustee, securing 5 per cent gold bonds, dated May 15, 1902, and due serially, beginning in 1907, and also subject to call after 1912 at 105. Of these bonds \$350,000 are reserved for enlargements and the building of a hot-water heating system to be operated in connection with the gas plant. The remainder of the bonds are those now offered. The franchises in New Albany run for 45 years and those in Jeffersonville for 30 years, both from 1903. The President of the company is Samuel Insull, President of the Chicago Edison Co. For further particulars see advertisement on page xii.

**United Gas Improvement Co.—Maturing Bonds.**—The \$1,000,000 6 p. c. bonds of 1888 will be paid July 1, 1902, at the First National Bank, 315 Chestnut Street, Philadelphia.—V. 74, p. 991, 1146.

Reports and Documents.

THE GULF & SHIP ISLAND RAILROAD COMPANY.

APPLICATION TO THE NEW YORK STOCK EXCHANGE TO LIST FIRST REFUNDING AND TERMINAL MORTGAGE FIVE PER CENT BONDS.

BUFFALO, N. Y., May 26, 1902.

The Gulf & Ship Island Railroad Company hereby respectfully makes application to have placed on the regular list of the New York Stock Exchange \$2,931,000 of its First Mortgage Refunding and Terminal Five per Cent Gold Bonds, Nos. 1 to 2,734, inclusive, and Nos. 2,751 to 2,947, inclusive, in coupon form, for \$1,000 each, or the Registered Bonds into which these may be converted.

The bonds are dated February 1, 1902, and will mature February 1, 1952, interest being payable semi-annually on January 1 and July 1, at the agency of the Company, Fisk & Robinson, New York. Both principal and interest are payable in gold coin of the United States of the present standard of weight and fineness, without any deductions for any taxes, United States, State, County or Municipal, that may be imposed under any present or future law. The Coupon Bonds are in the denomination of \$1,000, and may be registered as to principal only or exchanged for fully Registered Bonds in the denominations of \$1,000, \$5,000 or \$10,000. The Registered Bonds are re-convertible into Coupon Bonds.

The Gulf & Ship Island Railroad Company is a corporation created February 23, 1882, by Special Act of the Legislature of the State of Mississippi, and its charter is perpetual. The total length of railroad owned and operated is 249.70 miles, all in the State of Mississippi, as follows:

Gulfport to Jackson.....	159.70 miles
Maxie to Columbia.....	48.00 "
Saratoga to Laurel.....	42.00 "
Total.....	249.70 "
Also temporary branch from Gulfport to Handsboro.....	4.86 "

The gauge of the railroad is 4 feet 8½ inches, and the track is laid with 56-lb., 60-lb., 65-lb. and 75-lb. steel rails. The replacement of the lighter rails with 75-lb. steel on all main tracks is now in progress.

Gulfport, the southern terminus of the main line, is situated on Mississippi Sound, Gulf of Mexico, midway between New Orleans and Mobile. About 12 miles south of Gulfport, forming with a chain of other islands the boundary of Mississippi Sound, delimiting it from the Gulf of Mexico, lies Ship Island. Inside this island is an anchorage to which ships come to obtain cargoes lightered out from the mainland. In order to overcome the disadvantages and the expense of loading ships at anchor at this distance from the land, the Gulf & Ship Island Railroad Company is now constructing at Gulfport an extensive system of piers, docks, etc., in connection with which the owners of the railroad are under contract with the United States to dredge a ship channel out to deep water about six miles. This channel is to be 300 feet wide and 19 feet deep. One-half of the channel is completed, and it is expected that the entire work will be finished this year. An anchorage basin of the depth of the channel and one-quarter mile by one-half mile in area is in course of excavation adjoining the first and principal pier, about one mile long, now well advanced.

Information in detail with regard to the construction of the railroad, its present physical condition and the improvements under way, and also with regard to the construction of the system of terminals just mentioned, is given in the Engineer's Certificate accompanying this application.

The present equipment of the railroad includes 27 locomotives, 12 passenger cars, 4 combination cars, 3 baggage and mail cars, 1 official car, 404 freight cars, work-train cars and cabooses, 12 steam shovels, 1 steam dredge boat and 6 barges.

Under the First Refunding and Terminal Mortgage the issue of bonds is limited to \$5,000,000, which amount has been duly authorized by the Company's Stockholders and Directors. The purposes for which the bonds may be issued are as follows:

For the redemption of bonds formerly outstanding, all but \$16,000 of which have been retired, bond for bond, at par.....	\$2,750,000
For the acquisition and completion of additional terminal facilities, including construction of wharves, docks, basins and channels at Gulfport.....	750,000
For additional rails and equipment, construction of metal bridges, renewing trestle bridges and erection of water stations.....	1,000,000
For additional engines and other rolling stock.....	500,000

Total.....\$5,000,000

The Railroad Company had outstanding on January 31, 1902, \$1,050,000 of an issue of First Mortgage Five per Cent Gold Bonds dated December 1, 1896, due July 1, 1926, secured by a First Mortgage on a part of its lines and property; and it had also outstanding \$1,700,000 of an issue of \$3,500,000 General Mortgage Five per Cent Gold Bonds, dated May 1, 1900, due July 1, 1926, secured by a General Mortgage on its lines and property. Of the \$2,750,000 of First Refunding and Terminal Five per Cent Bonds issuable for the redemption of outstanding bonds, \$1,700,000 of bonds have

been sold and issued for the purpose of exchanging or replacing the above-described General Mortgage Bonds previously existing, which bonds have been destroyed, as is shown by Certificate of the Colonial Trust Company of New York accompanying this application. The further amount of \$1,034,000 of bonds have been sold and issued for the purpose of refunding an equal amount of the First Mortgage Bonds previously outstanding, which bonds have been canceled, as is stated in Certificate of the Manhattan Trust Company of New York herewith, and the remaining \$16,000 of bonds are reserved for replacing a like amount of First Mortgage Bonds not yet presented. In addition to the \$2,734,000 of First Refunding and Terminal Mortgage Bonds issued for refunding purposes as above described, the sum of \$197,000 of bonds has been sold and issued, in accordance with provisions 3, 4, 6 and 7 of Article 1 of the Mortgage, to pay for improvements and new property. The total amount of bonds issued, the listing of which is hereby applied for, is \$2,931,000.

Subject only to the \$16,000 of First Mortgage Bonds hereinbefore mentioned, for the retirement of which First Refunding and Terminal Mortgage Five per Cent Gold Bonds are reserved, these bonds are secured by a first lien, as fully set forth in an indenture to the New York Security & Trust Company as Trustee, bearing date of February 1, 1902, upon all of the estate, right, title and interest of the Railroad Company in and to all of its properties, rights, privileges and franchises of every name and nature, real, personal and mixed, and wheresoever situated, now owned or which may be acquired by it hereafter, whether by purchase, merger or otherwise, including the entire line of completed railroad and all of its equipment, all branches and extensions, and all terminal properties now owned or which it may hereafter acquire, and including also certain valuable rights to submerged lands in Mississippi Sound, and the right to reclaim such submerged lands.

Customary and suitable restrictions are provided in the Mortgage to govern the issue of the remaining \$2,053,000 of bonds reserved for the betterments and additions above specified. Before certifying and delivering any of the reserved bonds, the Trustee will require the Railroad Company to furnish proper resolutions of the Board of Directors and Certificates of the President or a Vice-President and of the Chief Engineer, stating that the bonds are required to reimburse the Railroad Company for disbursements made for the designated purposes; that the cost of the construction, acquisition or improvements was at least equal to the par value of the bonds to be certified and delivered, and that no part of the expenditures certified has been included in any previous Certificate in maintenance expenses.

The Mortgage provides for a Sinking Fund to be created on January 2, 1905, by the payment on that date and annually thereafter by the Railroad Company to the Trustee of a sum of money equivalent to One per Cent of the par value of all the bonds issued and at the time outstanding, the money to be applied to the purchase of the bonds at prices not to exceed 110 and interest, the bonds thus bought to be kept alive in the Sinking Fund and interest thereon to continue to be paid. Bonds will not be drawn for the Sinking Fund. In case bonds cannot be purchased in any year, the Sinking Fund for that year lapses.

The authorized Capital Stock of the Gulf & Ship Island Railroad Company is \$5,000,000, consisting of 50,000 shares of the par value of \$100 each, all of which have been issued, and have been deposited with Harvey E. Fisk, Charles K. Beekman and Joseph T. Jones as Voting Trustees.

The Company has no liabilities in addition to its capital stock of \$5,000,000 and its funded debt of \$2,947,000, as herein described, save only the usual operating liabilities and current liabilities for improvement work and terminal construction now in progress.

Owing to the fact that the stock is held in few hands, no annual reports have been issued. The intention is to publish such reports regularly hereafter. The gross earnings, operating expenses and net earnings of the two years and eight months ended February 28, 1902, are as follows:

INCOME ACCOUNT (TWO YEARS AND EIGHT MONTHS).			
	Year Ended June 30, 1900.	Year Ended June 30, 1901.	Eight Months Ended Feb. 28, 1902.
Average miles operated.....	153.55	250.10	253.58
Gross earnings.....	\$456,139 56	\$1,035,429 37	\$898,786 62
Operating expenses and taxes.....	358,320 18	802,555 04	628,514 02
Net earnings.....	\$99,819 38	\$232,874 33	\$270,272 60

The annual interest on the \$2,947,000 bonds outstanding, amounting to \$147,350, is the sole charge against income account.

The Company's condensed general balance sheet as of March 31, 1902, is as follows:

ASSETS.		
Cost of road and equipment.....	\$7,775,826 87	
Additions and betterments.....	348,651 26	
Materials and supplies.....	54,302 19

Profit and loss—surplus.....		190,458 82
Total liabilities and surplus.....		\$8,620,925 38

The Board of Directors consists of Joseph T. Jones, Buffalo, N. Y.; Joseph A. Jones, Buffalo, N. Y.; Robert E. Powers, Buffalo, N. Y.; Thomas P. Hale, Gulfport, Miss.; E. J. Bowers, Bay St. Louis, Miss.; Charles K. Beekman, New York; Clarence S. McClellan, Mt. Vernon, N. Y.; John H. Thompson, Plainfield, N. J.

The Officers of the Company are: Joseph T. Jones, President; Joseph A. Jones, First Vice-President; Thomas P. Hale, Second Vice-President and General Freight and Passenger Agent; Robert E. Powers, Secretary and Treasurer; W. A. King, Assistant Treasurer; E. J. Bowers, Gen-

**United States Carbon Co.—Ordered Sold.**—Vice-Chancellor Stevens at Trenton on Tuesday ordered the sale of the plant at Woodside, N. J., which cost, it is said, \$150,000, but was never put in operation.—V. 73, p. 964.

**United States Shipbuilding Co.—Consolidation.—Bonds Offered.**—An advertisement on another page offers for public subscription at 97½ \$9,000,000 first mortgage bonds of the United States Shipbuilding Co., which is being organized, under the laws of New Jersey, to unite the following shipbuilding concerns:

Union Iron Works, San Francisco; Hyde Windlass Co. of Bath, Me.; Bath Iron Works, Bath, Me.; Crescent Shipyard; Samuel L. Moore & Sons Co., Elizabethport, N. J.; Eastern Shipbuilding Co., New London, Conn.; Harlan & Hollingsworth Co., Wilmington, Del.; Canda Manufacturing Co., Carteret, N. J.

The authorized capital stock will be \$20,000,000, of which \$10,000,000 6 p. c. non-cumulative preferred. The first mortgage secures \$16,000,000, Series A, 5 per cent sinking fund gold bonds due in 1932, Mercantile Trust Co., trustee. Of this issue \$5,500,000 are withdrawn from public sale, under the vendors' and subscribers' contracts, and for providing cash capital for the company, and \$1,500,000 will be held in the company's treasury. The remaining \$9,000,000 have been fully underwritten in the United States and Europe, and are now offered for subscription through the Trust Company of the Republic in this city and through banking houses in numerous other centres. First mortgage bonds in excess of \$16,000,000 may be issued only for the purpose of acquiring additional plants and equipment, and for improvements and betterments upon such terms and conditions as shall be approved by the holders of a majority of the bonds outstanding at the time of such approval.

The bonds are a first lien on the plants above named, which have been appraised at over \$20,000,000. The new company will have more than \$5,000,000 of working capital, and will acquire contracts for work in hand aggregating over \$36,000,000, on which it is estimated the profit will exceed \$5,000,000, or more than enough to pay interest and sinking fund for five years. Annual net profits are estimated as below:

Annual average net earnings, \$2,225,000; interest on \$16,000,000 first mortgage bonds, \$800,000; sinking fund, \$200,000; balance, \$1,225,000. Deduct 6 per cent on preferred shares \$600,000; leaving for dividends on common shares and for betterments and reserve, \$625,000.

The directors of the new company will be:

Henry T. Scott, President Union Iron Works; John S. Hyde, President the Hyde Windlass Co.; E. W. Hyde, President Bath Iron Works. Limited; Lewis Nixon, President Crescent Ship Yard; Charles R. Hanscom, President the Eastern Shipbuilding Co.; Irvin M. Scott, Vice-President and General Manager the Union Iron Works; Charles J. Canda, President Canda Manufacturing Co.; Horace W. Gause, President the Harlan & Hollingsworth Co.; Daniel Le Roy Dresser, President Trust Co. of the Republic; J. J. McCook of Alexander & Green.

President Dresser of the Trust Company of the Republic, which is attending to the financial end of the consolidation, says that the plan in no way resembles that of the former effort to combine shipbuilding interests. (V. 72, p. 884, 940.)

**United States Steel Corporation.—Injunction Suits.**—Judge Lacombe in this city on Monday denied the application of C. H. Verner & Co. and James Pollitz for an injunction to restrain the making of the proposed bond issue.

eral Counsel; Elisha Gee, Auditor; W. T. Stewart, Purchasing Agent; Richard Morgan, General Superintendent; L. A. Washington, Chief Engineer; M. S. Curley, Master Mechanic; W. E. Leonard, Car Accountant.

The General Offices of the Company are at Buffalo, N. Y., and Gulfport, Miss. The Fiscal Agents for registration of the bonds and payment of interest thereon are Fisk & Robinson, New York.

In accordance with the requirements of your Committee, we beg to hand you herewith:

Copies of the First Refunding and Terminal Mortgage of the Gulf & Ship Island Railroad Company, including one copy certified by the New York Security & Trust Company, Trustee, as a true copy. Certified Copies of Resolutions of Stockholders and Directors of the Gulf & Ship Island Railroad Company authorizing the First Refunding and Terminal Mortgage. Certified Copy of By-Laws of the Gulf & Ship Island Railroad Company. Certificate of Counsel as to the legality of the issue of the First Mortgage Refunding and Terminal Five per Cent Gold Bonds; Certificate of Counsel that the Mortgage has been duly and properly recorded. Certificate of the New York Security & Trust Company, Trustee, acknowledging acceptance of the Trust, giving numbers and amount of the First Mortgage Refunding and Terminal Five per Cent Gold Bonds executed, and including evidence of the proper recording of the Mortgage. Certificate from the Manhattan Trust Company of New York, Trustee of the First Mortgage of the Gulf & Ship Island Railroad Company, evidencing the cancellation of all but \$16,000 of the bonds issued under that Mortgage. Certificate from the Colonial Trust Company of New York, Trustee of the General Mortgage of the Gulf & Ship Island Railroad Company, evidencing the destruction of all the bonds issued under that Mortgage. Certificate of Engineer. Maps of the Gulf & Ship Island Railroad.

Respectfully submitted,

By JOSEPH T. JONES, President.

This Committee recommends that the above-described \$2,931,000 First Refunding and Terminal Mortgage Five per Cent Coupon Bonds of 1952, for \$1,000 each, Nos. 1 to 2,734, inclusive, and Nos. 2,751 to 2,947, inclusive (and Registered Bonds in the denominations of \$1,000, \$5,000 and \$10,000, into which said Coupon Bonds may be converted), be admitted to the list. The Registered Bonds are re-convertible into Coupon Bonds.

W. H. GRANBERRY, Chairman.

Adopted by the Governing Committee June 11, 1902.

WM. MCCLURE, Secretary.

At Newark, N. J., on Monday, Vice-Chancellor Emery granted an order to show cause, with temporary stay, why the corporation should not be restrained from changing \$300,000,000 preferred stock into bonds. The bill was filed at Trenton on June 7 by Robert H. McCarter as counsel for Mrs. Miriam Berger and other holders of preferred stock to the extent of 1,200 or more shares, who claim that the law authorizing the exchange is unconstitutional, as it impairs their vested rights. The motion was argued at Newark yesterday.

The company's elaborate answer, filed on Thursday, stated that members of this syndicate subscribed to the new bond issue \$80,000,000 preferred stock and \$20,000,000 cash, and points out that at the meeting on May 19 last, out of the 8,124,435 shares of capital stock, exclusive of the 2,061,376 shares of the syndicate, there were voted in favor of the bond plan 5,642,912 shares, held by 14,000 individuals, while the opposition vote was represented by less than 13,000 shares held by not more than thirty-five individuals.—V. 74, p. 1200, 1146.

**Utica (N. Y.) Gas & Electric Co.—Officers.**—The officers are: President, Anthony N. Brady; Vice-President, W. E. Lewis; Secretary, William J. Cahill; Treasurer, George H. Stack.—V. 74, p. 1042.

**Western Union Telegraph Co.—Quarterly.—Earnings** (partly estimated) for the quarter and the twelve months ending June 30 were:

3 mos. ending	Net revenue.	Interest charge.	Dividends paid.	Balance, surplus.
June 30—				
1902 (est.).....	\$1,850,000	\$254,770	\$1,217,010	\$378,220
1901 (actual).....	1,762,436	239,040	1,217,005	306,391
12 months—				
1901-2 (est.).....	\$7,249,852	\$992,580	\$4,868,033	\$1,389,239
1900-1 (actual).....	6,685,248	556,160	4,868,007	861,081

Total surplus (estimated) June 30, 1902, \$10,708,526. The regular 1¼ per cent dividend is payable July 15.—V. 74, p. 1095, 785.

—Lawrence Barnum & Co. are offering to investors by advertisement on another page \$80,000 first mortgage 6 per cent 30-year gold bonds of the Dillon (Mont.) Electric Light & Power Co. This company has been in operation many years and with the improved plant will earn, it is claimed, at least three times the interest charge. Its plant is the only one within fifty miles of the city. The firm is also offering New York City 3s, Syracuse 3½s, Kearney (N. J.) 4s, Washington Central 4s, Madison County Gas & Electric Co. 5s and Southwestern Coal & Iron Co. 6s, guaranteed by the Missouri Kansas & Texas Ry.

—“Brown's Directory of American Gas Companies” for the year 1902 is now on sale. Besides the usual clear and concise statements regarding the plants and finances of the leading companies selling manufactured gas, the present number contains reports for a considerable number of companies supplying natural gas. The directory comes from the press of the “Progressive Age,” 280 Broadway; price \$5.

—Firms who have recently placed new issues of industrial, gas or electric securities are requested to communicate with Lisman, Lorge & Co., for the purpose of having them correctly quoted on this firm's July quotation sheets, now in course of preparation. See advertisement on page ix.

# The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, June 13, 1902.

The general business situation has continued to be unfavorably influenced by the labor situation. The course of the coal strike has continued to be closely followed and the fact that neither miners nor operators have been able to make important progress towards a settlement of differences has had a discouraging influence. Crop news for the week has been less favorable. The Agricultural Bureau report indicated a good condition for the spring-wheat crop and a prospect for the coarser grain (with continued favorable weather) of large yields. In a few lines of trade some improvement in business has been experienced. Especially has this been true of the sugar market, which is now feeling the effect of the early summer canning demand; prices have been advanced.

Lard on the spot has been firmer with futures, but the volume of business transacted has shown no improvement, buyers generally operating slowly, and the advance in prices has not been fully maintained. The close was quiet at 10.62½c. for prime Western and 10½@10¾c. for prime City. Refined lard has continued to meet with a light sale, but prices have held steady at 10.85c. for refined for the Continent. Speculation in lard for future delivery has been quiet, but early in the week prices advanced on light hog receipts. Subsequently, however, there was a slight reaction. The close was steady.

### DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
June.....	10.57	10.65	10.67	10.65	10.62	10.62

Prices for pork have been advanced in the local market, but only a jobbing business has been transacted, closing at \$18.75@19.25 for mess; \$19.75 for family and \$19.50@21.25 for short clear. Cutmeats have had a fairly large sale, especially pickled bellies and prices have been steady with pickled shoulders at 8½@8¾c., pickled hams at 11½c., and pickled bellies, 14@10 lbs. average, at 10@10½c. Beef has been quiet and easy at \$12.25 for mess \$14.50@16 for packet; \$16@17 for family and \$23@24 for extra India mess in tins. Tallow has had a moderate sale, but prices have weakened to 6¼c. Stearines have been firmer but quiet, closing at 12c. for lard stearine and 13¼@13½ for oleo stearine. Cottonseed oil has been quiet and easier, closing at 45c. for prime yellow. Butter has been in full supply and with a limited demand prices have weakened to 19@21½c. for creamery. Cheese has been quiet but well held, closing at 9@10¼c. for State factory full cream. Fresh eggs have been in moderate demand and steady at 18@18½c. for choice Western.

Brazil grades of coffee have continued to drag. The near approach of the new crop and the excessive supplies in sight has made buyers timid; consequently little disposition has been shown to operate and prices have declined. Brazil has been a fair seller on a lower basis of values. The close was quiet at 5½c. for Rio No. 7. West India growths have been firmer and quiet for desirable grades, but dull and easy for the medium grades. Speculation in the market for contracts has been more active and prices have declined under selling against purchases in Brazil. The close was steady. Following are the closing asked prices.

June.....	4.80c.	Sept.....	4.95c.	Dec.....	5.20c.
July.....	4.80c.	Oct.....	5.05c.	Jan.....	5.25c.
Aug.....	4.90c.	Nov.....	5.10c.	March.....	5.45c.

Raw sugars have been in fair demand and firm at 3½c. for centrifugals, 96 deg. test, and 3c. for muscovad 0.89 deg. test. Refined sugar has been in good demand and firmer, closing at 4.70c. for granulated. Teas have been more active and firmer, especially for Japans.

Kentucky tobacco has been in fair supply, but with a steady demand prices have been unchanged. Seed leaf tobacco has received only indifferent attention from buyers, the sales for the week being limited to 700 cases, and prices have lacked tone. Foreign grades of tobacco have been in moderate demand and steady.

Early in the week prices for Straits tin advanced on a temporary scarcity, but the improvement was not maintained and the close was quiet at 30c. bid and 30.50c. asked. Ingot copper has had a fair call for deliveries on contracts, but new business has been light, closing at 12.25@12.60c. for Lake. Lead has been quiet but steady at 4.12½c. Spelter closed quiet at 4.87½c. Pig iron has been in good demand and firm.

Refined petroleum has been unchanged, closing steady at 7.40c. in bbls., 8.50c. in cases and 4.85c. in bulk. Naphtha has been unchanged at 9.05c. Credit balances have been steady at \$1.20. Spirits turpentine has been quiet and slightly easier, closing at 49¼@49½c. Rosins have been quiet but steady at \$1.57½ for common and good strained. Wool has been in fairly brisk demand and firm. Hops have had a limited sale at hardening prices.

## COTTON.

FRIDAY NIGHT, June 13, 1902.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 20,356 bales, against 21,433 bales last week and 19,610 bales the previous week, making the total receipts since the 1st of Sept., 1901, 7,318,767 bales, against 7,214,467 bales for the same period of 1900-1, showing an increase since Sep. 1, 1901, of 104,300 bales.

Speculation in cotton for future delivery has been quiet. The outside speculative interest in the market has largely withdrawn, and the operations by regular dealers have been confined largely to scalping transactions. The weather reports from the cotton belt, especially in the Southwest, have been the principal factor. Numerous complaints have been received from Texas saying that the crop is in need of rains, and advices received from some sections east of the Mississippi report the condition of the crop as deteriorating, owing to the absence of sufficient moisture. Based on the less favorable crop reports from the South, the tendency of prices, especially for the new crop deliveries, has been towards a slightly higher basis. Cable advices were received on Thursdaysaying that a heavy monsoon storm had broken over India, and this, it was claimed, insures a good cotton crop for India. To-day there was a steadier market, the continued dry weather in the Southwest inducing some speculative buying, largely by room traders, and prices advanced a few points. The close was steady at a net gain for the day of 4@10 points. Cotton on the spot has been steady, closing at 9 7-16c. for middling uplands.

The rates on and off middling, as established Nov. 30, 1901, by the Revision Committee, at which grades other than middling may be delivered on contract, are as follows.

Fair.....	1-14 on	Good Middling Tinged.....	Even
Middling Fair.....	0-30 on	Strict Good Mid. Tinged.....	0-20 on
Strict Good Middling.....	0-50 on	Strict Middling Tinged.....	0-06 off
Good Middling.....	0-32 on	Middling Tinged.....	0-12 off
Strict Low Middling.....	0-14 off	Strict Low Mid. Tinged.....	0-34 off
Low Middling.....	0-38 off	Middling Stained.....	0-50 off
Strict Good Ordinary.....	0-72 off	Strict Low Mid. Stained.....	1-06 off
Good Ordinary.....	1-00 off	Low Middling Stained.....	1-50 off

On this basis the official prices for a few of the grades for the past week—June 7 to June 13—would be as follows.

UPLANDS.	Sat.	Mon	Tues	Wed	Th.	Fri.

Continental imports past week have been 93,000 bales. The above figures indicate a decrease in 1903 of 230,555 bales as compared with same date of 1901, a gain of 674,684 bales over 1900 and a decline of 1,300,530 bales from 1899.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1900-01—is set out in detail below.

TOWNS.	Receipts. This week.	Since Sept. 1, '01.	Shipments. This week.	Stocks June 13.	Receipts. This week.	Since Sept. 1, '00.	Shipments. This week.	Stocks June 14.

Houston, "...	20	85,555	13	807	13,166	234,052	420	29,711
Paris, "...	20	85,555	13	807	13,166	234,052	420	29,711
Total 31 towns.....	7,720	5,830,758	19,321	143,170	30,112	6,223,353	66,013	344,200

The above totals show that the interior stocks have decreased during the week 11,601 bales, and are to-night 196,080 bales less than at same period last year. The receipts at all towns have been 23,392 bales less than same week last year.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since Sept. 1, as made up from telegraphic reports Friday night. The results for the week ending June 13 and since Sept. 1 in the last two years are as follows.

June 13.	1901-1902.		1900-1901.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Shipped—				
Via St. Louis.....	3,704	801,000	7,993	833,410
Via Cairo.....	1,007	148,425	1,907	226,669
Via Paducah.....	.....	1,192	.....	5,101
Via Rock Island.....	.....	33,093	.....	58,208
Via Louisville.....	708	191,553	524	131,263
Via Cincinnati.....	180	89,497	1,376	107,084
Via other routes, &c.....	963	342,203	2,987	264,070
Total gross overland.....	6,512	1,606,963	15,047	1,625,805
Deduct shipments—				
Overland to N. Y., Boston, &c..	630	357,580	2,991	418,711
Between interior towns.....	.....	62,213	.....	98,266
Inland, &c., from South.....	1,704	59,054	1,788	74,954
Total to be deducted.....	2,334	478,847	4,906	591,931
Leaving total net overland*.....	4,178	1,128,116	10,141	1,033,874

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 4,178 bales, against 10,141 bales for the week in 1901, and that for the season to date the aggregate net overland exhibits an excess over a year ago of 94,242 bales.

WEATHER REPORTS BY TELEGRAPH.—Telegraphic advices to us this evening denote that except in districts along the Atlantic dry weather has been quite general at the South during the week. Our Galveston correspondent states that lack of moisture in Texas is becoming a serious menace to growing crops, and from Alabama and sections of Arkansas and Tennessee there are complaints that rain is needed.

Galveston, Texas.—Lack of sufficient moisture is a general complaint in Texas and is becoming a serious menace to growing crops. We have had no rain the past week. The thermometer has averaged 83, ranging from 78 to 88.

Brenham, Texas.—We have had no rain during the week. The thermometer has ranged from 66 to 97, averaging 82.

Abilene, Texas.—It has been showery on two days of the week, the rainfall reaching four hundredths of an inch. Average thermometer 81, highest 94, lowest 68.

Dallas, Texas.—Dry weather has prevailed all the week. The thermometer has averaged 86, the highest being 102 and the lowest 70.

Corpus Christi, Texas.—Rain has fallen very lightly on one day of the past week, the rainfall reaching but two hundredths of an inch. The thermometer has averaged 79, ranging from 72 to 86.

Henrietta, Texas.—We have had no rain during the week. The thermometer has ranged from 67 to 100, averaging 84.

Huntsville, Texas.—The weather has been dry all the week. Average thermometer 80, highest 97, lowest 62.

Kerrville, Texas.—There has been no rain the past week. The thermometer has averaged 78, the highest being 96 and the lowest 60.

Lampasas, Texas.—We have had no rain during the week. The thermometer has averaged 82, ranging from 65 to 99.

Luling, Texas.—Dry weather has prevailed all the week. The thermometer has ranged from 65 to 98, averaging 82.

Palestine, Texas.—There has been no rain the past week. Average thermometer 82, highest 96, lowest 68.

Paris, Texas.—We have had no rain during the week. The thermometer has averaged 84, the highest being 98 and the lowest 69.

San Antonio, Texas.—We have had no rain during the week. The thermometer has averaged 81, ranging from 68 to 94.

Cuero, Texas.—It has been dry all the week. The thermometer has ranged from 67 to 99, averaging 83.

Weatherford, Texas.—We have had a trace of rain on two days during the week. Average thermometer 86, highest 101, lowest 71.

Longview, Texas.—There has been no rain during the week. The thermometer has averaged 85, the highest being 102 and the lowest 68.

New Orleans, Louisiana.—We have had no rain the past week. The thermometer has averaged 83.

Shreveport, Louisiana.—We have had no rain during the past week. The thermometer has ranged from 68 to 98, averaging 84.

**Columbus, Mississippi.**—We have had no rain during the week. Average thermometer 85, highest 100, lowest 70.

**Vicksburg, Mississippi.**—There has been no rain the past week. The thermometer has averaged 82, ranging from 70 to 97.

**Helena, Arkansas.**—Crops are doing well as a whole, but some need rain. First bloom received on the 10th, against the 25th last year. Rain has fallen on one day of the week, to the extent of thirteen hundredths of an inch. More in some sections in the vicinity. Average thermometer 80, highest 95, lowest 61.

**Memphis, Tennessee.**—The weather has been dry all the week. Crop outlook good. The thermometer has averaged 80.3, the highest being 96 and the lowest 61.2.

**Nashville, Tennessee.**—Crops are in good condition, but need moisture, although there is no suffering as yet. We have had light rain the past week, the rainfall reaching twenty-four hundredths of an inch. The thermometer has averaged 75, ranging from 53 to 98.

**Mobile, Alabama.**—The weather has been hot and dry all the week and cotton is being injured by drought. There are some serious complaints, particularly from uplands. The thermometer has ranged from 69 to 93, averaging 82.

**Montgomery, Alabama.**—There has been no rain the past week. Drought continues, corn is suffering, and cotton begins to need moisture. Average thermometer 82, highest 97, lowest 68.

**Madison, Florida.**—Rain has fallen on one day of the past week, the rainfall reaching one inch and eighty-five hundredths. The thermometer has averaged 82, ranging from 68 to 95.

**Savannah, Georgia.**—We have had heavy rain on two days during the week, to the extent of thirty-seven hundredths of an inch. Average thermometer 77, highest 94, lowest 66.

**Augusta, Georgia.**—We have had rain on three days during the week, the precipitation being one inch and forty-seven hundredths. The thermometer has averaged 78, the highest being 93 and the lowest 64.

**Charleston, South Carolina.**—We have had rain on two days during the week, the precipitation reaching forty-four hundredths of an inch. The thermometer has ranged from 67 to 89, averaging 77.

**Stateburg, South Carolina.**—We have had heavy rains on three days of the week, with high winds on Saturday and Sunday; also destructive hail, doing damage over limited area. Nights are still cool. The rainfall reached two inches and fourteen hundredths. The thermometer has averaged 77, ranging from 61 to 93.

**Greenwood, South Carolina.**—Rain has fallen on one day of the week, the rainfall reaching forty-three hundredths of an inch. The thermometer has ranged from 65 to 90, averaging 77.

**Charlotte, North Carolina.**—Crops are progressing well. We have had rain during the week, to the extent of sixty hundredths of an inch. The thermometer has averaged 78, ranging from 58 to 93.

The following statement we have also received by telegraph, showing the height of the rivers at the points named, at 8 o'clock June 12, 1902, and June 13, 1901.

**EUROPEAN COTTON CONSUMPTION TO JUNE 1.**—By cable to-day we have Mr. Ellison's cotton figures brought down to June 1. We give also revised totals for last year that comparison may be made. The spinners takings in actual bales and pounds have been as follows:

Oct. 1 to June 1.	Great Britain.	Continent.	Total.
For 1901-02.			
Takings by spinners...bales	2,421,000	3,695,000	6,116,000
Average weight of bales...lbs	503	490	495.1
Takings in pounds.....	1,217,763,000	1,810,550,000	3,028,313,000
For 1900-01.			
Takings by spinners...bales	2,316,000	3,459,000	5,775,000
Average weight of bales...lbs	511	487	496.6
Takings in pounds.....	1,183,476,000	1,684,533,000	2,868,009,000

According to the above, the average weight of the deliveries in Great Britain is 503 pounds per bale this season, against 511 pounds during the same time last season. The Continental deliveries average 490 pounds, against 487 pounds last year, and for the whole of Europe the deliveries average 495.1 pounds per bale, against 496.6 pounds last season. Our dispatch also gives the full movement for this year and last year in bales of 500 pounds.

Oct 1 to June 1.	1901-02.			1900-01.

In May.....	162,	90,	152,	66,	88,	154,

\* The average weekly rate of consumption in Great Britain in each year is as given by Mr. Ellison, after allowing for stoppage of spindles in consequence of short supply of cotton.

† The average weekly consumption reduced on account of stoppage of spindles during the month, or for Whitsuntide holidays.

The foregoing shows that the weekly consumption is now 152,000 bales of 500 pounds each, against 154,000 bales of like weights at the corresponding time last year. The total spinners' stocks in Great Britain and on the Continent have increased 5,000 bales during the month, and are now 261,000 bales more than at the same date last season.

**JUTE BUTTS, BAGGING, & CO.**—There has been very little demand for jute bagging during the week under review, but prices are unchanged at 5 3/4c. for 1 3/4 lbs. and 5 1/2c. for 2 lbs., standard grades. Car lots of standard brands are quoted at 5 5/8c. @ 5c., f. o. b., according to quality. Jute butts dull and nominal at 1 1/2c. @ 1 5/8c. for paper quality and 3 3/8c. @ 2 1/2c. for bagging quality.

**GOVERNMENT WEEKLY COTTON REPORT.**—Mr. James Berry, Chief of the Climate and Crop Division of the U. S. Weather Bureau, made public on Tuesday the following telegraphic

reports on the crop in the Southern States for the week ending June 9.

NORTH CAROLINA.—Local showers beneficial, but over larger portion of State drought serious; blossoms reported on early cotton.

SOUTH CAROLINA.—Drought has seriously impaired all crops over the western half of the State; cotton recovering from previous cool weather and fields are exceptionally well cultivated; blooms reported, squares plentiful; a general rain would be of great benefit.

GEORGIA.—Showers in many counties latter part of week were beneficial, although more moisture is required; cotton continues promising, being generally well cultivated with good stands; cotton blooming in extreme south; lice have appeared in scattered localities.

FLORIDA.—Rains insufficient, irregular, except over limited portions of western and northern districts, where fairly satisfactory; cotton generally clean and growing; rains needed.

ALABAMA.—Few local showers, but generally dry and hot; drought unbroken in many northern counties; general rain needed; early cotton small but healthy, squaring generally; late cotton inferior.

MISSISSIPPI.—Hot week; few scattered showers; crops well cultivated; drought becoming intense in many eastern counties, effects not serious; cotton generally healthy, making good growth, beginning to bloom.

LOUISIANA.—Dry, hot week; cotton very irregular in size, but generally doing well, except in some localities, where lice are damaging plant; rain would improve crop.

TEXAS.—Hot and dry; serious drought imminent in eastern half of State; cotton not yet seriously affected by dry weather, is making good, healthy growth, and in limited areas only is it being injured by boll weevil and lice; plant fruiting well, blooms becoming general, and in southern portion bolls are in evidence.

ARKANSAS.—Warm and generally clear with scattered showers; crops made good growth, cultivation progressed rapidly; cotton generally clean, healthy and vigorous, but grassy where improperly cultivated.

TENNESSEE.—Heavy local rains in western division on the 3d and 5th and local showers in middle and eastern divisions on the 6th and 7th; week generally favorable for cultivating young crops, which are clean and growing finely, but in many places needing more rain. Cotton prospects unusually promising.

OKLAHOMA AND INDIAN TERRITORY.—Cotton being cultivated.

MISSOURI.—Some cotton forming squares.

These reports are summarized by the Department as follows:

Rain is very generally needed throughout the cotton belt, except over the northern portion of the central districts. The effects of drought, however, are not yet serious. Insects are causing injury in portions of Texas, Louisiana and Georgia. The crop is generally well cultivated, except in the northern portion of the western districts.

SHIPPING NEWS.—As shown on a previous page, the exports of cotton from the United States the past week have reached 35,409 bales. The shipments in detail, as made up from mail and telegraphic returns, are as follows:

	Total bales
NEW YORK.—To Liverpool, per steamers Celtic, 250 Sea Island	
....Georgia, 392.....	642
To Hull, per steamer Buffalo, 675.....	675
To Manchester, per steamer Corby Castle, 71 upland and 56 Sea Island.....	127
To Havre, per steamers La Gascogne (additional), 14.....	50

## BREADSTUFFS.

FRIDAY, June 13, 1902.

A moderate volume of business has been transacted in the market for wheat flour. Early in the week the feature was buying for Australia, principally spring patents. During the latter part of the week local jobbers were reported placing orders with slightly more freedom, and there was a limited demand from the West Indies. Winter-wheat flour has been more freely offered and at slightly easier prices. Rye flour has been in fair jobbing demand and firm. Corn meal has been quiet but steady.

Speculation in wheat for future delivery has been fairly active, but for the week prices show only fractional changes. Immediately following our last review there was a slight upturn to values, based on less favorable crop news from abroad, and rains in the winter-wheat belt, where harvesting is in progress. Monday the market turned weaker, prices declining 3/4 @ 1/2 c. Crops news from the interior was more favorable, satisfactory weather conditions being reported in both the winter and spring-wheat belts. The French crop report also made a favorable showing and indicated a small increase in the acreage. Tuesday there was a quiet market, awaiting the Government report. Wednesday prices made a fractional gain, based on the Bureau report, which made the condition of the winter-wheat crop lower than expected, and reported a decrease in spring-wheat acreage of 4,000,000 acres. On the figures published by the Agricultural Bureau it is estimated that the total wheat crop will be 639,000,000 bushels, against 748,460,000 bushels last year. It is pointed out, however, that the present indications are that Europe will need less of our wheat than during the present season, and that full yields of the coarser grain crops will lessen the demand for wheat. Thursday there was a firmer market on less favorable weather reports from the Southwest and reports from the Northwest that Minneapolis mills had purchased 1,800,000 bushels of No. 1 Northern wheat. To-day the market was firmer on reports of unsettled weather abroad and foreign buying.

Indian corn futures have received only a limited amount of speculative attention, and there has been an easier drift to values. Considerable interest has been shown in the position of July contracts in the Chicago market, where it is estimated that a long interest exists in excess of 10,000,000 bushels. The movement of the crop for the week has been moderate, receipts showing a considerable decrease as compared with last week, and country offerings have been limited. The advices from the corn belt have reported the crop making favorable progress, although at the close of the week complaints were heard from some sections of too much rain for cultivation. The spot markets have been steady, and on Thursday 80,000 bushels were reported sold at outports for export. This is the first export sale for some time past. To-day there was a steady market.

### DAILY CLOSING PRICES OF NO. 2 MIXED CORN IN NEW YORK.

May delivery in elev.....	43 3/8	43 1/8	43 1/4	43 1/4	43 1/8	43 3/8

Oats for future delivery at the Western market have been fairly active, but prices have shown some irregularity. Prices for July contracts for the week show an advance. Receipts have been light, and with small country offerings and buying by shorts to cover contracts, values have im-

proved. The new-crop deliveries, however, have declined. Crop news has been favorable, and the Agricultural Bureau, it was figured, indicated a crop of about 900,000,000 bushels. To-day the market was moderately active and firmer.

AGRICULTURAL DEPARTMENT'S REPORT ON CEREALS, &C.—The report of the Department of Agriculture, showing the condition of the cereal crops on June 1, was issued on the 10th inst., and is as follows:

Preliminary reports of the spring-wheat acreage indicate a reduction of about 2,511,000 acres, or 12.9 per cent. Of the 19 States reporting spring wheat, 13 report a reduced acreage, Washington being the only State having 100,000 acres or upward in this product that reports an increase. There is a reduction of 745,000 acres in Minnesota and of 905,000 acres in North Dakota, due largely to unfavorable weather conditions during sowing time in the Red River Valley; a reduction of 400,000 acres in South Dakota, resulting in the main from an increasing tendency toward a greater diversification of crops, and a reduction of 840,000 acres in Nebraska, consequent upon that gradual yielding of spring wheat to winter wheat which is going on in almost every section of the State.

The average condition of spring wheat on June 1 was 95.4, as compared with 92 at the corresponding date last year, 87.3 on June 1, 1900, and a ten-year average of 92.6. The present reported average condition has been exceeded only three times in the last fifteen years. Of the States having one million acres or upward in spring wheat, South Dakota reports a condition of 100, North Dakota 96 and Minnesota and Iowa 95. In Washington and Oregon, which together have over 1,100,000 acres in spring wheat, the condition averages are 97 and 93, respectively.

The average condition of winter wheat on June 1 was 76.1, as compared with 76.4 on May 1, 1902; 87.8 on June 1, 1901; 82.7 on June 1, 1900, and 80.3, the mean of the June averages of the last ten years. During the month of May there was a gain of 3 points in Michigan, Illinois and Kansas, of 1 point in Indiana, 2 points in Nebraska and 7 points in Oklahoma. On the other hand, there was a loss of 2 points in California and 3 points in Pennsylvania, with no measurable change in Ohio.

The acreage and condition of wheat for a series of years, as made up from Government figures, is as follows:

#### ACREAGE AND CONDITION OF WHEAT ON JUNE 1.

\* Three ciphers (000) omitted from acreage figures.

\* Not including winter-wheat acreage included under "other winter."

The total reported acreage in oats is about four-tenths of 1 per cent in excess of the acreage harvested last year. The changes in acreage are very evenly distributed and are generally inconsiderable, 25 States and Territories reporting some enlargement of their acreage and 24 some reduction. Of the 9 States having one million acres or

upward in oats, New York, Ohio, Illinois, Wisconsin and Minnesota report an increased acreage, no case exceeding 4 per cent, and Pennsylvania, Indiana, Iowa and Nebraska a decrease, which only in the last-mentioned State exceeds 1 per cent.

The average condition of oats is 90.6, against 85.3 on June 1, 1901, 91.7 at the corresponding date in 1900, and a ten-year average of 90. Of the States having one million acres or upward in oats, Minnesota and Indiana report conditions corresponding exactly with their respective ten-year averages, Michigan reports 2, Iowa 3, Illinois 5 and Wisconsin 6 points above, and Nebraska 1 point, New York 2, Ohio 5 and Pennsylvania 13 points below their respective ten-year averages.

The acreage reported as under barley exceeds the acreage harvested last year by 8.5 per cent. In the States having 100,000 acres or upward devoted to this crop, there is an increase in area amounting to 1 per cent in Kansas, 5 per cent in South Dakota, Washington and California, 8 per cent in Minnesota and 95 per cent in North Dakota, the increase in the State last named being almost entirely due to the substitution of barley for wheat in that section of the State where wheat seeding was restricted by long-continued wet weather. On the other hand, there is a decrease of 1 per cent in Wisconsin, 2 per cent in New York and 3 per cent in Iowa.

The average condition of barley is 93.6, against 91 on June 1, 1901, 86.2 at the corresponding date in 1900, and a ten-year average of 88.6. The ten-year averages are exceeded by 2 points in Washington, 4 in Minnesota and Iowa, 5 in California, 6 in North Dakota and South Dakota and 10 in Wisconsin, while New York and Kansas report conditions 2 and 5 points, respectively, below such average.

The acreage under rye shows a reduction of five-tenths of 1 per cent from that harvested last year. There is an increase of 1 per cent in New York, 2 per cent in Wisconsin and 3 per cent in Nebraska, while Pennsylvania and Michigan each report a reduction of 1 per cent.

The average condition of rye is 88.1, as compared with 93.9 on June 1, 1901, 87.6 at the corresponding date in 1900 and a ten-year average of 89.3. The ten-year averages are exceeded by 2 points in Michigan and 6 points in Wisconsin and Nebraska, while the conditions for New York and Pennsylvania are 5 and 7 points, respectively, below such averages.

GOVERNMENT WEEKLY GRAIN REPORT.—Mr. James Berry, Chief of the Climate and Crop Division of the U. S. Weather Bureau, made public on Tuesday the telegraphic reports on the grain crops in the various States for the week ending June 9 as follows:

WEATHER.—Although the week averaged somewhat cooler than usual in portions of the Lake region and Northern New England, where light frosts occurred, the temperature conditions were generally favorable in the districts east of the Rocky Mountains, and also in the Middle and South Pacific coast regions. The States of the lower Missouri Valley have again suffered from excessive rains, which have also interrupted farm work in the northern portions of Illinois and Indiana and the southern portions of Wisconsin and Michigan. Rain is now generally needed along the Gulf and Atlantic coasts from Texas to Southern New England, and drought is becoming serious in the Carolinas and in the central and west Gulf districts.

CORN.—With ample moisture and favorable temperatures corn has made good growth throughout the central valleys, but is much in need of cultivation in the States of the lower Missouri Valley and Wisconsin. In the lower Ohio Valley and Tennessee the crop is well cultivated and in promising condition, but in the central and west Gulf States is suffering much from drought.

WINTER WHEAT.—The warm showery weather of the past week has been favorable to the development of rust in winter wheat in portions of Missouri and Indiana, and has caused lodging to some extent in Illinois and Missouri. With these exceptions a general improvement in the condition of the crop is indicated. Harvesting has begun as far north as North Carolina, Tennessee and the southern portions of Missouri and Kansas, but is progressing under difficulties, resulting from heavy rains, in the last-named State. On the Pacific coast the wheat outlook continues promising, although grasshoppers are causing some damage in the Sacramento and San Joaquin valleys.

SPRING WHEAT.—Spring wheat has made rapid growth and is in promising condition throughout the spring-wheat region, except on low lands, where it has suffered from excessive moisture.

OATS.—In the States of the Missouri and upper Mississippi valleys and lake region, oats have made good progress and are in promising condition, although too rank growth is reported from portions of Illinois, Iowa, Minnesota and Wisconsin. In the upper Ohio Valley, Middle and South Atlantic and east Gulf States the crop is inferior.

The movement of breadstuffs to market as indicated in the statements below is prepared by us from figures collected by the New York Produce Exchange. The receipts at Western lake and river ports for the week ending June 7, and since Aug. 1, for each of the last three years have been:

Receipts at—	Flour.	Wheat.	Corn.	Oats.	Barley.	Yrs.
	Bbls. 196 lbs.	Bush. 60 lbs.	Bush. 56 lbs.	Bush. 32 lbs.	Bush. 48 lbs.	Bush. 56 lbs.

\* Galveston, last week's stock; this week's not received.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., June 13, 1902.

The market has passed through another quiet, uneventful week so far as the home trade is concerned, but at the close there is practical evidence of more interest being taken in the heavy brown goods situation by buyers on China account, the first business of any importance since the middle of April being recorded. Should this week's business be followed by further transactions of any moment, it should have an appreciable effect upon the heavy cotton goods division, export grades still being generally sold ahead. In both staple lines and seasonable fancies the home trade adhere steadily to a hand-to-mouth policy. They are evidently of opinion that there is nothing in sight to cause apprehensions of higher prices for some time to come, while the opinion still prevails quite generally that in some directions there will be at least a temporary revision in their favor. Meanwhile sellers pursue an even course with very few exceptions. There are stocks on hand in occasional quarters, and in efforts to clean these up price concessions were sometimes made. Such concessions have, however, no influence upon the general tone, which continues steady.

WOOLEN GOODS.—The re-order demand for men's wear woolen and worsted trouserings and suitings has again been on a quiet scale this week, to the disappointment of sellers, the majority of whom looked for an extension of supplementary buying by this time. To some extent the return business is hampered by the fact that many sellers are behind-hand with deliveries of sample pieces, thus retarding the operations of clothiers in connection with the fall trade in garments. Clothiers report, as a rule, fairly satisfactory results where they have been in a position to test their outlets for fall, but even in such instances there is no disposition to anticipate requirements to any extent. The general tone of the market while dull is steady. There are irregularities in prices, chiefly in fancies, but stand-

ard makes show no change. In overcoatings business has improved slightly this week, but there is no change in cloakings. All descriptions of woolen and worsted dress goods are quiet. Staples are generally steady, but fancies show considerable irregularity. Flannels and blankets are quietly steady.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending June 9 were 7,653 packages, valued at \$327,129, their destination being to the points specified in the tables below:

NEW YORK TO JUNE 9.	1902.		1901.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....	16	1,203	69	2,252
Other European.....	27	636	8	826
China.....	4,395	62,165	.....	21,879
India.....	600	9,096	28	1,787
Arabia.....	.....	10,491	2,467	19,769
Africa.....	6	4,743	81	4,097
West Indies.....	409	11,155	416	10,243
Mexico.....	20	1,115	63	894
Central America.....	179	3,611	172	4,534
South America.....	1,086	22,458	1,226	29,103
Other Countries.....	935	6,596	380	3,738
Total.....	7,653	133,269	4,910	99,132

The value of the New York exports since Jan. 1 to date has been \$6,072,373 in 1902, against \$4,723,570 in 1901.

Several thousand bales of heavy brown cottons, chiefly drills, have been sold for export to China this week at prices which show a steady market for export grades. The home trade demand for all descriptions of brown sheetings and drills has been indifferent, with some irregularity in prices of 3-yard and 4-yard sheetings. The looked for changes in the prices of bleached muslins have not yet been made, and buyers are keeping purchases down to small proportions in all grades. Cambric muslins are well sold ahead and firm. The demand for denims is quiet, but stocks are small and prices maintained. Low-grade tickings show irregularity in prices, but fine grades are firm. Other coarse, colored cottons are steady, with a moderate business in progress. Sales of wide sheetings and cotton flannels are limited, but cotton blankets are in good request for quick deliveries. Dark fancy calicoes have been in considerable demand this week in best lines and firm in price. Staple calicoes are well sold up as a rule. There is a fair demand and the tone of the market is firm. Fine printed and fine woven patterned fabrics are selling well for next year. Gingham are scarce and very firm. Bids of 3 1/2 c. for regular print cloths have been made and declined, Fall River holding for 3 1/2 c. Narrow odds have sold on the latter basis. Wide odds are quiet and unchanged.

FOREIGN DRY GOODS.—Piece silks and ribbons continue firm, with raw material and curtailed domestic supplies of piece goods supporting the market. Dress goods are quiet throughout but tone steady. Linens are very firm. Burlaps dull and irregular.

## Importations and Warehouse Withdrawals of Dry Goods.

## STATE AND CITY DEPARTMENT.

## Index.

An index to all the news matter appearing in this Department for the period from Jan. 4, 1903, to April 5, 1903, inclusive, was published in the CHRONICLE of April 12, 1903, pages 794, 795, 796 and 797.

**Galveston, Texas.**—*Notice to Holders of Galveston Bonds.*—The committee representing the holders of bonds of the city of Galveston, Texas, of which Chas. S. Fairchild is Chairman, have received a proposition from the city for an adjustment of interest now in default and for future prompt payment of interest. The committee states that it is important for the benefit of all bondholders and for the welfare of the city of Galveston that the action of the bondholders be as nearly unanimous as possible. The city is ready to promptly and regularly do all that it believes to be in its power to preserve its credit and to protect the city from damage by future storms. The present plans contemplate an expenditure of about \$3,500,000 for sea-wall and filling. Copies of the proposition are being sent to holders of the bonds who are parties to the bondholders' agreement, and these holders are requested to communicate with the Secretary of the committee, M. I. Mirick, 49 Wall St., for further particulars.

## Bond Calls and Redemptions.

**Douglas County (P. O. Omaha), Neb.**—*Notice to Bondholders.*—The Board of County Commissioners call for payment June 20 (interest to cease July 1) \$268,000 5% refunding bonds, issued Jan. 1, 1870. We are advised that these bonds were issued without authority of law and in violation of the statutes then in force—the Supreme Court of the State having so held. Holders of the bonds, however, will be paid the principal, and the interest to July 1, 1903, there being no desire on the part of the county to refuse payment of either principal or interest of its indebtedness.

The official notice of this bond call will be found among the advertisements elsewhere in this Department.

**St. Paul, Minn.**—*Bonds Redeemed.*—We are advised by J. J. McCurdy, the late Comptroller, that \$50,000 5% bonds due in 1909 have been purchased and canceled, making \$2,450,248 bonds redeemed during the past ten years.

## Bond Proposals and Negotiations this week have been as follows:

**Alma, Mich.**—*Bids.*—Following are the bids received June 3 for the \$12,000 5% 3-8-year (serial) building bonds:

W. J. Hayes & Sons, Cleve....	\$12,470 00	State Sav. Bank, Toledo.....	\$12,350 00
MacDonald, McCoy & Co., Chic.	12,450 00	Webber & Reul, Pawamo ...	12,300 00
N. W. Harris & Co., Chicago...	12,442 00	Farson, Leach & Co., Chic...	12,278 50
Denison, Prior & Co., Cleve...	12,432 75	Lamprecht Bros. Co., Cleve...	12,201 00
Noble, Moss & Co., Detroit...	12,405 00	S. A. Kean, Chicago.....	12,090 00
Thompson, Tenney & Crawford Co., Chicago.....	12,370 00	Detroit Trust Co., Detroit...	12,025 00

As stated last week, W. J. Hayes & Sons, Cleveland, were the successful bidders.

**Alta Irrigation District, Fresno, Tulare and King Counties, Cal.**—*Bonds Issued.*—We are advised that the \$500,000 5% refunding bonds offered but not sold on May 6 have been issued in exchange for the old bonds outstanding and are now held by Daniel Meyer of San Francisco. For description of bonds see CHRONICLE April 26.

**Annapolis Royal, Nova Scotia.**—*Debentures Not Sold.*—We are advised that the \$12,000 4% 25-year light-extension debentures offered for sale on May 19 have not as yet been disposed of.

**Ann Arbor (Mich.) School District No. 1.**—*Bond Sale.*—This district has sold \$14,000 4% bonds to Denison, Prior & Co., Cleveland, at 102-17. Denomination, \$500. Date, June 2, 1902. Interest, semi annual. Maturity, \$4,000 June 2, 1910, \$5,000 June 2, 1911, and \$5,000 June 2, 1912.

**Arapahoe County (Colo.) School District No. 7.**—*Bonds Voted.*—This district recently authorized the issuance of \$24,000 bonds by a vote of 131 to 53.

For description of bonds see CHRONICLE June 7, p. 1210.

**Brewster, N. Y.**—*Bond Sale.*—On May 29 \$2,000 3½% bonds were awarded to the Central Bank of Westchester County, White Plains, at par. A bid of 100-10 for 4% bonds was made by the Putnam County Savings Bank. Denomination, \$500. Maturity, \$500 yearly on July 1 from 1903 to 1906, inclusive.

**Bristol, R. I.**—*Bonds Voted.*—The Town Council has authorized the issuance of \$47,000 3½% bonds.

**Brookhaven, Miss.**—*Bond Sale.*—On June 3 the \$40,000 5% 5-20-year (optional) refunding bonds described in the CHRONICLE May 24 were awarded to The Lamprecht Bros. Co., Cleveland, at 100-77.

**Buffalo (Minn.) School District.**—*Bond Sale.*—The sale of \$5,600 4½% 2-12-year school bonds to the Citizens' State Bank at 100-181 is reported.

**Burlington, Iowa.**—*Bond Bids.*—The following bids were received on May 28 for the \$400,000 4½% water bonds described in the CHRONICLE May 17:

W. J. Hayes & Sons, Cleveland, \$390,000 for the \$400,000 bonds.	
MacDonald, McCoy & Co., Chicago, \$358,000 for the \$400,000 bonds.	
Fede, Holzman & Co., Cincinnati, \$350,152 for the \$400,000 bonds.	
The City Water Co. offered par for the bonds, \$100,000 to bear 6% interest; \$25,000 to bear 4% interest and any bonds issued in excess of \$35,000 5% interest.	
S. A. Kean of Chicago offered to sell the bonds at 5 per cents at par, he to receive a commission of 2% to cover attorney's fees, expenses, etc.	

Action on bids postponed. We are advised that certain citizens, through Seerley & Clark, attorneys, have asked for a temporary injunction in the District Court to prevent the City Council from accepting any of the above bids. It is expected that the case will go to the Supreme Court for final adjudication, where a decision is hoped for in the fall.

**Butler, Ohio.**—*Bond Sale.*—On June 10 the \$1,500 5% electric-light plant bonds described in the CHRONICLE May 31 were awarded to P. S. Briggs & Co., Cincinnati, at 105-217. Following are the bids:

N. W. Harris & Co., Chicago... 15,460 60

These bonds are as described in the CHRONICLE May 24, except that the maturity is July 1, 1922, one-half being optional after July 1, 1907, and one half after July 1, 1912, instead of the optional dates being 1912 and 1917, respectively, as we were originally advised.

**Montclair, Essex County, N. J.—Bond Offering.**—Proposals will be received until 8 P. M., June 23, by Harry Trippett, Town Clerk, for \$100,000 3½% gold refunding school bonds. Authority, Act of Legislature, March 23, 1899. Denomination, \$1,000. Date, July 1, 1902. Interest semi-annually at the Bank of Montclair. Maturity, July 1, 1932.

*The official notice of this bond offering will be found among the advertisements elsewhere in this Department.*

**Montgomery, Ala.—Bond Sale.**—The \$75,000 4½% 40-year bonds offered but not sold on Feb. 12 have just been disposed of to Spitzer & Co., Toledo, at 100'60. For description of bonds see CHRONICLE Feb. 1.

**Montreal, Quebec.—Bond Sale.**—On June 4 the \$2,000,000 3½% registered stock described in the CHRONICLE May 24 were awarded to Coates Sons & Co., London, at 98'20.

**Mount Pleasant, Texas.—Bonds to be Sold at Private Sale.**—We are advised that the \$20,000 4% 40-year water bonds described in the CHRONICLE last week will be sold at private sale to such parties as offer a price which in the opinion of the Board of Aldermen will be a fair one to the city.

**New Britain, Conn.—Bond Offering.**—Proposals will be received until 8 P. M., June 21, by S. H. Stearns, Chairman Board of Sewer Commissioners, for \$100,000 3½% sewer bonds. Authority, Act of Legislature approved June 17, 1901. Date, July 1, 1902. Maturity, July 1, 1932. Accrued interest to be paid by purchaser. Certified check for \$1,000, payable to the City Treasurer, required.

**Newton, Mass.—Description of Bonds.**—The \$35,000 water bonds recently authorized will be put out in denomination of \$1,000, dated June 1, 1902. Interest, 3½%, payable at the National Bank of Redemption, Boston, or at the City Treasurer's office. Maturity, June 1, 1932. Date of sale not determined.

**Norfolk, Va.—Bond Offering.**—Proposals will be received until 12 M., June 16, by H. S. Herman, City Treasurer, for \$460,000 4% Atlantic City Ward street-improvement bonds. Denomination, \$1,000. Date, July 1, 1902. Interest semi-annually in Norfolk. Maturity, July 1, 1932. Bonds exempt from city taxes. Official circular states that no default has ever been made, and that no litigation is pending or threatened affecting these bonds. Certified check for 1% of par value of bonds bid for must accompany proposals, and a further deposit of 4% required of purchaser upon notification of allotment. Checks to be made payable to the City Treasurer.

*The official notice of this bond offering will be found among the advertisements elsewhere in this Department.*

**Northport (N. Y.) Union Free School District.—Bonds Voted.**—This district on May 28 voted to issue \$12,000 school bonds.

**Norwalk, Ohio.—Description of Bonds.**—The \$10,000 water-pipe bonds recently authorized will be issued in denomination of \$250, dated June 1, 1902. Interest March 1 and Sept. 1 at the office of the City Treasurer. Maturity, \$250 each six months from March 1, 1903, to Sept. 1, 1933, inclusive.

**Bond Sale.**—On June 9 the \$3,200 5% real-estate bonds described in the CHRONICLE May 10 were awarded to Harry E. Weil & Co., Cincinnati, at 107'493. Following are the bids:

H. E. Weil & Co., Cincinnati... \$3,439 79 | W. R. Todd & Co., Cincinnati... \$3,321 00

**Norwich, Conn.—Injunction Dissolved.**—The temporary injunction to restrain the city from issuing \$300,000 water bonds referred to in the CHRONICLE May 17 has been dissolved.

**Okolona, Miss.—Bond Offering.**—We are advised by E. J. Ezell, President Okolona Banking Co., that he will receive proposals until June 30 for \$30,000 refunding and \$10,000 electric-light-improvement 5% 20-year bonds. Authority, election May 12.

**Oneida County, N. Y.—Bond Sale.**—The \$350,000 3½% court-house bonds offered but not sold on June 5 were disposed of on June 10 to the Union Trust & Deposit Co. at 101½, the institution agreeing to pay 3½% interest on the average daily balance of the proceeds of the sale.

**Otsego Township (P. O. Hamilton), Steuben County, Ind.—Loan Negotiated.**—This township on June 5 sold at 101 to local parties \$4,500 6% 1-3-year (serial) township bonds.

**Pattonsburg (Mo.) School District.—Bond Sale.**—On May 29 this district sold the \$12,000 4½% school-building bonds mentioned in the CHRONICLE May 24 to J. W. Meade of Galatin, Mo. Denomination, \$500. Interest payable at the Merchants-Laclede National Bank of St. Louis. Maturity, 1922, optional after 1907.

**Payne Special School District, Paulding County, Ohio.—Bond Sale.**—On June 5 \$15,000 5% school-house bonds were awarded to Seasongood & Mayer, Cincinnati, at 106½ and interest. Following are the bids:

Seasongood & Mayer, Cin....	\$15,940 00	Denison, Prior & Co., Cleve..	\$15,865 00

Denomination of bonds, \$500. Interest, semi-annual.

**Rochester, N. H.—Loan at Private Sale.**—We are advised that the \$10,000 refunding school loan mentioned in the CHRONICLE May 24 was placed by private negotiations.

**Rush Township (Pa.) School District.—Bond Offering.**—Proposals will be received until 12 M., June 28, by S. Shafer, Secretary, for \$3,000 3½% bonds. Denomination, \$100. Maturity "any time after three years."

NEW LOANS.

\$460,000

CITY OF NORFOLK, VA.,

30-Year 4% Coupon Bonds

Of \$1,000 Each.

\$460,000 Due July 1st, 1932.

Interest Payable January 1st, and July 1st.

Sealed proposals will be received at the office of the City Treasurer of Norfolk, Va., until 12 O'CLOCK M., MONDAY, JUNE 16th, 1902, for \$460,000 four (4) per cent semi-annual Thirty (30) year Coupon Bonds, issued for Water, Sewerage, Paving and other permanent improvements in Atlantic City Ward.

Bids may be for the whole or part of said bonds, and must state price and accrued interest.

Bonds issued in denomination of \$1,000 each, and dated July 1st, 1902. Bonds and interest payable in Norfolk. All bonds to be issued as Coupon Bonds, but purchasers to have privilege of having same registered.

Bidders to enclose check for one per cent of par value of amount bid for. Immediately upon notification of allotment a further deposit of four per cent of par value of amount allotted shall be made.

Four (4) per cent interest will be allowed successful bidders on the five (5) per cent paid in, from the time of receipt of the four (4) per cent until bonds are ready to be delivered.

It is proposed to deliver the bonds to purchasers on 1st of July, 1902, but if for any reason delivery should be delayed beyond that date, purchaser will be required to pay accrued interest to time of delivery. The remainder of the purchase money to be paid immediately after purchasers are notified that bonds are ready for delivery.

Checks to be drawn on some State or National Bank, certified and made payable to order of H. S. Herman, City Treasurer of the City of Norfolk, Va. The right is reserved to reject any or all bids.

NEW LOANS.

TO HOLDERS OF

GALVESTON (TEXAS)

BONDS.

A proposition for an adjustment of interest now in default, and for future prompt payment of interest, has been made by authorized representatives of the City of Galveston to the Committee appointed by holders of Galveston bonds.

A copy of this proposition is being sent to holders of Galveston bonds who are parties to the bondholders' agreement.

It is important to all bondholders as well as to the City of Galveston that the action of the bondholders be as nearly unanimous as possible. The city is ready to promptly and regularly do all that it believes to be in the city's power to preserve its credit and to protect the city from damage by future storms. The present plans contemplate an expenditure of about \$3,500,000 for construction of sea-wall and filling, which, if accomplished, will, it is believed, prove an absolute protection to the city, establish its future status, and make the outstanding City bonds good beyond question.

The holders of Galveston bonds who have not signed the bondholders' agreement are requested to communicate with the Secretary, M. I. Mirick, 49 Wall Street, for further particulars.

\$70,000

DOVER, NEW JERSEY,

WATER LOAN BONDS.

Sealed proposals will be received by the Mayor, Recorder, Aldermen and Common Councilmen of Dover at the office of the Town Clerk, Dover, N. J., until 8 O'CLOCK P. M. JUNE 30, 1902, for the purchase of Water Loan Bonds of the said Town of Dover, in the State of New Jersey, amounting in the aggregate to \$70,000. Said bonds are issued by the Town of Dover under authority of an Act of the Legislature of the State of New Jersey, entitled "An act to enable incorporated towns to construct water works for the extinguishment of fires and supplying the inhabitants thereof with pure and wholesome water," passed March 5, 1884, and the several supplements thereto, and in pursuance of a resolution of the Mayor, Recorder, Aldermen and Common Councilmen of Dover, passed June 9, 1902, and are non-taxable. Said bonds are in the denomination of \$1,000 and bear date July 1, 1902, payable in 20 years from July 1, 1902, at the National Union Bank, Dover, N. J., with three and one-half per cent interest coupons attached, payable semi-annually at the same place. Said bonds will be issued by the Town Treasurer at such times and in such sums as the Town Council may require within one year from date. Interest to commence from time of issue.

The right to reject any and all bids is hereby reserved.

Each bid must be sealed and endorsed "Bond Bid."

Said bids will be opened by the Common Council at the Council Rooms in the Engine House, Dover, N. J., on MONDAY, JUNE 30, 1902, at 8 o'clock in the evening of said day.

No bid or bids will be accepted for said bonds at less than par.

## NEW LOANS.

### DOUGLAS COUNTY, NEB., NOTICE TO BONDHOLDERS.

Office of the County Clerk, Douglas County,  
Omaha, Neb., June, 1902.

Pursuant to the terms of a resolution adopted by the Board of County Commissioners of Douglas County, Nebraska, on the 17th day of May, 1902, for the refunding of the \$268,000 of the remaining bonded indebtedness of said County, issued January 1st, 1870, and for calling in and retiring an issue of five per cent bonds in the sum of \$268,000, dated July 2d, 1887, the County Clerk is hereby directed to forward copy of this notice through the Fiscal Agency to holders of the said indebtedness of January 1st, 1870, and to holders of said issue of bonds dated July 2d, 1887, that said indebtedness in the sum of \$268,000 together with interest thereon at five per cent per annum to July 1st, 1902, will be paid on June 20th, 1902, at the Nebraska State Fiscal Agency in the City of New York, and that said last-mentioned bonds having been issued without authority of law are void, the same will be taken up and retired. Further notice is given that interest on said outstanding indebtedness from and after July 1st, 1902, will cease.

By order of the Board of County Commissioners of Douglas County, Nebraska.

PETER G. HOFELDT,

Chairman Board of County Commissioners.

Attest:  
HARRY C. MILLER, County Clerk.
