# THE FINANCIAL SITUATION.

It is time to call a halt on the performances that are now being witnessed on the Stock Exchange. The speculation there being carried on is of the most daring and reckless kind and unless quickly brought within proper bounds must sooner or later end in disaster. The great inflation of values that is taking place has as its assumed basis absolutely nothing except the expectation of large profits to be derived from the execution of war orders, chiefly ammunition supplies and the like. Such business is obviously of the most hazardous kind, and additional reason for caution exists in the fact that the bulk of the orders are going, not to concerns regularly engaged in that class of work and therefore familiar with its nature, but to outside concerns who have never previously been engaged in anything of that sort and who are now turning from their ordinary business to this new line because of the prospect of large profits which it offers.

Such is the demand for materials of war that the fighting nations of Europe are ready to place orders with almost any one who is willing to take them. On the other hand, general industrial activity, except where stimulated by these war orders, is at a low ebb and leaves manufacturing capacity to a considerable extent unemployed, thus encouraging entry into this new field of work. As a consequence, we see locomotive concerns turning to the manufacture of shells and typewriting plants being employed in the making of fuses, with other similar departures from the normal. The unusual and extraordinary nature of the situation is revealed in no more striking way than by this fact, namely that many important concerns are relegating their ordinary, legitimate work to an inferior place because it no longer offers the opportunity of full employment and adequate profit, and are taking up with avidity the more alluring business of making munitions of war.

Whether the gigantic conflict in Europe continues for another year or two or is brought to a sudden termination, the war-order business will in any event be of comparatively short duration. There may be large immediate profits (waiving altogether the question of risks), but these large profits cannot in any event last very long, and the permanent value of the stocks of companies enjoying such profits must in the end depend entirely upon the course of their ordinary legitimate business-the business upon which their energies were concentrated before the war broke out and upon which they will again have to be concentrated after the war closes. But the prospect of these large profits, albeit of a very risky nature, is being dangled before the eyes of the public and a gigantic speculation is being carried on, evidently by powerful cliques, with the view to utilizing this situation and the known gullibility of the ordinary citizen for the purpose of enriching the members of these cliques. With this idea in mind, prices are being boosted to absurd levels, in the belief, which is not likely to prove far wrong, that the public, deliberately but unknowingly deceived, will accept the high price levels as entirely justified and buy with avidity when the manipulators are prepared permanently to unload.

The reprehensible character of the proceeding is too patent to need urging. Nothing is more certain or more inevitable than that in the end the guileless outsider will suffer serious losses and the whole artificial structure of inflated price levels will collapse. This means, in plain language, that the public as well as some of the habitues of the Exchange will be fleeced. Similar schemes have been worked in the past, but never has the transparent character of the undertaking been so manifest as on the present occasion. It is the duty of all who are in position to influence popular sentiment, or who have access to the popular thought, to warn the innocent public against allowing themselves to become the prey of the designing band of manipulators. If past experience is any guide, the public will refuse to heed the warning, and will madly rush in as new high levels are established from day to day and from hour to hour.

There is necessarily more or less mystery connected with the prospects of large profits from the war business and for the time being mystery is a more potent weapon in the hands of the manipulators than absolute assurance would be of a definitely established income in an ordinary way. Within the last year and a half Bethlehem Steel common has risen from 29½ to 275 and General Motors common from 373% to 189½ and the great majority of those who allow themselves to be drawn into the speculative maelstrom on the Exchange entertain the notion that these performances are likely to be repeated in the case of other stocks that are being sent skyward from day to day on exaggerated accounts of benefits to be derived from war orders.

The fact that in any given case prices have been whirled up 25 or 50 or even 100 points does not matter with these deluded people, for no matter how high the level, they see visions of a still higher level, and the manipulators in their turn keep up the ballooning tactics day after day. Trading upon public credulity, prices are all the time being projected to still dizzier heights. Those directing the movement know that in no other way is there greater probability of success than by thus fooling the outsider into believing that there is to be no limit to the upward movement of prices.

But should not an effort be made to balk the schemes of those who are so industriously at work preparing to fleece the unsuspecting outside public even though the public is itself to blame for so blindly allowing itself to be misled? Should not this outside public be protected as far as possible against the results of its own folly? Has not the Stock Exchange a duty in the premises which it should not neglect to perform? It will at once be answered that it would be difficult for the Exchange to interfere and it must be admitted it undoubtedly will. Nevertheless, we are inclined to agree with the statement contained in an editorial article in the New York "Times" on Thursday as follows: "If the Stock Exchange really wished to stop the dangerous gambling in war stocks, it could do so. Its power is autocratic; the importance of its being so, in order that the Exchange may be perfectly free to deal with every situation on its merits, has been the strongest argument against incorporation."

We do not go so far as to assert that the Exchange should declare a stock "cornered" simply because it has had a tremendous rise and is now apparently in limited supply, nor obviously would anyone who has given the subject serious consideration, urge that the Stock Exchange should act the part of censor on dealings or undertake to set a limit as to how far prices shall advance, nor yet undertake to regulate the extent of the dealings from day to day.

There is one thing, however, it seems to us the Exchange might do, and that is to investigate and scrutinize the transactions with great rigidity from day to day for the purpose of determining how far the enormous dealings in the stocks which have been whirled up with such great celerity consist of normal, legitimate transactions, and how far they are wholly manipulative in character. It is conceivable that where a stock has been heavily oversold some scare on the part of the shorts might cause a large influx of buying orders all of a sudden to cover outstanding short commitments. But the huge business being done in some of these war stocks is not of that character. It is not uncommon to find the share transactions in any given stock for a single day aggregating one-half the share capital and even more in special cases. This, of course, is unnatural and illegitimate. If there were confident investment buying or even confident speculative buying, the aggregate of transactions might reach heavy totals on any given day, but the movement would hardly keep up to the same volume day after day. And yet that is now the record.

It needs no great powers of discernment to perceive from a study of the official Stock Exchange sheet that powerful cliques are using the facilities of the Exchange with the deliberate purpose of bringing about a tremendous advance in prices. The purchasing orders may emanate from a hundred different sources, but there is every indication of concert of action or movement and of a directing mind or minds, all operating to the same end, behind the movement. The movement itself, as already indicated, is dangerous, and its inevitable effect will be to cause serious losses to a lot of innocent though not blameless outsiders, who will then turn around and denounce the Exchange for having tolerated such practices.

The Stock Exchange would be justified, therefore, in applying correctional methods. Let it proceed to ferret out the persons engaged in these nefarious schemes, some of whom are evidently financially powerful, and let it devote its energies to eliminating for the future such transactions as reflect discredit on the Exchange. Two years ago (in January 1913), when certain speculative movements in American Can invited sharp criticism, and were looked upon as manipulative in character, the Stock Exchange made an investigation and the next month declared the transactions free from manipulative taint. As evidence of the apparently spontaneous character of the movement, the then President of the Exchange pointed to the fact that on Jan. 30 1913 of 366 firms doing an active business on the Exchange, 222 had transactions in American Can and on Jan. 31 of 408 firms, 251 had transactions. On the present occasion the investigation would have to go deeper than this. Every order would have to be traced to its source.

We have no personal knowledge of manipulation, but that there is palpable manipulation is evident from the dealings. There are the widest kind of fluctuations, and yet the market is being kept under perfect control for the time being, though of course no one knows when this control may be released and the inevitable collapse precipitated. In not a few instances, there is reason to believe the outsider is being milked both up and down. Many Stock Exchange houses are doubtless unwitting tools in the hands of the manipulators.

The Stock Exchange has ample power to trace the business back to is source, for it has full authority to while throwing a great weight of men and guns to

319

examine the books of all its members. The examination, however, should not be superficial. It must be thoroughgoing. The Stock Exchange authorities must proceed as the District Attorney would in ferreting out crime. And after the offending parties have been discovered, further dealings with them or for them must be prohibited.

Would not the Stock Exchange gain in general estimation if it adopted such a course, would not the effect be to strengthen confidence in the integrity of financial methods on Wall Street, and would not all talk of compelling the Exchange to incorporate disappear and would not at the same time the Exchange render a great service in preventing the persons whose operations have always been a disgrace to it from ensnaring any more victims? It is certainly high time that the Exchange should take steps to protect its good name and bring to an end the speculative debauch now prevailing there.

The official list of casualties in the British army and navy as announced by Premier Asquith shows an aggregate of 330,995 officers and men. The naval casualties are given up to July 20 and amount to 9,106 while the military losses to July 18 were 321,889. The military losses include 3,288 officers and 48,372 men killed in France, 506 officers and 7,567 men (including naval division) in the Dardanelles and 145 officers and 1,445 men in other theatres of operation excluding Southwest Africa. Of the total casualties, including killed, wounded and missing, there have been 11,254 officers and 255,649 men in France, 2,144 officers and 47,094 men in the Dardanelles and 415 officers and 5,333 men in other theatres of the war. Great Britain is the only one of the Powers engaged in the war which has announced from time to time its total casualties. Germany has issued at home full lists by name of all men killed, wounded or missing, but the Government has given out no official total.

Latest advices from the Eastern frontier of the war by way of London state that Warsaw, the third city of Russia and the goal for which the German armies in the East have been striving since last October, is about to be evacuated by the Russians. Germans in overwhelming numbers are at the gates of the Polish capital and dispatches both from the city itself and Petrograd say that further resistance would be unwise. The problem has become one of moving the Russian armies intact, threatened as they are from the South by the Austro-Germans and more seriously from the North where the German forces which have swept through Poland are aiming at the railway from Warsaw to Petrograd. This latter menace the London press admits is imminent and the hope of the allied countries now is not for the safety of Warsaw but for the continued cohesion of the Russian army. Presumably the Russian troops have for some time been stripping the city of everything of military value. The populace of the city have been warned to remain calm. With Warsaw captured (quoting press accounts from London) whether or not it proves a conquest of lasting strategic advantage, a great wave of enthusiasm will sweep over Germany and Austria-Hungary; it is predicted in London that the armies of the central powers will then seek to force a period of trench warfare in the East, meanthe West with the idea of resuming the battering towards Calais and perhaps towards Paris.

On the Western lines of battle the week has not witnessed any very important developments and dispatches from Petrograd contain the rather distinct intimation that Russia will now await a Franco-British diversion, which is interpreted as an intimation from Russia that it is time to abandon the Joffre policy of "nibbling" and deliver a general attack in the Western front in order to force Germany to reduce her forces estimated at 2,000,000, apart from the Austrians, facing the Russians in the Eastern theatre. It is interpreted also as an intimation that Russia hopes for a great battle at the Dardanelles which will smash the Turks and allow munitions and provisions to reach her in order that Grand Duke Nicholas' armies which have been bearing the brunt of the German attack may resume the offensive. The London "Daily Mail" yesterday gave special prominence to the following press dispatch from Petrograd:

At the beginning of the war Russian military opinion was divided on whether Warsaw and the Vistula should be defended or not. The result has been that Russia has gained a year

before taking up a position on the front contemplated by themselves in 1910 and by the Germans as far back as 1886.

A British-French diversion is now awaited.

The Duma meets on Sunday, when the Govern-ment will acquaint the country with the military situation.

The "Daily Mail's" comment is: "This appears to be the most significant message received from Russia since the beginning of the war. It seems possible that the nature of the statement to the Duma will depend upon the communications received from London and Paris."

Premier Asquith in the House of Commons on Wednesday was more than usually optimistic as to the results of the war. He praised Russia and Italy for their services in the conflict, lauded the British fleet for its "unobserved" but "all powerful" activity and indicated the Government's confidence in the result of the operations in the Dardanelles and also in France. The Premier presented his review of the war situation in announcing the adjournment of Parliament on Thursday until September 14. He stated that the conflict had become and was likely to continue a contest of endurance. Referring to the fact that next week would see the completion of a year of war Mr. Asquith remarked that the world never had seen a more miraculous transformation in Great Britain, not in its spirit and heart but in the outward manifestations of its life than had taken place in those twelve months. The British fleet to-day was far stronger, the Premier continued, than at the beginning of the war.

"To its quiet and unobserved but ubiquitous and all powerful activity," he went on, "is due the fact that the seas are clear, or substantially clear. For, after all, this submarine menace, serious as it has appeared to be, is not going to inflict fatal or substantial injury on British trade. The seas are clear. We have our supplies of food and raw materials, upon which we and the rest of the country depend, flowing in upon us in the same abundance and with the same freedom; and I may say without much exaggeration,

quith said, "the navy has so far been denied the grim and glorious fight, but it is through its unrelaxing vigilance and the supreme skill with which it has been handled that this country to-day can laugh at the scare of an invasion, and that we to an extent unknown by any other of the belligerent powers are immune from the actual ravages and dangers of war."

David Lloyd George, Minister of Munitions, followed the Premier, making a cheerful report as to the steps taken to supply the army with ammunition. He, however, declared that the "situation is serious if not perilous," evidently having in mind a solemn warning against the easy optimism that appears to be current in England as to the results of the war. The Minister of Munitions reminded his hearers that the successes of the Germans in the East mean increased pressure against the Allies in the West. Lloyd George charged that the munition contractors are behind in their contracts, that Labor is not keeping its agreement to suspend Trades Union rules during the emergency, that four-fifths of the ammunition making machinery of England are not employed full time and only one-fifth of it is working at night and that there cannot be an increased output from all works for weeks and perhaps months. On the other hand, however, the Government is shortly to establish ten new national arsenals in addition to the sixteen co-operative factories already under Government control. Forty thousand volunteer workmen, he said, are at work and 100,000 are to be utilized. among these being skilled workmen who are being brought back from the front. A substantial increase in the output of shells and other ammunition, he said, will largely be made from new establishments within a few weeks.

The American Steamship Leelanaw from Archangel July 8 for Belfast with a cargo of flax was sunk on Sunday by a German submarine off the Northwest coast of Scotland. All the members of the crew were saved. They were taken into Kirkwall in their own boats. The news caused a severe break in the New York stock market on Monday owing to the incomplete form in which the information was first published. It was at the outset regarded as an act of defiance by Germany to the American Government's note; later, however, it became evident that ample opportunity had been accorded to the captain and crew to leave the ship and that efforts had been made to protect life. Our own Government's contention, as in the case of the William P. Frye, is that the sinking of the ship is a violation of our treaty with Prussia and a demand for reparation is to be filed.

The British Government, anticipating the intention of the United States to send a further protest against the interference with American trade resulting from the execution of the British Order in Council, on Monday last answered the protest of the United States against certain features of the British blockade of Germany. The official text of the note has not been published and publication has in fact been delayed at the request of the British Foreign Office in order that a supplementary statement may be forwarded and appear as a part of the original document. An outline of its contents, however, has judging from the insurance rates and other matters, ' appeared in the daily papers and this we give on

subsequent pages. The British note is in reply to the American note of March 30. It was prepared by the London Foreign Office several weeks ago and is understood to have been delayed pending the development of a favorable moment for its presentation. The supplemental note is expected to arrive next week and will, it is presumed, be a response to the unofficial but vigorous efforts that have been made by our State Department to obtain for American importers the release of the numerous and large consignments of German, Austrian and other goods held up in neutral European ports by the British Order in Council.

Press advices from Washington yesterday contained a denial from the Secretary of State, Mr. Lansing, of a report that a new American policy toward Mexico was to be immediately inaugurated by another proclamation to the Mexican factional leaders, or that a general note to the leaders will be dispatched. The State Department was yesterday officially informed of the capture of Pachuca by Gen. Gonzales, who defeated Gen. Villa's flying column of cavalry there. Gen. Gonzales has declared that he will reoccupy Mexico City in two days. The Secretary of State said that representations dispatched on Thursday night to the Mexican leaders demanding that food shipments to Mexico City be allowed to go there without interference had nothing to do with the Administration's intended policy.

The Japanese Cabinet, headed by Count Okuma as Premier, has tendered its resignation to Emperor Yoshihito. This action followed the resignation on Thursday of Viscount Kanetake Oura, Minister of the Interior, after an investigation by the Minister of Justice into bribery charges growing out of the Parliamentary elections of last March. Viscount Oura's resignation was sanctioned by the Emperor after a report on the situation had been made to him by Count Okuma. The Premier, believing he should hold himself responsible for the action of the members of his Cabinet, was the first to tender his resignation. The other Ministers decided immediately to follow the example of their chief. The Elder Statesmen will meet to-day. It is considered probable that they will advise that Count Okuma be invited to retain the office of Premier and reconstruct the Cabinet.

The President of the Republic of Hayti, Vibrun Guillaume, was taken by a mob from the French Legation at Port au Prince on Wednesday and was shot to death in front of the building. The President had taken refuge with his family under the French flag after he had been driven from the Presidential Palace by the revolutionists. The Committee of Public Safety has taken charge of the capital and is conducting the de facto government. It was necessary to land American marines to enforce order and it is thought probable that before withdrawing its forces the United States Government will renew its efforts to negotiate a treaty with Hayti for the administration of the customs as in San Domingo, with the provision incorporated in the treaty, similar to the Platt amendment in the Cuban treaty, whereby the United States would have the right to intervene in the event of disorders.

The London Stock Exchange markets early in the week remained quiet awaiting dealings in the new war loan which commenced on Thursday with "conversion rights on." The dealings will begin ex-conversion rights on August 3. The trading in the new loan gave a much more cheerful and seemingly more practical market. The price level, too, showed a moderate response in the form of firmness. The dealings in the new loan, fully paid, began at 99@ 9914, advanced to 991/2 and then eased off to 981/2. Yesterday (Friday) the quotation declined to 9734. London correspondents state that strong buying of American rollroad bonds has been a feature this week at that centre. Another feature of interest to the American market has been the improved demands for United States Steel shares following the publication of the Corporation's quarterly earnings. The Exchange will be elesed on Monday next, the first Monday in August being a Bank Holiday. In view of this, the managers of the London Exchange have decided that on Saturday also business shall be suspended. There is however very little holiday spirit abroad in England at the present moment. The seaside resorts, especially those on the East coast, are experiencing an exceptionally poor season. Marconi shares were firm owing to the favorable report presented at the annual meeting held in London. Canadian Pacific led a rally in Canadian securities. It is reported that the London market is prepared for a cut in the Canadian Pacific dividend from a 10% to an 8% annual basis when the directors meet next month.

The British money market is under the complete control of the Bank of England, open market rates being as a rule 1/8 of 1% above the Threadneedle Street minimum. Meanwhile money on call is 4@412%. This firmness in money rates may be considered part of a general policy in maintaining rates in order to lend a steadying hand in the foreign exchanges. So long as American banks and bankers can utilize their balances in London to greater ad, vantage for short dates than in New York, they have active encouragement to permit them to remain abroad instead of bringing them home to a market that is so completely inundated with surplus loanable funds. No announcement has as yet been made of the form of credit that the English and French Gov eraments are understood directly or indirectly to be negotiating in New York. Meanwhile it may be stated that the most cordial co-operation is in progress between New York and London bankers for the purpose of preventing so far as possible any unnecessary movement of gold. It is worth while recalling that such a control of the gold situation was definitely provided for soon after Sir George Paish's return to London after his visit to this country last year. At that time it will be very readily remembered no little nonsense was being published as to the huge debt owed by America to London. Various schemes were proposed looking to the exportation of American gold to settle these exaggerated and mythical balances. When finally a proper appreciation of the real conditions that existed became more general in London an understanding was reached whereby the question of preventing the unnecessary movement of gold could be placed in the hands of a special committee. The official announcement which was made simultaneously in London and New York on Jan. 15 of this year concerning the plans which were discussed first between Sir George Paish and Secretary of the Treasury McAdoo at Washington and a committee of New York bankers, and were later under discussion in London between New York and London bankers follows:

In connection with the announcement by the Treasury upon the subject of the American exchange which appeared in the press on the 8th inst., we are authorized to state that after a conference held by the Chancellor of the Exchequer with the London bankers, it was resolved that, inasmuch as exchange between the United States and the United Kingdom is now substantially normal, no definite action at the present time is required, but that, if during the continuance of the war or for one year thereafter the exchanges between the two countries should become such that gold exports from either country to an unreasonable amount might result, committees of bankers could be appointed in the United States and in the United Kingdom, respectively, to consider plans for dealing collectively with the situation by such methods as may seem at the time mutually desirable. It is understood that a similar announcement is appearing to-day in the American press on behalf of the New York bankers.

There has been no direct announcement of any united action, but the announcement above quoted is significant of the direction in which to look for the control that is so ovbiously being exercised over the gold situation. Notwithstanding that sterling exchange rates indicate that English funds are substantially at a discount of 2% in New York, there is no substantial inbound movement of gold in progress. This, of course, is a situation that cannot go on indefinitely. Sooner or later it will be necessary for London to send gold or the equivalent of gold to settle a trade balance that is without question accumulating. There has certainly been a decisive check in the volume of selling of American securities since the subscription lists of the English loan were closed. While it is not improbable that there will be substantial further selling movement of our a securities by foreign holders in the event of the war proving protracted, this source of gold equivalent supply does not suggest sufficient magnitude to constitute anything like a complete offset for the large net volume of merchandise of various kinds that is leaving our shores. It seems to be taken for granted in important banking circles that England will find some other means of paying any balances where payment may be required, without resorting to the exportation of gold on a large scale. Tuesday the London "Times," as reported by cable, suggested that-

Buying of American bonds, which was such a noticeable feature among dealings in the city on Monday, had, in fact, been also going on for two or three days at the end of last week, and was continued yesterday in some quarters. The explanation has been taken to be that it was for American account as a result of government disbursements here [in England] in payment for orders placed in the United Yesterday, however, the firm belief spread States. in the money market that the buying was being done for the Government itself, the interpretation put on these purchases of American bonds being that they were to be used in connection with the placing of a loan in New York. There has been so much discussion for weeks past as to the prospect of the new British Government borrowing in New York, with the object of affecting American exchange, that such a belief and such an interpretation in financial circles are easily accounted for. Whether they are correct, time will show. From the character of some of the bonds which have changed hands, the inference is

The London correspondent of the New York "Times" declares that the American exchange question now occupies the energies of the Government and the Bank of England, with, the correspondent states, "no indication of a solution. High money rates here seem to have helped but little so far. The exchange position would presumably be further complicated if, as is expected here, we meet your cottongrowers' complaints by the purchase of a large amount of cotton." On Thursday Premier Asquith met sympathetically the deputation of bankers who called on him for the purpose of urging the imposition of a tax on imports to reduce British consumption during the war, but as Parliament was to adjourn on Tuesday for six weeks, early action could not be be expected.

It is interesting to observe from the press association dispatches that, despite the recent agitation by certain sections of the British press which desires that cotton be declared contraband, the British Government has not changed its decision on this point. This was indicated clearly by a statement in the House of Commons on Monday by Lord Robert Cecil, Parliamentary Under-Secretary for Foreign Affairs, that Great Britain did not want to deal unfairly with neutrals whatever Germany might do. "So far as cotton reaching Germany is concerned," Lord Roberts said, "it will make no difference whether it is declared contraband or not." Sir Charles Macara, for many years President of the International Federation of Master Cotton Spinners and Manufacturers' Association and one of England's foremost cotton men, declared in a published interview, received by cable, that if the cotton situation had been properly handled at the outbreak of the war the struggle would have been finished by December or at latest March. Sir Charles was the originator of the proposal now being agitated for the purchase of such of the surplus cotton as exists by reason of the loss of the German and Austrian markets. The object of such purchase would be to keep up the price, prevent loss to planters the world over and protect the industry. Arrangements are being made, it is announced from London, with several neutral governments to permit imports of a certain amount of cotton each month sufficient to meet the requirements of each country in question, importations of any excess above the stipulated monthly quota to be prevented by the British navy.

There has as yet been no perceptible increase in the offerings of securities on the London market. Chilian Treasury bills to the amount of £2,000,000 issued at the commencement of 1914 will be fully paid off at maturity on Aug. 4 and the redemption of British Treasury bills to the amount of £1,400,000 will take place on Aug. 24. The London & Northwestern Ry, is asking authority to issue £300,000 preference stock to pay  $4\frac{1}{2}\%$  redeemable at par in June 1925. Exceptional activity in Canadian Car & Foundry stock on the London market suggests that speculation in "war industrials" is beginning at the British centre. Canadian Car & Foundry has received large orders from the British Government for ammunition and

has sublet part of these contracts to American corporations. The monthly statement compiled by the "Bankers' Magazine" of London of the aggregate value of 387 securities dealt in on the London Stock Exchange, indicates a depreciation for the month ending July 20 of £98,589,000, which is equal to 3.3%. The heaviest decline was in British and India funds, namely £11,591,000, or 1.9%, which is explained, however, by the new war loan and the reduction of minimum prices on the Stock Exchange.

Very little in the way of financial transactions has been reported from the French markets this week. The City of Paris has been authorized to bring out an issue of 20,000,000 francs of bonds. A part of this issue is to mature in six months and bear 51/4% interest, while the remainder will run a full year at 5%. The Chamber of Deputies on Thursday again raised the limit of the issue of the French bonds, this time to 7,000,000,000 francs (\$1,400,000,000). The Chamber also appropriated 4,500,000 francs for the relief of the population of the French districts invaded by Germans. The amount of gold exchanged for paper by the Bank of France since May 27 has reached 220,000,000 francs. The French Budget Committee on Supplementary Military and Navy Credits, in its report just issued, shows that for the first five months, the war cost France 6,403,000,000 francs (\$1,280,600,000). The French Senate on Thursday passed a bill strengthening and making clear the provisions of the decree of Sept. 27 and the law of April 4 last interdicting all trade with Austro-Germans in any country and the commerce and all products of Austro-German origin, applying thereto the customs, regulations and penalties now applicable in the case of merchandise, the importation of which is prohibited. The law provides for exceptions being made to its provisions at the instance of the Minister of Finance when such exceptions are in the interest of the army or of the commerce of France. The Senate passed a resolution urging the Foreign Minister to obtain similar action by the Allies of France. The British Chamber of Commerce in Paris has approached the French and British Governments regarding the difficulties of commercial houses due to the high exchange rate, and has suggested that a series of conferences between bankers and Treasury officials be arranged in an effort to find a solution. No progress has been made in the proposals to liquidate the pre-war position on the Bourse, although it is generally recognized that such action is necessary. Subscriptions to Treasury bonds in the last eleven months total 8,500,000,000 francs.

According to advices from Zurich the German Minister of Finance will at a meeting of the Reichstag early in August submit proposals for a third German loan to be floated early in the autumn. The Finance Minister it is stated already has discussed his plans with the Finance Ministers of all the States of the German Empire. Advices by way of Amsterdam indicate that arrangements for the complete consolidation of Belgian financial interests with those of Germany are progressing rapidly. In Antwerp the German Administrator of the Banque Centrale Anversoise has given out information that it is to be absorbed by the Deutsche Bank, its head being a director of the latter institution.

Official bank rates at the European centres show no changes. In London, Paris, Berlin, Amsterdam, Vienna, Copenhagen the rate is 5%, in Norway, Sweden and Portugal it is 51/2%, in Italy and Russia 6% and in Spain and Switzerland 41/2%. In London the private bank rate at the close of business yesterday was 51/8% for sixty and 5@51/8% for ninety day bills. These figures compare with the single rate of 51/8% for both maturities a week ago. Money in London is 4@41/2% against 41/2% a week ago. There have been no private bank rates received by cable this week from any of the Continental centres so far as we have been able to learn.

The feature of the Bank of England's current weekly return is the further large increase of £68,409,-000 in the public deposits representing presumably the receipt of war loan funds reaching the Bank through indirect channels too late to appear in last week's statement. The Bank reported a further increase of £1,480,274 in gold, a part of which undoubtedly represents actual metal in the loan subscriptions. Note circulation decreased £243,000 and the total reserve increased £1,723,000. There was a contraction of £39,079,000 in the item of "other" deposits and an increase of £27,628,000 in loans (other securities). The Bank's gold now stands at £60,906,500 against £38,131,544 one year ago. The reserve is £45,825,000 against £26,875,194. Public deposits make a favorable comparison of £177,636,000 against £12,713,217 a year ago and loans are £192,195,000 against £47,307,530 in 1914 at this date and £29,-190,985 in 1913. Comparisons hereafter will necessarily be made with a war period. The Bank reports the amount of currency notes outstanding as of July 24 at £46,386,264 against £49,298,471 the preceding week. The amount of gold held for the redemption of such notes remains at £28,500,000. Our special correspondent furnishes the following details by cable of the gold movement into and out of the Bank for the Bank week: inflow, £1,730,000 (of which £787,000 bought in the open market, £65,000 released by Egypt, and £878,000 net received from the interior of Great Britain); outflow, £250,000 earmarked miscellaneous. We add a tabular statement comparing for the last five years the different items in the Bank of England return:

D'S COMP	ARATIVE ST	TATEMENT	
1014.	1913.	1912.	1911.
July 29.	July 30.	July 31.	Aug. 2.

The Bank of France reports a further increase of 78,038,000 francs in its gold holdings this week representing the continued exchange of gold for notes in response to the appeal by the French Minister of Finance, M. Ribot. Silver holdings increased according to this week's statement 871,000 francs. There was a still further expansion of 79,745,000 francs in note circulation while general deposits increased 4,425,000 francs, bills discounted were 1,749,000 francs higher and treasury deposits increased 28,124,000 francs. The Bank now holds in gold 4,129,338,000 francs against 4,141,350,000 francs one year ago and 3,362,225,000 francs in 1913.

Silver aggregates 367,971,000 franes against 625,-325,000 francs in 1914 and 627,375,000 franes in the year preceding. The note circulation is once again at new high record namely 12,592,000,000 franes which compares with 6,683,184,785 in 1914 and 5,676,832,110 in 1913. General deposits are 2,379,-825,000 franes against 947,571,861 franes in 1914 and 657,417,973 franes in 1913. The item of discounts stands at 2,426,649,000 franes. One year ago it was 2,454,280,425 franes and two years ago 1,840,492,647 franes.

The weekly statement of the Imperial German Bank as of July 23 showed an increase in gold of 1,126,000 marks and of 22,831,000 marks in the cash item, which includes Imperial and loan bank notes and notes of other banks in addition to coin and bullion. Discounts were reduced 102,812,000 marks, note circulation showed a contraction of 97,464,000 marks and deposits were reduced 16,847,000 marks. The Reichsbank now reports gross holdings of 2,392,-564,000 marks in gold, against 1,356,872,000 marks a year ago. Combining loans and discounts we have a total of 4,379,536,000 marks, which compares with 801,084,000 marks a year ago, while note circulation stands at 5,214,377,000, comparing with 1,-890,893,000 marks at the corresponding date last year.

The local money market has shown a much better tone, though a substantial demand is not yet distinctly in evidence. Some firmness seems natural, however, in view of the steady demand for crop financing that should now be experienced. The speculative activity in the so-called war industrials is attracting attention in banking circles and lenders are showing indisposition to accept risks by permitting the use of these stocks as collateral. The expansion in business on the Stock Exchange has been another influence in the firmer tendency. Last Saturday's statement of the New York Clearing House showed an increase of \$13,104,000 in loans, of \$14,789,000 in net demand deposits and of \$3,-293,000 in net time deposits. The reserve above requirements increased \$3,470,160, bringing the total to \$172,925,890 against \$26,173,750 under the old form of bank statement a year ago. The reserve requirements themselves are \$2,796,840 higher as a result of the increased deposits. Reserves in "own vaults" increased \$5,770,000 to \$444,985,000 of which \$371,104,000 was specie. Reserves in Federal Reserve banks increased \$6,066,000 to \$133,516,000 while reserves in other depositaries decreased \$5,569,000 to \$32,597,000. Thus the aggregate total reserve showed a net increase of \$6,-267,000 to \$611,098,000.

There have been no important capital applications this week. The result of the \$45,000,000 Canadian note issue for which subscriptions were invited last Saturday was fully up to expectations, the loan having been largely oversubscribed.

Referring to money rates in detail, the range for demand loans during the week has been  $1\frac{3}{4}(0.2\%)$ against  $1\frac{1}{4}(0.2\%)$  a week ago. In fact 2% has been the highest figure each day and  $1\frac{3}{4}$  the lowest, the latter also being the ruling rate each day until Thursday when it was advanced to 2% at which it remained on Friday. Time money closed at  $2\frac{1}{2}(0)$  $2\frac{3}{4}\%$  for sixty days (against  $2\frac{1}{2}(0.2\frac{3}{4}\%)$ ,  $3\frac{1}{4}(0.3\frac{1}{2}\%)$  for for four months (against  $2\frac{3}{4}(0.3\%)$ ,  $3\frac{1}{4}(0.3\frac{1}{2}\%)$  for

five months (against  $2\frac{3}{4}(@3\%)$ ) and  $3\frac{1}{2}\%$  for six months (against  $3(@3\frac{1}{4}\%)$  last week). Commercial paper discounts remain at  $3(@3\frac{1}{2}\%)$  for sixty and ninety days endorsed bills receivable and for four to six months single names of choice character. Names not so well known require  $3\frac{3}{4}(@4\%)$ . No changes have been announced this week by any of the Federal Reserve banks. The  $3\frac{1}{2}\%$  rate for trade acceptances at the New York Federal Reserve Bank remains at  $3\frac{1}{2}\%$ . The discount rates for bankers' acceptances in Boston, New York, Philadelphia, Cleveland, Chicago, Indianapolis and San Francisco as authorized by the Federal Reserve Board are 2% minimum and 4%maximum. Below are the current discount rates of all the Reserve banks:

Sterling exchange continues in the narrow groove that has recently been such a feature of the market. Changes have been confined as a rule to small fractions. In general the tendency has been toward easier conditions, the supply of bills being, if anything, in excess of the demand on balance. There has been no statement of the progress made toward the establishment of foreign credits in New York. The high rates of money in London are operating to some extent against importations of gold. That is to say, there is added inducement for American bankers and banks to keep their balances abroad rather than draw their funds home at a time they can be used so much more profitably abroad. As we have explained heretofore, the exportations of war materials do not appear to be entering as a market factor in the general sterling exchange situation. The success of the offering of the \$45,000,000 Canadian Government note should naturally have strengthened the market and the fact that it did not do so affords strong evidence of the nominal situation that exists. Renewed discussion is heard in foreign exchange circles as a whole as to the prospects of the English credit, when finally it shall be announced, taking the form of a loan for which the collateral shall be Amercan securities purchased by or on behalf of the British Government in the London market. Presumably, if this is to be the process, the purchases by the British Government must be from proceeds received for war bonds or Treasury notes. There also are reports that special British Treasury bonds not subject to income taxation are to be the basis of the credit in New York when, as must soon be the case, it is finally negotiated. The present situation, as far as the gold movement is concerned, seems, as we have explained more fully in a preceding paragraph, in the hands of prominent bankers of New York and London who obviously have the situation well under control. The weekly preliminary report of exports (for the week ending July 24) as reported by the Department of Commerce, showed exports of \$54,122,000, an increase of \$13,850,000 over the exports of the preceding week.

representing the highest point for such excess in eight weeks. For the preceding week the excess was only \$7,362,000, and for the week preceding that it was \$17,674,214.

Compared with Friday of last week, sterling exchange on Saturday was slightly firmer with demand quoted at 4 76 9-16@4 765%, cable transfers at 4 77 3-16@4 7714 and sixty days at 4 7134@4 7178. On Monday the volume of transactions was small and rates fluctuated within narrow limits, at slightly lower levels; demand ranged at 4 76 7-16@4 76 9-16, cable transfers at 4 771/8@4 77 3-16 and sixty days at 4 715%@4 71%. Following a steady opening, a weaker tone developed on Tuesday, though the range of quotations was practically unchanged, at 4 76 7-16 @4 76 9-16 for demand, 4 77 1-16@4 77 3-16 for cable transfers and 4 715/8@4 713/4 for sixty days. On Wednesday extensive selling by a prominent financial concern caused a slight decline during the forenoon, though later a more active inquiry brought about a partial rally; demand receded to 4 763%@ 4 761/2, cable transfers to 4 77@4 771/8 and sixty days to 4 711/4@4 713/8. Freer offerings of commercial bills induced a further recession on Thursday and rates moved down to 4 76 3-16@4 76 7-16 for demand, 4 76 13-16@4 77 1-16 for cable transfers and 4 711/8@4 711/4 for sixty days. On Friday the market ruled irregular. Closing quotations were 4 71@4 711% for sixty days, 4 761%@4 7614 for demand and 4 7634@4 76 13-16 for cable transfers. Commercial on banks nominal, documents for payment nominal. Seven-day grain bills at 4 751/8 @4 751/4. Cotton for payment nominal; grain for payment nominal.

In the Continental exchanges the week has shown few important changes. Sterling exchange in Paris closed at 27.10 francs, against 27.18 francs last week. In New York, checks on the French centre closed 5 69 and cable transfers at 5  $68\frac{1}{2}$ , against 5 64 and 5 63 respectively a week ago. Bankers' checks on Berlin are  $81\frac{1}{4}$  against  $81\frac{7}{8}$  and cable transfers  $81\frac{3}{8}$  against 81 15-16. Swiss exchange finished at 5 37 and 5 36 for sight and cables respectively against 5 36 and 5 35 a week ago. Italian lire are weaker, closing at 6 38 for sight and 6 37 for cables. A week ago the corresponding figures were 6 21 and 6 20. Bankers' checks on Amsterdam are  $40\frac{1}{8}$  and cables are  $40\frac{1}{4}$ .

A week ago  $40\frac{1}{8}$  was the check rate and  $40\frac{1}{4}$  plus 1-16 the cable rate. Greek exchange remains at 5 26 and 5 25 for checks and cables respectively. Copenhagen checks are 25 83 against 25 65. Norway and Sweden both are quoted at 25.88 against 25.70, while Russian roubles are  $32\frac{1}{2}$  for sight against 32 a week ago.

The New York Clearing-House banks, in their operations with interior banking institutions, have gained \$5,746,000 net in cash as a result of the currency movements for the week ending July 30. Their receipts from the interior have aggregated \$9,186,000, while the shipments have reached \$3,-440,000. Adding Sub-Treasury operations, which occasioned a loss of \$1,721,000, the combined result of the flow of money into and out of the New York banks for the week appears to have been a gain of \$4,025,000, as follows:

Week ending July 30.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.		
Banks' Interior movement	\$9,186,000 17,281,000	\$3,440,000 19,002,000			
Total	\$26,467,000	\$22,442,000	Gain \$4,025,000

c July 30 in both years. h Sept. 21 1914.

THE CONSTITUTIONAL CONVENTION AND NEW YORK STATE'S METHOD OF FIN-ANCING BOND ISSUES.

One of the important duties of the State Constitutional Convention now sitting at Albany will be the incorporation in the new Constitution of adequate provisions for safeguarding the finances of the State and its municipalities. An unusually competent committee for dealing with this feature of the fundamental law has just submitted a report to the Convention making certain recommendations and suggestions respecting what the organic law should contain in that regard and reviewing the course of State finances under the system and methods which have prevailed under the existing Constitution. From this report it is evident that the subject is receiving most intelligent consideration. The specific committee in charge of the work is the Committee on State Finances, Revenues and Expenditures under the Chairmanship of Henry L. Stimson, formerly U. S. District Attorney in this city and Secretary of War in President Taft's cabinet.

We print the report in full on a subsequent page and it will repay careful perusal. It points out in the first place that there has been a great increase of indebtedness in New York during the last decade on the part of the State and its subdivisions. This in itself would call for careful consideration of the methods of financing and handling future debt issues. The Committee finds that the net debt of the State, over and above all sinking funds, has increased from \$7,400,000 in 1903 to over \$145,500,000 at the present time. The gross outstanding debt to-day is over \$186,000,000 and the total authorized debt is over \$231,000,000. During this period, it is noted, the population has only increased from 7,650,000 in 1903 to 9,899,000 in 1914. Accordingly, the per capita net State debt has risen from less than a dollar a head in 1903 to over \$15 per head. New York has, it is indicated, at present not merely the largest total debt, but by far the largest per capita direct debt of any of the United States.

Municipal indebtedness has risen in a corresponding degree. According to the U. S. Census, the civil divisions of the State have an indebtedness far in excess of that reported by any other State. The total debt, less sinking fund assets, according to these Census figures, stands at \$1,046,226,813, which amount is equal to over 30% of the indebtedness of all the civil divisions in the United States and more than four times the amount reported by Pennsylvania, which ranks second in total debt. In the eleven years from 1902 to 1913, the per capita debt of the municipalities of the State of New York has grown from \$56 per head to \$107, an increase of over 90%. The Committee finds that while the credit of the State remains high this great augmentation in indebtedness has been noted and commented on in the investment market "and that there is an increasing tendency on the part of investors to scrutinize our securities and to demand an improvement in our financial methods of incurring and securing debt."

The Committee addresses itself to the subject of bringing about the needed improvement in methods here referred to. One of the serious shortcomings has been the mistake in the method of calculating and collecting the contributions for the sinking funds, thereby imposing unnecessary burdens upon the taxpayers. To indicate the extent of the unnecessary burdens the statement is made that "up to September 30 1914 there had been contributed to all of the sinking funds \$34,487,679 41 where only \$4,940,095 13 was required under a 3% actuarial computation, making a surplus at that date accrued of \$29,547,-584 28."

Owing to the unsatisfactory results attending the sinking fund method, the Committee recommends that hereafter all debts except emergency debts, shall be based upon serial bonds payable in equal installments. On and off in recent years quite a controversy has been raging between the partisans of the two methods. The question involved is whether in the issue of municipal bonds it is better to provide for the ultimate extinction of the principal of the debt through the serial method of partial pavments-that is the payment of a certain amount of the debt each year-or through the creation of sinking funds intended to retire the bonds at maturity, and obviously the question is an important one, aside from its bearing on the changes proposed in the State Constitution in that respect. On the whole the arguments in favor of the serial method are stated with cogency and force by the Stimson Committee as follows:

Your committee recommends that hereafter all debts except emergency debts shall be based upon serial bonds payable in equal installments. The advantages of such a system are so fundamental and are so closely related to sound governmental policy, as well as to sound finance, that we believe such a restriction to be thoroughly worthy of a place in the Constitution. The most certain, simple and cheap way to amortize a debt is to pay it off in annual installments. The uncertainties of calculation which have so unfortunately affected our sinking funds in the past are at once climinated. There is no large fund left in the hands of public officials to be cared There is no large for and invested and reinvested for fifty years, with all the attendant risk and temptation, and the danger that this power of investment in various local securities may be perverted into a political power is entirely removed. Furthermore, the fact that the same administration which incurs a debt must at once begin, within one year, to make provision for its retirement. necessarily and strongly tends towards responsibility and prudence in the contraction of debt. Finally, the serial method produces an immense saving in the amounts which the State must eventually pay to re-tire its debt. If our present canal debt of \$118,000,-000 had been composed of serial bonds, finally maturing in fifty years, instead of the present straight-term sinking fund fifty-year bonds, the State Government would have saved \$46,677,596 13, according to the calculation of the Comptroller's office, in the total cost of retiring the debt, even if we assume that the sinking fund was able to earn continually 4% on its investments.

The only point in the foregoing to which we are inclined to take exception is the reference to the "a final saving in favor of the serial bond method of

[Vol. 101.

Other things being equal, the two methods ought to stand on about an equal footing as far as financial results are concerned. The merit, or lack of merit, of the sinking fund method is not to be judged by the outcome as regards New York State. The unfortunate results attending its operation here are to be ascribed entirely to the inconceivably bad way in which this method has been applied. All sorts of errors and miscalculations have been made in applying it, as is shown very clearly in the minority report made by one member of the Committee, namely Robert Wagner. Mr. Wagner demonstrates that numerous blunders have been made in the carrying out of the method-blunders which would be unbelievable except that they are supported by the actual facts.

We know that those who advocate the serial method, which, for the reasons stated in the above extract, is on the whole much to be preferred to the sinking fund method, invariably make claims of great savings. But scarcely anyone undertakes to discover upon what basis these claims rest. They are founded on the idea that the funds cannot be invested so as to yield a rate of return equal to the rate of interest in the bond. That assumption may on occasions have been correct in the past. To-day it is open to question, to say the least. For the ordinary observer, it is natural to suppose there must be a saving, for the serial method involves paying off part of the issue each year and the common argument is that since certain amounts of the bonds are thus retired the State or municipality is relieved of the necessity of paying the interest on such amounts for the remainder of the term. For example, if a \$50,-000,000 issue of bonds should have a life of fifty years and a million dollars should be paid off each year, forty-nine years' interest would be saved on the one million dollars paid off at the end of the first year, forty-eight years' interest on the amount paid off at the end of the second year, forty-seven years' interest on the amount at the end of the third year, and so on.

In this way it is easy to figure out a big saving at least in interest. But the saving is no real saving nevertheless. If the one million dollars used each year to retire bonds were contributed to a sinking fund and this sinking fund were invested so as to yield the same rate of interest as the bonds, the return from the investment would take care of the interest on the bonds for the forty-nine years, the forty-eight years, the forty-seven years, or whatever the number of years might be, to maturity. Of course, the actuary does not overlook this point. It is only the layman who is misled. Yet there are actuaries who also argue that a great saving results from the employment of the serial method. In their case, as already stated, the saving results in the main from allowing a smaller rate of interest on the investment in the sinking funds than the rate of interest in the bonds for whose retirement the sinking funds have been created.

One of the staunchest advocates of the serial method of bond redemption is Alfred D. Chandler of Boston, and we published a long communication from him in our issue of August 1 last year. In this was included an elaborate tabular presentation going to show that if New York City should issue \$65,000,000 of 50-year 4% bonds, there would be

\$15,040,953," as compared with the sinking fund method. But this computation was based entirely on the assumption of an average earning of  $3\frac{1}{2}\%$  by the sinking fund on the theory that "this is the generally accepted average rate for such long-time operations." To-day, however, there is no warrant for any such low interest return as  $3\frac{1}{2}\%$ . This is obvious from the fact that even New York City  $4\frac{1}{4}\%$ bonds can be bought nearly two points below par and certainly New York City obligations are "safe."

We are not arguing against the serial bond method but simply pointing out that the supposed great saving over the sinking fund method, where both are impartially applied, is largely illusory. There are, however, certain drawbacks to the sinking fund plan which do not inhere in the serial method. Furthermore it is to be remembered that the maintenance of a sinking fund on a 41/4% (or higher) compound interest basis cannot be positively assured. Then also the securities in a sinking fund at the maturity of the loan must (so far as they do not consist of bonds of the loan to be redeemed) be converted into cash, which operation may, or may not, prove profitable. Another objection is the possibility of unwise and even dishonest management of the funds or their appropriation to other uses than those for which they are intended. In the case of the serial nethod, the gradual extinction of the debt by annual payments operates unfailingly to insure for these payments the same rate of interest as the obligation itself bears and the serial plan has the further advantage that it works automatically without any lapse or loss of time for investment. On the other hand, it is by no means certain that serial bonds can be depended upon to command the same relative degree of favor from municipal bond houses as sinking fund issues without the right of retirement before maturity. The Stimson Committee report refers to the fact that at the recent sale of New York City bonds the serial bonds sold on a slightly better basis than the straight sinking fund bonds. But this, in our estimation, cannot be considered entirely conclusive. Just now there is a great demand for shortterm issues of all kinds, owing to the superabundance of loanable funds, and this operated to the advantage of the New York City 15-year serial issues since the purchasers could depend on reselling such of the bonds as run off within the next three or four years at a satisfactory profit. Such conditions of the money market however cannot always be counted upon and serial bonds have not in the past been regarded with the same degree of favor as straight long-term issues.

The Stimson Committee thinks it might be well to replace the present straight term 50-year debt of New York State with serial bonds even if to effect the refunding a slightly higher rate of interest on the new securities had to be offered (such as  $4\frac{3}{4}\frac{9}{0}$ against the exisiting  $4\frac{1}{2}\frac{9}{0}$ ) as an inducement for turning in the old bonds, and in the peculiar state of things existing regarding the New York State sinking funds, the operation would doubtless be wise as well as advantageous. As concerns the recommendation that hereafter the life of any new bonds shall not exceed the life of the improvements for which they are issued, there can be no two opinions as to the desirability and soundness of such a Constitutional provision. 327

One of the current fads concerning aid possible or due to business from government is that some plan of rural credits ought to be set up. Any scheme for inducing the farmer to go into debt needs to be well considered. The life insurance companies other than those of this State have large farm loans, have had excellent experience with them, and are ready always to consider good applications. Furthermore, and as far better than any scheme of public aid, ex-Minister Herrick (not now for the first time) advocated cooperation in an address recently to a fertilizer association. He sees three causes for the agricultural shortcomings which are already serious and prospectively more so: the lack of good roads, the lack of social pleasures, and the defects in selling and purchasing power. It might be said that the rural telephone and the automobile are doing much and will do more and more to facilitate social intercourse and to minimize the obstacle of roads as to business and pleasure; thus those two hindrances are in course of removal.

Mr. Herrick meets the difficulty in purchasing and selling by the unassailable declaration that "organized selling and purchasing power is best attained through co-operation." The rural co-operative bank, he says, is largely misunderstood to be a savings-andloan association, making loans to its members, and this idea has been written into State laws about "credit unions," thus making those laws useless. The true rural co-operative bank is indeed a form of credit union but does not encourage borrowing and does not lend to its members in ordinary circumstances. Its field and purpose are local; if it makes individual loans it takes care that the money is used for some specified productive purpose; nobody ought to join it unless that will be for his material advantage, and per contra, nobody should be allowed to join unless he will add to its credit and standing.

What does the bank do? "The main use of its funds is to buy farm supplies in bulk at wholesale, to retail to its members at a lower price or on better terms than they could obtain for themselves, if each were standing alone; in other words the bank's grand object is to assemble the individual resources of its members and organize and strengthen their purchasing power." It is a borrowing and purchasing (also a selling) agency rather than a lending one. So far as it has savings or deposits it must pay the usual local rate as it must on any funds it borrows; it must also accumulate a reserve, especially if it is without share capital.

One of the first difficulties to be overcome by cooperators is the same as meets the individual buyer: to assemble enough cash or credit to make their custom worth while, against the inevitable opposition of the retailer. The bank produces an aggregation of the individual units of purchasing power and is therefore a large buyer. It is a form of consolidating weakness into strength.

Let it alone, that it may depend on itself and develop strength by using that. Wherever aided co-operation exists it would have come in due time unaided, says Mr. Herrick, and would have been on a firmer basis. Observe how he puts this:

Government aid is the rock against which the ruralcredits movement has been dashed. Particularly is this the case with land credit. The bills which have received most attention in Congress provide for State aid, tax exemptions and special privilege to such a pronounced degree that if any of them became a law it would set the farmers apart as a class by themselves, to be pampered and spoon-fed at public expense; and, as a consequence, it would bring down upon them the ennity of all other classes.

Co-operative buying through this union of cash and credit will certainly and naturally lead to cooperative marketing. This must be so, since producing without profitable marketing destroys itself. A case of which we have direct knowledge illustrates the helplessness of the individual producer: an apple grower only a few miles from the west bank of the Hudson and this side of Poughkeepsie in distance had a large crop of the very best apples. He bought barrels, picked in the most careful manner, worked hard, and consigned his apples to the commission dealer here in the usual manner; the result was that he found he had contributed his crop and his labor to the needs of the city consumer, and then must add to the gratuity a cash loss of nine cents a barrel; further, at that same time, men were seen vending half-rotten apples in the streets on the East Side, using as sale stands some garbage heaps which just then were in a state of interrupted removal. Combination of growers and crops, with a special agent for handling, and with the work so done as to avoid encountering a glut in market would prevent such losses; the remedy is co-operation, and there is no other.

The scheme compactly stated by Mr. Herrick is essentially on the same natural lines as the vast British co-operative work as sketched in the "Chronicle" of June 12 and 19. Purchasing for consumption, producing from the soil, converting materials into finished products, and selling-these are steps in one consistent process which develops naturally but cannot be forced either by hot-house methods or by an impatience that cannot wait. Of course, agriculture should and must become more intelligent and intensive-so much we have been saying among ourselves, especially in the last two years. Whoever would catch a hint of what may be achieved in that direction might examine a little tale, evidently sketched from life with reasonable fidelity, of which the "Chronicle" gave a digest on September 5 last.

# AN APPEAL TO THE COURTS FOR ADEQUATE RAILWAY MAIL PAY.

Suits lately filed against the Government by the New York & New Haven road, acting independently and also in association with other roads operating in New England, are another reminder of the still unsettled case of pay for mails-carrying. It seems almost a self-evident proposition that a Government which assumes to teach right-doing and to punish and suppress wrong-doing by private business should very carefully practice right-doing itself in its own business, and should welcome and further, rather than scout and hinder, determination of any alleged injustice in its own dealings. These recent suits, which are brought independently of the railway's committee on this subject, are so much additional, inasmuch as suits claiming some 35 millions of arrears under an order of the Department under an earlier Administration are in the Supreme Court, set down for re-argument in October. This particular claim arose under the "divisor" order, whereby the average under the weighings (such as those were) was made seven instead of six, because the first day of the week

had gradually become a business day in this railroad work.

The grounds of grievance in the matter of weighings and otherwise have been set forth so often that the reading part of the public should be familiar with them by this time, and there seems slight use in publishing them for such part of the public as declines to take any interest in the subject. But the latest suit, supplemental to the other recent ones, is different in that it includes shipment of gold from Washington to Boston by post instead of express. The New Haven road alleges that the classifications of mail matter are determined by law and are not subject to alteration by any Department orders; that gold in bags does not conform to the characteristics of first-class matter, either in the wrapping or in the amount of stamps affixed; that neither is it fourth-class matter as defined by law, because beyond the weight limit and not open for convenient inspection; that this gold is not lawful mail matter under any classification, nor was it shipped as freight, and that the road was required to supply guards for the safety of this valuable mail matter (so-called), and it demands proper pay for carrying the gold and passenger fares for the guards.

But was this gold parcels post matter? At this point the growth of that great incubus upon the roads may be once more mentioned. A few weeks ago Mr. Burleson issued a statement in which he declared that "notwithstanding the falling-off in other mails, the parcels post has continued to grow and is now in every respect a better, as it is a larger, service than it was a year ago." This agrees with and recalls the summary of reports from postmasters, given out by the Department and sent on by the Washington newspaper representatives. The gist of this was in the "Chronicle" of April 10, but a very little of it may be repeated now as being apropos: The Chicago office was delivering 558 packages daily from farms in the last quarter of 1914, with a recent increase "of five names daily"; the St. Louis office was handling weekly over 2,500 parcels of butter, 2,000 cartons of eggs and 1,000 packages of fresh meat; in Brooklyn the campaign of education began with the public schools, and in Philadelphia application blanks were sent out to 62,000 householders; the Indianapolis office suggested that development would be swifter if the weight limit were raised to 70 pounds, and the measure limit included the standard crate of peaches; and Boston, Nashville, Denver, Providence and some other cities reported a brisk trade or excellent promise, or both.

A useful, commendable and growing service which ought to be applauded and stimulated as lowering the cost of living? Perhaps so; that is not the present question, or, at least, the sole present question. The question to be disposed of first is, at whose cost is this perhaps useful service rendered?

# FOREIGN TRADE OF UNITED STATES, 1914-1915.

In reviewing the foreign trade of the United States for the fiscal year ended June 30 1915 we are dealing with a situation in the truest sense abnormal, in that as a result of anomalous conditons abroad an enormous and phenomenal balance of trade in our favor has been built up with the benefit accruing therefrom confined to a comparatively restricted list of commodities. In other words, wholly as a result of the stupendous war in Europe the demand upon us for materials and supplies with which to assist in its prosecution has been and is still so great as to overtax our productive capacity, leading in a number of instances to an extension of manufacturing facilities.

It thus happens that notwithstanding a decided decline in the shipments of many leading articles that have come to be considered the bulwarks of our foreign trade, the year's aggregate of merchandise exports by an appreciable amount establishes a new high record. Coincidently there has been a material contraction in the value of imports, the war having in considerable measure prevented shipments in this direction from Germany, Austria, Belgium and Russia. As a result, the net merchandise export balance for the latest twelve months reaches no less than \$1,094,422,792—by many millions the greatest in our history and actually exceeding the entire merchandise exports from the country for as late a year as 1896-97.

The fiscal year started off with our exports month by month running behind the amounts for the corresponding periods of the previous year, the immediate effect of the breaking out of the war in Europe being not only to hamper trading but to interfere most seriously with means of transportation, the German lines ceasing operations at once and many vessels being withdrawn by the English and French for use as transports or auxiliary cruisers. This difficulty, however, was overcome later by the substitution of other and smaller vessels many of which belonged to neutral countries. Some contraction in the outflow of commodities from here was noticeable before the close of 1913-1914, and the July 1914 figures were moderately less than for 1913. But for the next three months (August to October, inclusive) the falling off was very pronounced and for the halfyear ended Dec. 31 1914 the decline from the corresponding period of 1913 was in excess of 250 million dollars. The war itself, however, began to give impulse to our export trade before 1914 had closed and with the opening of 1915 merchandise exports rose to a record breaking scale and have so continued ever since. From this port alone the exports-which for the first half-year were some 31 millions behind-show a gain for the twelve months of fully 330 million dollars leaving 74 millions to cover the augmentation at other ports.

Horses and mules have gone out so freely as to almost give the impression that the country was being denuded of these useful animals, and it is hardly an exaggeration to say that now good horse flesh is decidedly at a premium in this country. Automobiles, breadstuffs, brass, chemicals and drugs, cotton and woolen wearing apparel, barbed wire, explosives, leather and manufactures, meats, firearms and zinc, too, have been shipped in unprecedented aggregates, some of the items never before having attained prominence in our foreign export trade. As against the articles already mentioned, however, the outflow of which owes its stimulation entirely to the European conflict, many important commodities have been adversely affected to a notable extent. Conspicuous in this category are agricultural implements, cars for railways, bituminous coal, copper, cotton (but more in value of the staple than in quantity, the war having been responsible for a marked drop in prices) fertilizers,

registers, locomotives—in fact, the general run of machinery except that used in metal working—iron pipes, steel rails, iron and steel sheets, tools, naval stores, mineral oils, tobacco, wood and manufactures and many other articles of lesser prominence but important component parts of the trade totals.

The mere statement that exports of munitions and war supplies have very largely increased is evidence enough that it is to the war itself that we owe the year's extraordinary expansion, but a study of the details makes assurance doubly sure. Furthermore, the statistics of the movement to the various entente countries furnish additional proof. Our exports to the United Kingdom in the late fiscal year were some 300 million dollars greater than in 1913-14, to France they considerably more than doubled, and the same is true of Italy, although in this latter case the increase is in most part ascribable to the fact that prior to the country's entrance into the war commodities for Germany entered Europe in that way. Neutral countries of North Europe, the undoubted media through which the Teutonic allies have likewise received supplies, also show a phenomenal increase in the absorption of our goods; these comprise the Netherlands, Norway, Sweden and Denmark. On the other hand the outflow from here in almost all other directions fell off and quite largely so to Canada, South America and China. In the case of our neighbor to the North the decline follows an important falling off in the previous year.

As indicating the changes in the foreign trade totals we append a compilation giving the imports, exports and balances of merchandise, month by month, and quarter by quarter, and quarterly returns for gold and silver for the last two fiscal years

twine, furs and skins, builders' hardware, cash for ranways, bituminous coal, copper, cotton (but more in value of the staple than in quantity, the war having been responsible for a marked drop in prices) fertilizers, twine, furs and skins, builders' hardware, cash

008,234, leaving the enormous net balance of exports of \$1,094,422,792 in the latest year against \$470,653,491 in 1913-14 and \$652,875,915 in 1912-13. The former record balance was \$666,431,554 in 1907-08, the year of depression here, and totals in excess of 600 millions are to be noted in 1897-98 and 1900-01.

The increase in the aggregate value of exports in 1914-15 is to an important degree to be ascribed to higher prices obtained. Thus the average price of wheat was appreciably above that of the previous year-\$1.28 per bushel comparing with 95.2 cents and for flour the contrast is between \$5.81 per barrel and \$4.605%. Moreover, corn averaged 80.1 cents against 74.7 cents; oats 58.4 cents against 41 cents and in the general run of provisions moderate increases are to be recorded. But these are to a large extent offset by the decline in value of one commodity-cotton-which from an average price of 12.8 cents in 1913-14 fell to 8.5 cents in 1914-15. Breadstuffs exports owing to the almost insatiable demand from Europe for wheat and flour, which engendered fears at times that supplies for home use would be depleted, reached a total far in excess of any former aggregate and ran over 400 million dollars ahead of 1913-14, and gains of unthought of magnitude are to be noted in horses and mules, autos and cotton wearing apparel.

Glancing over the import list we find evidence of contraction in a majority of the articles and especially those for which the war had caused an increased demand. Chemicals, drugs, etc., for instance, exhibit a decrease of some 12 millions, and copper and manufactures over 21 millions and equally notable losses are to be recorded in fertilizers, tin, cotton manufactures, fibers (flax, etc.) and manufactures, vegetable oils, raw silk and silk manufactures and smaller declines in a large list of goods. There are, of course, some instances of increasing imports in 1914-15, but the list is a comparatively short one with the gains of little moment except in such articles as India rubber, Egyptian cotton, fresh meats (from Argentina), sugar and wool.

The movement of gold was in favor of the United States in 1914-15. In the earlier months of the fiscal year the flow of the metal was outward, the efflux being largely to Canada on English account with a fair movement direct to Great Britain. But beginning with January a return movement from Canada set in, gaining strength in later months and reaching a climax in June when the amount of gold passing through Ogdensburg from Ottawa aggregated \$46,-755,494. In addition to this last named amount there were arrivals of \$2,437,539 at San Francisco from the Orient during June and nearly 11/4 millions at New York. In all, the imports for the month were \$52,341,740 and the exports \$2,821,988, leaving the net influx \$49,519,752. This served to wipe out the previously existing balance against us and leave an import balance of \$25,344,607, the year's inward flow having been \$171,568,755 and the exports \$146,224,148. Of the imports for the twelve months some 110 millions were from Canada, 26 millions from the Orient and 12 millions from France. In 1913-14 we lost net \$45,499,870 and in 1912-13 and 1911-12 totals approximating 8 million dollars, but 1910-11 showed a net import of \$51,097,360. The movement of silver exhibited a shrinkage from 1914-15 or any earlier year back to 1903-04 and on balance we sent out some 217/8 million dollars.

# LISTINGS ON THE NEW YORK STOCK EXCHANGE FOR THE HALF-YEAR.

The listings on the New York Exchange during the first half of the current calendar year, while small in amount, were even more radically affected than appears on the surface by the untoward combination of events during or immediately preceding this period, namely the collapse of credits that for several months attended the outbreak of the foreign war, the world-wide disturbance of business operations still due to it, and the uncertainties political, legislative, judicial and labor-factional which have of late hung over business enterprises in the United States. To the listings of the half-year not a single steam railroad or electric railway contributed anything whatever in the nature of shares offered for subscription to its shareholders.

Still more striking is the fact that, if we omit the stocks issued by the New York Central Railroad (the new company) for the absorption of the Lake Shore and other subsidiaries, and by the Interborough Consolidated Corporation for the readjustment of the finances of the Interborough-Metropolitan Co. of New York, there is left of the railroad and electric railways shares listed in the half-year only 6 million dollars, and of this amount 4 millions represents stock which one company (the Atchison) was obliged to issue in exchange for convertible bonds tendered by the holders for that purpose.

Moreover, while the total amount of bonds issued for new capital is shown by our listing table to be 235 millions, or about the same as the restricted totals for several years past, even this small sum is swelled by no less than 92 millions of  $4\frac{1}{4}\%$  bonds of the City and State of New York, and the remainder for the most part is made up of the bonds of six corporations, three of them railroads, the New York Central, Illi-nois Central and the Pittsburgh Cincinnati Chicago & St. Louis, and three industrial enterprises, namely, the Consolidated Gas Co. of New York, American Agricultural Co. and Chile Copper Co. The few most notable bond issues for the six months have as yet not been listed, several of these being mentioned in a subsequent paragraph of this article.

The usual comparative summaries of the amounts of securities listed during the six months ending June 30 in each of the last ten years are as follows: SIX MONTHS' LISTINGS ON NEW YORK STOCK EXCHANGE.

Bonds. (Str Months.)	Issues for New Capital, &c.	Old Issues Now Lasted.	Replacing Old Securities.	Total.

Tota	۱			\$168,317,000

Not only are these bond listings few in number, but they show even for the large, powerful corporations a practically complete abstention from new undertakings. The New York Central RR. has listed 40 millions of its Refunding & Improvement 41/2s, but they were issued merely for the retirement of shortterm notes and other unfunded obligations, representing an accumulation of indebtedness incurred on account of improvements and additions begun and largely prosecuted in a more prosperous period. The Chicago & North Western, the Southern Railway and Morris & Essex have issued and listed some considerable blocks of bonds, but these were chiefly or wholly for refunding old bonds. The Illinois Central with its 10 millions of Joint First & Refunding 5s, and the Pittsburgh Cincinnati Chicago & St. Louis with its 101/2 millions of guaranteed consols, 4s and 41/2s (along with 3 millions for refunding), are the two railroad companies most noticeable in our compilation for improvement issues.

The miscellaneous bonds include the municipal issues, of which we have spoken above, also the Consolidated Gas Co. of N. Y., 25 millions of convertible 6s; the Chile Copper Co. (the new Guggenheim enterprise), 15 million convertible 7s; the American Agricultural Chemical 7 million convertible debenture itized for the Louisville Gas & Electric Co. (one of the

o://fraser.stlouisfed.org

Byllesby companies), 81/2 millions of 1st & Ref. 5-year 6s, and the Montana Power Co., 6 millions 1st & Refunding 5s.

The merger by which the New York Central RR. Co. became the owner in fee of a direct line from New York to Chicago and numerous branches and feeders, explains the listing of 2491/2 millions of stock of the consolidated corporation, replacing 2251/2 millions of stock of the old local organization (the New York Central & Hudson River RR. Co.) and outstanding minority shares of former subsidiaries. The Interborough-Metropolitan Company of New York, the holding company for transportation interests in this city, subway, elevated and surface, which was hampered by over-capitalization, has successfully carried through a readjustment under title of Interborough Consolidated Corporation, which company on its 4534 millions of new preferred shares, now listed, has just begun the payment of dividends; the \$93,-262,700 of common stock of the old company is represented by 932,627 common shares without par value, also listed.

The prosperity that has come to a great mail order house in Chicago is borne witness to by the 50% stock dividend, calling for the listing of \$20,000,000 common stock of Sears, Roebusk & Co. The voluntary conversion by the holders of bonds into stock has been the occasion for the listing of 21 millions of stock of the American Telephone & Telegraph Co., as well as of 4 millions of common stock by the Atchison Topeka & Santa Fe Ry and \$308,500 of Norfolk & Western Railway common. Among the miscellaneous industrial stocks for the first time appearing on the list are the common and preferred shares of the Manhattan Shirt Co. (described in V. 100, p. 395, 402, 405, 1514), the National Cloak & Suit Co., the Booth Fisheries Co. of Chicago (see V. 100, p. 563), and the Willys-Overland (motor mfg.) Co., and the capital stock of the Butte & Superior Copper Co., Ltd. (V. 100, p. 1595), and the Tobacco Products Corporation.

The several stock issues and the objects of each are embraced in the following compilation:

As it happens, the principal corporate bond issues of the half-year, though not as yet isted on the New York Stock Exchange, have at least received its official recognition, through the fact that dealings have been by it permitted in their part-paid subscription certificates. The loans in question are the Chicago Milwaukee & St. Paul General Refunding Series B Convertible 5s, \$29,141,300, sold in January; the N. Y. Central RR. 6% 20-year Convertible bonds, \$100,000,000, underwritten and offered at par to shareholders of record April 1; the Pennsylvania RR. (a) Consolidated (now 1st) Mortgage 41/2s, \$49,000,-000, sold to Kuhn, Loeb & Co. in January, and (b) General Mortgage 41/2s, \$65,000,000, sold by the last-named firm in May. These large issues, speaking broadly, were for the greater part put out in order to fund or refund obligations maturing or shortly to mature, and to reimburse the treasury for such outays.

Short-term notes such as the foregoing, if not paid or funded at maturity, must of course be renewed or extended. Hence many of the foregoing issues, such as the Baltimore & Oh o, Missouri Pacific and N. Y. New Haven & Hartford, are in effect largely, if not wholly, merely renewals of previously existing notes issues.

# WORDS OF WISDOM-DANGER OF CREDIT INFLATION.

We take the following illuminating article from the issue of the "Pacific Banker," of Portland, Oregon, of Saturday, July 17:

Centripetal vs. Centrifugal in To-day's Finance.

Centripetal vs. Centrifugal in To-day's Finance. The any period of untoward inflation and riotous speculation two ele-ments are necessary—sentiment and monetary resources. The fact is that superabundance of the latter almost inevitably produces the former. When bankers are urging money upon their customers, it is but natural that customers should borrow in order to buy for the rise. This is speculation, an appetite which grows by what it feeds upon, and why the elasticity of a country's money is needed is that the surplus—the amount not needed to do the business of the country—may retire and not by its presence be continually forcing things towards speculation. Theses views be correct, there probably nover was a time in the his-fory of the country when it was so ripo—from the standpoint of mone-tary resources—for an era of speculation to run riot as now. True, the sen-above yonder horizon. And this, perhaps, is sufficient up to a certain point to keep out of the market those whom the banks wish to lend to. But a condition is now deviciping into the manufacture of war supplies. There is a profit, a big profit, in this undoubedly. An evidence of it is seen hat buy up of the on the stock exchanges of what are called war spances—U. S. and Bethlehem Steel, Winchester Arms, &c. What must form the nucleus for a more store in all securities, and, with the upprecedented amount of money now available, produce riotous speculation the country over. What we some of the evidences of the superabundance of the American

form the nucleus for a feverish market in all securities, and, with the imprecedented amount of monoy now available, produce riotous specula-tion the country over. What are some of the ordences of the superabundance of the American monostary position? Way back last March, the figures being the last given not by the Comptreller of the Currency, the excess reserves of the national banks alone were 734 millions. Four hundred and sixty five millions of this excess was produced by the simple expedient of lowering the limit of reserves of member banks of the new Federal system, as the same was provided by law. The reserves of central reserve cities were reduced for 25 to 18%: those of ordinary reserve cities from 25 to 15%, and country hanks from 15 to 12%. The result was 465 millions, ready to be thrown into the circulation, or used as a basis for four times that much of loaning capacity. Since the first or the year, there has probably come into this country, because of the favorable balance of trade, 180 millions of gold. And of course nothing can create speculative sentiment more surely than the sight of the yellow metal pilling up in the larger centres. Another pronounced loverage for credit expansion is the fast that a certain por-tion of the reserves in the Federal banks can be and are expected to be taken as a basis for the lawance of Federal Reserve notes, by the process of issuing these notes against a reserve of 35%. And in this connection, namely, that silver and the greenbacks, which in one case is flat money and in the other mere promises to pay, are resorves for national banks and national banks notes are reserves for State banks. Now, when we recollect that with all this money in sight the country has apparently settled down to the belief that under our new system there can be no such thing as a paid, and in addition the officers of the Federal banking sys-tem are using all the powers of their office to get member banks to re-discount, nob because there is a demand for the same, but in order that t

members thereof childing banks for not doing their duty by the new sys-tem in using its rediscounting features more, threatening in one case to take away a Federal bank from a certain city and give it to another, the ordinary banker may be somewhat bewildered as to what his rightful duty in the matter is. Its seens to us that the best banking thought of the country is justified in the view which it takes, that the abnormal facilities for credit expansion which we now possess—and one of no small moment, which we have not mentioned, is that of domestic acceptances by State banks—is by no means a matter for unstinted congratulation, but rather for serious consideration—is timely and that a clear view of what it may lead to should be impressed upon every banker in the country.

# APPLICATION OF CLAYTON LAW TO CREAM OF WHEAT CASE.

Judge Hough in the lower Federal (U.S. District) Court in this city on July 21 rendered a decision which may be fairly regarded as important in that it is the first case that has come to public attention, at least, regarding the application of Section 2 of the Clayton Act. This section makes it unlawful for any person "engaged in commerce to either directly or indirectly discriminate in price between different pur-chasers of commodities \* \* \* where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce provided that nothing contained [in the Act] shall prevent diserimination in price between purchasers of commodities on account of differences in the grade, quality or quantity of the commodity sold, or that makes only due allowance for difference in the cost of selling or transportation or discrimination in price in the same or different communities made in good faith to meet competition; and provided further that nothing contained (in the Act] shall prevent persons engaged in selling goods, wares or merchandise in commerce in selecting their own customers in bona fide transactions and not in restraint of trade."

The case in question was that of the Great Atlantic & Pacific Tea Co. vs. Cream of Wheat Co. Though the application was for only a preliminary injunction, pendente lite, preventing the carrying out of the system of sales hereinafter described, or the refusal to sell to plaintiff, which the Court denied, all of the essential facts were, as the Court points out, set forth with clearness and without contradiction on any material point, and the decision may therefore be re-garded, so far as the lower Court is concerned, as practically

on the merits. The Court says further: The novelty of the litigation in point is such that a careful statement of what these facts are is more than excusable, for upon them will depend con-clusions of law toward whose final settlement the action of this Court is but a preliminary

It should be noted that while the Court refers at some length to the question of the violation of the Sherman law, which was raised in the bill of complaint, no ruling is made on that point, the Court making the following remark with regard thereto:

I shall, therefore, follow counsel (none of whom has discussed the appli-cability of the Sherman law) and say no more about it. It appears from the bill of complaint that the Great Atlan-

tic & Pacific Tea Co. had for years had satisfactory business relations with the defendant, and in the year 1909 purchased 4,250 cases of Cream of Wheat, each containing 36 packages, for which it paid \$16,787 50, and in 1914 9,350 cases for which it paid \$36,932 50. Judge Hough emphasizes the fact that the plaintiff owns more than 1,000 stores, a large pro-portion of which are "economy stores," having but a single attendant, giving no credit, making no deliveries and without other expenses of the usual grocery, seeking to compensate for lack of convenience by cheapness of price, thus being able to buy like a wholesaler (on perhaps no great scale) and sell like a large retailer.

After the decision of the U.S. Supreme Court in the Dick, R. H. Maey & Co. and other cases, regarding the validity of cut prices, which for the most part turned upon questions of copyright, patents, or other considerations not in the least involved in the ease in question, the defendant, upon advice of counsel, evolved a new selling plan described by the Court as follows:

ns follows: By the printed scheme just mentioned, the Cream of Wheat Co. hold itself out as refusing to sell to "consumms, retailers or chain or department stores." It reserved the right to refuse to sell to anybody who falled to comply with any request made, and deemed by defendant beneficial to it-self, the "irade at large" or the "interests of the consumer"; and announced as its policy that it would "confine our sales exclusively to wholesalers." Sales, however, once made, were absolute, and the transaction closed. Sale was to imply no agreement to maintain or fix any price on a re-sale: nevertheless, defendant requested that retail prices be kept at the level recommended by it. This request, taken in conjunction with the reserve right to cease selling to any one who did not comply with requests from the same source, was in effect saying plaling enough, keep up the rotail price or we will stop supply-ing you if we think such stoppage profitable. I do not suppose that this sales scheme was a contract, or anything enforceable against defendant, but it serves to show a professed state of mind.

Notwithstanding, however, this published sales plan, defendant well knowing that plaintiff sold directly to the consumer, sold Crean of Wheat to plaintiff at wholesale rates and in large quantities, upon condition that in making sales over the counter no smaller price should be charged than the small retailers had to ask in order to get a fair profit, viz., not less than 14 cents per package. In or about January 1915 plaintiff refused to observe this agreement or request and openly sold Cream of Wheat at its "Economy Stores" for 12 cents per package.

Judge Hough says that the business of the defendants has been loosely called manufacture, but may be more properly described as the selection and clearing of a by-product of a true manufacture, viz., flour-making, being, in fact, no more than purified middlings. The article, it is stated, is not one of necessity, is not patented, any one can make it who can get middlings, and the amount of the material annually required by the business of defendants is less than one per cent of the amount produced by the millers of the United States. Its monopoly is said to be a perfectly law-ful monopoly, in the trade name of "Cream of Wheat," and "by the law of trade-mark and unfair competition no one but defendant can sell under the name chosen by defendant what any one can make and sell under another and non-infringing label.'

The following remarks of the Court on the question of price discrimination and lessening of competition, as applied to the case under review, are of especial interest:

case under review, are of especial interest: Section 2 plainty identifies the lessening of competition with restraint of trade (Cf the body of the section with the last exception). But price dis-crimination is only forbidden when it "substantially" lessens competition. Construing the whole section together, the last exception reads in effect that a "vendor may select his own bona fide customers providing the effect of such selection is not to substantially and unreasonably restraint of trade to refuse to deal with a man who avowedly is to use his dealing to injure the vendor: when said vendor makes and sels only such an advertisement-be-

vendor; when said vendor makes and sells only such an advertisement-be-gotten article as Cream of Wheat, whose fancy name needs the nursing of carefully handled sales to maintain an output of trifling moment in the food market, is beyond my comprehension."

# SOME THOUGHTS ON THE FEDERAL RESERVE ACT.

Fred. E. Farnsworth, General Secretary of the American Bankers Association, was a speaker at the convention of the Michigan Bankers Association at Grand Rapids, Mich., the present week-July 27th, 28th and 29th. After extending the "greetings" of the American Bankers Association to the Michigan bankers and speaking in a general way of the Association's activities as well as the scope of its work, its vast membership, and the important part that Michigan and Grand Rapids has had in the work of the Association from its organization in officers and committeemen, who have been residents of Michigan, Mr. Farnsworth spoke as follows:

The Federal Reserve Act has been called a miracle of legislation. Considering its political source, its limitation, and the manner of its preliminary discussion, the designation is probably correct. It must be remembered that the investigation into the operation of the so-called "Money Trust" and the bitter prejudices against Wall Street were inter-grouped parts of the proceedings which led up to the enactment of the new harding law.

inter-grouped parts of the proceedings which led up to the enactment of the new banking law. It was the confersed intention of many of the framers of the bill to pro-hibit what they called stock gambling and to punish those whom they charged with having a monopoly of the credit of the nation. Despite the agitation against Wall Street and speculation, despite the dedre to punish those who were classed as offenders and monopolists, and despite large indulgence in the fallacy that the issuance of what is called money was a sourceign power of the Government, the parts of the act which deal with these matters are comparatively insignificant and do not materi-ally affect the operations of the act as a sound financial and economic measure.

measure. Human wisdom is not sufficiently profound to anticipate, in the form of legal provision, every possible contingency which may arise in the trans-actions of trade and finance. The Federal Reserve Act is not a miracle in this respect. It leaves very much to subsequent interpretation, and the regulations that have so far been issued by the Federal Reserve Board have become really parts of thu bey differing from what is written is the act only in their superstituter. law, differing from what is written in the act only in their susceptibility change

to change. When Congress was in doubl as to what should be done in any particular, it delogated the power of decision to the Foderal Reserve Board and there were very many delegations of such authority. The regulations issued by the Federal Reserve Board have come as the result of wide investigation, sincers study, and after connsel with many bankers, with the Governors of the Rewerve banks and with the Federal Advisory Council.

Notes, where the statements of the set of th

The experience has brought no justification for the establishment of twelve Reserve banks. It was a departure from the correct interpretation of the law when the Reserve Bank Organization Committee divided the country into twelve districts. It will be remembered that twelve was the number of districts provided for in the bill as it passed the House, in the Senate this provision was changed to read "Not less than eight nor more than twelve."

The law as it was enacted provides that "the districts thus created may

The districts thus enacted provides that "the districts thus ereated may be re-adjusted and new districts may from time to time be created by the Federal Reserve Board, not to exceed twelve in all." It is a fair reading of this provision, that Congress intended that the Federal Reserve Board shall have the power and the right to determine whether or not there should be more than eight districts and the boundaries thereof.

When the Organization Committee presumed to fix the number beyond eight it usurped a power which Congress intended should be exercised only by the Federal Reserve Board.

There has been much discussion of this matter on the light of experience, because there is obviously not business enough to test the facilities of even eight Reserve banks.

There is constant complaint that the banks are not doing enough business to warrant their existence. In a recent speech before the New England bankers, Governor Hamiln (of the Federal Reserve Board) urged bankers to use the privilege of re-discount, whether or not they were in need of additional credit at the Reserve banks. It is difficult to reconcile a recommendation to borrow with the lack of

It is unificint to reconcide a recommendation to borrow with the tack of necessity for so doing. Business men borrow when they are in need of bank credit or funds. There is no reason why banks should borrow when they have resources and more than enough resources to meet every demand made upon them. Despite the situation which is created by an excessive number of Reserve banks it is doubtful if it would be advisable to recommend any reduction

Business is rapidly adjusting itself to the present situation and it is a fair prediction that if the number of Reserve banks were reduced branches

Business is rapidly adjusting itself to the present situation and it is a fair prediction that if the number of Reserve banks were reduced branches would have to be established. It is also a fair prediction that in the course of ordinary development inder the Reserve Act branches will be established and twelve banks would be no more than are necessary to meet the requirements of trade. It is not expected that the twelve banks will do an equal amount of basiness or make equal profits. The large Reserve banks in the large cities will assume the discharge of certain functions (such as the protection of the gold reserve and the direction of foreign-trade affairs) and these things would be properly within the scope of their business. The smaller Reserve banks will not be much concerned with such matters. Another matter of great interest to banker at this time is the supervision of the affairs of the member banks. As the Reserve Act develops the relations between the Reserve banks and their members will become more infinate. This was recognized by the Federal Reserve Board in the regulations it issued as to the admission of State banks into the system. The bank examinations of the State supervising authorities will be accepted by the Reserve Board, if the Reserve Board is satisfied as to the state banks (which foin the system) is to be the concern of the Federal Reserve Bank of which they are members.

What is true of the State banks in the latter respect is true also of National banks, and it is daily becoming more apparent that the Federal Reserve Bank of the district is perfectly competent to supervise member banks and give assurance that their condition meets all requirement. The Federal Reserve Board is now commonly recognized as the governing power in the national banking world. It has so well discharged its duties that the public as well as the bankers look upon it with confidence. Nothing would be more satisfactory than to have the power of super-vising all banks that are members of the Reserve system rest finally in the Federal Reserve Board.

Federal Reserve Board.

Federal Reserve Board. T have selected the illustrations given out of a large number for the pur-pose of indicating the trend of banking thought. Of one thing there is complete assurance, the new banking system has come to stay and it should stay. Opposition to it in its entirety is decidedly inadvisable. To repeal it would be a great mistake. To substitute another complete scheme of banding for it would. I think, be equally an error. Fundamentally the law is sound and it offers as good foundation on which to build a perfect banking structure as the country will ever secure. There is much in it that will have to be changed either by amendment or by interpretation.

The re-discount provision is ample assurance against panie, the country's

Find results of the provided is an interval of a state of a state, the equility is now safe from the raids of foreign nations, and banking facilities abroad may be established whenever the foreign trade of the ocuntry develops sufficiently to indicate that such action will be profitable. But, we still have a patchwork currency system and our currency is elastic only in the direction of expansion. But, every problem that comes up under the new law is being given adequate study and every one of them will be provided and a study and every one of them.

up under the new law is being given adequate study and every one of them will be ultimately solved. What it seems to me advisable for bankers to do is to study the law, keep pace with its development, to be familiar with every regulation of the Federal Reserve Board and to show no hesitancy in advertising the ways in which the law does not operate satisfactorily. We had a good start toward a sound and scientific banking system. Collectively and individually we are obligated to contribute to its devel-

opment,

If there are no erroneous interpretations of the act, if it is allowed to If there are no erroneous interpretations of the act, if it is allowed to develop naturally according to its demonstrated needs, and if Congress, the Reserve Board and other Government officials charged with some measure of banking supervision, will refrain from imposing artificial re-atraints on such development, there is no reason why the system should not reach eventual perfection. A law which expresses the common demand and is flexible enough to reserved to event used is always the baset law. The easiest to apple and the

respond to every need is always the best law, the easiest to apply and the easiest to enforce.

# PRECAUTIONS BY NEW YORK RESERVE BANK RE-GARDING ACCEPTANCE DEALINGS.

The New York Federal Reserve Bank is evidently taking proper precautions in dealing in bankers' acceptances. This is apparent from the following taken from the "Journal of Commerce" of yesterday:

There has been considerable discussion in financial circles lately regarding the recent rule adopted by the Federal Reserve Bank of New York gov-erning the purchase of bankers' acceptances in the open market. The bank in buying acceptances in the open market is insisting upon the seller of the In buying acceptances in the open market is insisting upon the seller of the acceptances furnishing the bank with a guaranty which would protect the bank against any loss arising out of irregularities in the way of endorse-ments or for loss that may occur through the purchase of an that acceptance may have been lost or stolen prior to the sale of the paper to the Reserve bank. In most cases—that is, wherever possible—the Federal Reserve bank requests a guaranty of the endorsement on the acceptance by the accepting bank. There has been some criticism of this practice, but it is defended on the ground shat the procedure is necessary as a protection.

The Reserve bank buys acceptances either from banks, trust companies or through note brokers. In the case of the re-discount of acceptances, the Reserve bank has the endorsement of the member bank which applies for the re-discount, but in open-market operations the bank sometimes deals with third parties, that is, neither the drawer nor the accepting bank, and it is essential, it is contended, that the bank should feel satisfied that the endorsements on the acceptance are genuine and proper in overy way. For that reason, it is requiring brokers who offer accepting bank, which places its stamp on the back of the acceptance as a guarantee of the endorse-ments. The accepting bank is in a position to know whether the signature of the drawer on the back of the drawer or his signature. Moreover, in many instances an acceptance has several endorsements on the back of it, and the Reserve bank in making the purchase must look to the last endorser in the event of non-payment. If the Reserve bank does not know the signature of the last endorser—the party may be absolutely unknow to the bank—then the Reserve bank will not buy the acceptance unless the seller gives the back some guaranty.

signature of the last endorser—the party may be absolutely inknown to the bank—then the Reserve bank will not buy the acceptance unless the seller gives the bank some guaranty. It was explained yesterday that in the case of a bank or trust company which sells its own acceptances there is no difficulty in obtaining the en-dorsement of the accepting bank. In some instances where the request for an endorsement was requested the banking institution has compiled, but infinated that it did not fully believe in the practice adopted by the Reservo bank. This institution pointed out that inamuch as it was the acceptor and the sale of the acceptance was made directly to the Reservo bank, no question of the genuineness of the drawer's signature could possibly arise, and that its acceptance on the face of the bill was a guarantee of the bill and its endorsement.

its endorsement. The rule adopted by the Reserve bank will cause some difficulties, it is believed, in cases where an acceptance is sold in the open market and passes through several hands before it is purchased by the Reserve bank. In such instances, it is pointed out, the seller of the paper will have to give the Reserve bank a guarantee of his own, and if his own guarantee is not consid-ered satisfactory, the endorsement or guarantee in the form of a letter will have to be obtained from some responsible party acceptable to the Reserve bank. bank.

### REGULATIONS GOVERNING RE-DISCOUNT OF TRADE ACCEPTANCES COMMENDED.

The issuance on the 15th inst. by the Federal Reserve Board of regulations governing the re-discounting of trade acceptances, is the subject of commendatory remarks by William F. H. Koelsch, Vice-President of the Bank of the United States and First Vice-President of the New York Credit Men's Association. The comments of Mr. Koelsch are of particular interest in view of the fact that he expressed the belief some months ago that the Reserve Board would deal with the question in exactly the same manner as is out-

deal with the question in exactly the same manner as is outlined by it. Mr. Koelsch is quoted in the "Daily Trade Record" of the 23rd inst. as saying:
The regulations issued by the Federal Reserve Board last week, indicating a preferential rate for the re-discounting of "trade acceptances." may be regarded as a timely step in the right direction. It is quite evident that the purpose of the Federal Reserve Board is to encourage along practical lines the use of the acceptance system by American merchants, anticipating a more general business in re-discounting by member banks. The viscoust regulations by the Board bearing upon the character of paper eligible for re-discount appear to have been issued with a view to leading up to the regulations regarding trade acceptances.
It has been stated that in view of the fact that American business men are accustomed to trade discounts of all sorts and descriptions, it will be very difficult to get business men to change their methods of paping for goods purchased. This may be a fairly good excuse to offer, but it lacks sound reasoning. The solution of the problem seems to lie in eliminating entirely the practice of trade discounts except for cash. By doing this it is well to consider that the following results will be accemptished:
The final ending of the perincicous practice of taking unauthorized and uncarned discounts.

The final ending of the periods as a period of the period of the periods of the periods and uncarned discounts.
 The conversion, automatically, of such portion of a merchants' liquid assets consisting of book accounts to self-liquidating commercial paper, in form desirable for re-discount in the open market at advantageous rates.
 The most satisfactory definite solution of the assigned account prob-

1. The most satisfactory definite solution of the assigned account prop-fem. The action of the Federal Reserve Board in making such an earnest endeavor to encourage the use of trade acceptances as is ordeneed by the regulation which provides for a lower rate of discount for this class of paper, should be supported by both bankers and merchants. Earnest co-operation along these lines will accomplish the result desired. It seems quite evident that the question reguling the most attention at this time is that of eliminating trade discounts, as by doing so, whatever possible objection there might be to converting rigid book accounts into liquid trade acceptances would seem to be removed. It may be well to mention, also, that in view of the desire of the Federal Reserve Board to have this change made, it is sure to come about in time, although it may be necessary for us to have a period of tight money before this desirable change in business methods will be fully brought about. It must be obvious to the thinking man that if an account is setiled by the acceptance of the debtor for the net amount at a fixed maturity, the smaller merchant could, through his banking connections and possibly also in the open discount market, convert the same into cash more readily

by the acceptance of the deduction the her and the at a fixed mathrity, the smaller merchant could, through his banking connections and possibly also in the open discount market, convert the same into cash more readily than he can under existing conditions. This is based, of course, upon the strength of the acceptor, and there could be no question as to the bill being the result of an actual commercial transaction. The subject is one which should particularly interest merchants of small or moderate means. Just one more reference to the desirability of converting accounts re-ceivable into acceptances. Under such a condition the merchant of small or moderate means would not be placed in the position of being forced to hypothecate his accounts receivable in order to meet his own engagements and to prevent financial embarrasment, which condition occasionally arises, and frequently results in scious loss to general creditors and harahy criticized bankruptcy proceedings. The volume of commercial paper created in this way would regulate it-self automatically if based upon actual commercial transactions, and the rule would apply equally and proportionately to the dealer of large and small means alike. It is a subject, however, which should receive serious and prompt attention by both meschants and their bankers.

### FURTHER WITHDRAWAL OF GOVERNMENT DEPOSITS FROM BANKS.

Announcement that a call would be made on the national banks for a return of Government funds to the amount of \$3,097,500 between Aug. 10 and Aug. 25 came from Secretary of the Treasury McAdoo on the 27th inst. This action is in furtherance of the Department's policy of limiting these funds in the depositaries to the amount necessary for the transaction of the Government's business. Several months ago \$5,000,000 of the Government's funds were withdrawn from the national banks. It was explained at the Treasury Department this week that the Federal Reserve banking system is now well established, and that should any of the Government depositories be handicapped by the withdrawal of Federal funds they can easily realize cash by re-discounting their commercial paper.

# CONNECTICUT BANKS SEEK TRANSFER FROM BOS-TON TO NEW YORK RESERVE DISTRICT.

An application for their transfer from the Boston Federal Reserve District to the New York District has been made by fifty-two national banks in Western Connecticut. The petition is signed by the Presidents and Cashiers of the banks concerned, the aggregate capital and surplus of which is \$24,161,000, and their total deposits \$67,769,878. In justification of the change, the Connecticut banks, in addressing the Reserve Board, say: Ever since the beginning of the national banking system these banks have

laways transacted the majority of their banking system these banks have always transacted the majority of their banking business with New York, which is their natural center and to which mostly all business of a financial as well as a commercial nature automatically flows. To try, therefore, to change this natural flow and trend to an artificial and forced point seems, if we may be allowed to use the simile, like trying to make water flow up hill. If left in the Boston District, these member banks can never derive the benefits from the system which they ought to, because it will be unnatural, inconvenient and burdensome.

The banks contend that ten times as much business is done with New York as with Boston.

# FEDERAL RESERVE APPROVALS AS REGISTRARS-STATE BANKS ENTERING SYSTEM.

The Irving National Bank and the American Exchange National Bank of New York have been authorized by the Federal Reserve Board to act as registrar of stocks and bonds.

The Fidelity Trust Company of Kansas City has become a member of the Federal Reserve system.

The German American Bank of Minneapolis has also joined the Reserve system; so too has the Badger State Bank of Milwaukee; the latter claims to be the first State institution in Milwaukee to become identified with the new The bank has increased its capital from \$100,000 system. to \$200,000.

### CHAIRMAN NAMED FOR NEW ORLEANS FEDERAL RESERVE BRANCH.

P. H. Saunders of New Orleans was yesterday elected by the Federal Reserve Board as Chairman of the board of directors of the New Orleans branch of the Atlanta Federal Reserve Bank. The New Orleans branch is the first of its kind authorized under the Federal Reserve law.

### RESTRICTION OF USE OF FEDERAL RESERVE NOTES IN CONNECTION WITH MUNITION PURCH-ASES NOT POSSIBLE.

The efforts of ex-Representative H. Robert Fowler of Illinois to have restrictions placed around the Federal Reserve notes with a view to preventing their use by banks in connection with transactions involving the sale of munitions of war have failed. In a letter to Mr. Fowler, who petitioned the Board in the capacity as General Counsel for the newly organized Labor National Peace Council, the Reserve Board declares that it lacks the power to impose the restrictions sought. Its letter, addressed to Mr. Fowler by Governor Charles S. Hamlin, under date of the 29th inst. says:

Your petition filed June 9 1915 on behalf of the Labor National Peace

Your petition filed June 9 1915 on behalf of the Labor National Peace Council was duly received and submitted to the Board. I am directed to say in reply that after analyzing and considering the avernents and allegations contained therein, the Board has concluded, under advice of counsel, that it is without jurisdiction to try the case presented and that it is not within its power, under the laws of the United States, to impose by regulation the restrictions which you seek to have imposed upon the operations of either Federal Reserve banks or national banks. banks.

banks. Your request for a public hearing is accordingly denied. I am further directed by the Board to repeat the request contained in its letter to you dated July 21 1915 that you furnish it forthwith with the names of all directors whom you charge in said petition with having per-sonally profited from rediscount transactions of certain Feredal Reserve and anks

## COMPARATIVE FIGURES OF CONDITION OF CANADIAN BANKS.

# SOLICITING BY TREASURY DEPARTMENT EMPLOYEES PROHIBITED.

An order forbidding Treasury Department employees from soliciting or receiving from any person or corporation subject to internal revenue taxation compensation of any sort for advertising has been issued by Secretary of the Treasury McAdoo. The order, we learn from the "Journal of Commerce and Commercial Bulletin," will terminate a practice in the Internal Revenue Service which has just been brought to the attention of Secretary McAdoo and Commissioner Osborn by the Civil Service Commission as the result of a recent investigation by the Commission relating to the publication of the convention souvenir program of the National Federation of Storekeepers and Gaugers. The "Bulletin" says;

In connection with the program for the third annual convention of the Federation, held in Cincinnati in 1910, the Commission found that the committee on arrangements of the local branch of the organization made a

The connection with the program for the third annual convention of the Federation, held in Cincinnati in 1910, the Commission found that the committee on arrangements of the local branch of the organization made a contract for the publication of the program providing that the publishers should receive one-half the amounts collected for advertising therein. The advertising rate was stated to be \$100 per page. The publication con-tained 43 pages of advertising matter. The Commission found that 72% of the total advertising came from distillers and other internal revenue tar-payers. It is said that \$4,897 50 was realized from the advertising, of which the Gaugers' Association received \$2,108 75. While the solicitation of advertising in the souvenit program was not done directly by Internal Revenue employees, but by the publishers with whom they contracted, the Commission found that the Gaugers' Associa-tion reaped practically all the benefits therefrom, receiving the souventrs without cost and nearly half the cash realized from the advertising. Out of these proceeds the Commission found that the Association paid the ex-penses incident to the convention, made a political contribution of \$150 to a Congressional campaign and turned more than \$700 hut the treasury of the local association as a net profit on the transaction. Mr. McAdoo said: "The solicitation of advertising was mainly from internal revenue tapayers, persons and corporations with whom the internal revenue tapayers, persons and corporations with whom the individually or collectively, through the medium of an association or of solicit or receive, or be in any way concerned in soliciting or receiving, individually or collectively, through the medium of an association or of solicitors or publishers, contracted with or amployed, or in any other manner, money or any other valuable thing from any person or corporation subject to internal revenue taxation for advertising in any program, son-venir or other publication, or for any other purpose, directly or i

# CTIONS BY BANKERS TO TEST WAR REVENUE ACT.

Proceedings to test the War Revenue Act of last October, insofar as it imposes a tax on banking capital, were filed on Thursday on behalf of the Farmers' Loan & Trust Co. and the Guaranty Trust Co. of this city. Two separate actions have been instituted. The Guaranty Trust Co. seeks the recovery of \$22,060, while the Farmers' Loan & Trust Co. asks for the return of \$3,400. Both plaintiffs claim that they paid the money under protest because Collector Anderson threatened to take steps to collect the money through the courts. They contend that the retention of the money amounts to the taking of property without due process of law, in violation of the Constitution of the United States.

# GERMAN SUBMARINE SINKS AMERICAN STEAMSHIP LEELANAW.

The American steamship Leelanaw, bound for Belfast from Archangel with a cargo of flax, was torpedoed and sunk on the 25th inst. by a German submarine off the northwest coast of Scotland. All the members of the vessel's crew were saved and have been taken to Kirkwall. The Leelanaw left New York on May 17 with a cargo of cotton consigned to Russia by way of Gothenburg and was detained at Kirkwall, while inquiries were made as to the possibility of getting her cargo to Russia, as Sweden forbids the exportation of cotton. The ship was released on June 26 with permission to proceed to Archangel, where the cotton was discharged and a cargo of flax was loaded for Belfast. The following report of the sinking of the vessel was received at the State Department on the 28th inst. from Consul Dennison at Dundee, Scotland:

Scotland: Leclanaw's crew here; all safe. Sail Saturday on St. Paul. Master under oath states he sighted German submarine July 25 sixty miles north of Orkneys. Endeavored to escape. Fired on at distance of two miles, shot falling short. Howe to and stopped. Submarine signaled for ship's papers, which were sent. After examining them, submarine signaled abandon ship. Ample time given crew to leave ship. Five shots then fired at Leolanaw without effect, followed by torpedo. Crew them taken on submarine with lifeboats in tow, after which two more shots were fired, last one setting fire to ship. Submarine headed toward Orkneys. Leelanaw was seen to sink one hour and twenty minutes later. At 8:30 p. m. another steamer being seen ap-

Submarine headed toward Orkneys. Leelanaw was seen to sink one hour and twenty minutes later. At 8:30 p. m. another steamer being scen approaching, crew ordered to hoats, in which they proceeded remainder distance to Rickwall, arriving 6:30 following morning. Leelanaw was laden with flax and tow only. Before leaving submarine master demanded ship's papers. Request refused, his register, customs manifest and bills of lading being retained. Master had no complaint of treatment on submarine.

Following the receipt of the report the State Department officials began the preparation of a note to Germany requesting payment of damages on the ground that the Prussian-American Treaty of 1828 had been violated. A dispatch from Ambassador Page at London was received in Washington on the 28th embodying a statement of the attack given to the Ambassador by the British Admiralty. The statement is said to bear out the previous reports of the incident. According to a report from Washington on the 29th, the State Department transmitted instructions to Ambassador Gerard for proper presentation to the German Government of the claim for the Leelanaw. It is stated that no amount is set forth in the application for indemnity, as the Department has not received the necessary figures from the ship's owners, but the claim will be filed immediately. The case of the Leelanaw is viewed by officials in Washington, it is reported, as practically the same as that of the American ship William P. Frye, which was sunk by the Prinz Eitel Friedrich.

GERMANY ASKED TO EXPLAIN ATTACK ON ORDUNA. A note of inquiry regarding the alleged attack on the British steamer Orduna by a German submarine was presented on the 27th inst. at the German Foreign Office in Berlin by the American Ambassador, James W. Gerard. According to statements made by the Captain, passengers and members of the erew of the liner when she arrived in this port on the 17th inst., a German submarine attempted to torpedo and shell the vessel on the morning of July 9. There were 227 passengers on the liner, of whom 21 were Americans. The Collector of the Port of New York, Dudley Field Malone, undertook an investigation of the attack under instructions from the Treasury Department. Mr. Malone's report was filed at the Treasury Department on the 23d inst. and transmitted to the State Department, at whose instance the Treasury Department acted. Although the report has not been made public, it is understood that it confirms the first accounts of the affair.

### GREAT BRITAIN ON UNITED STATES PROTEST TO ORDER-IN-COUNCIL.

Announcement was made on Monday by Secretary of State Lansing of the receipt from Great Britain of a reply to the American note of March 30, which took exception to the British Order-in-Council virtually declaring a blockade against commerce to and from Germany. It was then expected that the text of the British note would be given out for publication in Wednesday morning's papers, but a request

that it be withheld from publication was made on Tuesday by Sir Edward Grey, British Minister for Foreign Affairs. It was stated in explanation that a new note (supplemental to that received on Monday) bearing on the protest against British contraband and blockade regulations would be sent by Great Britain to Washington within a week. The noto received last Monday argues at length, it is understood, in defence of Great Britain's position. It is, it is stated, a long, exhaustive legal discussion of each point made in the American correspondence. Defence of the right of a belligerent to blockade a neutral port through which an enemy is receiving supplies, or attempting to market his own products, is the chief argument, it is stated, to be made in the supplemental note Great Britain is preparing. Its keynote is a declaration that the British Government has steadfastly held to the broad principles of international law in all that has been done under the Order-in-Council, and that if a neutral Government feels aggrieved at the application of the order, there is a remedy in the courts, or, eventually, in arbitration. Generally it is held that when a neutral country or port is made a base of operations against a belligerent, the other belligerent is justified in blockading such country or port. The action of the United States during the Civil War in blockading British Islands, Bermudas, is cited as a warrant for the action of the British Government in preventing goods from reaching Germany from the United States through Denmark, Holland or Sweden. The original American blockade on the west side of Bermuda proved deficient, the American warships were stationed on the east side, and throughout the remainder of the war no goods were permitted to reach Bermuda that might be trans-shipped to the Confederate States. That action was sustained, it is claimed, by the United States Supreme Court.

Assuming a sufficient legal basis for such a stoppage of trade with Germany through the neutral ports of Northern Europe, the new note, it is reported, makes the point that the only way to ascertain the real destination of supplies from America consigned to those neutral cuntries is to consider the amount of the goods consumed in their normal trade, for it is contended that the smaller Northern European countries are so much in fear of Germany that they fail to prevent, through actual embargoes, the re-shipment of such goods into Germany.

On July 17 formal notice was given to Great Britain, through Ambassador Page, that the United States Government would not accept the Order-in-Council as a substitute for international law, so far as it affected American commerce. It was in effect a reiteration of the statement made in the American note of March 30 and Oct. 22, that the United States Government will insist that the rights and duties of the United States and its citizens in the present war shall be defined by the existing rules of international law, and the treaties of the United States, irrespective of the Declaration of London.

The July 17 notice took the form of a brief statement presented to the British Foreign Office. Secretary of State Lansing explained at the time that the communication was not to be confused with the general note relating to contraband and interference with commerce on the high seas, which has been in course of preparation by the United States Government for some time. The statement he described as being in the nature of a legal caveat, generally conserving the rights of citizens of the United States whose cases are about to be tried by the English prize courts. The following synopsis of the caveat was made public by the State Department at Washington on the 17th:

at washington on the fron. In view of differences which are understood to exist between the two Governments as to the principles of law applicable in prize court proceedings in cases involving American interests, and to avoid any misunderstanding as to the attitude of the United States in regard to such proceedings, the Government of the United States informs the British Government that in so far as the interests of American citizens are concerned, it will insist upon their rights under the principles and rules of international law as hitherto established, governing neutral trade in time of war, without limitation or impairment by Orders-in-Council or other municipal legislation by the British Government, and will not recognize the validity of prize court proceedings taken under restraint imposed by British municipal law in derogation of the rights of American eitizens under international law.

In making known that Monday's note from Great Britain would be withheld until the receipt of the additional communication from Great Britain, Secretary Lansing declined to advance any theory for supplementing the first communication. The American note, which has been in preparation for some time, will be further delayed until the supplementary document is in hand. It was at first supposed by officials that statements in the last American note to Germany, which were of general application and set out the purpose of the United States Government to maintain the freedom of the seas, might have influenced the British Foreign Office to deal with that subject in the same note which defends the Order-in-Council. From British sources, however, it is said to have been learned that the main purpose of asking the postponement of publication was to afford opportunity to the British Government to consider, and if necessary comment upon, the communication cabled from Washington July 17 in regard to cases before the British prize courts.

## PRESIDENT WILSON TO STUDY NATIONAL DEFENCE.

Announcement that President Wilson had called for reports on the subject of national defence was made on the 23d inst. The President will make a study of the subject during his vacation at Cornish, N. H., where he returned for an indefinite stay on the 24th, following the publication of the note to Germany. In making known that the President was giving attention to the matter, the following statement was issued at the White House on the 23d:

The President has been considering every phase of the matter of national defence, and intends immediately on his return to Washington to confer with the Secretary of War and the Secretary of the Navy, his purpose be-ing to procure information on which he can formulate a sane, reasonable and practical program of national defence.

### CLAIMS AGAINST GERMANY FOR REQUISITION OF PROPERTY IN BELGIUM, FRANCE AND POLAND.

Instructions to Americans desiring to present claims against Germany growing out of the requisition of property in Belgium, Northern France and Poland have been issued by the State Department. The United States has been offi-cially advised of the German Government's creation of "the Imperial Indemnity Commission" to consider claims for compensation for property requisitioned in enemy territory occupied by Gorman military forces. The rules of procedure require that the Commission's proceedings shall be conducted in German and that documents submitted in any other language will be considered only when accompanied by certified German translation. Numerous claims, it is stated, have already been presented and pressed for action by the Department. The Department does not accept in principle of taking of property that does not come under the head of necessity. Claims of Americans are being filed by Ambassador Gerard with the German Foreign Office for presentation to the Commission. The Department will transmit to the Ambassador papers in such claims with the understanding that the Ambassador can do nothing more "at present" than forward the papers to the German Foreign Office, and that the claimants personally or by attorney must take other necessary steps in connection with the presentation of the claims.

The Department has also been informed that the German Government has taken steps to organize a "board of arbitration" to consider claims for property requisitioned in Germany. Prompt action in filing of claims is suggested. The Imperial Indemnity Commission is composed of five members, embracing three jurists and two merchants. may direct payment of indemnity, award return of the goods instead of determining "how far the legal prohibition against payment conflicts with the liquidation of indemnity.' The proceedings are not public, are held at Berlin or elsewhere, and hearings precede decisions.

# GERMAN-AMERICAN ALLIANCE CONDEMNS "AU-TOCRATIC ACTION" OF PRESIDENT WILSON.

A resolution condemning as an attitude "equivalent to an the "autocratic action" of President Wilson ultimatum" as embodied in his note to Germany of the 21st inst. in which he stated that any new attack by German submarines would be regarded as "deliberately unfriendly," was adopted on the 25th inst. by the German-American Alliance of New York State in annual convention at Utica. The resolution, which was drawn up by a special committee, reads as follows:

which was drawn up by a special committee, reads as follows: Whereas, President Wilson in his last note has expressed the threat against Germany that any new case of an attack on unarmed ships, causing the death of American citizens, will be considered as a deliberately unriendly act, thereby assuming toward the German Government, which insists that it cannot cease its submarine blockade against England in self-defense, an attitude which is equivalent to an ultimatum. Whereas, This standpoint of our Government makes impossible any com-promise or a settlement of differences by arbitration and is not in accordance with the humanitarian, peace-promoting policy of our Republic, thus creating a situation out of which Congress when eventually called can hardly find a solution other than a declaration of war against our old Fatherland.

Fatherland.

Whereas, Germany in this controversy has made concessions to our Gov-ernment which will guarantee the safety of American passengers as long as we do not export war material to belligerents on passenger ships, thereby pointing out between two friendly nations the way for an amicable settle-ment of existing as well as future differences in line with our past arbitra-tion without beats. tion policy; be it

Resolved, That we, the German-American Alliance of the State of New York, in convention assembled at Utica, July 23-25, condemin this auto-cratic action of the President, taken without previous consent of Congress, as a dangerous usurpation of power and a peril to our peace: that we support with the greatest energy the standpoint of the "friends of peace," as ex-pressed in the recent gigantic mass meeting attended by 100,000 citizens at Madison Square Garden in New York City, and we appeal to the peace-loving people of our country, and especially to the Americans of German origin, who are affected most by a conflict with their mother country, to take part by mass demonstrations and by overwhelming attendance at the National Peace Congress to be held at Chicago on Sept. 5 and 6 1915, so as to demonstrate to the President that, excepting in the case of a hostile attack or an invasion of our country, the American people are determined not to let themselves become involved in war with any mation. The signers of the resolution are said to include Theodore

The signers of the resolution are said to include Theodore Sutro of New York, Henry W. Brendel of Buffalo, Alexander E. Oberlander of Syracuse and Dr. Hugo Schweitzer of Brooklyn.

The convention also adopted a resolution registering a protest against the export of weapons and munitions of war, the inevitable result of which, according to the resolution, has been to create "serious political complications" between the United States and Germany which threaten to bring nearer war between the friendly nations. It was "resolved that this Alliance, in conjunction with millions of peaceloving friends of the State of New York, in the name of humanity protests against such exports of arms and hereby petitions the President of the United States to take legal steps to put a stop to such export in the interest of the preservation of peace."

# EXTENSION OF MORATORIUM IN PARAGUAY.

The London "Economist" in its issue of July 17 contains the following regarding the extension of the moratorium in Paraguay:

The "Board of Trade Journal" reports the publication of a law extending the operation of the Paraguay Moratorium Law, A summary of the original law was published in the "Board of Trade Journal" of Jan. 23. The present law extends the moratorium for debts due between August and May last from 290 to 320 days

# THE CHICAGO EXCURSION DISASTER.

The disaster which visited Chicago last Saturday morning in the capsizing of the excursion steamer Eastland claiming the lives of over 1,100 people is already the subject of several investigations-Federal, State and City. The catastrophe resulted in a loss of life almost as great as that suffered in the sinking of the Titanic in 1912 when 1517 were drowned and exceeds in its death toll a greater number than was lost in the burning of the General Sloeum in the East River in 1904, causing the death of 959 people. The Eastland was chartered to carry some of those who were to take part in the annual picnic planned by the Western Electric Company for its employees and arranged for at Michigan City, Ind., across Lake Michigan. The steamer, which was the first of five scheduled to leave Chicago with the excursionists, overturned at her pier in the Chicago River, just as she was to depart; the capsizing of the vessel occurred within five minutes after she was seen to list heavily to the side; the hawsers were still attached to the vessel when she went over and the force of its plunge tore the pilings from the pier. Many theories have been advanced for the disaster but apparently the accident was due to the fact that the steamer was not properly ballasted; it is also reported that the vessel had on board more passengers than the 2,500 she was officially authorized to carry. The boat was built in 1903 at Port Huron, Mich., by the Port Huron Ship Building Company and seemingly had been faulty from the start. W. J. Wood, a naval architect who was called upon by the owners to correct certain faults in 1903, was quoted as saying on Saturday last:

The fault in the Eastland was in the hulf. I told the builders at the time The fault in the Eastland was in the hull. I told the builders at the time I was called to inspect some parts of it that it was not properly designed, and they told me that they had spont \$2,000 for inspection and were willing to spend \$10,000 to have it right. Subsequently they sold the boat and they seemed never to have favored it very much. After the Eastland was completed \$35,000 was spent to correct faults, but the vulnerable parts were in the hull, and I got my first sight of it to-day as I saw the boat overturned in the river. There are certain fundamental principles applying to naval architecture which seem not to have been carried out. The Eastland had almost no body at all, and this was its main weakness. Other boats on the lakes look as top heavy as did the Eastland but they are absolutely safe because their hulls are properly constructed.

The steamer formerly (from 1906 to 1913) carried excursionists between Cleveland and Cedar Point and her propensity to list is said to have been noticeable at that time. Her most serious accident before last Saturday is reported to have occurred on June 6 1913 when she went aground with more than 400 passengers on board and was not released until the following morning.

In 1906 the steamer was taken over by the Eastland Navigation Company of Cleveland. The Depositors' Savings & Trust Co., Tom L. Johnson's Bank, is said to have had about \$175,000 of Eastland bonds when it was taken over by the First National Bank of Cleveland in 1908. It had subsequently been purchased by the St. Joseph-Chicago Steamship Company, the present owners; it had been leased for the Western Electric excursion by the Indiana Transportation Company

A grand jury investigation was started by State Attorney Maclay Hoyne within a few hours of the catastrophe last Saturday; Federal Judge Landis also summoned a special jury to probe the disaster, and Secretary of Commerce Redfield, acting under instructions from President Wilson, likewise immediately ordered a full investigation. Secretary Redfield arrived in Chicago on the 27th inst. to personally superintend the inquiry of his department. This is the first time, it is claimed, that a disaster of that kind has been probed by a Federal grand jury. The Eastland sank at a pier, but as a vessel plying the navigable waters of the United States the case, it is asserted, lies within the province of the Federal Government to determine where the blame lies.

A Coroner's jury returned a verdict on the 28th placing the blame for the loss of lives by the capsizing of the steamer on six men-William H. Hull, General Manager of the Chicago-St. Joseph Steamship Co., owner of the Eastland; Captain Harry Pedersen of the Eastland; J. M. Erickson, engineer; Robert Reid, Federal Inspector of Steamships, who gave the Eastland license to carry 2,500 passengers on July 2; J. C. Eckliff, Federal Inspector of Steamships, and V. K. Greenebaum, General Manager of the Indiana Transportation Co., lessee of the Eastland. The jury recommended that they be held for indictment on charges of manslaughter. Following the verdict of the Coroner's inquiry, Messrs. Reid, Eckliff, Greenebaum, Erickson and Pedersen were arrested on the 29th. Walter C. Steele of St. Joseph, Mich., Sec-retary and Treasurer of the Chicago-St. Joseph Steamship Co., who had been previously arrested and discharged, was arrested again on the 29th by one of State's Attorney Hoyne's detectives on a charge of criminal carelessness, although no warrant had been issued. He was subsequently released on a bond of \$10,000.

Secretary Redfield made public on Sunday correspondence he had had recently with W. H. Hull of the St. Joseph-Chicago Steamship Company, owners of the Eastland, regarding the requirements imposed under the new Seaman's Act, which goes into effect in November.

According to the latest list the deaths due to the disaster aggregate 1106; altogether it is reported there were 2,480 on board the vessel, of whom 2,408 were passengers and 72 members of the crew; the rescued numbered 1,002; S31 bodies have thus far been recovered.

### CONSTITUTIONAL AMENDMENT FOR CUMULATIVE VOTING AT CORPORATION ELECTIONS REJECTED.

Adverse action on the constitutional amendment intended to make cumulative voting for directors of corporations by stockholders compulsory was taken by the Committee on Corporations of the Constitutional Convention at Albany on Tuesday, when it rejected the proposal by a vote of 13 to 3. The committee had previously tentatively approved the amendment prior to the public hearing on it on the 20th inst. A reference to the hearing appeared in these columns last week.

# FORECLOSURE SUITS FILED IN DANBURY HATTERS CASE.

Foreclosure suits against the defendants in the so-called Danbury Hatters' case were filed in the U.S. District Court at Hartford on the 26th inst. by counsel for D. E. Loewe & Co. On the same day a notice of intention to foreclose was filed in Danbury against the defendants. The cases are returnable to the U.S. District Court at Hartford on Sept. 4. The damages to the amount of \$252,130 99 awarded to the firm were affirmed by the U.S. Supreme Court last January. In a resolution adopted in May, the United Hatters of North America pledged assistance to those of its members affected by the judgment. The resolution provided for an assessment of 1% on the weekly earnings of each member "to be used and employed by the officers of this organization in such manner as they may deem best for the relief and benefit of said members." The serving of the writs and subpoenas upon the 166 individual defendants named in the foreclosure proceedings was begun on the 28th. In explanation of the fact that no concern was shown this week by those affected by the forcelosure suits, one of the officials of the Union is quoted as saying:

There is no cause to be alarmed. The defendants will not be dispossessed. The unions of this country will come to the aid of the hatters before the homes are selzed, and, in fact, such a plan has been arranged for a long time.

The Savings Bank of Danbury paid on the 16th inst. to D. E. Loewe & Co. \$19,423 as part of the judgment ordered by the United States Supreme Court in the Danbury Hatters' litigation. The sum represents the deposits of individual hatters, attached when the suit was first instituted in 1902. Other banks where the hatters' money is tied up will soon make payments to the company, it is said.

# PROPOSED REFORMS IN STATE'S FINANCIAL METHODS.

On Monday night (July 26) the Committee on State Finance and Expenditures of the Constitutional Convention in session at Albany submitted to the Convention its report on the several proposed amendments relating to the State debt and the sinking funds created for the same. The report which is given in full below was presented by the Chairman, Henry L. Stimson. It is an interesting document and recommends important reforms in the financial methods of the State:

Your Committee has considered the present situation of the debts of the Your Committee has considered the present induction of the decision func-sions of Article Seventh of the Constitution and of the statutes governing and relating to such debts. It has also given consideration to the various proposed amendments relating to this article which have been referred to it by the Convention. As a result of such investigation, it reports to the Convention a Proposed Amendment embracing its recommendations in

 Convention a Proposed Amendment embracing its recommendations in respect to Article Seventh of the Constitution.
 The Increase of Indebiedness in New York on the Part of the State and Its Subdivisions.
 Your Committee finds that the net debt of New York State over and above all sinking funds has increased from \$7,400,000 in the year 1903 to over \$145,500,000 at the present time. The gross debt outstanding to-day is over \$185,000,000. The total authorized debt to-day is over \$231,000,000. over \$145,500.000 at the present time. The gross debt outstanding to-day is over \$186,000,000. The total authorized debt to-day is over \$231,000,000. During this period the population has only increased from 7,650,000 in 1903 to 9,899,000 in 1914. The per capita not State debt has thus arisen from \$0,94 per capita in 1903 to approximately \$15.04 at present. New York has at present not merely the largest total debt, but by far the largest per capita direct debt of any of the United States. It is much larger than those of the large states which are its neighbors. Pennsylvania has practically no debt, its sinking fund accumulations exceeding its indebtedness. In Illinois, the per capita debt is but \$0,39; in New Jersey, \$0.24; in Indiana, \$0.49; in Michigan, \$2.41, the foregoing figures being for 1913. Correspondingly there has been recently shown in New York a tendency on the part of the political subdivisions of the State to greatly increase their indebtedness. The United States Census Bureau Bulletin of 1915 on "County and Municipal Indebtodness" makes the following statement: "The civil divisions of the State of New York reported a total in-debtedness far in excess of that reported by any other State. The total indebtedness, less sinking fund assets was \$1,046,226,813, which amount was equal to 30.1% of the indebtedness of all civil divisions in the United States and more than four times the amount reported by Pennsylvania which ranks second in total debt." "The er capita figures for municipal and county indebtedbess also show preeminence on the part of New York. Its per capita county and muni-cipal debt is \$107 71. The next highest per capital debt of the various States is \$70 21 for the State of Washington; \$61 66 for New Jersey; \$57 86 for Oregon; \$52 86 for Massachusetts; \$51 18 for California and \$47 23 for Ohio. In eleven years, 1902 to 1913, the per capita debt of this class in New

for Ohio.

for Oregon; \$52 86 for Massachusetts; \$51 18 for California and \$47 23 for Ohio. In cleven years, 1002 to 1913, the per capita debt of this class in New York has grown from \$56 56 to \$107 71, an increase gf 90.4%. Your Committee finds that while the credit of the State is still very high, this great increase in its indebtedness has been noticed and commented on in the investment market and that there is an increasing tendency on the part of investors to scrutinize our securities and to demand an improve-ment in our financial methods of incurring and securing debt. Shortcomings of the Present Methods. With the general policy of the provisions were adopted in 1846 to rem-edy conditions resulting from extravagance in the construction of public improvements and the creation of debt for that purpose which had pro-duced a crisis in the financial affairs of the State. In brief, the provisions of Article Seventh forbid the contraction of debts (excepting certain emer-gency debts provided for in Sections 2 and 3), unless the law authorizing the debt has been submitted to the popie for ratification at an election where only one such law may be voted for at a time and unless it also provides for the payment of the principal of the debt within a fixed time by a direct annual tax, the proceeds of which are to create a sinking fund for that purpose.

by a direct annual tax, the proceeds of when are to clube a sinking tuning for that purpose. Your Committee believes that these restrictions upon debts, requiring the authority of the people before their creation, and permitting only one proposal to be submitted at a time, have excited a conservative influence upon State policy which until recently was successful in keeping down the State debt.

no State policy which until recently was successful in keeping down the State dobt.
Total recently it was the settled policy of the State to make its capital improvements out of current revenues without incurring debt for the purpose. Our hospitals, our charitable and penal institutions and other permanent improvements have been built out of annual appropriations and until the recent decision of the people to incur large indebtedness for canal and highway improvements the State debt was very small. Your Committee believes that this is a sound and proper policy for a common-waith and believes that this Convention should proceed with extreme curton in removing these restrictions.
Nevertheless, there have developed certain serious shortcomings in the state of direct taxation has not been satisfactory and has been already modified by the amendment of 1906 contained in Section 11 of the Article. The State government has not been successful in its methods of calculating and collecting the contributions for the sinking funds. As a result in some years a very much larger amount has been contributed than would be never your contributions for the past, no contributions whatever proves unade to some of the funds. There has this resulted on the one hand an unnecessary and oppressive taxation of the present generation while, on the other, there has been no certain or automatic method provided for the enforcement of sinking fund contributions. The unnecessary independent of sinking fund contributions whatever provide to some of the funds.

burden which has been put upon present taxpayers can be readily seen when it is stated that up to September 30 1914 there had been contributed to all of the sinking funds \$34,487,679 41, where only \$4,940,095 13 was required under a \$% actuarial computation, making a surplus at that date accrued of \$29,547,584 28.

to all of the sinking funds \$31,457,670 41, where only \$4,940,095 13 was accured under a 3% actuarial computation, making a surplus at that data accured of \$29,547,584 25.
Serial Bonds Instead of Sinking Fund Bonds.
Your Committee recommends that hereafter all debts except omergency febts shall be based upon serial bonds payable in equal installments. The divantages of such a system are so fundamental and are so closely related so used a restriction to be thoroughly worthy of a place in the Constitution. The most certain, simple and cheap way to amortize a debt is to pay it off in annual installments. The uncertainties of calculation which have so infortunately affected our sinking funds in the past are at once eliminated. There is no large fund left in the hands of public officials to be cared for and invested and reinvested for fifty years with all the attendant risk and temptation, and the danger that this power of investment in various of a securities may be perverted into a political power is entirely removed. Furthermore, the fact that the same administration which have say discussed and strongly tends towards responsibility and prudence in the constantion of dett. Finally, the serial method produces an funnense saying in the amounts which the State must eventually pay to retire its dotard in the year bonds, the State government would have saved she for of serial bonds for ally maturing in fifty years instead of the present straight tends towards responsibility and prudence in the out action of detc. Finally 4% on its investment.
These considerations, in the opinion of your Committee, would be declaiven for solution finds years bonds. The administrative benefits and actual cash saving of the serial method would, in the and, far outweighty was bonds for the constinution. The administrative benefits and the danger that the opinion of your Committee, would be declaiven for of New York (New York, Boston, Chicago and Printacher and the danger that the opinion of your comprolete of the o

of the other. Treatment of the Present Sinking Funds. Your Committee has endeavored in its treatment of this difficult subject to keep constantly in mind both the credit of the State and the rights of the bondholders on the one side, and the necessity of relief for the taxpayers from unnecessary taxation on the other. Although there is at present in nearly all of the funds an accumulation which is wholly unnecessary to a scientific amortization of the debt, your Committee feels that it would be very unwise and improper to take out of those funds any of those accumu-lations. The amounts of these funds have been publicly advertised and reported by the Comptroller; purchasers of State bonds have undoubtedly known of and relied on this information; and to diminish the funds—whether or not it were a violation of contract—would undoubtedly seriously affect the State's credit abd reputation for good faith. Nevertheless, your Committee has fait that it was highly important that a correct and automatic method of accumulation should be provided for these funds in the future. Such a method, we believe, is provided in the

itized for FRASER //fraser.stlouisfed.org/ 

 RONICLE

 Immediate the result submitted. Each year the Comptroller must appraise to value of the securities in each fund and calculate afresh the amount of the contribution which will be annually required to amortize the debt at its maturity, estimating the income on the securities at the conservative the debt of 3%. Thereupon it is made the duty of the Legislature to appropriate the amount thus estimated as the contribution to the fund for that year. If the Legislature fails to make this appropriation, the duty is imposed upon in question from the next general revenues of the State, to take the amount in question from the next general revenues in favor of the bondholder. The sessentially a line, superior to the current requirements of the State, to take the amount fund for the old debt and the faitful payment of the recurring installments of principal and the interest on all future debts of the State. Your Committee feels that in this way the completion of the rains to principal and the enforcement of the debt a right to principal and the interest on all future debts of the states the Comptroller is given to the bondholder. This remety is placed to the funder the output of the creating installments of the Completion is debt as dependent of the constitution because, under existing law, it would otherwise be to be and the against the Comptroller is given to the bondholder. This remety is placed to the funders such fund are so near completion than on further for the old debt and the against a state office.

 The of the debt by the time of its maturity and leave in addition a state which the debt by the time of its maturity and leave in addition a state will be afforded to the present Constitution, and that, so far as those funds are concerned, the good faith of the obtion, and that, so far as those funds are concerned, the good faith of the obtion, and that, so far as those funds are concerned, the g

Authorization to Refund the Outstanding Sinking Fund Debt with Serial Bonds. Your Committee feels that its recommendations would be incomplete unless authority were granted to replace the present straight term fifty-yoar debt with serial bonds. It would be of little avail to provide a new and better system for the future and at the same time to leave the State for over-forty years without authority to free itself from the budgers and incom-veniances of the system about to be abandoned by exchanging the old form of debt into the new. Of course, such exchange can only be accomplished by the consent of the outstanding bondholders. Your Committee finds, however, that even if it were necessary to offer a slightly higher rate of interest on the new securities as an inducement for turning in the old, the resulting saying in expense to the State would be very large. It has been calculated by the State Comptroller's office that if the existing canal debt of one hundred and eighteen millions were refinded into serial bonds beating a rate of interest of 4½% is a splate the present average rate of less than 4½ % the consequent saving to the State would be no less than 324,120,001 01.

besides that 414 % the consequent saving to the State would be no loss than 834.120,001 01. Accordingly, in its submitted assertionet, your Committee has proposed interading sinking fund bonds into scalabonds of the same final maturity upon such terms and conditions as the Legislature may authorize subject only to the state of the exchange of the outstanding sinking fund bonds into scalabonds of the same final maturity upon such terms and conditions as the Legislature may authorize subject only to the state of the existing debt. Debis Created in Anticipation of Resentes. Debis Created in Anticipation of Resentes. Debis Created is Anticipation of the present Constitution to the State government to borrow for the purpose of mating cashed herein a section 2 of article seventh. The form of this article is, in the opinion of your Confine is provision for the purpose of acquiring the Saratoga reservation, thereby practically exhausting all of its emergency borrowing power in the creation of a debt for a genement improvement. During the past year, while to the existion of its surplus and the signed by the Europea of acquiring the Saratoga reservation, thereby practically exhausting all of its emergency borrowing power in the creation of a debt for a permanent improvement. During the past year, while to the exhaustion of its emergency borrowing power in the creation of a debt for a permanent inprovement. During the past year, while to the exhaustion of its environment. The form of the state found itself obliged to borrow moneys for the surrent exponditures of the government in anticipation of the constitution of the Appellate Division of the Third Department has sustained the State's contours of the surface thereby and that, although the Appellate Division of the Third Department has sustained the State's contouring the past wear, wears closed thereby and that, although the Appellate Division of the Third Department has sustained the State's contouring the past that in this situation should be put beyond doubt, an

bind binds imposed that the bonds of order obligations issued for this purpose shall be payable and paid within one year from the date of issue. *Highway Debt.* In November, 1905, the Constitution was amended by the insertion of section 12 of Article VII, which authorized the creation of a debt for the improvement of highways and provided that the aggregate of the debt authorized by this section should not, at any one time, exceed the sum of \$50,000,000. It also provided that none of the provisions of section 4 of this article should apply to the debts for the improvement of highways thus authorized by section 12. Seven years later, in 1912, an additional \$50,-000,000 of donds were authorized by referendum under section 4 of Article VII. These \$100,000,000 of bonds for highway improvement thave thus been authorized under two different sections of the Constitution, one of them providing for a referendum to the people and the other authorizing the issue of bonds without further authority from the people than that conferred by the enactment of section 12. Under section 12 it would also seem evident that the original debt of \$50,000,000, as fast as its is refred, may be replaced by new issues of bonds under the authority of the Legis-lature alone, provided only that the aggregate outstanding at any one time shall not exceed \$50,000,000. Your Committee sees no reason for this divergence of methods and of authority in the creation of highway debts. It believes that all inture debts created for highway construction should require the sanction of the people of the State expressed at a referendum under the formalities and restric-tions of section 4. The proposed amendment which it submits, therefore, carries out this recommendation and recoals this authority contained in section 12 for the

The proposed amendment which it submits, therefore, carries out this recommendation and repeals the authority contained in section 12 for the creation of any further highway debts other than under the provision etion 4.

Ratification of Existing Debts. Fully realizing the importance that there should be no possible mis understanding in the creation of a new Constitution as to the intention and readiness of the State to stand behind its existing debts with the utmost good faith, your Committee has inserted in the proposed amendment an Your Committee desires to express its appreciation of the assistance it

Your Committee desires to express its appreciation of the assistance it has derived from the proposed amendments submitted by Messrs. Parsons, Wagner, Blauvelt, A. E. Smith, Austin, R. B. Smith, Lincoln, Cullinan, Van Ness and E. N. Smith. These amendments have been carefully con-sidered and many of the proposals embodied in the amendment submitted herewith by your Committee have been suggested in one or the other of the proposals submitted by these gentlemen. Respectfully submitted for the Committee, HENRY L. STIMSON, Cheirman

A minority report was submitted by Robert Wagner, as follows:

### MINORITY REPORT.

I disagree with the report of the Committee on Finance so far as it relates to the disposition of the excess in our sinking funds for the following reasons: I. It fails to carry out the indisputable intent of the people when they voted the canal and highway referendums, namely to distribute equitably the payment of the debt over a period of fifty years.

2. The proposed amendment requires the future appropriation from the general fund of money to pay the interest on existing debts, notwithstand-ing the fact that more than \$25,000,000 has already been taken improperly

Ing the fact that more than \$25,000,000 has already been taken improperly from the general fund for this purpose. No further demands ought to be made upon the general fund for sinking fund purposes until this large amount improperly taken in excess of the legal requirement has been used for the purpose for which the sinking funds were created under the provi-sions of the Constitution. 3. Its adoption would compel the levy next year of an unjust direct tax of \$11,000,000 which ought not to be levied, since it is conceded by everyone familiar with our sinking funds that the excess in the different funds can be used for the payment of the interest upon the bonds without in any way affecting the security of the investment or in any way violating the provi-sions of the Constitution. Indeed, the excess has been collected unjustly from the present taxpayer and we ought as near as possible cure this in-justice by giving the present taxpayer the benefit of this excess. 4. For the reason that while the report favors the serial bond method for future State debts, the proposal for the amortization of the present funded

future State debts, the proposal for the amortization of the present funded debt does not include or adopt the principle upon which the serial bond system is based.

Briefly, the history of the principal sinking funds is as follows: The first issue of bonds for the barge canal consisted of \$2,000,000 3% 18-year bonds. By an adjustment made in 1914, the sinking fund now equals the issue of bonds for the barge canal consisted of \$2,000,000 3% 18-year bonds. By an adjustment made in 1914, the sinking fund now equals the principal and its earnings meet the interest charges from yoar to year. The next sinking fund for barge canal bonds was created to provide for the pay-ment of \$21,000,000 of 3% 50-year bonds authorized by an amendment to the Constitution in 1905. Instead of raising a tax as provided by the Constitution to provide a sinking fund for the bonds issued under this authority, the Legislature levied a tax rate of 481 of a mill upon the entire valuation of the State upon the theory that a sinking fund should be created for the entire authorized issue of \$90,000,000 whether the bonds had been ractually issued or not. The result was the creation of an unnecessary and illegal excess in this sinking fund of over \$16,000,000. In other words, the Legislature provided a sinking fund in the years 1906, 1907, 1908 and 1909 for the bonds which had been issued and for the bonds which have been fissued since, and there ought not to be any question about using this ex-cess for the purpose for which it was raised, that is, the contribution to the sinking fund is to provide for the retirement of \$40,000,000 4% 50-year bonds issued under the authority of another amendment to the constitution, which permitted the Legislature to increase the rate of inter-est. When the Legislature provided for the retirement of \$40,000,000 4% 600. This sinking fund is contains an excess due to the fact that after the tax rate was fixed, the assessed valuation of the State was greatly in-erceased and the consequent contribution to the sinking fund was much larger than was necessary and also to the fact that the carnings of the sinking fund were much larger than were contemplated when the tax rate was fixed. bonds.

The other barge canal sinking fund provides for the retirement of 50-year  $435\,\%_{\rm b}$  bonds and this sinking fund has a large excess due to the payment into it of large amounts received for premiums and accrued interest. All the canal sinking funds have received premiums and accrued interest which

the canal sinking funds have received premiums and accrued interest which are not incressary to meet the requirement in the Constitution and which are entirely unnecessary for the amortization of the bonds. The excess in the highway sinking funds is due to the fact that the Constitution provided for the setting aside of a proportionate part of the debt each year but failed to make use of the earnings of such sinking funds with the result that the earnings of the funds have been placed in the highway sinking funds and created excesses to that amount. The highway sinking funds have also been unduly enlarged by the payment into them of the promiums received on the sale of bonds. What is true of the barge canal sinking funds is also true of the barge canal terminal sinking funds, of the Cayuga and Seneca sinking funds and the Palisadeu sated by the Comptroller in his report to this Convention is as follows: The surplus or excess of available resources over the reserves calculated in accordance with the menthod stated in the balance shoet. Exhibit A, as of April 30 1915 was \$28,904,706 05, classified as follows:

of April 30 1915 was \$25,904,706 05, classified as follow: Canal Debt sinking funds \$2 -\$20,671.850 68 Highway Debt sinking funds\_\_\_\_\_ Pallsades Interstate Park Debt sinking funds\_\_\_\_\_ 8,136,684 81

96,170 56 \$28,904,706 05 Total.

two years in three different sinking funds the State has, through the Legtwo years in three different sinking funds the State has, through the Leg-islature, made use of a portion of this excess and there has been no impair-ment of the credit of the State because the sale of bonds subsequent to this action of the Legislature produced the greatest premium that the State ever received and furthermore since this action of the Legislature, the value of the State bonds involved has increased and not decreased. The Com-mittee also leaves open the question of the legislity of using any part of the sinking fund. Without attempting to discuss that question, the fact that <text><text><text>

# COMMERCE COMMISSION'S FINDINGS REGARDING LIGHTERAGE AND STORAGE CHARGES.

The Inter-State Commerce Commission made known this week its decision (bearing date July 7) with regard to the changes in lighterage and storage regulations sought by the railway companies operating lines entering New York City from the West and North. While some of the applications for increased charges and reduction in the time of the free storage privileges are granted, the majority of the petitions are declared by the Commission unjustified.

are declared by the Commission unjustified. The Commission in its decision says in part: In presenting their case the carriers stated that the attempt to modify regulations governing terminal services and charges at New York was initiated by some suggestion or recommendation made by this Committee or its special counsel. It is assumed that this had reference to the recom-mendation in our decision in the 5% case, that the carriers investigate their terminal and other services with a view to the conservation of their revenues. The filling of the tariffs under investigation in this proceeding was not responsive to the spirit of that recommendation. A review of the vol-minous record brings conviction of the inadequacy of the carriers' attempt to place such a record before the Commission as would justify a conclusive disposition of the matters at issue. While stating that the principal reason for proposing these changes was to establish the same practices at New York, as now exist at other terminals, thereby removing a discrimination, carriers have failed to give proper recognition to the fundamental differences in conditions, and have afforded the Commission no satisfactory basis for making some of the comparisons. The cost of service would be an import-tant measure of comparison, but, aside from occasional indefinite allegations regarding comparative expense in but one case was evidence fundamental the case of other services. A valuable result of the present inquiry is the demonstration of the

that the ascertainment of the cost of the terminal service is easier than in the case of other services. A valuable result of the present inquiry is the demonstration of the necessity for a thorough revision of the tariffs governing terminal charges and practices at New York. The fariffs under suspension bear evidence of carelessness in preparation and are distinctly inferior in this respect to those which they were intended to supersede. The Commission's disposition of the applications of the

roads is summarized in the syllabus as follows: 1. Proposed reduction of period of free storage on New Jersey shore from 10 to 5 days justified as to domestic inbound freight for delivery at

from 10 to 5 days justified as to domestic inbound freight for delivery at New York.

 Proposed increased charge of 1 cent per 100 pounds for each 10 days or fraction thereof for storage on New Jersey shore of freight for New York delivery after reduced free storage period justified.
 Proposed increase charges for handling and storing heavy fron and steel articles, cooperage stock and sawed store justified.
 Proposed energe of 3 cents per 100 pounds on less than carload lots of westbound freight lightered or floated with carload of more of lighterage free freight justified.
 Proposed increased charges for staking, wiring or cleating shipments Proposed increased charges for staking, wiring or cleating shipments

of lumber, telegraph poles, etc., justified.
8. Proposed reduction of period of free storage on New Jersey shore from 10 to 5 days of domestic inbound freight destined for coastwise trans-

From 10 to 5 days of domestic mound freight destined for coastwise trans-shipment not justified.
7. Proposed reduction of period of free storage at railroad pier stations of domestic inbound freight from 3 to 2 days not justified.
8. Proposed reduction of period of free storage of export less than car-joad freight at railroad pier stations from 10 to 2 days not justified.
9. Proposed charge for loading to or unloading from lighters at other than station pier or vessels of the carriers not justified.

10. Proposed discontinuance of allowance to shippers or consignees for loading and unloading cars on floats not justified. 11. Proposed minimum charge of \$3 for each lot of westbound less than carload freight lightered or floated with carload or more of lighterage free

freight not justified.

Include induction of notice with choice with the second second register of instance of the second second

order to justify such charge, the entire through service of which it forms a part and the compensation heretofore received for such through service. 17. The tariffs under suspension, in addition to other defects, are am-biguous. They must be canceled. Recommended that opportunity be taken by respondents to review all regulations affecting terminal service at New York, whether involved in this proceeding or not, and that respondents co-operate in harmonizing and clarifying such regulations.

The decision was written by Commissioner Meyer. Commissioner Harlan, who wrote the decision for the Commission in the 5% freight rate advance case, took no part in the present decision.

## FOREIGN TRADE DISCUSSIONS AT FEDERAL TRADE COMMISSION'S HEARING.

With the opening of the further sessions of the Federal Trade Commission in Chicago this week, suggestions for the improvement of business conditions and the enlarging of commerce with South America and other foreign countries were presented to it. George M. Reynolds, President of the Continental & Commercial National Bank of Chicago, one of those in attendance at the hearing on Tuesday, pointed out that the discussion of foreign trade seemed most opportune. He said in part:

Not only does it give us an opening for the consummation of a long-hoped-Not only does it give us an opening for the consummation of a long-hoped-for event, in so far as American expansion of trade is concerned, but if it can be quickly put in execution it will serve as almost a philanthropic move, because at this time a large portion of the world is without facilities to con-tinue business and gain comforts and conventences. We have to find credit to enable man to handle the products which we wish to export. Credit can be extended only if business is stable, or, rather, if the credit is stable and business is prosperous. My idea of an ideal method would be the organi-zation of banks in South America, for example, where the dominating capi-tal would be furnished by banks of this country through subscriptions by several banks, say, two or three in a city, taking four or five cities and then interesting locally as much South American capital as possible, having it supervised by Americans. But actual contact with the people should be in charge of men who know the language, practices and customs of the foreign countries. foreign countries

A change in the Federal Reserve Act to enable bankers in the Middle West to subscribe for stock in foreign banking institutions was urged at the hearing by Samuel M. Hastings, President of the Illinois Manufacturors' Association. Mr. Hastings is quoted as saying:

It is quite possible there should be combinations of business men in the same line to fix prices for foreign trade. Combinations in Germany have built up the large foreign trade in that country. We hope that the Federal Trade Commission will find it possible to urge upon Congress a change in the Federal Reserve Act that will enable bankers of Chicago and the Middle West to subscribe for strek in foreign bankers of Chicago and the the Federal Reserve Act that will enable bankers of Chicago and the Middle West to subscribe for stock in foreign banking institutions; that is, subscribe as a bank. At present, Chicago banks are not directly repre-sented in South and Central America, and we are at a disadvantage in the matter of foreign trade as a result of this condition.

J. Ogden Armour, President of Armour & Co., suggested that study be given the organization of syndicates or trading companies for the sale in foreign countries of certain products, such as coal, lumber and phosphate rock. One organization in each line could attend to selling, chartering, insurance, credits, advertising and so on. In this way, he said, duplication in expense would be avoided and the American manufacturer would be given lower delivery costs and a better chance to compete successfully for foreign trade. Mr. Armour added:

Mr. Armour annou: When the war cods[all European countries will be organized on a syndicate basis. Their industries will be more centrally controlled. They must get on their feet as soon as possible. Foreign trade will be needed more than ever, and it must be secured at the lowest possible expense. Our present happy-go-lucky individualistic methods of seeking outside com-merce will handicap us against European efficiency. We may have to modify our present notions somewhat if we are to secure and hold our share. A "condition and not a theory" confronts us.

### COUNCIL OF CONCILIATION RECOMMENDS ADJUST-MENT OF GARMENT MAKERS' DIFFERENCES-MEN'S CLOTHING WORKERS STRIKE AVERTED.

The Council of Conciliation which was appointed by Mayor Mitchell on the 9th inst. to work out an adjustment of the differences between manufacturers and employees in the cloak, suit and skirt industries in this city, and thereby avert a strike involving about 50,000 garment workers, presented its report to the Mayor on the 23d inst. The report is in the nature of recommondations which must be accepted by

both sides in order to be effective. The joint board of the International Ladies' Garment Workers' Union has agreed to accept the recommendations; President Benjamin Schlesinger for the joint board states that he is well satisfied with the findings of the council. The attitude of the Cloak, Suit and Skirt Manufacturers' Protective Association toward the recommendations has not yet been made known. Officials of the garment workers' unions in a letter addressed to Mayor Mitchel on Thursday criticize the manufacturers as "deliberately trying to prolong negotiations until such time as the situation will become most unfavorable for any decisive action on the part of the workers." It was at the same time made known that a vote would be taken by the unions today, Sunday and Monday on the question of a strike on Aug. 3 if the agreement should not be accepted by the manufacturers by that time. The report of the Council of Conciliation provides for the workers an increase in wages of approximately 10%. On behalf of the employer, the Council decides that he must be free to select his employees and to discharge those who are incompetent, insubordinate or unfaithful. The recommendations also give the employer the right to assign work and reorganize his shop, but he would be required to distribute work equally in slack times. Under the recommendations, no employee shall be discriminated against or discharged because of union activities. The Council proposes that an agreement be entered into between employers and employees, so that there can be organized a trial board of three, composed of one employer, one employee and an impartial person, before whom all cases would be heard. The agreement, if signed, would be in effect for two years. Piece prices are to be settled between the employer and a price committee. Questions as to piece workers' overtime and what legal holidays shall be observed are to be arbitrated. The report recommends that there be no strike during the term of the agreement and that the Council create a joint The board of supervision and enforcement of standards. Council has been asked by the Mayor to sit as a permanent commission, and will, in the early fall, begin an investigation into the causes of discontent and unrest in the industry. The members of the commission are Dr. Felix Adler, Chairman; Louis D. Brandeis, Henry Bruere, George W. Kirchwey, Walter C. Noyes and Charles L. Bernheimer.

An adjustment of the strike, which had resulted in the quitting of 21,000 workers employed by members of the American Clothing Manufacturers' Association in the making of men's clothing, was reached on the 21st inst. at a meeting in the Chamber of Commerce. Representatives of employers and employees discussed the situation with the Committee of Immediate Action, which was appointed to recommend terms for a peace agreement. The committee was composed of six delegates from each side; Dr. J. L. Magnes acted as Chairman. The Amalgamated Clothing Workers of America are said to have been granted standardization of wages and recognition of the union shop. The agreement between the two factions, which will be valid until November 1916, calls for the creation of wage and piece-price standards to be put into effect by the next spring season. Pending the settlement of the standards, all price reductions made since the strike of 1913 are to be restored on a basis of 50% in the coats and pants trade and 100% in the vest trade. A committee of two, one from each faction, will settle all disputes. Appeal may be taken to the Committee on Immediate Action except in decisions affecting the industry as a whole. In such matters a council of moderators, which is to be the final arbitration body of the industry, is supreme. During a dispute the agreement provides that no strike or lockout can be called. Three months prior to the expiration of the protocol. its renewal will be discussed. Jacob Panken, attorney of the Amalgamated Clothing Workers of America, stated that of the 21,000 men who walked out three weeks ago, 13,000 returned on the 21st inst. This strike began on the 12th inst., and it threatened to involve all of the 70,000 members of the Amalgamated Clothing Workers in this city. There also seemed a possibility of the strike extending to Philadelphia, Boston and Chicago.

Members of the men's garment industry to the number of 20,000, employed in the shops of the independent clothing manufacturers, were scheduled to strike on the 26th inst, but failed to go out on that day. Sidney Hillman, President of the Amalgamated Clothing Workers, said in explanation of the postponement: "We are getting so many requests from independents signifying their intention to come to terms with

the unions that it would not be fair to call a strike at the present time.'

A conference was held on the 22d inst. between the Children's Jacket Makers' Union and the Children's Clothing Manufacturers' Association, whose differences threatened a strike of 18,000, which resulted in an amicable arrangement between the two. It is reported that the Children's Cloth-ing Manufacturers' Association and the American Clothing Manufacturers' Association are negotiating with a view to amalgamating the two branches of the trade into one organization. Ten thousand children's jacket makers in the shops of the independent manufacturers went on strike on the 23d inst., in accordance with plans of the officials of the Amalgamated Clothing Workers of America who had decided that strikes should be instituted against all independent manufacturers who would not grant the demands given by the Children's Clothing Manufacturers' Association on the 22d.

# MEETING OF CHAIRMEN OF LATIN-AMERICAN COMMITTEES.

A meeting of the chairmen of the permanent group committees of the Central and South America Republies named at the recent Pan-American Financial Conference at Washington, and bankers and business men interested in the development of the financial and commercial relations between those countries and the United States, was held at India House, this city, on Monday. The purpose of the meeting, which was called by Secretary of the Treasury McAdoo, was to discuss plans for the furtherance of the aims sought in the Washington conference. One of the topics of discussion was the question of making a return trip to the countries of Central and South America which sent delegates to the Washington meeting. Secretary McAdoo was unable to attend this week's meeting, and he was represented by Assistant Secretary of the Treasury Andrew J. Peters; the following tele-gram from Mr. McAdoo, to W. L. Saunders, Chairman for Nicaragua, who presided, was read at the gathering:

I deeply regret that it is impossible for me to attend the meeting at India House to-day, but I have sent Assistant Secretary Peters, who rendered such valuable services to the Pan-American Financial Conference, to repre-sent me. The American bankers and business men have a rare and wonder-ful opportunity, but viscous and intelligent work is necessary to trans-late this opportunity into concrete and permanent benefit to Latin-American and the United States. You may const upon my exnest and enthusiastic co-operation in the work you have undertaken. I am sure that you will being to it the enterprising spirit and the patriotic love of country which has made the American nation the greatest democracy in the world. My best wishes to you and to your associates. James A. Farrell, President of the United States Steel

Corporation and Chairman of the National Foreign Trade Council, was a speaker at the meeting, his remarks bearing upon the importance of the interchange of visits between banking and business representatives of the Americas. Mr. Farrell, as Chairman of the committee, appointed to arrange for the return visit, announced that a meeting of that committee would be held at India House on Aug. 5. To enable the eighteen standing group committees, chairmen of seventeen of which attended Monday's meeting, to work more effectively, it was decided to form a council of chairmen of group committees, the council to meet for exchange of views at frequent intervals. Robert H. Patchin, secretary of the National Foreign Trade Council, was elected secretary of this council.

# STATE AND FEDERAL QUARANTINES AGAINST CATTLE VIRTUALLY ENDED.

That the conditions necessitating the Federal and State quarantine resulting from the prevalence of the foot-andmouth disease are rapidly disappearing, is evidenced by the announcement during the past few weeks of the removal of many of the remaining restrictions.

Recent orders of the U. S. Department of Agriculture re-lease the entire States of Connecticut, Rhode Island, Ohio, Kansas and West Virginia. The Federal authorities have also made known the release from the quarantine of certain territory in New York, New Jersey, Massachusetts, Pennsylvania, Maryland, Illinois and Kentucky. The lifting of the ban or modification of former embargoes by State authorities in a number of States, including Kentucky, Kansas, Montana, Colorado and Louisiana has also been witnessed during the month, as a result of the progress made in stamping out the disease. In the case of Colorado, the American Commission Co. (Inc.), under date of the 16th inst., issued a circular

concerning the situation, in which it said: At the meeting of the State Sanitary Board here at Denver on the 12th, most of the restrictions in connection with the quarantime matters locally in the State, that resulted from the foot-and-mouth disease, were removed,

as that disease has been exterminated in the United States and there are only a few isolated points in some of the Eastern States where quarantines are still in effect. The Western States are to be congratulated on coming through this serious situation as well as they did, and it is hoped that by Aug. 10 the Chicago stock yards will be open and ready for the movement of feeder cattle. You understand, of course, that at the present time, Chicago is still maintaining two divisions in the yards—one for quarantine division is constantly growing smaller, and we hope it will be entirely abandoned by the 10th of August. The Government has annulled its order in connection with disinfecting stock cars. This will be a matter that is of interest to stockmen, as it withdraws that expense they are now paying. Furthermore, people in the country have gotten over their scare and they feel that if we should have another outbreak of foot-and-mouth disease in this country, that, on account of the new laws, and their experience with this disease, they can now control it, and it has ceased to carry with it so much anxiety and dread.

It is reported that in Pennsylvania 15,121 head of cattle and more than 11,000 head of swine had to be destroyed as a result of the outbreak of the disease in that State. Estimates place the cost to the State and to the Federal Government at over \$1,350,000, exclusive of the loss to the farmers or cattle raisers not reimbursed. The disease prevailed in 788 farms in 34 counties; at the time of the previous outbreak in 1908 but 100 farms were affected in 13 counties. Thus far the State Live Stock Sanitary Board has dusbursed about \$650,000, of which about \$445,000 was spent in appraisement of cattle, for which the State paid one-half and the Federal Government a like sum, and \$38,000 for property destroyed. The State also paid more than \$50,000 for disinfectants and disinfecting and disposal of cattle.

## PERU NAMES MEMBERS ON PAN-AMERICAN CONFERENCE COMMITTEE.

The Minister of Finance of Peru has named the members from that country who are to serve on the International High Commission on Uniform Laws-a committee whose creation was authorized at the recent Pan-American Financial Conference to co-operate with the Pan-American Union for the purpose of bringing about uniformity in the commercial laws of the different countries. The Peruvian Government also accepted Secretary of the Treasury McAdoo's suggestion that the first meeting of the Commission be held at Buenos Ayres on Nov. 1. Peru is the first of the Southern Republics to announce the appointments to this Commission which is to include nine representatives from the United States and each of the Republies of South and Central America. The memhers representing this country were appointed on June 22, Mr. McAdoo being constituted as their Chairman.

## EMPLOYERS NOT LIABLE TO EXTRA ASSESSMENTS UNDER NEW YORK STATE INSURANCE FUND.

According to an opinion rendered by Attorney-General Woodbury on the 21st inst., employers who insure in the New York State Insurance Fund and have paid the premiums required by the Workmen's Compensation Law are not subject to further liability by assessment. The Attorney-General asserts that insurance in the State fund is not in this respect similar to insurance in a mutual association of employers. It is reported that this question has been the subject of debate between the management of the State fund and the representatives of the casualty companies, the former maintaining that the law confers no power to assess a policyholder and the latter contending that Section 100 of the Act, which provides that in the event of the withdrawal of a policyholder his liability to assessment shall continue for one year, makes policyholders subject to an assessment levy. The opinion of the Attorney-General was given in reply to an inquiry by the Lucas & Dake Co., general agents in Rochester of the Aetna Life Insurance Co. 'The Workmen's Compensation Commission recently adopted a resolution declaring its judgment to be that it was without the right or authority under the Compensation Law to levy an assessment upon any policyholders. The Attorney-General in upholding this resolution states that, after a careful study of the law, it is his belief that there is no provision therein which authorizes the Commission to assess any policyholder for any amount in excess of the premium paid. He is quoted as saying:

I do not believe that it can be said that the Legislature has provided for I do not believe that it can be said that the Legislature has provided for the levying of an assessment on policyholders in the State fund when we find that the only mention made of it is in a section permitting an employer at the expiration of his policy to take out one of the other recognized forms of insurance. It may be that this provision in Section 100, dealing with assessments, was placed in that section with the expectation that machinery would be provided elsewhere for the levying of such an assessment or that at the time it was inserted, there was actually in the bill being drafted a suitable provision for the levying of such an assessment which was subse-emently removed.

quently removed. If the statute had somehwere expressly granted to the Commission the power to levy an assessment for the benefit of the State fund, instead of

Incidentally referring to it as an existing power, then the provisions of Section 67 authorizing the Commission to make rules to carry into effect the provisions of this chapter could be applied. I believe the courts would be rejuctant to approve of a delegation of legislative power to the Com-mission to determine not only the machinery for the levy of the assessment, but the limitations of the assessment itself, where no such assessment was directly authorized. directly authorized.

### STOCKHOLDERS IN RAILWAYS OF THE UNITED STATES.

Statistics indicating the number of shareholders in the railways of the United States have been prepared by the Bureau of Railway Economies at Washington. The table, covering all the railways of the country, except a few roads for which data were not available, presents the number of stockholders as shown on the books of the companies and reported to the Inter-State Commerce Commission. It is pointed out that the relatively large holdings per stockholder shown for Class II roads and for non-operating roads of the Western district, are due to the fact that many small roads are owned in whole or in part by other railways or by mining or other industrial corporations. Class I roads are those having annual operating revenues of \$1,000,000 or over, Class II roads of less than \$1,000,000 and not less than \$100,000, and Class III roads of less than \$100,000. The summary is as follows:

HER OF STOCKHOLDERS AND AVERAGE AMOUNT OF STOCK PER STOCKHOLDER, RAILWAYS OF THE NUMBER OF

The Southern district comprises the roads cast of the Mississippi and south of the Ohio and Potomac rivers. The Western district comprises roads in the region extending west from Lake Michigan, a line drawn from Chicago through Peoria to St. Louis, and the Mississippi River from St. Louis to Louis to the Guif. Roads lying in more than one of these districts are assigned to that district in which lies the largest portion of their mileage. that district in which lies the largest portion of their mileage.

# EFFECT OF SEAMEN'S ACT ON PACIFIC COAST SHIPPING.

The following from the "Financial Letter" of the American National Bank of San Francisco of July 25 illustrates the disastrous effect of the Seamen's Act on shipping so far as the Pacific Coast is concerned:

22 (11	MOLD RO	
Pacific Mail Steamship Co	54.898	
	10.244	
P. M. S. S., S. Central American Line	22,955	
-		
Total tonnage to be withdrawn on account of the Seamen's		

ount of the Seamen's

-134.007 " According to the last statistical abstract of the United State total American steam tonnage engaged in foreign trade amounted to 720,609

The amount to be withdrawn is accordingly 18.6% of the total tons.

tonnage The total American gross tonnage on the Pacific Coast engaged in foreign trade, as based on United States Government figures for the fiscal year ending June 30 1014, was 154.845 tons. When the Seamen's Bill goes into effect, it is figured there will remain

When the Seamen's Bill goes into effect, it is figured there will remain in commission and operating from this coast a total tonnage of 31,082, which would indicate that the Pacific Coast will lose 92% of the entire tonnage lost by the country. It is understood there is some movement afoot to sell a number of the Pacific Mail Steamship Co.'s boats to a Chinese corporation. This deal may or may not be consummated, but in any event the fact that it is in contemplation should furnish the members of our Congress with sufficient incentive to repeal at the very first opportunity this most vicious of natures. statutes.

# BANKING, FINANCIAL AND LEGISLATIVE NEWS.

Only one lot of 4 shares of bank stock was sold at the Stock Exchange this week and no sales were made at auction. In trust company stocks a sale at auction of five shares comprises the week's transactions.

Last previous sale.

\* Sold at the Stock Exchange.

A marked increase is reported this year in the special train organizations arranged for the convenience of the large delegations from all important centres of the country to the annual convention of the American Bankers' Association, which takes place at Seattle during the week of Sept. 6. Every comfort and facility of travel will be provided them en route. Many delegates from outlying sections, both individually and in small parties, who are not in sufficient number to warrant special train arrangements, will join their friends in the nearest respective centres and receive along with them all the attention which will be given the special delegations. The special train arrivals will begin to reach Seattle as early as the forenoon of Saturday, and will continue to the forenoon of Monday, the 6th. As heretofore indicated, the official program for Monday will be committee meetings at headquarters hotel, the committees being Currency, Agricultural, Insurance Law, Federal Legislative, Finance and Executive Council meeting in the ball room of the New Washington Hotel in the afternoon. On Tuesday meetings of the various sections-Trust Company, Savings Bank, Clearing House and the State Secretaries-will take place at the New Washington. The general convention will hold its meetings on Wednesday and Thursday.

The social program was outlined in our issue of June 12; special entertainments have been arranged for each day, and on Friday the whole day will be given up to a trip on Puget Sound; there will be no businness session on that day.

The Washington State Bankers' Association will hold its annual convention in Seattle on the 6th and 7th of Sept., with hotel headquarters in the New Richmond Hotel. Outside of their convention hours and following the conclusion of their meeting, they will assist the Seattle bankers in entertaining the guests of the American Bankers' Association.

A pamphlet giving facts about Seattle and the State of Washington has been prepared by F. Dickinson, Secretary of the publicity committee of the convention, for the purpose of setting concisely before the prospective guests a few salient points suggestive of trips to the more nearby cities, towns, places and scenes well worth a visit. Besides the information bearing on the various points of interest readily reached, the booklet contains a list of the cities, hotels, banks, principal office and public buildings, theatres, railway and steamship offices.

The Board of Governors of the Investment Bankers Association of America held their quarterly meeting at the Portland (Me.) Country Club last Friday and Saturday; A. B. Leach, President of the Association, presided. The question of rural land credits was discussed and referred to a committee which was requested to make a report thereon at the annual convention to be held in Denver on September 20, 21 and 22. Committee reports on a number of important subjects came up for discussion at the executive session. The following officers have been nominated for the coming year: President, Lewis B. Franklin, Vice-Pres-ident of the Guaranty Trust Company of New York; Vice-Presidents, Allen G. Hoyt of New York, John E. Blunt, Jr. of Chicago, Stedman Buttrick of Boston, Alec C. Foster of Denver and C. Edgar Elliot of Chicago; Treasurer, J. Herndon Smith of St. Louis, and Secretary, Frederick R. Fenton of Chicago. The new nominations for the Board of

Governors are: Richard Morris, George C. Clark, Jr. and George W. Hodges of New York; George M. Taylor and Harry L. Stuart of Chicago; J. Sheppard Smith of St. Louis; Reamy Field of Cincinnati; Charles L. Stacy of Toledo and Lynn M. Dinkins of New Orleans. William L. Ross of Milwaukee has been elected to serve the unexpired term on the Board of Governors of N. Dean Jay, resigned.

The National Shawmut Bank of Boston has been appointed agent and correspondent to handle all New England business for the Banco de la Nacion (Bank of the Nation), Argentina, Buenos Ayres. The latter is the Government bank of Argentina and the largest in South America, having total resources, according to the last published statement, equivalent to over \$350,000,000 in gold. It is pointed out that a Government bank, having no close European affiliations which might prove disadvantageous to United States merchants in dealing with Latin America is in a better position to give impartial service to manufacturers and merchants of this country.

Major Charles Elliot Warren, President of the Lincoln National Bank of this eity, whose interest in military matters of the metropolis is well known, is in receipt of the following letter from the Secretary of the Navy:

# NAVY DEPARTMENT

Washington July 23, 1915. Mr. Charles Elliot Warren. Pres., Lincoln Nat. Bank, New York, N. Y., My Dear Sir-The attention of the Navy Department has been drawn to a certain action taken by the Lincoln National Bank to encourage its employees to join and serve in the Militla. It is gratifying to learn that broad-minded men are beginning to realize the Importance of military and naval service and the moral obligation resting on all good citizens to con-tribute by practical self-sacrifice, either financial or personal, to the strength and the moral obligation resting on all good citizens to con-tribute by practical self-sacrifice, either financial or personal, to the strength hown by the Lincoln National Bank in allowing its employees to serve in ster Militia without loss of pay, and without loss of their regular annual teave, receives the unqualified approval of the Navy Department. Very respectfully. (Signed) JOSEPHUS DANIELS.

The constitutionality of the Pennsylvania law signed by Gov. Tener on June 19 1911 which places private banking houses under the supervision of the State, was upheld by Judge Porter on the 21st inst. in an opinion filed in the Superior Court at Philadelphia, dismissing the appeals of six Italian bankers who had been convicted and fined for violating the provisions of the Act. The law compels all private bankers in business less than seven years prior to its passage to take out a State License and otherwise subjects them to regulation. The ruling of the Superior Court upholds a decision by Justice Mestrezat of the Supreme Court. At the time of the passage of the Act, which was known as the Alter Bill, it was stated that those whom it principally concerned were foreigners engaged in selling steamship tickets and conducting banks for their countrymen.

The address on "Current Banking Problems" recently delivered by William A. Law, President of the American Bankers Association before the Missouri Bankers Association has been printed in booklet form. We referred to Mr. Law's remarks in last week's issue (pp. 256 and 257). A copy of the booklet can be obtained, we believe, on applica-tion to the First National Bank, Philadelphia, of which Mr. Law is President.

A report on the condition of the Oklahoma bank deposit guaranty fund for the three months ended June 30, which has been issued by P. C. Dings, Treasurer of the State Banking Board, shows a reduction in warrant indebtedness of \$9,314 since the previous quarter, the total outstanding being \$742,334, against \$751,648 for the first quarter of the Cash on hand aggregates \$86,505, as compared with year. \$17,184 for the previous three months. During the second quarter, the report shows, warrants were issued to the amount of \$11,407, while those restored totaled \$20,361. Of the total outstanding warrants, the board holds \$438,911 in lieu of collateral of banks.

Creditors in Decatur, Ala., of the cotton firm of Knight, Yancey & Co., which failed in April 1910, received on the 20th inst. a payment of 10% on their claims. A letter which was sent out accompanying the disbursements stated that another small payment would probably be made to the creditors.<sup>45</sup> As heretofore noted Knight, Yancey & Co. was one of the largest cotton concerns in the South, having offices in Decatur, Mobile, Huntsville, Birmingham and other [VOL. 101.

Southern cities and at the time of its failure was reported to have had assets of \$1,439,028 and liabilities of \$5,090,179. The suspension of the cotton concern uncovered many irregular bills of lading affecting numerous foreign interests and a number of suits resulted in which attempts were made to recover losses suffered through the alleged fraudulent bills of lading. The largest creditors of the concern were in New York and foreign countries.

Henry M. Conkey, Cashier of the Chase National Bank of this city, died on the 24th inst. of typhoid-meningitis, after an illness of several weeks. Mr. Conkey entered the employ of the Chase National in 1901; he was appointed Assistant Cashier in May 1908 and had been Cashier since January 1910. He was thirty-seven years of age.

At a meeting of the directors of the Chase National Bank on Wednesday Guy E. Tripp, Chairman of the Westinghouse Electric & Manufacturing Co. was elected a Director, to succeed Henry M. Conkey, deceased; Alfred C. Andrews, formerly Assistant Cashier, was appointed Cashier; and George H. Saylor and M. Hadden Howell, for many years connected with the Credit Department of the Bank, were appointed Assistant Cashiers.

John H. Scoville, a member of the Stock Exchange and partner in the firm of Maxwell & Scoville of this city, died on the 24th inst. at North Andover, Mass. He was in his seventy-second year.

The Corn Exchange Bank of this eity will open its Lexington Branch at the corner of 60th Street and Lexington Avenue on August 2. As heretofore announced the bank was authorized last February by the State Banking Department to establish this office which will be the institution's thirty-fifth branch in Greater New York.

The absorption of the Security Bank of this city by the Century Bank was effected last Saturday, the 24th inst., following the approval of the arrangements by State Superintendent of Banks Eugene Lamb Richards. With regard to reports that the Chatham & Phenix National Bank contemplates relinquishing its national charter and entering the state system with a view to taking over the Century Bank, Louis G. Kaufman, President of the Chatham & Phenix and Chairman of the Executive Committee of the Century Bank said on Thursday: "It is a possibility being discussed. It is not yet certain that the action will be taken. If it is decided upon it will not be in the near future." With the acquisition of the Security Bank an increase has been made in the capital and surplus of the Century; an issue of 6,500 shares of stock has been put out and has been purchased by a syndicate at \$180 per share, at which figure it will be offered to the shareholders of the Century; the issuance of the new stock serves to raise the capital from \$600,000 to \$1,250,000 and to give the bank a combined capital and surplus, according to a report issued under date of the 24th, inst., of \$2,275,766. On the same date the enlarged bank reported deposits of \$23,316,357 and resources of \$25,597,539. The following statement with regard to the merger of the Security with the Century was made public last Saturday by the President of the latter, H. L. Crawford:

last Saturday by the President of the littler, H. L. Crawford: The Century Bank has taken over the business of the Security Bank, ac-quiring its good will and deposits and assuming its deposit Habilities. The transaction became effective to-day and the Century Bank will continue the business of the Security Bank, as usual, at all its branches, except only the branch at 3rd Avenue and 106th Street, which will be discontinued. All checks against balances with the Security Bank will be honored by the Centure

Century. The transaction followed favorable action of the board of directors of The transaction followed favorable action of its stockholders and was

Century. The transaction followed favorable action of the board of directors of the Security Bank and of more than two-thirds of its stockholders and was the result of a protracted negotiation carried on on behalf of the Century by its president with the co-operation of L. G. Kaufman, chairman of its ex-ecutive committee, and our counsel, Messre, Lawrence & Lawrence. It has the approval of the Superintendent of Banks of the State of New York and of the Clearing House authorities, who have been acquainted with the negotiation throughout its progress. The Century Bank has now been admitted to membership to the New York Clearing House and is increasing its capital and surplus in proportion to its increased business. It now has a paid in capital and surplus of 32.240,000 with deposits including those of the Security of about \$24,000,-000. Its total resources are in the neighborhood of \$27,000,000, which makes it one of the strongest of the uptown banks. The officers of the Century Bank remain unchanged. They are Harden L. Crawford, Pres-ident, and L. G. Kaufman, Chairman of the executive committee. The Vice-Presidents are C. Stantey Mitchell, George P. Kennedy and Robert B. Minis. H. A. Clinkunbroomer is Cashier. R. Ross Appleton, Pres-dent of the Security Bank, and Bradley Martin and R. I. Brewster, Vice-Presidents of the Security, have also been elected as additional Vice-Pres-idents of the Security Bank, which, which its strength greatly increased, will be better infalposition to year-egilts patrons and the public than ever before.

The Century Bank has eleven branches in addition to its main office at 5th Avenue and 20th Street; the branches are located as follows: 5th Avenue and 14th Street; 3rd Avenue and 57th Street; 2 West 33d Street; 125th St. and Lexing-ton Avenue; 116th St. and Lenox Avenue; Bowery and Grand Street; 345 Grand Street; 9th Avenue and 14th Street; 66th Street and 2nd Avenue; Warren and Greenwich Streets and Broadway and 104th Street. It is stated that one reason tending toward the consideration of the conversion of the Chatham & Phenix National to a state institution is the fact that under the Federal law it would not be able to operate the branches of the Century in the event that that institution were taken over by it.

Scott Foster retired on the 29th inst. as President of the People's Bank of this city and was elected Chairman of the board of directors. Mr. Foster, who has been head of the People's for thirty-one years and a director in the institution for thirty-nine years, was tendered a luncheon on Thursday by the board of directors at which he was presented with a silver loving cup and engraved resolutions expressing appreciation of his services. William Milne, who has been Cashier of the bank for a number of years, has been elected President to succeed Mr. Foster. John B. Forsyth, hereto-fore Assistant Cashier, becomes Cashier while Wyckoff I. Dey has been reappointed Assistant Cashier.

Wade Gard'ner, agent for the Hong Kong and Shanghai Banking Corporation, 36 Wall Street, this eity, has received cable advices from the head office of the corporation at Hong Kong stating that an interim dividend of 43 shillings per share has been declared for the half year ended June 30. The dividend is subject to usual deduction of income tax and will be payable Aug. 16.

The Metropolitan Trust Company of this city has received permission from the State Banking Department to establish a branch on Fifth Avenue. It is expected that the branch office will be opened about October 1.

Walter S. Johnston, Vice-President of the American Surety Co., and a director of the Guaranty Trust Company of this city, died on the 23d inst. in Garden City, L. I. Mr. Johnston was formerly President and Chairman of the Executive and Finance committees of the American Surety Co. He was receiver for the old National Bank of the State of Missouri in St. Louis and was later appointed receiver of the Marine National Bank of this city. Mr. Johnston's testimony in the criminal proceedings following the Grant-Ward failure which brought about the closing of the Marine Bank served to absolve General Grant from the charge of fraud.

The Franklin Trust Co. of New York and Brooklyn, Arthur King Wood, President, shows the largest gain in deposits of any trust company in Brooklyn over the bank call of a year ago. The growth of deposits on June 23 was more than \$6,000,000, the figures being \$12,200,950 June 30 1914 and \$18,377,888 June 23 1915; the increase is due in part to the establishment of the institution's new branch in New York City, the corner of Wall & William Streets. The Company recently lost its oldest Trustee, Wm. H. Wallace, who died July 20th. He was one of the incorporators of the Company in 1888 and a member of the first board of trustees. Martin Joost, Vice-President of the Bond & Mortgage Guarantee Company, and Charles K. Beekman of the law firm of Beekman, Menken & Griscom, have recently been added to the Franklin's board. Edward C. Delafield is now Vice-President.

Ex-Comptroller Edward M. Grout, former President of the defunct Union Bank of Brooklyn Borough, was sentenced on the 27th inst. by County Judge Lowis, in Brooklyn to serve a term of not less than one year nor more than two years in Sing Sing. Grout was found guilty by a jury in the Kings County Court on the 24th on a charge of perjury in swearing to a false report of the condition of the Union Bank. The jury added to their verdict a recommendation for mercy. A stay of ten days was granted by the Court during which time Grout's counsel will seek to obtain his release on bail pending an appeal. The prisoner was indicted in December 1913 by the Grand Jury on a charge of having sworn to a false report of the bank's condition just prior to the closing

of the institution in April 1910. Grout pleaded not guilty to the charge. A previous indictment against Grout was handed down in October 1911 charging a misdemeanor in having made a false report to the State Superintendent on March 25 1910. A motion to dismiss the perjury indictment, was denied on May 14 1914 by Justice Kelly of the Supreme Court of Brooklyn. Another motion to supersede the 1911 indictment and to dismiss the one handed down in 1913 for failure to prosecute was denied on April 24 last by County Judge John F. Hylan. The 1911 indictment, District At-torney Cropsey asserted, was "emasculated" by a ruling of Justice Josiah T. Marean, since retired. Justice Marean granted a motion to strike out the most serious allegations in the indictment. The trial of the former President of the Union Bank began on May 24. It is reported that the trial of James T. Ashley, former Cashier of the Union Bank, who was indicted on the same charges as President Grout, will be held in the early fall.

James A. Smith has been elected a trustee of the People's Trust Company of Brooklyn to fill a vacancy on the board. Mr. Smith is a director in the Pacific Bank and the East River Savings Institution of this city, senior partner in the drygoods firm of Calhoun, Robbins & Co. and Vice- President and director of the Peerless Tube Company.

Depositors of the Brownsville branch of Max Kobre's private bank, which was taken over by State Banking Superintendent Richards in August 1914, accepted a proposition on the 26th inst., at a meeting called by the referee in bankruptey, whereby the branch of the defunct private bank will be reorganized under the name of the Brownsville Assets Corporation. The composition, which was offered by Moses Ginsberg, manager of the Brownsville branch, provides for the payment of the depositors in full during a period of three years. A disbursement of 25% is to be paid in cash as soon as possible and the remaining 75% is to be distributed in three equal payments at the end of each year. Judge Chatfield of the U.S. District Court in Brooklyn, who heard the bankruptcy proceedings, decided that Moses Ginsberg was solvent while the Brownsville branch was declared insolvent to the extent of \$20,566. The depositors of the Brownsville branch were paid a 10% dividend by Superintendent Richards last December. An additional 15% is to be paid when the referee makes report, which is expected within thirty days. It is reported that the holding company will begin business in a The stock will be held by Superintendent few months. Richards, Moses Ginsberg and a third man, to be selected by the other two. The new company will be managed by a directorate of which Mr. Ginsberg will be managing director, serving without compensation. At the time of the closing of the Brownsville branch it was stated that its assets were \$750,000 and liabilities \$1,250,000. There are approximately 9,000 depositors of the branch

The New England Trust Co. of Boston, Mass., has prepared a pamphlet on "The Management of Trust Property. which it will supply to interested inquirers. The pamphlet informs the company's clients and friends of its facilities for acting in fiduciary capacities, and the desirability of appointing a corporation rather than an individual for duty of this The pamphlet contains a summary of the Massachukind. sotts laws governing the descent of property and the inheritance tax laws now in effect. The company will be glad to consult with any one concerning any points not covered, and answer any questions which suggest themselves.

The Bankers Mortgage Co. is about to be established in Boston to conduct a general mortgage business. The new company, which has a capitalization of \$1,000,000, has been organized by William H. Minton of Boston. Mr. Minton is reported to have brought about the organization of the new Commercial Trust Co. of Springfield, Mass., and the Massachusetts Trust Co. of Boston, which opened on Feb. 10 1914. He is also understood to have been interested in the City Trust Co. of Worcester, which was recently refused permission to organize by the Board of Incorporation of Banks at the time the Park Trust Co. was formed, on the ground that the field was not big enough for two trust companies.

National Bank. The trust company charter, which was obtained by the latter institution in Dec. 1913 under the name of the First Ward Trust Co. will be used for the new institution, but a different name will be adopted. The proposed trust company will have a capital of \$300,000, surplus of \$300,000 and deposits of about \$3,000,000. Stockholders of each bank will be given opportunity to subscribe for the stock of the new company at \$200 per share in proportion to their present holdings. Of the proceeds \$100 will go to capital and \$100 to surplus. It is expected that both institutions will liquidate at about the book value of their stocks, which is 116 in the case of the Mutual and 175 in the ense of the First Ward.

The new institution is to begin business about Sept. 1 and in the meantime both banks will continue their independent existence. The present location of the Mutual National at 40 State Street will be the headquarters of the new trust company and the offices of the First Ward National in East Boston will be operated as a branch. It is reported that all the directors of both banks will be elected to the trust company directorate. The officers of the new institution have not been fully decided upon but it is understood that Chandler M. Wood, President of the Mutual, will be the head of the combined institution and that William H. Stickney, Cashier of the Mutual National, will be chosen one of the Vice-Presidents and Treasurer. It is also reported that George W. Moses, President of the First Ward National, will be offered the position of Chairman of the board of directors in the company and that Frank F. Cook, Cashier of the First Ward Bank, will probably become Secretary and Assistant Treasurer.

The Mutual National Bank has a capital stock of \$500,000 and on June 23 had surplus and profits of \$86,085 and deposits of \$1,716,347. The First Ward Bank has a capital of \$200,000 and under the last call of the Comptroller showed surplus and profits of \$157,005 and deposits of \$1,102,050.

The portrayal on the screen of the work of the construction of the Third National Bank Building of Springfield, Mass., a ten story bank and office structure now in course of erection by Hoggson Brothers of New York and Chicago is the latest use to which motion pictures will be put. Every step in the proceedings will be shown on the film. Not only will the history of the erection be allowed, from the demolition of the old building and the excavations for the new one, through the construction to the actual moving in of the bank's business, but the various materials to be used in the construction will be followed from their respective sources until they are installed in proper place in the building.

W. Grant Hallowell has been appointed Assistant Cashier of the Second National Bank of Philadelphia.

Samuel Graham, Jr., has been appointed Assistant Cashier of the Third National Bank of Philadelphia. Mr. Graham entered the employ of the institution in 1894 and was Secretary to the late General Louis Wagner, former President of the bank. For the past nine years Mr. Graham had been receiving teller of the bank.

George D. McCreary, Vice-President of the Market St. National Bank of Philadelphia, died on the 26th inst. Mr. McCreary was City Treasurer of Philadelphia from 1891 to 1895 and was elected to Congress from the Sixth District for five terms.

John D. R. Lamson, Vice-President and a director of the Commercial Savings Bank & Trust Co. of Toledo, Ohio, died on the 22d inst. Mr. Lamson was Vice-President of Lamson Brothers Company.

Max Palenske, Assistant Cashier of the Drovers' National Bank of Chicago, in whose accounts there is alleged to be a shortage of between \$10,000 and \$15,000, surrendered himself on the 20th inst. He was taken to the county jail and held under \$10,000 bonds. A preliminary hearing in the case was held on the 20th inst. before U. S. Commissioner Mark A. Foote, the technical charge against Palenske being misapplication of the funds of a national bank. He waived examination and was held to the Federal grand jury under \$20,000 bonds. A force of examiners has been put to work on the records of the bank to ascertain the extent of the alleged shortage. It is said that Palenske's method of defalcation was to credit balances of country banks with a greater

"T. Reeves of the Drovers' National is quoted in the Chicago "Herald" as saying:

"Herald" as saying: We have known of Palenske's trouble for a week. We had him in the office helping us straighten out affairs until a few days ago. He was unable to trace some of the discrepancies and it may be two or three weeks before the audit will be completed. I first became aware things were not right when I found a mysterious item of \$700. I had the books checked up and found several others which did not appear right. Palenske then was called in and admitted he had "swelled" the interest on country deposits. I think his bond of \$10,000 will cover the money he obtained.

An order directing William C. Niblack, receiver for the defunct La Salle Street Trust & Savings Bank of Chicago to levy an assessment of 100% against the stockholders of the bank to meet its liabilities was issued by Judge Thomas G. Windes in the Circuit Court of Chicago on the 22d inst. It is estimated by the Court that the liabilities of the bank exceed the assets by at least \$1,000,000, while Mr. Niblack places the deficit at \$2,000,000. The receiver testified as follows concerning the present condition of the bank's finances:

nances: Outside of the building owned by the bank. I should say the collectible assets have a face value of 3350,000. Then there are doubtful items of about \$440,000. I have brought suits against some of the holders of notes of this sort. I think the realization on them will amount to about one-third. Then there are assets amounting to about \$1,250,000 which I have classed as poor. In most of the cases persons indebted to the bank on promissory notes have no property.

On June 5 Judge Windes issued an order authorizing the receiver to file a claim in the Federal Court for about \$263,000 against Charles B. Munday, former Vice-President of the failed institution, and his son, J. Guy Munday. The amount of the claim covers the par value of the stock in the La Salle Street institution owned by the Munday's individually and as co-partners in the firm of C. B. Munday & Co., the Bank of Smithboro, Ill., and the People's Bank of East Alton, Ill. It is reported that Charles B. Munday, who is under an indictment on a charge of conspiracy in connection with the failure of the bank, will not be placed on trial until the September term of the Court. 'As heretofore stated, Munday entered a plea of not guilty to the charge on March 27. He obtained a change of venue which took his case to Grundy County. The delay in the Munday trial will also cause the postponement of the trials of William Lorimer, former President of the La Salle Street Bank, and other officials of the institution, who are also under indictments in connection with the bank's failure. As previously mentioned in these columns, the La Salle Street Trust & Savings Bank closed in June 1914.

The German-American Bank and Trust Company recently reported in these items as having opened in Louisville, Ky., is located at New Albany, Ind.

Creditors of the failed First National Bank of Salmon, Idaho, have been awarded a judgment of \$14,700 against Henry G. King and Norman I. Andrews, President and Vice-President respectively of the defunct institution, by Judge Dietrich in the Federal District Court at Boise. The bank went into the hands of a receiver in August 1911 and the Comptroller levied an assessment of 100% on the stock, only a part of which proved to be collectible. The receiver, Frank A. McCormiek, brought suit against King, Andrews, George Buck, Guy E. Bowerman, Fred G. Havemann and John Lottridge, directors of the bank, charging them with mismanagement of its affairs. Five charges were made in the complaint and the point on which Judge Dietrich finds the two officers of the bank assessable for damages (the others named in the proceedings were exonerated) is their failure to observe the Banking Act provision which prohibits any borrower from securing more than one-tenth of the capital stock and surplus of a bank. Judge Dietrich gave the re-ceiver judgment against the President and Vice-President of the bank, as the active members of the board of directors, in the sum of \$14,700, which was the amount of loans above the statutory limitation. Regarding one of the charges,

the statutory limitation. Regarding one of the charges, that overdrafts amounting to a total of \$3,900 were allowed and are uncollectible, the Idaho "Statesman" says: In the matter of the overdrafts, while the Court takes cognizance of the portion of the by-laws which prohibits the making of overdrafts, h accepts the explanation of the President that this provision was a dead letter and was in the by-laws only because they were copied from those of another institution. He says the prohibition of overdraft is not practicable in banking procedure. Furthermore, there was no protest from any of the stockholders, because of this method of doing business, though it was known to them through the publication of the periodical reports of the institution.

The consolidation of the City State Bank of Oklahoma City with the State National Bank of that city was consummated

on the 17th inst., and the enlarged institution opened for business on the 19th inst. W. D. Caldwell, President of the City State Bank, becomes a Vice-President and director of the State National; R. S. Litchfield and E. W. Sinclair will also be identified with the latter institution as directors. Mr. Litchfield is President of the First National Bank of Independence, Kansas, and Mr. Sinclair is a Vice-President of the Exchange National Bank of Tulsa, Okla. Robert L Smith, who has been a teller in the City State Bank, will be Assistant Cashier of the State National. The City State had a capital stock of \$50,000 and on June 23 had deposits of \$461,499. The State National prior to the consolidation had a capital stock of \$250,000, surplus and profits of about \$4,000 and deposits close to \$500,000.

George William Nott, Chairman of the board of directors of the Citizens' Bank & Trust Co. of New Orleans, died on the 14th inst.

Hubert F. Thomas has been named as receiver of the failed Union National Bank of Monroe, La., which, as previously announced, closed its doors on June 9.

The Fort Worth Savings Bank & Trust Co. of Fort Worth, Texas, closed its doors on the 23d inst. and was placed in the hands of W. B. Paddock as receiver. Application for the appointment of a receiver was made to the Forty-Eighth District Court by Horace Wilson, a depositor, who alleged that the payment of his deposit of \$2,047.97 had been refused to him. An answer to the petition was filed by E. E. Baldridge, President of the institution, in which the allegations made by Wilson were admitted. The bank had a capital stock of \$210,000 and, it is reported, had deposits of about \$400,000, the majority being small accounts. It is stated that the city of Fort Worth had a credit balance with the bank of \$283,186 which belonged to the sinking fund. On the other hand the city had overdrafts on the bank for \$119,562, representing money advanced for current expenses. The city deposit is said to be protected by a bond which has been turned over to the City Attorney. As heretofore stated in these columns the Fort Worth Savings Bank & Trust Co. was formerly the Waggoner Bank & Trust Co., the name of the institution having been changed. The institution, it is stated, operated under a charter issued under the law of 1875, and its deposits were not protected by the State bank guarantee fund.

President Baldridge committed suicide on the day following the failure of the Fort Worth Savings Bank & Trust Co. An inquest was held by Justice Emmet Moore and a verdict rendered that death was due to a pistol shot wound which had been self-inflicted.

The final report on the defunct Bank of Shasta County at Redding Cal., which closed its doors on March 25 1911 was filed on the 22d inst. by State Superintendent of Banks Williams. The statement shows a balance on hand of \$21,324 which will provide for the payment of a dividend to depositors of about  $2\frac{1}{2}\%$  in addition to the 87% which they have already received. The deposits of the institution at the time of its failure were said to have amounted to \$710,000. The bank had a capital stock of \$100,000.

THE ENGLISH GOLD AND SILVER MARKETS.

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of

July 15 1915: GOLD. The movements on balance have been somewhat against the Bank of England, but there was no Transvaal output credited during the week. Receipts were announced as follows: July 12-±125,000 in sovereigns released on miscellaneous account. 13- 25,000 in sovereigns released on miscellaneous account. 14- 124,000 in bar gold. Withdrawals were made as under: July 8- £68,000 in foreign gold coin. 9- 202,000 in foreign gold. During the week the net reduction amounted to ±243,000. On the 8th inst. M. Ribot announced that the export of gold from France had been prohibited until further notice. The output of the Transvaal for June 1915 was £3,208,224, as compared with £3,019,558 in June 1914 and £3,243,347 In May 1915. SILVER.

in May 1915. SILVER. The tone has been without animation, and were it nor for the scantiness of supplies, it would have been difficult to maintain prices. The abste-nence of the Indian Bazars has been again a noticeable feature. The mar-ket is so small that a little revival of demand from that quarter would causo an immediate raily in prices. In addition to the possible reasons put for-ward last week for their lack of interest, may be added a deficiency of rain

In certain districts of India. At so early a period, there is no need for seri-ous approbension, but as the monsoon was rather late in arrival, a certain amount of nervousness might arise. China has been more inclined to sell that to buy, and the weight of absorbing silver has fallen mainly upon Con-tinental and other buyers apart from the East. The quotation of the 13th inst., namely 22 j/d. (the same as that of Feb. 3 last), is the lowest touched this year, and is only 13-16d, above the lowest ever recorded. An Indian currency return for July 7 gave details in lacs of rupees as follows: Notes in circulation. (7.06

Notes in circulation	
Reserve in silver coin	
Gold coin and bullion	7.78
Gold in England	7.65
de Dest.	1.00

Gold in England. 7.65 The stock in Bombay consists of 5,000 bars, as compared with 6,300 last week. The total Canadian production in 1914 was 27,544.231 ozs., valued at \$15,097,269, as against 31,545,803 ozs., valued at \$16,040,924, in 1913, a decrease of 4,301,572 ozs., or 13.5% in quantity, and of \$3,943,655, or 20.7% in total value. Of the total production, 24,215,926 ozs., or 58%, is credited to Ontario, showing a failing off for the province of about 14.1%. The production in British Columbia, representing refined silver and silver contained in smelter products, and estimated recoveries from orces exported. was in 1014 about 3,212,111 ozs., as compared with 3,312,343 ozs. in 1913. A shipment of 500,000 ozs. has been made from San Francisco to Hongkong. Quotations for bar silver per ounce standard: July 9--224 cash. No Bank rate. 5%

# The Federal Reserve Banks.-Following is the weekly statement issued by the Federal Reserve Board on July 24:

The statement indicates a gain in total reserve of 1.8 millions and a gain in gold reserve of 2.4 million dollars. Gold in vault shows a gain of over one-half million dollars, the Gold Settlement Fund an increase of 1.7 million dollars, while other cash reserve decreased about 0.4 million dollars. An increase of about 0.4 million dollars is shown in the amount of discounted notes held by the banks, Richmond reporting the largest gain under 90% of the total gain. Of the combined total of commercial paper and acceptances the latter constitute at present 26.2% as against 32.3% reported the week before, and about 62.8% within 90 fue previous week. About 30.3% of all the paper held may the holdings of arcicultural and live-stock paper maturing after 90 days decreased about 0.4 million dollars, the paper held mount of acceptances the latter constitute at present 26.2% as against 32.3% reported the week before, and about 62.8% within 90 ever one-half million dollars, the paner held may week. The holdings of arcicultural and live-stock paper maturing after 90 days decreased 90 ever one-half million dollars, the paner held may ever the holdings of arcicultural and live-stock paper maturing after 90 days decreased 90 change is reported in the amount of United States bonds held. The total holdings of multicipal warrants increased about 0.7 million, all 90 mounts of capital shown for some of the other banks are due to the shifting of accounts resulting from the iteraster of member banks from one district 90 another. 90 Net days is shown for some of the other banks are due to the shifting of accounts resulting from the transfer of member banks from one district 90 another. 90 Net days decrease of 335.000 is shown for some of the other banks are due to the shifting of accounts resulting from the iteraster of member banks from one district 90 another. 90 Net days days and for the other banks are due to the shifting of accounts resulting from the iteraster of member banks from one district 90 issued to the banks. The Federal R

The figures of the consolidated statement for the system as a whole are given on the following page, and in addition we present the results for each of the eight preceding weeks, thus furnishing a useful comparison. In the second table we show the resources and liabilities separately for each of the twelve Federal Reserve banks. The statement of Federal Reserve Agents' Accounts (the third table following) gives details regarding the transactions in Federal Reserve notes between the Comptroller and the Reserve Agents and between the latter and the Federal Reserve banks.

Statement of New York City Clearing-House Banks and Trust Companies.—The following detailed statement shows the condition of the New York City Clearing-House members for the week ending July 24. The figures for the separate banks are the averages of the daily results. In the case of the totals, actual figures at the end of the week are also given. In order to furnish a comparison, we have inserted the totals of actual condition for each of the three groups, and also the grand aggregates, for the four preceding weeks.

In addition to the returns of "State banks and trust companies in New York City not in the Clearing House" furnished by the State Banking Department, the Department also presents a statement covering all the institutions of this class in the whole State. The figures are compiled so as to distinguish between the results for New York City (Greater New York) and those for the rest of the State, as per the following: For definitions and rules under which the various items

are made up, see "Chronicle," V. 98, p. 1661.

The provisions of the law governing the reserve requirements of State banking institutions were published in the "Chronicle" March 28 1914 (V. 98, p. 968). The regulations relating to calculating the amount of deposits and what deductions are permitted in the computation of the reserves were given in the "Chronicle" April 4 1914 (V. 98, p. 1045). BOSTON CLEARING-HOUSE MEMBERS.

July 17 '15. July 10 '15.

# Bankers' Gazette.

Wall Street, Friday Night, July 30 1915.

The Money Market and Financial Situation .- The highly sensational advance in several manufacturing stocks, which has been a prominent feature of the market for some months past, came to a sudden halt late on Thursday. This was immediately followed by a reaction, in some cases substantial but not very general, and the strength which developed over night and was in evidence to-day leaves the future course of the market decidedly problematical. There are ndeed few precedents, none in recent years, for the phenomenal advance of Crucible Steel from 20 on May 1stand 411/2 on Monday to 83 just before the break on Thursday; or for the steady advance in Bethlehem Steel, which has really led the whole movement, from 541/2 on Mar. 15th to 275 this week; or for Cuban Am. Sugar from 42 to 11934 during the same period-and these are only illustrations. It is interesting to note, however, that railway stocks have not been af-fected by this wild speculation. Whatever changes have occurred in this group of shares have been legitimate and readily accounted for.

While a few people have been interested in the above the entire country has been deeply absorbed in war news and the international situation, matters the importance of which every one is more or less aware. The most recent news from Poland makes it practically sure that the war will be prolonged beyond recent expectations and the diplomatic relations existing between this country and Germany are seemingly as much at variance as at any time within the year.

On the other hand the domestic situation is most encouraging and hopeful. Railway earnings are in some cases, especially those of the Southern Pacific for June, showing a decided improvement. These increased, gross \$419,000, net \$586,000, which is a very favorable contrast with the fiscal year to June 30 as a whole and show that the tide has turned. The spring wheat harvest will soon begin, with excellent prospects, in the southern part of that belt; the railroads are already preparing to move by far the largest corn crop ever harvested; reports from the iron and steel industry show that in some sections at least the output is on a scale of 87% of capacity and prices are steadily advancing. Moreover, there is, as every one knows, an abundance of money for all purposes.

The Bank of England's weekly report shows, in prodigious figures, the result of financing the new war loan. Deposits, both Government and other, increased enormously and while the gold holdings were \$7,500,000 larger, the percentage of reserve was near the lowest reported during the year-16.77. The Bank of France again reported a large increase of gold.

Foreign Exchange .- The market has been quiet and inclined to easiness all week, without special feature otherwise.

Ginned to examiness an week, without special relative of a restrict wise, To-day's (Friday's) actual rates for sterling exchange were 4.71st 4.71st for sixty days, 4.76 is 64.76 is for cheques and 4.76 is 64.76 is 13-16 for cables. Commercial on banks non-mal and documents for payment nominal. Cotton for payment nominal and grain for payment nominal. To-day's (Friday's) actual rates for Paris bankers transce were nominal for long and 5.711st for short. Germany bankers' marks were nominal. Amsteedam banker's guilders were 3.94 for short. Exchange at Paris on London, 27.18 fr.; week's range 26.873s fr. high and 27.15 fr. low. Kachange at Berlin on London not quotable. The range for foroign exchange for the week follows:

The range for foreign exchange to Sterling Actual — Sixty Days, High for the week 4 71% Low for the week 4 71	Cheques. 4 703% 4 763%	Cables . 4 77 14 4 76 14
Paris Bankers' Francs- High for the week Low for the week Germany Bankers' Marks-	5 6334 5 70	5 63 5 69 14
High for the week	8134 8134	82 81 7-16
Amsterdam Bankers' Guilders-	10 1 10 - her H H.	10 0 10 1 1 1 1

State and Railroad Bonds .- Sales of State bonds at the Board include \$32,000 New York 41/2s at 1091/2 to 1091/4; \$1,000 N. Y. Canal 41/2s at 1091/2; \$3,000 N. Y. Canal 41/2s, 1965, at 1041/4 to 1041/2; \$1,000 N. Y. Canal 4s, 1961, at 10112, and \$38,000 Virginia 6s, deferred trust receipts at 573% to 59.

The market for railway and industrial bonds has been decidedly more active, transactions at the Exchange averaging, since Monday, when they were much less, nearly \$3,500,000 per day, par value. The total was augmented largely by a demand for Westinghouse conv. 5s, when issued. These bonds have been dealt in on an enormous scale, and advanced from 109¼ on Tuesday to 114¼ to-day. Lackawanna Stee

5s of 1950 have also been notably active, and advanced over 2 points, a part of which was lost in the drop of yesterday. Bethlehem Steel 5s are also over 2 points higher than at the close last week. U. S. Steel 5s are nearly a point higher on limited transactions. Inspiration Copper conv. 6s, 1922, are exceptional in a net gain of 4 points.

United States Bonds .- Sales of Government bonds at the Board include \$1,000 Panama 3s coup. at 102, \$1,000 2s coup. at 971/2 and \$500 3s coup. at 1003/2. For to-day's prices of all the different issues and for the week's range see third page following.

Railroad and Miscellaneous Stocks .- A break which took place yesterday in some of the speculative stocks and some results of the movement then halted are mentioned above. The sensational advance which has been in progress for months past continued in force up to that hour and the break came without warning. The drop which followed was in two or three cases almost as sensational as the advance had been, but opening prices this morning were generally well above last night's closing figures and a considerable list including both railway and industrial issues, have recorded a net gain for the day.

To-day's market was, however, decidedly irregular and changes in either direction have little or no significance.

Of the railway list several have been strong throughout the week, including Canadian Pacific with a net advance of 51/2 points, New Haven with 33/4, Southern Pacific and Lehigh Valley with 2%, Northern Pacific with 21, Rock Island with 23% and others with 2 points more or less.

with 2% and others with 2 points more or less. In the miscellaneous list Crucible Steel has covered, within the week, a range of 38 points, with a net gain of 24, Bethlehem Steel 74, with net gain of 56; Bethlehem Steel preferred 17 with net gain of 6½, Baldwin Locomotive 10 with net gain of less than 5. Allis-Chalmers advanced over 9 points and closed near the top, the preferred making a similar record. United States Steel, strong on increased orders and output, advanced over 5 points to 68½ and closes at 66½.

For daily volume of business see page 362.

The following sales have occurred this week of shares not represented in our detailed list on the pages which follow:

### THE CHRONICLE

# Investment and Railroad Intelligence.

RAILROAD GROSS EARNINGS The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from July 1 to and including the latest week or month. We add a supplementary statement to show the fiscal year totals of those roads whose fiscal year does not begin with July, but covers some other period. The returns of the electric railways are brought together separately on a subsequent page.

#### Express Companies in United States.

(Domestic Business Year ended Jan. 31 1915-Rate Decision.) The decision rendered on July 14 by the Inter-State Com-

merce Commission in the matter of express rates says in subst:

The decimation is itendered to the out off y 14 by the inter-states Gommission in the matter of express rates says in subst: Petition.—In our original reports in this case, 24 I. C. C. 380, and 28 I. C. C. 131, which followed a very exhaustive investigation, we prescribed a uniform schedule of rates, classification, rules and regulations, effective Feb. 1 1914, as a whole effecting very substantial reductions in rates. On March 16 1915 the petitioners asked a modification of our order, asserting that they had endeavored to make the new plan a success by developing wharch 16 1915 the petitioners asked a modification of our order, asserting that they had endeavored to make the new plan a success by developing that they had endeavored to make the new plan a success by developing that they had endeavored to make the new plan a success by developing that they had endeavored to make the new plan a success by developing that they had endeavored to make the new plan a success by developing that they had endeavored to make the new plan a success by developing the business and effecting all possible economies but that, while their express business has substantially increased in volume, the revenue there-fore, request that we modify our order so as to permit them to transpose two of the three factors composing the express rule basis; that is, the col-lection and delivery service allowed by 5% of the express business and operate over approximately 95% of the express business and operate over approximately 95% of the express business and operate over approximately 92% of the provestions and financial condition of the different companies in detail and as a whole. These ex-nibilita are confined to domestic transportation. *Results on Dimestic Transportation*. On June 30 1914 the United States Express Co. operating approximately 31,000 miles of express routes, re-ited from the express business. This mileage is now operated by peti-tioners, and for this reason the exhibits introduced, and those used herein, unless other

### Cluett, Peabody & Co., Inc., Troy, N. Y.

(Report for Six Months ending June 30 1915.)

Pres. F. F. Peabody on July 29 wrote:

Nowithstanding some depression in the dry goods trade, the company is in an unusually strong financial position. During the period under re-view the company acquired \$435,000 of its preferred stock at a premium, for its amortization fund, but inventoried it at par. The company had upward of \$800,000 of cash in bank on June 30, no bills payable, and practically no liabilities of any kind. The favorable results from the operations of the company's business were due to scientific economies in production and mar-keting. 1011

Your directors have declared a quarterly dividend of 14%, payable Aug. 16. This is at the rate of 6% per annum, a rate to which at least your directors believe you are entitled, and, although we do not know whether the carnings for the year entitled, and, although we do not know whether the carnings for the year entitled, and, although we do not know whether the carnings for the year entitled, as there is a chance that 6% may be earned. This was the policy adopted in the year ending June 30 1916 when it paid the established rate, as there is a chance that 6% may be earned. This was the policy adopted in the year ending June 30 1916, when it paid an hittal semi-annual dividend of 2%, and in the year ending June 30 1915, when it paid three quarterly dividend of 14% (rate of 6% per annum) and later a somi-annual dividend of 2%, and in the year ending June 30 1915, when it paid three quarterly dividends of 14% (rate of 6% per annum) and later a somi-annual dividend of 2%, and in the year ending June 30 1915, when it paid three quarterly dividends of 14% (rate of 6% per annum) and later a somi-annual dividend of 2%, and in the year ending June 30 1915, when it paid three quarterly dividends of 14% (rate of 6% per annum) and later a somi-annual dividend of 2%, and in the year ending June 30 1915, when it paid three quarterly dividends of 14% (rate of 6% per annum) and later a somi-annual dividend of 14% (rate of 6% per annum) and the company to earn and pay at least 6%, with a sufficient margin for depreciation and contingencies, is necessary to maintain the credit of the company to earn and pay at least 6%, with a sufficient margin for depreciation and contingencies, is necessary to maintain the credit of the company to have the precises in the cost of labor and materials and by the large burdens which have been constantly imposed upon the company, and in the indgement of your directors it is not intervise dupon the company, and in the indgement of your directors it is not inthey to be sufficient to provide for c

Brazilian Traction, Light & Power Co.—Div. Reduced. —A quarterly dividend of ½ of 1% has been declared on the \$106,217,500 common stock, payable Sept. 1 to holders of record Aug. 10. From Nov. 1912 to June 1915 1½% was paid quarterly. Secretary J. M. Smith says:

was paid quarterly. Secretary J. M. Smith says: In view of the unsettled conditions surrounding exchange with Brazil and the low rates prevailing, and owing to the prolongation of the war, and notwithstanding that the carnings of the company have continued to in-crease in a very satisfactory way, the board of directors has decided upon the conservative policy of making the dividend of the common stocks for 1915 at the rate of 4% per annum. Three per cent has been paid during the first half of the year, and the board has now declared a dividend of 1% of 1%, making 314% for the three-quarters of the year.—V. 99, p. 118, 43.
Buffalo Bochester & Pittsburgh Ry.—Yearly Results. —The company has issued substantially the following state-ment regarding the results for the fiscal year ending June 30. (Compare monthly carnings on a previous page).

(Compare monthly earnings on a previous page.)

(Compare monthly earnings on a previous page.) The report indicates gross earnings of about \$10,200,000 (including mis-cellaneous and non-operating income.—Ed.), a reduction of about 12% compared with the previous year, yet in excess of gross for aby similar perior prior to the last three years, and the company has earned a safe mar-gin over its full dividend requirements for the year. In attaining this result, it did not depart from its policy of maintaining rowenue being expended for maintenance. With a reduction of \$1,356,000 in gross earnings compared with the previous year, the mainsperiation, the ratio for the year being 31.17%, a reduction of 3.06%. In addition to having expended more than a million dollars for new equip-ment during the year, the company constructed a modern warehouse of re-enforced concrete in its Rochester terminal; eliminated grade crossings at Saxton St., Rochester, and McVean Hoad, to carty the heavier locomotives reconforced concrete in its Rochester terminal; eliminated grade crossings at Saxton St., Rochester, and McVean Hoad, to carty the heavier locomotives reconfigure the during and the regulation of a subjust the station at Sykes, Pa.; new power house at Du Bolis; new steel priorement of steel viaduet 270 ft. in length, to carty the heavier locomotives recently purchased --V. 100, p. 1831.

Buffalo & Susquehanna Ry.—Sale Aug. 23.—This road, Wellsville to Buffalo. 86 miles, and appurtenances is adver-tised for sale under forcelosure of 1st M. of 1903 in Buffalo on Aug. 23. See new bondholders' agreement in V. 101, p. 287.

tised for sale under foreclosure of 1st M. of 1903 in Buffalo on Aug. 23. See new bondholders' agreement in V. 101, p. 287.
Chicago Burlington & Quincy RR. —Bonds Called. — One hundred and eighteen bonds of \$1.000 each and \$7.0 \$100 each of the same different bonds of \$1.000 each and \$7.0 \$100 each of the same different bonds of \$1.000 each and \$7.0 \$100 each of the same different bonds of \$1.000 each and \$7.0 \$100 each of \$1.000 each

 Chicago Milwaukee & St. Paul Ry.—Dividend Reduced.
 —A semi-annual dividend of 2% has been declared on the \$117,411,800 common stock, payable Sept. 1 to holders of itized for FRASCON Aug. 12. This compares with 2½% semi-annu-//fraser.stlouisfed.org/

ally from March 1912 to March 1915 inclusive and 31/2% during the years 1902 to 1911, both inclusive. Dividend Record on Common Stock Since 189

Dividend Record on Common Slock Since 1894. 1894. 1895. 1896. 1897 to 1900. 1901. 1902-11. 1912-14. 1915. 4 2 4 5 yearly 6 7 yearly 5 yearly Mar. 235 Authoritative Statement Issued on July 29. The action of the board of directors upon the dividend seemed to them ernediant in view of the decrease in operating income for the fiscal yearly which has just closed; which decrease is attributable to the following com-ditions, viz.: 1. General business starmation and the competition of the Panama Canal, both of which affected particularly the long haul traffic yielding the maxi-mum revenue. 2. A radical increase in the taxes paid amounting to \$640,000, togebber with a large increase in the taxes for depreciation of the Western advanced rate cases, freight and passenge. 3. The long-stabilished policy of the company to maintain the property at its customary high standard, in preference to sacrificing its physical con-dition.

rate cases, frelight and passenger. 3. The ions-established policy of the company to maintain the property at its customary high standard. In preference to sacrificing its physical con-dition. Confronted with this situation as the result of causes entirely beyond the control of the management, no other dividend action seemed justifiable. *Listed.*—The New York Stock Exchange has authorized to he listed \$29,141,300 General and Refunding M. 5% bonds, series B, convertible, on notice of issuance in exchange for outstanding full-paid temporary receipts.

Earnings.—A preliminary statement for the late fiscal year, it is said, will be issued next week. From information derived at the meeting of the directors on Thursday it appears that the statement will show about 2.7% to have been earned on the common stock. The following figures were made public this week:

-Years end. June 30- -10 Mos. end. Apr. 30-1013-14. 1014-15. 1913-14. 1914-15. Gross oper. revenues...\$93.613.700 \$91.435.374 \$78.647.397 \$76.380.308 Oper. exp. and taxes... 66.996.859 66.718.422 56.117.503 56.180.559

Gross corporate income for 10 mos. ending Apr. 30 1945. \$22,776.175 Deduct—Hire of equipment. \$ 28,266; rents paid. \$607.167; in-borest on Iosus, &c., \$307.314; non-operated property ex-ponses, \$54,886; total Bond Interest, \$12,037.501; aneothetible raliway revenue, \$25,104; miscellancous, \$165,240; total. 12.223.845

Balance, surplus, for dividends for 10 mos. end. Apr. 30 1015. \$9,139,703Dividend requirements for 10 months ending April 30 1015 called for \$6,757,673 on the preferred, and, at the semi-annual rate of 23/\$7 for 6 mos. ending Dec. 31 1014 and of  $2^{+6}$  s.-a. for the 4 mos. ending April 30 1915, for \$4,479,253 on the common stock.—V. 101, p. 287, 129.

Chicago Railways.—Delayed Dividend.—A dividend of \$4 has been declared on the Series 1 participating certificates (30,800 parts), payable Sept. 1 as of Aug. 1 to holders of record May 20.

The last distribution on the Series 1 certificates was \$4 in June last, the paymont due Feb. 1915 inving been deferred until that time. On Aug. 1 1914 \$5 was paid in full of arrears on the Series I certificiaes.

	Dividend	Record of	Participation	Certific	ales.	
Series 1	1908. \$4	1909-11. None.	1912. 86	1913. \$22	1914. \$12 \$2	1915. June, 84 June, 82

Vice-President of the Subsidiary Chicago Tunnel Co., 2.8 confirms the following:

confirms the following: During the period from 1906 to 1914 the company paid the city in faxes \$701.431, and during the same time not one cent to its owners. Revenue derived from the company has averaged about \$300.600 per year, and operating expenses and taxes have considerably exceeded this amount. Tor a period of five years, 1910 to 1914 inclusive, the company carned, net, out of its transportation plant, the sam of \$303.550, after paying op-crating expenses. Against this the company has paid taxes and franchise compensation amounting to \$525.035; therefore, the company has paid to the city in five years \$134.476 more than was carned from transportation property. This condition is urged by the company is a reason why it should be permitted to sell its telephone property. (No report is published.) See V. 100, p. 1831.-V. 101, p. 47. **Cincinnati Hamilton & Dayton Ry.**—Payment.— There was deposited on July 10 with J. P. Morgan & Co. the funds to pay the installment of \$54.000 Kleybolte Equipment Notes, which matured April 1 1915. The interest on the entire outstanding amount (\$162,000) had been previously met.-V. 101, p. 287. **Cincinnati Indianapolis & Western RR.**—Sale Sept. 9.-Press reports state that the sale of the road has been fixed for Sept. 9.-Y. 101, p. 129, 47. Cincinnati Traction Co.—Decision.—

Cincinnati Traction Co.—Decision.— The Ohlo Supreme Court on July 20, reversing the Hamilton County ourt of Appeals, hold constitutional the law which requires the consent a majority of abutting property owners to be given before a car fine can extended or tracks laid upon a street. This will, it is expected, prevent e building of the Bond Hill car line along Reading Road. Compare 101, p. 212. the

Cleveland Barberton Coshocton & Zanesville Ry.-

Cleveland & Ohio Central Electric Ry.-

See Cleveland Barberton Cochecton & Zanesville Ry. above. Consumers' Power Co. (of Maine), Mich.—Bonds—Au-thority to Operate Properties in Michigan—Merger Plan.—On July 20 1915 the Michigan RR. Commission approved the application of the company for an order (1) approving its prosent outstanding issues of First Lien & Refunding 5% 25-year gold bonds and common and preferred stocks; (2) authorizing it to issue from time to time \$2,714,000 of its First Lien & Refunding 5% 25-year gold bonds. These ast (\$2,714,000) bonds will be issuable upon the procurement or retirement from time to time of \$1,213,000 1st M. 20-year 5% gold bonds of the Commonwealth Power Co. and \$764,000 1st M. 25-year 5% gold bonds of Grand Rapids-Muskeson Power Co.

The Commission having obtained an expert appraisal of the property, also made an order on the authority of which the Secretary of State has issued to the company a certificate of authority to do business in the State of Michigan. This

enables the company to take conveyances of the physical properties heretofore operated by its various subsidiary com-panies, eleven in number, and to directly own and operate

panies, eleven in number, and to directly own and operate panies, eleven in number, and to directly own and operate all of these properties. The stock of the company is, therefore, a Commission-approved stock, and is absolutely tax-exempt in the State of Michigan. Through this order commiss are effected in operation and also a saving of Federal income tax. The company is under the management of Hodenpyl, Hardy & Co. and the W. Clark & Co. The outstanding bonds were placed on the market by Hards, Forbes & Co. -V. 101, p. 287. Denver City Tranway Co.-Selllement.-The dispute between the city of Denver and the company over the tax rate for 1912, 1913 and 1914 has been compromised, the company having on July 21 paid the city 373.061 in full payment for the remainder of the taxes of 1912 and all of the 1913 and 1914 taxes which had been in dispute. The city dismissed the suit for receivership which the municipality started because the taxes were not paid. Under the assessed valuation made by when included interest and penalties up to July 1. The saving is therefore about \$200.000. Under the terms of the settlement the company gave about \$200.000. Under the terms of the savessed valuation made by the State of its proportion of the taxes as assessed by the State of Colorado may make for its proportion of the taxes as assessed by the State of Colorado may make for its proportion of the taxes as assessed by the State of Colorado. The State is successful in its contentions, this may, it is expected, require not over \$25,000 to be paid.-V. 97. p. 1203. Denver & Rio Grande RR.-Suit on Noles for Advances

Denver & Rio Grande RR.—Suit on Notes for Advances See Western Pacific Ry. below.—V. 101, p. 212.

See Western Pacific Ry, below. -V. 101, p. 212.
 Detroit (Mich.) United Ry. -Contract Approved. -The Board of Street Ry. Commissioners on Monday approved the contract for the purchase of the lines within the one-fare zone under which the city may obtain control of the system at a price to be fixed by the Circuit Judges of Wayne County; also the necessary charter amendment.
 The statement of the Board's approval, together with the contract, which must be submitted to a vote of the people, and the proposed charter amendment were made public on Wednesday. The contract will be aubmitted to the directors at a meeting on Aug. 2. -V. 101, p. 213, 130.
 Evansville & Terre Haute RR. -Equip. Trust Plan. -See Chicago & Eastern Illinois Ry, above. -V. 101, p. 283, 47.
 Federal Light & Traction Co. -V. 101, p. 283, 47.

 Federal Light & Traction Co. -Voting Trust Wads. The voting trust agreement dated July 29 1010 having expired by limitation July 29 1915, the National City Bank, 55 Wall St. as depositary, will, upon surrender of any stock trust certificates and upon payment of four cents per share for transfer taxes, make delivery of proper certificates for the company. The voting trustees were James O. Colaste, Harrison Williams and H. Hobart Porter.-V. 100, p. 555, 140.
 Hocking Valley Ry.-Application.-The company and the Chesapeake & Ohio Ry. have applied to Judge Warrington in the Federal Court at Clineinnati for confirmation of a confract about to be entered into by the railway companies with E. M. Poston for the sale of 2,500 shares of stock of the Buckeye Coal & Ry. and 2,066 shares of the Ohio Land & Ry., which the railways were ordered to sell in the decree ordering the separation of the roads and the coal companies involved in the litigation.

ordering the separation of the roads and the coar companies involved in the liftigation. The two railway companies state that the contract of sale also provides for the exchange of \$1,327,000 20-year purchase-money bonds of the Ohio land & Ry, bearing 6% interest for \$700,000 income mige. Donds of a comparation to be excanized and known as the Hocking Coal Lands G. The slocks of the Ohio and Buckeye companies, except directors' shares and the bonds of the Ohio and Buckeye companies, except directors' shares and the bonds of the Ohio and Buckeye companies, except directors' shares and the bonds of the Ohio company, are, it is stated, subject to the like of the first consol, mixe, of the Hocking Valley Ry, and the Buckeye company to the Central Trust Co. Of N. Y., as trustee, dated March 1 1890, and these stocks are now held by the Central Trust Co. The price to be paid by Mr. Poston, it is set out, is \$50,000 in cash. The court should confirm the sale of the stock and the exchange of the bonds, it will mean practically the dismissal of the suit brough by John J. Jones, a coal operator of Chicago and Granville, recent purchaser of the studay Creek Coal Co. stock from the railway companies, to compet the buckeye companies. The company on July 28 filed the new rate schedule with the Ohio Ustil-tes Commission embracing the reductions ordered by the commission and district and Toledo. Tuder the new schedule, Ohio operators will have to pay 85 cents per ton from Armitage to Toledo instead of the old rate of \$1 per ton. The present inter-State rates from the West Virginia coal fields to Toledo is \$1 25 per ton with corresponding rates for intermeduate coal fields to Toledo is \$2 15 per ton the the conception lineter of the old rate of \$1 per ton. The present inter-State rates from the west Virginia coal fields to Toledo is \$2 15 per ton the contexponding rates for intermeduate points. It is pointed out that Ohio operators will have to outer a with corresponding rates for intermeduate points. It is pointed out that Ohi

Idaho Traction Co.—Increases Allowed.— The P. U. Commission has allowed increases Allowed.— The P. U. Commission has allowed increases in the interurban fares be-ond Randall on the southern division and Collister on the northern divi-on, but has refused to permit an increase in the fares on the Hill Crest pop and Collister and Cole school lines in commutation tickets and in the cent a mile charged on school children's tickets.—V. 100, p. 1437.

boop and Collister and Cole school lines in commutation tickets and in the I cent a mile charged on school children's tickets.-V. 100, p. 1437. Illinois Terminal RR..-Decision.--The Illinois State P. U. Commission on July 15 handed down a decision on the complaint of the Alton Board of Trade, holding that the Terminal RR. Is a common carrier under the State Public Utilities Act and ordering that its increased rates be annulled. The Board brought the proceedings in March 1914, when the Terminal Co. increased its rates, declaring that the Eastern 5% increase made this necessary. The new rates were aus-pended by the Commission pending the hearing of the case.-V. 98, p. 690. International & Great Northern RR..-Tax Suit.--Judge Burns in the Federal Court on July 20 dismissed the suit brought by the receivers against the State Tax Board to have reduced the tax leviced on Intangible property. The Court stated that the rights of the company under the Federal Constitution had not been violated and that nothing had ruling no Federal questions are involved in the controversy between the road and the State Tax Board. The Court declined to rule on the question as to whether the assessment for this year, \$10.743, 223, was creasive, this being, he state), a question for the State Courts to decide.-V. 100, p. 2000.

Kansas City Railway & Light Co .- Plan .- A pross re-

Kansas City Railway & Light Co.—*Plan.*—A press report yesterday said: Announcement was made in the U.S. Court before Judge Hook to-day, of the completion of the reorganization plan of the Kansas City By. & Light Co. It provides for the segregation of the present properties, one into a lighting corporation and the other into a railway company, each to issue let M. 5% bonds maturing in 1944. Old funded securities will be accepted at par in the reorganization. The City Councel of Kansas City recently granted an extension to Nov. 7, four months, as the time within which the Kansas City Railways must accept the franchise voted by the city.]—V. 101, p. 288.

Lake Erie Bowling Green & Napoleon Ry., Ohio.—Sale Judge Killts of the Federal District Court at Toledo on June 25 ordered the sale of the property on application of the Union Trust Co. of Detroit the mortgage trustee. See page 14. "Electric Ry. Section."—V. 99, p. 346.

itized for FRASER ://fraser.stlouisfed.org/

E. H. Rollins & Sons, fiscal agents, say in substance: The interest on outstanding bonds for the year ended June 30 1915 was earned 1.8 times, which is an excellent showing considering the fact that jitney competition is presumed to have been most serious in Los Angeles, where it originated in this country. This competition now seems to be dy-ing a matural death, as the number of jitneys now running is understood to be less than 25% of the number in operation at the height of the jitney craze. The falling off in earnings was due partly to general business de-pression, and we believe that the experience of this company has demon-strated that the holders of bonds of a conservatively capitalized street rail-road need have no fear that their investment will be jeopardized by jitney competition or periods of a cute business depression.  $-V \cdot 100$ , p. 1435.

Memphis (Tenn.) Street Ry.—Suit.— The company on July 15 filed a bill in the Chancery Court to enjoin the operation of jitneys in the city. Jitney corporations and other jitney owners to the number of 316 were made defendants. Chancellor Heiskell on July 22 began the hearing on the application for a temporary injunction. —V. 100, p. 1752.

 New Jersey & Pennsylvania RR.—Re-Sale Ordered.— Vice-Chancellor Howell, at Newark, N. J., on July 27, on application of the purchaser (a sanitarium patient), at receiver's sale on July 71 last re-lieved him of the necessity of carrying out his purchase. The Court, however, ordered that the \$500 carnest money paid be held by the receiver and that it will be applied as far as it will go to make good any difference resulting from a re-sale at a lower price. The purchaser agreed to pay \$27,000 and meet State taxes amounting to about \$15,000, besides \$200,000 bonded debt and general chains amounting, to is stated, to about \$80,000. —V. 100, p. 398.
 Naw York Control RP — Desceed Community

New York Central RR.—Proposed Guaranty.— See New York New Haven & Hartford RR. below.—V. 101, p. 288.

See New York New Haven & Hartford RR. below.--V. 101, p. 283. New York New Haven & Hartford RR.-Preliminary Statement for Year ended June 30 1915.--At the regular meet-ing of the board held on July 27, Chairman Howard Elliott presiding, the preliminary returns of the company and some of the associated properties for the fiscal year which ended June 30 1915 were made known, showing an available bal-ance of about \$2,418,000, being an amount "sufficient to make up the deficiencies in meeting the fixed charges of the New York & Stamford Ry. Co., the Westchester Street RR. Co. and the Berkshire Street Ry. System, the three trolley properties still managed by the company and the New York Westchester & Boston." The official statement continues: The deficit below all fixed charges for the three trolley properties will be

The year ended on June 30 rather better than at first esti-mated. The gross earnings decreased \$2,073,000 and the operating expenses decreased \$5,106,000—the ratio of ex-penses to earnings for the year being about 68%, compared with 72.83% for the fiscal year ended June 30 1914.

with 72.83% for the fiscal year ended June 30 1914. *Guaranty*.—Conn. RR. Commission will on Aug. 3 hold a hearing on the company's petition for approval of agreement with the New York Central RR. Co. and the New Yrok Realty & Terminal Co., involving a promise to guarantee or indemnify said Realty & Terminal Co. against loss in the issue of a bond and mortgage by said Realty Company on certain real estate or terminal property located in N. Y. City. (Compare N. Y. real estate outlays, V. 99, p. 1219.)—V. 101, p. 288, 213. p. 288, 213.

New York Railways.—Modification Denied.—The P. S. Commission on July 27 denied the application for a modifica-tion of its order of Dec. 10 1912 directing the company to set aside for depreciation an amount equal to 20% of its gross operating revenue.

Operating revenue. Commissioner Wood says that the application states that the company, in conformity with the order, has set aside 20% of its gross operating revenue from Jan. 11912 to Oct. 31 1914, amounting to \$7.808.007, having spent for maintenance 36.244.140, leaving a balance in the reserve of \$1,623.867. This the company holds, is more than sufficient to provide for lal depreciation on its properties during the period mentioned. If the order had required the setting aside of 20% of the gross passenger revenue \$1,345.867, which, the company states, will be ample for all depreciation accruing during the period. The modification asked for was that the order be changed so that it should provide that 20% of the gross passenger revenue instead of 20% of the gross operating revenue. The Commissioner says that the question of the amount necessary was considered in the Commission's decision in the so-called "steploss car

case." and concludes as follows: "Inasmuch as a writ of certiforari has been allowed to review the determinations of the Commission in that case, and a writ of certiforari has also been allowed to review the order in the present case, it does not seem to me that, pending the decision upon these important questions the Commission should at the present time undertake to modify the requirements of the order of Dec. 10 1912 as prayed for in the present petition."—V. 100, p. 2168.

Northern Central Ry.—Equity May be Covered.— See Pennsylvania RR. below.—V. 101, p. 288. Oregon & California RR.—Modification Asked.— The company has given notice that it will apply to the U. 8. Supreme Court when it reconvenes in Oct. next for a modification of its recent de-cision in the Government suit, under which it will be permitted to cut and sell the timber on the unsold portion of the grant before disposing of the land and retain the proceeds. Compare V. 101, p. 48.

Iand and retain the proceeds. Compare V. 101, p. 48.
 Paducah & Illinois RR.—Increase of Stock.—The company on July 22 filed amended articles of incorporation increasing the preferred stock from \$6,000,000 to \$7,000,000.
 The preferred stock under the amended certificate is to be entitled to receive semi-annual dividends at the rate of 5% per annum.
 Regular service on the line from Paducah to the site of the new bridge to be built opposite Metropolis. III., will be begun Sept. 1. A trial trip was made on July 23.—V. 100, p. 2088.
 Pennsylvania RR.—Authorized.—The Maryland P. S. Commission has authorized the company to amend its original request for a blanket mortgage to cover all the lines of the system so as to include special provision that the company may include in the mortgage the equities it holds in the Northern Central.—V. 101, p. 213.
 Pittsburgh Youngstown & Ashtabula Ry.—Bonds.—

system so as to mellide special provision that the company may include in the mortgage the equities it holds in the Northern Central.—V. 101, p. 213.
 Pittsburgh Youngstown & Ashtabula Ey.—Bonds.—The Ohio Utilities Commission has authorized the company to sell \$364.-000 4% bonds. See V. 100, p. 2086.
 Public Service Corporation of New Jersey.—Monthly Statements.—The directors recently voted to make monthly financial reports for the information of the general public. It has been the custom of the company to make such statement is only once a year, preceding the stockholders' annual meeting. In the first statement issued in accordance with the new policy the first six months of the past six months the corporation shows a gain in gross earnings over the first half of 1914 amounting to \$631,835 61, or a percentage of increase of 3.6%. The balance available—after the payment of operating expenses, fixed charges, sinking fund requirements, &c.—for amortization, dividends and surplus, amounted to \$1,597,442, which means that the increase in surplus available for dividends over the corresponding period of 1914 was \$149,596.—V. 100, p. 2168.
 Rapid Transit in New York City.—Contracts.—

 The Public Service Commission on July 28 awaided:
 To Post & McCord. Inc., the lowest of 12 bidders for \$3,7,950, the ontract for the construction of Section 1 of Route 40, a 3-track elevated state of all due to the 44 h Avenue subway. Brooklyn., estending along the old Culver route from 37th St. to a point about 25 ft. South of the function of the due to the due to by the Brooklyn, being an extension of the due torp, he dowest bidder, for \$3,170,-93.
 To Rodgers & Hagerty. He, the lowest bidder, for \$3,170,-93.
 To Rodgers & Hagerty. He, the lowest bidder, for \$3,170,-93.
 The commission allowed as the threedow and 7th Avenue between the Brooklyn heald Transit Co.
 <

Queensboro Bridge.-V. 101, p. 213. Rock Island Company.-Receivership.-This company, organized to hold the shares of the Chicago Rock Island & Pacific Railroad, which were rendered worthless by the sale under foreclosure of the latter company's holdings in the stock of the Chicago Rock Island & Pacific Railway (the operating company), was on July 29 placed in the hands of Channeey G. Parker as receiver by Vice-Chancellor Emery at Newark, N. J., on application by President John J. Quinlan, on the ground of insolvency. A deficiency judgment for 366,239,258 in favor of the Central Trust Co. was entered in January has tagainst the Railroad company. Mr. Quinlan alleges that the Rock Island Company has had its income cut off. Its assets and of questionable value and its resources taken away. See V. 100, p. 310.

310

310.
 Rock Island Southern Ry.—Default.—Reorganization.— This company was unable to meet the interest due July 1 on its \$2,282,000 1st M. 5s of 1908, and also needs money for repairs and additions. Reorganization is proposed. Vice-President M. A. Walsh says:
 Bondholders by the proposed plan would receive for each \$1,000 bond a new ist M. bond for \$400. first pref. stock for \$600 and \$100 of bonus com-mon stock. This common stock is given from that held by the present stockholders. There will be many added improvements to the property. especially to the terminals at Rock Island. There will be added some elec-tric locomotives to take the place of the present steam locomotives, thus increasing freight facilities and the general service.
 Iterry C. Morand, Singer Bidg., N. Y. has been named as Secretary of the proposed reorganization committee. The July interest on the \$521,000 ist M. 5s of the Rock Island Southern Railroad, we are informed, was paid at maturity. See also p. 65 of "Itelectic Railway Section."]-V. 97, p. 961.
 Twin City Rapid Transit Co., Minneapolis.—Jitneys.

The question of jurisdiction, involving an authoritative determination as to whether the Legislature of 1907 gave the Commission all power over rates irrespective of the acts of the Legislature in setting maximums, may, it is stated, now therefore be presented to the courts: also, further, that is is not unillely that in the meantime either the Constitutional Convention now in session or the Legislature may define the powers of the Commission anew so as to remove all future doubt of their scope.--V. 101, p. 132. **United Railroads of Yucatan.**-*Coupon Payment.*--Ladenburg, Thalmann & Co., 25 Broad St., N. Y., announced on Tues-day that they would on and after July 28 pay the April 1 coupon of the 5% 18t M. gold bonds with interest thercon at 5% from April 1 to July 28. -V. 91, p. 718.

M. gold bonds with interest thereon at 3% from April 1 60 July 26. -V. 91, D. 713.
 Wabash RR.—Plan Operative—30% Assessment Payable Aug. 30.—The joint reorganization committee, Winslow S. Pieree, Chairman, has declared operative the plan or re-organization dated April 28 1915 and notifiet holders of certificates of deposit of Columbia Trust Co. (or its prede-cessor), representing stock, either common or preferred, that they must make the payment required of them under the plan, namely, 30% of the par value of said stock, or \$30 per share, at the office of the Equitable Trust Co. of N. Y., on or before Aug. 30 1915. So soon as practicable after Aug. 30, notice will be given to holders of certificates of deposit representing First Refunding and Extensions More-sage bonds of the amount of the payment required of them.as provided in the plan and agreement of reorganization, and of the date by which such payment, or the first installment thereof, shall be made. See plan, &c., V. 100, p. 1594, 1599, 1834, 2012, 2168.

The time within which further deposits of both stock and bonds may be made under the plan has been further extended to and including Aug. 30 1915. See further particulars in adv. on another page.—V. 101, p. 132, 289.

Washington Ry. & Electric Co.— A ppeal to Courts.— The company on July 20 appealed to the District Supreme Court to com-pet the Commission to authorize a bond issue of \$341,000. It is altered that the Commission refuses to permit a bond issue made necessary to cover cert tain improvements ordered by the Commission.—V. 100, p. 1350, 1241.

West End Street Ry., Boston.—Noles.— To provide for \$4,743,000 4% bonds due Aug. 1, the company has sold for F.S. Mossley & Co. \$4,743,000 1, 2 and 3-year 5% notes, due \$1,581.-000 at each maturity.—V. 100, p. 1919, 1169.

000 at each maturity.—V. 100, p. 1019, 1169.
 West Virginia & Southern RR.—Sale of Stock.— See Marmet Coal Co. under "Industrials" below.
 Western Maryland RR.—Earnings—Status.—The New York "Times" on July 30 said:
 Directors of the Western Maryland, when asked recently about the finan-cial condition of the read, said the report of earnings for the full year would show that the Western Maryland was able to take care of fiself. The re-port for June and for the 12 months, issued yesterday, bears out the opti-inate assertions. June was another good month, showing increases in net operating income of \$2,120,016, an increase over 1914 of \$11,964,145.
 There will be no disposition to crower the management for payment on \$16,000,000 notes which are overdue, as long as the Western Maryland con-tinues to make strides ahead.
 Promosed Branch Line Charlered in West Virginia.—

Proposed Branch Line Charlered in West Virginia.— The Fairmont & Helons Run Rallway Co. has been incorporated with \$500,000 auth. capital stock to build in the interest of the Western Maryland a 6-mile road connecting the two mines which the Consolidation Coal Co. is opening up in Helens Run field of West Virginia with Western Maryland Ry, and Baltimore & Ohio.—V. 101. p. 132.

Western Pacific Ry.—Suit.—The New York Trust Co., as trustee under the adjustment income M. of the Denver & Rio Grande, on July 24 brought two suits against the com-& Rio Grando, on July 24 brought two suits against the com-pany, one to recover on several notes aggregating \$14,096,-095 given to the D. & R. G. for advances mainly to meet int. charges, and the other for \$4,375,000 for similar advances "The step, it is stated, is taken merely to reduce to judgment the collateral for the securities involved in the proceedings in order to prevent it from be-coming outlawed.-V. 101, p. 215.

Winnipeg Electric Ry. Co.—Stock.— The company has applied to the London Stock Exchange for authority to list £400,000 415% perpetual consol. deb. stock, making total listed £000,000.—V. 100, p. 1745.

Adams Express Co.—Domestic Revenue—Increase in Rates. See "Express Companies" under "Reports" above.—V. 101, p. 289.

American Coal Products Co., N. Y.—Official Statement —Proposed Extra Dividends on Common Stock—Earnings for Six Months.—Pres. William Hamlin Childs in circular dated at N. Y., July 29, says in substance:

at N. Y., July 29, says in substance: The cause of the rapid advance in the quoted value of this stock in the last 60 days has been fundamentally due to the prosperity of the company, but the management has not in any way alded this movement. Thasmuch as since 1903, the date of the formation of the American Coal Products Co., the enlargement of its plants has been made largely from earnings, and as only from 50 to 60% of the earnings have been declared to the stockholders are entitled to a larger percentage of the earnings applica-ing the common stock, and that with the continuance of the 7% dividend, an extra dividend, probably in common stock, should be made when war-ranted by the earnings at the end of each year, besides carrying every year a substantial amount to surplus in addition. It has been our custom to maintain all our important plants at their maximum efficiency, charging off all items for maintenance of twidend, the net profit applicable to dividends on common stock inow [\$10,760,200] reserves and surplus has been as follows: For the year 1914, \$1,36,63,21, and for the year 1914, \$1,32,475. The company has been paying dividends regu-led the rate of 7% for a number of years, and has carried several million dollars from its carnings to the company for the first six months of 1914, applicable to dividends on the common stock and use of 1914, applicable to dividends on the common stock and paying the pref.

dividends, were \$545,078 and are for 1915 3952,479, or an increase of \$407,601. We believe there will be more than a proportionate increase of during the last six months of this year.
This increase has come, to a considerable extent, from exceptional activity in our chemical department, but the steady increase of our sales of tarvia and the rapid development of the department manufacturing congoleum rugs, have been important factors. Our new agency contracts for the sale of benzol and toluol will give in the six months beginning July 1 of this year a new source of income.
The American Coal Products Co, owns one-third interest in the Benzol Products Co, the other two-thirds being owned respectively by the General Chemical Co, and the Semet-Solvay Co. This company has fust finished a large, modern plant at Marcus Hook, Pa., for the manufacture of analing of and salt, which are used in the domestic dycestift industry and which have previously been imported into this country. The income room this investment has not as yet shown in the statement of the American Coal Products Co., and will not until it is in receipt of dividends upon the stock. Compare V. 100, pp. 2012, 1595, 1589.

\*After charging replacements, renewals and interest on loans. Net current assets June 30 1915, \$10,147,459. Pres. Theodore S. Haight and Treas. George A. Hill say the statement for the 3 and 12 months ending June 30 1915 has been prepared on the same accounting basis as the annual statement of June 30 1914, and the finished leather has been taken at the same prices which are \$238,000 below a con-servative market valuation. On account of the present prevailing business conditions, the directors advise this conservative departure from the usual method of valuation.—V. 100, p. 1439.

Method of valuation.—V. 100, p. 1439. American Malt Corporation.—Special Meeting Sept. 22 —Attempt to Oust Present Management.—A special stock-holders' meeting will be held Sept. 22 1915 at the request of a group of stockholders representing some 25% of the stock and headed by James B. Taylor, of the late firm of Wm. B. Franklin & Co., for the purpose of attempting "a radical change in the management." Chairman Wilberforce Sully by signalar says in substance.

Bind neithed by James B. Paylor, or the fact thin or the relief.
Franklin & Co., for the purpose of attempting "a radical change in the management." Chairman Wilberforce Sully by circular says in substance:
The directors deem it their duty in the interest of the stockholders to resist to the utmost this attempt to obtain control of the company in the interest of a minority of the stock. They feel that such a change in the management would be detrimental to the company. A proxy committee has been designated by the directors, consisting of Michael Coleman, Albert N. Parlin and George Emlen Roosevel, to solicit the profiles of such stock-holders as cannot be present at the meeting. The officers of the company or the members of this committee will furnish any information desired concerning the affairs of the company and the conduct of the business.
The director dated July 21 1915, issued by Messer, Taylor, Leonard and Landale, refers to an agreement entered into in 1914 between the directors and certain "dissatisfied stockholders." These are the facts: Early in Jam. 1914 there was served on the board a paper signed by Messers. Thylor, Franklin, Landale and other stockholders is representing in all, it is stated is served at a time when the merger proceedings before the P. U. Commission were pending and the boarded debt of American Malting Co. with the stareholders in question with drew the request for a special meeting on condition that William B. Franklin, Franklin, Can and an agreement was therefore reached by which the shareholders in question with drew the request for a special meeting of chardhold be elected to the board. They were so elected on Jan. 14 1914, and Mr. Franklin was also elected president of American Malting Co., which was more than had been stipulated in the agreement. The statement that the odd hoard of Greetors bus previous to the afores such change a cange take and on the board of directors bus previous to the afore the state of the posilion of Charman of t

Kansas Natural Gas Co.—Increased Rates.— The Kansas P. U. Commission has authorized an increase in rates from 25 to 28 cents per 1,000 cu. ft., provided a similar increase is allowed in Missouri. The award stipulates that the increase is to be used in exten-sions and betterments and not towards retirement of the 2d M. bonds. While it is thought that an appeal might bring a greater increase, it is rumored that frederal Judge Flannely is quite likely to take matters in his own bands and order a rate advance in keeping with the company's financial plan on the ground that the company transacts an inter-State-bushness and that the State Commissions have no real jurisdiction. Com-pare plan, V. 100, p. 401.—V. 100, p. 1171. Kally, Springfield Ting Co.—Emponded Decision —

pare plan, V. 100, p. 401.—V. 100, p. 1171. Kelly-Springfield Tire Co.—Favorable Decision.— Judge Hand in the U. S. District Court on July 22 in the suit against the Diamond Rubber Co. (now merged in the Goodrich Co.) for infringements of the Grant patent, which has been pending since 1897, confirmed the award of the master of \$130,000 damages in favor of the Kelly-Springfield Co. The decision also allows interest and costs and adds \$50,000 for punktive damages, amounting in all to about \$212,000. The company has suits pending involving larger amounts against the B. F. Goodrich Co., Republic Co., Pennsylvania Rubber Co. and others for like infringements, now all in the accounting stage awaiting the master's report.—V.100, p.1756.

Keystone Watch Case Co., Phila.—Div. Omilted.— The directors have, owing to trade conditions, voted to omit the semi-annual dividend on the \$6,000,000 stock usually paid in August. In Feb. 1915 119% was paid for the 6 months ending Dec. 31 1914. From Feb. 1903 to Aug. 1914 35% was disbursed semi-annually. In 1901 and 1902 6% was paid and in 1900 5%.—V. 100. p. 2014.

Marmet Coal Co., Cincinnati.—Bids Asked for Property. Chas. W. Poysel and Edwin Marmet, receivers, will receive bids at Cin-muti office until Sept. 21 for the sale of the property, including the entire 100,000 capital stock of the West Virginia & Southern RR., a line running om Marmet to Hernshaw, W. Va. and connecting with the Chesapeake Ohio.—V. 100, p. 1441.

from Marmet to Hernshaw, W. Va. and connecting with the Chesapeake & Ohio.—V. 100, p. 1441. **Mt. Vernon-Woodberry Mills Co., Inc.**—Sale, &c.— Following the sale in parcels the properties of the Mt. Vernon-Woodberry Cotton Duck Co. Decated in Baltimore City and County, in Prince George's County, Md., at Columbia, S. C., and at Tallassee, Ma., were bid in as a whole on July 21 for \$3,420,000 for the bondholders' committee. They will hereafter be owned by the new company, the Mt. Vernon-Woodberry Mills, Inc., as per plan in V. 99, p. \$98; V. 100, p. 1202, \$61. The plants, it is said, are running full time, with unfilled orders on hand July 1 of 7,500,000 lbs., principally of Ichaki cloth and cotton duck for Europe,—V. 100, p. 2006.

stood to be substantially correct: The electron of Henry R. Sutphen, Vice-President of the Electric Boat Co., to the directorate of the Standard Motor Construction Co. appears to confirm rumors that the Interests controlling the Boat Co. have secured con-trol of Standard Motor. Lewis Nixon has resigned as President of the latter concern and it is believed that he has sold the greater part of his hold-ings of Standard Motor stock to the new interests in the company. Vice-Press. E. A. Relotte has been appointed to succeed Mr. Nixo. The Electric Boat Co. controls the Holland Torpedo Boat and the Elec companies. The company, or its management, also has an interest in the New London Ship & Engine Co., many of its directors being on the board of the Ship & Engine Co., many of its directors being on the board of the Ship & Engine Co., and its connection with Standard Motor will give the Electric Boat Interests control of concerns making all parts of small motor and submarine vessels. It is also understood that the New London company is constructing a number of motors under the Standard Motor patents by a royalty agreement with that concern. Bandard Motor, It is staid officially, has large orders for motors from the Elec Company. It is staid that the total orders call for delivery of 500 rungines of 380 h. p., costing \$10,000 each. Another order of similar size is said to be pending land has since been consummated. See also Electric Boat Co. above.—Ed.] Also compare V. 101, p. 136. Standard Motor & Mfg. Co., Indianapolis.—Receivership.

Boat Co. above.—Ed.] Also compare V. 101, p. 136. Standard Tool & Mfg. Co., Indianapolis.—Receivership. Albert Rabb, referee in bankruptey, on July 19, in the absence of Judge Anderson of the U. S. District Court, appointed the Actina Trust & Savings Co. of Indianapolis temporary receiver. The petition was filed on July 16, the creditors at the same time filing a petition in involuntary bankruptey against the company.

Stewart-Warner Speedometer Co.-Earnings, &c.-The following is pronounced correct by those knowing the facts:

Stewart-warner Speedonneter OG.—*Earnings*, cc.—1110 following is pronounced correct by those knowing the facts: The net earnings for the half-year ended June 30 increased \$271,000. For the cal. year 1914 earnings totaled \$982,362. At the rate of increase during the six months period the company is earning about 14% on the common stock for the current year. At the meeting at which regular dividends were declared on common and pref. stock, directors decided to anticipate sinking fund requirements on the preferred to the year, making the total sum devoted this year to the sink. fd. \$111,500.—V. 101, p. 45, 51. Street's Western Stable Car Line Co.—Sale Aug. 16.— The sale, it is stated, has again been postponed, until Aug. 16. In the mean time, a new plan of reorg, may be submitted.—V. 101, p. 292, 136. Swift & Co., Chicago.—*Earnings.*— Chicago 'Record-Herald' says: "The company's gross this year will go well over \$400,000,000, and the net earnings applicable to the \$75,-000,000 capital stock will be between 18 and 20%. In the previous year net carnings were around \$9,250,000, and earnings on the share capital were about 12.33%. "The showing made has been due entirely to large foreign sales. In former years the ratio of foreign business has averaged between one-furth and one-sixth of the total, while this year the average has been one-furth and one-sixth of the total, while this year the average has been one-furth and one-sixth of the total, while this year the average has been one-furth and the other the large volume of goods sold to European countries but not delivered. It is estimated that England has hed up fully \$20,000,000 worth of American packers products shipped to hostile count in the present wear bod (nominal) fung recently imposed for violation of the State large. The company on July 20 paid to the Clerk of the Missouri Supreme Court the State large.

will be pair for some time that the factor of the Missouri Supreme Court The company on July 20 paid to the Clerk of the Missouri Supreme Court the \$5,000 (nominal) fine recently imposed for violation of the State laws regarding the prices of dairy products in the State under the settlement and arrangement to hereafter obey the State laws.—V. 101, p. 292.

United States Realty & Improvement Co., N. Y.-Statement.-Chairman H. S. Black is quoted as saying:

For a year or more past conditions in building and real estate have been bad, but recently there has been an improvement and I believe we have turned the corner. Within the last three weeks we booked more business in new building than in the preceding six or seven months. Real estate is also showing signs of recovery. It looks as though the building and real estate branches, which ecen to be the first to experience depression and the last to recover, will prosper with other lines of trade.—V. 100, p. 1828.

## BROOKLYN RAPID TRANSIT COMPANY

# REPORT OF THE BOARD OF DIRECTORS TO THE STOCKHOLDERS-FOR YEAR ENDING JUNE 30 1915.

85 Clinton Street, Brooklyn, N. Y., July 27 1915. The passenger earnings of the system for the year ending June 30 1915 (excluding for the purpose of this comparison the newly acquired Coney Island & Brooklyn Railroad Com-pany's Lines) failed for the first time in the history of the Brooklyn Rapid Transit Company to show a substantial increase over the passenger earnings of the preceding year, and instead there was a decrease. There were two main causes for this result: First—The general decreasion in the

causes for this result: First—The general depression in business and industry affecting Brooklyn as well as other portions of the country, reflected in a large number of men and women out of work and a tendency towards economy in expenditures. Second—The very liberal increase in transfer facilities which went into effect on June 1 1914 under order of the Public Service Commission, whereby the total number of transfer points on surface railroads in the system was increased from 721 to 1,008. The first year of operation under this order shows an increase of 10,552,274 transfer passengers carried, and a decrease of 2,141,700 cash passengers. This situation presented not merely a loss in revenue but occasioned an increaso in expense by reason of the large number of addi-tional transfer passengers.

quired for the transportation of the large number of addi-tional transfer passengers. The figures as given in the year's accounts, however, and as herewith reported, show an increase of \$869,437 06 in passenger and other earnings, due to the inclusion of the operations of the Coney Island & Brooklyn Railroad Com-pany for the entire fiscal year as against six months' opera-tion of those lines during the preceding fiscal year. The in-grease in operating expenses was \$965,828 71, of which \$456,-018 38 (nearly half) was due to charges to maintenance of way and structure and maintenance of equipment, and \$267,-551 52 to trainmen's wages. Interest charges were reduced by the conversion of Re-funding Bonds into stock, and were somewhat increased by rapid transit improvements placed in operation. The net result shows an increase of \$196,856 26 in net income, and in addition the system's reserves for depreciation were cred-ited with \$256,384 55, as against a debit in the preceding year of \$53,190 75. Dividends at the rate of 6 per cent were paid on the amount

Dividends at the rate of 6 per cent were paid on the amount of capital stock outstanding during the year, namely, \$74,-520,000, leaving a surplus for the year over dividend require-ments of \$1,045,243 12. A summary of the financial results is given in the follow-ing table:

ing table:

PROGRESS OF WORK ON RAPID TRANSIT LINES UNDER CONTRACTS WITH THE CITY.

Under the contracts of March 19 1913, between the City of New York and the New York Municipal Railway Corpora-tion (a constituent company of the Brooklyn Rapid Transit System), the city is to expend upward of \$100,000,000 in the construction of rapid transit lines, and the Company is to

itized for FRASER //fraser.stlouisfed.org/

expend in contribution toward the cost of such lines and in the equipment thereof, and in extensions, enlargements and re-construction of existing rapid transit railroads, about \$65,-000,000. The contracts contemplated that all of these new equipment thereot, and in extensions, enlargements and re-construction of existing rapid transit railroads, about \$65,-000,000. The contracts contemplated that all of these new lines, and the extension and re-construction of existing lines, should be completed and ready for operation on the first day of January, 1917. More than half of this period has now elapsed, and it looks as if the most important part of the en-larged system would not be ready for operation until a con-siderably later date than Jan. 1 1917. The chief line, in the consideration of net revenue, is, of course, the Broadway-Manhattan Subway, with its connections to Queens and Brooklyn. Rapid progress has been made on those sections between Trinity Place and 26th Street, some of them being nearly completed, and all are at least three-quarters built. In the case of the other section, however, the contractor is not required to finish until some months after Jan. 1 1917, and the so-called Times-Square section has not yet been lot. The Board of Estimate has decided to make the connection with the Queens lines by a tunnel under the river instead of over the Queens lines by a tunnel under the river instead of over the Queens lines by a tunnel under the starter de-lay, and in the case of the East River tunnel from the Bat-tery to Brooklyn the contractor has until Jan. 16 1918 to complete. There is no way of operating the Broadway Sub-way, even as to those sections which may be completed on scheduled time, until connections are ready for operation be-tween this line and either Brooklyn or Queens, for there is no other way of getting equipment into the subway. Obvi-ously, it will not be desirable to postpone the operation of the Broadway Subway until the East River tunnel from the Bat-tery to Brooklyn is ready for operation, or until the connec-tion is made to Queens, either over the re-constructed Queens-borough Bridge or through a tunnel, and the only hope of ob-taining even a partial operation of the Broadway Subway is by the speedy com Street could be placed in operation shortly after Jan. 1 1917.

The prospect, however, is that a large part of the City's investment in the Broadway Subway (probably not less than \$20,000,000) will remain idle, owing to the delay in letting contracts for certain sections, with the treble results of First, adding to the cost of construction by the interest on the idle investment:

the idle investment

Second, withholding from joint account the net revenue which would come from the operation of the line, and Third, depriving the people of the improved means of transportation.

Moreover, no contract has yet been let for two compara-tively short sections of subway which will connect the Brigh-ton Beach Line with the Manhattan Bridge and Centre Street

ton Beach Line with the Manhattan Bridge and Centre Street Loop—a simple extonsion of facilities which would be of great advantage to the six miles of tributary population between Prospect Park and Sheepshead Bay. Nor has any contract been let for the 14th Street-Eastern Line, which will be of tremendous benefit to the people of the Eastern District of Brooklyn (now deprived of rapid transit). A portion of this route has not yet even been legal-ized

the Eastern District of Brooklyn (now deprived of rapid transit). A portion of this route has not yet even been legal-ized. The company, on the other hand, has proceeded as expe-ditiously as conditions would allow to carry out its obligations to the City. It will be remembered that the contracts made necessary the approval of the Public Service Commission to every detail of construction and equipment work performed by us, whether on our own lines or on those of the City. Every plan, every form of contract, every award of contract, and every dollar of expenditure are subject to the Commis-sion's scrutiny, and must be approved by the Commission in advance. This arrangement makes for great delay, and in some cases the Commission has taken many months to con-sider contracts submitted to it which should have taken a few days or at the most a few weeks. Under these conditions our progress is necessarily slow, even in the extension and enlargement of our own facilities, and we cannot, of course, proceed with the equipment of the City-owned lines until they are substantially completed. This entire situation involves serious consequences, both to the City and to the Company, other than the substantial in-crease of costs which delay always occasions. At the time the contracts with the City were made it was the expectation of both parties, founded upon careful expert examination, that, while for a few years after initial operation the enlarged system which one of our companies is to operate would not earn full interest on both the City's and the Company's in-vestment, it would in a comparatively short time be self-supporting and the City would then have added to its borrow-ing capacity upwards of one hundred millions of dollars, and in addition be the recipient of one-half of the divisible profits.

JULY 31 1915.] THE CH. That expectation was based upon the assumption that all the enlarged system would be placed in operation on or be-fore Jan. 1 1917, whereas it looks now asil only the less prof-itable, or the unprofitable, new lines would then be in opera-tion, and that the roturns from the profitable lines would be indefinitely delayed. In the present financial condition of the City, this result will mean not only that the City's credit will in the intervening period be too close to the debt limit to permit of expanditures for other municipal improve-ments, but that the taxpayors will be called upon for a longer period to make up more substantial deficits than were origi-nally contemplated, and this at a time when taxes are a par-ticularly heavy burden. It is true that by the terms of the contrasts into which we have entored with the City, these deficits in meeting the City's interest during temporary oper-ation are, contrary to all rules which apply to public service corporations generally throughout the country, chargeable to the City either through direct taxation or through the issue of additional corporate stock not heretofore set aside for rapid transit purposes, and to the extent that additional georprate stock is issued for these deficits other municipal improvements must be postponed, or in some way not now discernible, the City's debt-making power must be expanded. In the case of the Company, while it is assured of its prefer-entials if earned, it must charge against earnings its new in-vestment as put into operation, and if this investment is represented, as it will be very largely for tha first few years, in construction and equipment work on lines which are the least hopeful as money-earners, its net income will diminish. It is extremely essential, therefore, from the point of view of the City and its peeple, as well as for the interests of the Company, that every effort be made to expedite the comple-tion of all these new rapid transit facilities,

property owners sufficiently appreciate the present situation

and its consequences. The following is a synopsis of the progress of rapid transit work during the year so far as our relation to it is concerned:

Centre Street Loop. The work of re-construction of tracks and structures in Centre Street Loop, included in Modifying Agreement No. 2 with the City, was completed during the year, and equipment of all four tracks has been finished except a certain portion of the signalling. The additional tracks were placed in oper-ation from time to time during the year. Additional power equipment was also installed in the temporary sub-station at Centre and Walker streets. Centre and Walker streets.

Thirty-eighth Street Construction. The work of construction in 38th Street, in the Borough of Brooklyn, included in Modifying Agreement No. 1 with the City, has been practically completed at Fourth Avenue and 38th Street; the remaining work between Fifth and Tenth avenues is well under way and will be completed during the present calendar year.

#### Sea Beach Line.

Sea Beach Line. The re-construction of this line and the equipment thereof was completed during the present fiscal year, except station buildings, which will probably be finished before autumn. The tracks between Fourth and New Utrecht avenues were completed by Jan. 1 1915, and between New Utrecht Avenue and 86th Street by May 1 1915. That portion of the line between 86th Street and Coney Island has been equipped with third rail and temporary terminal facilities provided at Coney Island. Operation with new subway cars over this line was begun on June 1 1915.

Fourth Avenue Subway. Fourth Avenue Subway. The City completed during the year track-laying in this subway, between the Manhattan Bridge and 65th Street, to an extent that permitted operation on two tracks, which was begun June 22, connecting at 65th Street with the Sea Beach Line, and forming in this way a complete route from Chambers Street, Manhattan, to Coney Island, via Fourth Avenue and the Sea Beach Line. Tracks and equipment of the Fourth Avenue Subway are incomplete, and signal equip-ment has been installed on only a portion of the two tracks in operation. Connections, however, have been completed at 38th Street and Fourth Avenue to permit taking cars out of service for inspection. service for inspection.

Broadway-Myrlle Avenue Connection. This connection was completed and operation thereover begun July 29 1914.

Lutheran Cemetery Line. The main portion of this line was finished and operation begun over the same on Feb. 22 1915. At the westerly end of this connection a temporary construction was provided pending the erection of new structure at Myrtle and Wyckoff avenues, forming part of the third tracking of the Myrtle Avenue line. Temporary arrangements have been made with reference to yard tracks at the east end of this line pending the completion of the permanent yard. Line to Avenue Elevated Extension

Liberty Avenue Elevated Extension. The steel structure of this line has been completed and track laying practically finished. Some work remains to be done on the station structures and it is expected that this line will be ready for operation some time during August or Sep-tember of 1015 tember of 1915.

Jamaica Avenue Elevated Extension. Contract for the steel structure of Section I of this line was let in March 1915, and contract requires completion thereof by February 1916. Section I is about one-half of the total line, extending from Cypress Hills to Richmond Hill. Plans for the second section are awaiting a definite determination with reference to street lines, to be fixed by the City, which has also caused some delay to Section I.

Additional Tracks, Existing Lines. The third-tracking work on Fulton Street, from Sackman Street to Nostrand Avenue, has been practically completed so far as erection of structure is concerned. Contract for stations has been let, all of which will probably be completed before the end of the calendar year. The work on the lower section, from Nostrand Avenue to the Brooklyn Bridge, is awaiting the approval of plans by the Public Service Com-mission. mission.

mission. The third-tracking work on Broadway, for that portion between Havemeyer Street and Myrtle Avenue, is well under way and will probably be completed by the end of this calen-dar year. Steel for the second section, from Myrtle Avenue to East New York, is being fabricated, a portion of which is being delivered.

being delivered. Plans for the third-tracking of the Myrtle Avenue Line were approved by the Public Service Commission within a few days, and bids for construction will soon be invited.

Car Equipment. A total of 300 cars have been ordered, 160 of which have been delivered, 100 of the latter being now equipped and in operation. Delivery of the remaining 140 cars will be made during

the present calendar year.

#### Signal Equipment.

Signal Equipment. In addition to the signaling contracted for with reference to Centre Street Loop, contract has been closed which will cover signaling for practically all the rapid transit lines in-volved in contract with the city. This contract provides for immediate installation of signaling as construction work proceeds, and also provides for the contractor making cer-tain experiments with a system of Cab Signal and Speed Control which, if satisfactory, will mark a great advance over signal methods heretofore in use.

#### Power Additions.

Power Additions. Numerous additions to power equipment were installed in existing sub-stations, and two new sub-stations were con-structed, one at 64th Street and Fourth Avenue, equipped with two 2,000 k.w. Rotary Converters, and one at Ozone Park, for the new Liberty Avenue Line, equipped with two 1,000 k.w. Rotary Converters.

New transmission lines were also installed.

#### EXPENDITURES UNDER CITY CONTRACTS.

The New York Municipal Railway Corporation's expendi-tures for construction and equipment to June 30 1915, under the city contracts, were as follows:

On account of equipment of city-owned lines. On account of additions, extensions and improvements of	
existing rallroads	15,831,747 81
Total	\$30,010,859 78

RESULTS OF TEMPORARY OPERATION OF RAPID TRANSIT LINES UNDER CITY CONTRACTS.

The arrangement with the city, whereby the pooling of carnings between existing rapid transit lines with their ex-tensions and the city-owned lines was to go into effect as new lines are added from time to time, was described in detail in the annual report for the preceding year. This temporary operation and pooling began on August 4 1913, and the results for the year ending June 30 1915 and for the entire period from August 4 1913 to June 30 1915, are given below: below:

# RESULT OF OPERATIONS OF NEW YORK CONSOLIDATED RAIL-ROAD COMPANY, LESSEE, UNDER THE PROVISIONS OF CONTRACT NO. 4, DATED MARCH 19 1913, BETWEEN THE NEW YORK MUNICIPAL RAILWAY CORPO-RATION AND THE CITY OF NEW YORK.

ADDITIONS, IMPROVEMENTS AND MAINTENANCE

Exclusive of expenditures on rapid transit lines under con-tracts with the City of New York (referred to above) there was expended for additions, chargeable to Capital Account,

was expended for additions, chargeable to Capital Account, \$1,133,446 06, which are classified in detail in Table No. 3 [pamphlet report]. The charges for maintenance of way and structure and of equipment were \$4,793,655 73, being an increase over similar charges for the preceding year of \$456,018 38, and exceeding the charges of any year in the history of the system. The actual expenditures were less than the charges by \$256,-384 55, which amount was credited to Reserves. Among the principal maintenance and construction ex-penditures on rapid transit lines referred to above) are the following:

the following:

the following: Track and Structure. On the surface lines \$3,930 feet of single track were re-laid with standard 7-inch 105-lb. rail, and 96,072 feet of single track were overhauled; 154 pieces of special work were installed, repaired or renewed; 145,797 square yards of im-proved granite block pavement on concrete foundation were laid, and 781 square yards of wood block pavement, in addi-tion to which the city laid at the expense of our companies 45,383 square yards of improved pavement. A double-track line consisting of 5,921 lineal feet of "T" rail construction was built in Stillwell Avenue from the West End Line near Avenue "R" to a connection with existing tracks in Stillwell Avenue north of New York & Coney Island Railroad.

Railroad.

Railroad.
On Hegeman Avenue, between Hopkinson and Rockaway Avenues, a double-track line, comprising 1,578 lineal feet of track, was laid with 7-inch girder rail.
On New Lots Road, between Williams and New Jersey Avenues, 2,363 square yards of recut granite were installed. The special work lay-out on Prospect Park Plaza at Ninth Avenue and Fifteenth Street was renewed, with extensive changes in alignment, etc., to accommodate the plans of the Park Department for improvement of the Plaza. Many riveted joints of surface tracks were replaced by seam-welding process.
On the elevated lines renewals were made as follows:

On the elevated lines renewals were made as follows: 51,658 lineal feet of rail, 1,425 lineal feet of steel guard rails, 35 switches,

28 frogs

28 frogs, 4 crossings, 16,789 ties, 39,630 lineal feet of timber guard rail, and 140,508 lineal feet of 2x6 footwalk. 22,593 lineal feet of elevated structure were repainted. All elevated stations between St. Marks Avenue and 65th word were given a group in ord marketing and 65th An elevated stations between St. Marks Avenue and 65th Street were given a general repair and repainting; similar work, although not so extensive, was done on the stations on the Lexington Avenue Line from Greene Avenue to Reid Avenue, on the Myrtle Avenue Line from Johnson Street to Knickerbocker Avenue, and the Broadway Line from Van Sieklen Avenue to Crescent Street.

#### Buildings

An extension of the shop building was constructed at Fresh Pond Road; an enlarged and improved school room for the instruction of motormen and conductors was provided in the 58th Street Car Barn, and various improvements and repairs have been made to many buildings.

Power Stations and Transmission Lines

At Williamsburg Power Station a cinder catcher was in-stalled in the flues for eighteen boilers located on the first floor; 6 underfeed stokers with their blowers and coal-hand-

Ing equipment were installed, and the intervention of tunnel for condensing water was re-built. At Central Power Station 7, Oil Switch Compartments were constructed and additional switchboard and switching equipment installed for the operation of the Fourth Avenue

equipment installed for the operation of the Subway. At Tompkins Sub-station one 3,000 K. W. Rotary Con-verter with its transformers, switchboard equipment and storage battery, was installed, making the present capacity of the station 8,000 K. W. At Hudson Sub-station two 2,000 K. W. Rotary Convert-ers with their transformers and switchboard equipment were removed, and replaced with two Rotaries of 4,000 K. W., making the present capacity of the station 14,000 K. W. The Rotary Converters removed were installed in the 64th Street Sub-station of the New York Municipal Railway Corporation.

Corporation. The Sanford Street Sub-station of the Coney Island & Brooklyn Railroad Company, having been shut down, was dismantled and the equipment temoved to Ozone Park Substation

station. At Coney Island Sub-station one 2,000 K. W. Rotary Con-verter with its transformers, switchboard equipment and storage battery was installed, making the present capacity of the station 6,000 K. W. There were removed from the system 17.91 miles of over-head D. C. feeders, and 8.95 miles of this were re-installed in other parts of the system. Connections were made between the high-tension cables and the conduit lines of the Coney Island & Brooklyn Rail-road Company and other companies of the system, which permitted the removal from the conduit line of the Coney

Island & Brooklyn Railroad Company of one 3-0 high-tension cable 14,850 feet in length. This cable was re-installed be-tween the Essex Sub-station and the Ozone Park Sub-sta-tion for the operation of the Liberty Avenue Extension. High-tension cables were installed as follows: One 350,000 C. M. Sector Cable between the Williams-burg Power Station and the Essex Sub-station-28,650 feet.

- 25,050 feet.
   Three 350,000 C. M. Sector Cables between the Williams-burg Power Station and the Hudson Sub-station— 31,026 feet.
   One 350,000 C. M. Sector Cable between the Williams-burg Power Station and the Richmond Hill Sub-sta-tion 47,473 feet.

burg Power Station and the Richmond Hill Sub-station—47,473 feet.
16.40 miles of underground feeders were removed, and
15.51 miles re-installed in other parts of the system.
80.44 miles of trolley wire were renewed.
Telephone wire to the extent of 4.93 miles was removed.
2,524 trolloy poles were re-painted, 136 reinforced, 649 reset.
386 installed and 297 removed.

set, 386 installed and 297 removed. 2.15 miles of conduit lines were constructed.

Equipment. 462 complete air-brake equipments were installed on sur-

402 complete an brake equipments were installed on sur-face cars. 300 partial air-brake equipments were installed on surface double-track open passenger cars. 200 partial air-brake equipments—semi-automatic fea-tures substituted for straight air features—were installed. 617 improved geared hand brakes, supplementing air brakes, were installed.

112 pairs of new trucks have replaced a like number of old-style interior frames.

559 pairs of improved design maximum traction truck frames were installed under cars which are being equipped with air brakes.

With air brakes. On the surface division, 21 single-truck closed passenger cars, 201 double-truck closed passenger cars, 509 semi-con-vertible cars, 250 double-truck open cars, 432 convertible cars and 22 centre-entrance cars were repaired and revarnished. Of the Coney Island & Brooklyn equipment, 90 double-truck closed cars and 86 double-truck open cars were over-hauled and remainted

hauled and repainted.

83 plows and sweepers were repaired. 73 service and freight cars and 945 damaged passenger

cars were repaired. 300 pairs trucks were overhauled and strengthened to oper-ate under open cars equipped with air brakes. 541 cars were equipped with wheel guard chains. In 107 semi-convertible ears longitudinal seats were sub-stituted for Chamberlin chairs.

stituted for Chamberlin chairs. On the elevated division 31 cars have been repaired and re-painted and additional circuit of five lights installed: 594 motor and trailer passenger cars have been repaired and re-varnished, and 85 damaged passenger cars and 70 service and freight cars have been repaired. At all machine shops machinery has been safeguarded to avoid accidents, and various additional tools have been in-stalled

stalled.

### EMPLOYEES' WELFARE WORK.

avoid accidents, and various additional tools have been in-stalled. EMPLOYEES' WELFARE WORK. The broad program of employees' welfare, which has been inder development for many years, was substantially added to during the last year. The Employees' Benefit Associa-tion, through which these activities are largely conducted, has now a membership of upwards of \$,000, of whom over of the departments of the system. We expended during the past year, in the maintenance and inprovement of the club rooms for employees, in support of the Pension System, in medical inspection service, and in siekness and death gratuities in cases not reached by the majores' Benefit Association, the sum of \$78,742 47. The organization of a Brooklyn Rapid Transit Baseball Eague in the summer of 1914 was a distinct and very popular didition to the social diversions of the employees, inre-the auspices of the Baseball League, was attended by more than 5,000 employees and members of their famile. The system of compulsory medical inspection and free at-twas established January 1 1913, for approximatoly 10,000 men in the operating department, accomplished during the operating employees on account of illness, which was established January 1 1913, for approximatoly 10,000 men in the operating department, accomplished during the operating employees on account of sickness of 13,485 days (or nearly 18 per cent) over the time lose in the year ended for ano 30 1914. The milder winter of 1915 accounted for ance for this, however, there still romains a saving of upwards of 6,000 days' work for the year, or a reduction of 8.6 per cent over the sickness record of the year ended June 30 1914. The system of compulsory medical inspection was accom-manied in its first year by a reduction of 24 per cent in the maber of days' work lost by operating employees on ac-count of illness, and it is gratifying to find that this initial procerd is still being improved upon as the activities of the brace not only the inspection and attendance of opera

ployees injured in the performance of their duties and entitled to medical attendance under the Compensation Act; the examination of candidates for employment and the periodic re-examination of all motormen. A system of First Aid to the Injured has been developed to a high state of efficiency. An improved Portable First Aid ease with equipment for use both by an instructed layman and by a physician has been developed by the physicians of the Medical Inspection Bureau; 68 of these cases have been in-stalled in the depots, terminals, shops and power houses of the Company, and supplied to emergency and other crews required to work out on the lines. Wherever a First Aid case has been instructed in approved methods of First Aid to insure the presence of some qualified individual at all hours

case has been installed, a sufficient number of employces have been instructed in approved methods of First Aid to insure the presence of some qualified individual at all hours of the day or night when work is going on. This system of First Aid to the Injured will have an im-portant influence in minimizing the effects of injuries re-ceived by employees, particularly as it insures not only the prompt administration of First Aid but the prompt reporting and treatment of all cases by the physicians of the Medical Inspection Bureau.

# SAFETY CAMPAIGN.

On July 2 1914 there was appointed a Central Safety Com-mittee representing all the departments of the Company in which the accident hazard is a material factor. In accord-ance with a plan of safety organization at that time adopted,

which the accident hazard is a material factor. In accord-ance with a plan of safety organization at that time adopted, each department set up a departmental safety organization having as its objective the stimulation of a greater interest on the part of all employees in the problem of safety, through active participation in the study of conditions which produce accidents and in the devising of remedial measures. The Company invited all employees to report dangerous conditions and to make suggestions in the interest of safety. Meetings were held, both of committees and of departments generally, for the purpose of discussing the safety problem. So far as practicable, the investigation of accidents actually occurring was referred to the safety committees comprised largely of the rank and file. The employees demonstrated an immediate and vital interest in the safety movement which was most encouraging. The various departmental organiza-tions were completed during the fall of 1914. Although the period is too short to justify any general conclusions, it is at least gratifying to note that in each of the last six months boarding and alighting accidents, car collisions, accidents in which cars strike persons, and car and vehicle collisions, have made a more favorable showing than in any one of the corre-sponding months of the previous year—and this in spite of the fact that the hazard of accident has been increased sub-stantially by the reconstruction of several of the elevated lines and the construction of new lines, with operation over the same routes proceeding uninterruptedly during the pro-gress of the work. the same routes proceeding uninterruptedly during the pro-gress of the work. The public safety campaign, conducted in co-operation

The public safety campaign, conducted in co-operation with the Brooklyn Institution for Safety, was continued in the schools of Brooklyn throughout the year, with the ap-proval of the Board of Education of the City of New York. Stereopticon and moving picture lectures were featured in the school instruction; Safety Patrols among the boys, and Careful Clubs among the girls, were organized. Safety cal-endars bearing an appropriate drawing and text for each month, were supplied in the number of 9,000 for every school class-room in Brooklyn; 234,000 safety stories were distributed to the school children, together with 415,000 safety buttons. This educational work covered 159 public schools of gram-mar grades and below, 14 high schools and 54 parochial schools. Sixty-eight prize competitions in essays on safety were held. In addition to the work in the schools, 104 safety lectures were delivered to adult audiences reaching approxi-mately 38,000 people. The attendance at lectures or moving picture performances given primarily for children, including children who may have attended more than one performance,

children who may have attended more than one performance, was approximately 340,000.

was approximately 340,000. During the summer of 1914, safety instruction was given in 53 playgrounds and 9 summer schools in Brooklyn, and 43 motion picture performances featuring safety were given in the parks. Provision has been made for continuing safety instruction in the playgrounds throughout the present summer. As in the previous year, the results of the safety work done in Brooklyn have been made available to public organizations and corporations engaged in similar work throughout the country, and substantial evidences of appreciation have been received from many quarters. ACUDENTS AND NEGLIGENCE ACTIONS

ACCIDENTS AND NEGLIGENCE ACTIONS.

ACCIDENTS AND NEGLIGENCE ACTIONS. The amount paid during the fiscal year for injuries to pas-sengers and property aggregated \$607,700 61, or an increase of \$63,815 48. The legal expense in connection with dam-ages was \$261,153 68, an increase of \$41,394 95. The total payments for damages, including legal expense, were 3.29% of earnings. Of course, these payments represent accidents not only during the current fiscal year but prior thereto. As a matter of fact, there were 1,333 fewer accidents on the system during the fiscal year than during the preceding year, and 139 fewer actions were brought against the companies.

and 159 fewer actions were brought against the companies. The number of accidents tried in the courts, however, showed an increase of 42% over those tried in the preceding year. Based upon awards approved by the State Workmen's Compensation Commission, we have established Reserves adequate to meet future obligations to the dependents of deceased employees.

#### FIRE INSURANCE.

FIRE INSURANCE. In the year 1913 the New York Fire Insurance Exchange increased very largely the rates on the system's properties, and this action compelled the companies of the system to place their risks with London Lloyds, where a much lower rate was obtainable. In the succeeding year, however, the local Exchange offered an average rate somewhat lower than Lloyds, and about 20 points lower than the rates fixed in the preceding year, and our insurance was therefore placed with domestic companies for three years under blanket schedule. The average rate as fixed was .25387, which was afterwards reduced, by reason of certain improvements made in the risks, to .23358. The subsequent inclusion of the Concy Island & Brooklyn Railroad Company's properties may increase this rate slightly. Notwithstanding these low rates, the companies of the system are continuing to accumu-late an Insurance Reserve Fund, which, on June 30 1915, had reached the sum of \$787,439 47, an increase of \$188, 242 28 during the year. This fund, to the extent of \$736,-011 20, is invested in stable securities.

### CAR AND STATION ADVERTISING.

Contracts with the Inter-City Car Advertising Company having expired on April 30 1915, and not being renewed, it was decided to undertake this branch of business indepen-It was decided to undertake this branch of business indepen-dently, and there was organized the Broadway Subway & Home Boroughs Car Advertising Company, with a capital stock of \$10,000, all of which is owned by the Brooklyn Rapid Transit Company. This advertising company, under the direction of Joseph P. Day, the well-known real estate man, as President, will conduct the car and station advertising and news and vending privileges for the ravious railroads of the system. the system.

### FREIGHT TRAFFIC.

During the fiscal year the freight department shows a gross revenue of \$625,769 97, an increase over the preceding year of \$128,200 81. The net revenue was \$287,355 64. A small increase in the arbitraries allowed by the trunk lines has been obtained through the 5% increase in rates au-thorized by the Inter-State Commerce Commission. The volume of freight has been considerably increased through the construction and excavation work incidental to the building of rapid transit lines. The facilities of the freight department have been used by the contractors for practically all sections of the new rapid

The facilities of the freight department have been used by the contractors for practically all sections of the new rapid transit lines. Such transportation has not only been a con-venience to the contractors, but has proved cheaper than other means of transportation, thereby lessening the con-tractors' cost and incidentally the cost of construction, has permitted the handling of material in much larger quantities and in less time, and has expedited the completion of the work.

There is a constant demand from manufacturers and com-mercial houses for side-track connections in order to obtain deliveries of freight through the trolley or steam car deliveries over our lines.

### INCREASE IN NUMBER OF STOCKHOLDERS.

The number of stockholders has increased by 2,514 during the fiscal year—the total number on June 9 1915 being 8,833.

#### RESERVE ACCOUNTS.

## COMMERCIAL EPITOME

COMMERCIAL EPITOME Friday Night, July 30 1915. Though in some branches of trade midsummer dulness is noticeable and the situation is by no means without draw-backs in other respects, yet the feeling in this country on the whole is hopeful. The United States has taken a new posi-tion in the world's commerce and finance. That is uni-versally recognized. And foreign trade is reaching out towards still more gratifying records. Industries in the main are more active, with fron and steel leading. War orders, it is true, still afford the chief stimulus. Labor is better em-ployed. Strikes are fewer. Crop prospects are in the main favorable. It looks like unprecedented yields of wheat, oats and hay. Failures are fewer than they were recently, even if the number is admittedly larger than a year ago. On the other hand, the weather in the corn belt has recently been to cool and wet and exports of wheat are not as large as they recently have been. Then we have the question of our re-ations with Germany still open and the Mexican problem is very far from being solved. The feeling throughout the contry is nevertheless on the whole one of confidence. It is hoped that a way will be found to increase the exports of cotton, which have been restricted by the British embargo. From present appearances, Great Britain will not declare cotton contraband of war. Moreover, the Federal Reserve banks show a disposition to afford all proper accommodation in the matter of financing cotton at the South, so that an undue pressure of cotton on the market, even if exports should be retarded, may thus be obviated. LAD dult, prime Western 8.20c.; refined for the Con-tinent 8.70c.; South America 9.05c.; Brazil 10.05c.

LARD dull; prime Western 8.20c.; refined for the Con-tinent 8.70c.; South America 9.05c.; Brazil 10.05c. Futures have declined, owing partly to lower prices for hogs and partly to a decline in other provisions. Many stop orders have been met in selling out lard and ribs. To-day prices advanced.

DAILY CLOSING I	RICES	OF LA	RD FUT	URES I	N CHIC.	AGO.

PORK unchanged; mess \$20@\$21; clear \$20@\$22; family \$21@\$23. Beef, mess, \$18 50@\$19; packet \$17@\$18; family \$19@\$20; extra India mess, \$29@\$30. Cut meats steady and in small demand; pickled hams, 10 to 20 lbs., 12½@13½c.; pickled bellies, 6 to 12 lbs., 14@14½c. But-tor, creamery extras, 26c. Cheese, State whole milk fresh flats, colored specials, 14@14½c. Eggs, fresh gathered extras, 23½@25c.

November...6.63@6.65 [March.....6.81@6.83] SUGAR quiet; centrifugal, 96-degrees test, 4.80@4.83c.; molasses, 89-degrees test, 4.03@4.06c. Granulated, list price was 6.10c., but sales were reported at as low as 6c. and in Philadelphia at 5.90c. Later it was cut here to 5.70@ 5.80c. Sugar futures have declined. Stop orders in Sep-tember were caught on the way down. Prices have reached a new low lovel on this move. This tonds to check both do-mestic and European business, in the real article. To-day prices were lower. Closing quotations follow : August ...cts3.50@3.52 December cis3.35@3.36[Aprif....cts3.15@3.17]

OILS, Linseed steady; eity raw, Amer. seed 54e.; boiled 55e.; Calentta 75e. Cocoanut oil steady; Cochin 9@10e; Cey-lon 9@9½c. Palm unchanged at 7@7¼c. for Lagos. Corn higher at 5.66@5.71e. Cod. domestic declined to 45@46e. Cottonseed oil stronger, 6.30e. for winter and summer white. Spirits of turpentine 42@42½c. Common to good strained rosin \$3 25.

is doing very well, although the weather recently has not been altogether satisfactory. COPPER has been dull and weaker; Lake 19@19¼c. electrolytic 18½c. London prices have also declined. Tim on the spot here dropped to 35¾ cents with little business. London prices have also fallen, owing to larger offerings. Spelter here on the spot was quoted down to 18¼c., with trade dull. London prices have also declined. Lead here on the spot, 5.47½c., and quiet. Russia, however, is said to be inquiring for 2,000 tons here. Pig iron meets with more in-quiry. Buffalo furnaces have sold small lots for 1916 de-liveries at 50 to 75c. over present quotations. The demand for steel is sharp in some quarters. Structural steel is quoted at \$1 30, but there are intimations that this new price is shaded now and then. Some Eastern mills quote \$1 25. The rate of output of steel by a large concern is up to 93% of ingot capacity. Fully a quarter of the activity, however, is for the purpose of producing war material. Semi-finished steel has risen sharply in the East, as foreign demand has increased. Important shipments have been made to France and Great Britain. At Philadelphia, \$30 to \$32 for re-rolling billets has been a feature, and some Pennsylvania steel com-panies report even better prices paid. Scarcity of billets has caught some buyers napping. Sheet bars for prompt shipment have sold as high as \$23 at Youngstown.

### COTTON

Friday Night, July 30 1915. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 31.958 bales, against 27,303 bales last week and 29,625 bales the previous week, making the total receipts since Aug. 1 1914 10,420,912 bales, against 10,525,841 bales for the same period of 1913-14, showing a decrease since Aug. 1 1914 of 104,929 bales.

ing further information regarding warehouse facilities at the South. Naturally, the banks will require sound collateral in the shape of warehouse certificates that will meet all re-quirements. Temperatures have latterly prevailed in Texas of 100 to 109 and elsewhere 100 to 103. To-day prices were lower. The weather continued generally hot and dry and the forecase indicated no immediate relief. Several private crop reports were also of a bullish tenor. But there is quite a general impression that the Government report next Mon-day will be rather bearish than otherwise. Besides, stocks are so large and exports so small right on the eve of another crop, which may turn out to be rather liberal for all anybody now knows to the contrary, that there is little disposition to take the aggressive on the bull side, especially as the German question is not yet settled. Spot cotton closed at 9.30c. for middling, showing an advance of 5 points for the week. The following averages of the differences between grades, as figured from the July 29 quotations of the nine markets, as figured for the July 29 quotations of the nine markets, basignated by the Secretary of Agriculture, are the differ-ences established for deliveries in the New York market on August 5.

WEATHER REPORTS BY TELEGRAPH .- Our advices by telegraph from the South this evening indicate that dry weather and high temperature have prevailed quite generally at the South during the week, aiding the rapid maturing of cotton. Rain is claimed to be needed in some sections and in others would be beneficial, although there is no complaint as yet. Boll-weevils and insects are less active in Texas.

as yet. Boll-weavils and insects are less active in Texas. Galveston, Tex.—Light rains occurred at scattered localities in Texas, but were too light to be of any special benefit. Deterioration from continued drought is reported from Southwestern Texas. Weevils and insects are less active. We have had rain on one day during the past week, to the extent of sixty-four hundredths of an inch. Average ther-mometer S2, highest S8, lowest 76. *Abilene*, Tex.—We have had a trace of rain on one day of the week. The thermometer has averaged 83, the highest being 98 and the lowest 68.

Ablere, Tex.—We have had a trace of rain of one day of the week. The thermometer has averaged S3, the highest being 98 and the lowest 68. Brenham, Tex.—There has been rain on two days of the past week, to the extent of thirty-two hundredths of an inch. The thermometer has averaged S2, ranging from 66 to 98. Cuero, Tex.—It has rained on two days of the week, the precipitation being sixty-seven hundredths of an inch. The thermometer has ranged from 62 to 100, averaging 81. Dallas, Tex.—We have had no rain the past week. Aver-age thermometer S2, highest 96, lowest 68. Henrielta, Tex.—There has been no rain during the week. The thermometer has averaged 82, the highest being 102 and the lowest 62. Huntsville, Tex.—There has been no rain the past week. The thermometer has averaged 78, ranging from 60 to 96. Kerrville, Tex.—It has been dry all the week. The ther-mometer has ranged from 52 to 98, averaging 75. Lampasas, Tez.—It has rained on one day of the week. the rainfall being fifty hundredths of an inch. Average ther-mometer 78, highest 100 and lowest 56. Longview, Tex.—It has been dry all the week. The ther-mometer 78, highest 100 and lowest 56. Longview, Tex.—It has been dry all the week. The ther-mometer has averaged 82, the highest being 102 and the low-est 62. \* Embraces receipts in Europe from Brazil, Smyrna, West Indies, &c. a This total embraces the total estimated consumption by Southern mills, 3.145,000 bales in 1914-15 and 3.125,132 bales in 1913-14—takings not being available—and the aggregate amounts taken by Northern and foreign spinners, 14,900,222 bales in 1914-15 and 17,332,871 bales in 1913-14, of which 10,608,222 bales and 11,413,404 bales American. b Estimated.

COTTON CROP CIRCULAR.—Our Annual Cotton Crop Review will be ready in circular form about Thursday, Aug. 19. Parties desiring the circular in quantities, with their business card printed thereon, should send in their orders as soon as possible, to secure early delivery. Pub-lication of this annual review has been deferred this year to a somewhat later date (after the close of the cotton season) than has been our practice heretofore in order to afford more time for the investigation of the situation abroad.

SAVANNAH'S FIRST NEW BALE.—The first bale of cotton of the crop of 1914-15 to reach Savannah arrived there on the 22d from Mitchell County, Ga. It classed good middling, was sold at 18 I-16c. por lb. to E. W. Rosenthal & Co. and immediately shipped to New York. Last year the first new bale was received on July 17.

DOMESTIC EXPORTS OF COTTON MANUFAC-TURES.—We give below a statement showing the exports of domestic cotton manufactures for May and for the eleven months ended May 31 1915, and, for purposes of comparison, like figures for the corresponding periods of the previous year are also presented: year are also presented:

Manufactures of Cotton Exported,	Month end	ng May 31.	11 Mos. ending May 31.			
Translovied.	1915.	1914.	1914-15.	1913-14.		
Piece goods	33,088,775 1,213,169 1,017,656 179,963	\$2,054,907 178,705 776,007 295,333	15,494,363 2,725,916 1,424,167	\$26,603,653 2,314,852 7,458,282 4,176,574 671,406		
Total manufactures of vlaue	\$6,766,580	\$3 979 350	\$64.656.062	847 240 021		

RECEIPTS FROM THE PLANTATIONS.—The follow-ing table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

We	sk -	Rece	tpis at Pe		-Stock at		Towns-	Receipts	from Pta	ntation
end		1915.	1914.	1913.	1915.	1914.	1913.	1915.	1914.	1918.
June		38,102	49,234	35,551	589,646	239,300	270,799	20.379	20.022	10,840
	18.	29,037	47,984	30,264	571,352	220,845	251.025	10,743	29.529	10.490
	25_	30,014	30,500	27,262	549,238	202,124	227.688	7.900		3.925
July	2.	27,800	32,609	21,534	528,753	174,652	209,428	7.315	5,137	3.274
	9,	24,259	24,319	21,448	515,000	158,507	192,537	10,506		4.557
	16.	29,625	20,222	20,061	491,785	144,499	173.609	6,410		1.133
	23.	27,303	13,096	18,042	465,046	129,729	158,015	3.564		2,448
	30.	31,958	16,354		450,365				6.764	

The above statement shows: I.—That the total receipts from the plantations since Aug. 1 1914 are 10,751,138 bales; in 1914 were 10,523,553 bales. 2.—That although the receipts at the outports the past week were 31,958 bales, the actual movement from plantations was 14,277 bales, the balance being taken from stocks at interior towns. Last year receipts from the plantations for the week were 6,764 bales and for 1918 they were — bales. 1913 they were -- bales.

BOMBAY COTTON MOVEMENT.—The receipts of India cotton at Bombay and the shipments for the week ending July 8 and for the season from Aug. 1 for three years have been as follows:

384

			191	1-15.	19	13-14.	191	1912-13.			
	ipts at-		Week.	Since Aug. 1		Since Aug. 1.	Week.	Since Aug. 1.			
Bombay			26,000	2,755,00	32,000	3,699,00	0 27,000	2,665,000			
		For the	Week.		Since August 1.						
from-	Great Britain.	Conti- nent.	Japan &China	Total.	Great Britain.	Contl- nent,	Japan & China.	Total			
Bombay- 1914-15 1913-14 1912-13	1,000	38,000 19,000		74,000	72,000	1,233,000	1,232,000	1,759,000 2,537,000 1,431,000			

According to the foregoing, Bombay appears to show a *decrease*, compared with last year, in the week's receipts of 6,000 bales. Exports record a loss of 30,000 bales during the week and since Aug.1 show a *decrease* of 778,000 bales.

ALEXANDRIA RECEIPTS AND SHIPMENTS OF COTTON.—The following are the receipts and shipments for the week ending July 7 and for the corresponding week of the two previous years :

Alexandria, Egypt, July 7.	191	4-15.	191	3-14.	1912-13. 		
Receipts (cantars)— This week. Since Aug. 1	6,32	9,876 23,271	7,63	4,500 2,896			
Exports (bales)—	This Week.	Since Aug. 1.	This Week.	Since Aug. 1.	This Week.	Since Aug. 1.	
To Liverpool. To Manchester To Continent and India. To America	$3,829 \\ 659$	$\begin{array}{r} 207,234 \\ 149,429 \\ 277,779 \\ 162,917 \end{array}$	12.750	$\substack{210.640\\221.165\\452.664\\86.303}$	$2,750 \\ 6,750$	206,000 207,432 408,171 124,965	
Matal assorts	19 700	707 350	18 000	070 772	13 500	946.56	

Total exports\_\_\_\_\_ 13,720 797,359 18,000 970,772 13,500 946.3 ote.- A cantar is 99 lbs. Egyptian bales weigh about 750 lbs.

The statement shows that the receipts for the week end-ing July 7 were 9,876 cantars and the foreign ship-ments were 13,720 bales.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that yarns are steady, and the granting of increased wages to spinners strengthens the market. Clothes are quiet, with the trade for India and China small. We give prices for to-day below and leave those for previous weeks of this and last year for comparison:

### BREADSTUFFS

<text><text><text><text><text><text>

estimates, will be 320,000,000 bushels, as against estimates on July 1 from private sources of 295,000,000 bushels. Germany sends favorable crop reports. In Bulgaria the erop outlook is satisfactory. Further rains have occurred in Australia and the crop prospects are excellent. It is now said that in Spain the prospects are encouraging for a big crop and that importations will be smaller than they were last year. In Liverpool of late, it is stated that what-ever bullish influences there were fell flat in the presence of better weather conditions in America and indications of impending larger receipts at the Western markets of this country. The Russian crop, according to the International Institute of Agriculture at Rome, is likely to be 463,000,000 bushels, an increase over that of last year of 29.3%. To-day prices were stronger. prices were stronger.

Spring Wheat.—Over the greater part of the spring wheat region the reather was somewhat too cool at night for the best growth, but otherwise onditions remained favorable, especially in the Western districts, where he weather was warmer, and excellent growth resulted. The crop is near-ing the heading stage in all Northern and is ripening in some Southern istricts. Other small grains, rye, oats and barley, are reported in good ordition.

the weather has made stage in all Northern and is ripening in some Southern districts. Other small grains, rye, oats and barley, are reported in good condition. Corn.—Cool nights prevented rapid growth in the more northern portions of the corn belt, and the crop continues small and backward. The drier weather has permitted of very general cultivation, however, in all sec-tions, and the crop continues small and backward. The drier weather has permitted of very general cultivation, however, in all sec-tions, and the crop has made rapid growth in most central and Southern districts. It is tasseling as far north as Nebraska, and caring in central Kansas, and its condition is generally good in the States to the eastward, while a good crop of early corn is practically matured in the South. The need of more rain for the later plantings is now becoming general in the South, and rain would be beneficial in many central sections. *Oats and Hay*.—Drying weather greatly favored the ripening and harvest of oats in the districts where harvest is not yet completed, and the outlook for that crop continues good. Haying progressed rapidly, except in a few localities, especially in New England, where showers and cloudy weather were unfavorable. *Cotion*—Cool weather over the northern portions and dry weather in nearly all the important districts retarded growth, and while the crop is generally reported in good condition, no important progress was attained. The drought continues in Texas and is becoming serious in some portions, and more rain is now needed over much of the remaining portions of the bett. Some shedding is reported, and damage by wearli continues in Ala-bama and Mississipi, but they are reported as less active in Texas. The first bale of cotton in Georgia was marketed on the 22d. The statement of the movement of breadstuffs to market

The statement of the movement of breadstuffs to market indicated below are prepared by us from figures collected by the New York Produce Exchange. The receipts at Western lake and river ports for the week ending last Saturday and since Aug. 1 for each of the last three years have been:

bave been booked. FOREIGN DRY GOODS.—An active demand has been reported for all classes of linen goods and many fair-sized orders for dress lines for next spring and summer have been placed. The attendance of out-of-town buyers is said to have been large. Importers for the most part have accepted forward orders without guaranteeing delivery and only subject to their ability to obtain the goods from abroad. Household linens, especially those in small supply, have been in active demand, but the steadily advancing prices are tending to restrict sales, and especially as domestic manu-facturers are putting many substitutes on the market. Burlaps continue quiet with the undertone unsettled, owing to uncertainties regarding the British embargo question. Prices are easier with light weights quoted at 6.35c. and heavy weights at 7.85c. Importations & Warehouse Withdrawals of Dry Goods.

Importations & Warehouse Withdrawals of Dry Goods. The importations and warehouse withdrawals of dry goods at this port for the week ending July 24 1915 and since Jan. 1 1915, and for the corresponding periods of last year, were as follows :

THE CHRONICLE

# STATE AND CITY DEPARTMENT.

### News Items.

Canada (Dominion of).—Loan Oversubscribed.—The \$45,000,000 5% one and two-year gold notes of the Do-minion of Canada, offered to the public last Saturday morn-ing by the syndicate of New York bankers headed by J. P. Morgan & Co. and Brown Bros. & Co. were all disposed of. The subscription books were opened at 10 o'clock and closed shortly thereafter, subscriptions being greatly in excess of the amount offered. See V. 101, p. 307.

Hawaii (Territory of).—Bonds Awarded in Part.—Of the \$1,430,000 4% public-improvement bonds, series 1914-15, \$1,179,500 had been disposed of up to July 7. The facts given herewith are furnished by the Treasurer of Hawaii, C. J. McCarthy:

After advertisement, tenders for these bonds were opened Oct. 1 1914, and the following were accepted at par and accrued interest: Bishon & Co. of Warrish and Strong Bar Strong Bar Strong Co.

Bishop & Co. of Honolulu First American Savings & Trust	40	20 20	3100 0	\$50,000
Co. of Hawali, Ltd., of Honolulu Fashion Clothing Co., Ltd., of		20		10,000
Honolulu T. Holtum Lillie of Kohala, Hawal			55	500 500

\$61,000 The other bids being below par were rejected. In February 1915 the Governor decided to sell the remaining bonds at private sale. The law provides that the Treasurer may sell the bonds at private sale with the approval of the Governor, provided the receives a price above the last sale, which in this case was par. The price at pri-vate sale was fixed at \$100.01 plus accrued interest. Under these conditions the following sales were made:

Nashville, Tenn.—Court of Appeals Suspends Receivership.—In the proceedings brought by Miles Burns et al., Chancellor John Allison on July 27 appointed as receiver for the city of Nashville Robert Vaughn, Clerk and Master of the Chancery Court. On the same day Circuit Judge Matthews signed an order temporarily suspending Mayor Hilary E. Howse, Commissioners Robert Elliott and Lyle Andrews and City Treasurar Charles Myers. The suspension was accomplished, it is said, under the ouster Act recently passed by the Legislature. On July 28 Judge Wilson, Presiding Judge of the State Court of Civil Appeals, granted a writ of supersedeas, setting aside the action of the Chancellor in appointing a receiver for the city. Judge Wilson also superseded the injunction of Chancellor Allison, which prohibited the City Commission to remove Burns from the office of City Comptroller, an office from which he later resigned. In his petition Mr. Burns charged, among other things, that the eitys' finances had been improperly handled by the Mayor and City Commission. As stated in the "Chronicle" of July 10, page 147, the Chancery Court on July 5 appointed a special commissioner to take evidence on these charges. on those charges.

New Mexico.—Borrowing Capacity of Municipalities.— Chapter 54 of the Laws of 1915, approved March 12, creat-ing a State Tax Commission, also provides that the indebted-ness of a county, incorporated city, town or village (except debt created by a city, town or village for the construction or purchase of a water or sewer system) shall not exceed one and ont-third per centum of the actual value of taxable property. This limitation is contained in Section 13, which we give in full below: full below:

Sec. 13. No county or incorporated city, town or village, shall ever be-come indebted to an amount in the aggregate, including existing indebted-ness, exceeding one and one-third per centum on the actual value of the taxable property within such county, city, town or village, as shown by the last preceding assessment roll, and all bonds and obligations issued or con-tracted in excess of such amount, after the time this Act shall go into affect, shall be vold; but such limitation shall not apply to indebtedness for the construction or purchase of a system for supplying water or a sewer system for such city, town or village.

New York State.—Amendment to State Finance Law, in Relation to Temporary Loans and Revenue Bonds.—Chapter

333, which became a law April 17 1915, amends Chapter 645 of the Laws of 1913 so as to provide that the total amount of short-term notes issued in anticipation of the sale of bonds. of short-term notes issued in anticipation of the sale of bonds, or renewal of such notes, shall at no time exceed the total amount of the bonds authorized to be issued. As passed in 1913 the law required that such notes or renewals thereof should at no time exceed *one-half* the total amount of bonds authorized. The words "one-half" have been eliminated from the Act of 1913, which we printed in full in the "Chron-icle" of June 7 1913, page 1643.

Springfield, Greene County, Mo.—Election on Commis-sion Form of Government.—An election will be held Aug. 2, re-ports state, to vote on the question of establishing the com-mission form of government. This proposition was approved by the voters at an election held June 2, but there was some question as to the legality of the election.—V. 100, p. 2025.

Stone Harbor, Cape May County, N. J.—Bonds De-clared Valid.—It is reported that Justice Black of the Su-preme Court has rendered a decision validating the special election held May 14 which resulted in favor of a bond issue of \$33,000 for the erection of a boardwalk. The sale of these bonds to the State of New Jersey was reported in V. 100, 2155 p. 2188.

West Orange, N. J.—Referendum on Purchase of Water Plant.—The Town Council has called for a referendum on Aug. 16 to vote on the question of purchasing the plant of the West Orange Water Co. at a price not to exceed \$300,-000. The company recently offered to sell its system to the town for \$285,000.

Bond Proposals and Negotiations this week have been as follows:

ALABAMA (State of).—BOND ISSUE TO RETIRE FLOATING DEBT.—Both branches of the Legislature have passed a resolution provid-ins for the submission of a constitutional amendment authorizing an issue of \$1.500.000 short-time bonds to retire the State's floating debt. The amendment will be voted upon, it is expected, 90 days after the Legislature adjourns sine dic.

ALLEN COUNTY (P. O. Lima), Ohio.—BOND SALE.—On July 23 the \$21.000 5% 15', year average road-improvement bonds were awarded to Spitzer, Rorck & Co. of Toledo at par and int.—V. 101, p. 226.
 AMBRIDGE, Beaver County, Pa.—BOND OFFERING.—Bids will be received until 8 p. m. Aug. 2 by C. Earl Steel, Scerotary of Town Council, for \$40,000 4½ % tax-free street-improvement, sewage and refunding bonds dated July 1 1915.
 AMITY, Yamhill County, Ors.—BOND SALE.—On July 22 the \$15,000 6% 5-20-yr. (opt.) water works construction bonds were awarded to the Western Bond & Mortgage Co. at par.—V. 101, p. 147. Denom. \$500. Date July 1 1915. Int. J. & J.
 ANDVER, Esser County, Mass.—DESCRIPTION OF BONDS.—We are advised that the \$60,000 4½ sewer bonds awarded to E. M. Farnsworth & Co. of Boston at 100.76 on July 19, are in the denom. of \$1,000 and bear 1916 to 1927 incl.
