

# THE FINANCIAL SITUATION.

Professor Irving Fisher of Yale is guilty of a unique suggestion for dealing with the great problem which is confronting mankind to-day-the high cost of living. All over the world statesmen, politicians, publicists, economists, theorists, as well as dreamers, have been racking their brains for a decade past for a remedy, but have been obliged to give up the job. They have had to admit one and all that it was beyond them. But Professor Fisher, after revolving the matter in his mind for many moons, has managed to solve the problem. There may be doubters so incredulous as to disbelieve this statement, but "he himself hath said it." He confided his discovery at last week's meeting of the International Chambers of Commerce at Boston. His paper in full was printed in the issue of the "Independent" of the same week. The editor of "Independent" is so tickled with the idea that he is moved to ask: "Why wasn't it thought of before?" He would not venture, he says, to anticipate the verdict of qualified experts, but has "no hesitation in saying that it (Professor Fisher's proposition) appears to be most scientific and feasible."

Prof. Fisher himself goes into raptures over this latest emanation of his brain. After dismissing gracefully a long list of what he terms "possible makeshifts or palliatives which deserve careful consideration," he takes the whole world into his confidence and announces that "among the more ambitious plans which aim to go to the root of the matter is one of my own." And, most wondrous of all, he says "this is similar to a suggestion of Governor Woodrow Wilson that the weight of the gold dollar should be increased enough to restore some of its lost purchasing power." Mr. Wilson in his speech of acceptance confessed ignorance on the subject of currency reform; in that frame of mind and being at the same time a disciple and a devotee of William J. Bryan, it might be easy for him to look favorably upon suggestions for tampering with the standard of values. But Prof. Fisher unbosoms himself further and says "my proposal is not literally but virtually to increase the weight of the gold dollar by increasing the weight of the bullion on which it is based." He would not change the weight of the gold dollar but would increase its purchasing power by abandon ing the practice of paying for gold bullion in gold dollars of equal weight.

When the miner or bullion holder presented his gold at the Mint he would be told that since the purchasing power of gold, as expressed in commodity prices, had declined, therefore, he could only get in return such a number of gold dollars as would preserve the old equilibrium between the value of gold and the value of commodities. The gold dollar would still contain 25.8 grains of gold, but the mineowner would have to yield up 30 or 40 or 50 grains of his own gold in order to get it. The Government would confiscate the difference by calling it seigniorage, thereby deriving an important source of revenue. At the Mint the authorities would always keep tables of commodity prices and series of index numbers so as to make sure that a perfect accord between the standard gold dollar and commodity values was maintained and that the Government got the last penny of seigniorage. It is conceivable that the mine-owner might enter into a league with the Money Power and refuse to tender his gold bullion to the

given weight of gold was worth as much to him as it was to the Government, but obviously such sordid considerations deserve no place in such a beautiful scheme as that which Professor Fisher has devised. That the reader may appreciate to the full the merits of the proposal and get a perfect understanding of it, we make the following excerpts from the paper, as printed in the "Independent".

My proposal is virtually to increase the weight of the gold dollar. But this increase in weight would not be added to the coins themselves but only to the bullion out of which they are made. In other words, the proposal is to restore the ancient custom of a "seigniorage" on gold coinage. At present there is no seigniorage. Coinage is free and the weight of a gold dollar is as great as the weight of the bullion which the miner takes to the Mint and for which he receives back a dollar. He now takes 25.8 grains of gold bullion to the Mint to secure a 25.8-grain gold dollar. The coined dollar weighs the same as the uncoined or "bullion dollar," if I may employ such a term. My proposal is to increase the weight of the bullion dollarthat is, to require 26 or 27 or 28 grains of gold bullion to be taken to the Mint to secure a 25.8-grain gold The coined dollar would remain unchanged dollar. in weight (25.8 grains), but the bullion required to secure the coined dollar-the bullion dollar-would be heavier. The difference in weight between the two would be what is called seigniorage. It would not be fixed once for all, but would be continually adjusted so as to give the dollar always a fixed purchasing power. As the coined dollar would be interconverti-ble with the bullion dollar, the two would always be equal in value. The ultimate dollar would be as it now is-a dollar of gold bullion-but this dollar would no longer be of fixed weight and variable value, but of fixed value and variable weight.

The adjustment of the seigniorage would be entirely automatic, dependent on an official index number of the price level. Index numbers are now familiar and well-tried devices for measuring changes in the general level of prices. The new official index number could be modeled on the well-known index numbers already in use, such as those of the United States Bureau of Labor, Bradstreet, Gibson, the Canadian Labor Office, the British Board of Trade, the London "Economist," or of Sauerbeck, the London wool merchant. The system here proposed is, so far as I know, the only one proposed which is purely self-acting. If the official index number shows a rise of prices in any year, say 1%, it would be mandatory for the mints to add 1% to the seigniorage. Expressed the other way about, if gold loses 1% of its value, the mints would pay 1% less for it. This would tend always to preserve a uniform purchasing power of the monetary unit. As soon as any depre-ciation occurred, the increase of the seigniorage would operate to correct it. The present Mint price is fixed: it is £3 17s, 101/2d. per ounce of gold 11-12 fine in England, or \$18 60 per ounce of gold 9-10 fine in the United States. The proposal is simply that instead of always paying the same money price for gold, no matter how much it appreciates or depreciates in purchasing power over goods, we would pay exactly what it is worth. There is no virtue in a fixed Mint price for gold, but there is virtue in a fixed purchasing power of money. The proposed plan has been enthusiastically endorsed by those who have examined it in detail.

of commodity prices and series of index numbers so as to make sure that a perfect accord between the standard gold dollar and commodity values was maintained and that the Government got the last penny of seigniorage. It is conceivable that the mine-owner might enter into a league with the Money Power and refuse to tender his gold bullion to the Mint. He might hold to the obsolete theory that a tive wants, the price, whether in gold dollars or silver dollars, will tend downward; whereas if consumptive wants expand faster than the growth in production, the price of the cereal will soar upward. But such thoughts are evidently the relics of a by-gone age. Professor Fisher takes us into loftier realms. If we will only look intently we shall see that the high cost of living and the prodigious advance in the necessaries of life are due to one thing, and only one thing, namely the disturbance in the ratio between gold and commodity values. Professor Fisher's scheme will cure the dislocation.

We will be frank and admit that before the advent of the Fisher plan we ourselves quoted some Census statistics with the view of demonstrating that food prices had moved upward in response to the obsolete law of supply and demand. We showed that during the last Census decade population had increased, roughly, 16,000,000, while the yield of our farms in the case of all the leading crops except cotton had remained practically stationary, so that with sixteen million more mouths to feed, there was only the same quantity to go around as before. Not having been led into Mr. Fisher's secret, we encouraged imaginings that the great advance in food prices had been occasioned by the fact that the farmers had failed to extend production. And as indicating the extent of the rise in prices and the magnitude of the burden thereby imposed on the consuming masses, we quoted further statistics to show that by reason of the increase in price alone the farmer had realized in the latest Census year, roughly, two thousand million dollars morein exact figures, \$1,972,132,000 more-than ten years before. Educated in the old school of thought, we drew from these figures the inference that the rise in price was due to the circumstance that production had not increased, while consumption had. From Professor Fisher's argument it is plain that what really happened was that gold depreciated in value-not that commodities appreciated-the depreciation being due, according to those who believe in the quantitative theory of money, to the fact that the production of gold in recent times has enormously increased.

That being the true cause of the rise in food prices, the remedy is obvious: restore the old ratio between gold and commodities by paying less for uncoined gold and purloining the difference as seigniorage. Nothing could be simpler. If foodstuffs were in insufficient supply before, now there will be enough. If prices soar too high, squeeze the owner of gold and bring him to a proper state of benevolence. If there is a paucity of any commodity, just restore the old ratio of gold. If farming methods are inefficient, don't attempt a corrective on the farm but at the Mint. All over the country tremendous efforts are being made by bankers, railroad men and others to induce farmers to adopt more efficient methods, so as to increase the fertility of the soil. These well-meaning persons entertain the delusion that in this way a lower level of values for farm products can be brought about. But the new concept teaches differently. It furnishes warrant for saying: Why go to all this trouble when a much simpler remedy is at hand in the new plan for restoring the purchasing power of gold?

The three Presidential candidates for this year may differ as to everything else, but they are agreed that the cost of living should come down and the prices of the necessaries of life be reduced. Why not then embrace Professor Fisher's proposition? An arbitration com-

mission is now sitting to determine whether the locomotive engineers on the railroad lines east of Chicago and north of the Ohio River shall have an increase in wages, and, if so, how much. Why should not the beauties of the Fisher scheme be unfolded to the eminent members of this commission? The engineers argue that they should receive more dollars since the purchasing price of the dollar as expressed in commodities has so materially decreased. Duly impressed with the new doctrine, this arbitration board could advise the engineers that an easier and simpler remedy is at hand which will obviate the need for any increase in wages and will permit a reduction-give the mine owner less for his gold and let the Government add to its revenues by appropriating the seigniorage. By observing a proper demeanor, the engineers can readily be made to see that they are not being handed a gold brick.

Since such huge benefits are to result from it, Professor Fisher ought to do everything possible to spread his propaganda, putting to shame the old school of thought which remains in benighted ignorance when there is such a flood of light to be had from the new heaven. Apparent flaws in the scheme should worry no one, They will disappear with the spread of knowledge concerning it. No doubt those wedded to the idea that the increase in the production of gold is responsible for the advance in commodity prices, rather than more palpable causes, will ask Prof. Fisher, as the most brilliant exponent of that doctrine, how the situation in that respect will be relieved in the slightest degree by the plan proposed. The mine-owner will get less for his gold, since he will be paid on a basis of commodity values (with scales of index numbers and schedules of mercantile prices constantly on hand), but the quantity of gold taken over from him will be the same as before, and this gold will be coined into the same number of dollars. Therefore, as far as the volume of the circulating media has any influence upon the course of prices in general, the disturbing influence of the large production of gold will apparently not be removed. We confess ourselves puzzled as to this aspect of the matter. We should also be disposed to ask whether the plan will really accomplish anything more than the mere maintenance of a parity between gold and commodities as far as new takings of gold are concerned. What reason is there for thinking that the purchasing power of the gold dollar, as a dollar, would be affected at all, especially as the dollar would be of precisely the same weight as before? But we forbear carrying our misgivings any further. Every one can readily perceive that the plan is a most beautiful one and cannot fail to meet expectations-if one is simple enough to believe in it.

The cotton-ginning and cotton-condition reports issued by the Government on Wednesday, more particularly the latter, were favorably construed by cotton interests quite generally, and as a result there was an immediate decline in the value of the staple in the leading markets of the world. On the New York Cotton Exchange prices for the various options eased off on Wednesday 29 to 32 points from the previous day's close, and the spot quotation for middling uplands was dropped 20 points. Since then there has been some recovery in the options, but at the close of the market last night middling uplands cotton was quoted here at 11.25 cents, as low a level as has been reached since April 4 last, and a falling off of 2.15 cents since July 29.

The ginning statement, as we have remarked on former occasions, can in no sense be taken as an indicator of the size of the yield, and especially so the current season, when it is well known and freely admitted that, outside of Texas, the crop is late in maturing. It seems, however, that there had been ginned to Sept. 25 this year over three million bales (3,015,033 bales), a total exceeded only by the quantity put in shape for marketing during the corresponding period last year, when the aggregate reported was 3,676,594 bales. Compared with the years 1905 to 1910, inclusive, the current total is in excess by from 1/2 million to 11/2 million bales. The salient fact this report makes clear is the lateness of the crop over most of the belt, as in all States except Texas this year's ginning to Sept. 25 was much below that of last year, in most cases even less than that of 1910, and in such an important State as Georgia the smallest in any year since 1903. On the other hand, the total reported for Texas is no less than 2,001,697 bales, or 333,822 bales greater than a year ago. Owing to the backwardness of the crop east of the Mississippi the date of occurrence of killing frost becomes a more important factor than usual in determining the ultimate yield.

The cotton-condition report, the announcement of which followed close upon the publication of the ginning figures, was, of course, a market influence, and, as it was rather better than anticipated, its tendency was, as noted above, to weaken values. As is commonly the case in September, deterioration was shown during the month, but while this was greater than in 1911, it was less than usual, the general condition on Sept. 25 this year being given by the Department of Agriculture as 69.6% of normal, against 74.8% a month earlier, or a decline of 5.2 points, whereas for the years 1902 to 1911, inclusive, the falling off averaged 6.1 points. Moreover, the average is only 1.5 points below last year at the same date, and is moderately better than in 1910 and appreciably higher than in 1909, when, at 58.5, the status of the crop was the lowest for the date named since monthly reports were first issued. Furthermore, current condition is reported practically the same as on Sept. 25 1908the season when the yield turned out to be 13,828,846 bales from an area about 12% less than is now under cotton. Under all the circumstances, it is not surprising that this final official condition report for 1912 should (barring early frosts) be construed as indicating a yield second only to that of last year, and therefore a crop fully sufficient to meet the world's consumptive requirements for the season.

The bank clearings returns for the month of September 1912 from all sections of the United States furnish indisputable evidence of continued activity in the business affairs of the country, a fact that the current reports of railroad earnings serve further to confirm. Even in the South, notwithstanding the less free movement of cotton thus far the present season, due to the lateness of the crop, most of the cities share in the gains reported. Furthermore, at New York, where speculative transactions are a very important element in increasing or decreasing the volume of clearings, a fair increase over 1911 is recorded in the face of much smaller dealings in stocks and bonds.

From our detailed compilation of clearings on the first page of this issue, it appears that only 41 of the 150 cities fail to show improvement as compared with September 1911. and that where losses are recorded they are in almost all cases quite nominal. The increase in the country as a whole for the month, as contrasted with 1911, reaches 4.4%, and the gain for the period since Jan. 1—nine months—is 7.1%. Outside of New York an augmentation of 5.7% is shown for the month and for the longer period it is 8.3%. At New York the reduced activity in Stock Exchange circles served, as explained above, to hold down the volume of clearings, but nevertheless a moderate gain—3.4%—is recorded for the month, and the nine months' aggregate exceeds that of 1911 by 6.3%.

Transactions on the New York Stock Exchange, while somewhat heavier than in August, were appreciably below the total for September of last year, or, in fact, of any year since 1900 only excepting 1910. The comparison with 1902 and 1906 is especially poor, operations in stocks in September of each of those years having been more than double those of the current period. But although dealings in September this year were comparatively light, it is to be noted as a favorable development that the general tendency of values was upward, a number of leading issues making quite satisfactory advances. The month's sales of stocks were 10,107,204 shares, as against 17,395,957 shares last year, 7,673,529 in 1910 and 19,981,675 shares in 1909. The nine months' aggregate slightly exceeds that of a year ago, the comparison being between 95,604,426 shares and 92,294,988 shares, but makes a sorry contrast with the results for the corresponding period of most earlier years since 1900, and particularly with the 2221/2 million shares of 1906 and 216 millions of 1901. Bond dealings were smaller than in September of any year since 1907, and the sales for the period since Jan. 1 this year total only  $546\frac{1}{2}$ million dollars, par value, against 639 millions last year, 484 millions on 1910 and 1,026 millions in 1909. At Boston the volume of share sales in September 1912 was noticeably greater than in the month of last year, and the aggregate for the nine months exceeds last year largely and is only moderately less than for 1910.

Canadian clearing-house returns for September this year make the same satisfactory exhibit as those for earlier periods of 1912. For the 18 cities included in our compilation, from which comparative figures are obtainable, the aggregate for the month exhibits an increase over 1911 of 24.3%, Calgary, Victoria, Edmonton, Regina and Saskatoon being expecially conspicuous for ratio of gain. The total for the nine months' period is 25.1% heavier than for 1911. Contrasted with 1910 the gains are 38.5% and 48.1%, respectively.

If we are to believe accounts cabled from St. Petersburg, hostilities between the Balkan States and Turkey have really commenced. A dispatch received by the Russian Government states that the Bulgarians are crossing the frontier. This news may turn out to be exaggerated or premature, for if the reports are true, no ultimatum has yet been presented to Turkey by the Balkan States, and in Constantinople there is no expectation that one will be received until Monday. The Porte has sent the following official notification to the Powers: "In view of the mainfestly aggressive attitude of the Balkan States, Turkey reserves to herself full liberty of action, convinced that the civilized world will not fail to do justice to its moderate attitude. But this cannot exclude care for safeguarding its dignity and security as well as its rights."

It is evident that the Balkan States are being encouraged in their present action by the fact that they have at the present time, formally at least, an ally in Italy, and the further fact that peace negotiations between Turkey and Italy are so near a successful conclusion seems to be furnishing the chief incentive for forcing the contest at an otherwise unpropitious time. Winter is now clearly in view, and military operations in the Balkans under such circumstances will mean extreme hardships for both sides. Probably the best summary of the objects of the potential war that has yet appeared from the anti-Turkish standpoint is contained in a statement furnished for publication on Thursday by the Prime Minister of Bulgaria, Mr. Guechoff, and reported in a special cable to the New York "Herald" from Sofia. The statement follows:

As you now see, there is a great menace to peace in the Balkan peninsula. The terrible danger which hovers over the lives and property of thousands of innocent persons is the result of the deplorable policy of the great Powers since 1878.

In that year, after the Russo-Turkish War, Turkey was at the mercy of Europe, which had a splendid opportunity of settling the Balkan question. Europe refused to do its duty. The Christians in Turkey were left to suffer atrocities. When the Christians were unable to bear their sufferings any longer, the small Balkan States were obliged to espouse their cause.

The allies are accused of wishing to break the peace, but their intervention is solely on behalf of the Christians in Macedonia. No one need wonder. The example set by Italy had a contagious influence on the Christian inhabitants of the Balkan peninsula, and we thought the time had come to ask Turkey to change her policy toward the provinces in Turkey where Christians have been persecuted.

We have left no means unemployed to persuade Europe that radical reforms should be introduced in Macedonia as a sequel to the Istib and Kotchana massacres.

After Turkey's final provocation—mobilizing just when we were dismissing our reservlsts—we were obliged to mobilize in our turn. Simultaneously Servia, Greece and Montenegro mobilized their armies. This historic event, marking an understanding between the four Balkan States, should prove to Europe that it is not territorial ambition that has led us to take a warlike step. We could not have come to an understanding if territorial ambitions inspired us, but it is our deep conviction that an end must be put to the sufferings of the Christians in Macedonia.

That is what has united us. We hope public opinion will assist us to attain our aim, which is the lasting pacification of the European provinces of Turkey.

The importance of the actual advance of Bulgarian troops may, we think, be very readily exaggerated. The European Powers are working actively in diplomatic channels to prevent an outbreak; and their influence in this direction will undoubtedly receive careful consideration. In fact an agreement has already been reached, according to press cable accounts, that if Turkey does not reply to the Balkan States' note, it will be repeated, and the coalition of States will then simultaneously address a collective note to the Powers telling them that the Balkan States are prepared for This suggests that they will look to the Powers war. to find some means of compromising the situation. The draft of the collective note to be presented to Turkey by Bulgaria, Servia, Greece and Montenegro was received at all the Balkan legations in London on Thursday, and the foreign offices of the various Powers are to be made acquainted with its contents before its presentation to the Ottoman Government. The note demands autonomy for Macedonia, Albania and Old Servia which shall be at least equal to that enjoyed by Crete under the protection of the Powers. The refusal of French and other European financiers to advance loans to the Balkan States is interpreted as a factor in 'avor of peace.

Meanwhile it is significant that the war spirit is as element. It was, he says, "a support of words and mpant in Turkey as it is in the opposing States. not of cash." The absence of success is ascribed by

Advices from Constantinople state that the war fever of the populace is rising rapidly. Many thousands of students and others, for instance, formed processions and marched through the streets on Thursday night and held demonstrations in favor of war before the Palace, where the Sultan saluted them. Then they proceeded to the various embassies and the Porte. Everywhere perfect order was maintained, except that while passing the Bulgarian Legation, hostile cries were raised and stones were thrown. Later a strong body of police was sent to guard the legation. Patriotic meetings were held and fiery speeches were made, clamoring for war. The outcry is based on the belief that the Balkan States are combining to drive the Turks out of Europe. It does not appear unreasonable to suppose that advantage will be taken by the Turkish Government of the present excitement to cover up its loss in Tripoli. Latest dispatches intimate that terms of peace, very largely on the lines that have frequently been outlined of late, have been arranged between Italy and Turkey, and now only require formal ratification. In fact, it was unofficially announced in Paris last evening that the peace treaty had been officially signed by the Turkish and Italian representatives at Lausanne, Switzerland, on Thursday.

The sudden development of the acute stage of the Balkan troubles had a very depressing influence on the European Bourses, especially in Germany and Austria. We have referred at some length in another column to its influence on the gold situation and the resultant effect on the money market in America. In Berlin the selling of securities was panicky in character on Tuesday and Wednesday and the excitement is described by cable advices as being even greater than during the Moroccan crisis of last year. Towards the close of the week, notwithstanding the military advance by Bulgaria, all foreign markets seemed to be settling down into a quieter state. British consols as a matter of fact closed at 74, which is identical with the closing figures of Friday of last week, and French rentes were quoted yesterday by cable at 90.35 francs, comparing with 91 on Friday of last week. On the American markets, as we show elsewhere, the chief influence, aside from checking the importations of gold, has been the active selling by and through London of American securities for the purpose of reenforcing the cash reserves of European bankers.

The intimations cabled on Friday of last week that the independent Chinese loan of £5,000,000 had not been accorded a favorable reception in London prove to have been accurate. On Monday announcement was made that only £1,987,000 of the £5,000,000 offered was subscribed by the public, the underwriters being compelled to take practically 60% of the total amount. It is hardly likely, therefore, that other loans will be offered in the near future under similar conditions. The loan, in the first place, encountered active. though unofficial, discouragement by the British Government. It was subject also to the opposition, or at any rate the lack of support, by probably the strongest group of bankers in the world; and beyond this it had to contend with the conservative instincts of investors who proverbially dislike unconventional methods of doing an investment business. One London correspondent rather neatly expresses the London view that the loud support that was accorded to Crisp & Co. lacked one important and necessary element. It was, he says, "a support of words and

Charles Birch Crisp, the head of the syndicate, to the fact that many of the underwriters are actually large investors, to whom the issuers of a big loan generally look for large subscriptions. The loan, since the announcement of the backwardness of the subscriptions, has been quoted at a fractional discount. A Brussels dispatch states that a contract was signed on Saturday for a \$50,000,000 loan to China by a Belgian syndicate. The proceeds are to be expended on the extension of the Kaifeng-Honanfu Railroad into Kansu. Reports have been current that the underwriters of the London loan are behind a separate independent loan of \$10,000,000 that is under consideration by financiers in Hamburg. A Berlin cable announces that the German Government is inclined to disapprove strongly the issue of such a loan in Germany. The Chinese Legation at Berlin disclaims any knowledge of the transaction, and associates of Mr. Crisp state that there is no connection whatever between the London loan and that reported to be under consideration in Hamburg. A joint demand upon China for immedi-ate payment of arrears on the Boxer indemnity, amounting to about \$50,000,000, has been proposed by Russia to the other five interested Powers. We learn that no decision has been reached. The Six-Power Syndicate, however, is awaiting developments, and will be prepared to negotiate a loan with China whenever the authorities in that country desire to renew negotiations on the old terms, which will include foreign supervision of the proceeds of the loan.

President Taft has allowed it to become known that there is no truth in the report that he proposes in the near future to call a special session of Congress as a preliminary to United States intervention in Mexico. The President holds, as he has for several weeks, that intervention is a possibility but a decided improbability. Senator Fall, a member of the Senate sub-committee appointed to investigate the Mexican situation, has denied, according to a dispatch from El Paso, that either he or the committee had made a report to President Taft recommending intervention. Senator Fall admitted that conditions in Mexico were serious, but he added: "We have known this for some time." It is intimated that before the sub-committee finishes its investigation, it will hold a hearing in New York with a view of discovering what financial aid has been furnished the Mexican revolutionists. Late telegrams from Mexico City state that a well-defined revolutionary movement has started in the Tuxpan district, the centre of the Pearson oil interests.

-The October payments were successfully arranged without exceptional friction, both at home and abroad. The new month has witnessed a somewhat easier tendency in the money trend at home, notwithstanding that the sudden development of the Balkan crisis became a highly disturbing factor in the old world money centres. In this respect New York has also to a minor extent participated, for history once again has repeated itself, and European markets, in order to promptly re-enforce their cash reserves, have on quite an extensive scale sold American securities back to us. It is estimated that during the first three days of the week the sales of American securities through London, representing British as well as Continental liquidation, amounted to fully 200,000 shares. Later there was some disposition, following a more settled situation of the foreign markets, to re-purchase some

did not assume important proportions, amounting to, possibly, 30,000 shares, according to estimates of usually well-informed foreign houses. Active selling of American securities has become the usual feature in times of political stress in Europe. It was, it will be recalled, a particularly noticeable feature of the Franco-German crisis in the summer of 1911, when a selling movement began that forced quotations of usually active stocks down some 10 points before the end of September. There has not been an active re-purchasing of our securities since last year's liquidation. Therefore the argument is heard quite freely in international banking circles that there cannot be the same degree of liquidation as occurred last year. The so-called floating supplies of American securities in Europe were, it is believed, quite fully disposed of at that time.

It is with our money situation rather than the technical stock market position that the Balkan uprising seems more especially to deal. With the sudden development of an acute stage in the controversy between the Balkan States and Turkey and the possibilities of the dispute involving the greater Powers, there has developed in Europe a sudden demand for gold. A rather significant indication of the urgency of this demand is the news that comes by cable that the Bank of France and other of the large French banking institutions have temporarily suspended pavments in gold as a precautionary measure, in view of the diminution the last week of the gold holdings (22,850,000 francs) of the French Bank. The sudden increase in the foreign demand for gold has been somewhat disconcerting in local money circles, which have been feeling assured that with the preparations for the October payment successfully completed, the engagements of gold abroad would furnish a sufficiently strong improvement in the bank reserves to enable the present season of strain to be overcome without causing distress among all merchants and manufacturers requiring banking accommodation for legitimate purposes. On Monday, according to cable accounts, £1,100,000 of the £1,500,000 of new Cape gold was set aside for America at 77s. 91/4d. per ounce, which is 1/4d. above the Mint price. The remainder of the offering was secured by India. Of the total purchased for America, £450,000 was engaged by Lazard Freres, £200,000 by Heidelbach, Ickelheimer & Co., who later in the week increased their engagement by £50,000, £200,000 by Goldman, Sachs & Co. and £150,000 by Kuhn, Loeb & Co., making a total on the basis of actual engagements of £1,050,000. or \$5,250,000. This brings the total amount of gold engaged during the current movement up to \$8,700, 000. London cable advices have since announced tha a part of these engagements has been canceled, some \$2,000,000 of the gold purchased in the open market for American account having gone into the Bank of England. The Bank in its weekly statement showed a loss for the week in its gold coin and bullion holdings of £2,755,524. But the receipts of gold at the Monday auction are not likely to have counted fully in the Bank's weekly statement. Nevertheless, the reduction of gold in Threadneedle Street is significant of the active demand that is current in all directions for the precious metal. London correspondents cable that the Governors of the Bank were inclined to raise the minimum discount rate on Thursday, but finally concluded not to do so. There has for several weeks been an impression in circles, that are usually well of these securities; but the movement in this direction I informed as to the position of the Bank's Governors,

that if America were to insist upon taking gold from that institution, an advance in the Bank rate would immediately be put into operation.

It is quite evident, therefore, that if the Balkan disturbance is not promptly settled, the relief to New York banking circles that has been counted upon to accrue from a large importation of gold will not be realized, although there can be no question that with the active movement of our great grain and cotton crops and the continued activity in our exports of merchandise, New York bankers will be in a position to demand gold in payment. Our balances abroad that assumed such large proportions in London, and especially in Berlin, less than a year ago, have now been quite effectively drawn down, though there is no reason to believe that a balance adverse to American bankers has been created. Gold flows where it is most needed, as indicated by the ruling rental rates, and it seems likely that our own centre will have to compete with interests that urgently need the metal. It is not impossible, therefore, that Secretary Mac-Veagh may feel impelled to withdraw from the decision he reached early in the week as regards the necessity of depositing additional public moneys in the banks of the country in order to relieve the strain during the period of crop moving. The Secretary's decision after Assistant Secretary Bailey had made a personal canvass of the situation and had reported to Mr. Mac-Veagh at Dublin, N. H., was that there was nothing in the situation to warrant the Treasury Department taking arbitrary action. It now remains to be seen whether the active demand for gold abroad will sufficiently alter the situation to induce a new ruling on the question. The view most generally held by New York banks is that, even under the new conditions, there is no warrant for Government intercession. New York funds in Chicago and St. Louis now command a slight premium, which compares with a discount of 10c. per \$1,000 at each of these centres a week ago. This change indicates somewhat of a lull in the Western crop demand and a somewhat similar situation is indicated in the Canadian demand on New York, as New York funds in Montreal were yesterday quoted at par, which compares with 467/sc. per \$1,000 discount a week ago. The demand from the South, however, is showing greater strength, as was indicated by shipments aggregating \$1,550,000 through the Sub-Treasury to New Orleans this week.

In Lombard Street discounts as reported by cable yesterday were 35%% for sixty day bankers' acceptances and 31/8 @3 15-16% for ninety-day bills. A week ago the quotations were, respectively, 31/2% and 334%. Sixty day bills to arrive are quoted at 334% and ninety day bills to arrive at 4@41/8%. In Paris the open market rate remains unchanged at 3%, which is also the official discount rate of the Bank of France. The Berlin open market rate declined sharply after the October payments had been successfully concluded and the closing rate for all maturities as quoted by cable yesterday was 33/4 %-a reduction of 5%% from the quotation of a week ago. The open market rate in Vienna is 47/8%. At Amsterdam the market rate is 4%, which is the same as the official Bank rate and in instances it would be necessary to accept a fractional advance above 4%. Brussels closes 1/2% lower at 31/2%. The official Bank rates at the leading foreign centres are: London, 4%; Paris 3%; Berlin 41/2%; Vienna 5%; Brussels 4%; m sterdam 4%; Bombay 4%, and Bengal 3%.

As was to have been expected in its first return after entering upon the new quarter, the weekly statement of the Bank of England showed a decrease in its gold coin and bullion item. In this it did not differ from the official French and German banks. The English Bank's reduction amounted to £2,755,524, bringing the total holdings slightly below those of a year ago, namely to £38,937,720, comparing with £39,064,231 in 1911 and £34,413,052 in 1910. A reduction of £3,513,000 was indicated in the total reserve, which brought down the proportion to liabilities to 48.74%, from 51.39% last week, and which compares with 51.45% in 1911. The Bank reports a decrease of £368,000 in loans (other securities) and the loan account still stands well in advance of recent years, amounting to £34,202,000, compared with £28,357,-286 in 1911, and is, in fact, the highest amount outstanding since the corresponding week in 1906, when the total was £34,974,642. The London market received the benefit of a decrease of £2,923,000 in public deposits. Notes reserved declined £3,581,000, but notes in circulation increased £757,000. Ordinary deposits were reduced £965,000. The Bank did not secure any of the Cape gold offered at the usual Monday auction in London, but later in the week, by some arrangement that has not yet been definitely reported by cable, a part of the gold set aside for exportation to New York was released on Thursday and went into the Bank. Our special correspondent furnishes the following details of the gold movement into and out of the Bank for the Bank week: Imports, £26,000 (of which £20,000 from Ecuador and £6,000 from Australia); exports, £1,800,000 (of which £1,700,000 to Egypt, and £100,000 to France) and shipments of £982,000 net to the interior of Great Britain.

The loss of gold coin and bullion reported by the Bank of France as a result of the combined strain of the October payments and the Balkan crisis amounted to 22,850,000 francs. In consequence of this loss the Bank decided to temporarily suspend gold payments and in this was promptly followed by other large French financial institutions. It is difficult, therefore, to exchange notes for gold in Paris to-day, and gold is quoted, according to cable reports, at 25 to 50 centimes premium on a 200-franc bill. The Bank, however, is still quite strong in its gold and, in fact, in its general position comparing with a year ago. The total holdings of the precious metal amount to 3,252,275,000 francs, which compares with 3,108,-750,000 francs and 3,349,675,000 francs in 1910. The silver holdings during the week showed a further reduction of 975,000 francs, bringing the total down to 759,325,000 francs, comparing with 802,450,000 francs in 1911 and 841,025,000 francs in 1910. Notes in circulation increased 275,825,000 francs, but this item is still below the total of a year ago, amounting to 5,461,318,000 francs, against 5,530,786,335 francs. The bills discounted increased 302,150,000 francs during the week and are well in excess of a year ago, amounting to 1,552,391,000 francs, comparing with 1,461,255,905 francs. Advances showed an increase of 20,500,000 francs and treasury deposits also an increase of 114,675,000 francs.

The Imperial Bank of Germany in its weekly return published on Wednesday recorded some sensational changes as a result of the quarterly settlements. The gold on hand indicated a decline of 100,379,000 marks, and gold and silver combined a reduction of 158,139,000 marks. At the same time discounts showed an expansion of 491,016,000 marks, loans a gain of 32,669,000

marks and circulation an increase of 574,268,000 marks. There was also a withdrawal of 130,021,000 marks in deposits and an increase of 80,006,000 marks in treasury bills. However, in comparison with recent years the Bank is in a much stronger position and shows that the new policy insisted upon by the Kaiser a year ago that for political reasons German banks must strengthen their position, is being persistently carried out. The total cash holdings of the Reichsbank at the present time, gold and silver, are 1,114,-257,000 marks, which compares with 995,260,000 marks one year ago and 907,940,000 marks in 1910. Meanwhile loans and discounts in the aggregate are about 30,000,000 marks below last year's figures, amounting to 1,845,158,000 marks, against 1,875,-760,000 marks in 1911 and 1,744,360,000 marks in 1910. There is also a reduction-22,000,000 marksin the outstanding circulation from last year, the total being 2,273,413,000 marks, which compares with 2,295,200,000 marks in 1911 and 2,056,080,000 marks in 1910.

The local money market has ruled rather nervous and has shown rapid changes in sentiment. On Monday, the last day of September, call money touched 71/2%, which reflected, of course, the final preparations for the October payments. On Tuesday, Oct. 1, a 7% rate was current for a short time and renewals of Stock Exchange loans were generally on a 61/2% basis. But on Wednesday easier conditions prevailed, and there would undoubtedly have been'a still easier monetary position, had the Balkan situation not suddenly become so acute and caused an unusually active demand for gold abroad, sufficient to interfere with our gold engagements in London that had been counted upon to re-enforce American bank reserves during the ensuing month or more. As it is, a cancellation is reported of \$2,000,000 of the \$5,-250,000 that was engaged for New York account in London earlier in the week, the New York bankers having found it more profitable, in view of the sharp advance in sterling exchange, to re-sell the bars in London. The banks and trust companies were forced to actively call in loans last week, and the statement of the New York Clearing House on Saturday-the actual, not the average figures-indicated a reduction of \$20,166,000. The reduction in deposits was \$15,946,000, which in turn curtailed the reserve requirements. Therefore, although the Clearing-House institutions suffered a loss of \$1,461,000 in their net cash, their surplus above requirements increased \$2,127,500, makint the total surplus reserve \$9,499,-100, which compares with \$21,624,850 in 1911. Domestic exchange rates suggest at least a temporary easing up of the Western demand, as both Chicago and St. Louis yesterday quoted New York funds at a premium of 10c. and 20c. per \$1,000, respectively, which compares with 10c. discount in each case a week ago. A still further indication in the same direction was an order from a Minnesota bank to a New York bank to loan out on call in the New York market \$400,000 of the former's funds. Still another instance was the cancellation by a Texas bank of an order for a substantial amount of currency that its New York correspondent ordinarily ships at this season in connection with the movement of Texas cotton. This cancellation was explained on the ground that dear money had been so plainly in sight thatforewarned, forearmed-the bank in Texas had made preparations well in advance. A definite statemen

from Washington on Tuesday announced that the Treasury Department would make no deposits this fall with the national banks to facilitate the movement of the crops. Assistant Secretary Bailey, on his return from Dublin, N. H., where he had conferred with Secretary MacVeagh, made the announcement. It is, of course, possible in view of the complications that have subsequently arisen in the European monetary situation and the interference that this in turn means with our importations of gold, which constituted the chief source from which relief was to be expected, that Secretary MacVeagh may feel inclined to reverse his decision. He stands willing to deposit additional public moneys whenever such action seems warranted. and his decision not to do so at the present time was based entirely upon the supposition that action would not be warranted. Time money has declined about 1/2%. A reduction of about 1/4% was made on Tuesday, which was subsequently withdrawn; but on Friday a 51/2% rate became available on maturities up to four months. Bankers in New York feel that while profitable money rates will undoubtedly continue for several months, there will be nothing in the general money situation in the American markets to cause distress.

Call money this week has ranged between 3 and  $7\frac{1}{2}\%$ , although the lower figure has been very largely a nominal one, the ruling rate for renewals not having gone below 434%. On Monday the extreme figures were 6 and 71/2%, with the lower one the renewal basis; Tuesday's highest was 7%, with 41/2% the lowest and  $6\frac{1}{2}$ % the ruling quotation; Wednesday's maximum was 6%, minimum 3% and renewal rate 6%; on Thursday the range was  $3@5\frac{1}{2}\%$ , with  $5\frac{1}{2}\%$ the ruling basis; on Friday 5% was the highest,  $4\frac{1}{4}$ % the lowest and 434% the ruling basis. Time money closed about 1/2% lower for the week, the final quotations being 51/2% for sixty days, ninety days and four months,  $5\frac{1}{4}$  ( $6\frac{5\frac{1}{2}}{0}$  for five and six months and more distant periods. Mercantile paper, also, is a shade easier. closing at 53/4@6% for choice six months names and also for sixty and ninety-day endorsed bills receivable; names not classed as choice are quoted at 61/2%.

Sterling exchange during the week has been excited and strong as a result of the pronounced flurry in the foreign money centres, the sudden demand for gold all over Europe that accompanied the serious character of the Balkan troubles, and the demand for remittances to pay for the large sales of American securities at this centre by and through London. Probably the best indication of the situation is that while New York bankers purchased on Monday \$5,250,000 of South African gold at the London auction, orders for the exportation of \$2,000,000 of this amount were subsequently canceled as a result of a sharp advance in sterling exchange rates later in the week. Thus the net engagements for the week amount to \$3,250,000. which, added to those made during the preceding fortnight, brings the total of the present movement up to \$6,700,000. The engagements on Monday included \$2,250,000 by Lazard Freres; \$1,000,000 by Heidelbach, Ickelheimer & Co.; \$1,000,000 by Goldman, Sachs & Co., and \$750,000 by Kuhn, Loeb & Co. On Wednesday Goldman, Sachs & Co. increased their engagement by \$250,000. But on Thursday Lazard Freres canceled \$1,250,000 of theirs, and Kuhn, Loeb & Co. canceled their entire amount of \$750,000. There was a considerable short interest in the market

/fraser stlouisfed org

early in the week, and this, in view of the developments already noted, was induced to cover. On Friday the news of the gold cancellations was accompanied by offerings of the exchange that had origianlly been drawn against the metal, and a sharp, though temporary, reaction in rates ensued. Demand sterling in Paris, after touching 25.29 francs early in the week, sold off to 25.26¾ and closed at 25.27½. The London check rate in Berlin closed at 20.48¼, which is an advance of 2 pfennigs. The Berlin check rate in Paris closed at 123.35 tranes, comparing with 123.57½ francs a week ago. The rate of discount of the Bank of Bombay was raised from 3 to 4% on Thursday.

Compared with Friday of last week, sterling exchange on Saturday was unchanged for cable transfers and sixty-day bills, which were still quoted at 4 8565@ 4 8570 and 4 8190@4 82, respectively; demand was firmer and advanced to 4 8530@4 8540. On Monday rates ruled practically unchanged during the forenoon, though later in the day there was a decline of about 10 points, and the close was at 4 8525@4 8530 for demand and 4 8560@4 8565 for cable transfers; sixty days was firmer at 4 82@4 8210. Sterling moved irregularly on Tuesday, with the market quiet and disposed to await further developments; the final range showed little change, with demand at 4 8530@4 8540 and cable transfers at 4 8560@4 8570; sixty days declined to 4 8190@4 82. The threatening features of the Balkan situation, together with active covering of shorts, brought about a sharp recovery in exchange rates on Wednesday; demand advanced about 30 points to 4 8560@4 8570, cable transfers to 4 86@ 4 8610 and sixty days to 4 8230@4 8240. There was a decline at the opening on Thursday to 4 8555 for demand and 4 8590 for cable transfers on the apparent improvement of affairs in the Balkan States; later, however, the market rallied on short covering and closed with demand and cable transfers unchanged at 4 8560@4 8570 and 4 86@4 8610, respectively; sixty days declined to 4 8225@4 8235. On Friday the market ruled active and excited. The opening was firm but declined 10 points on the news of the cancellation of London gold engagements, but closed at partial recoveries. Closing quotations were 4 8220 @4 8230 for sixty days, 4 8550@4 8560 for demand and 4 8590@4 8610 for cable transfers. Commercial on banks closed at 4 803/8@4 82, documents for payment 4 811/8@4 821/4. Cotton for payment ranged from 4 811/4 to 4 811/2; grain for payment 4 8134 to 4 82.

The New York Clearing-House banks, in their operations with interior banking institutions, have gained \$3,111,000 net in cash as a result of the currency movements for the week ending Oct. 4. Their receipts from the interior have aggregated \$10,196,000, while the shipments have reached \$7,085,000. Adding the Sub-Treasury operations and the gold imports, which together occasioned a loss of \$4,400,000, the combined result of the flow of money into and out of the New York banks for the week appears to have been a loss of \$1,289,000, as follows:

Week ending Oct. 4 1912.	Into Banks.	Outof 1 Banks.		Change in k Holdings.¶
Banks' interior movement. Sub-Treas, operations and gold imp.	\$10,196, 00 29,000,000	\$7,085,000 34,000,000		\$3,111,000 4,400,000
Total	\$39,796,000	\$11,085,000	Loss	\$1,289,000

The following table indicates the amount of bullion in the principal European banks.

# GOVERNOR WILSON'S POLITICAL VIEWS.

The apparent trend of the Presidential campaign in favor of Governor Wilson gives more importance than has existed at any previous time to that candidate's declarations on fundamental questions of public policy. Many of the declarations on such matters, made by Governor Wilson since the campaign began, have been honestly applauded by the conservative part of the community. This was especially true of his speech of acceptance in the opening week of August, when he said, regarding the tariff, that in the matter of revision "we should act with caution and prudence, like men who know what they are about and not like those who are in love with a theory," and when, referring to the so-called "Money Trust," he declared that he was not "one of those who believe that business done upon a great scale by a single organization is necessarily dangerous to the liberties, even the economic liberties, of a great people like our own." These assurances he then supplemented by the distinct assertion that "what we are seeking is not destruction of any kind, nor the disruption of any sound or honest thing, but merely the rule of right and of the common advantage."

But there still remained in the memories of conservative-minded people Governor Wilson's other declaration in his speech at Norfolk of April 29 1911, when he said:

"For twenty years I preached to the students of Princeton that the referendum and the recall were bosh. I have since investigated and I want to apologize to those students. \* \* \* I want to say with all my power that I favor it."

The effect of that speech on popular opinion, especially in conservative business circles, was immediate and most unfavorable. Any reader of this article will be able to recall the chill which spread over the feelings of conservative and thoughtful men who, up to that time, had been gradually assuming a receptive and cordial attitude towards Mr.Wilsons candidacy.

In his speech of acceptance last August, Governor Wilson did not touch on the referendum, the initiative or the recall. That omission was proper enough, for the reason that these are not matters of national legislation—unless under such wild and crazy interpretation of them as was applied in Mr. Roosevelt's recent intimation of his willingness to have the President of the United States subject to recall, in a special election, on petition of a small minority of the voters. Nevertheless, the influence of a National Executive is always bound to be important on matters of State politics; and this explains the great interest taken in Governor Wilson's Hartford speech on Wednesday of last week. This speech contained, first, an unquestionably sound declaration of principle:

"We ought to go very slowly and very carefully about the task of altering the institutions we have been a long time in building up. I believe that the ancient traditions of a people are its ballast. You must knit the new into the old. If I did not believe You that to be progressive is to preserve the essentials of our institutions, I, for one, could not be a Progressive.'

Next, referring to the direct primaries, the Governor proceeded to say that "what you have established the direct primaries for is to find a way of dominating those who have dominated us." Perhaps; but there are many people who feel strongly that the nation at large has learned some lessons from its experiment with the Presidential primaries this year. When the matter is next tested, we are confident that there will be found a large body of honest and conservative opinion to the effect that the paramount necessity now is to protect the people, in their national and local elections, from ambitious demagogues, from irregular voting, and from their own hasty impulses, rather than to protect them from the boss domination, which may conceivably at any rate be restrained in other ways.

Taking up next the initiative, the referendum and the recall, the Governor began by stating emphatically that "I myself have never been in favor of the recall of judges." That this was true was proved by his Kansas City speech of May 5 1911, shortly after his unfortunate Norfolk speech. He then said:

"Judges are not lawmakers. They are not admin-Their duty is not to determine what the e, but what the law is. Their independence, istrators. law shall be, but what the law is. their sense of dignity and freedom, is of the first consequence to the stability of the State. To apply to them the principle of the recall is to set up the idea that determinations of what the law is must respond to popular impulse.'

But proceeding further, in his Hartford speech of last week, Governor Wilson thus defined the initiative and the referendum:

The initiative is a means of recapturing the seat of legislative authority on behalf of the people themselves. The referendum is a means of seeing to it that unrepresentative measures are not put upon the statute books, but are checked by being submitted to the vote of the people. When you come to the recall, the principle is that if an administrative officer for we will begin with administrative officers-is corrupt or so unwise as to be doing things that are likely to lead to all sorts of mischief in the future, it will be possible by a sedate and slow process prescribed by the law to get rid of that officer before the end of his term.

Now it may properly be asked, is this a correct diagnosis? "Sedate and slow process," Governor Wilson calls it. But is a process sedate whereby a small minority of the voters may force public men and public statutes to further and repeated consideration at the polls-perhaps in immediate sequence to action on them after serious discussion and possibly and presumably in a moment of passion and excitement? Or is a process slow which is brought about by hastily circulating a paper for the off-hand signature of onetenth of the voters at a previous election? Governor Wilson, in fact, went so much further in dealing with this matter as to say: "Let no man deceive himself by the fallacy that anybody proposes to substitute direct legislation by the people or the direct reference of laws voted in the Legislature to the vote of the people for representative government." But Governor Wilson should have known that this is precisely what has been brought about through the new constitution in the old State of Ohio, whereby even the constitution may be amended by popular vote on peti-

raser stlouisfed ora

law which 3% of the electorate has pressed for the Legislature's consideration may be forced to a vote by another 3% petition when the Legislature has refused it consideration. That other Western States have adopted, or are considering, constitutional procedure even more radical than that of Ohio, is perfectly well known.

We regret this attitude of Governor Wilson, and we believe that the candidate himself will regret it later on. The character of the third party's campaign, and the wildness of Mr. Roosevelt's specific propositions, show where the real present danger in the political situation lies. What the country needs, in our judgment, is quite as much determination on the part of conservative citizens to rescue from reckless and indiscriminate attack the old institutions, which have served the people well, as it does an enthusiastic movement to institute radical changes, even where abuses are seen to have existed. The one attitude at any rate leaves us with our feet on solid ground. The other, pressed with the haste and excitement which inspires its present advocate would drive the country at once into an unknown and precarious future.

Perhaps the most definite factor of reassurance in this matter lies in the principle, thoroughly established in our past political history, that the spirit of popular discontent is likely to wane with the return of business prosperity. Propositions for reversing and overturning existing institutions of government, which get wide hearing at a time when the people at large are struggling with adversity, are often either forgotten or else dealt with in a spirit of larger common sense when that special source of grievance and irritation disappears. It may not be unreasonable to hope that this experience will be repeated after the coming national election has been held, and when the time arrives for other States than Ohio to act on these new and radical propositions in our form of government.

# THE BALKAN SITUATION.

History is making fast in Southeastern Europe. To understand it and in any degree to forecast events, two important facts are to be kept in mind:

One is that many of the races that make up the principalities are Mohammedan; and the other that the final decision will be made not by the parties immediately concerned, but in the chancelleries of the great Powers.

When the Turks overran Southeastern Europe in the fifteenth century, they compelled many of the conquered peoples, all of whom were Christians, to become Mohammedans. These forced converts have remained largely apart from their fellow countrymen and, as is so often the case, have distinguished themselves by their hostility to the Christians, and even by cruelty and treachery toward those who remain true to the old faith. The Albanians are instances of this experience, and this explains why it is that so many of them, in spite of the cruel Turkish oppression they have been recently passing through, are already enrolling themselves on the Turkish side. The contest is sure to take on, in large part, the character of a religious war and these descendants of the original races who were forced to become Mohammedans and have remained so will constitute an important element in favor of the Turks. There are, for example, some 250,000 Albanians in Greece; and the perpetual warfare and brigandage, in Macedonia particularly, tion of one-tenth of the electorate, and whereby any and along all the borders, is in no small part due to

the great intermixture of races and the prevalence of so many among them who are of the faith of Islam, and have a traditional hostility, easily fanned into violence, against their fellow countrymen.

A less violent, but a real, antagonism also exists between the Roman Catholics of the northern provinces and the "orthodox" of the Eastern Church, among whom the Montenegrins are conspicuous. This will also be an important factor in the contest, and makes the balance of power quite other than that which may be represented by the relative population of the Principalities on one side and the Ottoman Empire on the other.

But the most important fact is the attitude of the Great Powers. There can be no question that if they could be sure of a mutual agreement for the division of European Turkey, the hold of the Turks on that territory would not be long continued. But that agreement hitherto has never been possible. Russia, of course, wants free exit through the Black Sea, and her hand has always been outreached for Constantinople. Austria has been pressing steadily toward the Mediterranean and Salonica as the chief seaport. But while Russia is financially, perhaps, in the strongest position, and her army has been reorganized, it is not at all probable that Russia at present wants war with anybody. Italy has her hands full with the North Africa campaign, and France with Morocco and the Hinterland. Both may be regarded as having only secondary interest in the present crisis. Austria will be largely governed by Germany, and England makes her every move with reference to the German position. The central factor in the problem may, therefore, be properly regarded as Germany.

Recent German publications of wide circulation have defined the general position of Germany and mark out her intentions and program with unmistakable clearness. She feels herself geographically confined with bonds which her growing population makes it increasingly imperative that she shall burst. And, also, she is greatly irked by the dominance of the Anglo-Saxon influence, especially in the Orient, but also in the wider commerce of the world. She has definitely declared her purpose to keep up the pressure against these restricting influences, and to this end is persistently, and as rapidly as possible, increasing the effectiveness of her army and navy and developing her merchant marine. Her course is not clearly open to establishing new colonies, and her success with such colonies as she has has not been of a kind to satisfy her own people or to encourage further aggressive action in that direction. The outflow of Germans to-day is into communities where their dominance is to be that of trade and finance rather than of possession of territory. The one open and most attractive channel for her aggression is through Turkey toward the Indian Ocean. To this end she has for some time been coquetting with the Porte and has taken an active part in the building of the main line of the Turkish railway running through Asia Minor to the South. Her ultimate purpose is to increase her control of this line with the viewto intercepting and cutting the projected line of railway communication of England from Suez, by way of Bagdad, to the Persian Gulf, and eventually through to North India. The Turkish Railway will have immediate connection with Aleppo, and the plan is to extend it to Haifa, which is within 300 kilometers of Suez, and to run another branch directly south to Mecca, the main line intercepting of mere cashbook or memorandum entries. Indeed,

the British at Bagdad. By this route, Germany hopes to secure control of a direct line from Europe to the Persian Gulf, and be in position of high military advantage with relation to Great Britain and her Asiatic provinces. What view will be taken of the relation of the present crisis in the Balkans to Germany's ulterior project cannot be forecast. But that Germany is not only dominant, at the hour, in the councils of Europe, but that she has immediate interests at stake and a definite program for the future, is sure.

The German situation has been definitely stated for her own people in these terms: "The compelling facts are that within forty years she has raised herself at a stroke from political insignificance to the chief place, won a national dominance, has created a great army, has developed her commerce and manufactures, has built great ships, and now proposes to claim the right, in consequence, to set her interests in the forefront of the world." That the German spirit is at heart peaceful and, whatever may be said of Prussia, that Germany is justified in her claim that she is by no means "reactionary", and has "a real desire to keep in mind the rights of others," may be admitted. The temper of Christendom being what it is, it is hardly conceivable that, however tempting the prize, or irritating the aggression, any nation will recklessly precipitate war. Peace is the dominant note of civilization to-day and the whole influence of the bourses of the civilized world is steadily and powerfully in favor of peace. War will certainly be avoided if diplomacy can accomplish it, and the issues of any great war to-day are inevitably so uncertain and the disasters involved so tremendous that it seems little imminent, notwithstanding appearances to the contrary.

# IMPROVING GOVERNMENTAL METHODS.

To the commercial executives assembled in Washington recently Mr. Taft remarked that good government is a matter of good business, an expression to which everybody must assent, of course, provided the word "business' is used in the worthy sense as meaning effective methods directed to worthy ends. He appealed to his listeners for their sympathy and aid in his desire to correct the financial method (or lack of method) in the financial affair of carrying on the Government. He urged this desire not then for the first time. Only a few weeks ago he made public a letter to Secretary MacVeagh, saying that he deems it quite competent for the Executive to submit to Congress and the country a statement of resources, obligations, outlays and estimates in such form as he thinks advisable, and that he intends to exercise the power to do this. He objects particularly to making increasing appropriations on no better basis than estimates submitted to Congress "by officers acting in the capacity of ministerial agents," and he has sought to change this practice by asking Department heads to send to him all estimates before printing them. "The present legal directions as to estimates, he said, are based on the theory that there is no need to take stock before passing on appropriations; that it is not necessary to consider revenues or Treasury resources."

We all know that this Government is most profuse in statistics, not all of which are significant and useful, and it is not questioned that there is an abundance of bookkeeping of many sorts. It is not difficult to determine where the money goes, but the Government's own finances are run very much on the manner

we might say the custom, now a very old and rooted one, recalls the story of the good wife who resolved to keep accounts, but her first attempt consisted of two entries: "Received from Jack, May 5, \$100;" "May 8, spent it all." The various Departmental subordinates have guessed or "estimated" that they might want so much, have reported it, in much apparednt preciseness, down to dollars and cents, to their respective chiefs; to make an appearance of business, estimates of revenues have been set down, too, but back of the whole has been the comfortable yet dangerous assum tion that if the money did not turn out enough it was only necessary to stretch out the clutching hand for more, the Treasury being a barrel of oil whose bottom could never be reached. Was there not the unlimited power of taking, as illustrated by the corporation tax and (more significantly) by the income tax which hangs over all our heads?

Only a thinking minority of the people take note of the essential difference between private and public affairs, namely that while the former must keep its outgoes within its income somehow or go to smash, the latter can bring up any deficits by seizing whatever they amount to, because the people have all there is and the Government "has" the people. Therefore the whole subject of Governmental financing, of keeping Government methods responsive to regular business laws, and of promoting efficiency and economy, is unattractive and is constantly shirked. It figures in party platforms, and is mentioned in campaigns in the form of criticisms; but the pressure for more expending is constant and vigorous, while nobody stands up boldly and stiffly for economy in the concrete. The Governmental horse leech has many more than seven daughters, and they keep presenting their mother with grandchildren.

The Constitutional provision that the President "shall" recommend to Congress "such measures as he shall judge necessary and expedient" is without limitation, and there is no good reason why the United States should not have a budget. The struggle for a Government of efficiency and economy includes the struggle for a Government which shall at least justify calls for more and greater powers by showing that it exercises its present ones at least as well as the average successful private business. This does not tickle the popular fancy like campaign palaver about promoting social equality and justice and all the rest of it; this asks persistent good sense in conduct from the people, while the other deals in unspecified and unsustained promises of great things to be given to them at the cost of nobody in particular (except the rich). A budget will not raise human nature, and therefore will not make any quick improvement; but it may be a leaven, and the mere putting of things into a businesslike form on paper should make for the beginning of better habits. At least, Mr. Taft deserves the credit of trying to bring about some changes which are right though not popular, and this is a credit which very few can contest with him.

# LABOR IN THE ANTHRACITE REGIONS.

The futility of contracting with an irresponsible party has just been demonstrated in the Panther Creek district of the anthracite coal regions. When the labor troubles of last spring in the anthracite fields was settled, a pact was entered into between the authorized representatives of the mine workers and the operators for a period of four years. Naturally, it might be supposed that as long as the operators lived up to the terms of this agreement, peace would reign in the hard coal region of Pennsylvania. But because the Lehigh Coal & Navigation Co. would not discharge two loyal employees who refused to wear union buttons, some of their fellow workers in a colliery who were members of the union struck. They induced others to join them and in a short time about ten thousand men were idle and the collieries were compelled to close.

This condition continued for three weeks, the loss of the mine workers in wages being about \$20,000 a day. Of course the officers of the company concerned relied upon the terms of its agreement with its employees and they felt that it was incumbent upon the labor leaders to keep good faith and see that the men returned to work. But the labor leaders made no progress in this respect and there promised to be a protracted period of idleness at a time when the demand for anthracite is most urgent, when the company can obtain the best market for its product and when its customers who had already made contracts for supplies were most insistent upon deliveries. Yet the corporation's officers patiently awaited the return of the mine workers.

They would doubtless still be waiting had it not been for the intervention of local business interests. Merchants in the vicinity of the company's mines took the subject in hand. They saw their trade falling off and they found themselves giving credit to customers who were obtaining no wages. The business men therefore raised a purse for the purpose of sending away the two men who had stood upon their rights as American citizens by refusing to join the union or to wear the union button. These men having departed, the mineworkers returned to their tasks and the "two-button" strike was terminated. The incident emphasizes the necessity of having the labor unions incorporate so that some degree of responsibility may attach to their acts. If the Lehigh Coal & Navigation Co. fails to live up to the terms of its agreement with its employees, it may be sued for damages, and if a verdict is obtained against the corporation, a judgment may be collected. There is no doubt about the responsibility of one party to the agreement and there should be equal assurance of the responsibility of the second party to the contract. This is a subject which ought to be satisfactorily solved by the year 1916, when the anthracite mine-workers will again ask the operators to enter into an agreement with them.

# THE LOUISVILLE & NASHVILLE REPORT.

The Louisville & Nashville Railroad is one of those long established railroad systems which are able to make a creditable showing even in bad times. Naturally, therefore, in fairly good times, such as were experienced in the fiscal year covered by the report issued the present week, the result is sure to be of an exceptionally gratifying character. Conditions during the twelve months ending June 30 1912 were, on the whole, of a favorable character. The system serves the Central Belt of Southern States East of the Mississippi River, including the mineral regions of Alabama and Tennessee, where development has been unusually rapid. By reason, too, of its location in the South, it gets a considerable traffic in cotton, and hence the fact that last year's cotton crop ran far in excess of that of the previous year and proved the very largest ever raised was an advantage of no small moment. As a matter of fact, this latter was an advantage, not merely by reason of the extra cotton

/fraser stlouisfed org/

tonnage which it brought, but also by reason of its influence in keeping the whole South in a state of prosperity.

It is likewise to be remembered that in the previous fiscal year, when the rest of the United States suffered more or less from general trade reaction, the South experienced searcely any setback at all, but continued to enjoy growing activity—except that in the iron trade there was some shrinkage in business, the same as at the iron and steel centres in the North. In the year under review the iron trade again recovered its tone, and this meant not only a direct addition to the tonnage in iron and steel products, but also a new impetus to trade prosperity. Thus practically all the elements on which a railroad is obliged to depend for its success, at least as far as the volume of traffic is concerned, were highly propitious.

The fact is reflected in the annual report before us. The addition to traffic was, perhaps, not as large as might be supposed, but the revival in the iron and steel trades did not get under full swing until well on towards the close of the fiscal year. Nevertheless there was a substantial addition to the passenger and the freight traffic alike. Total gross earnings, which in both 1910 and in 1911 had established new high records, made still another advance, and rose from \$53,993,740 to \$56,211,788. As showing how gross revenues have been steadily expanding in recent years, even in periods of indifferent conditions, we may note that after the downward reaction which came in 1908, when the gross dropped from \$48,263,945 to \$44,-620,281, earnings began an upward movement, which has continued uninterruptedly in progress ever since. In 1909 there was an increase to \$45,425,891, in 1910 to \$52,433,381, in 1911 to \$53,993,740 and now in 1912 to \$56,211,788.

What is particularly noteworthy, however, about the present report is that in the late year the company was also able to make some addition to the net earnings. The company has felt the rise in railroad operating cost the same as other railroad systems throughout the United States, and in 1911 suffered a heavy reduction of its net in face of continued expansion in gross revenues. In other words, in 1911 there was an increase of \$1,560,359 in gross revenues, but expenses ran up in the sum of almost 31/2 million dollars, and consequently the amount of the net was reduced almost \$2,000,000, falling from \$17,447,803 to \$15,513,918. In 1912, however, the outcome was more satisfactory, and with \$2,218,048 gain in gross, the increase in expenses was no more than \$1,147,505, leaving, hence, \$1,070,543 gain in the net. Of course, even with this improvement in net the total of the latter, at \$16,585,460, is almost a million dollars less than the amount of the net in 1910, two years before, at \$17,447,803. In the same two years the gross advanced, as we have already seen, over 334 million dollars. The shrinkage in the net, in face of this increase in the gross, furnishes evidence of the part played by rising expenses in diminishing net results.

Efficiency of operations is being steadily promoted, and the growth in operating cost has occurred in face of that circumstance. For 1912 the train-load was 285 tons, which compares with 275 tons in 1910-11, 278 in 1909-10, 263 tons in 1908-09 and only 234 tons in 1907-08. This, it will be observed, is an increase in the train-load in four years of over 20%. It is not generally known that the Louisville & Nashville, even more so than many important Western railway systems, is obliged to move traffic at very low average

rates. On its entire freight tonnage it realizes only about  $\frac{3}{4}$  of a cent per ton per mile. For 1911-12 the average was slightly better ( $2\frac{1}{2}$ % better) than in the year preceding, but nevertheless was only 7.86 mills per ton mile. This compares with 7.67 mills in 1910-11, 7.51 in 1909-10, 7.63 in 1908-09 and 7.79 mills in 1907-08. The slight improvement in the averages the last two years followed, no doubt, from some shrinkage in the proportion of bulky and low-class freights moved.

It has always been the policy to extend the mileage of the system but only by degrees and in a very conservative manner. This policy is still being adhered to, and the report enumerates numerous cases where small additions to mileage are being made. During the late year there were also two larger acquisitions, namely the purchase of the Lexington & Eastern Ry., comprising 96 miles (and to which an extension of equal length is being made) and the acquisition, jointly with the St. Louis & San Francisco Railroad Co., of a majority of the pref. and com. stock of the New Orleans Mobile & Chicago Ry. This latter line extends from Middleton, Tenn., to Mobile, Ala., a distance of 369 miles, with two branches aggregating 35 miles, and has also trackage rights over the New Orleans & North Eastern from Laurel, Miss., to a point of connection with the New Orleans Terminal Co., a distance of about 138 miles. These acquisitions, of course, are operated as separate properties.

Besides the outlay in the acquisition of these properties, \$4,819,586 was spent on property account for additions and betterments and \$1,650,594 for new equipment. The company's holdings of cash in bank June 30 1912 were not quite as large as they were on June 30 1911, when the amount was \$15,198,310, but aggregated, nevertheless, \$11,085,960. Through the action taken this week at the meeting of the stockholders, the company's financial status will be further improved, for \$12,000,000 of new stock is to be issued and sold to shareholders at par.

The income account for the twelve months ending June 30 1912 shows a surplus on the operations of the twelve months, over and above fixed charges, of \$9,560,771. The call for the 7% dividends on the \$60,000,000 of stock outstanding was only \$4,200,000. Even on the enlarged amount of stock which will be outstanding after the issue of the \$12,000,000 which has just been authorized, the call for dividends will be no more than \$5,040,000, against the \$9,560,771 available on the operations of the late year, while the prospect is that in the current fiscal year, with conditions so generally favorable, the result will be even better than in the year past.

BANKING, FINANCIAL AND LEGISLATIVE NEWS. —The public sales of bank stocks this week aggregate 604 shares, of which 544 shares were sold at the Stock Exchange and 60 shares at auction. The transactions in trust company stocks reach a total of 20 shares. National Bank of Commerce stock was actively dealt in at the Stock Exchange on Friday, the sales amounting to 433 shares at prices ranging from 206 to 210 and closing at 209½. National City Bank stock closed 10 points higher than last week's sale price at 450. Extensive tables reporting the bid and asked quotations, deposits, surplus, &c., of banks and trust companies in all important cities in the United States are published monthly in the "Bank and Quotation Section, the October issue of which accompanies to-day's "Chronicle." Bid and asked quotations for all New York City bank and trust company stocks are also published weekly in another department of the paper, and will be found to-day on pages 873 and 874.

-Two New York Stock Exchange memberships were posted for transfer this week, the consideration in one case being \$70,000.

-Dr. Frederick A. Cleveland, Chairman of President Taft's Economy and Efficiency Commission, gave out on the 28th ult. a statement relative to the plans of the President anent his proposal to submit to Congress a national budget. In this statement Dr. Cleveland said:

After nearly two years of study of the problem, it is my belief that Senator Aldrich's statement that \$300,000,000 per annum could be saved if the Government were run on a businessilke basis is not so wide of the mark as has been supposed. But to realize this amount in increased economy and efficiency, or even a considerable part of it, will require not less than ten

efficiency, or even a considerable part of it, will require not less than ten years of continuous, persistent effort in which both the legislative and the executive branches must co-operate. Popular sovereignty to be successful cannot be conducted on the theory that public business is to be transacted by officers behind closed doors and in the dark. The exercise of popular sovereignty requires the most open publicity. The only way to get publicity on matters of policy pertaining to what the Government shall do and what it shall not, what money shall be appropriated and for what purposes, is through a budget prepared and submitted by the Executive in a form to make it readily understood. submitted by the Executive in a form to make it readily understood

It was announced from Washington under date of the 3d that as soon as it can be arranged, the Post Office Department will give full access to the sworn statements of management and ownership filed with the Department in compliance with the newspaper publicity section of the Post Office Appropriation bill. While the law does not specifically direct the Department to make these statements public, or to grant access to them, it does require each publication to print its sworn statement in its second issue published next after the filing of such statement, and the officials hold that the law contemplates full publicity and ready access to persons properly seeking the information.

Mr. Edward L. Andrews has sent us the following letter criticizing ex-Senator Towne's defense of the Congressional inquiry into the so-called "Money Trust." In enclosing his letter Mr. Andrews takes occasion to refer to the application now pending before the President for the opening of the "If,' Treasury books and papers to the Pujo Committee. he says, "the principles for which the banks contend in the enclosed communication are correct, the Treasury would not be justified in exposing these accounts to a committee engaged in an unconstitutional inquiry." New York, October 1 1912

#### Editor of The Financial Chronicle-

Editor of The Financial Chronicle: The publication in "The Financial Chronicle" of a communication from Senator Towne of Minnesota, replying to an opinion on the legality of the Money Trust inquiry, calls for a few lines, due to the distinguished char-acter of the Senatorial writer. I cannot perceive that the Senator's cumeration of the Constitutional powers of Congress will avail to justify the legislative control over the ex-tension of bank credits, in respect to the personality of their recipients. The Congressional inquiry originated in the complaint that individuals and sections of the security were not getting the bask accommodation that they claimed. They attributed their omission in this respect to a Money Trust, otherwise called "a concentration of the control of credit." Assum-ing that these conditions could exist, is the Federal Government so organized as to change them? Does the Constitution provide for contingencies of this kind? If it does not, the Committee of the House is engaged in an unwarranted inquisition. unwarfaited inquisition. The eminent Senator believes that he has found authority for the Com-

<text><text><text><text>

excluded, that such commerce should be on a cash basis; or, on the other hand, should be on a credit basis? Would the power to regulate inter-State commerce sustain such interferences with the right of contract? Yet the jurpose of this inquiry—to create an artificial and legislative system of credit—ventures to an equal extreme. I arree with the distinguished Senator that we must all stand just where John Marshall stood in reference to the protection afforded by the Consti-tution—that the Money Trust inquiry "must be really calculated to effect any one of the objects entrusted to the Government." EDWARD L. ANDREWS. —Three of the Albany N. Y. sourings banks reduced their

Three of the Albany, N. Y., savings banks reduced their —Three of the Albany, N. T., savings banks featured then interest rate this week from 4 to  $3\frac{1}{2}\%$ . The institutions are the Albany Exchange Savings Bank, the Albany County Savings Bank and the Mechanics' & Farmers' Savings Bank. A joint announcement issued by the Presidents of the three banks stated that-

In view of the high character and restricted field for savings bank investments, as limited by law, it is the consensus of our respective boards that the rate of interest hereafter will be reduced to 3 14% per annum. Dudley Olcott, President of the Mechanics' & Farmers'

Savings Bank, also had the following to say regarding the movement:

This is not a spasmodic action, but it has had the careful thought of our respective boards of trustees for over a year, and now this action has the unanimous approval of each of our boards. It has been recommended to all the savings banks of the State, strongly, by three successive superintendents of our Banking Department. Many of the large and strong savings banks in New York City have reduced their rate to 31425.

the large and strong savings banks in the second strong strong savings banks in the trop  $3_{12}$  by The Trop Savings Bank, a strong institution, has never paid but  $3_{12}$  by The Trop Savings Bank, a strong institution, has never paid but  $3_{12}$  by Hudson. Schemeetady, Cohoes, Syracuse and Utlea have thought it wise to reduce their rate, and, further, at a meeting of the savings banks were represented, the sentiment was almost unanimous against a continuation of the parameter of 4% interest.

The Albany Savings Bank lowered its rate to 31/2% in July, there thus being three which still maintain the 4% rate, namely the Albany City Savings Institution, the Home Savings Bank and the National Savings Bank.

-Five of the seven farmers of Orange County, N. Y., who were arrested on Sept. 6 on a charge of shipping immature veal to this city, by an inter-State route, pleaded guilty this week (Oct. 1) and were fined in the Criminal Branch of the United States District Court of this city. Fines of \$10 each were imposed on John Somers of Montgomery and J. F. Horton of Campbell Hall; Robert Siegler of Pine Island was fined \$15, while J. Smith of Johnson Township and E. W. Wilkins of Stony Ford were each fined \$20.

-At the Fifth International Congress of Chambers of Commerce and Industrial Associations held in Boston last week a resolution was passed giving the assent of the Congress to the proposal of Prof. Irving Fisher of Yale that the United States call an international conference on the high cost of living. The Congress also voted to confirm the resolution adopted two years ago asking for a fixed date for Easter and the reform of the calendar, the purpose of the latter being to make the months of more nearly uniform length. The delegates likewise voted in favor of international arbitration in its widest sense, the resolution saying:

"The Congress affirms the desire to see convened as soon as possible a number of official international congresses assuring between nations the existence of an arbitral jurisdiction in the widest sense of the term and such as may assume an equitable solution of all international controversies either between private people of different nations or between the governments." —F. W. Ellsworth, Publicity Manager of the Guaranty

Trust Co. of New York, has been offered and has accepted the chairmanship of the Publicity Committee of the American Institute of Banking. He will have associated with him some of the best-equipped bank men in the country, whose names will be announced later.

-At the annual meeting of the New York Clearing-House Association on Tuesday, the 1st inst., Francis L. Hine, President of the First National Bank, was elected President, succeeding A. Barton Hepburn, Chairman of the Board of the Chase National Bank, who had held the presidency of the Association for two successive years. Stuart G. Nelson, Vice-President of the Seaboard National Bank, has been elected Secretary of the Association, vice Edward Earl, Presi-dentof the National Nassau Bank. William Sherer has been re-elected Manager, William J. Gilpin is continued as Assistant Manager and Charles A. Hanna as Examiner. The personnel of the various committees for the ensuing year is as follows:

Iows: Clearing-House Committee—Waiter E. Frew, President of the Corn Ex-change Bank (Chairman); Richard Deiafleid, President of the National Park Bank; Otto T. Bannard, President of the New York Trust Company; Albert H. Wiggin, President of the Chase National Bank; William Wood-ward, President of the Hanover National Bank. Conference Committee—Clarence H. Keisey, President of the Title Guar-antee & Trust Co. (Chairman); Lewis L. Clarke, President of the American Exchange National Bank; Joseph T. Talbert, Vice-President of the National Cily Bank; A. S. Frissell, President of the Fifth Avenue Bank; John T. Sproull, President of the Coal & Iron National Bank. Nominating Committee—George F. Baker Jr., Vice-President of the First National Bank (Chairman); Benjamin Strong Jr., Vice-President of the First

Bankers Trust Co.; David H. Rowland, President of the National Butchers' & Drovers' Bank; William A. Simonson, President of the Second National Bank; Casimir Tag, President of the German-American Bank. Committee on Admissions—Joseph B. Martindale, President of the Chem-leal National Bank (Chairman); Samuel S. Conover, President of the Fidei-ty Trust Co.; Pierre Jay, Vice-President of the Bank of the Manhattan Co.; Edwin S. Schenek, President of the Citizens' Central National Bank; Lewis E. Pierson, President of the Trying National Bank. Arbitration Committee—Frank O. Roe, Vice-President of the Mechanics' & Metals' National Bank (Chairman); Herbert L. Griggs, President of the Bank of New York, N. B. A.; John W. Piatten, President of the United States Mortgage & Trust Co.; Edward C. Schaefer, President of the Gride States Mark; Francis L. Leland, President of the New York County Na-

States Mortgage & Trust Co.; Edward C. Schaefer, President of the Ger-mania Bank; Francis L. Leland, President of the New York County Naal Bank

The total Clearing-House transactions for the year were \$101,723,563,155, as compared with \$96,808,683,205 the previous year. This year's figures are made up of \$96,-672,300 864 exchanges and \$5,051,262,291 balances. The average daily transactions during the year just ended were \$335,721,330, composed of \$319,050,498 exchanges and \$16,670,832 balances. The largest transactions on any one day in the year were \$603,459,752, on July 2, while the smallest transactions on any one day in the past twelve months were \$179,357,213, on April 6. The total transactions since the organization of the Clearing House, fifty-nine years ago. are \$2,428,676,538,356, consisting of \$2,321,152,175,785 exchanges and \$107,524,362,571 balances.

As a preliminary to the merger of the Standard Trust Co. of this city with the Guaranty Trust Co., the stockholders of the latter on the 1st inst. approved the proposition to increase the capital from \$5,000,000 to \$9,500,000. A further increase in the capital of the Guaranty Trust to \$10,000,000 will be made at a meeting of the stockholders to be held on the 15th inst. On that date, also, the proposed consolidation will be formally ratified by the stockholders of both compan-As we indicated in our issue of Sept. 14, \$4,000,000 ies. of the additional capital of the Guaranty Trust will be offered to its existing shareholders, \$500,000 will be allotted to the stockholders of the Standard Trust Co. (capital \$1,-000,000) on the basis of one share of Guaranty stock for two of the Standard, and the remaining \$500,000 will be sold to new parties for the best interest of the Guaranty Trust Co.

-The Corn Exchange Bank of this city is preparing to open a new branch on the corner of Tremont and Arthur Aves., in the Bronx. This branch will be known as the Corn Exchange Bank, Tremont Branch.

-Frank S. Witherbee has resigned as a director of the Chatham and Phenix National Bank of this city and the Citizens' National Bank of Port Henry, N. Y., to qualify as a Republican Presidential Elector.

Channing Rudd, formerly with Rhoades & Co. of New York, has become associated with the international banking house of Alexander Brown & Sons of Baltimore, as manager of their investment department.

The celebration of the silver anniversary of Ralph W. Cutler and Frank C. Sumner as President and Treasurer of the Hartford Trust Co., Hartford, Conn., occurred on Tuesday the 1st inst. They were elected on Oct. 1 1887, and in the term of 25 years the Hartford Trust Co. has paid continuous dividends amounting to 200% on its capital stock. The undivided profits of the company have increased from \$70,000 to \$475,000 in the same period and more than \$100,-000 has been expended upon the banking house and office out of the net earnings. The trust company is on the "honor roll" of the trust companies of the United States, and is the oldest trust company in the State of Connecticut, having been formed in 1868. Messrs. Cutler and Sumner received many floral tributes and cordial congratulations upon the success of the company during the quarter-century period of their administration. At the recent convention in Detroit, President Cutler was elected Chairman of the Executive Committee of the Trust Company Section of the American Bankers' Association.

The formation of a new trust company in Bridgeport, Conn., has been undertaken by Hosea Mann, Cashier of the Torrington National Bank of Torrington, Conn., and his son, Ralph H. Mann, Treasurer of the Manchester Trust Co. of Manchester, Mass. The charter for the proposed institution, which is to be known as the Federal Trust Co., was procured several years ago in the interest of one of the local banks. According to a statement of Mr. Hosea Mann, it was obtained at a time when the Legislature granted more liberal charters than it does now, and it is consequently most desirable to organize under it before its expiration on Dec. 1 next. The owners of the charter have arranged with

The directors of the Old Colony Trust Co. of Boston took action on the 1st inst. towards increasing the outstanding capital from \$5,000,000 to \$6,000,000. The new \$1,-000,000 of stock is offered pro rata at \$150 per share to stockholders of record Oct. 5; subscription rights expire Oct. 17 and payment is called for on or before that date. The stock of the company has recently been offered at about \$400 per share. The \$500,000 premium realized on the proposed issue will increase the surplus from \$7,500,000 to \$8,000,000. In August 1911 the authorized capital of the institution was raised from \$3,000,000 to \$7,500,000 and the outstanding amount was increased from \$2,500,000 to \$5,000,000, and was paid for through a cash dividend of 100% declared out of the surplus. The matter of issuing the further \$2,500,000 authorized was left to the discretion of the board of directors.

-Control of the Paul Revere Trust Co. of Boston is reported to have been acquired by interests affiliated with Lee, Higginson & Co. As a result former President Edmund Billings, who, with eleven other members of the board resigned last June, will, it is understood, be re-elected to the Presidency. Most of the directors who withdrew with Presidency. Most of the directors who withdrew with President Billings are expected to return to the board, Since Mr. Billings' resignation Vice-President Rottenberg had been Acting President. W. E. Moreland who has resigned as Treasurer of the company, has become Assistant Treasurer of the Cosmopolitan Trust Co. of Boston.

John R. Macomber, of N. W. Harris & Co., and John S. Lawrence, of Lawrence & Co., have been elected to the board of the Boston Safe Deposit & Trust Co. of Boston, Mass.

-The stockholders of the Cumberland National Bank of Portland, Me., voted on Sept. 30 to place their institution in voluntary liquidation. Its business has been taken over by the Portland National Bank. The Cumberland National was the oldest national bank in Portland, dating from 1812. It had a capital of \$150,000]and deposits of \$450,000.

Thomas S. Gates was formally installed as President of the Philadelphia Trust, Safe Deposit & Insurance Co. of Philadelphia, on Monday last, the 30th ult. Mr. Gates! forthcoming election to the office was announced in July, when he was elected a director of the company. As head of the institution he succeeds Samuel Y. Heebner, who last January accepted the post temporarily pending the election of a permanent successor to Roland L. Taylor, who resigned in December. Mr. Gates is one of the youngest bank presidents in Philadelphia; he is only thirty-eight years of age. For the last six years he was connected with the Pennsylvania Company for Insurances on Lives & Granting Annuities, first as Trust Officer, and later, since 1910, as Vice-President.

Roland L. Taylor, formerly President of the Philadelphia Trust, Safe Deposit & Insurance Co. of Philadelphia, has been admitted to general partnership in the banking house of Wm. A. Read & Co. Mr. Taylor will be the resident partner in Philadelphia, conducting the firm's business at the newly established offices in that city in the Morris Building, 1421 Chestnut St.

-Louis Fleisher has been elected President of the People's Trust Co. of Philadelphia to take the place of Joseph L. Greenwald, resigned.

-The Union Trust Co. of Pittsburgh, Henry C. McEldowney, President, has recently moved back to its bank building on Fourth Avenue, which has been completely remodeled to more advantageously handle the business of this vast Pittsburgh concern. A mezzanine floor has been installed—connected by elevators—where the transfer and trust departments have been removed. The floor of the main bank ng room is now devoted entirely to the banking de artm nt. On the mezzanine floor is located the directors room which is available for corporation meetings, and adjoining the directors' room is a private consultation room nd library. Profiting by the fire in the Equitable Life Building in New York last winter, when millions of dollars of securities tem orarily tied up financial operations, the c mpany has had a commodious vault constructed at the the Messrs. Mann to place the stock of the company. It is extreme ar of the building, divided into three separate safes for the use of the trust department, transfer department and a fire-proof book vault. The public safe deposit vaults are situated conveniently at the rear and center of the banking room.

Probably the most striking improvement to attract public attention is the system of electric lighting; the lights are partially concealed and arranged in s ch a way as to give the effect of sunlight. The Union Trust was incorporated October 28 1889 and to-day enj ys the distinction of "earning" the largest surplus and undivided profits of any trust company in the country. On May 3rd last its capital was \$1,500,000, surplus \$29,000,000 and profits \$747,407, or combined capital, surplus and profits of \$31,247,407, all of which has been "earned" with the exception of the capital. Annual dividends of 100% are paid to shareholders on its \$1,500,000 capital stock and in addition a 6% Christmas bonus. The deposits of the company's banking department on the date mentioned were \$46,948, 875, aggregate resources \$78,196,283, while the trust department holds estate funds of \$42,699,927. The institution is trustee under deeds of trust or mortgage for over \$240,626,512 and the total amount of securities deposited with it by corporations to secure issues of col-lateral trust funds is \$162,066,160. The directorate includes the names of many of Pittsburgh's famous industrial leaders, who are known throughout the nation. The board is composed of Arthur V. Davis, John B. Finley, Henry C. Fowes, William N. Frew, Henry C. Frick, Benjamin F. Jones Jr., Philander C. Knox, James H. Lockhart, J. Marshall Lockhart, Thomas Lynch, Andrew W. Mellon, Richard B. Mellon, Thomas Morrison, Henry C. McEldowney, David E. Park, Henry Phipps, Henry R. Rea, William B. Schiller, James M. Schoonmaker and George E. Shaw.

-John G. Jennings, President of the Columbia National Bank of Pitssburgh, Pa., died on the 26th ult. of heart disease. Mr. Jennings was also President of the Kanawha Oil Co. and a member of the firm of E. H. Jennings Brothers Co. He was forty-eight years of age.

-Sprigg D. Camden of Parkersburg, W. Va., was elected a director of the Fidelity Trust Co. of Baltimore on Thursday. Mr. Camden is identified with the management of a number of organizations; he is President of the Union Trust & Deposit Co. of Parkersburg; Vice-President and Treasurer of the Monongah Company; President of the Parkersburg, Marietta & Inter-Urban Ry. Co.; Vice-President of the South Side Bridge Co., the Parkersburg Chair Co. and the Balwin Tool Works. He is also President of the Parkersburg Water Works Commission and President of the Parkersburg Industrial Co., and has other important affiliations.

-Edgar G. Miller Jr., who retired as President of the Title Guarantee & Trust Co. of Baltimore last June, has been again elected to that office, the directors having prevailed upon him to resume the post, which became vacant through the recent death of George C. Morrison. Mr. Miller has also been made President of the Mortgage Guarantee Co., which is allied with the title Company.

-W. H. Yeasting has resigned as Cashier of the Home Savings Bank Co. of Toledo to become Vice-President of the Commercial Savings Bank & Trust Co. of that city. Mr. Yeasting's election to the management of the latter follows the purchase by him of 150 shares of its \$200,000 capital, the price paid for the same, it is stated, being \$100 each. John D. R. Lamson, Vice-President and Chairman of the Board of the Commercial Savings Bank & Trust Co., has been made Acting President, to take the place of President George W. Close, who died in August.

—The proposed La Salle St. Trust & Savings Bank of Chicago, whose organization is now being perfected, is to represent a conversion of the La Salle St. National Bank. William Lorimer, President of the latter, in a letter to the stockholders of the existing institution, announces that it is the purpose of the new institution to take over the national bank, and explains that the reason for the change is that "we can make a great deal more money with a trust and savings bank than we can with a national bank. He adds:

We are limited to a very narrow field with the national bank, but with the trust and savings bank, in addition to the business which we are permitted to do under our national charter, we can make real estate loans, take trusteeships, and do a hundred other kinds of business, and receive compensation for our services, all of which we are prohibited from doing under the national banking law.

The capital and surplus of the company will be the same as that of he bank, namely \$1,250,000, of which 1,000,000 is capital. Mr. Lorimer states that more than two-thirds of the stockholders have signed agreements to exchange their

stock in the national bank for an equal number of shares in the tru t and savings ban  $\varsigma.$ 

—A permit for the organization of the Northern Illinois Trust & Savings Bank of Chicago, with ₹200,000 capital, was recently issued to Albert H. Tyrrell, George R. Kent and William H. Mulholland.

--Neil J. Shannon has been elected Trust Officer of Foreman Bros. Banking Co. of Chicago, which recently established a trust department.

-It is stated that the Peninsular State Bank of Detroit contemplates increasing its capital from \$800,000 to \$1,-000.000.

-Louis W. Hill, Chairman of the board of directors of the Great Northern Ry., was elected a director of the Northwestern National Bank of Minneapolis on the 27th ult. Mr. Hill, who replaces the late Judge Martin B. Koon on the Northwestern's board, is a member of the directorate of the Merchants' National and First National banks of St. Paul and the First National Bank of Duluth. W. H. Dunwoody, Chairman of the board of directors of the Northwestern National Bank, is a director of the Great Northern road.

-Guy C. Landis, Cashier of the new Commercial National Bank of Minneapolis, which began business on Sept. 16, was found dead in bed on the 27th ult. His death was attributed to heart disease. Mr. Landis was formerly Cashier of the Flour City National Bank of Minneapolis, and upon its merger with the Security Bank of Minnesota he became Assistant Cashier of the latter. He was Secretary of the Federal Securities Co. of Minneapolis and Secretary of the Barthe-Martin Co. of Duluth, wholesale grocers.

A consolidation of the business of the Merchants' Bank and the First National Bank of Buchanan County at St. Joseph, Mo., went into effect on Sept. 16, following the completion of the proceedings incident to the merger on the 14th The consolidation is carried through under the name ult. of the First National Bank of Buchanan County; it has been accomplished by an exchange of stock, the shareholders of the Merchants' Bank, capital \$200,000, having received an equal interest in the First National. The capital of the latter, \$500,000, has not been increased, and it is intimated in the St. Joseph "News-Press" that the 2,000 shares of First National stock exchanged for those of the Merchants' came largely from Swift & Co., which is understood to have held a considerable interest in the First National. The Merchants' was organized in 1878 and was the oldest bank in the city; its deposits on June 14 were \$2,202,191. On the same date the deposits of the First National Bank of Buchanan County were \$4,017,290; this bank is the outgrowth of two previous mergers; the first, it is stated, took place about eighteen years ago, when the Saxton National and the Shuster-Hax National banks joined forces and formed the First National; and in 1905 the National Bank of St. Joseph was merged with the First National. Under the present consolidation its officers are: T. W. Evans, Chairman of the board; R. T. Forbes, President; J. M. Ford, R. L. McDonald and W. S. McLucas, Vice-Presidents; J. E. Combs, Cashier, and R. S. Brittain, R. N. Ridge and Max Andriano, Assistant Cashiers. Messrs. Forbes, Combs and Brittain were respectively President, Cashier and Assistant Cashier of the First National before the merger; Messrs, Evans, Mc-Donald, Lucas and Andriano were respectively President, Vice-President, Cashier and Assistant Cashier of the Merchants' Bank.

-In accordance with plans mentioned in our issue of March 23, the stockholders of the Missouri-Lincoln Trust Co. of St. Louis voted on Sept. 20 to increase the capital from \$500,000 to \$1,000,000. The movement is incidental to the reorganization of the institution, and follows a reduction to \$500,000 of the original capital of \$3,000,000. The proposal to make the capital \$1,000,000 was ratified by 3,105½ shares of the total of 3307 voting. Suit to prevent the reorganization of the company and for the appointment of a receiver was filed in the Circuit Court at St. Louis on the 13th ult. by T. L. Rubinstein, owner of 200 shares, and J. B. Reynolds, who holds 50 shares. In 1907 the Mercantile Trust Co. took over the safe-deposit department of the Missouri-Lincoln and guaranteed the payment of its depositors. The complainants in the Missouri-Lincoln suit are opposed to the company's reorganization; they ask the Court to order the disposal of the trust company's assets, the payment of its debts and the distributon of the remainder of its assets among the stockholders. **Clearings by Telegraph**—Sales of Stocks, Bonds, &c.— The subjoined table, covering clearings for the current week, usually appears on the first page of each issue, but on account of the length of the other tables is crowded out once a month. The figures are received by telegraph from other leading cities.

# Monetacy Commercial English News

#### [From our own correspondent.]

London, Saturday, September 28 1912. The week that has been looked forward to with no little

<text><text><text><text><text><text>

not expected to be great. The chief anxiety is respecting the American demand. Everybody knows that there will be a large Egyptian demand, which is estimated at from six to ten millions sterling; but the Bank of England can easily afford to part with that amount. Should, however, a large American demand spring up it would undoubtedly compel the Bank of England to raise its rate seriously and so might disturb all the money markets and stock exchanges of Europe. The India Council offered for tender on Wednesday 60 lacs of its bills and telegraphic transfers and the applications amounted to rupees 798,19,970 at prices ranging from 1s. 4 1-32d, to 1s. 4 1-16d, per rupee. Applicants for bills at 1s. 4 1-32d, per rupee were allotted 2 per cent, and above in full.

full.

+ Increase over last week. - Decrease from last week. \* As of June 14.

+ Increase over last week. — Decrease from last week. \* As of June 14. Nota.—"surplue" includes all undivided profits. "Reserve on deposits' includes for both trust companies and State banks, not only cash items but amount due from reserve argonts. Trust companies in New York State are required by law to keep a reserve proportionate to their deposits, the ratio varying necording to lo-restion as shown below. The percentage of reserve remitted is computed on the sagregate of deposits, exclusive of time denosits not may and not payable within thirty days, and also exclusive of time denosits not may and not payable within thirty days, and also exclusive of denosits eccured by bonds of obligations of the State or City of New York, and exclusive of an amount equal to the market value (not esceeding par) of bonds or obligations of the State or City of York owned by the bank or held in trust for it by any public department. The State banks are likewise required to keep a reserve varying according to frame deposits not payable within thirty days, represented by certificates (according to the amendment of 1010), and exclusive of deposits secured according to its mendment of 1010, and exclusive of deposits secured according to amend-ment of 1010, how the axis of the City or State of New York, and ex-tinsive of an amount equal to the market value (not exceeding par) of bonds or obligations of the State or City of New York owned by the company or held in trust for it by any public department. —*Trust Cos.*—State Banks—

Wall Street, Friday Night, Oct. 4 1912. The Money Market and Financial Situation.—The security markets have been quite irregular throughout the week. They opened strong on Monday and the advance then re-corded carried several issues to a new high level. Accrued profits were alluring and to sales inspired thereby were added increasing liquidation for foreign account as a result of the disturbed political situation in Southeastern Europe. At the same time call loan rates moved up to 75%, the highest quotation of the season. The reaction which followed these conditions was, however, relatively unimportant, and, with a less disquieting state of affairs in the Orient and a return of interest rates here to a lower basis, security prices are again on the upward trend.

of interest rates here to a lower basis, security prices are again on the upward trend. The domestic news of the week has been altogether favor-able. Preliminary figures referring to iron production in September indicate that the daily output was in excess of that for August, and orders are already placed which will keep practically all mills in full operation so far into 1913 that manufacturers are declining further bookings. The Government monthly report shows the condition of cotton to be 2 points above the 10-year average and indicates a crop of about 14,000,000 bales, if the yield is not cut short by an carly frost. Last, but by no means least, is the show-ing made by some of the railway reports of earnings. St. Paul, which earlier in the year made unfavorable compari-son with 1911, now shows net earnings of \$1,000,000, in round numbers, more than in August last year, and other in-portant lines make very excellent reports.

The open market rate for call loans at the Stock Exchange during the week on stock and bond collaterals have ranged from  $3@7\frac{1}{2}\%$ . To-day's rates on call were  $4\frac{1}{4}@5\%$ . Commercial paper quoted nominally at  $5\frac{1}{4}@6\%$  for 60 to 90-day endorsements and  $5\frac{1}{4}@6\%$  for prime 4 to 6 months' single names and  $6\frac{1}{2}\%$  for good single names. The Bank of England weekly statement on Thursday showed a decrease in bullion of  $\pounds 2,755,524$  and the percent-age of reserve to liabilities was 48.74, against 51.39 last week. The rate of discount remains unchanged at 4%, as fixed Aug. 29. The Bank of France shows a decrease of 22,-850,000 francs gold and 975,000 francs silver. NEW YORK CLEARING-HOUSE BANKS. (Not Industing Trust Comparts.)

Minneap-oils, 20c, per \$1,000 premium. Cincinnati, par. State and Railroad Bonds.—Sales of State bonds at the Board include \$23,000 New York Canal 4s, 1962, at 1003 to 1005 and \$12,000 Va. 6s def trust receipts at 551/2 to 57. In the market for railway and industrial bonds last week's closing prices have been more closely adhered to than in the

shares market. A few issues are fractionally lower, but over against them are many more which are from half a point to a point higher.

United States Bonds.—Sales of Government bonds at the Board are limited to \$6,500 3s coup. at 102¾. Closing prices have been as follows: for yearly range see third page following.

E	Interest Periods	Sept. 28	Sept. 30	Oct.	0ct.	Oct.	0a.
3s, 1908-18registered 3s, 1908-18coupon 4s, 1925 registered	Q—Jan Q—Feb Q—Feb Q—Feb Q—Feb	*101 *10236 *10236 *11336 *11336 *101	*10236 *11336 *11336 *101	$102 \frac{1}{113}$ $113 \frac{1}{113}$ 101	*10214 *10234 *11334 *11334	101 102 ½ 102 ½ 113 ½ 113 ½	*10234 *11334 *11334

\*This is the price bid at the morning board; no sale was made. **Railroad and Miscellaneous Stocks.**—The stock market has continued active with several noteworthy changes in prices. The liberal sales for foreign account, as noted above, were readily absorbed, but to-day's decline leaves closing quotations irregular. The market to-day has been re-actionary in tone and prices gave way substantially towards the close. the close

the close. Canadian Pacific is conspicuous in a decline of 45% points within the week, presumably on sales for London account. New York Central is 1½ points lower, Union Pacific and Southern Pacific over a point. On the other hand, St. Paul shows an advance of 3½ points, Lehigh Valley 2¼, Chesapeake & Ohio 2%, Pacific Mail 2½ and National Lead 3. As a result of the week's operations a list of 30 active issues shows 14 higher and 16 lower than at the close last week. For daily volume of business see page 882. The following sales have occurred this week of shares not represented in our detailed list on the pages which follow:

# THE CHRONICLE

# RAILROAD GROSS EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from July 1 to and including such latest week or month. We add a supplementary statement to show the fiscal year totals of those roads whose fiscal year does not begin with July, but covers some other period. The returns of the electric railways are brought logether separalely on a subsequent page.

Annual Reports.—An index to annual reports of steam railroads, street railways and miscellaneous companies which have been published during the preceding month will be given on the last Saturday of each month. This index will not include reports in the issue of the "Chronicle" in which it is published. The latest index will be found in the issue of Sept. 28. The next will appear in that of Oct. 26. Louisville & Nashville Railroad.

ANNUAL REPORTS

(Report for Fiscal Year ending June 30 1912.)

The annual report of the Board of Directors (Mr. H. Wal-ters, Chairman, and Mr. M. H. Smith, President) is given at length on subsequent pages; also the income account and balance sheet.

The statistics for four years have been compiled for the "Chronicle" as below:

Distillers' Securities Corporation, New York.

(Report for Fiscal Year ending June 30 1912.)

Pres. E. J. Curley Sept. 25 wrote in substance:

Thes. E. J. Curricy Sept. 25 wrote in substance: The cost of production this year was materially increased by reason of the abnormally high prices of grain and other manufacturing supplies. Ow-ing to unusual and temporary trade conditions, there was no corresponding advance in the selling price of certain of our products. These conditions necessarily reduced net earnings. The operating efficiency of the plants has been maintained, and the cost (\$287,992) has been charged against carnings. Accounts and bills receivable and bills payable are all current, and represent the trade receivables and payables of the companies. All accounts between the company and its constituent companies have been eliminated, so as to show the net figures.

#### GENERAL INVESTMENT NEWS.

#### RAILROADS, INCLUDING ELECTRIC ROADS.

RAILROADS, INCLUDING ELECTRIC ROADS.
American Railways Co., Philadelphia.—Pref. Stock.—The shareholders will vote Oct. 17 on creating an issue of \$4,-000,000 7% cumulative pref. stock, of which only \$2,000,000 will be issued at present, this amount to be underwritten, and then offered at par to shareholders pro rata. A statement signed by Pres. J. J. Sullivan and Sec. Walter W. Perkins, at Philadelphia, Oct. 3, says:
As shown by the annual report for the year ending June 30 1912, the commany has now ontranading bills payable of \$1,592,240, representing substantial improvements chargeable to capital made on the properties and demanded by the growth of your business. This item your directors feel should be capitalized, either in a funded dent or by the issuance of capital stock. Of the two methods, the latter sceme the more than sufficient to be ending June 30 last the new stock proposed to be issued that demanded by the growth of the properties owned and their caraing capitalized, either in a funded dent or by the issuance of capital stock. Of the two methods, the latter sceme the more than sufficient to be ending June 30 last the net caraings were more than sufficient to be ending some and also pay the dividends declared and paid upon the properties owned and their caraing capitalized, either to be sufficient not only to meet the dividends on the common stock. The value of the properties owned and their carain the same at their present high standard of efficiency.—V. 95, 749, 817.
Baltimore & Ohio RR.—Acquisition.—The Sandy Valley

p. 749, 817. Baltimore & Ohio RR.—Acquisition.—The Sandy Valley & Elkhorn Ry., the new road from Shelby, Ky., to the coal tract lately acquired by the Consolidation Coal Co., was taken over by the B. & O. on its completion on Oct. 1 in accordance with the arrangement made in 1911 (V, 93, p. 228). Daniel Wilard was elected President to succeed Jere H. Wheelwright. George F. Randolph, Ist V.-Pres.; George M. Shriver, 2d V.-Pres.; A. W. Thompson, 3d V.-Pres.; C. W. Woolford, Sec., and J. V. MacNeal. Treas. The newly elected officers occupy the same positions in the Baltimore & Ohio.—V. 95, p. 678, 235.

Oblo--V. 95, p. 678, 235. Ganadian Pacific Ry.—Increase of Stock.—The stock-holders on Oct. 2 authorized an increase in the ordinary stock from \$200,000,000 to \$260,000,000. The directors subsequently decided to offer the stock at 175. The issue is to be put out about Jan. 1913. The proceeds of the new stock are to be used for the purposes for which consolidated debature stock would otherwise have been utilized, includ-ing the satisfaction and cancellation of the outstanding \$33,760,000 \$52 statk\_maturing July 1 1915. The remainder will be used for additions and improvements chargeable to capital account. Presider 5 Shauchnessy stated at the meeting prior to the passage by the stockholders of resolutions

confirming the step: "By this means the company will be getting money on its ordinary state capital at a low rate of interest, taking the present rate as a basis, its boni and debenture debt will be \$60,000,000 less, the fixed charges will be \$2,400,000 per annum less than otherwise would have been, and its available funds for the purposes of the undertaking will be mount be supplemented by an appropri t or of \$15,000,000 from your accumulated surplus that might properly be distributed to the sharenolders but that will instead be expended on capital account in additions and im-present the supplemented by an appropri t or of \$15,000,000 from your accumulated surplus that might properly be distributed to the sharenolders but that will instead be expended on capital account in additions and im-present the supplemented by an appropri t of the construction and lease of the fluxe mentioned in the annual report (V, 95, p. 550) and the purphase of the Cap de la Madeleine Ry, and the issue of debenture stock to acquire cultanding securities of Dominion Atlantic Ry. Then has been deposited in the office of the Secretar, of State for Canada a divideate original of the lease of the Equimate & Manaimo Ry, to the canadian Paetife Ry, dated July 1 and of the indenture mortgrage of that company dated July 25 1912 between the Equimate & Manaimo Ry. Royal Trust Co, and Canadian Paetife Ry.-New Mortgage, The stockholders

Central of Georgia Ry.—New Mortgage.—The stockholders will on Oct. 17 take further formal proceedings necessary in regard to the authorization of the new mortgage to secure \$80,000,000 bonds, and their sale from time to time by order of the directors or exec. committee. Compare V. 95, p. 110.

Chicago & Alton RR.—New Directors.—Judge Robert S. Lovett, Chairman; Louis J. Spence, traffic director, and Julius Kruttschnitt, director of maintenance of the Harriman lines, have been elected directors to succeed Theodore P. Shonts, H. E. Huntington and F. T. Frazier. This is in pursuance of the plan for increased representation on the board by the Union Paelfic, which was announced early in August last. See Union Paelfic RR. under "Annual Reports" in V. 95, p. 358.—V. 95, p. 749, 480.

Westinghouse Air Brake Co.—New Director.— H. E. Andrews has been elected a director to succeed Horace E. Smith. V. 95, p. 748, 685.

-A large Canadian bond firm has been organized under the title of the Canada Bond Corporation, with a capital of \$2,000,000. The new company has a Dominion charter to buy and sell government and municipal bonds and deben-tures, also securities of public utility and industrial corpora-tions of Canada, and authorizing it to conduct a general financial, investment and brokerage business. The head offices will be at 59 Yonge St., Toronto, with branch offices in London, England, Montreal, Winnipeg, Vancouver, &c. The board of directors is made up of some of the most in-fluential and prominent men in the Dominion. George O. Somers, the General Manager, is well and favorably known in financial and railroad circles. He was connected with the Canadian Pacific Ry. for several years and was afterwards associated with Mr. Hill in the development of the Great Northern properties, being at one time Assistant Vice-President. --Attention is called to the offering of Wheeling Traction

-Attention is called to the offering of Wheeling Traction Co. first mtge. 5% gold bonds by Redmond & Co., this city, and the Continental Trust Co., Washington. The bonds of-fered are issued to retire an equal amount of prior lien 6% bonds matured Sept. 1 and Oct. 1—see "Chronicle," issue of Sept. 7, page 619. The bonds are offered at 981/2 & int., netting 5.12%. Full particulars will be found in the adver-tisement on another page.

-Avery Company 7% cumulative preferred stock is of-fered at par and accrued dividend by C. F. Childs &Co., Chi-cago. The Avery Company, located at Peoria, Ill., is said to be one of the largest manufacturers of agricultural im-plements and other machines. A statement made by the President of the company, together with the balance sheet, was published in the "Chronicle" of Aug. 24, page 483. Fur-ther particulars will be found in the advertisement on another page. page

—The September 1912 issue of the Bankers' Encyclopedia has come to hand. This is the 36th edition of this well-known annual styled "The Purple Book." In its 2,000 pages it covers very thoroughly the scope included in a bankers' directory, and with the marginal index tabs desired informa-tion is made easily obtainable. Bankers' Encyclopedia Co., 20 Nassau St., New York.

-An interesting illustrated booklet describing the city of Hamilton, Ontario, Canada, has been issued and copies may be had from H. H. Marsh, Commissionsr of Industries, Hamilton. There are photos of a number of the manufac-turing plants, of which there are some 400 in the city, with yearly products valued at \$50,000,000.

-Messrs. Edward C. Patterson, Howard F. Turrill and James L. Ridgway announce that they will continue, under the name of Patterson & Ridgway, at 141 Broadway, New York, the general practice of accounting formerly conducted by them under the name of Patterson & Cochran. Baltimore office, Munsey Building.

-Wm. Salomon & Co. and G. H. Walker & Co. are offer-ing, by advertisement on another page, St. Louis & San Francisco RR. Co. 2-year 6% secured notes dated Sept. 2 1912. The letter of Vice-Pres. Hillard giving the facts about the issue was printed in the "Chronicle" of Sept. 21, p. 751.

-William P. Philips has become a partner in the inter-national banking firm of J. & W. Seligman & Co. Mr. Philips was formerly a member of the law firm of Byrne & Cutcheon.

-T. Stewart Foulke, formerly with Gude, Winmill & Co., has become associated with Leonard Snider & Co., 60 Broadway, and will have charge of their bond department.

-C. E. Denison & Co., Boston and Cleveland, are adver-tising on another page a list of securities to which attention is invited. A complete circular will be mailed on request.

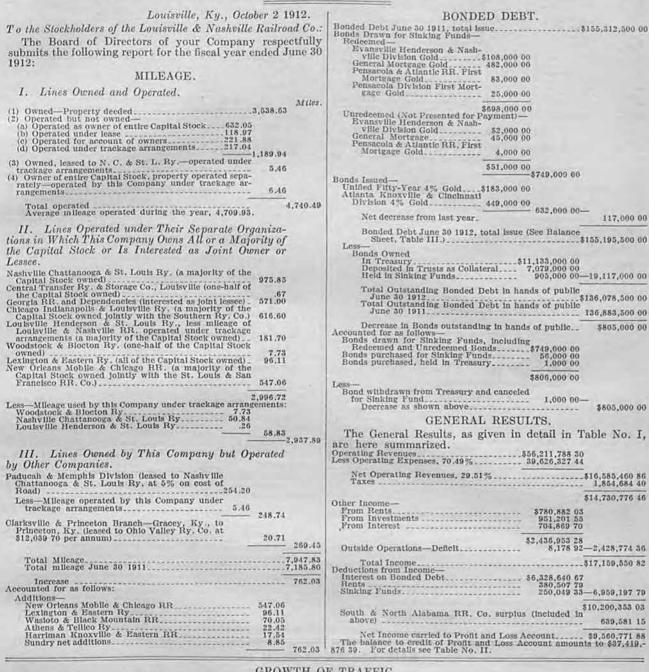

-Belvidere Brooks Jr. has become associated with the bond firm of Lawrence Barnum & Co. of this city, Phila-delphia and Washington.

-Herzfield & Stern announce the withdrawal from their firm of Felix E. Kahn and the admission to partnership of Walter J. Herzfeld.

The work on the second track and reduction of grades on the Kentucky Division between Covington and Paris, re-ferred to in last year's report, is being pushed rapidly, twenty-five miles of second track having been laid and bal-lasted. The grading of the DeCoursey yard is nearly com-plete and tracks are now being laid. This work will prob-ably be completed by January 1 1913. In order to obtain the lowest practicable grade from the coal fields at the head of the Kentucky River to Cincinnati, and to effect economies in operation of this division, work has been undertaken to reduce grades between Paris and Winchester, a distance of 15.6 miles, to the same rates that have been adopted between Paris and Covington, and to double-track the line. <u>NEW LINE, WINCHESTER TO IRVINE.</u> A new line is being constructed from Winchester, on the

A new line is being constructed from Winchester, on the Kentucky Division, to Irvine, Ky., on the Louisville & At-lantic Division, a distance of 26.26 miles, with maximum grades of .4 per cent opposed to north-bound trains and .5 per cent opposed to south-bound trains. Contracts for the whole of this work have been awarded and construction begun.

A freight yard is to be built on the Louisville & Atlantic Division south of Irvine. Property has been purchased and plans for the yard are being prepared.

and plans for the yard are being prepared. REVISION OF LINE, IRVINE TO BEATTYVILLE. That portion of the Louisville & Atlantic Division between Irvine and Beattyville, a dis ance of 31.6 miles, is to be im-proved by reducing grades, eliminating timber trestles, improving alignment, widening roadbed, installing heavier rails, with crushed stone ballast, and providing ample pass-ing tracks. The maximum grades will be .3 per cent op-

HARRIMAN KNOXVILLE & EASTERN RAILROAD.

This company owns all of the capital stock of the Harri-man Knoxville & Eastern Railroad Company, which con-structed a branch line from Allingham to Harriman, Tenn., a distance of 17.54 miles. The road was completed and placed in operation on March 15 1912. The operations are being conducted as a part of the system.

#### MEMPHIS UNION STATION.

MEMPHIS UNION STATION. In September 1909 the Memphis Union Station Company was incorporated for the purpose of constructing passenger terminal facilities at Memphis, Tenn., for the joint use of various railroads. The station was completed and placed in operation on April 1 1912. The company is owned by the Nashville Chattanooga & St. Louis Railway, Southern Rail-way Company, St. Louis Iron Mountain & Southern Railway Company, St. Louis Southwestern Railway Company and this Company.

#### FRANKFORT & CINCINNATI RAILWAY.

FRANKFORT & CINCINNATI RALLWAY. The litigation mentioned in previous reports in the matter of the acquisition of the Frankfort & Cincinnati Railway by this Company has been terminated, and, pursuant to the judgment of the Franklin Circuit Court of the Commonwealth of Kentucky, the Louisville & Nashville Railroad Company ceased to operate the Frankfort & Cincinnati Railway on June 30 1912. Commencing with the business of July 1st, the railway was turned over to the new owners, whose head-quarters are located at Frankfort, Ky.

during the present fiscal year. The operations are included with those of the system. The line reaches valuable coal properties in Bell and Harlan counties.

LEXINGTON & EASTERN RAILWAY. This Company has acquired all of the capital stock of the Lexington & Eastern Railway Company, which owns a line of road from Lexington to Quicksand, Ky., a distance of 96 miles. Shortly after this road was purchased, capital was advanced by the Louisville & Nashville Railroad Com-pany and construction commenced of a line from Dumont, about two miles east of Jackson, extending in a southeastpany and construction commenced of a line from Dumont, about two miles east of Jackson, extending in a southeast-wardly direction up the North Fork of the Kentucky River to Neon on Boone Fork of that river, a distance of 97 miles. There have been 48.3 miles of track laid, extending from Du-mont to a point 5.5 miles beyond Hazard, in Perry County. The ruling grades are .3 per cent opposed to traffic moving northward toward Cincinnati and .5 per cent opposed to traffic moving southward to the coal fields of the upper Kentucky River. An assembling yard is being built at Neon at the south end of the line, and a branch extending up Wright's Fork, a distance of 4.73 miles, to the mining operations of the Consolidated Coal & Coke Company, is nearing completion. When this undertaking is completed the Company will

nearing completion. When this undertaking is completed the Company will have a line from the Ohio River at Covington to the coal fields at the head of the Kentucky River, with maximum grades of .3 per cent opposed to north-bound trains and .5 per cent opposed to south-bound trains, except for one reach of .4 per cent opposed to north-bound trains between Irvine and Winchester on which train loads will be reduced, and a second reach of 1.0 per cent opposed to north-bound trains

between Jackson and Athol, where pusher engines will be required.

NEW ORLEANS MOBILE & CHICAGO RAILWAY.

This Company and the St. Louis & San Francisco Railroad Company have each acquired an equal number of shares of the preferred and common stock of the New Orleans Mobile & Chicago Railway Company, constituting a majority of the outstanding stock of that company, and, under an agree-ment dated November 15 1911 between the two companies, the operation of the road will be continued as a separate organization. The line extends from Middleton, Tenn., to Mobile, Ala., a distance of 369 miles, from Beaumont to Hatticsburg, 27 miles, and from Ellisville Junction to Ellis-ville, 8 miles. The New Orleans Mobile & Chicago Railway Company also has trackage rights over the New Orleans & Northeastern Railroad from Laurel, Miss., to a point of connection with the New Orleans Terminal Company in New Orleans, La., a distance of about 138.14 miles. This Company and the St. Louis & San Francisco Railroad

Attention is called to the report of the Comptroller for the details of the year's business.

The Board acknowledges the fidelity and efficiency with which the officers and employees of the Company have served which the outcome its interests. For the Board of Directors, H. WALTERS, Chairman. M. H. SMITH, President.

In addition to this railroad property, its rights-of-way, real estate, buildings, equipment, appurtenances, etc., your Company on June 30 1912 controlled, by virtue of its owner-ship of securities, all the property of the following corpora-tions with the property of the following corporations, viz.:

#### THE ARKANSAS WESTERN RAILWAY COMPANY.

A standard-gauge line from Heavener, Oklahoma, to Waldron, Arkansas, 32.33 miles, together with rights-of-way, buildings, appurtenances, &c.; controlled by The Kan-sas City Southern Railway Company through ownership of all the capital stock and bonds.

THE KANSAS CITY SHREVEPORT & GULF TERMINAL COMPANY.

Union depot property at Shreveport, Louisiana, including its real estate, buildings and 1.11 mile of yard and terminal track; controlled by The Kansas City Southern Railway Com-pany through ownership of all the capital stock.

#### PORT ARTHUR CANAL & DOCK COMPANY.

Lands, slips, docks, wharves, warehouses, one grain ele-vator (capacity 500,000 bushels), etc., all at Port Arthur, Texas; controlled by The Kansas City Southern Railway Company through ownership of all the capital stock and bonds.

#### THE K. C. S. ELEVATOR COMPANY.

One first-class elevator of capacity 650,000 bushels, sit-uated at Kansas City, Missouri; controlled by The Kansas City Southern Railway Company through ownership of all the capital stock.

#### THE MENA LAND & IMPROVEMENT COMPANY.

A Company formed for taking title to real estate at Mena, Arkansas, abandoned and vacated in consequence of estab-lishing new division terminals at Heavener, Oklahoma, and DeQueen, Arkansas; controlled by The Kansas City Southern Railway Company through ownership of all the capital stock.

#### GLENN-POOL TANK LINE COMPANY.

A Company operating 167 tank cars, under equipment trusts; controlled jointly by The Kansas City Southern Rail-way Company, as the owner of three-quarters of the capital stock, and the Midland Valley Railroad Company, as owner of the remaining one-quarter of the stock.

That portion of the System lying within the State of Texas, the mileage of which is included in the operated mileage of The Kansas City Southern Railway Company, is operated separately by its owner, the Texarkana & Fort Smith Rail-way Company, which Company has its own general offices and books of account at Texarkana, Texas, in accordance with the Texas law.

with the Texas law. For the sake of completeness, however, the reports of that Company are included in those of The Kansas City Southern Railway Company in so far as is necessary to show the results of operation of the whole line from Kansas City to the Culf to the Gulf.

#### RESULTS OF OPERATION.

the following statement shows the results of operation of The Kansas City Southern Railway for the year ended June 30 1912, compared with corresponding results for the preceding year:

Mail Revenue 105.40	
discellaneous Transportation Revenue 1.010 63 Revenue from Operations other than Transportation 4,809 09	8,078 41
Net Decrease in Gross Earnings	\$722,314 72
	The second second second second second second

The decreases due to labor troubles and the extremely unfavorable weather in the lumber districts, and also to the epidemic of cerebro-spinal meningitis in the South, proba-bly amounted to \$420,000, which under ordinary conditions

will naturally be restored. The estimated decrease due to he construction of pipe lines was \$495,000, which can be extored only by the development of new oil fields. These decreases amount to \$913,000, while the total net lecrease is \$722,314 72; showing that, notwithstanding rela-ive commercial depression during the year ended June 30 912 as compared with the previous year, the increase in earnings due to general development and vigorous solicita-ion may fairly be stated at \$195,000. No revenue charge was made against any Company freight ised in operation.

No revenue charge was made against any Company freight ised in operation. The increase in Operating Expenses on account of Main-enance of Way and Structures was due in part to charges to naintenance by reason of Improvement work under rules of the Inter-State Commerce Commission aggregating \$66,-161 73 in excess of similar charges during the previous year. The balance of \$35,369 16 was due to unfavorable weather word itors. onditions.

Wage schedules were revised, beginning with yard and rainmen June I 1911 and concluding Sept. I 1911. In consequence, the transportation pay-rolls were increased over the preceding year by \$59,588 33. The total Gross Tons One Mile were:

Decrease ..... 193,597,957

Decrease 123,597,957 It is estimated that, with north and southbound tonnage airly equalized, your road can, by reason of improvements heretofore made, handle about 25% more gross tonnage han during the past year, with a negligible increase in fransportation Expenses. The management believes that the development of the Gulf ports and the normal development of the territory ributary to your road will soon bring about a satisfactory necesse of business and the equalization of traffic. During the year the net expenditures for Additions and Betterments were:

Betterments were:

rom the Proceeds of Refunding and Improve-iment Mortgage Gold Bonds, exclusive of In-terest on Bonds \$4,429,620 65 rom Current Funds \$222,285 22

Alon outlone a duale	\$4.651.915	87
Interest on Bonds chargeable to Additions and Betterments under rules of the Inter-State Commerce Commission		Π.
Total	\$4,678,499	66

These expenditures include the cost of a number of new purs to serve industries not heretofore reached by your racks, and to accommodate new industries that were being stablished.

The following is a list of such spurs, of which some have eeen completed and others are in course of construction.

and the state of	

The Joplin Union Depot Company completed the new Union Passenger and Freight stations, and other facilities at Joplin, and placed them in operation July 1 1911. During the year ended June 30 1912 the results fairly at-ributable to the use of these facilities by your Company nay be stated as follows: ncrease in Passenger Revenue... ncrease in Freight Revenue..... 2,606 70

Total Increase in Revenue \$10,564.53 Proportion of Interest and Taxes of the Jop-lin Union Depot Co. payable by your Com-pany. 7,500.00 18,664.53 \$748 29 Net Gain

The management of the Kansas City Terminal Railway Company, in which your Company owns a one-twelfth in-terest, reports that the new Union Passenger Station and track connections will probably be completed and ready for service by Jan. 1 1914, but that the date of completion of all proposed freight facilities cannot be stated at this time. The new Passenger Station and facilities at Fort Smith, Arkansas, were completed and placed in operation May 1 1912, and are now used jointly with your Company by the St. Louis & San Francisco Railroad Company.

The total cost of these improvements was:

The total cost of these improvements was. Right-of-Way \$8,329.95 Tracks 27,380.87 Passenger Station 94,452 20-\$130,163.11 The general improvement and development of your property was prosecuted vigorously during the past year. Funds for this purpose were provided by the issuance of \$15,000,-000 of Refunding and Improvement Mortgage Gold Bonds, of which \$10,000,000 were issued July 1 1909 and \$5,000,000 were issued Feb. 15 1911. The situation at June 30 1912 with respect to these bonds was as follows:

Distribution of Expenditures-	Proposed.	Expended.
Discount on Bonds Stamp Tax on Bonds sold in foreign markets. Payment of Collateral Gold Notes on July 1 1909. During the year 86.5 miles of your track south of Shreve-port, Louisiana, were laid with new 85-pound rail, making a total of 123.92 miles of track so relaid south of Shreveport

a total of 123.92 miles of track so relaid south of Shreveport to June 30 1912. The bridges and culverts of your road were improved dur-ing the year by reducing the total length of trestles from 72,324 feet to 70,076 feet; increasing the length of steel bridges from 21,077 feet to 21,632 feet; increasing the number of stone and concrete culverts from 604 to 615; increasing the number of concrete pipe culverts from 61 to 64, and by re-placing 8 cast iron pipe culverts with larger concrete open-ings. Among the Statements and Statistics will be found a table

showing the progressive improvements made in bridges and culverts from June 30 1900 to June 30 1912.

The Balance Sheets and statistical statements give full

The Balance Sheets and statistical statements give full detailed information concerning expenditures for Improve-ments and the results of operation. The form of balance sheet prescribed by the Inter-State Commerce Commission has been filed with that Commission at Washington. Your Board has deemed it advisable, how-ever, to retain herein the form of balance sheet heretofore adopted, since the Stockholders are familiar with the same and since it is believed to set out more clearly the financial condition of your Company.

By order of the Board of Directors.

J. A. EDSON,

President. (For statistical tables, see under Annual Reports on a preceding page.)

CAPITAL STOCK.

There has been no change in the capital stock of your Company during the year.

Company during the year. FUNDED DEBT. The additional \$4,000,000 of 4% Refunding Bonds sold in the previous fiscal year for later delivery, as stated in the last annual report, were delivered during this fiscal year and the proceeds used to reimburse the Company for expendi-tures made to retire matured equipment trust obligations, and for additions, betterments and improvements to the property, and for the retirement of temporary obligations the proceeds of which had been similarly used. The \$20,500 Adjustment Mortgage Bonds remaining un-issued were sold during the year and the proceeds used for the general corporate purposes of the Company. There were redeemed and canceled during the year \$10,000 Florida Central & Peninsular Railroad Company Land Grant Extension 5% bonds. ACQUISITIONS. Your Company has acquired during the year all the capital

Your Company has acquired during the year all the capital

Your Company has acquired during the year all the capital stock of: Raleigh & Charleston Railroad Company, owning a line of road from Lumberton, N. C., to Marion, S. C., 43 miles, and, through stock ownership, an extension 12 miles in length, known as the Marion & Southern Railroad, a total of 55 miles. Tampa Northern Railroad Company, owning a line of road from Tampa, Fla., to Brooksville, Fla., and branches, 58,25 miles, and important terminals at Tampa, Fla. The properties of the Seaboard & Roanoke Railroad Com-pany (81 miles) and the Roanoke & Tar River Railroad Company (32 miles), the stocks of which were owned by the Seaboard Air Line Railway, were conveyed to your Company during the year and are therefore now directly owned. The mileage of these two roads has heretofore been included in that of your Company. GENERAL REMARKS.

#### GENERAL REMARKS.

During the year the gross revenue of the rail lines of your Company increased \$1,139,899 37. The freight train reve-nue per mile of road showed an increase of \$171 99 and the freight train revenue per train mile amounted to \$2 63, as compared with \$2 55 in the previous year. The passenger

train revenue per mile of road showed an increase of \$115 82, and notwithstanding the large increase in passenger train mileage the passenger train earnings per train mile were slightly in excess of last year. In addition to the more liberal expenditures for the mainte-nance of your property, the unfavorable weather conditions which existed during a considerable portion of the year, and which were almost unprecedented, contributed very largely to the increase in operating expenses. These were further added to by increased rates of wage schedules, increased cost of material and supplies, increased taxes, and the necessary compliance with the various laws in relation to equipment and service.

The road and equipment have been well maintained, and, in view of the generally favorable business outlook, the offi-cers of your company feel that a considerable improvement in results during the next fiscal year may reasonably be expected.

#### N. S. MELDRUM, President.

Extracts from the report of Vice-President an Manager C. H. Hix.	d General
Miles of road operated June 30 1912. Average miles of road operated during the year	3,070 12

Net Revenue non Operation. Statistical Statistics of Operating Expenses and Taxes to Gross Revenue was 75.02%, against 70..23% last year. Average miles of road operated shows an increase over previous year of 0.71%. Gross revenue shows an increase over last year of 5.23%, Operating Expenses and Taxes show an increase of 12.41% and Net Revenue from Operation shows a decrease of 11.70%. The increase in Operating Expenses was due largely to

and Net Revenue from Operation shows a decrease of 11.70%. The increase in Operating Expenses was due largely to increased charges to Maintenance on account of increased amount of work done over the previous year; to increased cost of materials, and to increased wages paid to employees of the Roadway, Mechanical and Transportation depart-ments. The Net Operating Revenue was further adversely affected by increase in Taxes and by changes in the charac-ter of freight traffic, the ton miles of which increased 9.04% and yielded an increase of only 4.26% in freight revenue. EQUIPMENT.

EQUIPMENT. The equipment of the railway was maintained during the year at a cost of \$3,212,277 60. Included in this cost is \$49,107 25 representing the value of equipment destroyed or retired from service, which was credited to the Cost of Equipment; \$321,356 91 for deprecia-tion, which was credited to Reserve for Accrued Deprecia-tion, and \$42,210 00 increase over the previous year due to Federal Boller Inspection Law. The average cost of repairs per locomotive and per car owned, for the year, was as follows:

## Locomotives . Passenger cars -Freight cars -

Flat Cars

In addition to the equipment above named there were purchased 2 Steam Derrick Cars, 1 Steam Ditcher, all of which have been received.

MAINTENANCE OF WAY AND STRUCTURES.

MAINTENANCE OF WAY AND STRUCTURES. Roadway, track and structures of the railway have been maintained at a cost of \$3,347,358 86, which represents an expenditure per mile of road amounting to \$1,094 40. 61.02 miles of new sidings and extensions of existing sid-ings were constructed, and there were deducted by removal and changes of old sidings 4.91 miles, making a net increase over previous years of 56.11 miles.

There were also constructed 1.44 miles of new sidings and extensions of existing sidings on leased lines, and 0.55 miles of old sidings removed, making a net increase over last year of 0.89 miles.

of 0.89 miles. The tie renewals were 1,445,787 cross ties and 890 sets of switch ties, and the cost, \$566,917 64, was charged to Operating Expenses. 123,79 miles of new 75-pound and 85-pound steel rail were laid in the main line track, releasing therefrom 58, 60, 75, 80 and 85-pound worn rail, and there was charged (net) to Operating Expenses \$65,481 06 and to Capital Account \$111,645 36. .256,071 cubic yards of gravel and slag ballast were put under main line track at a cost of \$169,865 69, of which \$160,514 55 was charged to Capital Account and \$9,351 14 to Operating Expenses.

\$160,514 55 was charged to Capital Account and \$9,351 14 to Operating Expenses. 10,435 lineal feet of wooden trestles were filled in, and of the total cost thereof, including culverts, \$62,211 36 was charged to Operating Expenses. The filling in of the Lincoln Street trestle at Columbia, S. C., reference to the progress of which was made in the last annual report, is included in the above-mentioned work. There were built during the year with creosoted timber 5,555 lineal feet of trestles, which have been ballast-deeked at a cost of \$58,125 23, which was charged to Operating Expenses. Expenses.

Additional stringers were put in 178 trestles during the year to strengthen same to carry the heavier power and traffic

traffic. Work has been done on forty-four bridges, replacing with steel or strengthening them for heavy traffic. Of this num-ber, twenty-five have been completed and the remaining ninetcen will be finished by June 30th 1913. Seven of the above bridges were authorized during this year and five of the seven have been completed. The total expenditures for bridge renewals during the year were \$374,440 30, of which \$243,523 99 was charged to Capital Account and \$130,926 31 to Operating Expenses. Of the total operated main line mileage of the system, 3,069 89 miles are laid with steel rails and 0.23 miles with iron rails.

iron rails.

#### NEW EXTENSIONS.

Extensions to the Company's line in Florida during the year were made as follows:

In addition to the above-named extensions, spurs have been built which are not included as main line mileags, as follows:

Main fine unneage, is to to any Phosphate Company's Barr Mine 2.14 Spur from old P. C. A. & G. line, near Alafia, to State Phosphate Company's mine 1.30 Construction work has also begun and is proceeding on the ex-tension from Mulberry to Bartow with the branch line to the Royster mine) of approximately 12

#### GENERAL REMARKS.

The additional terminal facilities at Raleigh, Wilmington and Savannah, referred to in last annual report, were com-pleted, and work on additional terminal improvements is now in progress at Wilmington, Savannah and Jacksonville. A considerable amount of dredging has been done at Savannah, Jacksonville and Tampa during the year to main-tain proper deaths of water

tain proper depths of water.

tain proper depths of water.
The union passenger stations mentioned in report of last year at Weldon, N. C., and Tampa, Fla., were completed.
Union passenger stations have been provided at Ocilla, Ga., and Bostic, N. C., and the Union Station at Vidalia, Ga., is in the course of construction.
Modern passenger stations have been built at Athens, Ga., Abbeville, S. C., Leesburg, Fla., and Richland, Ga., during the year

Abbeville, S. C., Leesburg, Fla., and Richland, Ga., during the year.
At Savannah, Ga., a new reinforced concrete roundhouse and modern steel and concrete machine and erecting shops have been built to replace the wooden shop buildings which were destroyed by fire.
Extensions have been made to the yards at Wilmington, N. C., Savannah, Ga., and Jacksonville, Fla., and new yards and mechanical facilities are in progress of construction at Norlina, N. C., and Cayee, S. C.
Considerable improvement has been made to station buildings by renewing floors with both timber and concrete, extending and renewing platforms and replacing decayed wooden roofs with metal shingles.
I92 industrial sidings and extensions to industrial sidings

192 industrial sidings and extensions to industrial sidings already existing have been constructed or are in process of construction.

of construction. 69 depots and freight stations have been constructed or substantially added to during the year. 70 passing tracks have been constructed or extended, or are in process of construction. The telephone line for dispatching trains, referred to in last year's report, has been completed, and this, with lines already in use, makes approximately 1,089 miles of line in complete on the system already in use, service on the system. Respectfully submitted,

C. H. HIX

Vice-President and General Manager.

(For statistical tables, see under Annual Reports on a preceding page ]

## The Commercial Times.

## COMMERCIAL EPITOME.

Friday Night, October 4 1912. Friday Night, October 4 1912. The expansion of trade is more uniform than ever. The industries are active. The demands of traffic are so greated that a shortage of cars is complained of. Bank clearings con-tinue to make a handsome exhibit. The indications point to a larger cotton crop than at one time seemed probable. The grain harvests are bountiful. Securities have advanced. Money continues strong. The activity and cheerfulness in the iron and steel trade continue to be noteworthy features. The following shows the general stocks of merchandise here:

The ronowing snows the general	stocks of	merchan	lise here:

Beef firm, with a moderate busi-ness. Stocks are still light. Mess \$17@\$18, packet \$18@ \$19, family \$22@\$22 50, extra India mess \$36@\$36 50. Cut meats firm; pickled hams, 10 to 20 lb., 1234@131/sc.; pickled bellies, 6 to 12 lbs., 14c. Butter, creamery extras, 32c. Cheese, State, whole milk, new white specials, 17c Eggs, fresh-gathered extras, 31@34c. OIL.—Linseed firm with, a moderate demand for jobbing quantities. Large consumers prefer to hold aloof and await events, especially until more is known of the size of the out-turn at the Northwest. City, raw, American seed, 68c.; boiled 69c.; Calcutta 78c. Cottonseed oil easier; winter 6.50@7.25c.; summer white 6.40c. Cocoanut oil firmer. Cochin 1034@11c.; Ceylon 94@934c. Chinawood con-tinues firm at 9@10c. Corn higher at 6.15@6.20c. Cod steady at 40@44c. for domestic. COFFEE has remained quiet on the spot with No. 7 Rio firmer, however, at 1434c. Mild coffee has continued to meet with only a moderate sale, with fair to good Cucuta 161/g@163/gc. Speculation in coffee futures has been on only a moderate scale and fluctuations in prices have not been very wide. Yet, in response to some advance in Europe and Bra-zil, prices have advanced, though the warehouse deliveries have fallen off and the receipts at Rio and Santos have not made so bullish an exhibit as compared with those of the previous year, as was noticeable at one time this season. It is asserted that adulteration is more extensive than for-merly, owing to the existing high prices. Large interests in New York, Santos and Hamburg are bullish. Closing prices follows: October 14.00[M4.0] [March 14.1406[14.07] June 14.120[14.13]

merly, owing to the existing high prices. Large interests in New York, Santos and Hamburg are bullish. Closing prices follows:

#### BREADSTUFFS.

Friday Night, Oct. 4 1912.

[VOL. LXXXXV.

Flour has been steady, with a moderate trade. Buyers of late have been disposed to await further developments before trading extensively. The stock here is 34,500 packages, against 46,300 on Sept. 1 and 45,800 a year ago. At Minneapolis some mills have done a rather large business, while others have made but moderate sales. Yet the total sales, it is pointed out, have considerably exceeded the week's output. There is no complaint of a lack of shipping directions. Exports sales, however, have been small. The total output at Minneapolis, Duluth and Milwaukee has been 473,385 barrels, against 459,275 in the previous week and 416,725 last year. Some buyers in the West have allowed their stocks to become so low that they want shipments by express.

Wheat has latterly advanced, owing in part to warlike reports from the Balkans. Foreign markets have risen, especially those on the Continent. The Continent has been buying freely in Europe. Some signs of a decrease in receipts have been noticed at our Southwestern markets. The arrivals at Chicago have latterly been small. Though the freight rate from New York to Liverpool has been 51/4d. the freight rate from New York to Liverpool has been 5¼d. and export business, as a rule, has been small, there was some increase in the trade in Manitoba wheat in the middle of the week. The political situation is also being sharply watched. In 1885, when there seemed to be some danger of a clash between England and Russia over the encroach-ments of Russia in the Far East, wheat for a time advanced sharply. Later in the year war news from Roumelia also caused a rise. The world's stocks of wheat increased last week only 2,460,000 bushels, against 4,060,000 bushels in the same time last year. It was remarked, too, that, though the receipts of wheat in the last three months reached some 114,060,000 bushels, against 25,000,000 bushels last year. Here is an excess of receipts over the same time last year of 29,000,000 bushels, yet an increase in the visible stock of noly 5,500,000 bushels. This heavy movement, resulting in so small an accumulation of stocks, has attracted atten-tion and has made some experienced people in the wheat the short side of the market. In fact, the speculation has been confined, for the most part, to small traders. Large operators have been holding aloof. Some of them are in corn. Wheat they are watching, rather uncer-ting what to do, and in the meantime acting on the principle "when in doubt do nothing." The high off in the export trade on that account has been one thing to discourage buying. Another is a tendency to increase the principle "wheat for spring wheat, against 191,000,000 hast year, and 408,000,000 bushels of whiter wheat 191,000,000 hast year, and 408,000,000 bushels of whiter wheat 191,000,000 hast year, and 408,000,000 bushels of whiter wheat 191,000,000 hastels. The weather has been better in the United King-dowing to unfavorable weather, they are expected to increase the Northwestern receipts have recently fallen off, in part owing to unfavorable weather, they are expected to increase the Northwestern receipts have recently fallen off, in part owing to unfavorable wea and export business, as a rule, has been small, there was some increase in the trade in Manitoba wheat in the middle

the market, owing to the glowing reports from the spring-wheat section of this country. To-day prices advanced, with a better export business, coincident with reports that Bul-garian troops have invaded Turkey. Some 280,000 bushels were reported sold for export. Indian corn has at times declined under liquidation and

Indian corn has at times declined under liquidation and the short selling due to a general impression that the crop is one of the largest ever raised. It is true that the September shorts had a rather unpleasant experience. That month touched 73¼ last Monday as a sort of Parthian shot. But the general sentiment is bearish. The world's shipments have been large. Some reports of damage to the crop have been received with evident skepticism. Some of these re-ports put the damage by recent frost at 20 to 35%. That would make a good deal of soft corn. One firm put the condition at 70.2, against 82 the Government report last month: On Wednesday Chicago made shipping sales of 300,000 bushels. It is well to bear in mind that some very large interests are identified with the bull side of the market, but apparently they have been doing more bidding than buying of late, though they have already accumulated something of a line, and evidently for what is popularly termed a "long pull." To-day there was free covering of shorts and prices were higher.

#### THE DRY GOODS TRADE.

New York, Friday Night, Oct. 4 1912.

The dry goods markets continue in a strong position, with the total sales for September greater than during the same period last year. Cooler weather has stimulated the buying period last year. Cooler weather has stimulated the buying for fall and winter delivery, and jobbers and retailers throughout the country are finding that their initial stocks of fall merchandise are wholly inadequate. Jobbers in all lines have made heavy inroads into their stocks in meeting the retail demand, and in turn are finding it next to im-possible to secure additional supplies from manufacturers in time to be of any use. In cotton goods, interest still centers in deliveries, and jobbers and commission houses are in constant receipt of calls for additional supplies, together with urgent requests for the prompt shipment of all goods at present under order. In dress goods and men's wear, the securing of supplies for the fall trade is also a matter of disappointment. The development of further labor trouble at Lawrence is augmenting the fears of clothing manufacturers, who are being compelled to disappoint their trade, owing to their inability to secure sufficient materials. DOMESTIC COTTON GOODS.—The exports of cotton

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending Sept. 28 were 5,437 packages, valued at \$330,787, their destination being to the points specified in the table below:

		912			
New York to Sept. 28— Great Britain		Since Jan. 1. 3,422 1,501	Week, 25	Since Jan. 1. 648 911

 The value of these New York exports since Jan. 1 has been \$19,955,879 in 1912, against \$17,887,919 in 1911.
 Domestic cotton markets are firm with a broadening demand in all directions. According to reports, merchants situated in the South and Southwest are ordering more goods for spring delivery than for a number of years past.

 Ordinarily the Presidential campaign would be a cause for hesitation, but this year it appears to have little effect.

 Demmad for the heavier grades of cotton goods is increasing, heavy colored cotton being in request for delivery through December and January. There is also quite good buying for prompt delivery and selling agents are said to be having considerable difficulty in meeting the demand. Demand for fine and fancy cotton is likewise improving, there being a decided improvement in business for late delivery to retailers. Sheetings, denims and the lower-priced ginghams are selling steadily, while there is a steady trade in fall dress cottons. In view of the smallness of stocks and the restless-ness at labor centers, merchants appear to be feeling the need of making provisions for their requirements. The cotton reports issued duirng the week by the Bureau of Agriculture confirm the belief that there will be an abundance of cotton during the coming year, but in view of the exhausted sup-plies of cotton goods in first hands it is not generally ex-pected that there will be any recession in prices. Gray goods, 3812-inch standard, are firmer at 5 3-16(@5124e.

goods, 38½-inch standard, are inmer at 5.3-16@5½C. WOOLEN GOODS.—In markets for men's wear and dress goods prices are firm and demand active. Mills are well sold ahead and many of those manufacturing light-weight goods are refusing to book further business. The low temperatures during the early part of the week stimulated the demand for overcoatings, but as the weather moderated, the buying became less active. Demand for heavy-weight suitings is moderate. moderate

FOREIGN DRY GOODS.—Although the buying of linens is not as heavy as it was a few weeks ago, there continues to be a steady demand. With the position of raw material strong, it is not expected that there will be any lowering of prices for some time. Housekeeping and dress litens have been in particular request. Burlaps have been very strong and active. A good business, light stock and reports of firm Calcutta markets having resulted in sharp advinces. Lightweight are quoted 6.60e and 10½-ounce at 8c.

It is possible for cities; to own and operate to the constitution of Ohio. It is possible for cities; to own and operate to the constitution of Director of Public Service be requested to in-vestigate the question of public ownership and operation of one or more of the existing telephone systems of the city and to report to the Council. At existing telephone systems of the city and to report to the council of the existing telephone systems of the city and advisability of the city acquiring and operating one or both of said telephones systems as and for a municipal telephone system.

Colorado.—Supreme Court Upholds Initiative and Referen-dum.—The Colorado Supreme Court on Sept. 23 held that the amendment establishing the initiative and referendum was submitted to the people in accordance with the provisions of the State constitution. This reverses the opinion of District Judge Riddle, who on Aug. 23 decided that the measure had not been properly published prior to the 1910 election and ordered its re-submission this November. See V. 95, p. 699. The decision of the higher Court, which is given in the "Denver Republican" of Sept. 24, will enable the submission on Nov. 5 of a number of measures provided for under the initiative and referendum amendment. for under the initiative and referendum amendment.

for under the initiative and referendum amendment. Grand Rapids, Mich.—Municipal Ownership of Street Railway Proposed.—In accordance with a resolution unani-mously adopted by the Common Council, Mayor Ellis on Oct. 1 appointed a commission of nine men who will study the question of street railway transportation. The Commission, which is composed of six members of municipal boards and three private citizens, is expected to render its report by February 15 1913, so that the voters may have a chance to study it and then vote on the question of municipal ownership. ownership.

The action, according to the Detroit "Free Press", follows the refusal of the local street railway company to extend its line into districts where such extension is deemed necessary.

New York City.—Tentative Values of Real Estate and Per-sonal Property for 1913.—The Department of Taxes and Assessments on Oct. 1 opened the assessment books for the year 1913. The tentative assessed value of real estate (ordinary and corporation) for 1913 is announced to be \$7,646,471,746, an increase of \$120,097,683 over the tenta-tive figures for 1912 and \$197,721,655 more than the final rolls for 1912. We give below the estimated figures for 1913, comparison being made with both the estimated and the final figures for 1912:

The above does not include corporation franchises and assessments of tangible property of public service corpora-

tions in streets and public places. The assessments for there are made by the State Board of Assessors and returned to the Tax Department of the city in March each year. They were reported as follows for 1912: Manhattan, \$277,836,-600; The Bronx, \$23,305,440; Brooklyn, \$94,615,990; Queens, \$15,031,989; Richmond, \$2,358,780; total, \$413,-US 700; 148,799.

148,799. The total of the tentative personal tax list for 1913 is \$852,376,348, or \$103,246,775 less than the tentative figures for 1912. In order to show the enormous reductions usually made in these figures by the "swearing off" process, a com-parison may be made of the 1912 totals, the estimated figures of \$749,129,573 being reduced more than 400 millions, the final figures amounting to only \$342,963,540. In 1911 al-most 500 millions were deducted from the estimated figures. The following table shows the amounts for the various classes of personal property on the 1913 list, compared with

classes of personal property on the 1913 list, compared with the tentative and final lists for 1912; the final figures for 1912 being designated by means of an asterisk (\*):

Oak Park, Ill.—Village Agrees to Purchase Water Plant.— At a special meeting held Sept. 27 the Village Board decided, it is stated, to accept the proposition of the Public Service Co. of Northern Illinois to sell its Oak Park plant for \$290,000. It is planned to pump water from the Chicago mains into Oak Park through the distributing system just purchased.

Oak Park through the distributing system just purchased. Oak Park through the distributing system just purchased. Oklahoma.—State Auditor Recommends Repeal of Income Tax and Graduated Land Tax Laws.—State Auditor, Leo Meyer, in his annual report to the Governor says that both the graduated land tax law and the income tax law have failed entirely as revenue measures, and recommends their entire reconstruction or repeal. The income tax law went into effect May 26 1908 and has not produced over \$5,000 in any year since, in spite of the fact that special inquisitions were held in two of the wealthier counties of the State. The Auditor points out that there is no definition of "gross income", and each in-dividual seems to have a different opinion concerning it. The graduated land tax law was in effect from and after the fiscal year ending June 30 1909 but no effort is being made to enforce the same pending a final decision on it from the courts. The Federal Court held the law unconstitutional and another case is now pending in the State Supreme Court. The procedure is confused, and in the Auditors' opinion the law, as it stands, would be difficult to enforce even if held constitutional. constitutional.

Port of Seattle, Wash.—Harbor Improvement Projects Declared Valid by Supreme Court.—The State Supreme Court on Sept. 26 affirmed the ruling of Judge Myers of the King County Superior Court, upholding the creation of the Port Commission and the validity of the \$8,100,000 bonds voted March 5 for a system of harbor improvements and terminal facilities within the port district.

Putnam, Conn.—Terms for Purchase of Water Plant Accepted.—This city and the Putnam Water Co. have, it is said, agreed to the purchase of the water plant by the city at the terms recently fixed by the appraisers. The city will pay \$240,000 for the property. V. 95, p. 699.
