The twin speeches delivered this week by the President and by Mr. Taft, his nominee for next President -heretofore the people have been accustomed to select their own candidates-these two speeches contain all of hope the present Administration, and, if Mr. Roosevelt can enforce his will, the next Administration, has to offer or will be willing to extend to the public in their distress. This dual relationship we call special attention to, because it has become at this juncture a highly important feature of the situation, one which every citizen ought to consider most seriously. If no other importance attached to it, is it not of itself a matter of deep moment how long such a state can be allowed to exist-a state which permits a chief ruling officer to choose his successor and use all the force of the Government to nominate and elect him.

At a time like the present it is especially perilous. We and those who think like us believe that a great and fundamental principle of law and equity is being violated by the existing Government through the policy it has taken upon itself to enforce, and which through the Roosevelt scheme of successorship he is preparing to perpetuate. The financial part of his policy described collectively is nothing less than a war fomented directly against capital; as it excites a fear as to the stability of the values of all our securities, and is hostile in its effect upon accumulated floating capital, it becomes an element of doubt entering into all financial international arrangements. These speeches indeed, indicated that, instead of relieving the situation, the Administration resented the suggestion of relief, and showed extreme irritation, going so far as to lay down a program to be made effectual on application to Congress by which the burden would become heavier to bear. Probably the most disturbing feature the Roosevelt policy has assumed is hostility against all corporations and their securities, especially railroad securities. These evidences of property rights, we hardly need say, are held and owned not by any means wholly by individuals in every part of the United States, but in large measure by individuals and corporations in all parts of Europe. They have found extremely rapid lodgment in more recent years in Great Britain and on the Continent, and are being used largely as a basis for international borrowing, especially short loans at times in very large amounts. These securities have been tainted by Mr. Roosevelt's actions and speeches, and have thus become an adverse factor, disturbing monetary affairs in Europe.

This, in brief, is the nature of one important phase of the disturbance in monetary affairs which Mr. Roosevelt is causing. The Stock Exchanges at the world centres of trade are merely instruments for recording with as much accuracy as possible the variations from hour to hour in the value of the certificates dealt in. The figures thus afford recorded evidence of the extent of the direct loss to the owner which has been and is taking place. But in addition to that there is a wonderfully sympathetic influence floating capital disseminates where arbitrarily dealt with which adds to the distrust, imparting a degree of gloom in all the world's markets affected and to the body of securities dealt in each. Remember, too, there is no country of the world in which a loss of credit in its securities

For these reasons such an exhibition as we have had this week of the mischief-making spirit possessing our highest officials, and the total ignorance of the simplest of money problems, must have a tendency to lessen Mr. Roosevelt's prestige in Europe if it does not here. We think he is losing ground even here. According to our view he could not carry New York State to-day. There are hosts of republicans who have been sufferers, and who have had enough of his work. The noisy people are never the majority. Besides, there will be experiences before election day arrives that will make a change a necessity.

We regret that a man of Mr. Taft's ability, heretofore so widely respected and fully capable of standing alone, has apparently accepted the position of adopting all the vagaries Mr. Roosevelt espouses with the understanding attached that he is Mr. Roosevelt's echo and is to be lifted into the President's chair by Government influences if he will endorse his chief's platform. The country can probably survive the eighteen remaining months of Mr. Roosevelt's term, though it may have to pay dearly for it. But a more serious question is-must it accept any substitute the Roosevelt dynasty offers for a succeeding four years? The inclination is to laugh when Mr. Roosevelt tells us that rich malefactors have combined to bring about financial stress for the purpose of discrediting the policy of the Government. That is so baldly absurd, so far from the truth, that only the most ignorant could be misled by it. What imparts respectability to Mr. Roosevelt's outpour of vituperative censure of the rich is not he, himself, but his props in his Cabinet. If he was deserted by the best of them, his words and purposes would be heeded as little as the vaporings of Mr. Bryan, which they so nearly resemble.

An event of the week was the export of \$1,100,000 gold to Europe. There were three consignments of the metal, the earlier of which, amounting to \$500,000, had an indefinite destination, though it was understood to be for Germany, as later, exports of \$600,000 were announced as being for that country. The fact that it was difficult to account for the shipment as an exchange operation-calculations showing that it must have been unprofitable to the shipper, unless he was reimbursed otherwise than through exchange-seemed to make it probable that the movement was in response to requirements of creditors, German bankers elsewhere than at Berlin, for the settlement of previous advances. If this should prove to be the case such requirements may soon be satisfied without making necessary the shipment of much more gold. There is, however, urgent need for the metal for the reinforcement of the reserves of the Reichsbank and it seems quite possible that if the official rate of discount of that institution shall be advanced for the purpose of attracting gold, it will be drawn from this centre.

The situation at London appears to be such as to indicate that it is confidently expected that gold will be attracted to that point from New York without the offering of special inducements by the Bank of England for its importation. The unofficial rate of discount at London has been maintained at about 5% and it is thought p obable that the official rate will be advanced next week to 5%. The Bank this week secured £300,000 out of the £400,000 Cape gold that came into the market on Monday and apparently without competition, though the India Council obtained £100,000. The market price of gold bars has been advanced 5% of a penny, to 77 shillings 97% pence per ounce, and exchange at New York on London is 4 871/2. for sight. If these advantageous conditions shall continue, and if, as the result of the firm discount rate or of an advance in the official quotation, they shall be maintained, it appears likely that gold will flow hence to London in some volume, and that the movement will not be interrupted until the Bank shall be enabled materially to augment its reserve and possibly to meet a great part of its requirements for various purposes, including the financing of the Egyptian cotton crop.

One notable feature this week was a rise of  $4\frac{1}{2}$  centimes in the rate for exchange at Paris on London, due to remittances by French bankers of funds to the British capital for employment at that centre; later in the week the rate for exchange fell one centime, to parity, and it was weak thereafter. This reaction seems to indicate that while the French bankers are disposed to invest their capital in London, they are controlling such investments so as not to contribute to the movement of gold to London.

The July statement of our international trade, remarked upon further on in this article, made such an exhibit as to account for much of the strength of exchange recently ruling; it indicated the existence of such an invisible adverse trade balance as to make it unlikely that this would turn favorable for some months. Indeed, this adverse state of our foreign exchanges will continue so long as our unsettled securities market shall be promotive of selling for European account of American share properties. The centre that is now in greatest need of our gold is London; we are more largely indebted thereto for loans than to any other centre and presumably the gold that is exported hence will be largely absorbed by London.

In view of the fact that gold exports-which the Secretary of the Treasury has been seeking to prevent through the withholding of relief to the money market in the form of public deposits-are now in progress, it would seem that such relief should be promptly extended. A liberal increase of public funds in the banks would probably be accepted as an indication of our ability to finance the commodity export movement with domestic capital without aid from abroad, and might also stimulate commercial interests, which seem to be suffering now more severely than they have been at any time heretofore through the inability of merchants to borrow even at unusually high rates; continued stress from this cause would most likely have a more unsettling effect than would obstructions to borrowing by stock operators.

The Philadelphia "Record" is inclined to make sport of us. In an article entitled "A Pitiful Wail from Wall Street," in its issue of Monday, it takes up the remarks we made last Saturday with reference to the utterances of Secretary Bonaparte and declares that the slump in the stock market has made us unusually bitter. This slump, it adds, "has also made it (the "Chronicle") what it very seldom is—foolish."

As illustrating the particular in which we have proved ourselves foolish, it declares that "it is pestilent folly to pretend that the drop in coppers and in certain enormously over-capitalized traction companies is due to anything done by the Administration, or even said by it, although Mr. Bonaparte has said several injudicious things and the President has said some things that would come better from a college professor than from the Chief Magistrate." It adds that "incomes from securities have not been affected at all, and no one expresses any fear that they will be."

This is just where our contemporary is astray. There are very grave fears that the income from securities will be affected. It is true that there have been no defaults of consequence yet, but up to date we have been banking on past conditions. Our manufacturing enterprises have been so overwhelmed with business that they have been carrying enormous unfilled orders on their books, and these orders have kept and will continue to keep, mill, furnace and factory active until they are exhausted. But new business is now coming forward only in limited volume. The railroads have been getting the tonnage incident to such unprecedented manufacturing output, and their earnings have kept up (gross, we mean) for the same reason. But when business falls off they, too, will feel the effect. Furthermore, State and nation, by new laws and regulations and restrictions, are endangering the revenues of the roads while at the same time adding to their expenses. The increases in wages and higher prices of materials and supplies are also running up operating cost. All this comes at a time when the railroads have heavier charges and dividends to meet, by reason of the new capital outlays which they have been obliged to incur. And the remark applies as well to traction enterprises as to steam railroads. Thus, any reverse in business, of which, unfortunately, the indications are multiplying, raises a very grave fear that present income from securities may not be maintained. And as a matter of fact, one important dividend reduction has just been announced, the Southern Railway yesterday afternoon having declared a semi-annual dividend of only 11/2% on its preferred stock, against 21/2% previously.

Our contemporary is also in error when it states that "it is pestilent folly to pretend that the drop in coppers. . . . is due to anything done by the Adminis-tration," &c. The States, taking their cue from Washington, have been following in the wake of the Federal Government, and the two together, in their policy of antagonism to railroad and other corporate interests, have succeeded in throwing so much discredit around securities that it is practically impossible for railroads, for traction enterprises, or for industrial undertakings to secure money for new capital needs except at forbidding terms. The result is that new construction work everywhere is being brought to a sudden halt. The copper trade is the first to feel the effects. Where a few months ago copper supplies were unequal to the demand, now the latter has almost entirely disappeared. It seems but yesterday that copper producers were getting 25@26 cents a pound for the metal. In July leading copper-producing interests, finding themselves no longer able to dispose of their product, made a sharp cut in price, with a view to attracting bidders. New prices were fixed at 22@23 cents a pound, but buyers are still holding off, and to-day

just a triffing business is being done at 18@19 cents per pound.

This absence of demand and tremendous collapse in price explain the great shrinkage in the market value of copper shares. Here, therefore, there are already pretty palpable indications of a probable reduction in "income from securities." It should be understood, too, that the demoralization of the copper trade is real and not imaginary. The Boston "News Bureau," which is exceptionally good authority on copper matters, on Wednesday contained a review of the condition of the copper trade which was gloomy in the extreme. Here are a few extracts:

Copper is accumulating at various points throughout the country, and at one place in particular—the Raritan Works of the United Metals Selling Company in New Jersey—the copper is plainly visible from the trains of either the Pennsylvania or the Jersey Central railroads. The capacity of this refinery is 20 million pounds a month. At the Lakes, copper is storing up . . . and the stocks here are variously estimated at from 15 million to 30 million pounds.

Last week prominent wire manufacturers held a meeting in New York and the concensus of opinion following the conference was that business in the last three months had fallen off 50%. The brass people state that their business has fallen off from 30 to 40%, while the sheet copper business is practically at a standstill.

Unfortunately, too, in the iron and steel trade, symptoms of the same kind are becoming manifest, though as yet these are not very pronounced. The "Iron Age" of this city, in its review this week, says that, generally speaking, the undertone throughout the iron trade is one of increased nervousness over the future. The plants are all still running under high pressure, and will do so for the remainder of this year, in order to fill orders now on the books. But there is a falling off in new business in nearly all directions, though specifications against old contracts continue very heavy and there is no indication in the finished lines of any cessation of work under way. Throughout the whole country, we are told, the buying of pig iron is from hand to mouth. Prices, it is stated, are weakening, and there is complaint that melters of iron are exhausting every pretext for canceling high-price contracts.

There is nothing very surprising in all this. Confidence has been so completely undermined that enterprise has been brought to a halt. It has been evident for some time that this would be the outcome and the only question for reasonable people to consider is whether we shall fatuously invite severe and pronounced prostration in business by denying that such prostration is possible and refusing to remove the causes responsible for it. The Philadelphia "Record" can do much to avert the impending catastrophe, and with the above facts before it we confidently count upon its co-operation to that end.

It seems that Kansas is to have a much larger wheat crop than any one thought possible only a short while ago. In June, judging from the gloomy reports at that time coming to hand, it seemed improbable that aggregate yield would exceed 40 million to 50 million bushels. The State Board of Agriculture has just given out a statement indicating a possible yield of 70,057,362 bushels. This statement is based on threshers' returns and reports from growers

and threshers giving acreage and yield of winter wheat. The improvement is based in part on a considerable increase in the area sown to winter wheat. The acreage in winter wheat is placed at 7,051,872 acres, or about 562,000 acres more than the estimate last fall, and larger by 615,000 acres than any previous season's sowings of winter and spring wheat combined. Not only does the area as officially reported exceed all expectations, but it seems also that much of the 21% earlier reported by growers as a failure, so surprisingly responded to the greatly improved conditions which followed the Board's June 4 return as to justify its harvesting, considerable of this area returning yields per acre approximating the average for the State.

This improvement, we are told, was made possible by the disappearance from infested localities of the pestiferous green lice and the development of ample moisture, abundant sunshine and favorable temperatures. It also appears that excellent conditions for ripening and in the main for harvesting have resulted in grain that will grade well, nine-tenths of the whole being reported as of "good, merchantable quality." According to the report of the Department of Agriculture at Washington (which does not always agree with the State returns) Kansas last year raised 81,830,611 bushels of wheat and the present estimate of 70,057,362 bushels for 1907 would, therefore, indicate a falling off of only about 12 million bushels. The condition of corn in Kansas is put by the State Board at only 74. Here, too, however, there may be a great improvement before harvest time.

As Mr. Roosevelt has so emphatically expressed the belief that those in control of large corporate and other undertakings are seeking to discredit his work and are placing themselves in direct antagonism to his policy. it is worth noting that quite the opposite is apt to be true. Purely as a matter of policy, such a course would be considered unwise. Recognizing this, the managers of our great corporations and the large capitalists behind them are prone in dealing with Government officials to be diplomatic rather than hostile. They know from experience that more is to be gained by a conciliatory course than by unrelenting opposition. A capital illustration of this is furnished in the recent action of the Southern Railway and other roads in vielding to the demands of the State authorities in the matter of the new State laws reducing railroad rates. The roads were entirely within their rights when they sought the protection and shelter of the Federal courts against the aggression of State legislation, but nevertheless, in view of the hostility of public opinion in those States, it was not deemed good policy to continue the conflict. Accordingly, in North Carolina, in Virginia and Alabama the roads have agreed to put the cut rates into effect, pending a determination of the controversy in the Federal courts. The Southern Railway has just issued an address to the people of Alabama setting out the reasons for its course, which is almost pathetic in the way it lays stress on this feature. The address is contained in a four-page circular, and concludes in these words: "The Southern Railway Company, while satisfied that it was proceeding in a legal and orderly way in defence of its property rights, after a careful consideration of the matter did

against this demand, but that in the interest of a peaceable and orderly conduct of its affairs, and the avoidance of angry controversy, it was performing its public duty and subserving its public uses to make this concession." And in the great majority of cases this is always the attitude of those having large interests at stake.

The United States foreign trade statement for July has been issued this week. Judged solely by the net merchandise export balance, it is the least favorable monthly showing for any month except February 1905 our foreign trade figures have made in a long time. Aside from that month (February 1905, which was somewhat exceptional), there has been no occasion since June 1897 when the imports and exports were so nearly equal as in July 1907. Furthermore the current July result is the poorest exhibit for that month, so far as trade balance is concerned, since 1895.

It is gratifying to note, however, that the present seemingly poor showing is not due to shrinkage in the aggregate value of our exports. On the contrary the total of exports for July is by comparison a very satisfactory one, recording, as it does, a noticeable increase over the corresponding month of the previous year, and a smaller decline from June than did either July 1906 or July 1905 from the preceding month of those years. It becomes clear, therefore, that the explanation for the small balance recorded is to be found in an especially full import movement, the imports of all classes of merchandise in July having reached the imposing total of \$124,764,063. This aggregate has been exceeded but five times in the history of the country, and all those occasions fall within the last fiscal year. In July 1906 imports totaled only \$102,592,449. The outward movement of goods for July this year was \$128,765,354 against \$111,693,274 a year ago, and hence the balance of exports for the month this year is but \$4,001,291, against \$9,100,825 in 1906. In July 1905 the balance was \$23,417,815the record for the month. For the seven months of the current calendar year the exports of merchandise foot up \$1,069,215,726, against \$969,536,002 last year, a gain of \$99,679,724; but imports for the like period have risen from \$739,951,779 in 1906 to \$876,-043,246 this year, an increase of \$136,091,467. Our seven months' trade balance is therefore \$36,411,743 less this year than last, standing at \$193,172,480, against \$229,584,223. With regard to the various items that go to make up the July 1907 export movement, it is to be said that almost all the important commodities show gains over the previous July, not alone in values but in quantities. In fact, cotton stands alone in recording a decline, and that is not surprising after the heavy shipments of earlier months. Breadstuffs exports have been full, making a record for July, and the same is true of provisions and of mineral oils as well. Moreover, as collectively these four items-breadstuffs, cotton, provisions and mineral oils-account for only 31/2 millions of dollars of the 17 millions increase recorded over July 1906, there remains 131/2 millions as representing the gain in other articles of export, indicating a quite favorable showing throughout the list.

On the other hand, the almost phenomenal increase in imports, as compared with the previous year, not

only in July but in recent previous months, is in great measure due to increase in values. That is a noteworthy feature. The details of the July foreign trade movement will not be available, of course, for about a fortnight. But we have only to refer to the completed statistics for the fiscal year 1906-07 to ascertain how potent prices have been in swelling import totals. By reference to that data it will be seen that advances in prices have been quite general throughout the list of imports. Chemicals, hides, goat skins, lead, some classes of iron and steel manufactures, and a number of less important commodities, came in in smaller quantities than in 1905-06, yet represented values as great or greater than then. Articles of food and drink, such as currants, cocoa, lemons, oranges, almonds, rice and tea, exhibit more or less important advances in price; copper was higher and foreign raw cotton (Egyptian, Peruvian, &c.), which is becoming an important import item, figured in the 1906-07 statistics at about 19 cents per pound, against a little over 15 cents in 1905-06. Jute records a rise from \$63 per ton to over \$85, raw silk from about \$35% to \$4 per pound and tin from 33 cents per pound to 40 cents.

We need not give further illustrations. Those furnished above are sufficient to indicate how general has been the recent advance in apparent cost of imported commodities. We say apparent cost, because it would seem that some portion of the increased values, as compared with the previous year, must represent a growing tendency to avoid undervaluation. There was a time when undervaluation was so marked and general as to provoke much comment, but the evil has been lessening year by year until now the necessity for marking up invoice values (upon appraisement) to make them conform to true market values has been reduced to a minimum. Among the articles we have referred to, however, are a number, such as cocoa, copper, cotton, jute, goatskins, raw silk and tin, that pay no duty, in which case no incentive to undervalue exists. The conclusion, therefore, is forced upon us that in great measure the gain in imports is due to the enhanced cost of the articles or to a rise in invoice valuations rather than to increases in quantity.

There was no change in official rates of discount by any of the European banks this week; unofficial or open market rates were, compared with last week, 1/4 of 1% higher at London, at Paris and at Berlin and Frankfort. It was quite confidently expected earlier in the week that the Bank of England official rate would be advanced; consequently there was an urgent demand for money in London, which caused a rise in open market discounts by Wednesday to 51/8@51/4%. The failure of the Bank to advance its rate brought about a recession in the unofficial quotation on Thursday and the improvement in the Bank condition, as shown by the statement, contributed to a more confident feeling in the market. The fact that there was no change in the Bank of England rate seemed to have a direct influence upon the situation at Berlin, which was reflected in generally higher prices for securities. At Paris, where firm rates for exchange on London had been maintained, as the result of transfers of capital to that centre for employment, the unchanged Bank of England rate was followed by a decided fall in such exchange.

The notable feature of the statement of the New York Associated Banks last week was a decrease of \$2,828,-300 in cash, which, however, was more than offset by a reduction of \$4,361,825 in reserve requirements, the result of a decrease of \$17,447,300 in deposits, so that the surplus reserve was augmented by \$1,533,-525 to \$9,294,075; loans were contracted by \$14,231,-200. The bank statement of this week should reflect, among other items, the transfer of \$150,000 to New Orleans, of \$500,000 to Chicago and of \$500,000 to San Francisco, and the shipment of \$1,100,000 gold to Europe.

The market for call money was abundantly supplied this week and the demand therefor was moderate because of the comparatively inactive stock speculation. The fact that rates for call money ruled so low as to make unprofitable the employment by trust companies of their balances with banks. on which they received an average interest of a fraction below that obtainable in the market, induced these companies to refrain from direct loaning and consequently bank balances were augmented. Time loans were, though, in urgent request, while offerings were not liberal and rates were abnormally high. Banks were unwilling to loan on time, even for brief periods, for they were in almost daily expectation of requisitions from their correspondents in the interior for money with which to move the crops. Trust companies were disposed to discriminate against industrial or even good mixed collateral by demanding excessively high rates for loans secured by such pledges and commission house borrowers generally were inclined to rely upon the call-loan branch of the market for the funds which their customers required. Consequently, very little business was reported.

Money on call, representing bankers' balances, loaned at the Stock Exchange during the week at 3% and at  $1\frac{3}{4}$ %, averaging about  $2\frac{1}{4}$ %; banks loaned at 2% as the minimum and trust companies were out of the market. On Monday loans were at 3% and at 2% with the bulk of the business at 2%%. On Tuesday transactions were at 234% and at 2% with the majority at  $2\frac{1}{2}$ %. On Wednesday loans were at  $2\frac{1}{2}$ % and at  $1\frac{3}{4}\%$  with the bulk of the business at  $2\frac{1}{4}\%$ . On Thursday transactions were at 3% and at  $2\frac{1}{4}\%$ with the majority at 21/4%. On Friday loans were at 3% and at  $2\frac{1}{2}\%$  with the bulk of the business at 21/2%. Time loans on good mixed Stock Exchange collateral were quoted at 6% for thirty, 61/2% for sixty and  $6\frac{3}{4}\%$  @7% for ninety days, 7% for four,  $6\frac{1}{2}$  @7% for five and 7% for six months. Commercial paper is unchanged at the nominal quotations of 6@61/2% for sixty to ninety-day endorsed bills receivable, 6@61/2% for prime and 61/2% and above for good four to six months' single names.

The Bank of England rate of discount remains unchanged at  $4\frac{1}{2}\%$ . The cable reports discounts of sixty to ninety day bank bills in London  $4\frac{7}{8}@5\%$ . The open market rate at Paris is  $3\frac{5}{8}@3\frac{3}{4}\%$  and at Berlin and Frankfort it is  $4\frac{3}{4}@5\%$ . According to our special cable from London, the Bank of England gained £981,749 bullion during the week and held £36,836,-630 at the close of the week. Our correspondent further advises us that the gain was due mainly to receipts from the interior of Great Britain. The de-

tails of the movement into and out of the Bank were as follows: Imports, £303,000 (wholly bought in the open market); exports, £83,000 (wholly to Singapore), and receipts of £757,000 *net* from the interior of Great Britain.

The foreign exchange market was strong this week. influenced by an urgent demand for remittance for stocks sold for London account, and, until Thursday, by expectations of a further advance in the Bank of England official rate of discount. The failure of the Bank to raise its rate caused a slight fall in exchange, but at the decline there was good buying for Saturday's steamer. There were very few commodity bills and those against grain were not in sufficient volume, to make any impression upon the market; the prospect that the export movement of cotton would be late discouraged operations in futures based upon such exports. The unsettled securities market at this centre and the probability of the continuance of these conditions, as the result of further attacks upon corporations, contributed to free selling of American securities in London and on the Continent, which selling was encouraged by the increasing tension in discounts on all the principal bourses. The engagement, early in the week, of \$500,000 gold for shipment to Europe, and the fact that its destination was not positively announced, gave rise to a report that the gold was being shipped to London and that the Bank of England was faciliattingthe movement, in which case it was thought probable that the metal would go forward in some volume. There was, however, no evidence that the Bank was, offering any inducement for the import of American gold, and it was suggested that the shipment was to Germany, where it appeared to be most urgently needed. On Saturday of last week Berlin discounts sharply advanced, indicating that efforts were being? made to compete for the South African consignment. of gold which would be due in London on the following Monday. The absence of such competition may be accounted for on the supposition that the shippers of the gold hence to Berlin later in the week, when \$600,000 was forwarded, were compensated forthe apparent loss on the consignment in order that the Reichsbank might get the gold and avoid advancing its rate of discount, which was thenthreatened.

Nominal quotations for sterling exchange are 4.84 @4 841/2 for sixty day and 4 88@4 881/2 for sight. On Saturday of last week the market was strong, and, compared with the previous day, short rose 35 points to 4 8735@4 8745 and cables 25 points to 4 8815@ 4 8820; long was unchanged. On Monday long fell 5 points to 4 8270@4 8275, short rose 30 points to 4 8765@4 8775 and cables 10 points to 4 8825@4 8830. On Tuesday long advanced 30 points to 4 83@4 8305, short fell 10 points to 4 8760@4 8765 and cables 5 points to 4 8820@4 8825. On Wednesday long rose 20 points to 4 8320@4 8325, short 30 points to 4 8790 @4 88 and cables 20 points to 4 8840@4 8845. On Thursday long advanced 15 points to 4 8335@4 8340 while short declined 30 points to 4 8760@4 8770 and cables 20 points to 4 8820@4 8830. The market was heavy on Friday at a decline of 10 points for long and of 20 points for short and for cables.

The following shows daily posted rates for sterling exchange by some of the leading drawers.

A LESSON FROM THE TELEGRAPH STRIKE.

The strike of the telegraph operators of the Western Union companies, which began on Monday, August 12, has now continued for nearly a fortnight. When it began, this labor demonstration was rather generally commented on as a sign of the times and as foreshadowing similar labor troubles elsewhere. We are so far from believing this to be true that we wish to review the episode at this time for the particular purpose of showing the altered situation in which labor stands to-day in regard to incidents of the sort.

The facts in this strike are reasonably familiar. There had been conferences and disputes between the employers and the employees, both of the Western Union and the Postal companies, which were, apparently, in a way towards compromise. On Sunday, the day before the actual outbreak of the strike, the telegraphers voted in a formal assemblage to defer action until the following Friday, conferences to be had with the managers in the meantime. This decision was in accordance with the distinct orders of the leaders of the union. For reasons which have at no time been made clear, and which so far as they have been stated are wholly immaterial, the telegra- tion which employs them. The Western Union's

### THE CHRONICLE.

phers suddenly decided on the 12th to go out in a body, with the avowed intention of tying up the telegraph service of the entire country. So far did they endeavor to carry this purpose that they called out the operators of the Associated Press, through which the news of the country is distributed-this notwithstanding the fact that they had no dispute with that organization.

They were thus placed in a position where they had broken their own expressed agreement, defied the orders of their own elected officers, and abandoned their posts on the impulse of the moment. Since then the strike leaders have submitted a synopsis of their demands; they are for arbitration in all disputes; for an eight-hour day; for a 15% increase in wages, and for equal pay to men and women in the employ of the companies. A cool assertion on the part of these same leaders that they wish to enforce Government ownership, while not at all material to the dispute, is interesting for the side-light it casts on the general question of Government control. Evidently it is the idea of these laborers that, with the Government owning and managing the industry, they would get whatever they wished in the way of wages or concessions. All things considered, this impresses us as one of the best arguments against Government ownership which has lately come before us.

The strike is not formally abandoned at the present moment of writing; but telegraph facilities have been so far restored throughout the country, and the places of the deserters have been so generally filled, that its failure appears to us to be certain. It will be remembered that in 1883 a far more formidable demonstration, so far as the spirit of the strikers is concerned, lasted exactly four weeks, and ended with the complete defeat of the strikers. We have a word to say, however, which applies more particularly to the present demonstration. With the restlessness of workers under the pressure of high prices for the necessaries of life we have abundant sympathy; this is one of the incidental misfortunes which all of us have had to bear in the extraordinary economic movement of the past few years. It is a matter of record, however, that concessions to employees of the great corporations have been most liberal from the start and that a great part of the extreme high prices for commodities and for various services has been necessitated by this very increase in the pay-rolls.

But we wish to submit the further fact that demands of this nature must, in the natural order of things, have some reasonable relation to the situation of the companies themselves. Clearly, if laborers submit such demands as would embarrass or cripple the efficiency of the companies, they would be doing themselves in the long run far more injury than benefit. The case of the telegraph companies is not altogether exceptional, and the Western Union, whose figures of earnings are before us, shows conclusively that the company's managers distinctly had no right to grant such extravagant demands for an increase in pay of its enormous force. No doubt, the idea of the average worker is that the companies which employ them are rolling in unprecedented wealth as a result of the prosperous times and high prices. They ignore the fact that this very pressure of high prices, which embarrasses the individual, embarasses also the corporastatement of earnings for the fiscal year ending with last June showed a surplus of \$171,169, comparing with \$874,520 for the preceding fiscal year and with \$1,092,781 for the fiscal year of 1905. It seems to us that such figures as these tell their own story. Even an employee must admit that the management of the corporation owes some duty to its shareholders, and when it is added that the Western Union annual dividend rate has not been increased since the panic period of 1893, the case seems fairly complete.

Further than this, the average employee is likely soon to be forced to recognize, if he does not recognize already, that the pressure of costliness of capitalwhich is the cost of living to the corporation-may possibly bring about, in some directions, a very considerable change in facilities for employment. Whether a time like this is the proper moment to hold up a company and derange its present industry for the purpose of enforcing extravagant demands, is a question which any reasonable man can answer. From many sources one hears the plain intimation that a slowing-down of trade is inevitable; and while such a slackening process is not unfavorably regarded for the relief which it will bring to the overstrained money situation, it must be manifest that its one certain result will be reduction of the present requirements of labor. That is as much as to say that a strike for higher wages represents a demand for larger concessions to labor at the very hour when labor is likely to be less needed by employers. It is a request for larger pay at the moment when companies are not only least able financially to grant it, but when they have the least inducement to yield to the stipulations.

#### THE SPEECHES OF PRESIDENT ROOSEVELT AND SECRETARY TAFT.

Quite the most remarkable part of the speech which President Roosevelt delivered on Tuesday of this week at Provincetown, Mass., at the laying of the cornerstone in commemoration of the three hundredth anniversary of the landing of the Pilgrims, was the fact that he attributed the collapse in security values to the machinations of those opposed to his administrative policy and could not see that it was the direct result of this policy. The words of the President, to which especial prominence has been given in every newspaper in the land, are as follows: "It may well be that the determination of the Government, in which, gentlemen, it will not waver, to punish certain malefactors of great wealth has been responsible for something of the troubles, at least to the extent of having caused these men to combine to bring about as much financial stress as they possibly can, in order to discredit the policy of the Government and thereby to secure a reversal of that policy, that they may enjoy the fruits of their own evil doing."

It seems almost incredible that a person of superior intelligence like the President should seriously advance such an argument. Think of men of wealth "combining" for the purpose of depreciating the market values of the properties in which they are the chief owners, and from which depreciation they must be the chief sufferers. Think of men deliberately conspiring to discredit their own possessions in the eyes of the public and doing it continuously and with such persistency and success that to-day no one will buy any considerable lot either of the stocks or the bonds parently warranting a construction favorable to

of such corporations. Men of sense, and most of all business men who have built up important undertakings, do not act in this way. They do not plan their own destruction in order to make out a case against some one else. They know too much to proceed, Samson-like, to pull the financial and business structure down over their own heads.

The newspaper accounts tell us that this portion of the remarks was added at the last moment, which suggests that possibly it did not receive careful consideration and was the outgrowth of hasty impulse. But candor compels the statement that the President has been acting all along as if he thought that the shrinkage in security values was not due to any acts of his administration, but was the work of those in control of large corporations and of "swollen" fortunes. It becomes important, therefore, to examine somewhat critically into this view of the matter.

So seriously has confidence become impaired that all through the present month the financial and security world had been looking forward to this speech at Provincetown, and also to the speech which Secretary Taft, of the War Department, made the day before at Columbus, at the opening of the politial campaign in Ohio. The hope was that these speeches would show that the seriousness of the situation had at last dawned upon the President and those of his Cabinet who are in closest touch with him. But this expectation has been distinctly disappointed, and hence the outlook remains gloomy in the extreme.

As far as Secretary Taft's speech is concerned, little need be said. It is keyed in the same tone and worded in the same plausible way as Mr. Roosevelt's own utterances. Mr. Roosevelt has evidently chosen wisely in selecting Mr. Taft as his political legatee. As with Mr. Roosevelt's own speeches, there are many passages in the address of Mr. Taft's to which even the most fastidious critic could not take exception. But just when, in an argument, the Secretary has reached the position where he is about to win our entire approval, he suddenly shifts ground and announces a conclusion at utter variance with the unanswerable arguments he has been making on the opposite side. So close is the analogy between the two men in these respects that it would be no injustice to say that Mr. Taft appears altogether in borrowed livery. He takes pains, indeed, to state that in some minor particulars he differs slightly with the President. For instance, he is not entirely sure that he would insist on a Federal license for corporations engaged in inter-State business. But this is purely a matter of detail. He argues in favor of an extension of Federal authority over railroad and other corporations, advocates adding still further to the functions of the Inter-State Commerce Commission, refers to the evils of "swollen fortunes," and discusses approvingly the graduated income tax and a progressive inheritance tax.

In President Roosevelt's speech there is nothing new except the remarks above quoted. As it happens, at the very moment Mr. Roosevelt was expressing the belief that "certain malefactors of great wealth" had, by forcing a decline in security values, sought to bring discredit upon the policy of the Government, the stock market gave a remarkable manifestation showing that it was not at all under the alleged domination of these men. Certain passages from the address apinvestment interests were given prominence in the news slips and on the tape Tuesday afternoon, and immediately the market responded by a rise of several points. The same thing happened at the time of Mr. Roosevelt's Decoration Day speech at Indianapolis. A portion of the speech on that occasion had leaked out the day before, and, being construed favorably, the market on May 29 responded with a rise of several points. Thus we see that, after all, it is the Government's policy that is affecting values, that the market is extremely sensitive to suggestions of a change in this policy, and that a sharp upward rebound occurs on any intimation or indication that the same may be altered or modified.

No one who has kept in touch with the course of events needs proof of the fact that the causes of the decline in security values are to be found in the new and radical tendencies of Government, State and national, which are finding such wide support. The President has got the impression that what the railroads and other corporations are seeking is assurance that the laws may be violated with impunity. This has given the President a fine opportunity for rhetorical display and for declaring in a spectacular way that, as far as he is concerned, there would be "no let up in the effort to secure the honest observance of the law.' No one is asking for a let up, and short shrift would be made of the corporation manager or capitalist who should voice such a demand. It is true that certain recent court actions have served to increase the feeling of disquietude prevailing, but the causes date further back than that. A very potent one of these causes has been the new legislation, both national and State, which has been enacted regarding the railroads.

This new legislation has been persistently hostile. It has taken the form of reductions in rates and vexatious and oppressive regulations for the control of the roads, and the worst of it is that the end is not vet in sight. Special bodies have in many instances been created for continuing the work of oppression. In national affairs, the Hepburn rate bill has endowed the Inter-State Commerce Commission with new and extraordinary powers. As if this were not enough, still further powers are being asked for that body. For example, Secretary Taft in Monday's speech argued in favor of giving it the right to make freight classifications for the railroads. In this State we have created two Public Service Commissions, which are already making things lively for the corporations that come under the scope of their authority. In other States the process has been much the same, as is evident from the recent controversies in North Carolina, Alabama, Virginia, Arkansas, and a host of other States.

The effect of all this is to endanger seriously the revenues of the roads, while at the same time adding greatly to their expenses. And this comes at a time when the roads are burdened with additional outlays by reason of increased wages and the high cost of materials, supplies and the numerous other things entering into the operating accounts. The Inter-State Commerce Commission has been actively at work for several months, under its enlarged powers. and has made many reductions in rates. The demand is sure to be for a great many more. Not less important, it has put into effect, dating from July 1, a revised form of accounts for the railroads. This new accounting system forbids the roads from including the management of huge industrial undertakings and

betterment and improvement expenditures in operating expenses; such expenditures must now be stated as separate items and reported entirely apart from the ordinary outlays of the road. There would be no objection to this except that this revision is contemporaneous with a renewed demand for a physical valuation of the railroads. Even Secretary Taft, in his speech, while arguing against the usefulness of such a valuation, could not get himself to come out flat-footed against the proposal.

After the valuation has been obtained, what use will be made of it? We may be sure that at least in those cases where such valuation shall prove to be less than the actual capitalization, Railroad Commissioners, State and national, will be urged to reduce rates to accord with such lower valuation. The income figures that the Inter-State Commerce Commission will obtain, with betterment and improvement outlays excluded, will, we may be certain, be used in the same way. It will be argued that the carriers have no right to pay for such improvements and betterments with moneys taken from income. Thus every agency will be employed to restrict the revenues of the roads and to cut down their profits to a point permitting only a bare return on some arbitrary valuation. Most railroad securities, both stocks and bonds, would seem to be very desirable purchases at present figures—but with these elements of doubt and uncertainty hanging over the future, no one is willing to buy even at these low figures.

Hence railroad securities now, as for the last eighteen months or more, remain under a cloud. This affects a total of over \$14,000,000,000 of securities. And the credit of the roads has become so seriously impaired that they are no longer able to borrow except on very onerous terms. At this juncture there comes the conviction of the Standard Oil Company and the infliction upon it of a fine of \$29,240,000, with the action of the Federal Judge in convening a special grand jury with the view to convicting the railroad in the same case, and presumably imposing upon it a similar huge fine. As we have previously shown, this was not a case of rebates or of intentional wrongdoing, but simply a technical violation of the law-and we are not altogether sure that on appeal it will be shown there was even a technical violation. But capital is timid and quick to draw inferences as well as to take flight, and hence it is not strange, it should be argued, that if one railroad and one large corporation for unintentional wrongdoing can be fined in such an enormous sum, the same rule and action will apply to other railroads and other corporations, with the result of a series of fines that will ultimately land both the railroads and the corporations in the hands of the Government to work out the fines, leaving little or nothing for the security holders.

This is a wholly new development since the President's speech on Memorial Day, and another new development has been the action of the Government in asking for the appointment of receivers in proceedings against trusts or combinations. This last proposition, the appointment of receivers in the interest of the Government, to operate the properties and secure their dismemberment, has met with condemnation on the part even of some of the staunchest adherents of the Administration. It would embark the Government in

would be the first step in the direction of State socialism. No wonder that the feeling of apprehension has become keen. With such a prospect ahead, the demand for industrial securities has vanished even more rapidly than that for railroad securities. Moreover, the receivership idea, when once launched by the National Government, took quick hold upon the States, and now the State legislatures are urged to enact laws providing that for any transgression receivers shall be appointed to take possession of the physical property within the State.

It might have been hoped that the securities of our street railway and traction enterprises and gas and electric-light properties would escape the general blight. But, no! They unfortunately are being subjected to similar treatment. These formerly were considered among the staunchest of investments. Now they are fast being made worthless. Consider the shrinkage in Consolidated Gas and allied properties in this State. The price of their product has been cut down, it is sought to invalidate their charters, and in every way they are being treated as outcasts, deserving of no consideration whatever. The street railways are being regulated almost out of existence, so far as concerns the interests of their owners. In this State our Public Service Commission is actively at work unsettling things. And the situation here is simply a replica of that in other States.

Add to all this the general imputation of wrongdoing against men of business everywhere; the sedulous cultivation of the idea that success in business implies dishonest business methods; the training of the batteries of abuse on those who are so fortunate as to be in the possession of accumulations of wealth; the disposition to convict the heads of corporations and leaders in business on ex parte statements rather than on legal evidence; the self-satisfaction and self-complacency of our administrative officials over the havoc they are creating; the attempt to prove offenses against the laws by a resort to pettifogging and a strained construction of the statutes and the Constitution; the fear that, even though in the end our Appellate Courts will see that substantial justice is done, before that time many concerns will be ruined by the ruthless policy of destruction being pursued; the ceaseless talk about the necessity for squeezing the so-called water out of the capitalization of our railroads and industrial enterprises; the steady trend towards socialistic ideas -these together make up an array of disturbing influences that have served to remove the last vestige of confidence remaining, so that in the business world men are now drifting about, rudderless and without compass, not knowing where they will land or how soon they may be engulfed in a fathomless maelstrom.

Is it not possible for President Roosevelt to see, therefore, that his idea that the discredit under which securities are resting is the work of those opposed to him is entirely mythical-that the trouble proceeds wholly from one source of which he is the fountainhead? If Mr. Roosevelt were correct in his notion that the discredit were the machinations of his administrative enemies, how are we to explain the fact that the State Water Supply Commission of New York last week offered the insignificant amount of \$60,000 4% bonds, and, though the offering was very extensively advertised, secured just one bid for a \$500 bond? Certainly the "malefactors of great wealth" cannot insurance directly by the State. There have been

be so all pervading in their activities as to prevent the success of such an insignificant offering as this.

The truth is, we have reached a point in the crusade against corporations and against capital where securities of every grade and description are regarded with fear and apprehension. The cause, as we have seen, is not obscure. The remedy is equally plain. It can come from only one direction. Mr. Roosevelt alone can stem the tide. Thus far, on account of the enormous volume of accumulated orders, general business has not revealed the evil effects to a great extent. But the point has at length been reached where mercantile activity can only be sustained by new business, and this latter unfortunately is now lacking. Soon there will be idleness and want; then there will be discontent. If the President does not reverse his course before the conflagration which he has started passes beyond control, his responsibility will be heavy and the consequences fearful.

#### STATE INSURANCE.

A brief article on State Insurance by Mr. Erving Winslow, in the "North American Review," is the first piece we have seen of serious, though tentative, advocacy of another socialistic innovation which has been mentioned with somewhat more frequency of late. The article is rather pessimistic in tone. The writer refers to what he calls "the dismal tale" developed in the insurance investigation of 1905 and thinks it improbable that the companies can regain confidence with thoughtful men by "any of the remedial half measures which it has been proposed to embody in legislation." He considers that the efforts "to exclude from the management the persons responsible for the evils disclosed have not succeeded in overcoming the mechanism by which these persons retain their power of control." He thinks the period of agitation for reform is to be followed by the usual apathetic reaction. As a corrective, he sees the threat of Federal control, under the extraordinary stretch of the commerce clause, and he thinks this remedy might be worse than the disease. The judicial decisions have blocked this for the moment, but he thinks it "extremely probable that a way may be successfully made to over-ride or reverse their decision." Then he cautiously leads up to the State proposition.

The "dismal tale" was dismal, not only in being enormously exaggerated and dwelling only upon defects, but in refusing also to look at the other side. The "mechanism" which the writer laments is simply the elective machinery as needlessly complicated by statute. What troubles him is plainly the success of the Administration tickets, but to condemn the elective process because one does not agree with the choice of the electors is undemocratic. "Thoughtful" men are the very ones with whom the companies are already, and justly, regaining such confidence as has been lost. A direct if not the prime cause of such evils as crept into administration was public neglect, started and stimulated by the tacit understanding that the State would look after the whole subject and relieve the citizen of all care.

So much by way of rapid comment upon his dolorous presentation. As for his remedy, a distinction must be clearly made at the outset, for the only form of State insurance which can be seriously considered is suggestions that the State should act as a sort of mediary, or as a referee or agent, or as a repository; but these must be put out of mind. State insurance means the State setting up as an unorganized insurance company; doing everything now done by private corporations; making rates and collecting premiums; becoming responsible for them; issuing its own formal contracts, binding upon the State and its credit precisely as the obligations we now call bonds. There is no half-way in the matter. Anything less and else than this formal conversion of the State into an insurance writer would be a delusion and a false pretense. So much should be made plain at the outset. Whatever else be said, State insurance is insurance by the State or it is nothing. It is to be attempted in that manner, or to be let alone.

Many years ago there was a scheme (chiefly used by one company that afterwards failed) for registering life policies at Albany. Those policies were advertised as "secured like national banknotes"—a statement which was positively untrue, for only the "reserve" was deposited, and the State did not make itself responsible for even that. No practical advantage existed in the scheme, except as an advertising device; yet the State consented, by silence and acquiescence, to a piece of deception.

The first objection to any scheme of State insurance is that the individual would demand too much. The inseparable vice of public ownership of utilities would attach to this also: As compared with the practice by private corporations, the policy-buyer would expect less insistence about the physical hazards of his particular case, its character in construction and use. the habits of the occupant, the degree of "exposure" by reason of adjacent property, and so on. If he became a claimant, he would look for sympathetic rather than critical treatment from the adjuster. Disagreeable questions about the loss sustained and the cause of the fire would be waived, according to the claimant's idea. The "valued policy" plan which legislation now persists in thrusting into the business, notwithstanding all demonstration of its inherent vice, would be pushed forward. On top of all, the citizen would expect more favorable rates than he has now, for unless insurance is to be made cheaper, and less disagreeable, why have any State insurance at all? The entire case turns, from the start, upon the assumption that a scheme backed by the public purse can or will be more favorable to the individual as an insurance buyer and a prospective claimant.

The interest of this individual as a taxpayer seems to be clearly suggested in the foregoing statement of the outsetting proposition. But if underwriting is not ably handled now, under the self-preservation of private capital, it seems idle to imagine that a State scheme could secure better handling. If agents continue to be employed, they would certainly expect at least as liberal treatment as they get now. As such a scheme would hardly cross the State boundary, the "average" experienced certainly could not be quite as favorable as under the present broader scheme. The cost of insurance, admittedly a burdensome tax now, is reducible only by better building and habits, thus destroying less property. Is there any reason to suppose that an insurance scheme which laid the guaranty directly upon the public treasury would have a more

to conditions and a more able handling than we get now, when private capital stands back of the contracts as guarantor? As for honesty of management, it must sadly be admitted that to turn from private administration to a public administration, with an increased number of places to be scrambled for, is grimly humorous rather than wise.

Turning to the life insurance side of the subject, the foregoing applies just as forcibly; we have merely to change the terms employed. The policy-buyer would have the same idea of very liberal treatment throughout. He would expect less strict medical sifting at the start; easy conditions as to paying his premiums; liberal terms on loans and surrender values; less strict inquiry into claims; and, of course, still lower rates. Why not, for otherwise why trouble the State to insure? It is an immovable fact that the great bulk of the cost of life insurance is the mortality cost; that is, the money has to be raised in order to be paid. No arrangements can mollify this. The rest of the actual doing of life insurance business consists of able medical selection; skilful investing; generally able and honest management. Whether a State scheme would or could improve upon the present "system" in any of these particulars we leave to the reader's judgment. But the law has gone farther and farther in assuming that individual trustees are not to be trusted, and so it ties their hands and there is nothing talked of, thus far, but tying the hands more and more, in investment and otherwise; would the law trust the men whom political methods had put into control of a State scheme? Would it tie their hands, or untie them? If men are so hedged about by statutory prohibition that they cannot do anything, they will surely do no wrong; but when the circle of seeking perfection through restrictive statute has been completed, we shall find ourselves back where we began: that fallible and peccable men must be trusted, if anything is to be done, and that constant vigilance instead of easy reliance upon statutes is the price of safety.

Dissatisfaction with insurance through private corporations, in either field, and schemes for amendment by transfer, are not new. Special trades (as brewing, carriage-making or tanning) have been talking for years about setting up their own mutual scheme. Cities and other municipalities have dallied with its rainbow promises, under which the wonder of using the same money for taxes and insurance premiums was sometimes to be accomplished. Certain towns in Massachusetts have been talking more about it of late years, and a quasi State scheme was also suggested this past winter. A legislative committee in Tennessee reported upon a form of pretended State insurance, only a few months ago. There was a like discussion in Indiana. In Florida, the Legislature for the second time postponed Gov. Broward's scheme of life insurance by the State, which to him looks alluringly feasible. It has also been recently threatened in the Wisconsin Legislature, but the sum of it is that the scheme is one of annual recurrence, that it gets to just about the same point, and then (at the time for commitment) the State or the municipality prudently-or timidly, perhaps, according to the view of the loudest talkers-declines to take any step. It all dissolves in talk, to return in more talk.

directly upon the public treasury would have a more favorable loss experience, a nicer adjustment of rates that "State insurance offers a security which cannot

Digitized for FRASER http://fraser.stlouisfed.org/

Federal Reserve Bank of St. Louis

be obtained through any private corporation;" or that "it may be stated as a very just and confident belief that some method of public insurance will sooner or later be adopted in the United States." There is, however, a rather growing prospect (unless the experience of some States of Europe serves to warn us off) that some scheme of workmen's liability compensation, or even of old-age pensions, may be taken up here. This is not referred to in the article before us, but it is a possibility in case the present tendency to advanced socialism continues unchecked; only a few weeks ago the subject of a civil-service pension or retirement plan came up anew in the form of the report of a committee who think they have devised something workable. Mr. Winslow's concluding sentence, that "it is perhaps to be determined very soon whether public insurance shall be done promptly and wisely by individual States, or whether it must come through yet more disastrous experiences of failure, dishonor and robbery, and perhaps by the seizure of the sovereign powers of the States by some usurpation of the General Government," is a dismal forelook which need not cause a moment's uneasiness. The indications, on the contrary, are for correction of the evils of insurance from within. A condition of this, let us clearly understand, is less interference by statute from without.

#### THE EXPRESS COMPANIES AND THE BANKS.

The proceedings which the banks, through the American Bankers' Association, have initiated against the express companies before the Inter-State Commerce Commission, for the purpose of compelling these companies to abandon what, in the bill of complaint, is called their "banking business," are not likely to come up for a hearing until the autumn. At latest advices no day had yet been assigned for the hearing. The case embodies some interesting and novel features, and when it does come up the developments will be closely watched and the outcome looked forward to with considerable expectancy.

The bone of contention between the banks and the express companies is the money order business. In undertaking this kind of business, it is claimed by the banks, the express companies are performing the functions of an organized bank without being subject to any of the restrictions and regulations of a bank, and are depriving the banks of a branch of work which belongs to them and absorbing profits that go with the business. On the other hand, the express companies contend that they cannot truthfully be charged with being engaged in banking. They issue travelers' checks and money orders, it is true, but do not receive deposits or assume any of the other functions of a bank.

The money order business of the express companies has been a gradual development. It is not difficult to perceive how it came about. Being engaged in the transportation of goods as common carriers, money was delivered to them to be forwarded and shipped. This, clearly, was one of their functions as public carriers. By and bye, instead of conveying the actual cash backwards and forwards, with the risk and danger of loss or robbery, it was deemed better to issue an order on the company's office at the town or place where the money was to be delivered. This had the paper, and the buying and selling of foreign money.

advantage, too, that the expense of the shipment of the money was avoided, thereby making it possible to sell money orders and issue travelers' credits at low terms. It is easy to see, considering the size of the country, that, in the aggregate, the profits of this business, even though done at a small margin of profit, may reach a quite large amount. It is also natural that the banks should want to secure a share of the business for themselves. It is not so clear that the express companies, in transmitting money in this way, are going outside of their proper sphere or conducting an illegitimate business. As we have already seen, if the money is actually forwarded to its destination, the companies are clearly within their rights. What law is transgressed when the companies modify this arrangement, and, at a saving of expense both to themselves and to the person wanting to transfer the money, they accomplish the same result without the actual handling of the money?

For years the matter has been discussed at banking conventions and in banking journals, and the pros and cons set forth-often with not a little ascerbity. Finally, at last year's annual convention of the American Bankers' Association at St. Louis, a resolution was passed directing the Executive Council to appoint a special committee to begin proceedings before the Inter-State Commerce Commission with the avowed intention of forcing the express companies to give up the business. In the resolutions referred to, it was charged that the express companies were illegitimately engaged in the "banking business," to the great loss and detriment of all regularly organized banking institutions, and that in the carrying on of such business, because of their dual nature as express carriers and bankers, they are enabled to make rates that prohibit regular bankers from competing for business that legitimately belongs to them. A reference is then made to the fact that, under the Hepburn Rate Law of last year the express companies have been placed under the jurisdiction of the Inter-State Commerce Commission and are now subject to the Inter-State Commerce Law. It is claimed that the companies are daily transgressing that law in carrying on their two lines of business, "which in effect rebate against each other." It was under the authority of these resolutions that a complaint was filed with the Inter-State Commerce Commission against the several express companies in June.

We have recently gone over the petition filed with the Commission with a view to seeing upon what the allegations of the complaint rest and the likelihood of success attending the effort. We should say that it is not at all clear that the Commission is possessed of the power to compel the express companies to discontinue this branch of their business. Moreover, some of the matters complained of are such that the banks themselves could apply the remedy, and an appeal to the Commission in that respect involves a curious confession of impotency. The petition points out that the American Bankers' Association is a voluntary organization, composed of over 7,500 banks and banking institutions. The occupation of its various members is declared to be that of bankers whose business, among other things, consists of the buying and selling of domestic and foreign exchange. letters of credit, drafts, bills of exchange, commercial

All of these things, it is averred, involve the shipment of money, through the medium of the express companies, with which to meet the payment of the exchange and drafts dealt in. The business of the express companies, on the other hand, as common carriers engaged in the transportation of property by continuous carriage or shipment, embraces, among other things, the carrying of gold, silver, currency, drafts, securities, and exchange between and for the banks, members of the American Bankers' Association. It is declared that the express companies, departing from the purposes for which they were organized and from their established duties and proper functions as common carriers, are engaged in the business of dealing in exchange, both foreign and domestic, in the form of money orders, letters of credit, both travelers' and commercial, travelers' checks and drafts, which is more properly the business and function of banks and .bankers.

In this way, it is charged, the express companies as common carriers are unjustly and unfairly competing with banks and bankers and subjecting the same as shippers of money to an undue and unreasonable prejudice and disadvantage. The reason of the undue disadvantage is said to be that the companies as common carriers, engaged in the express business, are themselves able to ship and transfer from point to point money with which to meet the obligations incurred by their sales of money orders, letters of credit, &c., at a cost and rate to themselves far lower than the rates and prices charged and demanded of the banks, as patrons of the express companies, for the transportation of money.

So far the allegations seem to possess direct relevancy. But the complaint goes further, and asserts that the express companies are unfairly using their powers as common carriers in order to get away from the banks the business of selling and dealing in exchange, letters of credit, &c., and are so conducting and carrying on their business as to compel the banks to make unnecessary shipments of money in inter-State commerce over the lines of the express companies for the use and profit of the companies in the conduct of their competitive business in dealing in exchange, &c. It is then charged that the express companies fail to keep on hand at all times at their various agencies cash available for the payment of the various money orders, checks and drafts issued by them. Furthermore, that the banks, "by reason of their relations with their customers, and the force of competition, are compelled to and do advance the money over their counters with which to cash the said money orders, checks and drafts of the said defendant companies, thereby furnishing and supplying capital to the said defendants with which to conduct their money order business, not only without reward of any kind, but also at a distinct loss to the banks, members of this Association, in interest, capital, clerk hire and the cost of clearance, while the said defendants in the meantime enjoy at their central offices the use of the money originally paid in and immediately shipped to said central offices in exchange for said money orders, checks and drafts when so'd."

The complaint then goes on: "And your petitioner further shows that they, the said banks, are, in addition to the loss of capital and interest so sustained, charged by and obli

at the regular rates fixed and established by said defendants for the re-shipment, through said defendants as common carriers, back to said banks, of the currency with which to replace the money so paid out as aforesaid, in behalf of said defendants, in the cashing of their various money orders, checks and drafts as aforesaid, to the further annovance, loss and unfair disadvantage of the said banks represented here by your petitioner." This, in effect, means that the banks, out of fear of incurring the displeasure of their depositors, are cashing these orders themselves, to their own detriment as contended, but now appeal to the Commission against the effects of their own acts. But what can the Inter-State Commerce Commission do to change this practice? It will not be contended that it can issue an order making it imperative for the express companies to supply the cash with which to redeem their orders, checks and drafts.

Other charges against the express companies are also embodied in the bill of complaint, and which it would seem to be beyond the power of the Commission to remedy. For instance, it is alleged that the companies underbid and undersell the banks in the business of issuing money orders, drafts, &c., in that the offices and agencies of the companies are open for much longer hours than the established customs of banks and bankers will permit; that the companies, in furtherance of their business of exchange, employ merchants, druggists and department stores, many of which are open to the public evenings and Sundays and holidays, paying such agents in many cases one-half of the charges as commissions for so selling their money orders. The further allegation is made that the express companies take actual charge of the entire shipments of large merchants "at a quoted higher rate on the purchase of their respective bills of exchange or commercial letters of credit than any bank or banker could afford to quote at the regular prevailing rates of exchange." The effect, it is claimed, is that the express companies "by such overbid and overpayment unreasonably waive and rebate much of their established rates or shipping charges as common carriers, in order thus to unfairly and illegally compete with the established business of the banks and bankers."

It is argued that the principal element that enters into and regulates and controls the price charged by banks and bankers, outside of their slight margin of profit and the loss of interest in the sale of exchange, is the cost of shipping the money with which to meet the obligations so incurred, which cost of shipping and transportation of money is regulated and controlled by the express companies, "whose services as carriers the banks and bankers are usually obliged to employ because of the superior advantages of safety and dispatch that transportation through said express companies offers."

The final averment is as follows: "By being able to transport and carry money for themselves, as aforesaid, at practically no cost or expense to themselves, and by forcing and compelling the said banks, represented by this Association, to furnish free the capital with which to cash the said money orders, checks and drafts of the defendants, and then charging them for re-shipping the money with which to replace that so paid out as aforesaid by the said banks, and in many other ways herein above set forth, the defendants are to pay to the said defendants, thereby enabled to unfairly and unjustly compete

[VOL. LXXXV.

with the banks and bankers, members of this Association, and underbid and undersell the said banks and bankers in the sale of exchange, both domestic and foreign, drafts, letters of credit, bills of exchange and commercial paper, and in the buying and selling of foreign money," &c.

To the layman it does not seem that the banks have a very strong case, and it will be interesting to see what disposition of it the Inter-State Commerce Commission makes. There are those who claim that it would be by no means an advantage to the community to drive express companies out of the business without providing a satisfactory substitute. As such substitute, it is feared small individual banks scattered all over the country would not answer. But it is not needful to discuss that aspect of the matter here. After so much and prolonged discussion, it is well that the question of the rights of the express companies should in this manner be tested before the Inter-State Commerce Commission, and the matter finally and definitely settled.

#### IITEMS ABOUT BANKS, BANKERS AND TRUST CO'S

-The public transactions in bank stocks this week were imited to the sale at the Stock Exchange of two lots aggregating 40 shares. Seven shares of trust company stock were sold at auction.

-According to the "Hartford Courant" the State Treasurer of Connecticut is sending out to those interested a circular relative to the new law affecting private banks. A copy of the Act is given, accompanied by the following ex-

planation:
Chapter 86, Public Acts of 1907, makes it the duty of private bankers to deposit a bond for \$10,000, or securities of like amount, with the Treasurer as a pre-requisite to the transaction of business within this State. Such deposit must be to the acceptance of the Treasurer.
If a bond is deposited, the surety mdst be some surety company duly guthorized to do business in this State and on a form furnished or approved by the Treasurer.
If securities are deposited, the deposit must be in notes secured by a first mortgage on approved real estate in this State, and such notes and mortgaged, must be assigned and transferred to the Treasurer for the purposes of the Act. Bonds of ralload companies or municipal bonds, approved by the Treasurer, may be deposited as well as notes secured by mortgage.
If the deposit consists of interest-bearing securities, such interest will be paid to the banker making the deposit, stating the bond or securities deposited.

-The Mutual Life Insurance Company of this city, which, in common with the Equitable Life Assurance Society, has been divesting itself of bank and trust company stocks in compliance with the insurance laws, is considering offers for the disposal of its interest in the United States Mortgage & Trust Company. It was reported this week that its entire holdings of stock in the latter company, of which the par value is \$1,073,600 and the net market value January 1 1907 \$4,831,200, were to be taken over by a syndicate headed by George M. Cumming, President of the United States Mortgage & Trust. It appears that negotiations to that end have been in progress, but the sale has not yet been definitely concluded. It will be remembered that negotiations were last week said to be under way for the acquisition of control of the United States Mortgage by interests in the Bankers' Trust. It since transpires that it was the interest of the Mutual which the Bankers' Trust's representatives had sought to acquire.

-Secretary Hanhart of the Savings Bank Section of the American Bankers' Association has issued the program which is to be presented at the annual meeting of the section, to be held at Atlantic City on Tuesday, Sept. 24. The convention will take place in the Marlborough-Blenheim Hotel, the order of exercises being as follows:

Meeting called to order by President Latimer at 10 a.m.

Prayer. Address of Welcome by Judge Adrian Lyon, President Perth Amboy Savings institution, Perth Amboy, N. J. Annual Address by the President. Report of Chairman of Executve Committee. Report of Secretary. Report of Committee on Printed Forms. Report of Committee on Joint and Trust Accounts.

Report of Committee on Auditing. Andress: "Savings Bank Insurance," by Alfred L. Altken, Treasurer Worcester County Institution for Savings, Worcester, Mass. Address: "Postal Savings Bank," by P. LeRoy Harwood, Treasurer Mariners' Savings Bank, New London, Com. Address: "Uniform Laws for Savings Banks in the Various States," by W. R. Creer, Sceretary Cleveland Savings Banks in the Various States," by W. R. Creer, Sceretary Cleveland Savings Banks in the Various States," by M. R. Creer, Sceretary Cleveland Savings Banks," by Edward T. Perine, Treasurer The Audit Company of New York. Address: "Deposits Received Evenings," by W. M. Kern, Secretary Pollar Savings Bank, New York. Address: "Review of 1907 Legislation Affecting Savings Banks," by Thomas B. Paton, Counsel for the Savings Bank Section. Mominations and Elections. Installation of Offleers Elected. At the comming meeting if is more and the house the

At the coming meeting it is purposed to have a complete exhibit of all advertising matter used by the savings banks in the United States. To this end the members have been requested to forward to the Secretary's office, at 31 Nassau Street, this city, a double set of all such advertising matter used by them. One set will be displayed at the headquarters at Atlantic City and the other will be placed on file in the New York office, with the ultimate view of dividing and compiling it in registers, and possibly, later on, reproducing and publishing it.

-The suspension of the firm of Mills Bros. & Co., of 71 Wall Street, this city, was announced on the floor of the Stock Exchange on Thursday. The firm was organized in September 1905 and is composed of S. Frederic Mills, J. Harry Masson Jr. and Philip O. Mills, the last-named the Exchange member, who was admitted in May 1905. The failure is considered an unimportant one, and is generally attributed to the inability of customers to respond to the call for more margins and to some trouble with the account of Richard Canfield, who is reported to have conducted large dealings through the firm. The liabilities are said to be between \$100,000 and \$200,000, the principal asset being the New York Stock Exchange seat. Edward Harding, of the law firm of Campbell, Harding. & Pratt, has been appointed assignee.

-Arthur A. Housman, head of the Stock Exchange firm of A. A. Housman & Co. of this city, died on Wednesday after a few days' illness. Mr. Housman entered the financia district as a clerk shortly after attaining his majority. He later became a member of the firm of Burrell & Housman, which was succeeded by the firm of A. A. Housman & Co. Mr. Housman had been a member of the Stock Exchange since 1890. He was in his fifty-second year.

-A shortage of \$12,076 in the accounts of Cashier Robert H. Gill of the Stapleton National Bank of Stapleton, Staten Island, was announced on Saturday last. It is stated that the full amount of the shortage has been made good by the directors, who are expected to be reimbursed by the surety company in which the defaulting Cashier was bonded to the extent of \$15,000. The latter has been placed under arrest to await the finding of the Grand July. The bank has a capital of \$100,000 and surplus and profits of over \$47,000.

-David S. Drake, Cashier of the First National Bank of Corning, N. Y., died on the 17th inst.

-The National City Bank of New Rochelle, N. Y., has issued invitations to a private opening on Thursday next, from 4 to 7, of its new bank building, 25 Main Street, corner Lawton Street.

-A certificate of incorporation was granted on Wednesday to the projectors of the Liberty Trust Company of Boston, which is to be organized with a capital of \$200,000. This is the institution which it was originally intended to designate the Pilgrim Trust. Its incorporators include B. M. Fernald, W. S. Littlefield, G. B. Mason, W. G. Russell, J. Wilson, M. O. Adams, G. H. Barrus, B. A. Robinson and A. W. Flint.

-It is stated that the Rockland Trust Company is being organized in Rockland, Mass., to take over the business of the First National Bank. The company is to have a capital of \$100,000 and a surplus of \$20,000.

The Glass City Union Deposit Bank is in process of organization in Jeannette, Pa. The projected institution is to be opened about Sept. 1 in temporary quarters at 210 Clay Avenue. The capital is \$50,000 in shares of \$50. William H. Frank (formerly Cashier of the Jeannette National Bank, lately absorbed by the Jeannette Savings & Trust Company) is to be Cashier of the new bank.

-A dividend of 16%, \$155,000, is reported to have been paid this week to the creditors of the City Savings Fund & Trust Company of Lancaster, Pa. The institution suspended in January 1905.

-John W. Woodland, President of the Farmers' Trust, Banking & Deposit Company of Baltimore, died on the 21s1 inst. He was fifty-seven years of age.

-David E. Evans, Vice-President of the Old Town National Bank of Baltimore, Md., and President of the Baltimore Electric Co., died on the 15th inst.

—The Ohio Savings Bank & Trust Company of Toledo has removed to its new quarters in the Ohio Building, corner Madison Avenue and Superior Street. The fittings of its new banking home—both the decorations and furnishings are said to be in excellent taste, and the equipment in its entirety of the most attractive and up-to-date type. The main banking room, with the trust, bond and real estate departments are situated on the first floor. In the basement the bank has its safe deposit vaults, private rooms for the accommodation of those having boxes, and a room for the directors' use.

-The Guardian Savings & Trust Company of Newark, Ohio, has been incorporated with \$100,000 capital and \$10,000 surplus. It is stated that the stock has been issued with the understanding that the institution may be converted into a national bank at the option of the shareholders. The incorporators are W. W. Gard, W. W. Davis, F. E. Corkwell, R. S. Wyeth and C. L. Flory.

—A new banking institution has been organized in Jackson, Mich., under the name of the Central State Bank. It has a capital and surplus of \$125,000—\$100,000 representing the capital—and will be under the management of H. R. Page, President, and Frank E. Palmer and Hugo C. Loeser, Vice-Presidents.

—The Four Per Cent Savings Bank of Chicago, which received permission to organize early in July, has closed its offices at La Salle and Madison streets. James S. Mather Jr., the President, states that "the bank has not failed or gone out of business." He announces that he has moved the office to the Schiller Building until the fall, when, he declares, the bank will open for business in earnest. It is understood that Mr. Mather has experienced difficulty in obtaining the capital necessary to finance the undertaking.

-J. Herman Belz has been chosen as the President of a new St. Louis banking concern, the organization of which is being perfected under the name of the Farmers' & Merchants' Trust Company. The institution will locate at Grand and Gravois avenues and will have a capital of \$100,000.

-The report of the temporary receivers of the Exchange Bank of Macon, Ga., which suspended July 7, was presented to the stockholders of the institution on Monday the 19th inst. It shows total resources of \$1,431,839 (of which \$156,790 is given as doubtful and \$235,476 as bad) and liabilities of \$1,440,340-a deficit of \$8,500. This is stated to be entirely independent of the loss of the \$500,000 capital and the surplus. The Macon "Telegraph" points out, however, that the report is a very stringent one, and that if it is changed in any way, it will be for the better. There is, it states, strong probability that the deficit will be covered and a little left over when the final settlements have been made. The reason given for the difference between the present report and the preliminary report of a month ago is the inaccuracy of the bank's books. The temporary receivers report a fund on hand of \$144,000, which will be distributed in a dividend of 20% to the depositors after Sept. 2. Judge Cordele on Tuesday last appointed R. J. Taylor, President of the American National Bank of Macon, B. P. O'Neal, Vice-President of the Fourth National Bank of Macon, and Campbell T. King permanent receivers of the Exchange Bank.

-It is reported that it has been decided to increase the capital of the First National Bank of Spartanburg, S. C., from \$200,000 to \$500,000.

-The Central National Bank of Los Angeles, Cal., which was formed to take over the commercial deposits of the Central Bank and the State Bank & Trust Company, began business on the 12th inst. The new bank has a capital of \$200,000. A list of its officers will be found in our issue of July 27. As stated therein, the savings deposits of the State Bank & Trust Company have been taken over by the newly organized Central Trust Company, which also commenced business on the 12th inst.

-The Oregon Trust & Savings Bank of Portland, Oregon, failed to open for business on Wednesday. According to a possibly even a higher rate. Up to the present, though

notice posted by the directors, the closing is ascribed to the inability to realize on securities. Another notice states that the bank has been closed by order of the Circuit Court for Multnomah County, Thomas C. Devlin being appointed receiver. The institution has a capital of \$100,000; it also reported a surplus of \$50,000.

On the 1st inst the officers of the bank which has just suspended effected the organization of a new Federal institution under the name of the National Bank of Commerce. The capital of the latter was to be \$250,000. The selling price of the stock had been fixed at \$120 per \$100 share, thereby giving a surplus of \$50,000. The middle of September had been set for opening time of the new bank. W. H. Moore, President of the Oregon Trust & Savings Bank, was slated for the presidency of the National Bank of Commerce. Advices from Washington, however, under date of August 22, state that the Comptroller of the Currency has stopped the proceedings for the organization of the proposed institution.

-The capital of the State Bank of Utah, at Salt Lake City, Utah, has been increased by authorization of the shareholders from \$250,000 to \$300,000. The bank has also added \$50,000 to its surplus, making the latter \$150,000. The par value of the shares is \$100 and the selling price from \$202 to \$204. The new stock will participate in the next quarterly dividend, payable October 15. The bank is now paying 3% per quarter. On July 15 the deposits of the institution were \$1,760, 109, its resources amounting to \$2,234,971.

#### Monetary Commercial English News

#### (From our own Correspondent.)

London, Saturday, August 10 1907.

Business continues as slack as ever. Monday was a Bank holiday, and the Saturday before the Stock Exchange was closed. Moreover, we have now entered upon the holiday season, when most people who can afford it are leaving town. The attendance at the Stock Exchange, therefore, is small, and is likely to grow smaller as soon as grouse shooting begins. Under any circumstances, then, after so long and so painful a liquidation, business would be likely to be exceedingly stagnant. It is made more so, however, by the fresh fall in New York this week. The American market has been so much more active than others for a long time past that it now dominates the whole Stock Exchange, and when a fall takes place there it increases depression elsewhere.

Moreover, the troubles in Morocco have a depressing effect. Nobody believes that there will be a quarrel between France and Germany, firstly, because everybody is sure that the French Government will be exceedingly cautious; and, secondly, because Germany knows that she is more or less isolated, and she is not likely therefore to pick a quarrel unprovoked. But though a disturbance of the peace is nowhere apprehended, there are fears that unpleasant incidents may arise; that there may be more or less angry comment in the German press respecting the doings of France and Spain, and therefore cautious people feel that it would be well to walk warily until something like order is restored in Morocco.

In Paris the massacres at Casablanca and the bombardment of that town have helped to depress business. Yet they have not created any serious fall. The truth is the French public desires eagerly that nothing should be done to give occasion to Germany to interfere. France is so profoundly desirous of peace that even to restore order in Morocco she is unwilling to give occasion for anything even approaching to strained relations.

In Germany trade continues as active as ever, but the bourses are stagnant and prices are declining. Speculation, in short, is almost at an end. The last week of July saw a further large increase in the note circulation of the Imperial Bank, so that the Bank once more had to pay duty on a portion of its note circulation. In the month of July this is unusual, and the inference is very generally drawn that, once harvesting begins, money will flow out from Berlin to the interior; that therefore rates will become stiff; and that before the end of September there may be a 7% rate, possibly even a higher rate. Up to the present, though there has been a considerable decline in quotations, there has been no very great fall Whether we are about to see a material fall there is much difference of opinion.

The Board of Trade returns for July are again highly satisfactory. The value of the imports shows an increase for the month of £3,605,505, or 7.4%, and for the seven months an increase of £31,428,379, or 9%. The value of the exports of British and Irish produce and manufactures shows an increase for the month of £7,009,369, or 21%, and for the seven months an increase of £32,733,322, or 15.3%. The value of the re-exports of foreign and colonial produce shows an increase for the month of £1,328,966, or 21.9%, and for the seven months of £8,459,340, or 16.7%.

Money is easy, but the best opinion is that money will be scarce and dear during the autumn, and that if any occasion arises the Bank of England will act with decision. The present ease is due to the utter absence of speculation. Trade is exceedingly good. Indeed, in the manufacturing districts money can be employed to almost any amount at good rates, but in London and generally throughout the south of England there is exceedingly little demand. The apprehension is that very soon a demand for gold will arise in New York. It is generally recognized that the shipments to Holland this week are abnormal. As soon as the moving of the crops begins, the prevalent opinion is that money will become so dear and scarce that a demand for gold upon London will spring up. Furthermore, the Imperial Bank of Germany decidedly needs an increase in its gold holding. It may be a ble to obtain a portion of the metal from Austria-Hungary, and it may be able to receive a larger portion from Russia. It is not considered likely that it can obtain much from London, for Germany unquestionably is indebted to this country. However, if there should be a demand from any quarter the Bank of England is expected to act with promptness, and it is quite possible that an advance in the official rate will be needful in the early future. [The rate was advanced from 4 to 41/2% on Aug. 15.—Ed.] The India Council offered for tender on Wednesday 40 lacs of its bills, and the applications exceeded 305 lacs, at prices ranging from 1s. 4d. to 1s. 4 1-16d. per rupee. Applicants for bills at 1s. 4 1-32d. per rupee and for telegraphic transfers at 1s. 4 1-16d. per rupee were allotted about 76% of the amounts applied for. The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last four years:: 1907. 1906. 1005. 1904. 1903. It may be a ble to obtain a portion of the metal from Austria-

Statement of New York City Clearing-House Banks.— The following statement shows the condition of the New York City Clearing-House banks for the week ending Aug. 17. It should be distinctly understood that as to all items except capital and surplus the figures are the averages of the daily results, not the totals at the end of the week. In other words, in reporting loans and deposits and holdings of specie and legal tenders, the practice is to take the aggregate of the amounts for the several days of the week and divide this aggregate by the number of days.

#### We omit two ciphers (00) in all cases.

a Including for Boston and Philadelphia the Item "due to other banks" and also Government deposits For Boston these Government deposits amounted on Aug. 17 to \$2,695,000; on Aug. 10 to \$2,691,000.

Imports and Exports for the Week.—The following are the imports at New York for the week ending Aug. 17, also totals since the beginning of the first week in January: FOREIGN IMPORTS AT NEW YORK.

For the week.	1907.	1906.	1905.	1904.
Dry Goods General Merchandise	\$3,847,668 18,540,598	\$3,583,983 12,652,630		
Total	\$17,388,266	\$16,236,613	\$12,687,737	\$11,635,982
Since January 1. Dry Goods General Merchandise	\$121,497,757 444,877,357	\$102,305,511 379,591,622	\$88,117,283 350,640,228	\$75,687,174 298,876,843
Total, 33 weeks	\$566.375.114	\$481,897,133	\$438,757,511	\$374.564,017

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Aug. 17 and from Jan. 1 to date.

	1907.	1906.	1905.	1904.
For the week Previously reported	\$12,479,789 384,172,766	\$11,836,437 380,834,247	\$10,389,916 324,653,624	\$7,979,410 296,087,799
Total, 33 weeks	\$396,652,555	\$392,670,684	\$335,043,540	\$304,067,209

The following table shows the exports and imports of specie at the port of New York for the week ending Aug. 17 and since Jan. 1 1907, and for the corresponding periods in 1906 and 1905:

EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

	Ex	ports.	Im	ports
Gold.	Week.	Since Jan. 1	Week.	Since Jan. 1
Great Britain France Germany		\$12,376,086 15,206,499		\$2,540,353 717,087 1,155,297
West Indies Mexico South America All other countries	\$6,000		\$9,982 3,840 59,549 1,139	311,262 173,810 1,769,891
Total 1907 Total 1906 Total 1905		\$32,109,683 5,809,504 37,700,987	\$74,510 157,900 55,244	\$6,889,141 49,496,644 6,446,454
Silver. Great Britain France Germany West Indies Mexico South America All other countries.	3,027	2,246,000 6,555	16,950 17,743 1,088	\$2,259 2,270 158 116,346 719,696 592,004 10,442
Total 1907 Total 1906 Total 1905	1,124,385	34,418,310	\$35,781 73,420 45,961	\$1,443,175 1,536,703 2,262,502

Of the above imports for the week in 1907, \$2,158 were American gold coin and \$950 American silver coin. Of the exports during the same time \$55,000 were American gold coin and \$2,750 were American silver coin.

We shall be pleased to mail investors copies of the ninth edition of our 10-page circular describing 65 Short-Term Notes and Collateral Trust Bonds with approximate market prices.

\*\$27,797,300 United States deposits included, against \$27,795,800 last week and \$10,179,900 the corresponding week of 1906. With these United States deposits eliminated, the surplus reserve would be \$16,243,400 on August 17 and \$14,709,500 on August 10. • Note --Returns of separate banks appear on preceding page.

Note --Returns of separate banks appear on preceding page.
Note --Returns of separate banks appear on preceding page.
Foreign Exchange. — The market was generally strong this week, influenced by an urgent demand for remittance and by a scarcity of bills; the tone was easier at the close. Exports of gold to Europe, \$1,100,000.
To-day's (Friday's) nominal rates for sterling exchange were 4 84@4 84½ for sixty day and 4 88@4 88½ for sight.
To-day's (Friday's) actual rates for sterling exchange were 4 8325@4 8335 for long, 4 8740@4 8750 for short and 4 88@ 4 8810 for cables. Commercial on banks 4 8265@4 8275 and documents for payment 4 82¼@4 83¾.
To-day's (Friday's) actual rates for Paris bankers' francs were 5 20@5 19¾a for long and 5 16¼h@5 16¼a for short. Germany bankers' marks were 94¾@94 7-16 for long and 95 1-16d@95 1-16 for short. Amsterdam bankers' guilders were 40 24@40 26 for short.
Exchange at Paris on London to-day 25f. 18c.; week's range 25f. 23½c. high and 25f. 18c. low.
The week's range for exchange rates follows:

	Long		Short		-Cables
Sterling, Actual— High4 8335 Low4 8270	@ 4 8340 @ 4 8275	4 8790  4 8735	@4 88 @4 8745	4 8840  4 88	@ 4 8845 @ 4 8810

Amsterdam Banker High Low					
Less: a 1-16 of 19	%. d 1-32 of		2 of 1%.		

The following were the rates for domestic exchange on New York at the undermentioned cities to-day: Savannah, buying, 50c. per \$1,000 discount; selling, 75c. per \$1,000 premium.

Charleston, selling, \$1 per \$1,000 premium. New Orleans, bank, \$1 per \$1,000 discount; commercial, 75c. per \$1,000 discount. Chicago, 50c. per \$1,000 discount. St. Louis, 40c. per \$1,000 discount. San Francisco, 30c. per \$1,000 premium

premium. State and Railroad Bonds.—No sales of State bonds have been reported at the Board this week. The market for railway bonds has been dull and the ten-dency of prices steadily downward. The daily transactions have averaged less than \$1,000,000, par value, while there has been a more general and precipitous fall in prices than has recently occurred. The probable cause of this decline is referred to above and remains in force. Some of the industrial issues seem to have yielded most readily to the influence noted, including Distilling Securi-ties, Colorado Industrial, American Tobacco and Westing-house. Third Avenue con. 4s have been under special pressure, which carried them down 9 points, and Interboro-Metropolitan 4½ s are nearly 4 points lower than last week. United States Bonds — Sales of Government bonds at the

**United States Bonds.**—Sales of Government bonds at the Board are limited to \$1,000 3s, coup., 1908-18, at 102. The following are the daily closing quotations; *for yearly range* see third page following.

	Interest Periods				Aug. 21	Aug. 22	Aug. 23
2s, 1930	Q—Jan Q—Feb Q—Feb Q—Feb Q—Feb Q—Feb	$*1051_{2}$ $*1021_{2}$ $*1021_{2}$ $*1017_{8}$ $*1265_{8}$ $*1263_{4}$	*10512 *10232 *10232 *10232 *10178 *12658 *12634	$*1051_{2}$ $*1023_{2}$ $*1023_{2}$ $*1023_{2}$ $*1017_{8}$ $*1265_{8}$ $*1263_{4}$	*1051/2 *1023% *1023% *1017% *1261/2 *1261/2	*1051/2 *1023/8 *1023/8 *1017/8 *1263/2 *1263/2	*10512 *10238 *10258 *10178 *12612 *12612

\* This is the price bld at the morning board; no sale was made

Railroad and Miscellaneous Stocks .- The downward movement which has been so conspicuous a feature of the stock market for some time past reached a temporary halting-place near the close last week, and there has been a steady recovery from the low quotations then noted until to-day. This recovery was, however, of a sluggish character, of meagre proportions and has been almost wholly lost in to-day's rather sharp decline.

rather sharp decline. Among the exceptionally strong features of the upward movement were Reading, Great Northern, Northern Pacific, Union Pacific and North West. As an offset to this, several issues have been conspicuously weak. Third Avenue shares sold last Friday at 78 and to-day at 56½, as against 123 during the current year. Inter.-Met. preferred has declined 61/2 points within the week, the common nearly 3, closing at 8, and General Electric closes with a loss of 41/2 points. Other active issues generally close with a small net gain. For daily volume of business see page 459. The following sales have occurred this week of shares not represented in our detailed list on the pages which follow:

### Investment and Railroad Intelligence.

### RAILROAD GROSS EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from July 1 to and including such latest week or month. We add a supplementary statement to show the fiscal year totals of those roads whose fiscal year does not begin with July, but covers some other period. The returns of the street railways are brought together separately on a subsequent page.

Net Earnings Monthly to Latest Dates.—The table fol-lowing shows the gross and net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the issue of July 20 1907. The next will appear in the issue of August 31 1907.

x After allowing for other income received.

<sup>x</sup> After allowing for other income received. BROOKLYN RAPID TRANSIT CO.—Owing to the re-classification of the lines of the Brooklyn Rapid Transit system and the cancellation of the lease of the Brooklyn Elevated RR. to the Brooklyn Heights RR., and also the leases of some of the other roads, the results for the elevated road are now reported separately and likewise those of the South Brooklyn Ry. and the Sea Beach Ry. This obviously makes the comparison with last year for the Brooklyn Heights RR. defective. The new-arrangement has been in effect since Feb. 28 1907. The returns of the different roads for the June quarter have been furnished this week. In the following we show the figures of the Brooklyn Elevated, of the South Brooklyn Ry., of the Sea Beach Ry. and of the Brooklyn Heights RR. separately and the total of the four combined. In this last case it is possible to compare with corresponding figures for 1906. We also add the compara-tive totals for the twelve months ending June 30.

Surplus over preferred dividends · Special appropriations for improve-ments, betterments and charges against income 536 334 999,827 1,056,549 \$253,987 \$1,229,239 \$1,095,083 Balance to credit profit and loss\_

 $\overline{a \, A}$  dividend of 1½% has been declared payable Oct. 1, calling for \$900,000, out of accumulated surplus, making 4% for the year—see item on a following page.

Special appropriations for improvements, betterments and charges against income are for new stations and other buildings, new bridges, additional equipment and miscellaneous improvements.

Increased expenses include: Increase in maintenance of way, \$537,812 91, or 7.55%; increase in maintenance of equipment, \$987,590 24, or 11.50%; increase in conducting transportation, \$3,130,659 78, or 15.04%; and increase in taxes, \$131,697 84, or 8.79%. The increase in conducting transportation is due chiefly to increased pay-rolls of train-men, yard and station labor and to the congestion of traffic. --V. 85, p. 406.

#### Easton (Pa.) Consolidated Electric Co.

(Report for Fiscal Year ending Dec. 31 1906.)

In the report issued some time ago President Joseph S. Lovering said:

In the report issued some time ago President Joseph S. Lovering said: Since your property was surrendered by the receivers of the Lehigh Valley Traction Co. in May 1904, the work of reconstruction, additions and betterments thereto has steadly advanced. In order to take care of the increased travel in Easton, we deemed it advisable to introduce a 10-minute schedule in place of the 15-minute service which had prevailed since 1892. For this purpose two new switches were constructed on the College Hill Division and the loop in Centre Square was completed. The 10-minute service on this division was introduced June 2 1906. On the Easton & South Easton Division a new double-track line was built on Northampton St. from 6th to 15th streets, new single track on 17th St. from Washington to Builer streets, new single track on Builer and Walnut streets from Washington to 17th streets, and new single track on St. John St. from Madison to Nesquehoning St. With the construction of this additional trackage and the elimination of the "Y" on the south side, the running time per round trip was reduced from 60 to 40 minutes, thereby enabling the company to give a 10-minute service. The new ser-vice was introduced on this division Sept. 6 1906. The Advan and Vulcanite Portland Cement Works and has a population of about 3,500. The opening of this extension has materially increased the receipts of the South Main St. Divesion. Extensive additions and improvements were made during the year at Island Park. The park was open from May 12 to Sept. 30; attendance 266,600, being an average day attendance of 2,582. To take care of this stravel. 24 cars were in operation. The Easton A South Pain St. Divesion a large number of ties wormpleted. The plate girder bridge over the Easton & Northern RR. Track was reinforced. The Easton A South Bethelherm Transit Company's line (Y. 84, p. 1307). Wich is now in course of contruction, will, when completed and in opera-

tion, give direct service between Easton, Freemansburg, Shimersville, Northampton Heights, Bethlehem Steel Works and South Bethlehem. The line will be a little more than 12 miles in length, and has been under way since May 1906. The line between Easton and Freemansburg, at which point it connects with our present track, will be ready for operation about May 1.
The claims of your company against the receivers of the Lehigh Valley Traction Co. were, after careful consideration, settied by a compromise, your company receiving \$37,500 in cash and 478 shares of stock in the Pennsylvania Motor Co. (one of your constituent lines). This stock, together with 20 shares purchased in the market, gives your company complete ownership of the Pennsylvania Motor Co.
Notwithstanding the increased pay granted to your employees, your constituent companies have shown a steady increase in earning capacity during the past faceal year, which has fully justified the large expenditures for the reconstruction of, and additions and betterments to, your property, and the outlook for the coming year is very favorable.
The amount expended for additions and betterments was \$102,737, the chief items being:
Buildings, paths and lighting system, Island Park.
\$15,376
Seven new 20-ft, solid vestibule closed car bodies; five second-hand 8-bench trail cars.
\$1,966
New double track, Northampton St. from 6th to 15th Sts.
\$1,977

#### American District Telegraph Co. of New York.

(Report for Fiscal Year ending Dec. 31 1906.)

In the report, issued early in the year, President Robert C. Clowry says:

While dull periods in Wall Street were reflected in the earnings, the busi-ness of the company averaged well for the year, as is shown by the advance of \$9,949 over the increase of \$32,633 of the previous year. I repret to say, however, that an increase in the compensation of messengers, necessitated by prevailing local labor conditions, caused an increase of over \$25,000 in the messenger expense. This increase is in part reflected in the increase of \$19,403 in the total expense. The cost of wiring new buildings, installing additional call-boxes, &c., was \$12,793, and as usual was paid out of earn-ings, and the amount is included in the expenses for the year.

Consolidated Cotton Duck Co.

#### (Report for Half-Year ending June 30 1907.)

The following is an official statement:

The following is an official statement: A meeting of the directors of the Consolidated Cotton Duck Co. and of the Mt. Vernon Cotton Duck Co. was held in New York on Aug. 16 at the office of the J. Spencer Turner Co. The semi-annual statement of the Consolidated Cotton Duck Co. for the six months ending June 30 1907 was submitted, showing net earnings from operations for the six months of \$632,383, an increase of \$1,583 over the same period of last year, this being the largest six months' period of the company in its history. President Oliver submitted his report for the past six months and pointed out the prosperous condition of the company in its various departments. The directors declared the usual semi-annual dividend of 3% on the preferred stock, payable on Oct. 1. The directors of the Mt. Vernon-Woodberry Cotton Duck Co, also authorized the payment of 1½% semi-annual interest on the lincome bonds of that company. The directors of the J. Spencer Turner Co. also held a meeting, at which president T. M. Turner submitted the statement for the six months ending June 30 1907. The statement of the company showed earnings for the six wonths of \$125,640, which, having deducted all fixed charges, leaves a surplus for the six months of \$77,640, an increase over the same period of last year of \$10,000. *RESULTS FOR HALF-YEAR*.

CANADIAN RAND CO., LIMITED-BALANCE SHEET MARCH 30 1907.

#### Page Woven Wire Fence Company.

(Balance Sheet of July 1 1907.)

(Balance Sheet of July 1 1907.) The shareholders on July 24 voted to decrease the common stock from \$5,000,000 to \$1,000,000 by changing the par value of shares from \$100 to \$20; the preferred stock remains \$1,000,000. Chicago papers say: Dividends have not been paid on either stock for much more than a year, although the preferred has paid 7% and 5% in the past. The management, with the approval of the stockholders, declided to acumulate a surplus, to the end that the practice of borrowing money might cease. The surplus poses of the corporation no dividends will be paid. That may be a matter of a year or two years. The resent cancelly of the company's Monessen mills, near Pittsburgh, 500 tons per day, while the company requires for its wire trade only about 500 tons per day. A five-year contract has been made by which surplus steel is sold to another manufacturing concern. This makes it possible for the mills to be constantly run at full time. The officers state that the year as been a successful one and that the outlook is favorable. The capital stock is closely held by the company's management, who are confident that the value of their holdings will be materially greater in the near future. BALANCE SHEET.

#### Colorado Fuel & Iron Co.

(Report for Fiscal Year ending June 30 1907.) President J. F. Welborn, Denver, Aug. 6 1907, writes in substance:

substance:
 General Results.—The shortage of labor that existed last year has continued throughout the year just closed, and has prevented the operation of all departments to their full capacity.
 The gross earnings from operations for the year were \$23,792,299, an increase of \$1,472,253 over the preceding year. The gross earnings of the four department show an increase of \$1,472,465 and of the Industrial (fuel) department a decrease of \$21,272,203, an event the preceding year. The gross earnings form operations for the year were \$23,792,299, an increase of \$1,472,465 and of the Industrial year (see \$2,596,044, an increase of \$37,016. The total net earnings from operations amounted to \$2,992,088, a decrease of \$27,2631. After providing for all fixed charges, interest, taxes, sinking funds, rentals, &c., there is left a surplus, carried to the preceding year.
 Profit and loss account has been charged with \$218,474 for depreciation for hron department, which is the difference between the actual depreciation of \$434,916 in iron department equipment dismantled and the credit of \$216,441 to iron department equipment sinking fund.
 The department,—One additional coal mine (Morley) was opened early in the year in Las Animas County, Col., and is operating successfully with

#### United States Glass Company

#### (Statement for Fiscal Year Ending June 30 1907.)

#### President D. C. Ripley says in substance:

President D. C. Ripley says in substance: On Feb. 10 the roof of our factory "U," one of our largest plants, located at Gas City, was destroyed by fire. While fully covered by Insurance, the loss of the time and production was considerable. In my last report, dated Aug. 15 1906, we had an increase in sales over 1905 of 3 % %, with a loss on account of bad debts of 1-5 of 1 %. This year shows an increase in sales over 1906 of 13 %, with a loss of 1-6 of 1 % on account of bad debts. The Glassport Land Co. sold during the year \$55,200 worth of property and the remaining property is increasing in value rapidly. The outlook for business is good, and with our plants and organization, which are in good shape, we should be able to increase our earnings ma-terially. Since the close of the fiscal year of the company we have sold our Greensburg plant for \$60,000, this figure being within \$1,825 of its appraisement made by the Appralsal Co., and referred to in my report of Aug. 15 1906. The sale of this plant disposes of the last plece of unpro-ductive property. *FINANCIAL STATEMENT JUNE* 30.

President T. C. Platt, in a circular letter dated Aug refers to the circulars sent out under date of May 2 and June 22 1907 by A. L. Banister and Samuel S. Hatt (compare a previous page of this issue) and further says:

The United States Express Co. is an unincorporated association. The ownership is represented by 100,000 outstanding shares of a nominal par value of \$100 each, amounting in all to \$10,000,000. No such sum of money was ever subscribed to the capital of the company. It has been the policy of the directors to accumulate a fund which shall equal the face value of utstanding shares, together with a reasonable surplus. From time to time the company has saved out of its net earnings and over and above its dividends, until it has accumulated property amounting to \$9,622,803. The general balance sheet as of June 30 1907 contained in Haskins & Sells' report shows a surplus (over the \$10,000,000 represented by the capital shares) of \$639,469. Its mum of the capital shares and the surplus, namely, \$10,639,469, is made up of the following items:

Baltimore & Ohlo Express contract.	\$1,016,667
Stocks, bonds, notes and mortgages.	7,224,225
Certain real and personal property	3,248,883
From which sum must be deducted the excess of "comment lie	\$11,489,775

#### GENERAL INVESTMENT NEWS.

#### RAILROADS, INCLUDING STREET ROADS.

Ashtabula (O.) Rapid Transit Co.—New Stock.—The shareholders have voted to increase the capital stock from \$150,000 to \$500,000, preliminary, it is stated, to consoli-dation with the Pennsylvania & Ohio Ry. Co. (V. 82, p. 929, 987) which is to be effected next year.

Atchison Topeka & Santa Fe Ry.—Application to List.— Application has been made to the New York Stock Exchange to list \$26,056,000 10-year 5% convertible bonds, due 1917. Compare V. 85, p. 283, 97.

Compare V. 85, p. 285, 97. Atlantic Coast Line RR.—Payment of Equipment Bonds.— Equipment trust 4% bonds dated March 1 1907, Nos. 1 to 225, due Sept. 1 1907, and the coupons due on the entire issue, also the coupons due on the "5% 3-year gold notes", may be presented for payment at United States Trust Co. of New York, 45 Wall St., New York, or at Safe Deposit & Trust Co. of Baltimore, Baltimore, Md. —V. 84, p. 1246.

"Atlantic & Lake Superior Railway Trust Fund."—Meet-ing.—A meeting of the holders of certificates of participation will be held on Aug. 28 at the office of the Royal Trust Co., Montreal, for the purpose of authorizing the acquisition of the claims now held by the trustees for the bondholders of the Atlantic & Lake Superior Railway Co. against the said company and its bondholders, and of confirming the issues of certificates of participation hitherto made by the trustees of the fund. Compare V. 84, p. 929; V. 85, p. 97, 220.

of the fund. Compare V. 84, p. 929; V. 85, p. 97, 220. **F2 Canadian Northern Ry.**—New Equipment Trust.—A no-tarial copy of a mortgage bearing date Aug. 9 1907 and made between the Imperial Rolling Stock Co., Limited, National Trust Co., Limited, and the Canadian Northern Railway Co., and an original agreement bearing the same date made between the Imperial Rolling Stock Co., Limited, and the Canadian Northern Railway Co., have been filed with the Canadian Secretary of State. Mortgage of Allied Line.—See Edmonton & Slave Lake Ry. below.—V. 85, p. 283. Central of Caparia Ru — Na Davisare At the conference

Isongage of Antea Dirk.—See Edition of a Stave Eake Ry. below.—V. 85, p. 283.
Central of Georgia Ry.—No Decision.—At the conference in this city last week between large holders of the income bonds and representatives of the company, no refunding plan was agreed upon, though the position of the company was quite thoroughly gone into and the question whether, in view of the decrease in earnings, the company should pay on Oct. 1 the full 5% on the three series of incomes was fully discussed. The "Wall Street Journal" says in substance:
The income bondholders have had a pretty complete statement from the management as to the position of affairs, but whether surplus earnings sufficient to meet the full interest on the incomes will be shown in the in-could declare a dividend out of the Ocean Steamship Company's profits sufficient to make up the deficit. This is what the bondholders insist must be done. The management, however, is disposed to treat the Ocean Steam-ship Co. as an equity in which the bondholders have no rights, but the bondholders have positive ideas of their own as to that. The latterest must be declared on or before Sept. 1; it is payable on Oct. 1. The bond-holders will have 30 days in which to file a protest if the decision of the management is unsatisfactory.

The object of the conference here was to bring about an understanding between the new owners and the bondholders. The only thing actually accomplished, it seems, is that the bondholders are pretty well satisfied that the management intends to be fair. The management desires to raise new capital, with the aid of the bondholders, with which to carry out a scheme of improvements, but the bondholders protested that the present is not a propitious time for undertaking large improvements; they demanded their full 5% interest this time, with reservations as to the future, when, under more favorable conditions, they would probably be willing to fund their interest in some way and co-operate in the work of providing new capital. A bondholder who has been present through all the conferences asys it is unlikely that formal representations of any sort will be made at present to all bondholders. Nothing has been agreed upon or promised, he says. The management proposed tentatively to give the bondholders notes in leu of their interests, creating a note issue enough to take care of the interest on the incomes as it fails due for five years and provide several millions of fresh capital besides, but nothing came of it. --V. 85, p. 344.

**Chicago & Alton RR.**—Sale.—The following announce-ment of the purchase of control from the Rock Island interests was made yesterday by President Shonts of the Toledo St. Louis & Western:

St. Louis & Western:
The Toledo St. Louis & Western has acquired control of the Chicago & Alton, subject to certain conditions not to be finally determined before 10 days to 2 weeks.
The terms under which the C. & A. has been acquired by the Toledo St. Louis & Western provide that the latter shall issue collateral trust bonds secured by the Chicago & Alton common and preferred stock purchased on the basis of 4% at par for its 63,800 shares of the preferred stock at 35.
Under these terms, if the Obicago & Alton continues to earn 4% on its preferred stock, as it has done during the last five years, with a surplus year ending June 30 1903 to a maximum of \$1,010,229 for the first five years and \$200,000 for the second five years.
Western you on the first five years and \$200,000 for the second five years.
Obicarea Willeneuhea & Ste Dayl Br. Discussed in the preferred stock at 34.

Chicago Milwaukee & St. Paul Ry.—Progress of Pacific Extension.—A technical paper has the following:

Extension.—A technical paper has the following:
The grading of the Pacific Coast extension has been completed for 50 miles westward from Glenham, N. D., where the new extension begins, and is under way all the rest of the distance to Butte, Mont., 750 miles, including 100 miles of the Montana Railroad. Fully 80% of the grading has been done as far as the Little Missouri River, and the entire grading to Whitehall, Mont., just east of Butte, will be finished by Nov. 1. Rails have been laid 65 miles west of Glenham, and also from Harlowton, Mont., east. The tunnel work will be completed this winter. In the State of Washington the construction of the extension will be pushed with great vigor, with the idea of having it participate in the hauling of next year's crops. Several thousand more men are to be put to work on the section between Seattle and Montana if they can be had. Forces are now getting ready to begin the construction of the Bitter Root tunnel. It will be 8,500 feet long. Considerable work already has been done on the 10,000-foot tunnel in the State of Deaka Show. The section between Seattle and the Orient when the extension of the road is finished in 1909. A tentative agreement has been made with the Osaka Shose make sho operate the line. The vessels, each having a capacity of 12,000 tons, are building in Japan. The latest ship is to be delivered not later than Forling of Montan Messer made with the Osaka Shose. The Storing of Montan Western Ry.—Payment of Bonds.—The

**Chicago & North Western Ry.**—*Payment of Bonds.*—The \$1,007,000 Dakota Central Railway (W. & St. P. RR. connection) first mortgage 6% bonds, maturing Sept. 1 1907, will be paid when due upon presentation at the office of the Treasurer of the Chicago & North Western Railway Co., 111 Broadway, New York City.—V. 85, p. 220.

Chicago Railways.—Appeal to Be Heard Sept. 5.—An appeal by certain interests from the plan as finally adopted by the arbitrators will be heard Sept. 5 by the United States Circuit Court of Appeals, Supreme Court Justice Brewer to preside in place of Judge Grosscup. Compare V. 85, p. 404.

Chicago & Western Indiana RR.-Called Bonds.--Seventy eight (\$78,000) general mortgage bonds of 1882 drawn for redemption are payable on Sept. 1 at 105 and interest at office of J. P. Morgan & Co.-V. 85, p. 154.

Delaware Lackawanna & Western RR.—Sale.—See Syra-cuse Binghamton & New York RR. below.—V. 84, p. 1551.

**Denver & Rio Grande RR.**—Equipment Trusts.—The company has sold to Blair & Co. \$1,500,000 5% equipment notes, dated Sept. 1 and maturing \$75,000 semi-annually to Sept. 1 1917.—V. 84, p. 1052.

Edmonton & Slave Lake Ry.—Bond Issue.—A mortgage dated July 1 1907 has been made to the National Trust Co., Ltd., of Toronto, as trustee, to secure an issue of first mort-gage bonds to the extent of \$20,000 per mile on that por-tion of the company's line of railway between the City of Edmonton and Athabaska Landing, a distance of about 100 miles. William Mackenzie is President and the road is ap-parently a part of the Canadian Northern Ry. system.

Fitchburg & Leominster Street Ry.—New Stock.—The shareholders on Aug. 6 voted to increase the capital stock from \$450,000 to \$700,000, to fund floating debt.—V. 80, p. 1478.

p. 1478. Fitzgerald Ocilla & Broxton RR.—Bond Issue.—This company, incorporated under the laws of Georgia on May 29 as successor of the Broxton Hazlehurst & Savannah RR. (which in April last purchased the Ocilla & Valdosta RR., V. 84, p. 997), has increased its capital stock from \$100,000 to \$300,000, all outstanding (par of shares \$100) and has made a mortgage to the Title Guarantee & Trust Co. of Atlanta, as trustee, to secure an issue of \$300,000 first mort-gage 6% gold bonds dated July 1 1907, of which \$150,000 are outstanding. These bonds are due in 30 years but are subject to call an any interest

These bonds are due in 30 years but are subject to call on any interest date at 110. Interest payable Jan. 1 and July 1 in Atlanta. Denomina-tion \$1,000. No prior liens remain outstanding. Of the authorized issue, \$150,000 is reserved for improvements, extensions, equipment, &c. The mortgage now covers 30 miles of railroad, extending from Broxton to Ocella, Ga., 25 miles, with branch to Fitzgeraid, 5 miles, and also all equip-ment, &c. President and General Manager, H. C. McFadden: Secretary and Treasurer, C. B. Gwyn.-V. 84, p. 1551. Grand Truble Prov. For holf-year (partily esti-

406); also below.—V. 85, p. 287. Joplin & Pittsburg Railway, Kansas City, Mo.—Merger. —This company, incorporated on June 10 1907 under the laws of Missouri with \$5,000,000 of authorized capital stock in \$100 shares (of which \$2,800,000 is outstanding), has taken over the properties of the Pittsburg Railway & Light Co. (V. 81, p. 1793), Pittsburg, Kan., and the Joplin & Pittsburg Street RR. Co., the latter having under con-struction an urban line in the city of Joplin. It is the pur-pose of the company to connect the lines acquired at Pitts-burg with those at Joplin, to effect which a line 26 miles in length is being built. Several branches and extensions are also now in course of construction. When these new lines are completed the company will have 82 miles of urban and interuban trackage for the transportation of passengers and package freight. A mortgage has been made to the Germantown Trust Co. of

A mortgage has been made to the Germantown Trust Co. of Philadelphia, as trustee, to secure an issue of \$5,000,000 5% first mortgage gold bonds of \$1,000 each, dated June 10 1907 and due July 1 1927, but subject to call on any interest day beginning July 1 1910, any or all, at 105. Interest payable Jan. 1 and July 1 at office of trustee. No prior liens, we are informed, remain outstanding. Officers: President, Joseph J. Heim; Secretary and Treasurer, John A. Prescott. Office 310 First National Bank Building, Kansas City, Mo. Regarding the bond issue, Treasurer Prescott writes: The authorized bond issue of this company is \$5,000,000, \$2,800,000 of which is to be issued to cover the acquirement of the roads we have bough and to ever the cost of construction of some 50 additional miles, so as to make the aggregate mileage about 82 miles. You will understand that all this \$2,800,000 of bonds are not yet outstanding, the majority of them being in the treasury of the company to produce funds necessary to construct the lines we are now building. It is expected that our total outstanding bond issue by the time we have completed our present plans, will be some-what less than \$2,800,000. The remaining \$2,200,000 of the \$5,000,000 authorized is not intended to issue at present. They are reserved for the acquirement of other properties, for extensions of our lines and for en-iargements in the future.

Kansas City Railway & Light Co.—Note Issue A pproved.— The shareholders on Aug. 15 ratified the proposition to au-thorize an issue of \$5,500,000 5-year 6% notes and the crea-tion of a mortgage securing the same. Of these notes \$4,125,000 series "A" were offered at par to shareholders of record Aug. 9 and \$1,375,000 series "B" were to be held for the present in reserve. See full particulars in V. 85, p. 284,339.

284, 339. Lewiston Augusta & Waterville Street Ry.—Mortgage.— The company has made a mortgage to the Old Colony Trust Co. of Boston, as trustee, to secure an issue of \$5,000,000 bonds to provide for the construction of extensions and improvements to existing lines and the refunding of the outstanding bonds of the Lewiston Brunswick & Bath Street Ry. and Augusta Winthrop & Gardiner Ry., both of which

have been acquired. Compare "Street Railway" section for June 1907, pages 52 and 8.-V. 84, p. 1182.

Metropolitan Street Ry., New York.—Protective Measures. Clarence H. Wildes, 24 Broad St., this city, in a notice issued to the non-assenting minority stockholders, says:

to the non-assenting minority stockholders, says: Rumors in circulation tending to impair the market value of the above stock have led to useless sacrifice of a security owning an immensely valuable traction system and equally valuable franchises. Under the terms of the plan guaranteeing dividends on the Metropolitan Street Ry. stock, it was stated that 'an unqualified guaranty would be afforded to the Metropolitan stock of 7%." To protect the interests of the minority stock-holders concerted and vigorous action will be required in ascertaining how for the guaranty (now considered worthless) was bolstered up by the guitting of the treasury of our company. Kindly send to the undersigned the amount of your holdings, with name and address. Mr. Wildes it is stated, will co-operate with a committee representing Philadelphia holders, of which George S. Gra-ham is counsel. See Interborough-Metropolitan Co. above. —V. 84, p. 1248. Mentically Fully and the test of the section of the secti

Monticello Fallsburg & White Lake (Electric) RR.—Bonds at Auction.—At auction in this city last week the entire issue of \$350,000 first mortgage 5% sinking fund gold bonds due October 1932 (hypothecated) was sold at \$30 per bond, October 19: par \$1,000.

On June 30 1906 the company reported that \$421,963 had been expended on its trolley line, which is projected to run from Fallsburg Station, N. Y. on the New York Ontario & Western Ry., to North White Lake, 18.8 miles. Against this amount, accounts receivable (\$2,885), &c., there were out standing \$250,000 capital stock in shares of \$100 each (of which \$35,200 issued for cash, \$164,800 on account of construction and \$50,000 for property), and \$174,849 loans and bills payable. Officers: George C. Edwards, Bridgeport, Conn., President; Frank M. Jeffery, 52 Broadway, N. Y. City, Vice-Pres. andTreas.;A. P. Bachman, 52 Wall St., Secretary.

New York New Haven & Hartford RR.—Official Descrip-tion of Electrification Work.—Vice-President E. H. McHenry has a 7¼-page article in the "Railroad Gazette of New York for Aug. 16 describing, with the aid of illustrations, the electrification work that has been done on the New York Division between Woodlawn in New York City and Stam-ford Conp. ford, Conn.

For a Conn. Equipment Not Newly Ordered.—Referring to the reports current this week that the company has recently ordered equipment costing about \$12,000,000, we learn that the same was ordered some time since and has been already announced in the newspapers, and with the exception of the freight cars, has been mostly delivered.—V. 85, p. 346, 221. Maria Landon Provide Some time to the second seco

Noriolk & Western Ry.—Final Syndicate Payment.— Brown Bros. & Co. and the Guaranty Trust Co., managers of the syndicate that underwrote the \$14,457,000 convertible bonds, have issued a call on the syndicate members for the final instalment (say 14½%) of their subscriptions, payable Aug. 30. Compare V. 84, p. 1248; V. 83, p. 1412, 1471. —V. 85, p. 339.

North Jersey St. Ry.—Merger.—See Public Service Cor-poration in last week's "Chronicle" (page 406); also be-low.—V. 85, p. 284.

Northern Texas Electric Co., Fort Worth.—Dividend.—A semi-annual dividend of 3% has been declared payable Sept. 3 on the \$2,500,000 6% non-cumulative preferred stock, to holders of record Aug. 22. The same amount was paid in March last, making 6% for 1907. The first dividend was paid March 1 1906 and 2% on Sept. 1 1906.— 83, p. 436.

Old Colony R.B.—Stock of Sub-Companies.—The company recently applied to the Massachusetts Railroad Commission for authority to issue stock for the purpose of retiring on the basis heretofore authorized, the still outstanding shares of sub-companies, namely, it is stated:

Panama RR.—Entire First Mortgage Bond Issue Called.— Notice is given by advertisement that the Central Trust Co. of New York and William Nelson Cromwell, as trustees under the first mortgage dated Aug. 16 1897, have elected to call in and redeem on Oct. 1 all the \$2,143,000 outstanding first mortgage 4½% 20-year sinking fund gold bonds at 105% and accrued interest. Payment will be made at the Central Trust Co. on presentation of the bonds with the Oct 1907 and subsequent coupons attached, from the proceeds of a United States treasury warrant drawn for the purpose. —V. 84, p. 804.

**Pere Marquette RR.**—Meeting to Ratify Reorganization Plan.—A meeting of the shareholders has been called for Oct. 28 for the purpose of ratifying the reorganization plan (see V. 85, p. 41, 100, 222) through the adoption of the following propositions:

following propositions:

 To approve the proceedings taken at a special meeting of the directors of the company held on Aug. 12 1907.
 To approve a certain agreement dated Aug. 12 1907 for the consolidation of the Pere Marquette RR. Co. of Michigan and the Pere Marquette RR. Co. of Indiana.
 To approve a certain agreement dated Aug. 12 1907 between the Pere Marquette RR. Co., the Cincinnati Hamilton & Dayton Railway Co., and Nathaniel Thayer and others, committee, providing for the settlement by arbitration of all claims whatsoever between the two said corporations and for the cancellation of the indenture of lease from the Pere Marquette RR. Co. to the Cincinnati Hamilton & Dayton RR. Co. dated March 1 1905, upon such terms as the arbitrators (William W. Crapo and Judson Harmon) may determine.—V. 85, p. 222, 100.

 Notes Oper-Subscribed — The \$5 000 000 6% notes issued

Notes Over-Subscribed.—The \$5,000,000 6% notes issued under the reorganization plan have been oversubscribed, over \$9,400,000 preferred stock having assented to the re-

organization plan and the holders of \$1,618,100 common stock having availed themselves of the right to subscribe for the same to the extent of 20% of their holdings.—V. 85, p. 222, 100.

Philadelphia & Easton Electric Ry.—Reorganized Com-pany.—This company has been organized, with \$265,000 capital stock in shares of \$50 each, as successor of the Phila-delphia & Easton Ry., which was bid in recently at trustee's sale by the bondholders' committee for \$100,000, subject to the \$825,000 of outstanding bonds. The company, it is understood, will make a new bond issue to provide for re-funding and for extensions and additions. The officers and directors are: President, David P. Avars of Wikesbarre: Secretary and Treasurer

President, David P. Ayars of Wilkesbarre; Secretary and Treasure Joseph S. Rawson of Philadelpha. Directors: David P. Ayars of Wilk Barre, A. H. Sickler of Philadelphia, W. J. Lescure of Harrisburg, A. E Pendergast of Trenton, Henry B. Rush of Lancaster, A. C. Patterson Philadelphia.—V. 84, p. 1368.

Rock Island Co.—Sale of Chicago & Alton Holdings.—See that company above.—V. 84, p. 1114. St. Louis & San Francisco RR.—Property Deeded.—See Fort Smith & Van Buren Bridge Co. above.—V. 84, p. 1483. Southern Ry.—Dividend on Prejerred Stock Reduced.—At a meeting of the board of directors held yesterday, the income account and the results of operation for the fiscal year ended June 30 1907 were considered and a dividend of 1½% on the preferred stock was declared, payable on Oct. 17, out of ac-cumulated surplus, thus making a total dividend distribu-tion of 4% for the year. For this purpose there was appro-priated a portion of the surplus income which was carried forward for the year ended June 30 1906 after payment of the dividends for that year. In taking this action the directors were influenced by con-sideration that the income account for the year reflects such abnormal and extraordinary conditions as may not reason-ably be expected to recur. At the same time the directors considered that, under existing conditions of high prices of supplies, material and labor, of increasing taxes and of legis-lative reduction of revenue, it was the part of conservative prudence to limit the distribution. of the profits of the com-pany at least until the permanent effect of such conditions can be fairly measured: *Report.*—See "Annual Reports" on a preceding page.— V. 85, p. 406.

*Report.*—See V. 85, p. 406.

Stony Creek RR.—Extension of Bonds.—The Reading Co. has arranged to extend at 4% the \$350,000 of 7% bonds maturing Oct. 1, guaranteeing the bonds, principal and interest

Syracuse Binghamton & New York RR.—Sale.—The Pub-lic Service Commission (No. 2) on Thursday granted the application of the Delaware Lackawanna & Western Railroad

application of the Delaware Lackawanna & Western Railroad Co. for authority to buy the \$590,600 of the \$2,500,000 capi-tal stock not already owned, provided, however, that the authority may be revoked at any time as to shares not theretofore purchased.—V. 65, p. 568. **Toledo Ann Arbor & Detroit (Electric) R.R.**—Sale Sept. 16 1907.—Receivers Willis Baldwin and I. H. Burgoon an-nounce by advertisement that the sale of the property under order of the Circuit Court for the County of Monroe, Mich., will take place Sept. 16 at the point in the township of Bedford, Monroe County, Mich., where the right of way crosses the State line. Upset price \$80,000. The adver-tisement says: tisement says:

The property consists of a right of way, now occupied by the said railroad company, through the townships of Bedford, Whiteford, Summerfield and Milan, in the County of Monroe, Mich., and the townships of York and Pittsfield in the County of Washtenaw, together with certain franchises in said townships, in the vilage of Petersburg and in the village of Milan upon which right of way there is laid about 17 miles of track, extending from Petersburg southerly to the State line between the States of Ohio and Michgan, and land in the village of Petersburg for the erection of a power-house thereon together with the parity completed power-house, together with all the ties, T rails and appurtenances to said track now fastened and attached to said rght of way, the estimated cost of which, as paid by the said defendant railroad company, being approximately \$275,000. Bethlehem Steel Corporation.—New Plant of Subsidiary in Operation.—The following is pronounced correct:
Production was begun Aug. 14 in the new \$12,000,000 Saucon plant of the Bethlehem Steel Co. Two of the 10 new 50-ton open-hearth furnaces were put in operation and steel made in them.
Five of the furnaces will be in working order Sept. 1, when work will be commenced in nearly all the departments. Orders aggregating over 100,000 tons have already been booked. The first tails made will go to the Harriman lines, as they put in an order for 22,500 tons several months ago. Gas was turned into 3 of the rail mill backing pits to-day and work on the rails will be commenced in a few days.
Orders for open-hearth rails have been received by the company from the Chicago Burlington & Quincy and the Delaware Lackawana & Westerne.

of the pig fron furnaces of the plant is 400,000 tons a year. —V. 84, p. 1489. **Bibb** (Cotton) Manufacturing Co., Georgia.—V. 84, p. 1489. Disperior Court of Bibb County to renew the charter, granted in 1876 for 20 years, the common stock to be \$1,628,300, in \$100 shares, to be issued in exchange for the old certificates, with privilege of increase to \$2,500,000. In addition the right is asked to issue not exceeding \$250,000 of 5% cumu-lative preferred stock, with preference also as to assets in case of liquidation. D. Parace: Sec. John S. Wise, Jr.; Treas., Calvin Parace Jr., -Ed.) International Harvester Co.—*Ouster Swit in Texas*.—Suit has been filed in the 53d District Court at Austin, Texas, to oust the company from the State of Texas for alleged viola-tions of the anti-trust laws. Penalties amounting to \$1,000,150 are demanded.—V. 85, p. 287.

\$1,000,150 are demanded.—v. ob, p. 257. International Paper Co.—Bonds Called.—Nine Piscataquis Falls 4% bonds issued under the mortgage of 1898, viz., Nos. 3, 5, 7, 16, 29, 60, 76, 149 and 182, have been selected by lot and will be paid at par and interest at the New York Trust Co., trustee, on Aug. 28.—V. 84, p. 1371.

Kansas City Home Telephone Co.—Offering of Guaranteed Bonds.—See Kansas City Long Distance Telephone Co. below.—V. 84, p. 631.

**Kansas City Long Distance Telephone Co.**—*Guaranteed* Bonds Offered—Status.—The H. P. Wright Investment Co., Kansas City, recently offered a block of the guaranteed first mortgage 6% gold bonds at a price to net about 6¾ %, their circular saying:

their circular saying: Denomination \$500 and \$1,000, dated Jan. 1 1905, due Jan. 1 1925, but redeemable at 105 on any linterest date. Interest payable Jan. 1 and July 1 in St. Louis. Authorized Issue \$1,500,000; issued and outstanding \$878, 500; amount in treasury, \$78,000; amount held by trustees for future ad-ditions to property, but to be issued at the rate of 90% only of actual cash cost: thereof, \$543,500. These bonds are secured by a first mortgage on the entire property of the company, which now consists of 830 miles of pole lines and 6,200 miles of first-class copper wire, and other lines are being built as fast as possible. The company has an exclusive 49 year contract with the Kansas City Home Telephone Co., which havers permanent connection with all tele-phones of that company, now numbering over 19,500; it also has 49-year contracts with practically all the local exchanges in this territory, as well as with long distance lines at 51, Joseph, Sedalla, Topeka and other im-portant centers, none of which can reach Kansas City except over its lines. *Earnings for Year ending March* 31 1907.

Earnings for Year ending March 31 1907. Gross earnings\_\_\_\_\_\_\$133,976 [Interest on bonded debt\_\_\_\_\_\_\$46,110] Net earnings per annum\_\_\_\_\_ 79,726 [Surplus above all fixed chg's. 83,616]

All the outstanding capital stock is now owned by the Kansas City Home Telephone Co., by which company the bonds of the Long Distance Com-pany are unconditionally guaranteed, both as to principal and interest. The two companies are therefore practically one organization, and then combined net earnings are now more than six times the interest on the Long Distance bonds.—V. 84, p. 631.

**Kirby Lumber Co.**—*Payment of Overdue Coupons.*—Coupons due Aug. 1 1907 on the Maryland Trust Co. timber cer-tificates of beneficial interest in Kirby Lumber Co. contract with Houston Oil Co. of Texas will be paid on Aug. 26, to-gether with interest on said coupons at the rate of 6% per annum from Aug. 1 1907.

Long Acre Electric Light & Power Co.—Reported Contract for Plants.—The American & British Manufacturing Co. of Providence, R. I., it is reported, has been awarded the con-tract for the construction and equipment of two generating plants of 50,000 horse-power each, one to supply the Harlem and the other the Long Acre district, the 42d St. plant to be operated to the extent of 10,000 horse-power by next spring. The company recently authorized a mortgage to secure an issue of \$10,000,000 of 5% bonds. Compare V. 84, p. 1056, 511.

Louisville Water Co.—Decision Exempting Property jrom State and County Taxes.—See item under Louisville, Ky., in "State and City" department.—V. 84, p. 394.

Marlborough Electric Co.—New Stock.—The Massachu-setts Gas and Electric Light Commissioners on Aug. 9 ap-proved an issue of 1,700 shares of additional capital stock, the new stock to be offered to present stockholders at \$100 per share.

• The proceeds of the new stock are to be used as follows: 358 shares for the payment and cancellation of the entire bonded debt, 990 shares for the can-cellation of an equal amount of the floating debt and 352 shares for the cost of permanent additions to the plant made subsequent to July 1 1907. The outstanding stock was at last accounts reported as

\$30,000.

Minnesota Thresher (Manufacturing) Co.—Suits to Collect Assessment.—Receiver Theodore R. Converse has brought suits against a number of Connecticut stockholders to enforce the collection of the full 100% statutory (double) liability. Compare V. 84, p. 1117.

Mohican Springs Water Co.—Receiver.—Judge Holt in the United States Circuit Court in this city on Aug. 21 ap-pointed Payson Merrill receiver, in involuntary bankruptcy proceedings filed by a number of creditors.

The company was incorporated in New York on May 4 1903 with \$1,000,-000 capital stock, as successor to the Mohican Springs Water Co., and deait in mineral waters. On July 20 1906 \$100,000 bonds were issued. The assets are reported as \$140,250, consisting of 10 buildings and 185 acres of land at Fairfield, Conn., \$80,000; machinery, \$16,000; stock, \$24,000; accounts, \$1,900; furniture and fixtures, \$500; live stock, \$750. David C. Ball was President.

Nassau Ferry Co. of New York.—Sale at Auction.—At auction last week 190 shares of \$100 each were sold at 50% of par value.

With the completion of the work now under way, all of wheeling alone. With the completion of the work now under way, all of wheeling alone. With the completion of the work now unde

F (The) New York Brockton & Boston Canal & Transpor-tation Co.—Prospectus.—This company, incorporated by Act of the Massachusetts Legislature approved June 28 1906, has issued an elaborate prospectus of 78 quarto pages,

with maps, &c., regarding its plan for a canal, which should serve as a short cut for vessels between Boston and Narra-gansett Bay, Rhode Island. The project is described in brief as follows:

The company is incorporated for the purpose of constructing and oper-ating aship canal from Narragansett Bay or Taunton River across a portion of the State of Massachusetts to Fore River in the Town of Weymouth on Boston Harbor in Massachusetts Bay. The canal to have a surface width of not less than 200 ft., a width at the bottom of not less than 120 ft. and a depth of not less than 25 ft. at mean high tide. The charter gives the right to a location of 700 ft. In width, within which to construct the canal, build docks and wharfs and other structures. The total length of the proposed canal is about 31 miles, and there will be at either end well-protected harbors with a depth of water in excess of that required in the canal. The company is capitalized at \$15,000,000, and the structures.

protected harbors with a depth of water in excess of that required in the canal. The company is capitalized at \$15,000,000, to be divided into shares of \$100 each; it may issue coupon or registered bonds to an amount not ex-ceeding the authorized capital stock paidin at the time; all issues of stock and bonds to be subject to the approval of the Railroad Commissioner, under what is known as the anti-stock-watering law. Ample provision is made, in the Act of incorporation for the purchase of the canal and all its franchise, property, rights and privileges, before or after its completion, by the Commonwealth or the United States; the financial interests of the stockholders being properly guarded in case of such sale. In case of such sale before the completion of the canal, one of the conditions of the sale must be its completion by the purchase. This is the first legislative enact-ment for a canal to connect the waters of Narragansett and Massachusetts bays. For more than 200 years the desirability of some sort of a waterway across this cape has been freely discussed, the primary consideration being to obviate the danger to life and property hickient to navigation in its treacherous waters. The distance from Point Judith to Boston by the distance to 110 miles; the distance by the canal proposed by the Act in-corporating this company reduces the distance to 75 miles. A press report from Boston states:

A press report from Boston states:

Treasurer Herbert F. Guy says that engraved certificates of stock of the company will soon be distributed to the subscribers, who number above 50. The company expects to be able to raise enough money during the coming fall and whiter to pay over to the State the \$10.000 expended for preliminary surveying, and also to invite bids for construction. Active construction work may be started by next June. *Directors.*—The directors (and officers) elected Feb. 5 1907 are:

1907 are:

President, John J. Whipple; Treasurer, Herbert E. Guy; Clerk, Thomas A. Norris; Robert Cook, Maynard A. Davis, Wallace C. Flagg, Jabez W. Trederick, George B. French, Bradford E. Jones, Emery M. Low, Edward B. Mellen, Kenneth McLeod, Elmer C. Packard, Moses A. Packard and Portus B. Hancock.

Compare Boston Cape Cod & New York Canal Co. below.

New York Butchers' Dressed Meat Co.—Reported Change of Control.—It was reported this week that the "beef trust" had acquired control. Frederick Joseph, formerly Vice-President of the Schwarzschild & Sulzberger Co., and who, it is stated, arranged the sale of 40% of the stock of the latter to the "trust," has been elected President. Officials of the New York Butchers and Swift & Co. are quoted as denying the sale, while President Ferdinand Sulzberger of Schwarz-schild & Co. (see that company below) positively confirms it. —V. 83. p. 628. -V. 83, p. 628.

company's 25th anniversary gives the following data:

company's 25th anniversary gives the following data: Established June 27 1882 as Elmore, Sivyer & Co., with 25 employees. In 1883 the one small cupole was replaced by a small reverberatory furnace, and in the same year the firm name was changed to the present one, but it was not incorporated until Sept. 8 1888. After a decade of existence the annual sales had increased sixfold, the capacity expanded from 600 to 5,000 tons annually, and the number of employees reached 600. Present annual capacity, 30,000 tons. There are now 11 reverberatory furnaces, a 10-ton cupola and 15 annealing ovens; the foundries aggregate 140,000 square feet of floor space, and the present working force numbers 1,200. The sales during the past year amounted to \$1,500,000, five times those of 10 years ago and 25 times chose of the year'ending June 30 1884. The present officers are: Frederick W. Sivyer, President, Frederick L. Sivyer, Viee President; Heimus B. Wells, 2d Viee-Pres.; D. Ralph Day, Secretary, and John M. Potter, Treasurer.

**Pacific Telephone & Telegraph Co.**—New Officer.—Edgar C. Bradley, formerly assistant to the President of the Amer-ican Telephone & Telegraph Co., was on August 2 elected Third Vice-President and General Manager. The strike of the operators, which had lasted for over 3 months, was ended at the same time.—V. 84, p. 1487.

**Pennsylvania Steel Co.**—New Ore Deposits in Cuba.—The "Iron Age of Aug. 15 has a leading article regarding the new ore deposits of the Spanish-American Iron Co., already described in this column. See V. 85, p. 226, 287.

Pure Oil Co.—New Pipe Lines, &c.—The company's new pipe line from Pine Grove, W. Va., to Marcus Hook, Del., 290 miles, press reports say, will be in operation in a few months. On July 19 Governor Stuart of Pennsylvania ap-proved the company's application for a new pipe line through Southern Pennsylvania from a point in Henry Clay Town-ship, Fayette County, to Marcus Hook, on the Delaware River, traversing Fayette, Somerset, Bedford, Fulton, Franklin, Adams, York, Lancaster, Chester and Delaware counties. counties

Government Report.—The report of Herbert Knox Smith, Commissioner of Corporations, on the "Petroleum Industry," recently published, has in substance the following.

Industry," recently published, has in substance the following. In 1801 the Producers' Oll Co., a limited partnership, was organized with a capital of \$600,000 and proceeded to hay local collecting pipes in the new and rich McDonald field near Pittsburgh. The plan at first was to ship most of the crude oil by rail to the scaboard. It was, however, soon determined to arrange for disposing of it to independent refiners in Western Pennsylvania. For this purpose a new limited partnership was established in 1802, known as the *Producers' & Refiners' Oll Co.* Its capital was \$250,000. Of this amount \$160,000 was owned by the Producers Oll Co., which was controlled by crude-oil producers, while the remainder was largely taken by independent refiners. This new company laid a pipe line from the McDonald field to Oll City and Titusville, where a consider-able proportion of the independent refineres were situated. The project for an independent pie line to the scaboard was first pushed in 1890 by Lewis Emery Jr., a large producer of crude oil and owner of a local collecting pipe in the Bradford field and of a large refinery at Bradford.

Queen City Furniture Co., Shreveport, La.—Bond Issue.— This company, incorporated in Louisiana in May 1904, in May last filed a mortgage to the International Trust Co. of Boston, as trustee, to secure an issue of \$125,000 6% gold bonds.

Capital stock authorized \$200,000, recently outstanding \$67,500; pa of shares \$100. Bonds dated May 1 1907 and due May 1 1927, but subject to call on any interest day at par and interest; denomination \$500; interest payable May 1 and Nov. 1 at office of trustee. Of the authorized amount, \$25,000 is reserved for building purposes and \$20,000 for working capital. President, A. Currie; Secretary and Treasurer, A. Currie Jr.

Rohr McHenry Distilling Co., Benton, Pa.-Bond Issue

Status.—This company last year made a mortgage to the Fidelity Trust Co. of Philadelphia, as trustee, to secure an issue of \$750,000 first mortgage 6% gold bonds. Treasurer Frank Deitrick, under date of Dec. 4 1906, favored us with the following:

the following:
Distillery. Benton, Pa.: general offices, Wilkes-Barre, Pa. Incorporated 1903 under laws of Pennsylvania.
Name of mortgage, first mortgage 6 % gold coupon bonds, tax exempt in Pennsylvania. Denominations 5500 and \$1.000. Amount authorized, \$750,000; amount outstanding, \$210,000; dated March 1 1906; maturity March 1 1916; redeemable on and after March 1 1907 at a premium of 1 % each year up to and including March 1 1911; thereafter and until maturity at a premium of 5 %. Interest payable March 1 and Sept. 1 at office of trustee in Philadelphia.
The purpose of the issue is to enable the company to manufacture and place under government control during the next three years approximately 40,000 barrels of whiskey on which the bonds issued by this mortage are a first lien. in addition to being a first lien on all the real estate, warchouse

and franchises of the company. Under the terms of the mortgage no bonds can be issued on account of the plant or improvements, the issue and certification of bonds being limited to the manufacture of 100-proof pure rye whiskey on the basis of \$20 per barrel. Statement of Assets and Liabilities as of July 1 1907. 1. Not covered or included in the mortgage. Market value of whiskey in bond manufactured previous to March 1 1906. Cash and cash item. 21,900 Total \$496,900 Deduct—Current bills and notes unpaid, the latter secured by whiskey in bond 257,000

Balance free (assets not covered by mortgage) \$239,900 2. Assets and liabilities covered by mortgage, plant and imp'st \$150,000

Market value of whiskey manufactured since March 1 1906	294,000
Total	\$444:000
Bonds outstanding	\$210,000
Free assets under mortgage	234,000
Total free assets	473,900
	a standard and a

The plant was established in 1812 and has been in constant operation since that date, having been enlarged and improved until at the present time it consists of a thoroughly modern plant, with a capacity of 12,000 to 13,000 barrels per annum. The capital stock, \$100,000 (par value \$100 per share), is held exclusively by parties interested in the business. The officers are: John G. McHenry, Pres.; Harry E. Long, Scc., Benton, Pa.; Frank Deitrick, Treas., Wilkes-Barre, Pa. **St. Louis Car Co.**—*Preferred Shares.*—The preferred stock recently sold abroad, is cumulative, and limited to 7%.— V. 85, p. 350, 288.

Schwarzschild & Sulzberger.—Sale of Large Interest.— President Ferdinand Sulzberger and Vice-President Max J. Sulzberger are quoted as saying that the "trust" has acquired 40% of the company's stock. See also New York Butchers' Dressed Meat Co. above. President Schwarzschild is quoted as saying:

Dressed Meat Co. above. President Schwarzschild is quoted as saying: Frederick Joseph was the son-in-law of Schwarzschild, former partner in the business, and the stock acquired by the trust was carried on the books of our company in the name of Frederick Joseph, Vice-President, for a year before we discovered that the trust really own, d the stock. The trust can-not offer money enough to induce me to sell out, however. We are com-peting with it all over the country, and shall continue to do so. The trust is not getting any dividends on its investment, because a business like ours requires a great deal of money, and its carnings are added to the \$7,000,000 of surplus or put back into the business, and for opening new plants.—V. 85, p. 158.

**Standard Oil Co.**—*Official Pamphlet.*—The company has sent to its employees and stockholders a 32-page pamphlet assuring them of the company's innocence in the Chicago & Alton case and quoting numerous newspapers, most of them journals of the first rank, disapproving the decision of the Court. An introduction says:

of the Court. An introduction says: The directors of the Standard Oil Co., in printing this pamphlet, desire to emphasize for the half million of people directly interested in its weifare to emphasize for the half million of people directly interested in its weifare the assurance of the company's absolute innocence of wrong-doing in any of the prosecutions lately instituted against it in the Federal courts. Par-ticularly is this so in the recent Chicago & Alton RR. case, made notorious by the sensational fine of \$29,240,000 imposed on the Standard Oil Co. of indiana. It should be known that this is no case of rebate or discrimin-ation, but simply of the legality of a freight rate. The verdict was obtained by the Government upon the most halr-splitting technicality, aided by the rigorous exclusion of evidence that would have removed all presumption of guilt. If the judgment in question be allowed to stand the company will be forced to pay \$20,000 (that is, fifty times the value of the oil) for every varioad carried over the Alton road during two years at an open 6-cent rate—a rate used over three competing raliroads for from ten to fourteen piears. The trial judge refused to allow proof that the 6-cent rate had been lided by the Chicago & Eastern Illinois and was, therefore, a legal rate. He refused to allow proof that linseed oil, for instance, was carried at x a cents was the only legal rate for oil, when no one had ever paid it, and when it was authoritatively sworn that it did not apply to di. The case has been taken on appeal to the higher courts, to which we must look for that caim judgment which will rescue the rights of the citizen from the field of public ciamor and from the domain of vindictive politics. -V. 85, p. 350, 409.

-V. 85, p. 350, 409.
Standard Steel Co., Pittsburgh, Pa.—New Plant in Operation.—The "Iron Trade Review" of Chicago on Aug 15 said: The new plant of the Standard Steel Car Co. at Hammond, Ind., is now in operation and is turning out between 25 and 30 completed cars per day. This plant is drawing its supply of plates and small shapes from the Illinois Steel Co. and Carnegie Steel Co.—V. 84, p. 1555.
Swift & Co.—Reported Acquisition.—See Schwarzschild & Sulzberger and New York Butchers' Dressed Meat Co. above. -V. 84, p. 107.

Demand by Stockholders.—A. L. Banister and Samuel S. Hatt, who claim to represent "a majority of the shareholders, both in actual numbers and in the amounts of their holdings" on Aug. 19 made public their demands upon the management in part as follows (see full statement in "New York Times" of Aug. 20):
Will you please ascertain the price of the shares of the United States Express Co., are any of their states and will you please ascertain the sold price out of the functional Express Co., or any of their states express Co. and the Southern Express Co., or any of their states express Co. and the sold price out of the treasmer all shares will you blease held by them to the Treasurer of the United States Express Co. Comparises and Basil w. Rowe and Franciscus and will you request the directors to return the creating are sheld by them to the Treasurer of the United States Express Co. Comparises and Basil price out of the treasurer all shares will you bring suit to compel such return? Will you request the directors to return the creating all you on the sail of the return the creating all to compel such return? Will you request the directors to return the creating all you on the sail of the return the creating and will you to the same? Will you please express Co. and the Adams Express Co. 'In the event of the return the creating allows on the same's salades, expenses and for legislation, or otherwise, and will you on the same? Will you please brine suit as allows on the same? Will you please the difference of the profits from the balking and express business diverted to them from the Dirted States Express Co. and the Adams Express Co. and the Adams Express Co. and the Adams Express Co. and the dams Express Co. and the Adams Express Co. and the dams Express Co. and the adams Express Co. Th

conflict with those of the American Express 60, and "personal" property "The committee insists that the items "real" and "personal" property and "Baltimore & Ohio Express contract" shown among the assets in the balance sheet on a preceding page are very much understated, and that in the statement of earnings for the six months ending June 30 1907 expenses properly chargeable to construction and equipment have been charged to operating expenses.

operating expenses. The committee states that it will answer all of the state-ments in Senator Platt's circular when the report of their experts who have been examining the company s books is completed. President Platt states that the committee is mistaken in its conclusion as to the company's condition and urges the shareholders to withdraw the proxies given to the committee and to send them to the company. See President Platt's statement in brief under "Annual Reports" on a preceding page.—V. 84, p. 1556. Victor Fuel Co. Denver. Col.—Report —For year ending

of Fort Collins, Colo. Western Union Telegraph Co.—Strike Still On.—While no settlement of the strike had been reached up to yesterday, and none was immediately in sight, officials of the telegraph companies reported that many of the operators were return-ing and additional branch offices were being opened from time to time. No negotiations, it was stated, will be entered into with committees representing the unions. Compare V. 85, p. 416. Westingheues Theorie Compare

Westinghouse Electric & Manufacturing Co.-Earnings.-For 4 months ending July 31 1907:

	Net income\$2,477,582 Interest, depreciation, &c. 1,099,874
Total net Income\$2,477,582	Balance for dividends\$1,377,708

-Eyer & Co., 37 Wall St., New York, will redeem the Japanese 6% bonds called for payment on Sept. 10 at par and accrued interest at 103, in exchange for approved bonds yielding 5 to 61%% income.

#### The Commercial Times.

## COMMERCIAL EPITOME.

Friday Night, August 23 1907.

Friday Night, August 23 1907. The condition of general trade continues favorable in the main, though the failure of a large grocery house and a pessimistic feeling among many regarding the financial situation have had a restrictive effect on some branches of business. Prices, as a rule, have continued firm, though a further decline has taken place in copper. TARD on the spot has been dull but firm on light offer-ings. City 85%c. and Western 8.95@9.05c. Refined lard has been easier, but mainly nominal. Refined Continent 9.55c., South American 10c. and Brazil in kegs 11.40c. The speculation in lard futures at the West has been mod-erately active with prices generally firm, owing to the sharp rise in grain quotations. Shippers have bought the near-by months of late and there has been a fair investment demand for January. The shipping demand has also shown some improvement. Some decline in live hogs is expected to curtail the receipts. Packers have bought to some extent. Outside speculation was restricted by telegraph strike. DALLY CLOSING PRICES OF LARD FUTURES IN CHICAGO

 Corber 1. 5.25c. February 5.80c. June 6.00c.
 Stovenber 6.00c. July 6.00c.
 SUGAR. - Raw has been dull but firm on light offerings.
 Centrifugal, 96-degrees test, 3.89c.; muscovado, 89-degrees test, 3.39c. And molasses, 89-degrees test, 3.00c. Refined has been dull and steady. Withdrawals on old contracts have continued light. The unfavorable reports in regard to the late fruit crops have checked new business. Refined 1.70@4.80c. Spices have been moderately active and steady. The unfavorable reports in regard to the late fruit crops have checked new business. Refined 1.70@4.80c. Spices have been moderately active and steady. The unfavorable reports in regard to the late fruit crops have been moderately active and steady. The reports conflicting. Beneficial rains have fallen in some sections but drought prevails in others.
 PETROLEUM. - Refined has been active for export and form; 73@76 degrees 18c. in 100-gallon drums. Spirits of turpentine has been firmer at 59½c. Rosin has been active and firm; 73@76 degrees 18c. in 100-gallon drums. Spirits of turpentine has been firmer at 59½c. Rosin has been active and firm, with trade fairly active. The reports in regard to the new crop have been more or less conflicting, but the tenor of many of the advices has been unfavorable. According to many, the prospects point to not more than two-thirds of an average yield. Drought has caused some injury to the plants, while nome sections of Wisconsin disastrous hail and wind storms have occurred. Havana has been strong and in fair request. There has been quiet and easier; lake 1834 (@ 19c. and dectolytic 1736 (@ 18c. Lead has been quiet and steady to 5.05@ 5.15c. Spelter has been dull and easy at 5.60@ 5.70c. Tin has been quiet but steadier; Straits 365(@ 37c. Tron has been more active and steady; No. 1 Northern \$21.70@ 822 20. SUGAR.—Raw has been dull but firm on light offerings.

# COTTON.

Friday Night, August 23 1907. THE MOVEMENT OF THE CROP as indicated by our telegrams from the South to-night is given below. For the week ending this evening the total receipts have reached 11,357 bales, against 8,763 bales last week and 7,460 bales the previous week, making the total receipts since the 1st of September 1906, 9,692,472 bales, against 7,833,369 bales for the same period of 1905-06, showing an increase since Sept. 1 1906 of 1,859,103 bales.

\* This year's figures estimated—not received on account of strike. The above totals show that the interior stocks have *decreased* during the week 2,870 bales and are to-night 30,435 bales less than at the same time last year. The receipts at all the towns has been 30,542 bales less than the same week last year last year.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since Sept. 1, as made up from telegraphic reports Friday night. The results for the week and since Sept. 1 in the last two years are as follows: are as follows:

		06-07		05-06

RECEIPTS FROM THE PLANTATIONS .- The follow ing table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the orop which finally reaches the market through the outports.

Wa	Week Receipts at the Ports.		Stock at	Interior	Towns.	Receipts from Plantai'ns.				
end'g		1907.	1906.	1905.	1907.	1906.	1905.	1907.	1906.	1905.
July	12	13,787	27,440	81,598	137,969	176.752	189.617		17.764	69.665

**	23	11,357	48,901	53,138		111.260			42,289	54.412

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1 1906 are 9,677,021 bales; in 1905-06 were 7,809,452 bales; in 1904-05 were 10.088,087 bales.

bales. 2.—That although the receipts at the outports the past week were 11,357 bales, the actual movement from planta-tions was 8,487 bales, the balance being taken from stocks at interior towns. Last year receipts from the plan-tations for the week were 42,289 bales and for 1905 they were 54,412 bales.

WEATHER REPORTS BY TELEGRAPH.-Telegraphic reports to us this evening from the South are in the main of a fairly satisfactory tenor. Rain has fallen in most localities, but on the whole the precipitation has been moderate or light, and over much of Texas dry weather has prevailed. It is claimed that in Texas the crop is deteriorating as a result of drought, but from elsewhere little or no complaint is made. Picking is not yet making much headway.

Texas .- The drought in Texas is practically Galveston, *Galveston, Texas.*—The drought in Texas is practically unbroken and the crop is deteriorating. Rain has fallen on one day of the week, the rainfall being seventeen hundredths of an inch. The thermometer has averaged 82, ranging from 76 to 88. *Brenham, Texas.*—We have had only a trace of rain on one day of the past week. Average thermometer 84, highest 94. lowest 74

94, lowest 74.

Corpus Christi, Texas.—We have had no rain during the week. The thermometer has averaged 83, the highest being 88 and the lowest 78.

Dallas, Texas.—It has rained on two days of the week, with rainfall to the extent of thirty-seven hundredths of an inch. The thermometer has ranged from 69 to 100, averaginch. 85 ing

Fort Worth, Texas.—We have had no rain the past week. Average thermometer 85, highest 96, lowest 74.

Henrietta, Texas.—We have had no rain during the week. The thermometer has averaged 92, the highest being 107 and the lowest 77. Huntsville, Texas.—There has been no rain the past week. The thermometer has averaged 86, ranging from 73 to 98. Kerrville, Texas.—We have had no rain during the week. The thermometer has ranged from 69 to 97, averaging 83. Lampasas, Texas.—We have had no rain during the past week. Average thermometer 84, highest 98 and lowest 70. Longview, Texas.—There has been rain on two days of the week, to the extent of thirty-two hundredths of an inch. The thermometer has averaged 85, the highest being 100 and

The thermometer has averaged 85, the highest being 100 and the lowest 69.

the lowest 69. Luling, Texas.—There has been no rain during the week. The thermometer has averaged 84, ranging from 72 to 95. Nacogdoches, Texas.—It has been dry all the week. The thermometer has ranged from 71 to 95, averaging 83. Palestine, Texas.—We have had rain on two days during the past week, the rainfall being twenty-eight hundredths of an inch. Average thermometer 83, highest 96 and lowest 70. Paris, Texas.—We have had rain on one day during the week, to the extent of fourteen hundredths of an inch. The thermometer has averaged 84, the highest being 98 and the lowest 69.

the lowest 69.

San Antonio, Texas.—We have had rain on one day during the week, the rainfall being four hundredths of an inch. The thermometer has averaged 84, ranging from 72 to 96. New Orleans, Louisiana.—Rain has fallen on three days of

The week, to the extent of forty-two hundredths of an inch. The thermometer has averaged 83. Shreveport, Louisiana.—There has been rain on two days the past week, the rainfall being one inch and twenty-nine hundredths. The thermometer has averaged 81, ranging

hundredths. The thermometer has averaged 81, ranging from 68 to 95. *Helena*, *Arkansas.*—Cotton is doing well, but corn is suffering for moisture. We have had showers here on one day during the week, the rainfall being seven hundredths of an inch, but there have been good rains in the neighborhood. The thermometer has averaged 81, the highest being 93 and the lowest 70

The thermometer has averaged 81, the highest being 93 and the lowest 70. *Memphis, Tennessee.*—Crop reports are generally good. The first bale was received on Thursday from Lexington, Holmes County, Miss., four days later than last year, and the same period of time behind the average. It elassed strict middling uplands, weighed 588 pounds, and was sold by auc-tion at  $40\frac{1}{2}$  cents per pound. It has rained on three days of the week, with rainfall to the extent of eleven hundredths of an inch. Good rain in immediate territory. The therof an inch. Good rain in immediate territory. mometer has ranged from 70 to 90, averaging 87.5. The ther-

mometer has ranged from 70 to 90, averaging 87.5. Mobile, Alabama.—The weather continues favorable and the plant is growing and fruiting well. Very little picking as yet. First new bale received here on Wednesday. There has been rain on six days of the week, to the extent of two inches and eighteen hundredths. The thermometer has aver-aged 81, the highest being 93 and the lowest 70. Montgomery, Alabama.—There are many reports of shed-ding and deterioration, but the cotton crop nevertheless is good. Two new bales were received this week, against about 25 bales up to the same time last year. There has been only a trace of rain the past week. The thermometer has averaged 81, ranging from 68 to 92. Augusta, Georgia.—There has been rain on two days of the week, the rainfall being eighty-seven hundredths of an inch. The thermometer has averaged 80, ranging from 70 to 92.

The thermometer has averaged 80, ranging from 70 to 92. Savannah, Georgia.—It has rained on six days of the week, with rainfall to the extent of two inches and fifteen hundredths. The thermometer has ranged from 69 to 90, averaging 75.

Charleston, South Carolina.—We have had rain on four days of the past week, the rainfall reaching one inch and twenty-two hundredths. Average thermometer 79, highest 90, lowest 72.

*Charlotte, South Carolina.*—We have had rain on one day during the week to the extent of six hundredths of an inch. The thermometer has averaged 76, the highest being 88 and the lowest 66.

The following statement we have also received by tele-graph, showing the height of rivers at the points named at 8 a. m. of the dates given:

	Aug. 23 1907. Feet.	Aug. 24 1906. Feet.

COTTON CROP CIRCULAR .- Our Annual Cotton Crop Review will be ready in circular form about Friday, Sept. 6. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to ensure early delivery.

FIRST BALE OF SEA ISLAND COTTON .- The first bale of Sea Island cotton of the crop of 1906-07 was received at Savannah, Ga., on Monday, Aug. 19, from Gainesville, Fla. It graded extra fancy and weighed 363 pounds. Last first bale of Sea Island cotton reached Savannah year the on Aug. 18 and in 1905 on Aug. 8.

WORLD'S SUPPLY AND TAKINGS OF COTTON.— The following brief but comprehensive statement indicates at a glance the world's supply of cotton for the week and since Sept. 1, for the last two seasons, from all sources from which statistics are obtainable; also the takings, or amount gone out of sight, for the like period.

Cotton Takings.	190	6-07.	1905-06.			
Week and Season.	Week.	Season.	Week.	783,000

JUTE BUTTS, BAGGING, &c.—There has been nothing doing in the market for jute bagging during the week. Prices are nominally unchanged at 9% c. for 2 lbs., standard grades. Jute butts dull at 3@4c. for bagging quality.

ALEXANDRIA RECEIPTS AND SHIPMENTS OF COTTON.—Through arrangements made with Messrs. Choremi, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria. Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the mervious two weers: of the previous two years:

Alexandria, Egypt, August 21.	190	6-07.	190	5-06.	1904-05.		
Receipts (cantars) — This week Since Sept. 1	6,80	565	5,83	100 76,852	$1,000 \\ 6,234,418$		
Exports (bales) —		Since Sept. 1.	This week.	Since Sept. 1.		Since Sept. 1.	
To Liverpool To Manchester To Continent To America	2,250	222,683 209,586 356,223 118,803	2,000	206,377 175,677 337,007 70,727	3,250	236,420 156,250 352,238 79,810	
Total exports	4,100	907,297	5,100	789,788	5,650	824,718	

Note .- A cantar is 99 lbs. Egyptian bales weigh about 750 lbs.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market continues quiet for both yarns and shirtings. The demand for both India and China is improving. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison.

BREADSTUFFS.

### Friday, August 23 1907.

<text><text><text><text>

the belief that technical conditions warranted something of a setback, has caused some reaction. Moreover, the tem-peratures of late have risen at the Northwest, and not a few reports have been received from that section stating that the reports have been received from that section stating that the damage from frost has been exaggerated, much of the wheat, according to these advices, having been cut previous to the fall in the temperature. The sharp advance in the price, furthermore, has had the effect of curtailing the export demand. To-day prices advanced sharply, owing to further reports of damage to spring wheat by the recent cold weather, much better cables than expected, small shipments from Argentina, reports of a good export demand, active buying by commission houses and covering of shorts.

May delivery in elevator 1111111 96 97 93 101% 99% 100% Indian corn futures have advanced, owing to cooler weather at the West, unfavorable crop reports from some sections and the sharp rise in wheat. Contract stocks at Chicago de-creased during the past week, and as the receipts have been on a small scale there are no prospects of any important increase in the supply there in the near future. Many con-sider the price relatively high, but short selling is held in restraint by the small confract stock. Furthermore, Liver-pool has shown considerable strength, influenced by the rise in this country and by reports of drought in Roumania. The shipping demand has increased and cash prices have been advancing. On the rise considerable realizing occurred and prices reacted, especially as temperatures have risen. To-day prices advanced, owing to active buying for long, higher Liverpool cables, unfavorable crop reports and covering of shorts.

# THE DRY GOODS TRADE.

New York, Friday Night, August 23, 1907. There has been little change in the character of the trading in the cotton goods market during the past week and while jobbing firms have enjoyed a considerable amount of activity, first hands have experienced rather a slow period. With buyers' excursions now in full swing, the number of representatives of retail houses at present in this city is very large and they have not failed to take advantage of the special sales at reduced prices organized for their benefit by jobbers, or, in fact, to quickly avail themselves of any opportunity to pick up goods at bargain prices. Under the circum-stances jobbers feel assured of a good fall trade and are inclined to take less notice of the unsettled financial situation. The latter, however, is still exerting a certain influence on the primary market and trading during the past week has been decidedly quieter. This is not causing any uneasiness, however, for business is expected to fall off during August and the majority of mills are not only very bare of stocks but are comfortably engaged for months to come. Moreover, the usual week's holiday of mill operatives around Labor Day is expected to be more generally observed this year and will result in deliveries running still further behindhand, although it will afford an opportunity for effecting necessary repairs. The men's wear woolen and worsted goods market is now in the between-seasons period but more interest is being shown in dress goods.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending Aug. 17 were \$3,287 packages, valued at \$339,511, their destination being to the points specified in the tables below:

FOREIGN DRY GOODS .- Imported woolen and worsted FOREIGN DRY GOODS.—Imported woolen and worsted dress goods are quiet with buyers showing little interest in the market. Silks are slow pending more settled conditions in the raw material market. Ribbons are in fair demand. Linens are strong and stocks are small. Burlaps are again easier on good crop prospects. **Importations and Warehouse Withdrawals of Dry Goods**. The importations and warehouse withdrawals of dry goods at this port for the week ending Aug. 17 1907 and since Jan. 1 1907, and for the corresponding periods of last year, are as follows:

News Items.

Alabama.—Legislature Adjourns.—The Legislature of this State adjourned Aug. 7

Georgia.—Legislature Adjourns.—The 1907 session of the General Assembly ended Aug. 18 at 3.26 a. m.

General Assembly ended Aug. 18 at 3.26 a. m. Louisville, Ky.—Decision Exempting the Property of the Louisville Water Company from State and County Taxes.— In a decision rendered in June, the Jefferson County Court held that the property of the Louisville Water Company— all the stock of which (\$1.275,000) is owned by the Com-missioners of the Sinking Fund of the City of Louisville— is not liable for State and county taxes. Under the Consti-tution of Kentucky "public property used for public pur-poses" is exempt from taxation. The decision was based on the ruling in the case of the city of Frankfort handed down in June 1906—94 S. W. Rep. page 648. In this last case the Court of Appeals on May 11 1907 denied the petition of the State of Kentucky for a rehearing. New York City.—Interest Rate on Future Bond Issues In-

the State of Kentucky for a rehearing. New York City.—Interest Rate on Future Bond Issues In-creased.—The Sinking Fund Commission on Aug. 22 took advantage of the power conferred upon it by a recent amend-ment to the City Charter (V. 84, p. 1260 and 1382), and increased the rate of interest on corporate stock and bonds as follows: On all long-time bonds issued to pay for general public improvements,  $4\frac{1}{2}\%$ ; bonds for the construction of rapid transit subways, 4%; on bonds to be deposited to the sinking fund account, 3%. It was subsequently explained that the rapid transit bonds excepted from the  $4\frac{1}{2}\%$  rate are bonds which are to be purchased with money from the sinking fund. They are not bonds which will be offered at public sale. The increase to  $4\frac{1}{2}\%$  on the bonds for public improvements was made necessary as money is needed in order to continue work on a number of improvements now under way, and the city has been unable to dispose of 4%bonds at par, owing to the present condition of the market. In explaining the cause of the increase of interest rate, Mayor McClellan says:

Mayor McClellan says:

In explaining the cause of the increase of interest rate, Mayor McClellan says: Tor the last three days I have done all in my power to be'p the Acting Comptoler sell 4% bonds. I find that in the present condition of the context there are no purchasers for city 4s at par except city contractors, fored to take bonds in sett ement of their claims. It is unfair to compto-ter to take bonds in sett ement of their claims. It is unfair to compto-ter to take bonds at par and re-sell them at a d'scount. The taken the best financial advice obtainable and have reached the we will have no difficulty in borrowing money at 4½%. It is absolutes precessary for the credit and good name of the city to pay its obligations of the day notify the heads of departments to limit their expend'tures a much as possible. This will not, however, apply to the completion of school buildings. Nor do I intend to discontinue work now under way ment would add to rather than help the present financial complications. The necessity of issuing long-term 44 % bonds is due to the fast that the thy has not the authority, of practically all other corporations, of issuing there period bonds to cover a time of money stringency. It is not the fu-ture to your difficult to establish this as the rate to be generally offered, but merely to sell sufficient bonds to obtain money now absolutely required. The order to guard against a repetition of the present situation, I intends for a short period and at a rate of interest conforming with market con-ditions. It is proposed to issue these short inter certificates under con-ditions that will enable the city to redeen them whenever it is possible of all 50-year bonds con favorable terms. The certificates will be reduced by the life of the short-time certificates. Thus, if a certificate were out-standing for one year, it would be replaced by a 49-year bond. The shinking tun-densition on account of any short-time certificates. This plan removes the criticism against the lissue of short-time bonds heretofore made

account of there being no fair method of collecting sinking fund installments for the redemption of such bonds. As an illustration, suppose the City of New York were to issue a certificate of one year at 6%, to be replaced and redeemed by a New York City bond issued for a period of 49 years at 4%. The additonal 2% interest paid for the 1-year certificate would make the average rate of interest paid for the 1-year certificate would make the average rate of interest paid place of resorting to the sale of high-priced bonds in a period of money stringency is therefore apparent.

#### Bond Calls and Redemptions.

Bolivar, Polk County, Mo.—Bond Call.—Payment will be made Sept. 1 of \$2,500 5% bonds dated March 10 1894. Securities are numbered 17 to 21 inclusive.
