# Bank and Quotation 

 SECTIONOF THE COMINERCIAL \& ANANCIAL CHRONICLE.

Copyrighted la 1915, according to Act of Congress, by WILLIAM B. DANA COMPANY, In office of Librarlan of Congress, Washington, D.C.

## Bank and Quotation Section

The Bank and Quotation Section, Issued monthly, Is furnished Eithout extra charge to every annual subscriber of the Commercial and Financial Chronicle.
The Rallway and Industrial Section, fsaed three tlmes a year on the tetra charday of February, June and October, Is Hkewlse rurnished withou xtra charge to every annual subscriber of the Chronicle.
The Rallway Earnings Sectlon fsued monthly, containing the sworn eturns of earnings and expenses flled each month with the Inter-State annual Chronicle subscriber. The Electric Rallway Sectlon
May and September, \& llkewise furnished without extra charge to every Chronicle subscriber.
of The State and City Section, Issued semi-annually on the last Saturday of May and November, is also Curnlahed tolihout extra charge to every The Batiers Chronicle.
The Bankers' Convention Section, Issued yearly, giving the detaited proceedings of the annual conventlon of the American Bankers' Assocta-
lon, Is also furnished without extra charge to Chroniclo subscriters. .
are Ten Dollars per annum withing the United Stateg. Thlitteen Dollary (whtch includes postage) in Europe, and $\$ 11.50$ in Canada. Fllo covers for tho Chronicle are sold at 60 cents each; (Whitch Ineludes postage). Filo covors for Supplements can bo had at same price.

(June) the amount of the net was almost as large as for the whole of the first three months of the year combined. In January the net was $\$ 1,687,150$, in February $\$ 3,638,578$, in March $\$ 7,132,081$, in April $\$ 7,286,409$, in May $\$ 9,320,576$ and in June $\$ 11$,343,070.

These improved results followed as a consequence alike of greater activity and higher prices and in both respects the situation became still more favorable during July. Not only did the demand for steel for use in the manufacture of war material in this country increase, but large orders were received for steel for direct shipment to the belligerent countires or at least the countries allied against Germany and Austria, these latter of course not being able to obtain any war supplies and little of anything else from this country by reason of Great Britain's command of the seas. The "Iron Age" of this city in its last issue of the month (July 29) reported a total of 220,000 tons of bars placed with a Cleveland interest for shipment to France, bringing the total on that account, it was stated, up to 350,000 tons, divided between the U. S. Steel Corporation and the Lackawanna Steel Co. An additional 100,000 tons, it was asserted, would be placed for delivery in the next six months if prices and deliveries could be agreed upon. France was also said to be in the market for shell forgings for more than $1,100,000$ shells, 6 -in. to 11 -in., to be delivered at the rate of 6,000 a day. Russia was at the same time stated to have placed large orders for rails and for cars. These are given as only a few instances among many. The "Age" estimated that 20 to $25 \%$ of the current output of the leading steel companies was represented in war materials, and the Steel Corporation was reported to be employed to $93 \%$ of its ingot capacity and as having started additional blast furnaces so that its pig iron production was up to about $87 \%$ of capacity. At the beginning of the year the Corporation's steel plants were working to only $40 \%$ of capacity. Prices sharply advanced all around but particularly in the case of material needed for war orders. The "Age" reported a further rise in shrapnell rounds so that whereas early in the war contracts had been made at 1.50 cts . the figures now quoted were 2.75 cts . to 3.00 cts. with some sales as high as 3.5 cts. Steel billets at Pittsburgh during July advanced from $\$ 21$ a ton to $\$ 22$, as against $\$ 19$ at the beginning of the year. Bars, plates and structural shapes were quoted at some further advance, that is at 1.30 cts, at Pittswith 1.10 cts. at the beginning of the year. Pig iron production kept steadily increasing and for July was reported at $2,563,420$ tons against $2,380,827$ tons in June, $2,263,470$ tons in May, 2,116,494 tons in April, $2,063,834$ tons in March, $1,674,771$ tons in February, $1,601,421$ tons in January and 1,515,752 tons in December 1914, which was the minimum.

In most of the other metals, however, prices declined after the sharp advances of the previous month. Thus in spelter at New York there was a drop from 21.50 cts. to 18.25 ets., but comparing with 5.55 cts. Jan. 1. Lead at New York declined from 5.75 cts. to 5.50 cts. comparing with 3.80 cts. Jan. 1, and tin from $\$ 40$ a ton fell to $\$ 36$, comparing with $\$ 33.25$ Jan. 1. Lake copper at New York was reduced from 22.50 to 22 cts, but comparing with $131 / 2 \mathrm{cts}$. Jan. 1, while electrolytic copper fell from 20 cts. to $181 / 2$ cts. at which comparison was with only 13 cts. Jan. 1. This decrease in price was due to the increase in production. At the outbreak of the European war, American producers restricted output to about 50 to $60 \%$ of capacity, while many of the smaller producers shut down altogether. But with the advance in. price to 20 cts. output rapidly increased while at the same time consumers instead of placing orders ahead began to restrict their purchases to immediate needs.

The part which our foreign trade is playing in giving the United States a position of extraordinary H Hvantrage was well shown in the trade statement
for the month of June, and the twelve months of the fiscal year ending with June, which came to hand at the close of July. From the figures for the month of June by itself, it appeared that by reason of the unusual foreign demand at high figures for our foodstuffs and the heavy exports of war material and of other articles that are leaving our shores in unusual amounts because of the war, our merchandise exports were continuing to run $\$ 100,000,000$ or more in excess of the corresponding total of the previous year, while the merchandise imports remain more or less restricted. For June 1915 merchandise exports reached $\$ 268,601,599$, against only $\$ 157,072,044$ in June 1914 and $\$ 163,404,916$ in June 1913; on the other hand, the imports were no more than \$157,746,140 , against $\$ 157,529,450$ in June 1914 and $\$ 131,245,877$ in June 1913. This gave an excess of merchandise exports for the month in the large sum of $\$ 110,855,459$, against an excess on the side of the imports in June 1914 of \$457,406 and an excess of exports in June 1913 of $\$ 32,159,039$. For the twelve months of the fiscal year merchandise exports in 1915 aggregated $\$ 2,768,643,532$, against only $\$ 2,364$,579,148 in 1914 and $\$ 2,465,884,149$ in 1913, while the merchandise imports were only $\$ 1,674,220,740$ in 1915, against $\$ 1,893,925,657$ in 1914 and $\$ 1,813$,008,234 in 1913. Accordingly there was a trade balance in favor of the United States on the merchandise movement in the huge sum of $\$ 1,094,422,792$, against a similar balance for the fiscal year 1914 of only $\$ 470,653,491$ and of $\$ 652,875,915$ for the fiscal year 1913. Weekly returns from the principal customs districts also made it apparent that for July there would be another very large sum to add to the balance previously accumulated.
As at the same time the erop situation in the United States continued on the whole satisfactory, notwithstanding some damage west of the Mississippi (particularly in Kansas) from excessive rains and overflows, there were thus many circumstances to encourage a hopeful outlook, notwithstanding little or no progress was made in the adjustment of the somewhat strained relations between the United States and Germany. The Government of the latter was slow in answering the note of our Government sent under date of June 9, and which was the second communieation concerning Gierman submarine warfare forwarded to Germany following the sinking of the Lusitania on May 7, but a reply bearing date July 8 was handed to United States Ambassador Gerard at Berlin on July 9. The German Government showed a disposition to parley and before the actual delivery of its reply to Ambassador Gerard furnished him an outline of the same and asked him to submit the proposals therein to our State Department, the intimation being given that these proposals might be made the basis for preliminary negotiations pending the definite framing of Germany's formal answer. The President, however, promptly let it be known that he would not discuss any tentative propositions and would refuse to receive piecemeal statements.
On the same day that the reply was handed to Ambassador Gerard at Berlin (namely July 9) press dispatches containing a translation of it were cabled from Berlin and appeared in the newspapers here Saturday morning, July 10, but the official text of the message was not received by Secretary of State Lansing until July 11. The German reply was not given a very cordial reception in this country, the general tenor of editorial comment being that the document was evasive and unsatisfactory and that the German Government obviously was endeavoring to avoid specific replies under cover of professions of friendship. The main points at issue were altogether ignored and the reply on the whole was so irresponsive to American demands that it might almost have been considered insulting. In particular the United States had asked disavowal by the German Government of the action of the German commander in sinking the Lusitania, and had also sought offers of reparation for the loss of American lives. The Ger-
man answer made no attempt to meet American views in that respect. Our Govermment had insisted on the recognition of the principle that Americans should be able to travel on the high seas on unarmed and unresisting belligerent merchant ships of any nationality in accordance with previously recognized principles of international law. Germany, however, undertook to throw the blame for the Lusitania disaster upon Great Britain, and merely offered "assurances that American ships will not be hindered in the prosecution of legitimate shipping and the lives of American citizens in neutral vessels shall not be placed in jeopardy," and then suggested certain untenable and unaceeptable proposals for making these "assurances" good. The gist of the German attitude is found in the following paragraphs:
"The case of the Lusitania shows with horrible clearness to what jeopardizing of human lives the manner of conducting war employed by our adversaries leads. In the most direct contradiction of international law all distinctions between merchantmen and war vessels have been obliterated by the order to British merchantmen to arm themselves and to ram submarines, and the promise of rewards therefor, and neutrals who use merchantmen as travelers thereby have been exposed in an increasing degree to all the dangers of war.
"If the commander of the German submarine which destroyed the Lusitania had caused the crew and passengers to take to the boats before firing a torpedo this would have meant the sure destruction of his own vessel. After the experiences in sinking much smaller and less seaworthy vessels it was to be expected that a mighty ship like the Lusitania would remain above water long enough even after the torpedoing to permit passengers to enter the ship's boats. Circumstances of a very peculiar kind, especially the presence on board of large quantities of highly explosive materials, defeated this expectation. In addition, it may be pointed out that if the Lusitania had been spared thousands of eases of munitions would have been sent to Germany's enemies and thereby thousands of German mothers and children robbed of bread-winners.
"In the spirit of friendship wherewith the German nation has been imbued towards the Union and its inhabitants since the earliest days of its existence, the Imperial Government will always be ready to do all it can during the present war also to prevent the jeopardizing of lives of American citizens. The Imperial Government therefore repeats the assurances that American ships will not be hindered in the prosecution of legitimate shipping and the lives of American citizens in neutral vessels shall not be placed in jeopardy.
"In order to exclude any unforeseen dangers to American passenger steamers, made possible in view of the conduct of maritime war by Germany's adversaries, German submarines will be instructed to permit the free and safe passage of such passenger steamers when made recognizable by special markings and notified a reasonable time in advance. The Imperial Government, however, confidently hopes that the American Government will assume to guarantee that these vessels have no contraband on board, details of arrangements for the unhampered passage of these vessels to be agreed upon by the naval authorities of both sides.
"In order to furnish adequate facilities for travel across the Atlantic for American citizens the German Government submits for consideration a proposal to increase the number of available steamers by installing in passenger service a reasonable number of neutral steamers under the American flag, the exact number to be agreed upon under the same condition as the above American steamers.
"The Imperial Government believes it can assume that in this manner adequate facilities for travel across the Atlantic Ocean can be afforded American citizens. There would, therefore, appear to be no compelling necessity for American citizens to travel the ship's own boats. While these meare indo Kirkwall in
the matter out of the category of inhuman acts, such as the United States would consider "deliberately unfriendly,". our Government nevertheless insisted that the sinking of the ship was a violation of the Prussian-American Treaty of 1828, and accordingly made a demand upon Germany for reparation.

In the military operations in Europe the Germans and the Austrians, after having the previous month driven out the Russians from the greater part of Galicia, engaged in a gigantic enveloping movement which had for its object on the one hand the capture of Warsaw, the Polish eapital, and on the other hand the destruction of the Russian army. The contest extended all along a line of huge front reaching all the way from the Baltic Provinces of Russia down to Bessarabia. The Russian Grand Duke Nicholas, realizing the danger of annihilation, kept steadily drawing back his troops, while at the same time engaging in desperate rearguard actions with a view to saving his army. At the end of the month the Russian lines had been pierced at numerous points. The Austro-German armies apparently met with success at both extremities. The occupation of the city of Lublin, southeast of Ivangorod, and the capture of the important town of Cholm in the same vicinity, indicating that the Austro-Germans had cut the Lub-lin-Cholm Ry., one of the important avenues of retreat from Warsaw, was reported at the end of July. At the beginning of August Mitau, the capital of the Russian Province of Courland, only 25 miles southwest of Riga, was occupied by German troops, while at the other end of the line marked progress was evidently being made in Southeast Poland. Warsaw was definitely taken by German troops on the night of Aug. 4.

It was announced by Reginald McKenna in the -House of Commons on July 13 that the subscriptions to the new British war loan (bearing $41 / 2 \%$ interest) through the Bank of England had reached the aggregate of $£ 570,000,000(\$ 2,850,000,000)$. In addition the subscriptions for small amounts through the Post Offices reached $£ 24,000,000$, making together close to $\$ 600,000,000$, or $\$ 3,000,000,000$. No statement was made as to the extent to which the $£ 570,000,000$ subscribed through the Bank of England consisted of ordinary subseriptions and how far of applications which equally involved a cash subscription, but which were made for the purpose of securing the privilege of converting holdings of the first war loan and of the old consols into the new $41 / 2 \mathrm{~s}$. Some very heavy subscriptions, from large financial institutions, were included in the total, the Prudential Assurance Co. having announced that it was investing $£ 3,000,000$ in the new issue and three leading banks having announced subscriptions of $£ 20,000,000$ each to the bonds, these banks being Lloyds, the London City \& Midland and the London County \& Westminster. The London County Council was reported as subscribing $£ 1,000,000$ and it was understood that other county and municipal authorities had subscribed liberally.

In our stock market there was a recrudescence on a large scale of speculation in the war stocks. Under pool and clique manipulation, and other schemes for marking up values, prices were whirled up with marvelous rapidity and ease. The advances in some of the share properties which were the special object of manipulation reached sensational proportions, the movement in that respect having been rarely if ever surpassed in Stock Exchange history. Operations, indeed, for a rise were carried on in such a wild and reckless fashion as to give occasion for deep concern on the part of the conservative element of the financial community. In the case of the Crucible Steel Co., a member of the executive committee deemed it incumbent to state that in his estimation there was no warrant for the figures to which the common stock had been boosted. He said that the previous year the company had been obliged to suspend dividend payments on its preferred shares, that there were itized for FRASERE arge ars of dividends on these preferred shares
which would have to be paid before anything could be distributed on the common stock; that while the company was handling very considerable business growing out of war contracts, and this business would undoubtedly yield large profits, yet the business itself in current statements was being greatly exaggerated, and that altogether prevailing prices for the shares seemed wholly unjustified. The first effect of this announcement was to cause a sharp downward reaction in price, the com. shares dropping from about 51 to 39, but those behind the movement were not at all disconcerted, and after the lapse of a few days succeeded in getting the stock moving upward again, and July 29 it touched 83, then, however, a renewed tumble began, the close being at 681/4. The speculative furore was confined largely to the war stocks, and railroad properties did not participate in it to any great extent, and in fact on occasions were decidedly weak. Even in the case of the war stocks, the rise was not uninterrupted or continuous. The whole market was weak at times for special reasons. One spell of weakness came at the very beginning of the month, when St. Paul common sharply declined because of rumors that the dividend might be reduced (the dividend was subsequently cut from $5 \%$ to $4 \%$ ), and Northern Pacific became sympathetically weak, while Can. Pac. was unfavorably affected by continued poor reports of earnings. The attempt on the life of J. P. Morgan on Saturday, July 3, did not improve the situation at this stage, and foreign liquidation proved very extensive, so that during the first ten days of the month nearly the whole list of railroad shares, and in particular New York Central, New Haven, Reading, Union Pacific, Sou. Pacific and Lehigh Val. suffered serious declines. The first effect of the German reply also proved disturbing, but thereafter the market was taken in handand under the leadership of the war stocks was subjected to ballooning tactics which resulted in carrying the whole list of stocks upward. The firm character of the communication of our Government seemed to have little effect in checking the manipulation so palpably in evidence, but the news with regard to the sinking of the American steamship Leelanaw caused a sharp downward plunge on Monday, July 26. Almost immediate recovery, however, ensued, as it appeared that the act did not come within President Wilson's definition of a "deliberately unfriendly" act. Later, the upward movement in the war stocks was carried to still dizzier heights and many of the railroad shares moved along on the general tide. At the very close of the month, however, realizing seemed to be in progress on a large scale, and some sensational declines were noted of which Crucible Steel furnished a sharp example.

The money market at this centre stiffened a bit and quotations for time money fractionally advanced.

The foreign exchange market moved within a narrow groove during July, but with the tendency of rates nevertheless towards still lower figures, not-
withstanding the abnormally low levels previously prevailing. In general the supply of bills continued in excess of the demand for remittance. At the beginning of the month there was some manifestation of strength, and this was ascribed to the liberal selling here of American securities on foreign account, growing out of the huge subscriptions to the new British war loan. While merchandise exports continued of large volume, the belief prevailed that many of these were being settled through special arrangements and not through the ordinary course of exchange operations. Reports were current all through the month of negotiations for the establishment of a large British credit in New York, but nothing definite transpired in that regard. A further Erench credit is believed to have been arranged for a considerable amount. Dearer money in London, growing out of the war loan subscriptions, was an inducement to American banks and bankers to hold their balances abroad rather than draw their funds home, but while this appears to have had an influence in checking further gold importations, it did not serve to prevent decline in exchange rates, which closed at the lowest figures of the month. In the early part of the month, J. P. Morgan \& Co. received $\$ 2,879,000$ more gold from Canada and $\$ 1,300,000$ was received about the middle
of the month from South America, against which, however, $\$ 1,000,000$ in five-dollar gold pieces were shipped to Cuba. The placing in this country of the $\$ 45,000,000$ Canadian Government $5 \%$ loan in oneand two-year notes undoubtedly played some part in interrupting the gold movement from Canada.

semployed, leaving blank spaces against the old fems which no longer appear tn the schedufes.

## New York Stock Exchange

## MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1915．They need no extended introduction，as they are self－explanatory．The tables embrace every security （excepting only State bonds）dealt in on the Exchange．We give bonds first，using the classification adopted in the official list．The black－faced letters in the column headed＂Interest Period＂indicate in each case the month when the bonds mature．

In accordance with the rule adopted by the New York Stock Exchange in 1909，all quotations for interest－paying bonds are at a price to which accrued interest must be added．The exceptions to the rule are income bonds and bonds on which interest is in default．This method of quoting bonds became effeetive January 21909.

FP Por foot－notes to tables see last page of honds and last paqe of stecks

## General Quotations

## BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more Important securifles llsted on any Stock Exahange in the United States; also for leading unlisted and inactive seourities.
2. Quotations from all Stook Exchanges are as near as possible for the cosing day of the month preceaing the dale of the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter " $f$ " is prefixed to the price, he must pay acorued Interest in addition to the price. This, however, does not apply to income bonds or bonds in dela, in which cases the price inoludes the interest, should there be any.
3. The letter " 7 " profixed to bond prices denotes that the quotation is a flat price-that is, that the acorued interest corms part of the price, and therefore employed to indicate the fact.
4. Stook prices marked thus (d) are per share. All others are per cent except bank stook prices, which are quoted per share unless otherwise stated.
5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities e merely nominal, but in all cases the figures are obtained from sources whioh are considered reliable. 6. The fillowing abbreviations are orten used, viz.: "M for mortgage. " $g$ "I gor for land grant "on" for optional. for
6. The black-faced type in the letters showing the interest period indicates the month when the bonds mature.

NOTICE.-AII bond prices are now "and interest" except where marked " F " and income and defaulted bonds.

## STREET AND ELECTRIC RAILWAYS

In quoting street and electrio railway bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter " $f$ " where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, " $f$ " appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which eases the price takes account of the interest and no designating mark is employed

NOTICE.-All bond prices are now "and Interest" except where marked "f" and income and defautted bonds.

## IMISCELLANEOUS SECURTTIES.

Quotations marked " $f$ " indicats that agorued fnterest is included in the price Prices not marked are "and interest,' that is, purchaser has to pay acorued interest In addition to the price. This, however, does not apply to income bonds and bonds in default, in which eases the prive takes acoount of the interest and no devignating mark is employed.

## STATE AND NUINICIPAL BONDS.

It is not the custom in quoting munioipal bonds to inolude agorued Interest in the price given 且ense fora acerued Interest must in all cases be added on There are a very fow instances whioh form exeeptions to the cute-that is, where the prices giveo are flat priges, the agorued interest baving been taken into account in making them These are indicated by a sperial mark, thus ( $S$ )

The igaras in the column "to net" indieate the basis on which the securities sell or the interest rate whinh the securities if held to maturity will net to the purehaser at the present market price.
