EDITION FOR 1910 NOW READY FOR DELIVERY

"This is by far the most elaborate, comprehensive and effective analysis of American railroad values that has yet been produced. It contains a wealth of finely reasoned argument on the merits or demerits of the various roads and their securities, and in short it gives evidence of many months of scientific labor, which speaks volumes for the enterprise and industry of Mr. Moody and his staff of assistants."

—London Financial News, London, England.

Moody's Analyses of Railroad Investments

SECOND ANNUAL NUMBER 1910

BY JOHN MOODY

WHAT has been a crying need among Bankers, Financial Institutions and investors for at least a decade has been a method for intelligently and uniformly ANALYZING the statistics of the railroads. To the average investor, railroad accounting is a complex matter, and the examination of a railroad report generally becomes more difficult as the report grows in completeness. For example, the traffic statistics often seem hard to analyze; the income account does not seem to convey a clear statement of actual results, and the capitalization items and investment accounts appear too involved for simple interpretation; while, most serious of all, the relative position of the bond and stock issues of the system seem often wrapped up in mystery.

To INTERPRET all these matters is the purpose of
Moody's Analyses of Railroad Investment

It ANALYZES the annual reports of all the railroads in the country by a method which enables the user of the book to ascertain at a glance the TRUE VALUE of all the Bond and Stock issues. Bankers and Brokers frequently hire experts at fees ranging all the way from \$100 to \$1,000 each to analyze particular railroad systems for them. This book furnishes equally complete analyses of all the railroads in the United States, the figures being brought down to the latest possible dates, and the subject treated in every case in an absolutely impartial and unbiased manner.

Being a 4.15% basis

Subject to prior sale, the opportunity is offered to holders of the Lehigh & Wilkes Barre Coal Company 4½% Bonds maturing June 1, 1910, who desire to exchange their maturing Bonds at par and interest for the new issue of 4% Bonds on a 4.15% basis as above. Holders desirous of making the exchange should deposit their bonds with Messrs. J. P. Morgan & Company of New York, or Messrs. Drexel & Co., of Philadelphia, at the same time declaring which maturity they select.

Should all of the bonds of the desired maturity have been already taken, bonds of the nearest available maturity will be allotted. Negotiable receipts will be issued pending the delivery of the new bonds.

This offering is subject to withdrawal without prior notice, and exchanges are to be made as of June 1, 1910.

Attention is called to the letter of George F. Baer, Esq., President of the Lehigh & Wilkes Barre Coal Co. (copies of which may be obtained at our offices), in which he states the net earnings of this property for the last two fiscal years, the estimated coal tonnage and the operations of the Sinking Fund.

We carry at all times a conservative line of high-grade Investment Securities, including:

CHICAGO REAL ESTATE MORTGAGES

In amounts of from \$10,000 to \$100,000 each, secured upon valuable improved Chicago Real Estate. Our judgment in such important requirements as valuation of security, quality of improvements, desirability of location and income value is the result of over forty years' active and continuous experience in the Chicago field. Such mortgages yield from 5 to 6%.

CHICAGO REAL ESTATE SERIAL GOLD BONDS

In denominations of \$500 and \$1,000 each, secured by first mortgage upon high-grade modern Apartment Buildings, well-located Mercantile or Manufacturing Buildings, or large modern down-town Office Buildings—a most convenient and desirable form of investment yielding from 5 to 6%.

RAILROAD, CAR EQUIPMENT AND TRACTION BONDS

Having behind them in every case a substantial margin of security, successful history, ample earnings and sound management. Such bonds yield from 4½ to 5½%.

STEAMSHIP BONDS

First Mortgage Serial Bonds secured upon modern Steel Steamships on the Great Lakes enjoy an enviable reputation in the investment market. After a most searching investigation, we have been unable to discover a single instance of default in interest or principal in such issues. Such bonds are a legal investment for Michigan Savings Banks and yield 5%.

INDUSTRIAL BONDS

Secured upon such staple natural resources as Timber, Coal and Iron Ore Lands, which are steadily increasing in value, and which are so developed as to have ample income-producing capacity for the protection of principal and interest. Also the bonds of well-known manufacturing corporations having long-established and successful histories. The margin of security in such bonds is invariably very large, and the bonded debt is always payable in substantial annual or semi-annual amounts, thereby increasing the value and safety of the investment from year to year. These bonds net from 5 to 6%.

THE FINANCIAL SITUATION.

Undoubtedly the most favorable factor in the situation at the moment is the determination reached by railroad managers to make a general increase in rates to offset the tremendous augmentation in the expenses of the roads and the widespread advances in wages to which the roads have agreed in order to avert strikes and prevent interruption of traffic operations. The future of the railroads would have to be regarded as very dubious if their charges for transporting goods and passengers could not be raised as the cost to them of rendering the service increased.

The situation confronting railroad officials is well illustrated by some of the monthly returns of net earnings that have been coming to hand during the last two or three weeks. We referred to a number of these in our issue of last Saturday, and will to-day cite only one additional case, namely that of the New York Central, whose return for the month of March has come to hand the present week. Gross receipts are satisfactory enough, the total of the gross in March this year having been \$8,073,534, as against only \$7,334,719 in March last year, giving an increase of \$738,815, or 10%. But note how the expenses have run up. These amounted to no less than \$6,895,853 this year, against only \$5,322,678 last year, thus showing an augmentation of \$1,573,175, or nearly 30%. As a consequence, net earnings actually record a decrease for the month in the large sum of \$834,360, the company having earned only \$1,177,681 net in 1910 against \$2,012,041 in 1909. Perhaps it will be said that this is only an isolated month. Take, therefore, the results for March in conjunction with those for January and February. For the three months combined the Central increased its gross earnings over 1909 in amount of \$2,412,197, or 12%, but in the same three months there was an augmentation in expenses of \$2,548,136, or over 16%. Consequently, the outcome of the \$2,412,197 gain in gross earnings is a loss of \$135,939 in net. In other words, the Central did a greatly increased business, but owing to the augmentation in the cost of the work, it is actually poorer off in net.

Remember, too, that this is the situation before the recent advances in wages had gone into effect to any great extent. Remember, furthermore, that the Central is now obliged to earn dividends or interest on a much larger capitalization, it having put out \$44,658,000 new stock in January, only \$21,966,615 of which was to take up existing obligations, the remainder being for additions and improvements to meet the imperative demands of an increasing business. This is entirely independent of the \$30,000,000 4½% equipment trusts created the present year to cover the needs of all the various lines in the Central System for additional rolling stock. We take the return of the New York Central for illustration because it is the very latest report of the kind that has reached us, though we might just as well have used the return of the Atchafalaya, or that of the Northern Pacific, or that of the Rock Island, or the Union Pacific, or a host of others. The feature in the exhibits of all these roads is the enormous growth in the expenses.

In these circumstances, the fact that the managers of the different properties, moved by a common impulse, are giving notice of contemplated advances in

rates, is invested with great significance. We referred last week to the fact that Western roads had filed new tariffs with the Inter-State Commerce Commission providing for advances in freight rates to go into effect June 1. These advances cover many classes of goods and commodities and seem to average about 10 to 15%, the additions being largest in amount in the case of the higher classes of goods, where increases would be very little felt. We also referred last week to the increases in passenger rates (particularly in the commutation rates) being made by many different roads in this part of the country. That movement has become still more general the present week, one road after another falling into line.

But, most important of all, the railroads east of Chicago have given notice of an intention to advance their so-called "class" rates, the increases ranging from 10 to 20%, the new rates to become effective about July 15. The Chicago papers report that information to this effect has been given to H. C. Barlow, Traffic Director of the Chicago Association of Commerce, and to John M. Glenn, Secretary of the Illinois Manufacturers' Association. Sixth-class freight rates between Chicago and New York are to be advanced from 25 cents to 27 cents, fifth-class from 30 to 33 cents, fourth class from 35 to 40 cents, third class from 50 to 60 cents, second class from 65 to 78 cents and first class from 75 to 90 cents. It is not proposed at present, it seems, to advance the so-called commodity rates, but these, the presumption is, will be raised later on.

It has been hinted in certain quarters that in raising their transportation charges at this time railroad managers are seeking to anticipate the probable enactment of the Railroad Bill now under consideration by Congress, which would make it impossible to increase rates except with the consent of the Inter-State Commerce Commission. But that is merely idle talk. The officials are taking the step because the salvation of the properties depends upon it. We are told it is not good policy to put up tariff charges when Congress is devising new laws for curbing and restraining the activities of the roads. Possibly not. But when the question is one concerning the very solvency of the roads, matters of policy are apt to receive only scant consideration. It is necessity that is moving the administrative officials—nothing else.

As stated last week, the estimate is that the advances in wages which the railroads of the United States have been called upon to make will add \$150,000,000 to their yearly expenses. Obviously, the managers would be derelict in their duty if they did not undertake to arrange for this added yearly outlay, the more so as all the roads are being obliged to make enormous additional outlays of capital to provide the facilities which public convenience and necessity demand for the conduct of their business. Shippers and travelers are opposing the move, but what alternative is there for meeting the present and prospective increases in expenses which the growth of traffic, large though it be, is not sufficient to take care of?

Previous to the present year, railroad managers have acted very cautiously about raising their transportation charges. They have been afraid of incurring public hostility. At the time of the panic, when railroad revenues suffered such tremendous shrinkage and when railroad labor refused to agree to any reduction

in wages, they had the matter under serious consideration. But they were told by those high in authority at Washington that they must neither reduce wages nor increase rates. Now they have got to a point where they can no longer take counsel of timidity. If wages cannot be cut in dull times, but must be further advanced as soon as industrial conditions improve, and if the companies are to respond to the constant demand of the public for increased service and for better accommodations and facilities, then they must be supplied with the wherewithal to continue their existence. As we explained last week, the situation of the railroads in this matter is really no different from that of the producer or manufacturer. These latter, when they find the cost of manufacturing and handling their goods rising, seek compensation for the added outlay by charging a higher price. The thing the railroads have to sell is transportation, and as the cost of the transportation work advances, so the compensation asked for the same must also be allowed to go up if bankruptcy would be averted.

The community would itself be the worst sufferer should the carrying interest be reduced to insolvency. Not only would the public suffer through the inability of the carriers to furnish proper service, but it would also, and still more, suffer through the curtailment of the spending power of the roads. Aggregate gross earnings of United States railroads in normal times now exceed \$2,500,000,000 per year, and with this earning capacity impaired to any great extent, and with the annual supplies of new capital for the use of the roads cut off to the extent of many hundred million dollars annually, there could be only one result, namely industrial disaster, as we saw during the panic. Merchants and shippers should take counsel of their better judgment and not deny to the carrier the right which they always ask for themselves, namely that of grading the selling price in strict accordance with cost.

Very little comfort is to be extracted from the Administration Railroad Bill, which passed the House of Representatives at Washington the present week. When this Administration measure emerged from the House Committee on Inter-State and Foreign Commerce, after months of discussion, and was reported favorably with a number of further objectionable amendments, it seemed inconceivable that anything worse could be devised and receive approval at the hands of the members of the House. The actual outcome only shows how easy it is to be mistaken on such a point. The two sections in the bill which appeared to have any redeeming feature in them, namely Section 7 and Section 12, have been stricken out. The one would have permitted the roads to enter into agreements among themselves under the surveillance of the Inter-State Commerce Commission and the other would have allowed them to perfect control of properties in which they already hold a majority interest. At the same time the House refused by a most decisive vote to eliminate the really destructive long-and-short-haul clause and grafted on the bill certain new features whose effect is to make the measure still more radical and harmful. A clause has been inserted providing for the physical valuation of the property of the roads, and still another bringing telegraph and telephone companies within the scope of the Act.

As the bill stands, the Commission is given the power to initiate rate reductions and to hold up proposed advances in rates, while there is scarcely a move the managers of a line can make, either in the matter of fixing rates, or classifications, or the issue of stock or bonds, that does not require the antecedent consent of the Inter-State Commerce Commission. The Commission also has the right to establish through routes and joint rates and to do this upon complaint or upon its own initiative. But President Taft appears to be entirely satisfied with the situation. In a speech on Monday night at the dinner given to him by the Passaic Board of Trade he took pains to declare (after reviewing the changes that have been made in the measure) that this Railroad Bill, which, he said, was in many respects the most important of the Administration measures, "still retains its important features." He seemed to think that Sections 7 and 12, which have been cut out, are of very little consequence anyway. We are inclined to agree with him in this, but hardly expected him to make the admission. The permission which would have been given to enter into agreements was so hedged about with qualifications and conditions as to be practically worthless. Nevertheless, there was at least a semblance of fairness and conservatism in the two sections referred to, and the fact that the House of Representatives refused to accept even such qualified provisos is a sad commentary upon the spirit that is animating the lower branch of Congress in the execution of such an important piece of legislation. The hope for a better bill must now rest entirely with the Senate. The draft of the bill, as reported in that body by the Committee on Inter-State Commerce, is in some particulars much less radical than the House measure; and action on the different sections of the bill which have been thus far considered in that branch has shown that a majority can be found against one or two of the most dangerous propositions which the House is seeking to enact. An evidence of this is furnished in the modification by the Senate yesterday afternoon of the revolutionary proposal of the House for altering the long-and-short-haul clause.

The report of the Agricultural Department at Washington issued Monday, regarding the growing winter-wheat crop, came as an agreeable surprise. The report shows the condition May 1. During April all sorts of unfavorable rumors were current speaking of deterioration. On top of this there came the storms and frost and cold weather of April 23 to April 25, and accordingly every one was prepared to find that the outlook for the plant had been seriously impaired. Instead of that, the Agricultural Department actually reports a small improvement during the month, making the general average of condition May 1 82.1, against 80.8 April 1. At 82.1 the condition is but little below that for May 1 last year, which was 83.5, and it compares with 89 on May 1 1908 and a 10-year average of 86.7.

Another particular in which the result is better than expected is in the matter of the area remaining to be harvested after allowing for that which has been winter killed. The figures confirm that there has been a much larger percentage of winter killing than usual. In fact, out of a total of 33,483,000 acres sown last autumn, only 29,044,000 acres are reported

as remaining under cultivation on May 1. This is a loss of 4,439,000 acres, or nearly 13.3%, and compares with an abandonment of only 2,163,000 acres, or 7.2% in 1909, and 1,318,000 acres, or 4.2% in 1908. But the important fact is that even after allowing for the large amount of land thrown out, the area under winter wheat still is 714,000 acres larger than that from which the crop was harvested last year.

Percentages of abandoned area are noticeably heavy in such important wheat-growing States as Kansas, Nebraska and Missouri, being reported as 35% or over one-third of the planting in the first named and 28½ and 17½% in the other two. Condition in the same localities is also low this year, that for Kansas, at 65, comparing with 84 on May 1 1909 and a 10-year average of 87; Nebraska's percentage standing at 67, against 83 and 91, and Missouri's 73 contrasting with 82 and 90. But, as it happens, in many other States prospects are very much better than a year ago, Ohio, California, Texas, Oklahoma, Pennsylvania, Washington and Michigan being most conspicuous in this category. Accordingly the general promise of May 1 was far from discouraging. Furthermore, latest telegraphic advices from important sections of the wheat belt furnish evidence of an improvement since May 1 that will mean very much if continued throughout the month. As matters now stand, the outlook seems to be for a crop a little larger than the winter yield of last year.

More encouraging views have prevailed the last few days regarding conditions in the copper trade, and accordingly the price of the metal has advanced somewhat. We are glad to see that the Copper Producers' Association is not going to withhold its monthly statements, as it was hinted a few weeks ago it might do. That in itself is occasion for gratification, for if the state of the copper trade had got so bad that the facts would no longer bear the light of day, then indeed would there be occasion for anxiety. The usual monthly figures were given out on Monday. They were not as satisfactory as could be wished. April having been a month of only 30 days, production was somewhat less than in March, when there were 31 days. In other words, the output of marketable copper in the United States from all domestic and foreign sources during April reached 117,477,639 pounds, against 120,067,467 pounds in March; but deliveries for consumption and export also fell off, being only 99,318,354 pounds, against 103,430,585 pounds. The domestic consumption was somewhat larger, at 67,985,951 pounds, but the exports were smaller, at 31,332,403 pounds. As a consequence, there was a further addition during the month of 18,159,285 pounds to the stocks of marketable copper in the United States, bringing the aggregate of these stocks up to 141,984,159 pounds on April 30, as against 98,463,339 pounds Jan. 31.

Since the beginning of May, however, large sales of copper have been reported, and from this very satisfactory conclusions are drawn. The result has been, as already stated, slightly higher prices for the metal. Whether there is to be permanent improvement now, only the event can determine. Obviously, sales are of less consequence than consumption. If copper is merely being bought because it seems cheap and hence is kept on hand instead of being used up, the situation

is not changed any for the better. It has happened many times in the past that sales have been large without any real improvement being effected in the condition of the trade. For instance, during the last two years under the large exports of the metal the foreign visible supply has been steadily augmenting, with the result that the foreign stocks of the metal became a menace to the market. The last two months, fortunately, under the diminution in the foreign takings, the foreign visible supply has been somewhat reduced. The change is as yet very slight, but at least it is in the right direction. On May 1 the foreign visible supply was reported at 246,863,680 pounds, as against 254,139,200 pounds March 1. The total, nevertheless, remains very large, as is evident from the fact that the amount now, at 246,863,680 pounds, compares with only 59,680,320 pounds in May two years ago.

Western bankers, perhaps a little tardily, are realizing that the speculation in land, to which they have been parties through somewhat extensive lending of money, is surrounded with unfavorable features. One regrettable consequence has been an unprecedented efflux of farmers from our Northwestern States to Canada, the emigrants having sold their holdings at fancy prices to newcomers, who in many instances have been obliged to mortgage the land in good part in order to pay for it and to purchase necessary stock. That bank loans have expanded abnormally throughout Western sections of the country was clearly revealed by the last returns issued by the Comptroller of the Currency, and now we learn that a more cautious policy has been resolved upon. "Most of the bankers have decided to be very conservative in lending money this year until the situation changes," one Chicago banker declares, after personally investigating the position in several States.

The United States supplied Canada with no fewer than 103,789 immigrants during the year ended March 31 last while only 57,930 came from the Dominion to this country. Our Commissioner-General of Immigration states that the farmer who sells out and goes to Canada is followed by the merchant with whom he has done business and then by the manufacturer. In the preceding year 146,908 immigrants entered Canada from all countries, of whom 42,865 were farmers or farm laborers from the United States and 2,066 were clerks or merchants. For a period of eight years the statistics show that the influx of immigrants into Canada was greater from this country than from England, constituting, in fact, one-third of the grand total.

Immigration from over-sea into both Canada and the United States is of unparalleled volume. In the first week of May 14,000 foreigners arrived at Dominion ports, a figure never before recorded, fully 75%, it is stated, were booked through to the western provinces. This influx followed arrivals in April of more than double the number received in the corresponding month of 1909 and was well ahead of 1908, when the previous high point was reached. Turning to the United States, the statistics are equally impressive. Last week the incoming steamships brought from Europe 40,616 steerage passengers, while a week earlier the total was 34,175. The current week's arrivals will swell the aggregate for the current calendar year to approximately 400,000, the inflow having a week ago reached

376,458, as compared with 351,645 for the same period in 1909. Italy is contributing a very large proportion of the total. In Great Britain there is no unusual lack of employment; the labor exchanges recently opened by the Government are finding work for men at the rate of fully 5,000 weekly, notwithstanding that only 100 of the 250 exchanges authorized by Parliament have so far been opened, and then it is to be noted that British trade is broadening very satisfactorily, the April imports having shown an increase of \$51,900,000 and the exports a gain of \$31,500,000.

Security markets were handled with great skill both abroad and at home by the leading financial interests and no disturbance followed the sudden death of King Edward, which we noted last week. The London Stock Exchange was closed on Saturday, but the support tendered the New York stock market during the one hour that our Exchange remained open indicated conclusively the course that was to be adopted by international bankers. When business was resumed in London on Monday, prices exhibited remarkable strength, and at no time has demoralization been threatened. The fears expressed here that the placing of large blocks of our new securities in Europe would be interfered with, if not entirely checked, proved baseless. Negotiations have progressed very satisfactorily, especially in France, where the movement has been taken up by almost all the powerful banks, and the estimate that upwards of \$100,000,000 will be absorbed abroad is likely to prove well within the ultimate mark. The banking syndicates that have been formed in Paris are expected to make public offerings during the current month, and as money there is still very cheap ($2\frac{3}{8}\%$), the prospects are that the various issues of high-grade railroad bonds and notes will be readily absorbed. Although details are still lacking, the terms granted by the American borrowers must unquestionably have been more generous than the French investor could obtain elsewhere. However, the demands for capital may bring about a material advance in money rates later on and thus prevent a continuance of the output on the large scale of the last fortnight. Germany has made moderate purchases; the Reichsbank is building up its cash resources and reducing its liabilities at a satisfactory pace, so that discounts there have declined to only 3%, which is 1% below the official rate. London has also subscribed for new bonds, but during the latter half of the week stocks have been sold here, thus counterbalancing to some extent the favorable influence upon the international exchanges.

George V. was on Monday proclaimed, with elaborate ceremony, "King of the United Kingdom of Great Britain and Ireland and the British dominions beyond the seas, Defender of the Faith and Emperor of India." Since his father's death, which we noted last week, the new King has created a favorable impression by his private acts and his public announcements. King Edward's reign and the larger results of which it was fruitful are treated at length elsewhere in this issue; it need only be said here in passing that no sovereign in modern times has evoked more universal or more cordial eulogies for all that was achieved in the cause of peace during the brief period His Majesty occupied the throne. The funeral (burial is

to take place at Windsor) has been fixed for Friday next, the 20th inst., and will be attended by many rulers, including Emperor William, the late King's nephew. At the request of President Taft, Mr. Roosevelt will attend as the Special Ambassador representing the United States. All the exchanges in Great Britain, as well as places of amusement and other institutions, will remain closed on the day of the burial, while, as a mark of respect, the New York Stock Exchange, which closed at 11 o'clock last Saturday, will not open until noon.

Alexandra, now to be known as the Queen Mother, on Tuesday issued a pathetic personal message to the nation, thanking the people "from the depth of my poor broken heart" for their touching sympathy, and adding: "I confide my dear son into your care, who, I know, will follow in his dear father's footsteps, begging you to show him the same loyalty and devotion you showed his dear father. I know that both my dear son and daughter-in-law will do their utmost to merit and keep it."

The new King on the same day addressed a message to the navy, in which the "Sailor Prince" served for thirty-three years, thus enabling him "to know how thoroughly I can depend upon that spirit of loyalty and zealous devotion to duty of which the glorious history of our navy is the outcome."

Parliament met on Wednesday, Premier Asquith and other prominent members having hastened to London, when the following message was read from the new monarch:

"The King knows that the House of Commons shares in the profound and deep sorrow which has befallen His Majesty by the death of His Majesty's father, the late King, and that the House entertains a true sense of the loss which His Majesty and the nation has sustained in this mournful event.

"King Edward's care for the welfare of the people and his skilled and prudent guidance of affairs, his unwearied devotion to public duty during an illustrious reign, and his simple courage in danger and pain will long be held in honor by his subjects at home and beyond the seas."

Premier Asquith moved, and A. J. Balfour, leader of the opposition, seconded a resolution of sympathy with His Majesty, offering him felicitations upon his accession. The address proceeded:

"We will ever remember with grateful affection the zeal and success with which our late sovereign labored to consolidate the peace and concord of the world, to aid every merciful endeavor for the alleviation of human suffering and to unite in justice and freedom all the races and classes of his subjects with his imperial throne.

"We beg to offer Your Majesty our loyal congratulations upon your auspicious accession and we assure Your Majesty of our devotion to his royal person and our sure conviction that his reign will, under the favor of Divine Providence, be distinguished by unswerving efforts to promote the virtue and contentment of the realm and to guard the rights and liberties of His Majesty's faithful people."

John E. Redmond, the Nationalist leader, has written to the Prime Minister urging a change in the form of declaration which the new King must make before Parliament. The present oath contains the words "abjuring the Church of Rome," which Mr. Redmond states are most offensive to all Catholics. The Cabinet has decided to bring forward a bill amending the declaration so as to omit these and other expressions, and substituting merely a statement that cer-

tain doctrines "are contrary to my belief," all reference to the Pope being omitted. This proposal has evoked bitter controversy, but as the balance of power in the House of Commons is held by the Irish Party, it is believed some modification in the oath will be made.

The House of Commons is to meet again on Tuesday next and will then adjourn until June 8.

London has passed through a trying week without mishap. The shock caused by King Edward's death was successfully withstood; the Stock Exchange settlement was effected smoothly; the payment of overdue taxes was begun on so large a scale that the Government's deposits increased almost \$11,500,000; the exchanges, however, moved less in favor of that centre and the hopes of the money and stock markets of a reduction in the Bank of England discount rate were disappointed, causing private rates to advance sharply on Thursday. The contango rate on American stocks on this occasion was lowered to 5%, while ordinary Stock Exchange loans were reduced to 4½%. Speculation in the shares of rubber companies, after having wavered, was revived by the sale at auction of the crude rubber which was withdrawn in the previous week, while the demand for oil shares has received a fillip from the loudly heralded announcement that the Standard Oil Co. has made enormous purchases of gasoline in the Far East for shipment to America. Why London should have expected a change in the Bank rate was not clear to New York; our bankers did not for a moment look for any reduction in view of the state of the foreign exchanges, the unsettled political and speculative conditions in England and the current and prospective demands for gold. Despite frequent purchases of gold in the open market, the Bank reported a loss of \$2,830,000 bullion, although a decrease of fully \$22,630,000 in ordinary deposits and of \$9,835,000 in loans contributed to bring about an advance in the reserve from below 52¾% last week to almost 54½% this week. The assumption that the Governors will be compelled to name a 3½% minimum discount rate next week may or may not prove well founded; the best opinion here is that, unless unforeseen developments arise, the 4% charge will be continued for the present. The Bank's stock of specie is still nearly \$8,500,000 below the \$200,000,000 mark regarded as desirable at this season of the year, and sterling in New York having fallen to the par of exchange, renewed assistance from this centre cannot be counted upon.

The Parliamentary elections in France and Spain have brought no changes in administration, nor do the results show any startling re-alignment of parties or revolution in sentiment. In France the proposal of Premier Briand to reform the electoral system by having Deputies elected by Departments instead of by individual districts, as at present, has been endorsed, and will no doubt be formally laid before the Chamber in due course. This forms virtually the only general deduction that can be drawn from the voting. The Radicals and Socialists will again command overwhelming majorities, although the returns are construed as indicating aversion to ultra-radical legislation. The Catholics took an active part in the campaign but failed to achieve successes; indeed, the Con-

servatives and Nationalists lost 13 seats. The results, in brief, were: Republicans of the Left, 79, a gain of 11; Radicals and Radical-Socialists, 261, a loss of 20; Independent-Socialists, 26, a loss of 4; Unified Socialists, 76, a gain of 21; Progressists, 72, a gain of 5; Nationalists, 16, a loss of 4; Conservatives, 62, a loss of 9.

In Spain Premier Canalejas has been returned with a working majority after a contest characterized by some rioting, although the disturbances on this occasion have been slight in contrast with elections in the past. Before leaving the subject of elections, it may be added that an Imperial edict has been issued in China summoning the National Assembly to meet on Oct. 3 and announcing the appointment of 96 members representing all classes of the population. The edict also urges the people to prepare for a constitution and a parliament. These preparations, however, are not to be consummated with Occidental haste. China has just taken another step forward by abolishing slavery, with, however, certain qualifications. The Finnish Diet has refused to accept the Czar's overtures to have the Russian Parliament's authority extended to Finland, and an interesting situation has thus been created. The plucky fight of the Duchy for the retention of its freedom is exciting widespread attention in both republican and monarchical countries. Developments will be closely watched.

The commercial failures exhibit for the month of April 1910, both as regards number of disasters and aggregate of liabilities, is a much less favorable one than that for March. This is due in great measure to important disasters among manufacturers. In fact, the indebtedness reported in that division for the month was not only nearly double the total for April 1909, but the heaviest for the corresponding period in any of the previous thirteen years. Moreover, out of fifteen branches included in the manufacturing class, liabilities were greater than last year in eight. Disasters among lumber dealers, carpenters, &c., were not only noticeably large in number, but the debts aggregated over 3¼ millions of dollars, nearly 1½ millions of which were reported by three building concerns. A million-dollar failure in the leather industry served also to make the indebtedness in that branch abnormally heavy, and very much in excess of April 1909. In the trading class, on the other hand, while the number of failures was larger than in the month of earlier years back to 1898, with the exception of 1908, the liabilities were less than in 1909 or 1908. Among brokers and transporters, the situation as regards liabilities is decidedly more favorable than in April of either of the previous two years, and it is worthy of note that all but a meagre portion of the indebtedness shown is ascribed to the failure of the cotton firm of Knight, Yancey & Co. of Alabama.

Messrs. R. G. Dun & Co.'s compilation of failures, which is the basis for the foregoing remarks, shows the aggregate liabilities represented by the 1,160 failures in April 1910 to have been \$17,752,592, against 990 in number and \$16,825,216 in indebtedness for the month of 1909. It is indicated, however, that 23 of the failures this year were for large amounts, aggregating liabilities of nearly 10 millions of dollars, and that the average of the remaining 1,137 was only

\$6,904. This average, although greater than in 1909, does not make an unfavorable comparison with former years. Manufacturing failures during the month totaled \$10,068,448, against \$5,245,934 in April 1909 and \$7,705,199 in 1908; trading disasters covered liabilities of \$5,288,917 this year, compared with \$5,346,274 and \$6,125,061 in the like period of 1909 and 1908, and the indebtedness of brokers, transporters, &c., reached only \$2,395,266, against \$6,126,734 and \$6,486,288, respectively, in the two preceding years.

Combining the results for April with those for the previous quarter, we have a much better indication than a single month can furnish of the current situation. Pursuing that course, we learn that not only are the total number of failures for the four months of 1910, at 4,685, and the aggregate of liabilities, at \$90,831,745, very much above those of 1909, and the average of recent years as well, but the indebtedness shown is but moderately less than that for the like period in 1908; and the 1908 total was abnormally large. It is to be said, however, that a comparatively few failures make up the greater part of the aggregate liabilities of the four months of 1910. In fact, 71 disasters account for $48\frac{1}{2}$ millions of liabilities, leaving $42\frac{1}{4}$ millions to represent the remaining 4,614 failures. Manufacturing failures account for \$37,286,176 of this year's four months' total, against \$25,160,832 for the similar period of a year ago and \$40,961,976 in 1908. In the trading division the comparison is more favorable, \$29,143,229 contrasting with \$26,041,601 and \$37,584,573 in 1909 and 1908, respectively, but among brokers, &c., the liabilities for the four months this year reach \$24,402,340, against only \$9,977,459 last year and \$17,476,110 two years ago.

The situation as regards failures in Canada in April was also less favorable than a year ago, for, while the number of insolvencies was less, the aggregate liabilities at \$3,698,366 compares with only \$646,193 in the month last year and \$1,191,981 in 1908. Seven large failures, mainly manufacturing, however, account for over three millions of this April's total. For the four months of 1910 the aggregate liabilities of failed firms reach \$7,719,950, made up of \$4,327,184 manufacturing, \$3,300,830 trading and \$91,936 "other commercial." In 1909 the total of all for the four months was \$5,460,820, including \$1,195,212 manufacturing, \$3,358,625 trading and \$906,983 "other commercial."

European discount rates were lower early in the week but advanced later. London raised its open market quotation on Thursday to 3 5-16@ $3\frac{3}{8}\%$. Paris is now on a $2\frac{3}{8}\%$ basis, with indications that extensive new capital issues will cause further firmness. Berlin has relaxed to 3%; the Imperial Bank of Germany this week reported a gain of \$2,470,000 in cash, a decrease of \$14,640,000 in note circulation, a reduction of \$12,050,000 in loans and a contraction of \$9,650,000 in discounts. Amsterdam is still unusually high, the range being $4\frac{5}{8}$ @ $4\frac{3}{4}\%$. Brussels is down to $3\frac{1}{8}\%$. No changes were recorded in European bank rates, but the Bank of Bengal and the Bank of Bombay lowered their rates from 7% to 6%, thus indicating that the extreme stringency in India has passed.

The Bank of England shared with the Continent and India the new gold offered in the open market on

Monday, only the minimum price (77s. 9d.) being paid. After the weekly statement was compiled, the Bank bought \$595,000 bar gold. According to our special cable from London, the proportion of reserve to liabilities rose from 52.68% last week to 54.44% this week—the highest figure at this season in recent times; the Bank lost £566,359 bullion during the week and held £38,317,325 at the close of the week. Our correspondent further advises us that the movement into the Bank was made up entirely of purchases in the open market. Exports were wholly to South Africa, and shipments to the interior of Great Britain were of important amount. The details of the movement into and out of the Bank were as follows: Imports, £591,000 (all bought in the open market); exports, £200,000 (wholly to South Africa), and shipments of £957,000 *net* to the interior of Great Britain.

The London Stock Exchange will remain closed from last night to Tuesday morning for the Whitsunday holidays. The Exchange will also close on Friday of next week, the date fixed for King Edward's funeral.

Money is very plentiful for day-to-day use, in adequate supply for time facilities, but is not easily obtainable for other purposes, including the discounting of commercial paper. The course pursued by the majority of institutions in the financial district is one of unusual conservatism. Our city bankers are not wholly satisfied with banking and speculative conditions West and South. Too much money, they say, has been lent to farmers for purposes that, though legitimate, are not desirable or conducive to stability, including speculation in high-priced land (many of the sellers going to Canada and the buyers giving mortgages) and the holding back of grain and cotton. The demand for funds from the banks in the agricultural sections has been and is quite exceptional. The somewhat curious, or at least unusual, attitude taken by local bankers is reflected by the disparity between money and discount rates; whereas, ordinarily, high-grade paper can be placed at $\frac{1}{4}$ or $\frac{1}{2}$ of 1% above time money quotations, there is little inquiry at present for bills yielding less than 5%, notwithstanding that six months' loans have been made quite frequently at 4% and over-the-year loans at $4\frac{1}{2}\%$. The offerings of bills have increased; at all events, the amount floating in the market is larger, due to the fact that a good many banks have granted accommodation to their own customers and are not buying from brokers. The range is now $4\frac{3}{4}$ @5% for the choicest four to six months' single names, $5\frac{1}{4}$ @6% for less attractive bills and $4\frac{1}{2}$ @5% for sixty to ninety days' endorsed bills receivable.

As a matter of fact, the money market has been without new features. Borrowing by Stock Exchange houses is light, speculation having remained dull when not confined to large operators. The supply is ample, although certain very large lenders are still acting guardedly. The periods wanted are the shortest and the longest maturities, especially eight months' money, which, of course, will comfortably tide over a possible pressure Jan. 1. The range was a little higher at the beginning than it is at the close of the week, namely: sixty days, $3\frac{3}{4}$ @4%; ninety days, 4%; four, five and six months, 4@ $4\frac{1}{4}\%$, and over-the-year, $4\frac{1}{2}$ @ $4\frac{3}{4}\%$. Call money has been remarkably steady throughout the week. The maximum has been daily

4%, the minimum (on Tuesday) was 3%, while the average ruling rate has been $3\frac{3}{4}$ @ $3\frac{7}{8}$ %. Yesterday the highest was 4%, the lowest $3\frac{1}{2}$ % and the closing quotation $3\frac{3}{4}$ %.

Foreign exchange has been subjected to aggressive speculation this week. The lack of official or definite information concerning the volume of new securities placed abroad by our railroads has naturally tended to produce differences of opinion as to the probable course of exchange. Even now doubts are entertained in certain quarters regarding the genuineness of the multifarious reports of bond flotations abroad, while others claim that the full extent of the movement has not yet been realized. Under these circumstances both short selling and extensive purchases have been indulged in by operators of speculative tendencies. Fluctuations consequently have been extremely violent. Sight drafts dropped to 4 8635 on Wednesday, whereas 4 86 $\frac{3}{4}$ was paid on the following day and a still higher figure yesterday. The tone changed not only from day to day but from hour to hour; on Thursday, for example, rates first advanced quite sharply, then fell $\frac{1}{4}$ c., but finally recovered to the highest level of the day. The actual offerings of remittance have not been so very extensive as the irregularity in rates would suggest; but it is now believed that the market has this week reflected preparations for transactions that will be publicly announced next week. Meanwhile a continuance of unsettlement is looked for in sterling. That the supplies of commercial remittance are still below normal can be readily realized when it is noted that our agricultural exports during April were the smallest since 1899, the total being only \$46,503,729, a decrease of \$6,691,784 as compared with April 1909, while for the ten months ended April 30 the decrease has reached \$40,956,389. Our exports, however, should increase now that prices of several important commodities have fallen to less prohibitive levels; also, the insistent criticism of our habits of extravagance, combined with a more sober feeling regarding the general outlook for trade, may have some influence in bringing about a decrease in our imports of more or less unnecessary articles of luxury. Of course no more gold is leaving New York—rates reached the par of exchange at the middle of this week. The subsequent sharp recovery has been accelerated by sales of stocks by Europeans and by firmness in foreign discount rates, notably at London, where less confidence is now felt in an immediate reduction in the official Bank rate. Yesterday trading was done at an advance of more than $\frac{1}{2}$ c. per pound over the low level of the week and the undertone at the close was very strong. These kaleidoscopic changes produce much confusion among operators. At Paris and Berlin exchange on London has also advanced sharply.

Compared with Friday of last week, sterling exchange on Saturday was $\frac{1}{8}$ c. higher, on the basis of 4 8390@4 84 for 60 days, 4 87@4 8710 for demand and 4 8740@4 8750 for cable transfers. On Monday demand fell to 4 8680@4 8685 and cable transfers to 4 8715@4 8720. The downward movement continued on Tuesday, 60 days being quoted as low as 4 83 $\frac{3}{4}$, demand 4 8665 and cable transfers 4 87. Wednesday witnessed erratic fluctuations, first sensationally downwards, and then upwards; the close was very firm,

4 83 $\frac{5}{8}$ being asked for 60 days, 4 86 $\frac{1}{2}$ for demand and 4 867 $\frac{7}{8}$ for cable transfers. Rates again moved violently on Thursday; an early rise was followed by speculative selling which caused a sharp relapse, but the close was at the highest for the day, namely 4 83 $\frac{3}{4}$ asked for 60 days, 4 8665@4 8670 for demand and 4 8715@4 8725 for cable transfers. On Friday rates opened at 4 867 $\frac{7}{8}$ for demand, receded on extensive offerings by a large national bank, but recovered to 4 867 $\frac{7}{8}$ at the close.

The following shows the daily posted rates for sterling exchange by some of the leading drawers:

		Fri., May 6.	Mon., May 9.	Tues., May 10.	Wed., May 11.	Thurs., May 12.	Fri., May 13.

The market closed on Friday at 4 8360@4 8370 for 60 days, 4 8680@4 8690 for demand and 4 8720@4 8730 for cables. Commercial on banks was quoted at 4 8350@4 8360 and documents for payment at 4 83@4 83 $\frac{3}{4}$. Cotton for payment ranged from 4 83@4 83 $\frac{1}{4}$, grain for payment from 4 83 $\frac{1}{2}$ @4 83 $\frac{3}{4}$.

The following gives the week's movement of money to and from the interior by the New York banks.

Week ending May 13 1910.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency	\$10,032,000	\$4,316,000	Gain \$5,716,000

THE NEW KING OF ENGLAND.

That the death of King Edward, on Friday of last week, should have caused a spirit of gloom to spread over London and over other communities in touch with it, was in all respects natural, when one considers the unexpected suddenness of the event and the personal popularity of the sovereign. That it should also have been accompanied, in London itself, by a feeling bordering on political apprehension, is a fact for which there were other causes, calling for some examination. No one here could have failed to be impressed by the cabled descriptions of the doubts and

misgivings in the English community as to the sequel—not only in England's foreign relations, which the late King, through his personal endeavor, had brought from a highly delicate situation into the most satisfactory position of many decades, but also, and perhaps especially, in the possibilities of English domestic politics, where collision between the Ministry and the Crown, over the appointment of new Peers to reverse the Conservative majority in the Lords, had already been threatened.

This was a situation in which great reliance had been popularly placed on the tact, experience and sagacity of King Edward; it is easily comprehensible that his death should have caused misgiving over this aspect of the political situation. The character and qualities of King George, from the standpoint of his new and large responsibilities, were not at all well known. That may be judged sufficiently by the conflicting accounts of his personality which appeared in last week's dispatches. He was described as shy and reserved, and again as genial and ready-witted. In some of the narratives he was characterized as a conservative, with a strong bent towards maintenance of the royal prerogative; in others, as a prince of distinctly democratic instincts. Some correspondents pictured him as a man of no ideas, others as a man of forcible convictions, and both appeared to have something like evidence to produce in support of their contentions.

Nothing could be more natural than an instinctive and apprehensive contrast of this ignorance of the new King's actual qualities with the intimate knowledge which existed of King Edward's individuality, at his accession in 1901. What people are apt to forget, however, is that the case of King Edward was peculiar. Queen Victoria's long widowhood, her habitual retirement from all save the most important public functions after the death of her husband, nearly fifty years ago, had inevitably placed on the Prince of Wales responsibilities, in the public eye, such as are rarely imposed on the heir to any throne. During the last three decades of his mother's long reign, Edward not only made speeches at the laying of cornerstones or other public occasions, presided at functions usually reserved for the sovereign himself, exchanged visits with foreign royalty, and acted as the immediate host for visiting diplomats, but he also, in the nature of the case, kept actively in touch with the public men of his day.

But the very fact that King Edward came to the throne with such important preparations, and with a character so fully understood by Parliament and people, is itself one reason why the situation with his son could not have been the same. The circumstances which induced the Queen to transfer so large a part of her public duties to the heir-apparent, not only did not exist with her successor, but long continuance in personal touch with these responsibilities made it impossible for King Edward, after his own accession to the throne, to follow her example. Yet the essential point to keep in mind is that the case of King George is the usual case on a new accession to a throne. Who, for example, has any knowledge of the political leanings or the personal traits of the German Emperor's eldest son? What basis would any one have, if the Czar of Russia were to die, for predicting how his heir would fill the throne? Of Archduke

Ferdinand, who will succeed old Emperor Francis Joseph, the public has much broader knowledge. This, however, is again for peculiar reasons; the great age of the reigning sovereign having for some time past imposed on the heir-apparent some of the sovereign's formal duties, and the Emperor having actually made distinct endeavors for the personal introduction of his successor to the people of Austria and Hungary.

When, indeed, one glances over recent events in royal succession, it will be found that ignorance of the incoming sovereign's qualities has been the rule, not the exception. Few people will have forgotten the dismayed conjectures regarding the present Emperor William, when his grandfather and his father died in 1888 within a few months of one another. The Queen of Holland inherited her father's throne in 1890, amid general apprehension, based on the fact that a girl of untried qualities was placed at the head of a State on which the disputes of Europe might converge. The Spanish King, in 1902, came to the throne at sixteen years of age, amid similar misgivings, based on the knowledge of a habitually rebellious people, held in check only by constant endeavors of experienced men.

Yet nobody will to-day have any hesitation in asserting that the popular misgivings of those several occasions were not only exaggerated but were in very large measure baseless. The sovereigns in question have fitted themselves so usefully to their several responsibilities that it is somewhat difficult to-day to imagine their governments without them. All have been conservative rulers, notwithstanding many predictions to the contrary at the time of their accession, and all have won popularity with their subjects, such as, in some instances, had not been conceded to their predecessors.

The explanation is not difficult; it may be found in the readiness of a sensible citizenship to accommodate itself to new personalities on the throne, and, more than this, to the sobering responsibilities of royalty itself. To a greater degree than in any period prior to the nineteenth century, European monarchy as an institution is nowadays bound about with restrictions which even the most adventurous sovereign could not easily overstep, and along with this sovereigns have learned, whatever their individual temper or qualities, that in the present age a strict and conservative recognition of the duties and limitations of their situation is the price which must be paid for continuance of the institution itself.

It is therefore altogether reasonable to expect for the new King of England a useful career, guided in its particular aspects by such qualities as shall be developed as his new responsibilities confront him. It is possibly too early to predict exactly what will be the bearing of this dramatic change of sovereigns on the political and constitutional crisis in Great Britain. This much, however, may be said—that there are some distinctly reassuring aspects arising from the very fact of a new and untried ruler. For one thing, it is almost absolutely certain that the crisis over the peerage creations and the House of Lords will be postponed. That Mr. Asquith was personally reluctant to invoke a crisis in which the Crown itself might be involved, was made plain by his own declarations on the floor of Parliament, more than a month ago. He was driven toward what appeared to be an approaching crisis through the refusal of the Irish faction to concur

in the Budget legislation, save on condition of a pledge to demand guaranties of Liberal control of the House of Lords. But the Budget has now been passed, and meantime the situation, in regard to which the pledge or understanding had been made with the Irish Party, has been so radically altered that all sensible public men will recognize the impropriety of applying its terms at once.

This means that time will be gained in the highly important constitutional controversy, and time is of the utmost value. In many quarters, it had been apprehended that another general election would be inevitable in July or August, and that such an election would be extremely complicated through the variety of issues raised in it. The election cannot now be held in any case until the autumn; possibly it will not occur until next year. But discussion of the Constitutional issue will continue, thus providing a reasonable possibility that when the Ministry again goes to the people, there may be a clean-cut issue. This turn in the situation is, after all, only one new illustration of the wholesome results which often follow interruption of an angry political controversy, or a political imbroglio seemingly impossible of solution, by a solemn event which appeals to the deeper emotions of our nature, and brings men's minds back to dispassionate and sober reasoning.

THE TROUBLE OVER COMMUTATION RATES.

The proposed increase next month in commutation rates by several railroads has stirred up an angry protest, which seems fiercest as respects the N. Y. Central and the N. Y. N. H. & Hartford. Meetings of commuters and property-owners have been held in several towns near by and complaint was carried to Albany and the Public Service Commission, and that body has served a complaint upon the roads. Gov. Hughes was appealed to for a special message urging an amendment to the Commission law giving somewhat more power over commutation and other reduced passenger fares, and on Tuesday the Senate anticipated such a message by passing an amendment (as reported) "in accordance with the wishes of the commuters of Westchester County." But Section 49 of the existing law requires the Commission, when satisfied, after complaint and hearing, that the rates or regulations "are unjust, unreasonable, unjustly discriminatory or unduly preferential," to determine the just and reasonable rates. This is a positive grant of power to make rates "within the State," and commutation would seem necessarily to be included.

Most steam roads show little or no profit from their passenger business and commutation rates are notoriously low. Commutation by the month is usually based on 60 rides; the commuter to Mamaroneck, for instance, is entitled to 1,200 miles for \$8 40 by the increased price, and other commutation rates figure well under a cent a mile, even after the increase. It has sometimes been asserted that the lowest rate ever granted is a fair basis for all, and that if a railroad can carry some people over some distances at a very low mile rate, and possibly have some margin left, it should be able to carry all people over all distances at that rate. But commutation rates are always low—so low that income from the commuters' family and other persons who make less frequent trips and pay on a higher basis is sometimes said to be all that makes

the monthly rate possible. Conceding increase necessary, there is therefore reason in putting it on the class of traffic now most favored.

The increase is undoubtedly some hardship, and we need not be either surprised or angry that the persons affected obey the disposition in human nature to pass a tax along to somebody else and take slight concern who bears it or how others are affected by it, provided only we can evade it ourselves. It is suggested now, as an easy method, that the owners of the property can bear the burden. An association of dry-goods men protests that so long as 6% dividends are paid "the public should be protected," and a daily journal in Bangor, Me., says that the Maine Central has a market value of over 200 for its stock and is paying 8% on par. But that is only 4% on the investment, since the return to an investor is to be figured on market value at the time or on the price paid. A definite cut in dividends would carry a drop in market value, which would mean a confiscation, by so much, made upon all private or public holders, and hitting all along the line of public institutions.

A daily journal in this city argues in a manner quite as narrow. It admits that railroads "are affected by high prices in the same way that many other interests are affected," but adds that "other interests are affected in a similar way by any addition to the cost of transportation." This is an implication that a railroad must not do what the others do—pass along to others, as far as possible, any increased burden of outlay.

It is admitted by all that the roads must work under increased expenses, particularly in wages; put in the bluntest statement, the labor unions, either with full consent or with indifference on the part of the general public, have forced wage advances, and now the commuters rebel against taking their share of that advance. But what is to be done about it all? The primary arithmetic is immovable, even by great corporations. When any man among us finds himself compelled to pay more for the things he buys, he protects himself against bankruptcy by adding something to the prices of the things he sells, so far as trade conditions allow—there is no other course open. The process of re-distribution of cost is not always immediate in its action, or uniform, or strictly impartial; but it adjusts itself somehow in the long run.

All services and materials are costing the railroads more, and more demands (or intimations of demands) by employees form a part of nearly each day's news; so while earnings are growing, expenses are growing even more rapidly, as we show on a preceding page. Not even the mandate of a Commission or a Legislature, although "willing to content the people" (like Pilate of old) can make railroads able to do impossibilities; unless they can adjust their prices to their costs, they must weaken financially—there is no escaping that.

Increased transportation cost is not pleasant; it necessarily finds its way into general prices and adds to the burdens of living. But this is the only tolerable method. Distribution of it thus is more just, more uniform and impartial, and far less disturbing in effects upon the country than any attempt to dump the burden upon investors by imagining them to be a separate and privileged "class" who can suffer without involving that indefinite body called "the traveling" or the "general" public.

LIMITATIONS OF THE POWER OF THE PUBLIC SERVICE COMMISSION.

In the decision last month by the Appellate Division (First Department) of the Supreme Court of this State in the case of the Long Acre Electric Light & Power Co., expression is given anew to the view of the courts that the Public Service Commissions of New York, notwithstanding all the vast powers conferred upon them by law, cannot usurp the functions and duties of the boards of directors and financial managers of corporations. Last December, it will be recalled, the Court of Appeals, our highest State judicial tribunal, in the case of the Delaware & Hudson Co., expressed its interpretation of the law in these words: "We do not think the legislation alluded to was designed to make the Commissioners the financial managers of the corporation or that it empowered them to substitute their judgment for that of the board of directors or stockholders of the corporation as to the wisdom of a transaction; but that it was designed to make the Commissioners the guardians of the public by enabling them to prevent the issue of stock and bonds for other than statutory purposes." The Court in that action went further and stated that "if such were the purpose and intent of the statute, a doubt might arise with reference to its constitutionality, for ordinarily the ownership of property carries with it the right of occupancy and management, and should a statute deprive the owner of the right to manage, it would under ordinary circumstances undermine his right to protect and make his property remunerative."

In the case of the Long Acre Electric Light & Power Co., now decided, the doctrine laid down by the Court of Appeals is followed with fidelity, and it is furthermore shown that, as regards gas and electrical companies, the authority of the Public Service Commissions is in some respects even more limited than in the case of railroad corporations. The opinion of the Appellate Division is by Justice Scott. He notes that by the Public Service Commissions Law of 1907 (Chapter 429) the Legislature intended to correct evils resulting to the public from the issue, without consideration, of securities by public service corporations other than in the legitimate conduct of business. Adopting the language of the Court of Appeals, he says: "This law does not make the Commissioners the financial managers of a corporation, nor does it empower them to substitute their judgment for that of the board of directors or the stockholders of a corporation as to the wisdom of a transaction." He then goes on to add: "The management of corporate affairs has not been delegated. The power of the Commission is limited to withholding consent to the issue of stocks and bonds for other than statutory purposes. It is not obliged to consent, or refuse consent, to an entire issue applied for, but may limit the issue to an amount which the Commission may determine to be reasonably required for the enumerated statutory purposes set forth in the application. The Commission may not refuse approval because the proceeds of such securities are not to be used in the way the Commission thinks wise, provided such proceeds are to be used in the legitimate conduct of the corporate business; the scope and advisability of the business is to be determined by the directors and stockholders."

The Long Acre Electric Light & Power Co. was incorporated on April 24 1903 and by its charter, as amended June 7 1907, it was authorized to generate and distribute electricity for light, heat, power and other purposes in the boroughs of Manhattan and the Bronx. On March 22 1906 it also acquired the franchise or consent granted in May 1887 to a corporation known as the American Electric Manufacturing Co. Being legally entitled to pursue the business for which the company was incorporated, it applied to the Public Service Commission, under the provisions of Section 69 of the 1907 law, for leave to issue stock and bonds for the purposes named in its application.

The Commission denied the application *in toto* for ten reasons. We have not the space to enumerate all of these reasons and shall confine ourselves entirely to the last five, though the Court found all of them untenable. The first five reasons dealt entirely with matters of a technical character or having no general application or bearing. The sixth reason for refusal given by the Commission declared that "the construction contract does not adequately protect the interests of the Long Acre Co. or of the public." The assignment of this reason, says Justice Scott, indicates a disposition on the part of the Commission to do precisely what the Court of Appeals has said that they are not authorized to do, namely "to substitute their judgment for that of the board of directors or stockholders of a corporation as to the wisdom of a transaction." The Court does not wish to be understood as saying that a case might not occur wherein a proposed contract by a corporation was so obviously objectionable that the Commission would be justified in refusing its assent to an issue of securities to carry it out. But no such case was presented in this instance. The Commission's objection to it seemed to be wholly arbitrary and was unsupported by any argument in its report or in the brief of its counsel. The Court's own examination disclosed nothing apparently so objectionable as to warrant condemnation.

As to the last four reasons for refusing consent, these were summarized as follows by the Commission: (7) The applicant has not proved that the existing companies are not properly conserving the public interests and convenience and that it would be to the advantage of the community to have a new company authorized to enter the field. (8) If a competing company were allowed to begin operations, it is not likely that it would continue to operate independently for any considerable period. (9) Competition would cause inconvenience and expense to the public, would cause duplications of plant, would lead to waste, and ultimately be urged as a reason why rates should not be reduced to consumers. (10) Practically all of the advantages claimed by the applicant as to the probable results of competition can be secured through the powers of this Commission, and until it has been demonstrated that these are ineffective, it would be unwise to adopt a method which has proved to be ineffective in the past.

These reasons for refusing consent to the issue of stock and bonds, it is pointed out in the opinion of the Appellate Division, are fundamental. They go to the extent of holding that the Long Acre Electric Light & Power Co., although authorized by its charter and franchise to manufacture and distribute electricity, should not be permitted to do so. This follows from

the fact that if the company may not issue any stock and bonds at all, it cannot exercise its corporate rights and franchises. The reasons given are all based upon the underlying proposition that there should be no competition in the business of electrical lighting, providing that there is found one company already performing the service acceptably. It had been urged that it was the general policy of the State to prevent such competition and to encourage in such matters beneficent monopoly, the rights of the public and the consumers being protected by the reserved right of the Legislature to regulate charges and methods of operation. That such has been the general policy of the State, the Court grants. However, the right to determine whether, and when, such competition should be permitted rests with the Legislature and has not been delegated to the Public Service Commission. The Long Acre Company had acquired legislative authority to transact its business before the Public Service Commission was created and the Court could find nothing in the Act which permits the Commission to say upon its own mere ipse dixit that a duly chartered and authorized corporation may not transact business merely because it may compete with another corporation engaged in the same business.

The Court takes occasion to point out, too, that the powers granted to the Commission respecting railroad corporations and those respecting gas and electrical corporations are quite different. By Section 53 of the Act, railroad corporations, street railroad corporations and common carriers who had not before the creation of the Public Service Commission obtained a consent from the Board of Railroad Commissioners, or who had not then become entitled to begin construction by virtue of compliance with the Railroad Law, are forbidden to begin the construction of a railroad, or an extension thereof, without first having obtained the permission and approval of the proper Public Service Commission, and such permission is to be given only after the Commission has determined "that such construction, or such exercise of the franchise is *necessary* or *convenient* for the public service." Under this provision the Commission could properly withhold its permission if a proposed railroad appeared to be unnecessary because the territory to be served was already sufficiently served by an existing line of railway.

On the other hand, the provisions regarding gas and electrical companies are quite different, and provide for no certificate of *necessity* or *convenience*. Section 68, which calls for the approval of the Commission before gas and electrical corporations may begin construction or exercise rights and franchises, merely requires that before such certificate of approval is issued, a certified copy of the charter of the corporation shall be filed in the office of the Commission, together with proof that it has obtained the required consent of the proper municipal authorities. Similarly Section 69, calling for the consent of the Commission to an issue of stock or bonds of a gas or electrical corporation, merely requires that the Commission shall be satisfied that the money to be derived from such issue is reasonably required for the enumerated purposes of the corporation. The conclusion, therefore, is that the specific requirement of a certificate of "*necessity and convenience*" in the case of a railroad company, and the omission of any such requirement in the case of a gas and electrical corporation, indicates that as

to the latter it was not the intention of the Legislature to delegate to the Commission the power to prevent the exercise of corporate rights merely because such exercise would involve competition.

As we have already seen, the last four of the Commission's objections to giving consent were based entirely upon the idea that competition should be prevented. It follows from the foregoing that as to these four main reasons for withholding consent, its action rested upon a mistaken view of the scope of its authority. The application of the Long Acre Company is accordingly referred back to the Commission for consideration and action within the limits of its authority.

RAILROAD GROSS EARNINGS FOR APRIL.

While returns of net earnings in some instances make unsatisfactory exhibits, owing to augmentations in expenses, the results as to gross earnings, it is gratifying to note, continue highly encouraging. Expanding gross receipts follow necessarily from the large volume of traffic that the carriers are enjoying and from the continued industrial activity which pervades all parts of the United States. The distinction between the net earnings and the gross revenues should be clearly borne in mind; for increasing expenses are becoming a growing feature in the affairs of the roads, and the fact that wages are being so generally and so widely raised makes it certain that this feature is likely to become more, rather than less, pronounced as the months pass. In such circumstances it might easily happen that comparisons of the gross would be very good while net earnings were actually falling off. As a matter of fact, instances of this very kind have been numerous in the statements for the month of March that have come to hand in the present and preceding weeks.

The tabulations in this article deal with the results for the month of April, as revealed by the figures of the roads which make it a practice to furnish early preliminary estimates of their gross earnings. Our summaries are confined entirely to this class of roads and therefore exclude most of the more prominent railroad systems throughout the country, like the Pennsylvania, the New York Central, the Union Pacific, the Southern Pacific, the Reading, &c., &c., whose April exhibits will not be available for two or three weeks yet. Nevertheless, the roads that do contribute to these early compilations operate an aggregate of 86,023 miles of line, which is considerably over one-third the railroad mileage of the country, and it may be assumed that these are fairly representative of the roads as a whole. It is therefore pleasing to find that the gains as compared with the corresponding month last year continue large. Altogether the roads furnishing returns earned \$60,761,753 in April this year, against only \$52,437,828 last year, the increase, therefore, being \$8,323,925, or nearly 16 per cent—15.87%. What gives additional significance to the improvement here recorded is the fact that the gain has been made in face of a diminution in the cotton traffic on Southern roads and a contraction in the coal shipments in the case of many roads in the Middle and Middle Western States. The greater part of the miners in the bituminous coal regions in the territory referred to suspended work at the beginning of April, compelling the stoppage of mining. The

suspension, too, continued throughout the whole month, except that in some instances there was a resumption of work towards the close of April, more particularly in Central and Western Pennsylvania, where about 40,000 men returned to work, an agreement having been reached with the operators with reference to wages and the other demands made by the miners.

It will, of course, be understood that the present gain in earnings follows a gain last year in the same month, when there was a recovery after the tremendous losses sustained in 1908 following the panic of 1907. In brief, our early compilation last year, comprising a somewhat smaller aggregate of mileage, recorded an increase of \$5,648,072, or 13.10%. In 1908 there was a loss of no less than \$11,486,050, or 19.85%. In the following we furnish a summary of our preliminary April totals for the last fourteen years. It will be observed that, with the exception of the setback experienced in 1908 and a minor setback encountered in 1904, gross earnings have been uninterruptedly expanding ever since 1897.

Note.—We do not include the Mexican roads in any of the years.

It is impossible to furnish any precise estimate of the loss in traffic sustained by the roads in the Middle and Middle Western States through the suspension of coal mining in the bituminous fields, owing to the fact that the loss in this class of tonnage on most roads was more than over-balanced by gains in other classes of tonnage, thus concealing the presence of the adverse influence referred to. In the case of the distinctive coal roads, however, we get direct evidence of the falling off. The Buffalo Rochester & Pittsburgh is a coal carrier of that kind and it shows a loss for the month in gross earnings of \$45,392, or about 8%. This, too, is in comparison with a small total of earnings for April last year. If we go back to 1907, a period of full earnings, we find that aggregate gross on that road then was \$742,476, as against only \$542,757 now.

The loss of \$35,357 reported by the Chicago & Alton must no doubt also be attributed to a falling off in the coal traffic. These are the only two roads among those reporting for the month which are distinguished for losses in earnings in amount of over \$30,000. There are seven other roads that have suffered decreases of smaller amounts, the most of them Southern roads, which, as already indicated, had a decreased cotton traffic. All the principal Southern roads, how-

ever, show notable increases in gross revenues for the month, notwithstanding the shrinkage in the cotton traffic. Instances are the Louisville & Nashville with \$633,699 gain; the Southern Railway with \$420,926 gain; the Seaboard Air Line with \$218,790, &c. Southwestern roads are distinguished in much the same way, but the Northern trans-continental lines surpass all others in the magnitude of their gains; thus the Great Northern has added \$1,186,846 to its earnings of last year and the Canadian Pacific has added no less than \$1,570,000. In the table we now present we have brought together all the changes for the separate roads for amounts in excess of \$30,000, whether increases or decreases.

The Western grain movement ran somewhat heavier than in the corresponding period of last year. Altogether the deliveries of wheat, corn, oats, barley and rye at the Western primary markets for the four weeks ending April 30 1910 were 32,583,965 bushels, as against 27,769,689 bushels in the corresponding four weeks of 1909. Below we give the details of the Western grain movement in the usual form.

To complete our analysis we furnish the following six-year comparisons of the earnings of leading roads arranged in groups. As indicating that earnings now are quite generally heavier than they have ever been before, it should be noted that the 1910 totals in all but one of the groups are the largest of all the years given. There are, however, exceptions to the rule in the case of some of the separate roads or companies. We may mention the Southern Railway, the Mobile & Ohio, the Texas & Pacific, the International Great Northern, the "Soo" and the Wabash, the 1910 figures for all of which fall a little below those of the best of previous years.

alleged cotton pool now under investigation, has elicited from Attorney-General Wickersham a communication, laid before the Senate on the 9th inst., in which he informs that body that it would be impossible to comply with the request. The information asked for concerned the names of those who had sold the cotton "alleged to have been bought by a pool of purchasers who are now under investigation by the Department of Justice, and at what price these parties sold this cotton, and whether or not they owned cotton at the time of the sale thereof, and the price of spot cotton in the South on the date of the making of these contracts or the sale of these contracts." Mr. Wickersham states in his communication that his powers and duties are prescribed by law, and that "by no statute is he required or permitted to conduct an investigation in aid of a legislative branch of the Government." He also asserts that "it has uniformly been held by my predecessors that the laws do not permit the Attorney-General to give advice at the call of either House of Congress, or Congress itself." He adds:

The investigation now being carried on by this Department concerning a so-called "pool" in cotton is for the purpose of ascertaining whether or not a crime against the laws of the United States has been committed. That investigation is being conducted with the aid of a Grand Jury, whose proceedings are necessarily secret, and the testimony adduced before it under well settled rules of law is for the use of the Grand Jury, whose functions are purely judicial and may not be used in aid of legislative inquiry.

The resolution of Senator Smith is said to have been since referred to the Judiciary Committee. A new turn was given to the situation on the 11th inst., when Senator Smith, who is a member of the committee which is investigating the high cost of living, decided that cotton was an important element in the cost of living and would therefore come within its scope of inquiry. The committee concurred in his views, and accordingly, it is stated, Frank P. Hayne, a cotton operator of New Orleans; Lewis W. Parker, a cotton manufacturer of South Carolina, and President of the American Spinners' Association; R. P. Stackhouse, a cotton grower of Dillon, S. C.; R. Mays Cleveland, a cotton grower of Marietta, and J. C. Hickey of Texas, have been summoned to appear before the Committee next week.

Notwithstanding the experience of the Senate, the House of Representatives on Thursday adopted a resolution introduced by Representative Craig, calling upon the Attorney-General to furnish any facts in his possession relating to the alleged attempt of certain persons to bull the cotton market. The resolution also inquires whether the Department of Justice is conducting or contemplates conducting, an investigation relating to combinations of persons operating for the purpose of reducing the price of cotton, and also whether any such investigation or prosecution was ever begun against any persons for conspiring to advance the price of wheat in 1909.

—In the bankruptcy proceedings against the cotton firm of Steele, Miller & Co. of Corinth, Miss., the Memphis "Commercial-Appeal" of the 8th inst. reports that an order appointing the present receiver, J. A. E. Pyle, as receiver also in bankruptcy has been given by Judge Niles. The petition in bankruptcy is understood to have been filed in behalf of European firms by their attorneys. According to the "Appeal" an indebtedness of \$945,000 is alleged by the petitioners, who are said to be Knoop & Fabarius and H. Biscoff & Co., Bremen, and Mechanische Baumwoll Spinnerei of Augsburg, Germany. Mr. Pyle is reported to have been named as receiver in an action brought by Cohn Bros., and it is stated that there will be no conflict between the parties who filed the creditors' bill and those who filed the bankruptcy petition.

—John Harsen Rhoades, of the banking firm of Rhoades & Co. of this city, who has been unrelenting in his efforts to effect a reduction in the rate of interest on savings deposits to the end that a proper ratio of surplus to deposits be established, seeks further to impress upon the savings bank trustees the dangers which attend the present high rates, in an article published in the May number of the "Bankers' Magazine." The article, which is entitled "Resources and Liabilities: the Problem Facing the Savings Bank Trustee," has been reprinted and circulated in folder form. Mr. Rhoades explains clearly the distinction between two terms much used in banking—"surplus" and "cash reserve." The cash reserve, he points out, is that amount held in cash, in the vaults of the institution, to meet any sudden demand from depositors, and does not necessarily denote any excess of assets over liabilities. A bank's surplus, on the other hand, represents the excess at any given moment of assets over liabilities; or that sum of money, or its equivalent in

investments, employed in various ways, held over and above the amount necessary to pay all depositors in full—in reality an insurance fund held to insure the full payment of all sums standing to the credit of depositors. Mr. Rhoades maintains that since every financial institution keeps the bulk of its funds employed, the method of computing the surplus requires careful consideration. Thoughtful reasoning, he states, warrants the conclusion that, with a going concern, the surplus can only be estimated, and that by ascertaining the current market or liquidating value of the assets.

As distinguished from the cash reserve, the surplus, he holds, is a potential liquidating resource of vital importance, to be kept intact at all times, save possibly in those of panic, when market values, being unreasonably low, and, as experience has shown, certain to improve, the bank director or Superintendent is not called upon to lay undue stress upon an ephemeral deficit. Mr. Rhoades notes that the cash reserve, as distinguished from the surplus, is a ready resource, not of similar importance, yet necessary at all times and essentially so in times of stress. The "surplus reserve," another term, Mr. Rhoades explains, is the excess of cash held over and above the legal requirement. Mr. Rhoades believes that the savings banks should aim to build up and maintain a surplus equivalent to at least 10% of deposits based upon the market value of their assets. In his article he says:

"The average percentage of surplus to deposits in the State of New York, which stood in 1887 at 17.74%, is to-day a little over 7%; and out of a total of 140 banks, 100 show a percentage below this average. If bonds legal for savings banks investment were to sell on a 4½% income basis, as against the 4% basis of to-day, it would mean a shrinkage in the market value of a bond of twenty-five years' life of about 8%. If our New York State savings institutions were called upon to mark down the market value of their securities—mortgages excepted—another 8%, not only in the majority of cases would no vestige of surplus remain, but in many a positive deficit would exist. It may seem far-fetched to insinuate that savings bank bonds will ever sell on a 4½% income basis, but there are many economists who believe that, with the continued great output of gold, we will again see a period of high money, and if so, bonds are certain to sell on a much higher income basis. However that may be, it is impressed upon the writer that the average margin of safety is entirely too small, and that, in common parlance, we are sailing too close to the wind. In the matter of dividends, under an erroneous conception of liberality, for which the law is largely responsible, we seem persistently to ignore this salutary fundamental maxim of banking and of business, namely the maintenance of a proper excess of resources over liabilities.

"There has been considerable discussion as to what ratio of surplus to deposits the savings bank should aim to carry, considering the high character of its investments, the amount invested in mortgages, and the fact that net earnings, as nearly as may be, should be credited to depositors. The question is open to argument, and yet the moment one decides that a surplus is essential, he has no choice but to admit that there is no half way about it. If the savings bank is not an investment institution—responsible only with bonds and not cash to its depositors—it is imperative that an adequate surplus should be maintained in order to guard against deficiency of assets to meet deposit liability. Fluctuating market values have convinced the conservative directorates of other institutions, where investments are equally gilt-edged, and in many cases less subject to fluctuation, because of shorter maturity, that it is sound banking to maintain a surplus, exclusive of the stockholders' liability, equivalent to 15 or 20% of deposits. It is to be remembered that while the New York State savings bank law does not permit a surplus to exceed 15% of deposits, it distinctly states that this maximum shall be computed by valuing securities selling above par at par, and below par at the market. It is obvious that, under such computation, a savings institution might carry a 'market' surplus of 20% or over, and yet not exceed the lawful maximum."

Mr. Rhoades also voices the opinion that the carrying of a small cash reserve, not less than 2½% of deposits, should be compulsory.

—An agreement under which the maximum rate of interest on deposits is fixed at 3½% was entered into by the members of the New Jersey Bankers' Association at their annual session held at Atlantic City on the 6th and 7th inst. This is to be accomplished under what is termed a "gentleman's agreement;" the arrangement is not made binding upon the members with penalty for violation, but is to be entirely voluntary, owing to the apprehension of some of the members that such an attempt to limit the rate might render the association subject to prosecution under the Sherman Anti-Trust law. Under the same plan it has been agreed to pay 2% on checking accounts where the average balance is over \$500. Vivian M. Lewis, Commissioner of Banking and Insurance of New Jersey, in an address before the convention took occasion to refer to the high rate of interest which, he stated, is not always the best thing for the depositor. Mr. Lewis also held that competition as a general proposition between banks is not good, and contended that unwise competition may lead the banker, in his effort to make money for his institution, to invest in unstable securities. Edward L. Howe, in his annual address as President, condemned the proposed postal savings bank bill, and urged consideration of the establishment of clearing houses in the State to secure better control of interest rates on deposits. Governor Fort,

who also addressed the bankers, referred to the banking growth of the State. He pointed out that there are now in the State 192 national banks, 19 State banks and 63 trust companies. The gross deposits in its national banks ten years ago, he said, were a little over \$70,000,000; now they are \$156,000,000; the State banks a decade ago contained about \$9,000,000; now they contain about \$14,000,000; the trust companies then held deposits of about \$34,000,000; now \$167,000,000; and added to this, he continued, is the splendid showing of the savings bank system of the State, of about \$101,000,000 now, against \$54,000,000 ten years ago. In a resolution which was adopted, the Association placed itself on record as "against the too rapid creation of an increasing number of financial institutions in the State, especially in cases where promoters desire the franchise to establish new banks and trust companies." The following are the officers of the Association for the ensuing year: President, Adrian Lyon, President of the Perth Amboy Savings Institution, at Perth Amboy; Vice-President, H. H. Pond of the Plainfield Trust Co. of Plainfield; Secretary, W. J. Field, Secretary and Treasurer of the Commercial Trust Co. of New Jersey, Jersey City; and Treasurer, William H. Van Dusen, Assistant Cashier of the National Newark Banking Co., Newark.

—The article by Maurice L. Muhleman dealing with "A Plan for a Central Bank," published in the "Banking Law Journal," has been reprinted in pamphlet form.

—The contest which developed at the annual meeting of the New York Stock Exchange on Monday through the presentation of an independent ticket brought about one of the largest votes ever cast by the members. The opposing forces, whose ticket differed in but two respects from that of the regular ticket, were victorious; they succeeded in electing Albert Francke, of Francke, Thompson & Robb, a member of the Governing Committee, over Arthur Whitney, the regular candidate, by a majority of 78, and Erastus T. Tefft, of Tefft & Co., as a member of the Nominating Committee, over Fuller Potter, by a majority of 103. The candidates on both tickets were otherwise identical. R. H. Thomas was re-elected President of the Exchange and Henry C. Swords was re-elected Treasurer. The successful ticket in full is as follows:

President, R. H. Thomas; Treasurer, Henry C. Swords; Members of the Governing Committee—To serve four years: Stephen H. Brown, Donald G. Geddes, R. T. H. Halsey, Stanley D. McGraw, Warren B. Nash, H. G. S. Noble, George B. Post Jr., Samuel F. Streit, F. K. Sturgis and Albert Francke; to serve three years: C. Ledyard Blair and William H. Remick. Trustee of the Gratuity Fund—To serve five years, Ernest Groesbeck. Members of Nominating Committee for 1911: Dexter Blagden, Alfred Mestre, William B. Potts, Henry E. Montgomery and E. T. Tefft.

—The proposition to increase the capital of the National Park Bank of this city from \$3,000,000 to \$5,000,000 was ratified by the stockholders at a special meeting on the 10th inst. The new stock is offered to shareholders of record May 7 at \$200 per share. The premium will be applied to surplus, raising it from \$8,000,000 to \$10,000,000.

—Suit was filed on the 6th inst. by Henry D. Hotchkiss, trustee in bankruptcy for the failed firm of Lathrop, Haskins & Co. of this city, against the National City Bank for the recovery of bonds and stocks valued, it is stated, at \$150,700. The complaint is said to allege that on Jan. 19, the day of the firm's suspension, the bank obtained a transfer of the securities as collateral for pretended loans and advances amounting to \$117,000. It is further alleged that at the time of the transaction the firm was insolvent; that the transfer was in violation of the bankruptcy Act, and should therefore be declared void. On the 4th inst. two suits were begun by Mr. Hotchkiss on behalf of the suspended firm against James R. Keene and the members of the two pools in the Columbus & Hocking Coal & Iron stock, in which an accounting of the transactions therein is sought.

—New interests have become identified with the European-American Bank of this city, and a reorganization of the institution is to be effected under the name of the Security Bank of the City of New York. More than a year ago application had been made to the Banking Department to change the title to the Security Bank, but the plans to this end seem to have since been held in abeyance. Earnest R. Eckley, an attorney of 43 Wall Street, has taken an active part in the plans for reorganization, and we are informed that the changes contemplate an increase of \$100,000 in the capital, making it \$200,000. Although action to this end had likewise been taken some time ago, the capital has continued at \$100,000. The following new directors have been chosen to the board: H. Durand Cheever, of the Okonite Company, Ltd.; Allen D. Converse, of the banking firm of Bigelow &

Co.; George Murray Brooks and Herman P. Olcott. Mr. Mann will serve as Acting President until the election of a permanent head at a subsequent meeting. The bank began business in September 1907.

—Finis E. Marshall, President of the Phenix National Bank of this city, authoritatively stated to our representative yesterday that "the negotiations pending for a consolidation of the Phenix National Bank with the Bank of New York, N.B.A., could not be consummated satisfactorily to the interests of both sides, so the matter has been dropped without prejudice to either party."

—The trial of F. Augustus Heinze, who was charged with misapplying the funds of the Mercantile National Bank during his presidency of the institution in 1907, and over-certifying checks of his brother's firm, Otto Heinze & Co., resulted in the return of a verdict of "not guilty" by the jury on the 12th inst. Since the beginning of the trial on April 25 a number of the counts in the indictments which had stood against the defendant on that date had been dismissed, the jury being charged only with the consideration of thirty counts. These concerned the over-certification of checks of Otto Heinze & Co. on Oct. 14 1907 aggregating \$464,000 and the misapplication of the funds of the bank to that extent. The Government, however, was unable to establish its charges, and Mr. Heinze has been completely acquitted.

—The Girard Trust Co. of Philadelphia has decided to discontinue on June 1 the custom of balancing depositors pass books, and in lieu thereof will inaugurate the system of rendering monthly statements of accounts, with canceled vouchers. While the proposed method is not original with the institution—it has for some time been in operation among a few of the financial institutions in New York—the Girard is the first trust company in Philadelphia to adopt the plan. Under this method the depositor is enabled to verify his account each month without the necessity of presenting the pass book for settlement. Its superiority over the method of settling pass books each six months, or upon the request of the depositor, is becoming more and more apparent, especially in view of the protection afforded the depositor and the institution in the matter of the prompt detection of forgeries and errors.

—The Penn National Bank of Philadelphia has increased its semi-annual dividend from 5 to 6%, making the yearly rate 12%. The bank has a capital of \$500,000. Its surplus fund has just been increased to \$1,200,000, through the addition of \$100,000.

—Harvey L. Elkins has been elected President of the Colonial Trust Co. of Philadelphia to succeed R. W. Downing, who retires on account of ill-health. Mr. Elkins, who had been Vice-President and Treasurer, was one of the organizers of the institution, which began business in 1899.

—The directors of the Mellon National Bank of Pittsburgh have increased the surplus fund to \$3,000,000 by the addition of \$100,000 out of the undivided profits. The institution has a capital of \$4,000,000.

—J. D. Ayres has been promoted from an assistant cashier-ship in the Bank of Pittsburgh, N. A., at Pittsburgh, to a vice-presidency in the institution. Mr. Ayres has been connected with the institution for a number of years. The office to which he has been chosen is a newly created one.

—The time for the holding of the annual convention of the Ohio Bankers' Association has been changed from June 8 and 9 to June 6 and 7, to accommodate President Taft, who has accepted an invitation to address the meeting. The bankers will convene in Columbus. The addresses of welcome will be delivered by Governor Harmon and P. W. Huntington, President of the Huntington National Bank of Columbus, and the response to these addresses will be made by former Governor Myron T. Herrick, President of the Society for Savings of Cleveland. There is to be a discussion of the Central Bank proposition, led by Col. J. J. Sullivan, President of the Central National Bank of Cleveland; Morris M. White, Chairman of the board of the Fourth National Bank of Cincinnati, and Thomas H. Wilson, Vice-President of the First National Bank of Cleveland. The discussion will be open to all in attendance. Other speakers of the occasion will be Smith W. Bennett of Columbus, F. W. Thomas of the Bankers' Publishing Co. of Toledo, B. W. Waltermier of Findlay, Dr. W. O. Thompson, President of the Ohio State University, and George Guckenberger, President of the Atlas National Bank of Cincinnati.

—Approval of the proposition to increase the capital of the Union Savings Bank & Trust Co. of Cincinnati from

\$500,000 to \$1,000,000 was given by the stockholders on the 10th inst. A dividend of 100% to apply as payment towards the new stock, in accordance with the announcement made in these columns April 16, has been declared.

—The plan to increase the capital of the Fifth-Third National Bank of Cincinnati, Ohio, from \$2,750,000 to \$3,000,000 was approved by the shareholders on the 9th inst. As stated two weeks ago, the additional stock is offered pro rata to the existing shareholders at \$200 for \$100 share.

—U. G. Walker, formerly President of the South Cleveland Banking Co. of Cleveland, Ohio, which assigned in January, is said to have been found guilty of perjury on the 7th inst. The charge is understood to have grown out of the alleged filing of false statements with the Banking Department.

—The new La Salle Street National Bank of Chicago, of which Senator William Lorimer is the head, opened its doors on Monday in the Rookery Building. The bank's opening was exceptionally auspicious, its first day's receipts, amounting, it is stated, to over \$1,500,000. The capital of the institution is \$1,000,000 and it has a surplus of \$250,000. Acting with Mr. Lorimer as officers are C. B. Munday and J. M. Appel, Vice-Presidents; C. Clavin, Cashier; Charles G. Fox, Assistant Cashier; William Lorimer Jr., Secretary; Leonard J. Lorimer, Assistant Secretary, and Thomas B. McDonald, Auditor. The affiliated institution, the La Salle Street Trust Co., is not yet in readiness for business, but is expected to begin operations shortly.

—The North Shore Exchange Bank of Chicago, located on Clark Street near Belmont Ave., began business on the 9th inst. Its officers are John Fuhrmann, President; Robert P. Hillinger, Vice-President, and George J. Kappes, Cashier.

—Leigh Sargent, manager of the publicity department of the First National Bank of Chicago, has been elected President of the Chicago Chapter of the American Institute of Banking. Thirty-one local delegates were appointed to attend the annual convention at Chattanooga, Tenn., in June.

—S. K. Sneed, formerly Cashier of the Henderson National Bank of Henderson, Ky., and President of the Kentucky Bankers' Association in 1902-03, was found dead in a ravine at Henderson on the 5th inst. He was seventy-two years old.

—Under the advice of his physicians, Matt J. Heyer, of the Southern National Bank of Wilmington, N. C., and of the Atlantic Trust & Banking Co. of that city, will disassociate himself from active business for the present. His resignation as President of both institutions was received by the respective directors on the 3d inst. and accepted with regret. He will, however, continue as a director of the two banks. Charles N. Evans, Cashier of the Southern National since its organization, has been elected to succeed Mr. Heyer in the presidency of both institutions. J. W. Simpson, formerly Assistant Cashier of the Southern National Bank, becomes Cashier of that institution.

—H. N. Tinker has resigned as active Vice-President of the Union National Bank of Houston, Texas, to devote his entire time to the Bankers' Trust Co., which was organized about eight months ago, and of which he is President. We are informed that the capital of the trust company will probably be increased in the near future from \$500,000 to \$1,000,000.

—A run on the All Night & Day Bank of Los Angeles, which began on the 2d inst., was reported by the Los Angeles "Times" of the 4th inst., to have come to an end after about thirty-six hours' duration. President Newton J. Skinner, according to the "Times," stated that the bank had lost only about \$100,000 in deposits. In a statement issued on the 3d inst., State Superintendent of Banks Alden Anderson said: "I find that the bank is paying its depositors dollar for dollar, and that the depositors will get every dollar that is coming to them if they want the money. I will stay here for two or three days, and in order to keep in touch with the situation will make a still more thorough examination of the bank's condition as to its loans and credits. The bank has obeyed the State law, and so long as it does it will not be molested. Some time ago the officials impaired the bank's capital to the extent of \$26,000, but this amount they made good upon my order on Feb. 16 last." The bank began business in January 1909. Its authorized capital is \$250,000 and the paid-in amount was reported last month as \$200,000.

—The Federal Banking Co. of Mexico City, reported as a small American private bank, is said to have closed its doors on the 3d inst. A receiver was appointed on the 7th inst.

The State Banking Department also now furnishes weekly returns of the State banks and trust companies under its charge. These returns cover all the institutions of this class in the whole State, but the figures are compiled so as to distinguish between the results for New York City (Greater New York) and those for the rest of the State, as per the following:

For definitions and rules under which the various items are made up, see "Chronicle," V. 86, p. 316.

The Banking Department also undertakes to present separate figures indicating the totals for the State banks and trust companies in the Greater New York *not in the Clearing House*. These figures are shown in the table below, as are also the results (both actual and average) for the Clearing-House banks. In addition, we have combined each corresponding item in the two statements, thus affording an aggregate for the whole of the banks and trust companies in the Greater New York.

Wall Street, Friday Night, May 13 1910.

The Money Market and Financial Situation.—It is an interesting and significant fact that the passing of so distinguished and important a personage as King Edward VII. should have caused practically no disturbance in international or financial affairs. This result seems to show that such affairs are in a remarkably stable condition and that their condition is pretty generally understood. The security markets in London and New York have, throughout the week, reflected the confidence that exists in financial circles on both sides of the Atlantic. There has been no evidence of liquidation, but, on the other hand, prices have advanced day by day.

Crop reports have been somewhat contradictory but on the whole favorable, especially in the case of spring wheat, and wheat has rather sharply declined. Some preliminary figures given out relating to the international trade for April indicate that the full report for that month will be little if any more favorable than that for March. On the other hand, the banking house which took \$40,000,000 of Baltimore & Ohio notes reports that a considerable portion of the issue has been placed abroad and a part of the supply of foreign bills now offered in this market is drawn against recent sales of securities.

The Bank of England's weekly statement attracted attention on account of its showing increased Government deposits and a large percentage of reserve.

The open market rates for call loans at the Stock Exchange during the week on stock and bond collaterals have ranged from 3 to 4%. To-day's rates on call were 3½@4%. Commercial paper quoted at 4½@5% for 60 to 90-day endorsements, 4¾@5% for prime 4 to 6 months' single names and 5¼@6% for good single names.

The Bank of England weekly statement on Thursday showed a decrease in bullion of £566,359 and the percentage of reserve to liabilities was 54.44, against 52.68 last week.

The rate of discount remains unchanged at 4%, as fixed March 17. The Bank of France shows a decrease of 3,250,000 francs gold and 3,875,000 francs silver.

Note.—The Clearing House now issues a statement weekly showing the actual condition of the banks on Saturday morning as well as the above averages. These figures, together with the returns of separate banks, also the summary issued by the State Banking Department, giving the condition of State banks and trust companies not reporting to the Clearing House, appear on the second page preceding.

Foreign Exchange.—Foreign exchange rates have moved up and down with great rapidity during the current week. Demand sterling sold as low as 4 8635 but recovered yesterday to as high as 4 867½.

To-day's (Friday's) nominal rates for sterling exchange were 4 84½ for sixty days and 4 87½ for sight. To-day's actual rates for sterling exchange were 4 8360@4 8370 for sixty days, 4 8680@4 8690 for cheques and 4 8720@4 8730 for cables. Commercial on banks 4 8350@4 8360 and documents for payment 4 83@4 83¾. Cotton for payment 4 83@4 83¼ and grain for payment 4 83½@4 83¾.

To-day's (Friday's) actual rates for Paris bankers' francs were 5 20½@5 20 for long and 5 18¾ less 1-32@5 18¾ for short. Germany bankers' marks were 94½@94¾ for long and 95@95 1-16 less 1-32 for short. Amsterdam bankers' guilders were 40 24@40 25 for short.

Exchange at Paris on London 25f. 27¾c.; week's range, 25f. 28c. high and 25f. 25c. low.

Exchange at Berlin on London 20m. 50½pf.; week's range, 20m. 51pf. high and 20m. 49½pf. low.

The range of foreign exchange for the week follows:

Sterling, Actual—	Sixty Days.	Cheques.	Cables.
High for the week	4 84½	4 87	4 8745
Low for the week	4 83½	4 8630	4 8670

Amsterdam Bankers' Guilders—			
High for the week	40 1-16	40 28	40 32
Low for the week	40	40 21	40 25

The following are the rates for domestic exchange at the undermentioned cities at the close of the week: Chicago, 5c. per \$1,000 discount. Boston, par for cash. San Francisco, 25c. per \$1,000 premium. St. Paul, 60c. per \$1,000 premium; Charleston, buying par, selling 1-10 premium. St. Louis, 20c. per \$1,000 premium bid, 30c. per \$1,000 asked.

New Orleans, commercial \$1 per \$1,000 discount, bank 90c. per \$1,000 premium. Savannah, buying 75c. per \$1,000 discount, selling 75c. per \$1,000 premium. Montreal, par.

State and Railroad Bonds.—No sales of State bonds have been reported at the Board this week.

The market for railway bonds has been dull and narrow. Only the movement of a few issues saved the market from comparative stagnation. Prices have generally been well maintained, however, and in a few exceptional cases an advance of a point or more has been recorded.

Wabash ref. and ext. 4s have been unusually active on a demand which carried them up over 3 points. Chesapeake & Ohio conv. 4s, w. i., and some of the Rock Island issues and Seaboard Air Line 5s are a point or more higher than last week. Northern Pacific, Union Pacific, Atchison and Brooklyn Rapid Transit have been relatively strong.

United States Bonds.—Sales of Government bonds at the Board include \$10,000 3s, coup., at 102¼; \$10,000 3s, reg., at 102¼; \$1,000 4s, reg., at 114¾, and \$500 4s, coup., at 115¼. The following are the daily closing quotations; for yearly range see third page following.

Railroad and Miscellaneous Stocks.—The stock market has been less active than of late, the transactions to-day amounting to only 340,500 shares and for the week averaging but little over 500,000 shares per day. The tendency of prices was steadily upward except during a part of to-day, and closing quotations are generally from 2 to 5 points higher than last week.

Canadian Pacific led the movement in an advance of over 10 points within the week. This advance was based on its largely increased earnings and reports of a new Eastern seaboard connection. Its shares sold to-day at 191¼, the highest price recorded since 1907.

A few other stocks have been exceptionally strong, including Pennsylvania, which has been in special request at an advance of over 4 points, Reading and Wabash issues, the latter on rumors of a change of control.

All the copper stocks have been strong, notwithstanding the report of a large increase in the stock of metal on hand. Other industrial stocks have moved in sympathy with the general market.

For daily volume of business see page 1290.

The following sales have occurred this week of shares not represented in our detailed list on the pages which follow:

Outside Market.—After showing improvement in the first half of the week, the "curb" market reacted and the majority of issues suffered declines. Changes were more pronounced in the copper shares. A stimulating influence in to-day's trading was the decided strength developed by the so-called Heinze properties. Butte Coalition from 18¾ reach 21¼, fell off to 20¾ and closed to-day at 20¾. Chino Copper advanced from 10½ to 13¾, weakened to 12 and ends the week at 12¾. First National, after selling between 2½ and 2¼, moved up to 4¾, assessment paid, and finished to-day at 4¼. Gila Copper ran up from 5¾ to 6½ and down to 6½. Giroux rose from 7½ to 8¼ and reacted to 7¾. Greene-Cananea went up from 8¼ to 9½ and sank to 8¾. Miami Copper gained a point to 22¾, dropped back to 21¾ and closed to-day at 22. Nevada Consolidated, after selling up from 18¾ to 20½, was transferred to the Stock Exchange, where the price rose to 20½, with the final transaction to-day at 20¼. Ohio Copper advanced from 2½ to 2 11-16 and to-day jumped to 4, the close being at 3 3-16. United Copper, common, advanced 2 points to 6½ and to-day sold up to 8, the close being at 7¾. A spurt in Tonopah Mining carried the price from 7½ to 9¼. This was followed by a drop to 8¼ and a recovery to 8½. Industrials continue dull. American Tobacco advanced from 437 to 450 and declined to 435. Intercontinental Rubber, after early improvement from 23 to 23½, dropped to 22½. Standard Oil advanced from 625 to 637 and dropped to 628. United Cigar Mfrs. com. improved from 69 to 70½. In bonds Western Pacific 5s were traded in from 94¾ up to 95¼ and down to 95½.

RAILROAD GROSS EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from July 1 to and including such latest week or month. We add a supplementary statement to show the fiscal year totals of those roads whose fiscal year does not begin with July, but covers some other period. The returns of the electric railways are brought together separately on a subsequent page.

Electric Railway Net Earnings.—The following table gives the returns of ELECTRIC railway gross and net earnings reported this week. A full detailed statement, including all roads from which monthly returns can be obtained, is given once a month in these columns, and the latest statement of this kind will be found in the issue of April 30 1910. The next will appear in the issue of May 28 1910.

ANNUAL REPORTS.

Annual Reports.—An index to annual reports of steam railroads, street railways and miscellaneous companies which have been published during the preceding month will be given on the last Saturday of each month. This index will not include reports in the issue of the "Chronicle" in which it is published. The latest index will be found in the issue of April 30. The next will appear in that of May 28.

Public Service Corporation of New Jersey.

(Report for the Fiscal Year ending Dec. 31 1909.)

The company has issued its first report in pamphlet form for the year ending Dec. 31 1909. This is given in full on subsequent pages of to-day's "Chronicle." The company controls practically the entire street-railway system of Northern New Jersey, also many lines in southern New Jersey, and the gas and electric-lighting interests of the greater part of the State. The trolley lines are shown on a map on pages 64 and 65 of our "Electric Railway Section" of Feb. 26 last, and also on a map annexed to the printed report.

Included in the report as given on subsequent pages are the remarks of President Thomas N. McCarter, the consolidated income account of the system, including the leased and controlled companies, condensed balance sheets of the Public Service Corporation and of its subsidiaries, the Public

Service Ry. and Public Service Gas Co., which operate the railway and gas properties, respectively, a list of dividends guaranteed under leases, and of stocks and bonds owned, and many other interesting tables and statistics.—V. 90, p. 1236, 699.

International Steam Pump Co.

(Preliminary Statement for Fiscal Year end. March 31 1910.)

At the annual meeting held May 10 President Benjamin Guggenheim said:

General Results.—In my last annual report I referred to the general commercial and industrial depression which characterized the business situation during the fiscal year then under review. The unfavorable general trade conditions which then prevailed continued in the first half of the year just ended and it was only during the last 6 months that business may be said to have approached its normal status. The practical result of these conditions is that, of our total billings for the year, about two-thirds were made during the second half. In view of such influences, the result is not only gratifying in itself but full of encouragement.

The total net earnings for the year amount to, approximately, \$2,000,000, compared with \$1,447,653 for the preceding year and \$1,618,506 for the year before. In order to appreciate the full import of these figures it is necessary to remember that while the volume of business in 1909 was only 65% of that of 1908, the profits were equal to 90% of those of 1908, and that during the year just completed, whereas the volume of business was only 85% of 1908, the profits were equal to 124% of those for 1908. The profits for the year just closed were about \$700,000 in excess of requirements for fixed charges and preferred dividends. Of this amount, \$117,900 will be used to retire \$107,185 bonds of the Blake & Knowles Steam Pump Works, leaving only \$194,970 of these bonds still outstanding. Should the current year's business continue as at present, and as it has averaged during the past 6 months, this year's profits should produce a surplus of about 7% on the common stock outstanding.

Improvements.—The expenditures now being made in our present plants to increase their capacity and provide them with additional equipment of modern tools and machinery amount to about \$850,000 in addition to about \$750,000, which is the approximate cost of a large addition to the plant of the Power & Mining Machinery Co. at Milwaukee for the purpose of entering into a new manufacturing line.

Acquisitions.—We have also acquired, since the end of the last fiscal year, the plant of the Jeaneville Iron Works Co. and a controlling interest in the Denver Rock Drill & Machinery Co.

New Bond Issue.—During the past year we have negotiated a 20-year loan for \$8,500,000, secured by 5% gold bonds, the proceeds of which were used in part for the redemption of our 6% debentures, amounting to \$3,500,000, maturing in 1911, as well as for the extinction of our total floating indebtedness, and which will further defray a considerable portion of the capital expenditures above referred to.

Prospects.—The foreign business shows signs of continual improvement, not only in the amount of business but also in the introduction of improved and more economical methods.

With the increased capacity due to the improvements and additions, when completed and in full operation, we confidently anticipate that our output will be increased not less than 30%, and that this increase will earn at least our present ratio of net profits, resulting in a correspondingly large and additional increase in the total of net earnings.

In the light of the results recently attained, I trust that you will share with me the fullest confidence in the company's excellent present condition and promise of continued prosperity.

United States Rubber Company, New York.

(Report for Fiscal Year ending March 31 1910.)

President Samuel P. Colt, May 17 1910, wrote in substance:

General Results.—The past year on the whole has been the most prosperous in the history of the company. The sales of merchandise by the United States Rubber Co. and its subsidiary companies, as also by the Rubber Goods Mfg. Co. (V. 90, p. 1236) and the Canadian Consolidated Rubber Co., Ltd. (see separate report below), were larger than in any previous year, and the net profits likewise were greater.

The operations of the Rubber Goods Mfg. Co., the Can. Consol. Rubber Co., Ltd., and the General Rubber Co. are not included in the Treasurer's report, but only on the dividends derived from the United States Rubber Co.'s stock interest therein. The share of the undivided earnings of these companies for the year which appertains to such stock interest amounts to approximately \$1,700,000. The increase in "property and plants" of about \$8,000,000 shown in the Treasurer's report represents the investment in the Revere Rubber Co. and in the Canadian Consol. Rubber Co., Ltd.

Volume of Business.—The sales of the company for the year were \$38,711,051, as against \$31,889,351 the previous year. Part of this increase, however, is accounted for by the higher selling prices which the company was compelled to establish, owing to the higher cost of crude rubber and other materials. The past winter was exceedingly favorable to the sale of rubber footwear and clothing, and the stocks of goods in the hands of retailers, jobbers and mill warehouses are smaller than for many years past.

Profits.—As against \$4,507,655, the net profits for the year ending Mch. 31 1909, those for the present year are \$5,535,163, after setting up \$500,000 as a "reserve for contingencies." Should we add the company's share of the undivided profits of the companies in which it is a stockholder, the profits for the year would be about \$7,235,000. All interest charges are deducted before this net profit is arrived at.

Export Business.—The export business was larger than in any previous year. We look for a steady growth in this branch of our business.

Consolidation.—Further progress has been made toward consolidation of manufacturing with the view of producing goods with greater efficiency and economy; and other moves of this nature are in contemplation, including the utilizing of one of our mills, not now in operation, for the growing business of the recently acquired Revere Rubber Co.

Automobile Tires.—The sales of the Rubber Goods Mfg. Co. for the cal. year 1909 were \$25,629,593, as against \$18,491,988 in 1908, the larger part of this increase being in automobile tires. The product of the Revere Rubber Co. amounted last year to about \$6,000,000. The brands of tires made by the Rubber Goods Co. are the Hartford, Hartford-Dunlop, Morgan & Wright and G & J. The Revere Co. manufactures the Continental brand. The automobile tire business promises to be of momentous importance.

Crude Rubber.—Fine Para and Ceylon rubber has during the past year reached the unprecedented price of about \$3 a lb. as against a normal price of about \$1 a lb. This has led to the formation of numerous companies, chiefly in London, to operate plantations in Ceylon, Sumatra, Java, Borneo and the Malay Peninsula, the market price of the rubber at the present time being 8 to 10 times the cost of production there, while the Brazilian product now sells here for at least three times its cost of production. With almost unlimited forests of native rubber trees in Brazil and other tropical countries and an almost unlimited area in the Far East upon which the rubber tree can be successfully cultivated, it would seem that rubber cannot be maintained indefinitely at a price from 3 to 10 times the cost of production.

Fortunately the United States Rubber Co. has obtained control, through the General Rubber Co., of a large stock of crude rubber at prices which enables it with some profit to meet the demands of its customers, though it has recently been compelled to advance prices somewhat. The wisdom of establishing our own houses in Para, Manaos, London and Liverpool, which was done a few years ago, is manifest, and during the past year special attention has been given to the initiation of plans for ourselves producing both in the Far East and in Brazil the supply of crude rubber needed by the company. We confidently expect that these plans will result in our obtaining in the not distant future from our own rubber properties a substantial portion of our requirements.

Canadian Consolidated Rubber Co., Ltd.—Some time since the United States Rubber Co. purchased through Mr. D. Lorne McGibbon an interest in Canadian Consolidated Rubber Co., Ltd., which manufactures about the

same proportion of rubber goods consumed in Canada that the United States Rubber Co. and its subsidiary companies do in the United States. Your directors recently felt it desirable to increase our interest in the Canadian company, and this has been done to such extent that we now own a very large proportion of the stock of the Canadian Consol. Rubber Co., Ltd. (V. 90, p. 629; V. 83, p. 1427). We have recently acquired through that company a large interest in the "felt" business of Canada—a business kindred to the rubber business, and which, owing to the more severe climate of Canada, is of greater relative importance there than in the United States. (See report of a Canadian company below.)

Revere Rubber Co.—The death of Charles H. Dale, President of the Rubber Goods Mfg. Co., left that company without a practical rubber manufacturer at its head. In December 1909 negotiations were opened with the General Manager of the Revere Rubber Co., Mr. Ellsha S. Williams. That company, with a capital stock of \$2,000,000, under his management had been developing for several years a large and successful business in the manufacture of tires, rubber thread and mechanical rubber goods. Its annual output had reached \$6,000,000, and its capital stock (par \$100) was selling at \$200 a share. Mr. Williams indicated a willingness to accept the presidency of the Rubber Goods Co., but only on condition that simultaneously his shareholders should receive an offer for all their shares in the Revere Rubber Co. at the stated market price. On or before Dec. 24 substantially all of the Revere Rubber Co. stock had been acquired by or for the United States Rubber Co., and on Jan. 5 1910 Mr. Williams was elected President of the Rubber Goods Mfg. Co.

New Securities.—To finance the acquisition of this stock of the Revere Rubber Co. and outstanding shares of the Canadian Consol. Rubber Co., Ltd., as well as to provide additional working capital needed for the growing business of the United States Rubber Co., the most available resources were the unissued 35,614 shares of first pref. stock and \$5,000,000 6% bonds of this company. A syndicate, comprising your President and some of the directors, undertook to purchase at \$110 a share all of the pref. stock which should be offered to stockholders, and not taken by them at that price, to purchase outright at par \$2,500,000 bonds, and, at the option of the company at any time before Dec. 20 1910, to purchase at par the other \$2,500,000 bonds, in the meantime lending thereon the full amount thereof at 6% interest, the terms being more fully stated in the circulars of Dec. 23 and Dec. 29 1909 (V. 89, p. 1673). In addition, the syndicate was to receive the net profits of the Revere Rubber Co. until Dec. 31 1911, but any excess above \$700,000 was to be divided with the United States Rubber Co.

Upon the offer of December 1909 the stockholders took 27,997 shares of first pref. stock and the syndicate took the remaining 7,617 shares at 110. It also took \$2,500,000 bonds at par and loaned the company \$2,500,000 on the remaining bonds, which it must take at par at the option of the company. (V. 89, p. 1673; V. 90, p. 307, 451, 1177.) Thus there was provided about \$9,000,000, of which \$4,000,000 were used for the purchase of stock of the Revere Rubber Co., \$1,000,000 were used for purchase of stock of the Canadian Consolidated Rubber Co. and about \$4,000,000 cash was added to our working capital.

Dividends on Common Stock.—The earnings of the company the past year, considered by themselves, would seem to warrant some division to the common stockholders, and, were it not for the abnormally high price of crude rubber existing and the consequent requirement of a much larger sum of money to purchase and carry the same, we would feel warranted in recommending a dividend upon the common stock at the present time.

United Boxboard Company, New York City.

(Report for Fiscal Year ending March 26 1910.)

President Sidney Mitchell May 7 1910 wrote:

Bonds, &c.—Of the underlying bonds and mortgages, there has been retired during the year the amount of \$129,205, leaving a balance of \$3,564,990, of which \$492,500 are in the treasury of the company, leaving a net outstanding bonded debt of \$3,072,490.

General Results.—The results of the company's operations for the year (including subsidiary companies) after paying all interest charges and expenditures for repairs and improvements show a deficit of \$19,580. While the competition has been severe and the margin of profit narrow, the deficit of the year is directly chargeable to the drought of the summer and fall of 1909, which severely handicapped the operation of your wood-pulp mills. These mills are normally good profit-making properties, and had it been possible to operate them continuously through the fall and winter, the company's operations for the year would have shown a surplus after payment of all charges.

The growing demand for paper boxboard has been accompanied by an increase in production slightly in excess of the normal demand. This over-production, though slight, has resulted in severe competition, especially on the cheaper grades. Prices have fluctuated from time to time with the market for raw material. The board market, however, is sensitive to a slight under-production as well as over-production, and it is reasonable to expect that the unsatisfactory conditions of the last two years will be followed by a return to a level of prices which will permit a fair margin of profit. The present volume of business shows a good increase over last year and the year before.

Your largest mill, situated at Norwich, Conn., which was damaged by fire, has only been in partial operation during the past year. The damaged portion has been completely rebuilt and will be in full operation within a short time.

The money which has been spent in repairs and improvements has resulted in an increased production and lower costs.

Central New England Ry.—*Purchase of Minority Stock by New Haven Road.*—New York New Haven & Hartford interests, it is reported, are endeavoring to purchase in odd lots from stockholders in Philadelphia their holdings of common and preferred stock, 23 being offered for the preferred and 12 to 13 for the common stock.

Joseph Moore Jr., of Philadelphia, says:

I think the prices now being offered by brokers, presumably acting for the New York New Haven & Hartford RR., are too low. My idea is that the preferred should bring \$50 per share and the common \$25.

If the greater part of the small amount of stock now outstanding could be pooled, I think we might secure these prices, as the New Haven road is anxious to retire this remnant of stock.

If those stockholders who are willing to sell at \$50 and \$25 will communicate with me, at the National Bank of Northern Liberties, I will correspond with President Mellen of the New Haven road and see what can be done if sufficient stock offers.—V. 90, p. 1238.

Central RR. of New Jersey.—*Guaranteed Bonds Offered.*—See Lehigh & Wilkes-Barre Coal Co. under "Industrials" below.—V. 90, p. 976, 697.

Central Railway Syndicate.—*Books Close for Distribution of Holdings.*—The transfer books closed April 28 and will remain closed until further notice, for the purpose of making a distribution of assets to subscribers "of record."—V. 89, p. 162.

Chicago & Alton RR.—*Notes Offered.*—Effingham, Lawrence & Co., 111 Broadway, N. Y. City, recently offered at 99½ and int., yielding 5.22% income, a block of the \$2,500,000 collateral trust 5% convertible notes, dated March 15 1910, and due March 15 1913. Int. M. & S.

Secured by \$3,500,000 "improvement and equipment mortgage" 5% bonds, due March 15 1930, of which \$18,000,000 have been authorized. Convertible into said bonds on any interest date on 30 days' notice; also callable after March 15 1912 at any interest period at par. Compare V. 90, p. 697, 771.

Chicago Milwaukee & St. Paul Ry.—*New Bonds.*—According to one press dispatch from Paris, the foreign purchasers of the new 4% debentures are the Banque de Paris et des Pays Bas and the Societe Generale de Credit Industriale et Commerciale; another says, the Consortium de Grands Etablissements de Credit.—V. 90, p. 1238.

Chicago & Western Indiana RR.—*Bonds Called.*—Ninety-three (\$93,000) general mtge. bonds of 1882 have been drawn for redemption on June 1 at 105 and interest at the office of J. P. Morgan & Co., New York.—V. 90, p. 447.

Cleveland Cincinnati Chicago & St. Louis Ry.—*Sale of Bonds.*—The \$10,000,000 (50,000,000 francs) 4% debentures placed in Paris last week through J. P. Morgan & Co., were taken by the Comptoir National d'Escompte de Paris, Societe Generale and Morgan, Harjes & Co.—V. 90, p. 1238.

Dartmouth & Westport Street Ry.—*New Stock.*—The Massachusetts State Railroad Commission has authorized the company to issue \$237,500 additional capital stock at \$150 a share, in part to retire \$90,000 bonds payable, it is said, Oct. 1 1910, and the remainder on account of improvements and additions. The new shares when issued will increase the capital stock to \$500,000.—V. 82, p. 691.

Delaware & Hudson Co.—*New Manager.*—Robert C. Pruyn, President of the National Commercial Bank of Albany, has been elected to the board of managers, succeeding the late Dumont Clarke.—V. 90, p. 1044, 911.

Duluth Superior Traction Co.—*New Bonds.*—The Wisconsin Railroad Commission has sanctioned the creation of \$2,500,000 Duluth Street Ry Co. general mortgage 5% 20-year, gold coupon bonds, of \$1,000 each, redeemable at option of company on any int. day after May 1 1915 at 105.

Of the total issue, \$300,000, it is understood, is to be used to reimburse the treasury for additions and extensions made during 1908 and 1909, and the remainder only for subsequent additions, extensions and permanent improvements. The bonds are to be issued at not less than 75% of par.—V. 90, p. 848, 627.

Frederick (Md.) RR.—*Mortgage.*—The company has filed a mtge. to the Fidelity Trust Co. of Baltimore, as trustee, to secure an issue of \$1,500,000 "first and refunding" 50-year 5% gold bonds, to refund outstanding bonds and provide for extensions and improvements.

It is proposed to extend the road from Thurmont to Emmittsburg and thence to Gettysburg, and probably also from Jefferson to Brunswick, and to build a new power house.

The new bonds are dated April 29 1910 and mature March 1 1960, but are subject to call as an entirety only on any interest day (March 1 or Sept. 1) at 105. Interest payable at company's office, Frederick, Md. Present issue to be \$500,000, \$250,000 of the remaining \$1,000,000 to be reserved to take up the \$250,000 prior liens.—V. 89, p. 1667.

Hartford & Worcester Street Ry.—*Sale.*—See Worcester & Southbridge Street Ry. below.—V. 82, p. 280.

Hocking Valley Ry.—*Listed.*—The New York Stock Exchange has listed \$1,584,000 additional first consolidated M. 4½% bonds, making total amount listed to date \$16,156,000.

The proceeds of the bonds just listed have been used to retire the \$1,584,000 Ohio & West Virginia Ry. first 7s which matured May 1 1910.

Meeting Adjourned.—Owing to the temporary injunction recently granted in the suit of three small stockholders, the special meeting to vote on authorizing the increase of the common stock from \$11,000,000 to \$26,000,000 was adjourned from May 11 to the first of the coming week, by which time it is expected the decision in the pending suit will have been rendered.—V. 90, p. 1239, 976.

Lake Shore Electric Ry., Cleveland.—*Meeting Again Adjourned.*—The meeting adjourned from March 25 until April 25 has again been adjourned for thirty days in order that the pref. stock not yet assenting (some 5,000 shares, it is said) may be given a further opportunity to participate in the plan. See V. 90, p. 698, 1170.

Hudson & Manhattan RR.—*Extension of Time.*—The Public Service Commission, First Department, has granted an extension of one year from June 15 for completing the road in Sixth Avenue between 23d and 33d streets and the spur on 9th St. from Sixth to Fourth avenues.

The company has also filed the consent of property-owners along the proposed route from 33d Street to the Grand Central Station. Work must begin within 6 months from the approval of the consents and be completed within 3 years.—V. 90, p. 1041, 1044, 502.

International & Great Northern RR.—*Foreclosure Sale.*—Judge McCormick in the United States District Court for Northern Texas on Wednesday ordered the foreclosure sale under the second and third mortgages, the date of sale to be fixed later.

W. H. Flyppen, now Master in Chancery was named as Special Master to conduct the sale. The decree provides that the rights and interests of all the intervenors and the question of priority of their claims is to be determined later. The question as to the alleged diversion of funds is also reserved for later determination.—V. 90, p. 1170.

Manistee & Grand Rapids RR.—*New President.*—H. W. Seaman has been elected President to succeed W. M. Simpson of Chicago, Ill. The present directors and officers are:

Directors: H. W. Seaman, W. M. Simpson, David G. Joyce, Frank P. Leffingwell, B. C. Sammons, John W. Claussen and Charles H. Morey. Officers: President, H. W. Seaman; Vice-Pres., Charles H. Morey; Treas., B. C. Sammons; Sec., Charles E. Pain.—V. 79, p. 1642.

Metropolitan Street Ry., New York.—*No Bids.*—No bids were made yesterday at the time appointed for the foreclosure sale. The proceedings will now go back to the Court, which will appoint another date for the sale.

L. C. Krauthoff, as counsel representing the joint bondholders' committee, stated that the reason the committee did not bid in the property was that the bondholders and the committee believe the purchase of the property covered by the general and collateral trust mortgage, without a purchase of the property represented by the 4% refunding mortgage, would be inadvisable, and that one sale should not take place without the other, since the two properties must be operated as one system. Mr. Krauthoff stated that a plan is about ready for the reorganization and operation of the whole system, and the committee deems it wise to wait until the 4% bondholders begin foreclosure proceedings, and then bid for the whole property.

The refunding mortgage bondholders, it is understood, will soon begin foreclosure proceedings for foreclosure and sale. Meantime the 5% bondholders desire to wait, so that both sales may be held at the same time.

Tax Sale.—The sale of the company's franchises at public auction for \$7,104,974 back taxes due has been ordered by Comptroller Prendergast to be enforced on the adjourned day, Thursday next.

Should the sale take place the property will no doubt be bought in either on behalf of the receivers or the bondholders. It is expected, however, that some agreement will be reached with the receivers for the settlement of the city's claim.—V. 90, p. 1045, 977.

Minneapolis St. Paul & Sault Ste. Marie Ry.—*Listed.*—The New York Stock Exchange has listed \$1,207,000 additional first consolidated M. 4½% bonds, due 1938, making the total amount listed to date \$47,098,000.

Purposes for which \$1,207,000 Bonds Listed were Issued.

New York Central & Hudson River RR.—*Dividends of Controlled Companies.*—The New York State Railways (of whose \$14,777,264 common stock \$8,866,507 was owned by the company on Dec. 31 last) has declared an initial dividend of 1½% on its common stock. The Mohawk Valley Co. (\$4,500,000 of whose \$7,500,000 stock is owned by the Central) has declared a dividend of 1½%, the first since Feb. 1907, before the readjustment of the stock. Both dividends are payable July 1 to holders of record June 15.

The Central will receive from these two payments \$200,498. It, as has been assumed by some, these distributions are to be made quarterly, the Central will derive about \$800,000 per annum from its dividends on these two stocks.—V. 90, p. 1239, 910.

New York State Rys.—*Initial Common Dividend.*—See New York Central & Hudson River RR. above.—V. 90, p. 914, 698.

Niagara St. Catharines & Toronto Ry.—*2d Mortgage.*—The company has made a mortgage dated Jan. 29 1910 to the National Trust Co., Ltd., of Toronto, as trustees, securing an issue of 2d M. bonds at the rate of \$10,000 per mile.—V. 90, p. 54.

Ontario & San Antonio Heights (Electric) RR.—*Bond Offering.*—*Subsidiary of Pacific Light & Power Co.—Proposed*

Extension.—C. E. Woodside & Co., Los Angeles and San Francisco, are placing at par and interest this company's 1st M. 6% gold bonds (tax-exempt in California), dated Feb. 1 1910 and due Feb. 1 1935, but redeemable at 101 and int. after 3 years from date. Int. F. & A. at Los Angeles. Par \$1,000. Southern Trust Co. of Los Angeles, trustee. A circular says in substance:

The company is a California corporation which for more than 20 years has operated a railroad under a 49-year franchise from San Bernardino County, extending from Ontario through Uplands to San Antonio Heights, Cal., a distance of about 7½ miles. It is now planned to increase the capital stock from \$150,000 to \$1,000,000 and to extend the line through the Pomona Valley. The right-of-way from Uplands to North Pomona is being graded for a four-track line, and will thus be in position to serve as a portion of the fast through line from Los Angeles to San Bernardino via Covina. The San Bernardino Valley Traction Co. is already controlled by H. E. Huntington. Bonds auth., \$1,000,000; present issue, \$300,000.

Condensed Letter of Pres. Wm. G. Kerckhoff, Los Angeles, Jan. 25 1910.

The proceeds from this \$300,000 of bonds will be used for the construction and equipment of the line from Uplands through Claremont and North Pomona to Pomona, on our private right-of-way, and for improvements on the line now operated. The road, when so completed and supplied with modern equipment, will have a bonded debt of only \$300,000. By removing the power house, now at San Antonio Heights, to a lower elevation, and installing modern machinery at an expense of about \$15,000, the same water will develop sufficient power to operate both the present lines and those under construction to Pomona. Population of present territory about 8,000; with new line over 18,000. This district is one of the richest agricultural sections in California, having shipped in 1909 about 8,000 carloads of citrus fruits, besides vegetables, which brought a cash return of about \$10,000,000.

Actual Earnings (7½ Miles), 1906 to 1909—Estimate Following Completion.

	1906.	1907.	1908.	1909.	Estimate
Gross earnings	\$11,607	\$15,398	\$18,251	\$20,297	\$85,000
Net earnings (after taxes)	\$4,219	\$6,019	\$8,523	\$10,248	\$33,000

The remaining \$700,000 bonds may be issued to reimburse the company for 85% of the actual and reasonable cost of further extensions and additions, provided the net earnings shall be at a rate at least equal to the annual interest charge, including the bonds proposed to be issued. Sinking fund: after first three years, an amount equal to 1% of outstanding bonds for five years; thereafter 2% and int. on bonds retired.

All the capital stock except the few shares necessary to qualify directors is owned by the Pacific Light & Power Co. of Los Angeles. The majority of the stock of the P. L. & P. Co. is owned by H. E. Huntington and corporations controlled by him. Officers of Ontario & San Antonio Heights RR.: W. G. Kerckhoff, Pres.; A. C. Balch, Vice-Pres.; Chas. Forman, Sec.—V. 90, p. 447.

Oregon Electric Ry., Portland, Ore.—Acquired by Hill Interests.—The Portland "Oregonian" of May 4 states that James J. Hill, then in Portland, admitted, "in reply to a question, that he and his associates now own the Oregon Elec. Ry. and the United Railways." The Oregon Electric Ry., it is understood, was acquired only a few weeks ago, while the transfer of the United Railways occurred last fall (V. 89, p. 1412). Compare V. 89, p. 847.

Oregon & Southeastern RR.—Foreclosure Suit.—The Trust Co. of America, mortgage trustee, has brought suit to foreclose the mortgage of 1902 under which, it is stated, \$250,000 bonds are outstanding. The amount due for principal and interest is reported to be \$302,375.—V. 90, p. 1171.

Pittsfield (Mass.) Electric Street Ry.—Merger.—See Berkshire Street Ry. above.—V. 90, p. 503.

Quakertown & Eastern RR.—Foreclosure Sale.—This 15-mile road, which has not been operated for several years, was sold on May 6 for \$10,000 under foreclosure of the \$180,000 mortgage, to C. C. Harring, representing the bondholders.—V. 83, p. 1471.

Rates on Import Traffic.—Preliminary Decision Calls for Same Rates from Boston, Phila. and Balt.—In the matter of import differentials at Philadelphia, Boston and Baltimore, the Inter-State Commerce Commission on May 11, following a conference with representatives of the Philadelphia trades organizations and of the railroads at interest, held that, pending a complete investigation of all the matters at issue, to be gone into in the fall, the roads should give the same rates on import traffic from the ports of Boston, Philadelphia and Baltimore.

Decision of Commission Addressed to Chairman of Trunk Line Committee.

Pending full investigation of the rates on import traffic from the ports of Boston, New York, Philadelphia and Baltimore to interior destinations, and basing its judgment solely upon present information, the Commission is of the opinion that these rates should in the meantime be the same from the three ports of Boston, Philadelphia and Baltimore, and should not, from these ports, exceed the rates now in effect from Boston and Baltimore, which are understood to be the same.—V. 90, p. 1131.

Saginaw-Bay City Railway & Light Co.—Purchase of Collateral Trust Bonds.—The company, having sold certain of the securities deposited under the collateral trust indenture dated Sept. 1 1903, for which it has received \$3,216,600, the Michigan Trust Co. of Grand Rapids, Mich., trustee thereunder, will, as required by the indenture, receive tenders for the sale of bonds secured thereunder at not over 105, up to 3 p. m. May 23. There were at last accounts only \$3,355,000 of the bonds outstanding. Compare amalgamation plan under caption of Commonwealth Power, Railway & Light Co., V. 90, p. 108.—V. 90, p. 448.

St. Louis & San Francisco RR.—Sale of Bonds.—It is reported that this company has sold a block of 4½% bonds, part of a new issue, but we are unable to confirm the report. A press report from Paris speaks of the purchasers, or the probable purchasers, as the Banque Union Parisienne and Credit Mobilier.—V. 90, p. 1171, 1045.

San Francisco Vallejo & Napa Valley (Electric) Ry., Cal.—Suit.—Ralph W. Boyer, the holder of \$212,000 stock, has brought a suit in the U. S. Circ. Court asking for a receiver.

The company operates 34 miles of electric single track road running from Vallejo to St. Helena, and had outstanding at last accounts \$1,500,000 each of stock and bonds. The rolling stock, it is stated, was purchased from the Niles Car Co. on the installment plan and the company is in default in installments due thereon. An accounting is asked for. It is alleged that

the company is hopelessly insolvent, and has been for a long time past; that in 1909 the road was operated at a loss of \$27,267 and its present indebtedness aggregates \$2,332,457. It is also alleged that certain officers have converted the company's property to their own use. Wm. F. Botsford of Los Angeles, Cal., is President and John T. York Vice-Pres. and Secretary.

San Jose (Cal.) Railroads.—Consolidation—Mortgage.—This company, incorporated in California on Dec. 22 1909 with \$5,000,000 of authorized (common) capital stock, in \$100 shares, as a consolidation of street railways in San Jose and vicinity, has recently made a mortgage to the Mercantile Trust Co. of San Fr., as trustee, to secure an issue of \$1,500,000 "5% 45-year gold sinking fund first mortgage" bonds of \$1,000 each, dated Jan. 1 1910 and due in 1955, with sinking fund from Jan. 1 1915. Int. J. & J. at office of trustee.

The company owns and operates 43 miles of trolley track in and about San Jose, including lines to Santa Clara, Alum Rock Park, &c. The properties taken over embrace: (a) the 18 miles of San Jose RR. Co. (heretofore unbonded), and (b) the 25 miles of the San Jose & Santa Clara County RR. incorporated Dec. 13 1905 and having still outstanding \$1,500,000 first mtge. 4½s, dated 1906 and due in 1946, but callable at 110 and interest from Feb. 1 1911. Interest A. & O. Trustee, Union Trust Co. of San Francisco. These, we understand, are the only bonds which San Jose Railroad has out at present.

Pres. & Treas., L. E. Hanchett; Sec., S. S. Baldwin, San Jose, Cal.

Seaboard Air Line Ry.—Sale of Adjustment Bonds.—It is reported that the syndicate which underwrote the \$18,000,000 adjustment bonds have placed abroad about \$6,700,000 of the issue, being the remainder previously unsold, and that it is expected that a public offering of the bonds will be made in London shortly.—V. 90, p. 1171, 915.

Springfield (Mo.) Water Works Co.—New Stock.—The company on May 9 filed a certificate of increase of capital stock from \$700,000 to \$800,000.—V. 82, p. 1160.

Third Avenue RR., New York.—Payment of Franchise Taxes.—Receiver Whitridge on Thursday paid to Comptroller Prendergast \$660,049 for special franchise taxes, this amount, with the \$1,000,000 already paid to the city, discharging, it is said, the entire obligation to the city on this account, with the exception of an item of \$5,000 in dispute.—V. 90, p. 1045, 628.

Toledo Railways & Light Co.—Negotiations with City.—The city authorities have accepted the company's offer to examine its books and accounts, with a view to affording information necessary in any negotiations which may be entered upon for the renewal of certain franchises which expire in November next.—V. 90, p. 843, 504.

Union Ry., New York.—Decision.—Justice Brady in the Supreme Court in this city on Wednesday dismissed the action brought by the Public Service Commission against receiver F. W. Whitridge to recover penalties amounting to \$750,000 for a delay of 150 days in complying with an order of the Commission to equip its cars with wheel guards within a certain time.

The law provides that a penalty of not exceeding \$5,000 per day may be imposed for failure to obey such an order. The case was withdrawn from the jury and dismissed on the merits, the constitutionality of the law not being passed upon.—V. 87, p. 1161.

United Railways Investment Co.—Plan Approved.—The shareholders of the company on May 6 ratified the proposition to increase the capital stock from \$50,000,000 to \$56,000,000, and also empowered the directors to adjust arrears of dividends on the outstanding pref. stock from time to time up to and including Oct. 1 1911. Compare V. 90, p. 1240, 1103.

United Railways, Portland, Ore.—Purchased by Hill Interests.—See Oregon Electric Ry. Compare V. 89, p. 1412.

Washington Baltimore & Annapolis Electric Ry.—Floating Debt.—Pres. George T. Bishop, who is also one of the receivers, has given out the following:

Estimated Floating Debt Jan. 1 1911 if No Payments Be Made in the Meantime		Cash March 31 1910

Total floating debt	\$1,083,711	Net debt	\$430,966

Real estate in Washington which cost \$82,000 may also be sold later. No plan for terminating the receivership will be recommended until sufficient time has elapsed to determine the value of the new down-town terminal at Washington in increased earnings, and of the 1,200-volt D. C. system in reducing operating expenses. Compare V. 90, p. 1172.

Western Maryland RR.—Extension.—A contract was recently let for the building of the 83-mile extension, estimated to cost \$12,700,000, from a point 2 miles west of Cumberland, Md., on the main line, to South Connellsville, Pa., where connection will be made with the Pittsburgh & Lake Erie, as agreed upon in the traffic contract recently entered into with the New York Central interests.

Of the new line, 18.49 miles will be built under the charter of the subsidiary Georges Creek & Cumberland RR. Co., the latter having recently increased its capital stock from \$1,000,000 to \$3,500,000 for this purpose, the Western Maryland to purchase the new shares. The remainder of the new road, say, 64½ miles, will be constructed under charter of Connellsville & State Line RR., recently incorporated in Pennsylvania with \$700,000 stock. Compare V. 90, p. 916, 850.

West Penn Rys.—Plan Operative—New Mortgage.—A press report from Pittsburgh states that the plan under which the American Water Works & Guarantee Co. acquires control has been declared operative; also the stockholders of the Railways Company have voted an increase in its bonded debt to \$12,000,000, to provide for extensions in progress and proposed. Compare V. 90, p. 628, 561, 504.

Worcester (Mass.) & Southbridge Street Ry.—Acquisition.—The Massachusetts Railroad Commissioners have approved the purchase of the Hartford & Worcester Street Railway Co. for the sum of \$140,000.—V. 80, p. 165.

American Glue Co.—Extra Dividend.—An extra dividend of 1% was paid May 2 on the \$800,000 common stock along with the semi-annual dividend of 2%. Extra distributions of 1% were resumed last November. An official is quoted:

During the first 11 months of the fiscal year earnings have increased heavily, and if May comes up to expectations the showing for the year ending May 31 will be the best in our history. During the past year our plants have operated at full capacity, as compared with about 80% for 1909. The company is now in a position where it could retire the entire floating debt, about \$900,000, with its quick assets.—V. 89, p. 1143.

Consumers' Power Co., Chicago.—Bonds, &c.—The Washington County Light & Power Co., which was incorporated in Minn. June 18 1909 and took over the Stillwater Gas & Electric Light Co. (V. 89, p. 167), filed on Dec. 17 a certificate of increase of capital stock from \$100,000 to \$10,000,000 in shares of \$100 each, with equal power, and changed its name to the Consumers' Power Co. Of the auth. stock \$4,000,000 is common and \$6,000,000 is 7% cum. pref. stock, subject to redemption at any time at 105. Stock outstanding \$3,217,000 common and \$1,360,400 pref., being the same amounts as the outstanding share capital of the Northern States Power Co., the holding company, described below, which owns the entire outstanding stock of the Consumers' Power Co. The Consumers' Power Co. has filed a mtg. to the Standard Trust Co. of N. Y. and Edward M. F. Miller, as trustee, to secure not exceeding \$10,000,000 5% 20-year gold bonds; present issue \$2,142,000.

This company operates in the cities of Stillwater, White Bear, Northfield, Cannon Falls, Faribault and Mankato, Minn., and Fargo, N. D. Hydro-electric plants are now being developed on the Rapidan and Cannon Falls rivers. The company also operates the gas plants in Stillwater, White Bear, Faribault and Mankato, Minn., and Fargo, N. D., and steam distribution system in Fargo, N. D. Control of the Grand Forks & East Grand Forks Gas & Electric Co. has also been acquired. See complete list of controlled, also under Northern States Power Co.

The present capacity of the water powers is something like 3,000 h. p., but the two powers located at Mankato and Cannon Falls will be completed by Jan. 1911, which will more than double the present output. Further water-power developments will be made in due course.

Dreamland Corporation, Coney Island, N. Y.—Sale.—The property was sold at sheriff's sale on March 30 or 31 at the instance of the holders of debenture bonds, with a view to a "friendly reorganization," and was bid in in two parcels (one for \$50,000, the other for \$30,000), subject, it is understood, to the \$750,000 mortgage bonds due Jan. 1 1914.

The proceedings which resulted in the sale were begun recently in the Supreme Court by Eugene D. Wood and Joseph Huber on behalf of themselves and other holders of the debentures. The total issue of debentures was originally \$750,000 but had been reduced to between \$500,000 and \$600,000. Besides the \$750,000 1st M., there was recently said to be a \$40,000 (not \$400,000) real estate mtg. Compare V. 79, p. 1464.

Edison Electric Illuminating Co. of Boston.—New Stock.—The Mass. Gas and Elec. Commission recently authorized the sale at auction of sufficient new stock to net \$120,000 cash to cover the net cost of property purchased from the Lexington Gas & Elec. Lt. Co., including provision for payment of its \$40,000 bonds.—V. 90, p. 1046, 112.

French Bros.-Bauer Co., Cincinnati.—Preferred Stock Offered.—W. E. Hutton & Co., Cincinnati and New York, are offering at \$105 per share (par \$100), yielding 6 2-3% income, a block of 7% cumulative pref. stock, tax free in Ohio. Dividends Q.-J. This is a recent merger of the French Bros. Dairy Co. and the Bauer Ice Cream & Baking Co. A circular says in substance:

Capitalization: Preferred stock, auth., \$500,000, outstanding \$400,000; common stock, auth., \$500,000, outstanding \$450,000. No bonds can be issued nor the preferred stock increased without written consent of two-thirds of the preferred stock. The company has no liabilities. The amount of preferred stock outstanding is less than 50% of the net physical assets. Amounts equal to 10% of all dividends paid on the common stock must be invested by trustees in securities legal for trust funds until the total is equivalent to two years' dividends on the preferred stock; the fund to compound and be held to protect the preferred stock.

Net book value of tangible assets April 1 1910 (not including valuable good-will, &c.), \$857,269, viz.: Cash, \$1,895; accounts receivable, \$78,258; notes receivable, \$2,928; inventory, material, supplies, &c., \$71,863; real estate, plant and equipment, \$700,621; miscellaneous, \$1,703. Properties: Two modern ice-cream factories, manufacturing capacity 150 tons of ice and 10,000 gallons of ice-cream per day; over 200 wagons and 300 horses; 23 country plants (21 in Ohio and 2 in Indiana. At Lebanon, O., an up-to-date milk dairy, supplying milk guaranteed absolutely pure to about 700 customers at about double the ordinary price. At Hamilton, Foster's and Morrow, O., new condensed milk plants; also in Cincinnati the famous "Bauer" bakery, 2 restaurants, 2 retail stores handling the largest line of fine bakery goods, confectionery and novelties in the city, and 12 smaller stores. Has a large trade in butter, casein powder and other by-products. The combined earnings are now on a basis of over 2 1/2 times the amount necessary to pay the dividend on the preferred stock.

Harlingen (Tex.) Land & Water Co.—Bonds Offered.—Porter, Fishback & Co., 115 Adams St., Chicago, are placing \$150,000 1st M. 6% serial gold bonds, dated March 1 1910, due \$25,000 yearly on March 1 1915 to 1920, but redeemable on any int. date after March 1 1915 at 103 and int. Par \$100, \$500 and \$1,000c*. P. & i. (M. & S.) at Colonial T. & Savings Bank, Chicago, trustee. A circular says in brief:

An irrigation enterprise situated at Harlingen, Cameron Co., Tex., about 25 miles from Brownsville and the Gulf, crossed by Frisco Railway system successfully conducted under same management for past seven years. Mortgage covers about 14,000 acres of land; also 40 miles of completed canals, which furnish sufficient water to irrigate 25,000 acres of intensely fertile land. These ditches are being rapidly extended and will soon furnish enough water for 50,000 acres of land, of which 10,000 acres are now under cultivation. With the proceeds of these bonds, the company will extend the canals already built, taking water from the Rio Grande River. The water supply from this river is perpetual. The canals surround the town of Harlingen on all sides. Total security for bond issue estimated at \$1,153,600, viz.: 40 miles of completed canals, \$325,000; water contracts which are first liens on 10,000 acres of cultivated farms worth a million dollars, \$300,000; water rights not yet sold, to cover 40,000 acres, \$200,000; 943 acres irrigated land owned in fee, at \$200 per acre, \$188,600; 14,000 acres irrigable land covered by this bond issue, at \$10 per acre, \$140,000.

Hartford (Conn.) Electric Light Co.—New Stock.—The shareholders will vote June 15 on increasing the stock from \$2,400,000 to \$3,000,000 and authorizing the directors to offer the additional 6,000 shares so created to the stockholders of record at the time of the offer in proportion to the number of shares held by them respectively, at \$100 per share.

4,000 shares of said new issue to be issued and paid for in installments as follows: One-half Aug. 8 1910 and one-half Nov. 8 1910; certificates for such stock to be issued and delivered to the stockholders upon the payment of each of said installments; and 2,000 shares to be issued and paid for at such times as the board of directors shall fix by their vote.

New Treasurer.—Arnold Tanzer, who was recently elected a director, has been made Treasurer in place of Vice-President Fleischer, the latter being now in charge of the foreign works.—V. 90, p. 376, 306.

Jersey City Water Supply Co.—No Reduction from Purchase Price for Sewage-Disposal Works.—Former Chancellor Magie, who was appointed by Vice-Chancellor Stevens as a Special Master to report on the city's claim for a reduction in the contract price of the Boonton reservoir system, on May 11 filed his opinion, in which he holds that the

company has installed a simple but effective process for preventing contamination of the water at a cost of \$20,545, the annual cost of operation and maintenance being \$2,100.

Mr. Magle reports the estimated cost of a sewer system would be \$516,341 and that even if built it would not be capable of substantially preventing contamination of the Rockaway River above the Boonton reservoir. The Master therefore finds that no abatement should be allowed for the stipulated price of \$7,595,000 for the construction of the sewerage system. Compare V. 90, p. 630.

Lake Superior Corporation.—Plan Approved.—The shareholders on May 6 approved the financial plan (V. 90, p. 1105) providing for the extension of the Algoma Central & Hudson Bay Ry. to Hobon on the Canadian Pacific line. President Drummond is quoted as saying in substance:

The cost of construction is estimated at \$3,962,000, and the net earnings for the first year after completion, it is estimated, will be \$552,000 for the railroad and \$75,000 for the steamship line, a total of \$627,000. With the completion of the extension, the company's steel plant will be entirely independent of outside sources for raw material supplies.

The rolling mills will probably be completed in July, the blast furnace in October, the first coke ovens in December and the remainder a few months later. The effect should be a gratifying increase in net earnings, both from reduction in costs and a wider field of products, which will include not only rails, as at present, but also tie-plates, angle bars and spikes. As to the effect of guaranteeing the proposed Algoma Central bond issue, the company assumes no liability for the road until its completion. The question of interest on the income bonds will be considered in October.

The trustee of the new mortgage of the Algoma Central & Hudson Bay Ry. will be the United States Mortgage & Trust Co.—V. 90, p. 1105, 1047.

Lanyon Zinc Co.—Sale.—The foreclosure sale of the property and smelting plants of the Lanyon Zinc Co., located at La Harpe and Iola, Kansas, which was made to Charles H. Werner, representing the reorganization committee, composed of John E. Borne, Chairman; H. H. Porter Jr., of Chicago; Lowell M. Palmer, Fred. S. Floyer and Cord Meyer of New York City, was on May 7 confirmed by the Court.

It is probable that the property will be taken over by a new company of similar name with a capital stock (all common) of not more than \$500,000, and without any bonded debt. Holders of the present first mortgage 6s, due 1929, of which some \$1,783,000 are outstanding, will receive stock of the new company in exchange, pro rata, for their holdings. Pending the organization of the new company the property is being operated by J. O. Rodgers as receiver. Compare V. 90, p. 852.

Lehigh & Wilkes-Barre Coal Co.—Offering of Guaranteed Bonds—Option of Exchange.—J. P. Morgan & Co., New York, and Drexel & Co., Philadelphia, began offering on May 11 on a 4.15% basis \$12,500,000 of the new consolidated mortgage 4% (serial) gold bonds. Authorized, \$20,000,000; issued, \$17,309,000. Dated June 1 1910, int. J. & D. Trustee, Pennsylvania Co. for Insurances on Lives & Granting Annuities. Free of tax in Pennsylvania. Guaranteed, prin. and int., by Central RR. Co. of New Jersey.

Subject to prior sale, the opportunity is offered to holders of the 4½% bonds maturing June 1 1910 to exchange their maturing bonds at par and interest for the new issue of 4% bonds on a 4.15% basis as above. Holders desirous of making the exchange should deposit their bonds with either firm, at the same time declaring which maturity they prefer. Exchanges are to be made as of June 1 1910. See advertisement on another page.

Abstract of Letter from President George F. Baer, Philadelphia, May 6 1910

The company, the majority of whose stock is owned by the Central RR. Co. of New Jersey, has just created a mortgage of \$20,000,000, dated June 1 1910, for the purpose of retiring the 4½% bonds maturing June 1 1910, amounting to \$12,175,000 outstanding in the hands of the public, and also the \$4,821,000 5% bonds held in the treasury of the Central R. Co. of New Jersey, which will be exchanged for the new bonds and withdrawn from sale. The balance of the \$20,000,000 issue are reserved to take up \$2,691,000 bonds maturing Nov. 1 1912; and on that date this mortgage becomes the first and only mortgage on all the property of the Lehigh & Wilkes-Barre Coal Co., which comprises some of the most valuable coal lands in the anthracite region. The Coal Co. owns 12,900 acres held in fee and 2,800 acres under long leases. It is estimated that in the land owned in fee there are 460,000,000 tons of merchantable coal.

These bonds are guaranteed as to principal and interest by the Central RR. Co. of New Jersey, and are free from taxes in Pennsylvania. They are issued in series of \$2,500,000, payable every five years, beginning June 1 1915. A sinking fund has been provided to pay off each series of bonds as it matures. The surplus earnings, after deducting large sums for colliery improvements, was \$3,428,634 for the fiscal year ended June 30 1909 and for the year 1907-08 \$3,480,181. The interest on these bonds will amount to \$800,000 a year and the sinking fund to about \$500,000 a year, leaving a surplus after all improvements, fixed charges and sinking fund of practically \$2,000,000 a year.—V. 90, p. 702, 240.

Long Acre Electric Light & Power Co.—Opinion of Court.—See editorial pages.—V. 90, p. 1174.

Michigan Lake Superior Power Co.—Report of Committee.—The first mortgage bondholders' committee, John Pitcairn, Philadelphia, Chairman, reports as of May 7 in substance:

Out of the \$3,500,000 1st M. bonds there have been deposited with this committee over 99%.

The receivers have applied for a lease for the diversion of water, but the War Department is not inclined to give a lease until it has concluded the proceedings now pending to condemn the property of the Chandler-Dunbar Water Power Co. (V. 88, p. 999). Until a lease is secured, it will be difficult to perfect a plan of reorganization and to secure the fresh money that will be required.

The Mich. State Legislature during 1909 repealed the "specific tax law," the repeal to take effect July 1 1911 (V. 88, p. 999).

The Real Estate Trust Co. of Phila. was substituted as trustee under the 1st M. Dec. 13 1909; your committee's counsel is also acting as special counsel for the trust company. On March 21 1910 the new trustee was granted permission to file a supplemental bill of foreclosure. The bill has been filed and foreclosure proceedings are under way.

Our counsel has convinced us that the claim of the trustee under the 2d M., that our mortgage does not cover all property owned at time of execution and thereafter acquired, is untenable. We are also convinced that title to certain valuable properties purchased for the company was taken in the names of third parties. One of the properties is about to be conveyed to the receivers. We are following up the others.

The receivers are continuing to operate the plant with some little profit. Part of the time the plant has been wholly, and for a substantial period partly, shut down under orders from the Government, due to the fall of the level of Lake Superior. By the time the Government is prepared to give us a lease, the foreclosure proceedings should have made substantial progress, and a satisfactory plan of reorganization will probably have been worked out.—V. 90, p. 917, 113.

Nevada Consolidated Copper Co.—Listed.—The New York Stock Exchange has listed \$9,939,309 stock, with authority to add from time to time \$60,700 additional stock on notice of

issuance in exchange for first mortgage convertible bonds of the company and capital stock of the Cumberland-Ely Copper Co., making the total amount to be listed \$10,000,000.—V. 90, p. 631, 170.

New York Telephone Co.—Listed.—The New York Stock Exchange has listed \$10,000,000 additional "first and general" M. 30-year 4½% bonds for \$1,000 each; also £3,000,000 additional sterling bonds for £100 and £200 each (\$5 being counted the equivalent of £1 sterling), making the total amount listed to date \$50,000,000. Compare bond offering, V. 90, p. 773.

Earnings.—For 3 months ending March 31 1910:

Gross earnings	\$8,734,854	Interest charges	\$354,028
Net earnings	2,667,392	Dividends, 2%	1,713,456
Other income	437,760	Balance, surplus	1,037,668

Niagara Falls Power Co., New York.—Option to Subscribe.—Stockholders of record May 11 are offered the right to subscribe at par and int. at the Treasurer's office, 15 Broad St., N. Y., on or before May 23 for \$686,000 6% "ref. and gen. mtge." bonds to the amount of one \$1,000 bond for each 67 shares of their respective holdings, every stockholder being entitled to subscribe for not less than one bond. All subscriptions are payable June 1 1910, with adjustment of interest from April 1 at Bankers' Trust Co., 7 Wall St., N. Y. A circular says in brief:

Of the \$9,076,000 bonds reserved for refunding all the 6% debentures, there have now been issued \$7,540,000 and an equal amount of the 6% debentures has been delivered, or arranged to be delivered, to the trustee. In addition \$2,000 debentures has been surrendered from the treasury, leaving outstanding April 30 1910 \$1,534,000 of all said previous issues of 6% debentures. The Pub. Service Commission on Feb. 18 1910, besides approving of bonds for said refunding, specifically approved of a present issue of \$1,021,000 to pay for additions and improvements to the plants of this company and the Canadian Niagara Power Co. The \$686,000 bonds now offered are the first for such special purposes and their proceeds will be used for such additions, &c., undertaken since Jan. 1 1909 or contemplated during 1910. Compare V. 90, p. 622, 632, 980.

Northern States Power Co., Chicago.—Dividend—Status.—H. M. Byllesby & Co., the managers of the company, recently announced a quarterly dividend of 1¼% upon the \$1,360,400 pref. stock, payable April 15 1910 on stock of record March 31 1910. The company was incorporated in Delaware on Dec. 24 1909 (Delaware agent, Corporation Trust Co. of America, Wilmington), with \$10,000,000 of auth. capital stock in \$100 shares, having equal voting power, of which \$4,000,000 is to be common stock and \$6,000,000 is to be 7% cumulative pref. (redeemable any time at 110); outstanding common, \$3,217,000; pref. issued, \$1,360,400. No bonded debt. The company controls the Consumers' Power Co. (see that company above), which in turn owns the capital stock of the following companies:

Polar Star Electric Co., Faribault, Minn.
Faribault Gas & Electric Co., Faribault, Minn.
Mankato Gas & Electric Light Co., Mankato, Minn.
Northfield Light, Heat & Power Co., Northfield, Minn.
Cannon Falls Electric Service Co., Cannon Falls, Minn.
Cannon Valley Power Co., Cannon Falls, Minn.
White Bear Electric Co., White Bear, Minn.
Stillwater Gas & Electric Co., Stillwater, Minn.
Union Light, Heat & Power Co., Fargo, N. D.
Grand Forks (N. D.) & East Grand Forks (Minn.) Gas & Elec. Co.
The President is H. M. Byllesby; Sec., R. J. Graf; Treas., J. J. O'Brien, Chicago office, 218 La Salle St.

Northwestern Gas Light & Coke Co., Chicago.—Stock Dividend.—The shareholders, it is announced, have been permitted to subscribe for \$825,000 new stock, to the extent of 20% of their holdings, raising the total outstanding stock from \$4,175,000 to \$5,000,000. The new shares will in effect be paid for from the accumulated surplus, the increase being in the nature of a stock dividend. The stock, it is understood, has received dividends at the rate of 6% yearly since Oct. 1906; prior to that time, 4% (Q.-J.).

Bonds.—Of the auth. issue of \$5,000,000 Cicero Gas Co. 5% general and refunding bonds, guar. by the Northwestern, \$2,730,000, it appears, have lately been sold to leading shareholders on account of extensions, additions, &c., making the amount of these bonds outstanding \$4,500,000; the remaining \$500,000 is reserved to redeem 1st M. 6s in 1922.

New Director.—E. A. Cummings has been elected director to succeed John R. Walsh.—V. 86, p. 1470.

Northwestern Ohio Natural Gas Co.—Possible Dividend in Debentures.—Secor & Bell, bankers and brokers, Toledo, O., on May 11, replying to our inquiry, telegraphed: "No definite announcement on Northwestern Gas 6% debenture bond dividend. Rumored this will be 50% present capitalization. Stock, which has been selling freely at 75, advanced to-day 79 bid, 80 asked. Par value shares, \$50." A Cleveland paper on April 25 said:

The Northwestern Ohio Natural Gas Co., it was given out on good authority on Wednesday, has decided to distribute among its stockholders \$1,000,000 of 6% debenture bonds as a dividend, amounting to 30% of the present capitalization. The Standard Oil Co. is credited with owning 80% of the \$2,755,250 stock. Dividends of 6% per annum have been paid since the company was organized. There are no bonds. The price of the stock has recently jumped from 52 to 66.—V. 85, p. 225.

Oscalosa (Iowa) Water Co.—Reorganization Plan.—The reorganization committee—Douglas H. Thomas, Henry B. Wilcox and J. Hemsley Johnson, with J. B. H. Dunn as Secretary (Merchants' Nat. Bank, Baltimore)—has borrowed funds and bought \$57,000 of the \$80,000 1st M. 5s and expects to bid in the property at foreclosure sale May 25. The plan submitted to holders of consol. 5s says in brief:

We believe that the holders of the remaining \$23,000 1st M. bonds will participate in the plan. Present capitalization: First M. 5s, \$80,000; consol. mtge. 5s issued, \$205,000; capital stock, \$75,000. The company defaulted as to the principal of \$10,000 of the above 1st M. 5s due May 1 '08. The new company will issue: First M. 5% bonds, \$85,000, and common stock (in \$100 shares), \$205,000. In addition, \$50,000 of new 1st M. bonds will be held by the mtge. trustee to be sold from time to time, under proper restrictions, to finance the future business. Sinking fund, \$1,000.

per annum. All the stock will be held by trustees for 5 years, with power to sell at a price to be approved by 51% of those beneficially interested. Holders of present 1st M. 5s will receive \$1,000 bonds for each bond held by them respectively (the committee thus receiving \$57,000), and \$5,000 will be issued to cover costs of foreclosure, &c. Holders of consol. 5s will receive \$1,000 stock for each \$1,000 bond held by them.

Net earnings applicable to interest and dividends: Cal. year 1907, \$13,725; 1908, \$17,757; 1909, \$14,643; average for three years, \$15,375. Fixed charges of new co., \$5,250 (bond int., \$4,250; sink fund, \$1,000); balance for dividends on stock, \$10,125, or approximately 5%. We believe that only thus can the company be put on a sound basis.—V. 90, p. 854.

Penn Central Light & Power Co.—Merger—Bonds Sold.—Robt. Glendinning & Co. and W. H. Newbold's Son & Co., Philadelphia, recently offered at 96 and int. and have privately sold \$1,237,500 "first and refunding mortgage" 5% gold bonds of this recent consolidation. The bonds are due April 1950, but redeemable at 105 and int. on and after April 1 1915. Pennsylvania Co. for Insurances on Lives & Granting Annuities, trustee. Denominations \$500 and \$1,000(*). Free of tax in Pennsylvania.

Abstract of Letter from President Richard W. Meirs, 1336 Walnut St. Philadelphia, April 20 1910.

Organization.—A Pennsylvania corporation supplying electric light and power in Altoona, Tyrone, Huntingdon and Lewistown, Pa., and intermediate territory, and gas to Huntingdon and Lewistown, covering a territory extending for 70 miles along the main line of the Pennsylvania RR., all connected by transmission lines; population over 100,000. The relations of the company with the community it serves are favorable; this is well shown by the fact that it has just entered into a ten-year contract for lighting the city of Altoona and a five-year contract for lighting the city of Lewistown. [The properties merged are the Edison Elec. Ill. Co., Altoona, and Citizens' Electric Lt., Ht. & Power Co., Altoona; Home Electric Lt. & Elec. Co. of Tyrone; Huntingdon Gas Co.; Mifflin County Gas & Water Power Co. (V. 84, p. 1055; V. 90, p. 505,306), an hydro-electric plant transmitting power to Altoona, Tyrone, Huntingdon, Lewistown, &c., is also owned but is, it is understood, maintained as a separate corporation, the Pennsylvania Hydro-Electric Co., below mentioned.—Ed.] It also operates the Lewistown & Reedsville Electric Ry. (see page 58 of "Electric Railway" Section).

The above earnings are for a period when there was severe competition which has now been eliminated by the combining of the seven different properties. This will undoubtedly result in largely increased gross earnings and at the same time materially reduce operating expenses. Various experts place the net earnings for 1910 at about \$200,000, against a maximum interest charge of \$88,000 for that period and thereafter a rapid increase. The plants and equipment are modern and adequate. There are two electrical power houses with a combined generating capacity of 3,400 k.w., in which additional units will be installed. The water power development furnishes a maximum of 2,800 k. w. J. G. White & Co. and Dodge & Day, after making separate and careful inventories, concur in fixing the replacement values of the properties at not less than \$2,500,000. All the franchises (railway included) are, in the opinion of counsel, perpetual and free from burdensome restrictions.

The bonds are secured by a first lien on the entire property now owned or hereafter acquired, except for (a) on one of the plants in Altoona a mtge. of \$100,000 (made by the Citizens' El. Lt. Heat & Power Co.), callable March 1 1911, to retire which funds have been deposited with the trustee, and (b) a mortgage of \$175,000 on the gas and electric plant at Lewistown, to retire which bonds are reserved. Under the laws of Pennsylvania the Pennsylvania Hydro-Electric Co., which controls valuable water and water-power rights, and the Lewistown & Reedsville Electric Ry., cannot be merged with the other properties. In the case of the Pennsylvania Hydro-Electric Co., all its stock and bonds are pledged under the mtge. An issue of \$250,000 Lewistown & Reedsville Electric Ry. bonds remain outstanding, but all the stock of the company has been pledged under the mortgage.

A sinking fund, equal to 1% per annum, on all outstanding bonds becomes operative in the year 1915, and an extension and improvement fund, equal to 1% per annum on all outstanding bonds becomes operative in 1920.

The engineering firm of Dodge & Day of Philadelphia will be actively in charge of the physical management of the property. Provision has also been made for representation by each of your firms upon the board of directors. There is a cash investment of more than \$600,000 in the property, over and above the bonded debt.

[The New Jersey company of the same name (Incorp. Jan. 10 1910 with \$3,600,000 of auth. cap. stock, part of this being preferred stock) owns the entire common stock of the Pennsylvania corporation, and for that reason it was not deemed wise, on account of taxes, to issue more than \$150,000 common stock of the Pennsylvania corporation.]

The directors (and officers) of the Pennsylvania corporation are: R. W. Meirs (Pres.), D. A. Pearson (Vice-Pres.), John E. Zimmermann (Sec. and Treas.), H. Laussat Geyelin, Henry M. Watts and Beauveau Borie Jr. Phila.; J. B. Mayer and G. N. Tidd, N. Y.; J. M. Sheedy and G. C. Kelchner, Altoona.

Ray Consolidated Copper Co., New York.—New Stock.—

The shareholders of this Maine corporation will vote May 25 on increasing the authorized capital stock from \$10,000,000 to \$12,000,000, all one class, in shares of \$10 each; also on exchanging the new stock for shares of stock of the Gila Copper Co. (of Maine) upon the basis of one share for three shares of the Gila Co., there being 600,000 Gila shares outstanding in addition to 5,000 shares now owned by the Ray.

Extract from Letter of Pres. Sherwood Aldrich, 111 Bway., N. Y., May 3 '10

All of our present authorized issue of stock, except 29,850 shares reserved for the conversion of the remaining bonds, has been issued and is outstanding. All the bonds have been called for retirement or conversion on July 1 1910. It has been apparent for some time that it would be of advantage to acquire the properties of the Gila Copper Co., which adjoin the properties of your company. The developments of ore bodies on the two properties have been such as to show conclusively that they could be mined much more economically under one ownership and management.

Report of D. C. Jackling, A. C. Beatty and S. W. Mudd, May 2 1910.

The developments of the properties have progressed, with the result as shown by the report, April 1 1910, of our engineer, that the Ray Co. had at that time in developed and partially developed ore a tonnage of 53,384,000 tons of an average grade of 2.22% copper; the Gila Co.'s developments in the same classes of ore amount to 15,427,000 tons of an average grade of 2.045% copper. The Gila ore so far developed will produce a concentrate containing about two-thirds the percentage of copper that will apply to the concentrates produced from Ray ores. Account must also be taken of the fact that the Ray is financed and its properties in process of equipment; and in such a consolidation the Gila Co. would secure its proportionate benefits from approximately \$5,000,000 that has been or is being expended in the equipment of the Ray properties, including the construction of its railroad, mill and smelter.—V. 89, p. 532.

Refining & Producing Oil Co.—New Company—Acquisitions.—This company, recently incorporated in Nevada with

\$21,250,000 authorized stock, has taken over the refining plant built by the California Petroleum Refineries, Ltd., at Oilport, near San Luis Obispo, at a cost of \$1,000,000 (see V. 90, p. 111; V. 83, p. 98, 1349), and intends to enlarge the plant, besides building another pipe line from Bakersfield to Oilport. In addition, extensive tracts of oil lands in Santa Barbara and Kern counties pass into the hands of the new company. A \$4,000,000 bond issue has been authorized for building new pipe lines and for the purchase of tank steamers. The principal stockholders are: J. I. Lamprecht, of Cleveland; T. N. Barnsdall, of Pittsburgh; Henry J. Crocker, of San Francisco, and J. C. Yancey, of Portland, Ore. The capital stock is divided into \$20,000,000 common stock, of which \$5,750,000 is in the treasury, and \$1,250,000 pref. stock. The latter is 6% non-cumulative pref. and after the common stock has received 6% it shares equally in dividends with the common stock. The new company does not take over the property or capital of the Nat. Ref. Co. of Cleveland. The Petroleum Producing Co., also incorporated recently in Nevada with \$10,000,000 stock, is owned principally by Messrs. Yancey and Barnsdall, who are interested in the refining and producing of oil.

Reo Motor Car Co., Lansing, Mich.—Status.—This Michigan corporation during 1909 increased its capital stock from \$1,000,000 to \$2,000,000 and declared a stock dividend of 100%, in order to distribute accumulated profits. Union Bag & Paper Co.—Pulpwood.—Pres. Barratt says: The recent action of Quebec in prohibiting the export of pulpwood from Crown lands is in no way a surprise. The Premier of the Province definitely stated over a year ago that they would prohibit the export within a short time, following the example of Ontario, where prohibition has been in effect for nearly ten years. The plans of the company have always contemplated this prohibition as an ultimate probability, and a year ago its arrangements were consummated, and are such that many years must elapse before it will be affected by this action, if at all. The supply of pulpwood is definitely provided for a number of years to come.—V. 90, p. 1106, 912.

—"Moody's Analyses of Railroad Investments," by John Moody, for the present year has just appeared. This publication, which is original and unique in its treatment of railroad investments, has taken its place as a standard authority in railroad values. In its pages are analyzed the annual reports of all the railroads on a uniform basis, while the bonds and stocks are all rated on the same principle that the mercantile agencies rate the credit of individuals and merchants. Thus the higher grade bonds, such as Lake Shore 3 1/2s, are rated Aaa; more speculative issues, like Missouri Pacific refunding 5s and Erie convertibles, get ratings of Ba and B, while bonds with much more doubtful futures, such as Buffalo & Susquehanna 4 1/2s, are rated D. The same principle is applied to the ratings of stocks, the higher grade preferred and guaranteed issues, being rated Aaa or Aa and the more uncertain and speculative issues running down from Baa to D and E. All the ratings are supplemented with information showing the position and lien of the various bond issues and the security and equity back of both the bonds and the stocks. All figures furnished in the volume are interpreted and commented on by the author, and the various complicated figures in the railroad reports, such as the traffic statistics, maintenance charges, fixed charges, capital obligations, investment holdings, equities in outside properties, are all presented on a uniform mileage scale for the full 10-year period, and their proper uses and value demonstrated in a clear and simple manner. The price of the volume is \$12 50 delivered. It is published by the Analyses Publishing Co., 35 Nassau St., New York.

PUBLIC SERVICE CORPORATION OF NEW JERSEY

FIRST ANNUAL REPORT—FOR THE YEAR ENDING DECEMBER 31 1909.

To the Shareholders:—

Public Service Corporation of New Jersey was incorporated under the Laws of the State of New Jersey on May 6 1903, with a perpetual charter, and began its business operations on June 1 1903. As an operating corporation its energies are now confined to the generation, distribution and sale of electricity for light, heat and power purposes, and it serves a population of approximately 1,900,000 people, as will appear more in detail later on.

The Corporation has a paid-up capital stock, issued only for cash at par, amounting to \$24,999,603.00. The authorized capital is \$25,000,000.00. The sale of the few remaining shares has been provided for. On June 1 1903 it authorized an issue of PERPETUAL INTEREST-BEARING CERTIFICATES amounting to \$20,200,000.00 at par, for the acquisition of the stocks of certain corporations, and executed simultaneously therewith a pledge of all the stocks thus to be acquired, as security for the Certificates. Under this authorization there have been issued \$19,852,255.00 at par of said Certificates. The rate of interest on said Certificates is as follows:

Year beginning May 1 1909	4½%
May 1 1910	5%
May 1 1911	5½%
May 1 1912	6%

On Sept. 27 1909 the corporation authorized an issue of \$50,000,000 at par of its general mortgage bonds dated Oct. 1 1909, secured by a mortgage on all its property of every character now owned or hereafter to be acquired.

Of the bonds authorized and secured by this mortgage there have been sold to the public \$13,500,000 par value. The remainder of the authorized issue is reserved for extensions and betterments, under carefully guarded restrictions contained in the mortgage. The Corporation has also issued one series of Car Trust Certificates upon which there remains unpaid \$640,000.

The Corporation operates all its electric properties under leases. It has also agreed, through the medium of leases, to pay as rental the interest on the various issues of bonds of sundry corporations which have become subsidiary to it, and certain stipulated amounts upon existing issues of stock of similarly situated corporations, the issues of bonds and the guaranteed stocks of all of which corporations are hereinafter set forth at length.

The Corporation has no floating indebtedness, except current bills.

The population served by the Corporation is located in the most thickly settled portions of the State of New Jersey. An enumeration of the municipalities is set forth later on.

The Corporation owns every share of stock, except Directors' shares, of Public Service Gas Company, which has an outstanding capital stock of \$4,500,000, all issued for cash at par. The Gas Company operates through leases or assignments thereof all the gas properties, with the exception of those in Elizabeth, Rahway and Perth Amboy, throughout the territory served electrically by Public Service Corporation of New Jersey.

The Corporation also owns 98.64% of the \$38,000,000 par value of stock of Public Service Railway Company, which company is a consolidation of the North Jersey Street Railway Company, Jersey City, Hoboken and Paterson Street Railway Company and United Street Railway Company of Central Jersey, which latter Company was a merger of the Elizabeth, Plainfield and Central Jersey Railway Company and the Elizabeth and Raritan River Street Railway Company. Public Service Railway Company, as successor to the North Jersey Street Railway Company, leases the Consolidated Traction Company, South Orange and Maplewood Traction Company, Orange and Passaic Valley Railway Company; it also leases directly the Bergen Turnpike Company and is the assignee of the leases of the Camden and Suburban Railway Company, Camden Horse Railroad Company and Camden Gloucester & Woodbury Railway Company. Thus Public Service Railway Company operates, either directly or under lease, all the street railway system controlled by the Corporation.

In addition to the foregoing, South Jersey Gas, Electric and Traction Company, a corporation whose electric business is leased to the Corporation, whose gas business is leased to the Gas Company, and whose traction business is leased to the Railway Company, owns the capital stock of the Bristol Gas Light Company, Bristol Electric Light and Power Company (Bristol, Pennsylvania), and of the Yardley Electric Light, Heat and Power Company, (Yardley, Pennsylvania) and under the leases of said company, as aforesaid, the profits of those companies flow in proper proportion to the Corporation and to the Gas Company.

When the Corporation began business in 1903, the electric properties acquired by it were in a fair operating condition

and state of development. The gas properties now operated by Public Service Gas Company were in a high state of efficiency, with one or two minor exceptions. The street railway properties acquired and now operated by Public Service Railway Company were completely run down and demoralized, and required complete rehabilitation, and it is only now that they have been brought to a proper operating condition.

Herewith is presented a table showing the municipalities in which the Corporation, the Gas Company and the Railway Company are operating, together with the service supplied in each, the population given being the Census figures of 1905, the same having been increased fully fifteen per cent since that year:

[We omit this table, but insert the grand totals.—Ed.]

	Municipalities Served.	Population Served (1905).
Corporation	146	1,543,716
Gas Company	125	1,433,277
Railway Company	101	1,398,153
Total Number	176	1,614,180

STATEMENT OF EARNINGS AND EXPENSES OF THE CORPORATION, THE GAS COMPANY, THE RAILWAY COMPANY, AND CONTROLLED COMPANIES—FOR THE YEAR ENDING DECEMBER 31 1909.

Gross Earnings of leased and controlled companies	\$25,103,018 81
Public Service Corporation of New Jersey Miscellaneous Income	1,457,432 29
Operating Expenses and Taxes	\$26,560,451 10
	13,331,228 27
Bond Interest and Rentals of leased and controlled companies	\$13,229,222 83
	10,111,403 35
Fixed charges of Public Service Corporation of New Jersey	\$3,117,819 48
	1,689,371 78
Surplus	\$1,428,447 70

Dividends were paid for the first two quarters of the year 1909 at the rate of four per cent per annum and for the last two quarters at the rate of five per cent per annum.

During the year 1909 there was converted into stock of the Corporation approximately \$6,000,000 at par of an issue of \$6,250,000 of convertible notes falling due Nov. 1 1909; the balance of the issue not converted being paid off at maturity. There was also paid off at maturity on Nov. 1 1909 an issue of \$7,250,000 of collateral gold notes. These notes were paid off from the proceeds of \$8,000,000 of the general mortgage bonds sold during the fall of 1909. Applying the earnings of the year to the basis of securities as now existing, the surplus for the year 1909 would have been \$1,540,258 53, instead of \$1,428,447 70, as shown by the above statement.

* Seven months only.

The electric business of the Corporation, for convenience, is operated in six divisions, namely: Essex, Hudson, Passaic, Bergen, Central and Southern. The business of the Gas Company is similarly operated in six corresponding divisions. The business of the Railway Company is operated in five divisions, namely, Essex, Hudson, Passaic, Central and Southern. There is no Bergen Division of the Railway Company. The Public Service Railway lines operating in Bergen County are comparatively small, and are included within the Hudson Division.

FRANCHISES.

The franchises of the Corporation, the Gas Company and the Railway Company, with certain minor exceptions, are perpetual.

MUNICIPAL OWNERSHIP.

The fetich of municipal ownership has made but little progress in New Jersey. The only place which has determined to try it is the City of Orange, where it has been decided to install a plant for public lighting. The outcome of this will be watched with much interest. The price quoted by the Corporation to the City of Orange was \$80 per lamp, which I am satisfied will be shown to be as low, if not lower, than the city, over a period of years, can generate its own light for, if proper methods of accounting are adopted.

CONDITION OF PROPERTY.

At the instance of bankers, the properties of the Corporation, the Gas Company and the Railway Company were thoroughly examined during the year 1909 by Stone & Webster of Boston and Mr. E. C. Foster, of New Orleans. On the strength of their reports a sale of \$8,000,000 at par of the general mortgage bonds of the Corporation was negotiated with Messrs. J. P. Morgan & Company of New York and Drexel & Company of Philadelphia.

TAXES.

That the Corporation and its controlled companies are bearing their fair share of taxation is evidenced by the following table of taxes paid:

	Corporation.	Gas Company.	Railway Company.	Total.
1904-----	\$128,053 24	\$247,793 58	\$461,081 98	\$836,928 80
1905-----	141,153 22	274,035 34	470,462 65	885,651 21
1906-----	151,280 72	292,982 85	495,033 91	939,297 48
1907-----	164,569 09	301,203 47	541,176 76	1,006,949 32
1908-----	173,617 35	311,188 63	583,866 48	1,068,672 46
1909-----	185,721 52	337,295 32	702,565 94	1,225,582 78
Total-----	\$944,395 14	\$1,764,499 19	\$3,254,187 72	\$5,963,082 05

During the year 1909 the Railway franchise tax rate was $3\frac{1}{2}\%$ of the gross receipts, except where governed by contract, as in the case of the City of Newark, where the tax on the gross receipts was 5%.

These tax figures do not cover payments for street improvement assessments, cost of new street paving or repairs to street paving.

EMPLOYEES.

The Corporation, the Gas Company and the Railway Company employ approximately 10,000 persons in their various departments, the Railway Company demanding the services of about one-half of this number.

NEW BUILDING.

The Corporation has taken a twenty-year lease of the entire new building being erected by the Prudential Insurance Company of America on the north-west corner of Broad and Bank Streets, in the City of Newark, together with two floors of the extension of said building fronting on Academy Street. This building will be finished and ready for occupancy during the year 1910, when all the various offices of the Corporation now located in the City of Newark will be housed under one roof.

COMMERCIAL DEPARTMENT.

The gas and electric field has been developed with the aid of a highly organized commercial force which brings the Corporation and Gas Company into close touch with their customers and provides careful supervision of every detail of their business. The two companies maintain thirty offices for the convenience of their patrons, and each office has a salesroom in which every desirable appliance for the use of gas and electricity is displayed. The salesrooms afford customers opportunities to purchase appliances of reliable makes at the lowest possible prices. These companies have more than

200 men in the field, whose business it is to acquaint the public with appliances which are most economical and efficient for their use, as well as solicit new business. Careful tests as to workmanship and efficiency of all appliances are made before they are placed on sale.

RATES.

During the progress of the Corporation's development substantial reductions have been made in the rates charged for its product and that of the Gas Company. In 1903 the electric lighting base rate charged by the various properties now operated by the Corporation ranged from a maximum of twenty cents to a minimum of twelve cents. During this period these rates have all been harmonized and made uniform, so that as of January 1 1910 the base rate charged over the entire territory is ten cents, and an equitable system of discounts applicable to large consumers has also been worked out. The rates for public lighting have likewise been largely reduced, and a new maximum schedule for nominal 2,000 C. P. arc lights has been put into effect as follows: First-class cities, \$75 per light. Other cities, \$80 per light. Other municipalities, \$85 per light.

Under this schedule contracts have been made with the City of Newark, having 2,557 lights, for \$70 per light per year; with Jersey City, having 1,713 lights, for \$75 per light per year; with Paterson, having 854 lights, at \$77.50 per light per year.

Similarly, the base rates charged by the various properties now operated by the Gas Company in 1903 ranged from a maximum of \$1.80 to a minimum of \$1. This has been likewise reduced, and made uniform, so that the entire territory served by the Gas Company as of January 1 1910, has the benefit of \$1 gas. This has not only proved a fair rate for the more populous sections served by the Gas Company, but has given to suburban sections a rate which otherwise they never could have expected to obtain.

The five-cent zone and the transfer limit have both been largely extended by the Railway Company, so that, with certain exceptions, where such a result would be altogether impracticable, it is now possible to travel on a continuous journey with a single transfer, throughout the limits of any one division, for five cents.

ELECTRIC STATIONS.

A first-class modern generating station has been located at Marion, Jersey City, on the banks of the Hackensack River, containing at the present time a total generating capacity of 40,000 k. w., and which will ultimately contain capacity to generate approximately 100,000 k. w. The Corporation has also constructed an entirely new and modern station at Camden, which station is in full operation, and has purchased land and commenced work on the foundations for another new station at Perth Amboy. In the development of the business of the Corporation the older and smaller steam generating stations will gradually be shut down, as some already have been, and all current will be generated in the newer and larger stations, and transmitted over the territory to sub-stations which are constantly being erected, and from which distribution takes place. Whenever practicable, generating stations are being inter-connected with transmission lines, for the double purpose of efficiency of the service and economy of operation.

Appended are figures showing the growth of the corporation's electrical business:

WAGES.

During the period between June 1 1903 and the date covered by this report, there have been three increases in the pay of the men, and during the year 1909 the Company adopted a new and comprehensive wage scale, effective January 1 1910, and increasing in subsequent years until the maximum is reached as follows:

From January 1 1910 to December 31 1910.	
First year men	21 cents per hour.
Second year men	22 " "
Thrid to tenth year men	23 " "
Over tenth year men	24 " "
From January 1 1911 to December 31 1911	
First year men	22 cents per hour.
Second year men	23 " "
Thrid to tenth year men	24 " "
Over tenth year men	24 1/2 " "
From January 1 1912.	
First year men	23 cents per hour.
Second year men	24 " "
Over second year men	25 " "

When this plan shall have been consummated, the first year men will each receive 23 cents per hour, second year men 24 cents per hour and men who have been in the employ of the Company above two years 25 cents per hour. This is regarded as a fair, liberal wage scale, and has been received by the men in a manner most gratifying to the Company.

The runs are based as nearly as practicable on a ten-hour a-day basis and time and a half is given to men who volunteer for an extra run. By the same plan each man on the extra list who presents himself at every roll-call for a week is guaranteed a minimum wage of \$10 50 per week.

REPAIR SHOPS, CAR HOUSES, ETC.

A repair shop having a capacity of 125 cars was built on the Plank Road in 1905, together with a large storage barn at the same point for 108 large cars and a store-room for supplies for all the northern divisions.

In Camden a repair shop for twenty cars was constructed in 1907 and also a new car house with a capacity of ninety-one cars.

New lay-outs with office and shop buildings were installed at Broadway Terminal, Paterson; Bergen Street, Sixteenth Avenue and Twentieth Street, Newark, Elizabeth and Dunellen, while extensive alterations were made in the buildings at West Hoboken, Hoboken, Montgomery Street, Jersey City, Bayonne, Central Avenue and South Orange Avenue, Newark. It is the intention of the Company to construct annually two or more first-class modern car houses until the entire equipment of the Company is properly housed.

At Hudson Place, Hoboken, a double-deck terminal is being completed at a cost of \$250,000. This terminal will double the facilities for car operation at that point. At Fourteenth Street Ferry, Hoboken, a new terminal has also been constructed, which has greatly improved the conditions there.

In the Maintenance of Way Department extensive improvements have been made at Passaic Wharf, where many money and labor-saving devices have been provided, including a large sand-drying plant and a tie-treating plant. At Fairview, on the Bergen Turnpike, a large quarry has been purchased and modern stone-crushing machinery installed, which enables the Company to turn out crushed stone at minimum cost for practically the entire system except the Southern Division.

A complete equipment of large work cars has been installed, with which the Company is able to haul track-building materials, thus doing away with the teams which it was necessary formerly to hire to do such work.

PAY-AS-YOU-ENTER CARS.

The Pay-As-You-Enter system of fare collection was investigated in 1907, and 150 P-A-Y-E cars were purchased and put in service in the spring of 1908, and other cars have since been converted to P-A-Y-E or other pre-payment type. As of this date we have 650 pre-payment cars of this general character in service.

This system eliminates the missed fares. Where these cars are used the receipts have been substantially increased. Passengers are relieved from the annoyance caused by conductors passing back and forth through the cars collecting fares and from mistakes being made by conductors in demanding fare a second time. By this system the conductor is also to remain on the rear platform to attend to the safety of passengers boarding and leaving the car. It is proposed eventually to have all cars operated in city service equipped with fare boxes, so that the pre-payment system of fare collection may be used. It has been found advisable, in order to reduce the number of accidents arising from passengers boarding and leaving cars while the latter are in motion, to equip the cars with doors or gates at the entrance and exit steps, these doors or gates at the rear platform to be operated by the conductor from his station, the doors at the front exit being operated by the motorman. On all cars so equipped in 1909 the platform accidents were practically eliminated. This P-A-Y-E system as a whole has proven popular with the public and the operating force.

INSURANCE.

On July 1 1903 the amount of insurance in force on the properties controlled by the Corporation was \$9,455,000, and the annual premium thereon was \$122,400, or an average rate of \$1.29 per hundred dollars of insurance. At the present time the insurance carried amounts to \$20,273,000, and the annual premium thereon is \$122,909, or an average rate of sixty cents per hundred dollars. Thus the total amount of insurance carried has been more than double for practically the same premium. The total losses occurring during the same period aggregated \$158,600, of which all but \$22,500 was covered by insurance.

To secure these results the Corporation has authorized, up to the present time, the expenditure of approximately \$200,000 for minimizing the fire hazard by installing fire extinguishers, sprinkler systems, fire hose, fire doors, parapet walls, concrete floors, etc.

It is expected that additional substantial economies will be obtained in the near future, either through the further lowering of rates by the insurance companies, or the establishment of a self-insurance fund which the Corporation now has under consideration.

THOMAS N. McCARTER,

President.

—The stock, bond, grain and cotton brokerage house of Harris, Winthrop & Co., of N. Y., Chicago, London and Paris, announce the removal of their New York office to the Wilks Building, 15 Wall St. The firm occupies the prominent offices on the second and third floors facing Wall and Broad streets, opposite J. P. Morgan & Co.'s offices and the U. S. Sub-Treasury. Most of the clerical staff are quartered on the third floor, while the customers and members of the firm have exceptional facilities on the second floor, which is favored with a high ceiling and daylight during the working hours of the day. The firm will sub-let its old offices at 25 Pine St. for two years at a greatly reduced rental. These offices on the ground and second floors of 25 Pine St. are next door to the Pine St. entrance of the U. S. Sub-Treasury and are specially adapted for out-of-town stock brokerage houses desirous of establishing a New York branch.

—E. W. Clark & Co., bankers, at 321 Chestnut St., Philadelphia, who are particularly well known for the successful organization and management of electric railway properties, invite confidential inquiries and correspondence from investors and financial institutions interested in their stocks and bonds. Some of the companies in whose securities the firm are specialists follow: Bangor Ry. & Elec. Co., Chattanooga Ry. & Light Co., Columbus Ry. & Light Co., Commonwealth Power, Ry. & Light Co., Denver & Northwestern Ry. Co., East St. Louis & Suburban Co., Grand Rapids Ry. Co., Lewiston Augusta & Waterville St. Ry., Peoria Light Co., Portland Ry., Light & Power Co., Saginaw-Bay City Ry. Co., St. Joseph Ry., Light, Heat & Power Co., Springfield Ry. & Light Co. and Union Ry., Gas & Elec. Co.

—The bond house of Wakefield, Garthwaite & Co., San Francisco, is issuing monthly for distribution a valuable and complete "Digest of California Securities." General conditions of California are also given showing the growth of that great State along commercial as well as financial lines. The firm are now occupying handsome new offices in the First National Bank Building, and make a specialty of high-grade municipal, railroad and corporation bonds. They are members of the San Francisco Stock and Bond Exchange.

—E. Medley Scovil, for many years manager of the financial advertising department of the "New York Times," has taken the management of the New York advertising office of the "Boston News Bureau," 44 Broad St. This well-known publication has lately opened its columns to financial advertising of the best class. Mr. Scovil also had charge for two years of the same department of advertising on the "New York Evening Post."

—The new firm of Fuqua, Tyng & Co., of Philadelphia, is being organized with a capital of \$100,000, by Watson F. Fuqua and Lucien H. Tyng. The firm will have offices in the Land Title Building and will deal in bonds and investment securities. Messrs. Fuqua and Tyng have for some time been in charge of the bond business of C. H. Geist & Co. Mr. Fuqua had previously been associated with Dick Bros. & Co. and Dick & Robinson and Mr. Tyng was formerly of the firm of Tyng & Co., of Buffalo, N. Y.

—Albert P. Miller Jr., the well-known dealer in bonds and stocks, Providence, R. I., is distributing to investors a comprehensive handbook of Rhode Island investments. It contains detailed information as to dividends, changes in capitalization, earnings, &c., of the leading industrial corporations of Rhode Island, as well as particulars regarding capital, surplus, dividends, &c., of the various national and State banks and trust companies.

—Case & Co. is the style of a newly organized investment banking house in Chicago which will deal in timber and irrigation securities, public utility bonds and other investments of high grade. The partners are Alfred E. Case, J. H. Green, E. F. Mertz and W. E. Hamilton, all formerly business men of experience in financial lines in Milwaukee, Wis. Case & Co. occupy a portion of the banking quarters in the Marquette Building formerly used by the Bankers' National Bank.

—Lyman A. Walton, formerly Vice-President of the Equitable Trust Co., Chicago, and latterly in the bond business in the New York Life Building, has removed his offices to 531 Commercial National Bank Building, corner Clark and Adams streets.

—The Meyer-Kiser Bank, 137 East Washington St., Indianapolis, is publishing and issuing a manual of statistics with regard to Indianapolis securities. The booklet contains in clear fashion financial facts regarding securities local to the Indianapolis market. Statements of Indianapolis banks and trust companies are also included.

—Henry Bainbridge Chapin, a member of the Boston Stock Exchange house of Schirmer, Chapin & Emmons, died on the 7th inst. Mr. Chapin was fifty-three years of age. He was a director of the Boston & Albany RR., in whose management he had formerly been active.

—C. H. Farnham, specialist in inactive and unlisted bonds, 27 State Street, Boston, has issued a circular showing over a thousand issues of railroad, street railway, gas, electric and industrial securities dealt in by his firm.

—Messrs. Thompson-Singleton, dealers in high-grade railroad and municipal bonds, have removed their offices from 37 Wall St. to 68 William St. Telephone 2490 John.

—Attention is called to the offering by Clark, Dodge & Co. of State of New York highway-improvement 4% gold bonds, due 1960.

COMMERCIAL EPITOME.

Friday Night, May 13 1910.

Though conservatism is plainly apparent in most of the avenues of trade, the fact that bank clearings are considerably larger than a year ago indicates that there is, after all, an undertone of confidence. The outlook for the crops is more favorable, and this fact has been punctuated by a sharp decline in wheat. The widely lamented death of King Edward VII. has had less effect on trade at home and abroad than might have been feared. Railroad earnings show a suggestive increase over those of last year.

LARD on the spot has been easier. Trade has been dull and receipts of live hogs of late have shown some increase. Prime Western 13.40c.; Middle Western 13.35c.; City, steam, 13½c. Refined lard has been quiet and generally steady. Continent 13.80c.; South America 14.50c. and Brazil in kegs 15.50c. The speculation in lard futures has been active, with prices more or less irregular. Packers in some cases have been inclined to sell more freely for short account, owing to larger receipts of hogs of late and predictions of still larger arrivals in the near future. Other packers, however, have made purchases at times and there has been more or less commission-house buying on setbacks.

PORK on the spot has been quiet and generally steady. Mess \$24@24 50; clear \$25@27, and family \$26@26 50. Beef has been quiet and firm; stocks continue light. Mess \$16@17; packet \$16@17; family \$20; extra India mess \$30. Cut meats have been steady with a fair trade in small lots; pickled hams, regular, 15½@16c.; pickled bellies, clear, 16@18½c.; pickled ribs 15½@16½c. Tallow has been quiet and steady; City 7 3-16c. Stearines have been dull and steady; oleo 15½@16c.; lard 14½c. Butter has been easier and fairly active; creamery extras 27@27½c. Cheese has been quiet; State, f. c., new, colored or white, fancy, 13½c. Eggs quiet and firm; Western firsts 21½@22½c.

OIL.—Linseed has been firm, with new business dull; there has been moderate withdrawals on old contracts. City, raw, American seed, 84@85c.; boiled, 85@86c.; Calcutta, raw, 90c. Cotton seed has been quiet and firm; winter 8.30@8.60c., summer white 8@8.23c. Lard quiet and firm; prime \$1 25@1 28; No. 1 extra 65@69c. Coconut has been quiet and firm; Cochin 10½@10½c., Ceylon 9½@9¾c. Olive has been quiet and firm at 80@85c. Peanut has been dull and steady; yellow 62@67c. Cod has been in good demand and firm; domestic 38@40c., Newfoundland 44@45c.

COFFEE on the spot has been quiet. Rio No. 7, 8¼@8¾c.; Santos No. 4, 9¼@9¾c. West India growths have been quiet and steady; fair to good Cucuta 9¾@10¼c. The speculation in future contracts has been moderately active. Prices have declined slightly at times, owing to weakness in the European markets, selling of the distant months here by foreign houses and local liquidation. On weak spots, however, trade interests have given support. The closing prices to-day were as follows:

May	6.40c.	September	6.60c.	January	6.66c.
June	6.45c.	October	6.60c.	February	6.70c.
July	6.45c.	November	6.60c.	March	6.73c.
August	6.50c.	December	6.65c.	April	6.74c.

SUGAR.—Raw has been quiet and easier. Centrifugal, 96-degrees test, 4.24c.; muscovado, 89-degrees test, 3.74c.; molasses, 89-degrees test, 3.49c. Refined has been quiet and steady. Granulated 5.25c. Teas have been steady, with a moderate jobbing trade. Spices have been fairly active and firm. Wool has been quiet and steady. Hops have been dull and steady.

PETROLEUM.—Refined has been moderately active and steady. Barrels 7.75c.; bulk 4.25c.; cases 10.15c. Gasoline has been active and firm; 86-degrees in 100-gallon drums, 18¾c.; drums \$8 50 extra. Naphtha has been firm with a good demand; 73@76-degrees in 100-gallon drums, 16¾c.; drums \$8 50 extra. Spirits of turpentine has been quiet and firm at 64c. Rosin has been quiet and firm; common to good strained \$4 30.

TOBACCO.—There has been no essential change in the general situation. Trade has been quiet, with many people awaiting developments. There is still a noticeable disposition to take a hopeful view of the future. Manufacturers are believed to be poorly supplied. Prices have been firm.

COPPER has been quiet, with slight changes in quotations. Lake 12½@13½c.; electrolytic 12½@12¾c.; casting 12½@12½c. Lead has been dull and easier at 4.30c. Spelter has been quiet but steadier at 5¼c. Tin has been moderately active and generally firm; spot 33.15c. Iron has been steady. Moderate sales have been reported of late with a larger number of inquiries. No. 1 Northern \$17 25@17 75; No. 2 Southern \$15 75@16 25. Stocks are large, but a steady decrease is expected, owing to the sharp curtailment in production of late. Finished material has been more active, especially structural steel for bridges and buildings.

COTTON.

Friday Night, May 13 1910.

THE MOVEMENT OF THE CROP as indicated by our telegrams from the South to-night is given below. For the week ending this evening the total receipts have reached 52,472 bales, against 50,968 bales last week and 64,893 bales the previous week, making the total receipts since Sept. 1 1909 6,825,810 bales, against 9,307,400 bales for the same period of 1908-09, showing a decrease since Sept. 1 1909 of 2,481,590 bales.

Speculation in cotton for future delivery has been more active at rapidly rising prices for the old-crop months. New-crop months until Thursday hesitated to follow the present-crop deliveries, but then manifested more strength in sympathy with the other months. Texas has been without the copious rains which are said to be needed in that State, and according to the Government reports the rainfall has also been deficient in Alabama, Mississippi, Louisiana, Arkansas and Florida and above normal in Georgia. The spot business at Liverpool has noticeably increased and spot markets at the South are reported somewhat more active. At Alexandria, Egypt, futures have advanced sharply. The certificated stock at New York has been decreasing. Reports from Manchester are to the effect that trade has been better at firm prices. They have been contradictory as to whether there is to be a strike at Lancashire on the question of wages. All that is known is that thus far there has been neither a strike nor a reduction in pay. British Board of Trade returns indicate that general trade in Great Britain is in a favorable condition. Yarns in Philadelphia have been firmer, though trade has not improved materially, if at all. Leading bulls have liquidated to some extent in the old-crop months as prices advanced, notably in July, but at other times they have given support. Large spot interests, it is stated, have been buyers of July and August, and there has been a good deal of scattered covering. Less attention has been paid to the May option and more to the later deliveries. The idea has been that a large short interest exists in July and also that there was more or less of an interest on the same side in August and September. Receipts have been small. On the other hand, many reports from the South insist that spot trade there is quiet and that the weather on the whole has been favorable. Some advices take the ground that the outlook in Texas is good and that the amount of re-planting necessary has been exaggerated. Trade in France is said to be bad, while stocks of cotton goods in that country have been increasing. Prices are so high that every effort will assuredly be made in this country to raise as big a crop as possible. A straw showing which way the wind blows is that this season cotton will be planted in parts of California. With cotton at approximately \$75 a bale, it stands to reason that cultivation all through the belt will be far more persistent and careful than for years past. Meantime speculation is largely professional. The Grand Jury proceedings still hang over it, and although the anti-option bill appears to be dead, formal obsequies are not yet in order. The consensus as regards the crop is that there is still time to raise a very large one and the high cost of living may have a marked effect on the consumption should cotton and cotton goods continue at high prices. To-day prices advanced sharply at first, on dry weather in Texas, strength and activity in Liverpool, reports of a good spot inquiry at the South, bull support and covering of shorts. Later there was a reaction on heavy liquidation. Spot cotton here has been more active. Middling uplands closed at 16.05c., an advance of 80 points.

The rates on and off middling, as established Nov. 17 1909 by the Revision Committee, at which grades other than middling may be delivered on contract, are as follows:

BREADSTUFFS.

Friday, May 13 1910.

unfavorable reports from the country districts are not accompanied by buying orders. Liverpool and Berlin quotations have fallen noticeably and the same is true of Paris and Budapest. The failure of a Russian bank has had a bad effect on the Continent. The banks in Europe are said to be forcing the shipment of wheat to market. Russian offerings have been pressing on the trade in Liverpool, where there has not been much demand for wheat. Prices here are still far above the export basis. Some think they are fully 10 cents above the export parity and it is contended that until wheat is down to a point where it can be shipped to foreign markets, there is little likelihood of a much further or sustained advance. The cash trade at the West has been quiet, not only for export but for home consumption. At the same time rain is admittedly needed at the Northwest, where cold, dry conditions have prevailed with high winds. On Wednesday night, the 11th inst., a hard frost was reported in some parts of North Dakota and reports from Minneapolis asserted that the damage amounted to 25%. Winnipeg on the same day reported ice. Some advices from the Southwest continue to insist that more or less damage is being done by insects. St. Louis at times has reported an increased cash demand. To-day prices advanced on unfavorable weather and crop news, decreased Argentine shipments, larger exports from this country, an advance at Liverpool, bull support and covering of shorts.

Indian corn futures in the local market have been nominal. At the West the speculation has been active, with prominent cash interests arrayed upon opposing sides of the market. Prices have been irregular. At times they have declined under pressure from bear traders and liquidation, as well as the depressing effects of dullness on the spot. But there has been a good deal of covering, however, on reports of delayed seeding by cold rains and reports of damage to young plants in some sections by frost. Support has also been forthcoming at times from strong interests. Sentiment is still bearish in the main, however, owing to the large stocks and dullness in the cash trade. To-day prices closed lower on more favorable weather and liquidation.

Oats for future delivery in the Western market have been quiet, with comparatively small fluctuations. Sentiment in the trade is bearish, owing to the absence of an active cash demand and the largeness of supplies in the hands of farmers. But selling has been held in check by abnormally low temperatures over many sections during the week. Reports from the Northwest and also from Illinois and Indiana have stated that considerable damage to the new crop has occurred. To-day the market was quiet, ending easier with corn and on liquidation.

THE DRY GOODS TRADE.

New York, Friday Night, May 13 1910.

The improvement noted in the cotton goods market last week was not maintained during the past few days. Demand, both at first and second hands, was light and scattered, and the business done mostly of a filling-in character. Prices displayed considerable irregularity. On contracts for future delivery sellers continued firm as a rule, but for prompt or near-by shipment goods were offered rather freely in various quarters at low figures, in order to clean up stocks, without, however, stimulating much activity; and this served to give the market a more or less ragged appearance. Most buyers showed marked conservatism and could not be induced to place contracts, despite the fact, generally admitted, that prices now ruling for forward deliveries are on an exceptionally low basis considering the present cost of actual cotton. As to reasons why buyers are so cautious regarding future commitments, opinions differ; some, for instance, attribute their attitude to a lack of confidence in the stability of prices of finished goods, while others think they are holding off pending a clearer outlook for a satisfactory distribution at prices based on levels which sellers are demanding. In this connection it is noteworthy that advices from various sections, especially the West, report quieter conditions among retailers, due in a measure to unseasonable weather. One encouraging feature, and an exception in the general situation, is that most leading jobbers report having done a satisfactory advance business on fall cottons, the total being somewhat above that of the corresponding period a year ago. Jobbers themselves continue out of the market except for small quantities of blankets and other fall merchandise, for which they have booked advance orders. In the primary market conditions remained practically unchanged. Selling agents continued firm on forward business and were disposed to await a change in the attitude of buyers rather than to attempt to force sales. Converters and printers operated moderately but steadily to cover well-defined needs during the summer months, and at the week-end appeared more anxious to secure goods for such deliveries than they have been for some time past. A moderate improvement in demand for cotton yarns was noted, with less pressure to move stocks, and a firmer tone in some quarters. In the woolen and worsted division trade in both men's wear and dress goods was seasonably dull; the market was rather unsettled by offerings of stock goods, particularly worsteds, at substantial concessions. A feature of the week was the naming of prices by leading domestic manufacturers on carpets and rugs for next fall delivery; the new schedules show material reductions on most descriptions from the prices announced last January.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending May 7 were 12,783 packages, valued at \$634,113, their destination being to the points specified in the table below:

New York to May 7—			
	1910	1909	1908
	Week.	Since Jan. 1.	Week.
Great Britain	9	855	55
Other Europe	11	505	452

South America	507	18,438	5,402
Other countries	299	15,646	17,799
Total	12,783	75,975	2,243

The value of these New York exports since Jan. 1 has been \$5,323,028 in 1910, against \$7,003,737 in 1909.

In most lines of domestic cottons business was light and confined to meeting current or near-by requirements. Orders for prints were more numerous but small in the aggregate; there were further reports of price-cutting in some sections to stimulate forward business on napped goods. Some fair-sized orders were received for bleached and colored cottons; demand, however, was scattered, and usually for small lots. Cotton linings were in moderate request, secondary distributors taking fair quantities for near-by and forward shipment. More interest was shown in denims in some quarters, following further evidences of light stocks. Drills and sheetings displayed little activity and prices continued irregular. Export trade was quiet in all directions. A steady demand was in evidence in the print cloth market and a fair business was reported done for deliveries extending through the summer. Although both regulars and standard wide goods remained quotably unchanged, a somewhat firmer tone was noted among sellers; on odd count print cloths slightly higher bids were made.

WOOLEN GOODS.—Trade in men's wear fabrics for fall continued dull. Duplicate orders showed little, if any, increase, and the failure of clothing manufacturers to re-order heavy-weight lines in larger volume is causing mill agents some anxiety. Both woolen and worsted goods moved slowly, and so far have failed to show the improvement which was expected to develop this month. Even carded woolens were in lighter request; leading producers of these fabrics, however, are said to be well sold ahead. Generally speaking, woolen mills are more comfortably situated as regards business already booked than are the manufacturers of worsted goods. There appears to be a surplus of the latter fabrics, and according to reliable reports producers have been offering accumulations at sharp reductions in prices. The dress goods market likewise was quiet pending the development of styles for the future; in this quarter also stock goods were pressed for sale.

FOREIGN DRY GOODS.—Buyers continued more or less indifferent toward imported woolens and worsteds. In linens, importers are still hesitating to place orders abroad for next year's delivery, claiming that prices demanded by mills are too high. The recent cool weather has curtailed retail distribution, with the result that trade has been less active with jobbers; this lull, however, has given the latter an opportunity to catch up on back orders, and shipments long overdue are now being made. In burlaps trade was of fair size; light-weights are quoted at 3.25c. and 10½ ounce at 4.25c.

STATE AND CITY DEPARTMENT.

News Items.

Cleveland-Collinwood, Ohio.—*Petition to Enjoin Annexation Dismissed by Supreme Court.*—The suit brought by Wm. H. Miner, a taxpayer, to restrain the annexation of the village of Collinwood to the city of Cleveland, on the ground that a rural section of the former had not been included in the agreement, was decided by the Supreme Court on May 3, and the petition dismissed.

Denver, Colo.—*Water Election.*—At the general city election on May 17 there will be submitted to the voters of this city the question of granting the Denver Union Water Co. a new 20-year franchise. The former franchise of this company expired April 10 1910, and for some time past negotiations have been pending for the purchase of the plant by the city. A board of appraisers appointed as a result of an agreement between the water company and the city on Sept. 17 1907 fixed the total value of the property at \$14,400,000. See V. 88, p. 955.

The new franchise prohibits the city from constructing or operating any competing water system or being indirectly interested in the same. It is provided that upon the expiration of this franchise the city shall have the right to purchase all the property of the water company at its fair cash value, which is to be determined by a board of appraisers consisting of five members. Under Section 21 of the new grant, if the city shall at the same election at which the new franchise is voted on decide to purchase the property under the provisions of Ordinance No. 44 of 1890 and fully pay for the same, as in that ordinance provided, then this franchise shall become null and void.

In addition to voting on the question of granting the water company a new franchise, the electors will also pass on three alternative charter amendments concerning the water question.

One of these provides for a water commission of five members to investigate the question of acquiring or constructing a water plant. The commission shall negotiate with the Denver Union Water Co. and ascertain for what amount its system can be acquired by the city and also determine the probable cost of construction of a new system. After reaching a decision in the matter, any recommendations the commission may make for the purpose of settling the question of a water supply, whether the same may involve the issuance of bonds or not, will be submitted to the City Council, which body will call an election to present the matter to the voters.

Another amendment provides for the creation of a public utilities commission of three members to exercise all the powers of the city granted in the Constitution or named in the City Charter in the matter of constructing or acquiring a water system. This commission, it is provided, shall offer the Denver Union Water Co. \$7,000,000 city bonds in payment for its plant, and if this offer is accepted by the company a vote will be taken on the question of issuing \$7,000,000 of the \$8,000,000 bonds for the purchase of the plant and the remaining \$1,000,000 for improvements. Should the water company refuse to sell its plant for \$7,000,000, the form of ballot will then be on the question of issuing the entire \$8,000,000 bonds for the construction of a new water plant. It is also provided, in the event of the water company's refusal to accept the \$7,000,000 bonds, that the commission may, after a careful investigation of the property and estimate of the cost of construction of a new plant, submit to the voters, in addition to the question of issuing \$8,000,000 bonds above referred to, an alternative proposition for the issuance of bonds in such sum as is deemed advisable for the acquisition or construction of a water system.

The other amendment appoints a Public Service Board of three members and gives them practically the same powers as the Commission created by the preceding amendment. If this amendment is adopted, an election may be called to vote on the question of issuing \$10,000,000 4% bonds, of which \$9,000,000 will be offered to the water company for the purchase of its plant, and in the event of its refusal the entire amount will be used for the construction of a new plant.

Illinois.—*Members of Legislature Indicted in Bribery Case.*—The special Grand Jury which has been investigating the alleged payment of bribes to certain members of the Legislature, in connection with the election on May 26 1909 of William Lorimer as U. S. Senator, voted indictments on May 6 against Representatives Lee O'Neill Browne of Ottawa, Robert E. Wilson of Chicago and Michael S. Link of Mitchell. The indictments were the result of testimony offered by Representatives Charles A. White of O'Fallen and H. J. C. Beckmeyer of Carlyle, both of whom, it is said, admitted having received money from Browne and Wilson for casting their votes for Mr. Lorimer. Messrs. White and Beckmeyer also accused Representative Link of having been on hand at the time a part of this money was paid. Later reports state that Mr. Link has also confessed to having received bribe money, the same having been paid him by Browne and Wilson.

Kansas City, Mo.—*Supreme Court to Decide Result of Recent Bond Election.*—There being some question as to whether the proposition to issue bonds aggregating \$4,175,000 carried at the election held April 5 (V. 90, p. 999), the matter has been submitted to the State Supreme Court for adjudication. A decision is not expected before the latter part of July or the first of August.

Massachusetts.—*Resolution Favoring Popular Election of United States Senators.*—By a vote of 116 to 110 the Lower House of the Legislature on May 10 adopted a resolution asking Congress to call a constitutional convention for the purpose of amending the Federal Constitution so that United States Senators may be elected by a direct vote of the people. The resolution was defeated in the Senate on May 12 by a vote of 11 "yeas" to 22 "nays."

Milwaukee, Wis.—*Supreme Court Decides Against City in Light Plant Case.*—In a decision rendered April 26, the State Supreme Court sustains the lower courts in their ruling on the injunction secured by T. J. Neacy, preventing the city from constructing a municipal-light plant. The Milwaukee "Evening Wisconsin" has the following to say regarding the case:

In the Neacy case, a suit in equity was brought by a taxpayer to enjoin the entering into a contract to erect a municipal lighting plant. The complaint alleged that in 1904 the Common Council, relying upon a report of the City Engineer that a municipal lighting plant of a capacity of 2,500 arc lamps could be established on Jones's Island for \$25,000, passed a reso-

lution for the issuing of \$500,000 in bonds for the construction and maintenance of a municipal lighting plant, providing this should be approved by the voters. This being approved, the Council decided to buy a site elsewhere and issued \$150,000 in bonds with the proceeds of which the site was bought, leaving \$350,000 in the treasury.

On March 4 1907 the Council passed an additional \$150,000 in bonds for the erection of the plant. In October 1908 it adopted a resolution authorizing the Board of Public Works to contract for machinery and equipment and building.

A preliminary injunction was granted to the complainant, T. J. Neacy, by a Court Commissioner, which injunction was affirmed by the Circuit Court, and later the Court denied a motion to vacate the order, from which an appeal was taken. The Supreme Court to-day holds "that a declaration in favor of the issue and use of \$500,000 for construction and maintenance does not with sufficient clearness declare that that amount, or, indeed, a specific part of it, may be expended in construction alone."

The Court further says: "We conclude, therefore, that the records disclose an attempt by the City Council to issue bonds and take other steps in dependence thereon without the statutory prerequisite of a popular vote of approval, and that all such proceedings would, therefore, be illegal and result in the subjecting of the taxpayer to at least an ostensible burden."

The Court in effect holds that the question was put to the voters with not sufficient clearness in the matter of stating the objects of the proposed bond issue.

New York City.—*Debt Limit Bill Signed.*—The enabling Act passed by the Legislature on May 2 to allow the city to take steps for the exclusion, in figuring the borrowing capacity, of bonds issued for rapid transit and dock purposes was signed by Mayor Gaynor on May 9 and by Governor Hughes on May 11. See V. 90, p. 1252.

Ohio.—*Legislature Adjourns.*—The General Assembly of 1910 adjourned at 6:35 p. m. on May 10. The Langdon bill, creating the "Tax Commission of Ohio," was finally passed just prior to adjournment.

Pittsburgh, Pa.—*Bond Case Argued Before State Supreme Court.*—The suit brought by Adam Hoffman, a taxpayer, to restrain the issuance of \$6,775,000 bonds voted last November was argued before the State Supreme Court on May 5. Decision was reserved. As stated in V. 90, p. 864, the District Court on March 24 dismissed a petition of Sarah Chostkov of Steubenville, O., who sought to restrain the issuance of these bonds.

Texas.—*Supreme Court Awards Writ Directing Approval of Mart School Bonds.*—The Supreme Court on May 4 granted the application for a writ of mandamus to compel the Attorney-General to approve an issue of \$40,000 bonds of the Mart Independent School District. See V. 90, p. 1188.

\$500,000 New Fire Engine House Loan of the City of Baltimore, redeemable on the 1st day of June, 1957, and bearing interest at the rate of 4 per centum per annum, payable semi-annually on the first days of June and December in each and every year. The interest will commence June 1, 1910. The amount of \$500,000 of this Loan has already been issued.

\$500,000 New School House Loan of the City of Baltimore, redeemable on the first day of June, 1957, and bearing interest at the rate of 4 per centum per annum, payable semi-annually on the first days of June and December in each and every year. The interest will commence June 1, 1910. The amount of \$500,000 of this Loan has already been issued.

\$350,000 Conduit Loan of the City of Baltimore, redeemable on the 1st day of December, 1958, and bearing interest at the rate of 4 per centum per annum, payable semi-annually on the first days of June and December in each and every year. The interest will commence June 1, 1910. The amount of \$250,000 of this Loan has already been issued.

\$550,000 Burnt District Improvement Loan of the City of Baltimore, redeemable on the 1st day of April, 1960, and bearing interest at the rate of 4 per centum per annum, payable semi-annually on the first days of April and October in each and every year. The interest will commence April 1, 1910. None of this Loan has yet been issued.

Circulars have been prepared by the City Register showing the authority for the issue of these Loans, together with the purposes to which the proceeds of the sale will be applied, which circulars can be obtained from him upon application.

Bidders are advised that under the ordinances certificates of loans will be issued in such amounts as the lender may require in the sum of one hundred dollars and its equal multiples thereof, in registered form only.

Proposals must be made upon the prescribed form of blanks, which may be obtained upon application at the office of the City Register.

Bids will be received for any part of the whole amount offered, and bids will also be received for all or none. Parties may make bids both for a part and the whole of the amount of loans offered.

No bid will be considered unless accompanied by a certified check upon a clearing-house bank, drawn to the order of the Mayor and City Council of Baltimore, or a certificate of deposit of a clearing-house bank, or cash, for 2 per cent of the amount of the loans for which bid is made, but no deposit by any one party need be for more than 2 per cent of the entire amount offered for sale.

Checks, certificates of deposit or cash accompanying bids not accepted will be returned to the bidders within 48 hours after the opening of the bids. Deposits of successful bidders will be applied in partial payment of the cost of the amount of the loans awarded them. Should there be more than one proposal at the same price, a pro rata award may be made.

Settlement in full for the loans awarded must be made with the City Register on June 1, 1910, on which day the certificates will be ready for delivery.

If a bidder, having made the required deposit of a certified check, certificate of deposit or cash, fails to pay for the amount of stock awarded to him, on the 1st day of June, 1910, the deposit thus made shall be forfeited to and retained by the City as liquidated damages for such neglect or refusal, and shall thereafter be paid into the sinking fund of the City for the redemption of the funded debt.

The City does not tax ANY of its issues of stock, and takes the place of the holders of these issues in the payment of the annual State tax thereon, for which the holder is legally liable.

All bids must be made at a flat price for each \$100 of the first four-named Loans.

All bids must be made at a price and accrued interest for the last-named Loan.

Proposals must be sealed and addressed to the "President of the Board of Commissioners of Finance, City Hall," and marked "Proposals for Baltimore City Stock," and sent to the Mayor's Office.

The address of each bidder must accompany the bid, and notification of acceptance of any bid will be considered accomplished when mailed in the Baltimore Post Office to such address.

The Commissioners of Finance reserve to themselves the absolute right, in their discretion, to reject any or all applications, and also to allot smaller amounts than applied for.

JOHN M. LITTIG,
President of the Board of Comm'rs of Finance.
