REVIEW OF MARCH.

The distinctive feature, of course, during March was the passing out of the Roosevelt administration and the advent of Mr. Taft to the Presidency. That there is a difference in the character of the two administrations was made patent even during Mr. Taft's first month's tenure of office. The convening of Congress in extraordinary session March 15 for the consideration of tariff legislation followed as part of the change in administration. Mr. Taft's message regarding the tariff was very brief, but his inaugural outlined quite fully what are to be the policies of the new administration. As expected, he proclaimed adherence to the Roosevelt doctrines, but his remarks were in temperate language, and the message contained a number of reassuring features. He argued in favor of "needed amendments" of the Anti-Trust and the Inter-State Commerce Law, and expressed the intention of submitting recommendations to that end at the regular session of Congress. But he also laid down the proposition that "such a plan must include the right of the people to avail themselves of those methods of combining capital and effort deemed necessary to reach the highest degree of economic efficiency." Another suggestion in the message which was favorably received, was that it would not be wise to attempt anything but tariff legislation at the extra session.

The Tariff Bill, as introduced in the Lower House by Chairman Payne of the Ways and Means Committee, proved more radical than expected. Duties on leading articles of iron and steel were sharply reduced, steel rails, for instance, being cut from 7-20 of 1 cent per lb. to 7-40 of 1 cent per lb. and pig iron being reduced from \$4 per ton to \$2.50. Iron ore was put on the free list, and so was coal, wood pulp and hides. In timber, in leather and in wool the duties were sharply reduced. On the other hand, on a few articles like gloves and hosiery the new duty proposed showed an increase. A duty was proposed on tea, but not on coffee except from countries imposing an export duty on coffee. The bill also contained a proposal for a Federal inheritance tax, as recommended by President Taft in his inaugural message. This latter was at once vigorously antagonized by many of the States, some of the State legislatures passing resolutions condemning the proposal. The effect of the tariff discussion was more or less disturbing upon trade, since, necessarily, business men can not operate with any definite idea as to the future so long as tariff schedules are in doubt. As always happens, too, when

new legislation is under consideration, there were some disturbing suggestions, as for instance the proposal that a tax be imposed on the dividends of corporations, and also another proposal that an income tax be imposed.

Conditions in the iron and steel industry remained very much unsettled, owing to the cuts in prices made the previous month and the proposed reduction in tariff duties. On some articles of iron and steel further cuts in prices occurred during March. The failure of J. B. & J. M. Cornell Co., a long and well-known local concern in this city, manufacturers of structural iron and castings, excited much interest. Another important event of the month was a reduction in the wages of iron and steel workers by many of the companies outside the United States Steel Corporation. The Lackawanna Steel Co. was the first to make the announcement of a reduction; later in the month several other companies followed, including the Pennsylvania Steel, the Maryland Steel, the Republic Iron and Steel and the Cambria Steel. The reductions generally were 10% and scheduled to go into effect April 1. In the copper trade, too, there was further demoralization in prices and electrolytic copper sold down to 12½@12¼ cents. At the close of the month, however, large sales for home and foreign account were reported and the price again got close to 13 cents.

Possibility of the suspension of mining in the anthracite coal regions on the 1st of April with the expiration of the three-year agreement between the operators and the miners attracted more or less attention during the month, but did not exert much influence upon affairs. Conferences between representatives of the mining organizations and the heads of the different companies served only to emphasize the fact that the operators did not feel that they could grant either the increase in wages or any of the other demands made on behalf of the men. At the convention of districts 1, 7 and 9 of the United Mine Workers, held in Scranton, Pa., on March 25, it was voted not to declare a suspension of work April 1 pending an effort to secure an amicable agreement with the operators.

In foreign affairs an incident was the continued exports of gold from this centre. In addition to further shipments of gold coin to Argentina to meet the special demand for the metal in that form, there were large exports of gold to London direct. Altogether, about \$14,000,000 gold was engaged for London during the month and \$5,000,000 for Argentina. It was understood that the greater part of the shipments to London went to constitute a reserve for the joint-stock banks in London, which previously had not been accustomed to hold large stocks of bullion in their own vaults, they relying upon the Bank of England to help them out in an emergency, but which were now accumulating a stock of the metal in response, apparently, to a report made by a committee appointed last September by the Association of Chambers of Commerce of the United Kingdom to consider the laws relating to currency and banking in the Kingdom. This report commented on the small stock of gold held in Great Britain and suggested monthly statements by all the banks. At times some uneasiness was caused by renewed talk of the possibility of war between Austria-Hungary and Serbia, but at the close of the month a definite agreement was reached between Austria and the other signatory Powers to the Treaty of Berlin involving the submission of Serbia to the Austrian terms as to the recognition of the annexation of Bosnia and Herzegovina and the demobilization of the Servian army. Quite a stir was created in Great Britain during the discussion of the naval estimates in the House of Commons. The occasion for the

ferment was the statements made that Germany's program for a larger navy was being carried out with such energy that in the course of a few years—three or five—she would have nearly as many ships of the most destructive type (Dreadnoughts and Invincibles) as Great Britain, thus endangering British naval supremacy. The statements in their extreme form were denied by the German authorities, and Premier Asquith's plan, providing for the construction of four Dreadnoughts instead of the eight advocated by the opposition, finally prevailed. An incident of the alarm created by the debate was the offer of several of the colonies—in particular some of the Australian colonies and Canada—to provide some additional ships at their own expense for the benefit of the mother country.

Several court decisions during the month were of an assuring character. On its re-trial the case of the U. S. Government against the Standard Oil Co., for having shipped oil over the Chicago & Alton RR. at alleged concessions from the legal rates, completely collapsed, and the jury, on instructions from Judge Anderson in the U. S. District Court at Chicago, gave a verdict for the Oil Company. This was the celebrated case in which Judge Landis imposed a fine of \$29,240,000. The Government had claimed that, instead of the 6-cent rate, which was the prevailing rate on the Alton and on competing lines, the Oil Company should have paid 18 cents, but was unable to establish that there had ever been an 18-cent rate. As a result of this decision, it was announced from Washington, on apparently reliable authority, that it was likely that other similar cases would be abandoned—this contrasting sharply with the attitude of President Roosevelt when court cases went against the Government.

Strength dominated the exchange market until towards the close of the month. Rates reached the highest figures of the year, which accounts for the large engagements of gold for export referred to above. Among the influences in this strength were a demand to remit for sales of securities on London account and to cover a speculatively-created short interest. Furthermore, the relatively higher discounts abroad than the rates for money in New York contributed to transfers of capital to Europe. While the market was advancing, offerings of bills against the gold engagements contributed at times to an easier tone, and so, likewise, did the offering of some franc bills created by the placing in Paris of a portion of the new New York City bond issue. The decided weakness at the close followed from the decline in discounts in London, reflecting accumulations of American gold as reserve, and checking the transfer of bankers' balances for employment abroad. Minor depressing influences were moderate purchases of American securities by European bankers, investments by London in commercial paper and the drawing of finance bills. As a result of all this, exchange rates sharply declined and further gold exports became out of the question.

In the stock market great activity at rising prices developed the last few days of the month, and stocks sharply recovered all around after the previous month's great break in prices. For most of the first three weeks of March, however, the market was dull, narrow and irregular. Some stocks were strong and higher even during this period, such as Atchison, Reading, Chesapeake & Ohio, Union Pacific, St. Paul, Chicago & Alton, N. Y. Central, Wisconsin Central and Columbus & Hocking Coal & Iron Co. This last rose from 21½ Feb. 23 to 45½ March 26 and closed at 44½. Wisconsin Central advanced on the announcement that the "Soo" road had agreed to issue its "leased line stock certificates" in exchange for the preferred shares. Some stocks were weak for special reasons—the traction stocks (more particularly Third Avenue and Interborough-Metropolitan) on a fear that the reorganization of the traction properties would have to be very drastic, and Erie shares on the difficulty the company was expected to have in complying with the requirements of the Public Service Commission with regard to its proposed bond issue. In the buoyancy and activity, however, which oc-

curred at the close of the month practically the whole list participated.

Pronounced ease continued to rule in the money market, notwithstanding the large gold outflow. Early in the month it was reported that commercial paper of exceptionally high grade, maturing in six months, had been discounted at 2½%. French and German bankers were said to be buying such paper for investment. Collateral loans running for a like period were at the time quoted at 2¼@3, with some choice contracts taken at 2½.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of each call since August of 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of the city.

Nassau, People's, Williamstburgh) and a Total row. Includes Gain or Loss since Aug. 22 1907.

* Not reporting on account of suspension, and not included in total. x Formerly Jenkins Trust Co.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1909. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. All quotations in the column headed "Price about January 2 1909" were made on that date, except those in italics, which are the nearest in January 1909. The black-faced letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

For foot notes to tables see last page of Bonds and last page of stocks.

STATE AND MUNICIPAL BONDS.

It is not the custom in quoting municipal bonds to include accrued interest in the price given. Hence this accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark thus (f).

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

Bonds.	Bid.	Ask.	To Net.	Bonds	Bid.	Ask.	To Net.	Bonds	Bid.	Ask.	To Net.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the closing day of the month preceding the date of issue, though often are nominal. An asterisk (*) denotes sales. The letter (h) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

ALABAMA—Nat. banks last call Feb. 5; State institutions latest returns.
