REVIEW OF MAY.

Following the unsettlement of things caused by the San Francisco earthquake and fire in April, conditions during May considerably improved. The tension in the money market was in large measure relieved. There were also other favoring features. The San Francisco banks resumed regular business on May 21 and at the close of the month it was announced that the legal holidays which the Governor of California had declared from day to day since the earthquake would not be continued after Saturday, June 2.

Perhaps the most encouraging event of all, however, was the action of the anthracite miners in deciding to accept the proposal of the operators, thus terminating that important labor controversy. On May 7 an agreement was signed by the representatives of the anthracite coal roads and the mine workers by which the wages and conditions which had been in force in the anthracite regions from April 1 1903 to April 1 1906 (based on the award of the Anthracite Strike Commission appointed in 1902 by President Roosevelt) were extended for another period of three years. This was approved by the miners in convention the next day. Another favorable happening in labor circles was the collapse of the strike ordered at midnight April 30 on the Great Lakes by the International Longshoremen & Marine Transport Workers' Association to enforce recognition of the Union of Mates. The strike came to an end on May 9, work being resumed the following day, the effort to obtain recognition of the Union having failed. It should be noted, too, that apprehensions regarding serious labor troubles in France were likewise relieved—the May Day disturbances feared having been averted through the energy of the French Government in suppressing attempts at an uprising.

On the other hand, the developments in Washington legislative circles were somewhat unsettling. The U. S. Senate on May 18 passed the Hepburn Rate Bill by a vote of 71 to 3, after making very extensive and numerous amendments to it. Fortunately one of these amendments contains a provision for what is called a "broad court review" of the acts of the Interstate Commerce Commission under the new measure. On May 4 President Roosevelt sent a message to Congress, together with the report of Mr. Garfield, the Commissioner of Corporations, giving the results of an investigation into the oil business and severely arraiging the Standard Oil Co. for having, it is alleged, obtained secret rebates and other discriminations in its favor from the railroads. On May 25 the

Senate attached a rider to the Agricultural Appropriation Bill providing for Government inspection of the business and operations of the beef-packing concerns in the United States. This was accompanied by sensational stories alleging offensive and revolting practices at the slaughtering and packing establishments, and the matter was very extensively agitated in the newspapers and in Congress.

As regards the crops, conditions were not altogether auspicious. The monthly report of the Agricultural Bureau at Washington made the average of winter wheat the 1st of May 91, as against 89 April 1, but subsequently heavy frosts were reported with snow in several States. This was early in the month, and the growth of cotton in the South was also retarded by the low temperatures. Later, however, the weather improved, and the price of middling upland cotton in this market, after advancing from 11.75c. May 1 to 12c. May 16, closed at 11.45c. May 31. The price of print cloths at Fall River was reduced from 3¾c. a yard to 3½c. On the other hand, certain cotton mills in Connecticut and Massachusetts engaged in the manufacture of fine goods made a voluntary advance in wages of 10%, leading to a renewed agitation of the wage question at Fall River.

One of the events of the month was the announcement May 15 that an issue of Pennsylvania Company 4½% gold notes, due in November 1907, to the amount of \$50,000,000, and guaranteed by the Pennsylvania Railroad, had been disposed of through Kuhn, Loeb & Co. The whole amount, it is stated, was quickly sold at slightly below par, Kuhn, Loeb & Co., it is understood, acting simply as brokers, and the money being obtained by the railroad at a net interest cost of about 5% per annum. Subsequently it was reported that the Pennsylvania Railroad had also succeeded in placing a loan in Paris; the facts as to this, however, could not be ascertained. President Cas-satt was in Europe at the time, but certain disclosures at an investigation made by the Inter-State Commerce Commission, showing that some of the officials and employees of the road had received gifts of money and stock from patrons of the road, induced him to cut his visit short and sail for home.

In the stock market there was a complete reversal of tone and of the course of prices. The severe break in values noted at the close of April continued with increasing force the first two or three days of May and the market then at times had a panicky appearance. It had been announced beforehand that the President intended to send a message to Congress concerning the investigation by Commissioner of Corporations Garfield into the methods of the Standard Oil Co., and this was used to further the downward movement. But after the message made its appearance a considerable recovery in prices ensued. The next week announcement came that the anthracite miners had agreed to accept the terms offered by the operators and would return to work and also that the strike on the Great Lakes had fizzled out. The monetary situation also began to wear a more assuring aspect. As a consequence stocks gained strength from day to day and notable advances in prices occurred. The dealings, too, were on a large scale, averaging over a million shares for a number of days, and a very confident feeling grew up. The latter part of the month, owing to the developments at Washington, the market again became somewhat unsettled and transactions dwindled to small proportions, but the recessions in prices were not very large in most cases.

The foreign exchange market was quite weak the early part of the month, facilitating further engagements of gold for import under Secretary Shaw's plan of extending to the importers the use of Government deposits while the metal is in transit. The action of the Bank of England, however, May 3, in again advancing its rate of discount from 3½% to 4% caused a recovery in the exchange. After that the market developed strength and important advances in rates occurred, precluding further gold imports. The announcement that the Pennsylvania Railroad had effected a sale of \$50,000,000 of collateral trust notes led to liberal speculative selling of bills on the theory that a portion of the notes at least would be placed abroad. Though some exchange dealers at this time thought they detected signs of drawings of exchange by agents of foreign insurance companies, it later appeared that there had been no drafts of moment on the home offices of the companies. The Bank of England suffered further heavy losses of bullion early in the month as a result of the continued drain for the United States, but subsequently was able very materially to replenish its stock of gold with the cessation of this drain and some large gold arrivals from India. The Bank of Germany at the same time reduced its rate of discount from 5 to 4½%, and on the whole the monetary situation abroad considerably improved. But money rates here also declined, and the course of exchange rates the last half of the month was somewhat irregular.

Some considerable tension in money developed early in the month as the result of the liquidation in stocks and the continued drain of funds, through Treasury transfers, to San Francisco. Some fears were also expressed lest the new trust company law in this State might lead to considerable withdrawals from the banks. On the 2d call loans at the Stock Exchange touched 12 per cent. Subsequently, however, rates eased off, and May 31 the range for call loans was 2½@4 per cent. Rates for time money also declined.

Table with columns: STOCKS, SALES TO JUNE 1, PRICES IN MAY, RANGE SINCE JAN. 1. Rows include various stock companies like American Locomotive, American Malt, etc., with columns for Par, Shares, Bid, Ask, and price ranges.

a Less than 100 shares. x Ex dividend. b Ex rights. c Ex-dividend and rights. k Stamped extended.

GENERAL QUOTATIONS

OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue.* Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.

3. Bond prices marked (a) indicate that the purchaser must pay accrued interest in addition to the price given. The method of quoting on the New York Stock Exchange is to quote the price flat (that is, to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.

4. Stock prices marked (d) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the month when the bonds mature.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the closing day of the month preceding the date of issue, though often are nominal. An asterisk (*) denotes sales. The letter (h) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

ALABAMA—Nat. banks last call April 6; State institutions latest returns.
