# OUR RAILWAY EARNINGS ISSUE.

We send to our subscribers to-day the March number of our "Railway Earnings" Section. In this publication we give the figures of earnings and expenses for the latest month of every operating steam railroad in the United States required to file monthly returns with the Inter-State Commerce Commission at Washington.

This Earnings Supplement also contains the companies' own statement where these differ from the Commerce returns or give fixed charges in addition to earnings, or where they have a fiscal year different from the June 30 year, as is the case with the New York Central Lines, the Pennsylvania RR. and others.

# THE FINANCIAL SITUATION.

It is impossible to withhold admiration for the way the sturdy, determined, persistent way-in which the English Government has been adhering to a wellconceived financial policy. When the European war broke out with such unexpected suddenness and new expedients had to be devised for dealing with the extraordinary situation thereby created, the Government, after consultation with banking and financial interests, decided not to suspend the Bank Act, but to create an issue of Treasury notes of small denominations, namely 10 shillings and £1, against which it was not obligatory to hold a gold reserve.

At the start these Treasury notes were issued without gold cover, though the Government stipulated to pay in gold if demanded. It was recognized, however, that a gold foundation should be speedily provided and the Government within a short time after the authorization of the notes began to set aside gold for this purpose. Early in September £3,000,000 was at one batch set apart and earmarked Currency Note Redemption. The next five weeks £500,000 more was added to the same fund each week. Then another £3,000,000 was in a lump sum transferred to the Note Redemption Fund. This was on Oct. 21. Thereafter a further £1,000,-000 per week was added regularly each and every week, no matter what the effect upon the ordinary reserve of the Bank of England. This was kept up for nineteen successive weeks, until at the beginning of the present month this Currency Note Reserve had no less than £27,500,000 gold to its credit.

The effect of these transferals has been, of course, to diminish to that extent the bullion holdings of the Bank of England from week to week and in all of the weeks since about the middle of December, with the exception of two weeks in January, the Bank has been obliged to report a net loss in its bullion holdings. During the same period the Bank of Germany has been regularly reporting a further increase in its gold holdings from week to week. But the British Government did not allow itself to be swerved from its purpose. In many of the weeks when the Bank of England reported a loss of gold, no loss would have been shown except for the setting up of this separate fund as a cover for the Treasury note issue. Nevertheless, the weekly contribution of £1,000,000 was kept up until the aggregate of gold so held was deemed sufficient according to that most exacting requirement. Further issues of the notes in recent weeks have been small, and with the Gold Redemption Fund creeping up £1,000,000 a week, a point was reached two weeks ago where

In considering the position of the Bank of England, this fact should always be borne in mind, namely that the Bank is now carrying a double Gold Fundone against its ordinary liabilities and another for the redemption of these new Treasury notes. In the ordinary way the Bank now holds £59,465,251 of gold coin and bullion, against £41,170,028 at the corresponding date last year and only £36,862,105 at the same date two years ago. In addition,  $\pounds 27,025,000$  of gold is held in the Currency Note Redemption Fund. Combining this £27,025,000 with the £59,465,251, the Bank of England really holds £86,490,251 under its control, against £41,170,028 last year.

Gold production of the Transvaal made further progress toward a normal basis of yield in February, the month's per diem output having been the heaviest of any similar period since June 1913 and exceeding that of January by 1,086 fine ounces. Specifically, the February yield was 676,221 fine ounces, or a daily average of 24,150 fine ounces, this contrasting with 626,261 fine ounces and 22,366 fine ounces, respectively, for the month in 1914. Contrasted with 1913, however, there is a marked decline, and to a lesser extent the same is true by comparison with 1912. For the two months of the current calendar year this premier gold field of the world has furnished a new supply of the precious metal of 1,391,205 fine ounces, or 113,191 fine ounces (9%) more than for the period in 1914, but 132,307 fine ounces (8 11-16%) less than in 1913.

Our foreign export trade, although very materially restricted in some directions, has shown more than counterbalancing expansion in others so that in the aggregate the volume of merchandise leaving the country recently has exceeded all former records for the period. This was true of February, judging by the data for the port of New York, the outflow of commodities for the month covering a value 12 millions greater than in 1914, but even more so of the elapsed portion of March. In fact, for the week ending last Saturday (March 13) the goods shipped from this port were valued at \$40,864,337, a total never even closely approached in a weekly statement and practically double the outflow of 1914. Furthermore, for 4 days of the current week the total reported is \$22,278,893, or about a million more than for the full week in 1914.

Were this a normal development of our outward trade it would be cause for extreme satisfaction, but as the case stands it can only be considered in large part an expansion due to abnormal conditions abroad, since a very considerable portion of the shipments is made up of war munitions and supplies for the armies. Of last week's exports from New York no less than \$14,639,386 were to England and \$4,231,592 to France, while totals in excess of 4 million dollars each to Italy and the Netherlands and of more than 2 million dollars each to Denmark and Sweden and nearly 1 million to Norway apparently indicate that indirect shipments are still in progress to the Teutonic Allies. Much is being the gold held formed nearly 75% of the notes out- made of these large exports; too much, in fact,

when it is remembered that special lines only are being benefited, general mercantile lines continuing more or less depressed. Meanwhile, imports, quite naturally, continue to fall off, further decreasing the national income from that source already measurably reduced by the addition to the free list and the lower rates under the new tariff law.

Depression here, accentuated by conditions abroad, continues to find reflection in our commercial and industrial affairs and in no line more clearly than in the building trade. It does not necessarily follow that a condition of inertia prevails-far from itbut with inactivity apparent in other directions, the demand for buildings has slackened perceptibly, and, in consequence, the amount of work arranged for, month by month, in the country as a whole falls quite a little below that for the corresponding period of the previous year or other recent years. While this is the general situation, evidence of activity is not lacking in some quarters. In fact, in almost every section of the country there are some instances of spurt in construction work. In the boroughs of Manhattan and Bronx of Greater New York, for example, the larger operations noted in January were followed in February by a volume of work contracted for over double that of 1914. The returns from New England cities for the latest months also include two or three of like character, a considerable revival is indicated at a few points in the West, several municipalities in the Middle group report much greater activity than a year ago and the same is even true of two or three localities in the South, notwithstanding the low level at which its staple product (cotton) is ruling. Notwithstanding all this, however, a majority of the cities making returns (94 out of 163) record losses from a year ago.

The February compilation covers reports from 163 cities and indicates a prospective outlay for construction work of \$47,786,379, against \$51,-527,218 in 1914, or a decrease of 7.2%, this following a decline of approximately 10 million dollars, or 16.6% last year, as compared with 1913. The result for Greater New York, however, is conspicuously better than for the month of last year, reaching \$12,159,733, against \$8,257,113, with all boroughs except Brooklyn sharing in the augmentation, but the current aggregate is some 3 million dollars less than two years ago. Outside of this city the estimated expenditures under the permits issued in February total \$35,626,646, against \$43,270,105 and about 46 millions in 1913. As arranged by us in groups, the cities of the New England section as a unit exhibit an increase in outlay as contrasted with a year ago, and in the Middle Division (exclusive of Greater New York) there is only a very small loss; but at the South and on the Pacific Slope large decreases are shown.

For the two months of 1915 the total estimated expenditures at the 163 cities reaches \$91,636,996, against \$102,927,739 in 1914 and 119 millions in 1913, Greater New York's share of the aggregates being 245/8 millions, 173/4 millions and 261/2 millions respectively. Outside of New York this year's quota is 67 millions, which compares with 851/8 millions last year and  $92\frac{1}{2}$  millions in 1913. The New England group of 25 cities furnishes a total of \$12,007,971 for the two months, or only nominally

Middle section (40 cities outside Greater New York) shows but a comparatively small loss. The aggregate for 27 municipalities in the Middle West, at \$19,915,570, on the other hand fall nearly 5 millions below 1914, the greater part of which is to be found at Detroit and with losses at all but two of the 14 Pacific Slope cities, the falling off of nearly 5 millions (this year's total \$7,688,471) is easily understood. The Other Western division represented by 23 cities, likewise, makes a rather poor comparison with 1914-\$6,567,193, against \$9,493,814- and the South's aggregate of \$5,705,448 for 33 municipalities is but little more than half that of the preceding year, such representative cities as Birmingham, Fort Worth and Savannah, in addition to many others, showing up poorly

Canadian building operations for February were in line with those for the preceding month in exhibiting a very decided decline in activity as compared with the previous year. In fact, extreme dulness characterized the course of the industry in most parts of the Dominion, with the outlay really nominal at some important points. At Winnipeg, for instance, this year's permit cover costs of only \$10,400, against \$771,700 a year ago. The total estimated expenditure at 17 cities in the Western Provinces is only \$279,667, against \$1,937,054 in 1914 and \$3,051,044 in 1913, and in the East the comparison for 24 municipilaties is between \$926,437 and \$2,324,142 and \$3,032,697. For the two months of 1915 the aggregate outlay arranged for in the West is only \$402,742 and in the East \$1,514,076, or a total of \$1,916,818 for the 41 cities, against \$7,-694,886 (\$3,304,816 West and \$4,390,070 East) in 1914 and over 12 million dollars in 1913.

Neither Italy nor Greece has as yet decided to enter as an active participant in the European war. The former seems on the verge of a formal declaration against Austria and as the price of neutrality is making demands that Austria frankly announces cannot be granted. Little was heard during the week from Greece until yesterday, when an official statement by the Greek Government denied that there had been any disagreement in the new Cabinet formed by M. Gounaris. But the announcement contained the following highly significant statement: "The Government continues to study the external situation. It will establish its policy on a solid and sure basis that will enable it to obtain precise promises in the event that Greece decides to abandon her neutrality." The statement is interpreted in London as indicating that the new Cabinet may not be so strongly in favor of neutrality as reports from Athens have heretofore indicated and that in a short time Greece will be actively enlisted on the side of the Allies. As to Italy, the obvious policy of the Government is to drive as hard a bargain for continued neutrality as possible and to enter the war on the side of the Allies if the demands are not granted at once. Press dispatches from Rome yesterday stated that war with Austria was inevitable unless the latter returned to Italy all Austrian districts inhabited by Italians. Such were the announcements in editorials in the semi-official newspapers "Tribuna" and "Giornale d'Italia." Their declarations are believed to have been inspired. The Austrian army that had been destined to resume the offensive against Servia has been concentrated on the Italo-Austrian frontier, less than that for the period a year ago, and the where the fortifications have been greatly strengthened. A dispatch published in Rome from Vienna points out that the immediate cession of the Trentino to Italy by Austria is impossible because of military reasons. Austria's frontier would be weakened and the barrier to Vienna removed. The best that Austria would be likely to do would be to promise to cede the Trentino after the war. Germany is said to approve the Austrian point of view and opposes the immediate cession of this territory.

The Bureau of Foreign and Domestic Commerce at Washington has published the result of a careful investigation into the financial resources of the countries at war in Europe, and of war debts that will be The conclusion is reached that the money created. cost is likely to exceed any war expenditure ever incurred. The advices received by the Department of Commerce indicate that the cost to the Powers involved up to January 1, as shown in funded debts, has been as follows: Great Britain, \$1,560,000,000; France, \$1,815,000,000; Germany, \$2,600,000,000; Belgium, \$130,000,000; Austria-Hungary, \$1,815,000,000; Russia, \$2,600,000,000; Servia, \$130,000,000; grand total, \$10,650,000,000. The daily cost of the war is placed by the Bureau of Commerce at \$50,000,000, distributed as follows: England, \$7,500,000; France, \$8,750,000; Germany, \$12,500,000; Austria-Hungary, \$8,750,000; and Russia, \$12,500,000. The relative national wealth of the countries of Europe and that of the United States is estimated as follows: United States, \$150,000,000,000; Great Britain, \$85,000,000,000; Germany, \$80,000,000,000; France, \$50,000,000,000; Russia, \$40,000,000,000; Austria-Hungary, \$25,000,-000,000; Italy, \$20,000,000,000; Belgium, \$9,000,-000,000; Spain, \$5,400,000,000; Netherlands, \$5,-000,000,000, and Portugal, \$2,500,000,000. The European debts prior to the war were: Great Britain, \$3,305,000,000; Germany, \$1,200,000,000; France, \$6,575,000,000; Belgium, \$740,000,000; Austria-Hungary, \$2,450,000,000; Russia, \$4,450,000,000, and Servia, \$130,000,000.

The Allied fleets are continuing to make progress in opening up the Dardanelles. They are, however, encountering active opposition from the Turkish forts. The Turkish Foreign War Office announces that the French battleship Bouvet, a vessel of 12,205 tons, was sunk by the forts on Thursday. Advices from Berlin state that the Bouvet was sunk by a mine and that the British battleship Irresistible was damaged by the forts. A French submarine is also reported to have been sunk in the Strait while trying to torpedo the German cruiser Goeben, now the Turkish cruiser Sultan Selin. It is believed that the fleet is now to receive military support. The naval expert of the London "Times," in yesterday's issue of that journal, confirms this view. He says: "Almost immediately the operation of forcing the Dardanelles must assume a new guise. From having been purely a sea affair it will take on the character of a conjoint enterprise in which the military as well as the naval forces will co-operate. It has been obvious from the outset of the operations that further military assistance will be necessary before the business can be completed." The same expert refers to the dash of the British light cruiser Amethyst through the mine fields in the Dardanelles on Sunday. The vessel was struck by twenty-two shells from the Turkish batteries, but was able to

return, although badly damaged. She lost twentyeight of her crew killed and thirty wounded. The incident, the expert argues, makes it clear that some kind of occupation is necessary to prevent the Turks from attempting any repair work on the inner batteries and placing new guns or howitzers in concealed positions in those intervals when bad weather prevents a continuance of the naval bombardment. He concludes: "The supremacy of ships over forts in gunfire has been amply demonstrated, but under the conditions which will obtain, the task has now become more dangerous. We must not expect its successful accomplishment without some sacrifice." The British Admiralty on Monday announced the sinking of the German cruiser Dresden on March 14 near Juan Fernandez Island.

In the military operations of the week the Allies report they have made substantial progress in the Western war theatre, the British achieving a particularly important victory at Neuve Chappelle. The belief is prevalent in British military circles that the Allies will assume the offensive on a large scale within a short time, and that the new armies are already taking the field. The object of the present British offensive is believed to be to keep the Germans occupied and in check until the time comes for the new forces to strike. The next important battle on the western front will, it is expected, take place along the River Yser, which is held on one side by the recently reorganized Belgian army and on the other by the Germans. In the Eastern operations Russians have again crossed the East Prussian frontier in the Northeast near Tilsit, and are continuing their offensive against the Austrians in Bukowina, but the situation does not appear to have changed in a material sense.

The text of the notes between Washington on the one hand and London and Berlin on the other were made public officially early in the week. The net result appears to be that Germany, as previously announced, is willing to modify its submarine war zone on condition that England permit foodstuffs to go forward to German ports. Great Britain rejects all the American suggestions because of Germany's alleged improper and barbarous conduct of the war, numerous incidents to prove the latter being cited. Furthermore, the British note defends that Government's foodstuffs policy by German precedent. The text of the notes appears on subsequent pages. The area of the blockade will be confined to European and Mediterranean waters. The British Order in Council, formally declaring the blockade of German commerce, was signed by the King on Monday last.

Our State Department has made representations to Japan on the subject of the latter's demands upon China. The representations were individual to this country, although it is known that the American communication was preceded by inquiries on the same lines by the other Powers interested in China, with the single exception of Germany. The American representations are unofficially described as inquiries calculated to draw from Japan a response which will stand as a guaranty of her purposes with respect to China. It is hoped to obtain from the Mikadoan announcement of elimination or modification of the demands which are regarded as dangerous to the preservation of the principle of equal opportunity in China, or else specific pledges from Japan that the effects feared by this Government will not come to pass. A similar course, it is understood at Washington, has been adopted by Russia and Great Britain. The Manchester "Guardian" yesterday published a complete list of the Japanese demands and draws the conclusion that the general effect of the Japanese requirements would be to impair the independence of China and to place entire provinces under the control of Japan. The "Guardian" makes a comparison owners. of the demands as cabled by correspondents at Peking and those published by Japan, and says: "It will immediately be apparent from this comparison that not only have many of the most important demands been omitted from the list as supplied to the

mands been omitted from the list as supplied to the Powers interested, but others had been so modified as to disguise their real character. Thus Japan did not indicate that while she insisted China should agree not to alienate any portion of her coast line or any islands off her coast to a third Power, she retained the right to demand herself the lease or cession of such territory. Neither did Japan let it be known that she demanded exclusive mining rights in the Yang-tse Basin, and that she be allowed to construct railroads which would seriously affect British interests in that region."

Advices from Mexico received at Washington indicate improvement and dispatches to the State Department state that rail and telegraphic communication from El Paso to the Mexican capital will soon be opened. American and other foreigners in Progresso have appealed for asylum on the United States cruiser Des Moines. Secretary of State Bryan is endeavoring to arrange transportation for Americans in Mexico City to Vera Cruz through joint action of Carranza and Zapata in opening the railway lines. Gen. Villa has levied tribute on the residents of Monterey, Mexico, the levy extending to Americans and other foreigners, and including the clerical authorities of the Catholic Church. The levy is for one million pesos. One English concern must pay 70,000 pesos. This has aroused a protest on the part of the British Government. Latest reports state that Villa has delayed the collection of the tax.

A new list of minimum prices authorized by the British Treasury was posted on the London Stock Exchange yesterday. The revised quotations, as a rule, showed a reduction of about 2 points. Consols may now be sold at  $66\frac{1}{2}$ , which compares with  $68\frac{1}{2}$ , the minimum which has ruled since the London Exchange reopened. American issues are not included in the list, the official explanation of their exception being that they may be changed from time to time without reference to the Treasury, to correspond with New York. In other words, the London minimum figures will from now on be the English equivalent of minimum prices fixed by the New York Stock Exchange. While it was only intended that the minimum quotations of the London Board as established on Jan. 4 should remain in force until the end of January, the Stock Exchange Committee made no important changes before the one just announced. The changes in the prices of American securities have, for instance, not been followed in London. Hence, there has been a merely normal market at the British centre for a number of Ameri-

Short-term maturities are reported by London correspondents to be in demand just now because the artificial minimum prices that were current until yesterday were distrusted. Towards the close of the week weakness developed in armament securities and those of other enterprises connected with the war, reflecting the determination of the British Government to take over control of the factories and its announced determination to limit the profits of the owners.

The annual election on the I ondon Stock Exchange will be held to-day. There has apparently been a complete change in sentiment as to the threat that was current immediately after the opening of the Exchange to "turn the committee out." The antagonism against the Stoc Exchange Committee that was current at that time seems to have disappeared, and there is no expectation that opposition of importance will develop. To quote one usually conservative London correspondent, "the affairs of the Exchange have worked smoothly under the plan of the Stock Exchange Committee in connection with the arrangements for re-opening the Exchange which were insisted on by the Treasury Department. The situation is now better understood and the necessity for what at first seemed arbitrary steps is recognized. The management of the Exchange will remain in the same hands that have carried the situation so successfully along thus far."

There seems increasing disposition at the foreign centres to look for serious peace negotiations towards the end of the summer or early in the autumn. A financial writer of some prominence in London, Edgar Crammond, in a paper read on Tuesday before the Royal Statistical Society, argued that the war must end in July because by that time at least some of the belligerents will be exhausted. He estimated the cost of the struggle to the end of July at \$17,000,000,000 and the total ecomomic loss, including damage to property and in other direct and indirect ways, at \$45,400,000,000, Great Britain alone spending up to the end of July \$3,540,000,000. The London "Times", commenting on these estimates, argued that if Mr. Crammond's figures were somewhat exaggerated, those of \$2,500,000,000 for war expenditures to the end of July, as estimated by Premier Asquith were somewhat too low. In line with Mr. Crammond's estimate, the French Foreign Minister, M. Delcasse, in a recent interview, declared that he expected "the war would be over before harvest." It is declared that, although official warnings have been issued against underrating the difficulties of the Allies' task, the French Cabinet shares the prevailing optimism. High hopes are said to be based on the results of forcing the Dardanelles, which is regarded merely as a matter of time.

hish equivalent of minimum prices fixed by the New York Stock Exchange. While it was only intended that the minimum quotations of the London Board as established on Jan. 4 should remain in force until the end of January, the Stock Exchange Committee made no important changes before the one just announced. The changes in the prices of American securities have, for instance, not been followed in London. Hence, there has been a merely normal market at the British centre for a number of American issues that formerly were London favorites.

[Vol. 100.

Ottoman Government in the European struggle. French rentes closed at 71.00 francs, against 71.23 francs a week ago and 69.95 francs a fortnight ago. In a recent address M. Ribot explained in connection with the compulsory closing of the Paris Bourse that "the sums engaged in carry-overs were not as considerable as they had been at other times. They did not amount to 500,000,000 francs on the Bourse and hardly passed 160,000,000 francs on the Coullisse". Referring on Thursday to the enormous expenses of the war, Mr. Ribot said: "Fortunately alongside the prospect of larger expense are reassuring indications of a restoration of the business of the country. The increases in direct taxation have been paid cheerfully by those able so to do, the revenues from indirect taxation are increasing, while the customs deficits are diminishing, and we are able to hope that on the day of peace there will be an exposition of activity in the development of the riches of our country which will permit us to overcome all difficulties." In analyzing the Treasury's operations in 1914, M. Ribot said that the Government had asked for 3,600,000,000 francs (\$720,000,000) of the Bank of France and 1,200,000,000 francs (\$240,-000,000) by public subscription, while in 1915 the Bank of France had supplied about 1,000,000,000 francs (\$200,000,000) and the country had furnished 2.500,000,000 francs (\$500,000,000). Albert Metin, reporting for the Budget Committee in the Chamber of Deputies on the bill authorizing the Government to raise the issue of national defense bonds to 4,-500,000,000 francs, announced that the subscriptions in France to these bonds already had reached 3,-, 003,000,000 francs. This amount added to the foreign subscriptions made a total of 3,684,000,000 francs, of which sum 51,800,000 francs had been placed in the United Kingdom. The bonds bear interest at 5%, payable semi-annually in advance on February 16 and August 16 each year. Their issue price is 96.50 francs, subject to deduction of the interest corresponding to the period of the current half-year that has not elapsed at the time of subscription. The bonds will be redeemable at par on February 16 1925. Beginning with February 16 1920, however, the Treasury will be able to redeem them at par at any date subject to interest. The bonds are exempt from taxation. The bill increasing the limit of the National Defense bonds unanimously passed the Chamber of Deputies on Thursday.

Press advices cabled from Berlin this week have, with the exception of the subscriptions to the new German loan, not mentioned the security markets there. According to reports from a German news agency, nineteen subscribers subscribed a total of nearly 40,000,000 marks, only one of these nineteen taking less than 1,000,000 marks, while the largest subscription, that of the Bochum Savings Bank, was for 5,000,000 marks. The subscribers referred to were chiefly insurance companies and savings banks. In addition to the institutions themselves, depositors of certain savings banks have taken united action in making subscriptions, and two towns also subscribed 1,000,000 marks each. Subsequently a second list was published, consisting of six subscribers who had applied for a total of 35,000,000 marks of the bonds. Three of these subscriptions, it is stated, all from insurance companies, were 10,000,000 marks each.

at Constantinople are making large shipments of gold to Berlin. In connection with the German loan, announcement has come from Chandler & Co., a Stock Exchange house here, that an offer they made to take \$10,000,000 German Treasury notes has been accepted by the German Government. The firm report that half of the total issue has been subscribed by banks and trust companies of this city, and the remainder by institutions and individuals in Philadelphia, Cincinnati and other places. The notes carry 5% interest, have nine months to run and have been sold on a  $6\frac{1}{2}\%$  basis. It is understood that they are to be signed on behalf of the German Government by the German Ambassador at Washington.

Official bank rates have not been changed at the European centres from 5% for London, 5% for Paris, 5% for Berlin,  $5\frac{1}{2}\%$  for Vienna and 5% for Amsterdam. Private discounts at London closed at  $2\frac{1}{4}\%$  for both short and long bills, which compares with  $1\frac{3}{8}@1\frac{1}{2}\%$  for short and  $1\frac{1}{2}@15\frac{5}{8}\%$  for ninety-day bills a week ago. Money in London closed at 1@ $1\frac{1}{4}\%$  for day-to-day funds, which compares with 1% a week ago. A wireless message from Berlin on Saturday last reported call money there at 2%, with the private rate of discount "4% and less." There have been no later reports from Berlin on open market rates and no reports from other Continental centres so far as we have been able to learn.

Still another reduction, namely, of £411,704, in its gold was recorded by the Bank of England in this week's return. There was a contraction of £231,000 in note circulation, so that the total reserves decreased only £181,000. The proportion of reserve to liabilities increased to 25.58%, against 24.47% last week and 45.92% at this date a year ago. Public deposits are £20,824,000 higher for the week, while "other" deposits decreased £29,360,000. The feature of the report was the large reduction of £11,260,-000 in other securities (loans). The Bank now holds £59,465,251 in gold, against £41,170,028 one year ago and £36,862,105 in 1913. The loan item still shows the large total of £115,749,000, as against £43,818,944 in 1914 and £44,823,090 in 1913. Our special correspondent furnishes the following details by cable of the gold movement into and out of the Bank for the Bank week: Inflow, £1,628,000 (of which £1,380,000 bars and £123,000 foreign coin bought in the open market and £125,000 released from the currency note redemption account); outflow, £2,040,000 (of which £627,000 foreign coin sold in the open market, £1,275,000 earmarked Argentina and £138,000 net sent to the interior of Great We add a tabular statement comparing for Britain). the last five years the different items in the Bank of England return:

insurance companies, were 10,000,000 marks each. A dispatch from Bucharest states that German banks of 1,612,000 frances in gold and of 596,000 frances in

silver. There was an increase of 20,023,000 francs in note circulation, of 82,837,000 francs in Treasury deposits and of 27,078,000 francs in general deposits. On the other hand, discounts were reduced 93,389,000 francs, while the Bank's advances were 25,369,000 francs lower. The gold holdings aggregate 4,619,-352,000 francs, against 4,247,445,000 francs in 1914 and 3,815,850,000 francs in 1913. Outstanding circulation aggregates 11,092,527,000 francs, against 5,813,334,000 francs one year ago and 5,677,545,000 francs in 1913.

In local money circles the condition of redundant supplies that has been the feature for several months continues. There has, in fact, been some disposition to modify terms for near-by maturities, while for call money the rate has not exceeded 2% and on two days of the week renewals on Stock Exchange business were on a  $1\frac{3}{4}$ % basis. Few demands of a special character have been made on the market this week. It is reported that subscriptions of \$5,000,000 have been made to German Treasury notes (nine months) on a  $6\frac{1}{2}\%$  basis, and that a similar amount has been subscribed by out-of-town centres. The redundance of money supplies merely reflects the restricted demand of trade and industry. The large exports reported from day to day are deceptive. They comprise very largely grain and other supplies needed in connection with military operations abroad. But general routine exports are in fact backward and the same remark may be applied to importations. Thus the foreign as well as the domestic situation is dull and is not providing by any means the usual demands upon the loanable funds of the banks. So far as exports are concerned, there is, in view of the uncertainty and risks of navigation, a continued disposition to deal with foreign exports entirely on a cash basis.

The weekly statement of the New York Clearing-House last Saturday showed conditions similar to those of the week preceding. There was an increase of no less than \$39,667,000 in loans, indicating the financing of some of the recent large commitments. Net demand deposits increased \$54,621,000 and net time deposits were \$2,294,000 higher. Reserves in "own" vaults increased \$6,057,000 to \$371,604,000 (including \$298,848,000 in specie). Reserves in Federal Reserve Banks increased \$1,405,000 to \$113,-070,000 and reserves in other depositaries increased \$1,743,000 to \$34,111,000. There was an increase of \$9,205,000 in the aggregate reserve, but only \$145,790 in the surplus, to \$129,739,530, which compares with \$23,016,300 a year ago under the old form of bank statement, which required a reserve of 25% instead of the present 18%.

Referring to money rates in detail, call loans have this week covered a range of  $1\frac{1}{2}\%@2$ . On Monday the range was  $1\frac{7}{8}@2\%$ , with the higher figure the ruling rate. Tuesday's highest was 2%, lowest  $1\frac{1}{2}\%$ and renewal basis 134%. On Wednesday and Thursday  $1\frac{3}{4}$ @2% was the range, with renewals at the higher figure on Wednesday and the lower on Thursday. Friday's maximum was 2%, minimum 134% and ruling rate was 2%. Time money closed at  $2\frac{1}{2}\%$  for sixty days, against  $2\frac{1}{2}@2\frac{3}{4}\%$  a week ago, 23/4@3% for ninety days (unchanged), 3% for four months (unchanged), 3@31/2% for five months (against 31/4%) and 31/4% for six months (unchanged). Commercial paper is in somewhat lighter supply,

and ninety-day endorsed bills receivable and for four to'six months' single names of choice character. Names not so well known still require 33/4@4%. The Federal Reserve Bank in New York quotes discounts thirty to ninety days 4% and above ninety days (agricultural bills) 5%.

With free offerings of bills, the sterling exchange situation has continued one of distinct ease. Demand bills on Thursday sold as low as 4 79 5-16. The weekly report by the Department of Commerce for the week ending March 13 at thirteen principal customs districts of the United States showed an excess of exports over imports of \$47,229,659, suggesting a total excess of \$50,000,000 for the week for the entire country when complete returns are available. It is evident that the perils of the war zone are not yet restricting shipments from this side of the Atlantic. The market is still without definite news of any formal credits extended in New York to the British Government, though it is considered not unlikely that the visit of J. P. Morgan, who sailed on the steamer Philadelphia on Thursday, is connected with some form of credit arrangement. With sterling exchange rates fully 4 cents to the pound below the usually accepted gold-import point, it obviously is requiring some form of arbitrary action to prevent importations of the precious metal on a large scale. Nevertheless the week's gold-import arrangements reach the considerable total of \$7,300,000, including shipments of \$150,000 in transit to Cuba from London. Lazard Freres (representatives of the Bank of France in New York) have engaged \$5,000,000 in gold from Ottawa; Ladenburg, Thalman & Co. are bringing in \$500,000, and the Guaranty Trust Co. \$600,000, both also from Ottawa; the Guaranty Trust Co., too, announces \$500,000 from China and the International Banking Corporation \$500,000 from Japan. Goldman, Sachs & Co. have received \$50,-000 direct from London.

In the Continental exchanges the features have been the weakness in German marks and Italian lires, which is not surprising, in view of the acute stage reached in the relations between Italy and Austria. Italian banks have been credited with much activity in selling marks with a view of withdrawing funds and credits from Berlin. Exchange on Paris has ruled weak as a result of active offerings, one institution being reported to have sold fully \$10,000,000 in francs, suggesting that some basis exists for recent reports that a new French credit has been established in New York. The weakness in exchange on Berlin has also undoubtedly been greatly influenced by the so-called English blockade of German ports, which promises to check almost completely the oversea trade to the Fatherland. Further weakness in this direction seems to be quite generally expected. The reported sales of \$10,000,000 of German Treasury bills in New York and other centres failed to stem the decline. Bankers' checks on Berlin closed at 821/8, against 831/s a week ago, and cable transfers closed 83, against 831/4. Bankers' sight on Geneva closed  $1\frac{1}{4}$  lower at  $541\frac{1}{2}$ . The check rate on Paris closed at 5 301/2, against 5 273/4, and cable transfers at 5 2934, against 5 2634. Bankers' checks on Am-sterdam finished at 3958, against 39 13-16 a week ago, and bankers' cables at 39 11-16, against 39 15-16. Italian exchange closed at 5 821/2 for but discount rates remain at 31/4@31/2% for sixty bankers' sight, against 5 7565 a week ago. In

Paris the London check rate closed at  $25.47\frac{1}{2}$  francs, against  $25.37\frac{1}{2}$  francs a week ago.

Compared with Friday of last week, sterling exchange on Saturday was weak and demand declined to 4 791/2@4 79 13-16, cable transfers to 4 797/8@ 4 801/4 and sixty days to 478. On Monday the opening was firm, with an advance, chiefly on a sharp rise in London discounts; later this was counteracted by heavy offerings of commercial bills, and the market eased off, with the range 4 80 1-16@4 803/8 for demand, 4 801/2@4 807/8 for cable transfers and 4 773/4@4 78 for sixty days. Further advances in discounts in London, as well as the announcement of the British blockade, again caused a firm opening here on Tuesday, although extreme dulness and a lack of demand brought about a reaction before the close; demand declined to 4 79%@4 80 5-16, cable transfers to 4 801/4@4 805/8 for sixty days to 4 771/2 @4 773/4. On Wednesday sterling rates continued to recede, following initial firmness due to covering of short commitments; demand went as low as 4 79 11-16, while the high was 4 801/8; cable transfers ranged at 4 80@4 803/8 and sixty days at 4 773/8@4 775/8; an easier feeling in the London discount market and large supplies of commercial offerings were the principal influences for the decline. The downward trend of the past few days was still in evidence on Thursday; cables touched 4 795/8 and demand 4 79 5-16 at one time, with the range for the day 4 795% @4 79 15-16 for cable transfers, 4 79 5-16@4 795% for demand and 4 771/4@4 773% On Friday the market ruled somefor sixty days. Closing quotations were 4 771/8@ what steadier. 4 771/4 for sixty days, 4 793/8@4 791/2 for demand and 4 795/8@4 793/4 for cable transfers. Commercial on banks nominal, documents for payment nominal. Seven-day bills at 4 781/4@4 783/4. Cotton for payment nominal; grain for payment nominal.

The New York Clearing-House banks, in their operations with interior banking institutions, have gained \$6,210,000 net in cash as a result of the currency movements for the week ending March 19. Their receipts from the interior have aggregated \$9,-471,000, while the shipments have reached \$3,261,-000. Adding the Sub-Treasury operations and the gold imports, which together occasioned a gain of \$1,402,000, the combined result of the flow of money into and out of the New York banks for the week appears to have been a gain of \$7,612,-000, as follows:

Week ending March 19.	Into Banks.	Out of Banks.		Change in t Holdings.
Banks' interior movement Sub-Treas. oper. and gold imports	\$9,471,000 19,964,000	\$3,261,000 18,562,000		\$6,210,000 1,402,000
Total	\$29,435,000	\$21,823,000	Gain	\$7,612,000

The following table indicates the amount of bullion in the principal European banks:

e July 30. d Sept. 21.

Last Monday the British Government issued its long-awaited Orders in Council, embodying England's retort to the German program of sinking merchant ships by submarine attacks in the declared war zone, and, to a certain extent, embodying its reply to our Government's note of Feb. 20, proposing a compromise between the German and English policies regarding merchant ships. The British Government's Order, after a preamble describing the action of Germany and asserting the right to reprisal, declared in behalf of the Allies that no merchant vessel, leaving any port after March 1 destined for Germany, should be allowed to proceed; that the goods on board such vessel must be discharged in a British port and referred to a prize court; that no merchant vessel sailing from any German port after March 1 should be allowed to proceed with goods taken on board in Germany; that such goods must also be discharged in a British port and placed in the hands of a prize court, where, if sold, the proceeds would be held unless shown that the goods were neutral property before the issue of the British Order. In general, the language of the Order appeared to protect the reasonable property rights of neutrals while interfering absolutely with their commerce into and out of Germany.

This British Government proclamation seemed to be distinctly unsatisfactory to our Government authorities. It was made known at Washington that our State Department would protest emphatically, if, as appeared, it should develop that this was not a lawful blockade under the terms of international law. It was significant that the word "blockade" was not once used in the Orders in Council, and that no assurance was given against indiscriminate seizure of neutral ships in any part of the ocean. Before lodging protest, however, our Government had placed before the British Government a formal inquiry as to how the proposed embargo was to be carried into effect, and what area of commerce it would cover. These inquiries plainly involved the whole question of a blockade.

The German Government's reply to our proposal of compromise in the war zone matters has already been discussed; in effect, it was conciliatory, though not yielding to all of the American suggestions, and intimating that the United States ought to prohibit shipment of war material to the Allies. Under date of March 13, the British Government replied directly to the same Washington proposal. Its answer was made public last Thursday. The London Foreign Office laid stress on the German treatment of Belgium, on the laying of mines in open waters by Germany, on the policy of sinking merchant ships by torpedoes without warning, and on the instances, as in the case of the American ship Frye, of the sinking of captured ships, even neutral, when such action was not warranted by the exigencies of the situation.

But the more important development in this exchange of views and declarations was the publication on Thursday of the British Government's explicit answer, dated March 15, to our State Department's inquiries as to how the embargo would be enforced. In this document the British Government for the first time uses the word "blockade," thereby ostensibly assuming all the responsibility of maintaining an

igitized for FRASER tp://fraser.stlouisfed.org/ effective cordon about the German coast. In this answer the London Foreign Office describes itself as "most reluctant, at the moment of initiating a policy of blockade, to exact from neutral ships all the penalties attaching to a breach of blockade." It declares its intention "to refrain altogether from the exercise of the right to confiscate ships or cargoes which belligerents have always claimed in respect of breaches of blockade." It assures our Government that "every possible regard has been had to the legitimate interests of the American cotton trade." And it closes by asserting that no interference whatever with neutral vessels is contemplated "outside European waters, including the Mediterranean."

The simultaneous reply to our note of inquiry by the French Government equally admits the existence and responsibilities of a legal blockade. The Paris Foreign Office assures our Government that "it will, not go to the length of seizing any neutral ship except in case of contraband," that "the discharged cargo shall not be confiscated," and that "it is not and it has never been the intention of the Government of the Republic to extend the action of its cruisers against enemy merchandise beyond the European seas, the Mediterranean included." It intimates, however, that "the old methods of blockade cannot be entirely adhered to in view of the use Germany has made of her submarines, and also by reason of the geographical situation of that country."

This joint reply of the French and English governments is undoubtedly very adroit. It shows evidence in every paragraph that the high law-officers of the Government had been at work on it. Its eminently conciliatory tone presents an inevitable contrast with the ill-advised threats at neutrals contained in the original war zone proclamation of the German Admiralty. Our Government has never denied the right of belligerents to blockade the coast of the enemy against all imports or exports. That power was indeed exercised to the full by the United States Government against the Confederacy during the Civil War.

The main purpose of our State Department's recent inquiry at London and Paris was to insist on the form and responsibilities of blockade as known to international law. We now have at least the formal answer on that point. What remains to be seen is, how far the blockading governments are prepared to carry out the legal forms of blockade, in the shape of a patroling fleet outside the blockaded coast. Our own State Department has not yet forwarded to London and Paris either its formal assent to the policy now declared or its formal dissent. In a semi-official statement given to the press, our Government fully concedes the right to proclaim blockade; but it intimates that no formal proclamation to that effect has yet been made. In default of such proclamation, neutral ships may properly be searched only for contraband, and even with a blockade proclaimed the question whether it "has been established in accordance with rules of international law is a question of facts."

It cannot, therefore, yet be assumed that the formal preliminaries to blockade of the German coast have been carried out. Enough has already happened, however, to be distinctly reassuring. There has been much searching of analogies with the situation which led up to our War of 1812. But the attitude now taken by Great Britain and France contains more contrast than resemblance to the

attitude of those governments on similar questions during the Napoleonic wars. Napoleon's Berlin decree of 1806 forbade all trade with England, and declared all vessels with English merchandise on board The subject to capture anywhere on the ocean. English Orders in Council of 1807 assumed an exactly similar attitude. The matter went so far that Napoleon, in his Milan decree of 1807, actually declared any neutral vessel, which had even submitted to search by a British cruiser, to be "denationalized" and subject to capture anywhere; and the British retaliatory orders were equally arrogant. American vessels were in fact actually seized by French men-ofwar in the West Indies and by English men-of-wara short distance away from our own ports.

All such practices are now specifically repudiated in the English and French declarations. It may be that both governments would have preferred to retain the option to resort to such measures; but this is apparently now out of the question. It remains to be seen, however, if the lawful conditions and restrictions of blockade as known to international law will be observed. The Declaration of Paris in 1856, to which all nations subscribed, and which has ever since then been the rule, requires that a blockade "to be binding, must be effective." That is to say, the ships of the blockading power must actually and physically block access to the enemy's ports and must not capture at random vessels on the high seas, merely because of a proclamation forbidding such access. The English and French declarations would naturally involve much closer approach of the Allied fleets to the German ports. If they can absolutely control ingress or egress of ships into those ports, a lawful blockade will have been maintained. If they cannot control such access, the blockade will have been ineffective and broken.

The outcome of this new chapter in the war is not wholly easy to predict. Many strategists have believed that a great naval battle would be, in any case, the inevitable outcome, the result of which conflict would better indicate the time and nature of possible peace negotiations. The immediate effect of the blockade itslef is still less clear. We have already set forth the doubts which surround the theory that Germany can be "starved out." The objections from the standpoint of humanity to cutting off the foodstuffs of a nation still remain; but the adherence of the Allies to a lawful blockade would at least remove the legal objections to them. The British note of March 13, in fact, makes one point of some controversial importance in quoting a speech of the German Chancellor in the Reichstag during 1892, when he stated that "a country may be dependent for her food or for her raw products upon her trade," yet that "it may be absolutely necessary to destroy the enemy's trade."

We imagine that the part of Sir Edward Grey's notes which will least appeal to the humane view of war is the insistence on reprisals. Such retaliation is, unhappily, an established precedent of war, but it is ordinarily used with the utmost circumspection. What its lavish use might mean, as regards the later chapters of the conflict, may be inferred from Thursday's statement by the German War Office that, in view of Russian destruction of German villages and estates, the German army occupying Russian territory will "sacrifice to the flames" three Russian villages and estates for every one pillaged or burned by the Russians in East Prussia.

# SECRETARY REDFIELD'S DIAGNOSIS VRONG-THE PSYCHOLOGICAL REFORMER THE TROUBLE.

Secretary Redfield of the Department of Commerce (created since the Federal Government began trying to correct everything except itself) has furnished to a Chicago journal another installment of reassurance for business. Like the rest of it, this must be interpreted by the general trend of events; of itself, it leaves no definite remainder after being read over, just as a hand passed through a bowl of iridescent suds brings away only a little slippery dampness. Such as it is, however, it starts with incorrect assumptions.

In saying that "the arms of the world are extended to us" for both money and goods, Mr. Redfield merely states what is well known. It is also true, and not denied, that here is no blight of war or earthquake, and that "here resources, human, agricultural, mineral, industrial, are all but untouched; the brains of America have not been damaged; they are just as able to think and plan, are just as alert and acute, as they ever were." This also may pass as true, notwithstanding it cannot rank high as a piece of English composition.

"The great tree of American industry is growing and expanding, until it shall cover many seas and many lands. The bears may have their dens about its roots; they may growl there; they may claw its bark and try to tear it down, but the tree is too strong for them and is growing to a fruitage that will bless us all."

There are no growling and scratching "bears" about the tree. None numerous enough to be called a class are seeking to tear this tree down; but there are a few over-psychological "bears" that are trying to rip out its roots, imagining that they are worm-infested and must be replaced by new roots made at one end of Pennsylvania Avenue in Washington. Here is the whole trouble.

Dropping metaphors, bad and good alike, it is an incorrect assumption that anybody is or has been disheartened about the material resources, the geographical position, the national opportunity, or the individual ability and energetic initiative, in this country of ours; on the contrary, there has been no time when faith in all these was more firmly held or better justified. Nobody doubts that the war will have an end and the arts of peace will make larger demands than ever for brain and hand. The discouragement and pessimism of which so much has been very mistakenly said is not as it has been said to be. The psychological trouble, the state of mind, the mental mourning, and all the other phrases which have been aimed at the country from Washington have been misused and misdirected; the phrasemongers themselves are the psychological ones, and no others. We mean just this : a few men (chiefly one who confesses his own ignorance of business but, unhappily for the country at present, has an unshakable self-confidence which he binds tight upon his eyes) have conceived that all business, as it exists to-day, is wrong and must be done over-torn up and inverted, that it may be inoculated with Government serum. Then, when the country is alarmed and halts for watchful waiting, comes this long trail of soothing talk.

The distinction should be kept clear. The country does not fear itself, or anything to be expected from any other country. It is not afraid of energy, or of a possible exhaustion of materials or opportunities, or of growth, or of industry, or of abundance, or of new problems the future may present. What it does fear is the sort of fourth-dimension psychology which has got into power and the politicans who cater to the lowest grades of intelligence; the country fears this New Freedom. It wants to use its brains and move its limbs; it wants to be let alone; it has no faith in the sunbeam-cucumber fantasies of the experimenters in the Academy of Lagado; it wants the old freedom under which it has grown to its vast size.

Individual men of business, speaking in their own names and associated in the most solid business organizations, have been saying this for a year past; their remonstrances and appeals would make a large volume, and if a half-dozen theorists are right all these men have learned observation and lifelong experience wrong. The confidence which has been disturbed is not to be restored because the disturbers reiterate that it may and should return.

For instance, Mr. Vail tells the stockholders of the telegraph and telephone company that if there could be such renewal of confidence in the future of railway securities as would induce the capital for beginning the expenditure of a part of the 1,000 millions yearly needed to fit the lines for the wants of the country as a "going" and a "growing" concern normal con-ditions would soon return; "the circle of industrial conditions would be again balanced, shops and factories would be filled, and instead of the breadline there would be a workingline night and morning." Mr. H. L. Higginson, a veteran Boston banker, says in a letter in The Market World and Chronicle that "the Government has discouraged business to a remarkable extent". . . no government regulations "have done as much good as the Government can now do by taking its hand off and letting people alone". . . while the best that men of long experience can do "is to manage a single railroad well, fix its rates, meet the various claims upon it, and, in short, adjust matters so that the machine will run smoothly, this Inter-State Commerce Commission of ours undertakes to do all that for everybody, and it is an impossibility."

No; the origin and nature of such pessimism as exists ought to be distinctly recognized.

# "SURPRISE" TESTS FOR ENGINEERS.

When the alien labor law of this State was suddenly pulled out of its obscurity and set as an obstruction before subway building, which is sharply needed, repeal was quickly obtained, because, for once, the public saw, without argument, that here was an issue between class selfishness and public welfare. The case against full-crew laws is almost as clear, yet public opinion has not as promptly procured repeal of those, either here or in New Jersey, and in the latter there is a bill somewhere in the legislative mill which strikingly shows to what preposterous lengths organized labor would like to go. This bill would forbid railroads to apply "surprise" tests for discovering what engineers cannot be depended upon to invariably and promptly obey warning from block signals.

Until the time comes when electricity automatically halts any train which has danger close before it (and it may be said parenthetically that the less railroads are burdened by outside interference the sooner will such conditions of safety be realized), engineers must be left to see and obey a block signal that is "against" them. No person on a train is more exposed than those at the forward end of it, yet engineers have before now complained of having such tests applied, alleging that the unexpectedness of it is unpleasant and is disturbing to the nerves. Perhaps so, and a part of the recurring demand for more wages by engineers harps upon the destructive effects of engine-driving on the senses and the nerves. Work is work, and when it involves a tension that tension is wearing; but railway managers have a direct interest in not making nervous wrecks of engineers. Signals set as a test are no more startling and disturbing to nervous poise than signals set because of a present emergency, and if the test were applied frequently it would cease to startle and cease to be a test.

The complaint is obviously baseless, and perhaps the men who make it would object also to testing for color-sensitiveness before the original employment. The bill somebody has introduced in New Jersey on their behalf actually provides that the roads must give the men written notice of intention to apply signal tests. If this were not so serious it would be humorous; as well send an advance notice of the date when the examiner will arrive at a bank, or stamp the word "decoy" boldly across the address when a letter is posted for the purpose of tracing the exact line on which purloining has begun in the mails service.

The wrecks of a year or two back on the N.Y. N. H. & Hartford road came partly because an impairment of discipline had grown up for which organized labor was in some degree to blame. The wise efforts on a number of important lines to further "safety first" by seeking individual co-operation of the men for precaution and prevention agree with, but must not be allowed to impair, the strict disciplinary obedience that is almost as necessary in railway as in military service. The entire railway problem-of rates, of wages and of details of management-is really one between the roads and the public, and not one between them and the immediate complainants, as to which the public is merely a looker-on. This particular matter at least is of public concern as a factor in safety; and if commissions and legislatures are to be trusted, the public should begin to awake to the dangers from an organized class that cares only for its own selfish desires and is under purblind leadership as to even those.

# THE REPORT OF THE UNITED STATES STEEL CORPORATION.

It is needless to say that every page of the annual report for the calendar year of the United States Steel Corporation—the world's largest industrial organization and at the same time, it is no exaggeration to say, one of the world's most wisely managed industrial concerns—reflects the presence of adverse conditions of no ordinary nature. That the company had to contend with conditions of that sort need not be pressed upon the attention of any of our readers, the fact being so perfectly familiar to all. As a matter of fact, to be strictly accurate, the company had to contend with a whole series of unfavorable circumstances and conditions, all coming in combination.

General trade in the United States was depressed throughout the whole year with scarcely a sign of relief or of promise from beginning to end. This necessarily meant a greatly curtailed general demand for the products of iron and steel. The railroad industry, ordinarily the largest single consumer of iron and steel, and which for many years has been in a most unfortunate plight, during 1914 fell into a worse predicament than before, and, with earnings shrinking and credit becoming steadily more impaired, had to restrict purchases for ordinary repairs and renewals and almost totally cut out improvement and extension work of every character. The outbreak of war in Europe at the close of July dealt the company's export business, which had been so carefully nurtured and so highly developed, a staggering blow.

Thus everything conspired to reduce the volume of business. In addition prices dropped to an abnormally low level. The lowering of tariff duties in October of the previous year had rendered certain a great reduction in prices in any event, but trade depression in this country and the vanishing in the later months of the year of the export business made the situation as to prices hopeless and disheartening. Altogether, conditions for the Steel Corporation were more trying than in any previous period of its existence. A pass was reached where even good management, high efficiency and splendid resources availed nothing. It was impossible to serve a demand which could not be called into being, and thus nothing remained but to meet the situation with stoicism and fortitude. Chairman Gary takes occasion to point out that in the closing quarter of the year operations reached the lowest average, as related to capacity, that has prevailed in any quarter since the organization of the corporation. He also says that the falling off in export business was relatively greater than in the domestic trade, the decrease in the tonnage of rolled and finished products shipped for export having been 37.6%, as compared with 23.3% decrease in the domestic tonnage.

As would be expected, all the statistics in the report present a most striking contrast with those of the year preceding, which latter was on the whole a very good period. The earnings or profits of the properties, after deducting expenses of operation, including those for repairs and maintenance and for interest, sinking fund and depreciation charges, were for 1914 only \$23,496,768, against \$81,216,985 for 1913. It will be remembered that as the situation went from bad to worse, the company first reduced and then entirely suspended the dividend on the common shares. As a matter of fact, the company did not earn enough to pay the 7% dividend on the preferred shares, the call for these dividends being \$25,219,677, whereas, as we have seen, only \$23,496,768 of income was available on the year's operations out of which to pay the dividend.

In addition to this call for the preferred dividends, \$15,249,075 was actually paid out in dividends on the common shares before suspension actually occurred, and accordingly the year's income account shows a deficit of \$16,971,984, against a surplus over and above 5% dividends on the common shares in 1913 of \$30,582,183. Of course the company had an ample accumulated surplus to draw upon in meeting this deficit. The truth is, an undivided surplus of \$135,204,472 still remained at the end of 1914 after charging off the deficit referred to.

As indicating the part played by lower values, the report tells us that the decrease in prices received in 1914 as compared with 1913 averaged \$2 54 per ton on the total tonnage of rolled and other finished products, and accounted in round figures for \$23,000,000 of the total decrease in earnings in 1914. The amount of iron ore mined in 1914 was only 17,034,981 tons, as against 28,738,451 tons in 1913; the limestone quarried 4,676,479 tons, against 6,338,509 tons; the coal mined 21,162,293 tons, against 30,786,573 tons; the coke manufactured 11,173,914 tons, against 16,-663,480 tons; the blast-furnace production 10,052,-457 tons, against 14,080,730 tons; the steel ingot production 11,826,476 tons, against 16,656,361 tons and the tonnage of rolled and other finished steel products for sale 9,014,512 tons, against 12,374,838 tons. The aggregate volume of business done by all the subsidiary companies during the year, as represented by their combined gross sales and earnings, equaled the sum of \$558,414,933, as compared with a total of \$796,894,299 in the preceding year. This is a shrinkage, it will be seen, of \$238,479,366; \$82,-344,712 represented the loss on inter-company sales, still leaving, however, a falling off of over \$156,-000,000.

The effect of all this on the company's pay roll was most striking, demonstrating that in the last analysis the burden of depression and unfavorable conditions falls in the main upon the wage-earning classes. For 1914 the average number of employees was only 179,353, against 228,906 in 1913; that is, roughly, 50,000 less men were employed in 1914 than in 1913. The amount paid in salaries and wages was only \$162,379,907, against \$207,206,176. In other words, about \$45,000,000 less was paid out in wages and salaries. The average wage per employee, which had advanced from \$2 68 in 1912 to \$2 85 in 1913, advanced still further to \$2 88 per day in 1914.

The total output for the year of all classes of rolled and other finished steel products for sale equaled only about 62% of the total annual capacity of the plants. It is pointed out that the decrease in production was especially marked in the case of materials used largely by railroads and in heavy construction and important development work. Thus, of steel rails the make in 1914 was only 978,907 tons, against 1,927,745 tons in 1913, a decrease of 948,838 tons, or 49.2%; of angle bars and rail joints 129,849 tons, against 256,676 tons, or a decrease of 49.4%; of plates 689,241 tons, against 1,108,147 tons, or 37.8% decrease, and of heavy structural shapes 613,739 tons, against 998,624, or a decrease of 38.5%.

The Corporation naturally curtailed development and extension work wherever possible, and yet it appears that the expenditures made during the year by the subsidiary companies and chargeable to capital account for the acquisition of additional property and for additions and extensions to the plants and property (less credits for property sold), including expenditures for development work and for the erection of additional logging and structural equipment, aggregated no less than \$23,171,013. Notwithstanding these outlays, aggregate funded debt was slightly decreased during the year; \$9,407,000 of new bonds were put out, but \$9,535,264 of old bonds were acquired or retired. Yet the consolidated balance sheet shows that the Steel Corporation was nearly as strong in cash December 31 1914 as on December 31 1913; cash on hand and on deposit at the first

mentioned date being \$61,963,286, against \$66,951,-010 at the end of 1913. Total current assets December 31 1914 (including cash) were only \$269,069,578, against \$303,757,733 on December 31 1913. But this is due to a reduction in the inventories and also to a reduction in the accounts receivable from \$58,-024,386 to \$37,088,352, this following from the fact that, with the volume of business so greatly reduced, there would naturally be a great reduction in the outstanding accounts uncollected. On the other side of the balance sheet there has been a great decrease in the current liabilities, which at the end of 1914 aggregated only \$41,876,828, against \$58,-577,060 on December 31 1913.

A feature of encouragement for the immediate future is found in the fact that since January 1 1915 there has been, according to the report, a material improvement in the booking of export business, which at present is said to be equal to the average of the last three years. Furthermore, the unfilled orders of all kinds on the books of the subsidiary companies March 1 1915 were 4,345,371 tons, against but 3,836,643 tons on December 31 1914.

# RAILROAD GROSS AND NET EARNINGS FOR JANUARY.

Every new statement of railroad earnings that is compiled now-a-days tends to emphasize the unfortunate condition of the railroad transportation industry under the shrinkage in traffic and the decline in revenues that has become the common experience of all the roads. We present to-dayour final compilation of the gross and net earnings of United States railroads for the month of January and it serves to illustrate anew the general and widespread falling off in revenues. The ratio of decrease is not as large as it has been in some other recent months, but no favorable conclusion is to be drawn from that fact alone, inasmuch as comparison now is with heavily reduced totals last year, so that this year's losses come on top of losses in 1914 and are cumulative in nature. As far as net earnings are concerned, the further loss the present year is being kept down to a minimum by the practice of most rigid economy with retrenchment in every direction. Accordingly the small extent of the decrease in net is not precisely a feature of an assuring nature.

In the gross our compilations show a falling-off in January this year as compared with January last year of \$16,598,551, or 7.01%. This loss has been met by a reduction in expenses of \$15,707,569, leaving, therefore, a loss in net of only \$890,982, or 1.70%, as will appear from the following statement:

$1914. \\ 243,559 \\ \$236,880,747 \\ 184,406,773$	Amount. +3,400 -\$16,598,551 -15,707,569	% 1.40 7.01 8.52	
	243,559 \$236,880,747	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$

If the foregoing results stood alone, the showing would not be so bad, and we have recently become rather accustomed to much larger decreases. But, as already stated, the showing in January last year was also poor—in some respects even more so than the present year, and this deprives the reduction in the 1915 decreases of any special importance. Stated in brief, our compilations for January last year registered \$16,884,807 decrease in gross, or 6.75%, and no less than \$12,451,572 decrease in net, or over 19%. To be sure, if we go back a year further we find that the 1914 losses succeeded very heavy gains in both gross and net in 1913. On the other hand, the large gains of January 1913 were themselves in part merely a recovery of exceptionally heavy losses in January 1912, when the winter weather experienced was the worst encountered in a generation. Stated in brief, our tabulations in January 1913 registered \$38,128,677 gain in gross and \$18,-781,777 gain in net. On the other hand, in January 1912 our compilations recorded a decrease of \$2,440,-307 in gross and of \$7,019,714 in net. The showing was unfavorable, too, in January of the year preceding, namely 1911, inasmuch as, though there was then a gain in the gross, it was very small, reaching only \$4,248,770, while in the net earnings there was an actual loss of \$3,483,309. Furthermore, in 1910 a gain of \$27,776,971 in gross yielded an addition of only \$6,918,577 to net. Below we furnish a summary of the January comparisons for each year back to 1896. For 1911, for 1910 and for 1909 we use the totals of the Inter-State Commerce Commission, but for preceding years we give the results just as registered by our own tables each year-a portion of the railroad mileage of the country being always unrepresented in the totals, owing to the refusal at that time of some of the roads to give out monthly figures for publication.

1915 1220,282,1961236,880,747 16,593,551151,582,992/52,473,974						

1903, 105; in 1904, 103; in 1905, 94; in 1906, 100; in 1907, 97. In 1908 the return were based on 157,629 mHes of road; in 1909, [331,970; in 1910, 239,808; in 1911 242,479; in 1912, 237,888; in 1913, 235,607; in 1914, 243,732; in 1915, 246,959.

In case of the returns of the separate roads the same observation is to be made. That is, comparison is in most cases with poor exhibits the previous year, correspondingly reducing the losses the present year and in some instances, at least in the net, converting a loss in gross into a gain in the net. In the great majority of cases, however, there are losses in both gross and net and they are not small either, as a rule. On the Pennsylvania RR. lines directly operated the loss in gross amounts to \$1,521,674 and the loss in the net to \$981,549. The New York Central reports \$84,657 decrease in gross, but through a heavy reduction in expenses has converted this into a gain of \$962,913 in net. Including the various auxiliary and controlled roads, the whole going to form the New York Central System, we have a loss of \$341,808 in gross but a gain of \$1,622,506 in net. Last year in January the result was the exact reverse, the return then showing a loss of \$3,071,698 in gross and of \$3,600,822 in net. The Pennsylvania RR. last year in January had a loss of \$2,870,947 in gross and of \$1,419,410 in the net.

Savings in expenses the present year have been sufficient in a number of cases to change a loss in gross into a gain in net. Thus, the New York New Haven & Hartford RR., with \$221,062 decrease in gross, has \$516,899 increase in net, and the Boston & Maine, with \$120,357 decrease in gross, has \$264,700 increase in net. The Baltimore & Ohio a This is the result for the Pennsylvania RR., together with the Pennsylvania Pennsylvania RR. reporting \$297,217 decrease, the Pennsylvania Company & Maine, with \$120,357 decrease in gross, has

has nearly converted a loss in gross into a gain in net, it reporting \$915,396 decrease in gross but only \$36,340 decrease in net. The Erie actually has \$144,109 gain in gross, and at the same time has curtailed expenses, the two together producing an improvement of \$397,174 in net. The Lehigh Valley has \$141,835 gain in gross and \$106,658 gain in net.

The Chesapeake & Ohio, with \$98,919 decrease in gross, has \$60,685 increase in net and the Illinois Central, with \$206,307 loss in gross, has \$102,749 gain in net, while the St. Louis & San Francisco, with \$283,299 decrease in gross, has \$278,260 increase in net. The Atchison has \$528,758 increase in gross and \$339,297 increase in net. There are some instances of the opposite nature, that is, where a loss in gross has been accompanied by an augmentation in expenses, producing a double loss in net. The Milwaukee & St. Paul belongs in this category, it reporting \$342,640 loss in gross and \$466,729 loss in net; the Missouri Pacific belongs in the same category, it falling behind \$393,277 in gross and \$439,826 in net. Poorest returns, as far as gross are concerned come as a rule, from Southern roads, and are to be ascribed to the unfortunately low level of values ruling for cotton, but here, too, the shrinkage in revenue has been tempered somewhat by reductions in expenses. The Louisville & Nashville, with \$879,850 decrease in gross, has only \$155,305 decrease in net, and the Southern Railway, with \$1,-085,966 decrease in gross, has only \$355,466 decrease in net, while the Atlantic Coast Line has \$562,385 loss in gross and \$133,610 loss in net and the Seaboard Air Line \$477,741 loss in gross and \$201,507 loss in net. In the following we show all changes for the separate roads for amounts in excess of \$100,000. whether increases or decreases, both in the gross and in the net.

\$401,829 loss and the P. C. C. & St. L. \$282,503 loss. Including all lines owned and controlled which make monthly returns to the Inter-State Com-merce Commission, the result is a loss of \$1,057,780. b These figures cover merely the operations of the New York Central itself. Including the various auxiliary and controlled roads, like the Michigan Central, the "Big Four," the "Nickel Plate," &c., the whole going to form the New York Central System, the result is a gain of \$1,622,506. In the gross the loss was \$341,808.

Arranging the roads in groups or geographical divisions, it is found that every division falls behind in the gross, but that such has been the length to which the reduction in expenses has been carried that three of the groups record improvement in the net, these three being the New England group, the Eastern and Middle States group and the Middle Western group. Our summary by groups is as follows :

SUMMAR	Y BY GRO	JUPS.		
		-Gross Ear	nings	
Section or Group— January—	1915. S	1914. \$	Inc. (+) or De	×.()
Group 1 (17 roads), New England	10,123,032	10,581,410	-458,378	4.33
Group 2 (88 roads,) East & Middle	58,697,001	61,407,904	-2,710,903	4.41

# THE AMERICAN TELEPHONE & TELEGRAPH COMPANY.

The Bell Telephone system furnishes a wonderful record of growth and development-and of prosperity as well. The annual report of the company, submitted this week for the calendar year, shows that that growth continued in 1914, notwithstanding the unfavorable business conditions ruling throughout the country. The explanation is found in the dicta of President Theodore N. Vail, when he says that the telephone business is peculiar in that it is the last to feel depression and the first to recover from it. While the year's business shows an increase, it is not the normal increase. The addition to the number of subscriber stations was only about 76% of the number added in 1913 and was less than in any one of the four years previous thereto.

It is pointed out that this smaller net growth was not so much due to the falling-off in new subscribers as to the unusual number of disconnections. Ordinarily, for about three new stations added there is a net gain of one. In 1914 the proportion was nearly four new stations for a net gain of one. In traffic, the number of all messages shows the small gain of slightly over 2%. Most of the retardation in growth occurred in the latter half of the year and steps were at once taken to reduce the expenditures for new construction by postponing such extensions as were not immediately needed. Nevertheless, \$50,000,000 was actually spent for new construction work during the year, notwithstanding the restriction-which shows the magnitude of the Bell system

and the constant new capital requirements for its expansion and proper development.

Nothing impresses the student more than the size and extent of the Bell system as revealed in the statistics from year to year. At the end of 1914 the total mileage of wire in use for exchange and toll service was 17,475,594 miles, of which 1,364,583 miles were added during the year. What will, perhaps, be most surprising is that out of the total wire mileage 9,760,165 miles are underground, including 601,817 miles of toll wires in underground cables. The underground conduits represent a cost of \$90,000,000 and the cables in the conduits \$104,-200.000-a total in underground plant of \$194,200,-000. The daily average for 1914 of toll and exchange connections was 27,848,000, or at the prodigious rate of 8,967,000,000 per year. This will sound like a fairy tale, but is an actual record of fact.

During the year \$73,091,000 was applied out of revenue to maintenance and reconstruction purposes. The total provision for maintenance and reconstruction charged against revenue for the last ten years was \$504,000,000. The plant additions for the last 15 years have aggregated \$696,960,500. In some years the amount required for this purpose has exceeded \$75,000,000 and for 1914, as already stated, the expenditure was \$50,045,300. For the year 1915 it is estimated that the current additions to plant will aggregate about \$35,000,000 and construction work is now proceeding on that basis. Business conditions, however, are carefully watched, and should they improve, the construction program will be modified accordingly and the prospective outlays increased to the required extent.

As indicating how promptly the Bell system responds to the demands made upon it by the public, it is pointed out that from 1906 to 1914 construction work in the Bell plant was done to an amount of more than \$700,000,000. During the nine years from 1905 to 1914 the capital obligations of the Bell Telephone system in the United States (all duplications between companies excluded) increased from \$389,018,100 to \$820,929,181. During the same nine years gross revenue rose from \$97,500,100 to \$225,952,123 and the net revenue from \$31,310,700 to \$59,247,279. At the end of 1905 the total of surplus and reserve was \$63,698,000. At the end of 1914 it was \$189,955,149. As concerns the American Telephone & Telegraph Co. proper, the results for 1914 show a surplus of \$4,762,139 on the year's operations over dividends.

In a letter addressed to the security holders, supplementing the annual report, Mr. Vail sets out his views respecting the general business situation and the course which should be pursued to effect a restoration of prosperity. In his opinion, the correction is simple and is pointed out by numerous precedents of the past and by well-established economic laws. The extension and improvement of our transportation facilities is necessary to meet the increasing demands of the country both as a "going" and a "growing" concern. A billion dollars a year are needed, and there must be a restoration of confidence which will enable the companies to procure at least a part of this necessary capital. That would mean employment and the circle of industrial conditions would be again balanced. For "employment means ability to purchase. Ability to purchase means consumption. Consumption means production and production for which there is a demand means prosperity."

#### THE WESTERN PACIFIC AND GOVERNMENT OWNERSHIP.

The following communication is self-explanatory: New York, March 16th 1915.

Editor Commercial & Financial Chronicle. Dear Sir—In this morning's "Sun" I notice a statement issued appar-ently by Mr. Bush, President of the Western Pacific Railroad, in which he other

ently by Mr. Bush, President of the western Facilic Railroad, in which he states: "San Francisco, March 15.—'I know of no one who could more success-fully operate the Western Pacific Railroad than the Federal Government, said B. F. Bush, President of the road, in summing up to-day his opinion of the probable fate of the bankrupt line. " The Government would be the one most financially able to construct the feeders and branches necessary to the continued life of the road. My conclusions are drawn merely from a comparison with the Government's operation of the Panama Railroad, the only basis of comparison we have. " 'I would be asking too much of you to give your readers the sum charged by the said Panama Railroad for having passengers and freight per mile?

by the said Panama Railroad for hauling passengers and freight per mile? I thought maybe this might be of some interest to your numerous readers. Very truly yours, M I OUINN

#### M. J. QUINN.

The query here put is a pertinent one. The passenger rate per mile on the Panama RR. is not materially different from that on the Western Pacific, being 2.11 cents, while that on the Western Pacific is 2.02 cents per passenger per mile. Freight rates, however, are more than five times as high. The average per ton per mile on the Panama RR. in the fiscal year ending June 30 1914, was 4.35 cents; in 1912-13 the rate was 3.48 cents; in 1911-12 3.99 cents; in 1910-11, 4.14 cents; and in 1909-10, 5.61 cents per ton per mile. On the other hand, the Western Pacific in the year ending June 30 1914, realized only a little over three-quarters of a cent per ton per mile-in exact figures, 785 thousandths of a cent. Had the Western Pacific been able to realize the same average rate as that realized by the Panama RR. (supposing such a thing possible, in view of the competition of the other trans-continental lines) its freight earnings would have been \$25,918,464, instead of amounting actually to only \$4,675,-940

With this 20 million dollars additional income each year, the Government as the putative owner of the Western Pacific, would be "financially able" to construct branches and feeders out of earnings. Mr. Bush evidently knows what he is talking about. But while it might be "agreeable" to Mr. Bush and the security holders to have the Government become the owner of the property, we imagine there would be a kick coming from the shippers and the general public on the basis of the rates assumed.

# BANKS PROTECTED IN LOANING ON HYPOTHE-CATED SECURITIES OF BROKERS.

In the New York Supreme Court at Special Term (Part V, County of New York), Justice Shearn has just handed down a decision of great interest and importance to banks and stock brokers alike. The point at issue was the right of a stock brokers' firm to pledge with banks as collateral for money borrowed, securities purchased for or received from a customer for whom the firm was carrying a speculative account on margin. The Court lays down the following propositions:

(1) To hold or carry stocks does not mean to keep the identical shares or to keep the specified number of shares in the broker's safe deposit vault free and ready for delivery on demand; it means readiness and ability to deliver the shares under the rules of the Stock Exchange upon payment therefor. (2) Even had the customer succeeded in establishing that the delivery and pledge by him of quasi-negotiable securities as margin had been procured by false representations, he could not recover the securities from a bank with which they had been pledged by the brokers as security for a loan. (3) The bank was not put on inquiry and notice by reason of the fact that certificates of stock so pledged and re-pledged stood in the name of the customer and not in the name of the brokers.

The action was brought by William P. Fisher, a customer of the failed firm of Stoppani & Hotchkin, against the Mechanics & Metals National Bank of this city. The plaintiff had pledged as margin on a speculative account with the firm named certain certificates of stock indorsed in blank and unregistered bonds. He sued the defendant bank, with whom the brokers had in turn pledged the securities as collateral to a bank loan, for the return of the securities on the ground that the brokers, who subsequently became bankrupt, had procured the original pledge by fraudu-lent representations. The brokers and the bank's assignee of certain of the securities and the general assignee of the bankrupt firm were joined as defendants.

The representations alleged consisted in the main of written monthly statements of account rendered by the brokers

to the plaintiff during a period of three years. These statements were in the usual debit and credit form showing purchases and sales made under and pursuant to the rules, regulations and customs of the New York Consolidated Stock Exchange, and showing the state of the account between the brokers and the customer. Plaintiff claimed that these statements, reasonably construed, represented that the brokers had purchased and were holding according to the manner of legitimate brokers and members of the Exchange, the shares of stock reported on the statements as bought for the account of the plaintiff, and further represented that plaintiff was actually indebted to the brokers for the purchase price of all of the stock as set forth in the monthly statements. In particular the plaintiff alleged that from April 29 1910 to May 18 1914 these statements represented that the brokers were holding for plaintiff's account at least 400 shares of the common stock of the American Smelting & Refining Co., referred to generally as "Smelters." These representations were alleged to have been false, known to be false by the brokers, made for the purpose of inducing plaintiff to make further deposits of marginal security, and relied on by the plaintiff in delivering the collateral in suit.

The Court, after a careful analysis of the statements of account offered in proof of the allegations made, reached the conclusion that the brokers had been holding and carrying, under the rules of the Exchange, a greater number of shares than plaintiff was entitled to demand on payment of his account, and the alleged representations were not proved to be false. There was a valid debt and a valid pledge.

Justice Shearn then goes on to say: But even had the plaintiff succeeded in establishing that the delivery of the bonds and the indorsed certificates of stock in pledge were procured by false representations, he could not recover the securities from the bank with which they had been pledged by the brokers as security for a loan. The securities were quasi negotiable, and the bank was a bona fide holder, having taken the securities in due course with other collateral for a loan of \$49,000. A blank transfer of a certificate of stock with an irrevocable power of attorney to transfer simple by the preserve the amount is the having taken the securities in due course with other collateral for a loan of \$49,000. A blank transfer of a certificate of stock with an irrevocable power of attorney to transfer, signed by the person who appears by the certificate to be the owner, confers upon the holder of the certificate apparent title to the stock, and the bona fide transferee of such stock from the holder can hold the stock against the real owner, who is estopped from asserting his title (McNeil vs. Tenth Nat. Bank, 46 N. Y., 325; Talcott vs. Standard Oil Co., 149 A. D., 694; Mitchell vs. Boyer, 160 A. D., 565). The reason for this well-settled rule is that where one has conferred upon another apparent ownership, it is contrary to justice and good conscience to permit him to assert his real title against an innocent purchaser from one clothed by him with all the indicia of ownership and power of disposi-tion. Another reason for the rule is that such a case calls for the applica-tion of the legal maxim that where one of two innocent parties must sustain a loss from the fraud of a third, such loss shall fall upon the one, if either,

tion of the legal maxim that where one of two innocent parties must sustain a loss from the fraud of a third, such loss shall fall upon the one, if either, whose act has enabled such fraud to be committeed (Moore vs. Metropoli-tan Nat. Bank, 55 N. Y., 46). It is true that there is an exception to this rule, where the instrument claimed to create the estoppel is obtained by common-law larceny. It is argued on behalf of plaintiff that because obtaining property by false repre-sentations is larceny under the statute, the same rule, so far as estoppel is concerned, should apply no matter what the character of the larceny. This argument ignores the reason for the exception in the case of common law larceny, which involves a taking against the will of the owner. Obviously, there can be no estoppel by virtue of an act that is done unintentionally against one's will. The radical distinction between common-law larceny and larceny by false pretenses is well settled (People vs. Dumar, 106 N. Y., 502; People vs. Miller, 169 N. Y.; 339). As was said in Green vs. Grigg (98 Å. D., 445, 449): "The claim of the plaintiff rests upon the principle that the property was obtained by larceny, and, therefore, no title passed to the purchaser, but we think a plain distinction exists between a larceny by which the property is taken without the knowledge or consent or against the will of the owner and one by false representations." But plaintiff claims that the bank was put on notice and therefore is not

But plaintiff claims that the bank was put on notice and therefore is not a bona fide holder. This, by virtue of the fact that the certificates of stock stood in the name of the plaintiff and not in the name of the brokers. This point is without merit. It is common knowledge that certificates of stock standing in the name of an original owner and indorsed in blank are dealt in the name of the plaintiff and over a main discrete in the name of the stock. point is without here. It is common knowledge that certificates of stock standing in the name of an original owner and indorsed in blank are dealt in thousands of times and during a period often of many years, without change of name of the original owner, although title has changed on innumerable occasions. But even if the bank had been put on inquiry and had sent for the plaintiff and questioned him concerning the brokers' right to pledge the stock, it would have learned nothing that would even have warranted a suspicion. The plaintiff would have been obliged to inform the bank, speaking truthfully, that he had pledged the securities with the brokers and that the brokers were authorized to re-hypothecate the same: and, further, that he had even signed a consent that the securities might be pledged for a greater amount than his indebtedness to the brokers. Inquiry of the brokers would have been fruitless. Even assuming that plaintiff were right in his contention that the brokers were unable on the day of the pledge to deliver all purchased stock to customers on demand, and that this was evidence of a fraud practiced by the brokers upon their customers, the facts could only be ascertained by the bank after putting experts upon the brokers' books. It has taken nearly a week to develop the state of the accounts upon this trial, and even now their significance is in dispute. It is unreasonable to impose any such obligations on banks in making loans upon quasi negotiable instruments. Business could not be transacted on any such basis and the law imposes no such unreasonable burden.

#### THE NEW BOOK OF CHRONICLES-BUSINESS GOES TO SCHOOL.

[From the Chicago "Railway Review" of February 27.! Now it came to pass in the second year of the reign of the high-priest Woodrow, the first of the schoolmaster dynasty that the tribes of the traders of the nation came up together to the chief city of the rulers which is at one side of the land as beseemeth the fact that the scribes and pharisees of the people can look only on one side of things and wear political blinders under the mandate of the high priest. From the forges and the furnaces

came the workers in metals-the descendants of Tubal Cain. From the mills came the weavers of garments, the workers in wood and the fabri-cators of utensils, the producers of all that enters into the alimentation, the protection and the decoration of the bodies of the people. From the marks came the dealers, the distributers, the money changers. The vast caravans came together in their yearly feast in the tabernacle which they term in the language of the caste their National Chamber.

caravans came together in their yearly feast in the tabernacle which they term in the language of the caste their National Chamber. In sackcloth and ashes came they chanting the dirges of famine and bewalling the desuctude of their crafts. And they sent a message to the high priest, saying unto him : "Great is Woodrow of the Cloisters. In-cline thine ear unto us and wheel thine ear flap to usward. Let not thine anger burn against thy servants, for the publicans, the tax gatherers and the inquisitors have gone over the land until we know not whither to flee. Behold we have come up from the deserted khans of business, from smok-less chimeys, from silent mines; and with the cries of the unemployed ringing in our ears. Tell us, we beseech thee, with our heads in the dust, what meaneth this "new freedom"? For, whereas, since the walls of Jericho fell, it hath not been known that any ruler commanded the sun to stand still and gravitation to work upwards, thou hast issued decrees that tubs must no longer stand on their own bottoms, that demand and supply must be separated, that industrial peace must stop, that fighting must be the rule of trade, but that the spoils shall go to the under dog. Now, whereas, we cannot all be under dogs, but in every fight there must be an upper dog, therefore are our souls sorely vexed within us. Vouchafe unto us to know what meaneth this "new freedom," which sendeth us to the galleys under the political taskmasters to make brick without straw. For, whereas, even in the law of the Medes and Persians it was known that "ten mills make one cent" we now find that neither ten mills nor any number of mills make a cent. Behold fear hath taken hold upon us, our knees shake, and we see not into the thick clouds which envelope our pathway. Thereupon the curtains of the temple were drawn aside and the high

envelope our

velope our pathway. Thereupon the curtains of the temple were drawn aside and the high priest appeared unto them clad in his smiles of office, his countenance annointed with the oil of gladness, and honey trickling from his lips. And he opened his mouth and spake unto them, saying: "O ye of little faith; how is it that ye distrust the leaders whom the people have chosen? Know

he opened his mouth and spake unto them, saying: "Our nips. And how is it that ye distrust the leaders whom the people have chosen? Know you not that you are blind and ignorant and that your hearts are desper-ately vicked within you? Else how is it that you have accumulated flocks and herds and lands and houses? Know you not that it is written "From him that hath shall be taken away that he hath", and have not I been chosen to break the legs of business and set back the wheels of time? For the hardness of your hearts and the protuberance of your bellies have I not blistered you and bled you? On squills and anti-billous pills and ipecac I've fed you. Is it not necessary to destroy, before we can build up; and must I not raze before I can raise? Behold am I not laying deep the foundations of the new temple of freedom, with you under them? How is it that you are able to come on this pilgramage? Know you not when you are dead? As for these my political children, have they not come from the deserts and the wilderness, where alone is clarity of vision and solid thinking? Whereas you from your very numbers are incapable of knowledge and communicate your thought by contagion. Know you not that prophets and seers of all ages have received light and wisdom far from the haunts of men? And are not we who have never known the soli of trade nor breathed the smoke of industry the real prophets? Are we not the Moses to lead you out of the wilderness which you call "business"? Why do you long for the flesh pots and leeks of Egypt? For behold when I have found the way, shall I not take the little man, the weakling and the defective, and set them on high? Behold there shall be no more cakes and ale for the workers, for we will highly exalt the drone and penalize intelligence and industry. And there shall penetrate even the thoughts and intents of the heart and there shall no more be hidden anything, but all shall be revealed, that all may know. And what shall it profit a man to know what everyone knows? Am I not the prophet who profit?

profit? Go to now! Go to your homes while you have yet homes to go to! For the besom is after business and before you take to holes in the ground, go out to the country and learn of the little banker and the small store-keeper how to dig holes. Are there not horse-traders and Indian medicine men who can give you aces and faces and points on business? What is it ye seek here? Know you not that your day has gone—that the mouth is now mightier than arm and brain; and that the new freedom is built upon wind and cannot be shaken? Then said certain of their own leaders unto the hosts who murmured

built upon wind and cannot be shaken? Then said certain of their own leaders unto the hosts who murmured within themselves, "Hush 'sh' is not the High Priest a charming speaker? Did not our hearts burn within us as he roasted us so gracefully and to the king's taste. Surely we are now well done. Let us be good and faithful servants and go home and take our medicine! For hath not Woodrow suborned certain of our number and seduced them by personal preferment. Let us sit down hard on those of the tribes who would clamor that something be done. Wherefore should we do anything when we are already done for?"

already done for?" And they folded their tents like the Arabs and as silently stole away. Selah.

## A CAUSTIC CRITICISM OF THE PRESIDENT'S POLICIES.

That the business depression is "more than 'a state of mind'" was the assertion which characterized an address delivered by Henry D. Estabrook, of the New York law firm of Noble, Estabrook & McHarg, at the Commercial Club of Chicago on the 13th inst. "Some History and Some Questions" was the title under which Mr. Estabrook addressed the gathering. He declared that "we are fly-blown with laws deemed necessary to safeguard a New Freedom that cannot be distinguished from an Old Thraldom-that no man to-day can do business and be legally honest if he tries, and if he is only morally honest he is headed for the lock-up." We take from his remarks the following:-

Now, when business in the United States, and especially in Chicago, has become a yawn, or mere bustle, instead of hustle, something alls the body politic. It is more than "a state of mind," a certain brain specialist to the contrary notwithstanding, and we should lose no time in summoning a

doctor. President Wilson, who stalked into office over a *pons asinorum* built by his opponents, entered upon his duties with a popular feeling for him made up of curiosity and respect. He was the only college professor who had ever stepped from a class-room over a State capital and into the White

RONACLE [VOL. 100.]
House. Curiosity was justified. So was respect, for his mental strength was conceded, and no one doubted his loyalty of purpose. Thousands of Republicans had voted for him for one reason or another—principally one—and wished him well. To be sure, no Republican reared in the school of Hamilton could regard hopefully a program that challenged every article of his faith. But he could at least be tolerant and even admit to himself that, possibly, Wilson knew more than Hamilton. He was willing to be shown—he was from Missouri. His attitude was one of watchful was shown—he was from Missouri. His attitude was one of watchful waiting; it has since become a Madame Butterfly vigil. The President himself never doubted for a moment the validity of his *credenda*. He has assumed from the start all responsibility for the accomplishment of his program, and is undoubtedly entitled to all the credit for whatever has thus far been achieved under it. He allowed no brother near the throne—but was somewhat partial to his Seven Sisters. When your political dilletante comes into power he is Oriental in his despotism, and this has been so from the beginning of time. You would say, off-hand, that it was a moral duty and an obvious necessity that a President dr. Wilson has virtually dispensed with Cabinet meetings, though really, when you come to think of it, he may be justified in so doing.
Ordinarily, one would suppose that Mr. Wilson has virtually dispensed with Cabinet meetings, though really, when you come to think wilson disclaims any practical knowledge whatever of business, but deems himself, for this very reason, all the better undified to deal with the impartial sould know the syntax of business before he undertakes to parse it. Mr. Wilson disclaims any practical knowledge whatever of business, but deems himself, for this very reason, all the better qualified to deal with the impartial with an aloof. It leaves him at liberty to try out certain theories untramismismelf, for this very reason,

for the collection of imposts, but these no longer amount to much. But the problem of raising revenues is the most fundamental problem

But the problem of raising revenues is the most fundamental problem of any Government, next to the development of its natural resources. I do not believe that a policy adopted by our Government at the very beginning of things; which has served not only to raise our revenues but to develop our resources; to which all our standards have been adapted— prices, wages, rentals; to which allso our institutions are so thoroughly adjusted; with whose machinery we are so familiar and wonted by custom; a policy which has moulded the very temperament of our people and their ways of living; I do not believe, I say, that a policy so basic, so intrinsic, so indigenous, so inveterate, may suddenly be abrogated without causing panic and confusion and all the evils mothered by them. Nor do I believe that our normal prosperity will be restored until our tariffs are restored or more scientifically adjusted.

The war is horrid, to be sure; [but it is likewise convenient. A few years ago everything that did not jibe with theory was laid to the Crime of '73; now it is the War in Europe. But the excuse is inadequate. Cruel figures show that, except for the War in Europe and the vast supplies of war goods ordered from us by the belligerents—mounting into hundreds of millions— othing would be doing in this country worth mentioning: and the United

show that, except for the war in Europe and the vast supplies of war goods ordered from us by the belligerents—mounting into hundreds of millions— nothing would be doing in this country worth mentioning; and the United States—the richest nation in the world—would actually verge on bank-ruptey. It is an ill wind that blows nobody good. But, bless you'n not even the Custom House and its machinery, the income tax and its machinery, the war tax and its machinery, the corporation tax and its machinery, the war tax and its machinery, the corporation tax and its machinery—not Ossa piled on Pellon—meets the situation; and we are now warned to look out for a bond issue to make up an appalling deficit; and here the Administration is on solid ground. Thank Heaven, the United States can always borrow money enough to tide over a few years of experimental folly. I noticed by a Washington dispatch recently that the Administration complains it is already over-burdened by the "duty of promulgating definitions for all business activities." I should think likely. But how came this to be a duty of any Administration? I suggest that the burden could be lightened somewhat by turning the job of definition over to the courts, where it properly belongs; for in this workaday world, and so long as human instincts are what they are, we cannot hope to attain to every-body's ideal of justice, for everybody has his own ideal; but only to a pragmatical definition and a working basis. Experience evolves its own definitions, and, as I have shown, the law is based on experience and not on the catagories of logic.

### THE U.S. GOVERNMENT FACING A LARGE DEFICIT.

That the appropriations of the last session of Congress totaled \$1,115,121,409 and that the Treasury will probably face a deficit of about \$133,000,000, if the excess of ordinary disbursements over receipts should continue at the rate of only \$5,000,000 a month for the remaining four months of the present fiscal year are declarations contained in a speech of Representative John J. Fitzgerald (Democrat) Chairman of the House Committee on Appropriations, in which he summarized the work of the last session of Congress. The speech was delivered in the House on March 4, and is pub-lished in an issue of the "Congressional Record" printed on March 15.

Representative Frederick H. Gillett, senior Republican member of the committee, agrees with Representative Fitzgerald's findings and places the total appropriations "of this first Democratic Congress" in round figures at \$2,231,000,-000. Chairman Fitzgerald did not give the total appro-priations for the entire Sixty-Third Congress. In declaring 000. that the House of Representatives is the people's only safeguard against extravagant Governmental expenditures, Mr. Fitzgerald said :

Under our system of government the chief hope of the people in the prevention of extravagant and unjustifiable expenditures is in the House of Representatives. The executive department of the Government may co-operate, but as the success of an Administration is frequently believed to be measured by the expenditures to carry out predetermined policies, the volume of expenditure must necessarily be of secondary importance. The direct representatives of the p pl clothed, under the Constitu-tion, with control of the public purse, if properly organized can and must curtail expenditures. To make the work of the House of Representatives really effective there

To make the work of the House of Representatives really effective there must be a radical change in its methods of handling appropriations. Real reform is impossible with eight committees of the House framing appro-

priation bills while seven of the committees have legislative jurisdiction of the matters for which they recommend appropriations. In the readjustment of the finances of the Federal Government heed

In the readjustment of the finances of the Federal Government heed should be given to expenditures. The country should be awakened to the fact that burdens are not evaded by shifting them from State or munici-pal treasuries to the Federal Treasury, and that the Government should not assume every service, however desirable, at the behest of enthusiastic persons merely because it is difficult to obtain from private sources the means to accomplish good.

means to accomplish good. The activities of the Government should be restrained to fields which are distinctly governmental. If such a policy is not to be advocated and adopted, it is idle to attempt to prevent a continuing disproportionate increase in the cost of government. The resulting burdens will be such as will arouse the most bitter, unfortunate and most disastrous contro-versies to which a people are subject. The questions involved demand the attention of able and patriotic men, regardless of party, in order that the welfare of the country be advanced and the happiness and prosperity of the people be secured. In presenting his figures Chairmon Eitgeored said :

In presenting his figures Chairman Fitzgerald said :

In presenting his figures Chairman Fitzgerald said : The Nation's Working Capital. The working capital, or the available cash, for the transaction of the public business is the money in the "general fund" of the Treasury. When that fund is exhausted or is so depleted that the ordinary daily obligations of the Government can not be promptly met, the fund must be replenished. If revenues are insufficient to permit a sufficient working balance to be maintained, the fund must be supplemented either by reimbursement from the sale of Panama Canal bonds or by the proceeds of 3% certificates of indebtedness authorized for one year by Section 40 of the Payne-Aldrich Act, approved August 5 1909 (Stat. L., Vol. 36. p. 117.) The Secretary of the Treasury issues daily a statement of the condition of the United States Treasury. It appears that the net balance in the "general fund" on July 2 1914, was \$139,652,960 51; on December 2 1914, \$74,858,305 46; on January 2 1915, \$64,002,737 68; on February 2 1915, \$55,522,509 56; on March 2 1915, \$42,759 689 10. On December 2 1914, the excess of ordinary disbursements over ordinary receipts was \$55,720,410 52; on January 2 1915, \$65,358,773 62; on February 2 1915, \$72,353,349 86; and on March 2 1915, \$83,229 541 60. On March 2 1915, however, the expenditures during the present fiscal year on account of the Panama Canal were \$21,096,139 11, so that the preditures of the Government exceeded its revenues during the current fiscal year to March 2 by \$103,431,443 71.

Iscal year to March 2 by \$103.431.443 71. Excess of Expenses Over Receives. Should the excess of ordinary disbursements over ordinary receipts continue at the rate of only \$5,000,000 a month for the remaining four months of the present fiscal year, exclusive of the Panama Canal expendi-tures, the deficit will be \$103.229,511 60, and including such expenditures, about \$133.000,000. These figures de not include any expenditures from the "general fund" of the Treasury on account of the Postal Service. Should the postal revenues be insufficient to meet the authorized obliga-tions of the Postal Service, the deficit will be increased to the extent that the postal receipts must be supplemented from the other revenues of the Government. The failure of the Post Office Appreciation

Government. The failure of the Post Office Appropriation Bill will probably cause deficiencies in some services of the Post Office Department which are required by law to be performed. The estimates of appropriations for any such deficiencies will be submitted to Congress at the first session of the Sixty-Fourth Congress, which meets in December of this year. Any amounts then appropriated will be available immediately and will be a charge upon the revenues for the fiscal year 1916. While it is true that the deficiencies carried in deficiency Acts at this Session will be a charge upon the revenues of this fiscal year (1915) the failure of the Post Office Bill and the appropriation, in a joint resolution, of \$313,364,667 Instead of \$325,511,794, which the bill would have carried if it had been enacted, presents a very unusual condition that must be taken into account when reckoning the charges to be made upon the revenues of the ensuing fiscal year (1916).

presents a very unusual continue that must be easier net attent and present as a very unusual continue that must be easier net attent and present (1916). In the month of June, however, the bulk of the income tax from individuals and corporations is received. Success of Underwood Tariff. When the Underwood Act was prepared its authors estimated that the receipts from the income-tax provisions would reach annually \$95,000,000. The receipts for the fiscal year 1914 were \$71,381,275. The difference between the estimated and the actual receipts has been attributed to the fact that incomes prior to March 1914 were not subject to the tax, and thus a very considerable sum that otherwise would have been realized from dividends payable in January was not obtained. The estimated at \$80,000,000. If the expectations of the Treasury officials are realized, the great bulk of that sum will be paid during the present fiscal year to offset the deficit. The Underwood Tariff Act is in no way responsible for the Treasury deficit.

deficit. It was estimated that for the fiscal year ending June 30 1914 that the customs receipts would be \$270,000,000 and the income-tax receipts \$95,-000,000; the total estimated revenues under the Act, \$365,000,000. The actual receipts were : From customs, \$292,320,014 51; from the income-tax provisions \$71,381,275, the total, \$363,701,289 51, a difference between the estimated and actual receipts of only \$1,298,710 49. A most casual examination of the Treasury Department statistics dis-closes that prior to the outbreak of the present almost universal war the Underwood Tariff Act was proving as effective a revenue producer as had been anticipated.

closes that prior to the outbreak of the present almost universal war the Underwood Tariff Act was proving as effective a revenue producer as had been anticipated.
For the current fiscal year (1915) the total estimates submitted to Comgress aggregated \$1.152.681.777 02. The appropriations for the current fiscal year, based upon those estimates, amounted to \$1.116.118.138.55. The total estimates upon those estimates, anounted to \$1.116.118.138.55. The total estimates submitted to Congress, in the regular Book of Estimates, at the beginning of, and supplemental estimates during the session, amounted to \$1.135.187.984.31.
On the face of the figures the estimates were \$17,493.792.71 less than for the current ficsal year.
The appropriations made at this session of Congress amount to \$1.115.-121.408.68. Contracts involving additional appropriations were authorized in the sum of \$37.400.000.
The sum stated of the appropriations includes the Indian and Post-Office Acts at the amounts carried by them for the current fiscal year—1915. The Post-Office and Indian appropriations bills failed of enactment.
Had the conference report on these two appropriation bills been adopted, the total appropriations for the current year of \$11,593.638.21, a reduction under the strictly technical estimates of \$7.476.207.55 and a reduction under the estimates properly considered of \$35.250.687.55. If the comparison be made between the estimates submitted in strict compliance with the law, the appropriations actually made are \$20.066, 575.63 less than the estimates, if comparison be made with the estimates

575 63 less than the estimates, if comparison be made with the estimates

formally and informally submitted, but which should have been submitted under the law, the appropriations actually made are \$47.841.025 63 less than the estimates.

Mr. Gillett, as would be expected, charges responsibility for the deficient revenues upon the Democratic Party and the Administration. He says':

The total appropriations of this first Democratic Congress have been, in The total appropriations of this first Democratic Congress have been, in round figures, \$2,231,000,000, which is \$113,000,000 larger than its pre-decessor and \$177,000,000 larger than the last Republican Congress. Moreover, in the four years before the Democrats secured control of the House the Republican Congresses paid out of the current revenues nearly \$70,000,000 more for the Panama Canal construction than has been paid in the last four years. The Treasury balance is to-day only \$45,000,000, instead of the \$166,-000,000 which years left them has the last four years.

The Treasury balance is to-day only \$45,000,000, instead of the \$166,-000,000 which was left them by the Republican policies at the beginning of the fiscal year 1914, although for months we have been paying vexatious "war taxes." A balance of only \$50,000 000 has for years been considered the danger point. The Treasury has not been so empty since the Cleveland Administration. I am afraid it can only be replenished, as it was then, by an issue of bonds, and that it can only be made permanently safe. as it was then, by a change of Administration.

Representative Fitzgerald's argument for a readjustment of the finances of the Government will, it is stated, shortly be given consideration by President Wilson, a conference with Representative Sherley of Kentucky and a committee of the House being planned for the consideration of a budget system.

# FURTHER INCREASE IN IDLE CARS.

The number of idle cars on March 1 is reported as 304,284 in the statement of the American Railway Association, issued under date of the 10th inst., that surplus comparing with 280,573 on Feb. 1 and with no more than 159,480 on March 1 last year. The issuance of the idle-car statements was resumed on the 15th of last month, following their sus-pension for a period of three months. The February statement was published in these columns Feb. 27; we print the March statistics below:

THE AMERICAN RAILWAY ASSOCIATION, Committee on Relations Between Railroads. New York, March 10 1915. The committee presents herewith Statistical Statement No. 2, giving a summary of freight car surplusages and shortages for March 1 1915, with comparisons:

#### CONDITION OF NEW YORK TRUST COMPANIES AND SAVINGS BANKS.

The banking institutions of New York State made a creditable showing for the year, despite the conditions arising out of the European war, and the general business depression, according to the annual report of Superintendent of Banks Eugene Lamb Richards on savings banks, trust companies and other banking institutions, submitted to the Legislature on the 15th inst. In commenting on the savings banks Superintendent Richards says :

The savings banks of this State were given a severe test during the past

The savings banks of this State were given a severe test during the past year. However, they have demonstrated that probably never in their history were they better able to meet the tremendous demand made upon them, due to general business depression and the European war. That the savings banks of the State were able to meet the heavy demands made upon them, is shown by the reports filed with this Department giving their condition on January 1st 1915. While these reports show a loss in their total resources of \$14,129,758, this decrease is due partly to the fact that the new banking law provides that savings banks must report their surplus based on market values. Under the old law the surplus was based upon the so-called investment or amortization values. The amount due depositors on January 1st 1915 was \$1,771,500,958, which is an increase of \$29,803,487 for the year. This amount includes interest accrued to depositors at the close of business December 31st 1914. The aggregate amount deposited during the year was \$410,275,689, whereas the with-drawals exceeded this amount by \$33,343,598. The number of open accounts on January 1st 1915 was 3,171,305, an increase of 27,851. The total amount of dividends paid to the depositors of savings banks in this State for the year 1914 was \$63,163,709, which shows an increase of almost \$2,500,000. Regarding the trust companies, Superintendent Richards

Regarding the trust companies, Superintendent Richards savs :

Says: Eighty-one trust companies reported to the Superintendent of Banks on December 24th 1914, or the same number as reported on December 9th 1913. Aggregate resources amounted to \$1,740,598,437, or an increase of \$165,942,230 for the year. Total deposits increased \$173,939,420, which is offset by increases in stock and bond investments of \$40,232,531, in loans and discounts of \$75,187,334 and in amounts due from other banking institutions of \$47,-524,811

524.811.

Total capital stock of trust companies under supervision on December 24th 1914 shows an increase over the previous year of \$1,750,000, although one company, with a capital of \$250,000, which has been in liquidation for several years past, was closed, and two others, with a combined capital of \$1,100,000, were merged into large banks of deposit and discount.

\$1,100,000, were merged into large banks of deposit and discount. Three trust companies were chartered during the year 1914. Total surplus, including all undivided profits on market values, was \$162,552,043, a decrease during the year of \$12,389,759. The ratio of surplus and undivided profits to aggregate deposits was 11.3% at the close of 1914, as compared with 13.8% at the close of 1913. The downward tendency of the security market which is largely responsible for this de-crease is still more apparent when it is noted that this percentage was 14.5% at the close of 1912. The amount of overdrafts shown in the last report of trust companies for the year 1914 was \$142,360, a decrease of \$15,149. This is less than 1-10 of 1% of total deposits. The practice of allowing overdrafts in insti-tutions under the supervision of the Superintendent of Banks has been discouraged for years, and the total amount of such overdrafts has never

discouraged for years, and the total amount of such overdrafts has never been large enought to cause any apprehension.

The report also contains the following interesting statistics: The report also contains the following interesting statistics: The total resources of 26,765 banking institutions of the United States on July 1st 1914, as computed by the Comptroller of the Currency, was nearly \$27,000,000,000, or an average for each institution reporting of a little over \$1,000,000. 421 State banks, trust companies and savings banks in this State had resources of \$4,360,000,000, or an average of over \$10,300,000. From these figures it will be seen that the total resources of these State institutions is almost 16% of the total of the country. Trust companies and banks of deposit and discount had total resources on December 24 1914 of \$2,400,000,000, or about 9% of the total for the country.

country.

country. The Savings Deposits of 634 mutual savings banks reporting to the Comp-troller of the Currency on July 1st 1914 was \$3,915,000,000, of which amount \$1,773,000,000 was contributed by the 140 savings banks of New York State, or nearly 50% of the total. The capital, surplus and undivided profits of trust companies and banks of deposit and discount of the State of New York on December 24th was nearly \$332,000,000, and the surplus of savings banks was approximately \$139,000,000. This would make a grand total of \$471,000,000, or over 10% of the total of all of the banking institutions in the United States.

#### ADDITIONAL DETAILS CALLED FOR IN NATIONAL BANK REPORTS.

The national banks, as pointed out in our issue of Feb. 27, were called upon, in reporting under the call of March 4, to supply information on several new items not previously embodied in the blanks prepared for their use. The salaries of all officers and directors must be given. The number of shares owned by officers and directors is now called for in a way intended to prevent concealment or evasion. Two sub-headings now appear under the head of "shares of stock owned,"-one calling for the number of shares "as registered on stock ledger," and the other the "actual shares owned." A foot-note applying to the latter states that "if stock ledger does not show stock actually owned by directors or other officers, give the correct amount in this column as ascer-tained from officers or directors."

#### MONEY ORDER BUSINESS REACHING NORMAL CONDITIONS.

According to a statement of the Post Office Department on the 14th inst., the international money order exchange is rapidly approaching normal conditions. Ordinarily, money orders amounting to more than \$100,000,000 are issued annually in the United States for payment in foreign countries. Of this amount Italy alone receives approximately \$22,000,-000, Great Britain and Russia each \$13,000,000, Austria \$10,000,000, Hungary \$8,000,000, Germany \$4,000,000 and France \$1,000,000. Europe sends to the United States in this manner a trifle more than one-tenth the amount, or about as much as is sent to Austria alone. With the outbreak of the European war, Postmaster-General Burleson found it necessary (Aug. 3) to limit the amount of international money orders to \$100 for each person. This was done because the unprecedented rise in the price of foreign exchange in New York made it impossible for the Post Office Department to obtain bills of exchange with which to liquidate its indebtedness to foreign postal administrations, and also because of the fear that abuses might result in view of the lower rates of conversion obtainable at the post offices.

On Jan. 21 the Post Office Department removed the restriction which had been placed on the issue of international money orders. The Department states that the abnormal rates in the exchange market have been gradually corrected, until now it is possible to purchase exchange in most instances at as favorable prices as prior to the war. In the case of Austria, Belgium, Egypt and Portugal, the money order business with this country continues to be suspended.

#### PROFITS OF GOLD POOL.

We learn that the profits of the Gold Pool which was formed last summer for the purpose of controlling the foreign exchange situation amounted to approximately \$50,000. As previously stated in these columns the dissolution of the Gold Pool was decided upon on Jan. 22 and the re-payment

of contributions made by the banks was consummated on the 12th inst. The total amount of subscriptions pledged was approximately \$108,000,000, of which 25%, or \$27,000,-000, was called for by the Gold Fund Committee. The banks received about \$1 85 for each \$1,000 actually paid in, which represents a return for the five months the fund was in operation at the rate of approximately one-half of 1% per annum.

# THE CORRESPONDENCE WITH REFERENCE TO BLOCKADES AND SUBMARINE WARFARE.

The State Department at Washington made public on the 17th inst. the full text of the correspondence which has passed between the United States and Great Britain and France and between the United States and Germany during the past month relative to the abandonment of submarine attacks on merchant ships, the shipment of conditional contraband and foodstuffs to civilians in a belligerent country, the use of neutral flags by belligerent merchantmen, the removal of mines and the proclamation of a virtual blockade Altogether six notes by the Allies against Germany. comprise the correspondence.

It is disclosed that while Germany agreed to abandon her submarine attacks on "mercantile of any flag", except when they resist visit or search, provided foodstuffs were permitted to reach her civilian population, Great Britain and her Allies rejected the proposal originally made by the United States Government in an effort to bring the belligerents into an arrangement which would safeguard the interests of neutrals. Furthermore, the documents show that in a message of inquiry to Great Britain and France, the United States asked whether the embargo on all commerce between Germany and neutral countries was to be carried out under the rules of a blockade or by interference with ships and cargoes "as if no blockade existed," the two together presenting, in the view of the American Government, "a proposed course of action previously unknown to international law." The answers from both Great Britain and France reveal that the Allies officially regard their policy as a "blockade", but desire to refrain from exercising the rights of belligerents under a blockade to confiscate ships and cargoes as a penalty for breach of blockade, substituting for it procedure in prize courts and compensation through sale of the detained merchandise.

Realizing the difficulties of maintaining an effective blockade by a close guard of an enemy coast on account of the newly developed activity of submarines, the United States asked that "a radius of activity" be defined. Great Britain and France have replied that the operations of blockade would not be conducted "outside of European waters, including the Mediterranean." This definition is the first intimation as to the area within which the reprisal order is to be enforced. Its limits are not given more exactly, the Allies contend, because Germany was equally indefinite in proclaiming all the waters surrounding Great Britain and Ireland a "war zone."

The correspondence began with an identical note sent by Secretary of State Bryan on Feb. 20 to the American Ambassadors at London and Berlin; a summary of this note was given out early this month and was published in these columns March 6, along with Germany's reply thereto. We print below in full Secretary Bryan's note of Feb. 20, and all the other communications which form part of the series of letters written in the matter, except Germany's reply, since, as stated, that has already been printed by us.

The following is the identic note sent by the Secretary of State to the American Ambassadors at London and

I.

#### Washington, Feb. 20 1915.

Washington, Feb. 20 1915. You will please deliver to Sir Edward Grey the following identic note which we are sending England and Germany: In view of the correspondence which has passed between this Govern-ment and Great Britain and Germany, respectively, relative to the declara-tion of a war zone by the German Admiralty and the use of neutral flags by British merchant vessels, this Government ventures to express the hope that the two belligerent Governments may, through reciprocal concessions, find a basis for agreement which will relieve neutral ships engaged in peaceful commerce from the great dangers which they will incur in the high seas adjacent to the coasts of the belligerents.

Init a bill commerce from the great dangers which they will incur in the high seas adjacent to the coasts of the belligerents. The Government of the United States respectfully suggests that an agreement in terms like the following might be entered into. This sugges-tion is not to be regarded as in any sense a proposal made by this Govern-ment, for it, of course, fully recognizes that it is not its privilege to propose terms of agreement between Great Britain and Germany, even though the matter be one in which it and the people of the United States are directly and deeply interested. It is merely venturing to take the liberty which it hopes may be accorded a sincere friend desirous of embarassing neither nation involved and of serving, if it may, the common interests of humanity.

The course outlined is offered in the hope that it may draw forth the views and elicit the suggestions of the British and German governments on a matter of capital interest to the whole world. AGREEMENT PROPOSED.

Germany and Great Britain to agree: 1. That neither will sow any floating mines, whether upon the high seas or in territorial waters; that neither will plant on the high seas anchored mines except within cannon range of harbors for defensive purposes only, and that all mines shall bear the stamp of the Government planting them, and the so constructed as to heave heave heave here their bear their searches the and be so constructed as to become harmless if separated from their moorings

That neither will use submarines to attack merchant vessels of any nationality except to enforce the right of visit and search.
 That each will require their respective merchant vessels not to use neutral flags for the purpose of disguise or ruse de guerre.

3. That each will require their respective merchant vessels not to use neutral flags for the purpose of disguise or ruse de guerre. Germany to agree: That all importations of food or foodstuffs from the United States (and from such other neutral countries as may ask it) into Germany shall be consigned to agencies to be designated by the United States (overnment; that these American agencies shall have entire charge and control, without interference on the part of the German Government, of the receipt and distribution of such importations and shall distribute them solely to retail dealers bearing licenses from the German Government, of the receipt and distribution of the terms of the retailers' licenses shall work a forfeiture of their rights to receive such food and foodstuffs to non-combatants only; that any violation of the terms of the requisitioned by the German Government for any purpose whatsoever or be diverted to the use of the armed forces of German.
The Britain to agree: That food and foodstuffs will not be placed upon the absolute contraband list and that shipments of such commodities will not be interfered with or detained by British authorities if consigned to agencies designated by the United States Government in Germany for the receipt and distribution of such cargoes to licensed German retailers for distribution solely to the non-combatant population.
In submitting this proposed basis of agreement, this Government depoted with the be understood as admitting or denying any belligerent or neutral right established by the principles of international law, but would consider the agreement, this creptable to the interference and so thinding upon the upited States in its present form or in a modified form unit accepted by the Server.

this Government.

#### II.

Germany's reply, dated March 1, was printed in our issue of March 6, page 783; only two or three slight differences between the draft heretofore published and that made public this week are apparent, the only one of any consequence appearing in the fourth paragraph, answering the various points of the American note. This paragraph has to do with the regulation of legitimate importations of food into Germany suggested by the American Government. Germany states that "such regulation would, of course, be confined to importations by sea, but that would, on the other hand, include indirect importations by way of neutral ports." In place of *indirect*, the earlier draft had read "direct."

#### III.

The reply of Great Britain, handed to the Ambassador at London, was as follows:

London, March 15 1915. Following is the full text of a memorandum, dated March 13, which

Following is the full text of a memorandum, dated March 13, which Grey handed me to-day: On the 22d of February last I received a communication from Your Excellency of the indentic note addressed to His Majesty's Government and to Germany, respecting an agreement on certain points as to the con-duct of the war at sea. The reply of the German Government to this note has been published, and it is not understood from the reply that the Ger-man Government are prenared to abandon the practice of sinking British has been published, and it is not understood from the reply that the Ger-man Government are prepared to abandon the practice of sinking British merchant vessels by submarines, and it is evident from their reply that they will not abandon the use of mines for offensive purposes on the high seas as contrasted with the use of mines for defensive purposes only within cannon range of their own harbors, as suggested by the Government of the United States. This being so, it might appear unnecessary for the British Government to make any further reply than to take note of the German answer. We desire, however, to take the opportunity of making a fuller statement of the whole position and of our feeling with regard to it. We recognize with sympathy the desire of the Government of the United States to see the European war conducted in accordance with the previously recognized rules of international law and the dictates of humanity. It is

States to see the European war conducted in accordance with the previously recognized rules of international law and the dictates of humanity. It is thus that the British forces have conducted the war, and we are not aware that these forces, either naval or military, can have laid to their charge any improper proceedings, either in the conduct of hostilities or in the treat ment of prisoners or wounded. On the German side it has been very different. 1. The treatment of civilian inhabitants in Belgium and the north of France has been made public by the Belgian and French Governments, and by those who have had experience of it at first hand. Modern history affords no precedent for the sufferings that have been inflicted on the defenseless and non-combatant population in the territory that has been in German military occupation. Even the food of the population was confiscated until, in Belgium, an international commission largely influenced by American generosity and conducted under American auspices came to the relief of the population and secured from the German form the Germans still continue to make levies in money upon the defenseless population for the support of the German rary. 2. We have from time to time received most terrible accounts of the

the support of the German army. 2. We have from time to time received most terrible accounts of the barbarous treatment to which British officers and soldiers have been ex-posed after they have been taken prisoners while being conveyed to German prison camps. One or two instances have already been given to the United States Government founded upon authentic and first-hand evidence, which is beyond doubt. Some evidence has been received of the hardships to which British prisoners of war are subjected in the prison camps, contrast-ing, we believe, most unfavorably with the treatment of German prisoners in this country. We have proposed, with the consent of the United States Government, that a commission of United States officers should be per-mitted in each country to inspect the treatment of prisoners of war. The United States Government to this proposal, and we remain in continuing anxiety and apprehension as to the treatment of British prisoners of war in Ger-many. many

At the very outset of the war a German mine-layer was discovered 5. At the very outset of the war a German mine-layer was discovered laying a mine field on the high seas. Further mine fields have been laid from time to time without warning, and so far as we know are still being laid on the high seas, and many neutral as well as British vessels have been sunk by them.

Irom time to time without warning, and so far as we know are still being laid on the high seas, and many neutral as well as British vessels have been sunk by them.
4. At various times during the war German submarines have stopped and sunk British merchant vessels, thus making the sinking of merchant vessels a general practice, though it was admitted previously, if at all, only as an exception. The general rule to which the British Government have adhered being that merchant vessels, if captured must be taken before a prize court. In one case already quoted in a note to the United States Government a neutral vessel carrying foodstuffs to an unfortified town in Great Britain has been sunk. Another case is now reported in which a German cruiser has sunk an American vessel, the William P. Frye, carrying a cargo of wheat from Seattle to Queenstown. In both cases the cargoes were presumably destined for the civil population. Even the cargoes in such circumstances should not have been condemned without the decision of a prize court, much less should the vessels have been sunk. It is to be noted that both these cases occurred before the detention by the British authorities of the Wilhelmina and her cargo of foodstuffs, which the German Government allege is the justification for their own action. The Germans have announced their intention of sinking British merchant vessels by torpedo without notice and without any provision for the case of neutral as well as of British vessels, unarmed and defenseless, have been deastroyed in this way.
5. Unfortified, open and defenseless towns, such as Scarborough, Yarmouth and Whitby, have been deliberately and wantonly bombarded by German ships of war, causing in some cases considerable loss of civilian life, including women and children.
6. German aircaft have dropped bombs on the east coast of England, where there were no military or strategic points to be attacked. On the other hand, I am aware of but two criticisms that have been made on Briti

(2) It is said that the Birlish Government has departed from the view of international law which they had previously maintained that foodstuffs destined for the civil population should never be interfered with, this charge destined for the civil population should never be interfered with, this charge being founded on the submission to a prize court of the cargo of the Wil-helmina. The special considerations affecting this cargo have already been presented in a memorandum to the United States Government, and I need not repeat them here. Inasmuch as the stoppage of all foodstuffs is an admitted consequence of blockade, it is obvious that there can be no universal rule based on considerations of morality and humanity which is contrary to this practice. The right to stop foodstuffs destined for the civil population must, therefore, in any case be admitted if an effective "cordon" controlling intercourse with the enemy is drawn, announced and maintained. Moreover, independently of rights arising from belligerent action in the nature of blockade, some other nations differing from the opinion of the Governments of the United States and Great Britian have held that to stop the food of the civil population is a natural and legiti-mate method of bringing pressure to bear on an enemy country as it is upon the defense of a beseiged town. It is also upheld on the authority of both Prince Bismarck and Count

It is also upheld on the authority of both Prince Bismarck and Count aprivi, and therefore, presumably is not repugnant to German morality. The following are the quotations from Prince Bismarck and Count Caprivi

Capityl, and therefore, presumably is not repugnant to German moranty. The following are the quotations from Prince Bismarck and Count Caprivi on this point. Prince Bismarck, in answering, in 1885, an application from the Kiel Chamber of Commerce for a statement of the view of the German Govern-ment on the question of the right to declare as contraband foodstuffs that were not intended for military forces, said: "I reply to the Chamber of Commerce that any disadvantage our com-mercial and carrying interests may suffer by the treatment of rice as contra-band of war does not justify our opposing a measure which it has been thought fit to take in carrying on a foreign war. Every war is a calamity which entails evil consequences not only on the combatants, but also on neutrals. These evils may easily be increased by the interference of a neutral power with the way in which a third carries on the war to the dis-advantages of the subjects of the interfering power, and by this means German commerce might be weighted with far heavier losses than a tran-sitory prohibition of the rice trade in Chinese waters. The measure in question has for its object the shortening of the war by increasing the difficulties of the enemy and is a justifiable step in war if impartially en-forced against all neutral ships." Count Caprivi, during a discussion in the German Reichstag on March 4 1892 on the subject of the importance of international protection for private

1892 on the subject of the importance of international protection for private property at sea, made the following statements: "A country may be dependent for her food or for her raw products upon

her trade. In fact, it may be absolutely necessary to destroy the enemy's trade. \* \* The private introduction of provisions into Paris was prohibited during the siege, and in the same way a nation would be justified in preventing the import of food and raw products."

"The Government of Great Britain have frankly declared, in concert with the Government of France, their intention to meet the German attempt to stop all supplies of every kind from leaving or entering British or French ports by themselves stopping supplies going to or from Germany for this end. The British fleet has instituted a blockade effectively controlling by cruiser 'cordon' all passage to and from Germany by sea. The difference between the two policies is, however, that while our object is the same as that of Germany, we propose to attain it without sacrificing neutral ships or non-combatant lives or inflicting upon neutrals the damage that must be entailed when a vessel and its cargo are sunk without notice, examination or trial. I must emphasize again that this measure is a natural and neces-sary consequence of the unprecedented methods repugnant to all law and morality which have been described above, which Germany began to adopt at the very outset of the war and the effects of which have been constantly accumulating." "AMERICAN AMBASSADOR, London."

#### "AMERICAN AMBASSADOR, London."

IV.

The American Government transmitted identic messages of inquiry to the Ambassadors at London and Paris, inquiring from both England and France how the declarations in the Anglo-French note proclaiming an embargo on all commerce between Germany and neutral countries were to be carried into effect. The message to London was as follows:

Washington, March 5 1915. In regard to the recent communications received from the British and In regard to the recent communications received from the British and French Governments concerning restraints upon commerce with Germany, please communicate with the British Foreign Office in the sense following: The difficulty in determining action upon the British and French declara-tions of intended retaliations upon commerce with Germany lies in the nature of the proposed measures in their relation to commerce by neutrals. While it appears that the intention is to interfere with and take into evented at each other outgoing and incoming trading with Germany

custody all ships, both outgoing and incoming, trading with Germany, which is in effect a blockade of German ports, the rule of blockade, that a

which is in effect a blockade of German ports, the rule of blockade, that a ship attempting to enter or leave a German port regardless of the character of its cargo may be condemned, is not asserted. The language of the declarations is: "The British and French governments will, therefore, hold themselves free to detain and take into port ships carrying goods of presumed enemy destination, ownership or origin. It is not intended to confiscate such vessels or cargoes unless they would otherwise be liable to condemnation." The first sentence claims a right pertaining only to a state of blockade. The last sentence claims a right pertaining only to a state of blockade. The last sentence proposes a treatment of ships and cargoes as if no blockade existed. The two together present a proposed course of action previously unknown to international law. As a consequence, neutrals have no standard by which to measure their rights or to avoid danger to their ships and cargoes. The paradoxical situation thus created should be changed and the declaring Powers ought to assert whether they rely upon the rules governing a blockade or the

situation thus created should be changed and the declaring Powers ought to assert whether they rely upon the rules governing a blockade or the rules applicable when no blockade exists. The declaration presents other perplexities. The last sentence quoted indicates that the rules of contraband are to be applied to cargoes detained. The rule covering non-contraband articles carried in neutral bottoms is that the cargoes shall be released and the ships allowed to proceed. This rule cannot, under the first sentence quoted, be applied as to destination. What, then, is to be done with a cargo of non-contraband goods detained under the declaration? The same question may be asked as to conditional contraband cargoes. contraband cargoes. The foregoing comments apply to cargoes destined for Germany.

V. The French Government transmitted the following message: Paris, March 14 1915

The French Government transmitted the following message: Paris, March 14 1915. French Government replies as follows: "In a letter dated March 7, Your Excellency was good enough to draw my attention to the views of the Government of the United States regarding the recent communications from the French and British Governments con-cerning a restriction to be laid upon commerce with Germany. According to Your Excellency's letter, the declaration made by the Allied Govern-ments presents some uncertainty as regards its application, concerning which the Government of the United States desires to be enlightened in order to determine what attitude it should take. "At the same time Your Excellency notified me that while granting the possibility of using new methods of retailation against the new use to which submarines have been put, the Government of the United States was some-what apprehensive that the Allied belligerents might (if their action is to be construed as constituting a blockade) capture in waters near America, any ships which might have escaped cruisers patrolling European waters. In acknowledging receipt of Your Excellency's communication, I have the honor to inform you that the Government of the Republic has not failed to consider this point as presented by the Government of the United States, and I beg to specify clearly the conditions of applications, as far as my Gov-ernment is concerned, of the declaration of the Allied Governments. As well set forth by the Federal Government, the old methods of blockade can-not be entirely adhered to in view of the use Germany has made of her sub-marines and also by reason of the government jeturation of that country.

erment is concerned, of the declaration of the Allied Governments. As well set forth by the Federal Government, the old methods of blockade can-not be entirely adhered to in view of the use Germany has made of her sub-marines, and also by reason of the geographical situation of that country. "In answer to the challenge to the neutrals as well as to its own adver-sarles, contained in the declaration by which the German Imperial Govern ment stated that it considered the seas surrounding Great Britan and the French coast on the Channel as military zone, and warned neutral vessels not to enter the same on account of the danger they would run, the Allied Governments have been obliged to examine what measures they could adopt to interrupt all maritime communication with the German Empire, and thus keep it blockaded by the naval power of the two Allies, at the same time, however, safeguarding as much as possible the legitimate interests of neutral Powers, and respecting the laws of humanity, which no crime of their enemy will induce them to violate. The Government of the Republic, therefore, reserves to itself the right of bringing into a French or Allied port any ship carrying a cargo presumed to be of German origin, destination or ownership, buit is will not go to the length of seizing any neutral ship except in case of contraband. The discharged cargo shall not be confiscated. In the event of a neutral proving his lawful ownership of merchandise destined to Germany, he shall be entirely free to dispose of same, subject to certain conditions. In case the owner of the goods is a German, they shall simply be sequestrated during the war. "Merchandise of enemy origin shall only be sequestrated when it is at the same time the property of an enemy; merchandise belonging to neutrals shall be held at the disposal of its owner, to be returned to the port of departure. As Your Excellency will observe, these measures , while depriving the

departure. As Your Excellency will observe, these measures, while depriving the enemy of important resources, respect the rights of neutrals and will not in

any way jeopardize private property, as even the enemy owner will only suffer from the suspension of the enjoyment of his rights during the term of hostilities.

The Government of the Republic, being desirous of allowing neutrals ery facility to enforce their claims (here occurred an undecipherable group of words), give the prize court (an independent tribunal) cognizance of these questions, and in order to give the neutrals as little trouble as possible, it has specified that the prize court shall give sentence within eight days,

it has specified that the prize court shall give sentence within eight days, counting from the date on which the case shall have been brought before it. I do not doubt, Mr. Ambassador, that the Federal Government, com-paring on the one hand the unspeakable violence with which the German military Government threatens neutrals, the criminal actions unknown in even against the lives of neutral subjects or citizens, and on the other hand the measures adopted by the Allied Governments of Frence and Great Britain respecting the laws of humanity and the rights of individuals, will readily perceive that the latter have not overstepped their strict rights as belligerents. Finally, I am anxious to assure you that it is not, and it has never been, the intention of the Government of the Republic ito extend the action of its cruisers against enemy merchandise beyond European seas, the Mediter-ranean included.

#### VI.

The reply from the British Government transmitted by the American Ambassador at London to the Secretary of State was as follows:

the American Ambassador at London to the Secretary of State was as follows: London, March 15 1915. Tollowing if the full text of a note dated to-day, and an Order in Council I have just received from Grey : 1. His Majesty's Government have had under careful consideration the inquiries which, under instructions from your Government, Your Excellency addressed to me on the 8th instant, regarding the scope and mod of application of the measures, foreshadowed in the British and French declarations of the 1st of March, for restricting the trade of Germany. Your Excellency explained and illustrated by reference to certain contingencies the difficulty of the United States Government in adopting a definite attitude toward these measures by reason of uncertainty regarding their bearing upon the commerce of neutral countries. 2. I can at once assure Your Excellency that subject to the paramount necessity of restricting German trade His Majesty's Government have made it their first aim to minimize inconvenience to neutral commerce. From the accompanying copy of the Order in Council, which is to be published to-day, you will observe tha a wide discretion is afforded to the prize court in dealing with the trade of neutrals in such manner as ma in the circumstances be deemed just, and that full provision is made to facilitate claims by persons interested in any goods placed in the custody of the marshal of the prize court under the order. I apprehend that the preprixities to which Your Excellency refers will for the most part be dissipated by the perusal of this document and that it is only necessary for me to add certain explanatory observations. 3. The effect of the Order in Council is to confer certain powers upon the executive officers of His Majesty's Government. The extent to which those provide will be put into operation, are matters which will depend on the administrative orders issued by the Government and the decisions of the authorities specially charged with the duty of dealing with individual ships and cargo the duty of acting with the utmost dispatch consistent with the object in view and of showing in every case such consideration for neutrals as may be compatible with that object, which is, succinctly stated, to establish a blockade to prevent vessels from carrying goods for or coming from

Germany. 4. His Majesty's Government has felt most reluctant at the moment 4. His Majesty's Government has felt most reluctant at the moment of initiating a policy of blockade to exact from neutral ships all the penalties attaching to a breach of blockade. In their desire to alleviate the burden which the existence of a state of war at sea must inevitably impose on neutral seaborne commerce, they declare their intention to refrain alto-gether from the exercise of the right to confiscate ships or cargoes which belligerents have always claimed in respect of breaches of blockade. They restrict their claim to the stopping of cargoes destined for or coming from the enemy's territory. 5. As regards cotton, full particulars of the arrangements contemplated

5. As regards cotton, full particulars of the arrangements contemplated have already been explained. It will be admitted that every possible regard has been had to the legitimate interests of the American cotton

6. Finally, in reply to the penultimate paragraph of Your Excellency's note, I have the honor to state that it is not intended to interfere with neutral vessels carrying enemy cargo of non-contraband nature outside European waters, including the Mediterranean.
The Order in Council referred to in the above letter is

printed elsewhere in to-day's issue.

The United States Government considers that Great Britain and France, in the British Order in Council and in the accompanying notes, have not answered the questions propounded to them as to what warrant there is under international law for the establishment of an embargo on all commercial intercourse, directly and indirectly, between Germany and neutral countries. A protest will be entered against some features of the Order in Council and more detailed information about other features will be sought. Two points which are being considered are the probable effects of the Order on American commerce and on the rights of American citizens.

#### STRIKE COMMISSION POSTPONES VISIT TO COLORADO.

The Colorado Strike Commission, which was appointed by President Wilson to deal with the Colorado mining troubles, and of which Seth Low of New York is Chairman, recommended to the President on the 16th inst. that its proposed visit to Colorado for the purpose of treating with the parties in the recent strike controversies be postponed

#### MAR. 20 1915.]

until autumn. Alluding to the letter received by Chairman Low from seventy-one operators in Colorado (published in these columns Feb. 27) in which they stated that "there is no way in which your Commission can be of service to the coal-mining industry in this State," the Commission states: "The temper in which they write says even more eloquently than their words, that with them the 'dead past' has not yet 'buried its dead.'

# TEXT OF BRITISH ORDER IN COUNCIL BLOCKING GERMANY'S TRADE.

The text of the Order in Council outlining the reprisal measures against Germany, in retaliation for the latter's submarine warfare, was made public by Great Britain on the 15th inst. The Order in Council, signed by King George on the 11th inst., defines the measures whereby shipments to and from Germany will be cut off by Great Britain and her Allies, in accordance with the intentions announced by Premier Asquith in the House of Commons on the 1st inst., and conveyed to Secretary of State Bryan in identical notes presented on the same date by the French and British Am-The text of the Order makes plain England's bassadors. purpose-to prevent commodities of any kind from reaching or leaving Germany during the war. When a neutral vessel is held up, in all cases, except where there is a false declaration of destination or other attempt at subterfuge, the cargo will not be confiscated outright, but will be sold, the proceeds eventually going to the owners. While the order is absolute insofar as ships to and from German ports are concerned, using the word "must" in stipulating how goods shall be discharged in English ports, the provisions concerning cargoes destined for neutral ports set forth that they "may be required to discharge" at British ports.

The following is the text of the Order:

Whereas, The German Government has issued certain orders, which, in violation of the usages of war, purport to declare that the waters surrounding the United Kingdom a military area in which all British and Allied merchant vessels will be destroyed irrespective of the safety of the lives of the passengers and the crews and in which neutral shipping will be exposed to a similar danger in view of the uncertainties of naval warfare; And Whereas, In a memorandum accompanying the said orders, neutrals

are warned against entrusting crews, passengers, or goods to British or Allied ships;

And Whereas, Such attempts on the part of the enemy give to His Majesty an unquestionable right of retaliation; And Whereas, His Majesty has therefore decided to adopt further

And Whereas, His Majesty has therefore decided to adopt further measures in order to prevent commodities of any kind from reaching or leaving Germany, though such measures will be enforced without risk to neutral ships or to neutral or non-combatant life and in strict observance of the dictates of humanity: And Whereas, The Allies of His Majesty are associated with him in the steps now to be amounced for restricting further the commerce of Germany, His Majesty is, therefore, pleased by and with the advice of his Privy Council, to order, and it is hereby ordered, as follows: 1. No merchant vessel which sailed from her port of departure after March 1 1915 shall be allowed to proceed on her voyage to any German port. Unless the vessel receives a pass enabling her to proceed to some neutral or Allied port to be named in the pass, the goods on board any such vessel must be discharged in a British port and placed in custody of the marshal of the Prize Court. Goods so discharged, not being contra-band of war, shall, if not requisitioned for the use of His Majesty, be re-stored by order of the Court upon such terms as the Court may in the circumstances deem to be just to the person entitled thereto.

stored by order of the Court upon such terms as the Court may in the circumstances deem to be just to the person entitled thereto. 2. No merchant vessel which sailed from any German port after March 1 1915 shall be allowed to proceed on her voyage with any goods on board laden at such port. All goods laden at such port must be discharged in a British or Allied port. Goods so discharged in a British port shall be placed in the custody of the marshal of the Prize Court and if not requisi-tion of the Prize Court. tion of the Prize Court.

The proceeds of the goods so sold shall be paid into Court and dealt with in such a manner as the Court may in the circumstances deem to be just, pro-

The proceeds of the goods so sold shall be paid into Court and dealt with in such a manner as the Court may in the circumstances deem to be just, pro-vided that no proceeds of the sale of such goods shall be paid out of Court until the conclusion of peace except on the application of a proper officer of the crown, unless it be shown that the goods had become neutral property before the issue of this Order, provided also that nothing herein shall prevent the release of neutral property laden at such enemy port on the application of the proper officer of the Crown. 3. Every merchant vessel which salled from her port of departure after March 1915 on her way to a port other than a German port carrying goods with an enemy destination, or which are enemy property, may be required to discharge such goods in a British or Allied port. Any goods so discharged in a British port shall be placed in the custody of the marshal of the Prize Court and unless they are contraband of war shall, if not requisitioned for the use of His Majesty, be restored by order of the court upon such terms as the Court may in the circumstances deem to be just to the person entitled thereto; and provided that this article shall not apply in any case falling within Articles 2 or 4 of this order. 4. Every merchant vessel which sailed from a port other than a German port after March 1 1915, having on board goods which are of memy a British or Allied port. Goods so discharged in a British port shall be placed in the custody of the marshal of the Prize Court, and, if not requisi-tioned for the use of His Majesty, shall be detained or sold under the paid into Court and be dealt with in such a manner as the Court may in the circumstances deem to be just, provided that no proceeds of the sale of such goods shall be paid out of Court until the conclusion of peace except on the application of a proper officer of the Crown unless it be shown that the goods had become neutral property before the issue of this order, provided also that nothing herein shall Crown

5. Any person claiming to be interested in or to have any claim in spect of any goods not being contraband of war placed in the custody the marshal of the Prize Court under this Order or in the proceeds of of the marshal of the Prize Court under this Order or in the proceeds of such goods may forthwith issue a writ in the Prize Court against the proper officer of the Crown and apply for an order than the goods should be restored to him, or that their proceeds should be paid to him, or for such other order as the circumstances of the case may require. The practice and procedure of the Prize Court shall, so far as applicable, be followed, mutatis mutandis, in any proceedings consequential upon this Order. 6. A merchant vessel which has cleared for a neutral port from a British or Allied port, or which has been allowed to pass, as having an ostensible destination to a neutral port and proceeds to an enemy port, shall, if captured on any subsequent voyage, be liable to condemnation. 7. Nothing in this Order shall be deemed to affect the liability of any vessel or goods to capture or condemnation independently of this Order. 8. Nothing in this Order shall prevent the relaxation of the provisions of this Order in respect of the merchant vessels of any country which declares that no commerce intended for or originating in Germany or belonging to

that no commerce intended for or originating in Germany or belonging to German subjects shall enjoy the protection of its flag.

#### DEATH OF SAMUEL BOWLES.

In the death of Samuel Bowles, editor and publisher of the Springfield "Republican," the journalistic world has suffered the loss of one who inherited and maintained high ideals in the conduct of a paper which has won for itself an enviable position in the newspaper field, commanding the admiration not alone of its readers, but of those engaged in the same sphere of work and imbued with the same lofty purposes and principles. Mr. Bowles, whose death occurred on the 14th inst., was the fourth of that name in his family and the third editor and publisher of the "Republican." The purposes that animated him are well summed up in these words of that paper: "Service of the paper was his constant thought, his supreme interest-how to keep it true to the broadest ideals of democracy, to make it alive to all sound progress in newspaper making, and yet untainted by undesirable developments in modern journalism, was his ever-present care. He resolved to keep the faith, and he did it with unswerving fidelity and splendid singleness of purpose. His father regarded the Republican as an institution for service, and so did he." The late editor was in his sixty-fourth year; forty-two years of his life were spent in the service of the paper, which had been started by his grandfather, Samuel Bowles 2d, as a weekly in 1824. The paper in its present form was founded and attained wide influence and reputation under Mr. Bowles' father, Samuel Bowles 3d. Mr. Bowles was educated with a view to succeeding his father in charge of the "Republican." His work with the paper started with an apprenticeship in the business department, which was followed by several years of travel. Upon his return to the paper in 1873, Mr. Bowles became an assistant in the editorial department, and two years later assumed the position of business manager. He became President and Treas-urer of the "Republican" with the death of his father in 1878, and during the first year of his control started the Sunday edition of the paper. Besides the part played by him in the journalistic world, Mr. Bowles was a sturdy champion of reforms and movements to improve the city in physical and civic ways; he was for years identified with the Board of Trade, serving on its education and arbitration committee and the national legislation committee. As indicating that there will be no departure from the policy of its late editor, the Republican" says:

It is proper to state at this time that the "Republican" will adhere to those ideals of the making of a newspaper and of its public service which have been its guide in the past. The chief who is gone had made, as his father had before him, complete plans for the carrying on of the organiza-tion and for its control in harmony with the paper's established policy of independence.

#### BILL GIVING NATIONAL BANKS TRUST POWERS OPPOSED.

That a bill permitting the exercise of trust functions by national banks in New York State will receive vigorous oppo-sition was evidenced this week. The bill in question was introduced in the New York Legislature by Chairman Marshall of the Senate Banking Committee on the 11th inst., and is designed to accord the national banks of the State the privileges conferred under the Federal Reserve Act. On Wednesday of this week the executive committee of the Trust Companies' Association of New York held a meeting at the offices of the Union Trust Company of this city and decided to take a determined stand against the bill. Edwin G. Merrill, President of the trust company, who is also President of the Trust Companies' Association, stated that the legislation was opposed on the ground that it constitutes a covert attempt to force the nationalization of State banking institutions, and is subversive of the entire banking system of the State. Mr. Merrill added:

The Trust Companies' Association is not opposed to the formation of additional trust companies to meet local needs, providing such institutions are so organized as to meet the reuqirements imposed by our State lawsj

The present State law provides a simple procedure by which any banking institution desirous of acting in any fiduciary capacity may become a trust company by meeting the standards as to capital and capital investments. The association will, however, vigorously oppose any lowering of the stand-ards imposed by the present banking law upon corporate fiduciaries of New York State, such as would inevitably result from the enactment of a law permitting national banks to assume these powers free from the supervision of State authorities and from the restrictions now imposed upon State institutions.

Counsel has been engaged by the Association to oppose the bill.

The expectation that the directors of the New York Federal Reserve Bank would indicate their attitude toward the new legislation at their meeting on the 17th inst. failed of fulfillment, the board having decided to withhold action at this time. A statement issued at the conclusion of the meetng by Pierre Jay, Chairman of the Board, said:

With reference to the article appearing in one of the New York papers last week, to the effect that the board of directors of the Federal Reserve Bank of New York would probably act upon a resolution with respect to a bill introduced in the Legislature of this State to authorize national banks to act as executors, administrators and trustees in this State, the directors at their meeting to-day decided that it was inadvisable for the Federal Re-serve Bank of New York to take any action respecting State legislation at this time.

In addition to his bill for the granting of trust company privileges to national banks, Senator Marshall has also introduced a bill vesting similar powers with the State banks. There has also been introduced a bill empowering State banks to deal in stocks, bonds, mortgages and other securities.

In New Jersey the trust companies have evinced their disapproval of the bill introduced in the Legislature of that State to enable national banks to assume trust powers. At a hearing on the bill before the Senate Committee on Banking and Insurance on the 15th inst. about forty trust company representatives were present to oppose the bill. According to the Newark "News," Colonel Willard C. Fisk of Jersey City, the leading speaker in opposition, said he believed the Reserve Act was unconstitutional, in that Congress sought to delegate its power of legislation to the Reserve Board, and that the powers sought to be conferred on national banks are reserved to the States. He had been informed, he said, that the American Bankers' Association is likely to test this question in the joint interest of national banks and trust companies and that certain trust companies are likely to bring suit to get a decision from the Supreme Court on the point. One of the results of the hearing, it is stated, was the withdrawal by Senator White of a bill intended to prohibit any trust company or State bank from performing any of the functions authorized under the Federal Reserve Act unless, and until, national banks are permitted to act in a trust capacity under the State law. Senator White announced that the purpose of his bill was to place all banking institutions in New Jersey, both national and State, upon an equal footing in competing for business, and stated that its withdrawal was at the request of the New Jersey Bankers' Association, which had informed him that its passage would be destructive to trust companies.

The Federal Reserve Board has approved the applications of a number of national banks to act as executors and trustees; these include the National Shawmut Bank and First National Bank of Boston; the Merchants National Bank of Dover, N. H.; the United States National Bank of Denver; Middletown National Bank of Middletown, Conn.; First National Bank of Wallingford, Conn.; Union Market National Bank of Watertown, Mass.; Manufacturers' National Bank of Waterbury, Conn.; Second National Bank of New Haven, Conn.; National Bank of Danville, Danville, Va.; National Exchange Bank of Roanoke, Va.; First National Bank of Alexandria, Va.; Essex National Bank of Haverhill, Mass.; Merchants National Bank of Boston, Mass.; Second National Bank of Boston, Mass., and First National Bank of Birmingham, Ala.

Discussing the privilege accorded State banking institutions to enter the Federal Reserve System, J. Dukes Downes, State Bank Commissioner of Maryland, in his annual report says:

While provisions have been made to admit to membership such State while provisions need the requirements of the Federal Reserve Law and may wish to avail themselves of the privilege of joining the system, it is an open question in the minds of many banking men whether any advan-tages that might be thus gained by State institutions would not be more than offset by the restrictions imposed upon them by the provisions of the Federal Law

As one example, I will cite the difference in the reserve requirements. Under the Federal Reserve Law national banks (in reserve cities) must maintain a reserve equal to 15% of their demand deposits and 5% of their

igitized for FRASER tp://fraser.stlouisfed.org/ time deposits, and those not in reserve cities 12% and 5% respectively. Under our State law no banking institution is required to keep more than 15% reserve, and that on demand deposits only. On time deposits no e is required.

To prevent any misunderstanding as to the character of time and demand deposits, Commissioner Downes suggests, (the Baltimore "Sun" reports), an amendment to the State banking law as follows:

Demand deposits, within the meaning of this Act, shall comprise all deposits payable within 30 days, and time deposits shall comprise all deposits payable after 30 days from date of notice, and all savings ac-counts and certificates of deposit which are subject to not less than 30 days' notice before payment.

# TRANSFER OF GOVERNMENT FUNDS TO FEDERAL RESERVE BANKS.

The withdrawal of Government deposits from the national banks acting as United States depositaries, with a view to their transfer to the Federal Reserve banks, was begun on the 17th inst. at the direction of Secretary of the Treasury About \$56,000,000 was on deposit in the national McAdoo. banks on the date mentioned; the funds, it is stated, will be withdrawn gradually; only a comparatively small amount has been transferred thus far, the transfers to date, according to the Treasury officials, having been from banks which had more Government funds than they could make use of.

# ISSUANCE OF SEMI-ANNUAL STATEMENTS OF FEDERAL RESERVE BANKS.

The proposed issuance of semi-annual statements of the earnings and expenditures of the twelve Federal Reserve banks was announced by the Federal Reserve Board on the 15th inst. The initial statement will be issued as of date July 1 next.

# MEETING OF GOVERNORS OF FEDERAL RESERVE BANKS.

The Governors of the Federal Reserve Banks held their third conference with the Federal Reserve Board on the 13th inst. This conference followed a meeting in Washington held among the Governors themselves. With two exceptions—Governor Wells of the St. Louis Federal Reserve Bank and R. M. Van Zandt, acting Governor of the Dallas Federal Reserve Bank-all the Governors were present. The more important subjects discussed were the intra-district clearings and settlements between the Federal Reserve banks, both of which were referred to a sub-committee of the Governors, which was directed to confer in the matter with the Federal Reserve Board. This sub-committee, consisting of Messrs. McDougal, Aiken, Strong, Fancher and Seay, was also instructed to take up with the Board the general matter of relation between the banks and the Treasury and Sub-Treasuries. It is also understood that the question of admission of State banks and trust companies to the Reserve system was discussed.

For the present, action is deferred on the protests filed or heard against the Federal Reserve districts. The illness of Secretary McAdoo, and the trips to California planned by Governor Hamlin and Adolph C. Miller, are factors in the delay. As the next full meeting of the Board will not be held until April 15, the matter goes over to that date, at least.

A petition has been filed by the banks in thirty-four counties in Eastern Wisconsin asking that they be transferred from the Minneapolis to the Chicago Federal Reserve District.

# PROVISIONS OF THE FRENCH MORATORIUM OF FEBRUARY 25.

A new decree extending the French moratorium for another period of sixty days was drawn up under date of Feb. 25. We have had translated the text of the decree as appearing in "L'Economiste Francais" of March 6, and publish the translation below. In the new decree reference is made to the decrees of Oct. 27 and Dec. 15, the text of both of which have heretofore been printed in these columns-that of Oct. 27 having appeared in our issue of Nov. 21 (page 1500), and that of Dec. 15 in the "Chronicle" of Jan. 9 (page 108). The latest decree is as follows:

The "Journal Officiel" of Dec. 26 published the following decree: Article 1. The delays granted by Articles 1, 2, 3 and 4 of the decree of Aug. 29 1914, and extended by the first articles of the decrees of Sept. 27, Oct. 27 and Dec. 15 1914, are extended, under the same conditions and reservations, for a new period of sixty full days. The benefit of this is extended to negotiable instruments, which will fall due before May 1 1915, provided that they were contracted previous to Aug. 4 1914.

Aug. 4 1914.

# MAR. 20 1915.]

Article 2. All the provisions of the decrees of Aug. 29, Sept. 27, Oct. 27 and Dec. 15 1914 which are not contrary to the present decree are continued. However, the application of Article 2, paragraphs 2 and 3, and Article 3, paragraph 2, of the decree of Oct. 27 1914, concerning the recovery of ne-gotiable instruments and of debts arising from commercial sales or advances on obligations, is suspended until the expiration of the said delay of sixty days.

days. Article 3. The present decree is applicable in Algeria. Article 4. The Ministers of Justice, Commerce, Industry, Postal and Telegraph, Finance, the Interior, Foreign Affairs, Labor and Public Fore-sight are charged, each in his own field, with the execution of the present decree, which shall be published in the "Journal Officiel" and Inserted in the "Bulletin des Lois." Drawn up at Paris, February 25 1915.

#### CHIEF OF BANK EXAMINERS IN MINNEAPOLIS DISTRICT.

P. M. Kerst, formerly Public Examiner under Governor Johnson of Minnesota, and now Vice-Chairman of the Federal Reserve Bank in Minneapolis, has been appointed Superintendent of Examiners for the Ninth Reserve District. The duties of the newly created position to which Mr. Kerst is, the first to be appointed, consist of supervising the work of the national bank examiners in the Ninth District. There are about ten examiners in this district. It is reported that Mr. Kerst intends to inaugurate a credit department in the Reserve Bank which will keep in close touch with the banks and the large borrowers of the district.

# FRANCE'S FOREIGN COMMERCE IN 1914.

From "L'Economiste Francais" of Feb. 27 1915 we take the following statement of the foreign commerce of France during the last two calendar years:

191		Loss in 1914.
Imports— Fran Articles of food1,713,3 Raw materials3,574,8 Manufactured articles1,061,0	26,000 1,817,579,000 30,000 4,945,732,000	<i>Francs.</i> 
Totals6,349,20	09,000 8,421,332,000	-2,072,123,000
Raw materials1,301,5 Manufactured articles2,549,0 Parcels post 346,93	50,000 3,617,046,000	$\begin{array}{c}211,927,000\\556,533,000\\1,067,996,000\\219,247,000\end{array}$
Totals4,824,5	6,880,217,000	-2,055,703,000

The preceding figures show that the decrease in foreign trade for last year was more than 4 billion 127 million francs, a decrease divided almost equally between imports and exports.

# RESULTS ACCOMPLISHED THROUGH FOREIGN TRADE DEBTS COMMITTEE.

The work of the Foreign Trade Debts Committee in England is set out in advices from London under date of Feb. 24 as follows:

The most remarkable fact in connection with the work of the Foreign Trade Debts Committee is that so far the loans applied for amount to only £892,447. When the committee was appointed about three months ago to administer the scheme, arranged by the Treasury and bankers, of ad-vances to exporters against unrealizable book debts in enemy and neutral countries, experts estimated that the amounts required might be anything from 10 to 100 millions sterling.

countries, experts estimated that the amounts required might be anything from 10 to 100 millions sterling. " Since the committee opened its offices 2,200 application forms have been sent out to banks, and of the applications received there remain at the moment only seven to be dealt with. Most of the applications have been for large amounts. Briefly, the method of working the scheme is as follows: A trader who has debts amounting possibly to £10,000 in Germany, £5,000 in Austria, £1,000 in Turkey, £5,000 in Argentina and other sums in neutral countries can, if he is unable to collect them, make application to the committee through his bankers for an advance. Having examined the facts submitted, which include a statutory declaration by the trader and a report by the manager of his bank, the committee in approved cases authorizes an advance not exceeding 50% of the outstanding debts.

# TRADING WITH BRITISH ENEMIES AS APPLIED TO CANADA.

A proclamation of King George relating to trading with the enemy, issued under date of Jan. 7, bears upon the provision in an earlier proclamation-that of Sept. 9, published in our issue of Oct. 24. Paragraph 6 of the Sept. 9 proclamation stipulated that "where an enemy has a branch locally situated in British, allied or neutral territory, not being a neutral territory in Europe, transactions by or with such branch shall not be treated as transactions by or with

such branch shall not be treated as transactions by or with an enemy"; the latest proclamation declares that: 1. Notwithstanding anything contained in Paragraph 6 of the trading with the enemy proclamation No. 2, transactions hereinafter entered into by persons, firms or companies resident, carrying on business or being in the United Kingdom (a) in respect to banking business with a branch situated outside the United Kingdom of an enemy person, firm or company; or (b) in respect to any description of business with a branch situated outside the United Kingdom of an enemy bank shall be considered as transaction with an enemy: Provided, That the acceptance, payment or other dealing with any negotiable instrument which was drawn before the date on which

this proclamation is published shall not, if otherwise lawful, be deemed to be transactions hereinafter entered into within the meaning of this paragraph.

2. The power to grant licenses on our behalf vested by Paragraph 8 of the trading with the enemy proclamation No. 2, in a Secretary of State, or the Board of Trade, may also be exercised by the Lords Commissioners of Our Trade.

or the Board of Trade, may also be exercised by the Lords Commissioners of Our Treasury. 3. If the Governor in Council of any British possession shall issue a proclamation extending the provisions of this proclamation to transactions by persons, firms or companies resident, carrying on business, or being in that possession such first-mentioned proclamation shall have effect as if it were part of this proclamation. 4. This proclamation shall be read as one with the trading with the enemy proclamation No. 2, and with our proclamation, dated the 8th day of October, amending the same. The provisions of the above proclamation were extended

The provisions of the above proclamation were extended to Canada under a further proclamation of Jan. 15.

# THE STOCK EXCHANGES.

The following changes were made this week in minimum prices for stocks below which transactions are not allowed on the New York Stock Exchange. We give the successive changes in each stock where more than one change has been made and also the previous minimum.

# WESTERN FREIGHT RATES SUSPENDED.

Schedules were suspended by the Inter-State Commerce Commission on the 11th inst., pending investigation for increased freight rates on live stock, dressed beef and packinghouse products from Chicago and the Mississippi River in Central Freight Association territory to Eastern seaboard and interior Eastern points, including Buffalo, Erie and Pittsburgh, and also increases in carload minimum weights on live stock. Packing-house products under the proposed rates are increased from 31.5 to 33 cents per 100 pounds, cattle from 29.4 to 33 cents and dressed beef from 47.3 to 47.5 cents per 100 pounds. When the proposed advances were filed the Inter-State Commerce Commission suspended their operation until March 15; on the 11th inst. they were further suspended until July 13. The increases sought are in addition to the 5% increase allowed by the Commission in the advanced rate case, which increase became effective beginning January 15.

# CANVASS OF UNEMPLOYED BY METROPOLITAN LIFE INSURANCE COMPANY.

A final report on the investigation undertaken by the Metropolitan Life Insurance Co. to ascertain the number of unemployed among its industrial policyholders in this city has been sent to the Mayor's Committee on Unemployment by Haley Fiske, Vice-President of the company. The report discloses that out of the 155,960 families visited unemployment existed in 37,064, or 23.27% of these families. Approximately 655,000 persons were represented in the families visited and 252,912 of these were wage-earners. Among the 252,912 wage-earners, 45,421, or 18%, were unemployed at the date of the canvass. On the basis of these figures, the company estimated that the total number of unemployed in the city at the time of the canvass was approximately 400,000. The industries most affected are said to be the building trades, clothing manufacturers, workers in iron and steel products, printing and bookbinding, miscellaneous manufacturing, employers in wholesale and retail trade and domestic and hotel servants.

# THE ATTORNEY-GENERAL'S VIEWS ON RIGHTS OF ASSOCIATED PRESS.

An answer in the complaint filed against the Associated Press by the Sun Printing and Publishing Association of New York was given by U.S. Attorney-General Thomas W. Greg-ory this week. The "Sun" in its complaint, filed in February 1914, alleged the Associated Press to be an illegal combination in restraint of the trade of gathering and disseminating news, the charge being made that the Associated Press had refused to sell its news service to the "Sun" and that no member of the association was permitted to purchase news of the "Sun" on the ground that the "Sun" service was "antagonistic" to the service of the Associated Press. In giving his opinion in the matter, Attorney-General Gregory submits it as his belief that, assuming that the kind of service in

which the Associated Press is engaged is inter-State commerce, "it is no violation of the Anti-Trust Act for a group of newspapers to form an association to collect and distribute news for their common benefit, and to that end to agree to furnish the news collected by them only to each other or to the association; provided that no attempt is made to prevent members from purchasing or otherwise obtaining news from rival This, of course, is not to say that such agencies. an association might not develop into an unlawful monopoly. The facts adduced, however, in my opinion, do not show that that has happened in the case of the Associated Press." The Attorney-General quotes from the by-laws of the association a provision designed to prevent its members from procuring news from other agencies, and points out that he is advised by the President of the Associated Press that the power thereby reserved has not been exercised. Mr. Gregory adds that whether it has been enforced or not, this by-law should be abrogated, and he is informed that this will be done. The principal grounds of complaint are set out by the Attorney-General as follows:

1. That the members of the Associated Press are prevented or at least seriously hindered from obtaining news by purchase or otherwise from any

2. That the members of the Associated Press are prohibited from furnishing the news collected by them respectively to any newspaper which is not a member.

3. That through the operation of the right of protest above described a newspaper in a given locality applying for membership cannot be elected without the consent of the members in that locality.

In submitting his conclusions he says:

Assuming that the kind of service in which the Associated Press is en-Assuming that the kind of service in which the Associated Press is en-gaged is inter-State commerce (a question not free from doubt). I am nevertheless of the opinion that it is no violation of the Anti-Trust Act for a group of newspapers to form an association to collect and distribute news for their common benefit, and to that end to agree to furnish the news col-lected by them only to each other or to the association; provided that no attempt is made to prevent members from purchasing or otherwise obtain-ing news from rival agencies. And if that is true, the corollary must be true, namely, that newspapers desiring to form and maintain such an organization may determine who shall be and who shall not be their assoorganization may determine who shall be and who shall not be their associates

This, of course, is not to say that such an association might not develop into an unlawful monopoly. The facts adduced, however, in my opinion, do not show that that has happened in the case of the Associated Press. This disposes of the second and third grounds of complaint, based on the requirement that members of the association shall not furnish the news collected by them to any one outside the association, and on the restrictions as to membership. As regards the first ground of complaint, assuming as I do that the col-lection and distribution of news among the several States is inter-State trade or commerce, any by-law or other regulation adopted by the Asso-ciated Press which would have the effect of preventing or seriously hinder-ing its members from purchasing or otherwise obtaining news from a rival agency would be, I think, a restraint upon inter-State trade or commerce and an attempt to monopolize. The contention that the Associated Press has imposed such a regulation upon its membership, or at least has the power to do so, has a foundation in Section 7 of Article VIII of the by-laws, which reads as follows:

has imposed such a regulation upon its membership, or at least has the power to do so, has a foundation in Section 7 of Article VIII of the by-laws, which reads as follows: "Experience having shown that it is very difficult, if not impossible, to avoid or prevent violation of the rules prescribed by the last preceding section, or to detect or prove any such violation, if the members are per-mitted to purchase news from other associations, and that such purchase may be seriously prejudicial to the interest and welfare of this corporation and its members, the board of directors may, in their discretion, forbid the members to purchase intelligence from any other such association. "When the board of directors by a vote of two-thirds of all its members shall decide and notify any member that the purchase or receipt of news from any other person, firm, corporation or association, not a member of this corporation, or represented in this corporation by a member, or any other action by such member, establishes a condition that will be likely to permit the news of the corporation to be disclosed to unauthorized per-sons, such members shall immediately discontinue purchasing or receiving such news, or such other objectionable action. The decision of the board of directors as to the establishment of such condition shall be final, and the fact shall not thereafter be open to question by a member." The President of the Associated Press states that the power reserved in this by-law has not been exercised. As I understand, the complainant disputes that assertion. It is not necessary, however, for me to determine that issue of fact, since my conclusion is that this by-law, whether it has been enforced or not, should be abrogated. I am advised by the President of the Associated Press obtaining the news of any rival agency: "Receded, That the placing of an operator of any other news-gathering or distributing association in the office of an Associated Press paper is a stop which establishes a condition which will be likely to pe any other news-gathering or distributing association in his office or building. (Feb. 20 1901.)"

(rep. 20 1901.) I am not prepared to say, however, that this regulation has no reasonable relation to a legitimate end, namely, preventing representatives of rival agencies from coming into possession before publication of news collected by the Associated Press

agencies from coming into possession balator punctuation of news concerning by the Associated Press. Nor am I convinced that the regulation seriously hinders members of the Associated Press desiring to obtain the service of another news agency. On the contrary, my information is that some of them do obtain news from other agencies, while at the same time complying with this regulation. As further showing that a news agency may serve a newspaper without an oper-ator in the office of the newspaper, I refer to the statement made to me by the President of the Associated Press, to the effect that many of its members have neither an operator nor a wire of the association directly in their of-ices, but receive the news items by messengers and other means of commun-

ication. If my information on these points is incorrect, I shall be glad to

have it corrected. It is perhaps unnecessary for me to point out that if the Sun Printing & Publishing Association is not satisfied with the conclusions I have reached, it may itself bring suit against the Associated Press, either for an injunction or for damages, and thereby obtain a judicial determination as to the merits of its according to the second se of its complaint.

# THE DYE STUFF SITUATION SAID TO DEMAND RELIEF FROM FOREIGN MONOPOLIES.

Following an inquiry made by Secretary of Commerce William C. Redfield into the dyestuffs situation in the United States, Mr. Redfield states that there "seems to be a consensus of opinion that any rapid development and evolution of the dyestuffs branch, on a scale commensurate with the nation's needs, present and prospective, can be assured only on the basis of an effective law preventing that action toward control of our markets by a foreign monopoly which is now prohibited to a domestic monopoly.' "Some of the largest manufacturers", he says, "have person-ally informed the Department that what is needed is not a tariff change, but laws placing a foreign monopoly on the same basis as an American one." These observations of Mr. Redfield's are contained in a preliminary report submitted by him on the subject to the Senate on February 24, in response to a resolution passed by the Senate on January 26, asking him to ascertain all the facts relating to the supply of dyestuffs for American textile and other industries. The action on the part of the Senate was taken following widespread complaint by American manufacturers that their supply of dyestuffs, which came mostly from Germany, had been cut off by the war, or was obtainable only at prohibitive prices. In his findings of the 24th ult., the Secretary said in part:

said in part: A careful analysis of the situation shows that not only is the American supply and the limited production of coal tar dyestuffs completely domin-ated by the German industry, but that this is the case throughout the world. Even countries such as Great Britain and France, with ample supplies of crude material and highly developed industrial power, are in the same condition as the United States. In 1913 the total consumption of artificial dyestuffs in the world had attained a value of over \$92,000,000. Germany furnished 74% of the entire amount and over one-half of the materials needed to make the remainder. The 21 German companies engaged in the dyestuffs manufacture have a nominal capital of over \$36,700,000, on which dividends average 22%. Actual profits often reach 50%. The present crisis has evoked deep interest on the part of all concerned— tar distillers, manufacturers of chemicals, manufacturers of dyestuffs, the many users of the same, and American economists in general—as to how the problem can be settled.

There is no question but that our coke interests are ready to multiply their plants for the production of benzol and tar if a permanent market is assured. There is no question of the readiness of tar distillers to enlarge their plants for the production of an ample supply of the needed crudes if a continued demand is certain. American chemical works and American manufacturers of dyestuffs are ready to embark capital and experience in building up a distinctly American coal tar chemical industry, using entirely American crudes and intermediates, provided there is adequate legislative prohibition against both "dumping" or unfair restraint of American trade by the arbitrary action of a foreign monopoly permitted by foreign law and not as yet forbidden by our own. Foreign makers assert their ability to make at once over 90% of the dyes now consumed in the United States, which are now patent free, and state that the remainder will soon be freed from patent restriction. Mr. Redfield states that the American consumption of

Mr. Redfield states that the American consumption of artificial dyestuffs has attained an annual value of \$15,000,-000, of which about \$3,000,000 is supplied by a domestic production. The average imports are from Germany \$7,850,000; Switzerland, \$910,000; Great Britain and others, \$370,000.

It has recently been reported in Washington that a process has been discovered for securing toluol and benzol from crude petroleum. These chemicals are the base products from which many of the aniline dyes are evolved and the prospect of a cheaper process by which supplies of them may be obtained would work in part to the solution of the problem for the establishment of more adequate dyestuffs works in this country.

# CUSTODIAN BANKS NAMED IN WOOL SHIPMENT PLANS.

The Textile Alliance, Inc., of New York has received a letter from the British Board of Trade, forwarded through Sir Richard F. Crawford of the British Embassy, which confirms the wool-importing plan, entered into by the British Government with the Alliance, whereby the shipment of certain kinds of wool from Great Britain and Australia to the United States is provided for under licenses. Cable advices received on the 17th inst. from Messrs. Freshfields, London solicitors of the Alliance, stated that the British Colonial Office has extended the wool-exporting plan to include New Zealand and South Africa ports as well as those of Great Britain and Australia. A recommendation has been made to the Governor-General of Australia that no

### MAR 20 1915.]

Australian licenses be granted unless intended recipient is said to have the approval of the British Embassy and the Textile Alliance. To secure uniformity it is planned to make similar arrangements with New Zealand and South Africa. The Textile Alliance has also been advised that the fact that wool, tops and yarn have been declared contraband of war will not affect the wool-import plan. Announcement is also made that the British War Department has approved as custodian bankers the London representatives of the following firms: Kidder, Peabody & Co., Brown Bros. & Co., Lee, Higginson & Co. and J. P. Morgan & Co. Under the arrangements agreed to two weeks ago, these banking firms are to hold the wool until shipment is approved and ordered released by President Patterson of the Textile Alliance, Inc.

#### GREAT BRITAIN WIDENS CONTRABAND LIST-EMBARGO ON PLUMBAGO LIFTED.

Under an Order In Council, signed by King George on the 12th inst., the following articles have been placed on Great Britain's list of absolute contraband: Wool, woolen and worsted yarns, wool tops and noils, tin, chloride of tin, tin ore, castor oil, paraffin wax, copper, iodine, lubricants, hides of cattle, buffaloes and horses, skins of calves, sheep, goats and deer; leather, dressed and undressed, suitable for military equipment, ammonia and its salts, urea, aniline and its compounds.

Tanning substances of all kinds, including extracts for use in tanning, have been placed on the list of conditional contraband. It is also declared that the terms "foodstuffs" and "feeding stuffs for animals" in the conditional contraband list previously published shall be interpreted to include oleaginous seeds, nuts and kernels, animal and vegetable oils, fats other than linseed oil, suitable for use in the manufacture of margarine and cakes, and meals made from oleagin-ous seeds, nuts and kernels. This apparently makes cotton seed and all cotton oil products conditional contraband.

Direct shipments of plumbago from Ceylon to the United States have been authorized by the British Government, according to the following statement issued by the British Embassy at Washington on the 12th inst.:

The British Government has authorized the Governor of Ceylon to grant The Britan groups and the states.

The arrangement applies also to plumbago exported from the United Kingdom to the United States

# STATISTICS OF NEW YORK WORKMEN'S COMPEN-SATION LAW.

The Workmen's Compensation Law in New York State does not appear to have achieved any striking degree of success during the six months of its operation to Jan. 1. According to the report of the State Compensation Commission, submitted to the Legislature on the 7th inst., the number of policies in force on Dec. 31 was 7,119 and the amount of semi-annual premiums was \$692,584. The total expenses of the Commission were \$470,967, of which salaries amounted to \$285,281. \$500,000 was appropriated for the Commission, and the estimated cost this year is \$425,000. The number of claims allowed was 18,930, and the total of the amounts paid was \$1,576,801. The average award paid to insured men was about \$83. According to the report, there were 130,723 workmen insured during the six months from July 1 1914 to Jan. 1 1915, but only 22,221 claims for compensation were presented. The principal reason for this, it is stated, is that the law allows compensation only for such injuries as result in disability for more than fourteen days. and that many of the notices of injury were from persons who were not in employments covered by the Act, and some reported injuries received prior to July 1 1914.

The report says:

The report says: "The present law provides that the expenses of the State insurance fund shall be paid by the State until Jan. 1 1917, and thereafter from the State Insurance fund itself. The Commission now recommends that the subsidy granted by the State for the State Insurance fund be discontinued on July 1 1915, the fund thus to be put upon a self-supporting basis eighteen months prior to the date established by the present law. Upon the monthly estimate, as made by the Legislature, of expenditures for the State fund at \$14,000, this change in the law would save \$252,000 to the State over the original plan of the Legislature." The law covers 180,000 employing industries with 2,000 =

The law covers 180,000 employing industries with 2,000,-000 workmen and an annual pay-roll of \$1,000,000,000.

# 953

#### COMMISSION ON INDUSTRIAL RELATIONS INVESTI-GATING FARM LANDS QUESTION.

The Federal Commission on Industrial Relations, which recently undertook an investigation in New York into the Rockefeller and other foundations, began an inquiry in Dallas, Texas, on the 16th inst. into the farm land question. In the Dallas inquiry the Commission seeks to ascertain what new tendencies of importance, if any, are arising from the creation by capital, largely from the Northern States of vast farms in the South. Charles W. Holman, Special Agent for the Commission, in outlining the scope of the inquiry, said that important points on which information would be sought included methods of bringing the rural population to an equilibrium; whether concentration of land ownership and its attendant speculative increase in valuations is not closely connected with the decreased purchasing power of the American laborer; whether the laborer of America finally will go back to the land; what method should be taken to prevent land speculation and to prevent enormous interest charges; how to pave the way for the organization of country life, such as the buying and selling of farm products, co-operative land banks and personal credit societies.

#### BANKING, LEGISLATIVE AND FINANCIAL NEWS.

Sales of bank stocks at the Stock Exchange this week amount to only 15 shares, and none were sold at auction. One lot of ten shares of trust company stock was sold at

Snares. BANK—New York. Low. High. Close. Last previous sale. \*15 Commerce, Nat. Bank of \_\_\_\_\_\_ 167 ½ 167 ½ 167 ½ Mar. 1915— 167 ½ TRUST COMPANY—New York. 10 Metropolitan Trust Co...... 396 396 396 Mar. 1912— 447 \* Sold at the Stock Trust

\* Sold at the Stock Exchange.

A New York Stock Exchange membership was posted for transfer this week, the consideration being \$44,000, the same as the last preceding transaction.

J. P. Morgan sailed for Europe on Thursday on the steamship Philadelphia. While it is customary for Mr. Morgan to go abroad for a brief vacation every year at this time, rumor has had it that his present trip is being made in relation to the establishment of a large credit in New York by the British Government and a proposed loan to France. The only statement Mr. Morgan would make upon his departure was: "I am going away on my usual vacation for a much-needed rest. I have not one word to say regarding conditions either at home or abroad, nor will I say anything about the business significance of my trip.'

Samuel L. Rogers of North Carolina was sworn in on the 16th inst. as director of the Census. Mr. Rogers' nomination was referred to in our issue of the 6th inst. He succeeds William J. Harris, who resigned to become a member of the Federal Trade Commission.

Charles C. McChord was elected Chairman of the Inter-State Commerce Commission on the 16th inst. to succeed Commissioner James S. Harlan. The chairman changes every year, members of the Commission rotating in the office. Mr. McChord, who is a Democrat, was appointed to the Commission by President Taft in 1910.

In response to numerous inquiries as to the probable effect of the war upon American business, President George Woodruff of the First National Bank of Joliet, Ill., has compiled an interesting chart entitled "Prosperity and War". The chart was made up after a careful study of the effects of the great wars of the past century upon neutral countries engaged in manufacture and commerce. It illustrates what has taken place during other wars, and the opinion is offered that it may forecast happenings during and after the present conflict. Five stages or periods are indicated, namely first: the outbreak of war, at which time all business is thrown into sudden confusion and depression; second, after the war has had a good start, at which time the business world has had an opportunity to re-adjust itself and the public has regained confidence; third, when the probable result of the war is known, and many great uncertainties are cleared away and the business world is able to begin to discount the future; fourth, when peace is declared, and the business world experiences a feeling of relief from strain and the public grows enthusiastic because of the cessation of war;

and fifth, when the great commercial and industrial re-adjustment takes place, at which time the unnatural stimulus of war upon business come to an end and the business world gets down to a sound foundation and begins the task of commercial and industrial rejuvenation.

Preliminary arrangements having in view the creation of an organization which would bring about the establishment of a uniform rate of foreign exchange were made at a meeting in Pittsburgh on the 7th inst. of representatives of nearly one hundred banks of Ohio, Western Pennsylvania and West Virginia. The organization is to be known as the Authorized Foreign Exchange Bankers. All bankers affiliated with the association will be compelled to charge only the rates of exchange fixed by the governing rules of the body. The following committee was named to perfect the organization of the proposed association: Chairman, William F. Benkisker, Manager of the Foreign Department of the First-Second National Bank of Pittsburgh; L. Burger of the Dollar Savings & Trust Co., Youngstown, Ohio; Henry Friedman of Joseph Roth & Son, McKeesport; H. Leonard of the First National Bank, Duquesne; A. Tanzer of the Monessen Savings & Trust Co. and B. Ranki of the Homestead Savings & Trust Co.

The Mechanics & Metals National Bank of the City of New York will celebrate its 105th anniversary on the 23rd of this month, having been organized March 23 1810. Its history is part of the financial story of the Metropolis. With the close of the Revolutionary War and the revival of commerce and industry financial organization was found to be a necessity to the country. Great efforts were then being made to restore trade to its wonted stability, it having become demoralized by the effects of a depleted currency and the hardships entailed by the protracted struggle for independence. Toward the close of the year 1783 the prospects brightened, and that winter Congress took its seat in the old City Hall on Wall Street. In 1800 the Society of Mechanics' & Tradesmen of the city of New York was founded. This organization was the first philanthropic, public-spirited enterprise established in the new metropolis of the Union. (Philadelphia had until about that time been the metropolis and the most prosperous of American towns.) The society grew in strength and membership and its scope of work broadened. The year 1810 witnessed the establish-ment of the Mechanics' Bank of the City of New York by the society and as at that time bank charters were very difficult to obtain, its franchise was very valuable. As its name indicates, the bank was founded in the interests of mechanics and tradesmen, the charter providing that \$600,000 of the \$1,500,000 capital stock should first be offered to mechanics of the State of New York. The stock was over-subscribed and it became necessary to increase the capital to \$2,000,000. The first President of the institution was John Slidell and Whitehead Fish was the first Cashier. At the outbreak of the War of 1812 and during the many dark days succeeding, the bank, which then had the largest capitalization of any similar institution in New York, promptly placed at the service of the Government all the financial aid in its power. The original quarters occupied by the bank constituted for years one of the landmarks of Wall Street, it being a remodeled three-story dwelling house, which had at one time been tenanted by Alexander Hamilton. The building was a modest one, standing back from the street a rod or so, and the bank's offices opened on the ground floor, the President and his family occupying the upper rooms. On the same site the Mechanics' Bank, later called the Mechanics & Metals National Bank, did business for 103 years, or unti April 15 1913, when the property was sold to J. P. Morgan & Co. and the bank removed to 50 Wall Street, its present location. In 1904 the business of the Leather Manufacturers' National Bank, of which Gates W. McGarrah was President, was merged into the Mechanics' National Bank, Mr. McGarrah taking the presidency of the combined institutions. In 1910 the National Copper Bank was consolidated with the Mechanics' National under the present title of the Mechanics & Metals National Bank. During 1914 the Mechanics & Metals National Bank absorbed the Fourth National Bank, and it is the intention of the institution to move from Wall Street about April 15th to the building known as 20 Nassau Street, fronting the entire block between Pine and Cedar Streets, and formerly occupied by between rine and Cedar Bucces, and formerly becapied by the Fourth National Bank. Extensive alterations are now being made in the building in order to accommodate the bank's rapidly growing business. The call by the Comp-troller of the Currency as of March 4th showed that the

Ligitized for FRASER

bank has total resources of \$135,804,402 05; capital of \$6,000,000, surplus and undivided profits of \$9,033,160 32, and deposits totaling \$112,590,932 18, an increase under the present management in the past 11 years of \$95,000,000. The fact is significant that at the present time there are on the bank's deposit books names that have been there for a century. It is customary among many of the large banks to serve luncheon to their employees. With the Mechanics' this has always been done, and perhaps originated in the time of the first President, when he had his clerks sit down with him in his own little dining room over the bank. The bank has always disbursed liberal dividends in addition to setting aside an ample surplus. The present officers are : Gates W. McGarrah, President; Nicholas F. Palmer, Frank O. Roe, Walter F. Albertsen, Harry H. Pond and Samuel S. Campbell, Vice-Presidents; Joseph S. House, Cashier; John Robinson and Ernest W. Davenport, Assistant Cashiers.

Robert L. Smith has been elected Assistant Secretary of the Broadway Trust Co. of this city.

The Bank of New York, N. B. A., celebrated the one hundred and thirty-first anniversary of its organization this week. The institution, which is the oldest in the State and the second oldest in the United States, was organized on March 15 1784, and began business on June 9 of that year. Except for a brief period in 1799, when it was forced to take temporary quarters in Greenwich Village on account of yellow fever and again in 1822 because of another epidemic, the bank has occupied its present site at William and Wall streets since 1798. Alexander Hamilton was one of the founders of the bank. The institution was incorporated as a national bank in 1865. At the annual dinner of the Bank of New York Club on the 13th inst. a copy of the institution's history was presented to each member.

William Douglas Sloane, who was identified as director with some of the city's banking institutions, died yesterday at Aiken, S. C. Mr. Sloane was a director in the firm of W. & J. Sloane, a member of the board of the National City Bank, the Guaranty Trust Co. the Guaranty Safe Deposit Co., United States Trust Co., the Central & South American Telegraph Co., Eastern Steel Co., and the Mahoning Coal Railroad Co.

Norman P. Ream was elected a trustee of the New York Trust Co. of this city on the 17th inst. The regular quarterly dividend of 8% was declared payable March 31 to stockholders of record March 20.

The Lawyers Title & Trust Co of this city has declared its 66th consecutive dividend, being a quarterly distribution of  $1\frac{1}{4}\%$ , payable April 1. This places the stock on a 5% per annum basis, as against a previous annual basis of 8%. The company recently took over the Home Trust Co. of Brooklyn and changed its name by dropping the word Insurance.

The State Bank of this city has assumed the business of the Clinton Bank at 158 Rivington Street, the transaction having been sanctioned by Eugene L. Richards, Superintendent of Banks. The Clinton Bank has been opened as a branch of the State Bank; the latter has a capital of \$1,500,000. The Clinton Bank, established in October 1913, had a capital of \$100,000.

At a meeting of the stockholders of the Phoenix National Bank of Hartford on the 16th inst. the Board of directors was enlarged with the election of Morgan G. Bulkeley, Jr. and James L. Howard as members. Mr. Bulkeley, who is assistant Treasurer of the Aetna Life Insurance Co., amd Mr. Howard, Secretary of the Travelers' Insurance Co., were directors in the Charter Oak National Bank, which was absorbed by the Phoenix National last month.

At a special meeting of the stockholders of the Webster & Atlas National Bank of Boston on the 8th inst. three new directors were elected, namely: Edward W. Grew, of the firm of Meredith & Grew; Thomas W. Thatcher, of Thatcher & Co., and Walter Tufts, Vice-President of the National Lead Co. of Massachusetts.

The Hartford Morris Plan Co., which was recently organized in Hartford, opened for business on the 11th inst. at 13 Haynes Street. The company has a capital of \$100,-000. Louis R. Cheney is President, Francis R. Cooley and Isidore Wise, Vice-Presidents, and Louis E. Stoner, pre-

### MAR. 20 1915.]

viously Assistant Cashier of the City Bank of Hartford, is Secretary, Treasurer and General Manager. The principal stockholder of the company is the Industrial Finance Corporation of New York. Similar organizations have been formed in other parts of the country, one of those recently established being the Morris Plan Co. of New York, which began business on Dec. 31. The organization aims to provide an opportunity for persons of moderate means to secure loans of money at reasonable rates of interest, repayable under equitable conditions.

The Providence National Bank of Providence announces the introduction of a new policy—the payment of interest on daily balances of \$1,000 or over. Recently this institution has been taking certificate deposits at interest, but until now it had never paid interest on daily balances. The Providence National is in its 124th year; it was incorporated in 1791 as the Providence Bank and was the first bank established in Rhode Island and the fifth in the United States. It has a capital of \$500,000, surplus of \$900,000 and deposits of over one million dollars.

A charter has been granted for a new State bank in Philadelphia, to be known as the Twenty-Second Street Bank. As heretofore stated, application for the charter was made on Dec. 7. The incorporators include Paul Kruger, Charles Seetto, Charles F. Burger, Benjamin Kauffman and Samuel Mosca. The bank, which will have a capital of \$100,000, will be located on 22d Street above Cambria, opening in temporary quarters in May. A permanent site has been acquired in the same square and a bank building will be erected.

A special meeting of the stockholders of the Philadelphia Trust, Safe Deposit & Insurance Co. of Philadelphia has been called for May 4 1915 to take action on a proposal to change the corporate title of the institution to the Philadelphia Trust Co.

John Bacon, Treasurer of the Easton Trust Co. of Easton, Pa., died on the 14th inst. at the age of seventy-two.

A special meeting of the stockholders of the National Howard Bank of Baltimore will be held on April 15 to formally ratify the merger of the bank's business with the National Exchange Bank on Jan. 18.

The directors of the Badger State Bank of Milwaukee have decided to change their institution to a national bank. According to President Gustav Reinke, the principal reason for the change is that the bank may become a member of the Federal Reserve System and thus take advantage of the privilege of having notes of its borrowers discounted by the regional Reserve bank. With the change to the Federal system the capital of the bank is to be increased from \$100,000 to \$200,000. The new name of the bank will be the Badger National Bank. President Reinke is assisted in the management by C. L. Roloff and J. J. O'Connell, Vice-Presidents; F. E. Wallber, Cashier. The deposits of the institution are in the neighborhood of \$1,000,000.

The Seaboard National Bank of Norfolk, Va., is now occupying newly enlarged quarters in its building in that city. Imported Tavernell marble has been used extensively for walls, counters, &c., while the screens are of solid bronze. Massive columns finished also in gray Tavernell run through the centre of the room. The Seaboard is enjoying marked prosperity. While still a young bank, it has, by careful and efficient management, built up a deposit account of \$1,283,-968 and aggregate resources of \$2,068,266. Wm. T. Old is President, H. T. Campbell, Vice-President, Abner S. Pope, Cashier, and W. C. Jenkins and W. P. Whaley, Assistant Cashiers.

At a meeting of the executive committee of the Virginia Bankers' Association on the 27th ult., it was decided to hold the annual convention of the association at Old Point Comfort June 17, 18 and 19.

According to the statement issued March 4 1915, the Fourthand First National Bank of Nashville, Tenn., has deposits of \$9,859,581 08, surplus and undivided profits of \$862.871 07 and capital stock paid in of \$1,100,000. Total

assets are \$13,470,846 02. The First Savings Bank & Trust Co., which is affiliated with the Fourth and First National Bank, on the same date had deposits of \$1,204,355, surplus and undivided profits of \$30,495, capital stock of \$220,000 and total resources of \$1,480,119. James E. Caldwell is President of both institutions. He is assisted in the management of the Fourth and First National byW.C.Dibrell, T.D. Webb and J. S. McHenry, Vice-Presidents; Randall Curell, Cashier; G. W. Pyle and C. H. Litterer, Assistant Cashiers, and D. M. Wright, Auditor.

955

Frank F. Hill, heretofore Vice-President of the Union & Planters' Bank & Trust Co. of Memphis was elected President of the institution on the 11th inst. to succeed the late Samuel P. Read, who died on Feb. 8. J. R. Pepper, a Vice-President, has been made Chairman of the board of directors. N. C. Perkins is active Vice-President of the institution.

The Hibernia Bank of Savannah, Ga., is now occupying its magnificent new home at the corner of Bay and Drayton streets. The new building, which is of the Greek-Doric design, and built of Georgia granite, is said to be one of the finest bildings in the South devoted exclusively to the needs of the one institution. 'Six massive' Doric columns face either street, extending to the roof, giving it a particularly attractive and substantial appearance. The interior of the main banking room is decidedly ornate and most complete in all its details. Vermont marble is used for all marble work, counters, &c., while the screens and grill work are of Tiffany bronze. The wood-work, furniture, &c., is built along original designs of Mexican mahogany. The walls and ceiling are finished in Caenstone cement. Large Herring-Hall-Marvin vaults of the latest design and construction have been installed. The Hibernia has a capital of \$200,000 and a surplus of \$200,000. M. A. O'Byrne is President, Charles Ellis, Vice-President, Joseph W. Heffernan, Vice-President and Cashier, and James P. Doolan, Assistant Cashier.

The Heard National Bank of Jacksonville, Fla., of which J. J. Heard is President, is rapidly taking its stand as one of Florida's leading financial institutions. During the past two months, or rather, between the official calls of Dec. 31 1914 and March 4 1915, the deposits of this bank increased from \$2,279,928 to \$3,364,087—a gain of over a million dollars. The Heard National has a capital of \$1,000,000 and aggregate resources of practically six million dollars (\$5,-995,394). Associated with Mr. Heard in the management are W. B. Sadler as Vice-President and Cashier; J. C. Boyd, Vice-President; and Jno. M. Bell, Geo. C. Marlitt and Thos. K. Cureton, Assistant Cashiers.

Albert Baldwin Jr., President of the New Orleans National Bank, died on the 11th inst. Mr. Baldwin began his business career with the hardware concern of A. Baldwin & Co., and on the withdrawal of his father as head of the concern he became President and continued in that capacity until his death. In 1892 Mr. Baldwin was made a director of the New Orleans National Bank and three years later Vice-President. In 1909 he succeeded R. E. Craig as President of the bank. Mr. Baldwin was also President of the Gullett Gin Co. of Gullett, La., President of the New Orleans Water Supply Co., Secretary and Treasurer of the Salmen Brick & Lumber Co., Vice-President and Treasurer of the Times-Picayune Publishing Co. and a director of the Illinois Central and Texas Pacific Railroad companies. He was in his forty-ninth year.

Our attention is called to the records of the banks in Prescott, Ariz., a town of about 6,000 people. According to the reports of Dec. 31 1914, the resources of the four banks in the city aggregate \$4,139,361, while total deposits amount to \$3,229,586. The showing of the individual banks, so far as deposits are concerned, are: Prescott National Bank, \$1,-163,389; Bank of Arizona, \$958,761; Yampai County Savings Bank, \$586,657; and Commercial Trust & Savings Bank, \$520,779.

The stockholders of the old National Bank of Commerce of Spokane last month formally ratified the absorption of their bank by the Exchange National Bank, which, as mentioned in these columns, was consummated on Jan. 12.

posits of \$9,859,581 08, surplus and undivided profits of James Aird, Secretary of the Bank of Montreal, died on \$862,871 07 and capital stock paid in of \$1,100,000. Total the 12th inst. Mr. Aird was born in Troon, Scotland, in

1855, and went to Montreal in 1873, entering the service of the Bank of Montreal that same year as a junior clerk.

956

A bill incorporating a new Canadian bank to be known as the Colonial Bank of Canada was approved by the Banking and Commerce Committee at Ottawa on the 12th inst. The stock of the proposed bank will be owned by the Colonial Bank of London. It is expected that the head office of the Colonial Bank of Canada, which is to have a capital of \$500,-000, will be in Montreal, and that branches will be opened in Halifax and St. John. It is the belief that the bank will not conduct an ordinary banking business, but will act as the Canadian headquarters for the extensive business which the Colonial Bank of London has already established in the West Indies.

William Baxter, New York agent of the Chartered Bank of India, Australia & China, at 88 Wall Street, this city, has received the following cabled advices from the head office in London:

The directors have declared a dividend for the past half-year (June-December) of 16% per annum, free of income tax, making for the year 1914 dividend at the rate of 14%. The sum of  $\pm 25,000$  has been written off premises account and  $\pm 125,300$  has been carried forward as undivided profits. In addition to the above, a special fund of  $\pm 150,000$  has been created to meet contingencies.

#### THE ENGLISH GOLD AND SILVER MARKETS.

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of March 4 1915:

GOLD.

A rather significant feature this week is the purchase and also the sale of considerable amounts of gold coin by the Bank of England. Two weeks' Transval outputs having figured in last week's return and none in this, Transvaal outputs having figured in last week's return and none in this, the reduction on balance this week is unusually large. The following amounts were received by the Bank:
Feb. 25.\_\_£66,000 in bar gold.
25.\_\_192,000 in foreign gold coin.
1.\_\_65,000 in bar gold.
3.\_\_97,000 in bar gold.
Withdrawals were made as under:
Feb. 25.\_\_£66,000 in foreign gold coin.
Mar. 1.\_\_124,000 in foreign gold coin.
Mar. 1.\_\_124,000 in foreign gold coin.
3.\_\_1,000,000 set aside on account of the Treasury Currency Note Reserve (making the total £27,500,000).
During the week the net reduction was £1,277,000.
SILVER.

During the week the net reduction was £1,277,000. SILVER. The undertone, which has been quite good for some time past, has been revealed during the week by an advance to a higher level of prices. Quota-tions have neared 23d, several times since the beginning of the year, but in consequence of a considerable amount of silver having been held back for prices about that limit, quotations have receded. When, however, the market had gathered sufficient impetus to carry off these supplies, and no similar barrier remained to check a further advance, the price rose. At present the Indian Bazaars are rather holding back from buying at the ad-vance, and the Continent and elsewhere have taken most of the offerings, which have not been large. The price rose from 22%d. to 23d. on the 26th ult., and continued to be quoted at almost continually rising rates until yesterday, when 23%d. was fixed, but fell to-day to 23%d., owing to the absence of Bazaar support. Appended are particulars of the last two Indian Currency Returns cabled to this country, in lacs of ruppees: Figh 22. Feb 28.

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of February 25 1915:

#### GOLD

Owing to an acceleration of the weekly deposit of gold at Pretoria, a double portion has been credited to the Bank of England during the week. The return, therefore, shows an increase of £275,000. ceipts were announced by the Bank: Feb. 18.- £449,000 in bar gold. The following re-

- 19\_\_\_ 20\_\_\_
- 120,000 in bar gold. 53,000 in U. S. gold coin. 72,000 in bar gold.

20-- 72,000 in bar gold. 24-- 782,000 in bar gold. Withdrawals were made as under: Feb. 24--£1,000,000 in gold set saide on account of the Treasury Cur-rency Note Reserve (raising the total to £26,-500,000).

500,000). 24.\_ 201,000 in bar gold. The latter withdrawal is understood to have been made for New York, for which quarter about the same amount of United States coin just arrived from Brazil was purchased in the open market. An interesting innovation has been made by the India Council by the sale of deferred telegraphic transfers upon India, payable 16 days—the normal time occupied by post—after the issue of the telegram. This ar-rangement will undoubtedly conduce to the convenience of merchants transacting business with India, and incidentally increase the stability of exchange with that country.

[Vol. 100.

SILVER. The tone of the market has been very steady. On the 19th inst, the quo-tation receded 1-16d, to 22%d, and remained at that figure every day with the exception of Wednesday, when the price was fixed at 22 15-16d. The main reason for this steadiness is the scanty selling from the United States of America and the interruption of supplies from Mexico. Demand is similar in character to that of preceding weeks, namely, a certain amount of Continental inquiry and almost daily orders from the Indian Bazaars. The following extract from the "Pioneer" of Allahabad, under date of Jan. 29, possesses special interest at the present time. It indicates that though India suffers economically from the state of war in common with other parts of the British Empire, the great mass of its population, which exists by agricultural labor, will in the long run derive much benefit from an increase in the area under cultivation and from the higher price obtain-able for the fruits of industry. The same consideration applies to Canada and the other great dependencies, to whom the people of this country look for a large proportion of their means of sustenance. "The first forecast of the wheat crop of the Punjab states that the season was exceptionally favorable. There was everywhere abundance of mois-ture in the soil at sowing time, while inundation canals ran well and river floods were exceptionally heavy. Favorable climatic conditions combined with the rise in price due to war and with the recommendation to culti-vators to sow cereals and grain instead of oliseeds has led to a considerable increase in sowings. The quinquennial average area sown is 8,224,555 area—irrigated 4,242,100 and unirrigated 3,982,455. The area now esti-mated exceeds this by 12%, the increase on irrigated and unirrigated land being 7% and 17%, repsectively. Moreover, sowings were still in progress in the north and west of the province when the district estimates were is-sued, and some districts in the Jullundar division and several of the native States States seem to have under-estimated the areas. So the next forecast will probably show a considerable increase." An Indian currency return for the 15th inst. gives the following details,

in lacs of rupees:

Notes in circulation	60.05	
Reserve in silver coin	30,14	
Gold coin and bullion	8,26

**The Federal Reserve Banks.**—Following is the weekly statement issued by the Federal Reserve Board on March 13: The cash resources of the banks show but little change since the previous report, both gold and cash reserves having slightly decreased during delphia and Onicago. Philadelphia reports a decrease of about one-half million dollars in other cash resources, the changes at the other banks all in-volving smaller amount. An increase of about 2 million dollars is shown by loans and discounts, Philadelphia and Cleveland with a gain of about one-half million dollars each leading all others, including the Southern banks. Of the total loans and discounts, \$6,828,000 is represented by acceptances held at six banks, New York alone reporting nearly 50% of the latter amount. The amount of investments shows an increase for the week of about \$370,000. Additional purchases of U. 8. bonds are reported by three West-dulars is due mainly to the larger amount of Federal reserve notes in the vaults of the New York and Cleveland banks. The value have but little change, the considerable decreases report a under this head by the St. Louis and Kanasa City banks being offset by gains of show nor the three Eastern banks. Federal Reserve Agents report a total of \$35,441,000 of Federal Reserve notes issued to the banks, an increase for the week of about 75% is secured by gold on deposit with Federal reserve agents. The banks outstanding circulation is \$28,949,000, a gain of 2.5 million dollars for the week. The net liability of the banks on account of their outstanding circulation is stated as \$7,004,000.

The averages of the New York City Clearing-House banks and trust companies, combined with those for the State banks and trust companies in Greater New York City outside of the Clearing House, compare as follows for a series of weeks past:

COMBINED RESULTS OF BANKS AND TRUST COMPANIES IN GREATER NEW YORK.

We omit ciphers in all these figures

Total Money Holdings. Entire Reserve on Deposits. Week Ended-Loans and Investments Demand Deposits. Other Money. Specie. 

In addition to the returns of "State banks and trust companies in New York City not in the Clearing-House" furnished by the State Banking Department, the Department also presents a statement covering all the institutions of this class in the whole State. The figures are compiled so as to distinguish between the results for New York City (Greater New York) and those for the rest of the State, as per the following.

For definitions and rules under which the various items are made up, see "Chronicle," V. 98, p. 1661.

The provisions of the law governing the reserve requirements of State banking institutions were published in the "Chronicle" March 28 1914 (V. 98, p. 968). The regulations relating to calculating the amount of deposits and what deductions are permitted in the computation of the reserves were given in the "Chronicle" April 4 1914 (V. 98, p. 1045).

Imports and Exports or the Week .- See second page preceding.

# Bankers' Gazette.

#### Wall Street, Friday Night, March 19 1915.

The Money Market, &c .- New phases of the European war situation, especially those in the naval departments, have absorbed a good deal of attention in financial circles throughout the week. That developments of this character have had any direct influence in the financial affairs of this market, it would, perhaps, be difficult to point out. There is no doubt, however, that the war and its possibilities are a dominant factor in alomst all departments of activity in this country. It is rapidly changing the relative financial and commercial status of all countries, especially those where any considerable amount of wealth has accumulated. It has, as is well known, largely reduced the imports and increased the exports of this country, and thus greatly disturbed the international exchange markets. Europe cannot, of course, under present conditions, pay in gold for the goods she is buying here, and the matter of effecting an offset is puzzling financial experts on both sides of the Atlantic. No doubt the return of a part of the American securities heretofore held in Europe will finally result; but the process of transfer is necessarily slow. Week by week since early in the year these securities have been coming to us, but not in sufficient amount to maintain an equilibrium, and hence the unbalanced condition of European exchange. One gets a vivid impression of the rapidity with which the balance in our favor accumulates from a report of last week's exports which shows that it was \$50,000,000 in excess of imports for the same period. As against this, \$7,300,000 gold has been engaged for import, the most of it coming from Canada.

The matter of establishing a lower minimum schedule of prices for some American stocks at the London Stock Exchange has been discussed this week, and it is reported that to-day's trading in London was on a minimum scale lowered to a parity with New York prices. This is believed to have been one of the causes for a somewhat freer movement of Americans abroad and a more active and firmer market for stocks here. There was, moreover, new evidence that sales of the latter on our own Exchange were for foreign account. It is interesting to note also that money market rates to-day, both here and in London, were at or near the lowest of the season.

The open market rate for call loans on the Stock Exchange on stock and bond collaterals ranged from 11/2 to 2%. The rate on Friday was 134@2%. Commercial paper closed at 31/4 @31/2% for sixty to ninety-day endorsements and prime four to six months' single names. Good single names 334 @ 4%

The Bank of England weekly statement on Thursday showed a decrease of £411,704 in gold coin and bullion holdings, and the percentage of reserve to liabilities was 25.58, against 24.47 the week before. The rate of discount remains unchanged at 5%, as fixed Aug. 13. The Bank of France shows an increase of 1,612,000 francs gold and 596,000 francs silver.

Foreign Exchange.-The market for sterling exchange has ruled irregular this week, though with some degree of steadiness evident towards the close. The week's gold engagements have aggregated \$7,300,000, including \$150,000 in transit for Cuba.

In transit for Cuba. To-day's (Friday's) actual rates for sterling exchange were 4 77  $\frac{1}{2}$  @4 77  $\frac{1}{2}$ for sixty days, 4 79 $\frac{1}{2}$  @4 79 $\frac{1}{2}$  for cheques and 4 79 $\frac{1}{2}$  @4 79 $\frac{1}{2}$  for cables. Commercial on banks, nominal, and documents for payment, nominal. Cotton for payment, nominal, and grain for payment, nominal. There were no rates for sterling posted by prominent banking houses this week. To-day's (Friday's) actual rates for Paris bankers' francs were nominal for long and 5 30 $\frac{1}{2}$  for short. Germany bankers' marks were nominal for long and 52 $\frac{1}{2}$  for short. Germany bankers' guilders were 39 $\frac{1}{2}$  for short. Exchange at Paris on London, 25f. 47 $\frac{1}{2}$ c.; week's range, 25f. 39c. high and 25f. 47 $\frac{1}{2}$ c. low. Exchange at Berlin on London not quotable. The range for foreign exchange for the week follows:

The range for foreign exchange for Sterling, Actual—Sixty Days. High for the week4 78 Low for the week4 77 ½	<i>Cheques.</i> 4 80 <sup>3</sup> / <sub>8</sub> 4 79 5-16	Cables. 4 80 % 4 79 %

Domestic Exchange.—Chicago, 5c. per \$1,000 premium. Boston, par. St. Louis, 5c. per \$1,000 premium. San Francisco, 50c. per \$1,000 premium. Montreal, \$6 5634 per \$1,000 premium. Minneapolis, 35c. per \$1,000 premium. Cincinnati, par.

State and Railroad Bonds .- Sales of State bonds at the Board this week include \$7,000 N. Y. Canal 4s, 1961, at 99% to 100; \$20,000 N. Y. Canal 4½ at 108%; \$16,000 Virginia 6s def. ctfs. at 55¼ to 56½; \$6,000 N. Y. Canal 4s, 1960, at 993% to 9934, and \$11,000 N. Y. State 4½ s at 10834.

Despite the fact that quotations of several issues showed rather wide fluctuations, the market for railway and industrial bonds has been generally steady. Sales showed a substantial decrease from last week's total and from a list of 25 leading issues ten advanced and ten declined. Net changes were, however, mostly fractional.

Of the railroad bonds, Chicago & Eastern Illinois gen. 5s made a low record of 53, as against a closing price of 61 a week ago. This road, as is well known, is in the hands of a re-The committee on reorganization reports a marked ceiver. falling off in earnings and consequent inability to meet obligations.

On the other hand, among the industrial securities, one of the prominent features was the rise of Inspiration Copper 6s of 1919 and 1922. These issues showed a gain of 21/4 and 25%, respectively, due probably to a speculative demand. Selling on a S-20-F basis has increased \$105,000, being

\$1,869,000 as against \$1,764,000 last week.

United States Bonds .- Sales of Government bonds at the Board were limited to \$1,000 2s reg. at 985/8; \$1,000 4s coup. at 11034; \$1,500 3s reg. at 1011/2, and \$2,500 3s coup. at 1015%. For to-day's prices of all the different issues and for weekly range, see third page following.

Railroad and Miscellaneous Stocks .- The volume of business in stocks as well as fluctuations in values have been so meagre and unimportant as to make a review of the market for the week, up to and including Thursday, hardly worth while. There was a tendency to strength during Monday's session, when only 129,253 shares were traded in, but the tone became weak later on and a considerable part of the then slight advance was lost. Sales increased to 219,886 shares on Thursday, although in the broader activity net changes were irregular and unimportant. The activity net changes were irregular and unimportant. The trading was larger in volume to-day than on any previous day of the week, and a sharp upturn of a few industrial stocks was followed by a substantial advance in the entire active list. As a result of the week's operations, 19 representative issues, of a list of 25, are higher and 6 lower. Bethlehem Steel is exceptional in an advance of over 9 points, General Motors is 5½ points higher, New York Air Brake 4, and Mexican Petroleum 3½. All the copper stocks have advanced on an increased demand and better prices for the product.

For daily volume of business see page 971. The following sales have occurred this week of shares not represented in our detailed list on the pages which follow:

STOCKS. Week ending March 19.	Sales for		Range for Week.					Range for Jan. 1.

Outside Market.—There was very little change in "curb" market conditions this week from those prevailing for some time past. Some slight activity was noted as the week building that key is the way only note that get in the find of the state conditions this week from those prevailing for some time past. Some slight activity was noted as the week closed, and a stronger tone was in evidence. Prices generally have held steady, with a few issues showing substantial gains. National Cloak & Suit was one of these, the com. advancing from 55 to 65, the close to-day being at 64. The pref. rose about three points to 99½ and ends the week at 99. Kelly-Springfield Tire com. went up from 111½ to 113½, but sold down to-day to 112½. The Whelen issues turnished the bulk of the trading, though price changes were small. Corp. for Stock of Riker & Hegeman advanced from 7 to 7¼, but reacted to 6½, the close to-day being at 7. United Cigar Stores com. sold up from 9½ to 9½, the pref. fluctuating between 11½ and 11½, with the close to-day at 13½. Sterling Gum went up from 3¼ to 3½ and eased off finally to 37-16. Oil shares were very quiet and irregular. Atlantic Refining advanced from 130 to 134 and eased off finally to 133½. Prairie Oil & Gas receded from 228 to 225, then advanced to 232, with the final transaction at 231. Southern Pipe Line was off from 206 to 201. Standard Oil (California) was traded in between 286 and 291 and at 288 finally. Standard Oil of N. J., after a gain of four points to 396, dropped back to 392 and to-day sold up again to 395. Standard Oil of N. Y., after early loss of a point to 188, advanced to 190, then fell to 187½, with the close to-day at 188. A feature in bonds was the rise in Western Pacific 5s from  $30\frac{1}{3}$  to  $3\frac{1}{3}$ . In mining stocks Braden Copper rose from  $6\frac{1}{3}$  to  $7\frac{1}{3}$ .

#### RAILROAD GROSS EARNINGS

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from July 1 to and including the latest week or month. We add a supplementary statement to show the fiscal year totals of those roads whose fiscal year does not begin with July, but covers some other period. The returns of the electric railways are brought together separately on a subsequent page.

#### ANNUAL REPORTS

Annual Reports.—An index to annual reports of steam railroads, street railways and miscellaneous companies which have been published during the preceding month will be given on the last Saturday of each month. This index will *not* include reports in the issue of the "Chronicle" in which it is published. The latest index will be found in the issue of Feb. 27. The next will appear in that of Mch. 27.

#### Buffalo & Susquehanna Railroad Corporation

(First Annual Report-For Fiscal Year ending Dec. 31 1914.)

(First Annual Report—For Fiscal Year enang Dec. 31 1914.) On subsequent pages is given in full the first annual report of the company, including the remarks of President Darlow, the income account, balance sheet, freight and passenger statistics, &c., &c. There will also be found in our "Invest-ment News" a digest of an interesting statement made by leading bankers (Edward B. Smith & Co., New York and Philadelphia) regarding the company.—V. 100, p. 396.

#### Philadelphia Baltimore & Washington RR.

(12th Annual Report-Year ending Dec. 31 1914.)

Pres. Samuel Rea, Philadelphia, March 8, wrote in subst.: Results.—The total operating revenues show a decrease of \$306,778, or 3.81%, due to the general depression. The large decrease in express revenue was due to a reduction in express rates and the operation of the parcel post. Retrenchment in operating expenses produced an increase of \$205,623 in the net revenue from rail operations. The savings would have been greater but for the increased wage payments under wage arbitra-tion awards, and other consequent wage adjustments and the expense of complying with legislative enactments. Non-operating income decreased \$119,680, principally because of lower dividends on Union RR. Co. of Baltimore stock. Deductions increased \$199,985, chiefly on account of hire of equipment, principally for use of freight cars of other roads, and larger interest payments. The net income was \$1,229,153, a decrease of \$146,630, out of which were paid dividends amounting to 4%, or \$1,005,520, and \$223,633 were applied to equipment improvements. The net debtis to profit and loss account were \$890,050, representing unpaid advances made to affiliated companies in 1914 and previous years, on account of improvements. Mende decreased 2.96%, while passenger train mileage decreased 5.50%. Through this greater operating efficiency, and by enforced economies, the net ton and passenger mile and train mile revenues were increased. Mend and Equipment Expenditures.—These amounted to \$792,650, which were charged as follows : to income, \$223,633; to reserve for additions and Pres. Samuel Rea, Philadelphia, March 8, wrote in subst .:

betterments, \$528,755; to profit and loss, \$127,050; total, increase, \$879,-437; net increase in investment in road and equipment, \$717,799. Subsidiary Companies.—The Del. Md. & Va. RR. Co's. construction expenditures (\$10,396), deficit in operation (\$93,161) and fixed charges were borne by your company. The operation (\$93,161) and fixed charges balt. Central RR. were debited to the profit and loss account. *Financing.*—To discharge the obligations incurred for capital expendi-tures and reduce the floating debt, we sold \$1,000,000 of 1st M. 4% bonds, maturing Nov. 1 1943, 5,000 shares Delaware RR. Co. stock, par value \$125,000, and \$342,000 Phila. & Balt. Cent. RR. Co. 1st M. 4% bonds.

American (Bell) Telephone & Telegraph Co.

(Report for Fiscal Year ending Dec. 31 1914.)

(Report for Fiscal Year ending Dec. 31 1914.) The report of the company, containing extended excerpts from the remarks of President Theodore N. Vail, and the income account and balance sheet, and many tables giving valuable information, will be found on subsequent pages of to-day's "Chronicle," also excerpts from a letter from Presi-dent Vail accompanying the report on the relations between the public and public service utilities, the proper regulation and control of the latter and their maintenance and further extension. Below are the comparative income accounts of the parent company for four years and comparative balance sheets. In the report on a following page will be found the income account and comparative balance sheets of the entire Bell System in the United States.

#### (The) Montana Power Company.

#### (Report for Fiscal Year ending Dec. 31 1914.)

<section-header>(The) Montana Power Company.
(Boot for Fiscal Year ending Dec. 31 1914.)
Description of the first of the first ending Dec. 31 1914.
Test John D. Ryan, N. Y., March 16 wrote in substance:
Base of the first of the first ending Dec. 31 1914.
Test John D. Ryan, N. Y., March 16 wrote in substance:
Base of the first of the first ending the f

Bonds.—Early in 1914 we sold \$10,000,000 "First & Ref. M. 5% bonds and thus paid the entire floating debt amounting Dec. 31 1913 to about \$3,060,000, retired \$2,833,000 6% underlying bonds upon the Mo. River El. & P. Co. and Billings & Eastern Montana Power Co. properties, and also provided for additional construction requirements (V. 98, p. 455, 1464, 1611). Since Dec. 31 1914 \$6,000,000 additional bonds of the same issue have been sold, the proceeds of which will be sufficient to pay the floating debt of about \$1,000,000 and pay for all development planned for 1915 (see a following page). With the large surplus of power then developed and with the distributing system extended as now planned, we believe it will be several years before any large amount of new money will be required. [See advertisement and official data on another page of this issue.]

#### Railway Steel-Spring Co., Chicago.

#### (Report for Fiscal Year ending Dec. 31 1914.)

Pres. F. F. Fitzpatrick, Mar. 4, wrote in substance:

Pres. F. F. Fitzpatrick, Mar. 4, wrote in substance: Results.—The net earnings were \$713,285 [against \$1,472,093 in 1913], after allowing \$199,218 for repairs, renewals and depreciation. In view of the diminished volume of business, a pronounced reduction has been made in the general expenses, but the plants have been properly maintained. The regular dividend of 7% was paid on the pref. stock [V. 98, p. 1004]. Sinking Funds.—Of the Latrobe Plant 5% bonds \$138,000, and of the Inter-Ocean 5\$ \$135,000, were redeemed and canceled. Outlook.—Our success is largely dependent upon the purchasing ability of the rallroads, which for more than a year past has been confined to the lowest minimum. A number of the largest customers have ordered less than 25% of their normal requirements of previous years. This condition is still prevalent to a somewhat less marked degree, but all indications seem to point to returning confidence Inventory.—Advantage has been taken of the prevailing low prices for materials on hand, which have been valued at cost or not above market price. EXENDINCS EXPENSES CHARGES. & c.

#### Pacific (Bell) Telephone & Telegraph Co.

(Report for Fiscal Year ending Dec. 31 1914.)

(Report for Fiscal Year ending Dec. 31 1914.) Chairman H. T. Scott, San Fran., Mch. 3; wrote in subs. Stations added 44,940 (30,329 company; 14,611 service, private line and connecting) making total stations, 692,933. Net additions to plant, \$3,-163,818. Six buildings were completed in San Francisco, Oakland, Port-land and Los Angeles. Total miles of wire (acrial, underground and sub-marine), 1,847,410, increase 41,241 miles. Also added 107 private branch exchanges, 341 miles of poles, 1,090 miles of phantom circuits, 22 miles of subway and 54 miles of poles, 1,090 miles of phantom circuits, 22 miles of subway and 54 miles of poles, 1,090 miles of phantom circuits, 22 miles of subway and 54 miles of poles, 1,090 miles of phantom circuits, 22 miles of subway and 54 miles of poles, 1,090 miles of phantom circuits, 22 miles of subway and 54 miles of poles, 1,090 miles of phantom circuits, 22 miles of subway and 54 miles of poles, 1,090 miles of phantom circuits, 22 miles of subway and 54 miles of of duct. The ines from Pacific territory to the Atlantic seaboard are now in commercial service. The opening was formally celebrated Jan. 25 1915. The new San Francisco-New York circuit now constitutes "The Main East and West Transcontinental Backbone Route". Preliminary work has been started with a view of establishing a lateral backbone route extending from the Canadian boundary north of Bellingham, Wash., to San Diego, Cal., connecting practically all of our principal points and giving access to the main east and west route. Note.—The comparisons of items other than dividends and balance, surplus, for the several years are somewhat inaccurate, owing to changes in method of accounting. Prior to 1914 the net non-operating revenues were apparently included in the gross earnings and similarly the item of rents was deducted prior to 1914 before arriving at the net revenue.

#### Southern Bell Telephone & Telegraph Co.

Southern Bell Telephone & Telegraph Co. (Report for Fiscal Year ending Dec. 31 1914.) Pres. W. T. Gentry, Atlanta, Jan. 31 1915, wrote in subst.: Additions costing \$1,216.841 were made. The net sum of \$661.330 was expended in replacement of plant. A substantial sum was added to reserve for acrued depreciation. A slight decrease in toll revenue per station was offset by an increase in exchange revenue per station. The reduction in operating expenses was slightly more than offset by a reduction of a little over \$110,000 in the dividends received on holdings of Cumberland Telep. & Teleg. Co. stock and by an increase in tastisfactory. EARNINGS FOR FISCAL YEARS ENDING DECEMBER 31. 1914. 1913.

#### New England Telephone & Telegraph Co.

(32d Annual Report-Year ending Dec. 31 1914.)

Prest. Philip L. Spalding, Boston, Feb. 17, wrote in substance: The European war, with the resultant closing of the Stock Exchange and general business depression, caused during the latter part of the year not only a marked decrease in the amount of business handled over what would normally be expected, but brought about a restriction in the plans for development work in the future. Much new construction has been completed, not only to provide for the future but to replace inadequate or obsolete facilities. There was no per-manent financing, all new money being obtained on short-term or demand notes. *OPERATIONS AND FISCAL RESULTS*

#### Southern New England Telep. Co., New Haven, Conn. (Report for Fiscal Year ending Dec. 31 1914.)

(Report for Fiscal Year ending Dec. 31 1914.) Pres. John W. Alling, New Haven, Feb. 2, wrote in subst.: The book value of certain non-operating real estate, heretofore included in "plant," is now entered as "miscellaneous investments." The lessened industrial and commercial activity was naturally reflected in the growth of the number of telephone stations, and in the revenue re-sults. The increase in stations of all kinds was 6,057, or 5.5%, as against 7,580, or 7.4%, during 1913. Total number Dec. 31, 116,276, or one tele-phone for each 10.3 of population. From periodic counts, our local traffic for 1914 is estimated to average 610,785 calls per day, as against 585,256 during 1913. On the other hand, the toll traffic between separate exchanges despite the increase in stations of 6,057, remained practically the same as in 1913. From Dec. 7 to 9 a sleet storm of unusual severity and duration swept over a large section of the State and wrought more extensive damage than we had previously experienced from a similar cause for many years. We are seeking authority to issue \$10,000,000 of additional stock, as needed from time to time. *GROWTH OF SYSTEM.* GROWTH OF SYSTEM

American Gas Co., Philadelphia.

(Report for Fiscal Year ending Dec. 31 1914.)

(Report for Fiscal Year ending Dec. 31 1914.) Pres. Morris W. Stroud, Phila., Feb. 17, wrote in subst.: Results.—The business of the year has shown a very satisfactory increase. The capital stock was increased in Dec. 1913 \$891.700, increasing the divi-dend requirements by \$63.285, and yet in spite of this and of the financial depression we earned over 10% upon the stock. Additions, &c.—When the war broke out we were under contract to complete the new coal gas plants at Chester, Pa., and Rockford, III., and the new water-power plant at Hubbell's Falls, on the Winoosid River, near Burlington, Vt. The completion of the latter was postponed until this year, but it was impossible to postpone the other two *Financing.*—Owing to these and other extensions and improvements, and the amount already owing, an issue of \$2,000,000 three-year 6% se-cured gold notes was authorized, the sale of \$1,000,000 of which was ar ranged in October, although all of them were not taken and paid for in 1914

(V. 98, p. 525.) Your board have decided not to sell the other 1,000,000 notes at present. The condition of the market seeming to warrant a 20% allotment of stock, your board approved of and has already notified you of such allotment (V. 100, p. 311). This will retire all of our floating debt and provide for improvements and extensions in 1915, including the completion of the large installations mentioned above at Chester, Rockford and Hubbell's Falls. large Falls.

Falls. During the year improvements to the value of \$1,749.914 were made and paid for in part by the issuance of bonds of the affiliated companies, and the above-mentioned short-term notes, and part by the issuance of your stock. [As to refunding of \$1,500.000 collateral trust 6% bonds due Oct. 1 1914 into 5% bonds due June 1 1920, see V. 98, p. 525.]

#### Crex Carpet Co., New York.

(Report for Year ending Dec. 31 1914.)

Pres. Myron W. Robinson, N. Y., Feb. 9, wrote in subst .: Pres. Myron W. Kobinson, N. Y., Feb. 9, wrote in subst.: The decrease in earnings results from a large falling off in sales, which we attribute to the abnormal business conditions prevailing, particularly during the last six months, and also to the unproductive expense incurred by the shutting down of the plant for several months, largely to conserve cash resources. A charge has been made against surplus for depreciation in value for manufacturing purposes of the stock of grass of 1911 and 1912, heretofore carried in inventory as reserve stock. We start the year with an adequate supply of fine quality of new grass; and having thoroughly overhauled the boiler equipment and machinery, are prepared to take full advantage of better business conditions.

a Includes \$2,001,000 common stock held in treasury. Of the outstand-ing common stock \$980,000 was sold to the trustees of the employees' savings fund, to be paid for as and when applied to the purposes of the fund and until the shares are paid for the dividends on them come back to the treasury by arresement.

the shares are paid for the dividends on them come back to the treasury by b Of the 1st and ref. 5s. 15,137,000 have been issued. Of the bonds \$241,000 are in the treasury, \$4,375,000 are deposited as collateral for \$3,500,000 3-year 6% notes, \$\$9,000 for certain notes, \$154,000 for certan notes with option of purchase, and \$550,000 for a future loan, with option of purchase.--V. 100, p. 737.

#### Kaufmann Department Stores, Inc., Pittsb. and N. Y.

(2d Annual Report-For Year ending Dec. 31 1914.) Pres. Isaac Kaufmann, New York, Feb. 15 1915, wrote in

substance:

The total net sales were \$10,231,172 (against \$10,165,610 in 1913). The third and last of the new 12-story buildings was constructed and is now occupied. The structural changes were completed about Oct. 15 and the departments located in their new quarters. Our sales are most gratifying in view of our building operations and the abnormal conditions in Pitts-burgh. While we show diminished profits, our completed building and other operating changes will result in substantial saving, as already evi-denced since Jan. 1 1915.

PESULTS FOR CALENDAR YEARS.

the total instea 21,770,000 (V. 97, p. 304).—V. 97, p. 802. **Cape Breton Coal, Iron & Railway.**— The holders of the 6% Special 1st M. gold bonds, £251,700 outstanding (V. 95, p. 235), were to vote March 10 on (a) postponing the time for payment of interest due Jan. & July 1 in each of the years 1915-16-17 to such date or dates not later than Jan. 1 1918 as the company may determine; (b) permitting the company to issue all or any of the £159,200 unissued bonds, with priority to the bonds now issued.—V. 95, p. 1744.

(b) permitting the company to issue all or any of the £159.200 unissued bonds, with priority to the bonds now issued.—V. 95, p. 1744.
Central RR. of New Jersey.—Rebate Charge.—
A fury in the U.S. District Court at Trenton, N. J., on Mar. 11 found the company guilty of granting rebates and concessions to the Lehigh Coal & Navigation Co. on coal shipments, in violation of the Elkins Act, under 185 counts of an indictment handed down on Dec. 1 last. Sentence was deferred. Minimum fine permitted, \$1,000; maximum, \$20,000 on each count. The company in a statement claims it was justified in making the allowances.—V. 99, p. 1672.
Chicago City Ry.—Dividends.—A quarterly dividend of 2% has been declared on the \$18,000,000 stock, payable Mar. 30 to holders of record Mar. 26. This compares with a regular rate of 2½% quarterly from March 1910 to Sept. 1914 (extra payments in various amounts having been also paid) and 1½% in Dec. 1914. An officer says:
The dividend a year ago was 2½% and the total paid for the fiscal year fending Jan. 31 was 9%, against 10½% the previous year. We hope to declare three more 2% quarterly Jan. 31.—

Calvert Brewer, Secretary to committee, 55 Colar Milly, Newrit, N. Y. City. Spooner & Cotton, counsel. Digest of Financial Statement by Above Committee, March 11 1915. The St. Louis & San Francisco RR. Co. purchased a controlling interest in the common and preferred stocks in 1903 and thereafter operated the Eastern Illinois system until 1913. The Ch. & East. Ill. RR. Co. purchased the Evansville & Terre Haute RR. Co. in 1911 and also acquired the latter's sub. co., the Evansville & Indianapolis RR. Co. and Evansville Belt Ry. Notwithstanding an increase in the annual operating revenue from \$10,-70,142 in 1904 to \$16,214.972 in 1913, the above transactions, and the operating conditions which ensued, proved so burdensome that the opera-ing income decreased from 33,32,672 in 1904 to \$2,718,460 in 1913, while the profit and loss annual balance decreased from a surplus of \$530,626 in 1904 to a deficit of \$1,333,646 in 1913. Receivers were appointed May 27 1913, at which time the property and equipment were in bad physical condition, and net current liabilities amounted to about \$5,600,000. A committee representing the holders of Trust Certificates for C. & E. I. pref. and common stocks, until the present time, has had the guiding voice, subject to the approval of the Court, as to the operating policy. The bondholders' and stockholders' committees each retained expert engineers to report independently upon the railroad and the goal properties. Their respective conclusions as to the condition and requirements of these properties were in general accord when such reports were finally made and have since been embodied in joint letters to both committees. These reports and joint letters indicated that (a) the property had not been adequately maintained. (b) A large sum is required for the rehabil-tation and betterments and for equipment, for the payment of receivers' certificates and for recorganization, &c. (c) The funded debt constitutes an undue proportion of the total liabilities. (d) Neither the present nor

pleted: auth. cap. stock, \$3,000,000. Control is viscal in the Unitage Milwaukee & St. Paul Ry.
Earnings.—For 6 months ending Dec. 31:
Six Operating Net (after Other Interest, Balance, Months—Recenues. Tarces). Income. Rents. &c. Surplus. 1914.....\$48,790,069 \$13,906,798 \$1,176,992 \$7,852,310 \$7,231,480 1913.....\$50,373,955 15,103,048
The semi-annual dividend declared July 30 1914 on the pref. stock (3½%) called for \$4,054,603 and on the common (2½%) for \$2,921,252. making a total of \$6,975,855. The total accumulated surplus Dec. 31 1914. after deducting same and also miscellaneous debits (net), was \$40,726,629. Bonds Sold.—Harris, Forbes & Co., New York; Harris Trust & Savings Bank, Chicago, and N. W. Harris & Co., Boston, announce that they have sold all of the \$4,000,000 convertible 5% bonds which they recently purchased from the syndicate that underwrote \$29,140,300 of the issue.—V. 100, p. 900, 811. V. 100, p. 900, 811.

V. 100, p. 900, 811.
 Chicago Rock Island & Pacific Ry.—Examination of Books.—At the hearing on March 18 before Magistrate Apple-ton in the Tombs Police Court on application of minority stockholders, Vice-Pres. J. J. Quinlan repeated to the Court the announcement that he made a month ago that access to the books and transfer sheets would be granted to the plain-tiffs from day to day, as they were posted.
 Mr. Quinlan issued a statement yesterday saying in substance that on the night of March 16, for the first time, the transfer department was able to strike a balance of its books, which was as of March 5. He says that the Amster committee "has always been promised the complete list of the stockholders, showing their respective addresses and number of shares, as soon as such list could be completed after March 25, the last day for the transfer of the stock that is in the hands of the Central Trust Co. This is the same promised that has been moder about without any reference whatever to the criminal prosecution. "-V. 100, p. 900, 811.
 Death Valley RR.—Stock Authorized.— The California RR. Commission on March 9 authorized the sale at par to the Borax Consolidated, Ltd., of London, of \$20,000 stock to retire \$4,000 bonds.—V. 99, p. 748, 269.

Denver Laramie & Northwestern RR.—One Receiver.— The Continental Trust Co. of Denver has resigned as one of the receivers of the company. Marshall B. Smith is now sole receiver.—V. 100, p. 641.

the receivers of the company. Marshall B. Smith is now sole receiver.—V. 100, p. 641.
Erie R.R.—Offering of 1st M. Bonds on Important Cut-off. —The Guaranty Trust Co. of N. Y. is offering at 103¾ and in \$6,000,000 Genesee River RR. Co. first (closed) mortage 6% sinking fund gold bonds of 1907, due July 1 1957, to be assumed by the Erie R.
Authorized and outstanding, \$6,000,000. Denom. c\*\$1,000; r\*\$1,000, from and \$10,000. Interest J. & J. Exempt from N. Y. State personal property tax. A part of the new issue it is proposed to exchange for the company's short-term debentures and advances made to affiliated concerns. The Pennsylvania RR. owns \$6,797,900 of the \$12,000,000 stock now outstand-ing.-V. 100, p. 398, 308.

Ing.—V. 100, p. 398, 308.
Los Angeles (Cal.) Ry.—No Financing at Present.—Vice-President Dunn says that no new application will be made to issue bonds, nor is any modification of the application which was denied on March 5 contemplated for this year at least. Mr. Dunn says: "What extensions will be made will have to be made from earnings over and above fixed expenses and with the jitney bus contin-ually cutting into our business, these are now or nearly nil."—V. 100, p. 901.

Itom carings for a mining soft and soft and

Mexico Tramways.—Bond Interest Deferred.—Owing to the continued unsatisfactory condition of affairs in Mexico, the payment of the coupon due March 1 on the general con-solidated 1st 50-year 5% gold bonds was deferred. The company and its allied undertaking, the Mexican Light & Power Co., failed to pay their coupons in Jan. last.—V. 100, p. 140.

Missouri Pacific Ry.—Executive Committee.—The new executive committee consists of:

B. F. Bush (Chairman), N. F. Brady, A. J. Hemphill, E. L. Marston,
Edwin G. Merrill, F. J. Shepard, Cornelius Vanderbilt and W. H. Williams.
The executive committee of the St. Louis Iron Mtn. & Southern Ry. is
identical with that of the Missouri Pacific, except that Albert H. Wiggin
serves in the place of Mr. Merrill. [See also Texas & Pacific Ry, below.]
-V. 100, p. 901, 812.

Northern Pacific Ry.—Abstract of Decision.— The "Railway Age-Gazette" of March 19 contains lengthy abstracts of the opinions handed down by the U. S. Supreme Court on March 8 in the North Dakota lignite coal and West Virginia 2-cent passenger rate cases. —V. 100, p. 902.

**Pennsylvania RR.**—*Rate Increase Denied.*—The New Jersey P. U. Commissioners on March 12 denied the application filed last fall by the company and other roads for an increase in passenger rates within the State. Appeal will be made to the courts.—V. 100, p. 902, 808, 818,

Rapid Transit in New York City.—Bids Requested.— Bids will be opened on April 9 for the construction of section 4 of routes 4 and 36, being that part of the Seventh Ave. (Manhatan) subway between 51st and 59th streets to be operated by the Brooklyn Rapid Transit Co. The amendment to Section 14 of the State labor law, approved March 11 provides that citizens shail have preference in employment on public works, but aliens may be employed when citizens are not available.
 The P. S. Commission on March 11 legalized the proposed Flushing-Bayside route, which calls for an extension by subway and elevated from the present terminus in Corona to and through Flushing to Bayside Boule-vard, Bayside. President Peters of the Long Island RR. states that the company is willing to lease desired trackage rights over that road to White-stone Landing and Little Neck.
 The P. S. Commission will open bids on April 20 for Section No. 2 of the Eastern Parkway subway in Brooklyn, extending from Prospect Park Plaza to Nostrand Ave., about 1½ miles; four-track, double-deck, with six stations.—V. 100, p. 902, 813.

Southern Ry.—Official Statement.—Referring to the omission of the usual semi-annual dividend on April 1 on the pref. stock, President Harrison says in substance:

binston of the usual semi-annual dividend on April 1 on the pref. stock, President Harrison says in substance:
Southern Railway failed by about \$1,000,000 to earn the dividend on the pref. shares in the 6 months to Dec. 31 last, and we cannot earn the dividend in the current six months. In November we declared a scrip dividend, because for the previous half-year the dividend was earned with a big margin, and it was considered advisable to conserve our cash. The traffic situation has not improved materially, although somewhat better than a few months back, when we were showing 20% loss, week after week. The South has suffered very severely. One of the oldest railroad heads in the South tells me that the situation in the panic of 1907 was nothing to this. I do not think things will improve until the people begin to get back their money from another crop. It seems probable that the next crop of cotton will be smaller than the last; but land sown to oats and other fall-sown crops was 4.000.000 acres greater last fall than usual and the acreage plated to corn will be greater.
The situation, so far as the railroads there are concerned, is, however, sound. Southern Ry, is in a strong position. We have no maturities to meet until about a year from now, and we have a large amount of unexpected cash. We are carrying along our double tracking work and will not be able to use up all our \$5,500,000 fund for that purpose before Dec. 31. When that work is completed, we shall have a through double track from washington to Atlanta; each dollar spent is getting a larger dollar's worth of work than before. But before that, such ascompleted we shall need it—I am firmly convinced of that.
For the present stringent economy is needed. The South is economizing, especially the tenant farmers, who have fielt the effect of the cotton situation more severely than others. As a result, people are traveling less, as the returns of the railways show.—V. 100, p. 902, 643.

Springfield (Mo.) Railway & Light Co. (of Maine).— An initial quarterly dividend of 1¼% has been declared on the \$750,000 7% cum. pref. stock, payable April 1. See V. 100, p. 813, 734.

Stockton (Cal.) Terminal & Eastern RR.—Application. —The company has applied to the California RR. Comm. for authority to issue \$319,500 bonds to complete its line to Jenny Lind, Calaveras County.

The company requests, in any event, to be allowed to sell sufficient bonds to construct two miles of road, in order to reach certain gravel beds, from which it is expected considerable traffic can be secured.—V. 96, p. 1490.

**Texas & Pacific Ry.**—New Directors.—At the annual meeting on Wednesday nine new directors were elected, most of whom represent the new interests in control of the Missouri Pacific:

Missouri Pacific: New Directors Elected.—Charles H. Sabin, President of the Guarant Y Trust Co.; B. D. Caldwell, President Wells, Fargo & Co.; John I. Water bury, Henry Ickelheimer of Heidelbach, Ickelheimer & Co.; Seward Prosser President Bankers Trust Co.; N. S. Meldrum of Blair & Co.; T. L. Chad-bourne, personal counsel of George J. Gould; Henry A. Bishop and William Church Osborne, who represent the Phelps-Dodge Interests in the stock. Old Directors Reelected.—George J. Gould; Henry A. Bishop and William Nicoll, R. C. Clowry, Kingdon Gould, Dunlevy Milbank, Henry E. Cooper and Howard Gould. *Old Directors Retired.*—John P. Munn, Frank J. Gould, Edwin Gould. E. T. Jeffery, Joseph P. Slocum, Finley J. Shepard, O. B. Huntsman, Thomas J. Freeman and E. F. Kearny. E. J. Pearson, who has been Vice-President for four years under President Bush, will, it is announced, be elected next week as the operating Vice-President.—V. 99, p. 1046. **Toronto Hamilton & Buffalo Ry.**—Merger, &c.— The Commons Railway Committee at Ottawa on Mar. 11 passed the bill allowing the amalgamation of the company and the Erle & Ontario Ry. The Chairman announced that the parties interested had arceed to a re-duction in the bonding powers from \$15,000,000 to \$10,000,000. Com-pare V. 99, p. 175.—V. 95, p. 1211. **Tri-State Railway & Electric Co., East Liverpool, O.**—

Tri-State Railway & Electric Co., East Liverpool, O.-Foreclosure Sale March 30.-

Tri-State Railway & Electric Co., East Liverpool, O.— Foreclosure Sale March 30.—
The property is advertised to be sold under foreclosure in Cleveland on March 30, pursuant to decree entered Jan. 23 in the U. S. District Court for the Nor. Dist. of Ohio, East. Div., Bankers Trust Co., trustee, complain-ant. The property in question includes the line of railway in Steubenville formerly owned by the Steubenville & Wellsburg Traction Company (amounting to 1-3 of a mile of track), and all other real property covered by the mortgage of April 3 1911; 12.995 shares of capital stock of Steubenville Wellsburg & Weirton Ry. Co. owning 13.86 miles Weirton to Wellsburg, W. Va.!; 6,995 shares of capital stock of Beaver County Light Co., 45 shares of cap. stock of Mildand Electric Lt. & Pow. Co.; 995 shares of cap. stock of Wellsburg El. Lt., Ht. & Pow. Co. and 115 shares of cap. stock of Hancock County Elec. Co.; also all claims, c., against or in said com-panies, but exclusive of any property heretofore sold by the receiver, W. R. Griffen, under order of court. The leases of East Liverpool Trac. & Light Co. and Steubenville & East Liverpool Ry. & Lt. Co. were surrendered April 1 1914, but these properties are still operated by the receiver under agreements. The lease of the Ohio Passenger Ry. has been canceled; the road extends from Ohio-Penn. State line to Vanport, Pa., 11.20 miles. Compare V. 93, p. 165; V. 94, p. 69. Committee of holders of 1st M. & Coll. Trust 50-year 6s of 1911 (\$1,000.-Oto issued, coupon of April 1 1913 defaulted), and also floating debt. Hora-tio G. Lloyd, T. W. Siemon, C. D. Smithers, J. Lee Rodgers, H. M. Feeley, J. H. Pardee and S. L. Selden. Depositary, New York Trust Co., N. Y. Deposit agreement dated March 26 1913. In March 1913 there was out-standing in addition to the bonds, \$70,000 unfunded debt, party secured. No reorg. plan as yet. Co.'s N.Y. office, 43 Exchange Place.—V. 96, p.864.
United Rys. & Elec. Co., Balto.—Alliance.—It has been announced that J. E. Aldred of

ests in this company to become a member of the board. In this connection it is understood that Messrs. Aldred & Co. for them-selves and associates have recently acquired a substantial interest in the stock of the United Rys. & Elec. Co. through purchases made in the market and direct from the larger interests in the United Rys. & Elec. Co. The Railways Co. controls all the tramway business in Baltimore and vicinity. Aldred & Co. are fiscal agents of the Consolidated Gas, Electric Light & Power Co. of Baltimore (see p. 154, "Ry. & Ind. Sec."), and of the Penn-sylvania Water & Power Co. (see V. 100, p. 816), which sells power in Balti-more to the public utility companies. Digest of Statement by Alexander Brown & Sons, Baltimore, March 14 Mr. Aldred has been most active in his interest in Baltimore Oity and in his desire to build up its commercial and manufacturing interests. He has

had prepared under his supervision an industrial survey resulting in sug-gestions which, if wisely and vigorously pursued, should result in a great deal of benefit to the city. It was felt by those largely interested in the company that Mr. Aldred would be an addition to its board. At the same time Mr. Aldred has for a long time evidenced an interest in the Railways Co. It was but natural, therefore, that he should desire an interest in the stock. The larger holders were unvilling to part with any considerable amount, and Mr. Aldred, after acquiring a comparatively small amount from them turned naturally to the open market. His orders were placed with the approval and co-operation of the larger interests. This is the full significance of the recent activity in the company is stock. Most of the stock recently purchased on the Baltimore Exchange has been for the account of Aldred & Co. and their associated interests. [Baltimore "Sun" on March 16 said that the Aldred holdings were them supposed to aggregate between 60,000 and 70,000 shares.]—V. 99, p. 1046, 818.

West End Street Ry., Boston.—Stock at Auction.—The 8,700 new shares (par value \$435,000) which were recently authorized by the Mass. P. S. Comm. to provide for addi-tions, &c., will be offered at public auction by R. L. Day & Co. on April 1.—V. 99, p. 1675.

#### INDUSTRIAL, GAS AND MISCELLANEOUS.

American Coal Products Co.—Earnings.— Net Total Exp. & Bond Pf.Dirs. Com.Div.Balance, Calendar Sales. Net Inc. Losses. Int., &c. (7%). (7%). Surplus. Waller, formerly 3d Vice-Pres., has been elected First Vice-Pres. to succeed Earl D. Babst. --V. 100, p. 808, 737.

-V. 100, p. 808, 737.
 National Cash Register Co.—Favorable Decision.— The U. S. Circuit Court of Appeals at Cincinnati, O., on March 13 reversed the verdict rendered in the lower Federal Court in Feb. 1913 of guilty of violation of the Sherman anti-trust law under which prison seatences and fines were imposed on President Patterson and 26 other officers and sales managers of the company. The case was remanded to the lower Court for a new trial. The opinion, containing nearly 28,000 words, was written by District Judge Cochran of Kentucky and concurred in by U. S. Supreme Court Justice William R. Day and District Judges Sanford of Kentucky.—V. 99, p. 346.
 New England Co., Boston.—Merger Plan.—

of Kentucky.—V. 99, p. 346. **New England Co., Boston.**—Merger Plan.— See New England Power Co. below.—V. 98, p. 1997. **New England Power Co. of Maine.**—Report.— See "Annual Reports" on a preceding page. Merger Plan.—The shareholders of this company and also the shareholders of the allied companies, Bellows Falls Power Co. and Connecticut River Power Co. of Maine, approved March 18 a proposed consolidation or merger plan dated March 1 1915, by which the assets of the three com-panies will be taken over by the "New England Company," (V. 98, p. 1997), a voluntary association, of Massachusetts. Digest of Amended Plan of Merger Dated March 1 1915.

panlies will be taken over by the "New England Company," (V. 98, p. 1997), a voluntary association, of Massachusetts. Digest of Amended Plan of Merger Dated March 1 1915.
The New England Company (V. 98, p. 1997) will increase its stock to the following, in \$100 shares, all having the same voling power: Common Stock—All to be exchanged (share for share) for the \$5,-000.000 outstanding stock of New England Power Co. of Maine (see "Annual Reports" on another page and V. 99, p. 1914)...\$5,000.000
First Preferred (D. & d.) stock, entitled before any dividends are set apart for 2d pref. and common stock to cumulative dividends at the rate of 5½% p. a. until Jan. 1 1920, and thereafter bear such 5½%, then all of the 1st pref. stock shall thereafter bear such bigher rate. Entire present issue exchangeable, share for share, as far as may be, for the \$650,000 pref. stock of the Bellows Fails Power Co. [dividends on which are guaranteed (V. 96, p. 64) by the Connecticut River Power Co. of Me., this guaranty to be assumed by the New England Power Co. as to any shares not exchanged], remainder as directors decide... Second Preferred (p. & d.) stock, entitled before any dividends at the set apart on the common stock, to cumulative dividends at the common stock, the rate of dividends in such year on each of asid two classes of stock shall, up to 5%, be equal on both classes, and above 5% the additional rate on the 2d pref. shall be one-half the additional rate on the common. Entire present issue to be exchanged share for share for the \$2,720,000 common stock of Connecticut River Power Co. of Me. Maine, the two issues having like dividend rights...... 2,720,000

Additional stock of the New England Co. of any class, except 2d pref., may from time to time be issued, and new classes may be created in accord-ance with the present declaration of trust of New England Co. The entire auth. \$500,000 pref. stock of Connecticut River Power Co. of N. H. (V. 93, p. 410) shall be distributed, share for share, among the holders of the pref. stock of Connecticut River Power Co. of Maine (which company now owns the first-named block). The stockholders of the two Maine companies shall, and the pref. stock-holders of the Bellows Falls Power Co. may, exchange their stock for trans-ferable certificates of deposit of Baker, Ayling & Co. Boston, or of Old Colony Trust Co., Boston, as depositaries, exchangeable after notice that the consolidation or merger is complete and binding for the shares aforesaid, respectively. The consolidation or merger will be complete and binding in all respects when approved by votes of the stockholders of the three com-panies concerned and when the assets of the two Maine companies have been conveyed to New England Co. and New England Co. has assumed all their liabilities and voted to increase its stock to the amounts set forth above. (Among the outstanding obligations of the system are: New England Co., 9, 380; 700,000 of % 3-yr. notes (V. 99, p. 1914); Com. River P. (o. of N. H., \$1,953,000 1st M. 5s (V. 89, p. 165), some \$316,000 5-yr. 8% coupon notes (V. 93, p. 410); Massachusetts Co., \$1,087,000 collat. 5s (V. 89, p. 435); Bellows Falls Power Co. \$550,000 collat. 5s of 1912, due July 1922, but callable at par, int. J. & J. at 01 Col. Tr. Co., Boston (V. 96, 64); Falls Mt. El. Lt. & P. Co. 1st M. 5s of 1904, due Apr. 1924, with int. A. & O. at Nat. Bank of Bellows Falls. There will also remain out \$500, 000 Conn. River Power Co. of N. H. pref. stock.]-V. 99, p. 1914, 1836. New York Edison Co. -Reduced Rates.--we were Kedison Co. -Reduced Rates.-

000 Conn. River Power Co. of N. H. pref. stock.]—V. 99, p. 1914, 1836.
New York Edison Co.—Reduced Rates.—
The P. S. Commission on March 16 adopted a formal order reducing the price of electric current from 10 cts. to S cts. per kilowatt hour in Manhattan and certain undeveloped sections of the Bronx. The order will, it is expected, be accepted by the company, since it is permitted to charge customers who desire lamps and other services hitherto rendered free, which will, it is estimated, add about ½ cent to the 8 ct. maximum charge fixed by the order. The reduction will also apply to the United Electric Light & Power Co.—V. 100, p. 905.

expected, be accepted by the company, since it is permitted to charge chastomers who desire lamps and other services lither or endered free, which will, it is estimated, add about ½ cent to the 8 ct. maximum charge fixed by the order. The reduction will also apply to the United Electric Light & Power Co. -V. 100, p. 905.
 New York Real Estate Security Co. -Sale--Plan. --The company's property is to be sold on April 17 under foreclosure of the trust deed of Dec. 17 1908.
 The bondholders' committee March 11 issued a plan calling for the formation of a liquidating co. as follows: Capitalization of Proposed Liquidating Co. to be Organized Under N. Y. Laws.
 Capitalization of Proposed Liquidating Co. to be Organized Under N. Y. Laws.
 Capitalization of Proposed Liquidating Co. to be Organized Under N. Y. Laws.
 Capitalization of Proposed Liquidating Co. to be Organized Under N. Y. Laws.
 Capitalization of Proposed Liquidating Co. to be Organized Under N. Y. Laws.
 Capitalization of Proposed Liquidating Co. Interface of any properties sold; also yearly after the first year a sum equal to at least 5% of the authorized issue, subject to waiver by the voting trust certificates, representing an equal interest in the property.
 Cash to be realized: Sale of \$250,000 6% debentures at 90%, \$252,000; Sale of voting trust certificates of 2.26 Miser of Stolo J. 31, 51, 000 shares To take up co \$3, 194,100 bc., 184, for easily of the states, \$15,000; total (med), \$327,000, applicable as follows: Payment of receiver 5 certificates, \$252, 000; allowing trust certificates of 2.26 Misers of stock, \$75,000; total (med), \$327,000, applicable as follows: Payment of receiver sectificates, \$252, 000; allowing trust certificates of 2.26 Misers of a majority in interest of the deposed of Ty 75,000; total (med), \$272,000, applicable as follows: Payment of receiver sectificates, \$252,000; allowing trust certificates for 2.060 Misers

v. 98, p. 308, 456, 1697.1
Niagara Light, Heat & Power Co.—Decision.— The P. S. Commission has denied the petition of Tonawanda and North Tonawanda to direct the company to serve natural gas in the two communi-ties. Such service would require 400,000 to 500,000 cu. ft. a day, while the daily output (used in Amherst. &c.) is only 70,000 cu. ft. -W. SI, p. 617.
Northampton (Mass.) Gas Light Co.—Rate Reduction. The Mass. Gas & Electric Light Commissioners, on the complaint of the Mayor, have reduced the price of gas supplied from \$1 10 to \$1 per 1,000 cu. ft. The opinion was given at length in the "Gas Age" of this city of March 15.—V. 85, p. 1522.

March 15. — V. 85, p. 1522.
 Northwestern Electric Co., Portland, Ore. — Pref. Stock. The company is reported to have offered to the public recently at 821/3 \$1,200,000 6% cum. pref. stock, part of an issue of \$2,000,000 which \$800,000 had previously been taken by California investors. The proceeds, it is said, will be used to retire short-term 6% gold notes. See V. 100, p. 906; V. 99, p. 612.
 Osceola Consolidated [Mining Co. — DividendsResumed. A dividend of \$2 per share (par \$25) has been declared on the \$2,403,750 stock, payable April 30 to holders of record March 30, comparing with \$1 in Jan. April and July 1914.

Produce Terminal Corporation, Chicago.—Proposed New Produce Terminals.—This company was incorporated

in Illinois on Feb. 27 with nominal (\$10,000) cap. stock, to establish in the interest of the Chicago Junction Ry. a large produce terminal on the property of the Chicago Junction interests, just west of the Union Stock Yards. It is esti-mated that the total ultimate cost of the entire terminal, including land and buildings, will aggregate about \$20,000.-000. The financial plan is not yet announced. Authori-tative data as to the plan as now proposed follow: The main building is to be an S-story storage plant centrally located, of which the first and second floors, respectively, will be devoted to the handling of outgoing and incoming small shipments of fruit and produce, from which point it is to be distributed to the numerous rows of stores. This central building will have a capacity of 350 cars. Team loading and unloading tracks are provided for freight in carload lots, total combined capacity 500 cars. A large dock house for handling water shipments is to be on the property; also a central power station. The Chicago, will serve which connects directly with every trunk line entering Chicago, will serve out the connects directly with every trunk line entering Chicago, will serve. Which connects directly with every trunk line entering Chicago, will serve. The active terminal. This arrangement, it is thought, will be much more convenient and economical and far less subject to congestion than the present arrangement on South Water St., where the produce must all enter by two roads, and much of it must also be transported across the river. Officers: President, J. A. Spoor, Chairman of Union Stock Yard & Transit Co. and of Chicago Junction Ry.; V.-Pres., Arthur G. Leonard, President Union Stock Yard & Transit Co.; Secretary, Anderson Pace, formerly Industrial Commissioner of Chicago Assn. of Commerce; Treas., Halsey E. Poronto, V.-Pres. Union Stock Yard & Transit Co. and the commerce of the store of the cases for in lung 1013.

the board. Compare V. 99, p. 1837. (The) Republic Rubber Co., Youngstown, O.—Pref. Emmons, Secretary, to succeed Walter M. Briggs, who resigned as Secretary and Treasurer, the last-named office not having been filled.—V. 99, p. 752.

Emmons, Secretary, to succeed Walter M. Briggs, who resigned as Secretary and Treasurer, the last-named office not having been filled.—V. 99, p. 75.
 United Shoe Machinery Corporation.—Government Dissolution Suit Dismissed.—The U. S. District Court at Boston, Mass., on Thursday dismissed the suit brought by the Government on Dec. 12 1911 against the Corporation, the United Shoe Machinery Co., 18 subsidiary companies and 23 individuals, for alleged violation of the Sherman anti-trust law. Compare V. 93, p. 290, 1672; V. 94, p. 1445; V. 96, p. 1845.
 Judge Putnam writes the main opinion, but Judges Brown and Dodge also discuss some of the points at issue. The decision was unanimous. The Court sutstains the legality of the original combination in 1899, the acquisition of the business of more than 55 companies and individuals and the validity of the leases and patent monopoly.
 The Court states that as far as the allegation the defendant conceived with bottoming shoes and later of certain devine that achinery connected with bottoming shoes and later of certain clicking and eyeletting machines. The Government was so satisfied of this, it is stated, that during the triat asked permission to amend its allegation accordingly.
 Judge Putnam also says: "We fail to find any support for the alleged charges in the bill of intended oppression, arbitrary conduct or anything of the taccu cases, namely a purpose to destroy what could be acquired by straightforwardness. There is no proof that the company has enforced its leases in any arbitrary or unreasonable manner."—V. 100, p. 500.

United States Rubber Co.—New Directors.— Middleton S. Burrill of New York as director, succeeds D.L. Mc-Gibbon.—V. 100, p. 808, 314.

United States Steel Corp.—Report.—See "Ann. Rep'ts." Board Reduced.—The directors on Tuesday voted to reduce the board from 24 to 18 for the reasons stated last week. Thomas Murray, Assistant Secretary of the company, resigned, there having been 5 vacancies. The annual meeting will be held on April 19 when the finance committee will be reduced from 9 to 7 members.—V. 100, p. 907, 817.

p. 907, 817. **United States Window Glass Co., Morgantown, W. #### TREASURY BONDS SUBJECT TO SALE.

TREASURY BONDS SUBJECT TO SALE. There were on hand at the close of the year in the Treasury, available for sale, bonds and debentures of subsidiary com-panies of the par value of \$7,227,000. The foregoing bonds were issued by subsidiary companies to provide funds for con-struction and for refunding maturing bonds. The bonds have been purchased from the subsidiary companies issuing the same by the U. S. Steel Corporation or are held in the treasuries of the subsidiary companies, and are not, therefore, in-cluded in the schedule of outstanding bonds, nor in the assets of the organization as shown by the General Balance Sheet. There may also be issued at any time to cover capital expenditures made, Union Steel Co. First Mortgage and Col-lateral Trust Bonds, to the amount of \$362,000.

URCHASE-MONEY OBLIGATIONS, SPECIAL DEPOSITS OR LOANS AND NON-INTEREST-BEARING NOTES SUBSTITUTED FOR PREVIOUSLY EXISTING MINING ROYALTY OBLIGATIONS.

The outstanding liabilities of the subsidiary companies of the above classes at December 31 1914, in comparison with amounts outstanding at the close of the preceding year, were as follows:

|   | Outstanding<br>Dec. 31 1914.                                   | Outstanding<br>Dec. 31 1913.                           | Increase.  |

1

During the year 1914 issues of the above-named obligations and liabilities were made, as follows: Purchase-Money Obligations.

\$703,560 00 4,500,000 0

 Non-Interest-Bearing Mining Royalty Notes:
 In addition to the \$4,500,000 of interest-bearing notes as above, there were issued under a revision and adjustment effected of sundry iron ore mining contracts held by the subsidiary companies, their non-interest-bearing obligations, payable in varying sums from 1915 to 1953, for the balance of the determined and agreed amount of royalties which would become due and payable during such period under the original contracts, totaling\_\_\_\_\_\_\_\_18,959,482 64 Special Deposits or Loans: Net Increase during year. 11.029 14 \$24,174,071 78 Less, Payments made during the year: Purchase-Money Obligations Non-Interest-Bearing Mining Royalty Notes...... \$355,050 43 129,582 59 484,633 02

\$23,689,438 76 Net Increase in Year 1914-----

#### INVENTORIES

OF MANUFACTURING AND OPERATING MATERIALS AND SUPPLIES AND SEMI-FINISHED AND FINISHED PRODUCTS, INCLUD ING NET ADVANCES ON CONTRACT WORK, ETC.

The net book valuation of the inventories of the above-named claases of assets for all of the subsidiary companies equaled at December 31 1914 the sum of \$158,091,036, in comparison with \$167,634,791 at close of the preceding year, a decrease of \$9,543,755. The decreases during the year were common to all classes of materials, supplies and products on hand with the exception of iron ores, pig iron, scrap, ferro and spiegel, and rolls, molds, stools, etc. Inventory values, as above stated, are on the basis of the actual purchase or production cost of the materials to the respective subsidiary companies holding the same (unless such cost was above the market value on December 31 1914, in which case the market price was used) except that in respect of such commodities in stock at the close of the year as had been purchased by one subsidiary company from another there has been excluded the approximate amount of profits in such sales price which had accrued to the subsidiaries selling the same or furnishing service in connection therewith. These asset to it. Accordingly, in the combined assets for all of the companies, the inventories of those materials and products on hand which have been transferred and sold from one subsidiary company to another are carried at net values which are substantially the production cost to the respective subsidiary company to another are carried at net values which are substantially the production cost to the respective subsidiary companies furnishing the same. The net valuation thus obtained and stated for the total inventories of all materials and products is largely below the market value of the same.

#### CAPITAL EXPENDITURES.

The expenditures made during the year by all companies, and chargeable to capital account, for the acquisition of additional property and for additions and extensions to the plants and properties, less credits for property sold, equaled the aggregate sum of \$22,746,031 06. In addition there was expended the net sum of \$424,981 95 for stripping the overburden from ore bodies preliminary to mining from open pit mines, for development work at mines, and for additional logging and structural erection equipment, making a total net expenditure on property account in the year 1914 of \$23,171,013 01. These expenditures classified by property groups are as follows:

#### VOLUME OF BUSINESS.

The volume of business done by all companies during the year, as represented by their combined gross sales and earnings, equaled the sum of \$558,414,933, as compared with a total of \$796,894,299 in the preceding year. This amount represents the aggreagte gross value of the commercial transactions conducted by the several subsidiary companies, and includes sales made between the subsidiary companies and the gross receipts of the transportation com-panies for services rendered both to subsidiary companies and to the public. The earnings for the year resulting from the above gross business represent the combined profits accruing to the several corporate interests on the respective sales and services rendered, each of which is in itself a complete commercial transaction. The following is a statement of the gross sales and earnings classified by operating groups. Gross sales of products Gross Sales by Manufacturing. Iron One and Content of the gross for the several for the severa

#### GENERAL.

The substantial lessening in the demand for products of the subsidiary companies which commenced in the mid-summer of 1913 generally continued with some fluctuations throughout the year 1914. The improvement in demand at the opening of the year was not maintained in the succeeding months. In June and July some increase in demand was noticed, but with the outbreak of the European war the business offering decreased, so that in the closing quarter of the year operations reached the lowest average, as related to capacity, which has prevailed in any quarter since the organization of the Corporation. The decrease in export business was relatively greater than in the domestic trade, the decrease in the tonnage of rolled and finished products shipped for export having been 37.6 per cent, as compared with 23.3 per cent decrease in the domestic tonnage. tonnage.

And

March 1 1915 4,345,371 tons. A considerable portion of this tonnage covers contract requirements extending through the first six months of 1915.

Inst six months of 1915. Since January 1 1915 there has been a material improvement in the bookings of export business and it is at present equal to the average of the last three years. The production of the subsidiary companies during the year 1914 of basic raw and semi-finished materials and of rolled and other finished products for sale to customers outside of the organization, was as follows:

| Iron Ore Mined<br>Coal Mined:   | 1914.<br><i>Tons.</i><br>_17,034,981  | $1913. \\ Tons. \\ 28,738,451$  | $\frac{Decr}{Tons.}$ 11,703,470  | ease<br>Per Cent.<br>40.72  |
|---|---|---|--|---|
| For use in making coke<br>For steam, gas and other purposes   | -15,890,382<br>-5,271,911   | $24,081,192 \\ 6,705,381$   | $\substack{8,190,810\\1,433,470}$  | $\substack{34.01\\21.38}$   |

The decrease in production was especially marked in the case of materials used largely by railroads and in heavy construc-tion and important development work, viz.:

|                            | 1914.   | 1913.     | Decre   | ase       |

The decreases in production of tubes and of merchant steel and bars were also somewhat larger than the average percentage

of reduction for the aggregate tonnage of all products. The total output for the year of all classes of rolled and other finished steel products for sale equaled only about 62 per cent of the total annual capacity of the plants. The cement production was about 76 per cent of the annual plant capacity. The shipments of all classes of products to customers outside of the organization during 1914, in comparison with the shipments during 1913, were as follows:

| Simplification during 1010, were as ronows.  |  |  |   |               |                              |

|  |  |  |   |               |                              |

The decrease of but 26.7 per cent in the total value of business in comparison with a decrease of 25.4 per cent in total tons shipped, notwithstanding there was as before stated an average reduction of \$2.54 per ton in selling price, is explained by the fact that in 1914 a relatively larger proportion of the entire shipments was made up of the higher-priced products. The expenditures made during the year for repairs, maintenance and general up-keep of the properties, in comparison with similar outlays in 1913, were as follows:

| Ordinary repairs and maintenance<br>Extraordinary replacements and general rehabilitation | $\substack{1914.\\\$40,345,019\\5,027,575}$ | $\substack{1913.\\\$52,551,630\\7,391,340}$ | Decrease.<br>\$12,206,611<br>2,363,765 | Per Ce<br>23.2<br>32.0 |

Construction work on the new steel plant at Duluth, also on the new cement plant at same place, together with work on the adjoining town-site of Morgan Park, progressed actively until the early fall of 1914, when construction operations were materially curtailed because of the severe depression in the iron and steel industry. By the expenditure of about \$3,000,000 additional, these plants will be ready for operation. It is hoped business conditions may warrant the completion of the work during the current year.

At the Edgar Thomson plant of Carnegie Steel Company the installation of a new open-hearth plant of 14 furnaces, together with gas producer plant and the enlargement and improvement of the blooming and No. 2 rail mills, was prac-tically concluded, although there remained at the close of the year about \$800,000 yet to be expended for installation of finishing equipment and facilities. The Carnegie Steel Company completed the erection of a distributing warehouse for the New England trade on a site purchased for that purpose near Boston. At the Gary Plant of the Indiana Steel Company there was practically finished during the year a flue dust sintering plant. At the South Works of Illinois Steel Company the work of remodeling the rail mill was completed. At the Lorain Plant of the National Tube Company an additional hot-blast stove and gas-cleaning plant were installed at furnaces Nos. 2 and 5. At Duluth, Minnesota, the Duluth Missabe & Northern Railway Company completed the construction of a new con-crete and steel ore dock, 384 pockets, and track approaches, expending on the same in 1914 \$1,002,459. This Company also expended \$502,123 for remodeling its dock No. 1 to enable limestone to be handled over it, and for additional coal-hand-ling equipment on its coal dock. During the year the various subsidiary railway companies acquired by purchase or construction as additions to the in-

During the year the various subsidiary railway companies acquired by purchase or construction, as additions to their complement of equipment, 4 locomotives, 3,630 steel gondola and hopper cars, and 10 other cars, at a total cost of \$3,-990,939; and in the replacement of equipment, 1 locomotive, 205 steel gondola and hopper cars, and 6 other cars, at a cost

990.939; and in the replacement of equipment, 1 locomotive, 205 steel goldon and hopper cars, and 0 other cars, at a cost of \$242,618. There were acquired during the year by the United States Steel Products Company, a subsidiary company, 6 addi-tional steamships for service in the over-seas trade. One steamer was lost during the year, the full value of which was recovered from the underwriters. At the close of the year the Company owned 9 steamers engaged in the over-seas trade, and operates under special charters additional vessels, varying in number from time to time as its business warrants. Reference is made to the several statements and tables printed in this report for further particulars of expenditures, other than those described above, made by the subsidiary companies during 1914 for sundry additions, extensions and betterments.

betterments. At January 1 1915 the lease of the so-called Great Northern Railway ore properties by the Great Western Mining

At January 1 1915 the lease of the so-called Great Northern Railway ore properties by the Great Western Mining Company, a subsidiary of this Corporation, was canceled in accordance with notice given in 1911 of the intention to exercise the option of cancellation on January 1 1915, and the properties not already surrendered were turned back to the lessors. During the period the properties were held by the Great Western Mining Company (1907 to 1914, inclusive) that Company mined and shipped from them 26,573,808 tons of ore, which tonnage fully covered the total minimums required to be paid for under the lease during the time it was held. The average number of employees in the service of the Corporation and the subsidiary companies during the entire year 1914 was 152,379,907, in comparison with \$207,206,176 in the preceding year, a decrease of 21.63 per cent. The average salary or wage per employee per day, exclusive of the administrative and selling forces, was \$2 88, and, including all em-ployees, \$2 97 per day. These average rates were slightly higher than the averages for 1913, owing to the fact that the general advance in wages made in 1913 did not take effect until February 1 of that year. On account of the disturbed and uncertain condition of the steel industry prevailing at the close of the year, the large number of employees who at that time were laid off because of mills being shut down or running only on part time, and also under the plan which had been observed during the preceding five years and who then either held stock certificates in their own names or were paying for subscriptions in installments. During the year there was disbursed by the Trustees of the United States Steel and Carnegie Pesnion Fund the sum of \$548,980 62. At the close of the year there were 2,521 names on the pension rolls. Grateful appreciation is expressed for the loyal and efficient services during the year of the officers and employees of the Corporation and the several subsidiary companies. By order of the Board of Dir

Note.—That part of the Surplus of Subsidiary Companies representing Profits accrued on sales of materials and products to other subsidiary companies and on hand in latter's Inventories is, in this balance sheet, deducted from the amount of Inventories included under Current Assets.

We have audited the above Balance Sheet, and certify that in our opinion it is properly drawn up so as to show the true financial position of the United States Steel Corporation and Subsidiary Companies on December 31 1914.

New York, March 9 1915.

PRICE, WATERHOUSE & CO., Auditors.

### AMERICAN TELEPHONE AND TELEGRAPH COMPANY

#### ANNUAL REPORT-FOR THE YEAR ENDING DECEMBER 31 1914.

#### New York, March 15 1915.

To the Stockholders: Herewith is respectfully submitted a general statement covering the business of the Bell System as a whole, followed by the report of the American Telephone & Telegraph Company, for the year 1914.

#### BELL TELEPHONE SYSTEM IN UNITED STATES. SUBSCRIBER STATIONS.

At the end of the year the number of stations which con-stituted our system in the United States was 8,648,993, an increase of 515,976, including 168,177 connecting stations. 2,885,985 of these were operated by local, co-operative and rural independent companies or associations having sublicense or connection contracts, so-called connecting companies.

#### PLACES REACHED BY TOLL LINES.

The Bell telephone toll lines of the United States now reach 70,000 places, from substantially all of which messages can be telephoned to the nearest telegraph office. The extent of the system is best realized by comparison with less than 60,000 post offices, 60,000 railroad stations and regular tele-graph offices at about 25,000 places.

#### WIRE MILEAGE.

WIRE MILEAGE. The total mileage of wire in use for exchange and toll service was 17,475,594 miles, of which 1,364,583 were added during the year. Of the total mileage over 15,000,000 miles were exchange wires and over 2,400,000 toll wires. These figures do not include the mileage of wire operated by connecting companies. Of this total wire mileage 92.6 per cent is copper wire, 9,760,165 miles are underground, including 601,817 miles of toll wires in underground cables. The underground conduits represent a cost of \$90,000,000 and the cables in the conduits \$104,200,000—a total in underground plant of \$194,200,000. TRAFFIC.

#### TRAFFIC.

Including the traffic over the long-distance lines, but not including connecting companies, the daily average of toll connections was about 799,000 and of exchange connections about 27,049,000, as against corresponding figures in 1913 of 806,000 and 26,431,000; the total daily average for 1914 reaching 27,848,000, or at the rate of about 8,967,000,000 per very per year.

#### PLANT ADDITIONS.

The amount added to plant and real estate by all the comsystem in the United States during the year 1914 was \$50,045,316, distributed as follows:

| Equipment | \$5,001,542<br>17,175,279<br>19,608,173<br>5,851,848<br>2,408,474 |
|-----------|---|
|-----------|---|

#### \$50,045,316 PLANT ADDITIONS OF PREVIOUS YEARS.

The net amounts added in fifteen years have been as follows:

| 1900 | _\$31.619.100 |      | \$26,637,200 |
|------|---------------|------|--------------|
| 1901 | _ 31,005,400  |      | 28,700,100   |
| 1902 | _ 37,336,500  | 1910 | 53,582,800   |
| 1903 | _ 35,368,700  | 1911 | 55,660,700   |
| 1904 | _ 33,436,700  |      | 75,626,900   |
| 1905 | _ 50,780,900  | 1913 | 54,871,900   |
| 1906 | . 79,366,900  | 1914 | 50,045,300   |
| 1907 | 52 921 400    |      |              |

making a total for the fifteen years of \$696,960,500.

MAINTENANCE AND RECONSTRUCTION.

During the year \$73,091,000 was applied out of revenue

to maintenance and reconstruction purposes. The total provision for maintenance and reconstruction charged against revenue for the last ten years was over \$504,000,000.

#### DEPRECIATION.

The policy of the Bell System with respect to deprecia-The policy of the Bell System with respect to deprecia-tion and depreciation reserve has continued on lines that are recognized as sound and reasonable both by investors and by the telephone-using public. That policy, briefly stated, is this: Each Bell Company makes charges to its operating ex-penses for the purpose of creating and maintaining proper and adequate depreciation reserves, and these reserves are used to meet the expense of depreciation. The Inter-State Commerce Commission defines expense of depreciation as follows:

(a) The losses suffered through the current lessening in value of tangible property from wear and tear (not covered by current repairs).
 (b) Obsolescence or inadequacy resulting from age, physical change, or supersession by reason of new inventions and discoveries, changes in popular demand, or public requirements; and
 (c) Losses suffered through destruction of property by extraordinary casualties.

The amount charged by the Bell Companies for deprecia-tion in 1914 was over \$41,000,000, of which the amount un-used during the year was about \$15,000,000. While this \$15,000,000 will some day be required for replacement of

plant, it does not remain idle in the meantime, but is inves-ted in productive plant, and is thus temporarily employed as additional capital on which no dividends or interest charges have to be paid.

#### RETARDATION OF GROWTH.

RETARDATION OF GROWTH. The effects of the disturbed business conditions generally prevailing in this country during the past year have not been so serious for the Bell Telephone System as for most industries. Chiefly they were felt in a retardation of the usual growth. Thus the increase in number of subscriber stations was only about 76 per cent of the number added in 1913, and was less than in any one of the four years previous thereto. This smaller net growth was not so much due to the falling off in new subscribers as to the unusual number of disconnections. Usually for about three new stations added there is a net gain of one station. In 1914 the pro-portion was nearly four new stations for a net gain of one. In traffic the number of all messages shows the small gain of slightly over 2 per cent.

In traffic the number of all messages shows the small gain of slightly over 2 per cent. Most of this retardation in growth occurred in the latter half of the year, and steps were at once taken to reduce the expenditures for new construction by postponing such exten-sions as were not immediately necessary, with the result that the additions to plant, which at the beginning of the year were estimated to aggregate \$56,000,000, were, as shown on a previous page, only \$50,000,000. For the year 1915 it is estimated that the current additions to plant will aggregate about \$35,000,000, and construction work is now proceeding on that basis. The general business conditions, particularly as they affect the demands for telephone service, are being carefully studied and watched, and should they improve as is hoped, the con-struction program can be promptly increased to whatever extent seems justified.

extent seems justified.

#### OPERATING RESULTS FOR THE YEAR.

The following tables show the business for the year of the The following tables show the business for the year of the Bell Telephone System, including the American Telephone & Telegraph Company and its associated holding and operating companies in the United States, but not including connecting independent or sub-licensee companies nor the Western Elec-tric Company except as investments in and dividends from those companies are included respectively in assets and revenue. All inter-company duplications are eliminated in making up these tables, so that the figures represent the business of the system as a whole in its relations to the public. The gross revenue in 1914 of the Bell System—not includ-ing the connected independent companies—was \$226,000,000:

ing the connected independent companies—was \$226,000,000; an increase of over \$10,000,000 over last year. Of this, operation consumed \$\$1,400,000; taxes, \$12,200,000, or 1.54 per cent on the outstanding capital obligations; current maintenance, \$31,600,000; and provision for depreciation, \$41,-500,000.

The surplus available for charges, &c., was \$59,300,000, of which over \$18,900,000 was paid in interest and \$30,-300,000 was paid in dividends. The total capitalization, including inter-company items

The total capitalization, including inter-company items and duplications, but excluding re-acquired securities of the companies of the Bell System, is \$1,419,039,668. Of this, \$624,324,761 is owned and in the treasury of the companies of the Bell System.

of the Bell System. The capital stock, bonds and notes payable outstanding in the hands of the public at the close of the year were \$794,714,-

in the hands of the public at the close of the year were \$794,714,-907. If to this be added the current accounts payable, \$26,214,-274, the total outstanding obligations of every kind were \$820,929,181, as against which there were liquid assets, cash and current accounts receivable of \$87,066,862, leaving \$733,862,319 as the net permanent capital obligations of the whole system outstanding in the hands of the public. As stated in previous reports, we believe from appraisals made by our engineers that the cost of reproduction of the physical plants of the Bell System would exceed their book cost by some \$61,000,000, aside from all intangible values. These telephone plants stand on the books of the companies at \$847,204,803 as of December 31 1914, an increase during the year of \$50,045,316. Stocks and bonds owned decreased \$20,722,796, chiefly by reason of the sale early in the year of the stock holdings of this Company in The Western Union Telegraph, as explained in the last report. Supplies, tools and receivables decreased \$7,454,953, and cash balances were increased \$17,902,418. This makes a total increase in assets of \$39,769,985, which is represented by \$24,342,116 increase in outstanding obligations of the whole system and an increase in surplus and reserves of \$15,427,869. In accordance with our previous practice in making up the combined figures for the Bell System, all inter-company items have been eliminated, and all intangible assets have been ex-eluded, so that the combined surplus and reserves as shown on the opposite page are considerably less than the sum of

cluded, so that the combined surplus and reserves as shown on the opposite page are considerably less than the sum of surplus and reserves shown on the books of the separate companies.

All of the present surplus and reserves, aggregating \$190,-000,000, is invested in tangible and productive property, the revenue from which enables the companies to maintain their

revenue from which enables the companies to maintain their efficiency without paying capital charges on this amount. Your attention is called to a comparative statement of the Be II System for the years 1907 and 1914. During that period the gross earnings have increased \$97,400,000, of which \$79,300,000 has been absorbed by increase in expenses, leaving an increase of \$18,100,000 in net earnings. The in-crease in interest was \$8,400,000 and in dividends \$12,200,-000. The surplus for 1914 was over \$10,000,000. During this seven-year period the assets of the companies have increased nearly \$407,000,000, while the capital obliga-tions and payables outstanding have increased \$269,000,000. The surplus and reserves have increased from \$61,300,000 to \$190,000,000, nearly \$129,000,000 after setting aside \$8,889,-750 for the Employees' Benefit Fund. AVERAGE OPERATING UNITS OF ASSOCIATED OPERATING

AVERAGE OPERATING UNITS OF ASSOCIATED OPERATING COMPANIES.

(See table on page 13.)

The table on page 13 shows average operating revenue and

The table on page 13 shows average operating revenue and expenses per station, operating ratios, unit plant cost, &c., of the associated operating companies (not including the American Telephone & Telegraph Company's long-distance lines), for the years 1895, 1900, 1910, 1913 and 1914. Although there are objections to the use of the subscrib-er's stations as a unit or standard, especially in comparison of one part of the country with another, yet it is the best unit available, and for general comparisons of the whole system from one year to another it gives some idea of the trend of the business. trend of the business.

\* Decrease.

It will be observed that both earnings and expenses per It will be observed that both earnings and expenses per station are now slightly less from year to year and are very much less than in earlier years. The average earnings per station have naturally decreased as the telephone service-has been extended to smaller communities and to smaller users in the cities. A very large majority of the subscribers pay an annual rate much less than the average. The ex-penses per station have in spite of increased wages and taxes been kept down by improved methods and greater efficiency all along the line.

Particular attention is called to the per cent of net earnings and of dividend and interest disbursements to total plant and other assets:

Net earnings to plant and other assets 5.51%Dividends and interest to plant and other assets 4.87%

In other words, the property employed earned less than 6 per cent per annum and the dividends and interest paid were less than 5 per cent upon the value of the property, which could not be considered unreasonable.

WESTERN ELECTRIC COMPANY.

WESTERN ELECTRIC COMPANY. As early as 1880 it was recognized as important that an ample source of supply of approved apparatus should be provided for the operating companies, and a contract was made with the Western Electric Company by virtue of which operating experience and manufacturing experience were brought into co-operation, under the supervision of our en-gineering forces, to provide standard apparatus. The appa-ratus was largely covered by patents and its sale was limited to the Bell Telephone System. The operating companies were, and remained, free to buy of the Western Electric Company or elsewhere as seemed to them most desirable Company or elsewhere as seemed to them most desirable.

AVERAGE OPERATING UNITS OF ASSOCIATED OPERATING COMPANIES, 1895 TO 1914. (This table covers the companies owning all the exchanges and toll lines of the Bell Telephone System except the long-distance lines of American Telephone & Telegraph Co.) Average per Exchange Station.

\* Increase during year shown over previous year.

\*Increase during year shown over previous year. When at a later period our plans involved connecting with rural companies, it became advisable that they also should have standard apparatus, and all restrictions as to-sales by the Western Electric Company were removed. In the evolution of the business the Western Electric Company became also a source of supply of other materials not manufactured by it, and about fifteen years ago, at the suggestion of one of the operating companies, an arrangement was worked out by the Western Electric Company under which it assumed the relation of purchasing agent and store-keeper. This arrangement was adopted one by one by the other associated companies and by this Company for its Long Distance Lines Department; and at the present time, as a result, the Western Electric Company is the purchasing agent and storekeeper of the entire Bell System. The contract defining this relation has been investigated by public commissions, and not one has found it other than a desirable arrangement. This contract as drawn is so liberal as to the power to make exceptions and to cancel that in effect it is hardly more than a codified routine. Thus as a natural combution and heagues the relation is

than a codified routine.

than a codified routine. Thus as a natural evolution and because the relation is advantageous to all parties, the Western Electric Company has become the manufacturing, purchasing and supply de-partment of the Bell System. In both efficiency and econ-omy the value of the relation to the system is enormous. Sales of the Western Electric Company for 1914 amounted to \$66,400,000, of which \$43,900,000 represents sales to the companies of the Bell Telephone System and \$22,500,000 represents sales to other customers.

represents sales to other customers. The orders on hand January 1 1915 were \$4,309,000 less

than on January 1 1914. 

The effect of the European war upon the company's foreign investments is, of course, very serious, but can measured with any degree of certainty at this date. cannot be

PLAN FOR EMPLOYEES' PENSIONS, DISABILITY BENEFITS AND DEATH BENEFITS. PLAN FOR EMPLOYEES' PENSIONS, DISABILITY BENEFITS AND DEATH BENEFITS. As a result of the first year's experience under the Benefit Plan, revised regulations for the administration of the Employees' Benefit Fund, extending the benefits in some minor respects, were adopted and took effect on May 1 1914. During the year benefits were paid in 20,915 cases of dis-ability or death among the employees of this Company and of the associated operating companies, and at the end of the year 211 former employees were carried on the pension rolls. The total amount expended for all classes of benefits was \$1,338,261. As was true during the first year's opera-tion of the Plan, a very large percentage of the cases consis-ted of minor disabilities among the lower-salaried employees, to whom a loss of wages for even a short period would have been a hardship. The work of studying the information secured in connection with the operation of the Plan is being continued with a view to the extension of measures for the prevention of sickness and accident.

#### REPORT OF THE AMERICAN TELEPHONE & TELEGRAPH COMPANY. EARNINGS.

EARNINGS. The net earnings of the American Telephone & Telegraph Company for the year were \$40,557,977 29, approximately the same as in the previous year. The interest charges were \$8,223,163 23 and the dividends at the regular rate of 8 per cent per annum were \$27,572,674 72. Of the resulting bal-ance there was carried to Reserves \$2,500,000 and to Surplus en sec 120 24 \$2,262,139 34.

ISSUES OF CAPITAL STOCK AND BONDS.

The only change in the outstanding capital stock and bonds of this Company during 1914 was the issue of \$65,600 par value of stock through the conversion of \$86,000 of the 4% convertible bonds of 1906. The total outstanding capital stock and bonds of the American Telephone & Telegraph Company at December 31

1914 were as follows:

| Capital Stock  | .\$344.681.900 |
|--|----------------|
| 4 Per Cent Collateral Trust Bonds  | 78,000,000     |
| 4 Per Cent Convertible Bonds   | 4.505.000      |
| 5 Per Cent Western Tel. & Tel. Co. Bonds   | 10,000,000     |
| 41/2 Per Cent Convertible Bonds, 1933  | 67,000,000     |
| 1/2/2 02 0 0011 0 000000 |                |
|  | 0201 100 000   |

FOUR AND ONE-HALF PER CENT CONVERTIBLE BONDS.

The 4½ per cent Convertible Bonds issued March 1 1913 are convertible at the option of the holder into capital stock beginning March 2 1915. The terms of such conversion are set forth in a circular letter of February 10 1915, which has been issued and which will be mailed to any applicant.

REPORT OF THE ENGINEERING DEPARTMENT.

REPORT OF THE ENGINEERING DEPARTMENT. The rapidity with which new improvements are incorpora-ted into the Bell System are exemplified by the fact that during the past five years new plant of all kinds costing more than \$425,000,000, was added to the Bell System and plant to the value of more than \$175,000,000 was taken out and removed from service. Mow promptly the Bell System has responded to the in-stood from the fact that from 1906 to 1914 new construction work in the Bell plant was done under our engineering speci-fications to an amount more than \$700,000,000. We are now preparing the way for the orderly future de-velopment of the switchboard system along rational and effective lines that will enable our companies to avoid the

enormous reconstruction costs which would result from even one false step in a matter so complex as this.

The latest product of this unceasing organized effort of the Bell System is the transcontinental telephone line, 3,600 miles long, bringing San Francisco within commercial talkmiles long, orniging San Francisco within commercial tak-ing distance of the principal cities on the Atlantic seaboard. Few can appreciate the years of indefatigable labor on the part of our entire staff, and the immense sums of money which this achievement has cost, and fewer, still, can foresee the countless ways in which it will, from now on, make for the benefit of all the service rendered to the public everywhere

How great is the sum total of our improvements was How great is the sum total of our improvements was demonstrated when Dr. Alexander Graham Bell, using a repro-duction of the first telephone ever made, talked successfully from New York to San Francisco, where he was heard by Mr. Watson more clearly and more distinctly than he was when the same two men held the first of telephone conversations using this same type of instrument over a wire extending only from one room to another in the same building. Deduct from the telephone art the grand total of improve-ments which the Bell Company has introduced into its sys-tem since the day of the first telephone conversation, and this faint-speaking, crude wooden first telephone is all that

is left. At the present time telephonic communication is provided between California and the principal cities on the Atlantic coast. Engineering studies have already been begun for the extension of this service to include the principal cities of the United States, so that direct telephonic inter-communi-cation between them all will become general. How successful has been the attack upon the underground wire problem is best shown by the figure of over 9,000,000 miles of wire in underground cable in 1914 as against only

miles of wire in underground cable in 1914, as against only a few hundred miles in 1884. The line from New York to San Francisco is overhead

throughout its entire extent except for a few short stretches of cable in cities and under rivers. Notwithstanding the improvements which we have made in underground cables the

improvements which we have made in underground cables it is still necessary in such long lines as this to exclude as far as practicable all lengths of cable however short. The time when the telephone wires can be placed under-ground universally is still a long way off. Even assuming that all of the technical difficulties had already been over-come, it would still require the expenditure of billions of dollars. Manifestly, the extension of underground telephone wires must be a matter of gradual growth. The progress which we have made in the past is the best evidence that we will continue our policy of increasing the mileage of under-ground wires year by year as fast as the technical advances and the economic conditions of the country permit.

#### REPORT OF THE LEGAL DEPARTMENT.

The amount of pending litigation continues to be insignifi-The amount of pending fitigation continues to be insignifi-cant. The suit referred to in the last report which the United States instituted in Oregon, charging that certain local transactions in which The Pacific Telephone & Tele-graph Company and The Mountain States Telephone & Telegraph Company were most directly concerned, were in violation of the Sherman Act, has been disposed of in ac-cordance with the terms of a decree filed March 26th 1914, as a result of a compromise acrond upon between the United

cordance with the terms of a decree filed March 26th 1914, as a result of a compromise agreed upon between the United States and the defendants. The basis for an adjustment which this decree fixes is apparently working out in a manner satisfactory to both the companies involved and the public. A suit which had been brought by the State of Mississippi against the Cumberland Telephone & Telegraph Company, this Company, the American Telephone & Telegraph Com-pany of Mississippi, and The Western Union Telegraph Company, in which a large sum was claimed as penalties on account of alleged violations of the anti-trust laws of the State of Mississippi, has been adjusted by the payment of a comparatively nominal amount. Pursuant to this adjust-ment, a decree was entered with the consent of all the parties on the 28th of March, 1914, which expressly recognizes the legality of the organization of the Bell System and of the re-lationship between the various companies constituting the system, as well as their business and practices. The suit referred to in the last report brought by William

The suit referred to in the last report brought by William A. Read & Company in Chicago is still pending. A vigorous effort is being made to bring it to trial upon the merits, and it is expected that this will be done prior to the vacation of

There is no suit pending against this Company, or any of its associated companies, charging any violation of any State or Federal anti-trust law.

The arrangement with the Attorney-General of the United States, evidenced by the correspondence between him and this Company set out in the last report, has been consistently adhered to, and has resulted in an entire avoidance of misun-derstandings or disagreements with the Federal authorities.

#### PROFIT-SHARING.

Welfare work, pension and sick benefit plan, have demon-strated their practical value. The recent offer of stock at a low price on installments, of which over 30,000 employees have availed themselves, was intended particularly as an en-

have availed themselves, was intended particularly as an en-couragement to saving. In such enterprises as public utilities there can be little or no "profit sharing" for either stockholders or employees. The capital invested must be paid for, in order that new capi-

tal in sufficient amount can be obtained as it is needed. The employee, a preferred creditor, must be paid sufficient to get his best services, and his further reward is through in-crease in compensation, promotion and security of position for proved efficiency, and a proper consideration for his wel-fare. This is the situation of the Bell System.

DISTRIBUTION OF REVENUE AND COST OF CAPITAL.

Some analysis of the distribution of revenue in this con-nection cannot fail to be interesting. The statistics per em-ployee are as follows:

Average investment in plant per employee upon which charges have to be paid, representing capital invested in plant \_\_\_\_\_\_4.632 Gross telephone revenue per employee \_\_\_\_\_\_1.408 Distributed as follows:

| Wages to employees46.5%   | \$656 |  |
|---|-------|--|
| Taxes   | 79    |  |
| Supplies and expenses24.0%  | 337   |  |
| Net operating revenue24.0%<br>Net earnings are divided as follows:                                      | 336   |  |
| Charges paid on capital (which is 5.1% on the capital invested in plant, or 5.9% on the outstanding se- |       |  |

curities) \$271 Surplus revenue. 65 \$336

It will also be interesting to the subscriber to learn what

is done with his payment for service. For the service of the Bell System, not including toll and long-distance service, the average revenue for exchange serlong-distance service, the average revenue for exchange service per telephone station, which is the only unit, is \$29 81, being less than the average revenue of any other comprehensive system in the world. For all telephone service, including toll and long-distance, the average revenue per station is \$40 20 per year. The average investment in plant per station, including telephones and long-distance lines, is \$152, represented by \$132 outstanding capital liabilities, upon which charges are paid. The average gross revenue for exchange and toll service, of \$40 20 per station, is distributed as follows:

of \$40 20 per station, is distributed as follows:

Wages to employees\_\_\_\_\_\_\$18 72, or nearly one-half Taxes \_\_\_\_\_ 2 26; Taxes 2 26 Miscellaneous expenses, light, heat, welfare, ma-terial, &c\_\_\_\_\_\_9 62.

terial, &c.\_\_\_\_\_ 9 62.
This leaves a net operating revenue of \$9 60, of which
\$7 75 is paid for capital charges, or an average of 5.1% on the plant investment, or an average of 5.9% on the outstanding securities, leaving a surplus of \$1 85.
A surplus over all expenses and charges is necessary in any enterprise to insure stability and certainty. For enterprises requiring as large capital relatively to gross and the telephone service capital cannot be

net earnings as does the telephone service, capital cannot be provided out of revenue nor from any source other than the investor, and then only because it is attracted to the investment

This being so, the question is whether the investment per unit is too great or whether the charges paid on capital are too high. That the investment of the Bell System is actually unit is too great or whether the charges part on capital at too high. That the investment of the Bell System is actually there has been certified to and confirmed by many examina-tions and investigations. That the investment per unit is reasonable is proved by the fact that it is considerably less than that of any other comprehensive system in the world. Could the money be got for less? Taking the average of all the years, it is not probable that even if procured on Gov-ernment bonds or on Government guaranty, it could be obtained in the enormous amount required for much less than the utilities as a whole have to pay.

obtained in the enormous amount required for much less than the utilities as a whole have to pay. It has been suggested that the Government take the prop-erty and pay for it in 3% bonds at par. This establishes nothing. If it can be taken and paid for in 3% bonds at par, it can be taken and paid for with 2% or 1% bonds at par, or even be taken for nothing. Property can be taken only at just compensation based on fair valuation.

Property can be taken only at just compensation based on fair valuation. The other large items of cost are wages to employees, maintenance and depreciation and taxes. Wages must be sufficient to attract and retain the best service; the wages paid by the Bell System are maintained at that level as far as possible. Proper maintenance and depreciation are necessary, without them good service cannot be given by the best of employees. The taxes are considerable and appreciable in amount, but the taxes, while increasing the cost of the service, indi-ectly relieve the public of the payment of them in some other **r** orm.

rorm

The telephone instruments to be of service must be used in connection with lines equipped with auxiliary and ancillary apparatus of great variety, none of which existed at the time; it had to be originated and created.

#### ADMINISTRATION.

For a centralized service, relieving the separated operating companies from the obligation of maintaining anything but an operating organization; for the amortization of the cost and royalties of all the many inventions; for the mainte-nance of a legal department at all times at the disposal of, and ready to defend, advise or prosecute for all companies, in all administrative matters; for the maintenance and sup-port of the very complete, extensive and effective technical and engineering department; for the rental and care of the port of the very complete, extensive and effective technical and engineering department; for the rental and care of the telephones themselves; for the financial assistance; for all the service and the benefit of it all, the operating companies contribute 4½ per cent of their gross revenue. For the "administration" of the telephone business over this vast country, and for all the benefits that come from a common administration without which vastly greater sums of money would have been expended in operation, vastly

greater sums required for construction and vastly greater sums paid for obsolescence; for all the advice and aid in legal and financial matters; for the right to use all inventions neces-sary and for protection in that right; for all the expenses of administration—after deducting the actual cost of furnish-ing the telephones and maintaining them at the highest standard—the average contribution by the operating com-panies to the Centralized General Administration is less than 3 per cent of their gross receipts.

#### DEVELOPMENT AND REASONS FOR THE 41/2

DEVELOPMENT AND REASONS FOR THE 4½%. Originally the telephones owned by the Bell Company were leased for a fixed rental payment for particular purposes. Owning and leasing the telephones, instead of selling them, insured proper maintenance, proper expert care, and the use uniformly throughout the system of only the highest and latest types, all of which was in the interest of the service and of the reputation of the instrument. Where the instruments are owned by users, expert care is seldom given and obsolete types are continued in use—all inimical to their reputation, and detrimental to the service. The rental of the telephones originally covered only their use for a particular purpose. The only obligation of the Bell Company was to protect the licensee in that use. The grad-ual assumption by the Bell Company of the expenses in con-nection with the development as set forth above and includ-ing it in the "rental" of the telephones, was entirely volun-tary on its part. As the centralization of all matters common to all devel-

As the centralization of all matters common to all devel-As the centralization of all matters common to all devel-oped into a Central Administration for all, and the protec-tion of the business was in the business policy and other in-ventions instead of telephone patents, the rental for instru-ments was changed to a percentage on the gross revenue, and this percentage was made to include, both the rental of in-struments and the contribution of the operating company to the cost of centralized administration. The term rental and royalties of telephones, however, has clung to the payment, much to the confusion and misunderstanding of those who had to deal with it. had to deal with it.

#### CONTROL AND REGULATION.

Regulation and control by commissions or business courts have, so far as anyone can forecast the future, become a per-manent feature of our economic laws. Like all new depart-tures from established practice, it could not be perfect from the start.

The broader and more general powers of a business court or commission when once established on their proper basis will allow of more generalization, a more satisfactory, practical and less technical hearing, consideration and solution of all questions.

If the public can be brought to realize fully that the problems to be solved by these courts are the most vital of all questions, and to the whole public far more vital and impor-tant than any of the questions before the higher courts, then and not until then will these business courts have their proper position in the public mind and be esteemed for their true worth.

true worth. Considered broadly and generally, the Bell System has no cause for complaint, protest or criticism as to its relations with legislatures, commissions, courts or municipalities. The various associated companies and this Company have been called before those having jurisdiction over their operations to give information and to make answer on many matters, many of them of grave importance. There have been some serious and many frivolous and selfish complaints made which had to be met and which have taken much time and caused large expense to both the investigators and the inves-tigated. With a few notable exceptions from the viewpoint of the Bell System, right and reason have been the controlling tigated. With a few notable exceptions from the viewpoint of the Bell System, right and reason have been the controlling influences in the conclusions reached. There have been fully as large a percentage of satisfactory conclusions arrived at by commissions as would have been in any regular courts of justice. No more could be expected. The telephone business is peculiar in that it is the last business to feel depression and the first to recover. When other industries have to retrench, retrenchment is possible with the service of the Bell System at command; it is the cheapest assistant or server that can be employed. While the year's telephone business shows an increase, it is not the normal increase; the circle of industrial conditions is out of balance and there is disturbance, and the telephone business is feeling the effect of it.

business is feeling the effect of it.

#### CONCLUSION.

It is a long step from a hardly intelligible telephonic con-versation between two rooms to a perfectly easy, low-voiced conversation between the extremes of our land, East, West, North, South. Remarkable as this is, the progress made during the epoch of which this was the culminating point has hear still more remarkable, but so quictly has it all been

during the epoch of which this was the culminating point has been still more remarkable, but so quietly has it all been accomplished that it has been hardly appreciable. Any public service system the use of which is inter-dep-endent and inter-connecting, such as street railway or tele-phone systems, can only be of the greatest benefit to the public when the extent of the system and the extent of the district of the interdependent communities, which it serves are identical. Just so far as the service is divided between a number of separate systems, each serving a part, the com-munity is deprived of the best possible service. In any universal service where all the communities tribu-tary to a central district are to be served with the central

tary to a central district are to be served with the central

district equally and uniformly, the entire service and the cost of that service must be treated as an entirety and the service for the tributary or subordinate parts of the district must be supplied in part at the cost of the whole; the consideration for it being in the contributory benefits of the subordinate

for it being in the contributory benefits of the subordinate parts to the whole. The use of the telephone system from any one station very largely influences the cost of that station. To make a flat or uniform rate for each station is in effect making the small user pay the costs of the service for the large users; and the result of this is to put the service out of the reach of many to whom it would be desirable and whose connection with the system would be of advantage to all others connected with it. The position that the Bell System holds with the public is entirely due to the fact that the Bell service has been con-

entirely due to the fact that the Bell service has been con-

sistently built upon the policy of creating a service of such great benefit and advantage to the public, and rendered at prices so well within its value to all—so well adapted to the use of all, as well as being a direct pecuniary advantage to each user—that none is too poor to take advantage of it, and none so independent as to get along without it. To this policy, to this organization, and to every individual member of it, belong the credit of making the Bell System what it is—the premier system of the world and the model after which every universal system throughout the world is built.

For the Directors,

President.

# LETTER FROM THEODORE N. VAIL TO THE DIRECTORS AND SECURITY HOLDERS OF THE AMERICAN TELEPHONE & TELEGRAPH COMPANY.

To the Directors and Security Holders of the American Tele-phone & Telegraph Company: There is a condition of disturbance, of economic unsettle-

ment, which cannot continue indefinitely. Either the causes must be removed, or by a period of quiet and freedom from other changes a chance be given for the new conditions to adjust themselves. Never were the basic conditions of the adjust themselves. Never were the basic conditions of the country better than now for a restoration and continuance of normal conditions. It does seem as if by combined effort of all, right ideas and a right understanding might be brought to bear on the solution of these questions. While the subject is not strictly pertinent to the annual report of the Company, yet, in my opinion, it is so important that the note of warning should be sounded.

#### PUBLIC SERVICE.

THE MOST VITAL OF ALL PRESENT ECONOMIC PROBLEMS ARE THE RELATIONS BETWEEN THE PUBLIC AND PUBLIC SERVICE UTILITIES, PARTICULARLY THOSE OF INTER-CHANGE AND INTERCOURSE—WHAT CONSTITUTES PROPER REGULATION AND CONTROL—WHAT IS THE BEST METHOD OF SECURING THEIR PROPER MAINTENANCE AND FURTHER EXTENSION.

It is the generally accepted belief that utilities are depend-ent on the public rather than the public dependent on them; while neither could exist without the other, means of inter-course and interchange are the *advance agents*. Competition, control, regulation and legislation have been looked upon as the causes or forces which have enabled or compelled indus-trial enterprises to improve and extend their service; to in-crease production; to pay increased wages and taxes; and at the same time to decrease charges for service rendered. While these have been to some extent a stimulus, the won-derful improvement which has been made has been coinci-It is the generally accepted belief that utilities are depend-

These production, to pay indicased wages and taxes; and at the same time to decrease charges for service rendered.
While these have been to some extent a stimulus, the wonderful improvement which has been made has been coincident, and indissolubly connected with the replacement of the old "rule of thumb" methods, by methods of scientific operation. Investigation, research, and the application of the results to both operation and production have produced "much more" and "much better" from the same or less effort and expenditure, and have obtained valuable products from what had heretofore been wasted; much to the benefit of the worker, the public served, and of those responsible for the work.
There is a lack of consistency in the understanding respecting enterprise and initiative, and the relations between capital and labor, the amployer and the employee. There are many ideals and beautiful theories which in time we hope may be realized. But commerce and industry are dependent upon the purchaser and consumer and so long as the human factor of self-interest as it now exists controls them in their dealings, so long must the effect of that same existing human factor be taken into consideration by commerce and industry in their relations with both producer and the worker.
The situation in the past has been aggravated, public indignation aroused, and public action influenced, by misleading and wilfully mistaken statements of irresponsible.
There may have been some abuses, but even if the worst that has been asserted was true, they were not of the kind that could have brought about existing conditions, which arise from an imposed reduction in revenue and an imposed increase of expenses. The public, in turn, has attempted to bring about ideal conditions through the power of control and regulation. This power has resulted in some cases in the section.

the impairment and even in the destruction of property

the impairment and even in the destruction of property rights and of the physical property involved. Happily, those abuses that existed are passing, and there is evidence of better understanding and appreciation, and more substantial justice on both sides. The public, and particularly those dependent on employment, will soon realize that the wealth of this country does not consist of tangible tokens of value that can be realized upon at will but that it largely consists of property, or certificates repre-senting property, which has been created by the investment of their savings in these enterprises of utility and industry. The returns from, and the intrinsic value of, these enter-prises depend on the activity caused by demand for the products or service produced by the employment of workers. Without that activity, employment ceases, returns dis-appear and values are dissipated. Public service enterprises when prosperous are large em-ployers of labor and large purchasers and consumers of all

Public service enterprises when prosperous are large em-ployers of labor and large purchasers and consumers of all varieties of products and manufactures. Their activity means employment and circulation of money, which in turn means further consumption of products and manufactures, and the further employment of labor. Employment means ability to purchase. Ability to purchase means consump-tion. Consumption means production, and production for which there is a demand means prosperity. Abundant em-ployment makes the worker his own master. He can afford to purchase and consume production. Without employ-ment he is a burden on his savings, his friends or on the community. community.

community. It is a great revolving circle of civic and industrial condi-tions, no beginning, no ending. When the balance is broken, and the relations between the conditions are changed faster than any adjustment between them can take place, them will ome disturbance. Continued disturbance is inevitably

followed by disaster. The entire public, working or investing, will all stand by and uphold a control and regulation which will be thorough and effective and at the same time equitable, just and prac-tical. But has the public ever remained complaisant when it is brought face to face with disturbance, uncertainty and unem-ployment, caused by too drastic action or too radical legislation upon economic conditions or industrial enterprises? Demands of labor for increased wages and shorter hours, and demands of the public for increased corrise must

Demands of labor for increased wages and shorter hours, and demands of the public for increased service, must be met by increased revenue produced by increased rates. The application of scientific and improved methods to operation produced great results in reduction of expenses because it had an unworked field to start with, but it cannot be expected that the same ratio of progress will be indefinitely main-tained. The irreducible minimum in unit expense has been reached in some industries and soon will be in all. A corporation, no more than an individual, can be bound hand and foot and yet be active or give good service. If too many burdens are put upon corporations, and no relief given them, it will be impossible for them to properly operate or maintain their plants. Poorly constructed, badly maintained and inefficiently operated utilities cannot give good service. Inadequate revenue would make it impossible to meet capital charges. Capital would avoid any enterprise which had to do with public service. Without capital, em-ployment in any large way would cease, extension and im-provement would be stopped, values would be destroyed, and the enterprise would become bankrupt. When service is rendered by starved or bankrupt corpora-tions in the head of merice.

the enterprise would become bankrupt. When service is rendered by starved or bankrupt corpora-tions in the hands of receivers, results must follow which will be disastrous. The indirect losses to the public will be far greater than the direct loss to the investor. Decline in prosperity will come to any community dependent upon such corporations. No community with inadequate and ineffi-cient facilities for intercourse and interchange can compete with communities with adequate and efficient facilities. with communities with adequate and efficient facilities.

#### DISTURBANCE OF STABILITY AND CONDITIONS:

There are three principal creative divisions of industrial enterprises:—"Industries producing from the Earth," of which agriculture is the most important—"Manufacturing" —and "Public Service", which is very largely transportation and Fublic Service", which is very largely transportation "Transportation" and "Intercommunication.

-and "Public Service", which is very largely transportation and intercommunication. "Transportation" and "Intercommunication" are the most important of all in their creative effect. They are the industries upon which depend all interchange and move-ment, all commerce and trade except that which is purely local. Transportation and intercommunication change local stagnation into world-wide interchange and prosperity. Their relative economic importance as to other industries is many times their relative capital. During the quarter of a century just past these three prin-cipal industries increased about two times and now represent about \$100,000,000,000 of invested capital. This develop-ment and this new wealth of \$65,000,000,000 in these enter-prises alone was made possible by, and was coincident with, the development of transportation. The capital invested in Public Service and Manufacturing increased during the quarter of the century at the rate of nearly \$1,500,000,000 per year; the number of employed increased about 100% and their yearly compensation over \$3,500,000,000, or 130%. In enterprises of transportation and intercommunication the capital increased over \$15,000,-000,000 or an average of \$600,000,000 per year; employees over 175%, with an increase in yearly compensation of \$1,350,000,000, or over 200%.

The normal employment in the public service and manu-facturing industries alone should be at the present time nearly if not quite 12,000,000, with annual earnings of from \$7,200,000,000 to \$7,500,000,000. All employment is far below normal. There are fully 2,000,000 unemployed, whose yearly e arnings should be a least \$1,250,000,000. These unemployed are now living at the expense of their savings, their friends, or the public, If they were employed, normal conditions would be restored the circle of inter dependent conditions would be balanced prosperity would be restored. Capital invested in "Transportation" and intercommuni-cation constitutes one-half the combined capital of Public Service and Manufacturing. It is entirely in the form of negotiable securities, while a large part of the other capital is closely held or not readily realized on. Transportation securities have been for years a favorite investment for capital by the small investor, the trustee, the savings bank; by the most conservative in good times and by the wise *investors* in bad times; *any cause that disturbs these enter-prises distubrs all*, both industrially and financially. The disturbance, uncertainty, and timidity about "Trans-portation" due to legislative requirements and the increase of gross revenue to meet them, have caused increase in ex-pense of operation which can no longer be met by reduction of operating expenses or by acientific methods, for the irre-ducible minimum has been about reached. The decrease in the surplus operating revenue has cast doubts upon the safety and certainty of not only the charges

The decrease in the surplus operating revenue has cast doubts upon the safety and certainty of not only the charges on the capital but the capital itself. Except for a few favored lines, the safe margin has been so reduced that investors have become frightened.

Extension and improvement of our transportation facilities for which capital is required, are necessary. Money is sufficient quantities or on reasonable terms cannot be ob-

RONICLE[Vol. 100.]Isined. Nothing that can be postponed is being done.<br/>*a "going"* concern cannot be satisfied, to say nothing of our<br/>contry as a "growing" concern.There could be a restoration of conditions which would<br/>inspire confidence in their securities sufficient to command<br/>part of the \$1,000,000,000 a year needed to put these enter-<br/>prises in a position to meet the demands of the country both<br/>as a "growing" concern, it would soon<br/>econsumption, production. The circle of industrial conditions<br/>would be again balanced, shops and factories would be filled,<br/>and instead of the bread line there would be a working line<br/>ineith and morning between places of employment, expenditure,<br/>constitution, on credit or small margin, intangible though<br/>possible future values, or when attempts were made to im-<br/>prove existing conditions by sudden changes.The public mind, which has been excited and influenced<br/>in fact. Those that did exist cannot be repeated; business<br/>conscience and public morals, as well as regulatory laws,<br/>will not permit. Other irregularities will creep in, for where<br/>there is abundance produced by labor, there will be many<br/>who want a part of it without labor. Take the fetters and<br/>restrictions off the employment market, keep a good watch<br/>on those who do not want to labor, and punish those who<br/>betray confidence. Wealth never will be distributed equal y<br/>no those who do not want to labor, and punish those who<br/>betray confidence. Wealth never will be distributed equal y<br/>no those who do not want to labor, and punish those who<br/>betray confidence. Wealth never will be distributed equal y<br/>no those who do not want to labor, and punish those who<br/>betray confidence. Wealth never will be distributed equal y<br/>no those who do not want to labor, and punish those who<br/>betray confidence. Wealth never will be distributed equal y<br/>no those who

New Jersey: Adjustment of surplus account (credit)\_\_\_\_\_ 728 64

\$1,583,088 68 Net increase in surplus\_\_\_\_

Dividends at the rate of six per cent per annum, aggre-gating \$1,500,000, were paid during the year upon the capi-tal stock of the Corporation, which amounts to \$25,000,000

gating \$1,500,000, were paid during the year upon the capital stock of the Corporation, which amounts to \$25,000,000 at par. The above figures demonstrate that the Corporation, operating under adverse conditions, has had, on the whole and relatively, a successful year. The severe storms of February and March cost the subsidiary companies of the Corporation in loss of revenue and added operating expense certainly upwards of \$300,000. For four months of the year, in nearly all of its territory, the Gas Company received only 90 cents per thousand cubic feet for its product, as against \$100 during the corresponding months of the year before, and during certain months of the year the Gas Company was compelled to pay for oil 134 cents per gallon in excess of the amount paid during the corresponding months of the year before. The voluntary raise of trainmen's wages inaugurated by the Railway Company January 1st 1914, and commented upon at length in the last annual report, cost the Railway Company \$200,000. The wage question is now settled upon a permanent basis, which fact has undoubtedly resulted to the Railway Company's advantage in the matter of permanency and stability of employment. In addition to the foregoing, it must be remembered that a state of business depression existed throughout the year, which was greatly aggravated after the outbreak of the European War on August 1st. This depression was felt by all of the underlying companies belonging to the Corporation.

gitized for FRASER tp://fraser.stlouisfed.org/ EAR ENDING DECEMBER 31 1914. The normal annual gross increase in the Railway Company's business averages about 5%. During 1914 the operating revenue of the Railway Company increased 1.11%. The normal annual gross increase in the Electric Company's receipts averages from 11 to 12%. This year the operating revenue of the Electric Company increased 9.34%. The normal annual gross increase in the Gas Company's business averages 7%. This year the operating revenue of the Gas Company increased 3.61%. In the case of the Gas Com-pany, however, as above shown, this falling off was partly due to the difference in the prevailing rate at which gas was sold during a portion of the year. The operating revenue of all the subsidiary companies of the Corporation increased \$1,331,979 85, or a percentage of 3.85%, as against an aver-age normal increase of about 7%. As compared, however, with the results obtained by railroad companies and other large public utilities in 1914, these figures of increase are quite satisfactory. The Corporation financed itself during the year as follows: Its \$2,000,000 One-Year Notes, falling due February 1st, were redeemed. To redeem these notes and to provide for the needs of the Corporation during the year \$7,500,000 Five Per Cent Two-Year Collateral Gold Notes of the Corpora-tion, secured by \$10,000,000 par value of General Mortgage Bonds, were sold. There were also sold during the year \$500,000 General Mortgage Bonds; \$150,000 Paterson & State Line Traction Company Five Per Cent First Mort-gage Bonds and \$62,000 Riverside Traction Company Five Per Cent First Mortgage Bonds. Three hundred thousand dollars Paterson Railway Company Six Per Cent Second General Mortgage Bonds due October Ist 1914, were ex-tended for a period of thirty years at 5% interest. MAINTENANCE OF PROPERTIES. The properties owned by the Corporation have been main

tended for a period of thirty years at 5% interest. MAINTENANCE OF PROPERTIES. The properties owned by the Corporation have been main-tained throughout the year at a high standard of efficiency. The amount, exclusive of ordinary maintenance, set aside for amortization during the year was \$1,306,358 87. Adding to this the amount set aside for the Sinking Fund, under the terms of the mortgage securing the issue of the General Mortgage Bonds of the Corporation, makes a grand total, set aside during the year for amortization of properties and redemption of securities, of \$1,515,858 87. The Railway Company reconstructed during the year, with the same rail, 31.845 miles of track, and with new rail 8.880 miles of track, and, in addition thereto, installed 10,621 electric weld joints. All the property of the three subsidiary operating com-panies of the Corporation is in first-class operating condition. It is true, of course, that some of the electric plants are old-fashioned and, in a measure, obsolete. Where this condi-tion exists the plants are being rapidly amortized and writ-ten off. IMPROVEMENTS COMPLETED

ten off.

#### IMPROVEMENTS COMPLETED.

The two main improvements completed by the Railway Company during the year were: 1. The building and opening of The Paterson & State

Line Traction Company, running from the Paterson city

line to Ridgewood. This was an expensive piece of work. It is built almost altogether on a private right of way and involves an expensive undergrade crossing of the Susque-hanna Railroad. Through service on this line was opened July 1st 1914, and travel thereon has been very satisfactory. 2. The building and opening of the Sewaren Spur, extend-ing from the Public Service Railroad tracks at Port Reading Junction to Sewaren, where the new construction connects with the heretofore existing Rahway line, running from Rah-way to Perth Amboy. By means of this construction it has been possible to put into operation a new through line, running partly over the tracks of Public Service Railroad and partly over the tracks of Public Service Railway, from Newark to Perth Amboy. This line was opened July 3d 1914 and was successful from the start. Altogether, during the year, the Railway Company built

and was successful from the start. Altogether, during the year, the Railway Company built 10.787 miles of track extensions to its system. The Railway Company also purchased from the Cooper estate a large tract of land in Camden, immediately adjoin-ing its carhouse and shops, which it has long desired. With this addition the Railway Company will have all the land it will need for carhouse and shop purposes in Camden for fifty years to come. There was also purchased for the Rail-way Company an addition to its terminal site in Paterson, which, with the ground heretofore owned at the terminal. way Company an addition to its terminal site in Paterson, which, with the ground heretofore owned at the terminal, taken in connection with the large carhouse in Paterson, gives the Railway Company ample facilities in that locality. In fact, it may be said that throughout the State the Rail-way Company has acquired for carhouse, shop and terminal purposes practically all the real estate it needs. The large electric power station located at Burlington, designed to take care of the growing needs of the Southern Division, and referred to at length in the last annual report, was completed and put into active service last spring. This station is used to supply, not only the municipalities in its

station is used to supply, not only the municipalities in its immediate vicinity with light and power, but also to supple-ment the existing stations at both Camden and Trenton by means of long transmission lines. During the year there were completed and put into service, working in co-operation with the Durlington station power whether at order America completed and put into service, working in co-operation with the Burlington station, new sub-stations at Olden Avenue and Liberty Street, Trenton; at Bordentown, Burlington, Riverside and Mount Holly, all connected by a complete system of transmission lines. This vast improvement dis-placed the obsolete generating stations formerly located at Bordentown, Burlington, Riverside and Mount Holly. The construction of another large power station, destined to be the Electic Company's largest generating plant which

to be the Electric Company's largest generating plant, which is to be known as the Essex station, was commenced on a site heretofore purchased for the purpose on the Passaic River, abutting the property of the Pennsylvania Railroad's freight line through the City of Newark. It is hoped to have this station in operating condition for the peak of the load in 1915 load in 1915.

A new sub-station in the City of Elizabeth and an under-A new sub-station in the City of Elizabeth and an under-ground system in the same city were put into operation. Agreements were concluded covering additional underground construction in the cities of Camden and Passaic, and work started in accordance therewith. A total of 6.23 street miles of underground conduits were laid and 59.93 miles of trans-mission lines were installed.

started in accordance therewith. A total of 6.23 street miles of underground conduits were laid and 59.93 miles of trans-mission lines were installed. During 1914 the Gas Company occupied two portions of its territory which it had not previously supplied, namely Roseland, in the Essex Division, and Hohokus, in the Bergen Division. In both of these communities the demand for gas warranted the Company in following its custom of extending its mains where the business to be obtained justi-fied the extension. Various improvements were made to the manufacturing plants and trunk main system of the Gas Company. In the Essex Division a concrete tunnel was driven under the Passaic River. It is approximately 370 feet long and has a clearance of 30 feet below mean low water, with an inside diameter of 7 feet 6 inches. Inside of this tunnel two 30-inch cast iron pipes were laid to connect the Harrison Works with the Market Street Works. In the bottom of the tunnel four 6-inch wrought steel pipes were installed, so that oil and tar can be transferred from one works to the other. Six waste-heat steam boilers were erected at Market Street during the winter of 1914. The water supply for the Market Street Works was doubled and a large saving in steam used effected by the erection of a centrifugal pump driven by a Corliss engine. A new 6-inch pipe line was laid from Paterson to Ridgewood in order to take care of the peak of the Company's business in that locality. In 1906, when the Gas Company first beeame interested in Ridgewood, the consumption was 14,500,000 cubic feet. In 1914 it had grown to 49,128,843 cubic feet. This explains the necessity for the additional pipe line, and is an extraordinary showing of increased business. At a large outlay, comprehensive changes and improve-ments were constructed at the Camden Coke Works, the effect of which has been to enable the Company 's problem has been solved and that there will be no further trouble in re-lation thereto. The Corporation has gradually continued its policy of

lation thereto. The Corporation has gradually continued its policy of building suitable commercial offices in all the prominent ocalities served by it. A new commercial office, thoroughly satisfactory in all its appointments, was opened in Montclair, on May 1st. The Perth Amboy commercial office was re-

modeled. New quarters were leased in Burlington, and

modeled. New quarters were leased in Burlington, and a site was purchased on Bergenline Avenue, corner of Fifth Street, West New York, on which it is proposed, in 1915, to erect a suitable commercial office building for the rapidly increasing North Hudson District of the Hudson Division of the Gas and Electric companies. The construction of the vast terminal and office building in Newark, projected by the Corporation more than a year ago and described at length in the last annual report, is well under way. A contract for the foundations for the building and the construction of the subway, to be connected there-with, was let during the spring of the year to the Holbrook. Cabot & Rollins Corporation, and work has proceeded rapidly thereunder. This contract is approaching com-pletion. During the summer a contract for the balance of the work, including all the superstructure, was let to the Hedden Construction Company, but all work under this contract was temporarily deferred after the breaking out of the war. It is now proposed to proceed with work on the superstructure as soon as the foundation contract is com-pleted. BUSINESS FOR THE YEAR.

## BUSINESS FOR THE YEAR.

BUSINESS FOR THE YEAR. The percentages of increase in operating revenue in the three operating subsidiary companies, and of the Corpora-tion itself, have already been referred to. The following facts, however, it is thought will be of interest. The revenue from electric sales averaged 5.71 cents per kilowatt hour, as against 5.86 cents per kilowatt hour for the pre-vious year. The total number of kilowatt hours sold com-mercially during the year was 159,044,648, being an increase of 17,108,405, or 12.05%. The sales of the Gas Company increased 686,444,653 cubic feet, a gain of 6.72%, the total being 10,907,541,440 cubic feet. Additional installations of gas and electrical appliances have been made in large numbers, and every effort has been made to encourage the demand for and utilization of these appliances for domestic and industrial purposes.

demand for and utilization of these appliances for domestic and industrial purposes. The total passengers carried by the Railway Company increased .71 of one per cent. The amount spent for acci-dents and the expenses in connection with the same was 4.27% of the passenger receipts, as against 4.15% for the year 1913. This Company received Honorable Mention in the "Safety First" contest for the Brady Medal, conducted under the auspices of The American Museum of Safety.

#### TAXES.

TAXES. The taxes paid during the year amounted to \$2,202,554 91; an increase over the previous year of \$139,573 22. In ad-dition to this, the Corporation contributed large sums to municipalities in the form of new improvements, street pavements and street paving assessments. In five years the taxes paid by the Corporation have increased approxim-ately one million dollars. The Corporation is entirely willing to meet its fair share of the public burden and to pay taxes lawfully assessed against it, but the increases in the past few years have been so large and persistent that the matter is getting to be very serious. The most recent method of raising taxes has been by means of substantial raises in the tax rates in many of the municipalities of the State. It is urged that the limit has about been reached of the ability of corporations and individuals to meet these increases, however brought about, and that the authorities of the respective municipalities should realize that no further bur-dens of this character should be put upon property under present conditions. present conditions.

# INSURANCE.

Fire insurance carried as of December 31st 1914 amounted Fire insurance carried as of December 31st 1914 amounted to \$29,009,824. This is an increase over the corresponding period of the previous year of \$800,073. The premiums for the year 1914 amounted to \$102,808 95, a decrease, as com-pared with the previous year, of \$5,426 18, and a decrease in the rate per \$100 of insurance, from 44 cents for the year 1912 and 38.3 cents for the year 1913 to 35.4 cents for the year 1014 year 1914.

#### WELFARE WORK.

The total expenditures of the Welfare Department for insurance, sick benefits and pensions during the year 1914 were as follows :

| Insurance<br>Sick benefits                       | \$19,672 85<br>27,619 89<br>21,451 51<br>11,049 59 |
|--|--|
| Total  | \$79,793 84  |
| This is an increase over the year 1913 of \$14,5 | 10 88.   |

The business of this department has been, as usual, han-dled in a humane and liberal manner, the well-being of the employees having been the moving consideration of the

Corporation. The cost of accidents arising under the Workmen's Com-pensation Act, including expenses, was \$63,033 95, divided

as follows : Total payments as required by Act\_\_\_\_\_\_\$44.200 15 Voluntary payments made in excess of requirements of the Act\_\_\_\_\_9,100 86 Expenses of the department\_\_\_\_\_\_\$732 94 \$63,033 95

or an increase of \$6,622 13 over the payments made for the same purposes in 1913.

EMPLOYEES' ASSOCIATIONS' MEETINGS.

Throughout the year the three operating companies car-ried on very useful meetings of their respective Employees' Associations, or Company Sections of the National Associa-

tions to which the various companies belong. These meet-ings are officered by the employees, and discussions of live topics are held, with highly educational results. The social and athletic work among the employees of the Railway Company was, as usual, successfully maintained.

#### PUBLIC UTILITY COMMISSION.

It is a pleasure to record that the relations of the sub-sidiary companies of the Corporation with the State Board of Public Utility Commissioners have, as heretofore, remained cordial.

#### THE GAS CASE.

On December 9th 1914 the Court of Errors and Appeals, On December 9th 1914 the Court of Errors and Appeals, after more than a year of deliberation, handed down its decision in the so-called Passaic Gas Case, which has been pending before the commission and the courts since the summer of 1911. The decision reversed the order of the State Board of Public Utility Commissioners reducing the price of gas from \$1 to 90 cents, and the judgment of the Supreme Court affirming said order, and fully sustained the contention of the Company that the order and decision of the Supreme Court were wrong, because they ignored the sub-stantive value of the franchises of the Corporation for rate-making purposes. The opinion of the Court was a learned and complete discussion of the law bearing on the case.

The case was heard by thirteen judges. The judgment was reversed by a vote of six to four, two of the judges who heard the case in the Court of Errors and Appeals having died in the meantime and the remaining judge did not participate in the decision. The decision was vigorously attacked by the counsel of the cities of Paterson and Passaic, aided by the counsel of the Public Utility Commissioners and by manu-factured clamor in the newspapers. A motion for a re-argument of the case was made by the counsel of Paterson and Passaic and of the Public Utility Commissioners and resisted by the Company. This unusual motion has, to our surprise, been granted by the Court and a re-argument of the whole case will, therefore, necessarily have to be made, involving, of course, further delay. It is expected the case will be argued at the March term of the Court of Errors and Appeals. It is difficult to see how the Court can depart from its sound decision already made. FINANCIAL STATEMENT AND STATISTICAL INFORMATION.

FINANCIAL STATEMENT AND STATISTICAL INFORMATION. I call attention to the balance sheets and statements of earnings and expenses of the Corporation and its subsidiary companies, which have been verified by the Stone & Webster Management Association, and to the usual statistical inform-ation and other statements herewith submitted.

THOMAS N. McCARTER, President.

# **BUFFALO & SUSQUEHANNA RAILROAD CORPORATION**

# FIRST ANNUAL REPORT-FOR THE YEAR ENDED DECEMBER 31 1914.

# Buffalo, N. Y., February 15 1915.

This report covers the fiscal year ending December 31 1914, the first year of the operations of this Corporation. The Buffalo & Susquehanna Railroad Corporation was organized December 30 1913 and began the operation of the Buffalo & Susquehanna Railroad on December 31 1913. The acquisition of the property followed a sale of it under the foreelosure of the mortgage securing the First Refund-ing Four Per Cent Gold Mortgage bonds of the Buffalo & Susquehanna Railroad Company; and the Buffalo & Sus-quehanna Railroad Corporation received the property owned by the old company free from any mortgage debt.

Susquehanna Railroad Company; and the Buffalo & Sus-quehanna Railroad Corporation received the property owned by the old company free from any mortgage debt. For several years the Buffalo & Susquehanna Railroad Company, the predecessor of this Corporation, had operated its railroad and had met its obligations; but on June 29 1907 there went into effect a lease covering all its physical property, assets and income, to the Buffalo & Susquehanna Railwoay Company, which had built 85.62 miles of railway from Wellsville to Blasdell, N. Y., to extend the line to Buffalo. The lessee company had incurred a very heavy mortgage debt and large equipment trust obligations at the time of taking over the property under the lease. The Railway Company found itself unable to meet its obligations, and first defaulted on its bonds, and then in the payment of the rent due for the use of the Railroad, while taking all the income from the Railroad property. This rental was needed by the Railroad Company to pay its fixed charges, and the failure to receive it resulted in a de-fault on the coupon of the Railroad bonds maturing July 1 1910. A receivership followed, under which the property was operated until delivered to the Buffalo & Susquehanna Railroad Corporation December 31 1913. The financial straits of the lessee company had prevented it from maintaining the Railroad and rolling stock in good physical condition; and during the three and a half years of the receivership it was necessary to make considerable expenditures on the properties; the work of restoring the rolling stock not being fully accomplished at the close of the receivership. The mileage of the Railroad, and of the proprietary and

rolling stock not being fully accomplished at the close of the receivership. The mileage of the Railroad, and of the proprietary and leased railroads, the income statement for 1914, the profit and loss statement and the balance sheet as of December 31 1914, and other statistical information, are shown later on in this report. During the receivership it was demonstrated what might be expected from the property, and on that experience the capitalization of the new company was based. The stock and bonds issued are as follows: S3.000.000

| Common Stock                             | \$3,000,000 |
|--|-------------|
| Preferred Stock                          | 4,000,000   |
| First Mortgage 4% Bonds                  | 6,959,000   |
| Equipment Trust Obligations, 5%, Assumed | 738,000     |

stock; during the receivership the income from investments pledged under the old mortgage was paid to the trustee under the mortgage, and did not enter the Receiver's accounts; the interest on the old bonds was not taken into account by the Receiver; the amount of bonds was \$2,551,000 less than in the previous year; and on the other hand there were no equipment trust obligation charges in that year. For these reasons no general comparison is made. The results of operations for the year, which are shown in fuller detail in the Income Statement, were as follows:

| Operating Revenues   | \$1,446,195 75                                       |
|--|--|

Income Balance to Profit and Loss \$160,365 61

Under the terms of the mortgage securing the Corporation's

<text><text><text><text><text><text><text>

charges at the rate of 4 per cent per annum on the original cost for depreciation of locomotives and cars. The depre-ciation charges included in the expenses for the year were:

for locomotives \$33,982 35, for passenger-train cars \$4,931 93, for freight-train cars \$125,971 45, and for work train equip-ment \$1,207 50; aggregating \$166,093 23 of the total of \$431,315 58 expenses for maintenance of equipment. During the year 20 locomotives received a general over-hauling and 21 were given heavy running repairs. At the close of the year 36 were in good condition, 14 in fair condi-tion, 7 in bad condition, and 5 were in the shop undergoing repairs. By reason of the age of the locomotives, it will be necessary to make expenditures for fire-boxes and boiler work during the current year of approximately \$25,000 more than in the year covered by this report. Up to the close of the year, of the total number of freight cars, 559, and also 17 cabooses, had been equipped with the safety appliances required by the Federal laws. The re-mainder of the freight cars and cabooses will have to be so equipped by July I 1916 unless there is granted a further extension of time. The cost will be approximately \$33,-484 00, and as the cost of the removal of the old appliances and the replacement in kind is chargeable to operating ex-penses under the rules of the Inter-State Commerce Com-mission, \$17,246 00 of the total cost of the safety appliances will go to swell operating expenses. The following gives in detail some of the work done on the freight-car equipment during the year:

freight-car equipment during the year:

| Flat Cars Repainted  | 28   |  |
|--|------|--|
|  | - 90 |  |
| Steel Gondola Cars Repainted   | 503  |  |
| wooden Gondola Cars Kepainted  | 81   |  |
| Cars Re-weighed and Re-stenciled1.   | .054 |  |
| Box Cars Re-roofed   | 75   |  |
| Cars in 3,000 Series, Equipped with new Center Plates                            | 112  |  |
| Cars Equipped with Safety Appliances   | 539  |  |
| Steel Gondola Cars Racked for Coke<br>Cabooses given heavy Repairs and Repainted | 50   |  |
| Cabooses given heavy Repairs and Repainted                                       | 7    |  |
| Box Cars given General Repairs   | 20   |  |
|  |      |  |

A large number of steel cars received extensive repairs. Some of the materials used in freight-car repairs were as follows:

| 6,540 33-inch Cast Wheels     | 262 Cover Plates               |
|-------------------------------|--------------------------------|
| 28,005 Pounds Steel Angles    | 210 Cast Steel Coupler Pockets |
| 39,153 Pounds Pocket Rivets   | 554 Miner Draft Castings       |
| 645 Pressed Steel Draft Sills | 9 Gusset Plates                |
| 257 Pressed Steel End Sills   | 882 Draft Sill Splices         |
| 29 Pressed Steel End Sheets   | 472 End Sill Patches           |
| 317 End Floor Sheets          | 877 Striking Plates            |
| 85 Side Sheets                | 627 Couplers                   |
| The 29 hox cars given gene    | ral repairs were also equipped |

The 29 box cars given general repairs were also equipped with new couplers, to conform to the safety appliance stand-ards. Including the 75 box cars re-roofed during the year, 113 of the box cars owned have received new roofs. The total number of cars repaired (not including minor repairs) was 27,136. Two steel underframe flat cars were built out of service-able parts of cars destroyed in the Austin flood. Three steed cars were repuilt

Three steel cars were rebuilt. One work train car was fitted up as a wreck train diner. The following work was done on the passenger-train-car

equipment: Overhauled and Repainted\_\_\_\_\_\_ Scrubbed, Varnished and Trucks Repaired\_\_\_\_\_\_

Of the 21 passenger-train cars, 13 are in good condition, 4 in fair condition, 4 in bad condition, 13 need re-varnishing and 4 need general overhauling. At the shops, two stationary boilers received new flues; four new ventilators were put over the forges in the black-smith shop; guards for the prevention of accidents were placed around the machinery and belts in the machine shop, engine room, boiler shop, blacksmith shop and planing mill; 8,436 square feet of cement floor were laid in the machine shop, replacing a wornout wooden floor; a number of new

8,436 square feet of cement floor were laid in the machine shop, replacing a wornout wooden floor; a number of new tools and appliances were built at the shops, and steam lines in and around the shop buildings were repaired. The expenditure during the year for equipping freight cars with safety appliances was \$5,479 31, of which \$2,-355 51 was charged to operating expenses and the balance to additions and betterments. Unless there shall be an extension of time it will be necessary to equip during the cur-rent year a total of about 2,000 cars with safety appliances. The larger amount of locomotive fire-box work, and of freight-car work, and the expenditures required for safety appliances will operate to increase maintenance of equipment expenses during the current year.

Treight-car work, and the expenditures required for safety appliances will operate to increase maintenance of equipment expenses during the current year. Under the plan of reorganization the Buffalo & Susque-hanna Railroad Corporation received all the cash and assets of the old company and of the Receiver that were left after carrying out the plan. A large cash balance thus came over to the Corporation, and it was deemed proper to appro-priate from that cash the sum of \$160,000 for extraordinary repairs and for certain improvements and additions needed at the time the property was acquired. Of this sum \$60,000 was for the bringing up to workable condition of some of the rolling stock received from the old company, and the bal-ance for additions and improvements the making of which had been deferred by the Receiver until after the reorganiza-tion. It was originally estimated that \$60,000 would be a sufficient sum to provide for the old equipment to bring it up to average condition for its age, but it has been found that it will take a somewhat larger expenditure. In appraising the rolling stock the necessity for expending the sum named was taken into account and added to the investment in equip-ment as the expenditures were made on it. As will be seen by the detailed statement, a total of \$109,-

As will be seen by the detailed statement, a total of \$109,-718 85 was spent for additions and betterments during the year, and property of a value of \$6,408 61 was retired.

The following statement shows in detail the expenditures for additions and betterments made during the year: Construction of Fr

| Water and Sewer Lines, Du Bois   | \$19 419 99  |

The leases of the Wellsville Coudersport & Pine Creek Railroad and Addison & Susquehanna Railroad are at nomi-nal rentals. All of their stocks and bonds are owned by the Buffalo & Susquehanna Railroad Corporation. The lease of the trackage rights over the Buffalo Roches-ter & Pittsburgh Railway is dated January 7 1905 and runs for twenty years from July 1 1906, and thereafter until terminated by two years' written notice given by either party to the other.

# COMMERCIAL EPITOME

**COMMERCIAL EPITOME** Friday Night, March 19 1915. Trade is improving much more slowly than could be wished. Exports are large through war orders. Those of wheat are smaller than recently, but sales of oats to Europe are still enormous and it is said that Italy and other European coun-tries are in the market for two million barrels of flour. Whether this is in preparation for war is of course purely conjectural. It may be a large-sized straw showing which way the wind is blowing. It is assumed that Italy's entrance into the war would point to an early peace. War orders in other industries are still large. Automobile factories are busy. Copper and other metals are higher. Silver has ad-vanced. That naturally tends to help trade with the Far East, especially as Oriental exchange is better. The pros-perity of the West, due to high prices for grain, is causing activity in sales of farm machinery. Textile industries are rather more active. Shipyards are busier than for many a year. The weather has been good for winter wheat. The country's exports of merchandise far surpass imports and our financial situation is in many respects enviable. Gold is being brought from Ottawa. The United States from a debtor nation may become a creditor nation. Yet there is of course much room for improvement. Collections are slow. Easter trade is below the normal. The coal trade is dull. Railroad traffic is still unsatisfactory, though larger in the Southwest. Europe is selling American bonds; stocks have been irregular and at times weaker. The British em-bargo, it is said, will elicit a sharp remonstrance from the United States Government, which has also protested against some of the demands of Japan upon China as prejudicial to American interests. The progress of the Allied fleets in

United States Government, which has also protested against some of the demands of Japan upon China as prejudicial to American interests. The progress of the Allied fleets in the Dardanelles is slow, something which tends to prolong the war. Yet the feeling in this country, is not unhopeful. LARD has been rather firmer; prime Western 10.50c.; refined for the Continent 11.15c. South America 11.35c.; Brazil 12.35c. Lard futures were at one time easier and the rallied, only to become weaker again under the pressure of selling by packers. Hogs declined for a time, with big re-ceipts, but then became stronger as arrivals decreased. Shorts have shown some disposition to cover. To-day prices de-clined on heavy selling, partly on stop loss orders in some provisions. provisions

10.25@11.25c. Naphtha, 73 to 76 degrees, in 100-gallon drums, 23½c.; drums \$8 50 extra. Gasoline, 89 degrees, 26c.; 74 to 76 degrees, 24c.; 67 to 70 degrees, 22c. Crude prices are lower. Shreveport advices state that field work in northern Louisiana is quiet, but that many of the wells recently started are nearing the sand and should result in some interesting extensions of the field within a compara-tively short time. Prices were as follows tively short time. Prices were as follows :

foreign country, has not been enforced, and is not to be put into effect." COPPER has advanced; foreign demand better. In London prices have also been noticeably higher. Exports from this country have been increasing; Lake 15 to 15½;c; electrolytic 14½;c. Tin has been scarce and higher at New York, London and the Straits. Here, on the spot, it has latterly been 53c. Lead has advanced to 4.10c., on a better demand, and higher prices in London. Spelter has been quiet but firmer at 9¾;c. to 10c. Iron and steel trade is expanding. Heavy sales have been made of semi-finished steel. The war is calling for larger quantities. European governments seem to be buying for months ahead. The French Government has latterly bought in this country 8,000 tons of girder rails, 6,000 tons of 16-pound portable track and 6,000 tons of steel ties. Considerable export business has been done in barb wire. There is one order in negotiation for 36,000 tons for shrapnel steel. Sales of machine tools, particularly lathes and also turning machines, have been so liberal to Europe that the mills have been and will be very busy. Bar mills are having a better trade. Wire mills have advanced prices \$2 a ton on galvanized products. Tin plate is up to \$3 75 per base box. Sheets are irregular. The scale of mill operations, taking the steel trade as a whole, is considered encouraging. For the whole industry, however, it is still only about 60%, though in one case recently it reached 69%. No. 2 Eastern Foundry iron \$13 50 to \$13 75. No. 2 Southern Birmingham \$9 25 to \$9 50, with a moderate trade.

# COTTON

IFriday Night, March 19 1915. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 227,227 bales, against 216,199 bales last week making the total receipts since Aug. 1 1914 8,536,588 bales, against 9,387,238 bales for the same period of 1913-14, showing a de-crease since Aug. 1 1914 of 850,650 bales.

Prices have advanced. The rise was largely due to heavy buying by Liverpool and the strength of that market. Of late the spot sales in Liverpool have been 10,000 to 14,000 bales a day. France, Russia and even Italy are reported to have been good buyers in the English market. Certain large American spot interests have also been buying there. Latterly there has been some hint of a modification of the British embargo on cotton and other shipments. A Washington dispatch says that these modifications determined upon by Great Britain would give safe passage to cotton for which contracts of sale had been made before March 2, as well as for cotton for which freight engagements had been made before that date. This is really nothing new, but as near as can be made out England has shifted the prescribed sailing date from this side from March 16 to March 31. Exports at times have been liberal, at others they have sagged. Freights and war risks have been high, insurance rates being nearly double what they were recently to French and English ports, the rates now being 2½ to 3½%. At the same time Manchester's export trade has been improving under the spur of higher exchange rates and an advance in the price of silver. The Census Bureau's statement of the American consumption in February was considered favorable. The consumption in Furope is believed to be on a large scale. Gun cotton is very largely used in the manufacture of smokeless powder; linters are generally preferred. But aside from this there is a very large consumption in the shape of uniforms, tents, tarpaulins, &c. Moreover, the reports from the South are persistent that there will be a material reduction in the acreage. It is insisted that the decrease in Texas will be something like 20 to 25%. The acreage sown to oats in parti

plant the usual acreage. There has been quite a systematic campaign at the South in favor of diversification of crops and there is a feeling that in the end it may amount to something. tExports have got well beyond the 6,000,000-bale mark and the gap between the total thus far this year and that of last year is thus being steadily reduced. Spot markets at the South have been generally firm or advancing. Political news from Europe has been in the main considered bullish, even if the Allies are apparently not making as rapid progress in forcing the Dardanelles as was at one time supposed. The Italian news has suggested a possible entrance into the war by Italy on the side of the Allies. On Thursday there was a rumor that all Germans and Austrians had been ordered to leave Italy. Relations between Austria and Italy have, apparently, been strained on the question of the Italian demand for cession of certain territory. It is assumed that Italy's entrance into the war plant the usual acreage. There has been quite a systematic between Austria and Italy have, apparently, been strained on the question of the Italian demand for cession of certain territory. It is assumed that Italy's entrance into the war would mean its early ending. As New York cannot sell in Liverpool unless Liverpool accepts United States standard of grades, contracts in Liverpool have been comparatively scarce. That has also been the case in New York. The general judgement is that the present New York contract is not a thing to trifle with. Selling it is more hazardous than was the case under the old contract. The new one, as everybody knows, is far more exacting. A man thinks twice nowadays before he sells it. He may be held to strict accountability. Large spot interests have latterly bought May here to some extent, if they sold October. New high records have been reached on the advance here for this movement. On the other hand, doubt is cast in some quarters on the idea that the South is really going to cut down its acreage much, especially if prices keep about where they are and still less if they should advance materially. High rates of marine insurance, and the fact that the U.S. Governrates of marine insurance, and the fact that the U.S. Governrates of marine insurance, and the fact that the U.S. Govern-ment has to all appearances suspended the writing of war risks to German ports, are factors which have been by no means disregarded. German houses have been selling here to some extent. Whether this was on European orders or simply hedging against Southern holdings is problematical. But in any case it is known that the Continent, including Austria, has been a seller here at times on quite a liberal scale. Meantime stocks are large and the American con-sumption is not as great as was predicted at the beginning scale. Meantime stocks are large and the American con-sumption is not as great as was predicted at the beginning of the war. Linters produced or to be produced this season, according to the Census Bureau, amount to 772,270 bales— the largest on record—against 631,153 bales last season and 602,324 bales two years ago. To-morrow the final ginning report will appear, comparing with 13,982,000 bales last big crop year of 1911-12. To-day prices declined slightly. Some think to-morrow's ginning report will cause an increase in crop estimates. Also the South sold a little more freely, partly against cotton. Spot markets declined. But there was no great pressure to sell, and Liverpool and Wall Street bought. Spinners' takings were liberal. Spot cotton closed at 8.95c. for middling uplands, showing an advance for the week of 15 points.

week of 15 points. The following averages of the differences between grades, as figured from the March 18 quotations of the nine markets, designated by the Secretary of Agriculture, are the differences established for deliveries in the New York market on March 25.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Foreign stocks, as well as the afloat, are this week's returns, and consequently all foreign figures are brought down to Thursday evening. But to make the total the complete figures for to-night (Friday), we add the item of exports from the United States, including in it the exports of Friday only.

corresponding period of the previous year—is set out in detail below.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE AUG. 1.—We give below a statement showing the overland movement for the week and since Aug. 1, as made up from telegraphic reports Friday night. The results for the week and since Aug. 1 in the last two years are as follows:

| 1   | 914-15   |   | 13-14   |
|---|--|---|---|
| March 19—         Week           Shipped—         Week           Via St. Louis         20,37           Via Cairo         7,57           Via Rock Island         57           Via Louisville         3,91           Via Cincinnati         3,26           Via Virginia points         1,37           Via other routes, &c         4,21 | $\begin{array}{cccccccccccccccccccccccccccccccccccc$ | Week.<br>11,888<br>9,406<br>157<br>3,755<br>3,591<br>1,046<br>3,764 | $\begin{array}{c} Aug. \ 1. \\ 439,836 \\ 327,846 \\ 57,22 \\ 99,746 \end{array}$ |
| Total gross overland  | 7 1,338,748  | 33,607  | 1,436,574   |
| Deduct Shipments—<br>Overland to N. Y., Boston, &c 5,02<br>Between interior towns 1,76<br>Inland, &c., from South 1,87  | 2 136,978  | $1,136 \\ 5,042 \\ 4,742$   | 115,983   |
| Total to be deducted 8,66   | 2 359,445  | 10,920  | 318,664   |
| Leaving total net overland*32,63  | 5 979,303  | 22,687  | 1,117,910   |

\* Including movement by rail to Canada.

The foregoing shows the week's net overland movement has been 32,635 bales, against 22,687 bales for the week last year, and that for the season to date the aggregate net overland exhibits a decrease from a year ago of 138,667 bales.

|  | 14-15   |                                      | 13-14                |

# BREADSTUFFS

<text><section-header><text><text><text>

[Vol. 100.

plains of drought. Russian merchants express doubt as to whether the Dardanelles will soon be open. Some dispatches say that the fleet alone is not enough. Besides the supplies at Russian ports are said to be light. Indian advices state that the weather is bad in harvesting districts and dry else-where. The Punjab needs rain badly. New York has latterly been buying cash wheat at Minneapolis and has been bidding 12 cents over Chicago May at Omaha for wheat free on f. o. b. at Newport News. The crop move-ment has been decreasing. There is increasing difficulty in getting cash wheat. East Indian offerings in Liverpool are light. The progress of the Allied fleet in the Dardanelles is described as disappointingly slow. Export business in wheat and flour makes no bad showing. In five days stocks at Minneapolis decreased 1,160,000 bushels. Cash handlers say they are unable to buy wheat in Minneapolis. Traders, however, have sold on the idea that Europe is now less urgent-ly in need of American wheat and also on the approach of the new-crop season in this country and Europe. To-day prices advanced at first then receded sharply on liquidation. Chicago dispatches said that there was good authority for saying that Italy is inquiring for over 2,000,000 barrels of low-grade flour. If that is so it would look to some like a warlike item. Stocks at most points in this country are rapidly decreasing. At Duluth ice-breakers are at work to get grain boats to ele-vators in order to load for shipment at the opening of navi-gation. DALLY CLOSING PRICES OF WHEAT FUTURES IN NEW YORK. Russian merchants express doubt as to plains of drought. gation.

# THE DRY GOODS TRADE.

**THE DRY GOODS TRADE.** New York, Friday Night, March 19 1915. There have been no important developments in the dry goods markets during the past week. In most departments prices are strong and the volume of sales is increasing. Favorable weather and the approach of spring are having a good effect upon sentiment, and the movement of seasonable goods is reported by most concerns to be satisfactory. Both pobbers and commission houses report a steady improvement in conditions. Buyers are still cautious in placing business, but upon finding prices firm, with no prospect of recessions for more distant deliveries, they enter the market with sub-stantial orders. The critical situation in the market for dyes is beginning to absorb the attention of all handlers of colored goods. The seriousness of the situation has been fully realized by manufacturers for some time—that is, so far as the difficulty of securing adequate supplies is con-cerned; but now conditions are further aggravated by the complaints which manufacturers are receiving concerning the poor quality of dyes used in coloring goods now being shipped. It is feared that there will be heavy cancellations of the remainder of orders if the trouble cannot be remedied. The complaints so far have been confined largely to woolen and worsted dress goods. Consumers state that recent ship-many cases the materials are so badly streaked and unevenly shaded that they cannot be used. Manufacturers and dyers ments of these have been of inferior coloring and that in many cases the materials are so badly streaked and unevenly shaded that they cannot be used. Manufacturers and dyers, when questioned, say that they cannot secure sufficient dyes of the same quality and from the same source to provide for a complete line of goods which they happen to be turning out in any one shade or design. This is also leading buyers to suspect that even where goods appear to be all right, the colors may weaken and fade after exposure to wear. Export business is showing some improvement, although conditions in the shipping business—that is, lack of freight room and high rates demanded for transportation—preclude the possi-bility of any very rapid improvement. Red Sea buyers are reported to have placed more orders for coarse sheetings. It is stated, however, that this business has been done on credits running sixty days, whereas all business with Red Sea meris stated, however, that this business has been done on credits running sixty days, whereas all business with Red Sea mer-chants heretofore has been upon a strictly cash basis. This course on the part of certain houses is not generally approved, as it is feared that it will establish a new precedent. In other quarters business is quiet, except for a steady but light demand from South American merchants. DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending March 13 were 10,244 packages, valued at \$599,782, their destination being to the points specified in the table below:

asking prices. Cotton dress and supplies are being rapidly ave been advanced an eighth

fabrics are in active request and supplies are being rapidly used up. Fancy ginghams have been advanced an eighth to a quarter cent in some instances, and several lines have been withdrawn from the market, owing to the scarcity of dyes. The same is true of denims, upon which advances are expected to be named any day. The fact that these goods are being withdrawn from the market or sold subject to the ability of mills to make deliveries when due is causing a rush to place orders. Gray goods, 38-inch standard, are quoted at 4c. WOOLEN GOODS.—Except for the unsettlement to the manufacturing end from the scarcity of wool and dye-stuffs, conditions in the woolen and worsted trade are very satisfac-tory. Fall bookings are well up to expectations, while late calls for spring and summer goods are numerous. With jobbers and retailers business has improved greatly during the past week or ten days, the fine weather having stimulated buying. In dress goods, gabardines are leading in popu-larity, with poplins and voiles close seconds. The early demand for covert cloths has almost completely disappeared. Silk-wool mixtures are also popular. Woolens continue to sell better than worsteds in the men's wear departments. Men's wear for fall is likely to be advanced to higher levels, as bookings are now so heavy that manufacturers are afraid to accept more at current levels in view of the uncertain raw material outlook. FOREIGN DRY GOODS.—Linens are quiet, business being depressed by the high level of prices.

material outlook. FOREIGN DRY GOODS.—Linens are quiet, business being depressed by the high level of prices. Numerous sub-stitutes are making their appearance in the market, and while some are being well received, others which are almost pure cotton are being passed over by buyers. Many importers and distributing houses heretofore doing a large business in linens are now compelled to turn their attention to other goods to offset the loss of business in linens. Advices from abroad give little hope of any improvement in conditions while the war lasts. There are still large supplies of linens held in bond here, but these will not last long at the rate new shipments are arriving. While lightweight burlaps have ruled quiet, a more active demand has developed for heavy-weights, with good sales reported. Lightweights are quoted at 5.25c. and heavyweights firm at 5.75c. Importations & Warehouse Withdrawals of Dry Goods.

Importations & Warehouse Withdrawals of Dry Goods. The importations and warehouse withdrawals of dry goods at this port for the week ending Mch. 13 1915 and since Jan. 1 1915, and for the corresponding periods of last year, were as follows:

# STATE AND CITY DEPARTMENT.

#### News Items.

News Items. Allegheny County (P. O. Pittsburgh), Pa.—Tunnel Project Approved.—On March 15 Judges Ambrose B. Reid and Joseph M. Swearingen of the Allegheny County Court of Common Pleas dismissed the exceptions to the re-port of the grand jury approving a projected tunnel through Mt. Washington. According to the Pittsburgh "Gazette," this tunnel, called the Neeld tube, because the plans were drawn by Engineer A. D. Neeld, is designed to pierce Mt. Washington at a point on East Carson St., at the intersec-tion of South Third St., and to extend in a general south-westerly direction to a point in Warrington Ave., near the Pittsburgh Railways Company's car barn. The length of the tunnel and its approach would be 5,650 feet and the length of the tunnel itself 4,875 feet. The estimated cost of the tunnel and the approach is \$1,927,854. County Comptroller Robert J. Cunningham has announced that he is in favor of immediately issuing \$1,000,000 bonds to start the project, that is, as soon as it becomes certain that the contestants will not appeal.

Arizona.—Legislature Adjourns.—The second State Legislature of Arizona adjourned March 11.

Arkansas.—Legislature Adjourns.—The Legislature of this State adjourned March 11.

**Crook County, Ore.**—County Division Upheld.—In an opinion by Justice McBride, the Supreme Court Mar. 2 held that the election in Crook County last November, at which the County of Jefferson was created, was legal (V. 99, p. 1471).

1471).
According to the Portland "Oregonian," A. D. Russell attacked the validity of the election on the grounds that the formation of Deschutes County was also voted upon at the election, and that the County Judge was absent during the first two days of the term of court and its order for the election was not legal. He contended that an Act passed in 1913 was void and that proposals for the creation of two counties could not be voted upon at the same election. Justice McBride said in part:
The is contended that the words providing that two commissioners may be elected to sit with the County Judge whils transacting county business in his absence. This, in our opinion, is giving too narrow and technical a meaning to the word 'sit,' and, in effect, limiting it to the mere physical presence of the two commissioners upon the bench. He would be jupiter and they but satellites, and even less, because they would not be authorized even to give light—their function would be to 'sit.' Unless they are to have equal authority wide should sit with two to opinion is giving in matters previating to their functions, the framers of the constitution might as well have provided that the County Judge should sit with two joints of stovepipe. We are of the opinion that the word 'sit' as here used means to hold court, to preside, or to do any act of a judicial nature.''
Delaware.—Legislature Adjourns.—The 95th session of

We are of the opinion that the word "sit as what word joints of both court, to preside, or to do any act of a judicial nature." Delaware.—Legislature Adjourns.—The 95th session of the Delaware General Assembly ended March 16. Edentown Graded School District (P. O. Edentown), Chowan County, No. Caro.—Bonds Valid.—The \$25,000 farm-life and high-school-building bonds sold last March (V. 98, p. 780) were declared valid by the Supreme Court of North Carolina on March 3. The bonds were authorized by Chapter 479, Public Local Laws 1913, and election thereunder duly held and carried. The validity of the bonds was at-tacked on the ground that Section 7 of the Act provided that County Commissioners provide annually by taxation or otherwise \$2,500 for the maintenance of the school. Chief Justice Clark, according to the Raleigh "News and Observer." States: "But there is nothing in the necessary expenses thereof unless by a vote of a majority of the qualified voters therein," and it has been held that the maintenance of schools is not a 'necessary expense' the conductive the validity of the bonds the validity of the maintenance. \* "The validity of the bonds for the school. It is strue is nothing in this Act which makes the validity of the election, and the bonds issued thereunder, dependent upon the validity of the appropriation by the county commissioners for its maintenance. \* "The validity of the bonds for the escient and the as been held huildings is in nowise dependent upon the source from which the mainte-mance schol of size 500 from the State Treasure for main-tenance, conditioned upon the appropriation of \$2,500 from the county. Maintenance, and the oppropriation of \$2,500 from the county. They all come." It was also contended that the bonds were void because another section provided for an appropriation of \$2,500 from the State Treasure for main-tenance, conditioned upon the appropriation of \$2,500 from State Treasure for main-tenance, conditioned upon the appropriation of \$2,500 from the county. and alleged t

Art. V. Section 4, of the constitution, must be summarized to a state of the people. Chief Justice Clark states: "It does not now occur to us that there is any distinction between the validity of such appropriation and many similar appropriations, such as to the Jackson Training School, the Cullowhee High School and others. But if this provision were invalid, it in nowise affects the validity of the bond issue." He states further that the Court had previously held that such Acts are not unconstitutional because they admit children from other parts of the State upon payment of tuition, &c. The state of the state o

not unconstitutional because they admit children from other parts of the State upon payment of tuition, &c. Elmwood Place, Ohio.—Decision.—According to the Cincinnati "Enquirer," the Hamilton County Court of Ap-peals and not the Muskingum County Court of App-peals and not the Supreme Court decided March 10, when it affirmed the judgment of the Hamilton County Court in the case of Fred. Schanzle, a taxpayer, versus the Village of Elmwood Place. Under the amended constitution, when two Appellate Courts render divergent opinions it becomes the duty of the dissenting Court to certify its judgment to the Supreme Court, which authoritatively declares the law. In this instance the dissenter was sustained. The Court of Appeals of Hamilton County denied Schanzle's petition for an injunction to restrain the issuance of \$10,000 of refunding bonds on the ground that they were not advertised as set out in the law in two newspapers of opposite polities. There is but one newspaper in the village, and the decision seems to uphold the contention that the insertion under the cir-cumstances was sufficient. Mississippi.—Official Yote on Constitutional Amendments.

Mississippi.-Official Vote on Constitutional Amendments. The following is the official count of the vote cast Nov. 3

on the nine proposed constitutional amendments submitted on that day (V. 99, p. 1312): Requiring the Judges of the Supreme Court to be elected by the people— 23,161 'for," 3,364 "against."
Fixing the term of office of the Judges of the Supreme Court—21,255 ''for," 8,639 ''against."
Proposing an amendment to the constitution by eliminating therefrom Section 151—20,903 'for," 8,346 ''against."
An amendment to the constitution by eliminating therefrom that 'Where eliher party shall desire, the Supreme Court, for the trial of any cause, shall be composed of three Judges. No judgment or decree shall be affirmed by disgreement of two Judges constituting a quorum''. -20,508 'for," 8,725 ''against."
Providing that the Supreme Court may sit for trial of causes in two divisions the venicle of the judges on the verdict and return it as the verdict of the judge 20,110 ''for," 9,711 ''against."
Providing for initiative and referendum—19,113 ''for," 8,718 ''against."
The total votes cast in the election was 39,945, and the

The total votes cast in the election was 39,945, and the amendments, in order to carry, had to receive a majority of this vote. Thus, it will be seen, all but the last two amendments were adopted.

New York State.—*Time and Place of Meeting of Consti-tutional Convention.*—On March 17 Governor Whitman signed the bill fixing the time and place for the meeting of the constitutional convention at noon, April 6, in the Assembly chamber, and making provision for the payment of the ex-penses of the delegates and the cost of preliminary printing.

Proposed Legislation Concerning Taxation of Secured Debts. —A bill has been introduced by Assemblyman Landon pro-viding, it is said, for the levying of an annual four-mill tax on intangible securities, including the securities now taxed under the secured debt law, bonds secured by mortgages, the property of which is partly within and partly without the State, bonds of other States and municipalities, and stocks of foreign corporations

The bill, it is understood, repeals the present secured debts tax law, but provides that payments made under it shall be considered the equivalent of one year's payment under the new law

Another measure having to do with the taxation of secured debts is known as the "Boylan" bill, introduced by Senator Boylan on Feb. 25. The Boylan bill proposes, it is stated, not only to repeal the secured debts law and provide a per annum tax on securities, but also contains this language: "The payment of a tax on a secured debt heretofore made pur-suant to this article shall exempt such debt from taxation as provided by this section only for the period of one year from date of such payment, and such debt shall, after the expiration of such period, be subject to taxation. This latter measure was to have had a joint hearing on March 16 before the Senate and Assembly committees. This hearing, however, was postponed, Senator Boylan explaining that he had received a request for adjournment from New York City. There was a question in the minds of some, he said, that the bill as drawn might be retroactive, which was not his pur-pose, and when the bill had been amended to correct this defect, another hearing day would be set, probably next week. week.

Bonds Listed.—The \$27,000,000 41/4% canal and highway bonds, the sale of which was reported in these columns last week, page 922, were admitted to the list of the New York Stock Exchange on March 18.

North Carolina.—Legislature Adjourns.—The 1914 session of the Legislature ended March 9.

**Pennsylvania**.—*Equal Suffrage*.—By a vote of 37 to 11, the State Senate on March 15 passed the joint resolution proposing a constitutional amendment granting the right of suffrage to women. The measure was passed in the House several weeks ago, and, having been adopted by the Legisla-ture in 1913, will be submitted to the people next November.

San Francisco, Cal.—Special Election on Purchase of Spring Valley Water Co.—We stated in the "Chronicle" of Feb. 6, page 491, that a special election would be held April 27 on the question of purchasing certain properties of the Spring Valley Water Co. The date upon which this election will be held has now been changed to April 20.

Utah.—Legislature Adjourns.—The Utah Legislature adjourned sine die Friday night (March 12).

**Virginia.**—Special Session of Legislature Ends.—The special session of the Legislature called for the purpose of revising the tax code of the State was brought to a close March 13. The last of the measures pertaining to taxation passed by the General Assembly were sent to Gov. Stuart for his signature March 12. To give the Governor ample time to examine the bills the two branches voted an exten-

time to examine the bills the two branches voted an exten-sion of the special session six days. For those six days the Legislature remained in constructive session. The Richmond "Dispatch" says in part: "Matters of legislation of general interest disposed of finally on the day of adjournment included the defeat of the Torrens land registry bill in the Senate, after it had passed the House by an overwhelming majority. Of great interest to bankers and financiers was the passage of the bank bill, which fixes the State tax on bank stock at 35 cents, while giving to the localities authority to levy a tax not exceeding \$1 15. This means a reduction of the maximum tax prescribed in the original bank bil from \$165 to \$1 50. "Another measure of wide public interest was the public service cor-poration franchise tax. The House agreed to the conference committee's of railroad and steamboat corporations at 114 %, a compromise on the Stearnes amendment, which called for a tax of 114 %."

Washington.-Legislature Adjourns.-The 1914 session of the Washington Legislature ended March 11.

Wyoming.—Legislature Adjourns.—The thirteenth Wyom-ing Legislature adjourned at 10 a.m. Sunday (Feb. 23).

Huntsville Bk. & Tr. Co.\_ 85,350 00 [A. J. Hood & Co., Detroit 83,812 00 \* These bids appear to be higher than that of the purchaser's, but are so given by the Judge of Probate. **MADISON COUNTY (P. O. Jackson), Tenn.**—BONDS AUTHOR-IZED.—On March 15 the County Court authorized, it is stated, the issu-ance of \$100,000 5% 1-12-year (ser.). funding bonds. **MALHEUR COUNTY (P. O. Vale), Ore.**—BOND SALE.—On March 5 \$30.000 Snake River Bridge bonds were awarded, it is stated, to Hall & Lewis of Portland for \$31,910, equal to 106.366. It appears, however, that there is some difficulty over the delivery of the bonds. We quote in part below the Boise "Idaho Statesman": "Keeler Brothers of Denver entered into a contract with the County Court last fall to prepare the bonds and attend to all the legal work for the sum of \$750. They also agreed to bid par value for the bonds when they were sold. Early last month the Denver company asked the county offi-cials to sign and execute the bonds, so its attorneys could inspect the signa-tures and pass on them. The Denver company agreed to place the bonds

in the First National Bank of Denver at the disposal of the Malheur County Court, after the examination had been made. The Court delivered the bonds to the company with this understanding. March 5, when the bonds were sold, Hall & Lewis, bond brokers of Portland, appeared and bid \$1,910 above par for the bonds. Keeler Brothers placed their bid of par as was agreed. But the Court accepted the bid of the Portland firm, and then wired the Denver bank to deliver the bonds to the purchasers. The Den-ver bank wired back that they knew nothing of the bonds. Judge G. E. Davis of Vale went to Denver last week to trace the bonds. He has wired back that the Denver firm claims to have already sold the bonds, and refuse to deliver to the county. He is expected to return home this evening, and within a few days legal steps will be taken to gain possession of the bonds. In the meantime, the money bid by the Portland firm is in a Vale bank awaiting to be turned over to the county when the bonds are delivered. The Portland firm has agreed to wait until April 1 for the transaction to be closed up.

International and the spectral water and support to be presented for the declassed up.
