### REVIEW OF FEBRUARY.

Conditions during February were much the same as in January. The financial markets were more or less in a state of uncertainty, with a disposition not to take too favorable a view of the future. The country's industries remained exceedingly active, with no evidences of any impending reaction, but considerable anxiety was felt with reference to the prospects of the railroads. The stock market reflected this feeling in a lack of tone and strength and in further liquidation.

Several causes contributed to the feeling of uneasiness with regard to the railroads. In the first place, their expenses have been increasing very heavily, with the result that large gains in gross receipts are being attended either by relatively small gains or by absolute decreases in the net. Quite a number of instances of this latter kind were disclosed in the returns which came to hand either for December or for January. Nor did there seem much likelihood of a change for the better in this respect, inasmuch as materials and fuel and practically everything else entering into the operating accounts of the roads remains very high. Furthermore, labor is costing more as a consequence of the advances in wages already made, while the tendency towards still further increases continues unchecked, a number of new advances having been announced in February.

Then also nearly all the roads seem to be urgently in need of supplies of new capital in order to provide the extra facilities required to take care of the ever increasing volume of traffic, while it is proving exceedingly difficult to float new obligations except on onerous terms. Owing to this fact, there were some further announcements of the issue of short-time obligations. Besides all this, the spirit of hostility against railroad and other corporate interests which has been so conspicuous of late has not abated. In many different States the legislatures were considering measures for the reduction of passenger rates, bills to that end having passed either one branch or both branches of the legislature in several States, and in some instances having become laws.

The investigation of the Harriman railroad by the Inter-State Commerce Commission also caused some disquietude. Nothing actually new was disclosed at the hearings conducted in this city, the facts with reference to the large capitalization of the Chicago & Alton having been well known. But a vague sort of feeling existed—whether ill founded or not need not be considered here—that these investigations of the Commission were intended as a basis for further

legislative or Governmental action against the roads. One incident in the examination of Mr. Harriman was his allegation that Stuyvesant Fish, the former President of the Illinois Central Railroad, during his incumbency of the office of President had used his position to further personal ends—an accusation which brought from Mr. Fish the response that the deposits of the Illinois Central Railroad Company in the Trust Company of the Republic and in the Commonwealth Trust Company (the name assumed by the Trust Company of the Republic after reorganization) which Mr. Harriman had criticised had been made in the ordinary course of business. Furthermore, Mr. Fish contended that he had borrowed from the Illinois Central Railroad only in the way that the other directors had done and always on ample security.

The most conspicuous instance during the month of the issuance of short-time obligations was that of the Pennsylvania Railroad, which sold to Kuhn, Loeb & Co. \$60,000,000 3-year 5% notes secured by car trusts and water bonds of the company and other collateral; \$50,000,000 of the sum is intended to take up a corresponding amount of Pennsylvania Company notes maturing next November. The Interborough Rapid Transit Co. sold \$10,000,000 3-year 5% notes. The Lackawanna Steel Co. sold \$5,000,000 2-year 5% secured notes. The Tidewater Construction Co., organized by H. H. Rogers and associates to build the Tidewater Railway, placed \$10,000,000 2-year 6% notes, secured by extensive collateral. The New York New Haven & Hartford Railroad, through Kuhn, Loeb & Co., placed \$28,000,000 (145,000,000 francs) 4% 15-year debentures abroad.

The offering of \$30,000,000 New York City bonds Feb. 1 resulted in the sale of the whole \$26,000,000 4s due 1956, but of the \$1,500,000 bonds due 1926 only \$511,000 were awarded, and of the \$2,500,000 assessment bonds due 1916 only \$1,075,000 were placed. The money cost the city close to 4%.

One of the features of the month was the pronounced activity in the dry goods market, particularly the cotton-goods branch. Purchases were large all along the line, and pretty general advances occurred in the prices of all classes of goods. Print cloths were marked up first from 4 to 4 1/8 cents, then to 4 1/4, then to 4 3/8, and finally to 4 1/2 cts. The raw material, cotton, was also slightly higher, namely 11.25 cts. Feb. 28 against 11 cts. Jan. 31.

The money market showed increased firmness in the call-loan branch, and time loans were in good demand with the offerings small, influenced by expectations of the maintenance of firm rates as the result of the borrowing by corporations independently of that through notes and other forms of contracts. Government deposits in national banks throughout the country were reduced by repayments in compliance with the calls previously made. But to get out Treasury accumulations Secretary Shaw on Feb. 11 offered to purchase \$25,000,000 United States 4s of 1907 at 101 1/2. Unfortunately the responses were very meagre, only \$1,389,300 bonds having been purchased up to Feb. 27. The financial community viewed with considerable satisfaction the progress made in Congress by the Aldrich Financial Bill; this passed the Senate Feb. 26 by a vote of 43 to 14. This bill allows the Secretary of the Treasury to deposit customs receipts in the depository banks as well as internal revenue, and increases from \$3,000,000 a month to \$9,000,000 the limit of the deposits of money for the retirement of national bank notes, besides providing for changes in the denominations of gold certificates and United States notes.

—Good 4 to 6 months	6 1/2	6 1/2	6 1/2	6 1/2

The course of the foreign exchange market was irregular. Early in the month it was generally strong; later the tendency was downward. The last half of the month there was much weakness, and yet there were quick recoveries at times. The ease was due to the offerings of bills against purchases here of American securities for foreign account and to expectation of increased supplies of drafts against the negotiation abroad of short-term corporation obligations. Some engagements of gold in London for shipment hither were announced early in the month, and American gold importers were then making arrangements for other purchases of the metal. Thereupon, according to report, representatives of the Bank of England approached the American importers with a request that they refrain from bidding, thus permitting the Bank to secure the gold. This request was acceded to, and the remainder of the month there was no competition by American bankers with the Bank of England for the gold which arrived in London. Through these purchases and by imports from Egypt the Bank was enabled to make a further large increase in its gold holdings, even after meeting a heavy demand for gold for South America.

The stock market showed some recovery in values the early part of the month, but with business on a small scale. The latter half weakness again developed, with some sharp declines in prices, and the last week the downward movement was further accelerated by the hearings in this city of the Inter-State Commerce Commission in its investigation of the Harriman properties. The very last day, Feb. 28, there was a sharp upward reaction on a very large volume of business, so that the tone at the close was quite strong.

# NEW YORK STOCK EXCHANGE

## MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1906. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the term is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference. All quotations in the column headed "Prices about January 2 1907" were made on that date, except those in italics, which are the nearest in January 1907. The black-faced letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

For foot notes to tables see last page of Bonds and last page of stocks.

# GENERAL QUOTATIONS

OF  
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.
2. Quotations from all Stock Exchanges are as near as possible for the closing day of the month preceding the date of issue. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.
3. Bond prices marked (a) indicate that the purchaser must pay accrued interest in addition to the price given. The method of quoting on the New York Stock Exchange is to quote the price flat (that is, to include the accrued interest in the price), and hence in the tables below no mark is now affixed where this method of quoting is followed.
4. Stock prices marked thus (d) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.
5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.
6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.
7. The black-faced type in the letters showing the interest period indicates the month when the bonds mature.

# STATE AND MUNICIPAL BONDS.

It is not the custom in quoting municipal bonds to include accrued interest in the price given. Hence this accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (\*).

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

Bonds.	Bid.	Ask.	To Net.	Bonds	Bid.	Ask.	To Net.	Bonds	Bid.	Ask.	To Net.

# BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the closing day of the month preceding the date of issue, though often are nominal. An asterisk (\*) denotes sales. The letter (h) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.
