Total Issue \$5,000,000.

Par \$100.

The J. G. Brill Company is the leading street railway car building company in the world. It owns five large modern plants, located in Philadelphia, St. Louis, Mo., Cleveland, Ohio, Elizabeth, N. J., and Springfield, Mass., giving the Company a capacity for constructing 3,500 cars and 6,000 trucks per annum, having a valuation of \$8,000,000. The Company's business is extensive; its cars being in use in the principal cities of this and foreign countries.

The Brill business was founded in Philadelphia in 1869. The Company has an enviable history of uniform success, and has paid dividends from its foundation. The present Company, which was recently incorporated and which absorbed the old Brill Company, has a capital of \$10,000,000, of which \$5,000,000 is Preferred and \$5,000,000 Common stock. The net profits were \$1,001,897 In 1906. This is \$651,897 in excess of the amount required to pay the dividend on the Preferred stock.

A quarterly dividend of 134 % was declared April 22d, 1907, on the Preferred stock, and a dividend of 1 % was declared on the Common stock.

The Company has a surplus of quick assets of more than \$2,000,000. There are at present on its books orders amounting to more than \$5,000,000. There is no bonded debt on the property, except a mortgage for \$400,000 on one plant. No bonded debt may be created without the consent of 75 % of the Preferred stock.

Application has been made to list the Preferred and Common stocks on the Philadelphia Stock Exchange Descriptive Circular will be mailed upon application to the undersigned.

We offer the Preferred Stock at \$100 a Share and Accrued Dividend subject to previous sale and advance in price without notice, and recommend it as an excellent Industrial Investment.

TO THE STOCKHOLDERS OF

United Railways Investment Company

FIFTH ANNUAL REPORT FOR THE FISCAL YEAR ENDED DECEMBER 31, 1906

On behalf of the Board of Directors I beg to submit the Fifth Annual Report of your Company, together with the Company's general balance sheet and statement of income and proit and loss account for the fiscal year ended December 31, 1906, to which is appended the certificate of Messrs. Haskins & Sells, Certified Public Accountants, who, in accordance with the usual custom, have examined and audited the books and accounts of your Company for that year. I think it is proper to direct your attention specifically to certain transactions of the last fiscal year. During the year 1906 your Company acquired \$24,200,000 (par value) of the common capital stock of the Philadelphia Company, an amount which is approximately 72.8 of the outstanding common capital stock of that company. Of the stock so acquired \$21,000,000 (par value) was deposited by stockholders of the common stock of the Philadelphia Company under the Plan and Proposition ratified at a meeting of stockholders of your Company held on the 5th day of April, 1906, and the purchase price there-duly pledged and deposited under the Collateral Trust Agreement securing the Five Per Cent Prior Lien Collateral Trust Bonds of your Company and paid for by it prior to the 31st day of December, 1906, and the balance, amounting to \$3,200,000 (par value), was acquired later in the year, and of that amount \$2,690,000 had been delivered to your Company and paid for by it prior to the 31st day of December, 1906, and the balance, amounting to \$510,000, was delivered to your Company and paid for by it in January, 1907. The purchase price of such \$3,200,000 of common stock was derived finally, in part, from the sale of \$2,400,000 of the additional Five Per Cent Collateral Trust Bonds of your Company, and of the residue of such available cash assets of the Company. By reason of the issue of the additional Five Per Cent Collateral Trust Bonds mentioned, the funded debt of your Company, which amounted funded debt is now \$18,150,000. The certificates for the \$3,200,000 has been incr

on the 31st day of December, 1906, to \$15,750,000, has been increased since that date by the amount of such additional bonds, and the total funded debt is now \$18,150,000. The certificates for the \$3,200,000 of stock of the Philadelphia Company, so acquired, were duly deposited and pledged under the agree-ment securing the Collateral Trust Five Per Cent Bonds of the Company, in accordance with the terms thereof, concurrently with the issue and authentication of the additional Bonds. The floating debt of your Company, which, according to the balance sheet presented, amounted to \$2,090,000 on the 31st day of Decem-ber, 1906, has since been repaid from the proceeds of the additional Collateral Trust Bonds above mentioned, and the floating debt of your Company at the date of this report amounts approximately to \$135,000, which will, however, again be increased presently, as your Directors have arranged to provide funds for the United Railroads of San Francisco towards the accruing requirements of that Company for the recon-struction and improvement work in progress. The total book value of the investments of the Company, as shown on the accompanying balance sheet, amounted on December 31, 1906, to \$53,126,481 70, approximately one-half of this representing the Company's interest in the United Railroads of San Francisco and the other half representing its interest in the common stock of the Philadelphia Company at that date. During the current year the Philadelphia Company has paid the regular dividend on its preferred stock and the usual dividend of 6% on its common stock, and all the surplus earnings of that company, above the amount of dividends, has been retained by that company for its corporate purposes.

corporate purposes. Both the gross and net earnings of the United Railroads of San Francisco had shown excellent results up to the 18th day of April, 1906. On that date the earthquake occurred, which resulted in a disastrous fire and involved the company in great loss, which included the destruc-

Both the gross and net earnings of the United Railroads of San Francisco had shown excellent results up to the 1sth day of April, 1906. On that date the earthquake occurred, which resulted in a disastrous fire and involved the company in great loss, which included the destruc-tion of the cable power houses and severe injury to the cable conduits. That company reports that it has now installed the overhead trolley system on practically all the important roads formerly operated by cable, and that over 91% of the mileage of the company is now in operation and that they expect to place the balance of 9% in operation as rapidly as the City completes certain necessary street improvements. The balance sheets of the United Railroads of San Francisco furnished to this Company show that, between the 31st December, 1905, and 1st March, 1907, there had been expended in the restoration and reconstruction of its lines and plant, including improvements and better-ments and the physical loss resulting from the earthquake and fire, a total of over \$4,000,000. The conditions existing in San Francisco, created by that company, and that its current liabilities, as evidenced by its balance sheet dated Feb-ruary 28, 1907, did not on that date exceed the amount usually carried by that company. The conditions existing in San Francisco, created by and consequent upon the earthquake and the fire, also led to a strike on the lines of the Railroad Company, involving practically all its employees, which lasted from the 26th of August to the 5th of September, 1906. Although the strike terminated in a resumption of work on the part of the Company's employees, under an agreement to refer to arbitration the matters in dispute, which were the terms of adjustment originally offered by the Railroad Company, it yet occasioned, both directly and indirectly, con-siderable financial loss to that Company. The decision of the arbitrators established a rate of wages for a period terminating May 1, 1907. Necotiations are pending between the umployeee

Messrs. Haskins & Sells, however, have prepared a tabulated statement of the consolidated gross earnings, operating expenses, taxes, int-erest charges, net income, dividends and surplus of the Philadelphia Company and the United Railroads of San Francisco, for the calendar year 1906. For the reasons stated, with respect to the Annual Reports of the two companies, the figures for the year 1906 are in part based on the provisional figures of the accountants.

COMBINED INCOME ACCOUNT OF UNITED RAILROADS OF SAN FRANCISCO AND PHILADELPHIA COMPANY AND AFFILI-ATED CORPORATIONS, FOR THE YEAR ENDED DECEMBER 31, 1906:

Non-York April 16 1007		100 //	. = / .

New York, April 16, 1907.

The figures given by these tables afford a reasonable basis for the calculation of the future prospects of your Company. When it is con-sidered that in the course of the year 1906 the earnings of the United Railroads of San Francisco have been subjected to the earthquake, the resulting conflagration, and all its consequences, the strke of its employees, and the consequent general demoralization, they offer a most encouraging promise for the future and justify the hope that at no distant date payment of cash dividends may be resumed. From this statement it will also be seen that had the Investment Company been the owner during the entire year 1906 of the common stock of the Philadelphia Company now held by it, and had the respective surpluses of the two companies been declared as dividends, the Investment Company would have shown an earning power during that year of \$2,821,975 75, which would have been equivalent to paying its operating expenses, interest on its outstanding obligations, and 5% dividends on the outstanding preferred stock, leaving a surplus of \$1,460,968 20. \$1,460,968 20.

MAY 11 1907]

THE CHRONICLE.

Financial

UNITED RAILWAYS INVESTMENT COMPANY (Concluded)

No cash dividends were paid during the year 1906 by the United Railroads of San Francisco, all its receipts over and above fixed charges and taxes, and all the surplus earnings of the Philadelphia Company, above the amount of dividends paid by it, having been retained by the respective companies for their respective corporate purposes. Notwithstanding the unfavorable circumstances affecting the San Francisco properties, it appears from a comparison of this statement t with a similar statement of Messrs. Haskins & Sells for the year 1905 that the combined gross earnings of the properties for the year 1906 exceeded those for the year 1905 by \$786,743 73, and after the deduction of all charges against the net earnings, the statement shows an amount for the year 1906 applicable to improvements, betterments, extensions, sinking funds, depreciation and dividends of \$5,479,558 71, as compared with \$5,105,109 73 for the year 1905, an increase of \$374,448 98. All of which is respectfully submitted.

Jersey City, N. J., April 16, 1907.

ERNST THALMANN, President.

Codes Used: Lieber and A B C 5th Edition

Peabody, Houghteling & Co.

(Established 1865)

181 La Salle Street CHICAGO

We carry at all times a conservative line of high-grade Investment Securities including:

CHICAGO REAL ESTATE MORTGAGES

In amounts of from \$1,500 to \$100,000 each secured upon valuable improved Chicago Real Estate. Our judgment in such important requirements as valuation of security, quality of improvements, desirability of location and income value is the result of over forty years' active and continuous experience in the Chicago field. Such mortgages yield from 4 to 6%.

CHICAGO REAL ESTATE SERIAL GOLD BONDS

In denominations of \$500 and \$1,000 each, secured by first mortgage upon high-grade modern Apartment Buildings, or upon large modern down-town Office Buildings—a most convenient and desirable form of investment yielding $4\frac{1}{2}$ to $5\frac{1}{2}\frac{9}{0}$.

RAILROAD, TRACTION AND PUBLIC CORPORATION BONDS

Having behind them in every case a substantial margin of security, successful history, ample earnings and sound management. Such bonds yield from 5 to $5\frac{1}{2}\%$ net.

STEAMSHIP BONDS

First Mortgage Serial Bonds secured upon modern Steel Steamships on the Great Lakes enjoy an enviable reputation in the investment market. After a most searching investigation we have been unable to discover a single instance of default in interest or principal in such issues. Such bonds are a legal investment for Michigan Savings Banks and yield about 5%.

INDUSTRIAL BONDS

Secured upon such stable natural resources as Timber, Coal and Iron Ore Lands, which are steadily increasing in value and which are so developed as to have ample income-producing capacity for the protection of principal and interest. Also the bonds of well known manufacturing corporations having long established and successful history. The margin of security in such bonds is invariably very large, and the bonded debt is always payable in substantial annual or semi-annual amounts, thereby increasing the value and safety of the investment from year to year. These bonds net from $4\frac{3}{4}$ to 6%.

Descriptive Circulars and Prices will be sent promptly on application.

ANNOUNCEMENT

We are now established in our new offices on the Banking Floor of the Borland Building, at the Southeast Corner of La Salle and Monroe Streets, Chicago, where we are more conveniently located and better equipped than ever to care for our rapidly increasing business.

THE FINANCIAL SITUATION.

The political outlook, at least so far as the Republican Party is concerned, has the current week, according to present appearances, passed out of its foggy surroundings into a much clearer atmosphere. The most important announcement along these lines is that Senator Foraker and his Ohio followers have announced themselves as in favor of Mr. Taft; that the Republican leaders of Ohio would be called together at Columbus May 15, and that they expected a unanimous declaration on that occasion in favor of Mr. Taft as the party's choice in that State for the Presidential nomination.

This looks as if it substantially settled the question as to who will be the candidate named at the general national convention of the party. There was no one in the country except Senator Foraker who could have put up a formidable opposition to Mr. Taft; with Mr. Foraker's withdrawal the way seems to be clear for the choice of Mr. Taft as the candidate, and presumably clear as to his election. He is a man whom every one respects, and no opposition can be made to him except on the ground that he is the heir to the place appointed by the present ruling President and his designated representative of the policies he will have been foremost in advancing during nearly eight years when his present term expires. This action has a hopeful aspect, as it scatters some hitherto disturbing doubts. There can be no question hereafter as to an impending third term; that danger is wholly removed. What is also h ghly important is that Mr. Taft is an extremely able, manysided man of sound judgment. He is not controlled by pride of opinion, petty prejudices nor by a hysterical temperament. If time should prove that any of the recently enacted laws are working industrial mischief, he will not hesitate to urge remedial legislation, notwithstanding he wears Mr. Roosevelt's mantle.

Another incident, which ostensibly is expected to help the same tendency of the Republican Party towards consolidation, has been the practical withdrawal of the Senatorial opposition in the New York State Senate to Governor Hughes's Public Utilities bill. The exact shape this issue has now taken cannot be fully understood or the effect of the change be reckoned with until the Utilities measure is passed and signed; up to that time we can hardly know what we are discussing. There has been a large opposition within the Republican Party in the Senate to leading features of the proposed measure, and on questions of vital importance, involving principles of great moment, principles which we cannot believe have been or can be shaken off in a night. The public, as we have said, will have to wait until the measure has been passed, and until its purport is known before a correct judgment can be reached. If the bill when enacted accords with the desires of the Governor as heretofore expressed, we shall be greatly disappointed in the utter surrender of the Senatorial opposition; it evidently was based on sound principle and should not have been abandoned.

That is by no means saying that the one-man power is desirable. Such a situation would be in keeping with Russian ways, but is by no means as a rule compatible with our own institutions. The old town meeting is what political arrangements in the United States grew out of, and though not perhaps suitable as an exact sample to copy for present use, it is a kind of arrangement that does not breed autocracy. Governor Hughes consequently must not be surprised if conservative circles are earnestly opposed to having his Utilities bill so worded as to give him absolute power to appoint and remove commissioners. No doubt it would be easier for the Governor to execute the measure if it were in the form he wishes; and as Mr. Hughes is honest, and will be guided only by good motives, so far as his judgment is faultless, no one questions the intent. On the other hand, it should be kept in mind that equally good motives and not captious opposition has been moving those who desire to have the appointment and removal power limited to the Senate's approval. We cannot forget that long usage in such cases is the safer precedent to follow. Much the same sort of reasoning leads to the conclusion with reference to the court-review provision of the same bill. Nor are these all the objectionable provisions in his bill.

A favorable development of the week in textile circles has been the wage adjustment agreement entered into between the representatives of the operatives and the Manufacturers' Association at Fall River. It marks quite a distinct departure from the methods employed in adjusting wage differences between mill owners and employees in recent years. Strikes, or threats of strikes, lock-outs, long periods of idleness and ultimate considerable loss to the wageearners have been the usual accompaniment of most struggles for more pay. But now we have the adoption of a scale, acceptable alike to stockholder and workman, without any particular antecedent friction. The new agreement, which goes into effect May 27th, and is binding upon both parties for a period of six months, practically assures an advance of 10% in wages to the cotton mill operatives in Fall River. Under it an adjustment is to be made each half-year, the last Monday in May and November respectively, the basis of which is to be the average margin between cotton and cloth the preceding six months.

The prosperous condition of affairs in the cottonmanufacturing industry of Fall River, and the willingness of mill owners to have their employees share in the present prosperity, made the reaching of the agreement a comparatively easy matter. Not only have the operations of the mills shown excellent financial results for some little time past, but the outlook for the future is considered bright. The quarterly distributions to stockholders in the form of dividends have been very satisfactory for many recent periods, and particularly so in 1907, the average rate for the first quarter having been $2\frac{1}{2}$ % and for the second quarter about $2\frac{1}{4}\%$, or 4.70% for the half-year. For the corresponding half-year of 1906 shareholders received on the average only 3.26% and in 1905 but a little over 1% (1.15%). In fact, not since 1900, when the six months' dividend payments reached 4.44%, has there been such a favorable showing. It is also worthy of mention that all reports agree in stating that the

Absolute efficiency can only be attained when all power is lodged in one man. The nearer a corporation or a government gets to that position, the more nearly t comes to reaching a state of relief from many sorts of friction met with in the operation of a statute.

MAY 11 1907.

mills generally have made earnings substantially in excess of dividends.

The financial surroundings have been of interest the current week. On Monday there were somewhat confident expectations that gold would soon be shipped hence to Paris as an arbitration operation. Such expectations were based upon the low rate of 25 rance $14\frac{1}{2}$ centimes for exchange at Paris on London, upon the advance in short sterling at New York on the British capital to 4 8655 and also upon the rise in the price of gold bars in the London bullion market to 77 shillings 934 pence per ounce, the latter indicating active competition between the Banks of England and of France, as was the case in the previous week, for the metal from South Africa which was offered in the market on that day. Though computations showed that there would be no profit to American shippers in exporting gold to Paris, even if the factors above noted should remain unchanged, it was regarded as probable that if the requirements of the Bank of France or of French bankers for gold were sufficiently urgent, inducements might be offered to American bankers-in the form of an allowance of interest on the metal while it was in transit—which would so far eliminate the time-cost of the operation as to enable a cable transfer on London to be drawn for the reimbursement of the exporters.

On Tuesday there was an unexpected reversal in exchange conditions which deranged all calculations of possible exports of gold, at least at present. Exchange at Paris on London advanced 11/2 centimes and sight sterling and cables at New York on the British capital became weak, and on the following day much lower rates for these classes of sterling were recorded. One reason for the decline in our exchange market was the offering of bills against a matured installment of corporation notes which had been negotiated in Paris some weeks ago. It was suggested that the rise in exchange at the French capital on London was due to the transfer to the latter centre of the credit resulting from the above-mentioned note negotiation; this suggestion seems to be reasonable, for by Wednesday exchange at Paris on London declined $\frac{1}{2}$ centime.

The abrupt changes in the factors of exchange at New York and at Paris on London which have occurred this week seem to show a need for caution on the part of any bankers who may be inclined to undertake gold exports as an arbitration operation. Unless they can have the assurance of the elimination of the timecost, either through the allowance of interest on the gold or otherwise, exports of the metal as an arbitration operation will be hazardous. A movement of the metal hence to Paris appears to depend upon the rance's requirements. If urgency of the Bank o these can be satisfied in he or inary way-that is to say, through regular exch ng transactions-the Bank moderate premium on the may be disposed to pay gold it seeks to procure at London, without offering inducements to American bankers to forward the metal from New York. Should, however, the price of gold be much further advanced at the British capital before the French demand shall have been satisfied, it may be a question of cost whether to draw the gold from London or to attract it from New York. It has so happened, however, that instead of a further advance in gold, the price dropped yesterday (Friday) 1/4

RASER

Digitized,

of a penny, indicating less resistance to the efforts of the Bank of France to the procurement of the metal that will be offered on Monday instead of greater resistance.

Other than the foregoing and an increased sensitiveness in money, nothing of a financial nature had any special influence on the movement of Wall Street affairs until Thursday. Then the early market, which had been almost stagnant, became notable for declines in the Metropolitan Company and Brooklyn Rapid Transit, &c., said to be due to a belief that the Public Utilities bill in its present shape would affect harmfully these and other local properties. It was not till between 2 and 3 o'clock of that day that the details were made public of the stock and bonds to be issued by the Southern Pacific and Union Pacific railroads, the particulars with regard to which will be found in our "Investment and Railroad Intelligence" department. The character of these announcements differed materially from what had been anticipated by investors and dealers, and were followed by a severe decline in Union Pacific and Southern Pacific securities. Up to that time the security market had been very quiet, much like the previous week. Indeed, operators at the Exchange, as a result of the persistent absence of any outside demand for stocks, had turned their attention to taking chances in the breadstuffs and cotton markets. This was quite natural. With literally nothing doing in stocks, and no signs of a better situation in the near future in that direction, at a moment, too, when no little doubt attends the outcome of crops in both the United States and Europe, the field for the operator, buying and selling commodities, was certainly more inviting where activity prevailed than struggling with the prolonged dulness of the security market.

The report on the condition of the winter-grain crops May 1, issued by the Agricultrual Department yesterday, indicates, as expected, a considerable deterioration during the month as a result of the decidedly adverse weather. In fact, the condition of winter wheat is placed at only 82.9, which compares with 89.9 on April 1 this year, 91 on May 1 1906 and 92 on May 1 1905. In some of the more important wheatproducing States the contrast between this year and last is very marked, the condition in Kansas May 1 this year being given at 82, against 87 last year; California, 79 against 89; Ohio, 77 against 94; Indiana, 74 against 94; and Oklahoma 72 against 93. It is found that the percentage of abandoned acreage, as a result of the damage by insects as well as the weather, is quite large, the area remaining in cultivation on May 1 being reported at about 28,132,000 acres, as compared with 31,665,000 acres sown last fall, or a loss of 3,533,000 acres—over 11%. The above represents, of course, the condition of the crops at the close of April. Since the first of May however, there has been, according to the United States Weather Bureau, a continuation of unfavorable conditions over most of the country. The bulletin for the week ending Monday last (May 6) reported abnormally cold weather quite general, with temperatures much below freezing in many sections and heavy frost over northern districts, and light to heavy frosts as far south as Northwestern Texas. • What further deterioration has occurred remains for time to determine.

1089

THE CHRONICLE.

It is interesting to note in this connection that latest advices from Europe indicate, on the whole, a rather unsatisfactory cereal crop situation. But, as bearing upon the demand for our cereals the coming season, advices from Argentina attract more attention. Although not as yet a great producer of cereals, Argentina is steadily gaining prominence, especially in the corn markets. The news from that country, therefore, to the effect that the injury to the corn crop is even greater than hitherto believed, is important. The general impression is now stated to be that from the area under corn (which has been greatly extended during recent years) the actual yield this season will not much, if at all exceed, one-third of a bumper crop. As last year users of corn in Europe largely increased their takings of Argentina corn at the expense of our export trade in that cereal, the importance of this news, if true, becomes apparent.

Self-inspection is often recommended as a good rule for the individual. Why would it not be an equally good rule for our various State legislatures? Instead of copying one another in their haste to put crude and ill-considered legislation on the statute books, would it not be better to make an investigation and determine whether the laws already in force are proving beneficial? We must credit our law-makers with good motives even when they act in response to some whimsical impulse or the unreasoning dictates of popular clamor. First and last we must assume that it is their desire to promote the public weal. They obviously imagine they are acting to that end when they co-operate in the effort to create new laws. Yet the statute books of every State are already overloaded with much harmful legislation, some of it vicious in character and all of it mischievous in its tendency and operation. Many of these objectionable laws no attempt is ever made to enforce, because their baneful character is so obvious or because public sentiment would not endorse efforts to make them efficacious. Still others are being scrupulously executed without any one paying particular attention to the injury they are working to the community. Instead, therefore, of joining in the movement to add to the volume of legislation, is it not quite possible that more glory and more advantage could be gained by repealing or modifying existing laws? We all have a deep interest, whether we live in one State or another, in seeing that in the general progress and advance our own particular community shall not suffer. It is obviously short-sighted and unwise if we handicap and retard our home development to gratify a feeling of spite against capital or against moneyed interests or large corporations, or yet because we want to be in the fashion and join in a general crusade against these various agencies so essential to the welfare and progress of the whole community. Why not, therefore, make a study of existing laws with the view to seeing if they are so framed as to allow growth and development to go on unhindered and give the fullest freedom to individual action and initiative consistent with the common good. Governor Guild of Massachusetts made a suggestion of this kind recently. He recommended the establishment of an unpaid commission to consider the upbuilding of the commerce and industry of that State. About ten days ago President Lucius Tuttle of the Boston & Maine Railroad was before the Joint Committee on

Ways and Means of the Massachusetts Legislature speaking in favor of the proposition. Mr. Tuttle made some interesting and significant remarks anent the state of things existing in that Commonwealth today. He pointed out that if the people of the State wish Massachusetts capital to be invested in Massachusetts industries, the laws must be so framed as to induce such investment. The present laws and system of doing business are not such as to tempt investors. For example, if an existing railroad wishes to build a branch which will cost \$2,000,000, the stock for the improvement must be issued at the market price, which may be \$165, but a new company could be formed for a subscription for the line and issue its stock at \$100 per share. In this way the stockholders of the new corporation could receive 7% while stockholders of an existing railroad for the same investment could receive only about 4%. A commission for the study of the subject, he argued, would be a good thing, especially if it led to the re-framing of the laws which are now driving Massachusetts capital out of the State. A railroad which is incorporated in another State may come into the Commonwealth and buy stocks of Massachusetts corporations, but a railroad incorporated in Massachusetts cannot do so. Her restrictive laws hold returns on many investments down to about the same return which could be had in a savings bank, and most people, he observes, prefer the savings bank-a statement, of course, that cannot be controverted. The case of Massachusetts is by no means an isolated one. Many other States also have harmful laws in operation, and where such statutes do not exist the legislatures, out of a mistaken zeal, are engaged in attempts to create the same. Why not now change our tactics by emulating our legislative brethren when they are engaged in beneficial moves rather than in questionable ones? Is not the suggestion worth careful consideration? At all events, we are certain that much good would result if the fact were recognized that, for the general prosperity, what is needed is, not more legislation but less legislation.

There are indications at last that iron production in the United States is to expand in some measure in the near future, and this is an encouraging feature —not that the output has not all along been extremely large, but that for some time production has been practically stationary at a moment when there appeared to be no limit to the consumptive demand. The "Iron Age" of this city has the present week made public its usual monthly-statistics, and they show that in April, a thirty-day month, the output of the coke and anthracite furnaces was 2,216,568 tons, against 2,226,457 tons in the thirty-one days of March. In other words, with one day less, the output for April was almost as large as that for March. However, these figures do not give an adequate idea of the extent to which production has actually begun to increase. The "Age" points out that while 14 coke furnaces were "blown in" last month and only 4 were "blown out," making a net gain of 10, a number of these began operations in the latter part of April so that they did not contribute greatly to the product of that month. It appears that on May 1 the 323 furnaces in blast at that time had a capacity of 523,912 tons, while the 313 furnaces in operation on April 1 had a

[VOL. LXXXIV.

MAY 11 1907.]

capacity of only 497,756 tons. Hence, on May 1 the capacity was over 26,000 tons per week larger than on April 1, an increase at the rate of almost $1\frac{1}{2}$ million tons a year. Furthermore, since the beginning of May, three more furnaces of large capacity have become active and these will add 6,000 tons additional to the weekly capacity. Our contemporary points out a noteworthy fact, namely that the increase in output and in capacity is almost entirely due to the works of the steel furnaces. These made in April 1,446,788 tons as compared with 1,424,827 tons in March. That the steel works are enlarging their output of pig iron cannot be deemed strange, for it is these same steel works that are in most urgent need of pig iron for conversion into steel, so as to satisfy the steadily increasing demand for the latter; for it is indisputable that up to the present time the consumption of steel is being maintained at the highest totals ever reached, notwithstanding the adverse developments which have occurred in a number of directions.

Under the name of the Morganfield & Atlanta Railroad the Louisville & Nashville Railroad has built 28 miles of road from Providence to Morganfield, which began operation on Saturday last. At the opening celebration, Mr. J. H. Ellis, Secretary of the Louisville & Nashville Railroad, delivered an address on "Railway Stock and Stockholders" in which he dealt at length with the present wave of hostile legislation against railroad interests. It was a felicitous occasion for dealing with the subject. Local residents were rejoicing over the boon of railroad facilities, so long denied to them, and hence were in a position to appreciate the value of railroad connection with the outside world and the importance of throwing no obstacles in the way of other communities obtaining the same advantages. Mr. Ellis gave some interesting facts with reference to the early history of the Louisville & Nashville which we have not space to repeat here. But what he said concerning the spirit of antagonism towards railroads will appeal to a wide constituency. He points out that it is not alone the interests of stockholders that are threatened by intrusive legislation of this kind. For if serious reductions in rates are successfully enforced the consequent reduced income of the railroads must result in diminishing expenditures and so the whole thing will react on the public. The average railroad manager desires but two things-first to give the patrons of his railroad the very best service in the power of his company, at the lowest possible rates, and, second, to so operate the property intrusted to him that the stockholders, who are his principals, shall receive a fair return upon their investment. The average railroad man is honest; he willingly wrongs no one and he is a good citizen. Coming to the matter of "watered" stock, Mr. Ellis says that if one were to judge solely by one case of some notoriety, there is ground for complaint. But the trouble lies in the easy way in which perfectly legitimate and lawful increases of capital stock are by nonreflecting people lumped with really reprehensible transactions, such as have lately been so prominently before the public. The capital of the Louisville & Nashville has been increased from \$3,000,000 to \$60,-000,000 without there being one drop of so-called water in it at any time. He well says that there is a

ed for FRASER

vast deal of nonsense talked about watered stock. There are at least two conditions under which capital stock may be prudently and lawfully increased. First, when for any length of time the profits from the business have been withheld from the stockholders and appropriated to betterments and additions to the capital property. In such a case the stockholders rightfully add to the divisional value of the property by increasing the stock and distributing the increase proportionately among themselves. Second, when the management and directors of the company believe it to the interest of the stockholders to make extensions, improvements or additions to the property for the payment of which the stockholders have not contributed, then the stock may and obviously should be increased and the stockholders be required proportionately to take and pay for the increased stock. And yet both of these processes are almost uniformly among some people and by some newspapers denounced as wrongful, and worse.

No doubt there is excessive capitalization among some railroads. But is it so hideous a thing as we are asked to believe? It is not criminal. It is not something done secretly and in the dark. It must necessarily be public and known to every one. Inflated securities are justly measured where values are fixed and no one is deceived. Nor has over-capitalization the remotest connection with the adjustment of railroad rates." They who talk of shippers and the travelling public being burdened with extortionate rates that the railroads may pay dividends on excessive capitalization are ignorantly associating two entirely separate and independent things. With any given schedule of rates, a railroad, however prudently operated, can earn but a certain sum from a given volume of traffic, and what matters it if that sum be 3% on \$100,000,000 or 6% on \$50,000,000. Even supposing a railroad to be so capitalized as to preclude, under ordinary conditions, the paying of anything to its stockholders, will it mend matters by throwing around it such legal or illegal restraints as to Mr. Ellis render it forever impossible to do so? urges that there is grave inconsistency in the persons and in the position of some notable minds of many thousands of people on the railroad question; for while uttering all manner of intemperate things about possible or impossible evils, which will propose for enactment laws they deprive the railroads of the means of correcting them.

This is undoubtedly the correct view to take and it is to be hoped that in time the fact can be clearly impressed upon the public mind.

There was no change in official rates of discount by any of the European banks this week; compared with last week unofficial or open market rates were $\frac{1}{8}$ of $\frac{1\%}{100}$ lower at London, steady at Paris and $\frac{3}{8}$ of $\frac{1\%}{100}$ higher at Berlin and at Frankfort.

The striking feature of the statement of the New York Associated Banks last week was the decrease in the surplus reserve by \$5,522,150, to \$6,824,625. This was due to a loss of \$1,918,000 in cash and to an increase of \$3,604,150 in reserve requirements. Loans were expanded by \$16,902,700 and deposits were augmented by \$14,416,600; a bout \$7,000,000 of the increase in loans and in deposits resulted from the inclusion in the statement of the returns of the Four-

teenth Street Bank, which was admitted to membership in the Clearing House last week. The bank statement of this week should reflect, among other items, the transfer hence to San Francisco of \$2,000,000 and also considerable absorptions of cash from the banks through Sub-Treasury operations.

The indications of an unfavorable bank statement this week as the result of the above-noted withdrawals of cash and also of the apparently speedy termination of redemptions of 4% bonds of 1907-such redemptions having already amounted to \$24,462,700, out of the \$25,000,000 called for surrender for this purpose -contributed to the development of a firmer tone for money on call and likewise for loans for short fixed periods. This improvement in the tone for time loans induced more liberal offerings after the middle of the week. but there was no recession in rates; it is note worthy that the bulk of the offerings came from Western banks. It was reported that unusually low quotations had been made for choice commercial paper, but these rates could not be verified; there was, however, an increase in the demand.

Money on call, representing bankers' balances, loaned at the Stock Exchange during the week at 3% and at 2%, averaging about 23%; banks and trust companies quoted $2\frac{1}{2}\%$ as the minimum. On Monday loans were at 3% and at $2\frac{1}{2}\%$ with the bulk of the business at $2\frac{3}{4}\frac{c}{0}$. On Tuesday transactions were at $2\frac{3}{4}$ % and at $2\frac{1}{2}$ % with the majority at $2\frac{3}{4}$ %. On Wednesday loans were at 3% and at 2% with the bulk of the business at $2\frac{1}{2}\%$. On Thursday transactions were at 3% and at 2% with the majority at 23%. On Friday loans were at 3% and at $2\frac{1}{2}\%$ with the bulk of the business at 3%. Time contracts on good mixed Stock Exchange collateral were quoted at $3\frac{3}{4}\%$ for thirty and 4% for ninety days; $4\frac{1}{4}\%$ for four to five, $4\frac{1}{2}\%$ for six and $5\frac{1}{4}\%$ for nine to twelve months; the rates for the longer maturities, however, represent loans for moderate amounts. Expectations of large borrowings by railroads caused a decline in corporation notes. Commercial paper was in demand chiefly by local and Eastern houses; rates were $5\frac{1}{2}\%$ for sixty to ninety day endorsed bills receivable, $5\frac{1}{2}\%$ for choice and $5\frac{1}{2}@6\%$ for good four to six months' single names.

The Bank of England rate of discount remains un-

The foreign exchange market was active this week with a strong tone on Monday, when the highest rates of the year were recorded. There was a sharp fall on the following day, succeeded by a feverish movement, and the market was generally lower to the close. Monday's advance in exchange was due to a good demand for remittance and to a scarcity of bills. Expectations of shipments of gold hence to Paris, as an arbitration operation, seemed to be entertained by some of the speculators in the market, and there appeared to be some basis for such expectations in the low rate for exchange at Paris on London. The tone remained strong during Monday, but on the following day it grew easier, because of a relaxation in the demand for remittance, and in the afternoon liberal offerings of bills against an installment of corporation notes which had been negotiated at Paris resulted in a sharp decline that encouraged speculative selling, and the market was weak until just before the close, when covering of short sales brought about a partial reaction. On Wednesday the tone was again weak and it was then chiefly influenced by a light inquiry for remittance and by further speculative selling. As was the case on the previous day, the sales were covered late in the afternoon and the market was steadier at the close; there was a quotation of 4 86 for sight when the tone was weakest, but no transactions were reported at this rate. On Thursday the market was less active and irregular, growing firmer on Friday because of a demand for Saturday's steamer. The speculative operations in exchange this week were almost wholly conducted by brokers who were inclined to sell, whenever the opportunity of higher rates offered, in the expectation of covering their sales when the market yielded to pressure. In some cases such expectations were realized, but in others the transactions resulted in a loss. The fluctuations in the rates for exchange at Paris on London contributed to activity in francs, and business was in fairly large volume. Commodity bills were in only moderate supply. It is regarded as likely that if there shall be serious detention of ocean steamers at this port, because of the labor troubles, shipments will be effected at other points.

Nominal quotations for sterling exchange were $4.84@4.84\frac{1}{2}$ for sixty-day and 4.87 for sight. The market was quiet though firm on Saturday of last week, and, compared with the previous day, rates for long were 10 points higher at 4 8360@4 8370, for short 15 points at 4 8650@4 8660 and for cables 10 points at 4 8685@4 8695. On Monday long closed 5 points lower at 4 8360@4 8365, short 5 points at 4 8650@ 4 8655, and cables 5 points at 4 8680@4 8690. On Tuesday, though the market was feverish and weak during the day, there was a partial recovery by the close, when long was 5 points lower at 4 8355@4 8365, short 15 points at 4 8630@4 8635 and cables 10 points at 4 8670@4 8675. On Wednesday long closed 35 points lower at 4.8320@4 8325, short 15 points at 4 8615@4 8620, and cables 25 points at 4 8645@ 4 8650. On Thursday long recovered 25 points to 4 8340@4 8350, short declined 5 points to 4 8610@ 4 8620, and cables were unchanged. The market was steady on Friday with long unchanged and short and cables 10 points higher.

[VOL. LXXXIV.

changed at 4%. The cable reports discounts of sixty to ninety-day bank bills in London $3\frac{1}{8}\%$. The open market rate at Paris is $3\frac{1}{4}\%$ and at Berlin and Frankfort it is $4\frac{3}{8}@4\frac{1}{2}\%$. According to our special cable from London, the Bank lost £172,882 bullion during the week and held £35,585,092 at the close of the week. Our correspondent further advises us that the loss was due to the heavy movement to the interior of Great Britain, which, with the exports, exceeded the large purchases in the open market. The details of the movement into and out of the Bank were as follows: Imports, £813,000 (of which £9,000 from Australia, £5,000 from Germany and £799,000 bought in the open market); exports, $\pounds 303.000$ (of which $\pounds 32.000$ to Paris, £200,000 to Constantinople and £71,000 to various countries), and shipments of $\pounds 683,000$ net to the interior of Great Britain.

The following shows daily posted rates for sterling exchange by some of the leading drawers.

PROSPERITY AND INTERNATIONAL PEACE.

Readers of the European press will have noticed that the recent visits of the King of England to his Continental neighbors are receiving their full share of public attention. It would be strange if they did not. Whatever may theoretically be argued regarding the restriction on royal prerogative, notably in England, the fact has become increasingly important that much could be accomplished in the way of international good feeling through personal and friendly conferences of rulers. In the case of England and France this was notably true; the Anglo-French convention of 1904 being a rather direct sequel of the royal visit to Paris. The recent appearance of King Edward in Spain has similarly led to renewal of friendly assurances on the side of both countries, and the importance of this "rapprochement" may perhaps be measured by comparison with the outburst and continuance of Spanish ill-will against England at the time Lord Salisbury, after our Spanish War, made his exceedingly untactful speech about "dying nations."

otherwise, which can be employed with a view of rendering war less easy, less probable, and, when it comes, less destructive, is just now instinctively grasped by the community as a whole. It has been learned by long experience that applause of the benefits of peace is of little consequence when restricted to utterances made during profound peace. The instant one of the usual causes of war had arisen and international ill-will had been stimulated and encouraged by the familar arts, it would be found that people who a few months before were arguing against war as a civilized proceeding would be either foremost among those demanding immediate hostilities, or, at all events, would have concluded that silence was the only prudent policy. Realizing this familiar fact, and with it the fact that consequences of international war are certain now-a-days to be far more serious than in any previous stage in the world's history, the problem has been practically taken in hand with the hopes of binding the hands of possible belligerents, first, through individual treaties; next, through such general restrictions of old-time warfare as will limit its dangers to'civilization.

We do not know a stronger instance of the economic absurdities into which even the more humane view of international collisions is bound to lead the world than the disposition lately made of the London proposal for a Channel tunnel. This proposition, brought before Parliament with assurances of the requisite capital, and with engineers' guaranty of its practicability, was rejected almost instantaneously by the Government. Nobody argued that such a project would not add greatly to the comfort of passengers, or that it would not probably lead the way to far more rapid and economical interchange of commodities between England and the Continent. The whole reason for the peremptory veto on the scheme was that a French army might suddenly appear some fine day on English soil, emerging from the Channel tunnel. Looked upon from the American point of view, there was something grotesque about the entire incident; yet it must be said, not only that the best men in the British Government shared in the opposition to the scheme, but that the most intelligent English newspapers gave their unqualified approval to the rejection of the tunnel proposition.

We imagine this unanimity to be the expression of English apprehensive feeling regarding possible developments of modern warfare. For ourselves, however, we scarcely imagine that the end of possible awkward situations will come with rejection of the scheme of a Channel tunnel. A striking article in the "Monthly Review" of London takes up, in a spirit of all seriousness, the discussion of the future possibilities of war as governed by the course of invention for aerial navigation. The writer, an expert in the art so far as yet developed, and both a believer and an enthusiast regarding its possibilities, deals without hesitation with what he regards as the probable nature of warfare conducted through such a medium. This is his pleasant picture-drawn, let the reader again be reminded, with entire seriousness and conviction:

1083

It is not our purpose in this article, however, to dwell particularly on the opportunities of royalty for encouraging international good feeling, but to point out the extent to which any machinery, diplomatic or

zed for FRASER

stlouisfed.org

"There will be all sorts of novel chemical compounds, fierce explosives and mixtures for suffocating, burning, pulverizing and annihilating the victim. The airship will devastate our cities, arsenals and dock-yards. She will smash up our forts, camps and battle-ships,

[VOL. LXXXIV.

and will threaten alike our protected forts and our most sheltered inland towns. As soon as this is fairly realized there will be a hurrying to and fro for means of defense, whilst all the time the airship will go ahead, being tested, altered and improved, first taking part in one war and then another, and advancing towards perfection by hard-won steps. . . .

"There will be nothing to prevent a determined enemy making a night raid on London. . . . It will bring home to the most sheltered the grim realities of war. One can imagine our well-fed English citizen, free from conscription and ignorant of invasion, pausing a moment in his bellicose agitation and glancing apprehensively upwards at a passing shadow. By day and by night he will be in danger. The whole country-side will experience the agonizing suspense of a beleagured city."

No doubt it will be answered either that this whole idea is grotesque, or that when the occasion arises, this formidable peril to modern industry and civilization will be dealt with jointly by the nations. Nothing is more probable; the question, for instance, of dropping explosives from balloons has already come before the Hague. Yet, humane and optimistic Americans may possibly remember that the two **p** opositions in the International Conference of 1899, prohibiting the throwing of explosives from balloons, and forbidding belligerents to fill shells with asphyxiating gases, were opposed by no less distinguished a delegate than Captain Mahan, and on the interesting ground that prohibition of these pleasing devices might logically be extended to the submarine torpedo boatwhich, we were to infer. the naval interests were determined to preserve. This incident might be passed over without comment, except in so far as it shows the absolute need for pressure on the coming Hague Conference to defend and assert the common interests of civilization. We may be sure that the professional ideas and interests of the navy, that the feelings inspired by international suspicion and jealousy, will have abundant hearing in private and in public. Financial, industrial and commercial interests should not fail to keep up discussion, from their own point of view, between now and the date when the Conference assembles. As preliminary to the further restriction of warfare in the interests of humanity, such incidents as the royal visits, making, as they do, for proper attitude on the part of the public toward the proposed reforms, may be of great importance.

PHILADELPHIA RAPID TRANSIT SITUATION.

the traction companies have resulted in delaying improvements and for a time at least in defeating the very ends which the people desired most to attain.

As a result of the general anti-corporation spirit which spread all over the United States during the past two years, there developed among many of the citizens of Philadelphia an animosity towards the Rapid Transit Company which gained such headway that the officers and directors of the company realized that the credit of the company was being adversely affected. They determined to grapple with the dilemma and effect a cure at whatever cost. The purpose, however, apparently was to work a permanent cure and not merely afford temporary relief. That the credit of the company had been hurt was evident from the fact that the syndicate which had bought \$10,000,-000 of the company's 4% bonds was unable to market them. It is stated that only \$2,000,000 of the issue was disposed of to the public; the remaining \$8,000,000 was apportioned among the members of the syndicate.

Under these circumstances it was impossible for the company to sell more bonds to bankers in order to provide funds needed to carry to completion work which was well under way. The remarkable feature about the ill-temper on the part of the public is that it reached a crisis at the very time that the Rapid Transit Company was making extraordinary efforts to provide better accommodations for the people of Philadelphia by providing an elevated road and a subway at a very large outlay, the expenditures for improvements during the past year having been ten millions of dollars.

Aside from the stringency of the money market and the temper of the public above noted, there was just one other factor which entered into the financial problem and helped to deter the bankers from buying any more bonds of the Rapid Transit Company. This obstacle is a cloud, possibly no larger than a man's hand, but a cloud, nevertheless, upon the perpetuity of the franchises of the company and all of its subsidiary companies. Fifty years ago there was passed in Philadelphia an ordinance providing that in all franchises for passenger railways which might thereafter be granted by the City of Philadelphia, the city reserved the right to terminate the franchise and acquire the property of the street railway company by the payment therefor of an amount equal to the cost of construction. No move has ever been made on the part of the city to avail itself of the right reserved by

1084

If the Philadelphia Rapid Transit Company hereafter shows the same energy in transporting the people of Philadelphia that it has displayed in urging the passage of legislation which it deems to be advantageous to its own interests and those of the public, the problem of rapid transit in that city has already been solved. Co-operating with the management of the Rapid Transit Company is a body of representative business men and the united efforts of the two interests have resulted in achievements which bid fair to promote the welfare of the community as well as that of the company which has a monopoly of the passenger railway business in the Quaker City. The Philadelphia situation is of general interest because it is quite in contrast with the methods which have been adopted in some other cities, notably Cleveland and Chicago, where opposition and antagonism on the part of citizens to the plans and wishes of the managements of sliding scale up to 6%, or \$3, per share per annum

the ordinance of 1857, but the fact that such a right exists leaves the way open for a disruption of the whole Rapid Transit combination.

Moreover, this possibility appeared all the more dangerous because a number of the stocks of the underlying companies are not full paid, and whenever there is any agitation on the subject of municipal ownership of the passenger railways, investors in the stocks which are not full paid are greatly disturbed, and on account of their timidity the market value of such shares at times suffers a serious decline. A single illustration will suffice to show how agitations and consequent fear on the part of investors affect values. Just before the recent crisis was reached shares of the Union Traction Company were selling around \$63, the par value being \$50. During the recent discussion this stock declined \$9 per share, or 18%. On this issue dividends on a

r FRASER

のであるというないで

MAY 11 1997.1

are guaranteed by the Philadelphia Rapid Transit Company, which is the present operating company for the system of 550 miles. It happens, however, that while the par value is \$50 per share, there has been paid in on each share only \$17 50. As there are 600,000 shares, the par value of the issue upon which dividends are guaranteed is \$30,000,000, but the amount paid in is only \$10,500,000, leaving \$19,500,000 of uncalled capital. When the dividend reaches 6%, as it will in a comparatively short period, the yield of \$3 per share will be equal to over 17% upon the amount paid in. On account of this peculiar situation the reader may readily understand why any agitation which has for its purpose the disruption of the combination of street railways causes a depression in the market value of the partially paid stocks and it may be just as clearly seen why it is greatly to the advantage of the investors to have the cloud removed and the perpetual feature of the franchises established beyond all doubt.

• To exchange this indefinite situation for one which is fixed, the management of the Philadelphia Rapid Transit Company has expressed its willingness to make some sweeping concessions to the city of Philadelphia. The concessions are so great that a stranger would not comprehend why they are made without an explanation similar to that which has been set forth above. In consideration that the franchises of the Philadelphia Rapid Transit Company and those of all of its underlying companies be made perpetual, and the ordinance of 1857 nullified and repealed, the Rapid Transit Company agrees to limit the cumulative dividend upon its shares to 6% from January 1 1907 upon the capital actually paid in, and to share equally with the city in the distribution of all surplus earnings above the amount required to meet such cumulative dividends. The company agrees further to set aside a sum monthly for a sinking fund, the principal of which in fifty years will amount to \$10,200,000, and which with the interest accumulated shall belong to the city of Philadelphia, and which shall be available for the purpose of purchasing the entire capital stock of the Philadelphia Rapid Transit Company at its par value. The par value of Philadelphia Rapid Transit stock is \$30,-000,000. There has been paid in \$30 per share, or \$18,000,000, upon the 600.000 shares. An installment of \$5 per share is payable this month, and the company, by the terms of the agreement, promises to call the balance of \$15 per share by December 31 1908. With the consent of the city additional stock and bonds may be issued, but they cannot be sold for less than par, and the proceeds must be used for extensions or betterments. If at the expiration of fifty years the city exercises its right to purchase the property at a price equal to the par value of the stock then outstanding, and the city offers to let the property for operation to the highest bidder, the company reserves the right to bid for the same. There are many minor provisions in the proposed agreement which have been prepared with much care and appear to be just to all the parties concerned. Under the present arrangement the Rapid Transit Company is obligated to maintain 6,700,332 square yards of paving within the city of Philadelphia. In addition to this expense, which is really a tax, it pays annually for licenses and taxes \$1,075,216. One bad feature of the tax upon cars is that it acts as an |

SER

obstruction in the way of providing more cars. Patrons of the railways continually ask for more cars, and yet the law imposes a penalty for every additional car which the company may add to its equipment. It is now proposed to substitute a fixed sum which the company shall pay yearly in lieu of the indefinite amounts, the agreement providing that the company shall not be subject to any additional taxes except to the customary taxes upon real estate.

The city now has the right to compel the company to put its trolley wires under ground. The new agreement waives this right. It is provided that the city shall have three representatives upon the board, and that statements of earnings and expenditures shall be filed periodically with the City Comptroller, which the city shall have the right to verify by having full access to the company's books.

There appears to be nothing essentially wrong with the Philadelphia Rapid Transit system as it stands to-day. For the year ended June 30 1906 the receipts from all sources were \$17,711,598. The cost of operation, including licenses, taxes and all fixed charges, was \$17,407,602, showing a profit of \$303,996, which was equal to 2.36% of the amount that had been paid in on the capital stock at the end of the fiscal year. There were 448,576,785 passengers carried. an increase of 45.683.540, or 11%. While the passenger receipts increased S_{c}^{\sim} , the operating expenses increased 12%. This large increase in operating expenses, the annual report explains, was due to relaying 42 miles of track with 141-pound rails, to an increase in the number of cars operated, to the additional expenses of heating cars in winter, and to a large increase in the payments for accidents.

While the agreement provides that the city shall assume no financial obligations, counsel for the company and for the committee of citizens were of the opinion that an Act of the Legislature was essential to enable the city to enter into a profit-sharing agreement with the company and a bill framed for this purpose was promptly passed by the Legislature and signed by the Governor. On Thursday, May 2, an ordinance was introduced in the City Councils of Philadelphia setting forth at length all the details of the agreement. It is expected that the ordinance will be passed and that the Mayor will sign it. In this manner investors are to be reassured, the credit of the Rapid Transit Company is to be restored, and the way provided for the company to give to the citizens improvements which are very much needed, and which will include

an elevated road to the northeastern section of the city..now suffering perhaps more than any other part of Philadelphia for lack of adequate transportation facilities.

Unlike New York, Philadelphia is not assuming any financial responsibility to provide rapid transit, but, quite as unlike Chicago, it is manifesting a disposition not to stand in the way of private capital which is willing to take the risk of providing the much-desired improvements.

WHEN AN INTER-STATE SHIPMENT LOSES ITS INTER-STATE CHARACTER.

In these days, when both the States and the General Government are asserting jurisdiction over railroad carriers, and when each is determined to extend paternal assistance to the patrons of the road (which

1086

THE CHRONICLE.

[VOL. LXXXIV.

assistance usually consists of an order or statute for lower rates or some other action favoring the shipper at the expense of the carrier), it is important to know which jurisdiction is to control, that of the State in which the line is located or that of the Inter-State Commerce Commission. Where the two conflict, obviously either one or the other must dominate. In the case of inter-State shipments it is indisputable that the authority of Congress and of the Government officials at Washington is supreme. The Federal Constitution has lodged the power over commerce among the States in the Central Government and the carrying agencies being instruments of such commerce, the United States Supreme Court has by its decisions uniformly undertaken to give effect to that provision of the fundamental law.

So long as Congress failed to assume the power vested in it by the Constitution, which was the situation prior to the enactment of the Inter-State Commerce Law in 1887, the States were free to make their own regulations; but since Congress has chosen to exercise its prerogative in that respect, its regulations and enactments alone are controlling, and the States are obliged to remain quiescent—to yield to the supreme authority-provided always the transportation is clearly inter-State in its character. If the shipment is an intra-State one, that is, in essence, is local, point of origin and destination being compassed within the same State, the State laws and regulations govern, since the authority of Congress does not extend to purely State transportation.

But what are the attributes of an inter-State shipment-what gives it its inter-State character? At first sight the answer would appear to be simple. Anything coming from without the State or passing from one State to another, clearly partakes of an inter-State movement-is in fact inter-State transportation. But there are other elements in the problem. A rather curious case arose in Texas some years since and reached the United States Supreme Court on appeal at the present term. The Supreme Court's ruling was given a few weeks ago, and according to the doctrine laid down by it, freight coming from another State after it gets started on its movement does not necessarily maintain its characteristic as inter-State commerce to the end of its journey. In the last analysis it is the contract between the consignor and the carrier, as expressed in the bill of lading, which determines the question. The shipment, which was the subject of the controversy in the case referred to, concerned a carload of corn which originally came from Hudson; So. Dakota, and which found its point of final destination at Goldthwaite, Tex., on the Gulf Colorado & Santa Fe Ordinarily the total rate on through Railway. shipments of freight carried long distances is lower than the sum of the separate charges of the different roads over which the freight is obliged to pass in reaching its destination. In this instance it happened that the consignor saw an advantage of $1\frac{1}{2}$ cts. a bushel by sending the carload of grain as far as Texarkana and then availing of the low rates put in force by the Texas State Railroad Commission. A new bill of lading was issued when the carload of corn reached Texarkana. The route of the shipment was over the Chicago Milwaukee & St. Paul Ry. to Kansas City with privilege to stop the corn at that point for

inspection and transfer, and thence over the Kansas City Southern Ry. to Texarkana. The Milwaukee & St. Paul issued a bill of lading limiting its liability for loss to its own road. At Kansas City the corn was unloaded, put in sacks, and transferred to the Kansas City Southern, which issued its own bill of lading and carried the corn to Texarkana. The car was consigned to a firm in the latter city. After being held there for five days, the same car was delivered, under original seals and without breaking package, to the Texas & Pacific Ry., which carried it to Fort Worth and there delivered it to the Gulf Colorado & SantaFe Ry., by which it was transported to Goldthwaite. This was in January 1902. The last-named road having failed to observe the rates prescribed by the Texas Commission, the State of Texas in the District Court of Tarrant County on July 28 1902 recovered a judgment against it for \$100 as a penalty for extortion in its charges for carrying this carload of corn from Texarkana to Goldthwaite. This judgment was sustained by both the Court of Civil Appeals and the Supreme Court of the State of Texas. Thereupon the railway company brought the case to the United States Supreme Court upon a writ of error.

The details of the transaction and the relations of the different parties to the same were somewhat involved, but the sum and substance of the case is stated in the outline furnished above. The opinion was by Justice Brewer. He pointed out that really the only question was whether between Texarkana and Goldthwaite the transportation was an inter-State shipment. If so the regulations of the State Railroad Commission did not control and the State Court erred in enforcing the penalty. If, however, it was a purely local shipment, the judgment below was right and should be sustained. He found the facts settled by the special findings of the lower Court. In the estimate of the Court the point of controlling importance was that the corn was carried from Texarkana, Tex., to Goldthwaite, Tex., upon a bill of lading which upon its face showed only a local transportation.

The argument upon the part of the Railway Company was of course that this local transportation was a continuation of a shipment from Hudson, S. D., to Texarkana, Tex., that the place from which the corn started was Hudson, S. D., and the place at which the transportation ended was Goldthwaite, Tex.; that such transportation was inter-State commerce and that its inter-State character was not affected by the various changes of title or issues of bills of lading intermediate to its departure from Hudson and its arrival at Goldthwaite. Justice Brewer says it is undoubtedly true that the character of a shipment, whether local or inter-State, is not changed by a transfer of title during the transportation. But whether it be one or the other may depend on the contract of shipment. The rights and obligations of carriers and shippers are reciprocal. The first contract of shipment in this case, according to his view and that of the Court, was from Hudson to Texarkana, and during that transportation a contract was made at Kansas City for the sale of the corn; but that did not affect the character of the shipment from Hudson to Texarkana. It was an inter-State shipment after the contract of sale as well as before. In other words, the transportation which was contracted for and which was not

MAY 1. 1907 |

changed by any act of the parties, was transportation of the corn from Hudson to Texarkana.

The control over goods in process of transportation, which may be repeatedly changed by sales, is one thing, he argues: the transportation is another thing, and follows the contract of shipment until that is changed by the agreement of owner and carrier. Neither the Harroun Commission Co. nor the Hardin Grain Co. (two of the parties to the controversy) changed or offered to change the contract of shipment or the place of delivery. The Hardin Company accepted the contract of shipment theretofore made and purchased the corn to be delivered at Texarkanathat is, on the completion of the existing contract. When the Hardin Company accepted the corn at the latter point the transportation contracted for ended. The carrier was under no obligation to carry it further. It transferred the corn in obedience to the demands of the owner to the Texas & Pacific Railway Co., to be delivered by it under its contract with such owner. Whatever obligations may rest upon the carrier at the terminus of its transportation to deliver to some further carrier in obedience to the instruction of the owner, it is acting, Justice Brewer urges, not as a carrier but as a forwarder. No new arrangement having been made for transportation, the corn was delivered to the Hardin Grain Co. at Texarkana. The thought or purpose of the Hardin Co. in respect to the further disposition of the corn was a matter immaterial so far as the completed transportation was concerned.

Justice Brewer also points to the fact that the car of corn remained in Texarkana five days and that the Hardin Co. was under no obligation to ship it further. It must further be remembered, he says, that no bill of lading was issued from Texarkana to Goldthwaite until after the arrival of the corn at Texarkana and the completion of the first contract for transportation. He also lays stress on the fact that in many cases it would work the grossest injustice to a carrier if it could not rely on the contract of shipment it had made, know whether it was bound to obey the State or Federal law, or, obeying the former, find itself mulcted in penalties for not obeying the law of the other jurisdiction, simply because the shipper intended a transportation beyond that specified in the contract. He says there is no presumption that a transportation when commenced is to be continued beyond the State limits, and the carrier ought to be able to depend upon the contract which it has made and in like manner must conform to the liability imposed by that con-

this important raw material are discouraged, for probably the leading incentive that spurred on experimental work in cotton-raising in colonial possessions has not ceased to exist.

That leading incentive is to be found in the course of events in this country the past four or five years, and primarily in the springing into existence of organizations at the South, formed ostensibly to see that the planter got a "square deal," but with the real purpose apparently of attempting to substitute for the laws of supply and demand the dictum of a selfconstituted band of leaders. Thus forcing users to pay for their cotton higher prices than conditions warranted. Coincident with the birth of these organizations, and evidently through fear of them, came the desire of manufacturers in Lancashire, elsewhere in Great Britain, and in Continental Europe, to become less dependent upon the United States for supplies of the raw material.

No appreciable augmentation in yield in Egypt could be expected until plans for proper irrigation were perfected, which would be a matter of some years. And even then the area would be comparatively limited. Furthermore, India, being a large and gradually increasing consumer of cotton, as well as a producer of it, no great addition to the volume of supplies from that source could be looked for. Moreover, Peru, Brazil, Smyrna, West Indies, &c., could be relied upon for but a decidedly limited amount of cotton annually. Attention therefore was directed to colonial possessions in Africa, with the hope that the immense tracts of virgin soil on that continent would prove adaptable to cotton. Results, however, as already indicated, have thus far been meagre; but it may be that in the years to come Africa, outside of Egypt, will reach prominence as an important producer. Yet that will not be until other work of development is more advanced and transportation facilities provided, affording easy access to the seaboard, so that crops can be expeditiously moved from the interior.

We are inclined to believe, however, that the United States's position as the most important contributor to the world's supply is measurably safe; we also think that overmuch importance is given in Europe to the influence exerted by the various organizations that have spring up of late years in the South for the purpose of holding up the price of cotton. When any body of men attempts to set aside the laws of supply and demand, and substitute therefor their dictum, they sooner or later come to grief and lose all standing and influence. Flippant and bombastic circulars do not make prices, as all well know. It is one thing to advise that cotton be held for a certain price, and quite another to induce its being held back, or to get the price. The cotton world has quite recently had samples of such advice and knows the result. It would seem that about all that these organizations have accomplished thus far is to stir up bitter feelings in some quarters against all who are not planters who have to do with cotton. Animosity is especially strong against the various cotton exchanges-the commercial bodies that have benefited the industry in every way, and particularly in providing facilities for disposing of the crop. Furthermore, leading officials of these Southern cotton associations have

tract.

COMPETITORS IN COTTON RAISING.

As we all know, cotton cultivation in colonial possessions has been a subject of deep interest in Great Britain, France and Germany the past few years. Cotton-growing associations have been organized in all of the countries named, and extensive experiments made in Nigeria, the Soudan, and other sections of Africa thought to be suitable for the production of the staple. But the net result thus far has not been encouraging. In fact realization has fallen very far short of anticipation, for after considerable work and •omparatively heavy expenditures, the world's supply has been swelled only a few thousand bales. Still it cannot be truthfully said that the interests back of the attempts to open up new sources of supply of not hesitated to stamp as wrong, or even worse, any information made public by the Government or individuals that disagreed with their one-sided and misleading reports. Their crowning act of folly, however, was the securing of a fraud order against the New York Cotton Exchange.

These thoughts with regard to the causes moving European cotton manufacturers to seek new sources of supply have been induced by the recently issued report for 1906 of Lord Cromer, late British Commissioner in Egypt. No one is better equipped to talk of matters relating to that country than he and what he has to say, therefore, is sure to engage attention. After pointing out that there were 1,752,473 acres under cotton last year, he remarks that the total cultivable area of Egypt is 6,387,100 acres, of which 5,339,638 acres is already under cultivation and 1,047,462 acres virgin soil. He then goes on to estimate the extent to which the cotton-growing area is capable of expansion, assuming as a preliminary that the whole of the basin lands in the Northern half of upper Egypt (now cultivated) will be brought under perennial irrigation, and that all uncultivated territory will be ultimately reclaimed. With this accomplished, he contends that land suitable for bearing cotton will extend over the whole area (6,387,100 acres) referred to above, with the exception of about 800,000 acres South of Assiout. In other words, there would be approximately 5,600,000 acres on which cotton could be raised, or three times the present area. He does not assume that all of this territory will ever be devoted to cotton but estimates that 40% of it may, and from that acreage looks for 10 million cantars (about 2 million American bales) annually. This acreage however is not expected to be reached in less than ten or fifteen years. But even now an addition of 3 million cantars to Egypt's crop (the present crop approximating about 7 million) would be welcome, as most of it is a high grade of cotton for which, as for our Sea Islands, there is pressing need.

Canvassing the entire field of cotton production, we do not find anything to encourage the thought that in the near future any considerable increase in supplies can be looked for outside of the United States. But there is nothing in this premise to cause disquietude to European consumers. The consumption of cotton has increased steadily of late and is liable to so continue; but so is the supply. New fields will undoubtedly in time become important contributors to the world's general stock, but, after all, the suppremacy of this country in production of the raw material is not now threatened, nor is it likely to seriously be, for years to come. And, finally, in the long run conditions and not dictums will govern the price of the commodity. management, very naturally furnishes in its yearly statements striking evidence of the fact.

The late year's increase in business measured by the value of sales was by far the largest in the company's history, noteworthy though the previous additions have been. The aggregate of these sales as represented by the amount billed to customers was no less than \$60,071,883. In the previous year the amount, which then was the very largest ever reached up to that time, was \$43,146,902. Thus in a single period of twelve months the addition to the yearly total has been almost \$17,000,000, the ratio of increase falling but little short of 40%. We need hardly say that 40% growth in a manufacturing business in a single year means much, in more ways than one. The report tells us that sales of supplies and small apparatus, such as meters, transformers, direct and alternating motors, arc and incandescent lights, wiring devices, &c., increased 35% over the previous year, and that 40,365 stationary motors, aggregating 565,000H.P., were sold during the twelve months.

As a matter of fact, however, the growth in the company's business, while of very exceptional magnitude in this latest year, has been noteworthy and continuous through practically the whole of its history. There was a falling off, it is true, in the fiscal year ending Jan. 31 1905, owing to the industrial reaction in the country during the fifteen to eighteen months preceding, but more than the whole of the falling off was recovered the very next year, and with that exception there has been no break in the upward movement in recent periods. In the report of the late First Vice-President, Eugene Griffin, written under date of April 1 (Mr. Griffin died April 11), it is pointed out that in the ten years from 1896-7 to 1906-7 the gross sales increased from \$12,540,994 to \$60,071,883, an average increase of 17% per year. He gives a little table to show that since 1900 the supply orders received alone have increased from an average of 473 per working day to 783. He also says that the very large increase in the business of the company during the past year, together with the difficulty and delay in obtaining raw materials, made it very difficult to meet the requirements of customers as to deliveries.

In the current or new fiscal year the gain appears to be proceeding at an even more remarkable rate than before. President Coffin in his portion of the remarks states that the sales for the first two months of the present fiscal year exceed those of the corresponding two months of the year under review by more than 50%. He also makes the significant announcement, writing under date of April 27, that should this growth in business continue additional capital would be required. Practically every statement in the report furnishes evidence of the need of additional capital. And yet previous additions have been large. Last December \$10,828,100 new stock was offered to shareholders at par, and though shareholders had until April to pay the last installment on their subscription for this new stock, no less than \$9,266,600 had been paid in on the same at the end of the fiscal year on Jan. 31 1907, leaving an unpaid balance of only a little over 11/2 million dollars-\$1,561,500. In the year immediately preceding \$6,013,300 of new stock was issued.

1088

11

THE GENERAL ELECTRIC COMPANY REPORT. The annual report of the General Electric Co. (for the twelve months ending Jan. 31 1907) affords testimony at once to the industrial activity prevailing in the United States and to the marvelous growth of the business of this important company. In no department of industry has there been greater progress and advance—by reason of inventions and the application of electricity to new uses—than in the electrical field. And the General Electric Co., as the largest manufacturer in the world of electrical supplies and equipment and having the advantage of a very capable

facturer in the world of electrical supplies and equipment and having the advantage of a very capable how the company's current supplies of capital are being

MAY 11 1907.]

absorbed in various directions. With the volume of business growing so enormously, the amount tied up in current accounts very naturally is steadily increasing. Notes and accounts receivable Jan. 31 1907 were \$22,863,789, besides which there were \$2,922,675 of advances to affiliated companies, making \$25,-786,464 together. The corresponding total on Jan. 31 1906 was only \$16,287,018. Thus there is an addition under this one heading alone of $9\frac{1}{2}$ million dollars. Then also as business increases the stock of materials and supplies on hand also expands, and more and more money is locked up in goods in process of manufacture. Hence we find that the merchandise inventories on Jan. 31 1907 represented a total of \$22,593,-907, against only \$16,922,291 on Jan. 31 1906. This gives a further addition of over $5\frac{1}{2}$ million dollars. Moreover, the cost of work in progress stood on the books at \$3,853,321 this year, against \$2,496,205 last year. Altogether, therefore, the three items represent the absorption of additional capital to the extent of not far from \$16,500,000. As a corollary some changes in other items in the balance sheet necessarily follow. Past annual reports have always contained the statement that the company's credit had not been used either by issuing notes, endorsing customers' paper for discount or lending its name in any way. The present report, however, shows that there is customers' paper under discount with the company's endorsement to a moderate extent-\$666,607. Also we see that cash on hand, which Jan. 31 1906 was \$6,356,093, for Jan. 31 1907 is of smaller proportions, being only \$3,910,708.

The income statement makes a very satisfactory showing. The profits for the twelve months are reported at \$8,427,842, or nearly double the call for the 8% dividends being paid, as calculated on the average amount of stock outstanding during the year. In other words, while the profits were \$8,427,842, the sum paid out in dividends was only \$4,344,342, leaving a balance of \$4,083,500. The profits include \$329,702 realized from the sale of securities in excess of the amount at which they had been carried on the books. They also include surplus net profits of \$675,000 during the year of the security-holding companies and \$417,586 derived from royalties, dividends, sundry profits, &c., and \$114,660 for interest and discount. The profits in the ordinary way-that is, from manufacturing-for the twelve months were \$6,965,288. In the previous year the profits in the ordinary way were \$6,121,556, so the increase here has been after all comparatively small. As the sales for the twelve months increased from \$43,146,902 to \$60,071,882, the relatively slight increase in the manufacturing profits must be accepted as proof that the company is doing business at a narrower margin of profit with each succeeding year. It is to be observed, however, that \$2,834,124 was charged off for depreciation of plant before arriving at the profits in 1907, as against \$1,838,362 so charged off the previous year. The conservative methods of bookkeeping always pursued by the company are still being maintained. Out of the \$4,083,500 surplus remaining on the operations of the late twelve months, \$999,999 was applied in writing off patent accounts on the company's books. This process of reducing the patent account has been going on for a long time, and with the latest reduction the whole of the company's patents (which |

RASER

Digitizeg

must be of great value), as also franchises and goodwill, now stand on the books at the nominal sum of \$1. Factory plants and machinery are also carried on the books at a very low basis of valuation. The cost of additions during the twelve months to plant, buildings and machinery was altogether \$3,834,124, and of this all but \$1,000,000, as already stated, was charged to the expenses. In other words, only \$1,-000,000 has been added to the book value of factory plants during the year. These factory plants (including all lands, buildings and machinery) are down on the books for no more than \$9,000,000. But during the fourteen years from Jan. 31 1893 to Jan. 31 1907 the aggregate outlays for additions of lands, buildings and additions to and replacement of machinery (over and above all ordinary expenditures for the maintenance and repair of buildings and machinery) have aggregated no less than \$23,246,496. Of the whole amount, \$18,205,024 has been written off, leaving a net charge on the books of only \$5,041,472. This, added to the \$3,958,528 reported as the book value of the factory plants on Jan. 31 1893, makes the present total of \$9,000,000.

In the merchandise inventories very conservative methods of valuation are also followed, and liberal allowances are likewise made in notes and accounts receivable for possible losses from bad debts. For instance, the notes and accounts receivable, which are entered for \$25,786,464 in the accounts, have an actual face value of \$27,094,348-\$1,307,883 having been deducted for possible losses. In the inventories such apparatus and supplies as are in active demand are carried at the estimated factory cost; inactive or slowselling apparatus and supplies at about 50% of the estimated factory cost, and obsolete apparatus and supplies at scrap value.

We have referred above to the growth in the company's business as evidence of the industrial activity prevailing in the United States. As a matter of fact, however, the company also does a large foreign business, and this foreign business is each year assuming larger proportions. Thus Vice-President Griffin in his remarks, after noting that during the past year turbo generators of an aggregate capacity of more than 350,000 H. P. had been sold, states that 37 Curtis turbines have been installed in Japan, and that the company has also sold Curtis turbines for installation in England, Ireland, France, Germany, South Africa, Cuba, Mexico, Canada, Brazil, New Zealand, Siam,

Peru, Algeria and Spain.

ITEMS ABOUT BANKS, BANKERS AND TRUST CO'S.

-The public sales of bank stocks this week aggregate 83 shares, of which 43 shares were sold at the Stock Exchange, and 40 shares at auction. The transactions in trust company stocks reach a total of 50 shares.

x Sold at the Stock Exchange.

-The Executive Council of the American Bankers' Association, which met at Hot Springs, Va., on the 6th and 7th inst., has decided to hold the present year's annual convention of the organization at Atlantic City, N. J., the week of September 23. The headquarters of the Association will be at the Marlborough-Blenheim.

-Senator Alld's bill, regulating the enforcement of the stock transfer tax in New York State, was signed by Governor Hughes this week. The bill, which was passed by the Senate on April 24, and by the Assembly on April 29, was referred to in this department last Saturday.

-Plans to consolidate the Mercantile and Equitable trust companies of this city, which have been taken up anew since the resignation last month of Henry C. Deming as President of the Mercantile Trust, are likely to be brought to tangible shape in a very short while. It is expected that Alvin W. Krech, President of the Equitable Trust Company, will become the head of the united institution, which will probably operate under the name of the Mercantile Trust.

-The board of the Phenix National Bank, Nassau and Liberty streets, New York, this week elected Cashier Alfred N. Ball to the vice-presidency, to succeed George M. Coffin. Bert L. Haskins, former Assistant Cashier has been chosen Cashier. H. C. Hooley was also appointed Assistant Cashier. Mr. Coffin recently resigned to become President of the new Beaver National Bank, at the junction of Beaver, Pearl and Wall streets.

-William O. Douglas, the defaulting assistant loan clerk of the Trust Company of America, this city, pleaded guilty **ast** Thursday to the three indictments of the Grand Jury for grand larceny. His accomplice, Oliver M. Dennett, was indicted on the same charge. Douglas, it is stated, will be a witness against Dennett.

-A new banking institution is being organized in this city by Hugh R. Garden, the law attorney at 34 Nassau Street. The bank is to be known as the Central Park West National Bank of New York. It will locate on the west side of Central Park, and will have a capital of \$200,000. The Comptroller has approved the application to organize, which is presented by Shirley E. Johnson, John Franklin Crowell, Edward A. Heshman and Frederick A. Richardson.

' -A bill introduced by Senator Saxe providing for some slight amendments to the law relating to the taxation of bank shares was passed by the New York Senate on Monday. The bill makes two changes in the existing law. First, it amends Section 24 of Chapter 908 of the Laws of 1896, as amended by Chapter 550 of the Laws of 1901, Chapter 126 of the Laws of 1902, and Chapter 267 of the Laws of 1903. This amendment relates to the tax of 1% which is assessed upon the stocks of banks and banking associations. The only change here is the addition of the following sentence at the end of Section 24: "No shares of stock of such banks and banking associations, by whomsoever held, shall be exempt from the tax hereby imposed". It has been the rule for trust companies holding bank stock to ask the City of New York to refund taxes paid on their holdings of such bank shares on the ground that the trust companies themselves pay to the State an annual tax of 1% on their shares. This course will no longer be possible under the change proposed.

A further amendment made by the bill passed in the Senate this week relates to the law governing the matter of property exempt from other State taxation, as contained in Section 202. The change here is of the same nature as the other. Following the clause saying that the owners of shares of trust companies shall not be taxed as individuals, there is added the following: "Personal property exempted from taxation by this section shall not include shares of stock of bank and banking associations taxable under the provisions of Section 24 of this Chapter." This law, dealing with the question of tax exemption, was changed in another respect some weeks ago, when the Legislature enacted an amendment making it unnecessary for trust companies, as was formerly required, to show their receipts for State taxes (other than organization tax) to the local assessors before being declared exempt from other payments. We give herewith this law, as amended, showing in italics the new matter, and in brackets the old matter; we also incorporate therein in both italics and parentheses the further change proposed in the bill passed by the Senate this week;

Section 1. Section two hundred and two of chapter nine hundred and eight of the laws of eighteen hundred and ninety-six, entitled "An Act in relation to taxation, constituting chapter twenty-four of the general laws if an amended by chapter twenty-four of the general laws," as amended by chapter one hundred and thirty-two of the laws of nineteen hundred and one, and chapter one hundred and seventy-two of the laws of nineteen hundred and two, is hereby amended so as to read as follows

follows: Section 202. Exemptions from other State taxation.—The personal property of every corporation, company, association or partnership, tax-able under this article, other than for an organization tax, shall be exempt from assessment and taxation upon its personal property for State purposes. *if all taxes due and payable under this article have been paid thereby*. [and] The personal property of every corporation taxable under section one hundred and eighty-seven-*a* of this article, other than for an organization tax, and as provided in chapter thirty-seven of the general laws, shall be exempt from assessment and taxation for all other purposes [if all taxes due and payable under this article have been paid thereby]. The personal property of a private or individe-a banker, actually employed in his business as such banker, shall be exempt from taxation for State purposes, if such private or individual bankershall have paid all taxes due and payable under this article. Such corporation and private or individual banker shall in private or individual banker shall have paid all taxes due and payable under this article. Such corporation and private or individual banker shall in no other respect be relieved from assessment and taxation by reason of the provisions of this article. The owner and holder of stock in an incor-porated trust company liable to taxation under the provisions of this Act shall not be taxed as an individual for such stock. (Personal property exempted from taxation by this section shall not include shares of stock of banks and banking associations taxable under the provisions of section twenty-four of this chapter.) this chapter.) This act shall take effect immediately.

-Charles Elliot Warren, who has been appointed Chairman of the Committee on Arrangements for the coming convention of the New York State Bankers' Association, announces that the 1907 meeting will be held on Thursday and Friday, June 27 and 28, at the Hotel Frontenac, St. Lawrence River, Thousand Islands. Mr. Warren (Cashier of the Lincoln National Bank of New York) is associated on the committee with Ledyard Cogswell, President of the New York State National Bank of Albany; David H. Pierson, Cashier of the Bank of Manhattan Company, New York, and E. O. Eldredge, Secretary of the association and Cashier of the New Amsterdam National Bank of New York City. Inasmuch as the convention will probably last over Saturday and Sunday following the dates mentioned, a number of interesting side trips will be provided. Arrangements are now being made by Mr. Warren with the Passenger Department of the New York Central RR. for a special trip rate. If a sufficient number of bankers from this city signify their intention to take space, a special train will be provided to carry the delegates and their families. Elliott C. McDougal, President of the Bank of Buffalo, at Buffalo, is President of the association.

-In our issue of April 27 reference was made to the adoption of a new schedule of exchange-rates by the St. Louis Clearing House Association. The new schedule became effective on the 1st, and is as follows:

On the following	r States a minimum	n charge of \$0.75 p	er thousand dollars:
Connecticut	Maryland	New York	Rhode Island
	Massachusetts		Vermont
Illinols	New Hampshire	Pennsylvania	
Maine	New Jersey		
On the following	g States a minimun	n charge of \$1 per	thousand dollars:

in St. Joseph, Mo.			

[VOL. LXXXIV.

1090

AN ACT

To amend scotion two hundred and two of the tax law to relieve local assessors from the duty of assessing property of trust companies which is not locally taxable. The People of the State of New York, represented in Senate and Assembly,

do enact as follows:

St. Joseph. Mo. Also discretionary:

Also discretionary: Charges on items deposited by U. S. Government, the State of Missouri, in the City of St. Louis, steam railroad companies and the Board of Public Schools of the City of St. Louis. On all items drawn "with exchange" or "and exchange," the charges is

All items received from, or for the account of, any bank, trust company, person or firm outside of St. Louis, and bearing a St. Louis endorsement, shall be subject to the same charge as if received direct from a St. Louis customer

On the preceding schedules, excepting the discretionary points, the mini-mun charge is 5c. for items of \$10 and under and 10c. for items over \$10; but in all cases two or more items received at any one time from any cus-tomer and payable at one place may be added together and charged for as one iten

For collections on points outside of St. Louis, the charge shall be the actual cost incurred, and, in addition thereto, a handling charge of 10 cents on each item whether collected or not.

-The Brooklyn Trust Company of Brooklyn Borough, announces that its Manhattan office, at 90 Broadway, will be opened on or about May 20.

-Cyrus Peck, President and one of the organizers of the City Trust Company of Newark, N. J., died on the 6th inst. He was seventy-eight years of age.

-The National Commercial Bank of Albany, N. Y., announces the resignation on the 1st inst. of Charles H. Sabin as Vice-President. He continues, however, as a director of the institution. Mr. Sabin, as is known, is

RASER

President of the new National Copper Bank of this city, which commenced business last week.

-John D. Long has been elected President of the Puritan Trust Company of Boston, Mass., succeeding William R. Dresser who died January 8.

-James F. Pennell, Vice-President of the Lechmere National Bank of East Cambridge, Mass., has been elected President of the Charles River National Bank of Cambridge, to succeed the late Walter S. Swan.

--Charles N. Clark has been elected to the presidency of the Northampton National Bank of Northampton, Mass., which became vacant last month through the death of Oscar Edwards. Mr. Clark advances from the post of Vice-President, in which office he is replaced by Cashier Warren M. King.

-The Merrill Trust Company of Bangor, Maine, is one of the newer institutions in New England which is steadily increasing its business, as is evident from its statement of condition for April 27. The growth in this instance becomes the more striking when consideration is given to the fact that Bangor has a population of but 25,000, and that the company competes with s'x other commercial banking organizations in that city. The institution has been operating, as a trust company a little less than four years, having succeeded on June 1 1903 to the business of the banking firm of Merrill & Co. Five months later, October 8 1903, it reported deposits of \$284,928, which have since risen as follows: \$422,370 August 22 1904; \$625,102 October 28 1905; \$734,179 October 23 1906; and \$905,817 on April 27 1907. Within the past two years the company purchased practically the entire capital stock of the Veazie National Bank, which has some \$450,000 deposits not included in any way in the trust company's statement. The latter in its latest report shows surplus of \$75,000, undivided profits of \$42,203, and aggregate resources of \$1,230,903. One of the officials of the company expresses the opinion that the Merrill Trust now controls more strictly commercial deposits than any bank in the State of Maine outside the city of Portland.

-The Farmers' and Mechanics' National Bank of Philadelphia which celebrated the one hundredth anniversary of its organization on January 17 with a banquet, marked the centenary of its opening with an exhibition of its curios to its stockholders, depositors, out-of-town correspondents and invited guests. The bank commenced business on the first Wednesday in May 1807. The exhibition, opened on Wednesday the 8th, embraces old books, bank-note plates letters and other documents coming into the bank's possession relating to its early history. A dividend of $3\frac{1}{2}\%$, clear of taxes, was declared by the directors on the 7th inst., and \$50,000 was addeed to the surplus, making that fund \$1,200,-000. Since its organization the bank has paid dividends aggregating \$12,567,000. The institution has a capital of \$2,000,000, and besides its surplus of \$1,200,000 has un-The deposits May 1 were divided profits of \$23,364. \$16,999,965.

-The directors of the Real Estate Title Insurance & Trust Company of Philadelphia have elected Holstein De Haven as President to succeed the late Joseph L. Caven.

\$250,000 was ratified by the stockholders on the 2d inst. It is stated that the change, which will be effected by retiring half the stock at par, \$50, will be accomplished within two months.

-H. A. Johnston, heretofore an Assistant Cashier of the Lincoln National Bank of Pittsburgh, has been elected Cashier of the institution to succeed the late William R. Christian.

-A. A. McKinney, formerly Cashier of the Union National Bank of Braddock, recently taken over by the Braddock Trust Company, has been elected Cashier of the First National Bank of Braddock. George C. Watt, lately Cashier of the First National, has replaced F. W. Edwards as Vice-President of the latter institution.

-The consolidation of the Second National and Merchants' National Bank of Toledo became operative on the 1st inst., the Merchants' National being placed in voluntary liquidation on April 30. The plan to consolidate these institutions was set out in these columns February 2. The merger has been consummated under the name of the Second National, which increases its capital from \$350,000 to \$1,000,000. The enlarged bank has as officers: Edwin Jackson, President; C. F. Adams, T. W. Childs and T. C. Stevens, Vice-Presidents; W. C. Carr, Cashier.

-Richard P. Joy has resigned as Comptroller of the City of Detroit to take the presidency of the new National Bank of Commerce of that City, which is to begin business on June 1. The other officers chosen for the new institution are W lliam P. Hamilton, Vice-President; Henry H. Sanger Cashier, and Charles B. Warren, General Counsel.

-The Hamilton National Bank of Chicago is now settled in its new quarters on the ground floor of the New York Life Building, corner of La Salle and Monroe streets. This is the very heart of the financial district of Chicago, the National Bank of the Republic occupying the entire first floor of the same building, the Northern Trust Company being directly across and the National City Bank and Bank of Montreal diagonally across La Salle Street, while the Central Trust Company and Monroe National Bank are across Monroe Street, and the Borland Building on the corner is filled with prominent financial institutions. The move ought to be a good one for the Hamilton National, and its growth at the former location, 80 and 82 La Salle St., suggests the possibility of still more rapid progress at the new site. With less than a half million deposits on its opening day, April 21 1903, there has been uninterrupted extension, year by year since then, as follows: April 21 1903, \$413,401.29; March 28 1904, \$1,565,972.23; March 14 1905, \$2,516,808.78; April 6 1906, \$4,532,858.20; Jan. 26 1907, \$6,155,549.42; March 22 1907, \$6,321,360.32. The officers of the Hamilton National Bank are as follows: Charles B. Pike, President; J. H. Cameron, Vice-President; Henry Meyer, Cashier; Geo. H. Wilson and W. T. Perkins, Ass stant Cashiers.

-Harrison B. Riley has been elected President of the Chicago Title & Trust Company of Chicago, Ill.-a post which has remained vacant since the death of Elbridge G. Kent, on May 17 1905. Mr. Riley advances from the office of Secretary to which J. A. Richardson has been elected. -The State Bank of Virginia at Richmond on the 1st inst. adopted its new title, the National State Bank of Richmond, as authorized by Comptroller Ridgely on April 29. The bank's capital continues the same as before conversion, namely, at \$500,000. There is likewise no change in the management, which consists of John S. Ellett, President; William M. Hill, Cashier and Julien H. Hill, Assistant Cashier. -The Austin National Bank of Austin, Texas, has increased its capital from \$150,000 to \$300,000. The addition was the result of a dividend of 100% out of the profits declared by the directors and ratified by the stockholders at a meeting on March 16. The par value of the stock is \$100 per share. The book value of the stock, after the increase, is \$153. The bank was organized in June 1890 with a capital of \$150,000, since which time it has earned and paid to its stockholders \$346,500 in dividends, and now has a surplus and profit account of \$182,698. On March 22 total deposits were \$2,763,039 and the resources, \$3,395,766. The officers are E. P. Wilmot, President; Walter Tips and Henry Hirshfeld, Vice-Presidents; William H. Folts, Cashier, and Morris Hirshfeld, Assistant Cashier.

-It is reported that the \$200,000 new stock to be issued by the Western National Bank of Philadelphia will be offered at \$120 per share of \$100. The dates of payment are June 5, July 5, August 5 and September 5.

-A new State financial institution is to be established in Philadelphia under the title of the American Bank. The capital is to be \$200,000 in shares of \$50; the stock will be disposed of at \$60, thus giving a surplus of \$40,000. The bank will locate in the South Philadelphia section, in the vicinity of Passayunk Avenue and Broad Street.

-Still another financial organization in process of formation in Philadelphia is the West Park Title & Trust Company. This company is to have a capital of not less than \$125,000 nor more than \$250,000. The stock, par value \$50, will be offered at \$55 per share. The institution expects to start business about July 1. It will locate in the neighborhood of 52d Street and Lancaster Avenue.

-The proposition to reduce the capital of the Merchants' Savings & Trust Company of Pittsburgh from \$500,000 to 1092

-The eighth annual meeting of the stockholders of the Mercantile Trust Company of San Francisco was held on the 24th ult. The reports indicate a prosperous condition of affairs. The net earnings for the year, after payment of all expenses and taxes, amount to \$230,747, against \$165,687 reported the previous year. During the past twelve months dividends aggregating \$60,000, declared in September 1906 and March 1907, were paid. The institution recently increased its capital from \$1,000,000 to \$2,-000,000, and now (April 24, 1907) reports capital, surplus, and profit and loss account as \$3,844,097. The directors elected for the ensuing year are William Babcock, Wakefield Baker, H. C. Breeden, Warren D. Clark, W. F. Detert, F. G. Drum, C. E. Green, M. H. Hecht, William G. Irwin, John D. McKee, D. Q. Mills, E. S. Pillsbury, N. D. Rideout, R. D. Robbins, Henry T. Scott, Claus Spreckels and Alexander B. Williamson. The officers are as follows: N. D. Rideout, President; Henry T. Scott and William G. Irwin, Vice-Presidents; John D. McKee, Cashier and Secretary; W. F. Berry, Assistant Cashier and Secretary; O. Ellinghouse, Assistant Cashier and Secretary, and A. H. Winn, Trust Officer.

-G. Bruce Webster, the New York agent of the Chartered Bank of India, Australia and China (head office London), has been notified by cablegram that the shareholders at the special confirmatory meeting May 8th approved the action of the previous special meeting and increased the company's capital stock to £1,200,000. As stated before in these columns, the additional stock is to be issued at £40 per share, payable in installments between June 4 to December 31 1907, such installments to bear interest at 5% per annum. The new shares will rank on the same basis with the existing shares from January 1 1908. With the increase of 20,-000 new shares at £20 (or £400,000) and a like addition of £20 per share to reserve fund (or £400,000) the bank's financial standing will be as follows: capital £1,200,000, reserve liability of shareholders, £1,200,000; reserve fund £1,475,000; undivided profits £93,000.

-The annual report of the Deutsche Bank (head office Berlin) for the twelve months ending December 31 1906 has been issued. Including the balance of net profits for 1905, amounting to \$247,790, the net profits for 1906, after writing off \$617,217 from the accounts of buildings and furniture, and making due provision for all bad and doubtful accounts, were \$6,939,970-representing 14.57% on the paid-up capital of \$47,619,047. The turn-over of the bank in the past year amounted to \$20,380,000,000 against \$18,-380,000,000 in 1905; the number of current deposit and other accounts open in the bank's book at its central and branch offices has increased during the past year from 139,451 to 164,494; the staff of the institution has increased from 3,693 in 1905 to 4,096 at the end of 1906. Out of the net profits for the year an addition of \$690,819 has been made to the Reserve Fund, increasing it to \$23,809.524. An additional reserve of \$14,285,714, amounting to 30% of the capital, the report states, is represented by various assets that are carried in the accounts at less than their market values. Current accounts and deposits on December 31 1906 are given as \$297,796,221.

discourage speculation, yet their real object is to keep their funds well in hand lest, in her present temper, Germany might suddenly attack her western neighbor. The criticisms passed by Germany on the meeting of King Edward and the King of Italy have greatly impressed European opinion. The inference generally drawn is that Germany, finding herself in general ill-odor because of her rather hectoring conduct of late, and finding that, in consequence, she is gradually being isolated, is becoming restive, and that at any moment she may embark upon a policy of adventure. ertheless the best opinion does not accept this view. Nev-That there is much disquiet and even irritation in Germany because of her practical isolation is of course not to be disputed. But that Germany will engage in war or even engage in a course of conduct which may threaten war the best informed do not believe. Nobody disputes Germany's military and naval strength, and that she would be a most formidable antagonist even against a coalition is of course also accorded. Still the belief is that any unprovoked action on her part would evoke such general opposition that her Government will not venture upon it.

The general view, therefore, is that the present stagnation will not last. It is to be observed that trade all over Europe is either already good or is decidedly improving. It'is only upon the Stock Exchange that there is extraordinary stagnation, and the argument is that in a little while the public will recognize that there is no danger of war, and that then they will begin to invest upon a large scale. While the Bank of England rate was at 6% or even at 5%, many people who had suffered losses because of the heavy fall in consols, British railway stocks, and other securities, preferred to place their savings on deposit with the banks rather than venture upon either investment or speculation. Now, however, that the Bank rate is down to 4% the other banks are allowing on deposit only $2\frac{1}{2}\%$, and therefore it is felt that depositors will soon tire of this and that we shall see before long very large and active investment.

In France business is nearly as quiet as it is in London. The French banks, moreover, have diminished the balances they are employing in London, partly because of the fall in rates here, partly because of the great improvement in trade at home and partly because they find it much more profitable to increase their balances in Germany. In Germany business on the Stock Exchange is also quiet, but trade continues good, and although the Bank rate has been put down to $5\frac{1}{2}$ %, still the reserve of the Bank is small, and it is doubted whether much further reduction will be made for the present. The German and Prussian loan was brought out on Thursday and has been a very great success, as was certain to be the case, for the interest it bears is 4%and the issue price was only 99. The applications, therefore, at home and from Holland, Belgium and Switzerland were very large. The applications from France and England, however, were very small. The general explanation is that in France and England the investor does not care for a security which will be paid off in five years, and that the rate of interest was not sufficiently attractive for either bankers or insurance companies, considering what a number of good securities giving nearly as high a return are obtainable.

In Russia trade is surprisingly good, in spite of the political uncertainty and the famine over so large an area of the Empire. Just at the moment there is politically a much more hopeful feeling in Western Europe respecting Russia. It is believed, rightly or wrongly, that M. Stolypin has triumphed over the Reactionaries; that he is more than ever in favor with the Emperor, and that he is gradually preparing to work along with the Constitutional Democrats and to establish a really Constitutional system. If this happens, there will be a very considerable rise in Russian bonds, and the belief in peace will be immensely strengthened.

The India Council offered for tender on Wednesday 70 lacs, and the applications exceeded $572\frac{3}{4}$ lacs, at prices ranging from 1s. 4 1-16d. to 1s. 4 5-32d. per rupee. Applicants for bills at 1s. 4 3-32d. and for telegraphic transfers at 1s. $4\frac{1}{8}d$. per rupee were allotted about 27% of the amounts applied for.

Monetary Commercial English News

(From our own correspondent.)

London, Saturday, April 27 1907.

At the beginning of the week the Imperial Bank of Germany reduced its rate of discount from 6% to $5\frac{1}{2}\%$, and the Bank of the Netherlands put down its rate from $5\frac{1}{2}\%$ to 5%. On Thursday the Bank of England lowered its rate from $4\frac{1}{2}\%$ to 4%. Notwithstanding all this, however, business upon the Stock Exchange continues utterly stagnant. Indeed, it is alleged both by brokers and jobbers that never in their memory has there been less business doing, and bankers confirm the statement, asserting that they have found it extremely difficult to employ money at the settlement this week.

As money now promises to be both plentiful and cheap for at least some months to come, people are naturally puzzling themselves as to what can be the reason of the present stagnation, and the general opinion seems to be that it is the attitude of Germany. It is observed that the Bank of France has not put down its rate, and that, in fact, money is dearer in Paris at present than it is in London. The inference generally drawn from this is that, although it is quite true that trade is exceptionally good in France—much better than it has been for years past—and although it is also true that both the Bank of France and the other banks desire to The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last four years.

Messrs. Pixley & Abell write as follows under date of April 25.

GOLD.—The Bank still receives all the gold and has purchased about £300,000 out of the arrivals. This week's movements include arrivals of £344,000 in bars, while £354,000 has been withdrawn, of which £254,000 for Paris. Next week we ex-pect over £1,000,000 in gold from South Africa. The Bank rate, which was lowered to $4\frac{1}{2}$ % on the 11th inst., was to-day further reduced to $4\frac{1}{2}$ %. Arrivals—Cape, £241,000; Australia, £187,000; total, £428,000. Shipments—Bombay, £108,600; Colombo, £1,500; Calcutta, £50,000; total, £160,100.

SILVER.—Silver has remained unchanged on the week, after some small fluctua-tions. The French Government invited tenders for 20,000 kilos, but this had no effect on the market. China has been the chief element of strength, and Shanghai exchange has risen $\frac{1}{2}$ d. during the week. India has done very little and quotes $77\frac{1}{3}$ Rs. Cash silver is now more plentiful, and in consequence of this and the forward demand for China the premium on cash is now only 1-16d. Arrivals—New York, £170,000. Shipments—Singapore (coin), £61,250; Bombay, £17,826; Co-lombo, £5,000; total, £84,076.

MEXICAN DOLLARS.—There have been some transactions in these coin at their melting value. Arrivals—New York, £46,000.

THE CHRONICLE.

Statement of New York City Clearing-House Banks .--The following statement shows the condition of the New York City Clearing-House banks for the week ending May It should be distinctly understood that as to all items 4. except capital and surplus the figures are the averages of the daily results, not the totals at the end of the week. In other words, in reporting loans and deposits and holdings of specie and legal tenders, the practice is to take the aggregate of the amounts for the several days of the week and divide this aggregate by the number of days.

We omit two ciphers (00) in all cases.

Banks (0s omitted.	Capital.	Surplus.	Loans.	Specie.	Legals.	Deposits. a	Rc- s'r. 6

For Dividends see page 1093.

Wall Street, Friday Night, May 10 1907.

The Money Market and Financial Situation.-Previous to the announcement late on Thursday that a large amount of new securities will soon be issued by the Union Pacific and Southern Pacific companies, very little enthusiasm had developed on the floor of the Stock Exchange during the week. The announcement was so unexpected and the amount involved so large (\$111,000,000) as to be somewhat startling. It was followed by liberal and more or less urgent sales of the outstanding securities of the companies, and a sharp decline of prices throughout the list. Naturally, there was a reaction from this decline, but to-day's market has been decidedly unsettled and irregular.

Up to the time of the announcement mentioned, sentiment had been influenced chiefly by crop reports. These con-tinued to be mostly of an unfavorable character, owing, as is well known, to the unusually backward spring, and there was a disposition to delay operations until the Government report due to-day should be given out. This shows a rating of 82.9 for winter wheat on May 1st as against 89.9 on April 1st, 91 May 1st 1903, 92.5 on May 1 1905 and 76.5 on May 1 1904.

The open market rates for call loans on the Stock Exchange during the week on stock and bond collaterals have ranged from 2 to 3%. To-day's rates on call were $2\frac{1}{2}@3\%$. Prime commercial paper quoted at $5\frac{1}{2}\%$ for endorsements and $5\frac{1}{2}\%$ for best single names. The Bank of England weekly statement on Thursday showed a decrease in bullion of £172,882, and the percentage

of reserve to liabilities was 46.70, against 45.21 last week. The discount rate remains as fixed April 25 at 4%. The Bank of France shows an increase of 13,375,000 frances in gold and 1,700,000 francs in silver.

NEW YORK CITY CLEARING-HOUSE BANKS.

a \$31,626,100 United States deposits included, against \$31,648,600 last week and \$35,971,700 the corresponding week of 1906. With these United States deposits eliminated, the surplus reserve would be \$14,731,150 on May 4 and \$20,258,925 on April 27.

Note .-- Returns of separate banks appear on the preceding page.

Foreign Exchange.-After opening strong, with sight at the highest figures of the year, the market was irregular and feverishly declined, closing steadier. It was influenced by speculative selling, a moderate demand and a better supply of bills.

To-day's (Friday's) nominal quotations for sterling exchange were 4 84@4 841/2 for sixty-day and 4 87 for sight. To-day's (Friday's) actual rates for sterling exchange were 4 8340@4 8350 for long, 4 8620@4 8625 for short and 4 8655@4 8660 for cables. Commercial on banks 4 83@ 4 8310 and documents for payment 4 821/2@4 8314. Cotton for payment 4 821/2@4 825%, cotton for acceptance 4 83@ 4 8310 and grain for payment 4 831/8@4 831/4.

To-day's (Friday's) actual rates for Par's bankers' francs were 5 20a@5 20 for long and 5 167/8a@5 167/8d for short. Germany bankers' marks were 941/2@94 9-16 for long and 95 1-16@951/8d for short. Amsterdam bankers' guilders were 40 27 @ 40 29 for short.

Exchange at Parls on London to-day 25f. 15c. Week's range 25f. 16c. high and 25f. 141/2c. low.

erage, and the tendency of prices has been, in sympathy with shares, towards a lower level. As usual under such conditions, the decline of convertible issues has been more marked than that of other bonds.

United States Bonds.—Sales of Government bonds at the Board include \$5,000 2s, coup., 1930, at $104\frac{1}{8}$; \$2,000 3s, coup., 1903-18, at $102\frac{1}{4}$; \$1,000 4s, reg., 1925, at 130, and \$1,000 4s, coup., 1907, at $101\frac{1}{2}$. The following are the daily closing quotations; for yearly range see third page following.

*This is the price bid at the morning board; no sale was made.

Railroad and Miscellaneous Stocks.-The stock market has been somewhat more active. It was dull during the early part of the week, the transactions on Wednesday aggregating less than 400,000 shares, and prices generally showed a tendency to decline. This tendency became a pronounced movement on the announcement of large new issues noted above and prices fell off sharply. Under the lead of Union Pacific, which dropped nearly 8 points. Reading declined nearly 5, and other prominent issues from 2 to 4 points within an hour. Later the market rallied and early to-day there was further recovery, but this strength was not maintained and closing prices are, in many cases, at or very near the lowest of the week.

Among the exceptional features of the week have been Delaware & Hudson, which declined 111/2 points on unconfirmed rumors of a contemplated loan, and New York Central, which sold down over 6 points on its report for the first quarter of the year. North West. dropped 4 points, perhaps in sympathy

The local transportation issues and Consolidated Gas were weak on discussion of the Public Utilities bill in the State Legislature.—Interboro-Metropolitan selling at the lowest price in its history.

Federal Sugar common and preferred were conspicious for an advance of 6 and 15 points respectively, the latter to a new high record for the year. Moreover they are the only issues traded in that close higher than last week. Smelting and Refining closes with a net loss of 5 points.

For daily volume of business see page 1103.

The following sales have occurred this week of shares not represented in our detailed list on the pages which follow:

Outside Market .-- Manhattan Transit and one or two of the copper issues absorbed the attention on the "curb" this week, the market otherwise being unusually quiet. Since the recent favorable decision, various unconfirmed in nors regarding Manhattan Transit have affected the stock, the price, on heavy transactions, advancing two points to 8. It reacted somewhat towards the close of the week, moving down finally to 7^3 §. Western Ice suffered a break in the price from $33\frac{1}{2}$ to $31\frac{1}{2}$ and ends the week at $31\frac{5}{8}$. Standard Oil rose two points to 527 but fell back to 519. N. Y. & Cuba Mail S.S. declined from 28 to 27, then advanced to 2812. Electric Boat Common sold at 33 last week and this week got up to 38, but finally sank to 361/8. The preferred advanced from 81 to 85, but receded to 82. Chicago Subway was dull and ranged between 17 and 171/2. Southern Pacific and Union Pacific "rights" were actively traded in, the former from $\frac{1}{2}$ to $1\frac{1}{2}$ and back to $1\frac{1}{8}$, and the latter from $\frac{3}{4}$ to 1 and down to $\frac{1}{4}$. Atchison "rights" sold up from $\frac{3}{8}$ to 7-16 and to-day back to $\frac{1}{4}$. Among the copper shares Dominion Copper was conspicuous for activity, moving up from 67% to 73%, subsequently reacting to 73%. Boston Con-solidated Copper dropped from 305% to 28% recovering to 2834. Davis-Daly Estates sold down from 161% to 1514. United Copper common, from 6178 advanced to 6234, easing off to 62. The preferred went down from 91 to 88 and up to 89. Cumberland Ely rose from $9\frac{1}{8}$ to $10\frac{1}{4}$, easing off finally to 10. Miemac Mining advanced from $4\frac{1}{8}$ to $5\frac{5}{8}$, but subsequently receded to $4\frac{3}{4}$.

The week's range for exchange rates follows:

RAILROAD GROSS EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from July 1 to and including such latest week or month. We add a supplementary statement to show the fiscal year totals of those roads whose fiscal year does not begin with July, but covers some other period. The returns of the street railways are brought together separately on a subsequent page.

ANNUAL REPORTS.

West Jersey & Seashore Railroad.

(Report for Fiscal Year ending Dec. 31 1906.)

President James McCrea, under date of Philadelphia, Feb. 26 1907, says in substance:

Feb. 26 1907, says in substance: Statistics.—The tons carried increased 16.87 %: tonnage mileage increased 21.28 %; freight train mileage, 19.53 %. The passengers carried increased 12.94 %; passenger mileage increased 10.48 %, and passenger train mileage increased 19.82 %. The rate per ton per mile decreased 6.09 % to 2.16 cents and the rate per passenger per mile increased 1.06 % to 1.337 cents. *General Remarks.*—The workings of the system for the year show large increases in both the freight and passenger earnings, the total increase in gross earnings being \$553,878. There was, however, a decided increase in the expense of maintenance of equipment and a still greater increase in the conducting transportation expenses, the total increase in expenses being \$568,186. The resulting decrease in net earnings was \$14,307. In addition, there was a heavy increase in taxes, so that after providing for all liabilities, the net income was \$797,648, against which were charged the regular sinking fund payment under the consolidated mortgage, and two dividends of 3% each on the capital stock, leaving a balance of \$274,729 to be carried to the credit of profit and loss account. The second semi-annual dividend was paid upon the increased amount of stock resulting from the allotment of 55% made March 30 1906. *New Stock.*—This allotment was for the purpose of providing a portion of the funds needed for the electrification of your road from Camden via Newfield to Atlantic City and from Newfield to Millville, and other necessary improvements and facilities. To the same end a sale was made of \$1,061,000 of 4% consolidated mortgage bonds maturing July 1 1936. *Construction, & c.*—The aggregate amount of construction, equipment and real estate expenditures during the year was \$6,312,812.

Charges to Capital Account Aggregating \$6,112,812.

Electrification, Camden (Haddon Ave.) to Atlantic City via New-field and Newfield to Millville______\$4,460,296

Connection between Atlantic City Division and Atlantic City RR.	-,,
at Winslow Junction	183,174
New lines, &c., in Camden, N. J	522.780
Double-track Ireight line Westville to Haddonfield Junction	244,910
Miscellancous	122,739
Electric ranway and other equipment	559,719
Real estate	19,193
	10,100

Real estate 19,193 The charges against the extraordinary expenditure fund set aside in 1905 aggregated \$200,000, of which \$123,406 was spent at Camden for inspection shed and shop, changes of track and other facilities, interlocking and removal of milk facilities to Cooper's Point. In addition we paid \$14,648 as our proportion of the cost of Camden joint terminal improvements, making our total proportion to Dec. 31 1906 \$1,894,500. You will note from the foregoing statement that the construction expen-diture for the year was mainly in the electrification of your railroad from Camden to Atlantic City via Newfield Junction, and from the latter point to Millville. This required an independent terminal and various other changes and improvements in Camden. As the result of these expenditures the company has one of the most completely equipped long distance electric lines in the country, but as the line could not be put in operation until Sept. 18 1906, the close of the season for heavy summer passenger traffic, and the complete service was not inaugurated until a month later, your company did not derive any material benefit from its earnings during the remaining portion of the year.

company did not derive any material benefit from its earnings during the remaining portion of the year. In order to divert from the electrified portion of your railroad the steam trains for seaside points, reached by the Cape May Division south and east of Sea Isle Junction, a connection was constructed between your Atlantic City Division and the Philadelphia & Reading's Atlantic City RR. at Winslow Junction, and between that railroad and your Cape May Division at Mount Pleasant.

Western New York & Pennsylvania Railway.

(Report for Fiscal Year ending Dec. 31 1906.)

President W. H. Barnes says:

Cost of road, franchises and property shows an increase of \$457,972 ex-pended for right of way and real estate, canal and dock improvements at South Buffalo. Ebenezer Branch, and grade crossing improvements in the city of Buffalo. In addition there was expended and charged to Income \$214,949, being cost of rebuilding pool freight cars, equipping freight cars with air brakes, shop tools and machinery, additional storage yards at New Castle and Lyons, and the Scottsville Branch of the Genesee Valley Canal Railroad. Railroad.

Rainoad.
The increase in amount due for advances, as stated in the balance sheet (\$543,637), is for construction charges.
The percentage of operating expenses to gross earnings was 80.18%, being a decrease of 3.80%. The number of tons carried increased 1,639,521, or 19.48% The number of passengers increased 176,831, or 10.22%.

Philadelphia Company of Pittsburgh.

(Report for Fiscal Year ending March 31 1907.)

The report of President Reed, the company's income account, balance sheet and stockholdings, the combined income account of all the operating companies, and the report of the Pittsburgh Railways Co., will be found in fullon pages 1121 and 1122.

INCOME ACCOUNT.

at Mount Pleasant. Other Important Improvements, still under way, are the new freight line from Westville to Haddonfield Junction and the new overhead connecting line from Spruce St. on the Atlantic City Division, to Van Hook St., on the Cape May Division, in Camden. In connection with the electrification of the Somers' Point Branch and its use under the contract by the Atlantic City & Shore RR. Co., it was necessary to double track that branch from Pleasantville to Somers' Point, for which we shall receive a satisfactory increase in the rental. increase in the rental.

United Railways Investment Co.

(Report for Fiscal Year ending Dec. 31 1906.) The report of President Ernst Thalmann for the fiscal year ending Dec. 31, 1906 accompanied by the income accounts of the United Railroads of San Francisco and the Philadelphia Company, singly and combined, and also the income account and balance sheet of the United Railways Investment Co., will be found in extenso in the advertising department of to-day's "Chronicle." The report of the Philadelphia Company is also given on subsequent pages of this issue. President Thalmann, April 16 1907, says in brief:

president Thalmann, April 16 1907, says in brief:
Acquisitions.—During the year 1906 your company acquired \$24,200,000
common capital stock of the Philadelphila Co., being approximately 72.8 %
of the outstanding common capital stock of that company. Of the stock so acquired \$21,000,000 was deposited by stockholders of the common stock of the Philadelphila Co. under the plan ratified April 5 1906 (V. 82
p. 393, 510), and the shares so acquired were duly deposited under the collateral trust agreement securing our 5% "prior lien collateral trust bonds," as required by said plan (see application to list in V. 83, p. 1235).
The residue of such common capital stock, amounting to \$3,200,000, was acquired later in the year, and of that amount \$2,690,000 had been delivered to your company and paid for by it prior to Dec. 31 1906, and the balance. \$510,000, was delivered and paid for in Jan. 1907. The purchase price of such \$3,200,000 of the additional 5% "collateral trust bonds" at 90, and the balance.
\$52,400,000 of the additional 5% "collateral trust bonds" at 90, and the and the dalance.
\$2,690,000 of the additional 5% collateral trust bonds at 90, and the asle of \$2,400,000 of the additional 5% collateral trust bonds mentioned, our funded debt, which amounted Dec. 31 1906 to \$15,750,000, is now \$18,150,000.
The certificates for the \$3,200,000 of stock of the Philadelphila Co. so acquired were duly deposited and pledged under the agreement securing the collateral trust 5% bonds, in accordance with the terms thereof, concurrently with the issue and authentication of the additional bonds.
Payment of Floating Debt—Further Requirements.—The floating debt, which amounted to \$2,000 on Dec. 31 1906, has since been repaid from the proceeds of the additional collateral trust 5% bonds, in accordance with the terms thereof, concurrently with the issue and authentication of the additional bonds.
Payment of Floating Debt—Further Req

however, again be increased presently as your directors have arranged to provide funds for the United Railroads of San Francisco towards the accru-ing requirements of that company for the reconstruction and improvement work in progress. Investments.—The total book value of the investments, as shown on the balance sheet, amounted Dec. 31 1906 to \$53,126,482, approximately one-half of this representing our interest in the United Railroads of San Francisco and the other half representing our interest in the common stock of the Philadelphia Co. at that date. Controlled Companies.—During the current year the Philadelphia Co. has paid the regular dividend on its preferred stock and the usual 6% on its common stock, and all the surplus earnings above the same has been retained by that company for its corporate purposes. Both the gross and net earnings of the United Railroads of San Francisco had shown excellent results up to April 18 1906. On that date the earth-quake occurred, which resulted in a disastrous irre and involved the com-pany in great loss, including the destruction of the cable power-houses and formerly operated by cable, and that over 91% of the mileage of the com-pany is now in operation, and that they expect to place the balance of 9% in operation as rapidly as the city completes certain necessary street im-provements. Hetween Dec. 31 1905 and March 1 1907 there had been expended in the restoration and reconstruction of its lines and plant, including improvements and betterments and the physical loss resulting from the earthquake and fire, a total of over \$4,000,000. All expenditures for betterments and improvements made to March 1 1907 had been inanced by said company, and its current ilasin francisco consequent upon the earthquake also led to a strike on the lines of the railroad company. Involving practically all its employees, which lasted from Aug. 26 to Sept. 5 1906. Although the strike terminated in a resumption of work on the part of the company's employees, puch has then dom Aug. 26 to

company, at par, for each. *Earnings.*—Messrs. Haskins & Sells have prepared a tabulated statement of the consolidated earnings, charges, dividends and surplus of the Phila-delphia Co. and the United Rallroads of San Francisco for the calendar year 1906, in part based on provisional figures.

Combined Income Account of United Railroads of San Francisco and Phila-delphia Co. and affiliated corporations for the year ended Dec. 31 1906.

Proportion applicable to United Rys. Inv. Co., based on present stk hold \$2	2.821,976	\$877,146 100.%	\$1,944,830 72.80 %

\$2,821,976, which would have been equivalent to its operating expenses, interest on its outstanding obligations, and 5 % dividends on the outstanding preferred stock, leaving a surplus of \$1,460,968. No cash dividends were paid during the year 1906 by the United Railroads of San Eranetsco

No cash dividends were paid during the year 1906 by the United Rambads of San Francisco. A comparison of this statement with a similar statement of Messrs. Haskins & Sells for the year 1905 shows that the combined gross earnings for the year 1906 exceeded those for the year 1905, and after the deduction of all charges against the net earnings, the statement shows an amount for the year 1906, applicable to improvements, betterments, extensions, sinking funds, depreciation and dividends approximately the same as for the year 1905 1905.

Note.—At Dec. 31 1906 the United Rys. Investment Co. had a contingent liability to an amount not exceeding \$500,000, for accounts of the United RRs. of San Francisco, which it has guaranteed. The dividends on the \$20,000,000 preferred stock of the United RRs. of San Francisco are cumulative and are in arrears as from March 31 1906. *a* This indebtedness had, prior to April 16 1907, been reduced to approxi-mately \$135,000. *x* The investments include: United RRs. of San Francisco, 200,000 shares preferred stock, \$100 par value each; 199,989 shares common, \$100 par value each; Philadelphia Co., 473,800 shares common stock, \$50 par value each, \$53,052,818; other investments, \$73,663.—V. 84, p. 932, 750.

Chicago & Milwaukee Electric Railroad

(Report for Fiscal Year ending Dec. 31 1906.)

President A. C. Frost, Chicago, April 4 1907, writes:

(Report for Fiscal Year ending Dec. 31 1900.) President A. C. Frost, Chicago, April 4 1907, writes: In presenting the report for the year 1906, we are glad to show a sub-stantial gain in earnings and extensive improvements made during the past year. The construction work has been of the most substantial char-acter, involving large expenditure, which is justified by the extraordinary territory through which we operate. The route is practically an air-line, entrely on private right-of-way not less than 100 feet wide, through the citles, as well as through the country. Having a maximum of 0.4 grade and a maximum of one degree curves. All having a maximum of 0.4 grade and a maximum of one degree curves. All having the vide, through the citles, as well as through the country. Having a maximum of 0.4 grade and a maximum of one degree curves. All having a maximum of 0.4 grade and a work of fast express service. The company holds most satisfactory franchises, all but four being in per-petuity. All the franchises of the Wisconsin Division are perpetual, ex-cept for the entrance into Milwaukee, which is for 30 years. The Chicago & Milwaukee Electric RR. connects Chicago with Milwaukee and 23 other cities and towns along the line—serving a population of 3,000,000, which is rapidly increasing. Last year the company built a cut-off between Highland Park and Lake Forest, a distance of about 2 miles, thereby eliminating two bad curves and greatly reducing the time between the two cities. A number of new sta-tions and shelters were built; the capacity of the power plant increased, and 10 large interurban cars added to our equipment. The company also made other improvements out of our surplus. The Wisconsin Division, as far as Racine, was placed in operation on Sept. 2 1906 and the earnings from this extension have been very gratifying. Nearly all the right-of-way from Racine to Milwaukee has been acquired and the road constructed to within 15 miles of Milwaukee. It is expected to have the roa

100 % 72.80 % The figures given by these tables afford a reasonable basis for the calcula-tion of the future prospects of your company. When it is considered that in the course of the year 1906 the earnings of the United Railroads of San Francisco have been subjected to the earthquake, the resulting conflagration and all its consequences, the strike of its employees, and the consequent general demoralization, they offer a most encouraging promise for the future and justify the hope that at no distant date payment of cash dividends may be resumed. Had the Investment Co. been the owner during the entire year 1906 of the common stock of the Philadelphia Co. now held by it, and had the respective surpluses of the two companies been declared as dividends, the Investment Co. would have shown an earning power during that year of

\$75,000 this year.

a Includes \$63,572,800 capital stock issued and \$780,750 of subscriptions on account of capital stock, an equal amount being payable April 1907. ----V. 83, p. 1593.

Diamond Match Co., Chicago.

(Statement Made at Annual Meeting-Committee's Report.)

At the annual meeting held in Chicago on May 1 President Barber submitted substantially the following statement (compare annual report figures in V. 84, p. 747):

Shortly after the special meeting of the stockholders, held in May 1906, in examining committee was appointed by the board, and I now submit its report:

The undersigned, appointed to employ experts to audit your books and appraise your property, respectfully report that the Audit Company of New York has submitted a report showing:

"Condition of Company as of Dec. 31 1906. Assets.

Land, buildings, machinery, equipment, interest in California

[VOL. LXXXIV.

pairs and depreciation to match factories amounted to \$202,788 and to \$111,066 for similar items in respect to the California plants. Since the difference in totals was found to be so slight, the Audit Company considered the company's charges sufficient and accepted its figures. Your committee, however, calls attention to the fact that the company's statements as usually published convey the idea that no charges whatever are made against profits for depreciation or replacements.

[Signed by $\{ E. A. POTTER, \\ GRANGER FARWELL, \\ C. H. PALMER. \}$

I have no comment to make except to say that I consider the values placed by the Audit Company upon our plants, property, &c., greatly be-low not only the cost of replacing such plants at the present time, but in some instances even less than the first cost of construction, notwithstanding that they were built when labor and material were greatly lower than at present time. The constant effort of your management has been to main-tain the present up has been to passible condition, and there are been to mainpresent time. The constant effort of your management has been to main-tain the property in the best possible condition, and liberal sums have been expended year by year for repairs, replacements and betterments which have been charged off direct to expense. Again, the action of the company in making heavy charges from time to time against surplus for depreciation or reduction of plant, &c., account, has tended to wipe out the loss that has been sustained in the sale of wreckage of plants that have at different times been acquired. I believe that if an appraisal had been made with less conservatism, the report would have suggested a much lower figure for pat-ents. trade-marks. &c.

conservatism, the report would have suggested a much lower ligure for pat-ents, trade-marks, &c. *Dividends.*—At the meeting of the shareholders held in May 1906 there was some discussion as to the propriety of reducing the dividend from 10 to 8%. The satisfactory results of our operations for the year 1906, how-ever, emphatically indicated that no such action was necessary, and in view of the flattering prospects of the company, its excellent condition and increasing trade, there seems to be no occasion whatever of even so much are discussion or reducing the table time.

ever, emphatically indicated that no such action was necessary, and in view of the flattering prospects of the company, its excellent condition and increasing trade, there seems to be no occasion whatever of even so much as discussing a reduction at this time. Acquisition.—In my report of March 1907 (V. 84, p. 747) I stated that we had taken an option on 93,000 acres of timber land in California adjacent to our present holdings, and that experts had been employed to make esti-mates of the value of the quantity of timber thereon. James D. Lacey & Co., who made the examination, have submitted their report, and it is so favorable that I cannot but believe that a rare opportunity has been given us. At a meeting of our board of directors held yesterday, it was resolved that the option be exercised and that the property be purchased for \$1,000, 000 for the timber, real estate, logging rallways, equipment, lixtures, &cc., and in addition thereto the lumber, merchandise and supplies at inventoried value. This acquisition is believed to be of great importance, not only because of our present as well as prospective value of the timber, but also because of our present heavy investment in permanent coupment, logging roads, sawmills, &c., in California, the life of which will obviously be ex-tended in consequence of the largely increased amount of timber we will ac-quire under this option. In my report I intimated that you might possibly be called upon to invest and taios stated that it had been successed that the lumber business should be segregated from the Diamond Match Co. Both of these matters have been carefully considered, and in view of the favorable outlook for business and earnings for the current year, it will not be necessary to make any un-usual arrangements for financing the property, as the company is abundant-ily able to undertake the purchase without calling upon its shareholders, as the terms of payment are liberal. While for many reasons it would be desirable if a company were organized to take over

Bethlehem Steel Corporation.

(Report for Fiscal Year ending Dec. 31 1906.).

C. M. Schwab, President and Chairman of the Board, April 2 1907 writes in substance:

General Results .-- From the consolidated balance sheet as of Dec. 31 1906. operations for the year show the following results: Total income of the constituent companies of the corporation____\$1,320,053 Deduct bond interest of constituent companies._____57,304

Net income for the year \$762,749against which have been declared dividends at the rate of 5 %, or \$745,400, of which three quarterly dividends were paid durin 1906, and the fourth Feb. 1 1907 (May 1906, 134 %; Aug. 1906, 134 %; Nov. 1906, 34 %; Feb. 1907, $\frac{3}{4}$ % total, 5 %.—Ed.) The following amounts were charged to accumulated surplus, not being considered properly chargeable against the earnings of the past fiscal year for reasons explained below: Loss by earthquake and fire at Union Iron Works, S n Francisco, Cal

- Loss by the at Bethlehem Steel Co. c Share (proportionate to work remaining to be performed Jan, 1 1905) of the loss in excess of \$250,000 provided in 1905, on Government crulsers contracted for by the United States Ship-building Co. \$118,401 60,000

ted to the production of Government work, although also suitable for the production of certain lines of commercial work. During the past year, there nas been a large decrease in the volume of orders received from the Govern-ment, and steps were taken to develop the business in commercial lines. Additional shops and mills were erected to increase the production of com-mercial material. The largest development was the erection of an entirely new plant, reference to which was made in our last report, for the manufac-ture of rails and of structural shopes by a new process to which the compny-has secured the exclusive American rights. The new plant, it is now ex-pected, will become productive in July of tais year. The fiscal year 1906

THE CHRONICLE

has, as far as the income of the Bethlehem Steel Co. is concerned, been a part of the transition period, and this has been reflected in the diminished income shown. While the new mills will not reach their full normal earning capacity during the current year, it is believed that they will add materially to the income of 1907.

\$78.364

\$778,364x The interest above (\$45,274) on the company's first extension mortgage 5s includes the proportion of discount and the amount of interest chargeable against operations of the year. It will be noted that even under the adverse conditions existing in 1906 and with the new plant not yed in operation, the total income of the Bethle-hem Steel Co., \$1,651,231, would be at a rate sufficient to pay the interest on its purchase-money mortgage 6% bonds outstanding, \$444,480; and the interest on the entire \$12,000,000 issue of its inst mortgage extension 5% gold bonds, \$600,000, leaving a surplus of \$666,751, which would give a substantial margin for sinking fund on first extension mortgage bonds (which commences in 1908), interest on loans, depreciation, and towards dividends to the Bethlehem Steel Corporation, leaving further applicable to dividends the increase which is confidently anticipated in the earnings of the present plant from development of the commercial business and the entire earnings of the new plant. Ship Yards.-The results of the operations of the ship yards have been very unsatisfactory. While repair work in these yards has been profitable, a serious loss has developed in several large ship contracts. At the time of the purchase of the shipbuilding properties by the Corporation, there were on hand a number of unprofitable ship contracts, principally Government cruisers, which have since shown a much larger loss than was anticipated. Losses have also developed on ship contracts, not yet completed, taken since the purchase of the shipbuilding properties, due largely to the unfavorable labor conditions existing at the Union Iron Works at San Francisco following the earthquake. The statement of income of the Bethlehem Steel Corpora-tion for the year ended Dec. 31 1906, and the adjustment of its surplus and property accounts, reflect what is believed to be the entire loss to be sus-tained on such contracts. Future ship contracts will only be taken on an assured ma

Works Co. will devote its attention entirely to ship repair work and mining machinery. Dividends.—As a result of the decreased earnings, your directors deemed it advisable to reduce the dividends payable Nov. 1 1906 and Feb 1 1907 to ¾ of 1 %, making the total dividends declared out of the income of 1906 at the rate of 5 % per annum on the preferred stock. Orders, &c.—The total estimated value of the orders booked by the corporation during the year aggregated \$16,216,570, with an estimated value of unfiled orders on hand Dec. 31 1906 of \$13,300,885. Union Iron Works Co.—This plant is situated outside the zone of the greatest destruction by the earthquake of April 18 1906, and consequently escaped with damages which, while serious, were slight compared to those suffered by property in the heart of the city. Apart, however, from the actual destruction of property, the labor situation which has followed the earthquake has seriously affected this plant. The yard is particularly well located for securing a large volume of ship repair work and this branch of the Government, which will probably be de livered in April and May, and four other ships, one of which should be delivered during March. Progress has been made in the development of the mining machinery business, and good results are expected. Harlan & Hollingsworth Corporation.—This plant has been placed in good condition. During the year 1906 this yard has delivered 11 yeasels and 158 cars, besides bollers, engines, &c., and miscellaneous repair work. There are now on the books orders for 14 yessels and 131 ears, which will employ the capacity of the plant until the fall of 1907, mostly at a good margin of profit.

the capacity of the piant until the fall of 1907, mostly at a good margin of profit. Samuel L. Moore & Sons Corporation.—This plant has been developing its general foundry and machine shop business and new lines of specialties. It is now well filled with work. The Crescent Shipyard Corporation has not been operated since the formation of the Bethlehem Steel Corporation, and it is intended to consolidate it with the Samuel L. Moore & Sons Corporation (the properties being adjoining). Bethlehem Steel Company.—During the year this company has delivered \$7,400,000 of its \$12,000,000 first extension mortgage 5% gold bonds, to provide a fund for the construction and extensions under way. The \$1,251,000 5% bonds of the Bethlehem Iron Co. matured Feb. 1 1907 and have been paid. The mines of the juragua Iron Co., a subsidiary to the Bethlehem Steel Co., have been in continuous operation throughout the year. The principal work done has been in the line of development and equipment for a larger and nore conomical output, the attendant cost of which has been deferred as a charge against future mining operations. The ore bodies on this property. It is demonstrated, are even more extensive than anticipated at the time of the acquisition of the property. Other Subsidiaries.— No operations are being carried on at the plants of the Eastern Shipbuilding Corporation and the Cartaret Improvement Co. BETHLEHEM STEEL CORPOR 1110N AND SUBSIDIARY COS.

Net surplus as per balance sheet		and the second in some desired in the second	

At the Bethlehem Steel Co. a number of new departments have been put in operation during 1906, the original equipment of small tools, &c., being charged to operations, although it might properly have been considered a capital charge. Further, a large part of the work on the new plant is being built by the Bethlehem Steel Co. and charged to capital account at cost, making the book value of these improvements stand at a lower figure than if purchased from a contractor who would add profit. The use of the facilities of the company for this purpose has, of course, reduced the amount of sal-able product and consequent profits. In view of the above, and the present physical condition of the various plants, no depreciation has been deducted for the year 1906. *y* The dividends here include: In 1905, Aug., 134 %, and Nov., 134 %; total, 3 4%. Total, 6%. Compare paragraph headed "General Results" above.—Ed. BETHLEHEM STEEL CORPORATION AND SUBSIDIARY COS.

Pennsylvania Steel Company (of New Jersey).

(Report for Fiscal Year ending Dec. 31 1906.)

The report, signed by President E. C. Felton and Chairman of the Executive Committee E. B. Morris, gives, under date of May 3, the following particulars regarding the operations of the mining, manufacturing and railroad companies owned or controlled for the fiscal year 1906:

or controlled for the fiscal year 1906: Mining Companies.—Reference was made in the last annual report to the formation, in your interest, of the Penn-Mary Coal Co. (V. 82, p. 1104) and the purchase by it of a large acreage of coking coal. This property, situated in Indiana County, Penn., was taken over on May 1 1906 and is now producing about 30,000 tons of coal monthly. It is being further de-veloped by opening new mines and by the construction of an additional coal tipple. The scarcity of efficient labor has retarded its development considerably. In line with the policy of increasing ore reserves, your subsidiary com-pany, The Pennsylvania Steel Co., of Pennsylvania, purchased during 1906 6¹⁴ additional shares in the Cornwall Ore Banks (compare V. 72, p. 1241, 1283; V. 73, p. 1364; V. 74, p. 1312; V. 76, p. 917; V. 80, p. 655) and now own a majority interest in that property. A notable addition to your sup-piles of iron ore has also been made by your subsidiary company, the Span-ish-American Iron Co., in the discovery of an extensive deposit of iron ore which has been acquired and which will be developed as fast as circum-stances permit. The development will involve the building of a rail-road, with the necessary ore docks, towns, shops and mining equipment, and, if it is to be made rapidly and economically, will require to be financed independently of the current surplus earnings available for plant additions and improvements. The producing mines of the Spanish-American Iron Co., near Santiago in the Island of Cuba, made their maximum output in 1906. These mines are in excellent condition. *Manufacturing Companies.*—The amount of steel produced and the value of products involced were in excess of those for any previous year; 809,000

Manufacturing Companies.—The amount of steel produced and the value of products involced were in excess of those for any previous year; 809,000 tons of pig iron were made in 1906, as compared with 748,000 tons in 1905, and 980,000 tons of steel ingots in 1906 as compared with 847,000 tons in 1905

At the Steelton plant of the Pennsylvania Steel Co. the 120 by-product coke ovens were completed with the year 1906, were started in January 1907, and are now in full operation. The construction of a new open-hearth plant, consisting of five 75-ton furnaces, was begun in June, 1906, and will be completed about the middle of the present year. Important additions were made during the year to billet mill and slabbing mill at Steelton and to the ore and copper concentrating plants at Lebanon. At the Sparrow's Point plant of the Maryland Steel Co. the replacing of all blowing engines at blast furnaces was finished and the remodeling and compounding of other important engines in the steel plants were well ad-vanced during 1906. The improvements to blast furnaces have resulted in a very gratifying increase in the output of that department. The marine department of the Maryland Steel Co. built ten vessels during 1906, and also did an amount of repair work to ships about equal to that of previous years.

of previous years. Railroad Companies.— The railroad companies, owned or controlled,

of previous years. Railroad Companies. — The railroad companies, owned or controlled, were successfully operated. All Companies. —Out of the balance of profits remaining, after deducting interest charges, charges to general and special depreciation and dividends paid, your subsidiary companies have transferred \$1,851,794 to their re-serves for plant improvements. The subsidiary companies expended during 1906 \$2,328,591 for capital account. The principal items from which this expenditure was made were the completion of the coke oven plant and the construction of the new open hearth plant at the Steelton works of the Pennsylvania Steel Co. Dividends to the amount of 7% have been paid during the year on your preferred stock. No dividend has been paid on your common stock. Outlook for 1907.—The program for 1907 comprises no important ex-penditure at the Steelton works other than that involved in the completion of the new open hearth plant now under construction. At the Sparrow's Point plant, improvements in the handling of raw materials for blast fur-naces, from ships to the blast furnace plant, are contemplated. The most inportant matter now before us is the development of the new iron ore property in Cuba belonging to the Spanish-American Iron Co re-

tized for FRASER er.stlouisfed.ora/

ferred to above. This is a subject of supreme importance to your company and the plans for developing the property and for financing the enterprise are now having our earnest consideration. The business outlook for the year 1907 is good. The amount of orders booked by your subsidiary companies is in excess of any previous year. The increase in costs of labor, supplies and raw materials will, however, considerably reduce their net profits.

Bush Terminal Company.

(Report for the Fiscal Year ending Dec. 31 1906.)

President Irving T. Bush March 12 1907 writes in substance:

Construction work was so delayed that many improvements did not produce income until the closing months of the year, and some not until early in 1907. Additions which are now producing a monthly revenue of \$20,000 produced practically nothing during 1906. With this exception, the business has continued upon a satisfactory basis, and a substantial increase of income for 1907 seems assured. Other construction work is under way, but will probably not become productive until 1908. Pler No. 2, the sixth pler to be constructed by the company, was com-pleted early in Jan. 1907, and has been leased for a term of years. The sprinkler plant, installed at an expense of nearly \$500,000, was completed early in 1906, and the present rates of insurance vary from one-half to one-tenth of those formerly in force.

spinkler plant, installed at an expense of nearly \$500,000, was completed early in 1906, and the present rates of insurance vary from one-half to one-tenth of those formerly in force. The ferry from the Battery to the foot of 39th St., ±rooklyn, was ac-quired by the City Oct. 1 1906, which will be of great benefit to all commercial interests in South Brooklyn. In addition, the city has decided to undertake the development of all the vacant property on both sides of the company's plant, on the South Brooklyn water-front, and has both taken steps to acquire this property and has approved a plan for the con-struction of nine piers, similar in a general way to our own. This will result in making South Brooklyn the greatest steamship centre at this port. The city has also acquired a site for a wholesale market upon the water-front directly opposite the factory buildings Nos. 1 and 2, and construction work has already been begrn. Our ordinary business operations have been carried on during the past year under many disadvantages, because of the large amount of construc-tion material it has been necessary to handle. This has interrupted our regular service, and has increased the cost of operation. These difficulties will correct themselves as soon as the plant is completed. The company is still carrying a large amount of undeveloped property, which is increasing in value, and which, when developed, will yield a large return. In view of this burden, and of the delay in construction work. It has been difficult to make a large net surplus for the year, but the condition of the plant has been eharged against the year's income, and a surplus of \$112,055 has been earned. Our plers and loft and factory buildings are leased at fixed rentals, and contingent income is derived from the storage of merchandisc, which branch of the business is never more prosperous than in so-called hard times. *Factory Building*.—The loft and factory building development of this company also deserves a special word. The venture was strated upo

United Gas Improvement Co., Philadelphia.

(Report for Fiscal Year ending Dec. 31 1906.)

President Thomas Dolan says:

Volume of Sales.—During the fiscal year ending Dec. 31 1906 the gas companies in which we are interested outside of Philadelphia, increased the volume of their sales 13 2-10 %. The sales of the Philadelphia Gas Works increased 6 3-10 % and the sales of the electric-light companies in which we

volume of their sales 15 2-10 %. The sales of the Philadelphia Gas Works increased 6 3:10 % and the sales of the ciectric-light companies in which we are interested increased 15 3-10 %. Stock.—The capital stock was increased during May and June from \$36,720,200 to \$45,884,850. The earnings of 1906 amount to 13.49 % upon the average capitalization of the year. Lease of Kansas City Gas Co to Syndicate, Etc.—On Sept. 27 1906 there was approved by the Mayor of Kansas City, Mo., an ordinance granting to a syndicate, of which this company is a member, the right to sell natural gas for 30 years, and for that purpose to lease the holders, street mains services and meters of the Kansas City (Mo.) Gas Co. This lease has been made on a gradually increasing rental, which finally reaches an amount sufficient to pay 5 % annual dividends on the capital stock of that company, in which, as you know, the United Gas Improvement Co. has a large inter-est. Contracts have been entered into with the Kansas Natural Gas Co. (Vol. 83, p. 821, 382: V. 84, p. 568) and the Kansas City Pipe Line Co. which insures to Kansas City, Mo., and Kansas City, Kan., an ample sup-ply of gas. This settles the only franchise problem likely to confront us for 10 years. ply of gas. for 10 years.

(vol. 6, p. 621, 352; v. 84, p. 305) and the Kansas City Kan., an ample supply of gas. This settles the only franchise problem likely to confront us for 10 years.
Lease and Sale of Company's Connecticul Interests.—The property of the Connectleut Rallway & Lighting Co. has been leased for 999 years from Aug. 1 1906, and the capital stocks of the Housatonic and New Milford Water Power companies and of the Meriden Southington & Compounce Tramway Co. have been sold to the Consolidated Rallway Co., a corporation controlling all the important trolley properties of Connectleut. The New York New Haven & Hartford RR. Co. owns most of the stock of the Consolidated Co. and has guaranteed the fulfillment of the conditions of the lease and payment of the principal and interest of the debentures issued to buy the stocks of the water power companies and the Meriden Southington.
Compounce Tramway Co.
The rentals under the lease supplemented by the sum of \$10 per share their stock paid by the owners of the common stock to the Colonial static, of New York, as trustee, will be sufficient to pay interest and sinking fund charges, the cost of maintaining the corporate organization, and dividends at the rate of 4% per annum on the preferred and common stock of the Connecticut Rallway & Lighting Co. (V. 84, p. 507, 390.) Sale of Rhode Island Interests.—Simultaneously with the above transaction there were sold to the Providence Securities Co., which made payment in 11s 4% 50 year debenture bonds, guaranteed as to principal and interest by the New York New Haven & Hartford RR. Co., all of the bonds and floating debt and practically all of the capital stock of the Rande Island Interests.—Simultaneously with the above the anount of \$10 per share of stock so sold. (See a subsequent page of this Issue; also V. 84, p. 97, V. 83, p. 1525.)
Assured Income of \$1,000,000 Yearly from Connecticut and Rhode Island floating debt and practically all of the Sontage of the Singhoyo.
Aguistitor Rand

The prosperity of this company is not dependent upon the Philadelphia gas lease, but upon the many interests which it possesses situate outside of Philadelphia, where the moneys payable to us upon such termination can be at least as profitably employed as here. Even though these sums should temporarily be tied up by litigation, in my opinion the dividends upon your stock will not be diminished.

GENERAL INVESTMENT NEWS

RAILROADS, INCLUDING STREET ROADS. Alaska Central Ry.-Construction.-President Frost confirms the following:

This company, which is building a line from Seward north via Susitua valley to the Tanana River, 450 miles has let a contract for building 25 miles and grading thereon has just been started. A contract will probably be let in June for building 30 miles additional. The company has also fin-thed summary for a beauch from Kully about 150 miles north of its southished surveys for a branch from Knlk, about 150 miles north of its south-ern terminus, east to Matanuska, 40 miles. See map on page 11 of "Rail-way & Industrial Section."—V. 82, p. 1495.

Atchison Topeka & Santa Fe Ry. Co.-New Bond Issue-Further Facts.-The block of about \$26,000,000 5% convertible bonds offered at par to shareholders of record May 10, as stated last week (p. 1051), while coming under the \$98,000,000 authorization of stock or bonds approved by the shareholders last January (V. 84, p. 269), is now officially described as "part of an authorized issue not exceeding \$35,000,000 of 10-year 5% convertible gold bonds to be issued pursuant to an indenture dated May 9 1907, to be executed by the company and by the Standard Trust Co. of New York, as trustee." A circular dated May 1 says: A circular dated May 1 says:

The bonds now offered will be convertible prior to June 1 1913, at the option of the holders, into paid-up shares of the common stock of the same par value. The bonds will be payable on June 1 1917, and will bear interest at 5 % per annum, payable June 1 and Dec. 1; and both principal and interest will be payable in gold coin of the United States of the present standard of weight and interest, without deduction from either principal or interest for any tay or taxes which the reduction from either principal or interest for any tax or taxes which the railway company or the trustee

may be required to pay or to retain therefrom under any present or future law of the United States or of any State, Territory, county or municipality therein. They will be issued as coupon bonds, each for the principal sum of \$1,000, and as registered bonds without coupons, each for the principal sum of \$1,000, or \$5,000, or any multiple of \$5,000 that may be authorized by the board of directors. The coupon bonds will be exchangeable for registered bonds and the registered bonds for coupon bonds. The bonds may be called for redeniption by the company on any interest day, at 110 % of their par value and accrued interest; but when so called for redemption they may, at the option of the holders, provided the time for conversion has not expired, be converted into stock, as aforesaid, at any time before the day named for redemption. The bond and indenture provide that their allway company will not exe-cute any new mortgage upon any of the lines of railway owned by it on Jan. 1 1907, except by way of further security for bonds issued under mortgages executed by the railway company prior to that date, unless such new mort-gage shall provide that all such convertible bonds issued and to be issued shall be included in the debt secured by such new mortgage. Subscription warrants will be issued only for amounts of \$1,000 or mul-tiples thereof. For each fraction of a \$1,000 bond in respect of which a stockholder is entitled to a subscription privilege, a fractional warrant will be issued which will not entitle the holder to subscription warrant for a \$1,000 bond; and, if the surrendered fractional warrants in an amount aggregating \$1,000, will be exchangeable for a subscription warrant for a \$1,000 bond; and, if the surrendered fractional warrants include a fraction. The company will not buy or sell fractions, but they can be sold in the market. The third and final installment must be paid and the warrant be returned

market. The third and final installment must be paid and the warrant be returned to the company between June 5 and June 10 1908, whereupon the bonds will be delivered.

At the time of paying the first or second installment subscribers may pay the subsequent installment or installments and thereupon receive the bonds. The bonds will bear interest from June 1 or December 1 next preceding the as payable will operate as a forfeiture of all rights in respect of the sub-scription and any installment or installments previously paid. Subscrip-tions must be made at the office of the company, 5 Nassau Street.—V. S4 p. 1051, 101.

Atlantic City & Suburban Traction Co.—Receivership.— On Thursday J. L. Clawson, of Philadelphia, was appointed receiver of the company by Vice-Chancellor Learning of New Jersey.—V. 84, p. 803, 692.

Baltimore & Ohio RR.—Called Bonds.—Thirty-eight (\$38,-000) Monongahela River RR. first mortgage 5% coal bonds called for redemption are payable at the office of the Ameri-

can Bonding Co. of Baltimore on June 1. Acquisition.—Temporary Loan.—The company, it is un-derstood, obtained several millions short-time money for use with cash in the treasury in the payment of the \$15,140,-000 4% bonds of the Chicago Terminal Transfer RR. which were redeemable on May 3 at par and interest. See Chicago Terminal Transfer RR., V. 84, p. 930, 867; V. 84, p. 569, 50.

Chicago St. Paul Minneapolis & Omaha Ry.—New Office.-See Chicago & North Western Ry. above.-V. 84, p. 507.

Columbus Sandusky & Hocking RR.-Status of Litigation .- The Supreme Court of Ohio recently handed down a decision affirming the judgment of the Franklin County Circuit Court in favor of the defendants in the case of Marriott against Charles Q. Davis and 19 others, brought to enforce the double statutory liability of the stockholders. It was currently reported that the judgment of Judge Evans levying an assessment of 25% on the stockholders generally was thereby rendered ineffective. We have the following from an authoritative source:

all authoritative Source: The decision of the Ohio Supreme Court does not affect that of Judge Evans levying an assessment of 25% against stockholders, except as to the particular persons named in the decree. According to the writer's recollec-tion no judgment was entered by Judge Evans against these persons, their cases being pending on demurrer at the time the decision was rendered. Those involved in the decision of the Supreme Court a week ago escape liability on the ground that the statute of limitations had run before they were served with summons in the action. There has been an appeal from the judgment of Judge Evans levying an assessment of 25% upon the other stockholders, on the ground that the assessment was not large enough to pay the debts. This appeal will not be disposed of until the September term of the reviewing court. It is expected that enough will be collected to pay the claims of creditors in full. Compare V. 82, p. 803; V 81, p. 264.

Coney Island & Brooklyn RR.—New Stock, Etc.—Stockholders of record on April 25 have the right to subscribe at par until and including May 25 for \$1,000,000 new stock to the extent of 50% of their respective holdings. Subscrip-tions are to be paid in four installments of 25% each on July 1 and Oct. 1 1907 and Feb. 1 and May 1 1908.

Certificates of stock will not be issued until subscriptions are paid in full. The proceeds will be used for construction of the new power house, recon-struction on Coney Island Avenue and other requirements. Concurrently with the suspension of dividends there have been rumors that Brooklyn Rapid Transit interests had been negotiating for control.— V. 84, p. 1052, 867.

Connecticut Railway & Lighting Co.—Leased.—See United Gas & Improvement Co. under "Annual Reports" on a preceding page.-V. 84, p. 507, 390.

Consolidated Railway, Connecticut.-Issue of \$15,000,000 Convertible 10-year Debenture 5s dated Mar. 1, 1907— \$5,000,000 Outstanding.—This issue, not previously reported, appears in the table furnished the New York Stock Exchange, showing the outstanding debentures of the Consolidated Railway Co., under "New York New Haven & Hartford

RR." below. Earnings—Exchange of Debentures for Slock.—See afore-said item.—V. 84, p. 1052, 995.

Darby Media & Chester Street Railway.-Guaranteed Bonds Öffered.-George B. Atlee & Co., 119 So. 4th Street, Philadelphia, who first offered to customers this company's first mortgage $4\frac{1}{2}$ % bonds, guaranteed, principal, and interest by the Philadelphia Rapid Transit Ry. Co., have purchased a further block and offer them at $98\frac{1}{2}$ and interest—at which price they yield to the investor 4.6%. A circular says:

which price they yield to the investor 4.6%. A circular says: These bonds are dated July 1 1906 and are due July 1 1936 but are callable on or after July 1 1916 at 102 ½ and interest. Interest payable Jan. 1 and July 1. Land Title & Trust Co. of Philadelphia, trustee. Tax free in Penna. Total authorized issue \$1,500,000; outstanding \$865,000. The bonds are an absolute first lien on the lines of the Phila. Morton & Swarthmore Ry. and the Media Middletown Ashton & Chester Elec. Ry. (V. 83, p. 38) which in July 1906 were merged into the Darby Media & Chester Street Railway. The Philadelphia Rapid Transit Co. has leased the Darby Media & Chester Street Railway for 999 years for the following rental: \$8,750 for the first year; \$17,000 for second and third years; \$25,500 for fourth year; \$34,000 for fifth year, and \$42,500 for six years and thereafter. The Philadelphia Rapid Transit Co. guarantees the principal and interest on the above bonds. The road operates 25 miles of track, making the debt less than \$35,000 per mile.

Delaware & Hudson Co.-New Issue of Convertible Bonds Probable.—To finance the company's acquisitions of the last two or three years and to defray the cost of additions and improvements, the board of managers, it is believed, are considering the advisability of making a new issue of securities, which will probably be convertible bonds, for an aggregate amount of from \$10,000,000 to \$20,000,000. The company's requirements, it is stated, are not pressing, and some time may elapse before a definite plan is decided upon and made public. The acquisitions of the company during the last two or three years, it is said, are in almost every instance paying their own way, in addition to acting as valuable feeders for the company's lines.—V. 84, p. 1052, 931.

(Has a traffic agreement with the Cleveland Electric Ry. Co.	1

Hudson Companies, New York.-Real Estate Mortgage.-This company, the construction concern for the Hudson & Manhattan (tunnel) RR. (V. 82, p. 804), has filed a \$250,000 3-year 4% real estate mortgage dated Apr. 17 1907 to Edward A. Morrison, as trustee, covering No. 1279, 1281, 1283 and 12831/2 Broadway, between 32d and 33d streets.— V. 81, p. 1550.

Hudson & Manhattan RR.-See Hudson Companies above.—V. 84, p. 220, 51.

Kanawha & Michigan Ry.-Equipment Bonds.-The Marchants' Loan & Trust Co. of Chicago 's offering a small b'ock of 5% equipment bonds dated Aug. 15 1903, not heretofore described. A circular says:

These bonds are part of an issue of \$460,000 due serially each six months from Feb. 15 1907 to Aug. 15 1916, the \$23,000 due Feb. 15 1907 having been paid. Interest payable Feb. 15 and Aug. 15. Denomination \$1,000. A direct obligation of the company, secured by a car trust covering 500 drop bottom steel coal cars, 100,000 lbs, capacity each, 20% of the cost of equipment having been paid in cash. The cars have all been delivered and accepted. (Bonds maturing Feb. 15 1908, Aug. 15 1908 and Feb. 15 1909 are offered at 99³/₄ and interest, 99¹/₆ and interest and 99¹/₄ and interest, respectively.—Ed.)—V. 84, p. 508, 51.

Low Fare Ry., Cleveland.—Franchises.—Mayor Johnson on April 27 signed the ordinance granting the company a franch'se over the Central Avenue route recently abandoned by the Cleveland Electric Ry. and on May 6 one g ving it the right over a number of streets now occupied by the Cleveland Electric Ry., but regarding which the franchises, it is claimed, expire in Feb. or March next. Temporary injunctions have been granted in various suits preventing the company from proceeding with construction work on the Central Avenue ioute. Compare V. 84, p. 995, 930.-V. 84, p. 102.

Maryland Electric Railways, Baltimore.—Underlying Bonds Resold.—Baltimore banking houses, including, it is stated, Owen Daly & Co. J. S. Wilson & Co. and the Fidelity Trust Co. have purchased from Brown Bros. & Co. their block of \$750,000 of the \$1,000,000 first mortgage 5% gold bonds of the Baltimore & Annapolis Short Line, an underly-ing issue of the Maryland Electric Rys. Co. The proceeds will be used to electrify the Short Line division. Compare V. 83, p. 156, and V. 84, p. 1052.

Metropolitan West Side Elevated Ry., Chicago.—Offering of Collateral Gold Bonds of 1903.—The Merchan's' Loan & Trust Co. of Chicago is offering at prices to not the investor $5\frac{1}{4}\%$ \$400,000 5% serial gold bonds, being part of the \$600,000 issue made in 1905 to refund the unpaid portion of a loan dating back to 1904; \$50,000 has been redeemed. A circular says:

A circular says: These bonds are part of an issue of \$550,000, maturing \$50,000 each six months from Oct. 1 1907 to Oct. 1 1912, both inclusive, but redeemable at 101 and interest on any interest day upon thirty days' notice. Interest payable April 1 and Oct. 1. Denomination \$1,000 c*. They are secured by deposit with The Merchants' Loan & Trust Co. of first extension mortgage 4% bonds, at the rate of \$75,000 bonds to each \$50,000,of this issue, leaving a margin of over 20% on the value of the collateral deposited. The Metropolitan is the largest elevated system in Chicago, operating 49 miles of road (single track mileage). Its traffic is increasing very rapidly, the daily average of passengers for the month of February 1907 being 154,413; an increase of 14% over that of Feb. 1906. The company is paying divi-dends at the rate of 3% per annum on \$9,000,000 preferred stock. In the trust agreement securing these bonds the company covenants that it will not declare or pay any dividends without first specifically setting aside will not declare or pay any dividends without first specifically setting aside and appropriating sufficient funds to pay all the bonds and coupons of this issue which may mature during the period for which said dividend is de-clared.—V. 84, p. 929, 804.

New York New Haven & Hartford RR.-Listing.-The New York Stock Exchange has authorized the listing of \$3,254,500 additional capital stock from time to time prior to July 1 1907, on official notice of exchange for Consolidated Ry. debenture certificates, making the total authorized to be listed \$99,069,000

This \$3,254,500 of stock is additional to the blocks of \$3,745,500 and \$6,750,000, authorized in 1906 to be listed for the same purpose (V. 82 p. 869; V. 83, p. 1471), and it makes the total amount of stock issued and issuable for the acquirement of the debentures of the Consolidated Ry. \$13,750,000. The total authorized issue of The Consolidated Ry. debenture certificates is \$38,500,000, of which there has been issued \$28,500,000. Of said debentures \$27,500,000 are exchangeable for this \$13,750,000 capital stock of the railroad and to date \$6,173,500 stock has been issued for such exchange, and \$7,576,500 remains to be exchanged for \$15,153,000 deben-tures exchangeable, but still outstanding, viz.:

Union Pacific RR.-Dividends Hereafter to be Paid Quarterly .- On Thursday the directors of both the Union Pacific and the Southern Pacific voted that "on account of the very heavy distributions of cash required to make semi-annual neavy distributions of cash required to make semi-annual payments, the payments on the stock should hereafter be made quarterly." The U. P. directors thereupon declared a quarterly dividend of $2\frac{1}{2}$, and the So. Pac. directors a quarterly distribution of $1\frac{1}{4}$, both payable July 1. New Securities.—The directors on Thursday also decided

to call a meeting of the shareholders next June to authorize the issue of \$100,000,000 of new common stock (increasing the authorized amount thereof from \$196,178,700 to \$296,-178,700), and against \$42,857,143 thereof to issue \$75.000.-000 convertible 4% 20-year bonds. The proceeds will be used to pay for the company's allotment of about \$15,000.000 in the new stock of the Southern Pacific Co. (see that company above) and to provide for other capital requirements as below stated.

All stockholders of record at 3 p. m. May 29 1907 will be given the option to subscribe for the new convertible bonds given the option to subscribe for the new convergine bonds at 90 and accrued interest to the extent of 25% of their holdings until Jely 10 1907; 20% of the face value of the bonds is to be paid July 10; 20% Aug. 9th, and the balance with adjustment of interest is to be paid Sept. 20 1907. The aforesaid bonds will be correctible at ever time before

mature in 20 yea.s; will be convertible at any time before July 1 1917, into common stock at \$175 per share; will be redeemable at the option of the company on July 1 1912, or on any somi-annual interest day thereafter at a premium of $2\frac{1}{2}$, upon 90 days notice, in which case the privilege of conversion will terminate 30 days before redemption date. After setting as de \$42,857,143 of the new common stock

to be issued only in converting the \$75,000,000 of convertible bonds, the balance of the new stock, \$57,142,857 (as well as any amount not required in converting the bonds) must, under the law, in the first instance be offered to the stockholders, and no such offer it is stated officially is now in contemplation.

the second black there will	1

Over and above all requirements of every kind, there will \$12,000,000 remain something over_____

remain something over______\$12,000,000 Mr. Harriman stated that it was his belief that the actual returns would be greater rather than less than the estimated figures, as they had been made up on very conservative lines. The Union Pacific RR. Co. as the holder of about 45 % of the Southern Pacific Co.'s stock will have to take about \$15,000,000 of the new preferred stock, which the directors of the Southern Pacific Co. to-day decided to effer to its stockholders, and that amount will be added to its present re-quirements, bringing them up to, say, \$65,000,000. In order to provide for that, they have decided to have a meeting of the stockholders in June and ask authority for the issue of \$100,000,000 of common stock, and against a portion of that stock to issue \$75,000,000 of convertible bonds. The floating debt of the Union Pacific RR. Co. was incurred for the fol-lowing expenditures, which have not been capitalized:

of Voting Trust.—The voting trustees give notice that voting trust will expire June 1. Holders of stock trust certificates may obtain the stock represented thereby on and after June 1 at the office of Commercial Trust Co. of New Jersey upon surrender of trust certificates .--- V. 84, p. 1054, 745.

Washington Traction Co., Springfield, Ohio.—Receiver-ship.—On May 6 Stacey B. Rankin was appointed receiver of this company on application of the Guaranty Title & Trust Co. of Pittsburgh. A press dispatch says that "the company has not paid a cent of the \$66,000 purchase money" due for the acquisition of the property in 1905 (V. 82, p. 1103).-V. 84, p. 572.

INDUSTRIAL, GAS AND MISCELLANEOUS.

American Silk Co., New York .- Increase of Stock .- This company, recently organized to bring under one management a number of silk properties, has called a meeting of its shareholders, to be held at Room 707, No. 34 Nassau St., New York City, on May 23, for the purpose of voting upon an in-crease of the capital stock from \$6,250,000, divided into \$2,750,000 preferred stock and \$3,500,000 common stock, to \$11,000,000 divided into \$5,000,000 preferred stock and \$6,000,000 common stock. Par of shares, \$100 each. We understand that no bond issue is proposed. Samuel B. Lawrence is President, and Henry C. Everdell, Secretary .---V. 84, p. 998.

Baltimore Electric Co.—Consolidation.—The shareholders of the Baltimore Electric Power Co. and its subsidiary, the Maryland Telephone & Telegraph Co., on May 4 voted to consolidate the two companies under the name of the Balti-

consolidate the two companies under the name of the Balti-more Electric Co. (Compare V. 84, p. 1054.) The bonds of the merging companies have been deposited with the Baltimore Trust & Guarantee Co. of Baltimore and the Northern Trust Co. of Philadelphia, and it is understood will be exchanged, par for par, for new bonds of an issue of \$7,500,000. The authorized capital stock of the new company, it is understood, is \$4,400,000, of which \$1,000,000 is to be 5% cumulative preferred and \$3,-400,000 is to be common stock. Of the latter stock, issued dollar for dollar for the shares of the old companies, \$900,000 goes into the treasury of the new corporation to represent a like amount of the stock of the Maryland Telephone & Telegraph Co., which for some time past has been owned by the Power Company; the outstanding common stock of the new company is, therefore, to be \$2,500,000. The preferred stock \$1,000,000, it is understood, will be sold at once to provide for payment of floating debt, &c. Officers of the new company: President, David E. Evans; First Vice-Pres., Sydney L. Wright; Second Vice-Pres., B. S. Josselyn; Secretary, W. T. Spring; Treasurer, R. F. Bonsal. The Maryland Telephone Co. has been incorporated with an authorized capital stock of \$1,000,000 in \$100 shares, as an auxiliary of the consolidated

capital stock of \$1,000,000 in \$100 shares, as an auxiliary of the consolidated company.

Compare Maryland Telephone & Telegraph Co. in V. 77, p. 2096; V. 79, p. 631; V. 80, p. 1061; V. 81, p. 268; V. 82, p. 283.—V. 84, p. 1054

Baltimore Electric Power Co.—Consolidation.—See Baltimore Electric Co. above.-V. 84, p. 1054.

Batopilas Mining Co.-On "Unlisted Sheet."-The New York Stock Exchange has admitted to dealings in the unlisted department \$8,925,360 capital stock (\$20 par) admitted to quotation, with authority to the Committee to add from time to time, prior to Nov. 1 1907, \$13,900 additional on notice that it has been exchanged for stock of antecedent companies. Stock is to be traded in at dollars per share.-Office 45 Broadway, New York.

Beatrice (Neb.) Gas & Power Co.-Bond Issue.-A first mortgage has been filed to the Superior Savings & Trust Co., as trustee, to secure an issue of \$100,000 6% gold bonds.

as trustee, to secure an issue of \$100,000 6% gold bonds. The bonds are dated Jan. 15 1907 and will mature Jan. 15 1927, but are subject to call Jan. 15 1917 at 105. Denomination \$500 and \$1,000. Interest payable Jan. 15 and July 15 at office of trustee. The mortgage covers plant at Beatrice: \$60,000 bonds are outstanding and \$40,000 reserved for new construction. Company was incorporated in Nebraska in 1906 to operate gas and electric light and power plant. Stock, \$150,000, all issued, par \$100. An independent company having a new franchise; "not connected in any way with the old company," the City Gas Co. of Beatrice, now in receiver's hands (V. 81, p. 1725, 1317). Charles F. Lang is President and Ernest S. Hough, Secretary and Treasurer.

Boston Consolidated Copper & Gold Mining Co.-Called

Boston Consolidated Copper & Gold Linning Co.—Catter Bonds.—The following comes from London: The company will on Nov. 1 1907 redcem the whole of the outstanding first mortgage debentures at £105 per £100 (\$487) debenture on presenta-tion either at Capel House, New Broad Street, London, E. C., or at 79 Milk Street, Boston, U. S. A., and either in English or American currency, as the case may be. (Of the original issue, \$250,000, about half, it is under-stood, has been converted into stock.) (V. 81, p. 1794).—V. 82, p. 394, 630

(J. G.) Brill Co., Philadelphia.—Preferred Stock Offered.— Edward B. Smith & Co., New York and Philadelphia, are offering at par and accrued dividends, by advertisement on another page, the preferred shares of this leading builder

another page, the preferred shares of this leading builder of street railway cars. A circular says: The company has a capacity for constructing 3,500 cars and 6,000 trucks per annum, having a valuation of \$8,000,000. The company has a surplus of quick assets of more than \$2,000,000. There are at present on its books orders amounting to more than \$4,000,000. There is no bonded debt, except a mortgage for \$400,000 on one plant. No bonded debt may be created without the consent of 75 % of the preferred stock. See full particulars in V. 84, p. 998, 869, 751. The Brill business in Philadelphia was founded in 1869. The company has had an enviable history of uniform success, and has paid dividends from its foundation. The company's business is extensive, its cars being in use in the principal cities of this country and in Europe, South America, Philippine Islands, Africa, Japan, Australia and India. To broaden the scope of its work a plant has been acquired for construction of cars for steam roads to meet a growing demand arising from the electrification of steam rallways. rallways

Butte Central & Boston Copper Corp.-Reduction of Capital Stock .- The shareholders will meet in Portland, Me., May 22, to vote on reducing the capital stock from \$15,000,-000, consisting of \$5,000,000 preferred and \$10,000,000 common stock, to \$6,000,000, of which \$2,000,000 will be 7% cumulative participating preferred and \$4,000,000 common stock. About \$1,000,000 each in preferred and common will remain in the treasury. The official notice says When the capitalization was fixed at \$15,000,000. It was intended that When the capitalization was fixed at \$15,000,000, it was intended that several large tracts of copper lands should be acquired and developed; in-vestigation, however, proved the undesirability of acquiring those proper-ties, as some of the property already acquired is proving so rich these are now unnecessary. The Ophir Mine alone gives indication of proving one of the richest mines in Butte. The reduced capitalization, we think, is amply sufficient for all purposes of the corporation,) and assure, in our opinion, certain and permanent returns to the stockholders, while relieving the corporation from the burden of unissued capitalization and fees and taxes thereon.—V. 83, p. 1413. (J. I.) Case Threshing Machine Co., Racine, Wis.—New Stock and Bonds.—The company on May 2 filed a certificate of increase of stock from \$2,000,000 to \$5,000,000 and has made a mortgage to the First Trust & Savings Bank of Chicago as trustee to secure an issue of \$3,500,000 first mortgage bonds. Bonds Offered.-Peabody, Houghteling & Co., Chicago, are offering at prices to net the investor $5\frac{1}{2}\%$ the entire issue of \$3,500,000 first mortgage 5% serial gold bonds, dated May 1 1907, and due \$300,000 yearly on Nov. 1 1908 to 1918, and \$200,000 in 1919, but redeemable in the reverse of numerical order on May 1 1908, or on interest dates thereafter, at 1021/2 and interest. Denominations \$1,000 and \$500 c*; interest payable at the office of the trustee in Chicago and at the First National Bank of New York. "The average annual net earnings for the five fiscal years ending Dec. 31 1906 have been \$887,900, being more than five times the maximum annual interest charge of \$175,000 on this issue, and leaves available \$712,900 for the annual payment on account of principal, \$300,000.

Abstract of Letter from President Frank K. Bull, Dated Racine, May 4 1907
The business was started by the late Jerome I. Case in 1842; in 1880 the
present company was incorporated, with a full-paid capital of \$1,000,000.
Since that time \$3,100,000 has been paid in cash into capital and surplus
account, all other additions to capital and surplus having come from the
profits of the business. The company has never had an unprofitable year
and has paid in dividends since 1880 an aggregate amount of \$7,750,000,
besides adding over \$4,000,000 to its capital and surplus. The sales during
the past nine years have more than quadrupled and the net earnings have
grown from \$238,000 in 1897 to over \$1,100,000 in 1906. In addition to
the large annual expenditure which is made out of earnings to maintain
the high standard of the plant and its equipment, ample provision has been
made annually for depreciation before arriving at these profits.
The business of the company is by far the largest of its kind in this country. The company has 35 branch houses in this and other countries, including houses at Minneapolis, Fargo, Spokane, Des Moines, Lincoln, Kansas
City, Denver, Dallas, Syracuse, and many other cities, in addition to which
it has over 6,000 local agencles, covering practically the entire grain-growing
territory of this and other countries. Our line of manufacture includes
farm engines, both portable and traction, and threshing machines.
This bond issue of \$3,500,000 is made for the purpose of funding the
floating debt, and, when issued, will constitute the entire debt of the corporation, excepting, of course, the usual operating accounts. Pledged as
additional security for the bonds there are \$5,250,000 notes received from
the sale of threshing machinery. In every case secured by chattel mortgage
on the machinery sold and in many cases by chattel mortgage on other
property or by mortgage on farm lands or other real estate. Abstract of Letter from President Frank K. Bull, Dated Racine, May 4 1907

Approximate Condition (as of Jan. 1 1907) After Completion of Funding

Accountants' Certificate, Chicago, May 4 1907.

We have examined the books of the company for the five years ending Dec. 31 1906 and we find:

Dec. 31 1906 and we find: Net Profits of the Business before Charging Interest on Borrowed Money. 1902. 1903. 1904. 1905. 1906. Ann. Avg. \$809,132 \$1,078,559 \$599,428 \$844,306 \$1,108,075 \$887,900 The principal officers being the principal stockholders receive no salarles. Incorporating in the balance sheet of Dec. 31 1906 (1) the \$1,100,000 additional capital stock since issued and paid for at par and (2) the \$3,500,-000 first mortgage bonds, we find that the net assets over and above all current liabilities on that date would amount to \$11,675,488, including patents at the book value of \$250,000, but excluding any value for good-will, and after making ample reserves for depreciation and bad and doubtful accounts, and for the cost of collection of notes and bills receivable. The notes and bills receivable, taken by the company for the sale of its product, were liquidated during the eight years ending Dec. 31 1906 to an aggregate par value of \$20,572,831, and realized in cash on account of the principal alone \$19,841,806, the realizations thus amounting to 96.45% of the face value, without taking into account the interest of not less than 6% per annum accruing thereon, which has been more than sufficient to pay the costs of collection.—V. 83, p. 892; V. 78, p. 1169; V. 77, p. 2099.

Chester County Gas Co.-Change in Control.-See United Gas & Improvement Co. under "Annual Reports" on a preceding page.

Columbus (O.) Public Service Co.-No New Stock.-The newspaper report that the shareholders at the annual meeting on April 8 were to consider a proposition to increase the capital stock by the issue of \$250,000 additional preferred stock, it appears was unauthorized. The stockholders, we are informed, were not asked to vote on issuing any additional securities at their annual meeting.—V. 82, p. 1271.

Consumers' Gas Co., Toronto.—Stock Offering.—The "Toronto Globe" of May 4 says that the company will sell at public auction 6,000 shares (\$300,000) of the capital stock on June 6.—Compare V. 84, p. 628.

Cornwall (Pa.) Ore Banks Co.—Control Now Owned by Pennsylvania Steel Co.-See that company under "Annual Reports" on a preceding page.

Edison Electric Illuminating Co. of Boston.—Stock Sold. The \$1,090,200 capital stock offered by the company at auction on May 8 was bid in, chiefly by leading bankers and brokers, at prices ranging from 202 to 20434, only 100 shares being sold at the maximum figure. The upset price was \$195 a share.

Number of Shares Purchased and Prices Paid by Principal Purchasers.
3,350 Kidder, Peabody & Co
900 Moors & Cabot 203 3 @ 202 3 %

Edison Electric Illuminating Co. of Brockton.—New Stock. -The Massachusetts Gas & Electric Commission has authorized the company to issue at par \$550,000 additional capital stock to retire floating debt.—V. 80, p. 1060.

Edison Electric Light Co., York, Pa.—Description of Plant.—The "Electrical World" of May 4 has an illustrated article describing this company's remodeled and enlarged power plant.

Electric Vehicle Co.—Litigation Discontinued.—Contrary to the recent newspaper report stating that the Court of Appeals has handed down a decision holding the former directors liable for the amount of dividends distributed in 1899 and 1900, we learn that the several actions brought for the purpose have all been discontinued by consent. A decision favorable to the directors was rendered by the Court of Errors and Appeals in March 1903. Compare V. 76, p 657.-V. 79, p. 1464.

Equitable Illuminating Gas Light Co., Philadelphia.-Status.—See United Gas & Improvement Co. under "Annual Reports" on a preceding page.-V. 84, p. 1055, 274.

Fairmont Coal Co.-Notes Offered.-Mercantile Trust & Deposit Co., Baltimore, and Potter, Choate & Prentice, New York, are offering at 97 and interest "yielding 65%%" the unsold portion (\$850,000) of the issue of \$2,000,000 5% collateral notes fully described in our issue of March 16, p.628.

The par value of these notes is \$5,000 and \$1,000 (see V. 84, p. 696). The Windsor Trust Co. of New York is trustee. Among the collateral is stock in the Northwestern Fuel Co. and first mortgage bonds of the Pitts-burgh & Fairmont Fuel Co. and the Southern Coal & Iron Co. as shown n V. 84, p. 628.—V. 84, p. 696.

Federal Sugar Refining Co. (of New York).-New Parent Company-Payment of All Arrears of Preferred Dividends.-This company was incorporated at Albany on May 6 with \$10,000,000 of authorized capital stock, of which \$3,322,800 is to be 6% cumulative preferred stock and \$6,677,200 common stock, to take over, dollar for dollar, the same amount of outstanding stock, common and preferred, respectively, of the Federal Sugar Refining Co. of New Jersey (see full statement to New York Stock Exchange in V. 84, p. 691, 870), which, in turn, owns the entire \$100,000 stock of the Federal Sugar Refining Co. of Yonkers, the operating

the Federal Sugar Refining Co. of Yonkers, the operating concern. President C. A. Spreckels, in a circular addressed to the stockholders of the New Jersey company, says: The authorized capital stock of the newly organized New York company is \$10,000,000, and of this amount \$3,322,800 is preferred stock (the same amount as the outstanding preferred stock of your company) and the rights and privileges pertaining to the preferred stock are the same as those pertaining to the preferred stock which you now hold. The remainder of the capital stock of the New York company, namely, \$6,677,200, is common stock (the same amount as the outstanding common stock of your com-pany) and with the same rights and privileges. The new company has offered to issue its common stock in exchange for the outstanding common stock of this company, share for share, and has also offered to issue its preferred stock in exchange for the outstanding preferred stock of this company, share for share, and has also offered to issue its preferred stock in exchange for the outstanding preferred stock of this company, share for share, and at the same time to pay to the preferred shareholders of this company at the time of their making such exchange, the sum of \$6 per share in cash, that being the amount of arrears of dividends on the preferred stock of this company; this offer to remain open for twenty days. Over two-thirds of the oustanding capital stock has already been turned in in exchange on the plan mentioned above. Steps will be taken to list the new shares on the New York Stock Exchange as soon as the transaction is completed. In addition to the ahove, you will receive a 3% dividend on your preferred shares on May 28 1907, being the dividend declared May 6 1907 to stockholders of record May 7 1907. Upon your sending your certificates of stock to Abner H. Platt, Presi-dent; care of First National Bank. Jersey City, endorsed in blank, the stock

May 7 1907. Upon your sending your certificates of stock to Abner H. Platt, Presi-dent; care of First National Bank, Jersey City, endorsed in blank, the stock of the Federal Sugar Refining Co. (of New York) will be issued in exchange therefor and a check given at the rate of \$6 per share for the preferred. Mr. Platt will be in attendance for that purpose from 12 to 1 o'clock each business day.—V. 84, p. 870, 691.

Gilbert (Wm. L.) Clock Co., Winsted, Conn.—New Stock. -President and Treasurer James G. Woodruff on May 4 wrote:

The new capital stock authorized (\$1,500,000, viz., \$500,000 to \$2,000,-000.--Ed.) may not be taken up for some time. The great increase in our business may call for more capital later on, but for the present there will be no change. (Bond issue, if any, not disclosed.--Ed.) Compare V. 84, p. 696.

Grand Rapids (Mich.) Hydraulic Co.—Decision.—Judge Willis B. Perkins in the Circuit Court at Grand Rapids on May 7 handed down a decision in the quo warranto proceedings brought by Attorney-General Bird sustaining the contention of the latter that the company has no longer any right to transact business, and also the Act of the Legislature forfeiting its charter passed last year. Compare V. 84, p. 934.

Hackensack Water Co., Weehawken, N. J.-New Stock.-The directors have decided to issue \$1,000,000 new common stock and to give to each stockholder of record on May 1 1907 the right to subscribe at par on or before May 21 for such stock, at the rate of one share of new stock for every two shares of his present holdings, common or preferred.

Subscriptions must be paid at the office of Hudson Trust Co., Hoboken, 60% June 1, 20% June 30, and the remaining 20% Dec. 1 1907, when stock certificates will be delivered and interest paid at the rate of 6% on previous payments. Payment in full of all installments may be made on June 1 1907, in which case the new stock will be delivered and will carry dividends from that date. An extra cash dividend of 25% has been declared on all stock of record May 1 1907, payable June 1 1907, the same date at which the usual dividend of 3% will be paid.—V. 79, p. 2799.

Houston (Tex.) Oil Co.—Court Order Requires Kirby Lumber Co. to Pay \$120,000 a Month.-Referring to the paragraph in our issue of April 13, page 870, it appears from the copy of the order of the Circuit Court of the United States for the Southern District of Texas given below that it was not merely in consequence of an agreement between the receivers of the Houston Oil Co. and the Kirby Lumber Co., but a direct order of the Court that compels the Kirby Lumber Co. to pay for 24,000,000 feet of timber at \$5 per 1,000, aggregating \$120,000 per month, whether they cut it or not, until Feb. 1908. The proceeds of the above 24,000,000 feet of timber per month are paid into Court to meet current operations of the Houston Oil Co. (under strict supervision of the court) and "timber certificate" payments; and the Court, it would seem, was influenced in making the order by the fact that about \$120,000 per month is necessary in order to meet the principal and interest of timber certificates, before the expiration of the six 'months' limit which, under the mortgage, would constitute a default.

mortgage executed April 24 1907, securing a proposed issue of not to exceed \$30,000,000. "Albany Argus" says:

The purpose of the proposed issue is to provide for the purchase of the flowage rights of a large reservoir on the Sacandaga River in the counties of Saratoga and Fulton, the construction of a dam and power-house at Conk-lingville, N. Y., with the necessary transmission lines and sub-stations, and other purposes. The company's capital stock is \$10,000,000, of which there is now issued \$5,777,300. The amount of bonds at present outstanding is \$4,140,000, issued under a first mortgage dated Jan. 2 1904.—V. 83,p.972.

Jamaica Water Supply Co.—Maturing Bonds—Option of Exchange.—President Charles A. Lockwood gives notice:

The first mortgage 6 % bonds due June 1 1907 will be paid at maturity, principal and interest, on presentation at the People's Trust Co., 181-183 Montague Street, Brooklyn. Holders are offered the option of exchanging their present holdings for Jamaica Water Supply Co. unified first mortgage 5% gold bonds due July 1 1954 at 98 and accrued interest.

Journeay & Burnham, Brooklyn, N. Y.-Receivership.-At Brooklyn on April 9, by the request of the directors, Supreme Court Justice Thomas appointed President William E. Phillips as receiver of the property. Yesterday Supreme Court Justice Kelly in Brooklyn authorized the receiver to sell the merchandise, fixtures and delivery system to the highest bidder.

The company, it is stated, has a surplus of assets over liabilities, its float-ing debt, according to one account, consisting of about \$23,000 in notes and some \$75,000 in unpaid bills; but the directors believe that it is better to sell the business as a whole than to run the risk of continuing it on a losing basis. In 1901 the capital stock, originally \$1,000,000 (of which \$500,000 was cumulative 8% preferred) was reduced to \$500,000, all of one class, of which \$100,000 was held in the treasury at last advices. Compare V. 84, p. 573; V. 72, p. 1139, 778; V. 70, p. 1293.

Kansas City (Mo.) Gas Co.-Lease.-See United Gas & Improvement Co. under "Annual Reports" on a preceding page.-V. 83, p. 821.

Lehigh Portland Cement Co., Allentown, Pa.-New Stock. The company on Jan. 30 1907 filed a certificate of increase of authorized capital stock from \$4,000,000 to \$7,500,000, The amount outstanding was recently increased from

The amount outstanding was recently increased from \$3,794,850 to \$7,731,750; par \$50. Incorporated in Pennsylvania Nov. 26 1897 with capital stock of \$250,-000, which in May 1899 was increased to \$350,000; in April 1900 to \$800,000; in January 1902 to \$1,350,000; in February 1902 to \$1,857,000; in July 1903 to \$1,870,000; in February 1906 to \$3,740,000; in June 1906 to \$3,765,350, and in November 1906 to \$3,794,850, these increased amounts being out-standing at the dates named. By election return filed Jan. 30 1907 the limit of issue was increased from \$4,000,000 to \$7,500,000. (Compare North American Portland Cement Co. in V. 83, p. 1416; V. 84, p. 163.) An exchange says: "The company has acquired the entire property of the Mitchell Lime Co. at Mitchell, Ind., and will build a \$1,500,000 Portland cement mill in the neighborhood of Mason City. Iowa, having recently purchased 500 acres of land for that purpose. Charles A. Matcham, General Manager, resigned Feb. 1."—V. 84, p. 163.

Maryland Telephone & Telegraph Co.—Consolidation.— See Baltimore Electric Co above.—V. 84, p. 999.

Merchants' & Miners' Transportation Co., Baltimore.— New Officers.—Charles S. Mellen, President of the New York New Haven & Hartford RR Co., and J. S. Hemingway, a director in the same company, have been elected to the board to succeed W. Kennedy Cromwell and E. P. Whitney, who has resigned. J. H. Robinette was made Secretary and Treasurer. Compare V. 84, p. 1056, 999.

Mexican Telegraph Co.-Text of Annual Report.-The earnings and balance sheet for the calendar year 1906 were given in our issue of Apr. 6, p. 801. In the printed report dated Mar. 26 1907 President Scrymser says:

dated Mar. 26 1907 President Scrymser says: The contract for making and laying the direct cable between New York and Colon, Isthmus of Panama, referred to in my last circular, has been awarded to the Telegraph Construction & Maintenance Co., Lim., of London, and there appears to be no doubt that it will be completed and in operation by about Aug. 1 next, as anticipated. It has been agreed that the cost of this cable shall be shared between the Mexican Telegraph Co. and the Central & South American Telegraph Co. in proportion to the mileage of the present cables in the Gulf of Mexico, *i.e.*, 738 miles from New York will be owned by the Mexican Telegraph Co. and the remainder, estimated at 1,563 miles, including the stations at Guantanamo, Cuba and Colon, will be owned by the Central & South American Telegraph Co. The traffic accruing from the use of this cable will continue as now upon the same mileage basis. The three cables in the Gulf of Mexico, are in perfect working order. The rapid growth of your Mexican traffic would soon have required another Gulf cable to insure its prompt transmission during business hours; this, however, will be avoided by the establishment of the New York-Colon Cable to which the South American traffic will be largely diverted...-V. 84 p. 807 801. Minnesota Thresher (Manufacturing) Co...-Assessment.-Minnesota Thresher (Manufacturing) Co.-Assessment-Litigation .- Chief Justice Baldwin of the Connecticut Supreme Court of Errors has granted Theodore R. Converse of Stillwater, Minn., as receiver, a writ of error for the removal to the United States Supreme Court of suits brought against the Aetna National Bank of Hartford and First National Bank of Suffield, Conn. to collect an assessment of \$18 a share (36%) levied on the stockholders under the doubleliability provision of the Minnesota law, to pay the claims of creditors.

Abstract of Order of Circuit Court of the United States Filed Apr. 1 1907.

Abstract of Order of Circuit Court of the United States Filed Apr. 1 1907. On this April 1st 1907 came on to be considered an agreement reached between the receiver of the Houston Oll Co. of Texas and the receivers of the Kirby Lumber Co. In relation to the cutting of timber and payments therefor from this date up to Feb. 1 1908; and it appearing to the Court that said agreement contemplates the payment by the receivers of the Kirby Lumber Co. to the receiver of the Houston Oll Co. for 24,000,000 feet of timber monthly, beginning with April 15 1907, whether that amount of stumpage is cut from the lands of the Houston Oll Co. or not, up to Feb. 1 1908; and it further appearing that said payments are necessaty to enable the receiver of the Houston Oll Co. of Texas to meet current operations and timber certificate payments, and that, under existing conditions it may not be to the best interest of the Kirby Lumber Co. to actually cut said 24,000,000 feet of timber monthly, it is therefore ordered that the re-ceivers of the Kirby Lumber Co. pay the receiver of the Houston Oll Co. of Texas for 24,000,000 feet of timber monthly, beginning April 15 1907 and ending Feb. 1 1908, and that the stumpage payment for January 1908, if the receiver of the Houston Oll Co should require said payment; said payments when made to be credited to the receivers of the Kirby Lum— ber Co. upon the books of the Houston Oll Co. as for stumpage paid for at the rate of \$5.00 per 1,000 feet. This order is supplementary to the orders of this Court made and entered on April 16 1904 and on Jan. 5 1905, respectively, and is governed by said order of April 16 1904.—V. 84, p. 870, 696.

Hudson River Electric Power Co.—New Bond Issue.— This company has applied to the New York State Gas Commission for permission to issue "consolidated and refunding mortgage" bonds to the amount of \$3,232,000, under a

The Supreme Court of Connecticut decided the cases adversely to the receiver. The assessment was levied under a ruling of the Supreme Court of Minnesota. An editorial article in our issue of March 3 1906, page 484, reviewed a decision of the United States Supreme Court holding the assessment invalid as against another bank. The Merchants' National Bank of St. Paul, a large creditor, has applied to the District Court at Stillwater for an order levying an additional Assessment of 64 %, bringing the amount up to the full statutory (double) liability. The hearing on this petition is set for June 11. Compare V. 74, p. 481; V. 82, p. 484.

Municipal Gas Co., Albany, N. Y.-Reduction in Price of Gas.-Governor Hughes on April 26 signed the bill of Senator Grattan, reducing the price of gas in Albany from \$1.30 to \$1 per 1,000 cubic feet, with a prescribed minimum for illuminating power and gas pressure.-V. 82, p. 104.

GENERAL ELECTRIC COMPANY.

FIFTEENTH ANNUAL REPORT-FOR THE FISCAL YEAR ENDING JANUARY 31 1907.

To the Stockholders of the General Electric Company	ny:
The profits of your Company for the year ending Jan. 31st 1907 (including \$329,702 55 from securities sold, \$675,000 increased value of Security Holding Companies, and \$417,- 586 19 from royalties, dividends sundry profits, etc.), after deducting all patent, general and miscellaneous ex- penses, and allowances for depreciation and losses, and writing off \$2,834,123 80 from Factory Plants—this being substantially 74 % of all expenditures thereon during the	
year-wcre Pald in dividends during the year	\$8,427,84268 4,344,34200
Faiu in uividenus during the year-	
	\$4,083,500 68
Written off Patents, Franchises and Good-Will Account, which on January 31 1897 stood on the books of the Com- pany at \$8,000,000, to reduce it to the nominal sum of \$1	999,999 00
Carried to Surplus Account	3,083,501 68
Amount of surplus at the end of last fi cal year was	12,027,295 09
Total surplus January 31 1907	\$15,110,796 77

The sales billed by your Company to its customers for the past year were nearly \$17,000,000 more than for the previous year, showing an increase in shipments of about 40%.

The sales billed for the first two months of the present fiscal year are more than 50% greater than last year. Should this growth in business continue, additional capital will be required.

Details of the business in the Selling and Manufacturing Departments may be found in the reports of the First and Third Vice-Presidents.

The Financial Report of the Treasurer and General Auditor is also submitted. Attention is called to the information given therein as to the recent increase in the share capital of the Company.

The certificate of Public Accountants is attached hereto.

There is also appended a Consolidated Balance Sheet of the Affiliated Companies.

By order of the Board.

C. A. COFFIN, President.

FIRST VICE-PRESIDENT'S REPORT.

Schenectady, N. Y., April 1st 1907.

C. A. Coffin, Esq., President General Electric Company.

Sir:-I submit the following report for the fiscal year ending January 31st 1907:

SALES AND ORDERS.	
Total sales (amount billed to customers)	
Total orders received	60,483
Comparison with providus years.	

00	••	^ 1	~	~ .	•••	~		•		•		•	11	• •					•	,						
Yea	r	e	n	11	11	7	J	(1)	2.	3	1.	st												mount billed.	Orders received.	
1902	۰.														-		-							\$32,338,036	\$34,350,840	
1903.																~	-							36,685,598	39,944,454	
1904																	-	1					-	41,699,617	39,060,038	
1905.											-		2				-			**	2.2			39,231,328	35,094,807	
1906_							1									-								43,146,902	50,044,272	
1907_			-		~	-									 -	-				-		•• :	-	60,071,883	60,483 659	

"Orders received" include only apparatus manufactured by the General Electric Company, and do not include such items as services of experts. labor of installation, freight and transportation, supply material, bollers, engines, etc., of outside manufacture, and bare copper wire. All these items are included in "Amount billed."

In the last ten years the amounts billed have increased from \$12,540,994 in 1896 to \$60,071,883 in 1906, an average increase of 17 per cent per year.

The very large increase in the business of the Company during the past year, together with the difficulty and delay in obtaining raw materials, have made it very difficult to meet the requirements of our customers as to deliveries.

Schenectady, N. Y., April 27 1907. on December 11 1906. To-day (April 1 1907) there are 110 multiple unit electric trains and 30 electric locomotives in daily service. The total daily multiple unit train mileage is 1,250 miles. Sixty trains are handled each day by electric locomotives, the daily train mileage being 692 miles.

The electric service is satisfactory in all respects. The delays in service are less than with steam, and the number of "dead" movements is greatly reduced as compared with steam.

All of the suburban service of the New York Central, and the majority of the long-distance trains are to-day operated in and out of the Grand Central Station by electric power.

ELECTRICAL EQUIPMENT OF THE WEST JERSEY & SEASHORE RR. (PENNSYLVANIA SYSTEM).

This steam road from Camden to Atlantic City-a branch line of the Pennsylvania RR.-was equipped electrically with General Electric Company apparatus in the autumn of 1906.

This apparatus has operated with complete success. On March 31st of this year the 58 motor cars (every car in each train being a motor car) carried 17,000 people, without delay or accident.

SUPPLIES.

Sales of supplies and small apparatus, such as meters, transformers, direct and alternating motors, arc and incandescent lights, wiring devices, etc., etc., have increased 35% over the previous year. 40,365 stationary motors, aggregating 565,000 H. P., were sold during the year.

APPARATUS.

Sales of large apparatus have also increased, and show the same tendency as heretofore towards larger sized units. The maximum sizes in various lines are:

Units	Nominal Rating.	Overload Capacity.
Turbo Alternators	9,000 K.W.	13,500 K.W.
Water Wheel Generators		11,250 K.W.
Direct Current Generators		4,000 K.W.
Induction Motors		9,000 K.W.
Transformers		11,250 K.W.

INCANDESCENT LAMPS.

The consumption of incandescent lamps has been very large, and great difficulty has been experienced in supplying the demand. The situation is being met by large increases in factory facilities which will provide for a greatly increased output of incandescent lamps during the next winter season when the maximum demand occurs.

The production of metal and metalized carbon filaments is 659 | rapidly increasing.

FOREIGN BUSINESS.

The business of the Foreign Department has shown a gratifying increase over the previous year. This business is well distributed throughout the world.

DAILY SUPPLY ORDERS.

During the year we have received about 235,028 supply orders (not including contracts), an average of 783 per working day. The record of the past year, compared with some previous years, is as follows:

Average supply orders received per working day:

	,		*										•			
Year	ending	January	31	1900								- 1			÷.	473
	••		••	1902	•							1				533
	••	• •	••	1904	-		-	 -		2	12	· _	-	- -		570
• •	••		••	1906					×							694
				1007										0		783

ORGANIZATION.

1118

CURTIS STEAM TURBINES.

During the past year turbo-generators of an aggregate capacity of more than 350,000 H. P. have been sold. Thirty-seven Curtis turbines have been installed in Japan.

We have also sold Curtis turbines for installation in England. Ireland, France, Germany, South Africa, Cuba, Mexico, Canada, Brazil, New Zealand, Siam, Peru, Algeria and Spain.

On January 29th 1907 an official test was made by the engineers of the Boston Edison Company of one of the 5,000 K. W. turbines in its station. Under the normal operating conditions the test showed a steam economy of 13.586 lbs. of steam per K. W. hour.

On Feb. 25 1907 one of four 8,000 K. W. turbines in operation at the Fiske Street Station of the Chicago Edison Co. was unofficially tested under the regular operating conditions and showed a steam economy of less than 13 lbs. of steam per K. W. hour. This test proves beyond question the preeminence of the Curtis turbine in respect of steam economy. This test, moreover, showed the remarkable result that from 5,000 K. W. output to 14,000 K. W. output the steam consumption varied less than 1.00 lb. per K. W. output.

ELECTRICAL EQUIPMENT OF THE NEW YORK CENTRAL & HUDSON RIVER RAILROAD.

the regular operation of many of its trains by electric power [terns, special tools, fixtures, etc.

The growth of the business of the Company has made it necessary to expand our organization. Mr. J. R. Lovejoy has been appointed General Sales Manager, Mr. J. G. Barry Manager of the Railway Department, Mr. C. D. Haskins Manager of the Lighting Department and Mr. D. R. Bullen Manager of the Supply Department.

I desire to express my appreciation of the loyal, efficient and hearty co-operation of all Department and Local Office Managers and Salesmen in the conduct of the selling business during the past year.

Respectfully submitted. EUGENE GRIFFIN, First Vice-President.

THIRD VICE-PRESIDENT'S REPORT.

Schenectady, N. Y., April 15th 1907.

C. A. Coffin, Esq., President, General Electric Company.

Sir:---I submit the following report on manufacturing and engineering for the fiscal year ending January 31st 1907:

MANUFAOTURING.

Expenditures aggregating \$3,834,123 80 have been made during the year for real estate, erection of new factories, ex-The New York Central & Hudson River RR. commenced tensions to existing buildings, additional machinery, pat-

The following table shows approximately the floor space and the number of factory employees during the last five vears:

Jean		
	Floor Space.	Employees.
1903		18,000
1904	3,700,000	17,000
1905	4,100,000	18,000
1906	4,350,000	22,500
1907	4,770,000	28 000

The land area of all three plants is now about 445 acres.

The total book value of all the land and buildings (excluding machinery, etc.) of the Schenectady, Lynn and Harrison factory plants is \$5,363,812 88, or about \$1 12 per square foot of manufacturing floor space of the buildings.

Schenectady Works .- A building of 237,000 sq. ft. of floor area which will be used for the manufacture of large apparatus, and release space in other parts of the plant for switchboard and kindred work, is now nearing completion.

There are also under construction a Blacksmith and Boiler Shop aggregating 39,000 sq. ft. of floor space, an extension to the Power House of 18,000 sq. ft., buildings for a wood-working plant aggregating 80,000 sq. ft. and an addition of 26,000 sq. ft. for the manufacture of wire and cable.

Additional important extensions aggregating 370,000 sq. ft. have been authorized.

The Brass Foundry and other additions mentioned in my last report as under construction were completed during the year.

Lynn Works.—The completion of the buildings for the manufacture of railway and stationary motors, etc., of 170,-000 sq.ft. of floor area, mentioned in my last report, has been delayed by the recent difficulties attending building operations, but these buildings will be finished and occupied at an early date.

The extension to the Turbine Building of 45,000 sq. ft. has been completed.

Buildings of 168,000 sq.ft., to provide increased facilities for the production of meters, instruments and other work, will be erected this year.

Harrison Works.-A building of 60,000 sq.ft. has just been completed for the manufacture of high efficiency metal filament lamps.

A four-story building of 120,000 sq. ft., to be located on land recently purchased at Ft. Wayne, Ind., and to be devoted to the production of incandescent lamps, has just been started.

Pittsjield Works .- The plant of the Stanley-G. I. Elec. Mfg. Co., at Pittsfield, Mass., has been used to a large extent for the manufacture of General Electric Company apparatus during the past year. It is now used wholly for this purpose, and will be operated hereafter as one of the General Electric Company's plants. The floor space at present available is 370.000 sq. ft., with about 1,700 employees.

There are now under construction extensions to this plant aggregating 178,000 sq. ft. which will be used for the manufacture of transformers, lightning arresters, switches and other apparatus.

ENGINEERING.

Engineering effort has continued to be largely devoted to the extension and improvement of our existing lines of apparatus, although a large amount of special apparatus has been designed to meet novel conditions.

Long-distance transmission of electricity is now thoroughly established in practice, and orders have been received for the equipment of a number of new and important installations of this kind during the year. The increase in the distance covered by such systems has involved the successful solution of many difficult problems connected with the generating, distributing and controlling apparatus.

The size and voltage of transformers for use in long-distance transmission work continues to increase. We are now build-ing on order a number of transformers of 7,500 K. W. capacity, for operation at 104,000 volts.

Our high tension switching apparatus has been still further

machines of a total capacity of 74,000 K. W. These machines are the largest direct current generators in existence, were especially designed by us for the purpose, and those already completed have proved to be entirely successful.

The vertical shaft design which has proved so successful in our large turbines has been applied to the design of motor generators and rotary converters. This vertical arrangement effects a considerable saving of space and money, and is particularly desirable for use in sub-stations in large cities. We have sold a number of such vertical sets for operation in Chicago and other places.

Electric motors in industrial establishments continue to increase both in numbers and in variety of applications. An interesting case involving the use of very large motors of special design is that of driving rolling mills in the manufacture of steel. We have several contracts in which the motors for driving the mills average about ten thousand (10,000) H. P. capacity each.

Our Research Laboratory has developed a new process for making a metal filament lamp of great efficiency. The commercial introduction of such lamps will mark a great step in the advance of the electric-lighting industry.

A large number of Letters Patent covering new and important designs and devices has been applied for during the past year.

It is a pleasure to testify to the successful and original character of the work of our engineers, and to the effective and economical work of our factory managers.

Respectfully submitted,

E. W. RICE JR., Third Vice-President.

FINANCIAL REPORT.

Schenectady, N. Y., A pril 20th 1907.

C. A. Coffin, Esq., President General Electric Company.

Sir:-The Balance Sheet and Statement of Profit and Loss herewith transmitted-with an explanation of each item on the Balance Sheet-include the assets and liabilities and profit and loss accounts of the Edison General Electric and Thomson-Houston Electric Companies (which, for convenience of bookkeeping, are consolidated with those of the General Electric Company) at January 31 1907; and when "the Company" is spoken of both the above-mentioned corporations are included.

ASSETS.

PATENTS, FRANCHISES AND GOOD-WILL.

During the year there was expended in acquiring sundry patents, for licenses under patents, and in patent litigation, \$785,594 17, which has been treated as ordinary expenses of the year.

In addition the amount of \$999,999 00 has been charged to Profit and Loss, leaving the Company's patents, franchises and good-will standing at a nominal valuation of \$1.

FACTORY PLANTS.

This account represents the Real Estate (lands and buildings); Machinery (steam and electric plants, tools, appliances, etc.); Patterns (including drawings, etc.); and Sundries (fittings and other small property accounts) of the manufacturing plants at Schenectady, N. Y.; Lynn, Mass., and Harrison, N. J.

All are free from mortgage or other lien.

On January 31 1893 the book value of all three factory plants Was \$3,958 528 21 During the fourteen years from that date to January 31 1907 (over and above all ordinary expenditures for the mainte-nance and repair of buildings and machinery), additions of lands, buildings and additions to and replacement of machinery, etc, have been made at a total cost of ______23,246,496 66

Total book cost of the plants______\$27,205,024 87 There has been written off during those fourteen years a total allowance for depreciation and replacement of_____18,205,024 87

Leaving their book value at January 31 1907_____\$9,000,000 00

developed during the year; one notable instance has been the design and successful testing of a switching device for 100,000 volt operation.

Our line of steam turbine generators has been enlarged and improved. The first of our 8,000 K. W. turbine machines was started at the station of the Chicago Edison Company in September 1906, and has been in daily operation with loads at times reaching 14,000 K. W. Five of these great machines have since been placed in operation in Chicago and New York. The steam economies which have been realized in these and other of our large turbines are unprecedented. Such high economy, added to the simplicity, reliability and compactness already realized in our turbine units, places us in a position to furnish our customers a prime mover whose value is unequaled.

The operation of the single-phase alternating current railway equipments which we have installed has been entirely satisfactory, and we have received orders for a number of such equipments during the year.

Our engineers have completed the design of a line of direct current railway motors containing important novel features. Practical tests have shown these new motors to be superior to existing standards in economy, commutation and ability to operate at higher and more economical voltages.

An interesting and important application of electricity is found in the reduction of metals. During the present year we have sold to one customer for use therein twenty-eight

Divided as follows:			
Schenectady plant		 	\$6,036 724 29
Lynn plant		 	2,638,275 41
Harrison plant (Lamp	Factory)	 	325,000 30

\$9,000,000 00

This valuation is but \$1 89 per square foot of floor space, including land, buildings, power houses, machinery, tools and all other equipment.

A summary of the changes in "Factory Plants" account since the last Annual Report is as follows:

			Written off	Book Value		
Real Estate and		the year.	at the end of the year.	1907.		
Buildings\$						
Machinery	3,156,185 12	1,927,364 36	1,447,364 36	3,636,185 12		
Patterns			154 048 47	1 00		
Furniture and Fixtures	1 00	187,983 71	187,983 71	1 00

REAL ESTATE.

(Other than Factory Plants.)

This account represents the investment in the Edison Building, 44 Broad Street, New York City, and sundry parcels of land in various places, mostly improved and rented, which have been acquired at various times, chiefly in payment of debts. All are free from mortgages.

STOOKS AND BONI	DS.

NOTES AND ACCOUNTS RECEIVABLE.

This account represents the total debts now due the Company.

They appear in the annexed Balance Sheet at an estimated realizable value—*i. e.*, from their face, \$27,094,347 85, there has been deducted an allowance (which is believed to be ample) of \$1,307,883 52 for possible losses (see below).

SALES DURING THE YEAR.

The net amount of sales billed to customers during the year was \$60,071,882 99.

Of some 19,700 regular customers on the accounts-receivable ledgers, an increase for the year of 2,700, there were debit balances against 8,900 at the close of the fiscal year.

COLLECTIONS DURING THE YEAR.

During the year the cash collections from notes and accounts receivable were approximately \$53,000,000.

On January 31 1906 the *face* amount of notes and accounts receivable was \$17.197,207 75, all of which have been settled during the year except \$2,374,948 30.

MERCHANDISE INVENTORIES.

These accounts represent actual inventories—counted and valued item by item—of raw materials and goods manufactured and in process of manufacture at the factories; of shipments in transit to store-rooms of local offices; of manufactured goods in store-rooms of local offices; of materials in local repair shops; of office furniture and fixtures, machinery, tools, instruments, etc., in the general and local offices, and in local repair shops, etc., and also of all goods on consignment.

A considerable quantity of apparatus and supplies is carried at local offices for the convenience of customers, to save time in delivery from factories and to save freight on individual shipments to customers by having them shipped in car-load lots to local office store-rooms.

Active selling finished and partly finished apparatus and supplies have been valued at estimated factory cost; inactive or slow selling apparatus and supplies at about 50% of estimated factory cost, and obsolete apparatus and supplies at scrap value.

The total of inventories of apparatus and supplies in all local offices showed a decrease from book value of \$103,745 63 which amount has been charged off to Profit and Loss

OFFICE FURNITURE AND FIXTURES.

The total appraised value of all office furniture and fixtures, machinery, tools, instruments, etc., in the general and local offices and in local repair shops is \$132,880 22. All these items are carried at a total book value of one dollar.

CONSIGNMENTS.

Finished apparatus for novel uses has been delivered to various concerns subject to purchase if its operation is successful. The greater part of consignment account represents such contingent sales, and the remainder represents apparatus on exhibition or loaned to regular customers for temporary use by them.

All such shipments are charged on this account at estimated factory cost. Their total is_______\$483,023 28 Less 50 % allowance for depreciation______241,511 64

LIABILITIES.

ENDORSEMENTS OF CUSTOMERS' PAPER.

As of January 31st the company had its customers' paper under discount, with its endorsement, to the amount of \$666,607 65.

DEBENTURES.

at too at t	F Of Cald Dalon	
At January 31 1906 there were outstanding ture Bonds of 1892		\$55,000 00
3 1/2 % 40-Year Gold Bonds of 1902

		\$2,102,000 00

There have been no changes during the year.

CAPITAL STOCK.

On January 31st 1906 the par value of the Capital Stock of the Company outstanding amounted to_____\$54,286,750 00

stockholders at par 9,286,100 00 9,286,100 00 \$63,572,850 00 \$63,572,850 00 \$63,572,800 00 pital Stock issued ere has also been subscribed under Circular of December 10th 1906, and installments of 50 % paid thereon, the balance being due in April 1907 1.561.500 00

[VOL. LXXXIV.

This account does not include outlays for anything in process of manufacture at the factories, but represents expenditures for labor, material, etc., at cost, on 1,123 uncompleted installations of finished apparatus in progress at various places.

ACCRUED INTEREST ON DEBENTURES.

\$80,000,000 00

This account, as its name implies, is the full amount of interest accrued to January 31 1907 on both classes of the Company's debentures then outstanding.

UNCLAIMED DIVIDENDS.

This account represents the full amount unpaid on all dividends declared and payable to January 31 1907 inclusive — the addresses of a few stockholders being unknown.

ACCOUNTS PAYABLE.

This account includes all unpaid audited indebtedness.

At the close of business on January 31 1907 the unpaid youchers on hand—none of which were then due under the
terms of purchase—amounted to 51,485,750 D4
Between January 31 and February 27 1907 the date of closing the general books, additional liabilities belonging to the past year were audited, amounting to2,524,660 04
Total as per Balance Sheet\$4,010,410 58

During the year the average amount of unpaid vouchers carried over monthly—by keeping the books, other than the cash book, open a sufficient time to include each month's obligations in that particular month—was about \$2,600,000.

Respectfully submitted, HENRY W. DARLING, Treasurer. EDWARD CLARK, General Auditor.

PRICE, WATERHOUSE & COMPANY, CHARTERED ACCOUNTANTS New York, Chicago, St. Louis, Pittsburgh, San Francisco, London, Melbourne, Mexico.

54 William Street, New York, May 2d 1907. To the Board of Directors of the General Electric Company, 44 Broad Street, New York City.

We have examined the books of the General Electric Company, in which are incorporated also the accounts of the Edison General Electric Company and the Thomson-Houston Electric Company; and we find that the Balance Sheet and the Profit and Loss Account below are correctly prepared therefrom.

We have also examined the books of the Affiliated Companies owned by the General Electric Company (except in the eases of Foreign Selling Companies, the accounts of which, as certified by Local Auditors, we have accepted), and find that the Consolidated Balance Sheet of these Companies below is correctly prepared therefrom.

We have satisfied ourselves that during the year only actual Additions, Extensions and Replacements have been charged to Capital, while ample provision has been made for Renewals and Depreciation; and that all expenditures in connection with Patents and Patent litigation have been charged against the Earnings of the year.

We are satisfied that the valuations of Materials and Supplies and Manufactured Products on Hand, and of Uncompleted Contracts as certified by the responsible Officials, have been carefully and accurately made at or below cost, proper provision having been made for those which are either obsolete or not readily salable.

Full provision has been made for Bad and Doubtful Notes and Accounts Receivable and for all ascertainable Liabilities.

We have verified the Cash, and Stocks and Bonds by actual inspection or by proper certificates and are of the opinion that the aggregate value placed on the Stocks and Bonds, the details and character of which are stated on page 20 (of pamphlet report,) is fair and conservative.

And we certify that the Accounts and Statements herein submitted, in our opinion, set forth the true financial condition of the Company on January 31st 1907, and that the statement of Profits for the year ending on that date are correct.

PRICE, WATERHOUSE & COMPANY, Chartered Accountants.

PHILADELPHIA COMPANY.

TWENTY-THIRD ANNUAL REPORT-FOR THE YEAR ENDED MARCH 31ST 1907.

Office of the Philadelphia Company. Pittsburgh, Pa., March 31st, 1907.

The Board of Directors herewith submit their report for the fiscal year ended March 31st 1907.

During the year 8 wells were purchased, and 97 wells were which 76 were productive of gas, 4 of oil and 17 unproductive; 3 wells were sold and 38 abandoned, having ceased to be productive; making the total number of wells owned or controlled through stock ownership (including the 24 productive gas wells of The Fairmont & Grafton Gas Company) and in use by the Company at this date, 785. During the year 21.44 miles of pipe were reclaimed and 172.60 miles were laid. The total amount of pipe lines operated by this Company either through ownership or stock ownership in other corporations (including The Fairmont & Grafton Gas Company) is now 2,029.73 miles. This does not include the 161.11 miles of mains of the Allegheny Heating Company nor the 371.78 miles of mains of our several artificial gas companies. The Company now holds under lease 428,584 9-40 acres of gas and oil territory situated in Western Pennsylvania and West Virginia. In controls through its ownership of The Fairmont & Grafton Gas Company 18,617 % acres, and through its majority ownership of the Equitable Gas Company 930 acres of leaseholds. The Company sold during the year 36,197,647,021 cubic feet of natural gas, being an increase of 3,234,699 651 cubic feet, with increased receipts from that source of \$508,495 95. There has been an increase during the year of 8,630 domestic consumers of the natural gas supplied by the Company and the companies it operates, including the Allegheny Heating Company and The Fairmont & Grafton

Gas Company, making a total number of domestic natural gas consumers of these Companies 87,689.

The Company has sold during the fiscal year 230 second mortgage bonds and 64,800 shares of the Common Capital Stock, and has applied the proceeds in retiring the one-year Collateral Gold Notes, issued October 1st 1906, in payment for The Beaver Valley Traction Company Capital Stock, the purchase of the Washington & Canonsburg Railway Company Capital Stock, and in advances to the underlying Companies to be used for improvements and extensions.

The operations of the Pittsburgh Railways Company will be found in the report herewith printed.

Accompanying this report are statements showing the financial condition of the Company.

For the Board,

J. H. REED,

President.

THE CHRONICLE.

CHICAGO STREET RAILWAY ORDINANCE.

Chicago Railways Company.

COMMITTEE'S REPORT AND ORDINANCE.

The report of the Committee on Local Transportation to the City Council of Chicago, under date of Jan. 15 1907, regarding the ordinances which were adopted by vote of the people at the election last week, being the ordinances passed by the City Council Feb. 11 1907, respecting the Chicago City Railway Co. and the Chicago Railways Co., which is the proposed successor of the Chicago Union Traction Co. and subsidiaries, says, under date of Jan. 15 1907:

subsidiaries, says, under date of Jan. 15 1907:
Your committee reports herewith an ordinance to the Chicago City Railway Co., covering the lines now operated by that company, and certain extensions thereof, and an ordinance to the Chicago Railways Co., covering the lines now operated by the receivers of the Chicago Union Traction Co., and certain extensions thereof.
These ordinances provide for the immediate rehabilitation of the said street railway systems and for the right of the city of Chicago or its licensee to purchase the same on Feb. 1 and on Aug. 1 of each and any year upon giving six months' previous notice, in writing, and upon definite terms fixed in the respective ordinances.
The following is a brief summary of the provisions of the ordinances: The city and the companies respectively agree that the value of the present tangible and intangible property of the Union. Traction system is \$29,000,000 and of the City Railway systems and put the same in first-class condition, in full compliance with specifications for such work and under the supervision of a Board of Supervising Engineers created under the ordinances.

ordinances.

ordinances. The Board of Supervising Engineers is to consist of three persons, one selected by the companies and one selected by the city, and the third to be Bion J. Arnold, who has been the expert engineer representing the City of Chicago in traction negotiations during the past five years. Mr. Arnold is also selected as Chief Engineer in charge of the preparation of the plans and specifications for the entire work of rehabilitation and of the super-vision of such work.

vision of such work. The city or any company authorized by it is given the right to purchase the entire property of the two systems, or either of them, upon the payment of the agreed price of the present property of each company, respectively, and the cost of rehabilitation and extensions, including fair allowances for construction, profit and brokerage. If the street railways are to be so acquired for operation by a private corporation, for its own profit, the purchase price is to be increased 20 %. The companies are limited, during their operation, to an interest re-turn of 5% upon the agreed value of their property, plus the cost of re-habilitation and extensions. The net profits from the operation of the street railways are to be divided

The net profits from the operation of the street railways are to be divided between the city and the companies in the ratio of 55 % to the city and 45 %to the companies. The ordinances require the setting aside of 6 % of the gross receipts for

The ordinances require the setting aside of 6% of the gross receipts for maintenance and repairs of the systems. The ordinances further require the setting aside of an additional and sepa-rate fund of 8% of the gross receipts, to cover renewals and depreciation. Whatever portion of the two funds above mentioned is not actually devoted to the purposes specified remains in the funds and passes to the city or its licensee upon purchase. In case either of the above funds should in any event be insufficient for the proper maintenance, repair and renewal of the entire street rail-way system and its equipment, the companies are obligated to supply addi-tional funds for these purposes. The ordinances provide for a comprehensive system of transfers and through routes, by means of which passengers can ride over all connecting lines, within the city limits, covered by the Chicago Union Traction sys-tem, the Chicago City Railway system, for a single fare, in any one gen-eral direction.

tem, the Chicago City Railway system, the Chicago Consolitated system and the Chicago General Railway system, for a single fare, in any one gen-eral direction. Twenty one through routes over the lines of those systems are speel-fied in the ordinances, and provision is made for such additions thereto as the traffic may warrant or require at any time hereafter. Numerous extensions of the existing lines are specifically provided for, and the companies agree to construct and equip additional extensions, amounting to 6 miles of double track or 12 miles of single track for the Union Traction system, and 4 miles of double track or 8 miles of single track for the City Railway system, in each year after the third year. The companies also agree, under certain conditions named in the ordi-nances, to construct whatever additional extensions may be required by the City Council. The companies agree, upon demand of the city and at the city's option, to furnish funds to the amount of \$5,000,000 for the construction of a cen-tral subway, to be built and owned by the city, the plans for which are to be approved by the Board of Supervising Engineers. The companies also agree to furnish to the city the funds for the construc-tion of extensions to this subway on the terms stated in the ordinances. The Chicago Railways Co. agrees to lower and reconstruct the tunnels under the Chicago River at Washington, La Salle and Van Buren streets. The city is also authorized to require the installation of the underground trolley system in place of the overhead wires. The capacity of the surface lines within the loop district will be largely increased by the through routes and re-arrangement of the existing termi-nals. Within three years the Chicago City Railway Co. must have in operation

nais. Within three years the Chicago City Railway Co. must have in operation on its lines at least 800 double-truck cars of modern type and design, to be approved by the Board of Supervising engineers, and the Chicago Railways Co. must have in operation on its system at least 1,200 such cars. The city has full power to require whatever additional cars or other equipment may be necessary. Within at least one year cars in trains can no longer be operated, and all cars must be operated singly. The ordinances contain ample requirements for grooved rails and for the cleaning and sprinkling of streets and for the paying of the right of way. The ordinances contain a complete reservation by the city of all of its police powers, including the right to make all -regulations which may be necessary to secure adequate and sufficient street railway accommodations for the people and to insure their comfort and convenience. The books and accounts of the companies are to be kept according to forms subject to the approval of the City Comptroller, and are subject to the inspection of the city's accountants at all times. The companies are required to make sworn annual reports to the city, and there is provision for an annual audit of their books by public account-ants. The ordinances are the result of porcelations with the representatives Within three years the Chicago City Railway Co. must have in operation

Company Must Acquire Clear Title Within 120 Days or a Reorganization Plan Must Be Adopted Within 210 Days.

(a) Such authority shall wholly cease unless within 120 days after the

Must Be Adopted Within 210 Days. (a) Such authority shall wholly cease unless within 120 days after the passage of this ordinance the company shall acquire all the property con-situiting the system of the Chicago Union Traction Co., provided a clear title be tendered, free from liens, at a price not exceeding the price for which the city may buy the same under terms of Sec. 20. (b) If such title be not tendered, the authority hereby granted shall cease, unless, within a period of 210 days after the passage of this ordinance, a plan of reorganization consistent with the terms of subdivision (e) of this Sec-tion shall have been approved, provided under said plan an opportunity shall be conferred upon each individual holder of a lien or claim to receive such stocks, securities or other benefits as said plan of reorganization may provide, and which opportunity shall remain open as to be specified in said plan, but not beyond Jan. 20 1908. (e) The company shall not have the right to accept this ordinance unless there shall have been deposited with the Chicago Title & Trust Co., trustee, under an argeement substantially in the form of "t_xhibit D," certificates of stock representing not less than the following amounts of capital stock, viz.; 3,126 shares of the Chicago West Division Ry. Co. and 1,251 shares of the capital stock of the North Chicago Street RR. Co. and 49,946 shares of the West Chicago Street RR. Co. (being, respectively, more than a majority of the entire capital stock of said companies, other than that held by trustees under outstanding mortgares of deeds of trust); also 29,601 shares of the North Chicago Street RR. Co. and 49,946 shares of the West Chicago Street RR. Co. (being, respectively, more than a ma-jority of the entire capital stock of said two companies last named, other than that held by the Hillinois Trust & Savings Bank, as trustee, under a deed of trust); and also 80,001 shares of the preferred stock and 133,334 shares of the common stock of the Chicago U

Reconstruction, Extensions and Subways.

Sec. 2. The company shall proceed at once to put said entire street rall-way system and equipment in first-class condition, in compliance with the specifications in "Exhibit B."

specifications in "Fxhibit B." Sec. 3. The company shall promptly construct and equip the extensions provided for in "Fxhibit A." and also in Sec. 38 hereof, and at any time after three years from the acceptance of this ordinance such additional extensions as may be required by the city, provided, that the company shall not be obligated hereby to construct more than 6 miles of double-track railway or

as may be required by the city, provided, that the company shall not be obligated hereby to construct more than 6 miles of double-track railway or 12 miles of single-track railway in any one calendar year. Sec. 6. The company hereby gives to said city and said city reserves the power by ordinance to require the company to join with the Chicago City Railway Co. and with the said city in defraying the cost of the construction of a system of subways for downtown terminals, the legal title to said sub-ways to be in said city: provided, that the companies shall not be required to contribute in excess of the pro rata cost of that part which is to be de-voted to the use of said companies or either of them, and the total amount which the said companies shall be required to constructing the present tunnels under the Chicago River, or (2) of converting said tunnels into a part of said system of subways. Three-fifths of that part of the cost of the said subways (exclusive of the tunnels under the Chicago River) paya-ble by said companies shall be borne by the company and two-fifths of the said cost shall be borne by said Chicaro City Railway. After the expiration of five years from the acceptance of this ordinance' the company (subject to Sec. 26 hereof) may be required by ordinance to join with the said Chicago City Railway Co. and with the said city in de-fraying the cost of the construction of extensions to such subway system. City to Have Supervision of Rehabilitation.

City to Have Supervision of Rehabilitation.

City to Have Supervision of Rehabilitation. Sec. 7. All of the construction, reconstruction, equipment, re-equipment, extensions and additions provided for by this ordinance, including under-ground trolleys, tunnel reconstruction, new lines, extensions and other additions (but not subways or extensions thereof) shall be done and acquired by the company under the supervision of the Board of Supervising Engineers, and the cost thereof shall be borne by the company. To the actual amount as expended shall be added 10 % as a proper allowance to the company for conducting the said work and furnishing said equipment and 5 % for its services in procuring funds therefor, including brokerage; except that no such percentages shall be allowed on reconstructing the Van Buren Street tunnel, as provided in Sec. 34, or of lowering and removing obstructions to navigation in the Chicago River under ordinance passed June 18 1906. The Board of Supervising Engineers shall each month report in writing to the City Comptroller the amount of money actually so ex-pended with their approval, together with the aforesaid percentages, and all amounts contributed to the cost of the subway system, together with 5% of the amounts so contributed; and the interest provided in Sec. 25 hereof as a deduction from gross receipts shall begin to run upon the total amount of each such certificate from and after the date thereof. *Bond Issue for Extensions*. Additions, &c.

Bond Issue for Extensions, Additions, &c.

The cost of such construction, reconstruction, equipment, re-equipment, extensions and additions, including said percentages, together with all amounts contributed by the company to the city for the construction of subways or extensions thereof, with 5% of said last named amounts added thereto, may be represented by mortgage bonds or obligations to be held, negotiated or sold by the company, bearing interest at a rate not exceeding 5% per annum, payable semi-annually on Feb. 1 and Aug. 1 in each year, maturing not earlier than 20 years after the passage of this ordinance, in denominations not less than \$500 each, redeemable at par and accrued in-terest after published notice, on any interest day. The company shall not create any lien superior to that securing said bonds and obligations. Pro-vided, however, that the company shall not issue said bonds or obligations The cost of such construction, reconstruction, equipment, re-equipment terest after published holder, of any first said bonds and obligations. Pro-vided, however, that the company shall not issue said bonds or obligations to an aggregate exceeding the amount certified by the Board of Supervising Engineers, nor shall the city be bound to recognize any of said bonds or obligations as having been authorized by this ordinance unless and until there shall be endorsed thereon by the City Comptroller or other officer or agent of the city designated by ordinance, a certificate to the effect that such bond or obligation is one of those by this section authorized.

The ordinances are the result of negotiations with the representatives of the companies involved, who have indicated their willingness to accept them if passed by the City Council.

CONDENSED EXTRACTS FROM CHICAGO RAILWAYS COMPANY ORDINANCE, PASSED BY CITY COUNCIL FEB. 11 1907.

Preamble.

Whereas, the city desires to provide for the reconstruction, re-equipment and extension of the street railway system and for the unified operation of said system, together with the street railway system now maintained and operated by the Chicago City Railway Co., and to determine the definite terms upon which the said city shall have the right to purchase.

Authority.

Sec. 1. In consideration of the acceptance by the company of this ordi-nance, authority is hereby granted to the company (until Feb. 1 1927; Sec. 23 below.—Ed.) to operate street railways along the streets and public ways in the City of Chicago, set out in the schedule marked "Exhibit A." Sec. 25 below.—E.1.) to operate street ranways along the streets and pluble $A.^{\prime\prime}$ ways in the City of Chicago, set out in the schedule marked "Exhibit A." To provide for the unlifed operation, an ordinance similar to this ordinance in general provisions and character, running to the Chicago City Railway Co. as grantee, has been presented (and adopted.—Ed.), covering its lines in the south division of the city. In the south division of the city.

Renewals and Maintenance During Three Years of "Immediate Rehabilitation."

Renewals and Maintenance During Three Years of "Immediate Renabilitation." The Board of Supervising Engineers shall have the power to determine what work shall be paid for by the company out of capital funds and what shall be treated as maintenance, repairs and renewals, to be paid for out of the gross receipts from operation. But during the three-year period of "Immediate rehabilitation" 70% of the gross receipts shall be used so far as required in defraying operating expenses, including maintenance and repairs, and the residue of said 70% shall be applied to the cost of renewals and no part of the cost of any renewal paid for out of such 70% shall be charged to additional capital, and all expenditures for renewals during said three years in excess of such residue of said 70% shall be charged to capital.

Service Regulations-Cars. &c.

Service Regulations—Cars, &C. Sec. 10. The company hereby agrees to comply with all reasonable regu-lations of the service which may be prescribed from time to time by the City Council, and the approval of any such regulation by the Board of Super-vising Engineers shall be binding as to the reasonableness thereof. All passenger cars hereafter built or purchased shall be of the most ap-proved style, have centre aisles, be without running footboards along the sides and equipped with motor capacity. Cross-seats facing forward shall be used, but longitudinal seats each seating not more than four pas-sengers may be used at the ends of the cars. All closed cars shall be vesti-builed, and at least 225 cars of such description shall be acquired within one year from the passage of this ordinance. All cars operated shall be supplied with electric bells and push buttons. with electric bells and push buttons.

Rates of Fare.

Sec, 11. The company shall be entitled to charge passengers: For a con-tinuous trip in one general direction, within the present or future limits of the city, over its street railways covered by this ordinance and all exten-

sions thereof (whether owned, leased or operated by it) the sum of 5 cents for each passenger 12 years of age or over and 3 cents for each passenger under 12 years of age; provided, that children under 7 years of age accom-panied by a person paying fare shall be permitted to ride free. (Then fol-low provisions for universal transfers to enable one to travel in one general direction for a single fare.—Ed.)

Street Sprinkling and Cleaning-Paving.

Street Sprinkling and Cleaning—Paving. Sec. 14. The company shall sprinkle, sweep, keep clean and free from snow that portion of each of the streets occupied by its right of way, as pro-vided in "Exhibit B." and if it shall be found practicable to have the streets occupied by its tracks swept and sprinkled their entire width by the com-pany, or to have street sweepings, garbage or other refuse removed by means of street cars at night, the company shall perform said service when so ordered by the Mayor and Commissioner of Public Works, and it shall re-ceive for such service reasonable compensation. Sec. 15. The company shall at its own expense fill, grade, pave and keep n repair that portion of the streets occupied by it, as more specifically pro-vided for in said "Exhibit B." All new tracks shall be of the grooved pattern described in "Exhibit B."

Maintenance, Renewals and Depreciation after Reconstruction Period.

Maintenance, Renewals and Depreciation after Reconstruction Period. Sec. 16. After the expiration of the 3-year period of reconstruction— (1) The company shall expend for maintenance and repairs each year at least 6% of the gross receipts for the particular year, and if the said amount is not so expended, then at the end of such year the unexpended portion thereof shall be deposited in a fund with one or more banks or trust companies for use whenever necessary for such maintenance and repairs. The said depositaries shall make payment out of said fund upon the order of the company, countersigned by the said Board of Supervising Engineers. (2) On or before the 5th day of each month the company shall deposit with said depositaries a sum equal to 8% of the gross receipts for the pre-ceding month, which shall constitute a reserve fund for taking care of re-newals and depreciation. No payments shall be made out of said fund ex-cept on the written certificate of the Board of Supervising Engineers, for renewals of the principal part of said street railways or of their equipment; and the Board of Supervising Engineers shall determine from time to time what particular items shall be considered as renewals and what as mainte-nance and repairs.

what particular items shall be considered as renewals and what as mainte-nance and repairs. The company, however, must expend whatever sums may be necessary to keep the said system in first class condition in every respect. The amounts expended or deposited respectively as reserve funds, under the foregoing provisions of this section, shall be considered a part of the operating expenses of the system.

Payment of Damage Claims.

Sec. 18. The company shall pay as part of the operating expenses all damages to persons or properties accruing subsequent to Jan. 31 1907, and may set aside such percentage of the gross receipts as the Board of Super-vising Engineers shall from time to time determine as a reserve against such claims.

Right of City to Purchase at Any Time.

Sec. 20. The company by the acceptance of this ordinance shall and does grant to the said city, and the said city hereby reserves to itself the right, upon Feb. 1 or Aug. 1 of any year, upon giving at least six months' previous notice in writing of its intention so to do, to purchase and take over (but only for municipal operation in case of purchase prior to Feb. 1 1927) the entire street railway system of the company within the said city, and also all extensions of and additions to said street railways made under the provisions of this ordinance.

Price to Be Paid by City.

In case the said city shall purchase the system, it shall pay the aggregate

Price to Be Paid by City. In case the said city shall purchase the system, it shall pay the aggregate of the following items: (1) The value of the property described in the appraisal inventory as of June 30 1906, filed Feb. 4 1907, and the value of all the franchises and rights to operate in the city now belonging to the Chicago West Division Rallway Co., the West Chicago Street RR. Co., the West Chicago Street RR. Tun-nel Co., the Chicago Passenger Rallway Co., the North Chicago City Rall-way Co., the North Chicago Street RR. Co., the Chicago Union Traction Co. (excepting the rights of the Chicago Consolidated Traction Co., here-inafter referred to), which said value is hereby fixed (for the purpose of such purchase) at \$29,000,000. (2) The value of all additions acquired as a part of said street rallway sys-tem, including tunnel reconstruction between June 30 1906 and Feb. 1 1907, such value to be determined by the Board of Supervising Engineers. If, at the time of such purchase, the title of the company shall not be free from any lien or encumbrance (other than such as are herein expressly au-thorized to be created), that portion of the purchase price specified in sub-divisions 1 and 2 of this section, or so much thereof as the city shall deem necessary, shall be deposited with one or more of said depositaries to perfect such title and to remove liens and encumbrances therefrom, and to indemnify the fity against the expenses of such proceedings. (3) The cost of reconstruction and re-equipment and of the construction of new lines, extensions, underground trolleys, tunnel reconstruction and other additions paid by the company and certified by the Board of Super-vising Engineers, and all amounts contributed to the city for the construc-tion of subways or extensions thereof, together with 5% of said last.mamed amounts a hereinbefore provided. "Provided, that the city and its sub-division (3) as it his section provided, or file untereof take over the prop-erty purchased by i

during the life of this grant, within six months after being required to do so by ordinance of the city, procure cancellation and termination of any or all of the agreements which affect or by their terms purport to affect in any manner the right of operation or maintenance of any of the lines of street raliway the right to maintain or operate which is granted by this ordinance to the company, and to which said agreements the Chicago Consolidated Traction Co. or any of the corporations from or through which the said Chicago Consolidated Traction Co. has derived any of its property or rights within the corporate limits of the City of Chicago, is a party." The company agrees that it will pay annually to the city and save the city harmless against the loss or damage, if any, which may arise to the city (as determined by the Board of Supervising Engineers) by reason of any diminution of the net receipts payable to the city under the provisions of Sec. 25 of this ordinance occasioned by the said agreements or any of them remaining in effect or by reason of the operation of the street raliways under the terms of such agreements or any other operating agreements to which the city has not consented. In determining the amount of loss, damage or diminution the said board shall take into consideration the value of such use of any lines of raliway of the Chicago Consolidated Traction Co. as has been enjoyed by the company for the period of such accounting. *Interest Return on Capital Investment*.

Interest Return on Capital Investment.

Interest Return on Capital Investment. Sec. 25. On and before April 10 in each year the company shall settle with the city as of Jan. 31 last preceding upon the following basis: From the gross receipts of the property from all sources for the year end-ing on said Jan. 31 there shall be deducted for such year— First: (1) All expenses of operation, including maintenance, repairs and renewals; (2) all amounts contributed during said year and then held in re-serve under the provisions of Sections 16 and 18 hereof; (3) all amounts paid out for taxes and assessments levied or imposed upon the real and per-sonal property, including all capital stock or franchise taxes levied or as-sessed after the year 1906, but not including sums paid to the city for city license fees, if any, exacted from the company or its employees: (4) all salaries and expenses of the Board of Supervising Engineers by this ordi-nance authorized, after the period of "Immediate Rehabilitation": and Second: A sum equivalent to 5% per annum for said preceding year upon the amount of the cash purchase price which the said city would then be obligated to pay on account of the Items specified in subdivisions 1, 2 and 3 of Sec. 20 hereof, if it were purchasing the property for municipal opera-tion on Jan. 31. In case in any year the gross receipts shall not be sufficient to pay in full the items in the "first" and "second" paragraphs of this sec-tion mentioned, then the deficit shall be paid out of the gross receipts of subsequent years.

subsequent years.

Division of Remaining Net Receipts.

After the deduction from the gross receipts of the items hereinbefore in this section provided, the amount remaining shall be considered as the net receipts for such year arising from the operation of the street rallway sys-tem hereby authorized, and shall be divided between the company and the said city in the following proportions: 45 % to be retained by the company and 55 % to be paid forthwith to the city, crediting thereon all amounts paid out during the preceding year by the company for license fees, if any, exacted from the company or its employees.

Commutation of Fares.

The city reserves the right at any time to commute a sum not exceeding the city's share of the net receipts for the previous year into a reduction of the rates of fare.

City to Establish Sinking Fund for Municipal Purchase.

Subject to the action of the City Council, the city shall deposit the amount so paid to the said city to the credit of a separate fund to be kept for the purchase and construction of street railways by said city.

Capital Investment Limitation.

Sec. 26. The company shall not be required on account of any extensions of subways or on account of underground trolleys, or on account of any extensions of its street railways (other than the extensions provided for in "Exhibit A," and in Section 38 of this ordinance, and 6 miles of double or 12 miles of single track per annum, as in Sec. 3 hereof provided), to increase its total capital investment to such an extent that the return thereon over and above the interest charge of 5% thereon by this ordinance authorized would be reduced to an unreasonably small amount.

Annual Reports.

Sec. 30. The company, so long as it continues to operate any of the said street railways under this ordinance, and on or before the 10th day of April in each year shall prepare and file with the City Comptroller of said city annual reports for the preceding year ending on Jan. 31.

Forfeiture for Non-Compliance.

Forfeiture for Non-Compliance. With some exceptions, failure by the company for a period of three months to comply with the covenants of the lease, after written notice by the city, the contract may be declared forfeited; "provided, however, that should the company, for its corporate purposes, piedge or mortgage its street rail-way property or any of the rights secured to it by this ordinance, or any security representing the said property or rights, for the security of the payment of its notes, bonds or other evidences of indebtedness maturing not later than Feb. 1 1927. the amount thereof not being in excess of the value of all the property and rights of the company, as defined in Sec. 20 hereof, such right of forfeiture of this grant by reason of any viciation by the company of the provisions of this ordinance shall not be asserted or exist against such piedgee or piedgees, mortgagee or mortgagees, or any of them, and shall not impair or affect the right of such piedgee or piedgees, mortgagee or mortgagees, to recover by foreclosure or other legal process against all the property of the company, including the rights and privileges hereby granted, the face value of said notes, bonds or other evidences of indebtedness." to an amount, however, not in excess of the sum for which the city would then have the right, under the terms of this ordinance, to purchase the said street railway property for municipal operation. The city shall have the right to bid and become the purchaser at any such foreclosure or other sale.

foreclosure or other sale.

Waiver of Rights.

Rights of Company in Case City Does Not Purchase for Twenty Years.

Sec. 23. In case the said rallways are not purchased by the city or its licensee as above prior to Feb. 1 1927 (and nothing in this ordinance con-tained shall be construed as being in any event a grant to the company ex-tending beyond Feb. 1 1927), the said city shall have the right to designate a licensee, to purchase the said property at or after Feb. 1 1927, upon the same terms that the city could then purchase, and in case such reserved right of purchase be not exercised by the said city or its licensee, and the situe aball grant a grant to appet to appet to a street rallway in city shall grant a right to another company to operate a street railway in the streets and parts of streets constituting the said street railway system of the company, such new company shall be required to and shall purchase and take over the said street railways, property and rights of the company at or after Feb. 1 1927 upon the same terms upon which the said city might then purchase and take them over.

Relations with Chicago Consolidated Traction Company

Sec. 24. "The company shall forthwith, upon the acceptance of this ordi nance, secure at its own cost and not out of the receipts of said street rail-ways, and shall during the life of this grant in like manner maintain the right and privilege to the company and to the city, and for the benefit of the pub-lic, of using all and any of the street railway lines and tracks forming part of the through route, or any of them, mentioned and described in "Exhibit C," so far as such fourtes involve the use of the lines and tracks of the Chicago Consolidated Traction Co., and, in case of the establishment of new through routes, as in this ordinance provided, which shall be laid out in part over the lines and tracks of said Chicago Consolidated Traction Co., the company shall secure the light and privilege of using such lines and tracks covered by said new through routes

said new through routes. "The company may in its discretion permit the Chicago Consolidated Trac-tion Co., its successors and assigns, to make such use of the lines of railway hereby authorized as the so-called operating agreement, dated Dec. 1 1899, between the Chicago Union Traction Co. of the first part, and the Chicago Consolidated Traction Co. of the second part as modified by the agree-ment between the same parties dated June 9 1900 (certified copies of both of which agreements have been filed with the Comptroller of said city), pur-ports to permit and authorize: Provided, that as one of the considerations for the passage of this ordinance the company agrees that it will at any time

Waiver of Rights. Sec. 33. The company, in consideration of the grant made by this ordi-nance, agrees to waive all rights and claims in respect to the location, maintenance, operation or exclusion of street rallways in the streets of the said city now or hereafter vested or claimed to be vested in the Chicago West Division Ry. Co., the Chicago Passenger Ry. Co., the West Chicago Street RR., the West Chicago Street RR. Tunnel Co., the North Chicago City Ry. Co., the North Chicago Street RR. Co. and the Chicago Union Traction Co., or in the receivers of any of said compa. 128.

Tunnel Reconstruction.

Sec. 34. The company shall diligently proceed to complete the work of lowering and reconstructing the tunnel under the south branch of the Chicago River at or near Van Buren St.

Comprehensive Reconstruction and Unified Operation Assured.

In case the said Chicago City Rallway Co. fails to accept lits ordinance, the company hereby obligates itself to extend its street railway system over the streets covered by said ordinance to the extent that the rights of the company or companies now operating upon such streets expire by limitation or otherwise and as rapidly as the city is able to confer the lawful authority, and also to make the contribution for the construction of subways.

Lease. or Assignment.

Sec. 40. No lease or op rating agreement and no assignment, except by way of mortgage or trust deed, under the provisions and limitations of this ordinance, shall be made by the company without the consent of the City Council of the city.

Council of the city. No mortgage or other instrument given by the company shall impose any lieu upon the said property and rights without the same being made specifically subject to all the provisions of this ordinance, including the right of the city or its licensee to acquire the property, and in the event of such purchase the mortgage and all other liens shall be discharged from said prop-erty and rights and shall attach to the proceeds of sale thereof, except in a case in which it is expressly provided by this ordinance that the purchase may be made subject to such lien or encumbrance and in which the city or its licensee has elected to purchase subject thereto.

Bond.

Sec. 42. And the company shall file with the City Clerk a bond in the penal sum of \$100,000, conditioned that it will forever indemnify the city resulting from suits for damages, &c.

Rights and Obligations Date from Feb. 1 1907.

Sec. 43. The rights and obligations of the city and the company under this ordinance shall be the same as if this ordinance had been passed and accepted on Feb. 1 1907.

EXHIBIT B.—CONDENSED EXTRACTS REGARDING REHABILITATION.

EXHABILITATION. Immediately upon the acceptance of this ordinance by the company, it shall proceed to reconstruct its street railway system and equipment and to secure the necessary supply of electric power to comply with the pro-visions of this ordinance and under the following sbecifications: The company shall proceed immediately, (1) to remove from the streets all of its present cable tracks, slots and conduits and substitute therefor electric tracks; (2) to rebuild at least 90 miles (single track) of the present electric track with track of the character and type hereinafter described; (3) to construct and equip the necessary system of distribution and sub-sta-tions; (4) to rebuild and re-equip the car houses; (5) to increase as rapidly as possible the number of double-truck cars until there shall be in operation at least 1,200 such cars, and (6) to reconstruct the Van Buren St. and Wash-ington St. tunnels and to reconstruct the tunnel at La Salle St., &c., &c. All new track hereafter laid in streets or public ways shall be laid with modern improved rails of the grooved type, weighing not less than 129 lbs. per yard. All rail used in the tunnels and on their approaches, and in the subways and on their approaches, may be "T" rail weighing not less than 80 lbs. per yard.

EXHIBIT D.-EXTRACTS REGARDING PROPOSED REORGANZIA-TION PLAN.

EXHIBIT D.--EXTRACTS REGARDING PROPOSED REORGANZIA-TION PLAN. No plan or any modification thereof shall be operative unless and until the allotment of securities of the Railways Company, or other benefits, to the depositors, as well as any other provisions of said plan (or modification thereof) affecting said depositors shall be approved by Peter S. Grosscup and by John C. Gray, as being based on the legal rights of said depositors as of the date of the passage of said ordinance under the respective leases to and from said companies and as being fair and just to each class of deposi-tors relatively to the treatment accorded to every other class of stocks, securities and evidences of indebtedness. In case of a disagreement be-tween said Peter S. Grosscup and said John C. Gray as to said plan, or any part thereof, then the said Peter S. Grosscup and John C. Gray shall submit the question in disagreement to a third person to be selected by them. In case they fail to agree on such third person, then such third person shall be selected by George W. Wickersham and Edward B. Burling. The de-cision of such three persons, or a majority of them, as to such plan or any part thereof shall be final and binding upon all the parties. Said plan shall extend to the holders the opportunity of making deposit ander said plan of all the stock, bonds and evidences of indebtedness of the North Chicago City Railway Co., the West Chicago Street RR. Tunnel Co., the Chicago Passegner Ry. Co., the West Chicago Street RR. Tunnel Co., the West Chicago St. RR. Co., the North Chicago St. RR. Co. and the Chi-oago Union Traction Co., respectively, and shall determine the stocks, securities or other benefits to be allotted to the depositors of such bonds, stocks or evidences of indebtedness, respectively.-V. 83, p. 491.

Parke, Davis & Co., Detroit.-Dividends.-We have been favored with the following authoritative statement:

The company has for some years paid quarterly 1½% dividend on its eapital :tock—an[annual 6% dividend, and from time to time, when the earnings waranted, diclared an extra dividend as well towards the close of the year. In December 1905 the company declared an extra 5% divi-dend, which was paid early in 1906 out of a part of the 1905 earnings. In December 1906 there was an extra dividend of 9%, and the company is saying the customary 1½% quaiterly for 1907. The capital stock is 54,000,000; par \$25; with no bonds or mortgages. President, Frank G. Ryan; Vice President, D. C. Whitney; Secretary & General Manager, Ernest G. Swift; Treasurer, G o. Hargreaves. The statement published in this column last week slipped into print prematurely.—V. 84, p. 1056.

-Shoemaker, Bates & Co., bankers, moved this week to the new Trust Company of America Building, Nos. 37-43 Wall Street. The firm has magnificent banking rooms, which have been cspecially fitted up for them, and in which white veined marble and solid mahogany figure extensively. The new offices are much more commodious than the old quarters at 24 Broad Street. The firm has two New York Stock Exchange memberships, and makes a specialty of handling high-grade investment securities. The uptown branch is located at No. 500 Fifth Avenue.

-John H. Wrenn & Co., one of the most prominent firms of bond and stock brokers in Chicago, has leased the spacious quarters on the ground floor corner of the Railway Exchange Building, formerly occupied by Chas. G. Gates & Co., and will cstabl'sh a branch office with J. B. Morrow as Manager. Mr. Morrow was in charge of this office of Gates & Co. from the time it was opened, and expects to retain a large share of the old accounts.

-Attention is called to the offering by Potter, Choate & Prentice, New York, and the Mercantile Trust & Deposit Co., Baltimore, of Fairmont Coal Co. 2-year 5% notes. The combined net earnings behind the collateral securing the notes is stated to be \$1,449,411, or about fourteen times the interest charge on these notes. A descriptive circular will be sent on application. The notes are offered at 97 and interest.

-The main offices of the C. H. Geist Co. are nowlocated in Chicago, Suite 600, Commercial National Bank Building, 115 Adams St. All companies controlled by the company will be operated from the Chicago office. The Philadelphia office will be maintained at No. 928 Land Title Building, as headquarters for the Eastern bond department, and will be in charge of Lucien H. Tyng.

-Attention is invited to E. B. Smith & Co.'s advertise-ment in to-day's issue of the J. G. Brill Co., Philadelphia, 7% cumulative stock offered for sale at \$100 per share and accrued dividend. The firm will receive subscriptions at either its New York office at 7 Wall Street or its Philadelphia office at 511 Chestnut St. Full description of the offering appears in the advertisement.

-Bond & Goodwin, of Boston, Chicago and Trinity Building at 111 Broadway, this city, have two well-known securities for sale which will net the investor nearly 6% profit. Their offering consists of \$500,000 American Locomotive Co. 5% coupon notes and \$200,000 American Beet Sugar Co. 6% registered notes. See to-day's advert sement on another page for full particulars.

-The New York Stock Exchange house of Hooley, Learnard & Co. will shortly admit into the firm Charles G. Smith, one of the junior members of Charles G. Gates & Co now dissolving. Hooley, Learnard & Co. will conduct the Waldorf-Astoria branch office of Charles G. Gates & Co., which they have taken over.

Southern Coal & Iron Co.—Bonds Pledged.—See Fairmont Coal Co. above and a'so in V. 84, p. 628.

Springfield (Mass.) Gas Light Co.-New Stock.-This company has asked the Massachusetts Gas & Electric Light Commission for authority to issue \$350,000 additional capital stock, for retiring floating debt and defraying cost of additions to plant.-V. 82, p. 1105.

Terre Haute (Ind.) Water Works Co.—See item under "Terre Haute" in "State and City" Department.—V. 84. p. 752.

United States Express Co.—Circular in Reply to President Platt.—The committee, headed by A. L. Ban'ster and Samuel S. Hatt, which has been endcavoring to force an increase in the dividend rate, has sont a circular replying to the letter of President Platt (V. 84, p. 1958), in part as follows:

No statement has been issued to shareholders, so far as we know, except the one contained in the letter dated April 26 1907. "The report of the management shows that net earnings have been f.om 11% to 18% annually for the past five years. We believe they have been much larger. Dividends in that time have not exceeded 4%. The real estate, securities and other assets have an actual eash value conservatively estimated at \$13,500,000. The total assets are believed to be worth from \$16,000,000 to \$20,000,000. Shareholders of other large express companies are receiving annually 10% and unwards, and an increase by this company to 7% cannot possibly and upwards, and an increase by this company to 7% cannot possibly cause nostile legislation. The net earnings for the ensuing year are estimated at 15%. The capital stock has been increased from \$500,000 to \$10,000,000 and the assets from

The capital

-Walter J. Trav's will be the manager of Waterman, Anthony & Co.'s new branch office at 5 West 58th Street, next door to the Plaza Hotel, now build ng. The same Stock Exchangy appointments and facilities found at the firm's main offices at Exchange Place will be provided at the 58th Street branch.

-"At the Market," the monthly publication issued by Bartlett, Frazier & Carrington, New York and Chicago, in the May issue just ready, contains much interesting matter on the crop situation and its bearing on stock market conditions.

-Mason, Lewis & Co., bankers, Boston, having found that some of their customers were not familiar with timber bonds as a security, have prepared a pamphlet upon the subject of timber and timber bonds, which contains much important and interesting information.

-Leeds Mitchell, for the last three years in charg of the stock and bond department of Pringle, Fitch & Rankin, Chicago, has been admitted to partn as'rp in the firm.

-Vickers & Phelps, 29 Wall St., have issued a four-page circular describing and quoting the note issues made since Jan. 1. Copies may be had on application.

The Commercial Times.

COMMERCIAL EPITOME.

Friday Night, May 10 1907.

Although trade has suffered more or less by reason of a backward season, the aggregate business has continued large and the feeling throughout the country is still very generally confident. Money has been comparatively easy and manufactures active. Warmer weather is needed for the crops. Speculation is still for the most part quiet, though in grain and cotton it has increased somewhat.

LARD on the spot has advanced, owing to the rise in the futures market at the West and the strength of the grain markets. Trade has been somewhat more active at the advance. City $8\frac{1}{2}@8\frac{5}{8}$ c. and Western $9@9.12\frac{1}{2}$ c. Refined lard has advanced. Trade has been more active, partly for export, and offerings have been light. Refined Continent 9.50c., South America 10.25c. and Brazil in kegs 11.25c. The market for lard futures has advanced, with the trading more active. The principal stimulating factor has been the strength and activity of the grain markets, though some increase in the spot trade has also had a bracing effect. Packets have given support at times.

DAILY CLOSING PRICES OF LARD FUTURES IN CHICAGO.

PORK on the spot has been firm for mess and easy for other grades. Trading has been moderately active. Mess \$17 75@\$18 25, clear \$17@\$18 50 and family \$19. Cat meats have been fairly active and steady. P.ckied shoulders 10c., pickled hams 12@12%c, and pickled bellies, 14@10lbs., 11@12c. Tallow has been strong, with the demand good and supplies light; City, 6c. Oico has been fairly active and firm. Olco 8%c, and lard 10c. Butter has been moderately active and firm. Creamery extras 27%c. Chees has been in fair demand and steady. State factory, September, fancy, 15c. Eggs have been active and firm; Western firsts 18c.

OIL.—Cotton such has advanced, with the demand active, owing to the rising prices for such. Prime summer yellow 52@53c, and winter 55(a58c). Linsued thas advanced, owing to higher quotations for such. The demand has fallen off of late, owing to unfavorable weather. City, raw, American such, 44@45c; boiled 45@46c; Cale atta, raw, 70c. Lard has been moderately active and firm; prime 75@76c, and No. 1 extra 57@58c. Olive has been quiet and sleady; yellow 85@95c, and green 70@75c. Cocoanut has been fairly active and sleady; Cochin 1014c, and Caylon 914@97%c. Peanut has been quiet and steady; yellow 50@50c. Cod has been fairly active and steady; domestic 38@40c, and Newfoundland 40@42c.

COFFEE on the spot has been dull and easier. Rio No. 7, $6^{3}\sqrt{6}6\sqrt{2}c$, and Santos No. 4, $7\sqrt{4}c$. West India growths have been quiet and steady; fair to good Cacuta $8\sqrt{6}0\sqrt{4}c$. The speculation for future contracts has been extremely dull and devoid of interesting developments. Prices have moved within narrow confines. The receipts have continued on a large scale and at times the European markets have shown unexpleted heaviness, while tired longs here have liquidated. There has been enough support from covering and other buying, however, to hold the market about steady. The closing prices were as follows:

May	5.50c. September	5.35c. January	5.40c.
	5.40c. October		
	5.40.c November		
August	5.35c. December	5.35c. April	5.45c.
SUGARI	Raw has been quiet	but firmer, with offe	erings.

small. Centrifugal, 96-degrees test, 3.83c.; muscovado, 89degrees test, 3.33c., and molasses, 89-degrees test, 3.08c. Refined has been firmer with a moderate demand. Granulated 4.75@4.80c. Teas and spices have been steady with a fair jobbing demand. Hops have been dull and steady. PETROLEUM.-Refined has been firm, with trade brisk partly for export account. Refined, barrels, 8.20c., bulk 4.75c. and cases 10.65c. Naphtha has been active and firm; 73@76 degrees 18c. in 100-gallon drums. Gasoline has been active and firm; 86 degrees 21c. in 100-gallon drums. Spirits of turpentine has been easier at 6712e, on increased supplies. Rosin has been moderately active and steady; common to good strained \$4 90. TOBACCO.—There has been no essential change in the general situation. The demand for domestic leaf has continued quiet with prices generally firm. Sumatra has been in moderate demand and firm. Crop reports from Kentucky have continued conflicting. Crop advices from Havana have been unfavorable. In fact, the situation in the Island is said to be the most serious for many years past, the season being three months late and the indications pointing to a yield considerably smaller than the average. It is said that there will be a famine of light-bodied Havana fillers. COPPER has been less active and easier; Lake $25\frac{1}{4}$ 25%c. and electrolytic 24¼@24%c. Lead has been dull and steady at 6c. Spelter has been quiet and steady at 6½@6.55c. Tin has been more active and firm; Straits 43c. Iron has been active and stronger; No. 1 Northern \$24 20(a) \$25 20; No. 2 Southern \$23 75@24 75.

COTTON.

Friday Night, May 10 1907.

THE MOVEMENT OF THE CROP as indicated by our telegrams from the South to-night is given below. For the week ending this evening the total receipts have reached 60,776 bales, against 74,710 bales last week and 76,608 bales the previous week, making the total receipts since the 1st of September 1906, 9,325,641 bales, against 7,195,152 bales for the same period of 1905-06, showing an increase since Sept. 1 1906 of 2,130,489 bales.

Speculation in cotton for future delivery has continued on a rather larger scale than recently, and prices have advanced, mainly because of excessive rains and cold weather, principally in the Mississippi Valley. Some Texas and Alabama reports however have also been unfavorable. Cloudbursts have occurred in Mississippi, Louisiana and Arkansas, flood warnings have been issued in regard to tributaries of the Mississippi, and what the whole cotton-belt seems to need is hot, dry weather. This it has certainly not been getting. The reports which have been received of late from many different parts of the belt give rise to fears among some that the next crop may not be adequate to meet the demands of a large world's consumption. It has been largely a weather market, however, and it is a very general conviction that should warm, dry conditions set in and last for a sufficient length of time, the crop outlook would be very greatly improved. Meantime a more or less aggressive bull speculation is going on, especially in the July option, which has latterly risen to a premium of 2 points over October, after selling at times during the week at considerably under that month. The near months in fact have been the strongest of any, not only here but also in New Orleans and Liverpool. At the same time there has been a somewhat larger outside public speculation which has shown a disposition to purchase the new-crop months on the strength of the unfavorable weather and crop reports. New Orleans, Southern and Liverpool interests as well as spot houses have also been buying on a sufficiently large scale to attract attention. A factor which also favored the bulls was the withdrawal of the injunction proceedings, leaving the matters in dispute between Mr. Theodore H. Price and the New York Cotton Exchange to the decision of a referee. Moreover the Liverpool market has been strong, with a good spot business, and the spot quotations at the South have been universally firm, with every appearance of a persistent demand, especially for the better grades. Reports about the dry goods trade have also been of an encouraging kind. Wall Street houses and not a few local operators who were recently inclined to the bear side have been buyers, and also, it would appear, the West to some extent. Though the speculation is much smaller than in the active times of the past, it has broadened somewhat, and unless the weather improves very materially

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Foreign stocks, as well as the afloat, are this week's returns, and consequently all foreign figures are brought down to Thursday evening. But to make the total the complete figures for to-night (Friday), we add the item of exports from the United States, including in it the exports of Friday only.

WEATHER REPORTS BY TELEGRAPH.—Our reports received by telegraph from the South this evening are, on the whole, of an unfavorable tenor. Rain has fallen in most localities during the week, being rather excessive at points in the Southwest. Planting operations have been delayed as a result, and there are also complaints of too low temperature. It is likewise claimed that much replanting is necessary.

Galveston, Texas.—Excessive precipitation and cold waves have further delayed planting in Texas and injured stands in many localitics. Cons derable replanting will be required and altogether it looks as if crops will have an unusual start for this State. There has been rain on three days of the week, the precipitation reaching one inch and ninety-one hundredths. Average thermometer 60, highest 78 and lowest 49.

Abilenz, Texas.—We have had rain on three days during the week, the rainfall being one inch and sixty hundredths. The thermometer has averaged 59, the highest being 84 and the lowest 34.

Brenham, Texas.—The week's rainfall has been two inches and four hundredths, on two days. The thermometer has averaged 65, ranging from 49 to 80.

Corpus Christi, Texas.—Rain has fallen on three days of the week to the extent of one inch and twenty-one hundredths. The thermometer has ranged from 60 to 82, averaging 71. Cuero, Texas.—Rain has fallen on two days during the week, the rainfall being one inch and twelve hundredths. Average thermometer 69, highest 87 and lowest 50.

a Including movement by rail to Canada.

The foregoing shows the week's net overland movement has been 11,400 bales, against 12,659 bales for the week last year, and that for the season to date the aggregate net overland exhibits an increase over a year ago of 373,131 bales.

Dallas, Texas.—We have had rain on four days during the week, the rainfall being one inch and eighty hundredths. The thermometer has averaged 63, the highest being 85 and the lowest 41.

Fort Worth, Texas.—The week's rainfall has been one inch and fifty-eight hundredths on three days. The thermometer has averaged 72, ranging from 54 to 90.

Henrietta, Texas.—We have had rain on three days during the week to the extent of forty hundredths of an inch. The thermometer has ranged from 38 to 77, averaging 58.

Huntsville, Texas.—There has been heavy rain on \mathbf{t} vo days of the week, the precipitation reaching three inches and eight hundredths. Average thermometer 66, highest 82 and lowest 49.

Kerrville, Texas.—We have had rain on three days during the week, the rainfall being twenty-five hundredths of an inch. The thermometer has averaged 69, the highest being 93 and the lowest 45.

Lampasas, Texas.—We have had rain on three days of the week, the rainfall being two inches and fifty hundredths. The thermometer has averaged 68, ranging from 40 to 95.

Longiew, Texas.—Rain has fallen on five days of the week, to the extent of two inches and fifty-four hundredths. The thermemeter has ranged from 44 to 80, averaging 62.

Luling, Texas.-It has rained on two days of the week, the precipitation being eighty-three hundredths of an inch. Average thermometer 66, highest 86, lowest 46. Nacogdoches, Texas.—We have had excessive rain on four

days during the week, the rainfall being six inches and eightythree hundredths. The thermometer has averaged 64, the highest being 83 and the lowest 45. Palestine, Texas.—The week's rainfall has been two inches

and nineteen hundredths, on four days. The thermometer has averaged 63, ranging from 44 to 82.

Paris, Texas.-We have had rain on four days during the week to the extent of one inch and fifty-six hundredths. The thermometer has ranged from 41 to 84, averaging 61. San Antonio, Texas.—Rain on two days of the week to the

extent of one inch and twenty-one hundredths. Average thermometer 64, highest 84, lowest 47. Weatherford, Texas.—There has been rain on three days

of the week, the precipitation reaching two inches and ninety hundredths. Average thermometer 65, highest 90 and lowest 39.

Ardmore, Indian Territory.—Heavy rains the past week have retarded all farm work. Cotton has been damaged by cold weather and much replanting is necessary.

New Orleans, Louisiana .- We have had rain on four days of the week, the rainfall being five inches and twelve hun-dredths. The thermometer has averaged 72.

Shreveport, Louisiana.-Rain has fallen on four days of the week, to the extent of three inches and seventy-nine hundredths. The thermometer has ranged from 44 to 84, averaging 64.

Leland, Mississippi.—Rain has fallen on five days during the week, the rainfall being two inches and forty hundredths. Average thermometer 59.4, highest 78 and lowest 46.

Vicksburg, Mississippi.-The week's rainfall has been two inches and forty-seven hundredths, on four days. The ther-mometer has averaged 68, ranging from 51 to 83. *Helena, Arkansas.*—There has been too much rain for farming interests. The river is rising and is now over the

outside levee. The weather is warmer to-day, with indica-ions of more rain. Much replanting has to be done. It has rained heavily on four days during the week, the rainfall reaching four inches and eighty-six hundredths. The thermometer has ranged from 45 to 77, averaging 63.

Little Rock, Arkansas.-There was too much rain early in the week, but latterly the weather has been clear and more favorable. Considerable cotton has been planted two or three times. There has been rain on four days of the week, the precipitation reaching six inches. Average thermometer

61, highest 77 and lowest 45. Memphis, Tennessee.—On account of excessive rain no farm work is being done. We have had rain on five days of the week, the precipitation reaching four inches and fifty-eight hundredths. The thermometer has averaged 61.8, ranging from 43.2 to 78.9.

Nashville, Tennessee .- Rain during the week, with a rainfall of three inches and thirty-four hundredths. The thermometer has ranged from 37 to 76.

Mobile, Alabama .- Crop reports are bad; excessive and continuous rains have been general. Replanting is making slow progress and good seed is scarce. The Tombigbee river is five feet above the flood stage and rising. It has rained on five days of the week, the rainfall being two inches and one hundredth. Average thermometer 72, highest 81 and lowest 63.

Montgomery, Alabama.—No indications yet of clearing weather; hence the outlook is still gloomy. It has rained on five days of the week, the precipitation reaching one inch and nine hundredths and it is still raining. The thermometer has averaged 69, ranging from 55 to 84.

Selma, Alabama.-Continuous rain is preventing all farmwork and much replanting is necessary. There has been rain on four days during the week, to the extent of four inches and fifty hundredths. Average temperature 67. Madison, Florida.—There has been no rain during the

EUROPEAN COTTON CONSUMPTION TO MAY 1.-By cable to-day we have Mr. Ellison's cotton figures brought down to May 1. We give also revised totals for last year that comparison may be made. The spinners' takings in actual bales and pounds have been as follows:

Oct. 1 to May 1.	Great Britain.	Continent.	Total.
For 1906-07. Takings by spinnersbales_ Average weight of baleslbs_ Takings in pounds	503	481	
For 1905-06. Takings by spinnersbales. Average weight of baleslbs. Takings in pounds	498	481	

According to the above, the average weight of the deliveries in Great Britain is 503 pounds per bale this season against 498 pounds during the same time last season. The Continental deliveries average 481 pounds, against 481 pounds last year, and for the whole of Europe the deliverics average 489.6 pounds per bale, against 488.1 pounds last season. Our dispatch also gives the full movement for this year and last year in bales of 500 pounds.

The foregoing shows that the weekly consumption is now 182,000 balcs of 500 pounds each, against 175,000 balcs of like weights at the corresponding time last year. The total spinners' stocks in Great Britain and on the Continent have increased 144,000 bales during the month and are now 724,000 bales more than at the same date last season.

FALL RIVER WAGE AGREEMENT ACCEPTED.— The textile unions of Fall River, representing about 30,000 operatives, at a meeting on Wednesday night voted to accept the new wage proposition. The new agreement will go into effect May 27 and means an advance of 10%. The agreement is as follows:

Ment 1S as follows: Clause I. That 21.78 cents per cut shall be the recognized standard price for a margin of 95 points, based on the cost of eight pounds of middling upland cotton and the selling value of 45 yards of 28-inch 64x64 print cloth and 33.11 yards of 38 ½-inch 64x64. Quotations from the "New York Jour-nal of Commerce" shall be considered authority. Clause II. Wage agreement shall be binding for six months, beginning the last Monday in May and November of each year, based on the average margin for the previous six months. Prices for weaving should be as follows: "With a margin of 115, 23.96c.; 105, 22.87c.; 95, 21.78c.; 85, 20.69c.; 80, 19.66c.; 75, 18.68c.; 72½, 18c." Wages in all departments other than weaving shall be adjusted on the same, basis: 23.96c., with a margin of 115, shall be the maximum, and 18c. per cut, with a margin of 72½, shall be the minimum rate paid for weaving. Clause III. If at any time either party to the agreement shall desire to make a change, at least three months' notice shall be given by the party desiring the change prior to the expiration of the existing six months' contract. The new agreement is based upon the average margin

week. Average thermometer 78, highest 90, lowest 66.

Greenwood, South Carolina .- We have had rain on four days during the week, to the extent of one inch and eightyone hundredths. The thermometer has ranged from 58 to 78, averaging 68.

Savannah, Georgia.-There has been rain on four days of the week, the precipitation reaching thirty-five hundredths of an inch. Average thermometer 75, highest 85 and lowest 64.

Augusta, Georgia-Heavy rains in this vicinity; much replanting is necessary and labor scarce We have had rain during the week to the extent of two inches and forty-seven hundredths, on four days; the thermometer has ranged from 57 to 86, averaging 73.

Stateburg, South Carolina.-There have been thunder storms on four days of the week, accompanied by high winds, the precipitation reaching three inches and twenty-soven hundredths. Average thermometer 70, highest 86 and lowest 55.

Charlotte, North Carolina.- The week's rainfall has been sixty-two hundredths of an inch. The thermometer has averaged 68 the highest being 83 and the lowest 50.

MANCHESTER MARKET .- Our report received by cable to-night from Manchester states that the market continues firm for yarns and steady for shirtings. Manufacturers are generally well under contract. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison.

The new agreement is based upon the average margin during a period a little short of six months ending with April 30, and the average having been found to be slightly over 115, the rate of pay for weaving will be 23.96 cents per cut of print cloth-about 46 yards of 28-inch 64x64s. То arrive at the marg'n it is assumed, and we are assured by Mr. Clinton V. S. Remington of Fall River that the assumption is practically correct, that 8 lbs. of cotton will make 5 yards of 28-inch 64x64 print cloths, or 33.11 yards of $8\frac{1}{2}$ -inch 64x64 print cloths. The joint average price of the cloths divided by 2 gives one side, the average cost of 8 lbs. of cotton; the other, the difference, being the margin. Thus, 5 yards of 28-inch at $4\frac{1}{2}$ cents per yard and 33.11 yards of $8\frac{1}{2}$ -inch at 7 cents gives a total of 84.343, or an average of \$2.176, and 8 lbs. of cotton at $12\frac{3}{4}$ cents is \$1.02, the margin being \$1.156. The agreement of Nov. 26 last, which this supersedes, was based upon a margin of 95 points, making the wage per cut 21.78 cents.

JUTE BUTTS, BAGGING, &c .- The demand for jute bagging has been dull during the week under review, and prices are as last quoted at 91% c. for 2 lbs., standard grades Jute butts dull at 3@4c. for bagging quality.

for FRASER uisfed.org WORLD'S SUPPLY AND TAKINGS OF COTTON.— The following brief but comprehensive statement indicates at a glance the world's supply of cotton for the week and since Sept. 1, for the last two seasons, from all sources from which statistics are obtainable; also the takings, or amount gone out of sight, for the like period.

BREADSTUFFS.

Friday, May 10 1907.

Prices for wheat flour have been advanced on most grades, owing mainly to the rise in wheat quotations and the persistent report of serious damage to the crop in the Southwest and of the probability of a material reduction in the springwheat area. The trading, however, has come almost to a standstill, buyers refusing to follow the advance, and the higher quotations have been mainly nominal. Export business has continued stagnant. Rye flour has been dull and steady. Corn meal has been quiet and firm.

Wheat has advanced, owing to continued unfavorable weather and crop reports from the Northwest, the West and the Southwest, higher foreign markets and some increase in the export demand. A very sharp rise at Buda Pesth-that is, a rise of over 10 cents per bushel in our money in a few days-was due, it appears, to an unfavorable outlook for the crop in Hungary. Supplies in France and Germany are stated to be small. It is officially reported that some 10 to 25% of the Hungarian and Roumanian winter-wheat acreage has been re-plowed, and in Bulgaria 20 to 40% winter killed. In other words, crop reports, both in this country and abroad, have been of a rather adverse kind, and on both sides of the Atlantic prices have risen. Realizing of profits, however, has latterly carsed some reaction in most of the world's markets, New York and Chicago by no means exc pted. Still, what with winter killing in the winter-wheat belt and delay in seeding in both the American and the Canadian Northwest, quite a large bull speculation has recently sprung up in this country, and at times prices have risen sharply. Some reports are to the effect that the damage by bugs in the Southwest has been exaggerated, and that the yield of wheat in that soction will be larger than is generally expected. Moreover, there is still time to plant a large acreage in spring wheat at the Northwest. It would be idle to d'sguise the fact, however, that the markets are very sensitive to weather and erop news, and even to all sorts of rumors concerning the probable yield, and also that the weather for some time past over much of the Western grain section of this country has been far from favorable. Latterly there has been some disposition to proceed more cautiously, awaiting the Government report of conditions as they existed on May 1. This appeared toas day, and stated the condition of winter wheat at 82.9%

on May 1, against 89.9 on April 1, 91% on May 1 last year, 92.5 in 1905 and 85.5% the average on May 1 for 10 years. This is taken as indicating a crop of winter wheat of 405,-101,000 bushels, against a crop of 492,888,005 last year. The acreage reported abandoned is 11.2%, leaving the total area 28,132,000 acres. The effect was to cause a sharp advance in pr.ces, with the trading active and exc.ted. The buying was general and came from all quarters. Bulls contend that since May 1, the date on which the Government figures were compiled, there has been a further material de-cline in the condition. New high-record prices for the season were established.

Indian corn futures have been firmer, though the trading has been on a comparatively restricted sale. Strengthening factors, however, have been the rise in wheat, cold weather at the West and a disinclination to sell for short account, owing to the fear of bull manipulation. A large area has been prepared for planting, but the weather has continued too cold for seeding. The cash market has been firm with a mod-erate demand. The receipts have been light and are ex-pected to continue small. The upward tendency of futures, however, has been checked by scattered liquidation. Cash interests have sold at times. To-day prices advanced owing to the rise in wheat, covering of shorts, light offerings, commission-house buying and reports of an increased export demand at the West.

Oats for future delivery in the Western market have been firmer and new high records have been established. The principal ball sh factors have been the cold weather, reports of damage to the crop and the strength of wheat. There has been a good shipping demand at the West at firm prices. The receipts have been light and contract stocks continue relatively small. Prominent Chicago bulls have given sup-port. At times, however, reactions have occurred, owing mainly to liquidation in the May option and selling by eash interests. To-day prices advanced, owing to sympathy with the sharp rise in wheat, covering of shorts and commissionhouse buying, but considerable liquidation occurred, check-

ing th	ie a	advance.		.2		e	4

AGRICULTURAL DEPARTMENT REPORT ON CE-REALS, &c .- The report of the Department of Agriculture, showing the condition of the cereal crops on May 1, was issued on the 10th inst., and is as follows:

The Crop Reporting Board of the Bureau of Statistics of the Department The Crop Reporting Board of the Bureau of Statistics of the Department of Agriculture from the reports of the correspondents and agents of the Bureau finds the area under winter wheat remaining in cultivation on May 1 to have been about 28,132,000 acres. This is 11.2%, or about 3,533,000 acres less than the area sown last fall, and 5%, or about 1,468,000 acres less than the area of winter wheat reported as harvested last year. The average condition of the growing winter-wheat crop on May 1 was 82.9, as compared with 89.9 on April 1, 1907 90.9 on May 1 1909 and 92.5 on May 1 1905, and 95.5 the mean of the May averages for the last ten Years.

 $g_{2,5}$ on May 1 1900, and once the line principal winter wheat States the years. e The following table shows for the 11 principal winter wheat States the percentage of the acreage sown last fall that is now reported as abandoned; the acreage remaining under cultivation; also the averages of condition on May 1 and April 1907 and on May 1 1906 and 1905, and the mean of the May averages of the last 10 years:

	Per Cent. Acreage	Acreage Remaini'g		C_{0}	ondition	1.

United States	11.2	28,132,000	82.9	89.9	90.9	92.5	85.5

The average condition o winter rye on May 1 was 88, as compared with 92 on April 1 1907, 92.9 on May 1 1906, 93.5 at the corresponding date of 1905 and 89.5 the mean of the May averages of the last ten years. The average condition of meadow mowing lands on May 1 was 83.6 against 92 on May 1 1906, 93.3 on May 1 1905 and 90.4 the mean of the May averages of the last ten years. The average condition of spring pasture on May 1 was 79.6, against 91.4 on May 1 1906, 92.3 on May 1 1905 and 89.2 the mean of the May averages of the last ten years.

Of the last ten years. Of the total acreage of spring plowing contemplated, 71.5 % is reported as actually done up to May 1, as compared with 63.9 % at the corresponding date last year and a 10-year average on May 1 of 65.0 %. Of spring planting 47 % is reported as having been completed on May 1, as compared with 53 % on May 1 1906.

The statement of the movement of breadstuffs to market as indicated below are prepared by us from figures collected by the New York Produce Exchange. The receipts at Western lake and river ports for the week ending last Saturday and since Aug. 1 for each of the last three years, have been:

THE DRY GOODS TRADE.

New York, Friday Night, May 10, 1907.

The weather during the past week has again been of a decidedly unseasonable character and complaints from retailers in this and other distributing centres of unsatisfactory trade are increasing. So far as first-hand sellers and jobbers are concerned, weather influences have not, up to the present time, played any great part. It is nevertheless to be expected that conditions with retailers will later on assert themselves in the primary market, and a period of slow business is by many being looked forward to. As matters stand, this is not regarded by manufacturers and their agents as altogether a disadvantage. Stocks in first hands are insignificant in any direction; mills, as a rule, are heavily under orders for forward production and an opportunity to overtake in some degree present commitments will be welcome rather than otherwise in the cotton goods division. The course of the market for raw material this week has tended to perplex manufacturers, who in the present state of uncertainty regarding early conditions of the 1907-8 crop, are unable to decide how for the rising tendency in cotton is justifiable or due to strong speculative support. Meanwhile, the tone of the goods market continues generally strong, with most prices well maintained, and an advancing tendency still noticeable in some. There has been no improvement during the week in the woolen goods division, business continuing disappointing in the aggregate, and indications on new spring lines rather against manufacturers. The new season for carpets opened this week with moderate average advance in prices.

Heavy brown sheetings and drills in export grades are without improvement, continuing irregular, and reports are current that there are offers in the market to reship goods of this description from China at or somewhat below quotations current here. Bleached muslins are extremely well held, and the tendency of prices is against buyers, who find some difficulty in placing orders for near delivery. The general run of coarse, colored cottons also rules firm and for quick delivery premiums are, in some instances, being paid. Domets and other napped colored fabrics are without change. Printed calicoes in both staple and fancy lines are in steady request at firm prices, with business for export still an encouraging feature in this division. Kid-finished cambrics and other converted lining goods generally tend against buyers but the current demand for these is moderate only. All grades of ginghams are moving out freely on existing orders with a quiet current business at previous prices. In print cloths, scarcity of supplies restricts current business and the market is very firm on the basis of 4 9-16c. for regulars. Wide goods are in steady request at full prices.

WOOLEN GOODS .- The effect of the prolonged unseasonable weather is more noticeable in this division than upon cotton goods. The week's business has been of quite moderate dimensions in all departments and the re-orders for woolen and worsted trouserings and suitings in fall lines have again fallen short of what sellers had hoped for. In the most staple varieties of the medium and lower grades of allwool goods and of most descriptions of fancy woolens, prices have ruled steady, but there is some irregularity in the worsted lines. Little has been added to the new lines put upon the market for this spring, but such goods as have been opened, mainly low-grade fabrics, tend to encourage buyers to look for somewhat lower prices than at first appeared probable, and this in spite of the fact of continued firmness in the market for raw material Indications point to considerable manipulation of products in order to overcome the inconsistency between high-priced wool and low-priced goods. Overcoatings continue slow and practically devoid of any feature of moment. In woolen and worsted dress goods the demand is mainly for plain colors, the business doing outiside of these being of restricted dimensions. Up to the present time there has been very little done for next spring, and such contracts as have been put through are booked on private terms. A large business is reported to have been done in carpets for the new season with prices, as already noted, against buyers.

FOREIGN DRY GOODS .- In imported woolen and worsted dress goods and men's wear fabrics, the week's transactions have been limited and without feature, so far as set prices are concerned. Business in silks and ribbons also shows no change of importance. The demand for linens has fallen off and is apparently affected by the continued bad weather. Burlaps, as they arrive, are regularly sold at full prices.

d for FRASER

The general demand from the home trade has been 60,964,782 this week of quite moderate dimensions. Filling-in orders have been less numerous than recently, and there has been some slackening off in the desire to order ahead.

THE CHRONICLE.

CITY DEPARTMENT. STATE AND

MUNICIPAL BOND SALES IN APRIL.

The April aggregate of municipal bond disposals proves to be, with one exception, of larger proportions than that of any April since 1892. According to our records, \$19,284,125 any April since 1892. According to our records, \$19,284,125 of such bonds were placed. These figures, of course, do not include temporary loans amounting to \$21,591,000 nor \$1,000,000 bonds of Porto Rico. Among the larger sales which took place during April may be mentioned \$5,000,000 by New York State, \$3,283,000 by the State of Massachu-setts and \$1,165,500 by the City of Newark, N. J. The number of municipalities emitting bonds and the number of separate issues made during April 1907 were 198 and 333 respectively. This contrasts with 199 and 245 for March 1907 and with 190 and 234 for April 1905. For comparative purposes we add the following table

For comparative purposes we add the following table showing the aggregates for April and the four months for a series of years:

i : :	Month of April.	For the Four Mos.		Month of April.	For the Four Mos.
	\$19,284,125	\$77,708,823 1	899	\$7,477,406	\$26,098,992
	8,725,437	65,755,686 1	898	3,570,963	27,336,696
	40,409,428	76,137,234 1	897	13,060,323	48,631,385
1904	11,814,584	58,333,230 1	896	4,521,850	19.672.118
1903	17,626,820	47,803,588 1	895	8,469,464	29,496,406
1902	6,735,283	38,254,819 1	894	11,599,392	35,718,205
1901	9,298,268	33,192,622 1			26,680,211
1900	14,157,809	48,650,275 1	892	6,723,000	28,987,431

In the following table we give a list of April loans to the amount of \$19,284,125 issued by 198 municipalities. In the case of each loan reference is made to the page in the "Chronicle" where an account of the sale is given.

REVISED TOTALS FOR PREVIOUS MONTHS.

The following items, included in our totals for previous months, should be eliminated from the same, as the sales have not been carried to completion. We give the page number of the issue of our paper in which the reason for the failure to consummate the sale may be found.

Page.	Name of Municipality.	Amount.
884 Bound	Brook School District, N. J. (February list)	\$10,000
1011Chemu	ng County, N. Y. (March list)	26,480
	n, Minn. (March list)	
587Readin	g, Ohio (January list)	7,800

We have also learned of the following additional sales for previous months:

Page.Name.Rate1068_Fairhaven, Mass.41142_Woodward Sch. Dist., Iowa5 Maturity. 1907-1949 d1912-1917 Amount. Price. \$42,000 100 11,000 101.045 Rate.

All the above sales (except as indicated) are for March. These additional March issues will make the total sales '(not including temporary loans) for that month \$10,544,440.

News Items.

South Carolina.—Blue Ridge Bond Scrip Litigation.—A case concerning old Blue Ridge bond scrip of this State came up for argument before the United States Supreme Court on April 25. The facts in the suit are very interesting and we therefore publish the following resume taken from the Charleston "News and Courier":

The case came to the United States Supreme Court on a writ of error from the Supreme Court of South Carolina, the essential facts in the case being as follows:

as follows: A petition was originally filed in the Supreme Court of South Carolina asking the Court to enjoin the defendant in error, the Treasurer of the State, from writing \$37,000 of certain State bonds off the books in his office and no longer carrying said bonds on the books as a debt of the State. The State Bank was originally chartered by the General Assembly of South Carolina in 1802. Its charter was renewed from time to time and finally expired in 1874. In 1854 the General Assembly authorized the issuance, in aid of the Blue Ridge Railroad, and for the purpose of purchasing shares of its capital stock, of State bonds to the amount of \$1,000,000, payable in five installments of \$200,000 each, the first installment payable after the expiration of twenty years and the remaining \$800,000 in four equal annual installments there-after. after.

The State Bank became the owner of 100 of these bonds (numbered from

years and the remaining \$800,000 in four equal annual installments there-after. The State Bank became the owner of 100 of these bonds (numbered from 801 to 900, each of the denomination of \$1,000) and all of them, with other assets of the bank, were taken from its agents by soldlers in Gen. Sherman's army when it passed through South Carolina in 1865. Nincteen of these bonds were recovered by the bank before a receiver for it was appointed. Under an Act of the General Assembly of 1869, providing for the placing in liquidation of the banks which had issued bills of credit and had falled to pay them, a receiver was appointed early in 1870 for the State Bank, to take charge of its property and assets and finally settle its affairs. April 20 1870 the Court passed an order in the cause enjoining the State Treasurer from paying either the principal or interest on any of the eighty-one bonds remaining outstanding to any person except to the receiver. The order, while it enjoined the payment of the bonds, did not enjoin the fund-ing of them under the Conversion Act of 1869 or the consolidation of them under the Consolidation Act of 1873, and in 1876 it was discovered that several of the bonds had been funded and were thus lost to the receiver. The Court passed a second order February 4, 1876, enjoining the Treasurer from funding or consolidating any of the bonds remaining outstanding. A number of the bonds were recovered from time to time and funded by the receiver under orders from the Court. An order was passed June 29 1894, referring the case to one of the Masters of the Court or port whileh of the bonds in question were still outstanding unpaid and unfunded. The Master reported that thirty-eight of the bonds were still outstanding and unpaid and that the said bonds are the property of the late corporation known as the president, directors and company of the State Bank, and collect the same from the Treasurer of the State. This report was confirmed by the Court. The thirty-eight bonds out standing matured on the

The General Assembly adjourned on the same day this resolution was passed. A new General Assembly convened, and the next day the resolution was sent to the Senate by the Governor unsigned and unapproved. The Senate then passed the resolution over the Governor's veto. Various grounds are set up declaring the resolution to be null and void. The petitioner prayed that an "injunction be issued perpetually enjoining and restraining the State Treasurer, the respondent herein, from writing the said \$37,000 of State bonds off of the books in his office and no longer carrying said bonds on the books as a debt of the State, and for general relief."

Bond Proposals and Negotiations this week have been as follows:

Albany County (P. O. Albany), N. Y.—Bond Sale.—On May 6 the \$99,000 4% 18-year average)) registered highway-improvement bonds described in V. 84, p. 1010, were awarded, it is stated, to the Albany County Savings Bank of Albany.

Allegheny, Allegheny County, Pa.-Bonds Not Sold.-Local papers state that no sale was made on April 29 of the \$1,000,000 reservoir and water-main and \$250,000 streetimprovement funding 4% bonds described in V. 84, p. 950.

Ashland, Clay County, Ala.—Bond Offering.—Further details are at hand relative to the offering of the \$10,000 5% gold coupon school-building bonds mentioned in V. 84, p. 1066. Proposals for the securities will be received at any time by R. G. Rowland, Mayor. Authority Acts of 1903, page 59, and vote of 85 to 3 at election held April 23. Denomination 500. Dated July 1 1907. Interest semi-annual. Maturity July 1 1927. Bonds are exempt from taxation. This town has no bonded debt at present. Assessed valuation 1907 \$210,000.

Auburn, Cayuga County, N. Y.-Bond Sale.-On May 1 this city awarded an issue of \$10,000 4% school-addition bonds to the City Water Board at par. Denomination \$1,000, Dated May 1 1907. Interest semi-annual. Maturity Oct. 1 1922, subject to call at any time.

Aurora School District (P. O. Aurora), Lawrence County, Mo.—Bond Sale.—On April 23 the \$26,000 5% 10-20-year (optional) high-school-building bonds recently voted (V. 84, p. 950) were awarded to the Little & Hays Investment Co. of St. Louis for \$26,805, the price thus being 103.096-a basis of about 4.611% to the optional date and about 4.759% to the full maturity. Denomination \$500. Date July 1 1907. Interest semi-annual.

Baltimore, Md.-Bonds Voted.-The election held May 7 resulted in favor of the propositions to issue the \$1,000,000 50-year fire-engine-house-construction and \$1,000,000 50year public-school-building bonds described in V. 84, p. 950. The vote was 49,032 to 6,843 on the former proposition and 48,149 to 6,549 on the latter.

Basil, Fairfield County, Ohio.—Bond Sale.—On May 1 the \$1,000 4% 1-10-year (serial) municipal-building bonds described in V. 84, p. 883, were disposed of at private sale.

Bemidji, School District (P. O. Bemidji), Beltrami County, Minn.—Bonds Voted.—This district recently voted to issue \$35,000 high-school-building bonds. The vote was 171 "for" to 151 "against."

Black Jack Township, Richmond Counyt, N.C.-Bonds Voted.-A proposition to issue good-road bonds carried at an election held April 20.

Bloomdale School District (P. O. Bloomdale), Wood County, Ohio.-Bonds Voted.-This district recently authorized the issuance of \$10,500 school-building-remodeling bonds by a vote of 178 to 78.

Blum Independent School District (P. O. Blum), Hill County, Tex.—Bonds Registered and Sold.—On May 1 the State Comptroller registered \$9,000 5% 10-30-year (optional) school-house bonds dated May 1 1907. The State Board of Education has purchased these bonds on a 43/8% basis.

Boerne School District (P. O. Boerne), Kendall County, Tex.-Bonds Defeated.-This city on April 23 defeated a proposition to issue \$8,000 school-building bonds.

Bonesteel, Gregory County, S. Dak.—Bonds Voted.—The election held April 23 resulted in favor of the proposition to issue the \$13,000 5% 20-year water-works bonds mentioned in V. 84, p. 950. The vote was 117, all of which was in favor of the bonds.

A temporary restraining order was passed in accordance with the prayer of the petition, and a rule to show cause issued against the State Treasurer, who made return to it April 21 1903, by demurring to the petition. The case was heard by the Supreme Court of South Carolina May 4 1903, and on September 10 1903 the Court handed down its decision, refusing the injunction prayed for, dissolving the temporary restraining order, and dismissing the petition.

dismissing the petition. A writ of error from this Court was allowed by the Chief Justice of the Supreme Court of South Carolina Aug. 14 1905.

Terre Haute, Ind.—Water Works Company Holds Con-tract with City.—The following letter comes to us from Dow R. Gwinn, President and Manager of the Terre Haute Water Works Company. The statement in the "Chronicle" to which Mr. Gwinn refers was based on a recommendation of a committee of the City Council, and printed in our issue of Feb. 23, page 461, that this city build its own water plant.

THE TERRE HAUTE WATER WORKS CO.,

Terre Haute, Ind., May 1 1907. Editor Commercial and Financial Chronicle, New York City, New York. Dear Sir.—Referring to a statement recently published in your paper to the effect that the City of Terre Haute would shortly have an election to determine whether a municipal water plant shall be installed, I wish to advise that up to the present time no move has been made to call an elec-tion. Furthermore, that we have a contract with the city which does not expire until 1921. Yours very truly

DOW R. GWINN, President.

Thermopolis, Fremont County, Wyo.—Bonds Illegal.—On April 22 Judge Carpenter of the District Court declared illegal an issue of \$15,000 water bonds of this city, owing to various irregularities.

Brodhead School District (P. O. Brodhead), Green County, **Wis.**—Bond Sale.—This district recently awarded an issue of \$30,000 4% high-school building bonds to the Bank of Brodhead. Denomination \$500. Interest payable annually in February. Maturity \$2,500 yearly from 1909 to 1920 inclusive.

Bucyrus School District (P. O. Bucyrus), Crawford County, Ohio.—Bond Election.—Local reports state that an election will be held May 15 to vote on a proposition to issue \$17,500 school-building bonds. Denomination \$1,250.

Caldwell, Noble County, Ohio.—Bond Offering.—Proposals will be received until 12 m. May 25 by Hugh F. Neuhart, Village Clerk, for the \$11,000 5% coupon street-paving bonds voted on April 20. Authority Sections 2835-2837 of the Revised Statutes. Denomination \$1,100. Date May 25 1907. Interest annually on Sept. 15 at the Citizens' National Bank in Caldwell. Maturity \$1,100 yearly on Sept. 15 from 1908 to 1917 inclusive. Bonds are exempt from State tax. Certified check for 3%, payable to the Village Treasurer, is required. Bonded debt, including this issue \$43,000. Assessed valuation for 1906, \$468,462.

Camden, Camden County, N. J.-Bonds Not Sold .- No bids were received on May 6 for the \$50,000 4% 30-year registered or coupon municipal hospital and the \$150,000 4% 20-year registered or coupon paving bonds described in V. 84, p. 1066.

Calgary, Alta.—Debenture Offering.—Proposals will be received until 12 m. May 31 by H. E. Gillis, City Clerk for the following debentures.

for the following debentures.

Hudson Water District, Mass.-Bonds Proposed.-The Water Commissioners of this district seek legislative authority to issue \$50,000 water bonds.

Hugo, Josephine County, Okla.-Bond Election.-The City Council has ordered an election to be held May 28 to vote on the question of issuing \$50,000 6% water-works bonds.

Houghton, Houghton County, Mich.—Bond Election.— Local reports state that the Village Council has called a special election to vote on the question of issuing \$50,000 bonds for a sewer system in West Houghton.

Indiana.-Bond Award.-We are advised that the \$100,- $000 4\% 3\frac{1}{2}$ -year coupon live-stock-show-pavilion bonds, bids for which were received on April 29 (V. 84, p. 1068), were awarded to J. F. Wild & Co. of Indianapolis at 102.150 —a basis of about 3.345\%. In the list of bids received for these bonds as published in this column last week, there were two higher bids than that of this award, but we are informed that these contained special provisions and therefore were not considered.

Ionia County (P. O. Ionia), Mich.—Bond Offering.— Proposals will be received until 2 p. m. June 5 by Harry J. Hollbrook, County Clerk, for \$35,000 4½% poor-house bonds. Denomination \$1,000. Date Sept. 5 1907. Maturity \$7,000 yearly on March 5 from 1908 to 1912 inclusive. Certified check for \$500, payable to the County Treasurer, is required.

THE WHOLE SECRET

of the success of the AUTOMATIC TELEPHONE SYSTEM lies in the elimination of th girl operators. It cannot be denied that most of the troubles and much of the expense in the manual system (where operators are used) can be charged to the operators themselves.

TRUE ENOUGH

all operators are not faulty all the time, but some of them are at all times and all of them are sometimes. But "a chain is no stronger than its weakest link," and the average telephone subscriber judges the entire service by the poorest he has received.

IN THE AUTOMATIC TELEPHONE SYSTEM

the fallible human operator has been displaced by an infallible machine, a machine that produces perfect telephone service. With the human operator disappear her faults and ber expense. The former are many, the latter not inconsiderable.

THAT IS WHY

the AUTOMATIC TELEPHONE SYSTEM, having no operators, can produce a perfect telephone service, prompt, accurate, absolutely secret, at a much lower cost than for inferior manual service. That is why it is a profitable investment to put your money into an operating company that uses the Automatic Telephone System. Our Automatic Telephone System has been adopted in the following cities:

DIRECTORS: Royal C. Taft, Robert H. I. Goddard, Geo. W. R. Matteson, William D. Ely, William Binney, William Binney, William B. Weeden, William B. Weeden, Glibert A. Phillips, Edward D.
