REVIEW OF MARCH.

In face of threatening and disturbing features in the labor world and some other drawbacks, the tone in financial circles decidedly improved in March, and this was accompanied on the Stock Exchange by a wholly unexpected rise in prices of large proportions and a growing revival of activity. The speculation on the Stock Exchange was undoubtedly the result of a concerted movement on the part of important interests, but it had for its basis a number of cheering factors suggesting better times in the not remote future. In the iron and steel trade, continued activity was noted, and while prices remained low, they displayed a stiffening tendency, notwithstanding a sharp break in the price of iron ore, last season's quotations at Lake Erie ports being cut 75 cents a ton on Bessemer ores and 65 cents on non-Bessemer. In the copper trade the same encouraging circumstances were noted as for several months past, that is, deliveries ran in excess of production, with the result of a further advance in price. For the first time in several years the price of the metal touched 15 cents a pound, and it continued to advance, with sales of electrolytic at the close of the month to domestic buyers at 15½ cents and in Europe at 15½ cents, at which latter figure Lake copper was quoted here. This was a rise of more than a cent a pound during the month.

The prices of some other metals also advanced, lead, for instance, rising from 4.10c. per lb. to 4.30c., while quotations for pig iron moved up 25@50c. per ton. In the dry goods trade, with stocks of goods low, an active demand brought improving prices, and print cloths at Fall River were marked up by successive stages from 3½c. per yard to 3¾c., then to 3½c., then to 3½c., then to 3¾c. and finally to 3¾c. In nearly all branches of trade and industry the volume of business was large, notwithstanding the existence of hindrances that are usually found in a Presidential year. There was a concensus of reports that stocks of goods everywhere were low. Then, also, current returns of earnings evinced an improving tendency.

Perhaps, however, the circumstance that did most to bring about a better sentiment was certain developments in connection with the political situation. It became increasingly evident as the month progressed that Mr. Roosevelt's hopes of again becoming a Presidential candidate were to be disappointed. Considerable anxiety had been occasioned the previous month by his announcement that he would accept the nomination if it were tendered to him. So far from there being a spontaneous uprising of the people demanding his nomination, such as he had counted upon, he found it necessary to make a contest to get delegates to the

Republican National Convention, and his efforts nearly everywhere met with defeat, notwithstanding that he entered on an extensive speaking tour.

Even more significant of the trend against him was the deliberate action of representative political bodies in declaring against the latest addition to his radical policies, namely the recall of judicial decisions. On March 14 the Union League Club of the City of New York, by an absolutely unanimous vote, adopted a resolution declaring that the plan of reviewing at the polls the decisions of our highest courts upon Constitutional questions would have the effect of destroying all Constitutional guarantees and of overthrowing our system of Constitutional government. The club made an appeal "to all loyal and patriotic citizens, irrespective of party, to oppose to their utmost these dangerous and revolutionary proposals, which threaten to overthrow in a common ruin both justice and freedom." On the 22d similar action was taken by the Republican Club of this city, the 350 members present, without a dissenting vote, adopting resolutions not only denouncing the proposed judicial recall, but also declaring opposition to a third Presidential term.

These favorable developments relating to matters of such far-reaching importance attracted more attention than did the developments of an unfavorable nature. Yet there have been few occasions when adverse features were so numerous and of such commanding prominence. Chief among these was the strike among the coal miners in the United Kingdom. This continued throughout the whole month. It was estimated that, besides the one million miners directly involved, two million more persons were thrown out of employment because of the inability of the establishments with which they were connected to get the necessary supply of coal.

In this country also important labor controversies were pending. The anthracite coal operators on March 13 rejected the demands of the miners in toto. On March 29 the officials of the United Mine Workers ordered the miners to quit work with the expiration of the old wage contract on April 1 and accordingly about 170,000 hard-coal miners laid down their tools on that date.

There were fears, too, all through the month that a strike would occur at the bituminous mines over the greater part of the United States—that is, in Pennsylvania, Ohio, Indiana, Illinois, Iowa, Kentucky, Oklahoma, Kansas, Missouri and a portion of the Kanawha District of West Virginia. Here, however, an agreement was reached March 29, following conferences between operators and men lasting more than a week. In stead of an advance of 10 cents per ton, as demanded, the compromise provides that there shall be an advance of 5 cents a ton for mining lump coal, of 3 cents a ton for mining all other coal, and an increase of 5.26% for men paid by the day. There will, therefore, be only a short suspension of mining in the bituminous fields so as to allow time for the adoption of the compromise agreement by a referendum vote of the miners.

In New England the cotton and woolen mills found themselves pretty generally compelled to make important advances in wages. At Lawrence, Mass., the strike at the woolen mills of the American Woolen Co. (the largest woolen and worsted manufacturers in the world) was brought to a close by advances in wages running all the way from 5% to 16% and averaging about 7½%. At Fall River and at New Bedford the cotton-mill owners voluntarily offered an advance of 5% in wages, which, however, was refused by the operatives, who made demands ranging all the way

from 10% to 17½%. Later Mr. M. C. D. Borden, of the Fall River Iron Works Mills, increased his offer to 10%, which was then accepted. The other cotton mills at Fall River averted trouble by also granting 10% increase, and so did the New Bedford cotton manufacturers. At other points in New England advances ranging from 5 to 10% were conceded at various textile mills, but at one or two points strikes or lockouts occurred, owing to inability to agree upon terms.

The railroads also had an important case for higher pay to deal with. The Eastern trunk lines were called upon to pass on a demand of the locomotive engineers for an advance in pay and for a standardization of wages among the different roads, the latter of which, if granted, would add still further to the expense accounts of the roads. The lines involved number fifty and comprise all the railways lying between Chicago and the Eastern seaboard north of the line of the Norfolk & Western Ry. In denying the request the Conference Committee of the managers of the different roads pointed out that these roads carry about one-half of the passenger and freight traffic of the United States. It was computed that to accede to the demands of the engineers would increase the pay on the roads concerned in the sum of \$7,553,792 per annum, or 18.63%. It was also pointed out that it was less than two years since the last adjustment of engineers' wages was made in the Eastern District, which resulted in an annual increase of engineers' pay amounting to \$3,923,680, or 10.73%. The managers contend that the reduction of railroad net revenues through constantly increasing expenses of operation has so narrowed the margin which is essential to the solvent existence of many of the roads that further increases in operating cost are to be viewed with grave concern. To illustrate the truth of this statement, figures were furnished showing that, though gross earnings on the 52,000 miles of road involved had increased \$18,559,659 in 1911, net earnings were reduced in amount of no less than \$27,650,200. Furthermore, though the number of men employed was 8,197 less in 1911 than in 1910, the amount paid out in wages increased \$39,416,802. Accordingly, it was declared that "this headlong movement toward financial disaster cannot proceed unchecked." A referendum vote of the engineers is now being taken to decide whether the officials of the Brotherhood of Locomotive Engineers should be authorized to inaugurate a strike in order to enforce the demands of the men.

On the Stock Exchange, as already indicated, a noteworthy speculation for higher prices was inaugurated. A large and general rise was established. No doubt a considerable short interest existed in the leading share properties, which facilitated an upward movement. At all events, hardly any one was prepared for the initiation of a bull movement so early in the year of a Presidential election, especially as the political uncertainties seemed to be more numerous and more pronounced than in previous quadrennial periods. Powerful interests, however, thought the time opportune for an advance. As the upward movement proceeded, it seemed to gain impetus. Unfavorable developments, like the labor involvements here and abroad, were completely ignored, while, on the other hand, much was made of the favorable developments, such as the growing activity in trade circles and the castigation that was being administered to Mr. Roosevelt at the hands of the Republican voters. Sentiment, too, in financial circles gave evidence of a growing spirit of optimism. Altogether, striking advances in values were brought about. The industrial properties were special favorites and scored the largest advances, the copper stocks particularly being prominent in view of the advance of the metal, first to 15 cents and later to 15½ cents. Railroad shares, however, also participated in the upward movement, though in a more moderate way. Liquidation in the stock market seems to have been so thoroughly completed before the movement was

started that little difficulty was encountered in moving up any particular stock 5 or 10 points, or even more.

In foreign exchange, the feature was the export of two additional blocks of gold bars to Paris, aggregating \$4,000,000. These gold shipments were not justified by the rates of exchange, but were a special transaction conducted by Lazard Freres, who in February had shipped \$8,000,000 to Paris under similar circumstances. Considerable amounts of gold were also exported from week to week to South America. As the British coal miners' strike served to interrupt British trade, not only at home but with abroad, the exchange market remained more or less under the influence of that circumstance. Up to the 18th the tendency of sterling rates was upward, owing to European selling of American securities, to borrowing here of funds on foreign account and to firm discount rates at London and other foreign centres. The latter part of the month sterling declined on lower foreign discounts and on a release of funds, occasioned by a belief that a settlement of the British coal strike was near. The selling of bills against the exports of gold weakened exchange at times during the month.

31—						SUNDAY.

The money market was fractionally higher, both for money on call and for time engagements. Arrangements for the 1st of April settlements doubtless played some part in the firmness, and, besides this, the money holdings and surplus reserves of the Clearing-House banks were heavily reduced.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1912. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. All quotations in the column headed "*Price about January 2 1912*" were made on that date, except those in italics, which are the nearest in January 1912. The black-faced letters in the column headed "*Interest Period*" indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

 For foot-notes to tables see last page of bonds and last page of stocks.

BONDS—PRICES AND SALES FOR MARCH AND THE YEAR TO DATE.

GENERAL QUOTATIONS

OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue*. As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "f" is prefixed to the price, he must pay accrued interest *in addition* to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

3. The letter "f" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

4. Stock prices marked thus (d) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "a l" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the *month* when the bonds mature.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

STREET AND ELECTRIC RAILWAYS

In quoting street and electric railway bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter "J" where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, "J" appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f," and income and defaulted bonds.

d Price per share, not per cent. * Last sale. n Nominal. s Sale price. x Ex-dividend. y Ex-rights.

MISCELLANEOUS SECURITIES.

Quotations marked "I" indicate that accrued interest is included in the price. Prices not marked are "and interest" that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "I" and income and defaulted bonds.

STATE AND MUNICIPAL BONDS.

It is not the custom in quoting municipal bonds to include accrued interest in the price given. Hence this accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (J).

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

a List price. *b* Basis. *c* On basis of \$5 to the £. *d* On the basis of 4 marks to the dollar. *e* In London. *f* Nominal. *g* Sale price.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the closing day of the month preceding the date of issue, though often are nominal. An asterisk (*) denotes sales. The letter (h) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

Where Names are Printed in Italics Fuller Returns may be Found in the Advertising Columns
