jh.

The Federal Reserve banking system the coming week will complete the first year of its existence and we deem it a duty to point out again that, contrary to the intent of the lawmaker and contrary to the letter and spirit of the Reserve Act, the volume of Federal Reserve notes outstanding is steadily being added to week by week. This is happening at a time when there is not the slightest call for the emission of such notes, and the aggregate of the notes now out reaches a very large amount. The Federal Reserve Bank of New York alone had nearly 71 million dollars of notes out on Friday of last week, according to the weekly statement issued on Saturday, while the other eleven Reserve banks had somewhat over 99 millions of notes afloat, making a grand total of notes for the twelve banks combined of over 170 million dollars. This stands unquestionably as the most signal achievement of the Reserve banking system in the first year of its operation, and the achievement is the more noteworthy as it has been accomplished in a period of unprecedented ease in the money market, with the banks, State and national, all over the country holding excess cash reserve of prodigious amounts-largely because the Reserve Act itself has reduced the reserve requirements of the member banks, but in part also because of the inpour of gold from abroad.

It is obvious from this statement of the situation that the notes are being put out, not in response to trade requirements which was intended to be the only authority for their issuance, but to attain an entirely different object. The purpose may be altogether laudable, but it is plainly outside of the law, as has been previously pointed out by us. The Reserve banks are all under control of the Federal Reserve Board, a Government body, and when a Government board or a Government agency of any kind, in the assumption of power or of authority, goes beyond or outside of the law the occasion is always one for grave concern. In this instance the notes, instead of being issued in pursuance of trade operations, are being made to do duty as certificates of deposit for gold. In that way they are being thrust out in increasing amounts week after week and evidently the end is not yet. In the debates in Congress during the process of the enactment of the measure and in the discussions in the newspapers bearing upon the features to be incorporated in the law, there was practical unanimity of opinion with reference to one point regarding the notes and that was that they must be promptly retired the moment they are no longer needed for the carrying-out of the trade operations which alone were to call them into being. In order effectually to ensure retirement, the law expressly provides that no Federal Reserve bank may pay out the notes of any other Reserve bank, except under penalty of a tax of 10%. The purpose, of course, is to compel the sending of the notes back to the issuing bank, to carry out the process of retirement. On the other hand, under the method of issuing the notes now employed, there will be no retirement at all. The notes are meant to stay out indefinitely, the Federal Reserve agents meanwhile holding the gold to acquire which they were issued.

The notes in the first instance, to be sure, are issued on the deposit of commercial paper, since that is the only method provided under the law, but immediately the case of a board charged with such important re-

://fraser.stlouisfed.org/

thereafter the paper is released by the deposit of an equivalent amount in gold for the nominal retirement of the notes. The notes are then pushed out into circulation, the Federal Reserve Agent (not the Federal Reserve Bank) meanwhile holding on to the gold, which was acquired merely so that notes might be issued against the same. Paradoxical though it may seem, the deposit of the gold for the retirement of the notes becomes the instrument for keeping the notes afloat. The operation of the law is reversed. In the scheme of the lawmaker, the deposit of the gold (or lawful money) was to be the last step in the operation of redeeming and retiring the notes. Under the plan pursued by the Reserve banks, the deposit of the gold (or lawful money) is a step taken with the deliberate purpose of getting the notes out as substitutes for gold. The technical requirements of the statute are being complied with, but the aim and purpose of the law with reference to note issues is defeated. The supply of mercantile paper is so limited-the Reserve banks, notwithstanding the best efforts of the managers, having done very little rediscounting-that if the notes were based merely on such paper, as designed by the law, the scheme of issuing notes would come quickly to an end. But by the plan under discussion, the paper is released with the deposit of the gold, and the same batch of paper is made to do duty over and over.

The plea offered in justification of the action so plainly contrary to the spirit and intent of the law, is that should a critical situation in the country's affairs arise it would manifestly be an advantage for the Federal Reserve system to have in sight the gold acquired in the process of the emission of the notes. But the gold does not belong to the Reserve banks at all. Nor is it in their custody. It is in the hands of the Federal Reserve agents and they hold it for the single purpose of retiring the notes. With the notes in active circulation it might be no easy matter to gather them for presentation and thus release the gold. We suppose, in the event of a crisis, the plan would be to issue new notes on the deposit of commercial paper, then present these new notes for immediate redemption and in that manner get the gold out of the hands of the Reserve agents and into the coffers of the banks. But this is obviously a clumsy process and it would always be possible for any outside institution holding the notes in considerable quantity to forestall the action of the Reserve bank by itself getting the notes cashed, thereby drawing away the supply of gold stored with the Federal Reserve agent. The notes, when presented to the Reserve bank, may be paid in either gold or lawful money, but must be redeemed in gold on demand at the Treasury Department in Washington.

At best the Reserve banks will have an uncertain and unsecure hold on any gold in the hands of the Federal Reserve agents, and the fact remains that it was never intended that notes should be issued for the purpose of impounding gold, even supposing that the gold, once acquired, might remain securely impounded for the ultimate use of the Reserve banks themselves. We are not sure that the Reserve banks need the extra amounts of gold, but if they do, authority to acquire the gold should be expressly conferred by Act of Congress. Resort to proceedings of questionable validity can never be countenanced in the case of a Government body, and least of all in the case of a board charged with such important responsibilities relating to the country's financial affairs as the Reserve Board.

The statute defines clearly the only legitimate way in which notes can be issued. That method should be adhered to and the law observed in letter and in spirit. Section 16 of the Act says: "Federal Reserve notes, to be issued at the discretion of the Federal Reserve Board, for the purpose of making advances to Federal Reserve agents as hereinafter set forth, and for no other purpose, are hereby authorized." It is then provided that any Federal Reserve bank may make application to the local Federal Reserve agent for such amount of the notes as it may require. Such application must be accompanied by a tender of commercial paper of the kind and character prescribed by the law.

There is absolutely no way in which notes can be issued except by the deposit of commercial paper of the right character. And that indicates plainly the sole function which the note issues are intended to perform. The notes are for the single purpose of facilitating the rediscounting operations of the banks. They are to be issued solely so as to enable the banks to grant rediscounts as needed, and only as needed. The moment the paper which serves as the basis for the note issues matures the notes also are to be retired—unless indeed the matured paper is replaced by other paper.

The amount of the commercial paper held by any Reserve bank furnishes a pretty accurate measure of what the volume of the note issue should be. With that idea in mind let the reader ponder intently the following record covering the last twenty-nine weeks of the Federal Reserve Bank of New York. It shows for each week the aggregate amount of paper held and available as a basis for making note issues; also the total of notes outstanding and how these notes are secured, whether by paper or by gold coin and certificates.

It will be observed that the aggregate of paper held by this bank has fluctuated very little during the whole period and last week was actually less than the previous April, being only \$5,383,000. That therefore ought to be the limit of the note issue; so far from this being the case, the amount of notes out has steadily risen and for last week was no less than

\$70,960,000, as against only \$25,040,000 last April. Of the total only \$170,000 is secured by paper and that is the full amount of notes that ought to be outstanding if the spirit of the law were faithfully adhered to. The remaining \$70,790,000 represents notes pushed out by extra legal means as substitutes for gold through a pseudo process of retirement.

Warrant is claimed for the operation under Section 14 of the law, which says that every Federal Reserve bank shall have power "to deal in gold coin and bullion at home or abroad, to make loans thereon, exchange Federal Reserve notes for gold, gold coin or gold certificates, and to contract for loans of gold coin or bullion," &c., &c. It is argued that in the present instance what is being done is to "exchange Federal Reserve notes for gold," but, as we have previously pointed out, a moment's consideration will show that the provision referred to is not at all pertinent to the question. Section 14 deals entirely with the open-market operations of the Reserve banks, and the object of exchanging notes for gold would be to add to a bank's holding of gold. But the process now being carried on does not add at all to the gold holdings of the Reserve banks, for the gold obtained by the issue and exchange of the notes cannot be retained, but must be turned over to the Federal Reserve agent, who holds the gold for the single purpose of redeeming the notes.

To carry our illustration a step further, we now furnish the record for the twelve Reserve banks combined, showing the amount of notes out from week to week and how secured; also the aggregate amount of paper held and available for note issues. The results are even more striking than in the case of the Federal Reserve Bank of New York alone. The table is as follows:

a Includes \$5,000 lawful money; \* Includes \$5,000 lawful money; deficiency of \$12,000 offset by funds in gold redemption fund.

The foregoing shows that since last June (the record in this instance goes no further back) the volume of notes has increased no less than \$91,-000,000 and now stands at \$170,310,000. Only \$16,305,000 of this is outstanding in the way contemplated by the statute, namely against deposits of commercial paper. As a matter of fact, all the banks combined held only \$43,127,000 of paper of all kinds at the latest date, this, therefore, representing the maximum amount of notes that could be issued in the legitimate way if every dollar of paper were utilized for the purpose. With \$170,-310,000 of notes out and only \$16,305,000 secured by paper, it follows that \$154,005,000 of notes are at the present time outstanding in a way not contemplated by the statute.

We see disclosed here, too, an entirely new device for the issuance of notes not yet resorted to by the Federal Reserve Bank of New York. Credits have been set up for the benefit of the Reserve agents with the Gold Settlement Fund at Washington, and these credits are being utilized for the purpose of forcing out more of the notes. That too is an idea strictly original with the Reserve Board. One marvels at its ingenuity and gasps at its temerity. No less than \$25,950,000 of notes are out with these credits in the Gold Settlement Fund as security.

The innovation is a recent one, dating back only to September. The first news of what was being done in that regard was obtained from the monthly "Federal Reserve Bulletin," issued at the beginning of October. This contained the following announcement : "Important developments have marked the progress of the Gold Settlement Fund during September. After careful consideration the Federal Reserve Board determined to make transfers at Washington between the Gold Settlement Fund balances of the Federal Reserve banks and the Federal Reserve agents. The matter had been under consideration for some time." It appears that the nucleus for this credit with the Gold Settlement Fund was furnished by the \$15,000,000 Government deposits which Secretary McAdoo then made in the three Federal Reserve banks in the South, \$5,000,000 to each one of them. The Federal Reserve Banks at Richmond and Atlanta had the full amount of their Government deposits placed to their credit in the Gold Settlement Fund and the Reserve Bank at Dallas had \$4,000,000 of its allotment placed in the Fund.

We suppose that the Reserve Board in sanctioning this latest device for pushing more notes into circulation, has found some technical way of squaring the operation with the law, but for ourselves we confess that we are deeply nonplussed. The only language we can find in the statute bearing upon the retirement of notes (which, as we have already shown, is the means employed for getting the notes afloat) is in Section 16 and is to the effect that "any Federal Reserve bank may at any time reduce its liability for outstanding Federal Reserve notes by depositing, with the Federal Reserve agent, its Federal Reserve notes, gold, gold certificates, or lawful money of the United States." There is here no reference to any Gold Settlement Fund, or Gold Redemption Fund (\$560,000 of notes are secured by the latter). Reduction of liability, according to the statute, for notes issued or outstanding, can be effected only by "depositing" with the Federal Reserve agent, not by availing of handy credits, near or remote. Apparently, the Reserve Board is in that respect stretching the provisions of the statute, as it has already done in other respects, and we cannot help feeling that even though the purpose be good, its effects must be harmful.

The course adopted of reading things into the law which are not there will, we are afraid, act as a further deterrent in preventing State banks from entering the Federal Reserve system. Nothing does so much to incite fear or create timidity as the arbitrary assumption of power. These State institutions were suspicious before. They will be still more so now. As to the action of the Board in embarking upon a

issues and keeping them afloat indefinitely, a conclusive reason for holding that the law contemplates nothing of the sort is that if it did Congress would have provided for giving the notes the widest possible circulation instead of restricting them to the district of their issue and imposing a penalty of 10% for their use in other districts.

Nor are we at all convinced that the Reserve banks are in need of extra supplies of gold. We observe that Paul M. Warburg in the scholarly address delivered in Minneapolis last month at the time of the conference of Governors, and which we reproduce to-day on another page, took occasion to say: "Excess balances and idle gold should accumulate in the Federal Reserve banks. They should control, not \$300,000,000 of gold, as they do now, or \$450,-000,000 as they will after another year, but they should control a billion or two of gold." The present stock of gold in the country is reported at \$2,198,113,762 and hence the Reserve banks if they should control two billions of gold would control the whole stock of gold in the country. We have great respect for Mr. Warburg's opinion. He is presumably the dominating spirit in the Reserve Board when it comes to determining questions of banking policy, by reason of his pre-eminent ability and his wide theoretical and practical knowledge, and his remarks possess additional interest as indicating the ambitious aim of the Board. Nevertheless, we do not think it would be advisable or desirable that all the gold in the country should accumulate in the Reserve banks. It strikes us that it would be far better that a considerable amount of the metal should remain in the hands and pockets of the people as a reserve to be drawn upon in case of national crises or at a time of supreme need. That has been the saving element with French and German finances in the present gigantic war. France would to-day be in a bad way if it did not have the huge stores of the metal which have accumulated in the pockets of her thrifty people to draw upon and which French citizens as a matter of patriotic duty are now turning over to the Bank of France in exchange for notes.

The tendency, too, towards excessive note issues must be guarded against. This tendency would be encouraged if unduly large amounts of the metal were concentrated in the Reserve banks. Furthermore, it would be questionable wisdom to endow any body of men with responsibility for the entire stock of gold in the country. We would be willing to trust Mr. Warburg in the matter because of his great special attainments and his expert knowledge and high degree of public spiritedness, but we could not feel the same degree of confidence in any one else. On the contrary, we would always be fearful in that respect, whether, for the time being, representatives of the Money Power or of the Government were in control of the Reserve Board.

There is no reason to apprehend that without such adventitious aids as are now being employed the Reserve system will not always be strongly buttressed in the matter of an adequate supply of gold. The twelve Reserve banks last week held \$294,715,000 of the metal, not counting any of the gold deposited with or credited to the Federal Reserve agents for the retirement of the notes. This total will be raised to \$450,000,000 when the member banks shall have turned in the full proportion of the cash reserves which they will ultimately have to policy which means a steady expansion of the note keep with the Reserve banks. Such a stock of the

#### Nov. 13 1915.

THE CHRONICLE

metal will support a huge amount of Reserve notes. Moreover, the stock of the metal will increase as the member banks grow in deposits and resources. The Bank of England before the war never aspired to hold more than  $\pounds40,000,000$  (\$200,000,000) of gold, and with that metal base was able to provide adequately for the huge trade of the whole British. Empire. The Reserve Board should rest contented and satisfied and not pervert the note-issuing function to uses it was never intended to have.

Transvaal gold mining operations continue to show very gratifying results. During October, in fact, as in all months since May, a new high record in output of the precious metal for the period covered was established. Furthermore, the result reported was with one exception the best for any month in the history of the workings. The exception occurred in March 1912-830,723 fine ounces-but when attention is called to the fact that in that month 52,533 fine ounces of the surplus holdings of the mines were included in the announced total, it will readily be seen that the present October aggregate of 797.631 fine ounces outranks by nearly 20,000 fine ounces the highest previous monthly product. Compared with October of 1914 the current total exhibits a gain of 63,885 fine ounces and the gain over 1913 is no less than 79,200 fine ounces. For the year to date there is a considerable increase as contrasted with 1914-7,531,547 fine ounces comparing with 6,967,165 fine ounces-and the gain over 1913 is 83,024 fine ounces. The loss from the banner year 1912, moreover, has now been reduced to only 59,009 fine ounces, and the progress recently made gives promise that this deficiency will be more than overcome by the close of the year, thus setting a new high annual record in production. It was predicted at the time the European war broke out that mining operations in the Transvaal would not be noticeably affected thereby; the correctness of that prediction is now being demonstrated.

The cotton ginning statement issued on Monday of the current week, and covering the amount of cotton of the growth of 1915 made ready for marketing prior to November 1, although bullishly construed, as was its immediate predecessor, was a comparatively negligible factor in the markets for the staple. It is true, of course, that the aggregate announced as having been ginned to the date mentioned was the smallest for any similar interval since 1910 and inferentially this is taken by some to indicate an ultimate yield under that then secured. There is a possibility that such may turn out to be the case, but the ginning report presents no real basis from which to draw that conclusion. Evidence accumulates that, due to the lateness of the crop, the work of ginning has been inordinately delayed in Oklahoma and in some other parts of the Southwest, and this has likely done more to hold down the total than the expediting of work elsewhere has served to swell it. Under the circumstances, therefore, the formulating of estimates based on ginning returns might well be deferred until after the turn of the year, bearing in mind, meanwhile, that no matter what the outturn, no dearth of supplies is threatened.

English political leaders have this week taken occasion to ridicule recent reports of peace talk. what the German Gov They describe these reports as having been "made as its object in this war.

in Germany" and declare they have no basis of fact. Sir Edward Carson in a statement for publication, declared that "if there has been a report current abroad that even an inconclusive peace would be welcome at the present moment, I can only say that any statesman in this country who was directly or indirectly a party to such a scheme would find it impossible ever again to hold up his head among his fellow countrymen, not merely at home, but throughout the British Empire." Similar statements were made by other public men. In France, equally positive assurances are being made that there is no foundation for the peace reports. The new Premier, M. Aristide Briand, on Wednesday, received the American newspaper correspondents in Paris in a body, the object being, to quote a press dispatch, "more for personal reasons than with the intention of granting an interview." Asked regarding peace suggestions, he answered: "What are these peace suggestions? They are heard first in one country and then in another, impersonal and imponderable. They irritate at the present stage of the war. I do not wish to consider them even to the extent of a public denial and rejection. We can think of nothing but to drive forward to complete success by arms." Speaking with much feeling the Premier added: "Even to mention a peace by compromise or concession is to be untrue to those who are giving their lives at the front." In Germany the German Socialist newspaper "Vorwaerts" of Berlin was suspended by the Government on Friday of last week, as a result of an outspoken plea for peace. The article is declared by Berlin correspondents to contain the boldest peace comment printed in Germany since the war began. It calls upon the German Government to state definitely the object of the war, saying :

We are told it is the others who must beg for peace, for we are victorious. But unfortunately, the others do not feel vanquished. No result is possible this way. The war goes on unendingly because both parties are anxious not to tell, or even utter, demands. They are afraid openness and frankness may be regarded as a sign of weakness.

The sole outlook in sight therefore, is that the war will go on until the complete exhaustion of all. If this be prevented the Governments of the belligerents must leave the regions of generalization and seek a positive program.

Neither England nor France shows a desire of yielding. All talk of peace, as far at least as France and England are concerned, is absolutely without foundation. The leading statesmen of France and England are as firmly determined as is the Imperial Chancellor of Germany to continue the war until victory has crowned their arms.

After criticizing the statements of the English and French Premiers for the indefinite character of their remarks the Socialistic paper concludes as follows:

It is not France and England alone who veil the conditions of peace, for the German Government is just as reserved. Whenever it has expressed itself regarding the objects of this war it confined itself to phrases, which, however suitable they be for firing enthusiasm into soldiers about to make an attack, nevertheless are wanting of the necessary clearness.

We like to have regard for Germany's intentions. For twelve months we have been listening to what is not true. Surely we cannot be taken amiss if we express a desire to hear once what is true and what the German Government really considers as its object in this war.

This cannot go on forever, that battle after battle is fought and our troops carried to new theatres of war. The people, through all this complexity of the war, never get to know what is happening, or what we are striving to attain in order that the bells of peace may be heard.

Advices cabled from Rome announce that sharp differences of opinion have developed in the Italian Cabinet concerning the war. These differences have not reached the importance of a crisis, but have brought about a conflicting view. One of the Ministers, at a recent meeting of the Cabinet. is reported to have expressed the view that Italy's best interests would be served by assisting in a movement toward a restoration of peace. This caused an angry protest and charges were made against the good faith of the Minister in question. Epithets were exchanged and one of the Ministers overcome by indignation, threw a book at his colleague. The incident, however, is declared to have been of a personal nature and the Cabinet and country are stated to be united, with this exception, for continuing the present policy.

Premier Asquith announced in the House of Commons on Thursday the new War Committee, which is a sub-committee of the Cabinet. It is to consist of five members, including the Premier himself, who is also acting Secretary of State for War in the absence of Lord Kitchener. The other members are A. J. Balfour, First Lord of the Admiralty; David Lloyd George, Minister of Munitions; Andrew Bonar Law, Secretary of State for the Colonies, and Reginald McKenna, Chancellor of the Imperial Exchequer. The War Committee will co-operate with the General Staff and the Anglo-French Staff in directing the war's operations. The Premier stated that naval, military and diplomatic advisors would assist the War Committee. The destination of Lord Kitchener, who has been sent on an important mission by the British Government, is a mystery which neither Mr. Asquith nor other members of the Ministry are inclined to explain. It is denied, however, that Lord Kitchener has resigned. Speaking on Thursday in the House of Commons, Mr. Asquith said that at no time had Lord Kitchener breathed a word of resignation to the King or to himself (Mr. Asquith). Continuing, he said: "The charge that I concealed from the House of Commons the fact that Lord Kitchener had been entrusted with an important mission to the Near East is shown to be a deliberate falsehood by the fact that while I made my statement on the war situation on Tuesday, the Cabinet de-cided on Lord Kitchener's mission two days later." A report that Lord Kitchener's destination was India, where a serious native uprising was reported to have occurred, was, however, semi-officially denied.

Conscription seems to be very close at hand in Great Britain. The official press bureau distributed a statement on Thursday night declaring that Lord Derby had been authorized by the Premier to express surprise that his statement in the House of Commons on Nov. 2 should be considered ambiguous. The Premier on that occasion pledged not only himself but the Government when he stated that if the young men did not under the stress of national duty come forward voluntarily, other, more compulsory, means would be taken before married men were called upon

was authorized to state definitely that if young men, medically fit and not indispensable to any business conducted for the general good of the community, do not come forward voluntarily before Nov. 30, the Government after that date will take the necessary steps to redeem the pledge made on Nov. 2. This is the first official announcement that the Cabinet has decided upon at least one form of conscription. It indicates that Lord Derby's scheme for recruiting has failed to produce enough men for the army.

Press dispatches from Athens state that a decree has been issued there dissolving the Chamber of Deputies and fixing the new elections for Dec. 19. The decree is regarded by the King's opponents as being extra-constitutional and likely to precipitate a crisis which may result in the Venizelos party, which is in control, seizing the Government by force. It is contended that the Government has no right to call an election while the army is mobilized, owing to the impossibility of the soldiers casting their votes. The French Foreign Minister on Wednesday received from Premier Skouloudis, head of the new Greek Cabinet, formal assurance of "our neutrality, with the character of sincerest benevolence toward the Entente Powers." This came in the form of a telegram which assured the French Foreign Minister that "the new Cabinet accepts as its own the declarations of former Premier Zaimis regarding the friendly attitude of the Royal Government to the Allied troops at Salonika." Advices from Rome are very frank in saying that the "benevolent" sentiments expressed by Greece have been received with skepticism in Italian political circles. The "Messaggero" says that the uncensored news of events in Greece proves that it has been fear of naval actions by the Allies that has held back King Constantine and his Government up to the present time. "We have rea-son to suspect," says the newspaper, "that Greece is awaiting an opportune moment to throw in her lot with the Central Empires. The Quadruple Entente has paid dearly for its mistake in the past, and it ought not to let itself be deceived again.

The Italian Line steamer Ancona carrying 422 passengers and a crew of about 60 was sunk in the Mediterranean on Tuesday by a large submarine flying the Austrian flag. It has been found impossible by our State Department to obtain definite news of the circumstances of the tragedy. Latest reports by way of Rome state that only 225 passengers and crew were saved. The Captain of the steamer denies that he was warned to stop. On the other hand, a semi-official statement by way of Berlin declares that the Ancona was endeavoring to escape after having been warned to stop. Some passengers have stated that the vessel was shelled for an hour and a half before it was torpedoed. President Wilson will obtain all the facts possible before taking official action. The fragmentary reports appear to bring up anew the question of submarine warfare.

Interest in the military operations has this week centered very largely in the steady advance of the Austro-Germans along the line west of Nish. Beyond the report of the capture of another 4,000 prisoners, which, like those reported captured previously, the Serbians say are largely civilians, or to fulfill their engagements to serve. Lord Derby Albanians or Macedonian troops who surrender

easily, the official reports of the invaders do not record the capture of any town. The Serbians are now facing the invaders in the mountains which have proved a protection to them in their previous wars and the further advance of the Teutonic Allies is apt to be more difficult. London military experts believe that the opposition that the Austrians are meeting in their efforts to drive back the Montenegrins is delaying Field Marshal von Mackensen's army, for the right wing must be free from this menace before it can proceed with its drive. In the southern part of Serbia the French are advancing on the west side of the Vardar River and at the same time are re-pelling Bulgarian attacks on Krivolak and endeavor ing to form a junction with the Serbians who are fighting in the Babuna Pass. A new British division having been landed, the British force under command of General Monrois spreading out toward Strumnitza, where encounters with Bulgarian patrols are reported. The Germans admit that they have withdrawn troops from ground west of Riga which they gained only a few weeks ago at considerable sacrifice, and that the Russian fleet in the Gulf of Riga is supporting the Russian army. By their recent gains the Russians have established a connection between their forces on the Gulf of Riga by way of Kemmern and Lake Babit to Olai, which is half way between Riga and Mitau. On the western frontier there has been active artillery work, but with apparently no net results.

An official statement from Peking announces that the Chinese Government has decided that no change shall be made this year in the form of the Government of the country. Election returns make it certain that the proposal to re-establish a monarchical form of government has been adopted, 18 of the 22 provinces having already given solid support to the project. The election will be completed, but action as a result of a vote will be delayed.

Tokio has been observing this week one of the greatest celebrations in the last half century in connection with the coronation of Emperor Yoshihito of Japan. The members of the diplomatic corps left Tokio for Kito on a special train on Nov. 8 and were received in audience by the Emperor on the following day. Ambassador Guthrie represented the United States at the ceremony, no special envoy having been sent. The Emperor formally ascended the throne on Nov. 10 and announced the fact to his subjects and to the envoys of the other Powers. The program provides for various ceremonies which will occupy the remainder of the month.

Premier Asquith asked and received on Thursday another war credit, amounting this time to £400,-000,000, thus bringing the total up to £1,300,-000,000 for the financial year ending with March, and making the total amount allotted for war purposes £1,662,000,000 (\$8,310,000,000). In a preliminary statement on Wednesday the Premier presented figures showing that the Government had a sufficient sum left over from the previous loan to finance the war until the third week in November. Loans advanced by Great Britain to her Allies and Dominions between April 1 and Nov. 6, Mr. Asquith said, amounted to £98,000,000. There was no reason to believe that expenditures during the next two months would exceed £5,000,000 daily, so that the new vote of credit might be expected to last to the

middle of February. The Premier presented a brief statement in which he said that of the total Governmental expenditures of £743,000,000 from Apr. 1 to Nov. 6 £17,300,000 had been used for munitions for the army and navy, £98,300,000 for loans to the Allies and the remainder for miscellaneous purposes.

There recently has been an increase in activity, speculative as well as investment buying, on the London Stock Exchange. This has been ascribed to the investment of profits accruing from war contracts obtained by British manufacturers and intermediaries. This buying has been criticized and has led the Government, it is understood, to decide on issuing a new popular loan sooner than would have otherwise been the case, in order to take full advantage of the capital market and discourage these outside investments. It is understood, if the present plans are carried out, that the next loan offering will be for an unlimited amount, and usually well-informed London correspondents cable that the rate will be 5%, which will apply automatically to the 41/2% loan recently issued. Money is being made freely and spent as freely by the stay-at-home workingmen in England who are purchasing pianos, graphophones, jewelry and other unnecessaries on a large scale. However, it will most probably be the middle of December before the detail work connected with the new transaction will permit the new issue to be distributed. Meanwhile Treasury bills are selling more satisfactorily than was the case a week ago, averaging more than £5,000,000 per day, which means, with the balance that the Government has on hand, that for the present the war expenditures can be comfortably covered and that from the financial standpoint there is no immediate need of haste in floating new bonds. To make the Treasury bills more attractive, the Bank of England announced yesterday that the rate of interest on bills sold over the counter will be 5% for all dates, instead of 5% for long dates only.

Early in the week Premier Asquith's speech in the Guild Hall produced a good impression on the stock market. His remarks were made at the banquet given in celebration of the inauguration of Sir Charles Cheers Wakefield as Lord Mayor of London. "We shall not falter nor pause," said the Premier, "until we have secured for the smaller States of Europe their charter of independence, and for Europe itself final emancipation from a reign of force." The Premier's remarks were along these lines. The remarks of Arthur J. Balfour, First Lord of the Admiralty, were considered even more encouraging than those of the Premier. The whole strategy of the Allies, said the First Lord, was based upon the Allied fleets. Never had there been a war in which dramatic incidents connected with the Allied fleets were fewer. Never had there been a war in which the operations of the Allied fleets were more essential to the success of the land forces; their fortunes would have been very different from what they were and what they were going to be had it not been for the fact that the Allies from the first moment took command of the seas. No historian in the future might say that there was a moment when the calculations of the Central Powers were near realization. Their campaign the first spring, which might have been fatal, was foiled; it was many months since any success could be claimed by the Germans on the Western front, and it was two months since there had been any advance in Russia. The pause in the war meant that the tide of the enemy's successes had reached its limit and what they had to look forward to was the ebb, slow or fast—but ebb all the same.

The large size of the new war credit exercised a restraining influence on the London market during the closing days of the week, though the turn for the better in our own securities was reflected cordially by the American section of the English market. Japanese bonds were strong, Greek securities were nominal, not being affected by the reported Anglo-French loan of £1,600,000 to Greece. Kaffirs did not repond to the great production for October in the Transvaal, to which we have referred in a preceding paragraph. While money remains plentiful in London, it is nevertheless being held for high rates. A significant instance of this was the offering and sale of £3,500,000 India bills on Wednesday on a 53/4% basis. A South Australian 5% loan of \$2,000,-000, offered at 99, was fully subscribed in London. The issue was made in order to meet maturing 4s next January and April. The New Zealand internal loan of £2,000,000 also was a great success, having been subscribed twice over. That the effects of the war promise to have a more or less permanent influence in financial London was indicated by the action taken at a well-attended meeting of the London Stock Exchange on Wednesday. A resolution was adopted practically unanimously, demanding that the Exchange Committee exclude Germans and Austrians by refusing them re-election next March, with the exception of old members whose loyalty to Great Britain is beyond question.

British trade as reported by the Board of Trade for October showed an increase in imports of £16,-413,000 (\$82,065,000), while exports increased only £3,367,000 (\$16,835,000). This is a condition that is being taken account of by the British officials, who are urging strict economies at home so as to reduce importations, and are also urging the active cooperation of all interests in the forcing of exports. In the latter they find their usual handicap in the arrogance of labor. An instance is the prospective strike of workers in the Lancashire finishing, bleaching and dyeing trades. These workers have already received war bonuses but are seeking additions and have decided on a complete stoppage of work on Nov. 19. The number of employees concerned is something over 20,000. The principal increases in the British imports for October were £3,000,000 in food, £1,000,000 in chemicals and drugs and £8,000,-000 in raw materials, of which cotton from America contributed £3,000,000. The principal increases in exports were in iron, steel and textile manufactures. The exports of cotton for October give a total of 367,322,000 yards, comparing with 370,712,000 yards in September, to the following destinations:

	October. Yards.	September. Yards.
		Yaras.
United States.	3,831,000	5,079,000
	144,872,000	230,836,000
China	30,447,000	20,073,000
Netherlands	2,719,000	1,504,000
France.	8,867,000	1,859,000
Egypt	15,307,000	9.050.000
Central and South America	31,325,000	13,128,000

The following comparisons show the trade of the United Kingdom in October and for the ten months ending with October:

Month o	f October-	-From Jan.	1 lo Oct. 31-
1915. Importsf67,791,435	1914. £51,379,435	1915. £711.679.693	1914. £574.118.981

The Paris Bourse has had a quiet week, French rentes, though they closed at a moderate advance, being frequently under pressure in consequence of the approach of the new 5% loan which Alexandre Ribot, Minister of Finance, was on Tuesday last authorized by the Cabinet to officially present to the Chamber of Deputies. The official bill was introduced on Thursday and was promptly passed. The price of issue and the period of subscription are left for determination by governmental decree. All the privileges and immunities attached to the 3% bonds are extended to the new 5% issue, which is exempt from all taxes. The Government renounces the right of payment until after Jan. 1 1931. Savings bank depositors have the privilege of liberating one-half their deposits for investment in the loan without the usual notices of withdrawal. In addition to the loan M. Ribot has proposed an income tax on war profits effective January 1 1916, applicable not only to firms supplying the Government but to all business. The measure is intended as a substitute for the income tax which should take effect on that date, but which, it is generally believed, cannot be applied effectively while the war is in progress. The French market has been greatly interested in the official announcement that the Bulgarian Government has taken over the administration of the security for the French loans to that country of 1902, 1904 and 1907, of which the nominal total is 345,000,000 francs. These loans were made under contract stipulating that "all security is to be administered by a delegate named by the Banque de Paris et des Pays Bas." This delegate, it appears, thought it would be unwise for him to remain in Sofia, but before leaving he turned over his powers to the Secretary. The Bulgarian Government now says there is no longer any delegate or secretary (the latter having been arrested by the military authorities on charges for which he is to be tried). As for the guarantees for the loan which consisted of tobacco and stamp taxes, Bulgaria has impounded them. These questions will, of course, have to be regulated after the war. French rentes closed at 65.35 francs, against 65.05 a week ago. The London "Times," according to cable accounts, hears that arrangements are in progress in Paris for the issuing of a Japanese loan to France, probably in 5% bonds.

A dispatch from Berlin announces that the Bourse Committee has voted to have outstanding stock engagements that have been running since the war began settled at the end of November. A circular of inquiry sent out by the committee has developed the fact that the total amount, including loans to carry account, reached about \$18,750,000, although it has been greatly reduced. Latest reports by cable state that the subscriptions to the third war

#### Nov. 13 1915.]

loan in Austria have reached a total of 4,015,000,000 crowns (\$803,000,000) Cabled advices from Berlin state that the payments in cash on the third German war loan up to November 6 had reached 9,415,700,-000 marks (\$2,353,925,000) or 77.8% of the total subscription. A dispatch from Amsterdam says that the "Official Gazette" of Constantinople has published an act voted by Parliament authorizing the Government to make arrangements with the German Government for an advance of \$30,000,000.

Official bank rates at the leading foreign centers are without change from 5% in London, Paris, Berlin, Vienna and Copenhagen; 51/2% Italy, Norway, Sweden and Portugal, 6% in Russia and 41/2% in Switzerland, Holland and Spain. The open market rates in London are 41/8% for short bills and 51/4@51/2% for 90-day bills, against 43/4@47/8% for sixty days bills a week ago and 434% for ninety day bills. Day to day funds at the British center have been advanced 1/2% to 4@41/2%. No private discount rates, so far as we have been able to learn, have been reported by cable from the Continent this week, except a 41/4% rate for Berlin.

The Bank of England reports this week a decrease of £1,304,044 in its gold coin and bullion holdings and of £1,070,000 in its total reserve, note circulation having decreased £234,000. There was an expansion of £3,421,000 in the item of public deposits, a decrease of £5,359,000 in other deposits and of £853,000 in other securities (loans). The proportion of reserve to liabilities declined to 29.13% from 29.48% last week and compares with 33.35% at the corresponding date last year. The Bank's bullion holdings now aggregate £55,351,674, against £69,-280,923 in 1914 and £36,700,264 in the year preceding. The reserve stands at £40,602,000. One year ago it was £52,211,893 and two years ago £26,649,-484. The loan item is £97,667,000, against £105,-091,369 in 1914 and £27,358,447 in the year preceding. The Bank reports the amount of currency notes outstanding as of Nov. 6 £79,935,940, against £77,-031,541 the preceding week. The amount of gold held for the redemption of such notes remains at £28,500,000. Our special correspondent furnishes the following details by cable of the gold movement into and out of the Bank for the Bank week: Inflow, £1,892,000 (of which £1,116,000 bar gold bought in the open market, £500,000 released from Egyptian account and £276,000 net received from the interior of Great Britain); outflow, £3,196,000 (of which £1,748,000 exported to the United States, £26,000 to Canada, £290,000 to South America, £501,000 to Spain, £50,000 earmarked Switzerland, £200,000 to other points on the Continent, £100,000 to Japan, £150,000 ear-marked miscellaneous and £131,000 bar gold sold). We add a tabular statement comparing for the last five years the different items in the Bank of England return:

THE CHRONICLE

The weekly statement of the Bank of France shows the following changes: Notes in circulation, increase, 109,817,000 francs; Treasury deposits, increase, 7,155,000 francs; general deposits, increase, 4,089,000 francs; bills discounted, decrease, 51,280,000 francs; advances, increase, 2,641,000 francs; gold in hand, increase, 27,325,000 francs; silver in hand, decrease, 909,000 francs. The Bank holds 4,781,947,000 francs in gold, against 4,141,350,000 francs a year ago. Silver aggregates 350,423,000 francs, against 625,-325,000 francs; note circulation is 14,188,365,000 francs, against 6,683,184,785 francs; general deposits are 2,525,072,000, against 947,571,861 francs, and discounts are 2,331,560,000 francs, against 2,454,-280,425 francs. Immediately after the war began last year the Bank of France suspended publication of its weekly statement and did not resume until Feb. 4 1915, hence no closer comparison with 1914 is available than of July 30. These are the figures used in the foregoing comparison.

The Imperial German Bank reports its condition as of Nov. 6, showing an increase for the week of 692,000 marks in gold and of 78,794,000 marks in discounts. A decrease of 172,449,000 marks was shown in the metal stock and paper currency, which includes Imperial and loan bank notes and notes of other banks in addition to coin and bullion. Deposits decreased 48,151,000 marks, loans decreased 942,000 marks, note circulation is 36,346,000 marks lower and treasury bills outstanding were curtailed 3,308,000 marks. The Bank now holds in gold 2,432,990,000 marks against 1,885,000,000 marks one year ago. Discounts aggregate 4,285,295,000 marks against 2,643,000,000 marks a year ago, treasury notes are 881,932,000 marks against 859,-000,000 marks. Note circulation is 5,910,051,000 marks against 4,085,000,000 marks and deposits are 1,594,536,000 marks against 1,282,000,000 marks.

In the local money market the tone continues an easy one. There is no competition for funds, while, on the other hand, lenders show slight disposition to obtain business by means of concessions in rates. Funds have loaned more or less freely this week in substantial amounts for six months at 3%. Last Saturday's bank statement showed a decrease of \$7,-114,670 in the surplus reserve, bringing the total down to \$189,100,500, which compares with \$15,-914,550 at the corresponding date a year ago under the old form of Clearing House statement. Loans increased \$52,445,000 for the week, net demand deposits increased \$51,270,000 and net time deposits increased \$364,000. There was a decrease of \$419,-000 in note circulation. Reserves in "own vaults" decreased \$918,000 to \$525,369,000, of which \$468,-397,000 was specie. Reserves in Federal Reserve banks increased \$309,000 to \$164,930,000, and reserves in other depositaries increased \$1,621,000 to \$48,175,000. The bank statement in greater detail appears on a subsequent page.

Referring to money rates in detail, the range for demand loans as has been the case for several weeks, has continued at  $1\frac{3}{4}@2\%$ . These figures have represented the lowest and highest rate each day. The renewal rate has remained pegged at 13/4% all week. In time money quotations the six months' maturity is quoted at the single figure of 3% against 3@31/4% as a range a week ago. Otherwise rates are without change from 21/2% for sixty days, 23/4% for ninety days,  $2\frac{3}{4}(\underline{0}3\%)$  for four months and 3% for five months. In commercial paper there have been some six months' discounts this week at the very low rate of  $2\frac{3}{4}\%$ , but the market quotations at the close are  $3(\underline{0}3\frac{1}{4}\%)$  for sixty and ninety-day endorsed bills receivable and for six months' single names of choice character. Names not so well known require  $3\frac{1}{2}\%$ . Bankers' acceptances remain at  $2\frac{1}{8}(\underline{0}2\frac{1}{2}\%)$ , according to maturity. Discount rates at the Federal Reserve banks have not been altered. The Federal Reserve Bank at Philadelphia this week purchased \$1,500,000 of Government 2% bonds.

FEDERAL RESERVE BANK DISCOUNT RATES.

Authorized rate for discount of bankers' acceptances, 2 to 4%.

The sterling exchange situation has ruled somewhat irregular during the week, though a gradual hardening tendency has been evident, due to the progress reported in the arrangements for the supplemental credits to be granted to English banks by American financial institutions. The general subject of the regulation or observation of these credits has been placed in the hands of a representative committee, including New York and Chicago bank and trust company officers, who will act in full accord with an English committee composed of Sir Walter Cunliffe, Governor of the Bank of England; Sir Felix Shuster, Governor of the Union of London & Smith's Bank, Ltd., and Sir Edward Holden, head of the London City & Midland Bank. The American committee consists of Frank A. Vanderlip, President of the National City Bank (Chairman); James S. Alexander, President of the National Bank of Commerce; Charles H. Sabin, President of the Guaranty Trust Co.; Seward Prosser, President of the Bankers Trust Co.; George M. Reynolds, President of the Continental & Commercial National Bank of Chicago; James B. Forgan, President of the First National Bank of Chicago; Robert Y. Hebden, New York Agent for the Bank of Montreal; William H. Porter of J. P. Morgan & Co.; John E. Gardin, Vice-President of the National City Bank, and Fred I. Kent, Vice-President of the Bankers Trust Co. This committee held a protracted meeting on Wednesday and discussed the general situation. At the conclusion of the meeting a cable dispatch was sent to Sir Walter Cunliffe and Sir Edward Holden, asking their views on several specific matters relating to the terms of the credits. Thus far no formal replies have been received, though unofficial advices indicate differences of opinion among London bankers. Benjamin Strong Jr., Governor of the Federal Reserve Bank of New York, and William Woodward, President of the Hanover National Bank, while not members of the committee, took part in the discussion. A sub-committee to the banking committee has been appointed to look after the details of the transaction. It is com-

posed of the exchange experts of the various institutions in this city, including Max May of the Guaranty Trust Co., Fred I. Kent of the Bankers Trust Co., John Gardin of the National City Bank, and William H. Porter of J. P. Morgan & Co., and a number of others. This sub-committee will handle the foreign exchange transactions in connection with the loans or credits that may be determined by the main committee. It is not probable that the committee will announce particulars either as to the amount or the form of the specific credits. These will be regarded as professional banking confi-dences. In a general way it may be stated the credits are of two kinds, namely straight loans to be drawn upon at sight as desired, and second, credits based on acceptances. These acceptances, it is expected, will be of such form as to be discountable at the Federal Reserve banks. In the event of collateral being required, it will, according to present plans, be deposited with the Bank of England for the account of the American lender. Not all the banks and trust companies have agreed to recognize any obligation to confer with the American committee of bankers. These exceptions feel themselves quite capable of conducting their own affairs without reporting their transactions to competitors. One of these concerns, a large trust company, has, it is reported, already extended credits amounting to \$18,-000,000 to London correspondents.

Meanwhile, gold is coming forward by nearly every steamer, and the inward movement of the precious metal may be expected to continue right along, virtually regardless of the extent to which credits may be extended. The White Star Liner Cymric on Monday brought in \$3,163,000 and the American Liner New York on Tuesday brought in \$2,700,000, both amounts consigned to the Guaranty Trust Company. The American Liner St. Louis brought in \$3,800,000 in British sovereigns, which was deposited at the Assay Office on Thursday. Of the total, \$2,500,000 came to the Guaranty Trust Co., \$500,000 each to the Bank of New York and Wells, Fargo & Co. and \$300,000 to the Canadian Bank of Commerce. There has been quite a free supply of merchandise bills of all kinds this week, while the demand seems to have proven just about sufficient to balance them. The weekly report of the Department of Commerce as of Nov. 6 showed a surplus in favor of exports of \$34,012,872, comparing with \$42,336,909 the preceding week and \$70,609,402 for the week preceding that. The exports of war material are now in full progress and the expectation in sterling exchange circles is that the export balance will continue large for several months to come.

Compared with Friday of last week, sterling exchange on Saturday remained strong, although at the extreme close a somewhat weaker tone developed with fractional declines from Friday's high point; demand bills were quoted at  $4 \ 64\frac{1}{2}\ 64 \ 64\frac{3}{4}$ , cable transfers at  $4 \ 65\frac{3}{8}\ 64 \ 65\frac{1}{2}$  and  $4 \ 61\frac{1}{2}\ 64 \ 64\frac{3}{4}$  for sixty days. On Monday the opening was firm, chiefly on expectation of early establishment of supplementary credits, but later the market eased off under the pressure of heavy offerings of grain and other commercial bills; the range was  $4 \ 64\frac{1}{2}\ 64 \ 64\frac{7}{8}$ for demand,  $4 \ 65\frac{3}{8}\ 64 \ 65\frac{3}{4}$  for cable transfers and  $4 \ 61\frac{3}{4}\ 64 \ 62$  for sixty days. Some irregularity was apparent on Tuesday, although for the most part the undertone was firm, influenced in large measure by a renewal of foreign selling of American securities; demand sold at 4 641/4@4 643/4, cable transfers at 4 651/8@4 655/8 and sixty days at 4 613/4@4 62. On Wednesday sterling quotations showed increased firmness, advancing to 4 6478@4 65 for demand bills, 4 653/4 @4 657/8 for cable transfers and 4 62@4 621/4 for sixty days; trading, however, was inactive and operations were restricted by the absence of mail facilities, as no steamer was scheduled to sail before the close of the week. Announcement that arrangements had been completed for establishment of the moderate British banking credits, brought about a further rise on Thursday, and demand moved up to 4 651/4@4 651/2, cable transfers to 4 661/8@ 4 663% and sixty days to 4 621/4@4 621/2. On Friday the market ruled firm at 4 653/8@4 655/8 for demand, 4 661/4 @4 661/2 for cable transfers and 4 611/2@4 62 for sixty days. Closing quotations were 4 601/2 for sixty days, 4 653/8 for demand and 4 661/4 for cable transfers. Commercial on banks (sixty days) closed at 4 601/2, documents for payment finished at 4 611/4 and seven-day grain bills at 4 641/4. Cotton for payment at 4 65, grain for payment at 4 65.

The Continental exchanges continue to move irregularly in response to the constantly changing conditions in the Balkans. Demand sterling in Paris closed yesterday at 27.841/2 francs against 27.781/2 a week ago. In New York Paris checks close at 5 991/4 and cable transfers at 5 981/2 against 5 96 and 5 95, respectively, a week ago. Exchange on Berlin finished at 81 3-16 for sight and 811/4 for cables against 81 7-16 and 81½ last week. Swiss exchange is 5 32 for sight and 5 31 for cables against 5 32 and 5 31 a week ago. Bankers' sight on Amsterdam is unchanged at 42, while cables are 421/4 against 421/4 last week. Commercial sight on Amsterdam is 1/8 higher at 413/4. Italian lires are 6 461/4 and 6 46 for checks and cables, against 6 43 and 6 42. Greek exchange is 5 1514 for checks against 5 27. Cables are not quoted freely. Copenhagen checks are 26 55 against 26 20 and bankers' sight bills on Norway and Sweden finished at 26 90 against 26 20. Rus-sian rubles are  $32\frac{1}{4}@32\frac{1}{2}$  against  $33\frac{3}{4}$  last week.

The New York Clearing House banks, in their operations with interior banking institutions, have gained \$465,000 net in cash as a result of the currency movements for the week ending Nov. 12. 'Their receipts from the interior have aggregated \$8,046,-000, while the shipments have reached \$7,581,000. Adding the Sub-Treasury operations and the gold imports, which together occasioned a gain of \$10,-158,000, the combined result of the flow of money into and out of the New York banks for the week appears to have been a gain of \$10,623,000 as follows:

	Banks.	Bank Holdings.
88,046,000 34,678,000		
12,724,000	\$32,101,000	Gain \$10,623,000
3	4,678,000	4,678,000 24,520,000

The following table indicates the amount of bullion in the principal European banks:

Banks of	٨	on. 11 1015		Nov. 12 1914.

#### GREAT BRITAIN AND THE BALKANS.

The course of events in the Balkan States, up to the present time, has merely continued to emphasize the unfortunate results of the over-confidence of the Allied Governments, prior to the German invasion of Serbia, in the continued neutrality of Bulgaria and the active co-operation of Greece. The advance of the Austro-German army has been pressed in conjunction with the movement of the Bulgarian invaders from the east, whose capture of Nish, the Serbian capital since the fall of Belgrade, has driven the Serbians back into the mountains toward Montenegro.

The diplomatic problems in the Balkans have grown more instead of less complex. For several days at the end of last week, the situation regarding Greece was extremely critical as a direct result of the resignation of the Zaimis Cabinet, on Thursday of that week, on a vote of want of confidence of 147 to 114 in the Chamber of Deputies. Superficially, this was a victory for Venizelos and the war party in Greece. It left matters, however, in a peculiar position. Two alternatives lay before the Greek King, with his pro-German sympathies. He might, in accordance with the usual practice after such a Parliamentary defeat, recall Venizelos himself to form a Ministry. But it was also within his constitutional powers to dissolve the Greek Legislature and call for a new election. The King was obviously unwilling to restore Venizelos because that would seemingly commit the Government to the war policy of the ex-Premier. Venizelos, with his Parliamentary majority, was able to force the King to choose between this and a dissolution. A compromise appeared at first to have been arrived at. The Zaimis Cabinet was practically recalled; the same administrative members constituting it, but a new Premier, Skouloudis, being named. Apparently, in concession to Venizelos and the majority of the Deputies, the new Premier was made to announce to the Deputies with great plainness that a policy of "very benevolent neutrality" would be pursued toward the Allies; the direct intimation being added that Greece recognizes where her national interests lie and that the use of Saloniki as the port of debarkation for the Allied forces might continue.

So the matter stood until yesterday's unexpected news of the dissolution of the Chamber of Deputies and of a call for a new election on Dec. 19. What bearing this decision has on the already complicated situation it has not been easy to determine. Quite aside from the question how the people of Greece will vote, on what is virtually a referendum for or against a policy of war, the danger of the situation to the Venizelos party lay in the possibility that the King, controlling affairs during the interval before the new electoral vote was taken, might commit Greece against the Allies, at the very moment when they were using a Greek port of access to the Serbian battleground. It may be that direct and binding assurances against such action have been made. But in any case a very extraordinary situation has arisen, in which a voting population is asked to express its wishes as to armed intervention against the powerful invaders of a neighbor State-this at the very moment when the aggressive campaign of those invaders is in progress. Until details of the electoral plan are known, it will not be possible to judge what effect the demobilization or continuing mobilization of the Greek army, pending the vote, would have on the result.

All this embodies a most unusual situation; especially when Greece is satisfying neither side in the war and is irritating both-not observing neutrality toward the Teutonic Allies, yet not accepting its treaty duties through coming to the aid of Serbia. The meaning of the situation, however, is clear enough. Greece is deferring aggressive action until she learns whether or not the Allies will be able to stem the tide of Teutonic invasion. The attitude of Rumania is almost certainly the same. All the dispatches indicate sympathy with the purpose of the Western Allies; it has even been reported that Rumania has granted to Russia navigation rights on the Danube for her transports, which is inconsistent with strict neutrality. Yet Rumania does not enter the war. These things can only mean that future developments hang on the action of the Allies in Bulgarian territory.

What that action will be, it is most difficult to determine. French troops to the south of Serbia have engaged Bulgarian forces with varying success, apparently not yet being in sufficient force for aggressive operations. More English troops have been landed at Saloniki. But how many are at hand is by no means clear; neither is the British Government's policy regarding use of the Gallipoli troops for the purpose. The departure of Lord Kitchener for the scene of war in Southeastern Europe-a spectacular incident of the day-is susceptible of several explanations. The theory of his resignation from the War Ministry has been indignantly denied by the British Premier, and, under all the circumstances, the rumor that he was sent to India may be dismissed at once. He may have gone to Southeastern Europe because of his knowledge of Egyptian warfare; but on the whole the unusual action of sending a Secretary of War to the battlefront is probably due to the fact that Kitchener as a Field Marshal would be the ranking officer over all the Allied forces at Gallipoli, and therefore able to take general command. This was almost certainly the recommendation of General Joffre in his recent personal visit to London, which was immediately followed by Kitchener's departure. Mr. Asquith stated to the Commons this week that "serious information, which led the Government to take that decision"-which was reached on Thursday, Nov. 4-"was brought to their knowledge for the first time on Wednesday." Precisely what this refers to has not yet been made elear. But the explanation was certainly not reassuring.

It is evident, at any rate, that a new trial of resources, generalship and military policy as between the antagonists in the Balkan peninsula is now at hand. Beyond question, the Allies are acting under a heavy handicap. They are too late in the field. They may preserve from annihilation the remnants of the Serbian army; yet the chance of blocking access of Teutonic troops and supplies to Constantinople seems already to have been lost. It is impossible at the moment even to foreshadow the Allied plan of campaign; yet it is evident that a very aggressive move is necessary if the active co-operation of Greece or Rumania is to be achieved.

If, as is easily possible, the Germans shall presently reach Constantinople, the moral effect would undoubtedly be great. Yet the military effect may easily be exaggerated. The achievement would not

be at all equivalent to occupying a hostile capital. Its real effect, aside from its influence on neutral Balkan Governments, would be that it would provide supplies and artillery, with possible re-enforcements, for the Turkish army. Beyond this, it is not easy to see what would be gained. The Suez Canal is protected by the long intervening stretch of desert; Egypt, by the Anglo-French control of the seas. Therefore the rumor that the Kaiser will dictate peace from Constantinople is not convincing. Yet the Allies must, in the logic of the military situation, achieve some marked success to offset the German achievements. Russia is doing her part, but wholly on a defensive basis. The Allied attack on the Western battle line was not at all decisive, despite the heavy resultant loss of men. One question which seems still to be left open is

what measures regarding army management the Allied Governments will take to repair the mischief of the past. The announcement of a Governmental committee on war in England is not wholly reassuring. Comprising as it does the Premier himself, Mr. Balfour, Mr. Lloyd George, Mr. Bonar Law and Chancellor of the Exchequer McKennafive competent and responsible statesmen, but wholly devoid of military training or experience-it does not in the least resemble a French or German general staff, and its particular value in the present situation is not easy to discover. The official general staff of the British army, of which nothing seems to have been heard in the course of the various campaigns, is apparently subordinate to this war committee. No evidence appears, moreover, as to whether this general staff was to be itself reorganized because of shortcomings in its recent military policy.

This, as the week's debates in Parliament have clearly indicated, is the main source of misgiving in the existing conditions. The discussion before the House of Commons reflected a rather wide-spread feeling, either that the Ministry itself had let matters drift, or else that Lord Kitchener himself, who has seemed to be hitherto the single autocrat of the British War Department, had failed to adapt his plans in the general European campaign to the new conditions which have developed in both warfare and diplomacy. It is not impossible that the "war committee" as now organized is designed specifically to provide a ministerial tribunal with an authority whereby it can judge between Kitchener's individual judgment and the judgment of subordinate officers in the staff or in the field. But if so, we imagine that the English Parliament and public will be all the more insistent in its demand for evidence of a more effective program.

#### THE RIGHT TO WORK REAFFIRMED.

Another sound decision of the Federal Supreme Court comes at an appropriate time. At the November election of last year, the people of Arizona, by the very modern process of initiative petition, enacted a law "to protect the citizens of the United States in their employment against non-citizens of the United States, in Arizona." This was proclaimed law by the Executive in December. It required every employer, either corporate or private, who was then or might hereafter be employing more than five persons at any one time, regardless of the kind of work or of the sex of workers, to have at least four-fifths of them either native-born or qualified electors. Fine and imprisonment were prescribed as penalty for the employer violating this command or for the employee who misrepresented his or her status, and one avowed purpose was the exclusion of Japanese labor.

One Mike Rauch, an Austrian cook employed in a restaurant, finding that his employer was about to discharge him (although satisfied with him in all respects) because the law officers of the State and of the county threatened prosecution, applied to the Federal District Court, and its decision in his favor has now been sustained by the final tribunal, with only a single dissent, which was based on the mode of procedure. The action was brought, of course, under the 14th Amendment. Manifestly, if a State can apply a prohibition to a percentage of a particular total number of employees it can make the same prohibition without any qualification. Said Justice Hughes:

It requires no argument to show that the right to work for a living in the common accupations of the community is of the very essence of the personal freedom and opportunity that it was the purpose of the amendment to secure. If this could be refused solely on the ground of race or nationality the prohibition of the denial to any person of the equal protection of the laws would be a barren form of words. The authority to control immigration, to admit or exclude aliens, is vested solely in the Federal Government. The assertion of an authority to deny to aliens the opportunity of earning a livelihood when lawfully admitted to the States would be tantamount to the assertion of the right to deny them entrance and abode, for in ordinary cases they cannot live where they cannot work.

If aliens are permitted to enter and remain within a State, whether on the Pacific Coast or the Atlantic, they must be permitted to work for their living, or else become a burden on the public, as paupers or as criminals; no other course is open. Whether public work (as in the recent case of the subways here) can be distinguished from private work, considered as a strictly legal question, has not yet been finally decided; but this attempt to exclude aliens by penalizing employee and employer together is of the essence of the attempt of organized labor to enforce the closed shop by denying at once the right to hire and to be hired. If a man does not own his bodily members he owns nothing and is not a freeman; if he cannot use those members to earn his living he does not own them; if he can work only on conditions imposed by an outside body, both he and his employer are under duress. This is the crux of the fight for freedom of labor, and in this latest decision the Supreme Court once more affirms the right to work. Employer and employee are either both free or both bound. The decision of the same tribunal, in the Kansas case, which turned upon the right of an employer to prescribe conditions to those seeking employment ("Chronicle" February 6 last, p. 434) may be compared with this latest one. The freedom of employer and employee both now stands established, as a matter of law; what remains is to enforce it in practice.

This Arizona case also illustrates the modern fad of direct legislation by the people. This law was one of nine, receiving 25,017 yeas to 14,323 nays, a total of 39,340, the vote for Governor in the same year being 51,007. The highest vote received by any proposition at that election was 95.3%; the lowest was 56.8%; this ratio of 77.3% indicates

that the voters in Arizona desired to drive out the aliens. Some who call themselves Progressive wax indignant that any small number of men on the judicial bench should presume to oppose and nullify the pronounced will of the people; the legislature, these persons affirm, or the people when they have directly declared their will, should be the sole judges of constitutionality; when the people have spoken, through their representatives or directly, that should be the end of it. In reality, the courts neither "nullify" nor invalidate; yet, if these protestants are allowed their own word there still remain constitutions, the highest written law, made by the people and binding on the people until changed by their makers, and all constitutions are binding, within their jurisdictions. Enforcement is im-

possible without interpretation. If the legislature is to interpret its own work it must remain in session. If the people, who indirectly or directly make the laws, are to interpret they must also execute, and that brings us to such interpretation and enforcement as was had in the case of Leo Frank, by masked judges in the hours of the night. If the administrative officer is to interpret, there may be conflicting views of both meaning and constitutionality. The doctrine of supremacy of the people, without regard to what they have previously decreed, heads towards chaoes; the doctrine that the police powers of a State have no limitation is not far behind in the same direction.

#### THE YEAR'S CROPS.

The corn crop of the United States for 1915 promises to approximate quite closely the 1912 record yield of that cereal, according to the November estimate of the Department of Agriculture announced on Monday. This, if borne out by the final report to be issued on Dec. 15, will be most satisfactory, but it is to be said that it is considerably at variance with the conclusions reached by expert private observers following the cold, frosty weather of early October. Those conclusions were that not only would quality be materially lowered, as much of the grain in the northern part of the belt was still in the milk at the time of the freeze, but there would also be a considerable reduction in the average yield per acre. In fact, private reports after the middle of the month referred to important damage in the Northwest and moderate injury in Indiana, Ohio and Northern Kansas, some going so far as to state that much acreage had been turned over to farm animals as too badly damaged to harvest. Moreover, the drying-out process was lowering estimates in sections where the corn was considered good. Estimates based upon the situation as above depicted centered around 2,750 million bushels.

The Crop Reporting Board of the Department of Agriculture in a statement issued in connection with, but not made a part of, the official report, refers to corn as being of unusually poor quality this year in the corn surplus States as a result of the freeze reducing the feeding value of the grain, but estimates the yield at 3,090,509,000 bushels, or 65 million bushels greater than indicated on Oct. 1. This total, moreover, is 418 million bushels greater than the finally announced yield of last year and only 35 millions smaller than the record production of 1912. The quality of the cereal this year is reported as 9.7% below the average of earlier seasons. The stock of corn in farmers' hands on Nov. 1 1915 is placed at 96,009,000 bushels, or 3.6% of the 1914 crop, as contrasted with 80,046,000 bushels, or about 3.3% of the 1913 yield on hand the same date in 1913, and 104,407,000 bushels the average of the preceding five years.

The subjoined compilation, unchanged except in the case of corn from a month ago, shows at a glance the cereal outlook for this year, as compared with 1914, 1913 and 1912 and the high records of production:

Production. Estimated.	Final.	Final.	Final.	Previous
(000.000s omitted). 1915.	1914.	1913.	1912.	Records.
Winter wheatbush. 657 Spring wheat		523 240		
Oats 1,517	1,141	1,122	1,418	1,418(1912)
Barley 237	195	178	224	224(1912)
Rye 44	43	41	36	43(1914)
Total bushels	4,943	4,551	5,533	5,825

These five leading cereals, it will be noted, give collectively a yield some 358 million bushels greater than any previous annual yield, and it is to be stated, furthermore, that their combined value on the basis of the Nov. 1 prices, which were quite generally below those of 1914 and very noticeably so for corn and oats, is approximately 3,532 million dollars, or some 155 millions more than last year and very greatly in excess of 1912.

The white potato crop, which a month ago was reported as promising an aggregate yield of 368 million bushels, is now estimated at 359¼ million bushels, or 46½ million bushels under 1914 and 61 millions below the record yield of 1912. Tobacco, too, is not expected to turn out quite as well as was indicated Oct. 1, but sweet potatoes and apples are in bountiful supply and of superior quality. Finally, the excellent general crop situation of the country finds official expression in a production percentage 7% higher than last year and 17.3% above the average of the preceding five years (1909-13).

Canada, in common with the United States, has produced a phenomenal wheat crop this year. The latest official statistics in fact place the yield at 336,258,000 bushels, or not far from double the production of 1914 and affording an exportable surplus in excess of 200,000,000 bushels.

#### CHICAGO BURLINGTON & QUINCY REPORT.

The Chicago Burlington & Quincy Ry. is a thing sui generis among American railroads. It is able to make a satisfactory showing in good and bad periods alike. Its income strength is such that it never fails to earn its customary dividend, which has been maintained on the basis of 8% per annum, even in years of crop failure or business depression or both combined, while in times of favorable conditions it is certain to earn a large surplus in excess of the dividend requirements.

The company has steadfastly adhered to the policy of making large appropriations out of income applicable to physical additions and betterments, varying the amount of the appropriation accordingly as revenues are large or small, and it stands almost alone among the larger railroad systems of the country in having found it possible to continue these appropriations year by year on a scale commensurate with the needs of the day, right up to the present time. In the year under review—that is, the twelve months ending June 30 1915—the amount applied out of earnings for additions and betterments was \$3,340,669; for the preceding year the amount was \$5,715,875, and for the year before it was \$7,647,743. This shows for these years declining contributions, but as a matter of fact the aggregate so applied for the three years is, as will be seen, over  $16\frac{1}{2}$  million dollars, or fully  $5\frac{1}{2}$  million dollars per annum. In 1912 the amount of the contribution was \$3,944,216; in 1911, \$4,826,755; in 1910, \$3,329,006, and in 1909 \$2,237,081.

Another distinctive feature in the policy of the Burlington & Quincy has been the large yearly contributions to the sinking funds. These have operated in the same way as the appropriations for additions and betterments, namely they have tended to keep capitalization low. From the present balance sheet it appears that alone in the eight years since 1907, when the Inter-State Commerce Commission imposed a new system of accounting upon the railroads, the additions to property through income have aggregated \$30,486,904. In the same period \$14,642,465 of funded debt has been retired through income. The two amounts together make over \$45,-000,000 and it is easy to see that at an interest rate of 5% per annum this represents a yearly saving of interest of \$2,250,000. It is probably not generally appreciated how light the capitalization of this property is. The capital stock of the company has undergone no change for a great many years and stands at \$110,839,100. The mileage of road operated on June 30 1915 was 9,366 miles, of which 358 miles was operated under lease, leaving 9,008 miles owned. Accordingly the stock averages only a little over \$12,000 per mile of road. The long-term debt at the same date aggregated \$181,690,000 which gives an indebtedness of a little over \$20,000 per mile of road owned. The total of stock and debt averages only a little in excess of \$32,000 per mile of road owned.

It is this light capitalization, made possible by the large yearly appropriations out of earnings for sinking funds and for additions and betterments to the physical property of the concern, that explain the ability to earn 8% dividends and carry forward a surplus on the year's operations (before the deduction of appropriations for additions, &c., and for sinking funds) equal to as much more. Such was the result of the late year's operations, the amount available above expenses and charges out of income having been \$19,041,919, or slightly better than the preceding year, while the call for the 8% dividends was only \$8,867,128. In addition, however, \$1,-753,007 had to be paid to the sinking funds and \$3,-340,669 was set aside for additions and betterments. Over and above these allowances there remained a balance of \$5,081,115, which was carried forward to the credit of profit and loss.

It is obvious that the policy pursued with so much success in the conduct of this property-and which was also pursued on many other railroad systems so long as an adequate margin remained above the requirements for expenses and charges-inures to the advantage of the public as well as of the railroad, inasmuch as capitalization is thereby kept low. Apart from this there are other considerations which have influenced the Burlington & Quincy management in adopting and adhering to the policy referred to. The late Darius Miller in the annual report for 1912 indicated some of these considerations, referring particularly to the fact that many improvements and additions which in no way increase earnings are demanded by the public. He instanced elevation of tracks through towns and cities, the elimination of grade crossings, both rail and highway, and new and more expensive passenger stations, as outlays belonging in that category. He declared it was unwise to pledge the credit of a company for non-revenue-producing improvements of this character because there is no compensation for the increase in fixed charges that would result from such new capital additions. Accordingly, a prudent regard for the welfare of the company, he insisted, requires that such expenditures should be provided as far as possible out of income. Obviously the public gets the benefit, since the company thereby avoids the necessity of earning increased amounts for interest and dividends.

Altogether the sums that have been put into the Burlington & Quincy property as a result of the conservative methods of management here indicated, represent an enormous aggregate. We have already noted that in the last eight years \$30,486,905 of additions to property have been made through income and that in the same period \$14,642,465 of funded debt has been retired through income. In addition there were on June 30 1915 \$22,108,871 of sinking fund reserves, \$3,740,856 of "appropriated surplus not specifically invested" and no less than \$97,879,653 standing to the credit of profit and loss, making a grand total of what is called corporate surplus of \$168,858,751.

Of course one other essential was needed to insure the good results disclosed-that is, the steady development of operating efficiency. Obviously the application of surplus income in the way indicated has been a great aid in the promotion and development of such efficiency. Progress has been particularly noteworthy in that regard since 1901, when the Burlington & Quincy came under the joint control of the Great Northern and the Northern Pacific, and Great Northern methods were initiated. In the year under review conditions were certainly not favorable for the further development of operating efficiency, since the volume of the tonnage was reduced and the proportions moving in opposite directions thereby disarranged. Yet we observe by the traffic statistics that there was nevertheless further addition to the train-load, which was increased from an average of 478 tons in 1914 to 491 tons in 1915. During the fourteen years from 1901 to 1915 the average train-load has been raised from 200 tons to 491 tons. As indicating what a saving this means it deserves to be pointed out that whereas in 1901 the freight trains were obliged to run 19,314,987 miles in order to move 3,871,337,916 tons of freight one mile, in 1915 the trains (including mixed train mileage) ran only 17,344,074 miles and moved no less than 8,527,444,254 tons of revenue freight one mile.

A feature of the comparison of operating results for the late year with those for the preceding year is that while there was substantial loss in gross earnings, this was attended by a reduction in expenses of even larger extent, leaving the net earnings for 1915 slightly better, as already stated, than they were for 1914. The loss in the gross earnings was \$2,562,081 and the reduction in expenses \$2,783,486. One element in the reduction in expenses was this increase in the train-load. There was some saving in the maintenance outlays-\$650,767 saving under maintenance of way and \$620,083 saving under maintenance of equipment-but the largest single item of reduction was in the transportation expenses, where the decrease reached \$1,107,360. The effects of the larger train-load and other economies are seen in

in train supplies and in reduced payments to enginemen and trainmen, because of the smaller aggregate of men required. In fuel for road locomotives there was a saving of \$299,754 and in fuel for yard locomotives a saving of \$80,383. The payments for road enginemen aggregated \$102,810 less, and for road trainmen \$80,436 less. Many other similar items might be mentioned registering decreases. There were also important decreases in the payments for loss and damage claims and for injuries to persons. In the one case the decrease was \$229,899 and in the other \$189,040.

The falling off in gross earnings was not large, considering the magnitude of the company's income, but it should be noted that it followed a small loss in the preceding year. It is not possible to state the precise amount of this loss for the preceding year, since the Inter-State Commerce Commission has made a change in the classification of the accounts, but on the old basis of classification the loss was \$1,-623,551. On the new basis the loss in 1915, we have seen, was \$2,662,081. The good crops acted to some extent as an offset to the loss in tonnage on account of business depression.

RAILROAD GROSS EARNINGS FOR OCTOBER.

Naturally, returns of railroad earnings now indicate improving results. Comparison is with very poor earnings a year ago and the conditions responsible for the slender earnings at that time have now in considerable measure passed away. The South was then in the slough of despond because of the complete collapse in the price of its main staple, cotton, but now has taken new hope with the re-establishment of a higher level of values and the certainty of a good demand for the staple, notwithstanding that owing to the exigencies of war the German and Austrian market is completely cut off.

Then, also, where a year ago business depression prevailed all over the United States we now have active trade revival which, though in the first instance having had its inception in munition contracts, has finally become diffused and extended so that it embraces even the trades and industries not directly stimulated by war orders. In Canada (we are dealing with our early or preliminary statement of gross earnings for the month in which we always include the large Canadian Railway systems)-the magnitude of the wheat crop raised in the Dominion, and the fact that it is being rapidly rushed to market, is swelling the traffic and the revenues of the Canadian roads in a striking fashion, enabling tremendous gains in gross earnings to be shown where previously there had been a long series of very heavy losses.

Altogether, from these and other similar causes there has been a wonderful transformation in the character of the returns of railway earnings. In this we have particular reference to the gross earnings, but in the case of the net the improvement is likely to be even more marked, since up to the present moment, influenced by the previous hard times, a rigid policy of retrenchment and economy has been pursued so that there is little probability of much augmentation in expenses at a moment when gross revenues are rapidly expanding.

reduction was in the transportation expenses, where the decrease reached \$1,107,360. The effects of the larger train-load and other economies are seen in many directions, but particularly in fuel economy,

there is no reason for thinking that the results for this mileage do not accurately reflect the showing for the railroad system as a whole. Stated in brief, on the 87,083 miles of road there is a gain of no less than \$10,806,253, or 14.95%, and out of the 44 roads there are only five that do not contribute to the gain, and show losses, while in only one instance is the loss of considerable amount. The improvement is gratifying, as indicating a recovery from the loss of the previous year and yet the fact should always be borne in mind that this improvement represents merely recovery-the retrieving of what was lost in 1914 and only partial retrievement at that. The truth of this assertion will appear when we say that in October 1914 our early compilation, comprising substantially the same roads as now represented, though with a little larger total mileage, registered a falling off of no less than \$14,270,984, or 15.82%.

As it happened, too, earnings in 1913 likewise had been poor or indifferent and in individual cases registered decreases to which the 1914 decreases were additional. Speaking of the roads collectively, our early statement in 1913 recorded an increase, but it was very small, amounting to only \$1,366,710, or but 1.57%, and more than the whole amount was contributed by the Canadian systems. In the years preceding, the comparisons were pretty favorable. In October 1912 our early statement recorded \$9,327,956 gain, or 12.30%; in October 1911 our preliminary statement showed \$3,656,352 increase, or 5.28%; in 1910, too, our early exhibit registered some improvement, the gain reaching \$1,840,328, or 2.14%. The year before-October 1909-the gain was of large proportions, being for the roads included in our early compilation \$7,479,391, or 11.76%. The increase then, however, followed in part from the circumstance that in October 1908 (succeeding the panic of the previous year) there had been a loss of \$2,678,874, or 3.95%. Prior to 1908 there was a continuous series of increases year by year back to 1896. The following table furnishes a summary of our early October totals from the last-mentioned year down to the present time.

Nots .- Neither the earnings of the Mexican roads nor the mining operations of the anthracite coal roads are included in this table.

gitized for FRASER p://fraser.stlouisfed.org/ [VOL. 101.

We have stated above that there was only one road which, the present year, shows a decrease for a considerable amount. That road is the Missouri Kansas & Texas, which has fallen behind \$228,933, but it is proper to state that last year in October the Missouri Kansas & Texas was one of the very few exceptions to the general rule and did not suffer a very large contraction in revenues. In extent of gain the Canadian Pacific and Canadian Northern overshadow all others, the amount in the one case being no less than \$4,159,000 and in the other \$1,100,200, these two systems having thus contributed almost half the total gain shown by our table. As for the railroads in the United States the increases come from all parts of the country and many of them are for large amounts, the Southern systems being particularly prominent among them. Where the results are so general it is not necessary to mention any particular road or company, but as a convenient summary we present the following, showing in our usual form all changes for the separate roads, whether increases or decreases, for amounts in excess of \$30,000.

a These figures are for three weeks only.

Current newspaper comment has conveyed the impression that grain had been coming to market tardily. As a matter of fact the receipts at the Western primary markets ran heavier than in October last year, when they were of prodigious dimensions. For the four weeks ending Oct. 30. wheat receipts this year were no less than 61,388,000 bushels, against only 46,404,000 in the corresponding four weeks of 1914 and but 28,936,000 bushels in the four weeks of 1913. The corn receipts were 12,637,000 bushels, against 10,041,000 and 11,-S11,000 respectively. The oats receipts fell a little below those of last year, being 27,387,000 bushels, against 30,436,000 bushels, but comparing with 18,536,000 bushels in 1913. The barley receipts were 13,774,000 bushels, against 11,482,000 and 12,644,000 bushels, while the rye receipts were 3,-326,000, against 3,019,000 and 1,647,000 bushels. Combining the five cereals, the aggregate of the grain receipts for the four weeks of 1915 is found to have been 118,512,000 bushels, against 101,382,000 bushels in 1914 and only 73,574,000 bushels in 1913. In the following we give the details of the Western grain movement in our usual form :

#### PAUL M. WARBURG ON SOME PROBLEMS OF THE FEDERAL RESERVE BANKING SYSTEM.

The remarks of Paul M. Warburg on the Federal Reserve System which were a feature of the gathering in Minneapolis last month of the Governors of the Federal Reserve banks have been printed in pamphlet form. Some extracts from the address were given in our issue of Oct. 30, but it seems desirable to present Mr. Warburg's thoughts in connected form, and accordingly we reproduce here the whole of the speech except the opening paragraphs:

speech except the opening paragraphs: Like Lucultus in Cyrene, the advent of the Federal Reserve system came at a time of acute adversity. Its operation, however, had so excellent an effect and the resulting changes were developed with such speed that many are now forgetful of its benefits. When, some months ago, we were near the brink of a most serious international complication, few people stopped to consider the fact that we were not then subjected, through fear of pank, to any convulsions, such as we should inevitably have experienced before the establishment of the Federal Reserve banks. I shall not thre you by enumerating the benefits of the system. I believe that those who think already know them; while those who do not think will learn to know them from actual experience. That will be conspicuously the case when excess reserves are next reduced and when higher rates for money again prevail.

excess reserves are next reduced and when higher rates for money again prevail. I could wish, for many reasons, that it might have been possible to open the Federal Reserve banks before the war began and that they might have furnished the about \$350,000,000 of notes that were issued under the Aldrich-Vreeland Act, as amended by the Federal Reserve Act. The func-tions of Federal Reserve banks in general and our present policy would then be better understood and there would be less talk about our earning capacity and the necessity of preserving the prestige of our Federal Reserve banks by earning dividends. Had the Federal Reserve banks been in operation when the war began and had they issued all the currency required last autumn, the rediscounts underlying these notes, at 5% interest, would have produced a return of about \$4,500,000, or about the sum required to cover running expenses and dividends of all Federal Reserve banks for a year. If the Federal Reserve banks had put out this circulation and secured this return, would any one suggest at this time that our banks should now make efforts to employ their money? Would not every one agree that this present period of excessive ease of money was the proper moment for the Reserve banks to withdraw their reserve money from active employ-ment? Earning capacity must never be considered the test of the efficience of the steries of the efficience of

Personally I should have felt heartily ashaned<br/>had all our banks, considering the circumstances under which they began<br/>operations, earned their dividends in the past year. Such an earning with<br/>all ti implied, would have been a proof that they had completely misunder-<br/>stood their proper functions and obligations. It must be conceded, how<br/>ever, that only men who have been trained in banking or who have given<br/>close south Pac.<br/>1,435,6461.915.1914.1912.1911.1010.Colober.1915.1914.1912.1911.1010.5.007,9082.236,4731.632,436Colober.1915.1914.1912.1911.1010.5.007,9082.630,5842.485,4782.193,0502.284,487Colo & South.1.435,6461.391,6051.273,1791.528,3491.382,2951.632,436Denv & Rio Gr2.337,2002.301,9002.530,5842.485,4782.193,0502.284,487Denv & Rio Gr1.235,6601.286,6883.664,2373.648,8836.643,2473.748,488Total1.220,0001.285,6801.286,683

should properly be withdrawn or held idle. Unless in times of great ease of money Federal Reserve banks withdraw the bulk of their money from actual employment, they can not possibly be prepared to have their funds available at the turn of the tide when their beneficial power s should make themselves felt.

<text><text><text><text><text> abuse their vast resources for inflation of credit or for the purpose of ag-greenlyely competing with the member banks, the full growth of the sys-tem, and with that the full growth of American banking, can not be developed.

I bolisve that I may say with confidence that both the Federal Reserve banks and the Federal Reserve Board are fully alive to the duty and re-sponsibility that rest upon them in this respect and that they will do their share of the work as they irust not only the member banks but those not now members will do theirs.

share of the work as they trust not only the member backs but those not now members will do theirs. Belleving in the backers' sense of public duty and animated by the motive of creating the broadest possible foundation for the development of a strong and united backing system inithe[United]States, the Board has gone to the utmost limits of liberality in determining conditions for the admission of State institutions. In order to achieve this alm, it found itself in the diffi-conditions which, in certain respects, give them a distinct advantage over national bank members. It is the[hope]and[aim of the Board to see the powers of national banks liberalized; still, for the time being, it remains a fact that State institutions entering our system are at an advantage. Such of them as are strong and conservative may come in practically with all the powers now enjoyed by them [and, in addition, may leave the system if they do not like it. Still they hesitate. As Lacellus said, "In times of prosperity it is hard to legislate," and Walter Bagehos, the British econo-miss, expresses, the same thought in slightly more modern language when he says: "Political economy is only an absorbing topic whom a mation is, mancially and indescrially, uncary." The mask those of the State institutions, that are proud of their indepen-dent standing: Is it quite fair to let your neighbors pay for the expense of heading the is of the general protection, and when, as a matter of face, you enjoy-overy day the advantage of the greater security provided by your neigh-bors? Let me tell them, at the same(time, that insurance companies are generally willing to take risks] salitions can be state banks in conse-generally willing to take risks[awhite]capplicants are young and conditions or the establishement[of the]Pederal Reserve system in the second of the establishement[of the]Pederal Reserve system in the develop-tion of the establishement[of the]Pederal Reserve system in the develop-tion of the establishement[of the]Pederal Reserve system

The thought is often expressed that "at the time of the next crisis the State banks will all come in," I think it may be safe to say that they will find that many will then come in after the next period of anxiety. This is

not meant as a threat, but I am afraid it will be a physical impossibility to take them all in during such a period of stress. Examinations take time, and many State banks will not look as strong during a critical period as they may look to day. Moreover, the Federal Reserve banks will find it difficult, in fairness to their own members, then to burden themselves with banks that might add an element of weakness, remembering that in times of sunshine and peace such institutions had refused to contribute their share to the work of protecting the entire community.

And now permit me to relate to you one last reminiscence from ancient history. Aristotle, in defining the elements of liberty, gives us this defi-nition: "One element of liberty is to govern and in turn to be governed. The other is, to live according to one's inclinations." I do not think that The other is, to live according to one's inclinations," I do not think that any modern writer has ever given a more interesting or a more original defi-nition of liberty. Liberty without restriction is anarchy; submission to restriction arbitrarily imposed produces a slavish surrender of human rights. Between the two lies true liberty, which means the exercise of our own free will and powers within the limitations which, for the protec-

our own free will and powers within the limitations which, for the protec-tion of our liberty, we have agreed to impose and enforce amongst ourselves. Our Federal Reserve system is to be considered from this point of view. For your own safety and liberty you have created this law and created the necessary organization for its enforcement. You have elected your government and appointed your directors and officers. Do not think now of these administrative organs as something imposed upon you by others, but only as something of your own creation. This system, permitting you "to govern and in turn to be governed," as Aristotic puts it, is an expression and a safeguard of liberty. You create your own traffic laws and clothe the traffic policeman with anthority. As long as we obey the law, we consider him a means of pro-tection and we resent him as a restraining influence only when we exceed the speed limit. While the Federal Reserve system is in its early stages, there must of necessity be a great deal of regulatory work. But I sincerely hope that the writing of regulations will soon become an occasional or inci-dental function of the Federal Reserve Board and that traffic rules in bank-ing will have become no more unusual or irritating than the raising of the

ing will have become no more unusual or irritating than the raising of the hand of the traffic policeman.

As for myself, I am not in accord with the school of thought that believes As for myself, I am not in accord with the school of thought that believes that law and government's sole function is to regulate. I believe that the function, of government is not only to regulate but to construct, and I believe that I am expressing the feelings of my colleagues of the Federal Reserve Board and of the men in charge of the Federal Reserve banks when I soly that we are looking forward to the time when all our energies may he applied, not to regulation, but to helpful co-operation in the genera work of construction.

#### GAINS AND LOSSES IN THE FOREIGN TRADE.

The continued unprecedented expansion in the foreign trade of the United States is shown in the analysis for September compiled by the Bureau of Foreign and Domestic Commerce, Department of Commerce. The exports for the month amounted to \$300,676,822, as compared with \$156,-052,333 for September 1914. For the nine months ended September 1915, the exports total \$2,532,485,167, against \$1,467,401,989 in the corresponding period last year.

The growth in exports to the United Kingdom continues to be a marked feature of the returns, the exports having risen from \$42,742,895 in September 1914 to \$95,758,600 in September 1915. The shipments to Italy also have increased in a noteworthy degree, having advanced from \$4,322,029 in September 1914 to \$33,572,356 in the same month this year; the exports to France have increased from \$19,008,510 to \$35,822,785, and to Russia from \$207,543 to \$14,684,382. In the case of Germany, where the exports before the war (in June 1914) reached \$16,678,846, the shipments in September were but \$96,797 this year and \$2,378 last year. The exports to Austria-Hungary were only \$60,167; in June 1914 our exports there aggregated \$1,438,221. In the comparison of the nine months ending with September for the two years under review, the exports to the United Kingdom are shown to have risen from \$374,282,472 to \$849,849,145; to Italy from \$43,618,282 to \$183,723,804; to France from \$94,616,-314 to \$369,230,908; to Norway from \$8,682,570 to \$32,-541,379; to Sweden from \$9,673,809 to \$66,462,650; to Russia from \$17,181,627 to \$73,334,467; to the Netherlands from \$77,246,860 to \$116,738,635. The exports to Germany in the nine months ending September 1915 were but \$11,785,-307 as compared with \$156,041,307 for the corresponding period in 1914.

In the case of imports from Germany there has likewise been a falling off; while the total reached \$122,620,200 during the nine months ending September 1914, for the same period in 1915 they amounted to but \$38,209,283. Imports from Belgium have fallen from \$29,104,309 to \$1,901,021; the imports from Austria-Hungary in the current nine months were but \$4,670,559, against \$12,921,797 last year; from the Netherlands, \$19,966,186 as compared with \$29,553,108; from France, \$53,214,054 against \$83,127,345; and from Russia \$1,630,506 against \$12,234,127 recorded last year. There is also a shrinkage in the imports from the United Kingdom, the figures for the nine months last year having been \$226,749,071 as compared with \$181,573,698 this year. For the month of September the imports from the United Kingdom were but \$19,835,850 as compared with \$32,040,275 in 1914. So far as increases in imports are concerned, the most marked are those of Brazil, the imports from that country in September this year being \$10,873,247 against \$5,553,882 in September 1914. The September fig-

#### THE CHRONICLE

ures of imports from China have advanced from \$2,763,586 to \$5,588,860, and from British India from \$2,863,712 to \$4,832,307. The table of imports and exports as compiled by the Bureau of Foreign and Domestic Commerce of the Department of Commerce is as follows:

#### ARRANGEMENTS FOR RETIREMENT OF FOREIGN CURRENCY IN CUBA.

A shipment of French gold amounting to 1,250,000 francs was received by the Irving National Bank of this city on the 9th inst. from its correspondent, the Banco Espanol de la Isla de Cuba, Havana. According to David H. G. Penny, Vice-President of the Irving National, in charge of the foreign department, the shipment is received in furtherance of the retirement of foreign gold as a medium of circulation in Cuba. It is estimated that the total amount of foreign money in circulation in Cuba is \$40,000,000 to \$50,000,000 in Spanish and French gold and \$25,000,000 to \$30,000,000 in Spanish silver. All the gold will probably be shipped to the United States and the silver to Spain. A few months ago the Cuban banks were endeavoring to

THE CHRONICLE

import French and Spanish gold pieces at a cost of 20c. per franc or peseta, owing to the peculiar money conditions existing in Cuba at that time. For many years merchants in Cuba were under the necessity of doing business with two currencies and to carry separate bank accounts in Spanish gold and in United States currency. Practically all the business of the island, except on the extreme eastern end, and all dealings with the Government were on the basis of Spanish gold and silver. Last August a Presidential decree was issued forbidding the importation of silver coins excepting United States and Cuban. This was followed by another decree fixing Dec. 1 1915 as the date from which all transactions must be handled in dollars. This adjustment of currency will require large shipments of American currency to Cuba to replace the coin now being exported.

PAYMENTS ON THE THIRD GERMAN WAR LOAN.

The cash payments on the third German war loan up to the 6th inst. were reported as aggregating 9,415,700,000 marks (\$2,333,925,000), or 77.8% of the total subscription, in a wireless message from the Overseas News Agency on the 9th inst. The American Association of Commerce and Trade, in its "Weekly Report on General Conditions in Germany," gave certain details in its issue of Oct. 9 regarding the new loan, saying:

The final result of the third German War Loan has reached a subscription of 12,101 million marks, equal to \$2,880,038,000. The following table indicates the amounts subscribed at the different subscription offices, compared with the first and second war loans. This table does not contain subscriptions received from soldiers in the field.

	Third	Second	First
Where Signed-	War Loan.	War Loan.	War Loan.
At the Reichabank	\$135,422,000	\$134,470,000	\$114,002,000
At Bankers and Banks	1,826,888,000	1,348,032,000	689,010,000

At Life Insur. Companies	99,246,000	91,392,000	48,314,000
At Credit Associations	161,840,000	86,204,000	
At Post Offices	39,746,000	26,656,000	
Total	\$2,880,038,000	\$2,156,518,000	\$1,061,480,000

HAITIAN SENATE RATIFIES TREATY WITH UNITED STATES.

Advices from Washington dated yesterday, Nov. 12, state that the Haitian Senate by a vote of 26 to 7 ratified the new treaty with the United States. The Chamber of Deputies has already ratified the treaty, as reported in the "Chronicle" of Oct. 9, page 1149.

#### SCIENTIFIC STUDY OF TARIFF BY PERMANENT COMMISSION URGED BY E. P. RIPLEY.

The creation by Congress of a permanent non-partisan Tariff Commission, with broad powers for investigation, research, investigation of tariff complaints, and with permission to make recommendations to Congress at any time, is advocated by E. P. Ripley, President of the Atchison Topeka & Santa Fe Ry. Mr. Ripley points out that at the war's end, notwithstanding that the conflict is far removed from us, we will have to readjust ourselves to the new conditions, and in the international readjustment the tariff looms forth as the principal factor. His ideas on the subject of a commission to deal with the question are set out in the following statement issued at his Chicago office on Oct. 29:

statement issued at his Chicago office on Oct. 29: Every well-informed and houghtful man must realize that the country is facing a very critical situation, and that there are a number of exceed-ingly important questions that should be disposed of and these should be given consideration immediately. One of the most important is the preparation to meet the great industrial changes that will follow the great war in Europe. As long as the war orders pour in and there is money to pay the bills, we will get along without much trouble, but when the millions of men now under arms cease to be consumers and become producers, and the waste of war must be made good, the world will be called upon to read-just itself to an entirely new condition, the elements of which we can not clearly foresee. Notwithstanding this conflict rages beyond the sea, we will have to readjust ourselves to the new conditions, and in the interna-tional adjustment the principal factor is the tariff. The method, or lack of method, in dealing with this exceedingly important question has been absolutely unworthy of American citizenship. No tariff has been satis-factory or has lasted long, nor will one ever prove satisfactory until the en-tors that should be considered. Tariff-making has gone by favor; the schedules have been made on little or no reliable information, much misinformation and juggling. The tariff is saturated with politics. The question of the hour is: "Shall we take poli-tics out of the tariff and put it upon a scientific connole bass, where it properly belongs." The only hope for doing this, so far as the write is able to see, is a strictly non-partian Tariff Commission of the highest per-sonnel, with a life tenure of office or one extending over at least eight or ten years, in which the principal industries of the country are represented and a 'uil and scientific investigation shall be made in the hope of develop-

sonnel, with a life tenure of office or one extending over at least eight or ten years, in which the principal industries of the country are represented and a full and scientific investigation shall be made in the hope of develop-ing an American system in which the interests of all the people and all lines of business will be fully and fairly considered. It is physically impossible for the members of a committee of Congress, with the constantly increasing demands made upon their time, to either make the necessary investigation or to give that full and careful consideration that the subject demands. Hence the logical situation is that all matters relating to the gathering of in-

[VOL. 101.

formation, classifying and reducing it to a concrete, definite proposition, should be done by a commission that will be constantly in session and charged with no other duty. The writer does not believe that it is business-like or practicable to add the duties of a tariff commission to any existing like or practicable to add the duties of a tariff commission to any existing body charged with the consideration of other subjects. No leading country of the world has handled her tariff matters so badly as we have done, and we have reached the time in national experience when the enormous waste, due to juggling the tariff, should cease, and sane, business-like methods should obtain. Hence, one of the first duties of Congress from the writer's viewpoint is to create a permanent non-partisan Tariff Commission, giving it broad powers for investigation, research, investigation of tariff complaints and with permission to make recommendations to Congress at any time. There seems to be no other way to accomplish the end sought. Hence the importance of the propaganda started by the Tariff Commission League to arouse and crystallize public sentiment that shall demand of Congress the necessary legislation.

#### JOHN W. WEEKS ON RESTRICTIVE LEGISLATION.

Further criticism of the tendency toward restrictive legislation and Governmental interference with business was contained in an address delivered by John W. Weeks of Massachusetts at the banquet of the Railway Development Association held in connection with the organization's semiannual meeting in this city the present week. During the course of his speech Mr. Weeks alluded to the Inter-State Commerce Commission and declared that as a result of its creation and the enactment of laws by Congress to aid its administration the railroad system of the United States has been brought to its present "verge of bankruptey." While he did not seek to deny that the Commission had aided in the elimination of many evil and objectionable practices during the period from 1880 to 1905, he endeavored to show that the country and business interests were nevertheless suffering from excessive regulation. On this point Mr. Weeks said:

I have no desire to defend the practices of some men connected with railroads during the period from 1880 to 1905, nor do I think it is fair to condemn all men who were engaged in that occupation, or even any concondemn all men who were engaged in that occupation, or even any con-siderable number of them; but that certain evils existed which should have been corrected is now universally acknowledged, and through the operations of the Inter-State Commerce Commission and the laws which have been passed relating to its work very largely this object has been accomplished. But even the operations of the expert commission like this are not entirely advantageous, and as a result of its operations and the laws which have been passed by Congress, the railroad system of the United States is to-day on the verge of bankruptcy. The cost of operation has been constantly increasing in recent years without any corresponding increase in the gross earnings. Rates, substantially speaking, are controlled by the Inter-State Commerce Commission and State commissions, while there is no limitation on the cost of operation and, unless something is done to main-tain such a difference between operating expenses and railway revenues

State Commission and state scannessions, while into its or main-tain such a difference between operation and, unless something is done to main-tain such a difference between operating expenses and rallway revenues there must soon ensue a total collapse of the capacity of the rallroads to furnish adequate transportation facilities. If we have results of that kind from a trained commission like the Inter-State Commission which has been recently appointed? I ought to say, I think, that it is a credit to this Commission that it seems to be disposed to move slowly and not take action until it has made reasonable investigation; in fact, up to this time it has not been active in any of the duties for which it was authorized, but has been devoting its attention to matters relating to foreign trade. Yet, this Commission has prety nearly unlimited power over three hundred thousand corporations in having to determine what are unfair methods of competition. Undoubtedly the courts have pretty well determined what unfair competition is; but when the word "methods" is inserted it greatly complicates the situation and no one has ever attempted to define what unfair methods of competition may be. As an instance of the sort of legislation which does not

As an instance of the sort of legislation which does not bring any benefit to any one, although serving to increase greatly the expenses of the public Treasury, Mr. Weeks pointed to the physical valuation of the railroads conducted under the auspices of a Federal Commissioner. The postal department's deficit of \$40,000,000 was cited by Mr. Weeks as "an example of serious mistakes made by the Government in going into business which should be conducted under private auspices."

W. S. Kies, Vice-President of the National City Bank of New York, was also a speaker at the meeting of the Railway Development Association. Mr. Kies discussed the opportunities for developing our foreign commerce, his remarks being along the lines of the address delivered by him in September before the students of the Northwestern University School of Commerce in Chicago and quoted at length in our issue of Oct. 2.

#### GUARANTY TRUST COMPANY APPOINTED REGIS-TRAR OF ANGLO-FRENCH LOAN.

The Guaranty Trust Co. of New York has been appointed by the Anglo-French Commission as registrar of the \$500,-000,000 Five-Year 5% external loan of the United Kingdoms of Great Britain and Ireland and the Republic of France. In the capacity of registrar the Guaranty Trust Co. will exchange engraved definitive bonds, as soon as they are ready, for the interim bonds now in process of issue. These bonds will be issued in fully registered and coupon form and will be interchangeable. The coupon bonds will

be issued in denominations of \$100, \$500 and \$1,000, which may be registered as to principal, and the fully registered bonds in denominations of \$1,000, \$10,000 and \$50,000 and authorized multiples.

## HIGHER RATES ON JAPANESE GOLD SHIPMENTS TO PROHIBIT EXPORTATION TO U. S.

According to the New York "Commercial" of the 4th the Japanese steamship companies, in order to prevent the further exportation of gold from Japan to the United States, have increased their freight rates on the metal so as to make exportations of it to this country prohibitive. The rate is now 5% as compared with a previous and normal rate of around 3% of 1%. The "Commercial" says

rate of around  $\frac{3}{5}$  of  $1\frac{10}{0}$ . The "Commercial" says: It is extremely easy for Japan to put what amounts virtually to an embargo on gold exports to this country, owing to the fact that Japanese steamships are about the only ones operating between the United States and Japan, now that the Pacific Mail Co. has gone out of business. Here-tofore Japan was unable to control her gold export movement to the United States in this manner. The gold production of Japan for 1912 amounted only to \$4,467,000. During the present year Japan has exported between \$15,000,000 and \$20,000,000 gold to this country.

#### PROCEEDINGS IN SOUTH DAKOTA ATTACKING RE-QUIREMENTS AFFECTING RESERVE.

Arguments have been made before Judge Jones in Sioux Falls, S. D., in the proceedings instituted by the four national banks of that city against the State Banking Depart-The banks seek to have the Department permanently ment. enjoined from enforcing an order requiring all State banks to deposit at least 50 % of their legal reserve deposits with State institutions in depositary cities designated by the Department. Judge Jones has taken the case under advisement. The order was to have taken effect on the 15th inst., but pending a decision by Judge Jones, the Banking Department is restrained from enforcing it. The banks which started the proceedings are the Minnehaha National Bank, the Security National Bank, the Sioux Falls National Bank and the Scandinavian-American National Bank, all of Sioux Falls. The effect of the order of the Banking Department, the bankers contend, will be to force the State banks to withdraw their deposits from the national banks within the State and from both State and national banks outside of South Dakota, and place them in the State banks designated by the public examiner of South Dakota as legal reserve State banks.

#### CALIFORNIA SUPERINTENDENT ON LAW RFFECT-ING SAVINGS ACCOUNTS OF NATIONAL BANKS.

In his annual report issued on Oct. 30 W. R. Williams, Superintendent of Banks of California, takes occasion to note that the national banks of the State thus far addressed relative to the State law regarding the advertising of savings accounts "have expressed their intention to obey the law of this State." It will be recalled that a provision in the California Bank Act stipulating that "no banking association shall advertise savings or in any way solicit or receive deposits in the manner of a savings bank unless it is chartered as a savings bank under the California law," brought forth an opinion from M. C. Elliott, counsel for the Federal Reserve Board, that since the Reserve Act empowers them to receive savings accounts the right to advertise for such accounts would seem to be a necessary incident to its exercise. In his reference to the matter in his annual report Superintendent Williams says :

In his reference to the matter in his annulat report Super-intendent Williams says: When the Federal Reserve Board save authority to national banks in this State to advertise for and accept "savings accounts," I deemed it my immediate duty to protest and to inform the Federal authorities as well as all national banks which assumed to offend against our law in this reference that I would prosecute to the full extent of State law all violations of the statute that prohibits such advertisement. The first principle of safety established for Californian savings de-posits is that they shall not be subjected to the hazards of commercial banking. National banks can give no such protection. Federal officials admit that national banks cannot safeguard savings deposits with re-stricted, conservative investments free from the dangers that necessarily accompany commercial risks. "Savings accounts" in national banks must share with commercial deposits the uncertainties of credit conditions, and I shall seek full compliance with our law. A. A. de Ligne, the attorney for this department, has stated our position in a very well considered brief, and it is my purpose to resist a deception upon the people of the State which possesses potentialities for the greatest harm. National banks cannot accept savings deposits in any sense which will protect these deposits against the exigencies of commerce or the crises that occur in credit, and it is dangerous to the public to permit banks that cannot assure safety to savings deposits to solicit for "savings accounts," I am pleased to report, however, that national banks due to subject have expressed their intention to obey the law of this State. In a circular issued some months ago Governor Kains

In a circular issued some months ago Governor Kains of the San Francisco Federal Reserve Bank, pointed out that it was desirable "that member banks limit such adver-

tisement to the exact wording of the statute, so that no reasonable complaint may lie against them for giving to the public the impression that the savings accounts authorized under the Federal Reserve Act are to be segregated and invested differently from other funds of the bank." "Advertisements," Mr. Kains said, "might be to the effect that a bank is authorized to accept interest-bearing time deposits, including 'savings accounts', and invest the same subject to the National Bank Act and the Federal Reserve Act.

#### GERMANY'S ABILITY TO FINANCE WAR-NEBRASKA BANKERS WOULD AMEND RESERVE ACT.

The declaration that "Germany and Austria can stand the strain of financing the war longer than the other nations combined" was made by John J. Arnold, Vice-President of the First National Bank of Chicago, at the annual meeting of the Nebraska Bankers' Association on Oct. 28. In his remarks, submitted under the head of "The Economic Aspects of the War," Mr. Arnold said: "The ancient Greeks had no medium of exchange, but traded only by the exchange of products. Germany and Austria in effect are doing that very thing just now. They are not exporting and are not importing. They are keeping their money at home and are trading with one another. The profits will stay at home. The savings accounts will increase. Wages will increase there; but the very opposite is true in the countries of the Allies." Concerning the extension of loans to the warring nations Mr. Arnold expressed the belief that we should extend loans for construction and not for destruction. We as a nation should be busy extending credit in South America and the Orient and helping them to develop." He added: "There has been talk of inflation on account of the influx of gold. I am not afraid of that. On the other hand, we ought to husband our gold so when the war is over we can extend credit to do the rebuilding."

A resolution adopted at the meeting recommended to the Senators and Congressmen from Nebraska that the Federal Reserve Act be so amended that the National bank examiners may be placed under direct supervision and control of the management in each Federal Reserve district. State legislation enabling the banks of Nebraska to act as executors of estates was urged at the meeting by W. A. Taylor, Vice-Prosident of the First National Bank of Hastings. Discussing rural credits, the retiring President of the Association, J. C. McNish of Omaha, said:

President of the Association, J. C. McNish of Omaha, said: We should have a rural credit system applicable to American needs. One plan contemplates the extending of our building and loan association laws to admit of making long-time loans on good farm lands under the amortization plan. The States, and not Congress, should devise a rural credit system. The danger and folly of taxing the property of citizens in the town, State and nation by sale of bonds to raise funds to lend Tom, Dick and Harry should be apparent. The field of rural credits should be properly occupied by private corporations operating under State laws for the important reason that a Federal statute must of necessity be too broad to meet the localized conditions of the several States.

#### HOWARD ELLIOTT ON EFFECT ON TRANSPORTATION BUSINESS OF REPRESSIVE POLICY

The repressive and depressing policy toward the transportation business during the last ten years tending toward the stunting of its growth was referred to in an address delivered on Wednesday night by Howard Elliott, President of the New York New Haven & Hartford RR. at the banquet of the Railway Development Association held at the

quet of the Rahway Development Association held at the Hotel McAlpin. Mr. Elliott in part said : The development work to-day in which you and all others in the United States are interested is being halted because the plants of the railroads cannot produce enough transportation for the needs of the people. The same thing is true of many other manufacturing and industrial plants, and, at times, it is true about our farms. In those cases, however, the months does not condemn the manufacturing and industrial plants. same thing is true of many other manufacturing and industrial plants, and, at times, it is true about our farms. In those cases, however, the country does not condemn the manufacturer and the farmer, but its policy has been to help them in many ways so that they may increase their plants and increase their productivity. Unfortunately, the same policy has not been pursued toward the transportation business, and now these plants, as I have already stated, are not large enough to manufacture day by day that safe and adequate transportation that is so necessary for all other forms of business. Precious time has been lost in the last ten years in preparing for the next great uplift in business, and it does little good now to try to fix the blame upon anyone. Rallroad owners and ralfroad managers have made errors, but unfortunately these errors have been magnified by those who either cannot or do not see that the repres-sive and depressing policy of the last ten years towards the transportation business could have but one effect in the long run, namely that of stunting its growth. Some of us in the business have tried hard to make this clear, and we have been called calamity howlers and pessinists. Instead, what we were trying to do was to have a reasonable margin in the transportation business so that plants could be added to constantly and be ready to serve the people when the peak load came. The load upon the transporta-tion business has been very heavy and raliroad owners and managers have tried hard to carry it. They are in the position of trying to serve 100,000.serve the people when the peak load came. The load upon the transporta-tion business has been very heavy and railroad owners and managers have tried hard to carry it. They are in the position of trying to serve 100,000,-000 people, to treat fairly nearly 2,000,000 employees, to respond to the conflicting rules, regulations and demands of 4S sovereign States and to pay close attention and obedience to the nation, acting through Congress and the inter-State Commerce Commission. Meantime, the country

has been growing, and the result has been a diversion of the energy of the owners and managers into channels that were not productive for the country as a whole, and the railroads have not been able to do the best they could to prepare for an increasing volume of business. So, to-day the country is face to face with inadequate facilities, and there should be good temper and co-operation by all to do the work needed to bring the transportation plants up to the present demands and to have a safe margin for future demands.

Speaking of the important functions of a railway development association, Mr. Elliott pointed out that one part of its work dealt with immigration, since without people, and the right kind of people, we cannot have development at all. "In this country," he noted, "we have many kinds of people from many lands, but, just now, one thing that is of vital importance is for each one of us to do our part in proving that there is only one real, loyal citizen, and he is an 'American.' 'Hyppens' no longer can be counted, and there cannot be French-Americans, Italian-Americans, Irish-Americans, German-Americans, English-Americans, but only 'Americans' for America African-Americans, Until that principle is definitely settled we cannot do all that we should in making the United States the greatest nation in the history of the world."

#### THEODORE H. PRICE ON FINANCIAL PROCESSES IN-CIDENT TO DISTRIBUTION OF COMMODITIES.

Discussing "The Financial Processes Incident to the Dis-tribution of American Commodities," Theodore H. Price, in an address before the New York Chapter of the American Institute of Banking on the 3d inst., divided his subject into several heads, dealing briefly with each subdivision and treating first of the various steps of distribution through which our agricultural commodities pass in their progress from the producer to the ultimate consumer. In his illustrations Mr. Price sought to make it plain that "the middleman is indispensable and that he is likely to continue a part of our necessary commercial organization, despite the theories of those who talk about bringing the producer and consumer together." Continuing, Mr. Price in part spoke as follows:

It is true that each intermediary has to be paid for the work he does, but he performs a necessary service and is entitled to his remuneration for it. The problem of intelligent commerce is to so reduce his hazards that the middleman will not be forced to exact a profit that will unduly enhance the cost of the goods to the ultimate consumer. By promoting the mobility of credit and the fluidity of exchange, the intelligent banker can make a very subtantial contribution toward the solution of this problem. I need very substantial contribution toward the solution of this problem. I need not go into details, for you who are here realize better than I can tell you how the merchant may avoid losses by deliberation in selling and through

hot go into details, for you who are here realize better than t can tell you how the merchant may avoid losses by deilberation in selling and through the ability to realize promptly by drafts against his sales once they are made. The machinery which provides credit against warehouse receipts or evi-dences, of ownership and reimbursement against bills of lading is more highly developed in the United States than in any other country in the world, and the case with which this machinery functions enables us to trans-act an internal commerce that is estimated at one hundred and twenty hillion dollars a year, with far less fuss and friction than that which is in-cidental to an export and import trade that, even for thus, our banner year, will not exceed six billion dollars in the aggregate. The aggregate value of the agricultural production of the United States in its crude form is estimated at about eleven billion dollars for the current year. In its manufactured form it is probably worth three or four itmes this sum, and the problem of financing the distribution of this enormous commerce has led many backers to consider whether it is wise to insist that documents shall always accompany drafts which represent the pro-ceeds of merchandise, or content themselves with the unsecured obligation of the drawer and allow him to reimburse himself, by clean drafts to which the documented bills is, therefore, the next subdivision of my subject

the documents are unattached. The question of documentary exchange versus undocumented bills is, therefore, the next subdivision of my subject to which I shall address myself. In England, as you well know, nearly all business is conducted upon long credits, and the English bankers for the most part rely upon the credit of their customers rather than evidential documents which attest the existence of the property in which they are supposed to be dealing. This may be well enough for England, where credit. Is perhaps more stable than in Amer-ica, but I have no hesization in expressing the opinion that under the con-ditions which prevail in the United States there is no hardship and great advantage in competing every drawer of a bill of exchange to substantiate the existence of the property against which such exchange is drawn by at-taching to it the documents which represent that property. If unsecured credit is allowed, it ought to be granted locally by the bankers who know the man with whom they are dealing, and have opportunity to verify his statements as to the property or assets which should be the basis of that credit.

The case and promptivade with which through bills of Inding can be ob-tained in the United States make it entirely practicable for every merchant to furnish documents for the shipments against which his exchange should be drawn, and the moment he is allowed to do otherwise the door of temptation is open to him.

Then next subdivision of my subject is the use of the acceptance in fa-cilitating the distribution of American commodities and the importation of foreign goods that are consumed in this country. I do not know that I can say anything new in regard to this phase of my subject. Such men as Mr. Harding of the Federal Reserve Board, and Mr. Eidridge, Vice-Presi-dent of the National City Bank, are outspoken in their advocacy of the accutance. I outling a such as with them and I regerst that it has thus for

dent of the National City Bank, are outspoken in their advocacy of the ac-ceptance. I entirely agree with them and I regret that it has thus far proved so difficult to induce our American merchants to use the acceptance rather than the promissory note as a credit instrument. The advantages of the acceptance are self-evident. Like the connecting pipe between two widely separated reservoirs, it would serve, if generally used, to maintain interest rate at the same level throughout the country. The fact that it would do this is probably one reason why so many of our interior bankers, who have hitherto been able to borrow money at a low rate in the reserve centers and lend it out at high a rate to their home bor-rowers, are opposed to educatia their merchants to avail themselves of it.

itized for FRASER o://fraser.stlouisfed.org/ The influx of gold and the development of the Federal Reserve system seem to make any stringency in the money market improbable for a long time to come, and I fear that the general use of the acceptance will only come when our interior bankers some day find their resources insufficient to give their local customers the credit they are entitled to. I read the other day that some banks in Kansas were compelled to de-

Tread the other day that some banks in Kansas were composed to de-cline deposits because of a State law which limits their deposits to ten timea the amount of their capital and surplus. Under such conditions any de-vice which tends to reduce or equalize the cost of credit is likely to be op-posed by the local money lenders. I am, however, hopeful that some time in the future the compulsion of circumstances will make the use of the ac-ceptance obligatory, and once the American business man becomes familiar with the dwartness. I am provide that her will not reduce the some day with its advantages, I am convinced that he will not willingly surrender

with its advantages, I am convinced that he will not willingly surrender them. The last subdivision of my subject is the present financial eminence of America, and especially of New York, and its bearing upon the distribution of not only the commodities which are produced in the United States, but of the world's production of the things which society requires. The pres-ent accumulation of money in New York and the destruction of wealth caused by the war in Europe have led many to cherish the hope that the metropolis of the Western Hemisphere is destined to become and continue to be the clearing house and financial center of the world. \* \* \* I confess I do not share this vision. I have been too long in business not to realize that commercial and financial relationships are established only by years of intercourse and the confidence thereby inspired. Despite the political decline of Holland, Amsterdam remained for many years the financial center of the confidence which years of intercourse had inspired. Even if the present war should be a draw, or England should be defeated, London would. I think, for many years con-tinue to dominate the world's exchanges and provide a clearing house for international commerce. I hope and I believe that the financial importance of the United States will be immensely increased as a result of the war, but I do not think that it will be practicable for us to wrest away from Eng-and the financial dominion she has exercised for so many years. We must be content to grow gradually. The financial dominion she has exercised for so many years. We must be content to grow gradually.

and the financial dominion she has exercised for so many years. We must be content to grow gradually. The internal commerce of the United States and the purchasing power of our people is greater per capita, than that of any other nation in the world, and we shall, I think, do botter if we address ourselves to the development of a country that is industrially and commercially self-contained than we pean by attempting the development of a foreign commerce for which we are untrained and which Europe will be better able to serve until the density of our population is so increased that over-production is staring us in the face.

We are well equipped to supply the world with the raw material which civilization requires. It is an age of specialization. Let us do those things for which we are best suited and leave the rest of the world to their various specialties. I am one of those who believe that Amazian's terrority ectables. I am one of those who believe that America's truest supremacy to be found in the development of her agriculture and that the most important service that the banker can render to society is in fostering and encouraging agricultural development.

#### SINGLE TAX PLAN OPPOSED BY BANKERS.

On Wednesday Nov. 10 the mortgage interests of the city, as represented by Clarence H. Kelsey, President of the Title Guaranty & Trust Co., and Louis V. Bright, President of the Lawyers' Title Insurance & Trust Co., expressed themselves strongly against the single tax theories that have been under consideration before the Mayor's special committee on the untaxing of buildings.

As witnesses at the second public hearing of the Committee on Taxation. appointed by Mayor Mitchel, both prophesied that the mortgage loan business and virtually all opportunities for obtaining capital for building development would be ruined by the contemplated change, and that the benefits to be expected from it were extremely doubtful. In addition, Dr. R. M. Haig of Columbia, who has been special investigator for the committee and has written reports on the untaxing of buildings in the Canadian Northwest and its possibility here, stated that to the immediate adoption of the system he would unhesitatingly say no.

Mr. Kelsey is quoted as saying of the plan:

Mr. Kelsey is quoted as saying of the plan: First, that it would kill speculation and the value of land; second, that it would not relieve consection and housing conditions because it would tend to make every land owner put himself in the position of the owners of sky scrapers and get as much on his property as was possible; third, that it would effect no appreciable reduction in rents, because rents were already so far below a fair return on investment; fourth, that it would reduce pub-lie revenue and injure public credit; fifth, that it would ruln the mortgage how business. loan busine

"Speculation in New York," Mr. Kelsey said, "does not keep out of use large vacant tracts of hand. It has resulted, on the contrary, in a large amount of over-production in building. As a matter of fact, fewer and less certain fortunes are made in real estate than in any other line of business. I believe it is erroneous to say speculation is unproductive, because it is the life of every kind of business."

Mr. Bright predicted as to the three main results of the plan a tendency toward more intensive improvement of the land, a large calling in of mortgages for the replacing of which no capital would be available, and a decrease in the selling value of real estate. He held that speculation was not detrimental to the community on the whole.

Frederick L. Cranford, contractor and Vice-President of the Business Men's Association to Untax Industry, did not agree with Mr. Kelsey. He read a statement to the committee in which he said:

An increasing tax upon land and a decreasing tax upon personal property and buildings would tend to diminish the fixed charges of enterprise, and would show appreciation by the Government of the city of the fact that a manufacturing establishment giving regular employment is a valuable aset to a community. If would tend to stop the continued movement out of few York of manufacturing plants.

In the past the taxation policy of the city has been an important factor producing certain results, among which is probably one of the very greatest instances of the protection of community wealth in the shape of land values over instanced.

ever instanced. On Manhattan Island alone the land values have increased within the last century from \$23,500,000 to over \$3,000,000,000. In spite of this the com-munity is burdened nearly to the point of embarcassement by an increasing tax rate, with a net debt of over \$1,000,000,000. No message is more plainly written on the wall as we look at the revolu-tion now in progress in Europe than that we must promote our industrial efficiency, because it is inefficient and wasteful to permit the industrial opportunities of the city to be capitalized into hand values for the benefit and enjoyment of those not engaged in production.

#### ACTION FOR REFUND OF TRANSFER TAXES DECIDED IN FAVOR OF BROKERS.

The Appellate Division for the Third District of the Supreme Court at Albany handed down a decision on the 11th sustaining the claims of brokers and bankers for the return by the State of the excess stamp taxes on stock transfers imposed by the New York transfer tax law of 1906. The amount asked for by the brokers was \$645,000, and the Court awarded this sum with interest at 6% from 1907. The 1906 amendment to the stock transfer Act was held to be unconstitutional in an opinion handed down by the Court of Appeals at Albany in January 1907. Under this amend. ment a two-cent tax was required on each share of \$100 or of face value or fraction thereof; the 1905 law, the validity of which was upheld in the same month by the United States Supreme Court, imposed a tax of two cents "on each hun-dred dollars of face value or fraction thereof." Although the Court of Appeals had declared invalid the 1906 law, the State Comptroller refused to return the excess tax involved in shares of less than \$100 par, paid from the time the law became operative, viz., May 1906, until January 1907; the State contended that if any refund should be granted it was due to the customers and not to the brokers. Samuel P. Goldman of Goldman, Heide & Unger, who conducted the proceedings on behalf of the bankers and brokers, argued that as the latter, acting as agents, had paid the tax, they were entitled, as agents, to the refund of the tax, since the law under which the taxes had been collected was found to be unconstitutional. Mr. Goldman was sustained by the Appellate Division on every point. While the State has the right to appeal to the Court of Appeals, the Attorney-General, at the close of the arguments, announced that if the decision was against the State he would not carry the case to the higher court. The action conducted by Mr. Goldman was brought in the name of William C. Van Antwerp, Francis C. Bishop and Charles L. Hoffman, composing the Stock exchange firm of Van Antwerp, Bishop & Co.

#### CONDITIONS IN MEXICO UNDER CARRANZA GOVERNMENT.

The State Department issued on the 9th inst. a statement on conditions in Mexico. The Department cites numerous instances of improved conditions due to Carranza rule and reports that "in the capital and in all of the large cities and towns under the control of the Carranzistas law and order have been restored as rapidly as possible." The statement says in part:

says in part: Conditions in Mexico are such as might be expected in any country that has passed through about six years of civil war. Those hopeful for the restoration of order and of Mexico's former prosperity believe that there now is a chance for them to improve. In Mexico City the famine is a thing of the past. Now, through Government officials, there is food for every-body, and the improvement of the railroad service makes it certain that food conditions will be better every day. While business is not flourishing, compared with former years in Mexico City, it is probably better than it has been at any other time since the trouble started. Restoration of railroad service throughout the country will not only be the big step toward resuming normal conditions, but it will also be the barometer of peace and order in the country. Railroads have been in the last few weeks transferred from the military to the civil authorities. The latter are now attempting to get them on a running schedule, working

last few weeks transferred from the military to the civil authorities. The latter are now attempting to get them on a running schedule, working under the most discouraging handicaps. Of the former equipment of the great national system of railroads more than two-thirds of the engines, cars, rolling stock and stations have been destroyed. One-half, at teast, of what is left is still being used by the military. Shortage of freight cars and locomotives is holding back the resumption of the normal commerce of the country. The warehouses at Vera Cruz are already crowded to their expactiv; the Ward Line boats have resumed weekly sullings, and they are loading hun-dreds of tons there every trip. The ratiroad is helpless to move more than a small portion of freight toward the interior. Practically every mile of railroad has been repaired by the different armies. A statement summarizing advices from Mexico City re-

statement summarizing advices from Mexico City rogarding plans for currency reform was issued by the Moxican agency in Washington on the 5th inst. In order to ascertain the consensus of opinion as to the best methods of unifying the currency of the republic and retiring issues now outstanding, a special commission appointed to investigate

Danking institutions has addressed a series of questions to bank officers and directors. The statement adds: The Constitutionalist Government has issued a decree forbidding Gov-ernors of the twenty-seven flates of the republic from granting any special privileges of any nature to any individuals, firms or corporations, and revoking all that have been granted heretofore. This decree also forbids the collection of any local taxes in gold, and forbids the plating of any administrative obstacles whatsoever in the way of absolutely free impor-tation and exportation of merchandise between the States.

banking institutions has addressed a series of questions to

Under a decree signed on the 8th inst. by Judge Charles M. Hough in the U. S. District Court in this city over \$200,000 in gold and silver bullion in a bonded warehouse in New York is to be turned over to Eliseo Arrendondo, Carranza's agent in this country. This sum was seized over a year ago by Carranza's troops in Mexico from mines belonging to private corporations and was sent to New York by way of Vera Cruz. The bullion was consigned to Carranza's agent, but the bill of lading being faulty the customs authorities refused to surrender it. In the meantime the mining companies brought suit to reelaim the bullion and secured a temporary injunction staying Collector of the Port Malone from turning over the bullior until the suit was settled. Following the recognition of Carranza by the United States and the A B C Powers, the status of the suit underwent a change, bringing the seizure of the gold and silver bullion by the troops within the scope of a legal military confiscation.

#### UNITED STATES SEEKS DATA ON MUNITIONS OUTPUT.

Instructions to prepare and forward to the Treasury Department as soon as practicable a report on the output of war munitions in their respective internal revenue districts for the month of September have been sent to collectors by the Bureau of Internal Revenue. These orders were issued at the direction of Secretary of the Treasury McAdoo and the reports are expected to reach Washington not later than Dec. 1. It is explained at the Treasury Department that these instructions were given in order that the Department might be in possession of data regarding the output of munitions in anticipation of a call from Congress for information on that subject. It is furthermore stated that the collection of such data does not result from any decision on the part of the administration to recommend to Congress legislation calling for a tax on munitions. It is the general belief however, that the assembling of the information has some such object in view.

It is reported that in addition to the inquiry which is being conducted by the internal revenue collectors, an independent investigation is being made by the War Department at the request of Mr. McAdoo.

#### SECRETARY REDFIELD TO AID A IERICAN OVER-SEAS CORPORATION.

Secretary of Commerce Redfield indicates in a letter to Morris R. Poucher, Vice-President of the new American Overseas Corporation, that he will be glad to assist the company in the forwarding of American products to neutral Mr. Redfield states, however, that there are countries. three conditions which he considers essential to the matter. These are that the enterprise be controlled by Americans and operated solely in the interest of American commerce; that it be strictly neutral and that there be no discrimina-tion shown in its operation. The Secretary also announces that he will appoint an inter-departmental committee to assist the corporation. The letter, which was made public on the 1st inst., is as follows:

As it is the duty of the Department of Commerce to encourage the do-

As it is the duty of the Department of Commerce to encourage the do-metric and foreign commerce of the United States in any legitimate way, I shall be very glad to do whatever I properly may to usels the American Overseas Corporation in forwarding American products to neutral coun-tries. I ought, however, to say that there are three conditions which I think essential to the matter. In the first place, the entrprise is to be controlled by Americans and operated solely in the interest of American commerce generally. In the second place, it must be strictly neutral both in intent and in actual operation and on both sides of the Atlantic. In the third place, its wrvices must be offered to every American clizen or business house college to do a legitimate foreign business on emetty the same teems as are offered to every other American clizen or business house. There must be no discrimination of any kind in favor of or against any one. It is my understanding that the operation of the enterprise is not com-fucted for profit or for the special or particular interest of any individual, corporation, partnership or group, and it ought also to be understood that pursuant to my duty to promote American commerce there is no exclusive privilege of any nature whatever involved in the above auggostion, but the Department of Commerce holds itself free to act as circumstances may de-Department of Commerce holds itself free to act as circumstances may de-mand and will unquestionably act in behalf of all our citizens who may desire its assistance in a similar way or in any other way within its lawful powers.

The Department will, so far as practicable, keep in touch through its commercial officers with your operations, both at home and abroad, to satisfy itself that the work is being carried on in the lines suggested above, and for the benefit of all American commerce which may seek its services.

I shall be glad also to appoint an interdepartmental committee representing the Treasury Department, the Department of Agriculture and this Department to assist in this matter.

As stated in our issue of October '30, the American Overseas Corporation has been organized to facilitate commerce from the United States to neutral countries, its underlying purpose being to get goods into those countries for neutral consumption.

#### LAWYER CENSURED FOR DEALINGS WITH LAMAR.

For his efforts through David Lamar, known as "the Wolf of Wall Street," to rehabilitate himself in the good graces of J. P. Morgan & Co. and other financial institutions, Edward Lauterbach received on the 5th inst. a "severe censure" from the Appellate Division of the Supreme Court. The Court in imposing the punishment considered the fact that Mr. Lauterbach is 70 years old and that he has for "half a century occupied a conspicuous position as a lawyer and politician." The opinion of the Court was written by Presiding Justice Ingraham. It refers to Mr. Lauterbach's connection with David Lamar when the latter was endeavoring to convey by telephone messages that it would be to the advantage of certain Morgan interests to retain Mr. Lauterbach as their attorney in regard to certain legislation that might affect the Steel interests. The charge against Mr. Lauterbach was professional misconduct. The charge Justice Ingraham states that the whole scheme of Lamar and Lauterbach was "a fraud and a sham."

As heretofore stated, Lamar was found guilty on Dec. 3 1914 of having impersonated Congressman A. Mitchell Palmer with intent to defraud J. P. Morgan & Co. and the United States Steel Corporation by seeking to lead them to believe that the Steel Trust investigation could be stopped. He was convicted by a jury in the U. S. District Court in New York and was sentenced to two years in the Federal Prison at Atlanta. The case is still in the courts, however.

#### TIME FOR DIVORCING OF RAILROADS AND GREAT LAKE BOATS POSTPONED TO DECEMBER 15.

The Inter-State Commerce Commission recently announced that the effective date of its order forbidding the operation by railroads of boats on the Great Lakes has been deferred from November 15 to December 15. This the "Railway Review" of Chicago points out, has the effect of allowing the present navigation season to close under the old status. Ordinarily navigation is resumed about the middle of April, and so the result of the order of postponement is to afford four months additional in which to meet the situation.

#### ARMY PROGRAM ANNOUNCED BY SECRETARY OF WAR.

Secretary of War Garrison made public on the 5th inst. an outline of the new army plan which is to be submitted to Congress in December as part of the national defense program. The Secretary's plan contemplates an increase in the regular army from 108,008 to 141,843 officers and men, and proposes that the term of enlistment in the regular army shall be two years with the colors (instead of four years) and four years on furlough (instead of three years), the obligation during the latter period being to return to the colors in the event or the imminence of war. The plan necessitates the raising of the following additional organizations: ten regiments of infantry, four regiments of field artillery, fifty-two companies of coast artillery, fifteen companies of engineers and four aero squadrons. Secretary Garrison proposes to supplement the regular army by a force of 400,000 men raised in increments of 133,000 a year and to be designated as the continental army. These men would be called upon to devote a specified time to training for a period of three years and after that to be on furlough for another three years without obligation except to return to the colors in case of war. The new army program would strengthen the State militia by increased appropriations and closer co-operation and would call for the expenditure of \$20,000,000 a year for four years on coast defenses and \$26,000,000 a year for four years in the accumulation of reserve material for use by a force of 500,000. The plan provides that, for the next fiscal year when it is proposed to put this policy into operation, Congress appropriate \$182,717,036; for the second year, \$212,815,879; for the third and fourth years, \$228,315,879 each, and annually thereafter \$182,234,559.

[VOL. 101.

As previously noted, Secretary Daniels announced the details of the national defense program for the navy on October 19. The plan calls for the expenditure during the next five years of \$502,482,214 on the construction of naw ships, the development of air craft and the creation of a reserve of ammunition and guns for the navy.

#### TRADE MESSENGERS IN UNITED STATES FROM OTHER NATIONS.

More than twenty nations are represented by visitors to the United States who are now making their headquarters at the branch offices of the Bureau of Foreign and Domestic Commerce, Department of Commerce, and are seeking new trade relations. Many of these men are members of foreign firms which are preparing to make purchases here. Others are representatives of big commercial houses and offer unusual facilities for our manufacturers to establish agencies abroad. Because of the foreign visitors flocking here, the Bureau is dealing directly with buyers as well as sellers, and bringing both classes of business men together so effectively that there are results-purchases of American goods and the making of contracts for agencies in other countries. Besides Central and South America, the interests represented are located in Australia, Russia, Italy, Argentina, Spain, India, China, Canada, Japan, South Africa, Bulgaria, New Zealand, and several other countries. It is stated that there is wide variety in the classes of goods sought, including machinery, leather, clothing, the numerous lines making up the stock of a department store, textile products of all sorts, tools and many other American manufactures. Two visitors from Russia have nearly completed the organization of a co-operative sales agency for promoting Russian interests.

#### FRENCH COMMISSION TO BUY SUPPLIES IN UNITED STATES.

A French trade commission, which plans to study American manufactures with a view to buying at the close of the war large quantities of machinery in this country with which to rebuild the ruined industries of France, arrived in New York on the 9th inst. on the liner Lafayette from Bordeaux. The commission, which will remain in this country for three months, is headed by Maurice Damour, Secretary of the Committee of Appropriations of the Chamber of Deputies. The other members who arrived in company with M. Damour are J. Lesuer, agricultural engineer and a delegate of the Chamber of Deputies; L. Trincano, director of the National Watch-Making School at Besancon, and a delegate of the Chamber of Deputies; E. Delesalle-Thiriez, Secretary of the Spinners' Syndicate, and T. Chouffour, a banker. Three other members, representing the metallurgical industry and the Lyons Chamber of Commerce, will arrive later.

The commissioners indicate that it is their purpose to arrange for the purchase at the end of the war of at least \$160,000,000 worth of structural iron and steel, machinery and industrial supplies which were formerly imported from Germany. They have also announced that they will at the same time endeavor to establish reciprocal trade relations between the United States and France. In outlining the purpose of the commission, M. Damour said:

Before the war France imported a large portion of all structural iron and steel, industrial machinery and all manner of supplies from Germany, but it is now conceded in France that the great friendship shown by the United States will bring about close trade relations between the two Republics at the conclusion of the war.

The purchases we will arrange for will be necessary to rehabilitate France's various industries after the war, but we will also take opportunity to modernize many of the plants. Before the war we were specify at least \$160,-000,000 a year for German machinery and industrial supplies. I feet sure this sum will now be spent in the United States, and that our purchases will lead to far larger ones in the future.

The fact that our oppulation has been considerably reduced by the war will compel us to equip our factories with modern labor-saving machinery. We feel that the best market for this machinery is in the United States. Also, many Frenchmen desire that a very large portion of our imports be purchased from America rather than from Germany. Our orders here will cover virtually all kinds of machinery from agricultural implements to finer grades of textile machines. Ample provision has been made for the financing of these orders.

M. Damour stated that the commission comes to this country as a representative of the French Government to study conditions here and meet men in commercial, industrial agricultural and banking lines. During its stay in this country the commission will have headquarters in New York. Trips will be made to many of the larger cities and the important manufacturing centers. The commission was ontertained at a luncheon by the Executive Committee of the New York Chamber of Commerce on Wednesday.

#### GREAT BRITAIN LIMITS MONEY ORDER REMIT-TANCES TO UNITED STATES.

According to advices from London on the 4th inst. the money order department of the Post Office has issued a circular advising the public that hereafter no individual or firm will be permitted to send more than £100 (\$500) weekly to any one person or firm in the United States. It is pointed out that during the recent period of unsettled conditions in the exchange market, money order exchange has not fluctuated and has offered the most favorable rate for forwarding money to America as compared with the other channels of financial exchange. The circular issued by the money order department calls attention to the fact that many persons and firms have been sending several thousand pounds weekly to the United States in the form of postal money orders which, the Department states, are not intended for the purpose of facilitating commercial exchanges of that magnitude. It is reported that many British firms with branches in America have taken advantage of the favorable postal rate in sending money for salaries and other expenses of their American offices. It is also believed that exchange speculators profited by drawing checks on New York accounts and covering the amounts drawn by dispatching postal orders.

#### GREAT BRITAIN TO TAX AGENCIES OF AMERICAN FIRMS.

An order was promulgated by Reginald McKenna, British Chancellor of the Exchequer, on the 4th inst. under which agencies of American mercantile firms operating in Great Britain will be compelled to pay an income tax on the basis of their total earnings in that country, including money returned to the United States. It is stated that hitherto these agencies have only paid an income tax on the profits expended in England. The new tax, it is believed, will bear heavily on some agencies and may have the effect of discouraging the importation of what in war time are considered luxuries, which cause an unfavorable balance of trade. It is reported that Armour & Co., the Standard Oil Co. and similar firms which are incorporated in England and pay an income tax as such will not be affeeted by the new order. For some time, it is asserted, the British Government has been struggling with the problem of taxing agencies and trying in vain to exact taxes from those which have consistently shown no profits on account of the fact that goods were billed to them at prices making local profits impossible, but bringing a substantial profit to the American factory.

#### GERMANY'S CANCELLATION OF PARCEL POST SER-VICE TO UNITED STATES EXPLAINED.

British interference with the mails is given as the reason in official circles in Berlin for the recent suspension by Germany of the parcel post service to this country, according to advices from Berlin on the 10th inst. Mention of the discontinuance of the service from Germany to the United States was made in our issue of Oct. 30. From this week's reports it appears that the Holland-America Line informed the German authorities that it was unable to carry parcels, owing to interference by the British. Other steamship lines, it is reported, are unwilling to carry parcels for the same reason. It is stated, however, that the parcel post service from this country to Germany has not been interrupted. It is assumed that the British authorities refrain from seizing these parcels, owing to possible complications with the United States Government, inasmuch as the parcels are still legally the property of the American owners while on the high seas

#### THE RE-NAMED DACIA SUNK BY A SUBMARINE.

The French steamship Yser, formerly the American steamer Dacia, which was captured by a French cruiser in February in the English Channel, has been torpedoed and sunk by a German submarine. The following official announcement came from Algiers, via Paris, on the 9th inst .: The French ship Yser, formerly the Dacia, renamed after her sale by the Prize Court, was torpedoed while conveying to Bizerta'the passengers saved from the Italian steamer Eliza-Francesa. The entire crew and the passengers were saved.

As has been reported in these columns the Dacia was transferred in January from German to American registry, and left Galveston, Texas, on January 31 for Rotterdam with a cargo of cotton for trans-shipment to Germany. The vessel's capture the following month by a French cruiser was confirmed in the French Prize Court and the

Dacia's sale by France was announced in August, the new owners renaming her Yser. It has been generally considered that a claim for indemnity by the owners of the The Dacia would be supported by the State Department. case is now in the stage of appeal from the Prize Court decision. The vessel's cargo of cotton was purchased through a special appropriation.

#### ITALIAN LINER ANCONA SUNK.

The Italian liner Ancona, bound from Naples to New York, was sunk in the Mediterranean Sea on the 7th inst. The vessel was attacked by a submarine flying the Austrian colors. As to the number of passengers and crew the dispatches gave various estimates. Early reports stated that the vessel carried 482 passengers, while her erew was estimated at from 60 to 160. Advices from Rome dated the 11th inst. gave 428 as the total on board. The State Department received an official dispatch from Ambassador Page at Rome on the 10th inst., which indicated that 27 Americans were lost on the Ancona. The message, as given in the New York "Times" of the 11th inst., was as follows: Rome, Nov. 10.

State Department, Washington: Alexander Patattivo of New York, his wife and four children; Mrs. Fran-cis Mascolo Lamure, also twenty other third-class passengers, believed to be Americans, lost with the Ancona. One passenger reported safe. Mrs. Cecile L. Greil, first called Gray, reported safe. AMERICAN AMBASSADOR, Rome.

It was reported early in the week that the Ancona attempted to escape and was shelled by the submarine befor the torpedo was fired. According to a dispatch from Naples on the 11th inst., the Captain of the Ancona has submitted a report in which he states that the submarine gave no warning to the liner and did not afford those on board the vessel any chance to escape. On the other hand, a Reuter dispatch from Malta quotes survivors as stating that the Ancona was overhauled and warning given for the removal of passengers. Many conflicting reports have been received as to the number of survivors. American Consul White at Naples reported to the State Department on the 11th inst. that the total number of missing was estimated to be 149. He said nothing as to the number of Americans lost. At the direction of President Wilson, the State Department is making an investigation into the destruction of the vessel and has sent instructions to the Ambassador at Rome and to consuls in the region near the scene of the disaster, directing them to supply all obtainable information at once.

The Ancona sailed from New York for Naples on Oct. 17, arriving in the latter port on Oct. 29. On that trip she had on board over 1,000 Italian reservists and a general cargo. The vessel was scheduled to sail from Naples on her return trip to this country on the 9th inst. William Hartfield of the firm of Hartfield, Solari & Co. of this city, agents for the Italia Societa di Navigazione a Vapore of Naples, which owned the Ancona, said on the 9th inst .:

The Ancona has accommodations for 48 first-class passengers, and usually has a few Americans on the westward voyage to New York and Philadelphia. She is commanded by Capt. Massardo, who is a very skillful navigator and a careful man.

#### GERMAN NOTE EXPLAINS ATTACK ON ORDUNA.

The State Department made public on Oct. 29 a memorandum from the German Government explaining the unsuccessful attempt of a submarine to torpedo the Cunard Liner Orduna. As heretofore stated, the United States sent a note of inquiry to Germany in July, regarding the attack on the vessel. The Orduna, which carried 227 passengers, of whom 21 were Americans, was attacked by a German submarine on July 9. The German memorandum, although only just made public, was written under date of Sept. 9. Advices from Washington on Sept. 13 stated that the communication had been received at the State Department but the text was not given out at that time. A significant fact revealed in the memorandum is that as early as July 9, more than a month before the attack on the Arabic, German submarine commanders had instructions not to sink "large passenger steamers" without warning. The note informs the United States Government that the same submarine that attacked the Orduna halted the American bark Normandie, and states that, "although the cargo contained contraband, the sailing vessel was permitted to continue her voyage unhindered, as it was impossible to guarantee that the crew would be surely rescued in the small boats if the ship was sunk." This latter statement is regarded as significant, inasmuch as the last note of the United States, in the case of the Wm. P. Frye, asked Germany for assurances that if, pending the arbitration of treaty rights, American vessels were sunk, the crews would not be subjected to the risk of small boats in the open sea. The Orduna memorandum was made public along with certain other correspondence supplementary to the second installment of the so-called White Book issued on Oct. 28 by the State Department. Its text is as follows:

At about a quarter past 7 on the morning of July 9 last a German submarine sighted a steamer from three to five miles away and a sailing vessel about a mile away. The steamer was proceeding without any flag or neutral markings and was taken for a small enomy steamer by the commander of the submarine, on account of the difficulty of observation caused by the unfavorable weather. The commander first decided to attack the steamer, submerged, and fired a torpedo at the vessel, which missed its mark.

Hoping to catch the steamer above the water, the submarine rose and chased the steamer on the surface. The steamer did not stop when a shot of warning was fired, and therefore soveral shells were fired at her, which did not strike her, as the submarine was pitching about and the distance was great.

The submarine then proceeded to the sailing vessel, which was shown to be the American bark Normandie, bound from New York to Liverpool with a cargo of lumber. Although the cargo contained contraband, the sailing vessel was permitted\_to\_continue her voyage unhindered, as it was impossible to guarantee that the crew would be surely rescued in the smal boats if the ship were sunk.

Impossible to guarantee that the crew would be surely rescued in the smalboats if the ship were sunk. The first attack on the Ordina by a torpedo was not in accordance with the existing instructions, which provide that large passenger steamers are only to be torpedoed after previous warning and after the rescuing of passengers and crew. The failure to observe the instructions was based on an error which is at any rate comprehensible, and the repetition of which appears to be out of the question, in view of the more explicit instructions issued in the mean time. Moreover, the commanders of the submarines have been reminded that it is their duty to exercise greater care and to observe carefully the orders issued.

#### BRITISH SEARCH AMERICAN VESSEL IN MEXICAN PORT.

The American ship Zealandia is reported to have been forcibly searched last week by a party from a British cruiser while lying in the Mexican port of Progreso. A report to this effect is said to have been received from American Consul John W. Germon at Progreso. It is stated that the cruiser was stationed outside the harbor, presumably waiting to seize the Zealandia. On the 10th inst. the United States formally asked Great Britain for information concerning the searching of the vessel, Ambassador Page having been instructed to make inquiry through the London Foreign Office. The vessel is American-owned and is said to involve no change of registry. Under these circumstances the United States desires to know upon what grounds search was conducted in a neutral port. It is pointed out that in the natural course Mexico would also enter a protest, but as Great Britain has not yet recognized the de facto Government in Mexico the situation is somewhat complicated. The Zealandia sailed from Pensacola, Fla., on Oct. 7 for Tampico, and was reported to have hoisted the German flag at sea, this, however, having been denied by the owners. The vessel is stated to have had a German crew. The Zealandia has been frequently mentioned in connection with reports of the investigation conducted by British agents who have been on the watch for ships supposed to be fitting out in the United States for the purpose of attacking oil-carrying ships from Mexican fields, whence the British navy draws a great proportion of its supply of fuel oil.

It was reported yesterday that the British Government has advised the State Department that its information is that the Zealandia was outside the three-mile neutral zone at Progreso and technically on the high seas.

#### GREAT BRITAIN SEIZES AMERICAN STEAMER AS ENEMY SHIP.

Great Britain notified the United States on the 11th inst. through Ambassador Page, that the American steamship Hocking, which is now in Halifax, in charge of a British prize crew, was seized as of enemy ownership. As stated in these columns last week, the Hocking and the Dutch steamer Hamborn were seized by the British after leaving New York and taken to Halifax where they arrived on October 31.

The State Department was notified on the 9th inst. that the American steamer Solveig, owned by the American Trans-Atlantic Co., had been confiscated by a French Prize Court. As previously stated, this vessel was detained by the French authorities at Marseilles and sent to a prize court to test its ownership. The State Department was advised that the Prize Court ordered the confiscation of the vessel on the ground that the owners who were summoned to appear before the Court failed to attend. It is reported that the State Department will protest the action of the Prize Court.

#### UNITED STATES PROTESTS DETENTION OF AMERI-CAN VESSEL BY GERMANY.

The United States has instructed Ambassador Gerard at Berlin to protest to the German Government against the detention of the American sailing vessel Passof Balmaha. As stated in these columns August 7, the detained ship, bound for Archangel with a cargo of cotton, was compelled to put-into Cuxhaven after being stopped by a German submarine which placed an officer on the vessel as a prize crew. Information to this effect was received in an item given out by the Overseas News Agency at Berlin on August 3. After the vessel reached Cuxhaven it was discovered that a British prize erew of one officer and four men were on board, hiding below. Germany recently ordered the ship held for prize court proceedings at Hamburg on the ground that her transfer from Canadian to American registry after the war began was illegal. It is understood that Ambassador Gerard in asking for the release of the vessel is directed to impress upon the Berlin Foreign Office the fact that the ship was virtually owned in the United States even before her change of registry and is now wholly owned in this country. The Pass of Balmaha sailed from New York on June 24.

#### REHEARING DENIED IN WESTERN RATE CASE. COMMISSION TO INVESTIGATE CERTAIN RATES.

While denying on the 10th inst. the petition of the Western railroads for a reopening of the Western freight rate advance case, the Inter-State Commerce Commission announced that it will undertake on its own initiative, an investigation of the rates, rules, and practices in relation to the transportation of live stock, fresh meats and packing house products in Western Classification territory. It was on these items that the Commission had relied for the greater part of the increase in revenue to be derived from the advances in rates asked for, and accordingly, it is felt that the action of the Commission is not a complete defeat for the roads. Formal application for a rehearing of the case was filed on September 29, with the Commission, after it had granted (Sept. 21) the request of the roads for time in which to prepare the petition for the reopening and reargument The decision of the Commission on the appliof the case. cation of the Western roads for increases in rates on certain articles was rendered on August 11, and was outlined at considerable length in our issue of August 14. The total increases asked for in the Western rate case were \$7,604,247. while the increase permitted by the Commission was estimated at only \$1,600,000, or about one-quarter of one per cent of the total freight revenue for 1914 of the 41 roads involved. The new rates were to have become effective on September 30, but under the Commission's order of September 21, the roads were given ninety days longer, or until December 31, to comply with the original order so far as it affected the rates for which a rehearing was sought. In their original application the roads had expected additional revenue of \$1,500,000 from increased rates on live stock and a similar sum from higher rates on packing house products and fresh meats. The announcement of the Commission's intention to inquire into these rates would seem to indicate a possibility of the granting of at least some further increases. The territory in which the increases were proposed comprises the States of Illinois, Wisconsin, Minnesota, North Dakota, South Dakota, Colorado, Nebraska, Iowa, Kansas, Missouri, Arkansas, Louisiana, Texas, Oklahoma and New Mexico. Indiana, Kentucky and Alabama were affected as regards coal traffic. The greater part of the territory comes within the jurisdiction of the Western Trunk Line Committee, the Southwestern Tariff Committee and the Trans-Missouri Freight Bureau.

#### GRAIN SERVICE TO CONSOLIDATED EXCHANGE CUT OFF BY CHICAGO BOARD OF TRADE.

The grain quotation service furnished to the Consolidated Stock Exchange of New York by the Chicago Board of Trade was discontinued by the latter on the 9th inst. The service was cut off without any previous indication being given of the action, secreey being maintained, it is stated, in order to prevent the Governors of the Consolidated Exchange from obtaining an injunction. An investigation made by the Board of Trade, it is stated, prompted the latter's action; as to the reasons for its course, J. P. Griffin, Vice-President of the Board, was quoted on the 9th inst. as saying:

Grain quotations of the Chicago Board of Trade were cut off from the Consolidated Stock Exchange to protect our property interests in the quotations. The Consolidated Exchange, which deals very little in grain, has been receiving our quotations without charge for a considerable time.

/fraser stlouisfed org/

Trading in grain on the Consolidated has of recent years been spasmodic. Several years ago it had an active market in the staple, but it is understood that certain rules under which trades were negotiated did not meet with the approval of the Chicago Board of Trade, and grain trading on the Consolidated languished and finally stopped. It was not renewed until the security markets of the world were closed shortly after the outbreak of the war, when, with the rise in wheat, the grain market was revived. With the re-opening of the stock markets, it is stated, trading in grain on the Consolidated fell off, and for several weeks there has been only the most limited sort of a market in the staple.

M. E. de Aguero, President of the Consolidated, issued a statement on Wednesday declaring that the cutting off of the quotations would in no way inconvenience it, since there had been no trading of any consequence on its floor in wheat. Mr. de Aguero's statement says:

Taking out the Chicago Board of Trade ticker does not in any way incon-Taking out the Chicago Board of Trade ticker does not in any way inconvenience the Consolidated Stock Exchange of New York, as, since the great activity in stocks has developed, there has been no trading of any consequence in wheat, as our members have not had time to devete to it. The action of the Board of Trade is Illogical, however, as we have been working in harmony with them, as well as the New York Stock Exchange, in the effort to eliminate bucket shops and bucket shoppers. In May last we turned down three applicants for membership whose financial condition was excellent because of their former affiliation with bucket shop interests. It is rather interesting to note that one of these men was and is a member of the Chicago Board of Trade.

#### BANKING, LEGISLATIVE AND FINANCIAL NEWS.

The public sales of bank stocks this week aggregate 97 shares, of which 57 shares were sold at the Stock Exchange and 40 shares at auction. The only transaction in trust company stocks was a sale at auction of 75 shares of stock of the Commercial Trust Co. at 96. The last previous sale of the stock was made in February 1915 at 70.

\*Sold at the Stock Exchange.

The spring meeting of the Executive Council of the American Bankers' Association will be held at Briarchiff Lodge, Briarchiff Manor, N. Y., May 8, 9, and 10 1916. This decision was reached at a meeting of the Administrative Committee at which the relative merits of the various places suggested were carefully considered. As in former years when the spring meeting has been held at Briarchiff, the hotel will be turned over to the exclusive use of the bankers.

The Muchlebach Hotel and the Baltimore Hotel at Kansas City, Mo., have been designated by the Administrative Committee as the headquarters hotels for the 1916 Convention of the American Bankers' Association. Both hotels are first class and are situated opposite each other. The date of the Convention has not yet been settled, but it will probable be the last week in September.

Owing to the success that attended the separation of the registration department from the meetings at the Seattle Convention, this plan will probably be repeated at Kansas City.

Incidental to the celebration of the one hundredth anniversary since the establishment in this country of the savings bank, and principally in view of the enormous destruction and waste now being caused by the European war, there will be conducted by the American Bankers' Association, Savings Bank Section, through the sixty-two chapters, in as many cities, of the American Institute of Banking, a nation-wide campaign of education for the encouragement of thrift. The campaign will be under the immediate direction of a committee of seven bankers who will work in co-operation with a proposed centennial advisory thrift commission, composed of seventy-five of the leading business men in the United States. First, by circulating among local school authorities and newspapers the printed matter issued by the American Bankers' Association, Savings Bank Section, for oncouraging the opening of savings accounts and the forming of the habit of systematic saving by school children. Second, by securing the publication in local newspapers of the "Thrift Talks" and other similar literature which is now being distributed by the American Bankers' Association, and will be sent to any newspaper on request. Third, by calling the attention of local employers of labor to certain plans for encouraging the forming of the habit of systematic saving among employees.

A meeting of the new Board of Governors of the Investment Bankers' Association of America was held in this city at the Biltmore Hotel on the 5th inst. All but four of the thirty-four Governors were in attendance at the meeting. Routine matters principally were discussed, and plans were outlined for the ensuing year. It was decided to delegate to a special committee consideration of matters affecting the railroad situation generally. Lewis B. Franklin, President of the Association and Vice-President of the Guaranty Trust Co., with regard to the purpose of the committee, said:

Co., with regard to the purpose of the committee, said: The railroad situation is improving gradually. It was very bad, but it is better now. What our committee will try to do will be to bring about closer co-operation among the bankers, the railroads and the Inter-State Commerce Commission. It is not all the fault of the Inter-State Commerce Commission. It is not all the fault of the Inter-State Commerce Commission. It is fargely the fault of lexitators that railroads are oppressed by senseless legislation. It has been the habit of politicians to take a few examples of crooked railroads and brand all railroads as erooked: We must convince politicians that the people really affected by railroad depression are their own constituents.

The following Executive Committee for 1915-16 was elected by Group VIII of the New York State Bankers' Association on the 9th inst.; Chairman, Charles Elliot Warren, President of the Lincoln National Bank; Secretary and Treasurer, Thomas Cochran, President of the Liberty National Bank; Joseph B. Martindale, President of the Chemical National Bank; Stephen Baker, President of the Bank of the Manhattan Co.; Charles H. Sabin, President of the Guaranty Trust Co.; Louis G. Kaufman, President of the Chatham & Phoenix National Bank; Herbert R. Eldridge, Vice-President of the National City Bank; Joseph Byrne, Vice-President of the Merchants National Bank.

George W. Eberhardt, the New York Stock Exchange member of the Pittsburgh firm of George W. Eberhardt & Co., was suspended for one year by the Governors of the New York Exchange on the 11th inst. His suspension is said to have been based on charges that the firm had been guilty of violating the resolution of the Exchange prohibiting business transactions between a member of the Exchange and bucket shops. Mr. Eberhardt became a member of the New York Exchange last February. The other members of his firm are Sanford B. Evans and Walter W. Stewart.

Charles T. Gwynne, heretofore Assistant Secretary of the New York Chamber of Commerce, was elected Secretary on the 4th inst. to succeed the late Sereno S. Pratt. The new post of Executive Officer has been created and Dr. John Franklin Crowell has been elected to the position. Dr. Crowell for a number of years was Associate Editor of the "Wall Street Journal" and for four years was attached to the Bureau of Statistics of the Treasury Department. He also formerly served as President of Trinity College at Durham, N. C.

Benjamin Strong, father of Benjamin Strong Jr., Governor of the New York Federal Reserve Bank, died at his home in this eity on the 6th inst. Mr. Strong was in his eightyfirst year. He was associated for many years with the late Morris K. Jesup as his private Secretary and became identified with many of Mr. Jesup's charitable and public interests. Mr. Strong's grandfather was one of the founders and for many years President of the Seamen's Bank for Savings.

At the special meeting of the directors of the Guaranty Trust Co. of this city on the 8th inst. a resolution was adopted calling for a special meeting of the stockholders Nov. 24 for the purpose of considering the recommendation to increase the capital from \$10,000,000 to \$20,000,000. The new stock is to be offered to existing shareholders at par. Yesterday's bid and asked prices for the stock were 710 and 725. Grayson M.-P. Murphy, President of G. M.-P. Murphy & Co. of 43 Exchange Place, was elected a Vice-President of the Guaranty Trust Co. on the 11th inst. Mr. Murphy will assume his new position in the near future.

The organization of the Farmers' Safe Deposit Co., to be located at 475 Fifth Avenue, has been authorized by the State Banking Department. The new company is to have a capital of \$100,000 and will be operated by the Farmers' Loan & Trust Co. in connection with its uptown branch at the above address. The incorporators of the safe deposit company are Edwin S. Marston, President of the Farmers' Loan & Trust Co.; William B. Cardozo, Samuel Sloan, J. Herbert Case and Cornelius R. Agnew, Vice-Presidents of that institution, and Augustus V. Heely, Vice-President and Secretary of the Farmers' Loan & Trust.

In accordance with the offer outlined in our issue of Oct. 16, it is understood that a majority of the stock of the New York Produce Exchange Bank of this city has been secured by interests connected with the Mechanics' & Metals' National Bank. It is announced that there is no intention of merging the business of the two institutions at the present time. According to the officers of the Mechanics' & Metals' National, no action toward the absorption of the business of the New York Produce Exchange Bank will be made until the Federal Reserve Act is amended, giving express permission to national banks to operate branches. In the meantime the Produce Exchange Bank and its branches will continue as a separate organization, having the added facility afforded by affiliation with the Mechanics'& Metals' National.

Notice of intention to organize the M. Berardini State Bank to be located at 34 Mulberry Street, Manhattan, has been filed with State Superintendent of Banks Richards at Albany. The new bank is to have a capital of \$150,000. Its incorporators are Michael Berardini, Victor E. Tozzi, August Caponigri, Virginio Bianchi and Angelo L. Casazza, all of New York.

An order authorizing the payment of a 5% dividend to the creditors of the failed Northern Bank of New York was signed by Justice Philbin of the State Supreme Court on the 3d inst. The suspension of the institution occurred in 1910. The dividend just authorized will bring the aggregate payments to depositors up to 65%. The 60% previously paid to the general creditors involved a distribution of \$3,319,783 36, and in addition approximately \$1,060,349 97 has been paid to creditors entitled to preference under the law or to offsets, making total disbursements to creditors by the Banking Department of \$4,380,133 33. The present payment will amount to approximately \$287,000. It is estimated by the Banking Department that approximately \$400,000 further will be realized from the assets of the bank.

A jury in the Supreme Court in Brooklyn returned on the 4th inst. at the direction of Justice Kelly a verdict of \$214,-000 in favor of the failed Union Bank of that borough against the estate of F. A. Heinze. It is reported that the State Banking Department does not expect to realize a great deal on the judgment as other claims against the Heinze estate amounting to more than \$1,000,000 precede it. According to the Brooklyn "Eagle," the sum mentioned is due the Union Bank as a result of stock deals between David A. Sullivan, former President of the bank, and Mr. Heinze. The latter gave promissory notes aggregating over \$200,000, and, after failing to meet the notes at maturity, sought the postponement of the sale of the collateral. This request Sullivan is said to have refused to grant, and when the collateral was realized on the bank was still short \$190,000. Suit was brought by the bank for that amount. Heinze is reported to have put in a counterclaim for \$145,000 which he alleged represented the losses incurred by selling the collateral before he had authorized it. A judgment for approximately \$45,-000 in favor of the bank resulted from the trial of the suit which took place in 1913. The Appellate Division, however, set this verdict aside. Heinze's counterclaim was prosecuted by his estate and is defeated by the direction for the \$214,000 verdict in favor of the bank.

A report on the Union Bank liquidation by the ways and means committee of the Allied Boards of Trade and Taxpayers' Association of Brooklyn, which was presented at a meeting on Oct. 15, stated that after an investigation the committee had concluded that the liquidation proceedings had not been carried on to the best advantage of the depositors. The committee alleges that \$265,000 was wasted in the payment of taxes, interest and carrying charges upon real estate that was not worth the mortgages, which were prior liens. It also alleges that excessive fees were paid to rent collectors and large sums expended for attorneys' fees. The committee asserts that, although there was enough money on hand at the closing of the bank in April 1910 to pay a 15% dividend, with the subsequent expense there was not enough in December 1914 to pay 1%. The committee expresses the opinion that the depositors may some day get as much as 5 or 10% of their deposits, but that they will have to wait a long while.

Franklin D. Locke, heretofore Vice-President of the Fidelity Trust Co. of Buffalo, N. Y., has been chosen President of the institution to succeed Robert L. Fryer, who died on Oct. 20. George C. Miller, a director in the company, has been elected Vice-President to take Mr. Locke's place.

Edwin G. S. Miller, President of the German-American Bank of Buffalo, N. Y., died on the 3d inst. Mr. Miller was also President of the Gerhard Lang Browing Co.

Convicted of conspiracy and aiding in the embezzlement of funds from the First National Bank of Amsterdam, N. Y., Baron Eugene F. E. Oppenheim, Dr. Howard J. Rogers and Richard Murphy were sentenced by Judge Ray in the U. S. District Court of Syracuse on the 8th inst. to an actual term of five years each in the United States penitentiary at Atlanta. Each one was sentenced to two years' imprisonment and a fine of \$1 on the conspiracy count and five years on each of the other 200 counts upon which they were found guilty, the terms, however, to be served concurrently. writ of error was granted by Judge Ray, and it is stated that an appeal will be taken. Oppenheim was released under \$15,000 bond and Rogers and Murphy furnished \$10,000 each. A verdict of guilty on all counts in the indictments was returned on Oct. 26 by a jury against the three men. Shortage in the accounts of the bank handled by William T. Brice, a bookkeeper and teller, was discovered in the spring of 1914. Brice was chief witness of the Government at the trial.

The Rhode Island Morris Plan Co. has begun business in Providence with a capital of \$250,000 subscribed and \$500,-000 authorized. Though this is the twenty-seventh company now operating the Morris Plan of industrial loans and investments in the United States, it is the first that has been organized to operate throughout an entire State. Branches will be opened at Pawtucket, Woonsocket, &c., and among the thirty-eight directors are representatives of these towns. The President of the new company is James R. MacColl, Treasurer of the Lorraine Mfg. Co., Pawtucket; the Vice-Presidents are Herbert W. Rice, President and Treasurer of the United States Gutta-Percha Paint Co., Providence; E. R. Richardson, Treasurer of the H. & B. American Machine Co., Pawtucket, and Edward H. Rathbun, President of the Rathbun Knitting Co., Woonsocket; the Treasurer is Herbert J. Wells, President of the Rhode Island Hospital Trust Co., Providence, and the Secretary-Manager is William F. Lythgoe.

A fourth and final dividend in liquidation, amounting to \$14 38 a share, was declared payable on the 4th inst. to the stockholders of the National Bank of Commerce of Boston. As heretofore noted, the business of this bank was taken over in May 1914 by the Merchants' National Bank, which institution guaranteed that the stock of the National Bank of Commerce would bring \$262 per share in liquidation. With this final payment the stockholders have received \$269 38 a share. An initial dividend of \$200 per share was paid on May 29 1914, a second dividend of \$15 per share was distributed in November 1914, and the third disbursement, of \$40 per share, was paid on March 1 last. The National Bank of Commerce had a capital of \$1,500,000.

Peter A. B. Widener, the railway magnate of Philadelphia, died on the 6th inst. at his home in Elkins Park, a suburb of Philadelphia. Mr. Widener's name, like that of the late William L. Elkins, is inseparably linked with the develop-ment of Philadelphia's traction facilities; not only in the Quaker City, however, did the Widener-Elkins interests exert their efforts toward improving the street railway transportation lines, but they were important factors in the development of street railway properties in New York, Chicago, Baltimore, Washington and Pittsburgh. In Chicago, in addition to their railway enterprises, they organized the Chicago Gas Company. Mr. Widener's business start was as a butcher, but he is said to have been attracted early in life to investments in street railway securities, which eventually led to his activities in the promotion and management of traction lines. The development of street railway prop-erties first took the attention of Mr. Widener while he was serving as City Treasurer. He was appointed to that post in 1873 to fill out an unexpired term, and the following year was elected for the full term. In addition to his street railway interests, Mr. Widener had also played an important

#### Nov. 13 1915.]

THE CHRONICLE

part in other large undertakings. He is understood to have been heavily interested in the securities of the American Tobacco Co. and its underlying properties. Mr. Widener's gifts to charity were many. He is said to have left the largest individual fortune in the city, estimated according to the Philadelphia papers at \$50,000,000. His possessions included a notable art collection. Mr. Widener was born in Philadelphia eighty-one years ago. He had been in failing health since the death of his son, George D., and grandson, Harry Elkins Widener, with the sinking of the Titanic in April 1912. At the time of his death Mr. Widener was a director of the Land Title & Trust Co., Electric Storage Battery Co., Philadelphia Traction Co., International Mercantile Marine Co. and the Jarden Brick Co. He had formerly been a director in the Philadelphia & Reading Railway Terminal Co., Philadelphia & Reading Coal & Iron Co., Reading Company and the Lehigh Valley RR.

J. C. Neff, Vice-President of the Fidelity Trust Co. of Philadelphia, has been elected a director of the company to fill the vacancy in the board caused by the death on Sept. 21 of Rudulph Ellis, who was President of the institution. W. Littleton, formerly Assistant to the Vice-President, has been chosen a Vice-President of the company.

Adolf Blau of Scranton, Pa., whose private bank closed on June 11, was found guilty on Oct. 28 on a charge of receiving deposits when he knew his bank to be insolvent. At the time of the suspension of the bank it was stated by Blau's attorneys that the deposits totaled \$450,000, while the assets, including Blau's equity in real estate, amounted to about \$175,000. It is stated that there are other indictments against Blau and that his attorneys will request a change of venue.

Announcement is made of the consolidation of the Commercial National Bank of Pittsburgh with the Commonwealth Trust Co. of that city. With reference to the union John W. Herron, President of the trust company, stated that the Commonwealth Trust had been considering for some time the necessity of securing more space for the proper transaction of its business and as the company owned the entire capital of the Commercial National and the interests of both banks were largely indentical, it was decided to consolidate the bank with the trust company rather than remove it to some other location. The Commercial National had a capital of \$300,000 and under the last call showed surplus and profits of \$203,782 and deposits of \$2,160,760. The Commonwealth Trust Co. has a capital of \$1,500,000, surplus and profits of about \$1,400,000 and deposits of approximately \$4,800,000. Samuel Bailey Jr., President of the Commercial National, was recently elected Secretary of the Dollar Savings Bank but will retain his interest in the Commonwealth Trust, remaining a director and a member of its finance committee. Charles D. Richardson, Cashier of the Commercial National Bank, has been elected Assistant Secretary and Treasurer of the trust company.

Ernest F. Proffen has been elected Acting Cashier of the Park Bank of Baltimore. The post became vacant, as noted in our issue of Saturday last, with the resignation of William B. Baker.

The First National Bank and the First Trust & Savings Co. of Cleveland lay claim to having the best lighted building in the world. On the evening of Oct. 27, as the climax to a banquet of the "First" Club, a brilliant white light was thrown upon the facade of the structure from the roof of the building across the street. The illumination came from a battery of reflectors, the combined rays exceeding 1,250,000 candle power. The sculptured details of the massive Corinthian building stood forth in daylight whiteness, sharply defined against the eity's night. According to experts, this new lighting system, which has been perfected by the National Lamp Works, marks a new era in the exterior illumination of monumental structures. The banquet held before the illumination was attended by the officers and employees of the affiliated institutions to the number of 250. As another evidence of progress, the most recent statement of the First National Bank indicated a growth in resources of \$7,-000,000 during the past twelve months, while the First Trust & Savings Co. gained more than \$4,000,000 in resources in the same period.

Charles H. Conover, President of Hibbard, Spencer, Bartlett & Co. of Chicago, died on the 4th inst. Mr. Conover was a director of the National Bank of the Republic Chicago, and the Chicago Great Western RR. He was sixty-eight years of age.

A new banking institution is being organized in Chicago to be known as the Wilson Avenue National Bank. The capital of the institution is to be \$200,000 and it is proposed to begin business with a surplus of \$20,000, the stock being sold at \$110 per share. William Hardy, President of the Edgewater State Bank, is said to be interested in the movement to establish the proposed institution.

In a report filed in the U. S. District Court in St. Louis on Oct. 19 in a suit brought by investors in property in University City against the People's Savings Trust Co., Special Master Walter D. Coles finds that the trust company has been guilty of a breach of its trust and recommends that a judgment for \$98,001 be entered against it in favor of the complainants. The People's Savings Trust Co., which was an E. G. Lewis enterprise, is in the hands of a receiver. The suit was brought by Henry Biddle and others against the trust company, the University Heights Realty & Development Co., and L. B. Tebbetts, Chairman of the Executive Board of the latter and is one of many growing out of the failure of the Lewis enterprises.

The Broadway Bank of St. Louis, situated at Broadway and Soulard Street, failed to open its doors on the Sth inst., having been placed in the hands of the State Bank Commissioner. Announcement was made that the affairs of the bank would be liquidated. The institution did not, as was its custom, open for business last Saturday night, the 6th inst. Edward Beisbarth, President of the bank, issued a statement to the effect that the institution had been placed in the hands of the Bank Commissioner when it became apparent that there might be a run on it as a result of its failure to open Saturday night. Mr. Beisbarth said that the closing of the bank was due to the fact that the National Bank of Commerce had declined to act as clearing agent for the Broadway Bank any longer. He also stated that the bank was solvent and that the depositors would lose nothing. Walker Hill, President of the St. Louis Clearing-House Association, issued the following statement regarding the closing of the bank:

regarding the closing of the bank: The Broadway Bank of this city failed to open its doors this morning. It was a small outlying bank and not a member of the Clearing House. This bank was affiliated with the Bankers Trust Co., now in a receiver's hands, and the suspension is said to be due to loans and securities of speculative and development enterprises in which the Bankers Trust Co. was interested and promoted. The Broadway Bank has no affiliation with any financial institution in the net disc support of the the Bankers of financial institution in

The Broadway Bank has no affiliation with any financial institution in the city, and the suspension will not affect general business or financial conditions.

The Broadway Bank was formerly a national institution but was reorganized as a State bank about two years ago. Mr. Beisbarth became President of the bank last January, succeeding F. Ernest Cramer. It was said in banking circles that the difficulties of the Broadway Bank are traceable to the administration of the Bankers Trust Co. when that institution held a large block of its stock. The Bankers Trust was placed in the hands of a receiver in Sept. 1914. As heretofore stated, Mr. Beisbarth took over last December 411 shares of the Broadway Bank, which had been held by the Bankers Trust Co. He acquired a controlling interest at that time, having previously been the owner of 155 shares. The last statement of the Broadway Bank, issued on Sept. 2, showed capital of \$100,000, deposits of \$820,543 and undivided profits of \$4,024.

The American National Bank of Richmond, Va., began business Nov. 1 1899, sixteen years ago. As showing its growth in the interval since then, the following comparative figures are furnished in a little folder issued by the bank and entitled "Sixteen Years of Steady Progress." Total resources at the end of the first year, \$1,123,000; at the end of the fourth year, \$2,599,000; at the end of the eighth year, \$4,487,000; at the end of the twelfth year, \$6,274,000; at the end of the sixteenth year, \$10,111,000. Capital, surplus and profits in the year 1900 were \$218,000; in the year 1905, \$526,000; in the year 1910 \$814,000 and in 1915, \$1,731,000.

Stockholders of the old Southern National Bank of Louisville, merged last July with the American National Bank which later became the American-Southern National Bank, received on the 1st inst., a dividend of 40% in the liquidation of the assets of the Southern National. The dividend, which amounts to \$200,000, is the first paid on the capital stock of \$500,000 of the Southern National. A notice sent to the stockholders by Brainard Lemon, acting for the liquidation committee, says in part :

The board of directors feel much pleased to announce that all the deposits

You will recall that the pledge of the assets of the Southern National Bank have been paid. You will recall that the pledge of the assets of the Southern National Bank was made to the American National Bank to secure the payments of the deposits, which amounted to over \$3,200,000. The transfer was made on the 6th of July. During this brief period sufficient assets of the South-ern National have been realized upon and this deposit account has been readd in full. The remaining assets have been turned over to the liquidating com-

mittee, which was appointed by the board of directors, and consists of Messrs. Lemon, Ezzell and Thlemann. This committee reports that they have sufficient money on hand to make a dividend of 40% on the

they have sufficient money on hand to make a dividend of 40% on the lst of November. Every effort will be made by the liquidating committee and the board of directors to reduce to cash the remaining assets of the Southern National Bank, and it is believed that in a very short while other dividends can be paid. Everything is being done that is possible and wise to secure payment of all outstanding obligations at the Southern National Bank so that the amount may be distributed among the stockholders. The sale of the banking house for \$63,000 and \$100,000 bonus were most fortunate transactions, both for the Southern National Bank and the American National Bank, and this leaves the American Southern National Bank with the largest deposite of any bank in the State of Kentucky.

Bank with the largest deposits of any bank in the State of Kentucky

The suspension of the First National Bank of Toccoa. Ga., on the 8th inst. has occasioned the issuance of the following statement by the Comptroller of the Currency

First National Bank of Toecoa, Georgia, capital \$75.000, surplus \$20,000, deposits about \$150,000, has closed its doors. Its failure is due to continued mismanagement, the tying up of its capital and deposits in loans to its President, Vice-President, Cashier and other directors and enterprises in which these officers and directors are interested. Other irregularities include excessive borrowings, unlawful real estate loans and other violations of the National Bank Act against which the bank has been repeatedly warned by this office,

A 5% dividend was paid to the creditors of the defunct Exchange Bank of Macon, Ga., on the 5th inst. As heretofore stated, the Exchange Bank suspended on July 7 1907. It had a capital of \$500,000. The present dividend, which is the first to be paid since 1911, makes a total dis-bursement of 90%. The receivers are C. T. King, B. P. O'Neil and R. J. Taylor.

R. S. Hecht, Trust Officer of the Hibernia Bank & Trust Co. of New Orleans, has been appointed Commissioner of the Dock Board of the Port of New O leans. Mr. Hecht became Assistant Manager of the foreign department of the Hibernia Bank & Trust in 1907, and since Janua y 1911 has been Trust Officer of the institution.

A block of stock of the Merchants' National Bank of San Francisco, consisting of approximately 4,000 is reported to have been purchased by R. N. Burgess, William T. Summers, W. F. Williamson and others. Mr. Summers is President of the Union National Bank of San Luis Obispo, Calif. It is stated that there will be no changes in the executive officers of the Merchants' National as a result of \$1,500,000 in \$100 shares. According to the San Fran-cisco "Chronicle," the interest just taken over by Mr. Burgess and his associates, together with the holdings of their friends in the present management, constitutes control.

Charles Cambie, formerly Manager of the Ottawa branch of the Canadian Bank of Commerce (head office, Toronto) has been appointed as representative of the bank in London, succeeding H. V. F. Jones, who was recently made Assistant General Manager of the institution. Mr. Cambie's position at Ottawa will be filled by D. M. Hamilton, heretofore Assistant Manager of the bank's branch at Vancouver. A. A. Wilson, who has been Manager of the Fort William branch, has been chosen Assistant Manager of the San Francisco office. Mr. Wilson is succeeded at Fort William by R. M. Saunders.

#### THE ENGLISH GOLD AND SILVER MARKETS.

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of October 28 1915:

October 28 1915: GOLD, External movements have been again adverse to the Bank of England. The following amounts were received by the Bank: Oct. 27 — 4756.000 in bar gold. Withdrawals were made as under: "ct. 21 — 2600.000 in sovereigns for Spain. ct. 21 — 70,000 in sovereigns for Argentina.

- Oct. 21-20,000 in sovereigns for Uruguay
- -1,245,000 in sovereigns for the U. S. A. Oct. 22

Oct. 22-1,245,000 in sovereigns for the U. S. A.
Oct. 22- 100,000 in sovereigns sor Japan.
Oct. 25- 175,000 in sovereigns sort aside on miscellaneous account.
Oct. 25- 100,000 in sovereigns set aside on Egyptian account.
Oct. 26- 865,000 in sovereigns for the U. S. A.
Oct. 27- 455,000 in sovereigns for the U. S. A.
Oct. 27- 100,000 in sovereigns for the U. S. A.
Oct. 27- 75,000 in sovereigns for the U. S. A.
Oct. 27- 75,000 in sovereigns for the U. S. A.
Oct. 27- 75,000 in sovereigns for the Continent.
Oct. 27- 75,000 in sovereigns set aside on miscellaneous account.
During the week the net reduction amounted to 23,049,000. The output of Rhodenia for September 1915 amounted to 2321,003, compared with 2309,398 for September 1915 amounted to 2135,744, compared with £154,316 for September 1915 amounted to £135,744, compared with £154,316 for September 1914 and £139,364 for August 1915.

2154,316 for September 1914 and 2139,364 for August 1915. SILVER. The excellent undertone which has been maintained for so long, owing chiefly to the more or less continuous purchases for home coinage, has been again emphasized by an almost continuous advance in prices during the week. At the present time only moderate amounts seem to come into the market when prices recede to any considerable fraction below the level of 244. If there is competition buyers do not find enough to go round, and the neice has to prevene until the market is beend enough to go round.

#### TRADE AND TRAFFIC MOVEMENTS.

TRADE AND TRAFFIC MOVEMENTS. UNFILLED ORDERS OF STEEL CORPORATION.— The United States Steel Corporation on Wednesday, Oct. 10, issued its regular monthly statement showing the unfilled orders on the books of the subsidiary corporations at the close of October. From this statement it appears that the aggregate of unfilled orders on Oct. 31 was 6,165,452 tons, recording an increase of 847,834 tons over last month, when the amount of outstanding orders was 5,317,618 tons. These are the highest figures since May 31 1913, when the amount of outstanding orders was 6,324,322 tons. In the following we give the comparisons with previous months: Tons.] Tons.] Tons.

		Apr. 30 19125,664,885	

The figures prior to July 31 1910 were issued quarterly only. These, extending back to 1901, were given in the "Chronicle" of March 13 1915, page 876.

"Chronicle" of March 13 1915, page 876. ANTHRACITE COAL PRODUCTION.— Anthracite coal shipments during October as reported to the Anthracite Bureau of Information aggregated 6,505,892 tons, against 6,644,476 tons for the corresponding month last year, a de-crease of 138,584 tons. The reduction is in the shipments from the Wyoming and Lehigh regions, whose combined total shows a decrease of 250,510 tons, while the shipments from the Schuylkill region increased 111,926 tons. The movo-ment for October 1915, it is stated, includes all the coal shipped from the breakers or washeries. In previous state-ments a relatively unimportant quantity put into storage by one of the transportation companies was not included. Below we give the shipments by the various carriers for October 1915 and 1914 and for the ten months ending Oct. 31:

Nov. 13 1915.]

Imports for the week in 1915, 395,000 were American gold coin

The Federal Reserve Banks.—Following is the weekly statement issued by the Federal Reserve Board on Nov: 6: A gain of 7.8 millions in the total reserves of the Federal Reserve banks and a still larger gain of 13.3 millions in their combined gold reserves for by the federal Reserve banks and a still larger gain of 13.3 millions in their combined gold reserves for by the harceases in gold and total cash shown for the week by the New York bank. The Minneapolis bank reports an increase of 1.4 millions store than accounted for by the increases in gold and total cash shown for the week by the New York bank. The Minneapolis bank reports an increase of 1.4 millions of system total 48.7 million dollars. Compared with 43.2 millions reported a week ago, 415.4 about a month ago and 345.9 millions and the federal Reserve bard. To find indidings 154 millions are held by the Federal Reserve banks, the combined figures for these three banks showing a declino of the total gold holdings 154.500, mainly at the New York and Philadelphia banks. Of the total difficult of commercial paper is reported larger bill holdings than the week before. Bankers' acceptances on hand show a gain for the state han for the previous week. Thus the proportion of paper maturing after 90 days the average maturity of all the paper held by the banks is apparently obta han for the previous week. Thus the proportion of paper maturing within 10 days decreased furing the week from 15.8% to 13.6%. On the banks are considerable liquidation during the week of our state 60 and within 90 days increased rom 19.2% to 19.7%, while the proportion of paper maturing after 90 days increased from 19.2% to 19.7%, while the proportion of paper maturing after 90 days increased from 19.2% to 19.7%, while the proportion of paper maturing after 90 days increased from 19.2% to 19.7%, while the proportion of paper maturing after 90 days increased from 19.2% to 19.7%, while the proportion of paper maturing after 90 days increased from 19.2% to 19.7%, while the proportion of pa

The figures of the consolidated statement for the system as a whole are given in the following table, and in addition we present the results for each of the eight preceding weeks, thus furnishing a useful comparison. In the second table we show the resources and liabilities separately for each of the twelve Federal Reserve banks. The statement of Federal Reserve Agents' Accounts (the third table following) gives details regarding the transactions in Federal Reserve notes between the Comptroller and the Reserve Agents and between the latter and the Federal Reserve banks. #### THE CHRONICLE

Statement of New York City Clearing-House Banks and Trust Companies.—The following detailed statement shows the condition of the New York City Clearing-House members for the week ending November 6. The figures for the separate banks are the averages of the daily results. In the case of the totals, actual figures at the end of the week are also given. In order to furnish a comparison, we have inserted the totals of actual condition for each of the three groups and also the grand aggregates, for the four preceding weeks.

Deposits.

In addition to the returns of "State banks and trust companies in New York City not in the Clearing House" furnished by the State Banking Department, the Department also presents a statement covering all the institutions of this class in the whole State. The figures are compiled so as to distinguish between the results for New York City (Greater New York) and those for the rest of the State, as per the following:

For definitions and rules under which the various items are made up, see "Chronicle," V. 98, p. 1661.

The provisions of the law governing the reserve requirements of State banking institutions were published in the "Chronicle" March 28 1914 (V. 98, p. 968). The regulations relating to calculating the amount of deposits and what deductions are permitted in the computation of the reserves were given in the "Chronicle" April 4 1914 (V. 98, p. 1045).

## Bankers' Gazette.

Wall Street, Friday Night, Nov. 12 1915. Market and Financial Situation.-The Money The money market and Financial Studition.—In the stock market the expected has happened this week. We refer to a sharp decline of the shares of several manu-facturing concerns, whose product is largely exported, the recent phenomenal advance of which seems not to have been justified. The downward movement was not excessive, and for the moment gives evidence of having run its course.

been justified. The downward movement was not excessive, and for the moment gives evidence of having run its course. In the meantime railway securities have continued to be in favor as the news of the week from every department of activity is of a hopeful character. The increase in rail-way traffic is almost unprecedented, so that lack of equip-ment and congestion is getting to be, in some cases, a serious matter. The U. S. Steel Corporation's report of unfilled orders at the end of October shows that they increased during the month 847,000 tons, notwithstanding the very large output and advance in prices during the period. It is interesting, moreover, to note that a large part of this increase is from domestic sources, in which the railways of the country are conspicuous.

The country are conspicuous. The Government crop report of condition on Nov. 1st estimates a total of over three billion bushels of corn, which, except that of 1912, is the largest crop ever harvested. As a natural result of the foregoing, railway passenger traffic has rapidly increased of late so that to be sure of securing desirable hotel accommodation it is quite necessary to apply in advance.

securing desirable hotel accommodation it is quite necessary to apply in advance. The whole country has been surprised and more or less disturbed by the torpedoing of a transatlantic passenger steamer and reported destruction of many lives, including, it is feared, some American eilizens. This event was wholly unexpected, as it was generally supposed that the pledge of the German Government, to the effect that in future naval operations during the war the rights and lives of American eitizens would be respected, applied to its Allies as well as to itself. If it should develop that in this we have been in error, it is better that we know the fact. Official information in detail of the incident referred to is, however, as yet lacking and in the absence of this the matter however, as yet lacking and in the absence of this the matter cannot, of course, be intelligently discussed.

Foreign Exchange.—The market for sterling exchange was somewhat erratic, but towards the close showed a generally firmer undertone.

erally firmer undertone. To-day's (Friday's) actual rates for sterling exchange were 4 6114 @4 62 for sixty days, 4 6555 @4 6555 for checks and 4 6614 @4 6614 for cables. Commercial on banks (sixty days) 4 6014 and documents for payment (sixty days) 4 6144. Cotton for payment 4 65 and grain for payment 4 65. To-day's (Friday's) actual rates for Paris bankers' frances were nominal for long and 5 9914 for short. Germany bankers' marks were nominal. Amsterdam bankers' guilders were 4114 @42 for short. Exchange at Paris on London, 27.8415 fr.; week's range, 27.77 fr. high and 27.941 fr. low. Exchange at Berlin on London, not quotable. The range for foreign exchange for the week follows:

United States Bonds.—Sales of Government securities at the Board are limited to \$2,500 3s, coup., at 101 1/s. For to-day's prices of all the different issues and for weekly range see third page following.

Railroad and Miscellaneous Stores. It irregular, both has continued active and has been decidedly irregular, both Railroad and Miscellaneous Stocks. - The stock market

has continued active and has been decidedly irregular, both in volume of business and movement of prices. The total transactions for the week have, however, aggregated large and average prices are but slightly changed. The reaction which began last Friday continued until Wednesday, when the railway list showed a net loss of from 2 to 4 points and manufacturing stocks a wider margin. On Wednesday a reverse movement set in which has restored nearly the whole list of active issues to its former level. The exceptions are a few of the munition manufacturing stocks which evidently were too high. As a result of the week's operations, no net changes in the railway list are worthy of note unless it be Great North-ern, which, for some unknown reason, unless it be foreign

the railway list are worthy of note unless it be Great North-ern, which, for some unknown reason, unless it be foreign selling, shows a loss of 2 points. In the industrial list, how-ever, fluctuations have, as noted above, been wider with varying net results. General Motors has covered a range of 29 points, Beth. Steel 50, Baldwin Locomotive 22, U. S. Ind. Alcohol 14½, Colo. Fuel & Iron and Max. Motors 11, Lack. Steel 10 and Allis-Chal., Am. Car & Foundry, Am. Linseed, Am. Locomotive, Smelt. & Ref., Am. Steel Fdry., Crue. Steel, Pressed Steel Car and Westinghouse from 7 to 9½ points. U. S. Steel has been far and away the most active stock, and closes with a net gain of 1 point. For daily colume of business see page 1619. The following sales have occurred this week of shares not represented in our detailed list on the pages which follow:

**Outside Securities.**—Trading in securities on the Broad Street curb was brisk this week and prices show, in a number of cases, substantial advances. American Zine dropped from 69 to 653%, rallying at the close to 68¼. Canadian Car & Foundry, from 101 advanced to 105, declined 15 points to 90, but was quoted at 99 as a final price. Chandler Motors and Cheverolet Motors, fell away 7½ and 13 points, respectively, from their closing prices last Friday of 94½ and 133. The last sales, however, showed an increase of 234 and 5 points. Cramp Shipbuilding Co. dropped from 85 to 81. International Mercantile Marine, after falling off from 183% to 15, jumped to 22¼, closing to-day at 20. Kelly-Springfield Tire fluctuated between 288 and 298. Midvale Steel, from 85½, fell away to 76, but recovered at closing to 83. Submarine Boat v.t. etfs., Tobacco Products com, and World Film advanced, respectively, from 40½, 35 and 4½. Sales of Standard Oil subsidiaries were not heavy and prices suffered a general decline. Houston Oil lost 1 point, closing at 18½, while Illinois Pipe Line fluctuated between 152 and 156. Ohio Oil and Pierce Oil, from 162 and 164, declined to 159 and 15, respectively. The last price, however, indicates a recovery of 3 and 1 points. Standard Oil of California fell off from 317½ to 309. Standard Oil of New Jersey dropped from 488 to 309. Standard Oil of New Jersey dropped from 484 to 309. Standard Oil of New Jersey dropped from 484, while Standard Oil of New York advanced from 204 to 205, declined to 201, the closing being at 203. Among the bonds sold were \$295,000 Cerro de Pasco 6s, at 118-120½; \$100,000 Kennecut Copper 6s, at 159-167 and \$225,000 Braden Care Marked and the standard Oil of New Jersey dropped from 485 to 201, the closing being at 203. Among the bonds sold were \$295,000 Cerro de Pasco 6s, at 118-120½; \$100,000 Kennecut Copper 6s, at 159-167 and \$225,000 Braden Care Marked Batter 205, declined to 201, the closing being at 203. Among the bonds sold were \$295,000 Cerro de Pasco 6s, at 118-120½; Outside Securities .- Trading in securities on the Broad

# THE CHRONICLE

# Investment and Railroad Intelligence.

RAILROAD GROSS EARNINGS. The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from July 1 to and including the latest week or month. We add a supplementary statement to show the fiscal year totals of those roads whose fiscal year does not begin with July, but covers some other period. The returns of the electric railways are brought together separately on a subsequent page.

### ANNUAL REPORTS

Annual Reports.—An index to annual reports of steam railroads, street railways and miscellaneous companies which have been published during the preceding month will be given on the last Saturday of each month. This index will not include reports in the issue of the "Chroniele" in which it is published. The latest index will be found in the issue of Oct. 30. The next will appear in that of Nov. 27.

Seaboard Air Line Railway. (Report for Fiscal Year ending June 30 1915.) On a subsequent page are given at length the remarks of President Harahan. As to the pending consolidation with the Carolina Atlantic & Western and the proposed new mort-gage, see V. 101, p. 528, 1189, 1273. The shareholders will vote on the plan on Monday, Nov. 15.

### Vicksburg Shreveport & Pacific Railway.

(15th Annual Report-Year ended June 30 1915.)

Pres. Larz A. Jones, Aug. 16, wrote in substance:

(15th Annual Report—Year ended June 30 1915.)
Pres. Larz A. Jones, Aug. 16, wrote in substance:
Property—Of the 171.47 miles of main track operated. 154.03 miles are divide 75-10, steel rails and 17.44 miles with 60-b. steel rails. During the year there were laid in the main track 6.57 miles of 7.5-10, steel rails in replacement of 60-b, steel rails. There are 36.619 lineal feet of bridge structure on the main line between Delta and Shreveport, of which 3.029 feet are steel and iron spans and 33.590 feet wooden trestles. Since the steel are steel and iron spans and 33.590 feet wooden trestles. Since the steel are steel and iron spans and 33.590 feet wooden trestles. Since the 36.619 lineal feet of the steel rails in the main track 6.57 miles of 7.578 ft. to 33.590.
Tright and other cars. During the year three passenger locomotives and 25 cars were purchased and 72 cars were retired: 4.50 of the freight cars retired for 36.610 line (ass. During the last ten years the number of freight cars for an steen increased 15%, while the total carrying capacity has been increased from 26.78.78 ft. to 32.34%, a decrease in operating revenues of \$422.38, or 32.34%, a decrease in operating revenues of steed or 11.14%, and an increase in a steen increased and the production, while the demand and prices for lumber of the line test of grounds. There were the additions the every outdok for the current year is good and the productive ability of the prespine in the territory tributary to your property is as great as before, so that we are a resulted and 20 your steed raise been draged to complete and the inspinet and the inspinet and the spense. The property has been well maintained and 3% or the regime and refer to a structure will be a spense that for a line the term productive ability of the prespine in the territory tributary to your property is as great as before, so that we are a resulted and 2.56.00 to a store of all equipment thas been draged to expense.

### Detroit & Mackinac Railway.

(Report for Fiscal Year ending June 30 1915.)

(Report for Fiscal Year ending June 30 1915.) J. D. Hawks, V.-P. & Gen. Mgr., Sept. 6, wrote in subst.: Business conditions during the past year have with but few exceptions been duil and unprofitable, especially so in lumber and forest products, which in the past have contributed such a large part of our traffic. Earn-ings have shown a steady decrease, and even with the greatest economy the road has been unable to reduce expenses as much as gross carnings declined. Owing to these conditions, siter having paid for 445 years a dividend of 5% on both stocks. It was thought a wing paid for 445 years a dividend of 5% on both stocks. It was thought a wing bail for 445 years of the dividend of 5% on both stocks. It was thought a wing bail for 445 years of the dividend of 5% on both stocks. It was thought a wing bail for 445 years of the dividend of 5% on both stocks. It was thought a wing bails to be dividend of 5% on both stocks. It was thought a wing bails of 445 years to make the Au Sable & Northwestern broad gauge to conform with the other milleage of the system. At this date our gross earnings still show, month by month, a steady de-cline. However, it has been deerned wise to for the winter starts in, two steel bridges, replacing wooden bridges. With these bridges and a change of line at Ossineke about a mile long, which we propose to complete

another year, our main line from Bay City to Cheboygan, 105 miles, with the exception of Alpena, will have permanent bridges and masomry its whole distance. leaving only some wooden culverts to be replaced by iron pipe and concrete. When this has been done your line, with a new bridge at Alpena, or some strengthening of present girders, will be hald its entire length with 70 to 85-fb, steel calls, steel bridges on concrete, ballasted throughout and physically in as good shape as any of the trunk lines in the State of Michigan. All that will be required then will be fair treatment from the State in the matter of rates, on both passengers and freight, and an increase of business, and it should put your property, which is capital-ized at about 50% less than it would cost to reproduce, on a paying basis. The Great Lakes Stone & Line Co., mentioned in report for 1913, is shipping stone. Other companies are taking of opening more quarries. The road has been kept up to our usual standard. The number of freight cars in need of extensive repairs has been reduced by 200 cars.

### The Virginian Railway Company.

(6th Annual Report-Year ended June 30 1915.)

The report, dated at N. Y., Sept. 29, and signed by Charles W. Hotchkiss, Chairman of the Board, and Raymond Du-Puy, President, says in substance (Compare map on p. 127 of "Railway and Industrial Section"):

of "Railway and Industrial Section"): Mileage.—A branch, 1.12 miles, was built up Allen Creek to reach a new coal operation. The 5.05 miles of double track at and through the Elmore Yard was completed and put in operation. Results.—Operating revenue decreased from relight traffic \$720.154, equal to 12.44%; increased from passenger traffic \$15.456, equal to 3.98%; decreased from mall and express, \$4.851, equal to 6.29%; and increased from miscellaneous revenue \$189.876, equal to 2.25, 14%. Total operating revenue decreased \$10.674, or 3.20%. Operating ex-penses decreased \$155.369, or 4.43%. Not revenue from operation de-creased \$363.304, or 12.94%. Cross income decreased \$485,309, equal to 16.84%. The ratio of operating expenses to operating revenue was 58.02%. against 55.73% for the preceding year While fully maintaining the track and equipment, we enforced the most rigid economy in transportation expenses, resulting in a slight decrease which was due largely to tying up some of the lighter power. Financial.—No new financing was done during the year. Equipment.—There were received and paid for during the year, Equipment.—There were received and paid for during the year.

the ratio of the cost of this department to total operating expenses, which was duragely to tyring up some of the lighter power.
 Francial.—No new financing was done during the year.
 Equipment.—There were received and paid for during the year? 775 steed for in the product cars, being the remainder of the 1.000 cars contracted for in the product year, but no other new equipment was purchased nor contracted for in the product year, but no other new equipment was purchased nor contracted for the polley of rebuilding wooden stock and box cars using steel underfames was continued, and 405 cars were so rebuilt. Of the total cost of \$140,919, \$109,303 was charged to operation and \$31,989 to capital. The init amounts expended for repairs to equipment compared as follows: Per 408, \$2,831 in 1914-15 against \$3,004 in 1913-41; per passenger car, so is against \$629; per freight car. \$44 against \$462 in 1913-44, a decrease of 11.03 %. Thirteen wooden bridges, aggregating \$35,215, of which \$10,298 was charged to operation and balance to capital. \$7,033 en. yds, for 208 was charged to operation and balance to capital. \$7,033 en. yds, for which and in sidings, spur tracks and yards. ### New Orleans & North Eastern Railroad.

(31st Annual Report-Year ended June 30 1915.)

<section-header><section-header><section-header><text><text><text><text><text><text><text>

The replacement of open trestles by creosoted ballast deck trestles was continued, involving a betterment expenditure of \$5.265. The length of completed trestles of this type is now 13.017 feet. One trestle on the main line, 123 feet in length, was converted into a culvert and one 16-foot treatle, with corresponding trestle on side track, was filled at a betterment out of \$2.068; 99 main line trestles, 9.951 feet in length, were stremsthomed at a betterment cost of \$5.357; 12.202 yards of slag were used in replacing gravel ballast at a betterment cost of \$6.179; \$3.313 was expended in betterment of rails and \$5.343 in betterment of rail joints. Automatic block signals on about 5 miles adjacent to Eilbaville were completed at an additional cost of \$2.047. During the year five passenger locomotives, three freight locomotives, for steel gondola cars, 47 steel underframe drop bottom gondola cars and 243 steel underframe box cars, purchased mider an equipment trust and one trash car were added to the equipment. Three passenger locomotives were sold and 101 cars were destroyed. Car Trusts.—The company made an equipment trust arreemont for the purchase of eight locomotives and 340 freight cars, costing \$472.233, for which 4/5% lease warrants, amounting to \$340,000, were issued, extending over a period of ten years, payable in semi-annual installments. These warrants were reduced by the payment during the year of \$17,000. Is to extension of \$1,320.000 prior line 6s of 1885 to Nov. 1 1940 at 5% interest, see V. 101, p. 774.] OPERATIONS AND FISCAL RESULTS (196 MILES.)

### Lehigh & Hudson River Railway Co.

(33d Annual Report-Year ended June 30 1915.)

Pres. Lewis A. Riley, Warwick, N.Y., Sept. 1 wrote in subst.

Pres. Lewis A. Riley, Warwick, N. Y., Sept. 1 wrote in subst. Financial.—The net income from operation for the year, amounting to \$26,299, is accounted for as follows: Additions and betterments (net), \$33,565, after deducting credits of \$11,569; equipment trust certificates plot, 200, materials and supplies Increased \$3,158; working assets and increased \$20,000, reducing same to \$40,000; dividends paid, two of 4%; each, \$66,510, \$261,299.
Teaching the gross earnings increased \$41,793, or 2.35%; operating ex-monophic trust and the supplies increased \$41,793, or 2.35%; operating ex-monophic trust and the supplies increased \$10,800; working assets and increased \$98,744, or 7,64%; surplus from operation increased \$128, or \$66,510, \$261,299.
Teaching the gross earnings increased \$41,793, or 2.35%; operating ex-monophic trust and \$40,000%; itoms one mile, 316,250,138, increase of \$0,50%. Freight traffic \$1,169,429, increase \$1,14%. Average revenue per ton mile, 5,12 mills, increase 2,19%. Company's freight, additional, \$4,050 tons, and \$405,404 ton miles. Average traindout provenue freight 559 tons, increase 27 tons; including company's freight, additional, \$4,050 tons, and \$403,404 ton miles. Average traindout provenue freight 559 tons, increase 27 tons; including company's freight, additional, \$6,050 tons, and \$405,404 ton miles. Average traindout provenue freight 559 tons, increase 27 tons; including company's freight, additional, \$6,050 tons, and \$40,240; tons miles. Average traindout provenue freight 559 tons, increase 2,114,883, decrease of \$3837; passengers, mean \$5,08%.
The sum of \$243,923 was expended for maintenance of way and structures, decrease of 482%; is evaluated for 56,56 in 1913,42,42 and the tool-18, and 51,220 ties placed, as against 46,765 in 1913,44,42 and the sum and the sum of \$243,923 was expended for maintenance of way and structures, decrease of the sum of \$243,923 was expended for maintenance of an and structures, decrease of the sum of \$243,923 was expended for

	revenue freight 589 tons, increase 27 tons; including company's freight,
San Antonio & Aransas Pass Railway.	506 tons. Revenue from passengers, \$114,883, decrease of \$887; passengers one mile, 5,561,130, decrease 5.26%; revenue per pass, mile 2.07 cts.
(Report for Fiscal Year ending June 30 1915.)	Increase 5.08%.
Pros. W. H. McIntyre, Oct. 6, wrote in substance:	Maintenance.—The sum of \$243,923 was expended for maintenance of way and structures, decrease of 4.82%; 8.41 miles of 100-lb. rail were laid.
Funded DebtThe Decrease in equipment obligations of \$203,591 is due to the retirement of notes.	replacing 80-lb, rall, and 51,220 ties placed, as against 46 765 in 1913-14
Capital Expenditures These aggregated \$205.611: less credit for equin-	The road is now laid with steel rall as follows: 42.97 miles 80-lb., 31.63 miles 100-lb. Maintenance of equipment aggregated \$234,422, a de-
ment retired, \$49,928; net, \$100,083.	crease of \$33.541, or 12.52%.

### American Linseed Company, New York.

(Report for Fiscal Year ending Sept. 30 1915.)

Pres. R. H. Adams, N. Y., Nov. 9, wrote in substance:

These fields for the Atlantics, field the business that it has been impossible to fore-tell conditions from month to month. In splite of this, however, this report not only shows a handsome increase in profits but a considerable decrease in operating expenses. All additions and improvements have been charged to cost of operating, and the physical condition of the properties, we be-lieve, was never better. Our increasing surplus has caused inquiries as to when dividend payments would probably be resumed, and in response we may say that the officers

would not feel justified in giving consideration to the question of dividends until the company has accumulated a surplus sufficient to enable it to operate in the future, were it obliged to do so with funds from the ordinary channels instead of under the exceptionally favorable contracts of some years past with John D. Rockefeller. Under this agreement Mr. Rocke-feller has provided the company with any capital required, as a 5% loan, without collateral, on open book account, subject to draft as needed and payable as the company has funds. We feel that the company could not otherwise obtain the large amounts required a tertain periods of the year on any such favorable basis without giving collateral.

or s2,129,000. For six months ending June 30 1915 there was a surplus over all interest charges of \$1,800,000.-V. 101, p. 1272, 1189. Hilo RR.—Committee—Annual Report.— The shareholders at Honolulu recently appointed W. F. Frae, George Rodliek, John Kidwell, R. H. Trent and Albert Waterhouse as a committee to confer with the committee representing the bondholders of the road, in an effort to arrange terms whereby present stockholders may participate in the reorganization. The plan is said to contemplate foreelosure and the formation of a new company with a 5% bond issue of \$2,500,000, as against the present outstanding issues of \$4,500,000 at 6%, and an annual interest charge of only \$125,000 annually, as against \$270,000 at present. See report on a preceding page.-V. 101, p. 1180. Kansas City Outer Belt & Electric RR.—Plan.— See Kansas City Mexico & Orient RR. above.-V. 95, p. 1472, 968. Kansas City Mexico & Orient RR..—Proposed Plan.— There being outstanding \$5,640,200 two-year gold notes that mature on April 30 1916, the preliminary steps are being taken with a view when financial conditions are favorable to the completion of the organization. To this end a hearing was to be held before the Kansas P. U. Commission on Nov. 9 regarding a plan which has been unofficially out-lined as follows: lined as follows:

Was to be held before the Kansas P. C. Commission on Nov. 9 regarding a plan which has been unofficially outlined as follows:
 The reorganization committee of the old road is asking permission to issue \$15,000.006 in bonds to take care of outstanding obligations, complete the line into Kansas City from Wichita, and take over the Kansas City Outer Belt RR. (V. 95, p. 480, 968, 1472). Permission is also asked to issue \$560,000,000 capital stock, half each common and preferred, of which it is contemplated at this time to issue \$27,273,330 pref. stock and \$20,064,667 common stock to the bondholders of the old road and the construction companies having claims against it.
 The tentative plan provides that the old bondholders shall turn in \$600 cash with each \$1,000 in old bonds and receive in return a new \$600 000, all olds on all \$1,000 common stock in the reorganized Orient. The three construction companies that built the grade in Kansas, reass and old Mcxico are to creeive \$960,000 cash in the reorganized Orient. The three construction companies that built the grade in Kansas, if desired, be turned in at par in lice of the bonds and slos \$4,398,933 pref. stock and \$1,17,334 common stock for their terminal properties. In order to obtain this stock the bondholders of the Orient.
 The Amasas City Outer Beit bondholders and stockholders are to be given \$16,74,400 pref. stock and \$1,17,334 common stock for their terminal properties. In order to obtain this stock the bondholders of the Orient.
 The near the state completed and in operation in Kansas, Oklahoma and trass. The as been spent in constructing and equiping the road, this not helding the franchise values or right of way or other concessions in Kansas, Oklahoma, and state over and the coastruction completed to kansas City, in addition to gamites graded in Maxico.
 The application to the Commission it is represented that \$22,20,269 in cash has been parelt in constructing and equiping the roa

Sale.—A syndicate headed by Kidder, Peabody & Co. has sold at 99 and int. such part of the new \$7,000,000 1st M. 20-year 4½s as they have received to date. See annual re-port, V. 101, p. 1465, 1090.

Minneapolis & St. Louis RR.—Equipment Certificates.— E. H. Rollins & Sons are offering \$400,000 6% Equipment Trust Ctfs. at prices to yield from 5.60% to 5.75%, accord-ing to the maturity of the certificates. The certificates are dated Nov. 1 1915 and mature \$40,000 annually, Nov. 1 1916 to 1925 inclusive. They are issued to cover the recent purchase by the company of 500 steel underframe box cars. —V. 101, p. 1363, 1272.

Missouri Pacific Ry.—Listing of Certificates of Deposit for Securities Deposited Under Plan.—The New York Stock Exchange has listed the certificates representing securities deposited with the respective committees under the plan of readjustment, and has authorized the listing of further amounts as from time to time issued against further deposits. See last week's "Chroniele," p. 1553. Higher Rates Pending Trial.—A press dispatch from Omaha on Nov. 4 said: The rater of the list for an homen is

Omaha on Nov. 4 said: The railroads won the initial round in a fight for an increase in passenger rates to-day when the Federal Court, with Judges Sanborn, Follock and Munger sitting, granted an infunction to the Missouri Pacifie Ry. Co. restraining the Nebraska State Railway Commission and the Attorney-General from filing suit against the road for raising inter-State rates during the time the case for increased rates is being argued before the higher courts. Passenger rates on this road now may be raised to 3 cts. a mile, with a rebate of 1 cent if the company loses, a deposit of a \$50,000 bond to be filed with the Court to cover the rebate. Though the decision affects only the Missouri Pacific, it is believed other roads will seek a similar injunction. Parameter Pacific, it is believed other roads will seek a similar injunction.

Earnings Improve .- Chairman B. F. Bush Nov. 6 said:

Conditions are improving throughout the Middle West. The Missour Pacific gross earnings for the first week in November ought to show an increase of from \$450,000 to \$500,000. The merchants are beginning to take a more optimistic view of matters and are no longer purchasing from hand to mouth but are inclined to stock up heavily.—V. 101, p. 1559, 1553.

# Monongahela Ry.-Passenger Service.

Regular passenger service was inaugurated Nov. 1 over the new Monon-gahela Ry. from Fairmont to Pittsburgh, 128 miles. The line is owned by the New York Central and the Pennsylvania RR., and both lines operate trains over the road.-V. 101, p. 449, 213.

operate trains over the road.—V. 101, p. 449, 213.
 New Orleans & Northeastern RR.—Report.— See "Annual Reports" on a preceding page.
 Bonds Sold.—Kean, Taylor & Co. recently sold at 102½ and int., yielding about 4.82%, \$687,000 Prior Lien 5% gold bonds of 1905 (part of an issue of \$1,372,000, just extended to Nov. 1 1940), and have placed the entire block. See adv. on another page. A dircular shows:
 A first and closed mortrage upon the caffre property at \$7,000 per mile of road, and also a first lien upon terminals in New Orleans, and upon equipmat. The assessed valuation of these terminals (\$972,307) and the original cost of the equipment covered the inter a \$60,000 capital stock. Dividends averaging 45% annually have been paid on the capital stock for the ten years to June 30 [915. The company's railroad extends from New Orleans, La., to Meridian Miss., forming part of the main line of the so-called "Queen & Crescent Route" between these points and between the order and between the order and between the order and between the order and between York New Haven & Hartford RR.—New Officer —

See Rutand Transit Co. under "Industrials" below.--V. 101, p. 695, 213. St. Louis & San Francisco RE.--Plan.--The tentative plan of reorganization was on Nov. 11 accepted by the Mis-souri P. S. Commission, subject to formal approval after public hearings. Press reports state that as presented the plan calls for a reduction in the capitalization stock and bonds (including the bonds of the Kansas City, Fort Scott & Memphis system, which will remain undisturbed) from about \$356,000,000 to \$327,000,000 and a reduction in the total annual fixed charges of \$5,726,000, the fixed interest charges of the new company to be \$9,160,000, against pres-ent charges of \$14,886,000. The plan will be underwritten by a syndicate of New York bankers headed by Speyer & Co., J. & W. Seligman & Co., Guaranty Trust Co. and Lee, Higginson & Co. The plan will be carried out by J. & W. Seligman & Co., and Speyer & Co., as Reorganization Managers.--V. 101, p. 1554, 1093. M. gold 4½s due 1941. Int. M. & N. The bankers report: Southern Pacific Co.-Bidsfor Stock.-New Director.--

M. gold 4½'s due 1941. Int. M. & N. The bankers report:
 Southern Pacific Co.—Bids for Stack.—New Director.— The New York "Sun" on Nov. 9 said:
 It is reported in the financial district that a strong syndicate has been formed to purchase from the Ponnsylvania RR. Co. the unsold portion of the \$33,292,400 Southern Pacific stock it holds and which it secured in 1913 through the exchange of its \$21,273,000 Ballimore & Ohio stock. The syndicate as reported in Wall Street, consists of Ruhn, Loeb & Co., Hayden, Stone & Co. and Bernard M. Barneh. Those mutual refused yesterday to say anything about the reported syndicate. This holdings of Southern Pacific stock and that the offer was refused. For a year or more there have been bidders for the Pennsylvania KR. was offered 98 for its holdings of Southern Pacific stock and that the offer was refused. For a year or more there have been bidders for the Pennsylvania's Southern Pacific stock. The reported syndicate is said to have offered the company \$100 per share for 100,000 shares of Southern Pacific 100,000 shares. (Do Jan. 1915 Penn. RR. owned \$17, 143,800 and Pann. Co. \$14,201,200 Sou. Pac. Co. stock.]—V. 101, p. 1468, 1568.
 F. D. Underwood, President of the Erie RR., has been chosen a director to succed Cornelins N. Bliss, who resigned.—V. 101, p. 1468, 1466.

# Vicksburg Shreveport & Pacific RR.-Report.-

See "Annual Reports" on a preceding page. Bonds Offered.—Kenn, Taylor & Co. are offering by adv. on another page at 100 ½ and int., yielding over 4.95%, the small unsold portion of their block of \$1,214,000 Prior Lien 5% gold bonds of 1885 (part of the closed issue of \$1,323,000), extended to Nov. 1 1940. Company assumes payment of the normal Federal income tax. A circular says in substance:

A circular says in substance: A first and closed mortgage upon the entire property (including terminals at Shreveport and Monroe) at the low rate of \$7.020 per mile of road; also a first lien upon all of the company's equipment, the original cost of which to March 1 1915 was \$1.290,826, or about \$0,850 per mile of road. Fol-lowed by \$1.922,000 General Mortgage bonds, \$2,142,300 pref. stock, \$2,856,500 common stock. Dividends of 5% have been paid on the pref. stock since 1902, with the exception of 1908. Forms part of the main line of the so-called "Queen & Crescent Route" between Meridian, Miss., and Shreveport. La. Compare V. 101, p. 775, 924.

Shreveport, La. Compare V. 101, p. 775, 924
 Wheeling & Lake Erie RR.—Sale Dec. 20.—The property is again advertised to be sold at auction in Cleveland on Dec. 20 under foreclosure of the General Mortgage of 1905, as entered by the U. S. Court for Nor. Dist. of Ohio, Eastern Div., April 1 1914, and amended Jan. 16 1915. The sale will be made subject to the several prior lien mortgages executed by the company and its predecessor prior to Aug. 1 1905, and subject also to all equipment trust agreements, including the receivers' equip. trust dated Mar. 1 1913 (V. 96, p. 792). Upset price, previously \$20,000,000, is now reduced to \$18,500,000.
 The securities to be included in sale along with the road, and also the contract and securities to be excluded from the sale were stated in V. 99, p. 469.—V. 101, p. 1184, 450.

Wichita (Kan.) Union Terminal Ry.—Bonds.—Henry & West are offering at 93 and int., 1st M 41%s due 1941. A first mortgage on properties affording sole terminal facilities in Wichita. Kan. (population 55.600), for four trunk line railroad companies. These companies, including Atchison Topcka & Santa Fe Ry., guarantee jointly and severally the principal and interest of these bonds.—V. 93. p. 667.

Willamette Valley Southern Ry.—New Line.— Regular passenger service was inaugurated on Oct. 23 over the company's w line from Portland to Mount Angel.—V. 100, p. 57.

Winona Bridge Ry .- Bonds in Part Extended .-

Of the \$384,000 5% bonds due Sept. 1 1915, \$104,000 were paid at ma-turity and \$280,000 extended for 20 years at 1%. The sinking fund pro-vision of the old mortgage has been abrogated and a new sinking fund of \$14,000 yearly provided, "which will retire the extended bonds at maturity." -V. 77, p. 252.

# INDUSTRIAL, GAS AND MISCELLANEOUS.

Aetna Explosives Co., Inc., N. Y.—Pref. Stock.—Domi-nick & Dominick, heading a large syndicate, are offer-ing at 90, to yield over 7% %, \$2,000,000 7% cumulative pref. stock. Authorized, \$5,500,000; outstanding, \$5,412,-900. Dividends payable Q.-J. 25. Incorp. in N. Y. State. Application is to be made to list the common and preferred stocks upon the New York Stock Exchange.

 Dated Nov. 1 1915 and due serially each Nov. 1 1916 to 1925, but subject to call on any interest date upon 30 days' notice at 10214. Interest Co., 8t. Louis, trustee.
 Digest of Letter from Pres. F. V. Hammar, East St. Louis, Oct. 30 1915.
 Organization.—Incorporated in Missouri in 1908, succeeding to businees stabilished in 1872 in Clinchnati, and operated successfully for past 43 years. In Fob. 1914 the plant was destroyed by fire, but operations were carried on almost without interruption in quarters leased from Nat'l Lead Co. The new fire proof mill, buildings and corroding sheds at least 8t. Jouis, automatic closing fire doors and automatic sprinklers, reducing insurance rate to 6 ets. per \$100. A minimum of \$500,000 poinsurance is deposited with the trustee to protect the bondholders. Manufactures white lead by the old Dutch process of slow corroding the standarding in high repute. Our lead has been accepted and used by the United States?
 Malance Sheet Aug. 31 1015, alter given Effect to New Financing Promery and plant.

Harbison-Walker Refractories Co.—Com. Div. Increase. A quarterly dividend of 1% has been declared, payable Dec. 1 to holders of record Nov. 20. This compares with 3% of 1% Sept. last and places the stock on a 4% basis.—V. 99. p. 1747. Hupp Motor Car Co.—Stock Increase.— The company, 16 is stated, is about to increase its capital stock. See V. 101, p. 1555.

101, p. 1000. International Mercantile Marine Co.—Joins Committee, Charles H. Sabin, President of the Guaranty Trust Co., has been made a member of the preferred stockholders' protective committee, which, with James N. Wallace of the Central Trust Co., Chairman, is opposing the re-organization plan presented by the Bannard committee. Street gossip credits this committee with wishing to end the company' financial diffi-culties by paying off the two defaulted bond issues.

Certificates of Deposit for Preferred Stock Listed. — The N. Stock Exchange has listed \$10,351,500 Central Trust Co. of N.Y. certificates of deposit for 6% cum. pref. stock, with authority to add \$11,384,300 of the certificates of deposit on exchange for pref. stock out-standing; making the total authorized to be listed \$51,726,300.

The Wallace committee in an adv. on another page refer to the aforesaid listing and state that they will receive further

deposits without penalty until the close of business Dec. 1. The investigation instituted by them has thus far, they say, confirmed all the announcements they have made.—V. 101, p. 1275, 1095.

Interstate Electric Corporation, N. Y .- Pref. Stock .-

An issue of \$1,000,000 7% cumulative pref. stock has been authorized, \$500,000 of which will be immediately disposed of and the proceeds applied to the purchase of three additional properties in the State of Texas.

La Belle Iron Works, Wheeling and Steubenville .-New Bonds, &c.

The shareholders on Oct. 27 without a dissenting vote authorized the issue of \$7,500,000 mortgage bonds bearing not over 6% interest. to pro-vide for retirement at or before maturity of the existing \$1,572,000 1st M. 6% bonds due Dec. I 1923 and as required for present and future additions. to pro-

Issue of \$7,500,000 morigage bonds bearing not over 6% interest. Io provide for retirement at or before maturity of the existing \$1,572,000 184 M. 6% bonds due Dec. I 1923 and as required for present and future additions. Digest of Statement by Pres. R. C. Kirk to Stockholders Oct. 27. The year 1914 was one of the worst that the iron and steel budness in the sequence of 1916, and not until Apell 1915 did the tide begin to turn. The company in July 1914 discontinued dividends on its common stock and in the free quarter of 1916, and not until Apell 1915 did the tide begin to turn. The company in July 1914 discontinued dividends on its common stock and in the free stock to 1% interest quarter of 1916, and not until Apell 1915 did the tide begin to turn. The company in July 1914 discontinued dividends on its common stock and in the present months will make a better showing than Aug. and Sept. Unfounded rumors were recently given wide circulation that the company is squipped to turn out steel of a character necessary for rolling into the shape required for shrapnel. If we can get desirable specifications we will evolved we understand, is of modest proportions and will not interfere vitat the necessary changes at our plant for handling it. While we have not closed any contract for war materials, we have some very live prospects in the near future. If a contract was closed on Nov. 5, but the turnage involved, we understand, is of modest proportions and will not interfere with the company's domestic trade.—Ed.] The prospects for the future is consider bright.
 It is the intent of the directors immediately to use some \$2,000,000 of the new bonds for the purpose of completing the by-products coke plant which the La Belle is installing on the west Virginia side of the river. Year, and by the installing on the two \$50,000. Practically all the available ground in and about the present plant on the Ohio side of the river. So occupied, butwhin the target access and open-hearth furances can only be mad

yet.] Compare V 101, p. 1373, 1473. Magnolia Petroleum Co.—Bonds Called.— Seven bonds of \$10,000 each and 24 bonds of \$1,000 each (aggregating \$94,000), dated Jan. 1 1012, have been called for payment at par and inter-est on Jan. 1 1916 at Columbia Trust Co., 60 Bway.—V. 101, p. 1016, 51.

 National Brick Co. of Laprairie, Ltd., Montreal.--Touching the plan on which the holders of the \$2,319,100 ist M. 6s will vote Dec. 20 to defer the payment of their interest for a period of three years (the Oct. 1915 coupon hot having been paid), the Quebec Saving's & Trust Co., as mortages trustee, says in substance:
 The proposal has been approved by the board of directors and the shares-holders, as well as some of the largest bondholders.
 Ta spite of the business depression which began in 1913, the company's sales were maintained at satisfactory levels during that year and in the suc-ceeding year. The outbreak of war resulted in the prostration of the build-ing trade throughout Canada, the building peruits lasued in Montreal failing to a fraction of the previous year's records. This condition exists in practically all cities in Canada and may continue as long as the war lasts, the building industry. The various reasons, being the most adversely affrected of all industry. The year 1915 brought a further decline in building operations, cutting the company's sales to the point where the payment of bond interest became impossible.

New York Dock Co.—Agreement with P. S. Commission-—The following is pronounced correct: The P. S. Commission and the New York Dock Co. have perfected an agreement which, it is estimated, will save the city at least \$350,000 in intercost of construction of the new subways and will result in the immediate spenditure of at least \$1,250,000 by the company for the improvement of the Brooklyn waterfront between Fulton St. and Atlantic Ave. The im-provement contemplates the replacement of the existing plets, which are about 400 ft. long, by five new piers, which will be from 640 to 750 ft. In length, more than doubling the capacity of the plets and making possible the accommodation of much larger vessels than can be taken care of with the present pier space. Three of the new plets will be erected over the ex-isting subway tunnel in Joralemon St. and the two new subway tunnels in Montague and Clark St., so that absolute protection will be afforded for these tubes. The agreement provides that the city shall purchase the case-ment rights for the new subway at least \$75,000 for property owned by the city at the foot of Montague St. and at least \$25,000 for property owned by it at the foot of Montague St. Brooklyn. In other words, the city will acquire the Clark St. essement for \$15,000 net, and the Dock Co. will be able to make the improvements above mentioned. (As late as yesterday the agreement had not actually been signed.)

### CAPITAL STOCK.

There has been no change in the capital stock during the year. FUNDED DEBT UNMATURED.

There has been no change in the funded debt during the year. EQUIPMENT.

An Equipment Agreement, Series "Q," was entered into on July 1st 1914 for the purchase of:

July 1st 1914 for the purchase of: 10 Mountain Type Passenger Locomotives. 19 Mikado Type Freight Locomotives. 7 All-Steel Passenger Coaches, with reclining chairs, 8 All-Steel Passenger Coaches, with Walkover Seats, 5 All-Steel Mail and Baggage Cars. 9 All-Steel Postai Cars. 9 All-Steel Postai Cars. 9 All-Steel Postai Cars. 9 All-Steel Express Cars. 9 All-Steel Express Cars. 10 All-Steel Express Cars. 10 All-Steel Express Cars. 10 All-Steel Steel Upper and Underframe Ventilated Box Cars. 11 for which \$160,043 81 was paid in cash, and equipment trust 11 obligations aggregating \$1,440,000 00 were issued, payable in twenty consecutive semi-annual installments of \$72,000 00 each, bearing interest at the rate of 5% per annum. All of this equipment was received during the fiscal year.

Extensions to the Company's lines in Florida were comple-ted during the year as follows:

26.41 0.82 Spurs Removed during the year.

### 

### MAINTENANCE OF WAY AND STRUCTURES. ROADWAY, TRACK AND STRUCTURES.

Roadway, track and structures of the railway have been properly maintained at a cost of \$2,414,866 20, which repre-sents an expenditure per mile of road of \$777 59. (See General Remarks below).

### SIDE TRACKS.

13.07 miles of new sidings and extensions of existing sid-ings were constructed, and there were deducted by removal and changes of old sidings, 5.33 miles, making a net increase over previous year of 7.74 miles. There were also added 1.75 miles leased sidings.

TIE RENEWALS. Tie renewals were 1,328,761 cross ties and 745 sets of switch ties, and the cost, \$583,594 83, was charged to Operating Expenses. RAIL.

RAIL. 11.67 miles of new 85-lb. steel rail were laid in the main line, releasing therefrom 68 and 80-lb. worn rail, and there was charged net to Operating Expenses therefor \$8,904 66, and to Capital Account \$21,906 86. In addition, 11.31 miles of released 80-lb. steel rail were laid on branch lines, releasing 60-lb. and lighter rail, and there was charged to Operating Expenses therefor, \$3,117 62, and to Capital Account \$14,898 98. There has also been received and distributed along the main line ready to lay 34 track miles of new 90-lb. and 26.5 track miles of new 85-lb. steel rail.

### BALLAST.

73,269 eubic yards of gravel and slag ballast were put under main line track and of the total cost thereof \$27,108 11 was charged to Capital Account.

### TRESTLES FILLED.

990 lineal feet of wooden trestles were filled in during the year, and of the total cost thereof, including culverts, \$11,141 48 was charged to Operating Expenses.

### TRESTLES REBUILT AND BALLAST DECKED.

There were built during the year out of creosoted timber 2,904 lineal feet of ballast decked trestles, replacing old open deck trestles, and the cost thereof, \$40,427 95, was charged to Operating Expenses.

## TRESTLES STRENGTHENED.

Additional stringers were put in 19 trestles between Columbia, S. C., and Jacksonville, Fla., on the South Caro-lina Division during the year to provide for use of heavier power, the cost of which, \$1,768 37, was charged to Capital Account.

### BRIDGES.

Work has been done on sixteen bridges, repairing, adding signals, replacing with steel or strengthening them for heavier power. Of this number fourteen have been completed.

pleted. Seven of the above bridges were authorized during this year and five of the seven have been completed. One of the uncompleted bridges is a reinforced concrete viaduct for highway and street railway traffic, on Duval Street, Jackson-villa, Fla., over Hogan's Creek, and the tracks of the Sea-board Air Line Railway and the St. Johns River Terminal Company. This viaduct will be completed during the coming year and will be approximately 1,418 feet long, with a total width of 42 feet. Of the bridges completed the principal ones are:

Of the bridges completed the principal ones are:

Fourth Street, Wilmington, N. C., reinforced concrete highway overpass
Fourth Street, Wilmington, N. C., reinforced concrete highway overpass, on concrete masonry
Flaventh Street, Charlotte, N. C., highway underpass, deck girders
flaventh Street, Charlotte, N. C., highway overpass, creosoted
timber, concrete foundations.
Whitoed Avenue, Atlanta, Ga., highway underpass, evabeams on plo foundations
Howells Mill Road, near Atlanta, Ga., highway overpass, plate girders on creased timber foundations
Howells Mill Road, near Atlanta, Ga., highway overpass, plate girders on creased timber foundations
Gaston Street, Chester, S. C., highway overpass, timber construction with concrete masonry
The total expenditures for bridge work dowing the street masonry

The total expenditures for bridge work during the year were \$72,776 47, of which \$71,046 92 was charged to Capital Account and \$1,729 55 to Operating Expenses.

### EXTENSIONS.

## THE CHRONICLE

## RAIL IN MAIN LINE.

### LEASED LINES.

...

### MAINTENANCE OF EQUIPMENT.

The equipment of the Railway was properly maintained during the year at a cost of \$3,175,642 45. (See general re-marks below.)

marks below.) Included in the cost of maintenance is \$28,614 49, repre-senting value of equipment destroyed or retired from service during the year and credited to Cost of Equipment. There was also included in the Cost of Maintenance \$412,-626 for depreciation, which was credited to Reserve for Ac-crued Depreciation.

The cost of maintenance per article owned was as follows: 

### GENERAL REMARKS.

GENERAL REMARKS. On account of the European war the important agricultural and industrial activities served by your lines were affected, resulting in a decrease in gross revenues of \$4,140,040, or 16.29 per cent, as compared with the previous year. This decrease was largely caused by the interruption of the exportation of certain commodities consisting principally of cotton, phosphate rock and naval stores, and the importa-tion of fertilizer materials. The business depression re-sulting from the war also caused decreases in movements of lumber, fertilizer, general merchandise and practically all other commodities. Weather conditions in Florida unfavor-able to trucking also caused a decrease in the perishable vegetable shipments. The general business depression caused also a decrease in passenger business.

The general business depression caused also a decrease in passenger business. As an offset against the decrease in revenue above shown, a reduction was made in Operating Expenses amounting to \$2,541,172, or 14.55 per cent. The greatest item of reduc-tion was made in Transportation Expenses, consisting of \$1,577,776, or 16.8 per cent. Realizing at the outset of the European war that there was a necessity for the greatest possible economy consistent with safety and proper upkeep, a careful and searching analysis was made of the proposed expenditures for Maintenance of Way and Structures and Maintenance of Equipment for this fiscal year, and a plan laid out by which only such ex-penditures were made as were absolutely necessary to com-ply with the conditions above outlined. By these means your property has been fully maintained. Extensive improvements and additions have been made to the General Office building at Portsmouth, Va., which con-sisted of remodeling, with fireproof construction, the original building, adding two stories thereto, and thereby providing modern office facilities. No promise has been made for the occupancy of these offices for any stipulated period, but it is felt that as long as the present conditions last the arrange-ment is of advantage to the company. During this year a contract was entered into with the Southern Railway providing for the joint use of the Scaboard Air Line and the Southern Railway's tracks between Raleigh N. C., and Cary, N. C., as a double track, these tracks be-ing immediately parallel for the entire distance. 1.32 miles of double track has been put into service at Tampa, Fla., from Tampa Northern Junction to Twigg Street. A Union Station at Bartow, Fla., has been built during the

A Union Station at Bartow, Fla., has been built during the year, and the one at Hurtsboro, Ala., mentioned in last year's report, has been completed. A passenger station has been completed at Marston, N. C., and the one at Rockingham, N. C., mentioned in last year's report, has been finished.

report, has been finished. Combination passenger and freight stations have been con-structed during the year at North, S. C., Terra Ceia, Fla., and Kingsland, Ga.

itized for FRASER p://fraser.stlouisfed.org/

The freight depot at Carrsville, Va., has been extended, providing passenger facilities therein. A freight depot has been built during the year at Hawthorne, Fla. At Apex, N. C., both a passenger station and a freight sta-tion have been provided, together with necessary track changes and additions to serve same. The passenger shelter shed and granolithic walks at Portsmouth, Va., mentioned in last year's report, have been completed.

Portsmouth, Va., mentioned in last year's report, have been completed. At Wake Forest, N. C., an umbella shed has been pro-vided in connection with present passenger facilities. A passenger shed has been provided at South Clinton, S. C. A car repair shed has been provided at Cayce, S. C., in connection with other shop facilities. Necessary dredging has been done at Jacksonville, Fla., in slip between Warehouse No. 2 and No. 3, to maintain proper depth of water, and necessary dredging is now in progress in slips 1, 2 and 3, and river front, at Hutchinson's Island, Savannah, Ga. The reinforced concrete coal elevator with 300 ton storage bin at Savannah, Ga., mentioned in last year's report, has been completed.

bin at Savannah, Ga., mentioned in last year's report, has been completed. The 100,000 gallon capacity steel tank, together with pipe lines for auxiliary fire protection at Hutchinson's Island, Savannah, Ga., mentioned in last year's report, has been completed and put into service. Modern interlocking plants have been provided at Bur-roughs, Ga., and Bartow, Fla., and the one at Pembroke, N. C., mentioned in last year's report, has been completed. A wooden cotton platform has been provided at Green-wood, S. C., and a reinforced concrete cotton platform provided at Maxton, N. C. Paving and street work has been done at Henderson, N. C., Columbia, S. C., Cordele, Ga., Columbus, Ga., Manatee, Fla., Bradentown, Fla., and at several other points on the system, to comply with municipal requirements. Crossing gates have been installed at Hermitage Road, near Richmond, Va., and on Elmwood Avenue, Columbia, S. C.

S. C. A coal trestle has been built jointly with the Durham & Southern Railway at Durham, N. C., during the year. Additional storage tracks have been provided during the year at Nitrolee, S. C.

year at Nitrolee, S. C. Interchange tracks have been provided with the Maxton Alma & Southbound Railroad at Alma, N. C., with the Norfolk Southern Railroad Co. at Charlotte, N. C., and the Southern Railway at Franklin, Va. Three track scales were rebuilt with concrete foundations and steel "I" beams replacing wood. Three old water tanks at McKenny, Va., Collins, Ga., and Palmetto, Fla., were replaced with modern 50,000 gallon tanks and suitable pumping facilities provided. New water station has been provided at Schofield, S. C. 65 industrial sidings and extensions to industrial sidings already existing have been constructed or are in process of construction.

construction.

.40 depots and freight stations have been constructed or substantially added to during the year. 17 passing tracks have been constructed or extended or

17 passing tracks have been constructed or extended or are in process of construction. The use of creosoted piling has been continued in main-tenance work on docks, wharves and trestles. The work of the Valuation Committee, created in con-nection with Section 19-A of the Federal Act to Regulate Commerce, referred to in the last annual report, was con-tinued during the year at a cost of \$57,215 39, which was charged to General Expenses—an increase of \$42,232 10 over the preceding year.

over the preceding year. The accounts for the fiscal year were examined by Messrs. Haskins & Sells, whose certificate appears on page 11 of pamphlet.

There were no changes in the organization during the year. The Directors wish to record herein their appreciation of the loyalty, efficiency and co-operative spirit displayed by the officers and employees of the company during this trying year. By order of the Board.

W. J. HARAHAN,

President.

### CURRENT NOTICE.

### CURRENT NOTICE.

-At a price to yield 4.20%, William R. Compton Co., Pine St., corner William, this city, and St. Louis, Cincinnati and Chicazo, are to-day featuring for investment in our advortising columns \$211,000 State of California 4.% highway bonds. These bonds are legal investments for savings banks and trustees in New York, Massachusetts, Connecticut and all the Eastern States. General particulars appear in the advar-tisement.

—C. R. Bergmann & Co., Investment securities, 66 Broadway, this city, have issued an analytical letter on Kathodion Bronze preferred stock, which will be malled to inquirers on request. This stock has been one of the featurers of the week in the New York Curb Market dealings. The firm's descriptive letter explains the reasons for the rise in price.

-Messers, Farson, Son & Co., 115 Broadway, New York, and 39 So. La Salle St., Chicago, are offering in our advertising columns to day a list of municipal bonds for investment. The firm will be glad to furnish detailed description of these and other municipal bonds on request.

# The Commercial Times.

# COMMERCIAL EPITOME

COMMERCIAL EPITOME Friday Night, Nov. 12 1915. Trade steadily increases and the activity is no longer con-fined to war supplies. Domestic trade is steadily rising. It is true that the mild weather restricts retail trade to a certain extent. Foreign exchange, moreover, remains low and exports of cotton lag far behind those of the normal year of 1913. The world is not buying American cotton on the scale that was expected. But in other directions there are signs of growing business that inspire new hope in very many of the great avenues of American business. The big sales of steel at rising prices are attracting universal atten-tion. The crops of wheat and oats are the largest in Ameri-can history and the yield of corn is close to the best ever known. The exports of wheat this week, 12,875,000 bush-els, have never been surpassed. Merchants are cheared by reports of the big tonnage that the railroads are handling and of the gradual disappearance of idle cars. Lumber sales, long very poor, have increased not only at the South, but also at the Pacific Northwest, and prices have risen. Copper has advanced on a larger demand. Other metals, such as lead, zine and tin, are higher, tin rising sharply on unmors that the Suez Canal has been closed to commerce. This event may help the sale of American cotton in Europe by shutting out East Indian. Regardless of some admitted drawbacks, the general situation is such that optimism is spreading. ARD steady; prime Western 9.25e; refined to the Conti-

drawbacks, the general situation is such that optimism is spreading. LARD steady; prime Western 9.25c.; refined to the Conti-nent 10.30c.; South America 10.50c.; Brazil 11.50c. Futures declined under heavy selling by stockyard interests at Chi-cago, coincident with large receipts of hogs and lower prices for them. To-day prices advanced. DAILY CLOSING PRICES OF LARD FUTURES IN CHICAGO. prices were as follows:

Cabell Marcer black	70 40 35 35	Princeton S1 27	Ragiand B8c Illinois, above 30 degrees 31 27 Kansas and Okia- homa
Corning 1	35	Somerset, 32 deg 1 27	monthly services and outs

Corning 135 Somerset. 32 dec., 127 TOBACCO has been in moderate demand and steady, especially for binder. The demand for old crop has been greater than usual at this time of the year, owing to the small production in Wisconsin. Yet, taking the country as a whole, the Government states that the tobacco crop is large, i. e., 1,050,025,000 lbs. against 1,034,679,000 lbs. in 1914, and an avorage crop for the last five years of 996,087,000 lbs. Filler has met with a fair sale, the demand including Ohio and Pennsylvania. The sales of Cuban tobacco are fair, and the ordinary demand prevails for Sumatra. ordinary demand prevails for Sumatra.

COPPER in steady demand and firmer; Lake 18¼@ 18½c., electrolytic 18¼@18½c. London has advanced; predictions of coming scarcity in the United States are heard. Tin advanced on the spot to 38½c., with a brisk demand. London prices advanced. The report that the Suez Canal has been closed to commerce has had a noticeably bracing effect. Spelter advanced to 16c. here; the advance affects the demand somewhat. London advanced £8 in one day. Lead on the spot here advanced to 5.15c., with a large de-mand. Pig iron in excellent demand and higher. No. 2 Eastern \$16 75@\$17 25, No. 2 Southern \$13@\$13 50, Birm-ingham. The demand for steel continues large despite rising prices; in fact, it is more insistent and on a largor scale than ever. Pig iron, billets and a number of finished products are higher. Northern pig iron is 50c. a ton higher, billets and sheet bars are up \$1, forging billets \$3, bars, plates and shapes \$2, light rails \$2.50, spikes \$3, bands \$1, shafting \$6, and some grades of scrap 50c. to \$1. Certain forms of ma-terial are very scarce. It may cause a curtailment of out-put in some directions.

## COTTON

### Friday Night, Nov. 12 1915.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 200,421 bales, against 231,002 bales last week and 245,558 bales the previous week, making the total receipts since Aug. 1 1915 2,545,100 bales, against 1,970,503 bales for the same period of 1914, showing an increase since Aug. 1 1915 of 574,597 bales.

United States.....7,384,871 ....9,826,912 61.8 8,803,396 63.2 8,869,222 65.8 Included in the ginnings were 69,204 round bales, compared with 23,152 last year, 61,577 in 1913 and 54,539 in 1912. Sea Island cotton included numbered 55,358 bales, compared with 43,115 last year, 42,804 in 1913 and 28,887 in 1912.

COTTON FUTURES ACT.—Rulings Amended.—Amend-ments to its cotton futures Act regulations governing the filing of statements recording the business transacted by cotton brokers have been issued by the Treasury Department

filing of statements recording the business transacted by cotton brokers have been issued by the Treasury Department as follows: In conformity with the provisions of Section 14 of the United States Cotton Futures Act, which provides that the Secretary of the Treasury shall "require all persons coming within its provisions to keep such records and statements of account as will fully and correctly disclose all transactions " \* \* " a regulation providing the form of record to be kept was promul-rated as T. D. 216. The facts disclosed by this record are, of course, intended and necessary for a proper enforcement of the law by the revenue officers charged with that duty, and in furtherance of that object, and under the authority con-ferred by said Section 14, the following amendment of and addition to Section 18 of regulations No. 36 (T. D. 2139) is hereby promulgated: Subdivision 4.-All persons who make contracts of sale of cotton for future delivery at. on, or in any exchange, board of trade or similar insti-tution, or place of business, shall on or before the fifteenth day of each month render a return, in writing for the preceding month; the the United states cotton futures attorney, to a United States cotton futures agent, or to the collector of internal revenue of the district where located showing the number of contracts brought forward from the preceding month; the number of contracts bought or sold; the number of bales of cotton involved in said contracts; the month in which said cotton is to be delivered; whether the order for said contract, that is, whether by "ing." "direct." Induke," "actual delivery" or through the Cotton Exchange clearing association, by the Commissioner of Internal Revenue. "Bubdivision 5.-All persons who send or direct or authorize to be settle-math of said contract, that is, whether by "ing." "direct, "mother," and, and the the number of contracts left open at the end of the month. "Aut, and the the number of contracts of sale of cotton futures, states for future delivery in ca

purchase or sale, date and price at which cotton was bound of the cost of a delivery or settlement, muchad of settlement whether closed by ring, of delivery or settlement, muchad of settlement and delivery, or whether contract is still open. Said roturn to be made upon forms to be furnished, upon application, Said roturn to be made upon forms to be furnished, upon application, by the Commissioner of Internal Revenue. Subjivison 6.—That if any person liable to make the return, required by the United States Cotton Futures Act or the regulations promulsated by the United States Cotton Futures Act or the regulations promulsated by the United States Cotton Futures and the made by a United States cotton of the books and records of the person so liable provided that the making of said return by a United States cotton futures agent shall not be construct to relieve the person so liable from any penalty incorred by reason of his failure to make the return as required by liaw.

Movement by reason of his failure to make the return as required by law. Movement FOR BETTER COTTON BALING.— Messrs. D. H. Cameron and A. U. Puckitt of Austin, Texas, are in New York as the representatives of the Marketing Department of Texas for the purpose of obtaining the views of spinners and of cotton men generally on the subject of improving the appearance of the cotton bale and better pro-tecting the contents, and will later visit Boston, Philadel-phia, Baltimore, Washington, Savannah, Charleston, Wheel-ing and St. Louis. The importance of the movement they have come North to foster will be best understood when it is stated that at the present time there is something like twenty pounds lost in handling a 500-pound bale for domestic use and 35 pounds in handling a bale that is to be shipped abroad. INDIA COTTON MOVEMENT.

# THE DRY GOODS TRADE

THE DEP GOODS TRADE
New York, Priday, Nor. 12 (19).
The York Priday New York, Friday Night, Nov. 12 1915. While dry goods markets have been fairly active during

DOMESTIC COTTON GOODS .- The compilation of the

DOMESTIC COTTON GOODS.—The compilation of the weekly returns of exports of cotton goods has been tem-porarily discontinued by the New York Custom House. Staple cottons are quieter, but prices continue to advance on many lines. Buyers have covered their requirements pretty thoroughly and are now inclined to watch the market for a while. Gray goods have shown a slightly easier under-tone during the week, asked quotations having been lowered an eighth of a cent. Sheetings, while not active, are decided-ly firm. Some wide counts are an eighth cent higher, owing to a shortage of supplies. Mills at present are more inter-ested in eatching up on back deliveries than in securing new business. Buyers are holding manufacturers strictly to specifications on deliveries, as much of the business was closed at lower levels than those now prevailing. Standard brown drills are strong, being held ½c, higher than last week. The most pronounced advances, however, have taken place on standard lines of duck. Popular brands are in heavy de-mand and mills have booked about all the business they can handle for some time. Selkirk and Oliver 8-ounce have been advanced 1c., while Hartford 11-ounce are up ½c, per yard. On other brands the discounts have been shortened from 5 to 10%. Manufacturers report a better inquiry for colored goods and spring wash fabries as a result of their warning 10%. Manufacturers report a better inquiry for colored goods and spring wash fabrics as a result of their warning to the trade that orders must be placed early in order to secure deliveries when needed. Gray goods, 38-inch stand-ard are quoted 43/2 ard, are quoted 4% c.

secure deriveres when needed. Gray goods, bornen stand-ard, are quoted 4%c. WOOLEN GOODS.—Demand for woolens and worsteds in both dress goods and men's wear is improving with prices showing a strong upward tendency. Many lines are running short for near-by delivery, particularly fine broadcloths. Buyers who have delayed covering their requirements of high-grade broadcloths are now having difficulty in getting supplies, and are compelled to cover their needs with medium and low-priced goods. Serges for next spring are in active demand, while poplins and such goods are not being called for. Sales of piece goods to retailers and custom tailors are reported to be satisfactory. In men's wear demand is stead-ily improving on medium and low-priced goods. Prices are being marked up on the best selling lines, particularly those colors in which the dyes used are scarce. Demand has so far favored woolens, although recently quite a good business has been put through in worsteds. Manufacturers who are in a position to guarantee colors are doing an excellent busi-ness, especially in serges and in most cases buyers are willing to pay premiums over current quotations to secure color to pay premiums over current quotations to secure color guarantee

b pay premiums over current quotations to scence only guarantees.
FOREIGN DRY GOODS.—Demand for linens continues active with most of the inquiry for stock goods for immediate and near-by delivery. Supplies of imported lines are scarce and most of the goods arriving in this market are already sold. Importers are receiving good inquiries for next spring delivery and are closing all the business which they are in a position to accept. The inability of importers to figure on the price of goods which will come forward next spring makes it impossible for them to quote, and much of the business is booked subject to value at the time of arrival. Retailers are preparing for an active mid-winter and holiday trade and handkerchiefs whenever they are available. Little is heard regarding dress goods for next spring, except that supplies will be lighter then ever before. Buyers are particularly interested in colored goods and are anxious to cover their requirements as early as possible. Burlaps rule firm, influenced by reports that the Suez Canal has been closed by the British Government. Light-weights are quoted at 5.50c, and heavy-weights at 8.10c.

Importations & Warehouse Withdrawals of Dry Goods. The importations and warehouse withdrawals of dry goods at this port for the week ending Nov. 6 1915 and since Jan. 1 1915, and for the corresponding periods of last year, were as follows:

Chicago Sanitary District (P. O. Chicago), Ill.—Court Refuses to Enjoin Bond Issue.—Local papers report that Judge Heard in the Circuit Court Nov. 5 dismissed John J. Mor-tell's plea as a taxpayer for an injunction to restrain the sanitary district from issuing \$2,000,000 bonds and from continuing the construction work on the Calumet-Sag Canal. An appeal was taken.

Chippewa Falls, Chippewa County, Wis.—Commission Form of Government Defeated.—The question of establishing the commission form of government failed to carry, it is stated, at the election held Nov. 9.

stated, at the election held Nov. 9. Illinois.—Supreme Court Passes on Validity of Appropria-tions.—The Illinois Supreme Court on Nov. 5 in deciding what is known as the "Fergus Case," held unconstitutional and invalid certain appropriations made by the last Legis-lature involving, it is said, nearly \$2,000,000. In another suit brought by City Treasurer Charles H. Sergel of Chicago, the Supreme Court on Nov. 6 declared invalid special appro-priations aggregating more than \$500,000 passed by the City Council since April. The importance of the decisions re-ferred to will necessitate an extra session of the Legislature and Governor Dunne is now preparing a call for this purpose. In its tentative shape the call is said to include the following general items, both of them financial: Appropriation enactments to rectify the blunders pointed out by the

Appropriation enactments to rectify the blunders pointed out by the Supreme Court and to furnish the machinery of government with pe-cuniary relief. Re-passage in proper form of the \$250,000 in salaries knocked out because in ownflows instead of in State officers appropriation. Remedial legislation to straighten out Chicago's financial muddle due to the Supreme Court decision in the Sergel case, invalidating \$504,548,80 in appropriations because they were not made during the first three months of the fiscal year.

The following synopsis of the opinion written by Justice Cooke in the Fergus case was given out by Chief Justice

1644

<text>

In the case involving appropriations made by the city of Chicago the Court upholds the contention of City Treasurer Charles H. Sergel, who three months ago stopped the pay-ment of money from funds created by appropriations passed after the first three months of the year, on the theory that they were invalid. Oliver L. Chadwick, a real estate ex-pert for the Board of Local Improvements, brought a man-damus suit to compel the Treasurer to pay him fees from a special appropriation. Judge Brentano in the Superior

Court ruled in Chadwick's favor and ordered City Treasurer Sergel to pay him his fees. Mr. Sergel appealed to the Su-preme Court and that Court decided in his favor. The State law requires that appropriations for the year must be made within the first three months. The practice of making appropriations after that period has been in effect for more than a score of years, the theory being that the law intended that special appropriations were not to be made from taxes, but from other revenue. Kapsas — Rural High School Law Unbeld. The Tender

from taxes, but from other revenue. Kansas.—Rural High School Law Upheld.—The Topeka "Capital" says that the validity of the rural high school law passed by the 1915 Legislature was upheld on Nov. 6 by the Kansas Supreme Court, when it granted the writ of mandamus against W. E. Davis, State Auditor, to compel him to register bonds issued under the Act. The writ was asked by Rural High School District No. 1, Rush County, which had voted a bond issue under 1915 measure. Davis refused to register the bonds, in order to get an opinion from the Court as to whether the law is defective. It was main-tained that the title was defective in that it provided for the consolidation and organization of rural high school dis-tricts, but not for the issuance of bonds for the construction of the school buildings. The body of the Act provided for of the school buildings. The body of the Act provided for the issuance of bonds. The same question has been raised in a number of counties, more than twenty of these districts having been organized.

In a number of counties, more than twenty of these districts having been organized.
 Los Angeles County Waterworks District No. 3, Cal.
 —Rehearing Denied.—The State Supreme Court has denied the application for a rehearing in the suit involving the \$2,650,000 bonds which the Court recently ordered the Board of Supervisors to issue. Until the amending of the law under which the bonds are put out, the correct title was Los Angeles County Irrigation District No. 3. See V. 101, p. 1303.
 New York City.—Ashokan Dam Case Decided by U. S. Supreme Court.—The U. S. Supreme Court in an opinion handed down Nov. S held that in appraising property taken for the new reservoir in connection with New York City's improved water supply, the commissioners had no power to award compensation to property owners in excess of the actual "face market value" of the land, and that there can be no compensation allowed on account of the "adaptability of the land for reservoir purposes."
 The decision was in what is known as the Sage case, involving about \$4,300. But the rule applied will affect other condemnations, and in the aggregate will, it is thought, save the city big sums which it would have had to pay if the rule of the appraisers to award compensation based on "adaptability" had stood as the Court of Appeals and the Federal Court below left it.
 Not only were land owners paid for the land taken for the eity's purposes, but in some cases additional damages were allowed because of the claim that their property was peculiarly adapted for the purposes of a reservoir.

infly adapted for the purposes of a reservoir. Pennsylvania.—Constitutional Amendments Adopted.— Incomplete returns are said to indicate the adoption of the following constitutional amendments submitted on Nov. 2: To Section 8 of Article IX, regulating the amount of indebt-edness of counties, cities, boroughs, townships, school dis-tricts, other municipalities and incorporated districts; to Section 21, Article III, providing that the General Assembly may enact laws requiring the payment by employers, or employers and employees jointly, of reasonable compensa-tion for injuries to employees arising in the course of their employment, and for occupational diseases of employees; and an amendment (in accordance with the provisions of Article XVIII) permitting laws to be passed providing for a system of registering, transferring, insuring of, and guar-anteeing land titles by the State, or by the counties thereof. See V. 101, p. 1207. The defeat of the equal suffrage amendment, also sub-mitted on Nov. 2, was reported in last week's "Chronicle." page 1570.

page 1570.

Shreveport, La.—Voters Authorize Building of Municipal Water Plant.—The proposal to build a municipal water works and sewer system with the proceeds of the \$1,200,000 bonds voted Aug. 20 1914 carried, it is stated, by a vote of 1,558 to 268 at the election held Nov. 4—V. 101, p. 1301. The bonds were originally authorized for the purpose of either building a plant or acquiring the one owned by the Sherveport Water Works Co., but the eity and company failed to reach an agreement as to price.

 FLORENCE, Florence County, So. Caro.-STATEMENT MY MAYOR.--As stated in the "Chronicle" of Oct. 30, page 1491, Weil, Roth of Chronich all advised at a did not the state of the state of the they did not the state of the state of the state of the they did not the state of the state of the they did not the state of the st

accept the \$140,000 refunding bonds awarded them on Aug. 4 as their attorneys, Caldwell, Masslich & Reed, refused to approve the Issue without a Supreme Court decision upholding the legality of the original indebtedness which these bonds are issued to refund. The Mayor of Florence, W. R. Barringer, writes us under date of Nov. 3 that in view of the fact that the indebtedness had been validated by an amendment to the constitution of the State of South Carolina, duly adopted by a vote of the people, and rath-field by an Act of the Legislature and had also been validated by an enabling Act passed by the Legislature, the Council declared the contract for the sale of the bonds at an end, and so notified Weil, Roth & Co. The official minutes of the City Council show, it is said, that the contract with the clared at an end by the City Council of Florence for non-compliance with its terms within a reasonable time.

charged at an end by the City Council of Forence for non-compliance with its terms within a reasonable time.
 FLORENCE SCHOOL DISTRICT (P. O. Florence), Florence County, So. Caro.—BONDS RE-SOLD.—In the "Chronicle" of Oct. 30, page 1491, we said that Well, Roth & Co. of Cincinnati had advised us of their refusal to accept the \$52,000 bonds which were awarded them on Oct. 4 because their attorneys declined to unqualifiedly approve the issue. We are now advised by the Chairman of the Board of School Commissioners, W. R. Barringer, that the bonds referred to have since been approved by attorneys of cline Co. (An example, Carolina and re-sold. Mr. Barringer's letter follows:
 "In your issue of Oct. 30, at page 1491, appeared a statement based on refused to unqualifiedly approve the \$52,000 School District issue, because of the limited tax from which these bonds and interest are payable.' It is also true that the issue was approved to basequently by attorneys of the limited tax from which these bonds and therest are payable.' It is also true that the issue was approved the the bond sequences of the limited tax is valid without any sinking fund provision whatever, as the law will compel payment of the bonds by mandamus proceedings if necessary. Under this decision, the South Carolina autorneys referred to could not do otherwise than approve the bonds. We \*\*\* ask you to give this explanation in the same publicity that you have given the statement of Weil, Roth & Co."

the same publicity that you have given the statement of Weil, Roth & Co." FLOYD COUNTY (P. O. Rome), Ga.—BOND OFFERING.—Proposals will be received until 12 m. Nov. 24, by J. G. Pollack.
