ONE AND DEPEYSTER STS., NEW YORK

REVIEW OF MAY.

The controlling considerations during May were favorable, and this fact was reflected in a further increase in trade activity and a further advance in prices on the Stock Exchange. Perhaps the two influences of greatest importance during the month were the decided improvement in the metal trades, more particularly in iron and steel and in copper, and the decision of the U. S. Supreme Court in the case involving the constitutionality of the so-called Commodities Clause of the Hepburn Rate Law. This latter had been rather anxiously awaited by those interested in the coal properties, since it was feared that a decision upholding the validity of that clause would necessitate a severance of the coal-mining business from the carrying business in the case of such companies and thus prove highly prejudicial.

As it happened, while the Court upheld the constitutionality of the provision referred to, it construed the language in such a way as to relieve it of its objectionable features. The U. S. Circuit Court for the Eastern District of Pennsylvania, accepting the construction contended for by the U. S. Government, had the previous September, by the majority opinion of Judges George Gray and George M. Dallas, declared the provision invalid. But the U. S. Supreme Court, speaking by Justice White, says that the law, rightly construed, does not embody any such vast and extensive prohibitions as urged by the Government. It is the view of Justice White and of all his colleagues that a proper construction of the Commodities Clause is that it prohibits the transportation by railroad companies only of commodities owned *at the time of transportation*—that it does not prohibit them from transporting commodities manufactured, mined or produced by them previous to such transportation but which are not owned by them at the time of transportation. The Court also held (Justice Harlan alone dissenting) that the provision does not apply to the transportation of commodities owned by other corporations in which the transporting railroad company may have a stock interest. The effect of the decision of course was to leave the coal-carrying properties unharmed. As concerns those companies which hold control of the coal mines through outside companies, the Court expressly holds that such control does not come within the prohibition of the law; and as regards the companies which directly own the mines (numbering among the anthracite companies only the Delaware & Hudson and the Delaware Lackawanna & Western), the only requirement is that they shall

have divested themselves of the ownership of the coal—that is, should have sold it—before transporting it. With the situation thus clarified, there was a noteworthy jump in the price of the shares of the anthracite companies and this in turn gave a further impetus to the general upward movement on the Stock Exchange.

The improvement in the iron and steel industry was quite general in its nature and was observable in nearly all directions. There were reports that the Republic Iron & Steel Co., the Cambria Steel Co., the Jones & Laughlin Company and the other independent concerns which had on April 1 reduced wages of steel workers 10% contemplated a restoration of the old wages with the 1st of June. It appeared, however, that in the case of the Republic Iron & Steel Co. the changes involved merely a correction of some inequalities in wage rates. In the case of the Cambria Steel, the Jones & Laughlin Co., the Shenango Furnace Co. and some other independent concerns, the restoration was confined to the blast-furnace workers. But even this last was very significant as an indication of the tendency in that regard, for it showed that these blast-furnace workers had been obliged to accept the rate reductions for a period of only two months—that is, from April 1 to June 1. In other words, the cut in wages had scarcely been in operation for more than a few weeks before it was felt that the situation had improved sufficiently to warrant a return to the old scale.

There can be no doubt that there has been a noteworthy revival in the iron and steel trade, many of the mills and furnaces reporting enough orders on hand to keep plants engaged to about 90% of their capacity. This is the more noteworthy inasmuch as tariff legislation continued to drag in Congress and inasmuch also as orders for railroad material were still of limited volume, though even here there was a decided change for the better and some fairly large orders were placed. A very general appreciation in the market prices of iron and steel products occurred.

In the copper trade there was also noticeable improvement under an increasing demand, and lake copper advanced to 13½c. per lb. and electrolytic copper to 13¼c. The death of Henry H. Rogers occurred on the 19th, but was without influence either in the copper market or on the Stock Exchange. The noteworthy revival of activity in the iron and steel industry led to a further rise in the shares, both common and preferred, of the United States Steel Corporation, though here there was a further stimulating circumstance in the election of Mr. J. P. Morgan Jr. to the board of directors of the company to fill the vacancy caused by the death of Mr. Rogers. Both Steel common and Steel preferred made new high records and sold up to the highest figures in their history, the common on May 28, the last business day of the month (Saturday, May 29, and Monday, May 31, being holidays), touching 64¾ and in June getting still higher.

An encouraging event in the railroad world also deserves mention. The Erie Railroad Co. announced that it had disposed of the remaining \$4,500,000 of the \$15,000,000 6% collateral gold notes authorized in April 1908, and that this would amply provide for the company's present cash requirements; accordingly, that it would not be necessary after July 1 1909 to continue funding coupons of the general lien bonds and the general mortgage convertible bonds. A local matter in railroad circles, without influence elsewhere in the railroad world, was a strike on the Georgia RR., which began May 17 and lasted for thirteen days. It was caused by the discharge of ten white firemen and an attempt to put negro firemen in their places. This was resented not only by the men themselves but, apparently, by the whole population along the line of the road, so that it became unsafe to run trains manned by colored firemen. The Federal Government, through Martin A. Knapp, of the Inter-State Commerce Commission, and Labor Commissioner

Neill, sought to bring about a readjustment and on May 29 a settlement was reached and the strike ended, the men being allowed to return to work under the conditions existing before the trouble began.

The speculation in wheat was renewed and prices carried higher even than in April. The Government report on winter wheat, issued May 7 and showing the condition May 1, was much less favorable than had been hoped for. It made the average for the whole country \$3.5, as against \$2.2 April 1, but as against \$9 on May 1 1908 and a ten-year average of \$6. Moreover, it showed the area remaining under cultivation May 1 as only 27,871,000 acres, as against 30,034,000 acres sown last fall. Mr. James A. Patten returned after his sojourn on his ranch in Colorado, and this seemed to infuse new spirit into the speculation. In April the high point for the May option in Chicago had been \$1 29¼; in May this option at Chicago sold up to \$1 35¼; in New York the May option touched \$1 41, as against \$1 34½, the high point in April. The July option at Chicago advanced from \$1 11⅜ May 1 to \$1 19½ May 25, with the close May 29 \$1 17¼. In New York this option rose from \$1 18¼ to \$1 26⅞, with the close \$1 25. Corn and oats also again moved upward, the May option for corn at Chicago advancing from 70¾ cts. to 75½ cts., with the close May 29 74¼ cts., and the July option rising from 67⅞ cts. to 71⅞ cts., with the close 70 cts. May oats at Chicago rose from 56 to 63 cts., with the close 58¾, and July oats from 49½ to 56, with the close 53½.

In cotton there was likewise a further pronounced upward movement, and on May 20 middling upland cotton in New York sold at 11.80 cts., against 10.85 cts. May 1 and 10.90 cts. April 30; the close May 28 was at 11.40 cts. The rise in the price of the raw material had a stiffening effect on prices of cotton goods, but the American Printing Co. made a reduction of ½ ct. a yard, to 4¾ cts., in its price on printed wash fabrics. This reduction, however, was ascribed to conditions peculiar to printed fabrics, these being apparently in temporary over-supply. Print cloths at Fall River were 3⅞ cts. bid at the close of the month; previously, 3 7-16 cts. had been the nominal price since the preceding December.

Foreign exchange rates ruled high and gold exports continued in large volume until the last week, when the outflow temporarily ceased. The controlling influences were the diminished shipments of leading commodities, in particular grain and cotton, owing to the high prices prevailing for such commodities; the large merchandise imports, caused in part by expectations of tariff changes; and selling of American securities by London to realize the profits resulting from the advance in prices on the Stock Exchange. The demand for remittance was so urgent and bills were in such limited supply that coin was finally taken for shipment in large amounts in the absence of an adequate supply of gold bars (the output of the latter being limited by the capacity of the Assay Office at this point) and exchange rates rose sufficiently to make the operation profitable. The gold engagements for the month aggregated \$10,000,000, of which about \$4,500,000 went to Paris and \$2,000,000 to Holland and \$3,200,000 to Argentina. The shipments to Paris occurred notwithstanding that a new element of cost entered into the transaction by reason of the fact that, in consequence of the strike of the postal employees in France, it was deemed advisable to insure the gold while in transit from Havre to Paris.

half of the month the dealings were of small volume, but the striking spurt in the price of the Steel shares with the election of J. P. Morgan Jr. as a director of the company and the multiplying evidences of trade activity gave a renewed fillip to the whole market and the tone at the close was buoyant.

In the stock market the United States Supreme Court decision in the case of the Commodities Clause of the Inter-State Commerce Law came early (May 3) and exercised a potent influence on values throughout the month. In some of the anthracite properties the advances were almost phenomenal, this applying more especially to Central of New Jersey and Delaware & Hudson, and the rise in these carried the whole market upwards. The industrial shares mounted upward on the expanding activity in trade, and Amalgamated Copper and other copper properties were strong on the rise in the price of the metal. As a matter of fact the trend was distinctly towards a higher level all through the Stock Exchange list, and numerous new high records for the month were again made. The last

In the money market there was still greater ease, notwithstanding the large gold shipments. There was active bidding for commercial paper and rates for the same dropped to very low figures—3@3½% for choice 60 to 90 days double names.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of each call since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of the city.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1909. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. All quotations in the column headed "Price about January 2 1909" were made on that date, except those in italics, which are the nearest in January 1909. The black-faced letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

For foot notes to tables see last page of Bonds and last page of stocks.

BONDS—PRICES AND SALES FOR MAY AND THE YEAR TO DATE.

GENERAL QUOTATIONS

OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.
2. Quotations from all Stock Exchanges are as near as possible for the closing day of the month preceding the date of issue. As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "f" is prefixed to the price, he must pay accrued interest in addition to the price. In other words, the letter "a" previously used to indicate that interest must be added is now dropped, this feature being such a common one.
3. The letter "f" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment.
4. Stock prices marked thus (d) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.
5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.
6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.
7. The black-faced type in the letters showing the interest period indicates the month when the bonds mature.

NOTICE.—All bond prices are now "and interest" except where marked "f."

STREET AND ELECTRIC RAILWAYS

In quoting street and electric railway bonds we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter "f" where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, "f" appears against a quotation the buyer will understand that the accrued interest is to be added on.

NOTICE.—All bond prices are now "and interest" except where marked "f."

STATE AND MUNICIPAL BONDS.

It is not the custom in quoting municipal bonds to include accrued interest in the price given. Hence this accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (f).

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the closing day of the month preceding the date of issue, though often are nominal. An asterisk (*) denotes sales. The letter (h) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.
