THE FINANCIAL SITUATION.

The new Secretary of the Treasury, David F. Houston, has struck a popular chord in suggesting to the Ways and Means Committee of the House of Representatives the simplification and radical modification of the income and excess profits taxes. His proposal-we print his letter at length in a subsequent part of our paper-would mean the virtual doing away of the excess profits tax on corporations, with some paring down of the surtaxes on individuals. The recommendation regarding the excess profits tax served to give a further stimulus to the speculation for a rise on the Stock Exchange, the industrial shares being again the leaders with prices advancing by leaps and bounds. The industrial shares would unquestionably benefit greatly from the elimination of the excess profits tax, but the pyrotechnics in these industrial shares is to be greatly regretted. These stocks are behaving once more just as they did before the great collapse which began last November and continued for several months, working great havoc with prices: Speculative cliques are repeating the tactics indulged in during the spring and summer of last year. Prices are being boosted upward in very spectacular fashion, the advances running from 5 to 20 points a day and in special instances even higher. Last week the Supreme Court decision holding that stock dividends cannot be taxed as income fitted in well with the plans of the manipulators, while this week Secretary Houston's recommendation was made to do duty in the same way and the upward reaction in sterling exchange-to the best figures of the year thus far—acting further to promote the speculative furore. The railroad shares have been comparatively neglected, though firm. The performances in the industrial list are not only harmful per se, but they are to be deprecated because this recrudscence of Stock Exchange speculation is certain to make new demands upon the credit facilities of the banks, already strained close to the breaking point.

What the Secretary says regarding the excess profits tax is to be commended, and it is gratifying to find the subject dealt with so sanely in high quarters. The only criticism we would make is that the Secretary does not go far enough in his suggestion. Instead of merely modifying the tax and relieving it of its most glaring features, we would do away with it altogether, and instead of deferring revision until 1922, as proposed, we would provide for its going into immediate effect.

The Secretary argues that "it would be manifestly unsafe to reduce now the income and profits taxes to be collected in 1920 and 1921," but says he "can see nothing in the financial prospects for 1922 and thereafter which would make impossible, or unwise, the very modest reduction involved in the plan of simplification."

As regards the excess profits tax we do not think that action looking to its repeal should be deferred a single day. The tax is wholly wrong in principle, and, besides, operates most unfairly in its application to the smaller corporations, being almost confiscatory. The law proceeds upon the theory that the business man is entitled to only an exceedingly moderate return on the actual cash capital invested. Of course, the entire income is in the first instance subject to the normal tax, which is now 10%, and which, at that figure, ought to be

The excess profits tax is super-imposed on the normal income tax and the law undertakes heavily to penalize the shareholders in small corporations where the income runs above 8% on the "invested capital," by which is meant simply cash and other tangible assets. On everything above 8% the Government begins by taking one-fifth or 20%. The 20% rate applies up to the point where the income itself amounts to 20% of the "invested capital," then the Government takes 40%. In the case of the larger companies the application of the 40% rate is not so serious a matter because of the smaller corporations it is little short of destructive.

Very few persons outside of those who suffer through it and who thus know from practical experience how it operates have any conception of its really destructive nature. Our attention has been called to the case of a corporation with a nominal capital of \$400,000, but possessing cash and tangible assets aggregating no more than \$75,000. This concern before the war had a net income of \$60,000 equal to 15% upon the nominal capital of \$400,000. Upon an invested capital of only \$75,000 the 8% allowed represents merely \$6,000 and the \$3,000 exemption allowed to corporations increases this only to \$9,000. On all income above this \$9,000 the Government proceeds at once to levy a tax at the rate of 20% and 40% respectively as already pointed out. Altogether a surtax of \$19,200 has to be paid by this little concern, besides the normal tax of 10% which adds \$4,080, making a total of \$23,280 to be paid in income and excess profits tax. The following is the showing in tabular form:

INCOME AND EXCESS PROFITS TAX OF A CORPORATION EARNING \$60,000 ON \$400,000 STOCK, BUT WITH ONLY \$75,000 INVESTED CAPITAL.

Net income or profits for year.....\$60,000 Calculation of Tax—

Leaving for the shareholders_____\$36,720

The worst of it is that after having paid over \$23,280 to the Government this item in the next year's return is again treated as profits (as though it was still on hand) and the Collector proceeds to levy another 40% upon the \$23,280 already paid over to the Government. This 40% on \$23,280 amounts to \$9,312 and so the process continues year after year. Secretary Houston points. out that partnerships and personal service corporations are altogether exempt from the operation of the excess profits tax. This being so, this tax is open to the further objection that it operates unfairly as between business of the same kind conducted through different forms of organization. Is there any reason why a tax which by reason of its magnitude is practically confiscatory and which operates so unevenly as between the same classes of business should be tolerated a single day longer than the time necessary for its instant repeal?

There is still another aspect in which the excess profits tax is exceedingly harmful in its operations. We refer to the fact that it must be considered an important factor in the rise in prices of all articles and commodities. Mention of this has been made by others but in the example above of the case of a small corporation which by reason of its meagre invested capital is obliged to pay over so large a portion of its net income to the Government in taxes we have a capital illustration to show just how such an excessive tax works in raising the selling price of goods.

This little concern, which earned \$60,000 net, but had only \$36,720 of it left after paying the enormous taxes assessed against it, will, of course, seek to so increase profits that it will have the old amount of \$60,000 left after the payment of the taxes. This involves, however, increasing profit to an enormous extent, since as profits rise the Government's rake-off also rises. In the case under consideration the profits would have to be nearly doubled would have to be increased to \$104,000 as against the previous \$60,000, in order that \$60,000 might still be left to those engaged in the business after deducting the Government's tax levies. That this is true will appear from the following:

| Net income or profits for year\$104,000 Calculation of Tax— Excess Profits Tax—20% on \$15,000 after deducting allowance of \$6,000 (8% on | |
|---|--|
| \$75,000) and exemption of \$3,000 \$1,200 40% on \$89,000 35,600 | |
| Total\$36,800 Normal Income Tax—10% (calculated on \$104,000, less Excess Profits Credit of \$36,800)6,720 | |
| Leaving for the shareholders | |

Thus we have a practical illustration going to show how it is necessary to earn \$104,000 net now in order to leave the same \$60,000 net income that this little corporation earned before this process of tax collection was applied. It may well be doubted whether so long as this particular tax remains on the statute books any substantial lowering of prices can be brought about. There is, therefore, all the more reason why the tax should be repealed without a moment's delay. And Congress should immediately address itself to the task of expediting the repeal.

The foreign export total for the United States for Feb. 1920, announced officially last evening, is merely one in an extended series of phenomenally heavy aggregates. This latest total, it is true, is not as large as that for the preceding month, with its 31 days against 29 in February, but is the heaviest on record for the particular month covered and, in fact, has been exceeded only five times in our history. Specifically, the merchandise exports for Feb. 1920 covered a value of \$646,000,000, a total contrasting with \$585,097,012 in 1919 and \$411,361,970 in 1918. For the eight months since July 1 1919 the aggregate records an augmentation of 849 million dollars over the preceding year, comparison being between \$5,-231,000 and \$4,382,510,730, and there is a gain of 1,370 million dollars over 1917-18. A decidedly interesting fact is that the total is 898 million dollars in excess of that for the full fiscal year 1915-16 and nearly double that of 1914-15.

Merchandise imports in Feb. 1920, at \$467,000,000, also exceed all previous records for the particular period covered, exhibiting a gain of 232 million dollars over 1919 and 260 millions over 1918, and are only 7 millions less than the record monthly total established in January. For the elapsed portion of the fiscal year 1918-19 the aggregate is \$3,235,000,000, or no less than 1,302 millions more than for the similar period of 1918-19 and 1,394 millions larger than for 1917-18. The net result of the February foreign trade this year is an export balance of \$179,000,000, this contrasting with \$349,972,738 a year ago and \$203,646,430 in 1918, while for the eight months our net credit abroad stands at \$1,996,000,000, against \$2,449,185,036 and \$2,020,334,947, respectively.

The gold movement of the month shows a net loss of \$38,633,851. Exports reached \$43,107,211, of which about 23 million dollars went to Argentina and relatively important amounts to China and Hong Kong. Against this there were imports of only \$4,473,360. For the eight months the net outflow of gold has been \$319,462,061, against \$8,096,518 in 1918-19 and \$96,936,876 in 1917-18.

Current activity in the building industry of a country-wide nature holds out a promise that within a not very lengthy period there will be at least some relief from the existing acute housing situation in the United States. The extent to which relief will be experienced, however, is dependent upon the ability of those in interest to bring about conditions in the labor, material and loan markets that will permit the work of construction to proceed with as little obstruction or delay as possible. From all sections there come reports that there is a dearth of structures, especially for dwelling purposes, and, coincidently, complaints of rent profiteering are loud and persistent. It is to relieve this latter feature of the situation that builders are urged to get work speedily under way, and those upon whom they rely largely for financial aid in carrying on their projects are taking steps to offer all possible assistance.

We have had an illustration of this locally within the last week in the conference held, at the instance of the Mayor, in the Board of Estimate room at the City Hall. The outcome of the conference was the appointment of a Stabilization Committee to smooth out the differences between capital and labor, and between rival labor unions, which have been a serious hindrance to active resumption of building operations, and to offer assistance in any other manner that may be required. Attention was drawn at the conference to the fact that the tax upon income from mortgages under Federal and State laws has been a factor of extreme importance in reducing funds available to finance construction work, as large holders are replacing that class of investments with non-taxable securities. To make this money available, these taxes will have to be removed, it was contended, and it was urged that steps be taken to secure their repeal. The definite outcome of the conference was the assurance given by large investment interests that with labor conditions and material prices stabilized and the heavy taxation of mortgages removed, there would be money enough, quickly available, to meet every legitimate building need, thereby ameliorating if not ending the housing shortage and rent profiteering. One of the large insurance companies specifically made a pledge of \$15,000,000 to \$25,000,000 of loanable funds.

Prompt action on the mortgage question was indicated by the introduction of a bill at Albany to exempt from taxation income from mortgages up to \$40,000.

Our February compilation of projected building operations, covering 171 cities in various sections of the country, fittingly supplements that for January in furnishing an aggregate of contemplated expenditures of truly notable magnitude for the season of the year. It is, of course, and by an appreciable sum, a new high mark for the particular month. The total of intended outlay, in fact, foots up no less than \$112,633,266 against only \$34,330,503 in 1919, or an increase of 228.1% and the gain over 1918 is even greater-275%. The result for Greater New York-needless to say-is decidedly better than a year ago, an outcome due to a marked acceleration of operations in all boroughs except Richmond. The current aggregate is \$24,577,129 against \$8,125,613, and compares with but \$4,328,691 two years ago. Outside of this city the estimated expenditures provided for under the contracts entered into at \$88,056,-137, contrasts with \$26,204,810 in 1919 and 251/2 million dollars in 1918, and of the 170 cities all but 23 exhibit increases over last year. With gains so general specific reference to individual cities would seem to be superfluous except to mention that at such important centres as Cleveland, Indianapolis, Los Angeles, Washington, Omaha, Minneapolis, Portland, Ore., San Francisco, Springfield, Mass., St. Louis, Newark, Detroit, Philadelphia and Chicago the increases are from 300% to over 600% as compared with 1919. Decreases where shown are inconsequential. As arranged by us in groups, the cities of New England record an augmentation in expenditures of 31/2 million dollars over last year, the middle division (exclusive of Greater New York) shows a gain of about 14 millions, the Middle West 211/4 million, the Pacific Coast a little under 7 millions, the "other Western" 6 millions and the South 101/4 millions.

For the two months of 1920 the estimated outlay at the identical 171 cities reaches the enormous total of \$245,661,592-an aggregate far in excess of the figures for these two months in any earlier year. It is, moreover, nearly half that for the full year 1918 at 285 cities when operations were reduced to a minimum in an effort to employ all the resources of the country in the winning of the war. The result for the two months of 1919 was \$58,223,189 and of 1918 barely 59 millions. Greater New York's shares of this year's aggregate is \$55,150,224 against 13 millions and 91/2 millions one and two years ago, and the outside cities account for \$190,511,368 and 45 millions and 49 millions, respectively. New England's total of \$15,735,008 for 25 cities is nearly 1134 millions more than a year ago, and that of \$36,046,047 for 44 municipalities in the middle group (Greater New York excluded) overtops 1919 by 27 millions. The Middle West aggregate (30 cities) at \$63,827,765 compares with \$14,484,518, the Pacific Coast (14 cities) shows an increase of 1934 millions, and the "other Western" (24 cities) over 16 millions. At the South (33 cities) the contrast is between \$26,935,153 and \$5,500,722.

Advices from Canada indicate that, as in the United States, the necessity for housing accommodations is very urgent, but that the scarcity of materials and the high wages demanded by labor have served

[VOL. 110.

Needless to say, the developments in Germany, beginning a week ago to-day, have overtopped every other happening in all Europe. During the first few days the rumors were so numerous, and so conflicting as well, and the censorship was said to have been so rigid, that it was not only extremely difficult, but altogether impossible, to form definite opinions as to all that actually had happened, and as to the probable effect of those events upon domestic affairs in Germany, and also upon its international relations, just beginning to take new form.

The first real intimation that trouble was brewing was conveyed in cablegrams from Berlin that were made public here in some of the papers on Saturday morning. In one such dispatch it was claimed that "the German Government has discovered a revolutionary plot, organized by a reactionary clique, which also has been endeavoring to corrupt the troops." According to the "Freiheit" "General von Luettwitz, commander of the first Reichswehr group, is implicated in the plot." The dispatch contained the further report that Minister of Defense Noske had arrested several supposed instigators of the movement, one of whom, Dr. Wolfgang von Kapp, was destined to come into prominence very shortly as its real leader.

During the greater part of the forenoon Saturday numerous rumors were received from London, Paris and other European centres to the effect that the troops had mutinied, taking possession of Berlin, and that Dr. von Kapp had declared himself Chancellor and issued a proclamation to the people. Shortly before noon it became known pretty definitely through cablegrams direct from Berlin that this report was substantially correct, and that the revolt had been effected without shedding of blood. The members of the Ebert Government apparently were taken completely by surprise, knowing nothing of what was going on until the plot among the soldiers was discovered late Friday night. Then it was too late to defend themselves and there was nothing to do but to surrender and flee for personal safety. According to the proclamation of Dr. von Kapp, the National Assembly of the former Government was declared dissolved and the people were promised freedom and new elections. On the other hand, the leaders of the late Government issued an appeal to the people "claiming their support against the reactionaries and calling upon them to organize and declare strikes."

According to the early messages from Berlin Saturday, President Ebert and his Cabinet offered no armed resistance to the revolutionary troops and were reported to have gone to Dresden and to have established the seat of their Government in that city. Monday afternoon's advices stated that the Ebert Cabinet would be rallied together at Stuttgart and that the National Assembly would be convened there the next day. A dispatch purporting to come direct to retard preparations for construction work. At the from that centre, and dated the 16th, and which was

made public here Tuesday evening, claimed that "Konstantin Fehrenbach, President of the National Assembly, signed a decree convoking the Assembly." No date for the session was mentioned. Another Berlin cablegram stated that the appointed time was 4 o'clock Wednesday afternoon. Evidently up to that time only the Ebert Cabinet, and not the National Assembly, had met.

Dr. Wolfgang von Kapp, the self-appointed Chancellor of the new Berlin Government, and who is said to have been born in New York City, in his proclamation, declared in the very first sentence that "the overthrow of the German Government must not be taken as reactionary." In the next sentence he said that, "on the contrary, it is a progressive measure of patriotic Germans of all parties, with a view to re-establishing law, order, discipline and honest Government in Germany." With a view apparently to setting forth the desire of his party to protect the people's interest, the Chancellor said that "the new Government invites heartily the acceptance and co-operation of the Independents for the creation and elaboration of laws for the betterment of the working classes." On Saturday morning the Majority Socialists (President Ebert's party) also issued a proclamation in which the assertion was made that "we refuse to bow to this military party." The people were urged to "strike" and to "cease to work." The manifesto closed as follows: "Let there be a general strike along the entire line. Let the proletariat act as a unit." The document was signed by President Ebert and the other Social Democrat members of the Government.

Monday's advices from Berlin and other points indicated that it was pretty much an even race between Dr. von Kapp and his immediate followers, and President Ebert and his Ministry, to get and maintain control of things in Germany. The Associated Press dispatch from Berlin that morning, in which an account of the situation there was given, began as follows: "The two Governments of Germany are now matching wits and forces to gain control of the Republic." The dispatch added that "Dr. von Kapp is employing all his efforts to assure the German people that the Government under him and those he selects to administer affairs will mean true democracy, increased production and conservation of the rights of the working people." President Ebert, on the other hand, was reported to be depending chiefly on the strike weapon to overthrow the new Government. It was stated that "in response to the appeal a general strike has been proclaimed in many places, but in other parts of Germany the call for a strike has not met with favor." There was said to be some apprehension even then of coming bloodshed, although up to that time none had bene reported at any important centre.

Monday evening reports reached here from Berlin, Paris and London that an agreement had been reached between Dr. von Kapp and President Ebert, which had practically brought the revolution to an end. According to one of the messages, the agreement was made by the Chancellor and by Gustave Noske, Minister of Defense in the Ebert Government. While it appeared from the cablegrams the next morning that the report of an agreement actually having been reached was at least premature, the statement was made that a definite proposal had been submitted by Chancellor von Kapp to the Ebert Government. Among its many provisions

the following were the more important and more striking: "A Cabinet will be formed of professional Ministers, including professional Ministers of the old Government; a second Chamber will be formed by the extension of the Economic Ministry and of the Economic Councils." "Briefly," it was further set forth, that "Chancellor von Kapp is agreeing to the continuance in office of the present Imperial President, who is Friederich Ebert, until an election for Imperial President by the people is held." A clause in the pronunciamento that was said to have attracted special attention was this: "The new and old Governments shall issue a joint declaration that under present conditions a general strike is a crime against the German people." The explanation was offered in the dispatch also that "until a decision is taken on these proposals the Imperial Chancellor renounces the formation of a new Ministry and charges the senior State Under Secretaries with the direction of affairs."

At first thought the foregoing seemed to constitute a program on which the two contesting factions for control of the Government could join forces. Here in New York there was general expression of the hope that the seemingly serious situation in Germany would work out this way. The suggestion was made by some of our international bankers that a coalition of the best elements among the militarists, with their experience in conducting the affairs of the country, with the idealism of the Socialists, who represent the people pretty generally, would make the resultant party and Government the best that could be hoped for under present conditions.

The advices from Berlin and Stuttgart during the day Tuesday did not hold out much hope that such a political union would or could be brought about. President Ebert was quoted as having refused point blank to negotiate with Dr. von Kapp or with any one representing him and to have demanded his unconditional surrender. Paris was more optimistic, judging from the advices from that centre. It was still maintained there that the two groups were negotiating and that an agreement practically had been reached. On the other hand, the Berlin correspondent of a London news agency cabled to his home office that "Dr. Wolfgang von Kapp, leader of the new German revolution, has offered to resign as Chancellor, thus opening the way for negotiations with the Ebert Government." On Wednesday morning the assertion was made in an Associated Press dispatch from Berlin that he had actually resigned. In his demand for the surrender of the Chancellor, President Ebert was said to have had the hearty support and co-operation of his Cabinet. Serious fighting was reported on Tuesday in Hamburg and in Berlin suburbs, in Leipzig and other places.

The foregoing gives a rough outline of the principal events in Germany in the revolutionary movement during the first four days. Well nigh countless details might be gone into, but time and space forbid. It will be interesting to turn back for a moment and glance at the attitude of Great Britain, France and the United States toward the whole affair. In London the first reports of the overthrow of the Ebert Government came as a genuine surprise, according to dispatches from the British capital. They stated that no one was more surprised than the Secretary of the German Legation, who was quoted

as saying that "not a word has been received from Berlin." "How far the movement is a Monarchist one it is not possible to say. We never dreamed of anything of the kind and are unable to understand it." British Government officials were not inclined at first to credit the idea that "the revolutionary movement is monarchical in tendency." In Paris the attitude toward the whole affair was said to have been quite different. Marshal Foch was spoken of as "the hero of the hour," because he had foreseen the event, it was claimed. A Paris correspondent of the New York "Times" cabled that "the general demand is that the Allies take a firm stand at once." The opinion was said to prevail that "the Berlin coup does not mean that all Germany will follow the revolutionary leaders." On the contrary, it was asserted that Bavaria and the Rhineland will not submit to Prussian military dictation. In Washington the first news of the German revolt was declared to have "caused deep concern in Government circles, where the feeling prevails that the situation may compel the Allied Powers to undertake forcible measures to require Germany to carry out the terms of the Treaty of Versailles."

On Monday the British political leaders appeared to have more definite views regarding the German situation. They were reported as doubting that the von Kapp movement would be successful, "largely because of a lack of popularity on the part of its leaders with the people." The London correspondent of the "Sun and New York Herald" said that "the British Government, it may be said authoritatively, has adopted a watchful waiting attitude toward the revolution across the Rhine." Premier Lloyd George announced in the House of Commons Monday afternoon that "the German counter-revolutionists are in possession of 35 towns." and also stated that "the new Government appears to be gaining strength." He counseled against hasty action and even said that "it is well to await developments before taking any definite action."

French opinion, according to one correspondent, was divided. He stated that "on the one side the French see the danger of a recrudescence of German militarism, refusal to disarm and consequent eventual danger to France." He added that "on the other side they see the complete surrender to the French view that the only safe policy toward Germany is one of firmness and force, if need be.' Marshal Foch, it was stated, promptly made whatever preparations in a military way he thought might be necessary to cope with the situation. The "Petit Parisien" said on Monday that "France contemplates sending three more army corps to Weisbaden, Neustadt and Bonn, thus doubling her forces along the Rhine." The French were reported to be in favor of aiding the Ebert Government rather than the von Kapp revolutionary movement during the existing crisis. Washington authorities, upon second thought, were declared in advices from that centre to have decided upon a hands-off policy, or, in other words, to treat the revolution as a German domestic affair, until compelled to consider it as having distinct and serious international aspects. As a matter of fact, it was said that the authorities there looked for an early collapse of the revolutionary movement.

Taking up again the outline of events in Germany,

did the advices from Berlin state that official announcement had been made of the resignation of Chancellor von Kapp. Even then it was not set forth that he had actually filed his resignation. What was said was this: "It is officially announced that Chancellor von Kapp, at 1 o'clock this afternoon, decided to resign." Thursday morning word came from Berlin that not only he but General von Luettwitz had actually resigned. An official statement was issued which set forth that the two men gave up because of "the extreme necessity of the Fatherland, which demands solid union of all against the annihilating dangers of Bolshevism." It was stated that "the Vice-Chancellor, in the name of the Imperial President, has accepted the resignations and has entrusted Major-General von Seecht with the provisional conduct of affairs as Commander-in-Chief." According to the semi-official news agency, "an agreement has been reached between the members

of the majority parties, the German National Party and the German Peoples' Party, on the following points: First, Reichstag elections to be held in June at the latest. Second, an Imperial President to be elected in accordance with the Constitution, by the people. Third, thorough reorganization of the Imperial Government." The Berlin advices stated that "the real circumstances of von Kapp's retirement are still shrouded in mystery."

News agency dispatches received in London from Berlin Wednesday quoted Gustave Noske, Minister of National Defense, as being confident of his ability to "restore normal conditions in Germany within a comparatively short time." Through a cablegram direct from Stuttgart, the temporary seat of the Ebert Government, it was reported that, because of the railroad strike, many members of the National Assembly might not be able to reach that city in time for its first meeting since the beginning of the revolt. The session was scheduled for 4 o'clock in the afternoon. Later advices stated that as a matter of fact nearly 200 members of the National Assembly arrived during the forenoon and held a meeting in the Art Hall at the appointed time. It was added that "military forces occupied the great open space before the hall."

With the apparent partial or complete collapse of the revolutionary movement, so far as the leadership of Dr. von Kapp and General Luettwitz was concerned, reports were received in London of uprisings by the Independent Socialists, Communists and Spartacides in Berlin and other large centres in Germany. It was claimed in those advices that "the Independent Socialists and Communists in Berlin have proclaimed a Republic and delivered an ultimatum to Dr. von Kapp, head of the revolutionary government." (Up to that time word had not been received of his resignation.) According to the reports also, Dr. von Kapp replied "by establishing martial law." The "Frankfurter Zeitung" was said to have published a statement to the effect that "after the Independent Socialists and Communists delivered their ultimatum, von Kapp and Luettwitz announced their readiness to retire and to hand over the authority to Vice-Chencellor von Bulser." In another telegram received in London from a Berlin correspondent of a news agency "the Independent Socialists and Communists in Germany have begun a violent agitation in favor of a Soviet Republic and an alliance with Soviet Russia." "Sanguinary clashes" were reported it may be noted that not unti Wednesday afternoon to have taken place Tuesday night at Essen, Dortmund, Leipzig, Mannheim, Frankfort and Brunswick." According to one report 59 were killed at Treves in the American zone and 100 in Dresden. A dispatch received in Copenhagen from Kiel on Tuesday stated that the town had been "bombarded by the cruiser Eckenfoerde, which was at the disposal of the revolutionary Government." It was even elaimed that "the cruiser fired through the streets from the harbor killing some 500 persons and demolishing a number of buildings."

With the passing of the direction of the military government from von Kapp and Luettwitz, the opinion was expressed in an Associated Press cablegram from Berlin Thursday morning that Gustave Noske would come back soon to the capital from Stuttgart, and that power would be returned to him. One of the most persistent rumors all that day was that Dr. von Kapp had committed suicide, but verification was not forthcoming then and has not been since. One dispatch dated "Berlin, March 17 (night)" and received here Thursday afternoon, stated that "following the resignation of Chancellor von Kapp and General von Luettwitz, Eugene Schiffer, Vice-Chancellor under President Ebert, took over the Government at 6 P. M. (Wednesday, the 17th). "Simultaneously," it was added, "the red, white and black flag was hoisted over the Government buildings as a symbol of the defeat of the Monarchist movement." "The Ebert Government," it was reported, "restored to power, has ordered the arrest of von Kapp, von Luettwitz, Police Chief von Jagow, and others prominent in the Monarchist movement." Gustave Noske, Hermann Mueller and other members of the Ebert Cabinet, were quoted in the Cologne "Gazette" as having denied that they had negotiated with General von Luettwitz "for the purpose of organizing a countercampaign to prevent the spread of Bolshevism in Germany." The latter development appeared to be feared more than any other, not only by the Ebert Government, but also by the Government authorities in London, Paris and Washington. In several dispatches from the French capital that came to hand, it was asserted that the German Peace Delegation there continued loyal to the Ebert Govern-The advices from Berlin yesterday morning ment. stated that that Government was again in control in the German capital. It was added that "Gustave Noske, Minister of Defense, and Vice-Chancellor Schiffer, in whose hands the sudden retirement of Dr. Wolfgang von Kapp temporarily placed the administrative power, are engaged in bringing about order in the city and restoring activities to their normal basis." President Ebert and the full Cabinet were expected to arrive in Berlin yesterday.

The dispatches regarding the German situation, received during the day yesterday and last evening, indicated the continuance of disorder in Berlin and other important cities and a continuance of the strikes at some centres. They contained reports also of the resignation of Gustave Noske as Minister of National Defense, and of a rather comprehensive recasting of the Ebert Cabinet. It was rumored that some of the changes would be in compliance with demands made by Dr. von Kapp before he resigned.

The dispatches from Holland all week indicated- 94% of our wool, 90% of our linen, 90% of our that the Dutch authorities were more or less appred minerals, 83% of our pig iron, 70% of our sugar an

hensive of the international complications that might develop as a result of their continued harboring of the former Kaiser, particularly if the greatly disturbed political conditions in Germany should last for some little time and should result in victory for the von Kapp movement. They were said to have obtained a promise from the former monarch to bar all political activity while in the limits of Holland. The further assertion was made that he would be restricted to Doorn, Amerongen, and their surroundings. The former Kaiser was spoken of as being in a highly nervous state, while the von Kapp revolutionary movement was in progress, and in a dispatch from Berlin yesterday morning the assertion was made that he had contributed 8,000,000 marks for that undertaking.

Official announcement was made early in the week of the partial formation of the new Italian Cabinet. Signor Nitti continues as Premier, and for a while it was stated that he will take over the portfolio of the Minister of the Colonies as well. While, according to a dispatch from Rome, "the Italian Cabinet does not contain any members of the Catholic Party, it was reported that the Premier had received a semi-official Catholic promise to stand by the Ministry." A cablegram from Rome Thursday morning stated that "the new Cabinet is holding daily council to discuss the program which the Government will submit to Parliament."

Finland is another country in which a new Cabinet has been appointed within the last week. Dr. Rafael Erich formed it, and, of course, is the Prime Minister. This Ministry succeeds that of Signor Venola, which resigned on March 3.

In an interview with a Paris correspondent of the Associated Press, Premier Millerand of France gave a most frank and illuminating view of the financial position of his country and of her intentions with respect to the payment of her foreign obligations. With respect to the relations that should exist between France and the United States, he said that "France and the United States must continue the close friendship which always has been maintained between the two countries." He added that "France is not asking for charity. The greater part of the money France borrowed abroad was spent in the common interest of all. We don't request cancellation of our debts. We only ask time to recover our strength after 41/2 years of exhausting war." The Premier pointed out also that "if France is obliged to meet her obligations abroad at the present rate of exchange, she would be forced to pay 21/2 times what she owes." Continuing, he exclaimed: "We have given our blood; we have given our money. To ask us now to give more than double our debt is an anomaly that cannot fail to strike the most impartial judges." Discussing ways in which the foreign obligations of France might be paid in part the Premier said: "We ask nothing better than increased exports. We must first, however, manufacture, and we can't make things for foreign trade until we have factories in which to manufacture." He asserted, furthermore, that "the war cost us 600,000 industrial workers; 600,000 of our buildings were destroyed; regions were entirely ruined which in 1913 gave us 94% of our wool, 90% of our linen, 90% of our

itized for FRASER b://fraser.stlouisfed.org/ 53% of our coal." Continuing he said: "The war wasted our railroads to an unimaginable extent; 30% of our merchant fleet was sunk and our wheat production was reduced two-thirds, involving a deficit of 2,000,000,000 francs." "These catastrophal changes," the Premier declared, "were a blow to the very base of the economic and financial situation of France." He asserted that if France were to ship her gold "it would bring on a financial crisis coinciding with the period during which the effects of the war would be unrepaired."

It would be interesting in the extreme toknow definitely what Great Britain's naval program for 1920 and 1921 actually is. The advices from London regarding the matter have been conflicting in the extreme. In a communication received early in the week it appeared that the Government intends to cut down its naval expenditures for this year and next by a very large amount. The revised naval estimates for the two years, it was stated, "provide for the expenditure of £84,372,300, as against £157,-528,800 for the previous year." It was stated also that "the estimate calls for a total personnel of 136,-000 men, against 280,000 last year." As against the foregoing came the following dispatch from London a few days later: Walter Hume Long, First Lord of the Admiralty, in introducing the naval estimates in the House of Commons, said that "the Government is firmly adhering to the traditional policy that the British navy should not be inferior to the navies of other Powers." He added, however, that "the idea of competition in armaments between the United States and Great Britain was repugnant." Previously in his address he had admitted that "the United States is the only country whose navy approaches that of Great Britain in strength." Washington dispatches last evening told of a statement said to have been made during the day at the British Embassy in that city. According to the announcement, "British naval estimates for 1920-21 provide for no new warship construction. Provision is made for a post-war fleet in full commission of only 16 battleships, 4 battle cruisers, 38 light cruisers, with destroyers and submarines in proportion."

In order to husband its gold reserve as fully as possible and at the same time to obtain money for current needs, it is apparent that Great Britain intends to dispose of its surplus war equipment wherever such action seems advisable. With this apparent end in view announcement was made that the British Government had decided to sell its entire surplus supply of aircraft material. It was even stated that such a sale had been made to a syndicate. The value of the material was placed at £100,000,000 and it was reported to include "10,000 airplanes, 3,000 new airplane engines and an immense quantity of engine and airplane spares and hangars."

Although the assertion was made in a London cablegram that Earl Curzon's speech in the House of Lords and unofficial statements on the subject, indicated that the Near East tangle was regarded as serious by the Allied authorities, apparently they were giving very little consideration to it, or to any other matter outside of the political situation in Germany. The Paris correspondent of the New York "Times" declared that "all pending problems were forgotten in the face of the new and startling developments."

Announcement was made, however, in a cablegram from Constantinople, dated the 16th, and made public here Thursday morning, that the city was occupied Wednesday morning "by Allied forces under General Sir George F. Milne, of the British Army, which occupied the Ministries of War and Marine, and assumed control of the ports, telegraphs and telephones." It was stated also that all the public services had been suspended temporarily, as had been the shipping. The correspondent added that "this long-looked-for military demonstration by the Allies against Turkey was carried out with only one untoward happening, a serious clash at the War Office, where the Turks resisted the Allied troops." Another message from the Turkish capital Thursday afternoon stated that the Turkish police were cooperating with the Allied authorities in maintaining order. The ferry and telephone service had been resumed, and it was added that "only small detachments of Allied soldiers are visible in the streets and about the buildings." The British, French and Italian High Commissioners issued a proclamation in which they claimed that their occupation of Turkey would be only provisional and that they did not intend to deprive the Turks of Constantinople. London heard yesterday afternoon that General Milne "virtually has been given blanket power to administer affairs in the Sultan's empire until the treaty of peace between the Allies and Turkey is completed." The "Morning Post," of London, received a message from its Constantinople correspondent last evening saying that "the Turkish Government is on the point of falling as a result of Allied occupation."

All week the advices from London have contained rather well defined reports that Lloyd George has decided to form a new political party. The "Observer" of that city, which is regarded as being particularly close to the Premier, said that "Lloyd George is determined to resign his old allegiances to the Liberal Party and form a new party from the present Coalition." Continuing, the paper said: "Mr. Lloyd George has crossed the Rubicon, and will announce his decision this week." The "Daily Mail" said that "a joint manifesto, which will be signed by Premier Lloyd George and Andrew Bonar Law, will be issued in a few days stating the principles of a new party led by the Premier." According to that paper also, "it will be accompanied by an important recasting of the Ministry." It was added that, "according to the present intentions, the name of the new party will be the National Democratic." It was said that the Unionist leaders who have been adherents of Premier Lloyd George "have decided to support him, but that a revolt under the leadership of the Marquis of Salisbury and Sir Robert Cecil is expected." A special correspondent of the New York "Tribune" declared in a dispatch to his paper Thursday morning that "a new party will be formed, and whatever happens there will be real opposition in Parliament hereafter."

British Treasury returns for the latest week show an increase in the Exchequer balance of £120,000, which compares with a debit of £982,000 the week preceding. Expenditures were £41,515,000, against £50,249,000 for the week ended March 6, while the total outflow, including Treasury bills, advances, Exchequer bonds and other items repaid, amounted to £107,773,000, against £132,175,000 the previous week. Receipts from all sources totaled £107,893,-000, in comparison with £131,193,000 the week before. Of this amount revenues contributed £57,-145,000, against £56,441,000 and savings certificates £1,200,000, against a like sum last week. Sundries brought in £586,000, against nothing in the week preceding. From advances a total of £5,000,000 was received, against £14,500,000. New issues of Treasury bills aggregated £43,437,000, in contrast with £46,054,000 a week ago, while Exchequer bills were sold to the amount of £525,000, against £12,850,000 last week. In the case of Treasury bills, repayments were below the total sales, so that the volume of Treasury bills outstanding was increased to £1,059,-228,000, as against £1,056,662,000 the previous week; Temporary advances outstanding are now £168,930,-000, a reduction of £6,500,000 for the week. The total floating debt continues to recede, and aggregates £1,228,158,000, against £1,232,092,000 last week.

Official discount rates at leading European centres continue to be quoted at 5% in Paris, Berlin, Vienna and Switzerland; $5\frac{1}{2}\%$ in Norway, 6% in London, Sweden, Copenhagen and Petrograd, and $4\frac{1}{2}\%$ in Holland. In London the private bank rates is now slightly firmer at $5\frac{3}{4}\%$ for sixty days and $5\frac{7}{8}\%$ for ninety days, against $5\frac{3}{8}@5\frac{3}{4}\%$ a week ago. Call money in London is still reported at $3\frac{1}{2}\%$. So far as can be learned, no reports have been received by cable of open market rates at other centres.

The Bank of France continues to report small gains in its gold item, the increase this week being 402,325 francs. The Bank's total gold holdings, therefore, now amount to 5,583,113,075 francs, comparing with 5,540,015,815 francs last year and with 5,372,264,210 francs the year before; of these amounts 1,978,278,416 francs were held abroad in 1920, 1,978,308,484 francs in 1919 and 2,037,108,484 francs in 1918. During the week advances were augmented to the extent of 1,429,443 francs; Treasury deposits gained 67,565,130 francs and general deposits rose 232,392,077 francs. Silver, on the other hand, decreased 1,429,443 francs and bills discounted fell off 4,888,315 francs. Note circulation took a favorable turn, a contraction of 304,814,335 francs being recorded. The total outstanding now is 37,740,008,251 franes, which contrasts with 33,262,-283,890 francs last year and with 24,824,969,040 francs in 1918. On July 30 1914, just prior to the outbreak of war, the total outstanding was only 6.683.184.785 francs. Comparisons of the various items in this week's return with the statement of last week and corresponding dates in 1919 and 1918 are as follows:

BANK OF FRANCE'S COMPARATIVE STATEMENT.

| Changes | No. Contraction | -STATUS BA OF- | |
|--|--|---|--|
| Gold Holdings— for Week, France, France, In France, Inc. 402,325 Abroad | Mar. 18 1920. Francs. 3,604,834,659 1,978,278,416 | Mar. 20 1019. Francs. 3,561,707,330 1,978,308,484 | Mar. 21 1918. Francs. 3,335,165,725 2,037,108,484 |
| Total | 5,583,113,075 248,521,325 1,558,234,652 | 1,029,401,107 | 5,372,264,210 255,768,100 1,039,774,552 |

Another substantial gain in gold holdings was announced by the Bank of England this week, in round numbers £2,280,737, so that the Bank's stock of gold discounts was noted, though on the other hand

on hand has now been augmented to £118,270,077. Last year it stood at £83,414,724 and in 1918 £60,-605,025. The total reserve was increased £3,996,000, note circulation having been reduced £1,715,000. A further advance in the proportion of reserve to liabilities has taken place, bringing it up to 23.50%, which is the highest percentage touched thus far this year, and compares with 21.62% last week and 19.90% a year ago. The lowest percentage during the current year was recorded on Jan. 8, when it was 12.20%. Public deposits declined £136,000, but other deposits expanded £5,692,000 and Government securities £1,672,000. Loans (other securities) were reduced £103,000, and now stand at £91,954,000, in comparison with £79,477,023 in 1919 and £99,228,-693 the year before. Reserves aggregate £35,548,-000. Last year the total was £29,657,024 and £31,696,130 in 1918. The total of circulation is £101,171,000 and compares with a total of £72,207,-000 last year and only £47,358,895 a year earlier. Currency notes outstanding aggregate £298,498,000, as contrasted with £300,010,000 the previous week. The amount of gold as security against these notes is now £29,774,000, comparing with £29,735,000 last week. Clearings through the London banks for the week totaled £767,470,000. A week ago the total was £785,550,000 and £438,120,000 last year. We append a tabular statement of comparison of the different items of the Bank of England statement:

| BANK OF ENGLAN | D'S COMP. | ARATIVE S | TATEMENT | T41 |
|---------------------------------|-------------|-------------|-------------|------------|
| 1920. | 1919. | 1918. | 1917. | 1916. |
| March 17. | March 19. | March 20. | March 21. | March 22. |
| £ | 6 | £ | 2 | £ |
| Circulation | 72,207,700 | 47,358,895 | 37,824,290 | 32,903,895 |
| Public deposits 18,419,000 | 27,212,004 | 35,373,425 | 67,911,044 | 56,216,377 |
| Other deposits 133,030,000 | 121,834,936 | 134,380,750 | 124,334,897 | 90,125,709 |
| Govt. securities 42,059,000 | 40,452,735 | 56,085,782 | 24,051,099 | 32,835,646 |

Saturday's bank statement of New York associated members, which is given in more complete form on a later page of this issue, was more favorable than might have been expected, when the recent strain of revenue collections is considered. Loans were increased \$27,052,000. There was a further expansion in net demand deposits of \$59,584,000 to \$4,139,852,000 (Government deposits of \$18,-061,000 deducted), while net time deposits gained \$2,873,000 to \$252,431,000. Cash in own vaults of members of the Federal Reserve Bank declined \$503,000 to \$97,535,000 (not counted as reserve), but reserves of member banks with the Federal Reserve Bank expanded \$33,113,000 to \$554,349,000. Reserves of State banks and trust companies in own vaults increased \$64,000 to \$13,139,000 and reserves in other depositories (State banks and trust companies) showed a gain of \$1,044,000 to \$11,585,000. The accession to the member bank reserve brought about an expansion in aggregate reserve of \$34,221,-000, so that the total held now stands at \$579,073,000. Reserve requirements were expanded \$7,879,640, with the result that the gain in surplus was only \$26,341,360. However, the total of excess reserves on hand is \$29,040,420. The above figures for surplus are based on legal reserve of 13% for member banks of the Federal Reserve, but not including cash in vault to the amount of \$97,535,000 held by these banks on Saturday last. At the Federal Reserve Bank a further reduction of nearly \$25,000,000 in re-

there was an increase of \$16,600,000 in the rediscounts placed with other Federal Reserve banks. The New York Federal Reserve Bank also was able to add nearly 18 million dollars to its gold holdings. The reserve percentages were up and altogether the statement was more encouraging than for some little time past.

The tendency of quotable rates for call money in New York this week has been toward a lower level. Stock Exchange houses did not seem to experience special difficulty in filling their requirements at the prevailing rates. The quotations for time funds have softened fractionally and small amounts of money, chiefly for the account of out-of-town institutions, were reported to have been offered from day to day. Bankers at this centre say, however, that until the reserve ratios of the Federal Reserve banks are substantially higher than they have been for several months, borrowers will not be justified in looking for large offerings for the longer periods. In discussing the general monetary position they indicate that there cannot be much hope of a substantial relaxation in the money market, chiefly because of the heavy commercial and mercantile demand for funds. It is pointed out that as soon as money is released in one channel it is quickly taken up in another. The further suggestion is made that so long as business in this country continues at about the present level there cannot be much slackening in the demand for loans and consequently not much increase in the supply of available funds. On the other hand, bankers say that they are urging reductions in loans, particularly when the money is sought for aid in the manufacture and handling of luxuries. Secretary of the Treasury Houston's recommendations for a modification of our taxation system were pretty well received and have been given some consideration in Congress. The falling off in our exports for February, as indicated by the estimated figures made public yesterday afternoon, were given more than passing attention by those who are making a close study of commodity prices, and the foreign exchange and money markets. Needless to say, if the exports decrease and the imports increase sufficiently, not only will commodity prices come down, but the industrial and mercantile demand for money in this country will not be as heavy as at the present time, and as it has been for several years. Offerings of securities are being made in moderate amounts, but the demand at the moment for new issues is not particularly urgent.

As regards money rates in detail, call loans ranged during the week between 6 and 9%. This compares with 7@15% last week. On Monday there was no range, 9% was the only rate quoted, being the high, low and ruling for the day. On Tuesday a slight recession was noted and the low declined to 7%; renewals were made at 8%, although the high was still at 9%. There was a further easing on Wednesday, with 8% the maximum and renewal rate, and the low 6%. Thursday's range was 6@7% and 7% the renewal basis. On Friday call loans were again renewed at 7%, which was the high as well as minimum rate. These figures are for mixed collateral and all-industrial loans without differentiation. Offerings continue in excess of the demand, which is still very light. For fixed maturities the situation reshould soon seek lower levels. As a result trading was very dull and the market continues a nominal affair with 8% quoted for all periods from sixty days to six months on regular mixed collateral, and 81/2@ 9% for all-industrial money, unchanged. Commercial paper rates remain as heretofore at

largely out of the market, believing that time money

61/2@63/4% for sixty and ninety days' endorsed bills receivable and six months' names of choice character, with names less well known still quoted at 63/4@7%. Transactions attained fairly large proportions, and a brisk demand is reported from out-of-town institutions.

Banks' and bankers' acceptances continue quiet and the daily turnover is still small, although brokers assert that all indications point to a broadening market. No material improvement, however, is likely until there is a decided lowering in the interest rates now charged. Rates have ruled firm and without quotable change. Loans on demand for bankers' acceptances are still at 5%. Detailed rates follow:

| | Spot Deliver | y | Delivery |
|--|--------------|---------|----------|
| Ninety | Strty | Thirty | within |
| Days. | Days. | Days. | 30 Days. |
| Eligible bills of member banks | 6 @5% | 6 605% | 635 bid |
| Eligible bills of non-member banks 614@534 | 614 (0 534 | 61665% | 636 bld |
| Ineligible bills | 76614 | 7 60035 | 7 bld |

There have been no changes the present week in the discount rates of the Federal Reserve banks. The following is the schedule of prevailing rates now in effect:

DISCOUNT RATES OF THE FEDERAL RESERVE BANKS IN EFFECT MARCH 19 1920.

| Pederal Reserve Bank of- certificates bom- of indebi- | Discounted bills mainting within 90 days (including member banks' 15- day collateral notes) secured by- | | | Bankers' Acceptances | Trade Acceptances | Apricultur- al and lies- stock paper |
|---|---|---|---------------------------------------|---|--|--|
| | Liberty bonds and Victory notes. | Otherwise secured and unsecured. | discounted for member banks. | maturing within 90 days. | maturing 91 io 180 days, | |

Nets.—Rate on paper secured by War Finance Corporation bonds 1% higher than a rate on commercial paper shown in column 3 of figures above.

The week in sterling exchange has been one of more or less natural reaction from the phenomenal strength and activity of a week ago, and with the completion of recent extensive covering operations prices receded in the initial transactions more than 5 cents in the pound. Coincidental with this came the news on Saturday last of the outbreak of revolutionary conditions in Germany and the overthrow of the Ebert Government, which exercised a generally depressing effect on all the exchanges. Rates ran off to 3 651/4 for demand bills, or a loss of 17 cents from the high point on last Thursday, while trading for a time was nervous and unsettled and of rather meagre proportions. However, with the receipt of cable advices on Wednesday indicating that the von Kapp regime had, to all intents and purposes, practically collapsed, there was a sharp recovery and quotations advanced to 3 7334, with a further rise to 3 831/4, a new high on the current movement at the close of the week. Operators who had temporarily withdrawn from the market to await the outcome of the German political crisis, returned with substantial buying orders, while cabled quotations from London that had declined precipitately mains without important change. Borrowers are in the earlier days of the week, rallied, and London

bankers figured in a new buying movement, which in turn served to strengthen price levels here. In the final dealings speculative interests who had not expected so sharp a rally, hurried to cover, with the result that prices bounded upward on Friday, as above noted, though the closing figures were slightly under the best.

Despite the variations just recorded, however, the consensus of opinion in many quarters seems to be that sterling rates have shown remarkable resisting power in the face of adverse developments and bankers are pointing to this fact with a good deal of satisfaction as a further confirmation of their views that the fundamental situation in foreign exchange, at least so far as sterling is concerned, has undergone a radical change for the better. Those less optimistically inclined eling to the belief that anything like a return to normal is still a matter of the distant future, that no material or permanent raising of currency values should be looked for and that further setbacks in the form of violent fluctuations are likely to be witnessed occasionally for some little time to come.

The question of gold shipments from Great Britain and France to meet the approaching maturity of the \$500,000,000 Anglo-French bonds continues to arouse the keenest interest in financial circles here and many and varied were the rumors in circulation at different times during the week. One report had it that the British Government is in possession of invisible gold supplies which will enable it to meet the loan payment by means of shipments amounting to \$250,000,-000 in gold; the precious metal to be used for this purpose having been, it is said, received from Germany some time previously and not been included in the statements of the Bank of England. Following this it was reported that \$25,000,000 gold was already on its way here from Great Britain on warships, due to arrive at Halifax some time this week. Subsequently, this was officially denied by J. P. Morgan & Co., fiscal agents of the British Government in the United States. On Thursday the British Admiralty was quoted as denying that "shipments of gold are being made to New York by warships." Secretary of the Treasury Houston yesterday issued a statement disclaiming all knowledge of gold imports actual or impending. Another rumor which received attention for a while was that gold not held in China as collateral for the \$38,000,000 credit granted the All-Russian Government by American and British bankers may shortly find its way to this country. This credit which was arranged in the latter part of 1919, was secured by about \$40,000,000 in gold. It is now stated that the precarious condition of the All-Russian, or former so-called "Kolchak Government" may compel the Allies to demand the payment of this collateral gold. Approximately \$17,000,000 of this metal is said to belong to Great Britain and \$23,000,000 to American interests.

Advices from the American Chamber of Commerce in London state that the Supreme Council in Paris has invited the Moscow Narodny Bank to arrange the details of a plan whereby it is proposed to extend the trade of Western Europe from the non-Bolshevist to the Soviet territories of Russia. It is claimed that this Russian bank is run on co-operative lines, is in no sense a political concern and is conducted in the interests of the peasant farmers of Russia, doing business with them largely on a system of barter. The Chamber further reports that this is the only revolutionary leaders, good buying support was

bank as yet not interfered with by the Soviet Government, but whether a scheme such as the one under contemplation is practicable is somewhat doubtful. A cablegram from Consul-General Skinner to Washington states that the extent to which British commercial interests are to be permitted to resume trading relations with Russia is now being determined by the British authorities.

Dealing with the day-to-day rates, sterling exchange on Saturday of last week was easier and losses of about 3c. were recorded, partly a reaction from the too rapid rise of last week, and partly because of the reported uprising against the Ebert Government in Germany, which caused considerable uneasiness in diplomatic circles abroad; demand ranged at 3 67@3 68½, cable transfers 3 67¾@ 3 69¼ and sixty days 3 64@4 65½. Monday's market was irregular and weak and there was a further decline to 3 651/4@3 66 for demand, 3 66@ 3 6634 for cable transfers and 3 63@3 6334 for sixty days; lower quotations from London and freer offerings of bills featured in the day's trading. Indications that the attempted German revolution was likely to prove a potential failure, resulted in a sharp recovery on Tuesday and demand sterling advanced more than 7c. to 3 731/4; the low was 3 691/4, while cable transfers ranged at 3 70@3 74 and sixty days 3 67@3 71; good domestic and foreign buying, also higher cabled quotations from London, followed the more favorable news from Berlin. On Wednesday irregularity marked trading operations, although prices moved within narrower limits than on the day preceding; the range was 3 72@3 7334 for demand, $372\frac{3}{4}$ @ $374\frac{1}{2}$ for cable transfers and $369\frac{3}{4}$ @ $371\frac{1}{2}$ for sixty days. Further improvement was shown on Thursday and demand moved up to 3711/2@375, eable transfers to 3721/4@ 3 753/4 and sixty days to 3 701/4@3 723/4; trading was fairly active. Friday's market was strong and more active, with a further sharp advance to 3 771/4 @3 831/4 for demand, 3 78@3 84 for cable transfers and 3 741/2@3 80 for sixty days. Closing quotations were 3 771/4 for sixty days, 3 801/2 for demand and 3 811/4 for cable transfers. Commercial sight bills finished at 3 7934, sixty days at 3 741/2, ninety days at 3 721/2, documents for payment (sixty days) 3 74, and seven-day grain bills 3 771/2. Cotton and grain for payment closed at 3 7934. The week's gold movement, which was all to Argentina, totaled \$10,-095,000 in gold coin, the bulk of which went forward by Wednesday's boat. Argentine exchange is still at the gold shipping point, being quoted at 1.0180 Argentine gold pesos to the American dollar, against a party of 1.0364. Some bankers are predicting that the end of the gold movement from New York to Buenos Aires may be in sight since the \$50,000,000 Argentine Republic 6% Treasury notes fall due shortly and Argentine credits here may be exhausted.

Movements in the Continental exchanges were somewhat less favorable than those in sterling and considerable irregularity was shown, with declines totaling in some instances more than 60 points. Berlin exchange naturally responded to the sensational developments in Germany and on Tuesday the quotation for marks broke precipitately to 1.05 for checks and 1.07 for cable transfers-a loss of 63 points from last week's high record. This was of brief duration, however, and with the downfall of the

tendered and the rate quickly rallied to 1.36; although later on heavy offerings brought about a partial recession downward. French and Belgian francs also fluctuated quite sharply and on some days losses of as much as 35 points were registered. Lire ruled heavy practically throughout. Except for the dealings in marks, which again ran into the millions, trading was quiet, though at the close covering of shorts brought about fractional recoveries in some cases and a slight increase in activity.

According to information received in Washington, it is learned that notwithstanding the recent improvement in mark quotations, German bankers are still evincing serious uneasiness over the present foreign exchange outlook and it is stated that the low value of the German mark in the world's money markets is still the chief obstacle to the resumption of German foreign trade relations. In the opinion of certain German financiers one reason for the spectacular depreciation of the mark is the impossibility of balancing Germany's revenue and expenditures, a condition which, it is alleged, has been aggravated by the restrictions upon exports and imports imposed by the Peace Treaty, and earnest appeals are being made to the Allied Governments for the modification of certain of these conditions.

In a report from the American Commercial Attache at Rome, it is urged that sales of Italian securities in American markets be encouraged as a natural and desirable means of correcting the present unfavorable balance of trade against Italy. It is pointed out that with lire down to the basis of 14 to 1 in dollar exchange, the American investor buying in dollars would pay only two-fifths of what the Italian purchaser has to pay. The principal difficulty in the investment of funds in Italian securities, however, lies in the need for adequate protection. This, the official declared, could be overcome through the issue of certificates by American bankers representing the deposit of foreign securities, which is purely a matter of international banking, and that the fact to be emphasized now is that the creation of an American market for Italian securities would go far toward correcting present adverse exchange conditions.

Premier Millerand's recent statements to a representative of the American press regarding conditions of international credit created a favorable impression. His declaration that France if granted time would pay all her debts in full and that no fleeting misunderstandings must be allowed to interfere with the close friendship maintained for so long between France and the United States was well received, as also was his straightforward utterance to the effect that France was not asking cancellation of her war debts, but only time to breathe and recover strength after four years and a half of the most exhausting warfare ever endured by any civilized nation. A dispatch from Berne says that France and Switzerland have arranged a commercial treaty under which France is to permit the shipment of 20,000 tons of coal a month to Switzerland in exchange for electric power, watches and embroideries. Recent statistics of Franco-American trade for the month of January show that there has been an increase of fully 500% in French exports to the United States as compared with the same period last year. French tax collections are also shown to be increasing encouragingly; revenue returns for the first two months in 1920 being two or three times in excess of the amounts previously estimated.

Through a dispatch from Washington recently received here, it is learned that the regulations to put into effect the Edge Act are likely to be announced within a very few days. The Act was passed Dec. 24, and the Treasury Department has since then been engaged in preparing regulations to govern its enforcement. * Regarding the ill-fated Peace Treaty, while it is still in the hands of the Senate and under discussion, hopes of its ultimate ratification have dwindled to the vanishing point, and it now appears a foregone conclusion that the document is to form one of the issues of the coming national political campaign.

The official London check rate in Paris finished at 51.95, as against 49.50 last week. In New York sight bills on the French centre closed at 13.61, against 13.44; cable transfers at 13.59, against 13.42; commercial sight at 13.65, against 13.47, and commercial sixty days at 13.72, against 13.55 a week ago. Belgian francs finished at 13.10 for checks, and 13.08 for cable transfers. Last week the close was 12.87 and 12.85. German reichsmarks closed at 1.31 for checks and 1.32 for cable remittances, which compares with 1.34 and 1.36 on Friday of a week ago. Closing quotations for Austrian kronen were 00.48 for checks and 00.49 for cable transfers, against 00.41 and 00.43 last week. Exchange on Czecho-Slovakia finished at 1.45, against 1.20, on Bucharest at 1.70, against 1.75, on Poland at 76, against 70, and on Finland at 5.50, against 5.10 the previous week. Lire closed the week at 18.64 for bankers' sight bills and 18.62 for cable transfers. This compares with 18.12 and 18.10 last week. Greek exchange was a shade firmer and finished at 8.78 for checks and 8.80 for cable transfers, against 8.86 and 8.88 a week ago.

Neutral exchange has been somewhat colorless and movements were irregular without definite trend in either direction. No increase in activity was noted. Guilders and Swiss francs were firmer, and the same is true of Spanish pesetas. Stockholm and Copenhagen remittances were substantially higher, but exchange on Norway ruled weak and closed at a further net decline.

Bankers' sight on Amsterdam finished at 36³/₄, against 36¹/₈; cable transfers at 36³/₈, against 36 31-42; commercial sight at 36 11-16, against 36 1-16, and commercial sixty days at 36 3-8, against 35 11-16 a week earlier. Swiss francs closed at 5 80 for bankers' sight bills and 5 78 for cable remittances. A week ago the close was 5 90 and 5 88. Copenhagen checks finished at 17.95 and cable transfers 18.10, against 17.00 and 17.15. Checks on Sweden closed at 21.00 and cable transfers 21.15, against 20.10 and 20.25, while checks on Norway finished at 17.90 and cable transfers 18.10, against 18.30 and 18.45 in the preceding week.

As to South American rates a firmer tone has been noted and quotations for Argentina have been advanced to 43.625 for checks, the closing figure, and 43.75 for cable transfers, against 43.20 and 43.35, while for Brazil the check rate is now 27.125, against 25³/₄, and cable transfers 27.25, against 26 a week ago. Chilian exchange continues to be quoted at 23¹/₂ and Peru at 4.75@4.80, unchanged.

Far Eastern rates are as follows: Hong Kong, $94\frac{1}{2}@95$, against 94@95; Shanghai, 139@139, against 133@134; Yokohama, 47@48, against $47\frac{1}{3}@47\frac{3}{5}$; Manila, $49\frac{1}{2}@51$, against $48\frac{1}{4}@48\frac{1}{2}$; Singapore, $43\frac{1}{2}@44$, against 44@45; Bombay, 45@ 47, against 47@48, and Calcutta, 45@47, against 47@48.

The New York Clearing House banks, in their operations with interior banking institutions, have gained \$5,628,000 net in cash as a result of the currency movements for the week ending March 19 Their receipts from the interior have aggregated \$8,928,000, while the shipments have reached \$3,300,000. Adding the Sub-Treasury and Federal Reserve operations and the gold exports, which together occasioned a loss of \$143,534,000, the combined result of the flow of money into and out of the New York banks for the week appears to have been a loss of \$137,906,000, as follows:

| Week ending March 19. | Into Bunks | Out nf Banka. | Net Change in Bank Holdings |
|---|---------------------------|------------------|--------------------------------------|
| Banks' Interfor movement Sub-Treasury and Federal Reserve operations and gold exports | \$8,928,000 29,309,000 | | Gain \$5,628,000 Loss 143,534,000 |
| Total | \$33,237,000 | \$176,143,000 | Less137,906,000 |

The following table indicates the amount of bullion in the principal European banks:

THE MILITARY REVOLT IN GERMANY.

Undoubtedly the majority of people, including those most familiar with European history and present conditions in Europe, have expected ever since the present German Government was established, that some kind of attack on that Government by the military party was a strong probability of the situation. It had not, to be sure, been possible for any one to say with certainty which political faction was favored by the disbanded army, taken as a whole. Probably the demobilized soldiers, who had been called into service from private citizenship, were as much divided in such affiliation after the war as were the German people at large, and in substantially the same proportion.

There has never been any evidence that the German private soldier as a class had even the strong professional devotion to his military chiefs or his sovereign which has sometimes distinguished the French army, and there is abundant reason not to believe that the instinct of military caste would determine his political action. That motive was left for his officers, who were a caste by themselves. During the immediate period of disbandment after defeat, when the private soldiers were returning to homes where hardship and privation were being endured and to communities where the authority of Government was uncertain, it would have been natural enough to expect them to follow in a campaign of organized violence. We know that this was the principal fear in the mind of conservative German people during the "Spartacus" insurrection of a year ago. The the movement is accepted, it would go some distance

course of events proved the apprehension at that time to be unfounded. But if the demobilized soldiers did not follow an uprising against Government then, it was not reasonable to expect them to follow it a year later.

Nevertheless, there must have been some such expectation in the minds of the ringleaders of the curious demonstration which has just ended its fiveday history at Berhn. All the indications are that the attempt of Kapp and Von Luettwitz and their supporters to overthrow the Ebert Government had reckoned on some such support. They could not have looked for assistance from the business community or from the Labor party. What actual support they had in the Junker class as a body is not clear. One of the oddest things about this very singular political incident is that nobody seemed at any time to know who was really back of it. The Kaiser was the first thought in a good many minds last Saturday; but no word or sign came from his refuge in Holland. Next there was open talk of Hindenburg and Ludendorff. But Hindenburg publicly repudiated and discountenanced the Von Luettwitz uprising, almost within a day of its capture of Berlin, and Ludendorff, though according to some accounts in personal touch with the leaders of the movement, gave no indication personally of anything but passive indifference.

There are two possible theories to explain what actually happened. There may have been, in the minds of the militarist party as a whole, the purpose of upsetting the new Government of Germany, and the real leaders, feeling some doubt as to the real prospects of such an undertaking, may have encouraged the not very eminent leaders of last week's uprising to try the experiment. If it succeeded, if the disbanded army or the people at large had come to its support, then the important men of the faction could have taken charge. If it failed, they could wash their hands of it.

This theory would explain some things that have occurred; for instance, the confident proclaiming of certain well-known public men by Kapp as members of his "ministry" and the seeming absence of either acceptance or rejection of the honor by the persons named. But on the whole, the more plausible supposition is that the prudent leaders of the militarist faction had decided not to move at this time-advising either acquiescence or delay-and that secondrate leaders, impatient at the procrastination, had taken the reins in their hands. They had the small army of organized soldiery which had returned from the Baltic frontier. They were incensed, and be-lieved that all other army men would be similarly angry, because the compulsory trial of her own military offenders, under the accusations preferred by the Entente Governments, was about to begin.

Furthermore, they probably believed that the Ebert Government was about to collapse in any event especially after the public exposure of irregularities on the part of one of its members. "Last but not least," so concluded Kapp's proclamation of Satur-day, "a government whose chief spokesman is Erzberger must be swept away." This bit of anticlimax, which sounds rather more like the platform of a political party on the eve of election than like a summons to military revolution, is pretty clear witness both to the intellectual quality of the leaders and to their idea of the situation. If this theory of

toward accounting for the precipitate flight of the Ebert Government from Berlin. One might assume that Noske and his colleagues had information as to just how much and how little the real Junker leaders were doing or intended to do, and that the Government was for that very reason taken completely off its guard by a demonstration which it had not suspected and whose occurrence drove it to the hasty conclusion that a far more serious blow must have been secretly prepared.

Nevertheless, the result of the whole incident cannot fail to be to strengthen the new German Government, and to increase the confidence, both of the German people and of other peoples, in the stability of the political institutions built up in Germany since the war. It is altogether probable that this abortive attempt at a military coup-d'etat will do away with any real chance of a successful effort of the kind. A revolutionary movement which ends in a cloud of absurdity is the most discouraging of all introductions to serious business of the same sort. Even Kapp and Von Luettwitz recognized the precarious nature of their appeal to the people by beginning their first proclamation with the statement that "the overthrow of the Government must not be taken as reactionary." It is difficult to see what appeal could be made in another similar experiment.

So far, then, the sequel to the whole incident is reassuring to the political future of Germany. Yet there was one phase of it which caused well-grounded misgiving at the time, and which may have very mischievous after-consequences. When the Ebert Government, on the eve of its withdrawal from Berlin, deliberately and officially advised the Labor leaders to resort to the expedient of a general strike, it was inviting political opponents and disaffected adherents as well as actual supporters to unsheathe a sword which was not unlikely to be used next against the very Government which this time suggested its use against some one else.

This recourse was ill-judged in the extreme, especially when, as is now plainly enough evident, the "counter-revolution" was morally certain all along to collapse of itself. It is not at all remarkable that the second stage of the episode, after the failure of the military demonstration was ensured, should have been the attempt of "Communists" in one German city after another to seize power on their own account. To appeal to such a force was an evidence of personal weakness which the Ebert Government can never explain away. The best that one can hope for, as a sequal to such a blunder,

that it may serve as a warning to the German p. ple themselves that, even while preserving their new form of constitutional government, they must msist on its being administered by men of sufficient dignity and strength to avoid such sacrifice of social order, even when the purpose was to uphold political order.

THE FUTURE OF THE RAILROADS—THE PUBLIC'S RESPONSIBILITY.

To a meeting of committees of the National Association of Owners of Railroad Securities the ounder and head of the Association, Mr. S. Davies Warfield, has submitted a resume of the labors of that body and some suggestions apropos at the present time. The meeting was attended by some 50 persons, among whom were officers of a number of the largest insurance companies and of nearly thirty

banks and trust companies, scattered all over the country. Mr. Warfield recalls that the first statement made after the Association started, in 1917, noted that "a state of mind hostile to carriers has been created in nearly every legislative relation, whether national or State; this has resulted in a steady encroachment upon the property rights represented by bonds and stock." In adding the admission that this condition had come about "largely from the railroads themselves in the public policy which had been pursued," the roads apparently not recognizing "the stubborn fact that these public service carriers bore a relationship to the public which demanded that in their operation the first consideration should be the public interest," Mr. Warfield perhaps lays a little too much stress upon the sins of the carriers. There were some, yet the time when no offers were deemed excessive if construction into new territory could be induced thereby has too long been forgotten. The pretended regulation has been destructive, and when the Association, as its first act, appeared in the effort for a 15% rate increase, Commissioner Harlan put on record in his dissent from the majority the testimony of officers of insurance companies and savings banks to the shrinking in the volume of their railway investments. The descent has continued, as all of us know, and now we are at a stage when the past should be remembered only to profit by its lesson of warning.

On behalf of the Association, Mr. Warfield claimed credit for originating the fixed rate of return on the fair aggregate value of railway property and the division of excess above 6%. He proposed that the Association communicate to the directors of Class 1 roads a suggestion that each board name one from among themselves to form a "committee of railroad directors;" that this committee so formed name a smaller one of not over twenty, and that this body of twenty name a sub-committee of seven, the members of all these committees to be selected geographically. To this body of seven, composed of directors in touch with general business and financial conditions, should be referred "the questions of policy, both public and legislative, with which the railroads will have to deal, also matters of legislative and financial policy in respect to the railroads as a whole." He further proposed that the Association of Owners designate a committee to meet and discuss with the committee of seven, action reached jointly to be binding on both. Further, he proposed that the larger shipping organizations be asked to name from among their own committees "a standing committee to confer with a like committee to be appointed by the Executive Committee of this Association to take up questions proper to be considered by the owners of the properties with those upon whom their business depends."

These suggestions were adopted by the meeting, and while they can have no binding force they should be capable of being of great advisory value. At least they represent, and embody also, an honest effort to get together. The Association represents, says Mr. Warfield, an ownership of nearly 10,000 millions out of the total railway securities outstanding, "the largest single organized group of railway securities in existence; they come nearer to an active force, being the owners of the roads, than any other single organization."

It would be well if the men in the railway brotherhoods could only get through their heads the fac

that not only as citizens have they a concern in railway life but as direct or indirect owners of savings based upon railway securities they are themselves among the "owners;" if they would ascertain where is kept the large emergency fund of which they boasted, in Washington in 1916, they might see that their incessant demands are a part of the attack upon their own property. If enacting this railroad law would only suffice to effect the restoration as well as the return of the properties, and if it would only be self-operative and possessed some power of analyzing and smoothing out the difficulties, then the Association, and the public as well, would have nothing to do but to contentedly wait. We Americans have grown into a lazy habit of imagining that problems are disposed of when a law has been passed about them; but we have slid down a terrible descent and now our good sense, our determination to honesty, our grit, and our patience will all be needed. Mr. Warfield considers the questions at issue "altogether too far-reaching and vital to the people as a whole to permit of errors in judgment between the owners and the operating executives." He thinks "the public will not stand for any further mistakes on the part of the railroads, and a continuation of errors in policies will inevitably lead to public ownership." Says he:

"Few statutes have been enacted by Congress upon the successful administration of which so much depends and with results so far-reaching. Private ownership and operation of the rail transportation system of the country is at stake. Whatever its defects, no other country has prospered as this has under private operation of its railroads. Yet government ownership may result, although the country is overwhelmingly opposed to it, from failure to carry out the intent and purposes of this law."

Mr. Warfield does not overstate the gravity of the situation, and that is attested by the attendance at the meeting of so many executives of the leading insurance and banking institutions. The country is at a parting of the ways, and we need the very best that is in us. Yet it is hardly felicitous or timely to say that "the public will not stand for" any further mistakes by the roads. There will be further mistakes. There are probably some in the law itself, which has the imperfections of a compromise; they are to be discovered by experience, and are then to be firmly and hopefully corrected. Are we to keep in mind the "mistakes" of the past? If so, remember that they have not been on one side only; the public must recognize the public's share in them, for in the last dozen years at least the roads have been so confined, and so ground between the millstones of increased expenses and of lowered or non-advanced rates, that they have not sinned more than a little, since freedom of action is necessary for sinful acts.

Nor does it seem certain that a failure to realize the intended salvatory purpose of this law is likely to bring Government ownership. What is most needed, as the "Chronicle" has lately said, is that the people of this country recognize and in all its bearings and significance realize the fact that these railroads are *theirs*. In dealing with them, they deal with their own. The mistakes are theirs; not only in results but in responsibility. If the people "stand for" such an attitude as the regulative Commission has hitherto taken and such treatment as it has dealt out to the roads, nothing but disaster can be expected; as well might the farmer seald his seed and look for a

crop. The good workman never quarrels with his tools; he takes care of them, and so they render him due service.

So it must once more be said that the future of the roads and the success of the new law rests with the people. Perhaps it would be too much to expect that the brotherhoods, long encouraged by fear and surrender, will soon come to their senses; but there are evidences of a change in the public attitude towards the subject, and the existence and seriousness of Mr. Warfield's Association is evidence of it. The people must now take this subject as theirs, and they must attend to seeing that the Commission understands it and represents their will. That will must be for honesty, for justice, for the practical sense which is supposed to be characteristically American. As a country, we can no more thrive and grow without healthy and efficient railroads than we can without crops; to fully realize this is to win half the battle before the tug begins.

It will not be easy, it will not be smooth, it will not be pleasant; but we should face it as sound men face a surgical operation, not desirable, yet salvatory.

If it fails? Time will show what awaits us in such event, yet that we should rush (or even helplessly slide) into Governmental ownership after the lesson we have had of Governmental operation hardly seems conceivable. Say, rather, that the effort to return will not fail, because we, the awakened American people, have resolved not to let it fail.

THE HOUSING PROBLEM CONTINUES.

The housing problem continues unabated. At the conference on Monday definite assurances were given that funds for a large amount of construction during the present year can be had, upon conditions: there must be some stabilizing in the cost of materials and labor, and some of the tax pressure on funds placed in mortgages must be relieved. Representatives of the loaning companies and of the savings banks were agreed upon this, and the Comptroller of the Metropolitan Life repeated his assurance that his company will be ready with many millions as soon as the conditions warrant; the promises of from 50 to 100 millions were sufficiently responsible and definite, conditioned upon legislation which shall lighten the mortgage burden and upon agreement that shall lighten costs otherwise.

There is an abundant supply of bills in the legislative hopper, and on nine of them a special hearing is set for next Tuesday. One would exempt from State taxation income from mortgages up to \$40,000, and this is urged by substantially all the largest potential lenders. But others are in the familiar direction. They would empower the courts in the largest cities to stay eviction procedures, if the tenant will pay such advance as the court may deem fair, also making void as against public policy any waiver that may be inserted in a lease. Another would estop eviction if there has been an increase in rent over that in the last previous month or if the increase in the past year is over 20%. Another, applicable to all cities, would allow eviction proceedings to be contested because the demand is unreasonable and oppressive, and then the landlord may prove his own reasonableness, if he can. Another would apply a smart and progressive tax on excess profits per rents. The tenants of a large apartment at Forest Hills have joined in asking an injunction (and have obtained a temporary one) against letting their premises to others

and for protection against what they allege is (and may perhaps be) a harsh and unjust increase. Special trains are proposed, to carry throngs of excited tenants to add to the pressure on the legislature.

The seriousness of the matter will not be denied, even by persons who have not yet had it brought to themselves. The average landlord will take all he can get, and the stories told seem to indicate that the increases which horrify present tenants are accepted unhesitatingly by others; but there is a landlord's side in the case. The pressure is upon everybody. The landlord's dollar is clipped. The loudest cries come from the people who arrogate to themselves the right to be deemed the only workers there are and to join increased pay with decreased hours and service. They must progressively receive more in exchange for less, and the immovable law of rising cost per scarcity runs through every kind of material and every kind of labor, from the first excavation to the finished building and then to the maintenance. The employees in hotels and apartments who rebelled, some weeks ago, and were entreated by Health Commissioner Copeland did not care what happened to the sick and could not seeor, if they saw, would not admit the deduction-that they were heightening their own living costs. The chief obstacle now is likely to be the contumacy of the unions, and at the meeting on Monday accusations were bandied back and forth. Mayor Hylan, who will not be suspected of sympathy with "capital" in any form, says the worst hitch is between two labor factions and that he is sure seven or eight men here could say the word that would usher in the greatest building boom ever known. This may be somewhat over-stated, but it has a foundation of truth. Organized labor may hang back, and demand and expect that employers and landlords and lenders will forego returns; but capital and labor may be considered to be a "double team," in this work of new construction, and hanging back by either can prevent movement.

If somebody offered a bill to repeal the law of supply and demand, and put his proposition in precisely those terms, even the dullest member of the dullest union might think the proposal unbalanced or the proposition meant for a joke; yet legislatures are continually asked-and in this situation now are asked-to virtually repeal or suspend that law. Housing demand has risen and continues rising, and supply has fallen off; to lessen demand is impossible. so how shall supply be increased? Everything has been done-or has been permitted-to discourage new construction; yet excited persons apparently believe that it can be furthered by coercing present owners. The value of a building is in its rentals, and unless those attract funds they will not come. To storm over this proposition will not change it; building funds can be attracted but cannot be driven, yet all attempts to lighten rentals by coercion set up a barrier before the new construction that alone can help the case. If statute had potency, it might better take the shortest cut to the end. The landlord might be ordered to reduce rents (just about what some of the pending bills do professedly undertake) and a refusal on his part might be made punishable as a misdemeanor. If statute can lower prices, why not lower them and be out of trouble?

One concrete case is raised already. A gas company in Brooklyn lately announced that it cannot

which new building is both needed and proposed; it cannot do so, the company said, because at the present legal rate for gas it is losing money and cannot afford to increase the loss; so it gave notice, it added, that builders might understand the situation in advance. The Public Service Commission, however, has ordered the company to go on and do what it protests it cannot afford to do and cannot borrow the funds to do; it also avers (and the present condition of the fuel oil market seems to support the averment) that any increased use of gas by present customers will inevitably cause a lowering of pressure, a condition obviously hazardous to health and even to life. Can a corporation be made to do what is financially impossible?

And in this housing trouble shall we go on trying coercion, or shall we calm down and resort to reason, agreement, and inducement?

THE BOY SCOUT THE AMERICAN CITIZEN OF TOMORROW.

We cannot too carefully keep alive in the public mind the fact that the change which transformed the Germany of the first half of the 19th Century into the Germany of 1914 which flew at the throat of the world was accomplished by a system of public education shaped to that result.

It is almost incredible that the Germany of poets and thinkers, of Goethe, Schiller and Koerner, of Kant and Leibnitz and Lessing, which gave birth to the Revolution of '48 which was crushed by the Prussian army of Frederick William, driving out of Germany a hundred thousand of her elect young men, giving to America Carl Schurz the thinker, Franz Sigel the soldier, Dr. Walters the theologian and a host of others, to the enrichment of our national life, that this could be the Germany to feel no shock when the newly crowned Kaiser William II proclaimed himself the Vice-regent of God and in his address to his departing soldiers at Bremen exhorted them to make the German name so terrible in China that the Chinese would for a thousand years tremble at hearing it. With him the way opened for pushing to its fulfillment the masterful policy of the Hohenzollerns for which Bismarck had laid the foundations. Two generations were sufficient to create a people trained from childhood to obey the will of the State embodied in the Kaiser as supreme lord.

The war has taught the world many important lessons, none more significant than this, that a system of controlled education made to embrace the youth of a land in its entirety from the kindergarten to the university can in an incredibly short time dominate the thought and change the character of a great people.

Theoretically we accepted public education as essential to Democracy, and the nations generally aimed to adopt it, but we have carelessly come to think that Democracy, as the coming political order, would work itself, and we have trusted education to do the same. As a consequence, we have satisfied ourselves with a public education in large sections of the country shamefully incomplete and ineffective. Until, as a nation we have been awakened by the war to find ourselves shockingly illiterate, and that in ways that proved us distressingly unprepared.

When now we have forced upon us the task of Americanizing the foreigners, and we look to edupu down mains for supplying certain sections in cation as the chief means of doing this, we face the fact that our American system of education, as it to-day exists, shows no very promising sufficiency.

In this emergency we find one large group of our lads who are under a discipline that is producing uniformly notable results, if not in specific scholarship, in all that develops manly character and fits them for intelligent citizenship.

It is the army of Boy Scouts. An organization that holds in regular and responsible attendance, as it does to-day, 383,482 lads with no less than 106,544 fit men as their scout-masters and leaders, whatever it may do with them, is to be reckoned with by the nation in relation to its problems and its When that organization is found to be future. governed by the principles that lie at the base of the Boy Scout Army, and is successfully training its members in the life of active and helpful service of others and of the country and maintaining them in a steady and enthusiastic loyalty, it is deserving of both study and praise. The question then cannot be avoided, why the same principles taught in a similarly effective way cannot be applied in connection with all the youth of the land and in all its schools?

So we ask, what are those pr nciples, and by what method are they taught?

The fundamental principle is that human nature, even in boys, has inherent capacity for goodness, and that, given the right influence, this can be developed. The leaders are men who accept this view and hold it with such faith as leads them to devote themselves to proving that boys can be made better than boys habitually are.

The method then is simply to create the circumstances in which by some sort of challenge, usually the natural challenge of surrounding circumstances, the boy's nature will be evoked and his interest awakened, or in which, if it is a crisis, the heroism of the boy and his latent idealism will be appealed to. A way is found for bringing him into touch with nature, where he will master its difficulties, learn its ways and bring it into service of his needs; in short, a chance for him to be a normal man.

This quickly leads to the discovery that things that can be done in co-operation with others and also things that require on one's own part self discipline, give more pleasure than those which are done solely for pleasure.

This opens the way for that mental attitude towards others which we call chivalry, that lofty spirit which rises above all questions of personal advantage and leads one to act in a certain way because it is right and unselfish.

The success of this method with our boys suggests the treatment by which the adult alien may be Americanized. When that seems peculiarly difficult, and, as in some cases, impossible, as of late, with isolated groups of Germans, it discloses the way for uprooting hostility and prejudice through the teaching of their children. These can readily be drawn into the ranks of the Boy Scouts, and captured and made over by them. This accomplished, the boys do the rest in their homes.

The boy to whom doing a good turn is a habit and who tries to mark each day by some act helpful to another person, while he is helpful and pleasant to live with at home, requires no diploma to secure influence, or make his family proud of him.

There are ten million boys in America yet unreached by the Scout Army because it has not suf-

ficient funds to provide proper leaders. These boys should be reached without delay. There are half a million graduate scouts and their influence with that of the Army has already gone far to stem the tide of Bolshevism that has been rolled in upon us since the war.

The Scout is not training to be a soldier, but to be a citizen "prepared" for daily service. The uniform he wears is simply a suit best fit for his task, inexpensive and durable. As a uniform it gives a certain desirable and pleasurable distinction. But it is not essential. The Scout's oath is to do his best; to do his duty to God, to his country and to the Scout law; to help other people at all times, and to keep himself physically strong, mentally awake, and morally straight. The Scout law is simply a series of injunctions as to his personal conduct.

He is passed from grade to grade learning things that will be necessary in his daily life whatever and wherever he may chance to be, until he becomes a specimen of the new type of boy, red-blooded, inured to hardship, landing on his feet, not daunted by difficulty, strong, helpful, enthusiastic, entirely trustworthy, "mentally awake and morally strong." He is a youth who knows the difference between the real life of which he is so efficient a part and the false life of the hero of the "movie" thriller, and the dime novel.

Happily the country is awakening to the problem it has in its boys. Two articles in the "Atlantic Monthly" for March bear interesting testimony. One is an analysis of boy character so searching and true that no father can read it without wishing that he were a boy again to be taught by teachers with such understanding of what as a boy he was and might become, or without regret that he had not secured similar teaching for his own sons when they were boys.

The other is an account of an existing school where for some years what may be hopefully called modern methods are carried out with a success that will make the dullest graduate of an ordinary fitting school wish he could go back and begin over again under such conditions.

Of course its methods are "already in use in a number of schools." It could not be "hid under a bushel." Such a headmaster may be hard to find elsewhere, but the country is surely producing them. The new education is in the air and will make its way. The need is coming to be understood.

Here is the hope of the country, a universal recognition of the fact that the nation of tomorrow is in the making in the boys of to-day; that boy nature is intrinsically good, and under right training will not go astray; and that right training means teaching them to see and to think and to feel in ways to lay hold of life, and to find their highest happiness in modest mastery over difficulty, in helpful service of others, in self discipline and in knowing how much there is to be learned and how worth living is life.

When parents begin to demand this teaching for their boys the teachers will be found who can supply it. We shall hear much less about one's rights, and much more about our responsibilities and our duties, less of what we are going to make out of life, and more of what we may make of life itself; for that way lies the truest success. Meanwhile, we would add, support the Boy Scouts.

THE PEACE COVENANT AND A SUPER-STATE.

The great "solemn referendum" which presumably will soon be upon us, incidental to the main question, will decide whether the Executive assumption "I am doing what I feel you would have me do," was right or wrong. After the fact of the assumption it will be before the consummation of the fact involved, and will at least preserve the protective power of the electorate and the consent of the governed. For, if the long Senate consideration has disclosed anything fundamental it is that the continuance of inherent sovereignty is at stake, the form of government, as well as the weal and woe of the people and all peoples. Two elements of the condition appear which we may define in this way: the supineness of the citizen and the power of the Executive; or, to put it another way, the tendency of the people toward abject dependence on representatives in office on the one hand, and the tendency of the representative system, and the Executive branch of government, to assume and assert power through interpretation of duties of representation over and above the specific and direct declaration of the Constitution as the fundamental law of the land.

The incidence of the power of the Executive to commit the nation to the League now shifts from the Executive to the citizen. And at once, the voter must answer this question: If it was beyond the capacity of one man in office to commit a great people to submission to a super-State, with all its complications and engagements, is the individua citizen, by his personal vote, capable of assumingl the same role? We might solve this difficulty by drawing a distinction between egoism and egotism, but it would not alter the condition. The citizen must be an egoist. He must act from within himself. He should be untrammeled in the exercise of his personal judgment of the right. But he should approach the polls with humility and devotion, expressing only his personal estimate as to what will be best for the people and the State. This is not egotism. It will not do to say "we elect men to office in whom we repose confidence as to rectitude and ability. I am not capable of deciding these questions, let them do it." This is to surrender personal liberty and its responsibility to a representative system. And on the basis of this surrender representatives cannot do otherwise than become autocrats, and autocrats in their consequent role of interpretative power cannot become or be other than egotists. In short they must think for a free people the individuals of which will not think for themselves.

Concerning the Peace Council at Paris reference was frequently made to the "Big Four." We shall not here consider contradictions of provisions of the Treaty with the principles of the League, or its alleged inconsistencies with itself, or ideals vs. facts, or any of the fourteen points. The "average man" quickly saw that four men *were* partitioning Europe, were constructing a League in the existence of which was, to a varying extent (according to personal belief), vested the destiny of mankind.

Now, as we say, the incidence of power shifts, and every citizen as a voter becomes a co-equal with each man of the Big Four. He, by his vote, holds in his hands the destinies of peoples and of States. But there is this marked difference, the citizen assumes no prerogative of interpretation nor can he

escape his duty. He does not act after the fact of submission to a so-called super-State, but before it. He does not assume to do what he believes the people would have him do; he does, however, do not only what he believes to be best as a personal opinion but what is best for the whole people if they shall by a majority coincide with his opinion. In this we discern more clearly a pure democracy in action than the functioning of a representative system. Whatever power he exercised comes from below, not above. And while there may, or may not, be reflection upon a servant of the people assuming to make for them this huge commitment by thrusting a League into a Treaty, no such charge lies at the door of the citizen voter. He is face to face with the fact of an entangling illiance, or none. And it should be remembered if it is right that the voters should decide whether to "go in" or "stay out," the same rule should apply in the future as to whether we "stay in" or "go out."

In this matter the elector cannot cry out against "autocracy" in office, and shirk the responsibility of his present duty as voter. If he believes that no four men are capable of forming an organism designed to "rule the whole world," he must now ask himself whether he is capable. The unfortunate part of this appeal to the people is that it is only submitting the work of "four men" to the voters for approval or rejection. It is passing upon the question of this particular League, or nothing. It is not delegating power to representatives to frame a covenant or Constitution for world-union to be by them resubmitted to the voters for adoption or rejection, it is confirming or opposing work done by men and not definitely and originally by peoples or by their empowered representatives. So that if the voter doubts the ability of four men to "rule the whole world," he must likewise doubt or affirm the ability of his chosen representatives sitting in the council of a League of Nations to "rule the whole world." And in this determination he must exercise his own ability. If he feels a doubt as to his own capacity in this regard, can he say or believe that democracies by representatives can combine to so "rule the world" without creating an autocracy or super-State? Not only is centralization in home government involved, but empire in and by government also is involved. And it must be true, therefore, that our republic cannot approach this question of a League of Nations from the same standpoint and with the same feeling held by an imperialistic government.

Democracy and Empire do not amalgamate, though Empire include all the world. If only some form of agreement, some solemn pledge looking to perpetual peace, some combined treaty of all the States of the world, were the issue (as might be the case under a different form of covenant or contract preferred in the way popular State constitutions are presented) simplified to disarmament and economic liberty, the voter would be less perplexed. But to consider this present League compels consideration of the province of human government to spread over a whole world, centralized in some unit of power. If one say "we have too many laws, too much government, at home, here and now," how will he answer the question of setting up one government for all races, peoples and States of that world? This issue the voter cannot escape, no matter what he believes about self-determination, democracy, ideals of State and human relations, and the abilities of men in

EDUCATIONAL PROPAGANDA IN WORLD ECONOMICS.

The study of mankind is economies rather than politics. This we have maintained before, and assert again. If now, in what is so blithely called a "New Era," democracies are to function properly they are to become the political agents of peoples for the purpose of guaranteeing the fairness and fullness and freedom of production by safeguarding individual initiative in enterprise and ownership of property free from governmental control. This purely ministerial office performed, the aspirations and endeavors of men will forward progress and bring order out of confusion. Let us argue from a notable premise. The New York Stock Exchange has recently found it advisable to publish anew the requirements for listing securities. These are found to be soundly rigid and include a complete financial exposition of the company from which the security issues. Proceeding from this it must be apparent that any foreign securities issued or to be issued in this country must in some way undergo the same scrutiny. And it follows that if individual investors are to be interested great good would flow from wide-spread popular education as to the resources and liabilities of countries (or States) over and above that ascertained and promulgated by the financial houses engaged in stock and bond offerings in the United States.

When political discussion has shown what the soviet and syndicalism mean on the one hand and militaristic autocracy on the other, when it has been shown what "liberal" forms of government contain and condition as a golden mean between these two, when it has been shown what these democracies accomplish in freeing "business" into its natural estate we may, reasonably, be done with politics-save and only that in the present condition of disordered production and exchange a balance sheet of national debts is a necessary antecedant. While the faw of trade is adventure for profit, and the seller seeks the buyer thereunder, the world-merchant gathering but to scatter, at the same time no continental or regional trade can be carried on successfully without knowing what the possible tribute is that must or may be levied on the products to be exchanged. We refer to the domestic taxes incumbent rather than to tariff levies.

This is to say that the costs of political government must be added to the productive costs of the articles of exchange, and to that extent add a factor in determining the course of trade. If a world merchant set out to exchange a native product for a foreign one, of two countries one in debt and the other out of debt, he would naturally bring back the larger product of exchange from the country out of debt. Hence this study of national indebtedness (as well as forms of government) is inevitable in international trade. But once this is known, and democracies, if that may be, accepted as durable (or so-called liberal governments), the intensive study of politics may be dismissed for study of economics.

Speaking of the condition of the American merchant marine one well informed in shipping matters has said that rather than the flag, or seamen's laws, or subsidies, or governmental operation, this new accession should be considered upon the type presented by the tramp ship, free to touch at every port, carrying back and forth the products of every people, servant of every man or concern engaged in

world-trade. Modified as this is by the machinery of overseas exchange it expresses the broad truth that economics is a more controlling factor now in human progress than politics. Therefore the appeal must be made to peoples direct and not restricted to the legislative and executive departments of governments if trade is to flow freely throughout the earth. And it is quite within bounds to say that "liberal" governments being once accepted as a fact, if they could (still functioning within the province of protection to property), drop out of men's minds for a time and the possibilities and processes of trade enter, the world would be sooner on the way to rehabilitation and the "normal." Trade however implies commercial credit, and commercial credit is affected by national credit. Yet it is still true that if the latter could by some means become fixed, and remain fixed, trade would and could immediately adjust itself to this burden, and successfully, if not easily, carry it. And, aside from a reasonable policy of asking future generations to pay a proportionate part for the establishment of the freedom and democracy they inherit as the result of world-war, there is here a profound reason for prolonging by refunding the present tremendous debts of the governments.

It is true these considerations are broad. But they are far from being glittering generalities. Let us suppose universal acceptance of the present States of the world with their present forms of government with the added understanding that only acceptable plebiscites shall change their forms or boundaries. Let us further suppose that there is a League of Nations, functioning, but quietly disposing of international political relations, as it ought to do if it is not to become a means of more turmoil. Then let us suppose the full resurgence of industry and enterprise. What then would happen to commercial credit, without which no production and exchange can occur, domestic or foreign. In production, the peoples of the earth have got to proceed on the assumption that there will be no more war for a long time, if ever, else all above mere sustenance is useless since it would be immediately swallowed up in the new besom of destruction.

Then with both foreign and domestic debts canceled to the lowest point by offsets (not extinction by repudiation) and funded into fixed forms (foreign indebtedness on an equable rate of interest as near as may be) trade is ready to proceed, knowing the political burden it must bear. And nations should incur no new debts domestic or foreign (it being understood that surplus capital in any one of them, not used in trade, under these supposed conditions would flow into securities according to need, tending to spread the weight of foreign debts throughout the world). Then, by means of honest rivalry (competition), harmonious effort (co-operation), could and would spring into being. Consolidated corporations would be formed to adventure in trade, using merchant ships wherever existent and routing them according to the inducements of mutual profits or benefits in exchange-and in giving goods for goods, bringing not only equability of monetary exchange but permanency and efficiency with stability to production and trade.

This trading of goods for goods in the nature of things would not only reduce the volume of commercial debt arising out of uneven balances but would tend to make commercial debts "good" because trade would go to customers who could pay

itized for FRASER

And at once, in proportion as peoples are informed of the resources and products of countries, or regions of production, throughout the earth (albeit these be covered by political forms of government reduced to the smallest degree of interference) they could and would back up commercial credit with a knowlledge over and above that coming to them by the mere announcement of the enterprises and industries engaged directly therein. Not only would these bills of exchange grow into international currency but it would be increasingly possible to float industrial securities in markets far from their originbased on the confidence arising out of the knowledge that a country in need of the products of another can most surely pay if it possess products which that country itself needs. And thus mutual benefits would make commercial credit benignly efficient everywhere.

Not politics then, but economics, is the world's redeemer, not the science of government so much as the science of commerce and credit. Not, then, a League of Nations, concerning itself with theoretical and Utopian ideals of political rights and national relations, but an organism for the purpose of a clearing house of commercial endeavor, and an agency, serving all nations alike, for the promotion of production and exchange, according to racial capacities, and continental or regional resources. And by this means promoting peace as a product of prosperity. And this is indubitably true if it be conceded that commerce is the world's great civilizer, the thing carrying with it the thought that elevates and enlightens; and it is true if it be conceded that liberal governments are instituted to serve, not rule. It must be said also that if a League of Nations is to concern itself with purely political questions to the extent now prevailing in national legislatures (to say nothing of executive ambitions) it will not make for that hoped-for peace, that, be it said, in its idealism passeth understanding.

What are some of the paramount outstanding facts of condition? Here are some of them: A "Supreme Council" partitioning and repartitioning the earth's productive areas, prompted (can it be doubted) by political rule if not interest, transferring the governmental allegiance of peoples thereon, a political basis that offtimes does violence to the economics of production both for domestic and foreign need. A world with energies, dissipated, confused, even lethargic, in turmoil, in doubt, regardless of people or locality. Huge debts domestic and foreign, laid down by governments, overlapping each other, growing and spreading, regardless of natural resources to a large extent. Penury, starvation, sporadic war, internal disorder, extravagant and even despairing living, all waiting on the vain hopes of political theories. Yet old forces of strength and soil at work, and new dreams of foreign trade conquests springing full-armed into being. Inevitably a settling process going on albeit unappreciated. But above all, a world in the throes of political discussion-when peoples everywhere would work and trade if freed from politics.

To bring order out of this conflict is it not apparent there must be less of politics and more of economics? Is it not imperative to "drive down a peg" and start again? Can this be done without a balance sheet of all national resources and liabilities as a basis of world-trade—without each nation first clears its decks for action—reduces debts, reduces inflated

credits, reduces expenditures, and thereby and thereafter sets its people free? As an illustration of an anomalous debt condition-the United States borrowing at a lower than international interest rate billions of dollars from the people (from and at the expense of their expanding commerce) to loan to foreign countries at a slightly higher rate on which no interest can be (or is) collected. Foreign countries borrowing at a still higher rate from their own peoples. This all contributes to the well-being of foreign peoples so borrowing. They also become free to borrow in a domestic way, thus, at lower rates than would otherwise prevail, to promote the very commerce our people hope to secure. And more than this, compelling these Liberty Loan patriots to pay higher home commercial rates. Liberty bonds 41/4 %; loans to Allies, say 5%; bonds of Great Britain and Ireland at 51/2%!

How vast the problem, and how intricate. But how can finance-corporations for the promotion of foreign trade by flotation of industrial securities function while nations stagger under unknown and undetermined debts? And how can they function freely and fully until credit may follow commerce, and industrial securities, based on the stability and security of world-wanted products, themselves exchange by reason of the popular knowledge that securities (as well as temporary bills) may by exchange cancel each other, because manufactured products must, can, and will pay for raw materials and the reverse. If the world is bankrupt it ought first to go into voluntary liquidation, And this will be ascertained by filing a schedule of assets and liabilities, making proper allowances, and obtaining discharge, that business may resume.

CANADIAN RESTRICTIONS UPON THE IMPORATION OF SECURITIES.

Ottawa, Canada, March 19 1920.

Caradian purchases of Canadian securities held in Great Britain, it is estimated, have exceeded \$100,000,000 in the last 10 months. By agreement between the Minister of Finance, the Canadian banks and the Bond Dealers' Association, this business of importation has officially come to an end. It now develops that the reasons of the Finance Department were based upon a desire to "keep Canadian money in Canada," to lower the exchange premium on United States funds, to bolster up the domestic market for Victory bonds, and to ease pressure upon the liquid banking resources of the Dominion. This new form of financial restriction introduced by the Canadian Government has not gone unchallenged; indeed, it is disputed in every detail by some leading bond houses which at the same time intend to abide faithfully by their Association pact. The theory of "keeping Canadian money in Canada" is thus ridiculed by a Montreal bond firm of high repute.

"No money actually leaves this country in connection with our current purchases of Canadian securities in Great Britain. In the last ten months we sold Great Britain alone \$357,500,000 more in goods than we bought. For most of this Great Britain was unable to pay cash. As a result, the pound sterling is quoted in Montreal at approximately \$4.00 instead of \$4.86. But we sold the goods to Great Britain—we did not give them away. How were the sales, not paid for in cash, financed as

between Great Britain and Canada? They were financed directly by private and governmental arrangements, indirectly by the selling of Canadian securities held in Great Britain to Canada.

"Every Canadian dollar which has been invested in Canadian securities held in England has made possible the sale of the dollar's worth of goods to Great Britain. The money involved in buying these securities has not 'gone out of Canada at all.' The proceeds have been spent in Canada to pay for Canadian goods made by Canadian workmen, in Canadian plants."

The only alternatives to the free movement of securities, it is contended, are to finance Canadian exports to Great Britain by loan flotations or to relieve Canadian producers of further overseas orders. To adopt the loan method would undoubtedly depreciate Victory bonds more dangerously than is now the case with free and open trading.

That the premium on United States funds in Canada may be cut down by the Finance Minister's action is not disputed, because sterling exchange transact ons are cleared through New York and New York funds must first be purchased. Against this, however, the argument is offered that lower levels for sterling exchange in Montreal, which are now apprehended, will only add further interference with Canadian export business to the United Kingdom and elsewhere. There is also the important consideration that the debarring of Canadian securities held abroad from sale within the Dominion may impress investors as tantamount to temporary repudiation.

Current Xvents and Discussions

CONTINUED OFFERING OF BRITISH TREASURY BILLS.

The usual offering of ninety-day British Treasury bills was disposed of this week by J. P. Morgan & Co. on a discount basis of 6%, the rate which has been in effect for some weeks. The bills in this week's offering are dated March 15

CONTINUED OFFERING OF FRENCH TREASURY BILLS.

Another block of French Treasury bills was disposed of by J. P. Morgan & Co. this week. They were again disposed of on a discount basis of 6%, the figure to which the rate was advanced some time ago. The bills in this week's offerwas advanced some time ago. ing are dated March 19.

HOUSE COMMITTEE TOLD OF TREASURY DEPART-MENT'S OPPOSITION TO COMPOUNDING IN-TEREST ON LOANS TO ALLIES.

A statement to the effect that the Treasury Department opposes the compounding of interest on loans of the United States to the Allies was made yesterday (March 19) to the House Ways and Means Committee by Norman Davis, in charge of foreign loans. According to Mr. Davis the average interest on Government loans from which the advances were made to the Allies is 4.26% and he is reported as stating that under the plan which the Treasury Department believes it has sufficient authority to follow, the return on foreign loans would approximate the same figure. The belief that the committee would approve the Treasury Department plan is said to have been expressed by Chairman Fordney.

BRITISH GOVERNMENT EXTENDS CREDITS TO PO-LAND FOR FLOUR SHIPMENTS FROM U. S.

It was announced on March 18 by the Department of Commerce at Washington that advices had been received from the American Legation at Warsaw reporting the extension of credit of £300,000 to Poland to defray transportation charges for flour for which credit was granted by the United States. The cablegram received by the Depart-

ment also announced a further credit by the British Government of £26,000,000 for financing British goods sold to European countries. The advices in the cablegram said:

The British Government has extended a credit of £300,000 to Poland to defray transportation charges of part equivalent to about 48,000 of the 100,000 tons of flour for which credit was granted by the United States Covernment to the Grain Corporation.

The British Government has granted a credit of £26,000,000 for the purpose of financing S0% of the value of firitish goods sold to various European countries, but what part of this sum will be available for Poland is not

The report that Great Britain has loaned £800,000 to the Polish Govern-ment for the purpose of buying British merchant fonnage cannot as yet be confirmed, but if there is any truth in this it is probable that negotiations are being conducted through private parties.

UNPAID INTEREST ON LOANS OF U. S. TO FOREIGN GOVERNMENTS.

In answer to a resolution, Secretary of the Treasury Houston informed the Senate on Mar. 16 that the unpaid interest on loans to foreign governments, accruing up to Nov-ember last, amounted to \$236,240,114, while the estimated interest for next year is \$463,215,613. Belgium, he said, owed \$8,370,381; France, \$65,858,101; Great Britain, \$105,-503,126; Italy, \$39,228,303, and Russia, \$15,051,977 of the unpaid interest. The interest falling due in 1920 includes: Great Britain, \$211,828,890; France, \$139,094,272; Italy, \$79,595,569; Belgium, \$16,822,078; Russia, \$9,399,365, and Czecho-Slovakia, \$2,515,004.

BILL PASSED IN SWEDEN SUSPENDING GOLD PAYMENTS IN PAPER CURRENCY.

Advices to the State Department at Washington, it was announced yesterday, report that both houses of the Swedish Parliament have passed a bill relieving the State Bank from obligations to pay gold on Swedish paper currency. Regard-ing this measure "Financial America" yesterday said:

ing this measure "Financial America" yesterday said: Bankers say, with reference to the report from Stockholm that the Riks-dag had enacted a measure suspending gold payments upon currency pre-sented at the National Bank of Sweden, that there continues considerable unsettlement in most of the European countries and the developments in Sweden mark the inevitable readjustment in that country's financial affairs. In the first two years of the great war Sweden contributed to the financing of Germany and sold a great deal of material to that country. As a result of these operations there was a boom in Sweden and the Government, with the view of preventing inflation at one time, debarred importations of gold. In the third year of the war it became evident that Germany was the losing side and some unsettlement in Swediah business conditions followed. A feature at one time was a great boom in Sweden in shipping securities.

In stating that gold has been going from Sweden to other countries lately, the "Wall Street Journal" added:

Official British figures of total imports of gold buillon and coin during January and February showed that out of £5,512.000 imported, £365,000 came from Sweden and £5,362,000 came from the Transvaal.

SPAIN'S LOAN TO FRANCE. In its issue of March 13 the New York "Evening Post" said:

This month, according to London advices, France begins repaying to Spain, at the rate of 35,000,000 pesetas (\$7,000,000) every four weeks, a wartime loan of 420,000,000 pesetas (\$\$4,000,000). At the present rate of Spanish exchange at Paris, payment of the whole sum will involve nearly 1,000,000,000 francs, though nominally the franc and peseta have the same value. the value

BRAZIL TO ISSUE \$75,000,000 SHORT-TIME PAPER-\$25,000,000 CREDIT TO ITALY.

It was announced on March 18 in Rio Janeiro dispatches that "the Brazilian Government is preparing a \$75,000,000 short-time paper issue to relieve the money shortage, which is restricting business, particularly exports, according to reports current in financial circles." It was added that "the issue, it is believed, also would be employed in handling a \$25,000,000 food credit for Italy, as well as prospective credits for other European countries. The extension of credits of \$25,000,000 to Italy by the Brazilian Government, through the Bank of Brazil, was made known on the 16th, the credit, it was said, to be used in the purchase of Brazilian products, including beef, cotton and sugar.

PREMIER MILLERAND OF FRANCE APPEALS FOR TIME TO PAY U. S. DEBTS.

In appealing for time within which France might discharge its obligations to the United States, Premier Millerand in an interview with a representative of the Associated Press on March 15 declared that it was not the intention of France to request "cancellation of our debts" but only to "ask time to breathe and to recover our strength after four-and-a-half years of exhausting war." He contended that if "France is obliged to meet her obligations abroad at the present rate of exchange she would be forced to pay two and a half times what she owes. We have," he said, "given our blood; we have given our money. To ask us now to give more than double our debt is an anomaly that cannot fail to strike the most impartial judges." In its account of Premier Millerand's discussion of the relations between France the United States and the conditions of international credit the Associated Press quotes him as follows:

France and the Unit d States must continue the close friendship which always has been maintained between the two countries. No fleeting mis-understandings must be allowed to trouble their relations. To that end the sconer misconceptions are dissipated the better. Without going into the purely political questions, it appears to me an opporting time to recall now to our friend the United States that France is not asking for charity. The greater part of the money France borrowed abroad was spent in the common interest of all the rivilized countries—a fact which might form a basis of a claim for special consideration, but such is not our intention. such is not our intention.

such is not our intention. We don't request cancellation of our debts. We only ask time to breathe and to recover our strength after four and a half years of exhausting war. Our propositions are those which any debtor would feet eight in making in the interest of both himself and his creditor. The Premier referred to the ruinous floctuations in the rote of exchange, which he held would be aggravated rather than palliated through measures proposed to France by those not taking sufficient account of interior con-titions.

ditto

ditions. If France is obligated to meet its obligations abroad at present rates of exchange she would be forced to pay two and a hulf times what she owes, continued the Premier. Thus, after spending for the common good 30, 000,000,000 frances berrowed from her friends she would have to pay 75, 000,000,000 frances as France's premium to these same friends. Of course, that is not what they mean to require from us. We have given our blood, we have given our money. To ask us now to give more than double our debt is an anomaly that cannot fall to strike the most invarial ledges.

most impartial Judges.

After mentioning the suggestion made by the United States that France could raise the value of the franc by increasing exportations, Premier Millerand said that the question appeared to be imperfectly understood

Millerand said that the question appeared to be impertently independent by the American people. We ask nothing better than increased exports. We must first, how-ever, manufacture, and we can't make the things for foreign trade until we have factories in which to manufacture them. Do our American friends loss sight of the extent of the devastation of the richest part of our territory; do they forget that we are still partly paralyzed, and that it will require years to recuperate our wasted man power and restore the former flourish-ing manufacturing contras? ing manufacturing centres?

ing manufacturing centres? The war cost us 600,000 industrial workers, 600,000 of our buildings were destroyed, regions were entirely ruined which in 1913 gave us 94% of our wool, 90% of our innen thread, 90% of our minerals, S3% of our pig iron 70% of our sugar and 53% of our coal. The war wasted our railroads to an unimaginable extent. Thirty per cent. of our merchant fleer was sunk, and wheat production was diminished two-thirds, involving a deficit of 2,000,000,000 francs. These catastrophal changes were a blow to the very base of the economic and financial situation of France."

The French Premier then took up the view of American financiers who have urged France to ship her gold against an unfavorable trade balance.

The French Premier then took up the view of American financiers who have urged France to ship her gold against an unfavorable trade balance. He continued: "If France were deprived of her gold it would bring on a financial crisis coinciding with the period during which the effects of war would be unre-paired. It would constitute perils of another order quite as great as those we were under from 1914 to 1918. "The reproaches of American financiers that France has been too slow in imposing taxes sufficient to balance the budget are made without due consid-eration of the extent to which the paying power of the country has been reduced, as shown by figures I have already given. "Besides sapping our economic power, the German invasion reduced the treasury resources 10%. Also while the United States mobilized about 17% of her men of an age to serve, we sent to the colors 89% of all our mobilizable men for an infloitely longer period. "The paralysis of business as well as the prolonged absence of so many taxpayers resulted in a diminution of 23% in the yield of taxes in 1915, as compared with 1913. In 1916, when it appeared no longer possible to wait for the liberation of the invaded districts to increase the tax revenues, new taxes were imposed and old ones increased, until during the present year the yield of those taxes in force will amount to 12,000,000,000 frances. Fürther taxes now under discussion in the Chamber of Deputies will increase fur ravenue to 20,000,000,000 francs, or four times greater than the pre-war total. "Could France, impoverished in man power, with her principal industries wirned out he asked to make greater or speedier effort?"

war total. "Could France, impoverished in man power, with her principal industries wiped out, he asked to make greater or speedier effort?" In conclusion the French Premier declared: "France and the United States cannot afford to misunderstand each other. Both countries must bear in mind that there are no dealings worth while in which each does not find an advantage. France is determined to rise from the ruins accumulated on her soil by the battle of nations. She will be able to make the necessary fiscal effort, taking all the measures the situation requires." situation requires."

FRENCH COMMITTEE TO CURB NATIONAL EXPENDITURE.

The formation of a Committee on Economies, to be a part of the Finance Ministry, is announced in a cablegram from Paris, Mar. 18 (French Wireless Service), which states that the committee has been created for the purpose of curtailing the national expenditure. It is also said:

The committee has been instructed to conduct investigations and recom-mend measures for a reduction in the outlay of public money. The decree under which the committee was formed gives it wide powers in investigating the different governmental departments. The Attorney General of the army will head the committee, assisted by an official from the Ministry of the Liberated Regions.

FRENCH CREDITORS TO SEEK RECOVERY OF PRE-WAR DEBTS FROM HUNGARIANS AND AUSTRIANS.

Paris cablegrams of Mar. 13 state that French creditors are authorized to recover pre-war debts due them by Hungarian and Austrian subjects, according to an official announcement. Money due Hungarians and Austrians, however, it is said, will remain sequestered for the time being.

PROPOSED AMENDMENT TO WAR FINANCE CORPORATION ACT EXTENDING \$1,000,000,000 CREDITS TO GERMANY.

An amendment to the War Finance Corporation Act so as to provide for advances of \$1,000,000,000 to the German Government for the purchase of food and raw materials is proposed in a bill, introduced in the House of Representatives at Washington on Mar. 16, by Representative Smith (Demo-crat), of New York. The advances in any one year would be limited to \$300,000,000. The bill proposes that "the terms of payment of the said bonds, obligations and under-takings, the conditions of priority and the assets and revenue of Germany, against which the said bonds, obligations or undertakings shall be a charge, shall be fixed and established by the Reparation Commission, appointed under and purby the Reparation Commission, appointed under and pur-suant to said treaty subject to approval of the Corporation." The following is the text of the bill:

Smith to said treaty subject to approval of the Corporation. The following is the text of the bill: Section 1. The War Finance Corporation Act is hereby amended by adding to Title 1 thereof a new section to read as follows: Section 22 (a). That the corporation shall be empowered and authorized to pay to any person, firm, corporation or association engaged in buildness in the United States the contract price of supplies of food and raw materials hereafter purchased, or agreed to be purchased, by the German Govern-ment from any such person, firm, corporation or association, and to accept in fill payment of the moneys so advanced, the bonds, obligations, or other evidence of indebtedness to be issued by Germany for payment of the moneys so advanced, to bear interest at the rate of 6% per annum from the date of such advance; provided. That the said contract shall be approved by the corporation as to price, quantity and subject matter, that the said contract shall be for such supplies of food and raw materials as may be judged by the Governments of the principal ailed and associated Powers parties to the Treaty of Peace be-tween the said Powers and Germany, to be essential to enable Germany to meet her obligations or undertakings by Germany shall be at first, the said bonds, obligations or undertakings by Germany shall be at first, the add bonds, obligations or undertakings by Germany shall be at first, and that the said here and shall be paid in priority to all other bonds, obligations and undertak-ings of Germany, accept such as may be issued for the payment of the costs and shall be paid in priority to all other bonds, obligations and undertak-ings of Germany is the armises of occupation subsequent to the armistice of Nev. 11 1918. 11 1918.

and expenses of the armies of occupation subsequent to the anisoted of Nov. 11 1918.
(b) The total advances to be made by the corporation shall not exceed \$1,000,000,000, and shall not be in excess of \$300,000,000 for any one year.
(c) The terms of payment of the said bonds, obligations and undertak ings, the conditions of priority, and the assets and revenue of Germany, against which the said bonds, obligations or undertakings shall be a charge whall be fixed and established by the Reparation Commission appointed under and pursuant to said treaty, subject to approval of the corporation.
(d) Any such bond, obligation or undertakings shall be a charge ment thereof shall be a lite and charge agalost the property of Germany or of any of her nationals in the custody of the Alien Property Custodian after the payment of debts due to the mationals of the United States.
(e) There is hereby appropriated out of any momey in the treasury not otherwise appropriated the sum of \$1,000,000,000 or so much thereof as may be necessary, for the purpose of making payments by said corporation as and when required under the provisions of this section.
Reparding his bill Representative Smith said:

Regarding his bill Representative Smith said:

The processing of the purpose of making payments by said corporations is and when required under the provisions of this section.
Engrading his bill Representative Smith said:
The Trenty of Peace expressive contemplated that in the interest of the interest of the constricts and to enable Germany to meet the demands of reparation. Strictly of the trenty, after providing for the payment of an amount approximate of the trenty of the symmetric of an amount approximate of the trenty of Nov. 11 1918, shall first be unset, and such stripples of food and raw materials. A trictly and associated powers to be essential to enable Germany to meet the amilities of Nov. 11 1918, shall first be met, and such stripples of food and raw materials as may be judged by the governments of the principal vibilities for reparation, may also, with the approval of the associated powers.
The deal of the treaty providing for the payment for such aupplies of ond and raw materials are may be judged by the governments of the principal vibilities for reparation, may also, with the approval of the adiabation in respect of reparation shall have been or may be indiged to be essential to enable dermany to meet her obligation in respect of reparation shall have been or may be treated for Germany as may be judged to be essential to enable dermany to interest providing to the adiabation in respect of reparation shall have been or may be indived by the governments of the contract price of such articles purchased in the stripted to the resources of Germany price to the payment of the samples for pay be furnished to Germany that is to enable her to meet her adiabation in respective. Since France and problem to define a strend of any divances made, hould be allowed the sector of Germany price to the payment of the analyse of the pay be furnished to Germany. Another method by with payment of raw materials provides except the express of the armite of occupation. Since France and problem to the united states are applied in the treat of

GERMAN TRUST COMPANY FOR FINANCING PURCHASE OF RAW MATERIAL.

A paraphrase of a cablegram from Berlin under date of March 8 was published as follows in "Commerce Reports" of, March 15:

of, March 15: The following bankers, M. Warburg & Co., Hamburg; Mendelssohn & Co., Berlin; Berenberg, Gossler & Co., Hamburg; Conrad Hinrichs Donner, Hamburg; Munich, Meyer & Co., Hamburg; Schroder, Gebruder & Co., Hamburg; Vorwerk, Gebruder & Co., Hamburg; A. Leby, Cologne; Salop-penhelm Junior Compagnie, Cologne, have organized a trust company at Hamburg along lines of the Deutsche Industrie Treuhand Aktien-Gesell-schaft, generally referred to as Ditag. The object of this company is to secure credits for German firms for the purchase of merchandise, particularly raw material for re-export as manufactured goods; the corporation will act as a trustee for these firms. The corporation's nominal capital is 10,000,000 marks. Connection has been established between this new corporation and several very important American banking and investment companies. "Commerce Reports" adds the following note:

and several very important American banking and investment companies. "Commerce Reports" adds the following note: On Feb. 17 1920. "Commerce Reports" published a full description of the Deutsche industrie Treuhand Aktien Gesellschaft, generally referred to as "Ditag." The Ditag is backed by the German knitting industry, embracing 16,000 mills and handleraft organizations. The German manu-facturer, according to the plan, agrees to obligate himself in terms of dollars for the credit on goods, by depositing with the Ditag certain securitiese In addition to his corporate security, the German manufacturer must, a far as possible, give the usual banking security. The yarns and manufac-tured goods made of raw material imported will continue the property of the foreign financiers as represented in Germany by the Ditag until an export draft in gold value has been extended.]

THE PROPOSED INTER-ALLIED LOAN TO GERMANY.

Sir Auckland Geddes, whose appointment as British Ambassador to the United States was referred to in our issue of Saturday last, page 1048, in a speech in London March 2 is said to have disclosed the fact that the Allies were approving an international loan to Germany, the proceeds to be used in stabilizing the economic situation in Germany, and redemption of the loan to be placed ahead of Germany's Whether the uprising against the Ebert war indemnity. Government will have the effect of changing these plans remains to be seen.

Advices to the effect that the policy of the Supreme Council of the Peace Conference had undergone a change and that it was regarded as probable that it would sanction an international loan to Germany, came in cabled dispatches to the daily papers from London on March 2. The question of security, it was said, is a basic one, and some of the other information contained in the cablegrams stated:

In high diplomatic circles it is asserted that the conference has come to recognize that Germany ruined would mean a weak spot, and a daugerous spot, in Europe.

recognize that Germany ruined would mean a weak spot, and a dangerous spot, in Europe. Great Britain, and personally Premier Lloyd George, are credited with heing the chief forces in bringing about this new polley. The French peace delegation is described as moving toward this point of view reluctantly although it is moving. It is asserted that the French are less unbending than when M. Clemenceau was Premier. How to set Germany on her feet is one of the largest questions the Council is now considering. It is expected that a plan will be arranged which will offer inducements to the rich smaller neutral countries to subscribe to a loan. Even England, her representatives believe, will contribute, officially or unofficially, although England's financial commitments of various sorts arising from the war are greater than those of any other nation. One of the conferees ex-pressed the opinion to-day that Germany's war indemnifies at a specific sum is also being discussed. The belief is expressed that the German Government can organize its finances and industries more efficiently if the German people know exactly what are their obligations and what they are to be called upon to pay. This question was one left by the Treaty to the Reparation Commission, but the present idea seems to be that the conference will take it out of the hands of the Commission. will take it out of the hands of the Commission.

A copyright cablegram to the New York "Times" from Paris, March 4, reported a message to the "Echo de Paris" from "Pertinex" as saying:

Trom Parellex as saying: The principle of a loan to Germany has been acquiesced in by all the powers represented on the Supreme Council; but the payment of Indemnities stands on the same plane, but the extension of credits to Germany is re-garded as a means to an end. In other words, in order to make reparation Germany must be helped to make money. Only in that sense can the pro-posed loan be said to take precedence over indemnity payments.

GERMANY'S ALTERNATIVE PLAN FOR INTER-ALLIED LOAN.

The New York "Sun" of March 10 printed the following from Berlin:

From Bernin: A proposition which is advocated in the German financial press as an alternative scheme to an allied loan, provides that leading groups of in-dustry, agriculture, banking and trade, with the assistance of the Reicha-bank, form a credit union—the Allgemeine Credit Gemeinschaft—this credit union to raise credits by fixed interest—6% to 8% bonds for a long term, guaranteed by the industries concerned. The bonds, it is hoped, might be taken up by American banks and capital for industries thereby secured. cured.

OTTO H. KAHN ON CONDITIONS PREVENTING U. S. FINANCIAL AID TO EUROPE.

It is contended by Otto H. Kahn that "as long as the United States has its present income tax law

Europe can expect little or nothing from private American capital." This statement by Mr. Kahn of Kuhn, Loeb & This statement by Mr. Kahn of Kuhn, Loeb & Co. was made in Paris on March 17, when in reply to a question as to why America could not or would not come to the financial aid of Europe he stated that this country is burdened "with a war debt of over \$50,000,000,000" and "has a railway crisis which will need a larger sum than France paid as indemnity after 1871 to settle." Mr. Kahn's views were expressed to Stephane Lauzanne, editor of the "Matin" and his statement is contained in a special cable to the New York "Times," which gives Mr. Kahn's remarks as follows:

The reasons are so apparent that I are surprised to have to explain them. I might tell you that America has herself a war debt of over \$50,000,000,000 that she has a railway crisis which will need a larger sum than France paid as indemnity after 1571 to settle; that America has no savings, no well-filled stocking, and that in 1014 there were only 400,000 out of a total population of 110,000,000 who were bondholders. But all that is secondary and one to discussion.

filled stocking, and that in 1914 there were only 400,000 due of a binar polite lation of 110,000,000 who were bondholders. But all that is secondary and open to discussion. What is, on the other hand, indisputable and huminous, and is the origin of the whole matter, is that the United States by its financial and political constitution is actually incapable of helping in the industrial affairs and in the national and international loans of Europe. It is not a question of sentiment; it is a question of arithmetic. In the United States the principal tax which weighs on capital is the in-come tax, which reaches 78% of the income of taxpayers. But this ter-rible and exorbitant tax is considerably lightened by the constitutional arrangement which stipulates that all municipal bonds, Federal bonds and farm loan bonds are exempt from all taxation except a succession that would bring in only 3%. I prefer to buy New York city bonds exempt from in-come tax, which bring me in 5% clear. The argument is irrefurable. I have drawn up a scale of incomes which might interest American capitalists when they are taxable and have aver-aged at these figures; if the American millionaire is to buy any foreign in-restment it must bring in at least 18%. If it does not, investment in Amer-ican municipal loans at 415% is more profitable. The interviewer replied to this statement: "But during the war 20,000.000 American subscribed \$15,000-000,000 in Liberty bonds which were only partially exempt from the income tax."

000,000 in Liberty bonds which were only partially example that, "Quite right," replied Mr. Kahn, "but those 20,000 000 Americans were "Quite right," replied Mr. Kahn, "but those 20,000 000 Americans were not making an investment. They were doing a patriotic action. The example yoa cite is a bad one because since passe came these very bonds have fallen in price considerably, and their holders are not encouraged by that fact to invest in any others." The interviewer again put forward an objection. "Both during and sloce the war," he said, "several other loans have been launched on the American market, and some of them nave had consid-erable success. Their present price is higher than the pilce of emission." "Quite right again," sold Mr. Kahn, "but they were short-term loans which at the rate of exchange benefitied to the sytent of 50%. That was not investment; it was speculation. "This is the truth of the situation: As long as the United States has its

not investment; it was speculation. "This is the truth of the situation: As long as the United States has its present income tax haw, and to change it would be to change the Constitu-tion, Europe can expect little or nothing from private American capital. And I will add that there is in America only one reservoir from which Europe can draw to relieve her distress. That is the reservoir of private fortunes. On account of the financial structure in the United States, this reservior is and will remain closed to Europe." Max Kake, and that there is the financial structure of the time, laft are

Mr. Kahn, as noted in these columns at the time, left on March 2 for a trip to Europe during which he will visit Great Britain, France, Belgium and Italy.

GOLD SHIPMENTS TO ARGENTINA AND ITS MA-TURING LOANS.

This week's gold shipments to Argentina, amounting to over \$10,000,000, and conferences which have been held in this city regarding the Argentina loan maturing in May have been incidents in the financial developments. With the gold shipped to Argentina this week, altogether, it is stated the shipments of the metal to that country have reached close to \$60,000,000 since the first of the year. The return to Argentina of that country's Minister of Finance, Dr. Domingo Salaberry, after conferences which he had with local bankers (generally known as the South American group), in the offices of J. P. Morgan & Co. occurred on March 17. Dr. Salaberry, as we announced in our issue of Feb. 14, page 610, came to the United States to participate in the Pan-American Financial Conference in January, the main object of his visit, is was said, being generally supposed to be in the interest of Argentine's requirements for the sum of \$300,000,000, to be applied to the liquidation of short In his conferences at the offices of J. P. Morgan date loans. In his conferences at the offices of J. P. Morgan & Co., Dr. Salaberry is said to have informed the financiers that his Government would like to renew half or all of its \$50,000,000 loan, which matures on May 15 next, but that Argentina would be willing to pay off the loan without a refunding operation if the bankers so recommended. The New York "Tribune" of March 17, which is authority for this, also says:

Lifts, also Says: Although leading members of the group denied a decision had yet been reached, it was reported in the financial district that the loan would be paid off. The balance of trade between the United States and Argentina has been in favor of the latter, and \$56,000,000 in gold has been abipped to the South American country from New York since the first of the year. Moreover, it is understood that the Government of Argentina still has a large credit balance at the Federal Reserve Bank of New York, which has been estimated to be \$70,000,000. In view of these facts, bankers realize that Argentina could easily pay off the entire loan, which consists of \$25,-

000,000 and 5,000,000 pounds sterling of bonds, which were issued in 1915. Practically all of the bonds are now held in this country. Despite Argentina's favorable credit balance, the country has a large floating indebtedness at home which was incurred during the war, and thus far has not felt able to float an internal loan. If the dollar and sterling loan could be renewed, instead of paid off, the funds thus held back could be employed, it is pointed out, to reduce the indebtedness at home. It is said that the Argentine Finance Minister at his conference with the South American group on Monday declared that if the May 15 maturity were said that the Argentine Finance Minister at his conference with the South American group on Monday declared that if the May 15 maturity were paid off it would be necessary to float an internal loan, and that legislation which would make such an operation possible would soon be passed. Some bankers, however, said that wealthy citizens of Argentina were as a group unsympathetic toward the present Government, which is considered some what radical, and, therefore, were not anxious to buy its bonds. During the war, the Argentine Government financed itself mainly through loans from the banks. from the banks

As a result of the conference with Dr. Salaberry, it became known that the power of decision as to what would be done with the coming maturity was seated in New York, and not in Buenos Aires.

CRITICISM OF CANADA'S EMBARGO ON TRADING IN OUTSIDE SECURITIES.

That public opinion is by no means unanimous as to the wisdom of the action of the Canadian Government in prohibiting trading in securities from outside of Canada, is evident from the discussion of the matter in the Canadian papers. Here, for instance, is a letter that appeared in The Kingston (Can.) "Standard" on March 12 from a correspondent who signs himself "British Fair Play":

The Editor, "The Standard" Sir:—There is one phase of the decision to prohibit trading in securities from outside of Canada, that does not seem to have received the con-sideration and attention which it deserves, this, namely, the ultimate effect upon Canada and Canadian securities. The immediate effect is known, to wit, that it will stabilize prices and help, for the time being, to release the adverse probance situation.

known, to wit, that it will stabilize prices and help, for the time being, to relieve the adverse exchange situation. But looking absed, where in the end may the country be landed such a policy? Take the English investor, for instance. He bought securities in good faith and in the belief—as he had a perfect right to believe—that if the time ever came when he should desire to sell these securities he would find a ready and an open market for them, enabling him to convert his securities into cash whenever he felt so disposed. With-out the belief that such a market would be available to him, he probably would not have invested his money; for one of the principal attractions of a standard investment is that there is always a ready sale for it—always an open market, so that in the event of the investor being at any time in urgent need of funds he could readily realize on his investment and by using the cash thus obtained perhaps save himself from serious loss in other directions.

<text><text><text><text><text>

Yours truly, BRITISH FAIR PLAY,

CANADA'S CREDITS TO ALLIES.

Regarding Canada's credits to the Allies the Montreal "Gazette" of March 11 in a Canadian press dispatch from Ottawa said:

Italy—Total advance, \$6,003,301.20. Interest is payable half yearly at 5% in Canadian dollars. The principal must be repaid by Dec. 31 1923. France—Under agreement of May 15 1919 the Dominion agreed to ad-vance up to \$25,000,000 for purchases in Canada of Canadian products during the period ended Dec. 31 1919. The total advances, including contracts entered into and still unpaid, amount to \$5,519,047.60. The bills carry interest at 514%, and are repayable Dec. 31 1924.

Greece—Canada advanced up to \$25,000,000 for purchases in Canada these carry interest at 515% and debentures will be due on June 30 1920. Belgium—Canada agreed to advance \$25,000,000 at 556%, the neces-sary debentures for which have been deposited in London to the order of the Finance Minister. Rumania—\$25,000,000 was advanced for purchases in Canada. The total advances, including contracts entered into and still unpaid, amount to \$22,542,223.76. The Rumanian minister in London has deposited a bond for \$25,000,000 to cover the advance.

N. Y. SENATE PASSES BILL PERMITTING SAVINGS BANKS TO ACCEPT DEPOSITS UP TO \$5,000.

The New York Senate passed on Mar. 16 the bill of Senator N. M. Marshall, permitting savings banks to accept deposits up to \$5,000 instead of \$3,000 as at present.

PROPOSED NEW BUILDING OF FEDERAL RESERVE BANK OF ST. LOUIS.

The Federal Reserve Bank of St. Louis plans to erect on Locust Street between Broadway and Fourth Street, a new building at a cost of \$2,000,000. Negotiations were coneluded a month or so ago for the purchase of the ten-story Commonwealth Trust Company Building at Broadway and Locust Street and the four-story Pope building adjoining on Locust Street. The purchase price of the Common-wealth Trust Building is \$450,000 and the Pope Building The building and ground of the St. Louis Trust \$60,000. Co., and an addition to the north had previously been acquired by the Federal Reserve Bank for \$540,000. The erection of the Federal Reserve Bank Building on the site was conditional upon the alley running into Locust Street being vacated. This the city has assented to. The new building will have a frontage of the entire block on Locust Street, which is 269 feet, a frontage of 65 feet on Broadway, and 145 feet on Fourth Street. This land totals about 22,500 square feet. Plans for the new building have not yet been completed.

DIRECTORS OF OKLAHOMA BRANCH OF FEDERAL RESERVE BANK OF KANSAS CITY

The proposed Oklahoma branch of the Federal Reserve Bank of Kansas City plans to begin business on Apr. 1. An item respecting the establishment of the new branch appeared in our issue of Jan. 31, page 425. As to the directors of the same, the Federal Reserve Bulletin for February says:

of the same, the Federal Reserve Bulletin for February says: Announcement was made on Jan. 29 1920, of the appointment of the following directors of the Oklahoma City branch of the Federal Reserve Bank of Kansas City: Mr. William Mee, Mr. E. K. Thurmond, Mr. L. H. Earhart, Mr. Dorset Carter, Mr. P. C. Dings. The first two gentlemen have been appointed by the Federal Reserve Board, while the last three are the appointees of the Federal Reserve Bank of Kansas City. Mr. William Mee is President of the Security National Bank of Oklahoma City, and Mr. E. K. Thurmond, also of Oklahoma City, is prominently connected with banking interests in the State of Oklahoma City, is prominently connected with banking interests in the State of Oklahoma City. Dorset Carter is an Attorney and President of the Coline Oil Co., and Mr. P. C. Dings is President of the Guaranty State Bank of Ardmere, Okla.

STATE INSTITUTIONS ADMITTED TO FEDERAL RESERVE SYSTEM.

The Federal Reserve Board at Washington makes public the following list of institutions which were admitted to the Federal Reserve system in the week ending Mar. 12 1920: District No. 2-Capital. Surplus. Total Resources.

| City Trust Company of Newark, | - and a second second | 1.0000.00010 | and the second second second |

National Bank,

\$154,000,000 OF TEMPORARY LIBERTY LOAN BONDS EXCHANGED FOR PERMANENT BONDS IN

NEW YORK RESERVE DISTRICT.

According to an announcement issued by the Federal Reserve Bank of New York on March 15 exchanges of \$154,000,000 of Third Liberty Loan temporary bonds for permanent bonds have already been effected. Over one billion of these bonds, it is estimated, are held in this district, says the statement of the Reserve Bank, which we quote herewith:

Exchanges of Third Liberty Loan temporary bonds for permanent bonds are now being made. Holders of these bonds may present them for ex-change at any bonk or trust company or. If in domaintations of \$50 or \$100, at the Liberty Loan Association at 19 West 11th Street. Exchanges may, in this manner, be made more speedily and with greater facility for bondholders than by presenting them direct to the Federal Reserve Bank, which as the central institution makes the exchanges prin-cipally in large volume for the banks. It is estimated that over one billion dollars of these Liberty Loan bonds are hold in this district. There were originally more than three million subscribers, and at the close of business yesterday it was learned at the Federal Reserve Bank that exchanges, amounting to \$151,000,000 had thus far heen effected.

The exchanging of temporary bonds of the First and Second Loans, of both the 4% and 4%% issues, will not begin until after April 1.

SECRETARY OF TREASURY HOUSTON RECOMMENDS REVISION OF INCOME AND PROFIT TAXES.

The simplification of the income and excess profits tax and the equalization of the tax upon corporate and unincorporated business is urged by Secretary of the Treasury Houston in a communication addressed this week to Representative Fordney of the House Ways and Means Committee. Secretary Houston states in his letter that "public opinion has not yet awakened to the gravity of the conscquences which are likely to follow a failure to simplify the tax law at this legislative session." It would, he says, "be manifestly unsafe in my opinion to reduce now the income and profits taxes to be collected in the calendar years 1920 and 1921, but I can see nothing in the financial prospects for the calendar year 1922 and thereafter which would make impossible or unwise the very modest reduction involved in the plan of simplification hereinafter proposed. Secretary Houston proposes that a flat tax on profits in excess of distributed earnings be substituted for the present graduated rates of 20 and 40%. It would, he says, be possible to adopt a declining rate, say of 25% for the first year in which the suggested amendment is in operation, 20 % for the second year and 15% thereafter. It is, he adds, "only necessary that the rate should be fixed at one figure for a particular year." A reduction (by one-fourth) in surtaxes attributable to that part of net income which is saved and re-invested is also recommended by Secretary The revenue lost by such an amendment, could, Houston. The revenue lost by such an amendment, could, he says, "be made up by increasing the normal tax or that portion of the surtaxes attributable to income spent for purposes of consumption." According to Mr. Houston's letter the losses to the Government as a result of the Supreme Court decision in which stock dividends are held non-taxable are estimated at \$105,000,000, but the net loss it is expected will be only \$25,000,000, since much of the original loss would be regained through the sale of stocks and subsequent taxes on them.

The aggregate loss for the two years 1918 and 1919 under exemption to personal service corporations would probably, he says, be between \$10,000,000 and \$12,000,000, involving 2,500 corporations, and he says the need for legislation to meet this situation arises "not so much from the possible loss of revenue as from the obvious undersirability of permitting 2,500 corporations and their stockholders to escape both the taxes upon the corporations and those imposed upon individuals. Fortunately," he says "it is possible to place personal service corporations and their stockholders in nearly the same position that they now occupy-in a manner wholly consistent with the spirit and letter of the ruling of the Supreme Court-by applying to such corporations on and after January 1 1918 the tax on undistributed profits recommended above for all corporations on and after Jan. 1 1921. This tax would, of course, be in lieu of the war profits and excess profits tax which because of its dependence upon 'invested capital' cannot intelligently be applied to personal service corporations in which, by definition, 'capital (whether invested or borrowed) is not a material income producing factor.' It is plain also that the law should be so amended as to tax dividends received by the stockholders of personal service corporations in the same manner as other dividends are taxed.'

In his further recommendations Secretary Houston proposes the extension to all income and profit tax laws of the five-year limitation contained only in the 1918 law on the time for bringing suit for collection of taxes; simplification of the varying exemptions on the Liberty bond issues so as to strengthen the market standing of those securities; that extraordinary income as compensation from personal service and gains from sales or dealings in property for a period of years be deemed to have accrued or been received ratably during the years in which the service was rendered or the property held, and the amount of extraordinary in-

come so assigned to any one year be subjected to the surtax rates prescribed by law for that year; an amendment authorizing the Commissioner of Internal Revenue, with the consent of the taxpayer and the approval of the Secretary of the Treasury to make a final determination and settlement of any tax claim which shall not be set aside except for fraud; the adoption of an amendment which would prevent interpretative regulations or Treasury decisions from being retroactive. Secretary Houston's letter follows in part:

<text><text><text><text><text><text><text><text>

New returns are being made faster than old returns can be audited. ment. New returns are being made faster than old returns can be audited, resulting in an accumulation of claims and potential back taxes the dangers of which have already been described. Second, the profits tax is confined to a small faction (in number) of the business concerns of the country. Personal-service corporations, partnerships, sole proprietors and most forms of trust organization are exempt from the tax. If the principle is sound, it should be extended to all forms of business organizations—a pro-posalwhich administrative considerations alone stamp as impracticable either by the average tax and future needed near enough to be worth consideration. in the present or any future period near enough to be worth consideration.

In the present or any future period near enough to be worth consideration. The general course or principle which simplification of this part of the tax law should follow, is I believe reasonably clear. The outstanding feature of the present system of income taxation in its most important application to business income, is the fact that we employ for this purpose two systems of taxation which are incommensurate and irreconcilable. Corporations pay the profits tax and normal income tax while their stock-holders pay surfaces on dividends or distributed profits, but nothing in respect of the undistributed corporate profits. On the other hand, sole proprietors and the members of partnerships pay full income tax, normal tax and surfaces, upon the entire profits tax. The profit tax on cor-porations is evidently meant to be a rough equivalent for the surfaces levid upon the reinvested or undistributed profits of other forms of business. But the the quivalent is reached. In 1918 the members of a well known part-nership paid nearly \$1,125,000 more taxes than they would have paid had their business been organized as a corporation. And the contrary is quite as frequently true.

their business been organized as a corporation. And the contrary is quite as frequently true.
There should be one system and not two systems of income taxation applicable to persons eugaged in business. Substantial uniformity of treatment, ould be an easily of ways, the details of which it is not necessary to discussinere. I outline below one such plan which nasm many attractive features, the detailed provisions of which I shal be glad to supply upon request. The detailed provisions of which I shal be glad to supply upon request. The contrary and neavier burdens. Equalization of the tax upon corporates at time when such taxation represents simplification and relief, not for the provident during its to simplify the excess profits of corporations at a time when such taxation represents simplification and relief, not for the properties of the during business can be accomplished now with benefit to the proportations, the Government and the general public. We should grasp an opportunity which may never return. The principal features of the provident is designed, first to eliminate from the war profits and exceeded to above are as follows:
(a) This plan is designed, first to eliminate from the war profits and exceeded 'war contracts'' all reference to or use of invested capital and second, to place the taxation of theorporated and unincorporated business concerns, so far as may be, on substantially the same basis of certain provide the range of 20% and 40%, a flat tax on profits in the solid capital eatings. A rate of 20% has been used as the basis of certain provide to adopt a deciling rate, say of 25% for the first year in which solid to adopt a deciling rate, say of 25% for the first year in which solid basings to adopt a deciling rate, say of 25% for the first year in which solid basings to adopt a deciling rate, say of 25% for the first year in which solid basings to adopt a deciling rate, say of 25% for the first year in which year is a subscient.

the suggested amendment is in operation, 20% for the second year, and 15%
thereafter. It is only necessary that the rate should be fixed at one figure for a particular year.
(c) The second object could be accomplished (although the plan would be well worth while without this feature) oy making it explicit in the law that corporations have the right to pay dividends in bonds or promises to pay bearing a fair rate of interest which are taxable to the stockholders as ordinary dividends, or by authorizing corporations to receive back from their stockholders as paid in surplus, cash or other dividends recently distributed. Under these or analogous procedure a corporation could retain its profiles for use in the business and yet convert the profits tax into a genuine income tax. use in the business and yet convert the profits tax into a genuine member as The excess profits tax would thus become a flat tax on undistributed earn-ings: "Invested capital" would practically disappear and the corporation if it desired could place itself on substantially the same basis as the partnership, the personal service corporation, and the sole proprietor. The principal object of this suggested amendment is to simplify the tax by removing the greatest inequality and complexity now found in the tax laws, i. e., she use of "invested capital."

of "invested capital." (d) Revenue needs make it impracticable in my opinion, to apply the preceding amendment to profils for the calendar year 1920, the taxes upon which will be payable in the calendar year 1921. But it should be put into effect as soon thereafter as the diminishing expenditures of the Government will permit. It is estimated that with a 20% rate and on the basis of present corporate net income the suggested amendment would reduce the tax revenue by approximately \$430,000,000 a year. If, for instance, the amendment were adopted and made to apply to income received on and after Jan. I 1921, the first reduction in the tax collections would occur in the last half of the fiscal year 1922 and would amount to \$215,000,000 for that fiscal year.

last half of the fiscal year 1922 and would an analyze fiscal year.
(c) However, present corporate conditions can hardly be maintained; and if corporate income declines and invested capital increases as rapidly as they have done in the past twelve months the proposed amendment would probably cause to reduction in the future revenue. New schemes are constantly being devised for the purpose of increasing invested capital. It is time to provide for a modification of the excess profits tax not only to relieve the taxpayer, but because of an approaching decline in its productivity.
8. Reduction of surtaxes on income saved and reinvested. In connection

<text><text><text>

ing taxable income and at the same time to limit the total amount of such reduced surfaxes to the same percentage (e. g. 20%) of the reinvested in-come as the rate imposed upon the undistributed profits of corporations. The maximum tax upon such saved income would thus be approximated the same, whether reinvested by the individual, the partnership or the corporation, and whether reinvested personally by the stockholder, of a cor-poration or by such corporation for its stockholders. If at any later date, the profits of a corporation which had paid the undistributed profits tax came to be distributed a credit equal to the tax already paid by the corpora-tion could. If it were thought wise, be easily granted to the stockholders. The revenue lost by such an amendment could, if necessary, be made up by increasing the normal tax or that portion of the surfaxes attributable to facemespent for purposes of consumption. But the time is fast approach-ing when the adoption of such an amendment would cause little real re-duction of the revenue. We cannot long continue to collect surfaxes riding to 65% upon income from ordinary business and investment while exempt

The revuele lost by such as an andment would perform that the proceeding of the composition of such an animediment could, if necessary, he middle and the second of the events. regarded as maximum and most of the experts of the department are of the opinion that the entire net loss resulting from the exemption of stock divi-dends will amount to less than \$25,000,000. The suggestions made above do not comprehend all the changes in the present law, which in my opinion could be advantageously adopted at the present law, which in my opinion could be advantageously adopted at the present session of Congress. I have confined my suggestions to an irre-ducible minimum of measures looking largely to the simplification of the income and profits taxes, for the consideration of which there still remains time and action upon which at this session of Congress may reasonably be asked by the tax paying public. I shall be glad upon recuest to submit drafts of amendments embodying the suggestions here presented and to place at your disposal for the work of tax revision all of the personnel and addities of the Treasury D-partment.

MAR. 20 1920.]

HOUSE PASSES BILL AUTHORIZING UNITED STATES GRAIN CORPORATION TO SELL FLOUR FOR RELIEF IN EUROPE.

The bill permitting the United States Grain Corporation to sell 5,000,000 barrels of soft wheat flour for eash or on credit to Austria, Poland and Armenia, was passed by the House on March 15 by a vote of 283 to 12. Eleven Democrats and one Republican voted against the bill. They were Representatives Bankhead, Alabama; Blackmon, Alabama; Buchanan, Texas; Garner, Texas; Rayburn, Texas; Sisson, Mississippi; Stephens, Mississippi; Thomas, Kentucky; Wilson, Illinois; Johnson, Kentucky; Johnson, Mississippi, Democrats; and Kraus, Indiana, Republican. The pro-posal to sell the flour on credit in Europe was referred to in these columns last scale, page 1000 and in full soft the set these columns last week, page 1040, and is in lieu of the earlier plans to extend credits (originally \$150,000,000 and later reduced to \$50,000,000) in behalf of the starving peoples of Austria, Poland and Armenia. Representative Kitchin during the debate on the bill on the 15th said in part:

during the debate on the bill on the 15th said in part: I do not think there is a man here who is so lacking in humanity or who has the courage to vote against this bill. I am going to see that we have a record vote on it so that every man can vote according to his judg-ment and conscience. But I cannot understand why a tion has not been taken earlier. A month and a half ago the Committee on Ways and Means reported out a bill granting this same relief, only it was expressed in dollars—\$50,000,000—while this bill, according to Mr. Barnes, and according to other testimosy, appropriates flour worth \$53,000,000, or \$3,000,000 more than the original bill. This flour is worth \$50 a barrel, so 5,000,000 barrels is \$53,000,000, or \$3,000,000 more than the bill which the Rules Committee refused to permit the House to consider. The following is the hill as massed by the House on the 15th.

The following is the bill as passed by the House on the 15th:

The following is the bill as passed by the House on the 15th: IH. R. 12954.)
A BILL providing for the relief of populations in Europe and in countries contiguous thereto suffering for want of food.
Be it encied by the Senate and House of Representatives of the United States of America in Congress assembled. That, for the participation of the Govern-ment of the United States in the furnishing of foodstuffs to populations in Europe and countries contiguous thereto suffering for the want of food, the United States Grain Corporation is hereby authorized, with the ap-proval of the Secretary of the Treasury, to sell or discose of flour now in its possession, not to exceed five million barrels, for eash or on credit at such prices and on such terms or conditions as may be necessary to carry out the purposes of this Act and to relieve populations in the countries of Europe or countries contiguous thereto suffering for the want of food: Provided. That an audited, itemized report of the receipts and expenditures of the United States Grain Corporation for the purposes authorized by this Act shall be submitted to Congress not later than the first Monday in December 1920.

SUGAR EXPORTS FROM CANADA PROHIBITED.

The Canadian Trade Commission announced in a memorandum on March 18 that no licenses for exportation of sugar would be issued until domestic needs were satisfied. The Trade Commission now has full control over imports and exports of sugar.

There is no likelihood of a reduction in sugar prices, the Commission's memorandum said. It was pointed out sugar consumption had increased 20%, due to "increase in popu-lation, higher wages and prohibition." Persons who formerly consumed liquor now eat sweets for stimulants, the Commission said.

Canadian refiners, it was said, according to the Commission, could at this time export sugar to the United States markets at an average price of \$1 35 per hundred pounds above Canadian prices if exports were permitted. The Commission has advised consumers to begin buying by a store of sugar for the coming season.

DIFFERENCE IN EXCHANGE FACTOR IN SUSPEN-SION OF EXPORT FIRM OF GEORGE MOGENSEN.

"The heavy difference in exchange during the last few months, taken in connection with the refusal of payment by Rumanian merchants to the amount of over \$400,000 of invoices," is given as the immediate cause for the suspension of business on March 17 by the firm of George Mogensen, which had conducted a general export business at 50 Broad Street, this city, with branches in Paris and several other European cities. A general assignment in favor of William C. Fitts for the benefit of creditors was filed on the 17th inst. by the firm, consisting of George Mogensen and Gerome S. Dumont. Following the assignment H. and J. J. Lesser, attorneys for three creditors whose claims aggregate \$2,217, filed an involuntary petition in bankruptcy. The petitioning creditors are the Western Union Telegraph Co., whose claim is for \$2,000; Charles Viale & Co., Inc., \$190, and Morris S. German, \$27. The assignce stated that, although the liabilities will aggregate about \$2,000,000, the assets, if realized upon, will amount to consideably more. In the statement giving the exchange situation as the immediate cause of the firm's difficulties, it must be assets immediate cause of the firm's difficulties, it was also said

that the suspension "was necessitated, by a combination of circumstances, some of which have tended to hamper the banking credit of the firm."

"INCREASED PRODUCTION CONVENTION" OF U. S. CHAMBER OF COMMERCE.

Seeing in increased production a means of restoring normal business and price conditions, the Chamber of Commerce of the United States, it was announced on Mar. 15, will make its eighth annual meeting, to be held at Atlantic City, Apr. 27 to 29, an "Increased Production Convention."

The announcment of the Chamber says:

The atmountement of the Chamber says. This subject is considered of such importance that in working out a program for the meeting every topic will be considered from this viewpoint. Lack of production, it is pointed out, is one of the chief causes of the high cost of living, which cannot be reduced until more goods are put on the market. The present is a seller's and not a buyer's market. Prices have been forced up by competitive bidding. This in turn has made necessary unusual wage increases, with a still further rise in manufacturing and pro-duction costs. duction costs

duction costs. Even with the orchange situation as it is, with its threatened curtailment of exports to Europe, manufacturers generally believe it will be a long time before production in the United States catches up with the demand for goods. In the meantime producers are faced with the task not only of meeting current demands, but with making up in some directions produc-tion lost as a result of the diversion of manufactured goods for war purposes. The general subject of increased production has been divided up in the pr gram for the convention into sub subjects. The first to be taken up will be the government in relation to production. Under this heading will be considered anti-trust legislation and taxation. Business of every kind is keenly interested at this time in the situation with respect to taxation, especially in the subject of excess profits taxes, against which there has been general complaint.

especially in the subject of extess provide tatter, signified to complaint. The second general subject to be taken up will be transportation in rela-tion to production. This will include both land and water transportation. One of the chief causes of lack of production just now, it has been pointed out, is the general shortage of railroad equipment. One authority estimates that the country is short at least 200,000 box cars and all lines of industry have felt the shortage. Vaternational finances and its relation to world production has a prominent

Inst the country is short at least 200,000 box cars and all lines of industry International finance and its relation to world production has a prominent place on the program. This subject will be discussed both from the financial cars and its relation to world production has a prominent place on the program. This subject will be discussed both from the financial cars and the business man's point of view. The Chamber has just expressed its willingness to name delegates to an international financial cars present industries is a decided factor in retarding production in many of the countries of Europe. One general session of the convention will be given over to agriculture in relation to production. Here will be the relation of labor to production. Here will be the relation of labor to production. This will be approached from both sides, the employee's viewpoint being presented by a representative of the American Federation of labor to production. This will be abgroached from both sides, the employee's viewpoint being presented by a business man.

JOHN BARTON PAYNE SWORN IN AS SECRETARY OF INTERIOR.

John Barton Payne retired as Chairman" of the U. S. Shipping Board on March 15, on which date he was sworn in as Secretary of the Interior, succeeding Franklin K. Lane, who retired on March 1. Reference to the appointment of the latter as Mr. Lane's successor was made in the "Chronicle" of March 21, page 714. Mr. Payne's nomination as Secretary of the Interior was confirmed by the Senate on Feb. 28. Before retiring as Chairman of the Shipping Board, Mr. Payne created two new positions, that of General Counsel and General Solicitor. Robert A. Dean, General Counsel for the Emergency Fleet Corporation, was appointed to the first office and Charles F. Dutch was made General Solicitor.

NOMINATION OF REAR ADMIRAL BENSON AS MEMBER OF U. S. SHIPPING BOARD CONFIRMED.

The nomination of Rear Admiral William S. Benson to be a member of the U.S. Shipping Board was confirmed by the Senate on March 13. While Rear Admiral Benson replaces John Barton Payne on the Shipping Board, he is appointed only as a member; it is expected, however, that he will be made Chairman of the Board. Mr. Payne relinquishes the Chairmanship of the Board to become Secretary of the Interior.

ASSOCIATION OF RAILROAD SECURITY OWNERS PROPOSES COMMITTEES TO CONSIDER NEW RAILROAD LAW.

There was made public last Monday (Mar.15) a report dealing with the activities of the National Association of Railroad Securities, which was submitted by the President, S. Davies Warfield, at a meeting of the Committees of the Association, a resolution being unanimously adopted thereat, authorizing the President and officers to carry out the suggestions therein made. A resolution was also adopted authorizing the President to arrange for representatives of the Association and Counsel to attend the hearing announced by the Inter-State Commerce Commission for Monday next (Mar. 22) in respect to the administration of the new railroad law. The report calls attention to the fact that the administration of this act affects not alone the owners of railroad securities, but of every business enterprise. The creation of Committees of railroad directors, shippers organizations and the National Association of Owners of Railroad Securities for the consideration of problems affecting their interests, is recommended in the report, the suggestions of which, were adopted and authorized to be carried out as follows:

(a) That we communicate with the directors of Class I railroads suggesting that the board of each road name a director from its number to serve on a committee to be known as "Committee of Railroad Directors," This Committee of directors to name a smaller committee composed of not more than twenty directors. The committee of twenty to name a sub-committee of asy seven. The members of these committees to be selected geographication.

of say seven. The internet of this committee the questions of policy, ally. That there shall be referred to this committee the questions of policy, both public and legislative, with which the railroads will have to deal, also matters of legislative, financial policy in respect to the railroads as a whole. The members of this committee should be composed of directors in touch with general business and financial conditions. (b) That the National Association of Owners of Railroad Securities will financial conditions.

(b) That the National Association of Owners of Railroad Securities will designate a committee to meet with the committee of directors and discuss matters properly before the two bodies so constituted. Action jointly taken to be binding on both.
(c) That the organization known as the American Railroad Association, with headquarters at Chicago and now maintained by the railroads, presents the means of solving the technical problems that arise from time to time and which affect all the railroads and in the disposition of which all the railroads could concur, and such matters may be disposed of by that Association. Mr. R. H. Aishion, among the abelest railroad executives in the country, is President of that Associations of the country be asked to name a committee from among their executive or other committees as a standing committee to confer with a like committee to be appointed by the Executive Committee of this Association to take up questions proper to be considered by the owners of the properties with those upon whom their business depends.

This Association, it is recalled, originated and urged before the committees of the two Houses of Congress the placing in the Act of a fixed percentage return to be computed on the fair value of the property of the railroads in the aggregate, and with a division of earnings in excess of six per cent on the fair property value of each individual railroad. This regulation of excess earnings, it is pointed out, is necessary to secure the fixed percentage return also to an adjustment of rates sufficient to maintain transportation as a whole. These provisions are both contained in the "Transportation Act."

Mr. Warfield in his report leads through the negotiations with the Government of the standard form of contract during Federal control and the difficulties their representatives and counsel experienced in securing changes therein recognized as vital to the security owners through failure to secure cooperation from railroad sources. He gives in detail tho circumstances under which the owners approached the return of their properties and the necessities for changing the organic law to admit of rates sufficient to allow for great discrepancies in earnings between the various railroads and to reestablish railroad credit. He asserts that many of these necessities are not operating matters and should not be left to the decision of any organizations of purely operating executives. It is pointed out that the questions at issue are altogether too far-reaching and vital to the people as a whole to permit of errors in judgment between the owners and operating executives. They should have their proper place in settlement of these questions and, it is declared, that the public will not stand for any further mistakes on the part of the vailroads. That a continuation of errors in policies will inevitably lead to Government ownership. Mr. Warfield Savs.

Silvs' The responsibilities devolving upon the Association, growing out of the emaciment of this legistation, are very great, for it contains substantially every fundamental for which the Association stood from the outset. If the enactment of this law could alone solve the problems of the railroads, the Association's activities might end with its passage. But no law can func-tion automatically. Few statutes have been enacted by Congress upon the succersful administration of which so much depends and with results so far-reaching. Private ownership and operation of the rail transportation system of the country is as take. Whatever its defects, no other country has prospered as this has under private operation of its railroads. Yet Government ownership may result, although the country is overwhelmingly opposed to it, from failure to carry out the intent and purposes of this law. Allusion is made to the conditions obtaining at the finare.

Allusion is made to the conditions obtaining at the time of the organization of the Association and its first statement in 917 to the public calling attention that:

A "state of mind" hostile to carriers has been created in nearly every telelative relation, whether National or State. This has resulted in a steady encroachment upon the property ights represented by bonds steady en and stock.

The report continue under th , heading "Publ , Policy the Railroads"

The fact cannot be concealed that this resulted largely from the railroads The fact cannot be conceased that this resulted targety from the fact barroads themselves in the public policy which had been pursued. The stubborn fact that these public service carriers bore a relationship to the public which demanded that in their operation the first consideration should be the public interest, the railroads apparently would not recognize. They declined to accept the fact that the railroads were not any longer private enterprises in the sense that they could be operated as a private business not required to be conducted under a franchise right and as a public service.

Referring to the circumstances of the return of the railroads, the report states:

roads, the report states: It was under circumstances such as these that the owners of the rairoads were to approach the questions involved in the return of their properties. Not alone were matters incident to the physical condition and operation of the properties to be considered, but questions of far greater import. What were to be the methods of regulation under which the railroads would be operated. Were they to go back under the old conditions of uncertainty and turnell. The roads were to be returned with some of them as the result of the war not making their operating expenses. Some of the great systems were on an earning basis of only twenty to twenty-two per cent. of their standard rental, while others were earning from 145% to 200% of their standard rental. How were such disparities to be provided for. Were those to whem the owners of their securities were required to look prepar-ing to profit by past experience and find some constructive basis upon which the Government, the public and the railroads could stand. No such evidence has yet been given in the proposals of legislation advanced by the Associa-tion of Executives.

tion of Executives. The proposals of registation advanced by the Associa-The records show that the representatives of railroads had committed themselves irrevocably to compulsory Federal incorporation and other dis-turbing measures as the basis of their past and present desires in Congres-sional legislation. It had been sufficiently proven to the satisfaction of your Executive Committee that apart from its unpopularity with the public and its dangers to the railroads compulsory Federal incorporation was uncon-stitutional. The Association secured as Advisory Counsel, in addition to its General Counsel, Messrs. Elihu Root and John G. Milburn (New York), John S. Miller (Chicago), Hugh L. Bond, Jr. (Baltimore, Md.), and Forney Johnston (Birmingham, Ala.). You are familiar with the unanimity with which these lawyers as well as our General Counsel pronounced compulsory Federal Incorporation unconstitutional, in addition it would lead to endless litigation.

The report closes with the following:

The report closes with the following: The fact should not be lost sight of that the individual investor who takes his case through an Association organized as this is, before the public, the legislative and regulatory bodies and the shippers, has a standing far differ-ent from the railroad corporation, as such. He represents, through the mutual institutions with which he is identified or in bimself personally, an individual interest; he is more responsive to the public interest and the public will be more responsive to his attitude. No railroad corporation can occupy a corresponding relation to the people.

A. M. SAKOLSKI ON THE PRESENT RAILROAD SITUATION.

A comprehensive article on "The Present Railroad Situation" in which is reviewed the old conditions and the new law has come from the pen of A. M. Sakolski, Ph. D., author of American Railroad Economies and a member of the bond department of the Equitable Trust Company of this city. The article was prepared for and is copyrighted by the Bankers' Statistics Corporation and was made available March 9. In his analysis of the new law Mr. Sakolski points out that "in view of both the tremendously expanded functions of the Inter-State Commerce Commission and the endless perplexities of official rate making, it is exceedingly difficult to express any conclusions regarding the immediate or ultimate effects of the new railroad legislation." He also says:

also says: The direct outcome on the exclusive rate determining powers of the Com-mission is problematical. Rate making of liself is such a delicate task than when a scale of charges is once established, railroad managers will be loath to make adjustments warraited by changes in competitive forces or lie traffic conditions. This rate rigidity is likely to be intensified under the new powers of the Commission, since, in order to create conditions leading to the acceptance of its theory of rate making, the Commission, in addition to controlling without State interference every detail of railroad policy, must provide a grouping of lines and systems that will tend to maintain sectional economic differences. This of itself promises to involve sectional controversies aside from its effect on the financial status of the companies. The provisions of the new law establishing exclusive Federal supervision of capitalization and a strict control of railroad financing, though probably splininating speculative features, may affect a much needed stability in the value of railway accurities. This is further fostered by prevention of excess-tion. Sectional controversies and political exigencies may be expected to modify administration policies in these matters, but a national slacken ing in the pace of transportation development and a gradual adjustment of traffic routes to meet the needs of sectional economic conditions should tend to eliminate unfavorable results.

to eliminate unfavorable results.

In discussing the pre-war period Mr. Sakolski said: The impending adverse financial situation of American railroads in general at the outbreak of the European war may be ascribed largely to the following cause

(1) Small earning capacity of new branch mileage and non-income producing improvements.
(2) Reduced scale of operating economics.
(3) Higher standards of railroad service.
(4) Increasing wage costs.
(5) Increasing rates paid for capital.
(6) Adversa bigitaling and structure.

(6) Adverse legislative enactmen

In enlarging further upon the above Mr. Sakolski in his treatise says as to item 6:

Restrictive and punitive rairoad legislation both State and Federal, during the decade prior to the war, had grown with such cumulative in-tensity that rairoad officials in 1916 joined in a concerted movement to appeal to Congress for an entire new scheme of rairoad control whereby all uncertainty of public policy would be removed and the companies re-lieved of the vexations State interference and political railroad baiting. All told, between 1912 and 1915 it was computed that upward of 4,000 bills

affecting railroads were introduced into the National and State legisla-tures, of which 440 became laws. Whatever the purpose of these laws, there was most always one certain result, viz., increase in operating costs. The full crow laws, which during this period were enacted in the most im-portant States, were extremely costly, the law of the small State of New Jersey adding an operating cost of something like \$400,000 annually.

As to railroad conditions on Americans entrance in war, Mr. Sakolski says:

Mr. Sakolski says: When the United States entered the war in the Spring of 1917 the rail-road problem had become acute. There was a shortage of equipment of all kinds, an insufficient and inefficient labor supply, a declining margin of net earnings, and an impending demoralization of railroad credit. Added perplexities were found in the uncertain political attitude toward the rail-roads. The conflicting regulations of the States and the Federal Government with causing an annual loss to the country's transportation system and with causing an annual loss to the comparise estimated at over \$100,000,000 annually. In the endeavor to have a fixed and uniform railread policy established throughout the Union, the leading railroad systems organized an Executives Advisory Committee, to place before Congress a plan of control whereby the companies would be freed from the authority of the various State Commissions and at the same time would be assured a certain and fixed policy of Governmental administration to which they could adjust their schemes of operation and expansion. The Congressional committee, appointed to inquire into this subject (known as the Newlands Committee, appointed to inquire into this subject (known as the Newlands Committee, they is the indextation of the war. The whole matter, therefore, was left in absyance to be finally taken up again after the return to peace outions.

conditions. During the nine months of the war preceding Government operation, the railroads of the country floundered in a sea of irresponsible centralized direction while under private and responsible financial control. The companies voluntarily surrendered their individual initiative and independ-ence as a war measure, but without any adequate rollef to assure their financial or corporate integrity. Under this system the operating diffi-culties multiplied to an extent that made direct Government operation not only a military but a financial necessity. What ways may be said of the policy of Government opera-

Whatever may be said of the policy of Government operations of the railroads, Mr. Sakolski observes "there can be little doubt that considering the circumstances the owners and managers of the lines were benefitted thereby." He continues:

continues: Private operation under military necessity could have hardly continued without general bankruptcy or financial demoralization. It cannot, in hairness, he said, however, that the assumption of direct operation by the Government has not fostered serious evils. The diversion of traffic from customary channels, the laxity of exceentive morale, the inefficiency of labor and the resulting high operating costs, the impaired earning, the under-maintenance and the general disorganization of competing progressive forces together with the loss of adaptation of each line to traffic and operat-ing conditions are all matters which will require adjustment if a regime of private initiative and management is again to prevail. Before any predi-tion as to the future status of the transportation systems of the country can be made, it should be clearly borne in mind that the railroads now returned to their owners are not the same properties as when taked over by the Government. The metamorphosis, though not physically complete, marks a new stage in their life history. In judging railroad investment values or railroad possibilities for public service past history may offer little assistance.

values or railroad possibilities for public service past history may offer little assistance.
When the railroads were taken over, freight cars, because of the universal hador shortage, were generally in poor condition. Under the Administration car pooling arrangement during Government control, there was no incentive on the part of the operating officials to keep their cars in repair, since only a small percentage of each company's cars would remain on its own lines. This circumstance combined with insufficient skilled car repairers contributed toward general freight and passenger car deterioration. In addition to physical impairment, account must be taken of depreciated earning capacity. When all the data bearing upon the subject are available, it will be found that the deficit incurred by the Raitroad Administratics of the Inter-State Commission show that in the year 1019 the net operating income of large roads having a total miteage of 234,000 miles was less than \$16,000,000. The net operating income of these coads in the three test years on which the guaranteed standard return to the company is based was \$550,000,000. This would indicate a deficit of about \$450,000,000 in 1919, which added to approximately \$250,000,000 in 1918 makes a total Government loss of more than \$700,000,000.
Bease of the current loss of more than \$700,000,000 in 1918 makes a total government loss of more than \$700,000,000 in 1918 miles of its which has generating the new rule company is based was loss for any proximately \$250,000,000 in 1918 miles of the individual companies can hardly be used as a grage of a rate making to gether with the profit sharing arrangements with the government, it is not likely that the former motives for profitable operations with again be present.

above, we take the following:

<text><text><text><text><text>

<text><text><text><text><text><text><text>

Stabilization of Credit.

Stabilization of Credit. In the absence of a fixed guarantee of nct earnings to individual railroads is it cannot be expected that the new legislation will immediately effect a com-plete stabilization of railroad credit. In pleas for higher railroad rates the point has been made that the cost of capital was an important element in the adequate provision of railroad facilities. Because of the impairment of credit, the transportation companies have been unable to obtain required additional capital funds. The seriousness of this situation is manifest when it is computed on good authority that the railroads as a whole will required during the next three years 55,000,000,000 to place them in a condition to supply the country's transportation needs. (See Railway Age, Jan, 21920). For a decide before the war, the new capital investment of the railroads amounted to more than a balf billion dollars anounally, and as this amount had to be obtained mainly from 'nvestors who have the free choice of placing their funds in other securities which they may deem more desirable, the railroads must adjust their borrowing rates to meet the competitive invest-ment market.

ment market. There is no doubt that this phase of the problem was considered by Con-gress. The provision in the law creating a revolving fund of \$300,000,000 for new capital and the prescribed application of the Government's share of "excess profit" to needy lines for capital expenditure, though constituting a "half losd" measure of relief, is better than no loaf at all. There is every reason to believe that the inter-State Commerce Com-mission in adjusting the general rate levels will give full consideration to railroad credit conditions.

WHAT GOVERNMENT OPERATION DID TO THE RAILWAYS.

The Government did not return the railways in as good condition in any respect as they were in when it took them over, according to the contention made by the "Railway Age" in an editorial in its current issue. In commenting

Age" in an editorial in its current issue. In commenting upon the statement of Director-General Hines to that effect the "Railway Age" says: This is certainly not correct as to passenger equipment, because the Gov-ernment never in more than two years of Government operation bought a single passenger car. It can hardly be true as to locomotives and freight cars, it can hardly be true as to locomotives and freight cars, because in two years of Government operation the Government bought only as many locomotives and freight cars as were required to replace the number ordi-narily retred in one year. The equipment may be in as good condition in so far as repairs can make it so as it was two years ago. but the amount of its much more inadequate than it was then, and no regains can make an old car as good as a new one. With regard to track, the Geveenment has not laid anywhere near as many new ralls and ties as the companies nor-mally did under private operation. To vernment operation has caused numerous changes in the official per from the effects of the ruthless discuption of their official erganizations which occurred under Government control. The advocates and defenders of Government operation said that it had solved the labor problem, but from the first to the last moment of Government operation it was conducted in such a manner as to tend to allonate railway employees from private oursain the amount as to tend to allonate railway employees from private oursain as a policy. It resulted in wholesale diversions of traffic from normal channels, and it will be months and years before it is restored to those channels. Theseulted in enormous increases of operating expenses. Mr. Hines in a recent statement maintained that Government operation had been as

economical as, or more economical than, private management would have been. That is a matter of opinion. Under Government operation railway expenses increased \$1.606.000.000 a year. At any rate, Government ope-ration has left to the companies a legacy of enormously increased expenses."

PRESIDENT WILSON'S OPPOSITION TO PLAN OF ALLIED PREMIERS FOR SETTLEMENT OF ADRIATIC PROBLEM.

The State Department at Washington made public on March 7 the latest communication which President Wilson had addressed to the French and British Premiers regarding their proposals for disposition of the territory on the Adriatic Sea in dispute between Italy and Jugo-Slavia. The President's note, dated March 4, was a reply to one from Premiers Lloyd George and Millerand, dated Feb. 26, and received the following day.

While expressing his concurrence in their view that a speedy settlement of the Adriatic question is of urgent importance, the President, in his note of March 4, says: "He cannot accept as just the implied suggestion of his responsibility for the failure to reach a solution." President Wilson notes with satisfaction the desire of the Allied Premiers to reach an equitable solution in conformity with "the principles of the Peace Conference," and of the "legiti-mate though conflicting aspirations" of the Italian and Jugo-Slav peoples, but he refuses to consent to the withdrawal of the joint memorandum of Dec. 9 in which England, France and the United States agreed on a plan for the settlement of the Adriatic problem.

He expresses the hope that the Allied Governments "will not find it necessary to decide on a course which the American Government, in accordance with its reiterated statement, will be unable to follow."

The Dec. 9 memorandum was revised by the French and British Premiers, without the knowledge of the American Government, and it was this revision, some of the provisions of which were considered by President Wilson to be objectionable and consequently unacceptable to him, that called forth a protest from this Government, followed by an exchange of notes on the subject between the United States on the one hand, and France and Great Britain on the other.

For a long time the Adriatic dispute has been one of the most perplexing problems of European politics. Nor has the United States been a disinterested party to this dispute. Nearly a year ago, it was, that President Wilson issued from Paris his now famous pronouncement in which he firmly opposed Italy's claims to Fiume. The statement to which we allude was made by the President on April 23 1919 in the course of the peace negotiations. It was published in the "Chronicle" of April 26, pages 1687-1688.

In September Fiume was entered and occupied by Italian military forces under the leadership of Gabrielle d'Annunziopoet and aviator. This action, however, was not countenanced by the Italian Government.

Negotiations looking toward settlement of the Adriatic problem continued for a period, but their results were Finally an agreement was reached by the prinnebulous. cipal Allied Powers on Dec. 9 which promised to afford a basis for a satisfactory and lasting settlement of the question. But the matter was again complicated, when, five weeks later, (Jan. 14), Georges Clemenceau, then Premier of France, presented to the Jugo-Slav peace delegates the revised British-French proposals, to which we have already referred. This settlement plan, President Wilson subsequently informed the Allied Premiers, he believed had "pro-foundly altered" the proposal of Dec. 9 "to the advantage of improper Italian objectives, to the serious injury of the Jugo-Slav people, and to the peril of world peace." The Italian Government having accepted the Jan. 14 agreement (to which, it will be remembered, the United States was not a party), but rejected the one of Dec. 9, the President in a note to the Allied Premiers on Feb. 10 contended that this point naturally strengthened the view "that very positive advantages have been conceded to Italy." The note concluded with this paragraph:

concluded with this paragraph: The President desires to say that if it does not appear feasible to secure acceptance of the just and generous concessions offered by the British, French and American Governments to Italy in the joint memorandum of those Powers of Dec. 9 1919, which the President has already clearly stated to be the maximum concession that the Government of the United States can offer, the President desires to say that he must take under serious con-sideration the withdrawal of the treaty with Germany and the agreement between the United States and France of June 23 1919, which are now before the Senate and permitting the terms of the European sottlement to independently established and enforced by the associated Governments. On Feb. 17 the Prime Ministers of France and Great Britain replied to the President's note of Feb. 10. They

Britain replied to the President's note of Feb. 10. They said the inGovernments "view with consternation the threat

of the United States to withdraw from the comity of nations because it does not agree with the precise terms of the Adriatic settlement." In conclusion, Premiers Lloyd George and Millerand said:

The Governments of France and Great Britain cannot believe that it is the purpose of the American people to take a step so far-reaching and terrible in its effects on the ground which has the appearance of being so Inadequate

President Wilson sent another note to the Allied Premiers on Feb. 24 reiterating views expressed in his previous communications His attitude was set forth in the note of Feb. 24 as follows:

The President's position is that the Powers associated against Germany gave final and irrefutible proof of their sincerity in the war by writing into the Treaty of Versailles Article X of the covenant of the League of Nations, which constitutes an assurance that all the great Powers have done what they have compelled Germany to do-have foregone all territorial aggres-sion and all interference with the free peolitical self-determination of the peoples of the world. With this principle lived up to, permanent peace is secured and the supreme object of the recent conflict has been achieved. Justice and self-determination have been substituted for aggression and political dictation. Without it there is no security for any nation that con-scientiously adheres to a non-militaristic policy. The object of the war, as the Government of the United States understands it, was to free Europe from that cloud of anxiety which had hung over it for generations because of the constant threat of the use of military force by one of the most powerful Governments of the continent, and the President feels it important to say again that, in the opinion of the American Government, the terms of the peace settlement must continue to be formulated upon the basis of the prin-ciples for which America entered the war. It is in a spirit of co-operation, therefore, and of desire for mutual understanding that the President re-views the various considerations which the French and Brithh Prime Min-isters have emphasized in their memorandum of Feb. 17. He is confident that they will not mistake his motives in undertaking to make plain what he feels to be the necessary conclusions from their statements. The Allied Premiers' reply, dated Feb. 26, was made

The Allied Premiers' reply, dated Feb. 26, was made public by the State Department on March 5. It may be mentioned here that some time elapsed before the decision was reached to make public any of the correspondence between the President and the Premiers. On Feb. 26 the State Department took action in the matter and gave out the texts of the President's notes of Feb. 10 and Feb. 24 and those of Jan. 23 and Feb. 17 from the French and British Premiers, as well as the texts of the Dec. 9 and Jan. 14 memorandums containing proposals for settlement of the Adriatic question.

The correspondence between the President and the Allied Premiers began with a short note sent on Jan. 19 by then Secretary of State Lansing, asking the point of view of the French and British Governments in undertaking to dispose of this and the Russian problem before ascertaining the views of the American Government. The text of the first note follows:

follows: Washington, Jan, 19 1920. Please take up with Mr. Clemenceau and Mr. Lloyd George the quesilon of the way the Russian and the Italian problems have been handled and ascer-tain their point of view. The United States is being put in the position of having the matter disposed of before the American point of view can be ex-pressed, as apparently Mr. Clemenceau and Mr. Lloyd George thave sought only the views of the Italian and Juroslaw Governments before ascertaining the views of the United States Government. Is it the intention of the Brit-ish and French Governments in the future to dispose of the various questions pendine in Europe and to communicate the results to the Government of the United States? There are features in connection with the proposed Finne settlement which both Mr. Clemenceau and Mr. Lloyd George must realize would not be acceptable to the President. As it was pointed out by Mr. Polk before ils departure, the Dalmatian and other questions should be taken up through regular diplomatic channels and the fact that you are not charged with full powers could have no bearing on the question. As no American officials could be sent to these graterings that could have the same authority as the Prime Ministers of the three Governments to be represented at the meetings of the Prime Ministers. LANSING. The text of the reply of the British and Fronch Prime

The text of the reply of the British and French Prime Ministers to the above, under date of Jan. 23, read as follows:

His Britannic Malesty's Ambassavior presents his compliments to his Paris. His Britannic Malesty's Ambassavior presents his compliments to his Excellency the United States Ambassavior and has the honor to state that he has been charged by Mr. Lloyd George and M. Clomencean to hand to Mr. Wallace the inclosed telegram drawer up by Mr. Lloyd George and M. Clemencean before their departure. In reply to the telegram from Mr. Lanslog, which Mr. Wallace handed to Mr. Lloyd George and M. Clemen-ceau on the 20th inst., Lord Derby would be grateful if the telegram now inclosed could be transmitted to Mr. Lanslog at the carliest opportunity. The telegram reads as follows. "The French and British Prime Ministers have given their careful atten-tion to the memorandum communicated to them by the American Ambassa-

The preach and British Prime Ministers have given their careful atten-tion to the memorandum communicated to them by the American Ambassa-dor in regard to the Russian and Italian negotiations. As to the Russian question, they had previously sent a statement of their views for the con-sideration of the United States Government, inviting their consent and economition

sideration of the United States Government, inviting their consent and co-operation. "As regards the Italian question, the absence of the United States has never been regarded by the French and British Governments as more than temporary, and they have never lost sight of the American point of view on this question on the right solution of which the future of the world so largely depends. The French, British and Japaneso Governments have never had the intention of making a definite settlement of the questions raised without obtaining the views of the American Government. They therefore took up the Adriatic question at the point at which it was left on the departure of Mr. Polk for Washington. Signor Nitti transmitted certain p operals in modification of the ionit memorandum handed to Signor Scialoja by the request from the United States, France and Great Britahn on Dec S 1919 in the assembly of the conference in Parts a fortnight ago.

<text><text><text><text><text><text><text>

Subsequently on Feb. 10 there was dispatched to the British and French representatives at Paris, a note from President Wilson, the text of which was as follows:

<text><text><text><text>

The memorandum of Dec. 9 carefully excluded every form of Italian sovereignty over Flume. The American Government cannot avoid the conclusion that the memorandum of Jan. 14 opens the way for Italian con-trol of Flume's foreign affairs, thus introducing a measure of Italian sovereignty over, and Italian intervention in the only practicable port of a neighboring people; and, taken in conjunction with the extension of Italian territory to the gates of Flume, payes the way for possible future annexation of the port by Italy, its contradiction of compelling considera-tions of equity and right. The memorandum of Dec. 9 afforded proper protection to the vital rail-

oversignly over, and taking intervention in the only practicable port of an alghboring people; and, taken in conjunction with the extension of flalat territory to the gates of Finme, payes the way for possible future annexistion of the port by Italy, its contradiction of compelling considera-tions of caulty and right. The memorandum of Dec. 9 afforded proper protections to the vital rail-modular. It establishes italy in dominating military positions close to the rail-way connecting Finme nerthward with the interior. The memorandum of Jan. 14 establishes italy in dominating military positions close to the rail-way at a number of critical points. These and other provisions of the memorandum on Jan. 14. negotiated its hints the knowledge or approval of the American Government, change the whole face of the Adriatic estiment and, in the eyes of this Gover-ment, render it unworkable and rob its of the messure of justice which is appears to this Government is to co-operate in maintaining its terms. The fact that the Jugoslav representatives might feel forced to accept, in the fact of the alternative of the Treaty of London, a solution which ap-pears to this Government is on unfair in principle and so unworkable in pra-tice, would not it any degree alter the conviction of this Government that is canned give its assent to a settlement which both in the terms of its pro-visions and in the methods of its enforcement constitutes a positive denail of the principles for which America entered the war. The matter would wear a very different aspect if there weres any real divergence of option as to a just and equilabile territorial arrangement at the shead of the Adriatic Secture that fulfill fulfills (Government that fulfish and Americans its o a just and equilabile territorial arrangement at the matter would wear a very different aspect of the preced, British and Americans its o a just and equilabile territorial arrangement at the shead of the Adriatic Secture and equilabile territorial arrangement at the matter would

<text><text><text><text>

London, Feb. 17 1920. The Prime Ministers of France and Great Britain have again given their earnest attention to the communication made to them in regard to the Adri-atic settlement on behalf of President Wilson. They are glad that the Government of the United States has set forth its views so fully and with such complete frankness. They do not, however, find it allogether easy to understand the steps by which the Government of the United States has surfued at its present attifude.

to understand the steps by which the Government of the United States has arrived at its present attitude. In the first place, they believe that there is no foundation for the assump-tion which underlies the American communication that the proposed settle-ment outlined in their telegram of Jan. 20 involves a capitulation to the Italian point of view as opposed to the Jugo-slav, and therefore constitutes a settlement with which the Government of the United States can have nothing to do. The memorandum from the United States Government criticises the proposed settlement on four grounds: Firstly, that it cedes to Italy the narrow strip of territory running along the coast as far as the corpus separatum of Fiume. Secondly, that this strip of tarritory coupled with the constitution of Fiume as a free city, under the guarantees of the League of Nations, clearly paves the way for its annexation to Italy. Thirdly, that the modification of the Jugoslav-Italian frontier operates to the detriment of Jugoslavia in its control of the northern railway from Fiume; and,

Fiume: and, Fourthly, that it provides for the partition of Albania. The memorandum of the Government of the United States would appear to have entirely ignored the great advantage conferred on Jugoslavia at the same time.

<text><text><text><text><text><text><text>

of Jan. 20, since they must know what the attitude of that Government is. They feel bound, however, to ask the United States Government to con-sider the effect of their action. The proposal of Dec. 9 has fallen to the ground because nobody wants to set up the artificial free State of Flume. The proposal of Jan. 20 is objected to by the United States, which had to representative at the deliberations, and which cannot therefore be in close touch with the changes of opinion and circumstances which have taken place since its plenipotentiaries returned to America. They cannot help feeling that a large part of the misunderstanding is attributable to the diffi-culty of reaching a common understanding. In such circumstances, how does the United States Government, which, to the regres of the Allies, still has no plenipotentiaries at the conference, propose that this dispute, which has no plenipotentiaries at the conference, should ever be closed? Further, the British and French Governments must point out that the failure to secure an agreed settlement between Italy and Jugoslavia must

leave them no choice but to acknowledge the validity of the Treaty or London. They would recall to the United States Government that th 1 Treaty of London was entered into in the Spring of 1915, at a most critica and dangerous moment of the war. In thus entering the war on the side of human freedom, Italy made a condition that the Allies should secure for her, as against Austria-Hungry, strategic frontiers which would guarantee her (?) retention by the Central Powers of the strategic command of the northern plains of Italy. Had the Austro-Hungarian Empire re-mained in existence as the ally of Germany, the provisions of the Treaty of London would have been sound. Relying upon the word of her allies. Italy endured the war to the end. She suffered a loss in killed of over 500,000 men and in wounded of three times that number, while her people are burdened by crushing debt. It was clearly impossible for her allies to declare at the end of the war.

500,000 men and in wounded of three times that number, while her people are burdened by crushing debt. It was clearly impossible for her allies to declare at the end of the war that their signature to the treaty meant noching but a scrap of paper, and that they did not intend to apply the time to renounce their bond. They arreed with President Wilson that these circumstances under which the treaty of London was concluded had been transformed by the war itself. The Anstro-Hungarian Empire had disappeared, and the menace to Italy against which the terms of the treaty were intended to provide had largely diminished. They, therefore, cutiraly associated themselves with the efforts of President Wilson to negutiate a settlement between Italy and Jugoslavia, which would be consonant with the new conditions, and which was acceptable to both sides. But throughout these proposals they never concealed from him the fact that they regarded themselves as bound by the treaty of London, in the event of a voluntary agreement not being arrived at. The fact, therefore, that when they made their proposals of Jan. 20 they informed both the Italian and the Jugoslav Governments that, in the event of their not being accepted, they would have no option but to allow the treaty of Londou to come into force, can have come as no surprise and was, indeed, the obvious method of bringing this long controversy to a close.

close. They would point out that this declaration is not, as the American Gov-ernment appear to think, an ultimatum to Jugoslavia on behalf of Italy. Under the treaty of London Italy has to abandon Finms altogether, and hand it over to Jugoslavia.

Under the treaty of London Italy has to ahandon Fimme altogether, and hand it over to Jugoslavia. This part of the treaty is as unacceptable to Italians as is the transfer of Dalmatin and the Islands to Jugoslavia. The declaration, therefore, in regard to the enforcement of the treaty was an attempt to promote a prompt settlement of this dangeroux controversy by pointing out to both sides that if they could not agree upon a settlement, which after long negotiation seemed to be a fair compromise between their conflicting views, the only alternative was an arrangement which was less palatable to both. Finally the Governments of France and Great Britain feel bound to reply to the general observations contained in the latter part of the United States' memorandum. They know well the slucerity of President Wilson's desire for the establishment of an order providing real guarantees azalast a repe-tition of the terrible events of the last five years. They are reluctant to believe that the President can consider that the modifications which they have made in the memorandum of Dec. 9 can constitute in themselves a justification for a withdrawal from all further co-operation with them in the attempt to adjust penceshy the world's affairs. They feel confident that the explanations contained in this reply will remove any misundersiandings as to the nature of the Adriatic proposals. At the same time they are deeply concerned that the United States should even contemplate the ac-tion to which they refer.

<text><text><text><text><text><text>

Governments of France and Great Britain cannot believe that it is the pur-pose of the American people to take a step so far-reaching and terrible in its effects on a ground which has the appearance of being so inadequate. D. LLOYD GEORGE MILLERAND DAVIS.

The text of President Wilson's reply to the above, his note

<text><text><text><text>

<text><text><text><text><text>

Regarding the Treaty of London, the French and British Prime Ministers will appreciate that the American Government must desitate to speak with assurance, since it is a matter in which the French and British Gov-renments can alone judge their obligations and determine their politices. But the Fresident feels that is is not improper to recall a few of the argu-ments which have already been advanced against this treaty, namely, the dissolution of Austria-Hungary, the secret character of the Treaty, and its opposition to the principles unanimously accepted as the basis for making peace.

In addition he desires to submit certain further considerations. In the Northern Italian frontier agreements have already been reached which

depart from the Treaty of London line, and which were made with the understanding that negotiations were proceeding on quite a new basis. It has been no secret that the parties to the treaty did not themselves now desire it and that they have thus far refrained from putting its provisions into effect. In mutually disregarding their secret treaty commitments the parties to the treaty have recognized the change in circumstances that has taken place in the interval between the signing of the secret treaty and its proposed execution at the present time. For nearly eight months dis-cussion of the Adriatic problem has proceeded on the assumption that a better basis for an understanding could be found than those provided by the Treaty of London. The greater part of the resulting proposals have already received Haly's assent. These proposals in some cases affected territory beyond the Treaty of London line, as in the Travis and Secton Valleys. In others the territory fell short of the Treaty of London line, as in the case of the Islands of Lussia, Unio, Lissa and Pelagosa, to montion only a few of the many proposals upon which teatative agreeoments have long been reached and which would be upset by an application of the treaty at this late day.

long been reached and which would be upset by an application of the freaty at this late day. The coupling of the Treaty of London as an obligatory alternative to the Adriatic settlement proposed on Jan. 14 came as a surprise to the American Government, because this Government had already by the agreement of Dec. 9 entered into a distinct understanding with the British and French Government regarding the basis of a settlement of the question. By their action of Jan. 14 the Government of the United States was confronted with a definitive solution, to which was added on Jan. 20 a threat to fall back upon the terms of the Treaty of London. This course was followed without any attempt to seek the views of this Government or to provide such opportunity of discussion as was easily arranged in many other matters dealt with in the same period.

dealt with in the same period. The President notes that the memorandum of Feb. 17 refers to the diffi-culty of reconciling ethnographic with other considerations in making territorial adjustments, and cites the inclusion of 3,000,000 Germans in Czechoslovakia and more than 3,000,000 Ruthenes in Poland, as examples of necessary modifications of ethnographic frontiers. He feels compelled to observe that this is a line of reasoning which the Italian representatives have advanced during the course of negotiations, but which the British and French have hitherto found themselves unable to accept. There were cases where for sufficient geographical and economic reasons slight deflections of the ethnographical frontier were sanctioned by the confer-ence, and the American Government believes that if Italy would consent to apply the same principles in Istria and Dahmatia the Adriatic question would not exist. The American Government heartily subscribes to the sentiments ex-

to apply the same principles in 1stria and Dalmatia the Adriatic question would not exist. The American Government heartily subscribes to the sentiments ex-pressed by the Governments of Great Britain and France regarding Italy's participation in the war. It fully appreciates the vital consequences of her participation and is profoundly stateful for her heroic scarffces. These sentiments have been repeatedly expressed by the American Government. But such considerations cannot be made the reason for unjust settlements which will be provocative of future wars. A course thus determined would be short-sighted and not in accord with the terrible sacrifices of the entire world, which can be justified and ennobled only by leading finally to settle-ments in keeping with the principles for which the war was fought. The President asks that the Prime Ministers of France, Great Britain and Italy will read his determination in the Adriatic matter in the light of these principles and settlements, and will realize that standing upon such a founda-tion of principle, he must of necessity maintain the position which he arrived at after months of carnest consideration. He confidently counts upon their co-operation in this effort on his part to maintain for the Allied and asso-ciated powers that direction of affairs which was initiated by the victory over Germany and the Peace Conference at Paris. POLIK, Acting.

The above note was received by the Allied Premiers Feb. 26 and the same day they replied thereto as follows:

London, Feb. 28 1920 The Prime Ministers of France and Great Britain welcome the communi-cation which they have to-day received from the President of the United States in answer to their memorandum of Feb 17. They wish to record their appreciation of the recognition given therein by Presideat Wilson to the attitude of the French and British Governments concerning the Adriatic settlement. settlement.

settlement. The French and British Prime Ministers are glad, once again, to repeat the assurance given by them in the memorandum of Jan. 22 that they "have never had the intention of making a definite settlement of the ques-tions raised without obtaining the views of the American Government." A further explanation of these views, which is supplied in the memorandum index reply, is, therefore, for the French and British Governments, a matter of very great interest and importance, all the more since it shows that the United States Government does not wish to disinterest itself from the gen-neal constituent of mere.

of very great interest and importance, all the more since it shows that the United States Government does not wish to disinterest itself from the gen-eral question of peace. The absence of any American representative has proved, in practice, an almost insurmontable obstacle to the success of negotiations and to the acceptance by the parties concerned of an equilable solution in conformity filke with the principles of the Peace Conference and of the legitimate, though conflicting, aspirations of the Italian and Jugoslav peoples. They note as a fact of the greatest importance that the President of the United States expressed his willingness to accept any settlement mutually agreeable to Italy and Jugoslavia regarding their common frontier in the Flume region provided that such an agreement is not made on the basis of compensations elsewhere at the exponse of nationals of a third power. This, the French and British Prime Ministers agree, would be the ideal way of settling the question at issue and they are willing to do their atmost to reach a settlement by this road. In order to facilitate this process they are ready to withdraw the pro-posals made both on the 9th of December and the 20th of January, for they feel that if the two parties principally concerned believe that the various allied and associated powers are committed to supporting them in any par-ticular solution its will be more difficult to secure a voncher for acroement between them. The French and British Prime Ministers, therefore, Join in a cordial invitation that President Wilson should take part with thom in a formal proposal to the Italian and Jugoslav Governments, urging them to negotate a mutual agreement on the basis of a withdrawal of all previous proposals. If, however, this attempt should prove unsuccessful, the French and

proposals. If, however, this attempt should prove unsuccessful, the French and British Prime Ministers agree that the United States, Great Britain and Brance should once more consider the question in common with a view to arriving at concrete proposals. The French and British Prime Ministers desire further to record the wording of appreciation of the interest taken by the American Government in the future of the Albanian people, and they assure President Wilson that they share to the full respect for the principle which he here enunciates. They would remind him of what they said on the subject in their memorandum of Feb. 17, and would state that they are convinced that by a review of the Albanian question a settlement can be reached which will satisfy the aspirations of the Albanian people for fm

self-government, while taking into consideration the vital interests of all other parties concerned, together with the necessity of assuring to Jugo-elavia an outlet on the Adriatic in the region of Scutari. They are willing to urge upon the Governmenta interested that they should bring their desires into line with the American point of view. The French and British Prime Ministers must further refer to the obser-vations of President Wilson on the character and applicability of the Treaty of London. With regard to this treaty they feel bound to insist that its secret character, to which he objects, was due to the exigencies of military strategy. The essence of all success in warfure is to prevent divulging to the enemy of important plaus which are of a military or political character, and the treaty, on the faith of which Italy entered the war, was not one which could be published during hostilities without detriment to the Allies' cause.

which could be published during hostilities without detriment to the Allies' cause. With regard to their statement that in the event of an amicable settle-ment not being arrived at between Italy and Jugoslavia, the Treaty of London would have to come into force. So far as they are concerned, the French and British Prime Ministers feel that they need add little to the ex-planations they have already given in the memorandum of Feb. 17. The Italian Government has co-operated most loyally and assiduously with the French and British Governments in endeavoring to substitute for the ar-rangements of the Treaty of London, a settlement which would be satis-factory allke to them and to Jugoslavia. Such an agreement would ob' ylously replace and annul the 'Treaty of London with the consent of Italy herself. That such an agreement should be reached is the cordial hope of all the Allied Governments, a hope which they know President Wilson shares to the full, but they cannot disguise the fact that should no voluntary settlement of this kind he attained, the Treaty of London to which they set their hand in 1015, would then become the only valid alternative so far as they were concerned. In conclusion the French and English Prime Ministers venture to call the attention of President Wilson to the urgent importance of a speedy settlement of the Adriatic dispute--a dispute which is move gravely threat-ening the peace and delaying the reconstruction of Southeastern Europe. **President Wilson on March 4 replied to the Allied Premiers**

President Wilson on March 4 replied to the Allied Premiers as follows:

The President desires to express his sincere and cordial interest in the response of the French and British Prime Ministers received on Feb. 27. He notes with satisfaction their unaltered desire to reach "an equitable He notes with satisfaction their unifiered desire to reach "an equitable solution, in conformity alike with the principles of the Peace Conference and of the legitimate, though conflicting, aspirations of the Italian and Jugoslav peoples." He further welcomes their expressed intention, re-garding certain essential points, "to urgs upon the Governments interested that they should bring their desires into line with the American point of enter."

riew." The President is surprised, however, that they should find in the state-ment of his own willingness to leave to the joint agreement of Italy and Jugoslavia the settlement of "their common frontiers in the Flume region" any ground for suggesting the withdrawal of the joint memorandum of Dec. 9. In this he could not possibly join. The memorandum represents deliberate and disinterested judgment after months of earnest discussion. It constituted more than a mere exchange of views; it was a statement of principles and a recapitulation of the chief points upon which agreement had been reached. There was thus afforded a summary review of these points of agreement of the French, British and American Governments, and the memorandum should remain, as it was intended to be, the basis of reference representing the combined opinion of these Governments. In referring to the "common frontier in the Finme region," the President

In referring to the "common frontier in the Flume region," the President In referring to the "counton frontier in the Flume region," the President had in mind the express desire of the two interested Governments to abandom the project of the free State of Flume, as defined in the memorandum of Dec. 9. If, as he understands, the Government of Italy and the Govern-ment of the Serb-Croat-Slovene State prefer to abandon the so-called buffer State, containing an overwhelming majority of Jugoslavs, and desire to limit the proposed free State to the corpus separatum of Flume, placing the sovereignty in the League of Nations, without either Italian or Jugo-alav control, then the Government of the United States is prepared to accept this memoral and is willing under auch circumstances, to leave the deter-

<text><text><text><text>

dom of Dec. 9. In conclusion the President desires to express his concurrence in the view of the British and French Prime Ministers that a speedy settlement of the Adriatic question is of urgent importance. But he cannot accept as ust the implied suggestion o this responsibility fo the failure to reac a solution. He ha mere 'y adhered to the provision isset ement which the Frenc j an *i* British Government recognized *i* equitab the 'ont memorandum Dec. as ha decline approve new settlemen

negotiated without the knowledge or approval of the American Govern-ment, which was unacceptable to one of the interested Governments and which, in his opinion, was in direct contradiction of the principles for the defense of which America entered the war. These views he has fully explained in his note of Feb. 10, and he ventures to express the carnest hope that the Allied Governments will not find it necessary to decide on a course which the American Government in ac-cordance with its reiterated statement will be unable to follow. POLK,

The text of the memorandum subscribed to by France, Great Britain and the United States was made public on Feb. 26 by the State Department as follows:

Department of State, Feb. 26 1920, The text of the joint memorandum signed on Dec. 9 by Premier Clemen-ceau for France. Sir Eyre Crows for England, and Undersceretary Frank L. Polk for the United States reads as follows:

Paris, Dec. 9 1919. The following memoranda were signed by Clemenceau, Crowe, and myself at the close of the meeting of the Supreme Council at Quai d'Orsay this

<text><text><text><text><text><text><text><text><text><text>

"(4.) The same wisdom and moderation as that which had marked the attitude of the Italian Government towards the Dalmatian question have characterized their attitude as regards the Islands in the Adriatic. The Italian Government appears to be at one with President Wilson in realizing the necessary racial, geographic, and political connection of the Dalmatian coastal islands with the Jugo-Slav state. On the other hand, the possession of certain outlying islands, though ethnically Jugo-Slav and economically connected with Jugo-Slavia, are considered by the Italian Government necessary to Italy's strategic control of the Adriatic and the reasonableness of this claim has been accepted. The following islands being accorded to Italy on a demilitarized status, namely: (a) The Pelagosa group, (b) Lisa and the small islands west of it. (c) Lussin and Unit. These islands are to pass in full sovereignty to Italy who, on her part, is to make an agreement with the Slav population of Lisa providing for their complete local auto-nony.

to pass in full sovereight to Taky who, one part for their complete local auto-nomy. "(5) Italy is to receive a mandate for the administration of the independ-ent state of Albania under the League of Nations. Attached to the present memorandum is an outline of the form which, in the opinion of the three representatives, such a mandate should take. The frontiers of Albania on the north and east at present will be those fixed by the London confer-ence in 1913; the southern frontier is still a matter for negotiation. In order, however, not to delay a general settlement of such negotiations. The order, however, not to delay a general settlement of such negotiations, the follow-ing provisional arrangement could be adopted. Greece shall occupy the territory west and south of a demarcation line which shall run as follows (reference one million two hundred thousand Austrian staff map): from Mount Tumba on the northern boundary of Greece northwestward along the crest of the Nemercha Ridge to the Vojusa River, thence down that river to Teleleni, Mirica to point 98, thence south, passing between the villages of Lopsi-Marciolait and Zembian, thence through points 1840 and 1225 to a point about two miles south by east 1225, thence westward passing just north of Poljana, thence southeest to point 1669, there west and north-west to point 2025, thence southwestward to the coast just south of Asprixy-ouruga. The triangle of territory from point 98 on the Vojusa River, between Haba and Sinaraj, northeastward to Lake Malik and southward to the Greek frontier and the demarcation line mentioned above should be the subject of later negotiation between the three Allied representatives on the one hand and Italy and Greece on the other, the three Allied repre-sentatives acting for Albana. "(0) The city of Valonia, together with such Hinterland as may be strictly

the subject of later negotiation between the three Anned representatives on the one hand and Italy and Greece on the other, the three Allied repre-sentatives acting for Albanis. "(6) The city of Valonia, together with such Hinterland as may be strictly necessary to its defense and economic development, is to be granted to Italy in full sovereignty. "The above six points in their general aspect are those on which, after many months' negotiation, the Italian Government have happly reached an agreement with the President of the United States. They afford to Italy in this together in their general aspect are those on which, after many months' negotiation, the italian Government have happly reached an agreement with the President of the United States. They afford to Italy full satisfaction of her historic national aspirations, based on the desire to unite the Italian race; they give her the absolute stragetic control of the Adriatic; they offer her complete guard against constitutional guarantees against whatever aggressions she might fear in the future from her Jugo-Slav neighbors, an aggression which the three representatives on their part consider as most improbable if the lines of a just and lasting settle-ment are reached. They have even carried their concern for Italian security to the point of neutralizing the Dalmatian Islands and adjacent waters from the northern border of the Raguas region to Fiume. The three representatives therefore venture very earnesity to urge on the Italian Government in the most friendly spirit that they should reflect on the great advantages which the above settlement following on that which gave to Italy the frontiers of the Alps would bring her and the great moral and material triumph with which its successful conclusions would now provide the Italian Government. "Anxious however, to give the most sympathetic consideration to every

Government in the most friendly split that they should relieve to the sizes of advantages which the above settlement following out that which gives to that prevent the following out that which gives to the tailan Government. """ Anxhous, however, to give the most sympathetic consideration to every finals interies or sentiment, the three representatives have carefully sentence to a strengt end of the following four heads: (A) Control for the following four heads: (A) Control for the following four heads: (A) Control for the city of Finne twich the?) Italian provides of listic by the successful conclusions would be discolated for the city of Finne twich the?) Italian provides of listic by the successful to the free State of Finne and made completely independent though its port and railway should be left to the free State. (G) Direct connection to taily of a long narrow strip of the tailan of Lagost. "If the successful the successful to the free State of Finne twich the?) Italian provides of listic by the successful to the free State of Finne to the following the coast. From Finne to Voloace between the railway and the sea, the Italian frontier in latta being pushed castwards on as to include the whole peninsula while. The successful to the free State of the successful to a stready concellation of Zars. The city will there for be notificately in esticity in the railonal Talian demand that this semification and the sche-Croat-Slovene customs union the city shall be formately independent under the Lesgue of Nations. The city will there for be entring? Free to decide, subject to the approval and the stready conceded the residuation of a buffer state bedies of Finne, except the state and of a costar water way its in a stready conceded the set of the creation of a buffer state bedies of Nations. The city will there for be entring? Free to decide, subject to the approval and the stready was of the sectimate of the sectimate of the sectimate of Nations how a shall be diplomatically represented abund. If, as is not subsce

but it would appear to rest on a misapprehension of the real position of Finme. The creation of the buffer state—which is to be completely inde-pendent of Jugo-Slavia—was, among other reasons, probably intended to safeguard the position of Finme; and the free state, of which Finme must, as indicated in the preceding paragraph, form an essential part, is already in direct contact with the Kingdom of Italy, not only by sea but by a long and frontiler of approximately a hundred miles. Full effect, therefore is already given to the sentimental considerations to which the Italian Gov-ernment attack so much value. In fact, the new Italian plan would not achieve this object so well, as in practice it is to be feared that it would be with the railway connecting Finme with the north, which they admit is to remain within the free state. This railway runs for a considerable dis-tance along coast; and the Italian proposal amounts, so far as this region is concerned, to cutting off from the free state and incorporating with Italy the line of sandy and barren beach intervening between the railway and the sea. Whilst the injury to the free state and incorporating with Italy the line of sandy and barren beach intervening between the railway and the sea. Whilst the injury to the free state should be so crippled. Nor darks as regards customs control, coast-guard services, and cognate matters in a territory of such musual configuration. "The plan appears to run counter to avery consideration of geography, if these considerations were overlooked by the Italian Government this was due to their having connected it in their mind with the question of anner-sus to their having connected it in their mind with the question of anner-in a territory of such musual configuration. "This question of further annexation of Jugo-Slav territory is raised quite

"The three representatives venture with all deference to express the opin-lon that in declining to agree to the incorporation of more Jugo-Slav terri-tory they are acting in the highest interest of the Italian nation itself.

"From this point of view the inclusion in Italy of purely Jugo-Slaw territories where neither security nor geographical or economical considera-tions compel annexation is not in itself a commendable policy. It would be bound to create within the Italian borders a compact body.

be bound to create within the Italian borders a compact body. "The three representatives would make an earnest appeal to the Italian Government to selze the present most favorable of opportunities for arriving at a friendly agreement with them for the immediate conclusion and per-manent guarantee of the definite settlement on lines which they venture to think fully realize all the legitimate national aspirations of Italy, and fully safeguard her pre-eminent position in the Adriatic. A settlement based on the foundations which Italy, in conjunction with her Allies, could thereby lay would have given a means of reconciling interest at present divergent and of offering Italy an opportunity for rendering more cordial and solid her relations with the new nations, who are her neighbors, and to whom she could furnish such valuable assistance and economic support as her re-sources and experience entitle her to offer.

"The spirit of moderation which was characterized in the recent attitude of the Italian Government leads the three representatives to hope that this appeal from Italy's American. British, and French Allies will not pass unbedded and that the Italian Government will, by assuring definite agree-ment with their Allies, place on firm foundations the great moral and material triumphs to which Italy's efforts and sacrifices throughout the war have so justice that the Training and the second state of the Independence of the Albanian State. They consider that the State of Albania will require, to the extent Indicated in paragraph 4 of Article 22 of the covenant of the League of Nations, "The Administrative advice and assistance' of one of the Great Powers. For this task Italy, by her geo-graphical situation and economic capacity, is primarily indicated. "The United States, British, and French Governments are andous there-fore, to entrust to Italy a mandate over the state of Albania under the con-thing implied in the covenant of the League of Nations. They consider that these conditions should form the basis of Italy's acceptance of this mandate and should be in a convention to be concluded between the Italian government and the Governments of Italy a diled and Associated powers. The headings of such a convention would be the following: "One. Albania is recognized as an independent State within the frontiers indicated in the body of the covering memorandum. "Nothing in these stimulations should be memorandum."

"One. Albana is recognized as an independent state within the frontiers indicated in the body of the covering memorandum. "Nothing in these slipulations shall, however, prevent the Albania State from negotiating with the Serb-Croat-Slovene state such region rectifications as may be in accord with local ethnographic and economic requirements

requirements. "Two. The Serb-Croat-Slovene Government shall have the right to construct and operate railways through Northern Albania north of parallel 41, degrees 15, and otherwise to only full privileges of international pur-port across Northern Albania. "Three. The right to control the development of the Boyana river shall be vested in the Council of the League of Nations with power to delegate the work to either Italy or the Serb-Croat-Slovene State under proper re-strictions. It is assumed for this purpose that Montenegro will form part of the Serb-Croat-Slovene State. "Four. A commission shall forthwith be established consisting of a

of the Serb-Croat-Slovene State. "Four. A commission shall forthwith be established consisting of a representative of the Italian Government, a representative of the League of Nations, and a representative of the Albanian State who shall be desig-nated by the Principal Allied and Associated Powers for the purpose of claborating (A) the terms of the mandate to be entrusted to Italy over Albania, and (B) the organization of the future state of Albania. This commission shall terminate its labors within five months from the signature of this convention and will address a report thereon with the necessary recommendation, to the Council of the League of Nations. The final de-cision as to the terms of the mandate and the organization shall be made by the Council of the League, acting by a majority vote. "Five. The Commission foreshadowed in the above paragraph shall base its deliberation not only on the considerations above outlined but also on the following principles:

its deliberation not only on the considerations above outlined but also on the following principles:
(A) The freedom of conscience and the free and outward exercise of all forms of worship; the complete liberty in education and linguistic matters of all the inhabitants of the State of Albania.
(B) The organization in so far as may be compatible with the tradition of the country and the exercise of efficient administration of legislative and administrative bodies representing all sections of the population.
(C) The prevention of the exploitation of the country or lise colonization in a manner liable to militate against the interests of the native inhabitants. Under this heading would be included any recommendations which the commission might make as to improvements in the existing system of land tenure. of land tenure.

of land tenure. "(D) The eventual creation of gendarmerie the senior officers of which may be Nationals of the mandatory power. The mandatory power shall have the right for a period of two years from the date of which the mandate is conferred and pending the organization of the native gendarmerie the request for armed forces in the country. After that period the State of Albania shall be permanently demilitarized and no power shall be allowed to maintain regular forces in the country without the sanction of the Council of the League of Nations."

The following, according to the State Department, is a paraphrase of the text of the British-French revised proposals, as accepted by Premier Nitti and handed to the Jugoslav delegation by Premier Clemenceau on Jan. 14.

Jugoslav delegation by Premier Clemenceau on Jan. 14. The Adriatic Question—Revised proposals handed to the Jugo-Slav delegates by M. Olemenceau on the afternoon of Jan. 14 1920. I. There shall be an independent State, under the guarantee of the Lengue of Nations, consisting of the Corpus Separatum of Finme. The right of this independent State to choose its own diplomatic represen-tation shall be accorded. The Serb-Croat-Slovene State shall be given the Town of Susak, it being understood that the railways terminating there, together with all facilities for their development and the whole port as well, are to be handed over and to belong to the Lengue of Na-tions, which will take into consideration the interests of the Serb-Croat-Slovene State, Hungary, Transylvania, as well as the city itself, and will

tions, which will take into consideration the interests of the Serb-Croat-Slovene State, Hungary, Transylvania, as well as the city itself, and will make arragements accordingly.
2. The free State (of the previous proposals) shall disappear and the boundary shall be so drawn between Italy and the Serb-Croat-Slovene State as to meet the following requirements:

(a) To provide along the coast a connection by road within Italian territory. This, however, shall be done in such a manner as to leave within the Serb-Croat-Slovene State the whole of the rallway from Flume northward through Adelsberg. Where the rallway from Flume follows the coast, the boundary line shall be between the rallwad and the corridor joining Flume with Italy.
(b) A readjustment of the Wilson line in the region of Senosecchia in order to provide for the protection of Trieste.

to provide for the protection of Trieste. (c) The boundary line to be further drawn as marked by the blue line on the map attached. This will leave in the Serb-Croat-Slovene State purely Jugo-Slav districts.

3. There shall be an independent State, under the guarantee of the League of Nations, consisting of Zara, within the limits of the municipality. The right of this independent State to choose its own diplomatic representa-

The right of this independent State to choose its own diplomatic representa-tion shall be accorded. 4. Valona shall be retained by Italy, as provided for in the Treaty of London, and, in addition, the mandate over Albania shall be given to Italy. In Northern Albania the boundaries shall be readjusted as shown on the attached map. Those districts of Albania which will thus go to the Serb-Croat-Slovene State will enjoy a special regime as an autonomous province similar to that which the treaty with the Czecho-Slovak Republic provides for its autonomous provinces. The southern boundary of Albania shall be the line which was proposed by the British and French delegations on the Commission of Greek Affairs. This leaves Greece Koritza and Argyro-kastron. kastron.

5. There shall be assigned to Italy the following island groups: Lussin, Lissa and Pelagosa. There shall be placed under the sovereignty of the Serb-Croat-Slovene State the remainder of the islands.

All Adriatic islands shall be do-militarized.
 All Adriatic islands shall be do-militarized.
 There shall be special provisions permitting Italians in Daimatia to choose, without leaving the territory, Italian nationality.
 Economic enterprises now existing in Daimatia shall, by an international convention, have their security safeguarded.

Great Britain in agreeing to the Dec. 9 settlement of the Adriatic question acceded to a request made by Italy that the other signatories consent to withhold publication of the note so as to give Italy an opportunity to reply and that the settlement be not regarded as final. This was disclosed in a tolegram sent by Lord Curzon, British Secretary of State for Foreign Affairs, to Sir Eyre Crowe, British representative on the Supreme Council.

A copy of the telegram, which was communicated to the American Government March 3 for the first time, was made public the following day by the State Department. The conditions for signature, Lord Curzon said, were requested by Signor Seialoia, Italian Foreign Minister, with whom Lord Curzon held a long conversation Dec. 8.

When informed of the terms of the French-British-American proposal Signor Scialoia raised two main objections, which Lord Curzon said in the telegram were:

That it was a mere reiteration of the Wilsonian position and made no concession to the Italian point of view about Fiume, and that while safe-guarding the strategical position of Italy north of the Adriatic, yet by leav-ing both Sebenice and Cattaro in the hands of the Jugo-Slav State it exposed to attack the entire central and southern Adriatic flank of Italy. Italy claimed neither of these ports for herself, but did claim that both, or at least Sebenice, be demilitarized.

THE TEXT OF THE LONDON TREATY CONCERNING THE ADRIATIC.

The text of the so-called Pact of London between Great Britain, Russia, France and Italy (referred to above) whereby Italy received assurances as to the disposal of Adriatic areas was published in the N. Y. "Times" of Feb. 22. This is the agreement presented to the Jugoslavs as an alter-native in case they rejected the Allies' proposal. The version printed in the "Times" was that translated by "New Europe" from the Russian version of the French original, found in the Russian archives and made public by the Bolsheviki when they took control of affairs in Russia. The text of the treaty follows:

The Italian Ambassador in London, Marchese Imperiali, on instructions from his Government, has the honor to communicate to the Secretary of State for Foreign Affairs, Sir Edward Grey; to the French Ambassador, M Cambon, and to the Russian Ambassador, Count Benckendorff, the following memorandum:

from his Government, has the honor to communicate to the Secretary of State for Foreign Affairs, Sir Edward Grey; to the French Ambassador, M Cambon, and to the Russian Ambassador, Count Beuckendorff, the Income and the Russian Ambassador, Count Beuckendorff, the solution in great novers of France, Great Britain, Russia and Italy shall, "induit delay, draw up a military convention by which are to be determined the minimum of military forces which Russia will be bound to place against listy. This military convention will also regulate the problems relating to a possible armistice, in so far as thesic do not by their very nature fall the disposal in agreement with France, Great Britain, and Russia, and against the States which are at war with them.
II. The naval forces of France and Great Britain and Russia, and signist co-operation until such time as the Austrian fleet shall be destroyed, or till the conclusion of peace. France, Great Britain and Russia, and so the local conclusion of peace. France, Great Britain and Russia, and so the local conclusion of peace. France, Great Britain and Russia, and so the local conclusion of peace and shall shall receive the Trentino, the Bronner, the Clin y Treiste and Its surroundings, the County of Gorias and Gradisca, the whole of Istria as far as the Quarnero, including Volosca and the Istrian Islands. Cherse and Lussin, as also the lesser islands of plavnik, Unia, Cathidi, Palazuola, 8 Pietro Nervito, Admito and the Strike Unia, Cathidi, Palazuola, S Pietro Nervito, Atanich and Trans at the Sources of the Rivers Adige and Elsach, then across the Mounts of Raven Andre Bronner, the Rivers Adige and Elsach, then across the Mounts of Raven Andre Bronner, Mattella and Hall and and the strike Hole of Steve Adige and Televent of the Steve Rove Adige and Elsach, then across the Mounts of Raven Andre Breener and Briter Adige and Elsach, then across the Mounts of Raven Andre Breener and Breener adige and Elsach, then across the Mount of Raven Andre Breener and Bre

The following shall be neutralized; (1) The whole cost from Cape Planka on the north to the southern point of the Peninsula of Sabbioncello on the

from the frontier of the Italian tereitory of Valona to Cape Stilos, is to be neutralized. To Italy will be conceded the right of conducting the foreign relations of Albania; in any case Italy will be bound to secure for Albania a territory sufficiently extensive to enable its frontiers to join those of Greece and Se-bia to the task of the Lake of Ohrida. VIII. Italy shall obtain full possession of all the Islands of the Dodecan-ness at present occupied by her. IX. France, Greek Britain and Russia recognize as an axiom the fact that Italy is interested in maintaining the political balance of power in the Miditerranean, and her right to take over, when Turkey is broken up, a portion equal to theirs in the Mediterranean—namely, in that part which borders on the Province of Adalia, where Italy had already acquired special rights and interests had down in the Italo-British convention. The zone to be assigned to Italy will, in due course, be fixed in accordance with the vital interests of France and Great Britian. In the same way regard must be had for the interests of Laky, even in the dividity of Asiatic Turkey, and merely proceeding to map out spheres of interest among the assieves. In the event of France, Great Britain and Russia occupying during the present was districts of Asiatic Turkey, the whole distric, bordering on Adalia and defined above in greater detail, shall be reserved to Italy, who reserves the right to occupy it.

defined above in greater detail, shall be reserved to Italy, who reserves the right to occupy it. X. In Libya Italy obtains recognization of all those rights and prerogatives hitherto reserved to the Sultan by the Treaty of Lausanne. X.I. Italy shall receive a military contribution corresponding to her strength and sacrifices. X.II. Italy associates herself with the declaration made by France, Great Britain and Russia, by which the Mohammedan holy places are to be left in the possession of an independent Mohammedan State. X.III. In the event of an extension of the French and British colonial possessions in Africa at the expense of Germany, France and Great Britain compensations in the form of an extension of her possessions in Eritrea, Somaliand, Libya, and the colonial districts bordering on French and British colonies.

compensations in the form of an extension of her possessions in Erlitred, Somaliland, Libys, and the colonial districts bordering on French and British colonics. XIV. Great Britain undertakes to facilitate for Italy without delay and on favorable conditions the conclusion of a loan in the London market, amounting to not less than 550,000,000. XV. France, Great Britain and Russia undertake to support Italy in so far as ahe does not permit the representatives of the Holy See to take dip lomatic action with regard to the conclusion of peace and the regulation of quastians connected which the war. XVI. The present treaty is to be kept secret. As regards Italy's adher-ence to the declaration of Sept. 5 1914 this shall only be published after the declaration of war by and upon Italy. The representatives of France, Great Britain and Russia, having taken cognizance of this memorandum, and being furnished with powers for this purpose, agreed as follows with the representative of Italy, who was also authorized by his Government for this purpose: France, Great Britain and Russia declare their full agreement with the present memorandum presented to them by the Italian Government. With regard to Points 1., II, and III. (relating to the co-ordination of the military and naval operations of all four powers), Italy declares that she will enter the war actively as soon as possible, and in any case not jater than one month after the signature of the present document on behalf of the contracting pariles. (Stered in four conies, Arril 26, 1915.) partles. (Signed in four copies, April 26 1915.)

EDWARD GREY, JULES CAMBON, IMPERIALI, BENCKENDORFF.

SUITS BECAUSE OF THE ERRONEOUS REPORTS REGARDING TAXABILITY OF STOCK DIVIDENDS.

Erroneous reports through the Wall Street ticker service that the United States Supreme Court in its decision of March 8 had decided that stock dividends were taxable, has resulted in the institution of proceedings by Gaston Jaillet, a customer of Josephthal & Co., this city to recover \$2,218 75 alleged to have been lost through the erroneous information. The faction, which is a test case, has been brought against Joseph Cashman, Treasurer of Dow, Jones & Co., through

Mr. Jaillet's attorney, Martin C. Ansorge. The complaint recites that the Dow, Jones ticker service sent out at 12:09 p. m. on March S a bulletin from Washington that the Supreme Court had ruled that stock dividends are income, and therefore taxable, and had sent out a second statement in correction at 12:54 p.m. It is charged that the publica-tion of the erroneous report was due to the "negligence, carelessness and recklessness of the defendants, its servants, agents and employees, and that for a long time afterward Dow, Jones & Co. "negligently, carelessly and recklessly failed to correct said false report with the knowledge that in the meantime persons throughout the country, and particularly customers of brokerage houses, were relying upon and acting upon the alleged information contained in the report.' The complaint also says:

The complaint also says. The market prices of stocks, bonds and securities were violently pre-cipitated downward as the result of said faise report. The plaintiff was present at said brokerage offices at the time of the publication of said report and, helleving the representations contained therein to be true, sold stocks which he owned at the lower prices which resulted from the faise report and sold other stocks short at said lower prices, which stocks subse-quently violently reacted and rapidly advanced upward before defendant corrected its report and before plaintiff knew of the falsity thereof and was able to as thereon. able to act thereou.

The New York News Bureau, as well as Dow, Jones & Co., sent out erroneous reports of the Supreme Court's decision, these reports causing heavy selling on the Exchange of stock on the general list, the market, however, quickly recovering with the later correction of the false reports. On the 8th inst. Dow, Jones & Co., in a statement regarding the first and incorrect reports of the decision, said:

the first and incorrect reports of the decision, suid: "Flash" bulletins from Washington, which are sent from the Capitol-in which the Supreme Court sits, concerning the stock dividend tax de-cision were locorrect and directly contrary to the actual decision of the Supreme Court. Not only were the "flashes" to financial agencies wrong but those sent out by news services were also incorrect. Because of the apparent corroboration these dispatches give the other reports, the in-correctness of the news was difficult to check. It was only when the statement that the lower court was upheid, which appares several hundred lines down in Justice Pitney's decision, came over the wires that it was realized that the first "flash" was wrong and corrections were immediately sent out by all services. nt out by all services.

Mr. Cashman, of Dow, Jones & Co., in stating on the 8th inst. that his company made the correction on the ticker within about ten minutes of the time when the erroneous report sent out, said:

We get our service through our own branch in Washington. As soon as we got the correction we put it on the ticker, I think is was about ten or ten and a half minutes after the first report went out. Some of the other services were very late in getting the correction on the ticker.

William H. Hurst, Treasurer of the New York News Bureau, which also sent out the erroneous intelligence, was reported by the New York "Times" of the 9th inst. to have said:

Shift: I understand that the mistake was due to a misunderstanding of the meaning of the decision by our representative and other news representa-tives, who sat in the Court room and heard the decision read. It is surprising that mistakes of this kind do not happen more often, hecause of the manner in which the Supreme Court decisions are rendered. No copies are furnished. They are read in the Court room generally in a low or mumbling tone. It is necessary to strain your ears to catch the words, and under the circumstances mistakes in interpreting the meaning are not aventisms.

words, and under the circumstances instants in interpreting interpreting meta-are not surprising. Of course, since this occurs in the Supreme Court of the United States, there is no one to complain to and no way to bring about an improvement, as far as I know. I have heard that a committee of sinck-brokers is going to investigate the occurrence. I wish they would. Such an investigation might result in a better method of getting the Supreme Court decisions before the public.

The Associated Press issued a statement on the 8th inst.

Saying: The service of the Associated Press was accurate in every particular. We find it necessary to make this statement because the Dow-Jones Ticker Co. after correcting its own erroneous statement declared: "Not only were the flashes' to financial agencies wrong, but these sent out by news-paper services also were incorrect." As this statement contained the infimition that the Associated Press, in common with other news associations, had made the same error that was made by the Dow-Jones Ticker Service, the Associated Press asked the Dow-Jones Co. to make a correction. The Dow-Jones Co. specifically refused to do so, and therefore the Associated Press takes this means of presenting the facts.

An explanation from Washington, March 8, concerning the erroneous report, was published as follows by the New York "Times" of the 9th inst.:

York "Times" of the 9th inst.: According to the local representative of the Dow, Jones & Co. agency, 40 minutes elapsed between the time when he sens out the first erroneous report and the time when he was able to correct it. This was when further reading of the oplinon showed that he had reached a wrong impression from the early paragraphs of the decision. "I think that it was fully 40 minutes before I was able to finally make a correction to my earlier report," said Henry Eland, who represents the Dow, Jones & Co. agency. The United Press, which furnishes news service for one of the ticker com-panies, also sent out an erroneous flash on the stock dividend decision. Hugh Bailie, Washington manager for the United Press, said: "The correction followed within two minutes after the first flash. I do not think that the erroneous information carried in the first flash. I do not hink that the was probably carried by one of the ticker companies." Mr. Bailife sold he did not know what ticker agency took the United Press service. Press service.

The act that the request had been made by President Barron, of Dow, Jones & Co., that a committee be appointed by the New York Stock Exchange to investigate the origin of the false reports, was made known in a statement which appeared in the Dow-Jones daily, "The Wall Street Journal," on March 11. A rep y that such an investigation was "out of our province as a Stock Exchange organization," came from the Exchange, according to Mr. Barron's statement, which we publish herewith:

which we publish herewith: It is not within the memory of the oldest employee that the Dow, Jones & Co. organization ever made an error in transmitting a Supreme Court decision before this week. It has at times stood alone and been found correct when everybody alse was wrong. The Washington reporter of the organization who sat in the room of the Supreme Court, Monday afternoon, had grown up with the service and for several years had so admirably reported the Supreme Court decisions as to hold an enviable reputation for accuracy as well as speed. It has always been the fear within the Dow-Jones organization that sometime there might be a slip in reporting a Supreme Court decision by misinterpretation of the decision, by a hasty conclusion or by the sacrifice of accuracy to speed. But nothing of this kind occurred Monday. It was something against which no human provision could have been made. The rule of procedure always is that if the decision is not clear, the exact language of the court and no other must be transmitted. But, of course, the "yes" or "no" of the decision, when clearly defined, must be flashed without the delay of a second.

language of the court and no other must be transmitted, must be flashed the "yes" or "no" of the decision, when clearly defined, must be flashed without the delay of a second. The storms have played havoc of late with the wires. The usual tele-graph wire between the capitol and the Dow, Jones & Co's Washington office was put out by the storm and as luck should have if the Boston wire was interrupted between 12 and 1 by an accident at the New York end. Otherwise a correction of the Washington decision could have been had in New York earlier, as the Associated Press when appealed to before 12.30 had in the public interest given the Boston office the correct flash. The reporter for Dow, Jones & Co. made bis telephone connections and messenger arrangements and carefully prepared his copy so that it could be sent by inserting or leaving out the word "not" in the line "stock divi-dends are not taxable as income Supreme Court decides." The first impression that the reporter and many others received was that the lower court had been reversed and therefore stock dividends were taxable and the word "not" was stricken out. Then the message was held for confirmation and in a few minutes it became positive that the lower court's decision bad been affirmed. By some mental aberration, which nobody on earth can explain, the re-porter was confident, as he handed the bulletin to the messenger, that he had put back the word "not." He sat in the court room for more than 15 minutes with no suspicion but that he had delivered the first flash and delivered it correctly.

He sat in the court room for more than 15 minutes with no suspicion but that he had delivered the first flash and delivered it correctly. Later than the Dow-Jones announcement other news organizations flashed what it is fair to assume was their first incorrect interpretation of

flashed what it is fair to assume was their first incorrect interpretation of the court decision. When the brokers' Washington wires in about 15 minutes began to doubt the correctness of all the previous Wall Street reports, the Washington office was asked to confirm. It was a few minutes before the reporter could be reached. Of course the correction came promptly back and the reporter was nearly crushed when he learned of the lapse he had committed. This explanation would have been given yesterday except for the desire of Dow, Jones & Co. to have an official investigation. To the letter herewith annexed the President of the Stock Exchange per-sonally replied that such investigation was "out of our province as a Stock Exchange organization." March 9 1920.

March 9 1920.

To the President of the New York Slock Exchange. Dear Sir — If in consonance with New York Stock Exchange policy, would you be willing to name immediately a committee to investigate the origin of the erroneous reports that were circulated in Wall Street between 12 and 1 o clock Monday in respect to the Supreme Court decision regarding Federal taxes upon stock dividends?

Very truly yours, DOW, JONES & CO., By C. W. BARRON, President.

In its issue of the 10th inst., n referring to the attitude of the Association of Stock Exchange Firms toward the errone-ous report, the New York "Times" quoted an official of that organization as saying:

The Executive Committee of the Association can see no justification in the circumstances for any official action. There is nothing to indicate that there has been anything but an unfortunate error. If there was even a suspicion of sirregular practices the Association would be the very first to take up the matter in earnest.

According to Mr. Ansorge, attorney for Mr. Jaillet, advices have been received by him from several other attorneys stating that they had clients who desired to participate in the test case. One of these clients, Mr. Ansorge said, is a resident of Washington, who because of the erroneous reports, suffered a loss of \$30,000.

OTTO H. KAHN ON TWO YEARS OF FAULTY TAXATION—RECOMMENDATION FOR TAX ON SALES.

In a pamphlet prepared by Otto H. Kahn, on "Two Years of Faulty Taxation and the Results," made public on Feb. 29, Mr. Kahn states that "several factors are responsible for the economic dislocation and resulting ills (including high prices) which confront us," and among these factors he says "none has been more potent for harm than our Federal taxation." Mr. Kahn continues:

The free flow of capital, the normal working of the investment market are absolutely basic elements for every kind of trade and industry. The effects of their disturbance to any serious degree for any length of time are all-pervading.

We cannot have a return to a state approaching normal conditions of trade, prices, &c., until our investment market will have come within measurable distance, at least, of normal conditions. And that is impossible as long as our present income tax remains in force, even if the other elements which have operated to bring about the present abnormal situation were removed.

It is an old axiom of taxation that an excessive tax destroys its own

productivity.

productivity. Wrong economies, however well-intentioned, have been more fruitful of harm to the people than almost any other single act of government. No doubt the provailing apportionment of monetary reward is not free from defects (though less so in this country than anywhere else), but there has been a steady and pronounced tendency and movement, especially within this generation, toward mending such defects and remodelling in-equitable conditions. Evolution and the irrestible powers which make for progress, enlightenment and justice may be depended upon to continue and advance that process. There can be no turning back. But improvident measures of economic violence will not hasten that process; on the contrary, they will impede it. they will impede it.

Mr. Kahn states that "A small committee of wellinformed men of different callings, approaching their task free from political, social and sectional bias, would not find it a formidable undertaking to evolve a measure which, while fully responsive to the dictates of equity and social iustice, would produce no less revenue than the taxation now in force, and yet would be far less burdensome upon the country, less hampering to enterprise, and less productive of economic disturbance." Continuing, he said:

It might recommend a radical revision of income taxation on the theory that the emphasis of taxation be laid rather on expanditures than on in-comes and that a sharply marked distinction be made between such portion of a person's horme as is used constructively in savings, investments, or enterprises and such portion as is spent on his scale of living. A tax based on that theory would no doubt exempt expenditures of a certain minimum sum per annum, say. 2,50.) for single and 4,000 for married persons, would be applied moderately to moderate expenditures, and would be severely pro-gressive on large expositives. Much can be said for such a tax from both the economic and moral points of view. Among other desirable effects, it would reach those who, by

Much can be said for such a tax from both the economic and moral points of view. Among other desirable effects, it would reach those who, by holding tax-exempt securities, escape the burden of income taxation, and it would thus go a long way to eliminate the undue advantage now attaching to tax-exempt securities and to correct the resulting evils which I have pointed out before in discussing that phase of our tax problem. While a tax of this nature involves certain complexities in its details and working, they would by no means be insuperable; in fact, they would, I think, be less formidable than those of the present income tax. The committee might, I should think, reach the conclusion to recommend the imposition of a small percentage tax, say 1%, on all sale of commodi-ties and products and presumably of real estate. Such a measure would be productive of an immense amount of revenue and would not be harmful to any one.

the and products and presumably of real estate. Such a measure would be productive of an immense amount of revenue and would not be harmful to any one.
The exact form which such a tax should take is debatable. It might be imposed on the seller according to the aggregate sales effected, the tax to be computed quarterly, semi-annually or annually. Or, it might, on every transaction, be paid by the purchaser, in which case it should not be included in the selling price, but specifically added to it as a separate item, probably best in the shape of stamps. Or, it might be made applicable to retail sales only.
In the latter case it might be found well to exempt from the tax single purchaser, it might possibly be deemed appropriate to make the tax varying in its scale, say from 1% to 10%, or even 20%, progressing according to the value of the article purchased, so that, for instance, a person making a \$5,000 purchase would pay 1% tax, i. e., five cents, while a person making a \$5,000 purchase would pay 10% tax, i. e., \$500, and so on.
While the progressive scale suggested.
Multi the guarding of the turnover, computed quarterly or semi-annually, or sales of commodities and products way, naturally, would be to impose a decisive against the adoption of that suggestion.
The simplest and most remunerative way, naturally, would be to impose a tax is one tax is finally passed on to the consumer. No doub it is, so is the built of the scale scale that are single products all along the line, from these is nearbore. A present, apart from various minor taxes, corporate business pays 10% it is such at as is finally passed on to the consumer. No doub it is, so is the built of the scales profit tax. So, in the end, is practically overy business fax and, to a great extent, even individual taxes. At present, apart from various minor taxes, corporate business pays 10% in federal income taxes alone.
A triling sales tax on the huge volume of commodities changing hands amuall

be abolished altogether.

A similar recommendation by Mr. Kahn was referred to in our issue of Jan. 24, page 318.

F. J. LISMAN SUGGESTS TAX ON PERSONAL EXPENDITURES.

An article headed "Confiscating Capital and Incentive by Taxation," prepared by F. J. Lisman, appeared in the Feb. 11 issue of "Commerce and Finance." Mr. Lisman avers that "it is unquestionably a conservative statement that one-half of all surplus earnings of our large corporations and the bulk of the smaller ones go into improvements, being used to create additional facilities for production and employment. The profit tax is a strictly socialistic measure because it confiscates new capital while it is being created." He also says, among other things:

<text><text><text><text><text><text><text><text>

R. S. HAWES DECLARES EXCESS PROFITS TAX AS FACTOR IN LIVING COST.

Attacking the excess profits tax as a contributing factor to the high cost of living, Richard S. Hawes, of St. Louis, President of the American Bankers' Association, in a speech at the LaSalle Hotel, Chicago, on March 10, declared that most of the War Revenue Law needed revision for the purpose of bringing it back to sound principles which would aid in rectifying the present banking situation. Mr. Hawes remarks on the subject were given at a luncheon of the Chicago Association of Commerce on the question of presentday finances and the American Bankers' Association. Taxes that can be passed on from one person to another with a profit, or are repressive or confiscatory, are a detriment to our economic existence, according to Mr. Hawes, who pointed out that it was only fair to suppose that, beginning with the producer, to the jobber, to the manufacturer, and then into the retail dealer's hands, each one in turn added thereon his excess profits tax to the price, and by the time it arrives to the consumer five or six excess profits taxes have been added thereon. Mr. Hawes added:

added thereon. Mr. Hawes added: The excess profit tax has outlived its usefulness and now stands as a detriment to same industrial development in the reconstructive period. Although the excess profit tax is in the form of a direct tax on profits, it is in effect a most unsatisfactory commodity tax. The manufacturer or merchant subject to the tax is required to estimate in advance the amount is compelled to add to the soling price of the commodity and in turn to pass this on to the ultimatic consumer in order to protect himself against the heavy imposition. Consequently, a business concern is naturally more tain to over estimate than under estimate its liabilities. Thus the uncer-tainty of the tax has made it an obnavious burden to both the one taxed and the ultimate consumer. In the matter of primary production, it is just and fair to expect a man who owns timber in a forest, or ore in a mine, to cut that timber and give the Government a large percentage of what is in fact his reserve capital? The law indirectly tends to deter both expan-sion and production because it penalizes credit. A corporation with sood are distingt to exception being made for the borrowed capital.

INCREASE IN TAX ON STOCK TRANSFERS PROPOSED IN BILL IN NEW YORK LEGISLATURE.

An addition tax of two cents on each \$100 face value of stocks, raising the tax to four cents on all transfers issued, is suggested by a bill introduced this week in the New York State Legislature by Assemblyman Franklin Judson, Chairman of the Assembly Committee on Taxation. The measure, it is stated, is designed to add to the State's revenues

about \$7,000,000, making \$14,000,000 derived from this source of taxation.

BILL AMENDING NEW YORK STATE INCOME TAX LAW AS TO NON-RESIDENTS RECALLED FOR FURTHER AMENDMENT.

On March 16 the New York Senate adopted a resolution offered by Senator Davenport, Chairman of the Joint Legislative Taxation Committee, recalling from Governor Smith the bill passed by the Legislature last week amending the State is come tax law relative to exemptions of non-It is pointed out that the bill as it went to the residents. Governor allowed only partial exemption based on the proportion of income earned within the State to total income from all sources, and it was withdrawn in order to change its provisions so as to grant to non-residents the full exemptions granted to residents.

ITEMS ABOUT BANKS, TRUST COMPANIES, &c. No sales of bank or trust company stocks were made this week at the Stock Exchange or at auction.

Plans for the proposed merger of two of the city's important banking institutions, namely the Chemical National Bank and the Citizens National Bank, were made known in the following announcement issued on Thursday of this week:

The directors of the Chemical National Bank and of the Citizens National The directors of the Chemical National Bank and of the Citizens National Bank have unknowly agreed on a plan to merge the institutions. The consolidated institutions will be operated under the name of the Chemical National Bank and it will be located at the Chemical Bank's long established quarters, 270 Broadway. The consolidated institution will have a capital of \$4,500,000, a surplus of \$13,500,000 and undivided profits approximating \$1,000,000. It will have gross deposits of about \$140,000,000, and total resources of \$200,-000,000.

000.000. Its principal officers will be Herbert K. Twitchell, Chairman of the board. Percy H. Johnston, President: Edwin S. Schenck, First Vice-President. Mr. Gerard Comby retired from active duties as Vice-President of the Citi-zens National Bank on Jan. 1st, last. All other officers of the respective institutions will hold similar positions to those now held by them with the consolidated bank. The directors of the Chemical Bank met Wednesday and recommended to the shareholders the ratification of the plan. Similar action was taken by the Citizens National Bank directors at their meeting Thursday morning. Consummation of the plan will be carried through upon receipt of the approval of the Comptroller of the Currency and after the shareholders of the respective multituicus have formally voted on the question. More than the requisite number of the saarcholders of each institution have expressed their approval, and the merger will become effective about May 1st.

The Chemical National Bank was founded in 1824 and the Citizens in 1851, and both institutions have been successful in every way. The Chemical National has a capital of \$3,000,000 and

in statement issued under date of the Comptroller's call of Feb. 28, it is reported surplus and profits of \$10,004,251 and deposits of \$81,625,946. The Citizens National which also has a capital of \$3,000,000, on the same date gave its surplus fund as \$3,000,000, undivided profits as \$784,881 and deposits as \$46,449,375.

At a meeting of the Board of Directors of the Mercantile Bank of the Americas, Arthur Jones was appointed Assistant Manager.

A book containing the Federal Reserve Act, revised to include all amendments to Dec. 24 1919, has been issued by the National Bank of Commerce in New York. The volume is prepared for reference purposes, being fully indexed and provided with marginal annotations. Several of the amendments are particularly significant in connection with recent international developments affecting American banking, such as the Edge Act and sections relating to the investment by national banks in foreign banking and financing corporations organized under Federal or State laws.

"The end of an epoch is rapidly approaching in conti-nental affairs," says the Guaranty Trust Company of this eity in the latest issue of its fortnightly review, "American Goods and Foreign Markets," adding: "In spite of surface conditions, it is now becoming possible to think more definitely of Europe as a whole rather than as several groups of sharply conflicting interests. This might be called a period of forced co-operation. Even the Allied countries are seeing more clearly the necessity of a solvent Germany as part of their own economic machine, likewise the need of closer union of action with countries that remained neutral during the war." "The continental system," it adds, "will be controlled and unified by the very community of interest bred from past community of disaster. It will remain, of course, for many years a debtor to both Great Britain and the United States. And herein lies a very important world fact. Great Britain, as debtor to the United States and creditor of Continental Europe, will be the essential link between the American and the European systems. In other words, she will be the financial moderator of a distinctly new order."

Group insurance has been provided for the employees of the Colonial Bank of this city applicable to all employees of the bank on the payroll on Feb. 17. Employees entering in the service of the bank after that date will be permitted to avail of the insurance plan after three months' service. The amount of insurance to which each employee will be entitled is to be determined by his salary, the minimum amount of insurance being \$500 and the maximum \$3,000. The policy, which covers death, as well as permanent disability when the latter occurs before the age of sixty, requires no medical examination. The employees of the bank are under the insurance plan, entitled to a visiting nursing service without expense.

At the regular meeting of the trustees of the Equitable Trust Co. of this city James L. De Rosset and General Wm. A. Mann were appointed assistant secretaries and Arthur M. De Bebian, advertising manager.

General Stephen M. Weld, until 1916 head of the cotton firm of Stephen M. Weld & Co., and of Weld & Neville, a director of the Old Colony Trust Co. of Boston and the Bay State Trust Co. of that city, died suddenly on March 16 at Boca Grande, Fla., in his seventy-ninth year. General Weld earned his title of General during the Civil War, having been brevetted Brigadier-General for meritorious service. General Weld was a native of Massachusetts.

"Descent and Distribution of Decedents' Estates" is the title of a new booklet which the Columbia Trust Company, of this city, has ready for distribution. This booklet goes into a full explanation of how the laws of the State of New York affect the passing of property after death and includes a synopsis of New York Transfer Tax and Federal Estate Tax Laws.

Richard W. Saunders has resigned as Cashier of the National Bank of Commerce in New York. The Bank announces that Roy H. Passmore, Assistant Cashier, has been appointed by the Finance Committee of the Board of directors to be Cashier. Mr. Passmore was formerly Cashier of the National Bank of Chambersburg, Pennsylvania. He came to the National Bank of Commerce in New York as an Assistant Cashier in July 1918.

At a meeting of the trustees of the Central Union Trust Co. of this city on March 16, George J. Corbett was elected a Vice-President of the institution.

The Passaic National Bank of Passaic, N. J., has increased its capital from \$200,000 to \$500,000. The stockholders ratified the plans on Feb. 16, and the new capital of half a million dollars became available Mar. 9. The additional stock was disposed of to the shareholders at par, namely \$100 per share.

At a meeting on March 9 the stockholders of the Exchange Trust Co. of Boston, Mass., ratified the proposal to issue 4,000 additional shares thus increasing the capital from \$600,000 to \$1,000,000. As indicated in these columns March 6 the new stock is to be sold at \$200 per \$100 share, the premium of \$400,000 being added to the surplus, making the latter \$1,000,000. The increased capital will become effective April 3 1920.

The First National Bank of White Plains, N. Y., has been placed in voluntary liquidation, following the consolidation of its business with the County Trust Company of White Plains. Reference to the consolidation appeared in our issue of Feb. 7.

A merger is planned between two Rochester banks, namely the the Union Trust and the Citizens' Bank. The Citizens' Bank has a capital of \$250,000 and the Union Trust Co. (after a proposed increase of \$250,000 has become effective) will have a capital of \$1,250,000, the additional \$250,000 being distributed share for share for the \$250,000 of capital stock of the Citizens Bank. In the event that the merger

is approved, it is proposed to continue the office of the Citizens Bank as a branch of the Union Trust Co., James L. Hotchkiss, President of the Citizens Bank will become a Vice-President of the Union Trust Co., John C. Frankland, cashier of the Citizens' Bank will have charge of the Citizens branch and will be a Vice-President of the Union Trust. and George G. Ford will also be a Vice-President in the latter. The President of the consolidated bank will be Frederick W. Zoller, new President of the Union Trust Co. The other officers of the company who will continue in their present respective posts are Martin E. Wollf, Allan B. Fraser, and Edward P. Vollerstein, Vice-Presidents; Blake S. Raplee, Vice-President and Secretary, and Delos M. Rose, M. G. Palmateer and Carl R. Snider, Assistant Secretaries. Action looking to the ratification of the merger plans and the inincrease in the capital of the Union Trust Co. will be taken by the stockholders of the latter on April 10.

Charles E. Spencer, Jr., a Deputy Governor of the Federal Reserve Bank of Boston, has been elected a Vice-President of the First National Bank of Boston. Mr. Spencer, previous to becoming associated with the Federal Reserve Bank, had been with the Colonial Trust Co. of Waterbury, Conn.; he had previously been with the National Bank of Commerce in New York, the National Bank of Commerce, Kansas City, and the Trust Company of America, before the merger of the latter with the Equitable Trust Co. in New York.

The new West Springfield Trust Co. of West Springfield, Mass., of which Clarence A. Boyce was recently elected Treasurer, is to begin business about April 20. It has been unanimously voted that each of the 20 directors is to bring in a quota of 10 deposits, making 200 deposits (\$250,000) pledged, at the opening of the bank. Reference to the election of Mr. Boyce was made in our columns Feb. 28. The company is to have a capital of \$100,000, in shares of \$100; the stock is to be disposed of at 125 per share. H. A. Moses is President; W. B. Chandler, W. H. Pierce and F. H. Sibley, Vice-Presidents.

The Chelten Trust Co. of Philadelphia, Pa., has taken action toward increasing its capital from \$200,000 to \$400,-000 by the issuance of 2,000 additional shares of the par value of \$100 each. The stock, which is to be disposed of to the stockholders at \$125 per share, may be paid for in full on or before May 1 1920, or in five equal instalments of 20%each, the first payable on or before May 1 1920, and the remaining instalments at 3, 6, 9 and 12 months thereafter the increase in capital being effective May 1 1920.

Three new directors have been added to the board of the Phoenix Trust Co. of Philadelphia, namely, Charles M. Town, Frederick C. Lehman, M. D., and Herman S. Zahn. The company began business on Jan. 5 with a capital of \$300,000, following the issuance of a decree authorizing the sale to it of the assets of the North Penn Bank which closed its doors last July.

The North Philadelphia National Bank of Philadelphia is the name of an institution for which a charter is sought. The application to the Comptroller of the Currency gives the capital as \$250,000.

James J. Flannery, President of the American Vanadium Co. and President of the Oakland Savings & Trust Co. of Pittsburgh since its organization 19 years ago, died on March 6. Mr. Flannery was also chairman of the board of directors of the Flannery Bolt Co., President of the Collier Land Co., the Keystone Nut Lock Co. and the Montour & Lake Erie Coal Co.

Frank W. Jackson of Apollo, who has been identified with the Pennsylvania State Banking Department has been appointed receiver of the Park Bank of Pittsburgh, Pa., sueceeding the late G. H. Getty.

At the annual meeting of the stockholders of the Mercantile Trust & Deposit Co. of Baltimore on March S. George Weems Williams was elected a director, succeeding Charles A. Webb, deceased. At a later directors' meeting all the officers were re-elected with the addition of J. R. Crunkleton and E. M. Schall, who were made Assistant Secretaries and Assistant Treasurers.

At a meeting of the directors of the Equitable Trust Co. of Baltimore on March 9 several new officers were elected. They are as follows: Charles J. Hanzlik, Assistant Treasurer; William H. Busey, Assistant Secretary; Henry Stockbridge, 3d Assistant Trust Officer, and A. Lee Gough, Assistant Secretary and Assistant Treasurer. Mr. Gough is Cashier of the American Bank, the stock of which bank has been purchased by the Equitable Trust Co.

The liquidating committee of the old First National Bank of Baltimore, of which Col. Henry B. Wilcox is the Chairman, on March 1 made a final distribution of the assets of the institution to the stockholders. The dividend amounted to \$3 25 per share and was derived from collection of certain unliquidated assets not included in the agreement of consolidation when in 1916 the First National Bank was merged with the Merchants-Mechanics' Bank under the title of the Merchants-Mechanics First National Bank.

The change from a savings to a national institution of the Liberty Savings Bank of Washington, D. C., under the name of the Liberty National Bank has been effected. The Comptroller of the Currency in his weekly bulletin issued March 12, reports the issuance of a charter for the nationalized bank, with a capital of \$250,000. On March 11 the bank opened in its new home at the Southeast corner of 15th and I streets, N. W. The officers of the bank are Geo. O. Walson, President; Dr. Wm. L. Robins and Grant W. Taylor, Vice-Presidents; E. J. McQuade, Cashier and J. B. Skinner, Assistant Cashier. Items regarding the proposed conversion of the savings bank appeared in these columns June 14 and Dec. 20.

The Central Bank & Trust Co. of Youngstown, Ohio, has taken action toward increasing its capital from \$150,000 to \$200,000. The new stock (par \$100) will be disposed of at \$110 per share. April 1 is the date when the enlarged capital is to become operative. The additional stock was authorized by the stockholders in January.

The City Trust & Savings Bank of Youngstown, Ohio, plans to increase its capital from \$200,000 to \$300,000. The par value of the new stock is \$100 and the additional stock was disposed of at \$200 per share, the enlarged capital to become effective April 1 1920. The proposition was ratified by the stockholders on Jan. 20 1920.

The wrecking of the historic Pontchartrain Hotel on Cadillac Square in Detroit, which for years was the leading hotel in that city, began on March 10. The building, which is 15 stories high and less than 15 years old, is to be demolished in order to make way for the new bank and office building of the First and Old Detroit National Bank, Emory W. Clark, President. The new bank and office building will be 24 stories, will cost about \$8,000,000 and will be one of the most imposing structures in Detroit. Enough applications for space have already been made, it is stated, to fill two buildings the size of the contemplated structure. In addition to quartering the First and Old Detroit National Bank, the new building will furnish a home for the Central Savings Bank and First National Co., a securities corporation, both of which have recently been unified with the First and Old Detroit National Bank interests. The bank quarters in the new building will be between three and four times the size of the space at present occupied by the two banks. The First and Old Detroit National Bank has been expanding its organization rapidly during the past year. Its stockholders now own the stock of the Central Savings Bank, which has six branches, and also the stock of the First National Co., a new securities corporation which began the year with capital and surplus of \$1,200,000 fully paid up. The combined capital and surplus and undivided profits of the First and Old Detroit National Bank and Central Savings Bank, according to the last statement, was \$10,687,237; the combined deposits were \$98,684,309 and the combined resources, \$125,408,941.

At a special meeting of the directors of the Highland Park State Bank of Highland Park, Mich., on Feb. 24, the resignations of Mayor James Couzens as President and director and Walter L. Dunham as Vice-President and director, were accepted. James T. Whitehead, previously a Vice-President has been elected President and Doctor George R. Andrews, a director of the bank, has been made Vice-President. Geo. H. Van Buren, Vice-President of the bank, and F. L. Klingansmith, Vice-President and Treasurer of the Ford Motor Co., were elected directors. Mr. Van Buren succeeding Mr.

Dunham as managing executive. The resignation of Mr. Couzens is due to his inability to give his various other interests the desired attention. Mr. Dunham resigns to become Vice-President of the Dime Savings Bank of Detroit.

The National Bank of the Republic of Chicago announces the organization of a trust department to serve its patrons in all business of a fiduciary character. By the provisions of the Federal Reserve Act the bank is permitted to act as trustee, executor, administrator, registrar of stocks and bonds, guardian of estates, assignee, receiver and in any other fiduciary capacity authorized by the laws of the United States and the State of Illinois.

P. S. Hanna on March 1 became a Vice-President of the American State Bank of Detroit, Mich., having resigned as Chief Examiner of the Michigan Banking Department.

The firm of Ware & Leland, with offices in Chicago and New York, will be dissolved on May 1 when two new firms will be established. The Chicago business of the firm, all its branches and its leased wire system, will be taken over by E. F. Leland & Co. Mr. Leland will have as partners Harry B. Signor, John N. Weinand and Edward J. Schaack. J. Herbert Ware with Sefton Tranter will form a new firm in New York under the name of Ware & Tranter and will serve as the eastern connection of E. F. Leland & Co. All members of the two prospective firms are members of the present firm of Ware & Leland. Messrs. Ware and Leland have been associated for fifty years. The firm is a member of the New York, Chicago and Pittsburgh Stock Exchanges, the New York Cotton Exchange and the Chicago Board of Trade. It deals in stocks, bonds, grain and cotton and specializes in unlisted securities. The business, it is stated, has grown to large proportions, and the firm has branches, linked by leased wires, in all the principal cities in the Central West, from the Alleghanies to the Rockies, with connections in the eastern centres, all of which will be retained by E. F. Leland & Co.

The trust department of the Continental and Commercial Banks, of Chicago, has issued a booklet entitled "The First Step." This booklet presents information intended to simplify the making of a will. The pages are so arranged that they may be readily filled in by any one disposing of his effects, thus facilitating the work of the drawing of a will by an attorney. Copies of the booklet may be obtained free on request to the Continental and Commercial Trust and Savings Bank, 208 South La Salle Street, Chicago, Illinois.

R. L. Hopkins, National Bank Examiner for the Southern Wisconsin District, has been elected President of the Bank of Wisconsin of Madison, Wis., succeeding Joseph M. Boyd, who has become chairman of the board of the bank. Mr. Hopkins has represented the Comptroller in Pennsylvania, Michigan and Illinois districts.

The opening of the Globe National Bank of Denver oceurred on March 1, following the issuance of a charter for the bank by the Comptroller of the Currency, to which reference was made in these columns March 6. The bank represents a change from the State to the National system of the Commerce State and Savings Bank of Denver. The Globe National has a capital of \$200,000 and surplus of \$50,000. D. H. Staley is President and August Loching, Cashier.

At a meeting of the stockholders of the Georgia Savings Bank & Trust Co. of Atlanta, Ga., the stockholders voted to increase the capital from \$200,000 to \$500,000. The new stock was authorized by the stockholders on March 1. The additional stock (per \$100) is offered to stockholders pro rata at \$135 per share and \$150 per share to the public. The increased capital will become effective April 6.

The thirty-first anniversary of the Security Trust & Savinga Bank of Los Angeles occurred on Feb. 11 and one of the important features of the day commemorating the event was the arrival of assents of the stockholders of the Security National Bank to the absorption of the latter. Under the plans of the proposed merger the assets of the national bank, the entire stock of which is held by trustees representing the stockholders of the Security Trust and Savings Bank, will be incorporated with the assets of the State bank, bringing its total resources to the neighborhood of \$90,000,000. The

Security Trust & Savings Bank on its anniversary day last month had resources of a little less than \$82,000,000 and deposits of over \$76,000,000. The Security Trust & Savings has become a member of the Federal Reserve system and hence it is no longer considered necessary to continue the operation of the national bank. The absorption, it is expected, will be completed before May 1. The Security Trust has purchased property at the corner of Hollywood Boulevard and Cahuenga Avenue in which will be housed its Hollywood branch, now located diagonally opposite the new site. This branch, which was formerly the Hollywood National Bank, was absorbed by the Security Trust & Sav-ings Bank last November. It is planned to erect a new building on the newly-acquired site. Concerning other improvements contemplated the Los Angeles "Times" says:

provements contemplated the Los Angeles "Times" says: A large force of workmen is engaged in tearing out the partitions and fix-tures of the greater part of the second floor of the Security Building, above the main bank. This will be occupied by the trust department, giving it what the officers say are the largest quarters occupied by any trust depart-ment on the Pacific Coast. When this work is done and the Security National is merged, the Security Trust and Savings Bank will occupy the entire first floor and basement of the Security Building, and the Security National Bank Building mezanine, a large part of the second floor of the Security Building, all the five floors of the Security National Building, which, with the large branches at Seventh and Grand and at Holtywood and the Equitable branch at First and Spring streets, will make it the largest bank, in point of floor space, in any city west of Chicago, the bank officers say. BAV.

It is interesting to note that J. F. Sartori, the President of both the Security Trust & Savings Bank and Security National, was Cashier of the former when it started business in 1889.

The death, early in February of Stoddard Jess, well known as the President of the First National Bank of Los Angeles, has prompted the following meritorious comment in the "Pacific Banker," in recognition of his worth:

has prompted the following meritorious comment in the "Pacific Banker," in recognition of his worth: California bankers might dispute as to whether Stoddard Jess merited the distinguished reputation which he bore as a banker, but they could not dispute as to whether he merited his reputation as a man. It is of course easy to say that this or that man is not so good a credit man as a somebody else; that hundreds of others have more executive ability, or to express surprise at the position which some banker occupies in the eyes of his fellow craftsmen. In the opinion of some the typical banker is the automaton—a thing of life, but minus a nervous system. Judged by this standard, Jess could not go very far, for he was at all times a man of deep feeling, but he had a wrath against chicanery and low dealing, which showed the strong fibre of his character and made him as a banker good for the community in which he lived as well as the institution which he served. Country bankers called upon Jess for advice and he always gave it with a deep sense of responsibility. When California suffered the terrible freeze of some years ago and a loss of 20 millions, Jess, the leading banker to lose faith ha its customers. He recognized that there were lean years as well as far years in banking, and faced a coming stringency philosophically and uncomplainly. At conventions Jess' remarks were usually—and he was sure to be called uncomplainly. At conventions Jess' remarks were usually—and he was sure to be called monking. How he could appeal to young men to resist the doing of a thing merely because the latter's competitor was doing it. He was the voice of manking. How he could appeal to young men to resist the doing of a thing merely because the latter's competitor was doing it. He was the voice of manking. How he could appeal to young men to resist the doing of a thing merely because the latter's competitor was doing it. He was the voice of manking. How he could appeal to young the bard to be was the voice of manking. How he could

Emerson in bankine: "You men, you will hear on all sides maxims of low prudence. Never-theless, if God has given you to pursue the truth, be hold, be firm, be true." It was because Jess was so pre-eminent as a man that there was a tendency in certain quarters to dispute his pre-eminence as a banker. He was a man of university training. Had he been without this, had he been a man of no emiture or fine feeling, no vision beyond the dollar involved in a single trade, had he been one of your old-time money bags, and nothing more, his merits as banker would have been more easily recognized, simply because the pro-cess of judging would have required less effort. But, account for it as you will. Stoddard Jess in the prime of his powers would have been named among the two first in any list of leading California

But, account for it as you will, Stoddard Joss in the prime of his powers would have been named among the two first in any list of leading California bankers which any person, capable of judging, could draw up. The passing of such a man merits an attempt to portray his salient features. He was no accident. His occupation did not engulf his character and the remembrance of him will be a fragrant power for good in the world. Because of ill health Mr. Jess had retired as President of

the First National toward the end of January the present year but remained with the institution as Chairman of the Advisory Board of the bank. At the time of his death he was also director of the latter and the Los Angeles Trust & Savings Bank and President of the Los Angeles Clearing House Association. Mr. Jess was sixty-three years of age.

An application for a charter for the American Marine National Bank of Los Angeles, Cal., with a capital of \$200,-000, has been filed with the Comptroller of the Currency.

The following from Consul-General Robert P. Skinner at London, Jan. 29, is taken from "Commerce Reports" March 9:

An announcement was made in London on Jan. 29 that the P. & O. Banking Corporation (Ltd.) will be launched in April next. This corpora-tion is being set on foot by the Peninsular & Oriental Steam Navigation Co., which has offices in many parts of the world. The new Corporation will have an authorized capital of $\pm 5,000,000$ ($\pm 24,332,500$ at normal ex-change), with $\pm 2,000,000$ ($\pm 9,733,000$) fully paid up. Lord Incheape, who is the chairman of the P. & O. Co., will be chairman of the banking corpora-tion. It is intended gradually to open up a banking business at the ports where the P. & O. steamers touch. Arrangements have been made for a

participation in control by the P. &. O. Co., Lloyds, the London County & Westminster Bank, and the National Provincial Bank, and a preference will be given to applications for shares from the P. & O. stockholders.

A new book, entitled "Underwritings and Original Offerings," has just been published by the Financial Statistics Service, 72 Trinity Place, New York. The book contains a record of all underwritings and offerings of importancestocks, bonds, notes and equipment trusts-made during the period from Jan. 1 1917 to Dec. 31 1919. It particularly features the numerous issues brought out during the year 1919, giving such information as the name of the underwriting house, offering price, par value of shares, total capitalization, transfer office, nature of business, &c. It claims to be the only book published containing this information on all these new issues in quick reference form.

The book is intended for use by the trader, cashier, statistician, new securities department, &c., and should also be of assistance to the individual investor. The publishers intend to keep the record up-to-date by issuing cumulative quarterly supplements.

THE ENGLISH GOLD AND SILVER MARKETS.

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of Feb. 19 1920:

GOLD. The Bank of England gold reserve against its note issue is £107.736.620. a substantial increase of £2.504.160, as compared with last week's return. The price of gold has continued to move in some degree of correspondence with the fluctuations of the United States exchange, although the actual demand has not been from that country, but from India. South America, the Straits Settlements and the Trade. The visible holding of gold in the British Empire before the outbreak of war and that at the close of last year are worth contrasting. The polley adopted lately of strengthening the Bank of England reserves against notes has carried the total about seventeen and a half million pounds above that of 1919, as given below:

has been withdrawn." The following information is from the "Times" of the 11th inst.; "An Omsk message, transmitted by Moscow, states that 150 boxes of Russian gold to the value of £1,000,000 have been delivered to the Osaki Bank in Japan. According to the same message, gold ingots from Siberla worth £2,300,000 have already been delivered to the same address."

SILVER.

SILVER. The powerful influences at work have been demonstrated during the week by very wide fluctuations in the price. The prices on the day follow-ing our last letter, that is to say, Feb. 13, were notable for the two fresh records involved, namely, the forward quotation fell no less than 534d, from that of the day before, and the discount for forward delivery reached 5d. The actual cause of these remarkable quotations was the temporary entry of China into the market as seller at a time when the Continent was also freely operating in the same direction. The mark, however, was also freely operating in the same direction. The mark, however, was overshot and a steady rally ensued, encouraged by an inquiry from China

gitized for FRASER o://fraser.stlouisfed.org/

amongst other buyers. The substratum of strength in the silver position is evidenced by this strong reaction, notwithstanding adverse influences con-nected with the approaching Chinese New Year, the heavy sales of melted coin from the Continent, and the free realization of plate, &c. So con-siderable is the latter that the trade is more than supplied from this source. The cogent arguments of the Chancellor of the Exchequer in favor of drastic dealing with the silver coinage of the United Kingdom seem to fore-shadow that the proposed bill will be carried through probably in its multety.

The quotations to day for cash and for forward delivery are, respectively, 5d, and 355d, below those fixed a week ago,

We have also received this week the circular written under date of Feb. 26 1920:

GOLD.

GOLD. The Bank of England gold reserve against its note issue is £109,713,890, another substantial increase, on this occasion of £1,977,270. Gold has not been available on some days, and was therefore quoted only "nominal" on those occasions. The demand has emanated almost entirely from the Straits Settlements and South America. It is reported from New York that \$13,050,000 and \$215,000 in gold have been shipped to South America and Mexico respectively, while \$7,000,000 in gold have been engaged for shipment this week to the former. Further substantial amounts are also reported to be ongaged for export to South America in the near future. An Indian correspondent under data 30th Ian. Informs us that the up-country demand for gold was 50,000 to 60,000 tolas a day, and that, in addition to Government offerings, there was a supply of American gold dollars, sover-eigns and English bar gold, believed to be smuggled. Reuter telegraphs that a sovereign is worth 37 shillings in the Aden Bazars, and it has been reported that there is a ready market for British Sovereigns in Mozambique. The Customs at Rangoon, in order to prevent Illegal importation, selzed about 2,500 sovereigns and 3,000 American twenty-dollar pleces on the S. 8. "Hongmoh." When we remember that the mint value of gold before the war was 1,395 German marks the fine klo, the statement of the Neue Zurcher Zeitung that gold has changed hands in Germany at the rate of 67,000 marks the fine klo is a powerful Illustration of the financial collapse of that country. BILVER.

<text><text><text><text><text><text>

RONICLE 1157 Honore this crop was naturally strong. Moreover the Government wheat purchases were at that time paid for entirely with notes and the notas so disbursed very soon found their way back to the Currency Office for en-cashment. The operation of these two factors threw a great strain on the Currency Office. On the 20th May the drastic step was taken of prohibi-ing the carriage of specie by rail on private account. The immediate effect of this measure was to cause at first an almost complete stoppage of large issues at Lahore and Madras. A further restriction was shortly afferwards introduced in the form of a prohibition on the transmission of specie by post. This measure followed almost directly on the prohibiting despatch. Meanwhile large quantities of silver amounting to 0,6d lakhs were on their way from America. Special measures were taken to expedite their trans-mission and a special slip, the R.I.M. "Northbrock" was despatched to meet the arrivals across the Pacific. Further rellef was also provided by the issue of gold monurs in part payment for the wheat purchases in the Punjab. . . . Actually the lowest point reached in the silver coin balances was in the first weele of June, when these stood at 4.14 lakhs. . . . The position was saved by the splendid work of the Mints. Also the Taet was generall known to the public that enormous shipments of silver were arrival of these reinforcements from America. The turn of the tide came in the third week of june when the Currency coin balance rose to 4.74 lakhs, while the fourthy week actually no to 5.65 lakhs with silver under coinage at 2.78 lakhs and in transit at 6.51 lakhs." The datalis below suggest many pregnant thoughts and epitomise the of the currency weigh the disting the closing coin balance on the 30th of June up to 5.65 lakhs with silver under coinage at 2.78 lakhs and an epitomise the disting the closing coin balance on the 20th of June up to 5.65 lakhs with silver under coinage at 2.78 lakhs and in transit at 6 epitomise the difficulty faced by the Indian Government with regard to currency; Laklis.

Member Banks of the Federal Reserve System.—Following is the weekly statement issued by the Federal Reserve Board giving the principal items of the resources and liabilities of the Member Banks. Definitions of the different items in the statement were given in the statement of Dec. 14, 1917, published in the "Chronicle" Dec. 29 1917, page 2523.

STATEMENT SHOWING PRINCIPAL RESOURCES AND LIABILITY ITEMS OF MEMBER BANKS LOCATED IN CENTRAL RESERVE AND OTHER SELECTED CITIES AS AT CLOSE OF BUSINESS MARCH 5 1920

Substantial additions to loan and investment account notwithstanding inther reduction in the holdings of United States was securities, account and time deposits are indicated in the Federal Reserve Board's weekly statement of condition of Mar. 5 of 807 member banks in leading effets. Treasury certificate holdings show a deeline for the week of 31.6 millions, of which 25.2 millions represents the reduction in the holdings of the New York City member banks. Victory notes fell off about 3 millions context, which and a deeline for the week of 31.6 millions, of which 25.2 millions, represents the reduction in the holdings of the New York City member banks. Victory notes fell off about 3 millions context, shows an increase of 12.7 millions for all reporting banks, and signify member banks. In New York City Loans secured by stocks and bonds declined 14.2 millions at all reporting banks, and slightly more at the New York City banks. On the other hand, all other loans and investories of the seck of about 55 millions for all reporting banks, and decline for the week of about 55 millions for all reporting banks, and decline for the week of about 55 millions for all reporting banks, and decline for the week of about 50 millions for all reporting banks. On the other hand, all other loans and investories of the new York City banks in New York City. Ware paper hands and investories of the seck of about 55 millions for all reporting banks in New York City. Ware paper hanks, and decline for the week of about 55 millions for all reporting banks in New York City. Ware paper hanks, and decline for the week of about 50 millions for the banks in New York City. Ware paper hanks, and decline for the week of about 55 millions for all reporting banks and investories of the form the week of about 55 millions for the banks in New York City. Ware paper hanks, and distributed context of the reporting banks in New York City. Ware paper held about 2 millions for all reporting banks and investoris and thanks in New York City. Ware paper held

1,284.2 millions, while other paper held under rediscount by Federal Reserve banks for all reporting banks declined but slightly from 801.4 to 799.9 mill millions. Government deposits are given as 39.1 millions, a reduction of about 3 millions for the week and marking a new low level for this item. For the New York banks the total of 18.9 millions shows no change since the week

before. Time deposits show a further gain of 32.7 millions, largely outside Federal Reserve bank cities. Reserve balances (with the Federal Reserve banks) of all reporting banks fell 5.3 millions. For the New York City banks a reduction of this item by 22.6 millions is shown, while the Chicago banks report an increase under this head of 15.2 millions. Cash in vault shows an increase of 3.5 millions.

1. Data for all reporting banks in each district. Three ciphers (000) omitted.

The Federal Reserve Banks.—Following is the weekly s Aggregate additions of 5.1 millions to the total of disconniced and pur-chased bills on hand, accompanied by increases of 5.7 millions in net de-posits and of 9.7 millions in Federal Reserve note circulation are indicated in the Federal Reserve Board's weekly bank statement issued as at close of business on Mar. 12 1920. Total cash reserves show a gain of 2.1 millions, has the result of these changes the banks' reserve ratio shows a nominal decline for the week from 42.6% to 42.5%. Acceptaness of the of 4.5 millions in war paper on hand the banks report a further increase of 19.3 millions in the holdings of other discounted paper. Acceptances on hand fell off 9.7 millions, while Treasury certificate holdings increased 0.0 million. Total earning assets of the Reserve banks are given as 3.221.9 millions, an facrease of about 0 millions for the week. Of the total of about 1.516 millions of war paper held, 730.5 million, or 43.2%, and 52.13 millions, or 34.4%, by Treasury certificates, as against 49.15.9 and 35.1% of a total 01.520.5 millions of war paper held the week before.

The Federal Reserve Banks .- Following is the weekly statement issued by the Federal Reserve Board on March 12:

Atatement Issued by the Federal Reserve Board on March 12: Discounted paper held by the Boston, Cleveland, Atlanta, Chicago Minneapolis, Kansas City and Dallas banks are inclusive of 115.8 millions of paper discounted for the New York and Philadelphils banks, as agains 96.6 millions the week before, while acceptance holdings of the Boston, Cleveland, Atlanta, Kansas City and San Francisco banks comprise 12.6 millions of bills (as against 17.6 millions) purchased from the New York and Boston banks, the week before. Government deposits show a decline for the week of 28.6 millions, while members' reserve deposits increased 28.7 millions, and all other deposits (including foreign government credits)—6.8 millions. The 'foat' carried by the Reserve banks (treated as a deduction from gross deposits) shows an increase for the week of 1.2 millions. The result of these changes is seen in an increase of net deposits by 5.7 millions. Federal Reserve note circu-lation shows a further expansion for the week of 9.7 millions, the Cleveland bank reporting the largest increase. This increase is largely offsett by a reduction in the banks' liabilities on Federal Reserve bank noise ckreulation from 229.2 to 220.7 millions.

Bankers' Gazette.

 Battlices
 Gazette.

 Wall Street, Friday Night, March 19, 1920.

 Ratiroad and Miscellaneous Stocks.—Although there is practically nothing new in the general situation the stock market has again this week been very active and, with interest shifted from railway to miscellaneous issues, the advance in prices has continued. These characteristics of the market are the result of increasing ease in the money market, of a substantial advance in sterling exchange rates and reports that a large shipment of gold is in transit from London to New York. The latter is regarded in some quarters as the beginning of a heavy movement of the metal, but this is, of course, only conjecture.

 Thereing bills which sold around \$3.65 on Monday were quoted at \$3.83 to-day and it now seems highly improbable that the low figures of last month will not again be reached. Call loan rates declined from 9% on Monday to 6%, as the ruling rate, on Thursday, showing that normal conditions are approaching in this department also.

 The transactions aggregated 1,900,000 shares, on Thursday and nearly 1,500,000 to-day. Not one of a last of the 50 most active stocks shows even a fractional net decline, as a result of the week's operations although Ches. & Ohio and St. Paul of the railway list close without change. On the other hand, Texas & Pacific shows an advance of 5½ points. Reading 2½, So. Pac. 2½ and Union Pac. No. Pac., New Haven and Gr. Nor, are between 1 and 2 points higher than last week.

 The following sales have occurred this week of shares not represented in our detailed list on the pages which follow:

Domestic Exchange.-Chicago, par. 8t. Louis, 15@25e. per \$1,000 per \$1,000 premium. Cincinnati, par. Outside Market.-A generally firm tone prevailed in "eurb" securities throughout the week though the trend of values was somewhat irregular. Business has been only fair, the principal activity as usual being in oils. Former Standard Oil subsidiaries were conspicuous for activity and strength. Standard Oil of N. J. was actively traded in jumped in the beginning of the week from 795 to 905, but reacted and ends the week at 845. Standard Oil of N. Y. moved up from 465 to 480. South Penn Oil gained about 22 points to 355 and closed to-day at 342. Internat. Petroleum, new stock, sold up from 37 to 45½ and at 41 finally. Texas Company was heavily bought, the price ad-vancing from 49½ to 55 with the final transaction to-day at 54. Texas Pacific Coal & Oil ran up from 94 to 1111½ and reacted to 106. White Oil after a fractional advance to 30½, sank to 28 and closed to-day at 28½. Business in industrials was somewhat small though as the week ad-vanced the market broadened considerably. General Asph-alt com. advanced from 101 to 110¼, sold back to 101 and ends the week at 105½. Amer. Safety Razor gained about a point to 10½. Indian Packing improved over a point to 15¾. Swifts Internat. sold down from 46 to 44 and back to 46½ with the close to-day at 45½. Submarine Boat after a gain to 18 moved down to 16. Tobacco Prod. Ex-ports advanced from 19 to 23½ and sold finally at 22. Mining shares active. Bonds inactive. Russian Govern-ment bonds showed weakness the 6½s after loss of about 2½ points to 32½ during the week broke to-day to 27½, the 5½s dropping almost five points to 28.

THE CHRONICLE

Investment and Kailroad Intelligence.

RAILROAD GROSS EARNINGS The following table shows the gross earnings of various STEAM roads from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from Jan. 1 to and including the latest week or month. The returns of the electric railways are brought together separately on a subsequent page.

Chicago City Railway.

(Report for Fiscal Year Ended Jan, 31 1920.)

President Leonard A. Busby, Chicago, Mar. 16, wrote in substance:

President Leonard A. Busby, Chicago, Mar. 16, wrote in substance:
 Results — This report for the 12 months ending Jan. 31 1920 slows: (1) the earnings, expresses and residue receipts of the Chicago Surface Lines increase of the Chicago Surface Lines amounted to 343.063.438.
 erspesses 33.264.015. or 76.642, of the gress, leaving residue receipts of S10,700.423, divisible 60% or 36.654 to the Chicago Railways Co.
 Tors earnings of the Chicago Surface Lines amounted to 343.063.438.
 erspesses 33.264.015. or 75.642, of the gress, leaving residue receipts of S10,700.423, divisible 60% or 36.626.544 to the Chicago Railways Co., and 40% or 31.283,760 to the South Sile Lines, namely: the Chicago City Railway Co., and the South Chicago Railway Co., and the South Chicago Railway Co., and the South Chicago Railway Co., and the souther Street Railway Co., and the Chicago City Railway Co.
 The gress receipts of the Surface Lines increased \$0.253,340; operating) expenses increase in operating expenses in dreeses to the Surface Lines increase of the chicago City Railway Co.
 After the payment of operating expenses and bond interest, your property produced a net income of 31.303,937, an increase over has tyear of \$457,750. Not earnings abow a return of 7.24% on the capital stock, as against 4.70% has your. Surface Lines and the capital stock, ware paid.
 Tor increased in greates of the your chase price of your property by \$700.865. The seconstructed 28.76 miles of single track Dice 31, 322.42.
 We construct and the city purchase price of \$450,855 out of its earnings to the single track Dice 31, 322.42.
 The increase in functional of a single track and built only one extension of a small fraction of a null. Total miles of single track Dice 31, 322.42.
 The constructed 28.76 miles of single track and built only one extension of a small fraction of a null. Total miles of single track Dice 31, 322.4

but on Dec. 10: 65 cents. A second supplemental order, interview 100, p. 2439, abolished tickets, and reduced the fare to a flat 6-cent rate (Y. 109, p. 2439, 2171). Valuation for Rate-Making.—The companies employed Stone & Webster and A. L. Drum & Co. to make a complete inventory and valuation of the properties. In September we began the hearings before the Utilities Com-mission on the valuation of our properties for rate-making purposes, and submitted the above mentioned valuation and other evidence. The city is now proceeding with its side of the case. Court Decisions.—The city vigorously contested the jurisdiction of the Supreme Court of Illinois. This court rendered a decision Feb. 18 1920 clearly establishing the duty of the Commission, on a proper showing, to increase rates (Y. 110, p. 764). Another recent decision of our Supreme Court settled certain fundamental principles to be followed by the Commission in making valuations of utility properties. These decisions, we hops, will eventually result in a valuation and findings which will fully protect the purchase price of your property, as fixed by ordinance, and a rate of return on such valuation, while restore the credit of the company and enable it to procure the mew capital necessary to provide much-needed extensions and botterments. Barnsdall Corporation (of Dela.) Pittsburgh and N. Y.

(First Annual Statement-Year ended Dec. 31 1919.)

This corporation, a merger and amalgamation of the natural gas, oil and mining interest of the estate of the late T. N. Barnsdall of Pittsburgh, Pa., has issued its first annual report, giving many facts regarding the several properties and their finances.

On subsequent pages of this issue will be found extended extracts from the report, including the remarks of President Robert Law Jr., together with the consolidated balance sheet, and income and surplus, accounts, and also a tabu-lated analysis of the properties, investments and advances of the corporation and its subsidiaries.

A digest of the very full statement made to the Pittsburgh Stock Exchange was published in the "Chronicle" of Aug. 16 1919, page 673, discussing at considerable length the several controlled properties. Application is pending for the listing of the stock on the New York Stock Exchange.—V. 109, p. 1091, 972.

Consolidation Coal Co.

(56th Annual Report-Year ending Dec. 31 1919.) On subsequent pages will be found the remarks of President C. W. Watson, together with the tonnage and other statis-tics, the income account for the calendar year 1919 and also the balance sheet as of Dec. 31 1919.—V. 110, p. 363.

Computing-Tabulating-Recording-Co.

(8th Annual Report—Year ending Dec. 31 1919.) The remarks of President Thomas J. Watson along with the consolidated income account for the calendar year 1918 and consolidated balance sheet as of Dec. 31 1919 will be found on subsequent pages.

a The profit from sale of manufacturing product and income from other sources as above is shown after deducting all operating expenses, ordinary losses, but before deducting interest charges, bond discount applicable to the year, provision for depreciation on plant, and other charges. b includes proportion of bond discount applicable to the year, c includes deferred discount charge applicable to such bonds.-V. 110, p. 264.

Studebaker Corporation.

(9th Annual Report-Year Ending Dec. 31 1919.)

President A. R. Erskine, South Bend, Ind., March 10, wrote in substance:

Wrote in substance:
Results.— The total net sales amounted to \$66,383,307 and the net profits, with other net income, after deduction of the usual depreciation and interest charges, amounted to \$11,166,513. Making provision for the income and excess profits taxes of \$1,854,229 reduced the net profits to \$9,312,284.
Dividends of 7% each ware paid on the Preferred and Common stock ontstanding in the amount of \$2,843,475, and the balance of net profits, \$6,463,809, was transferred to surplus account, which with special surplus account amounted to \$24,165,583 at Dec. 31 1919. after absorption of expense of new financing hereafter mentioned. Pref. stock amounting to \$515,000 was retired during the year. In both 1918 and 1917 our plants were serving the Government and our profits were considerably below normal. The last year's results, therefore, should be compared with those of 1916, in which sales amounted to \$61, -988,594 and net profits \$3,611,245, after deducing \$132,954 for income tax. Commetcial operations were not in full swing until spring; results contrast as follows:

trast as follows: Pirst six months sales. ____\$27,500,000 | Net profits (before taxes) . \$4,000,000 Second six months sales. ____\$28,900,000 | Net profits (before taxes) _ 7,200,000 Withdrawal from Horse-Drawn Vehicle Business. — Business offered was in excess of our capacity. Production was hampered by shortages of materials, relight cars and labor, which increased costs and curtailed output, and these conditions continue to-day. Availing ourselves of the opportunity afforded we discontinued the manufacture and liquidated our Investments in all horse-drawn vehicle lines of product, including harness, except farm wagons and farm trucks, which lines are retained. The factory space and Invest-

United States Cast Iron Pipe & Foundry Co.

United States Cast Iron Pipe & Foundry Co. (21st Annual Report—Year ending Dec. 31 1919.) President L. R. Lemoine, N. Y., Mar. 3, wrote in subst.: Results—Outlook — While your business last year was disappointing, it is realifying to say that the present outlook promises a very material improve-ment. The demand began to improve in October last and has shown a decided change expecially as to volume and also as to price and diversity of sizes. Bookings from December to last through the first quarter of 1920 will closely approach if not exceed your total shoments in 1910. The disappointing results of last year are due to a number of causes, stopped and for the five months to April, 1919, totaled approximately 25% less than the tonnage booked in December, 1918. Dusiness almost notwithstanding a failing off in the price of your principal product and an increase in the cost of mandature—the not return per ton in 1918 from manufacturing your principal product was slightly less than in 1918, but the volume was took small to produce more than insignificant shop earn-ings. We suffered from car shortages and the consequent irregular deliveries

manufacturing your principal product was slightly less than it. 1916, one the volume was too small to produce more than insignificant shop earnings.
 We suffered from car shortages and the consequent frequilar deliveries of raw material and added expense in handling and shipping and also from the continued indifference and lassitude of certain classes of labor. The average production of tons per man employed in the shops in 1919 was about one-half, while the average wages paid by the Company were more than double those of 1915.
 Worr loss for the year 1919 was the sum of \$503,703. This accrues, however, after absorbing \$1,241,553 in cost of operation and maintenance of plants and also after providing \$424,705 as a reserve for depreciation, which reserve on Dec. 31 amounted to \$1,103,417 as compared with \$772,461 th 1918, a net gain of \$330,765. Your total reserves now amount to \$1,360,065, a gain of \$349,491
 As usgested, your bookings for the last quarter, especially in December, which reserve on Dec. On the larger diameter, 24 inch and over, specificitors of considerable moment are now in prospect from certain which slices your considering that the orders were chiefly for pipe of the smaller diameters on which slices your capacity is now fully occupied and will be for some time. On the larger diameter, 24 inch and over, specificators of considerable moment are now in prospect from certain specific tores of considerable moment are now in prospect from certain specificators of considerable moment are now in prospect from certain the slow be well occupied. Even before the war these buyers had allowed their bore states on which slows continues in excellent condition. The addition to property and plant account includes the partial cost of new machine shops now under construction and additional equipment at your Addyston Works which, when completed, will greatly add to your machine department. Your machine shop equipment was also increased by the purchase of more eff

New England Company Power System.

(Report for Fiscal Year ending Dec. 31 1919.)

George S. Smith, President New England Co., says in substance:

substance: *Plant Extensions.*—In August the additional unit at Uxbridge was put in service, increasing that station's capacity by 10,000 kilowatts. At the Vernon plant construction of two new units of 4,000 k.w. each was started about June 1 and at the present time is about half done; the machines should be ready for service July 1. It is expected that the installation of these two new units will increase the output of the Vernon plant in an average year by from 20,000,000 to 22,000,000 kilowatt hours. *New Transmission Lines.*—The line to Nashua, N. H., put in service in 1918, has worked to such advantage that the Nashua Manufacturing Co. decided to electrify its Jackson mills early in the year, and in view of this and other load secured in Nashua the construction of a second circuit be-tween Aver and Nashua became necessary, and has been completed. Our connection with the Edison Electric Illuminating Co. of Boston was also completed, as well as the connection with the Eastern Connecticut Power Co. at Norwich, Conn.

Barrett Company (New Jersey)

(Report for Fiscal Year ending Dec. 31 1919.)

(Report for Fiscal Year ending Dec. 31 1919.) President William Hamlin Childs, March S, wrote: The winter and spring of 1919 were exceptionally dull and disappointing seasons owing to the general readjustment of the business from a war toba beace basis, as stated to you in my letter of July 22 1910. The first six months of the year, instead of showing a normal profit, showed a slight itses, so that the net profit made for the year 1919 was all made between July 1 and Dec. 31. The entries circumstances the stockholders are to be congratulated that the total earnings of the year show a net final profit available for dividends of \$2,232,013, or the equivalent of 7% on the Preferred stock issued and 10.25% upon the Common stock. The earnings for Jan. 1920 were the largest of any January in our history and together with a large number of unfilled orders on our books and in-numerable inquiries for our goods, indicate an earning for the year 1920 that will be very satisfactory. During 1919 the directors declared dividends on the Common stock at the rate upon the Common stock. Wing to the impossibility of securing sufficient office space in the next first rate upon the Common stock. Out of 25% point the Common stock. Must be very satisfactory will be or two others has decided to build a 16-story office building on the corner of Rector and West streets. N. Y. City. We do not anticipate that this building will require any large amount of cash capital to be taken from the assets of the company and the amount of cash capital to be taken from the assets of the company and the amount of cash capital to be taken from the assets of the company and the amount of cash capital to be taken from the assets of the company and the amount of cash capital to be taken from the assets of the company and the amount of cash capital to be taken from the assets of the company and the amount of cash capital to be taken from the assets of the necessary and proper unaters for a company of its standing. Pittsburgh Coal Co. (Pennsylvania).

(Report for Fiscal Year ending Dec. 31 1919.) Chairman M. H. Taylor, Pittsburgh, Pa., March 9, wrote in substance:

1919 Trade Conditions.—After the armistice was signed in November 1918 demand for coal for war purposes ended. An exceptionally mild winter followed with surplus stocks everywhere. This situation continued well through the first four months of the year. Later on an improved demand developed, but this was lessened in effect through car shortage and by the general strike of the minors on Nov. 1, which practically stopped production for the balance of the year.

Production.—The total tonnage produced and handled, exclusive of out side coal purchased and handled by the subsidiary companies, and in all districts, was 13.852.741 net tons, a decrease under 1918 of 3.305,058 net tons, or 19.28%.

Production.—The totial tomage produced and handled, exclusive of out districts, was 13.562.741 not tome, a decrease under 1018 of 3.305.055
 Prices.—Governmental prices were withdrawn Feb. 1 1910, re-established Oct. 30, and are still in effect. Between these dates the market mine selling out and are still indered by our company.
 The high mine cose of labor, materials, taxes and overhead through decision of the Lover law that the produced is shiftled to a reasonable profile in the direct Ogermental mine price now in effect but also its increase if the basic principle of the Lover law that the producer is shiftled to a reasonable profile is decision.
 The night mine cose, of labor, materials, taxes and overhead through decision of the totic law the principle of the Lover law that the producer is shiftled to a reasonable profile is decision.

Herschell-Spillman Motor Co.

Herschell-Spillman Motor Co. (Report for Fiscal Year ending Dec. 31 1919.) B. W. Burtsell, Pres. & Gen. Mgr., March 9, North Tona-wanda, N. Y., wrote in substance: On Feb. 1 1919 your corporatoin took over the plant and management of the Herschell-Spillman Co., a New York corporation. At that time the old company was building about 20 motors per day. The Herschell-Spillman Motor Co. was amply financed, and manufacturing arrangements of 50 motors per day, or a total annual production of 16,000 pleasure vehicle and truck motors per annual. Through aggressive sales management your company arrived at a posi-tion late in the spring of 1910 of having reached the maximum capacity of the plant, with its entire output sold for a year ahead. By the early summer, pressure to accept further very large orders from many of the most responsi-ble manufacturers of motor vehicles and motor trucks became so insistent

that your directors decided to proceed at once to expand its manufacturing resources and finances in order to avail itself of the enormous amount of profitable business offered and become one of the largest and most import-ant factors in the motor-building industry in this conntry. Our new buildings have been completed and the greater part of the new machinery, which is of the latest type, is now installed and in operation, and at this date we are producing 100 motors per day, and by the end of the second quarter of the current year we fully expect to be producing over 200 motors per day, or an annual rate of over 60,000 motors per annum, representing gross sales of about \$12,000,000. Our entire schedule of production for 1920 has been sold, and such orders as we are now accepting are for 1921 delivery. FINANCIAL STATEMENT DECEMBER 31 1919.

United Fruit Company.

(20th Annual Report-Year ended Dec. 31 1919.)

Pres. Andrew W. Preston, Boston, Mass., Feb. 2 1920,

Pres. Andrew W. Preston, Boston, Mass., Feb. 2 1320, wrote in substance: *Results.*—This net profits for the fiscal period were: From operations, 37,351,730, and from other sources, \$1,034,579, a total of \$35,336,200 Deducting interest charges, \$206,636, and estimated taxes, \$18,016,106, eaves a profit for the fiscal period of \$20,163,517, from which dividends were paid amounting to \$6,259,562; balance, \$13,873,955. Adding adjust-ment in connection with acquirement of Revere Sugar Refinery \$195,614, results in a total increase to profit and loss during the period of 15 months of \$14,069,569. The net profits for the fiscal period were determined after deducting normal depreciation on plant, equipment, and steamships, amounting to \$6,369,465. Stock and Debt.—Retirement of debt through the operation of sinking

carried as War Emergency Reserve has been consolidated with this reserve account. We have been studying carefully the possibility of the further use of machinery in connection with its various operations. At present all its banana cargoes are loaded by machinery, excepting cargoes from Jamalca. In the Southern Domestic Divisions all discharging is done by machinery. Extensive experiments have been conducted in the use of tractors and trailers for agricultural work, as well as with new types of cards. Fuel oil installa-tion in the Cuban Division's lis practically completed. The Myrtie Bank Hotel at Kingston, Jamaica, was purchased during the past year. The company's Hotel Tichfield at Port Antonio is operated only during the tourist season; the Myrtie Bank is operated during the entire year.

Notwithstanding difficulties with labor and unsettled conditions in some of the countries in which we operate, a larger area of land has been planted

both in bananas and sugar cane than during any other single year in the history of the company. Extensive experiments have also been mide in the cultivation of cacao, citrus fruits, pineapples, and other tropical products, and the results of several of the cultivations have been very satisfactory.

For the comparative income account see V. 110, p. 655. CONSOLIDATED BALANCE SHEET.

Gulf States Steel Co., Birmingham, Ala.

(6th Annual Report-Year ending Dec. 31 1919.)

Pres. James Bowron, Birmingham, Ala., wrote in subst .:

(6th Annual Report—Year ending Dec. 31 1919.)
Pres. James Bowron, Birmingham, Ala., wrote in subst.:
Results.—Governmental requirements for millitary, naval and transportation purposes naturally ceased with the armistice. It was impossible, however, to turn immediately from war conditions to those of peace. On April 1 operations at the steel works were reduced from an 80% to a 60% basis, the blast furnace was blown out and the by-product coke overs were put on slow time. Permit having been obtained for the sale of billets in England, silpments of this commodity were resumed and continued until the foreign exchange situation became demoralized. In the third quarter, business began to revive with the exhaustion of accumulated stocks of manufactured products, and more normal operations were resumed.
Improvements.—Purther, to balance the steel plant, is was decided to marge the wire-drawing department and to double the capacity of the nail mill, thus permitting the operation of the rod mill on double turn; the increased supply of wire thus available enabling the barbed wire and woven fence departments to the more influend and woven fence departments and wire products by other turb scale and woven fence departments for all the above have been placed and work is in progress. Additional bars, rods and wire products will be available for sale in lieu of billets within the second quarter of 1920.
Foreign Trade.—The importance of the company's foreign trade has been diaded. To reduce the doubled the slope and its protection with summer the slope and its protection such as a statistical and work is in progress. Additional bars, rods and wire products will be available for sale in lieu of billies turbing the second quarter of 1920.
Foreign Trade.—The enlargement of the old slope and its protection with encrete limity bas busines.
Shanon Ore Mine.—The enlargement of the slope such as been completed, fully could and the presentatives are now in South America for the slope in the d

Atch. Topeka & Santa Fe Ry.—Discontinues Line.— The company has discontinued the operation of the Port Boliver Iron Ore Ry., actending from Long View, Tex., to Iron CLy, a distance of about 30 miles. This road was operated under lease by the Guif Colorado & Santa Fe Ry. The lease expired in 1918 and was not renewed.—V. 110, p. 969, 560.

Bartlesville Interurban Ry .- Exchange of Bonds .-

Bartlesville Interurban Ry.—Exchange of Bonds.—
 The following statement has been prepared for the "Chronicle": "After much consideration, it has been decided to replace the street railway department of the Bartlesville Interurban Ry., which for some time past has not been profitable in its operations, substituting therefor the property of the Bartlesville Gil & Gas Co., the local natural gas distributing organization, which has been showing excellent results from its operations and is looking forward to a substituting therefor the property of the Bartlesville Gil & Gas Co., the local natural gas distributing organization, which has been showing excellent results from its operations and is looking forward to a substituting therefore the property of the Bartlesville Gil & Gas Co., the local natural gas distributing organization.
 The accordance with this plan it has been decided to change the name of the company to the Bartlesville Gil & Electric Co., the bondholders will receive bonds of the new company in equal amounts, without cost to them.
 The henefit derived is obvious, as the property under the mortage is materially enhanced in value by the withdrawal of the street railway property operating results and revenues are very satisfactory, and which will not all probability enjoy still greater prosperity in the fure.

Cleveland Cincinnati Chicago & St. Louis Ry .-

See Evansyme & Indianapolis RR. below.-V. 110, p. 969. Cleveland Railway.-Dividend.-Judge D. B. Culi of the Common Pleas Court has granted a permanen-injunction restraining the City of Cleveland from printing the ballots for a referendum yote on April 27 on the dividend increase award from 6% to 7%, as authorized by the City Council on the ground that the petition asking the vote was invalid. New puttions, it is stated, will be issued. The company has given notice that a dividend of 1¼% (at the increased rate of 7%) will be paid April 1 to stock of record March 13.-V. 110, p. 871, 764.

rate of 7%) will be paid April 1 to stock of record March 13.—V. 110, p. 871, 764.
Cleveland Southw. & Columbus Ry.—Bond Extension.
President F. E. Myers in asking the holders of the §110,000 20-year lat Mige bonds of Norwalk Gas & Electric Co., due April 1, to extend their bonds to Feb. 11923, says in brief. The Cleveland Southwestern & Columbus Ry. for some time past has been giving consideration to the maturity of these bonds with it has assumed to pay by its agreement of consolidation. The company finds that due to general financial conditions everywhere prevailing its practically impossible at the present time to refund these bonds in the ordinary way and that the only course available is to provide for a short extension. The company proposes to extend the maturity of these bonds to Feb. 1 1923, at the same rate of interest, vis. 6%, at which time the company proposes to make an immediate cash payment of \$14.17 or each \$500 of bonds. Thus the bonds during the period of the ordinary way propose to make an immediate cash payment of \$11.17 or each \$500 of bonds that the ordinary of the lien on these bonds shall be preserved in every respect. The holders of the bonds are requested to deliver their bonds to fee available is to available be preserved in every respect. The holders of a large amount of bonds and with the continued improvement in the company's earlings of whether their bonds to gardian Savings & Trust Co., trustees, Cleveland, who will stamp the date of extension the company is earlings bow manifest, the most astisfactory in its entire history, and with the termination of the present stringency in the mode spromy searching the termination of the present stringency in the money market the company to the date of extension the company to the date of extension thereon.
The accented maturity date.—V. 108, p. 2241.

\$40,000 300,000

Condensed Extracts from Letter of Expert J. Peyton Clark, Feb. 18.
 Operation of the road by the "Big Four" under the proposed contract will, in my opinion, at once relieve the Expansible & Indianapolis of its artificial bandicaps. The "Big Four" under the contract, will supply needed equipment at fair rental prices. This equipment, sufficient to move the present large coal and other tonnage of the E. & I., I estimate to be of a value of not lees than \$4,000,000.
 Operation of the two roads in conjunction will be mutually advantageous. The "Big Four" will be greatly advantaged by the control of the Evasville & Indianapolis, controlling, as it will, the important tonnage originating on the Terre Haute terminals of the E. & I., and securing, as it will, the formation of the feasibility of the Control of the two roads in conjunction will be entiting variations of the Evasville & Indianapolis, controlling, as it will, the important tonnage originating and the Terre Haute terminals of the E. & I., and securing, as it will, the Z. & I. line. This coal tonnage results from the development of mines, exclusively served by the E. & I., and cually moving since the termination of the recent coal strike, at the rate of more than 1,000,000 tons per year. Another advantage obtained immediately through "Big Four" operation under the contract, will be the securing for the E. & I. of remunerative switching rates on its Terre Haute terminals. In normal times the E. & L. sufficient to my the bottained at once, while you will no express that state to the care increase of from \$2 (the present rate) to \$5 per car will be obtained at once, while you will no \$2, would result in some \$60,000 per year increased net earlings to the E. & I.

Interborough Rapid Transit Co. — Official Rejoinder to Mayor's Suggestion that Company "Turn Back" the Property to the City. — President and Gen. Manager Frank Hedley says: If by the words "turn back" is meant a sale by the company and pur-chase by the city it is highly proper to point out the magnitude of the financial propositions involve. On Jan. 21 1929, but not before, the city can end the contract No. 3 lease and purchase this interborough investment in the new subway. Ines-and equipment at a fixed percentage above cost. The lease for the original aubways runs to 1068 with no right of prior termination, but with an obli-gation on the dity to buy the equipment. — The city's right of recapture covers only the new subways, not the old. The city as however, the right to an "archange of lease. The lease for the original aubways runs to 1068 with no right of prior termination, but with an obli-gation on the dity to buy the equipment. — The city's right of recapture covers only the new subways, not the old. The city as however, the right to an "archange of lease. That is, it could pick its line so as to operate a complete fast fide line, or a complete West side time, but the interborough would have the one the city did not wart, and the city could not take it away until the end of the 46-year term. This would mean that each line tone operated by the new subways. And the operating contracts (with the city are the principal security for the to the other through 42nd 34. without paying another fare. A similar privilege at South Ferry would also be lost. — The examption of a the price percentative milet well consent to an advancement of the date on which the company investment in the new lines country have purchased and now hold. If full municipal context ho country have purchased and now hold. If full municipal context ho and the same time they would murraly appeat that the city would app-at

 Northern Ohio Electric Corp., N. Y.—Change in Plans — Note Renewed—\$100,000 Paid—Preferred Dividends Deferred Pending Permanent Financing.—
 President Geo. E. Hardy, writing to the "Chronicle" on March 12, says: "The note has been renowed for one year. We have paid on account is approximately the equivalent of the 6% dividend on the Preferred stock with the sale of securities to meet the payment of the loan.
 An extract from an official circular in brief, dated Feb. 21, says: "At a meeting of directors held Feb. 17 it was decided that the amount and number of subarticity their acceptance and that the plan should therefore be abandoned. This action was taken after concrence with and approval of the bankers holding the \$4,000,000 loan which we sought to retize.
 "We have arranged with the banks for a one-year estension and have have equivalent amount of such dividends to reduction of the principal sound to such dividends will be deforted until such time as financial conditions will permit the sale of securities to retize the loan, and to apply the equivalent amount of such dividends to reduction of the principal sound dividends will be deforted until such time as financial conditions will permit the sale of securities to reduction of the principal sound dividends will be differed the loan and to apply the equivalent amount of such dividends to reduction of the principal sound dividends will be set interests of all are bardoned.
 "We have arranged with the banks for a one-year element of apply to approximate the share every confidence that all accumulations will be principal approximation of the principal sound directors field that under the circumstances the best interests of all sockholders were being conserved by so doing. The Pref. stock dividends to the loan places the stock in just that much stronger position." Compare

the stock in fust that much stronger position." Compare V. 110, p. 262. Pennsylvania RR.—Offer for Panhandle Minority Stock— Purchase Price to be Paid in New 50-Year 5% Mtge. Bonds of Panhandle Company on Par for Par Basis—Guaranteed by the Pennsylvania RR.—The company has announced the terms on which it offers to purchase through its subsidiary com-pany, the Pennsylvania Company, the minority stock of the Pittsburgh Cincinnati Chicago & St. Louis RR. The official announcement dated Mar. 15, says in substance: Status of Panhandle Co.—Financial Condition.—The Pennsylvania RR.-has, directly or through the Pennsylvania Co., assisted and developed from their inception the railroad lines of the P. C. 0. & St. L. R. (known as the "Panhandle"), which form part of its system west of Pittsburgh, and these companies own over 77% of the St. Stoll I outstanding Panhandle Capital stock. The development of the territory in which the Panhandle and continued enlargement of terminals, yards, tracks, facilities and rolling stock, and its credit is not sufficiently broad, under the railroad learning stock, and its credit is not sufficiently broad, under the railroad earnings and conditions of recent years, to assume the resulting necessary financial burdem. Further, owing to the general financial conditions and its narrow margin

<text><text><text><text><text><text><text><text><text>

and the validation and issue of the Mortgare bonds. Further, the pur-chase is subject to the necessary approval of any Commission having juris inbefore referred to. If this offer is consummated the present holders of stock of the Panhandie Company would be entitled to the semi-annual dividends payable in July, and the new bonds would bear interest from July 1 1920.—V. 110, p. 1089, 974, 960.

Pennsylvania-Ohio Electric Co.—Fare Increase.— The Pennsylvania Utilities Commission has granted the company per-mission to increase street car fares from 6 to 7 cents. The company recently changed its mane from Mahoning & Shenango Ry. & Light Co. to the present title.—V. 110, p. 872.

Texas Pacific Coal & Oil Co.—Extra Dividend.— The directors have declared the regular quarterly dividend of 114% and a special dividend of 54%, both payable March 31 to holders of record March 20. In Jan. 1920, 51%; Sept. 1919, 11%; June 1919, 74%; and in March 1910 5% extra was paid. These dividends are equivalent to \$7 on the old shares of \$100 par and 70 cents a share on the new \$10 stock.—V. 109, p. 2363.

A statement has been issued stating that owing to conditions brought about by strikes of miners at Tonopah and the general labor unrest and inefficiency also prevalent in districts where its subsidiary companies are operating with resultant high costs and low production, the management deems it wise to temporarily discontinue dividends until conditions become more normal -V. 109, p. 2272.

CURRENT NOTICES

-Farson, Son & Co., members of the New York Stock Exchange, 115 Broadway this city, have issued a comprehensive circular, which may be had upon request, setting forth the position and extremely advantageous terms, largely because of the low rates of exchange on which French, British, Belgian and Italian Government bonds and German municipal bonds may be bought. Investors are reminded that during the Civil War United States Government 6% bonds sold at about 40% of their par value. As to the German municipal bonds the bankers say they are informed that interest is being paid as always has been done. Figures are presented showing the par value at normal rate of exchange and also the approximate present price of French, British, Belgian and Italian Government bonds. —Imbrie & Co. announce that as of March 15th they have opened an

Reports and Documents.

SOUTHERN CALIFORNIA EDISON COMPANY

ANNUAL REPORT TO THE STOCKHOLDERS FOR THE YEAR 1919.

Los Angeles, California, February 26 1920.

To the Stockholders of

Southern California Edison Company:

Herewith is submitted the twenty-fourth annual report of this Company, and its predecessor companies—this being my nineteenth annual report.

Full details as to your Company's property and its operations, including comparative balance sheet, will be found in the President's report and in the certificate of Price, Waterhouse & Company, Chartered Accountants, submitted herewith.

EARNINGS.

Earnings for the year 1919 compared with 1918 were as follows:

| depreciation | 4,480,321 06 | 3,348,423 51 |
|--------------|--------------------------------|--------------------------------|
| Net earnings | \$6,089,243 69 3,106,060 99 | \$5.387,034 47 2,943,568 75 |

Balance applicable to dividends and depreciation \$2,983,182.70 \$2,443,465.72

Earnings available for interest amount to 2.23 times the year's bond and debenture interest payments and to 1.96 times the year's total interest payments.

Notwithstanding unusually high operating costs, due to two successive years of abnormally low rainfall necessitating the consumption of a great quantity of oil, and to increased cost of supplies and labor, net earnings are particularly gratifying, representing an increase of 13%.

DIVIDENDS.

The regular dividends of 7% on First Preferred Stock and Common Stock, and 5% on Second Preferred Stock were paid in the aggregate amount of \$1,950,833 39, leaving to be carried forward into the new year in surplus account \$580,560 38.

SECURITY SALES AND FINANCING.

As incidated in my last report, your Company issued in January, 1919, \$8,000,000 General and Refunding Mortgage 25 year 6% bonds, "Series of 1919," the proceeds of which, supplemented by partial proceeds of the \$8,000,000 7% "New Debentures" also issued in January, 1919, were used in the refunding of \$10,000,000 of bonds, "Series of 1917," maturing July 1, 1919. The remaining proceeds of debentures provided for the payment of floating debt incurred on account of construction.

Ratio of bonded debt to investment cost of capital assets, including investments in system corporations, remains substantially the same as that given in last year's report, viz., 62.3%.

A convincing proof of the increasing interest in the Company's business, both on the part of the public within its territory, and its employees, is found in the fact that 30,173 shares of Common Capital Stock were sold to the public, and 15,826 shares to employees during the year, an aggregate par value of \$4,599,900.

The Company's stockholders now number 7,016, of which 400 are owners of Preferred Stock, and 6,616 of Common, an increase of 91% during the year.

August showed the largest sales in any one month, 10,845 shares. Until July 1919, stock was offered to the public at \$89 per share, and to employees at \$88 per share, but in that month the price was increased to \$91 to the public and \$90 to the employees.

For the purpose of broadening the market for its junior securities, the Company made application to list its Common Stock on the New York Stock Exchange. This application was approved in October and it is expected that in the near future the stock will be regularly quoted in New York.

In spite of heavy construction requirements, and pending financing, the Company maintained a strong cash position, closing the year with \$1,026,098.29 on hand. Toward the close of the year, the Company arranged fo^{**r**} sale to a syndicate of Eastern bankers of \$7,500,000 General and Refunding Mortgage Bonds, "Series of 1919," bearing 6% interest, and not convertible into other securities, the sale to be consummated early in 1920.

BALANCE SHEET.

The most important change in our Balance Sheet will be found in Capital Assets which were increased during the year by \$9,209,523 58. The principal item in this amount is found in Construction Work in Progress, representing expenditures made on Kern River No. 3 power development and those on account of the increase in Big Creek No. 2 plant. There is also included in this item \$1,000,000 covering the purchase price of the Shaver Lake project. Distributing facilities were increased at a cost of \$2,096,668 75 to serve new consumers and provide for the increasing demands. Investments in System Corporations include the purchase price of \$400,000 capital stock of Shaver Lake Lumber Company and approximately \$235,000 in the acquisition of the remaining outstanding stock of the Mt. Whitney Power & Electric Corporation. Your Company now owns the entire outstanding capital stock of the Mt. Whitney Power & Electric Corporation, which in turn owns the capital stock of the Mt. Whitney Power & Electric Company.

Changes in Capital Assets are offset by similar increases in the Company's capital liabilities. The outstanding and subscribed common capital stock shows an increase for the year of \$4,320,000, and the bonds a net increase of \$5,196,-000. As stated above, Series of 1917 bonds in the amount of \$10,000,000, which fell due July 1, were paid and, to provide for such payment and other capital purposes, there were issued \$8,000,000 of the Company's General and Refunding Mortgage Twenty-five Year Bonds, Series of 1919, and \$8,000,000 of Serial 7% Debentures maturing 1921 to 1928, inclusive. Through the operation of Sinking and other funds, bonds were retired in the face amount of \$\$04,000. As part consideration for the purchase of the Shaver Lake project, the company guaranteed the payment of principal and interest of \$1,150,000 Shaver Lake Lumber Company bonds maturing serially 1921 to 1925. \$1,000,000 was transferred to Depreciation Reserve out of earnings. After meeting depreciation realized during the year, the Reserve shows a net increase of \$429,113 75.

ACCOUNTANTS' CERTIFICATE.

The certificate of Price, Waterhouse & Company, Chartered Accountants, is submitted herewith.

GENERAL.

The signing of the Armistice was the signal for immediate entrance upon large water power development. The ever increasing demand for power brought about by the establishment of new industries of large proportions in Southern California, together with the tremendous growth along agricultural lines in the San Joaquin Valley and other portions of our system, have necessitated vigorous prosecution o well matured plans for the development of new plants o great capacity. The President's report covers in detail the work now being done at Kern River No. 3, Big Creek No. 2, and Shaver Lake. The latter property was acquired from the Fresno Flume and Lumber Company in May, and furnishes a most valuable additional supply of water.

As stated in my letter to Stockholders in June, the situation in the City of Los Angeles is in satisfactory shape. Details will be found in the President's report.

In the early part of the year the Company sold its Santa Barbara and Ventura gas properties to the Southern Counties Gas Company, and the proceeds were used in the purchase of Santa Barbara Gas and Electric Company bonds, and to pay for additions to the property.

All in all, your Company's affairs are in most excellent condition, from every angle.

There have been no changes in the personnel of the Board of Directors or of the officers during the year, except that Mr. Harry J. Bauer, our former General Counsel, who succeeded the late Mr. H. H. Trowbridge in that office, has tendered his resignation and taken up private practice. Mr. Bauer's leaving was a source of keen regret to the Directors and Officials of the Company, but we were most for-tunate in securing the services of Mr. Roy ∇ . Reppy, formerly with O'Melveny, Millikin & Tuller of this city, who now occupies the office of General Counsel.

Under the leadership of our First Vice-President, Mr. R. H. Ballard, who is also President of the National Electric Light Association, the 1920 Convention to be held next May has been secured for this portion of the State, and will hold its sessions in Pasadena. The National Electric Light Asso-ciation represents \$3,000,000,000 of invested capital, 300,000 employees located throughout the United States, and it is expected that about 3,000 delegates will attend the Convention.

During the year the Company has taken a forward step in adopting a most liberal and progressive Pension for its employees. It has met the increased cost of living with commensurate advance in wages, and these conditions, coupled with the fact that since the inception of our stock campaign in July 1917, 1,700 of our employees have become stockholders and the number is increasing at the rate of about 60 a week, emphasizes the spirit of co-operation existing with the Company's employees.

As evidence of the fine spirit pervading our organization, final tabulations showing response of all employees of the company to war calls, such as Liberty Bonds, Red Cross, &c., totaled \$885,699, an average of \$354 per employee.

The Board desires, through me, to endorse the comments of the President on the co-operation, loyalty, and efficiency of the entire Company's personnel.

By order of the Board of Directors,

JOHN B. MILLER, Chairman.

REPORT OF THE PRESIDENT.

February 16 1920.

Mr. John B. Miller, Chairman, Southern California Edison Company:

Dear Sir:

3

S

B

Total

I submit herewith annual report on the management of the properties and business of the company during the year 1919.

GENERATING PLANTS.

The generating plants on the system are interconnected and operated in parallel, the installed capacity being the same as set forth in my annual report for the year 1918, and together with subsidiary companies, consists of the following:

| outhern California Edison Company | En conner | | |
|---|-----------|--|-----|
| Big Creek (2 plants) | 85,400 h | lorsepower | |

rsepower

The generating plants, both steam and hydro-electric, have been maintained in a high state of efficiency, and are all in excellent operating condition.

The kilowatt hour output from these plants and other sources was as follows:

| 1919. | | 1018 | |
|---|--------|---|------|
| Water power plants | 11 KWH | $1918. \\ 554,235,214 \\ 186,698,288 \\ 13,655,494$ | |
| Total Edison System 854,960,22 Distributed to Los Angeles consum- | 38 " | 754,588,996 | . ж |
| ers from water power plants of the City of Los Angeles, additional \$0,884.8 Output of subsidiary companies ex- | 10 ** | 79,525,830 | |
| cluding power from Edison sys- tem63,688,63 | 88 " | 65,118,765 | - 11 |
| 999,533,78 | 36 " | 899,233,591 | # 1 |

The peak of the total system for the year was 200,020 kilowatts, and the annual load factor 58:3% based on the highest 15-minute peak.

ADDITIONAL HYDRO-ELECTRIC DEVELOPMENTS.

All classes of business, particularly industrial, oil development and agricultural, were given a tremendous impetus upon the signing of the armistice. This placed before us unusual demands for electric power, which are increasing. These will be met by development of additional power. We are fortunate in having 900,000 hydro-electric horsepower capable of development on a commercial basis in the watersheds in which the company's principal power plants are located.

On the Kern River where we have two hydro-electric plants in operation, an additional plant will be put in service this year. This plant, known as Kern River No. 3, will have a capacity of 40,000 horsepower. The power will be transmitted forty-five miles at 60,000 volts from the point of development to Richgrove in the San Joaquin Valley, connecting with the Big Creek lines, so the power may be distributed north or south.

Our main sources of undeveloped power are on Big Creek, and in the upper San Joaquin watersheds, where there is a possible development of upwards of 800,000 horsepower. Two plants, Big Creek Nos. 1 and 2, 85,400 horsepower, are now being operated, with Huntington Lake, 90,000 acre feet capacity, as a reservoir. A third unit of 22,000 horsepower at Big Creek plant No. 2 will be in operation in 1920. A third unit of the same size will be installed in Big Creek Plant No. 1, the energy from which will be available in 1921.

Work is in progress on the development of a third plant on Big Creek, from which 50,000 horsepower is expected to be available during 1922. Additions to this plant will be made from time to time as the runoff from watersheds is made available through the construction of tunnels and reservoirs to an ultimate capacity of 235,000 horsepower.

The drainage areas tributary to the Big Creek plants, developed and undeveloped, are as follows:

Plans for the best utilization of this water supply have been carefully studied for a number of years, and ultimately several additional plants will be constructed below the present installations, making further use of the same waters falling through the several plants, an aggregate total of 6,000 feet. The construction program of this company provides for the commencement of the following projects during 1920:

Construction of Florence Lake tunnel, a distance of 10 miles through the mountains, requiring several years to complete.

Diversion of Pitman Creek through two miles of tunnels to Huntington Lake. This tunnel project will be completed in 1921.

Shaver Lake Reservoir: By purchase from the Fresno Flume & Lumber Company, this company has acquired approximately 30,000 acres, including Shaver Lake. The construction of a dam will enlarge the reservoir capacity to 50,000 acre feet, which will ultimately be increased to 146,000 acre feet upon the completion of the Florence Lake tunnel. This latter project is a necessary adjunct to secure full and efficient operation of our water powers.

CITY OF LOS ANGELES.

During the year through the operating agreement with the City of Los Angeles, Southern California Edison Company distributed for the eity 80,884,810 kilowatt hours of electric energy generated at the eity's hydro-electric plants, for which the eity's proportion of Los Angeles business amounted to \$617,889 72.

The city's proportion of Los Angeles business amounted to \$617,889 72. A formal contract has been executed for the sale of the company's distributing system located within the City of Los Angeles to the City in consideration of \$11,000,000 cash, plus the cost of extensions since July 1 1919, and a further agreement that the city shall buy from the company at wholesale all of its power requirements in excess of that generated at its own plants for a period of thirty years, sub-ject to cancellation after ten years by a vote of the qualified electors of the city. The company will continue to furnish the power requirements of city and interurban railways. Bonds to provide for this purchase have been voted by the people, but the validity of the election has been attacked in the courts and several suits are now pending. In the interim a new operating agreement has been ex-cented as a result of a series of conferences presided over by the President of the Railroad Commission of the State of California. Operations in Los Angeles are at present being conducted in accordance with the terms of this new operating agreement.

agreement.

THE CHRONICLE

TERRITORY SERVED.

TERRITORY SERVED. Although the Company's income shows a marked increase for the year 1919 over the preceding year, this has not been brought about by extending generally into new fields, the territory supplied being practically the same as in 1918. However, it is worthy of note that the population in the territory supplied now shows an increase from 1.250,000 to 1,500,000. During the year 1919 the Company was in a position to care for all reasonable demands for electric service, and extensions to distributing systems were promptly made. The majority of extensions made were into the agricultural districts, where new lands were brought under cultivation. cultivation.

BUSINESS DEVELOPMENT.

An analysis of the income in the various geographical districts of the company indicates that with the ending of the war there has been a freer use of electric service for all purposes, and due to the shortage of industrial and domestic labor, there is a tendency to make electricity a greater servant than ever before. During the year 1919 there has been no apparent gain in the number of consumers supplied with service. This is accounted for by the fact that early in 1919 the company sold its remaining gas properties in Santa Barbara and Ventura Counties, and by this sale transferred 8,684 consumers. However, in 1919 the Com-pany added approximately 9,000 electric consumers, so that the number of consumer lost by the sale of the gas properties was fully made up by the taking on of additional electric consumers. In 1919 the total new business contracted for was as follows: An analysis of the income in the various geographical was as follows:

| Power Lighting Cooking and heating Lamp socket appliances | Horsepower, 41,000 14,400 1,600 30,000 | Estimated Annual Income. \$650,000 290,000 11,000 180,000 |
|--|--|--|
| | \$7.000 | \$1 121 000 |

RATES.

It was not deemed necessary to make any changes in the company's established rate schedule during the year 1919. Complete schedules covering all classes of service were filed with and approved by the Railroad Commission of the State of California during the latter part of 1918, and under these schedules the company has since continued to operate.

BUSINESS PROSPECTS.

BUSINESS PROSPECTS. Trospects for new business in the electrical industry in Southern California were never as great as at the present time. Since January 1 1919 the company has added to its lines 203 new industrial plants ranging in capacity from a minimum of 10 horsepower to a maximum of 3,500 horse-power, and averaging 67 1/2 horsepower each. During the same period additions to capacity have been made to many industrial plants already supplied with the company's service. The demand for service for agricultural purposes is already heavy for the current year and the amount of properties promises to be much greater than heretofore. The year 1920 will see a large amount of construction for resi-dences and apartment houses in order to keep up with the immediate and future necessities. It naturally follows that a heavy increase in such industrial lines as supply construc-tion materials. It will not be necessary to do much soliciting for new business during the year 1920, as the company will be kept busy keeping up with requests for service which are lowing into all its offices. **COPERATION IN THE INDUSTEX.**

flowing into all its offices. CO-OPERATION IN THE INDUSTRY. There has developed a very decided movement along co-operative lines in Southern California, the object being to cement friendly relations between the various branches of the electrical industry. The work has been educational in its character, and has been carried on among the power company employees, manufacturers, jobbers, electrical con-tractors and dealers. The result has been that each branch of the industry is receiving stimulation and encouragement to perform its particular function, the aim being that all engaged in the electrical business will be benefited by the spread of the spirit of co-operation, and that the public will be better served and better pleased. The Southern Cali-fornia Edison Company has taken an active part in this movement and has reason to feel that the results obtained so far have been highly satisfactory. Undoubtedly this company will continue to be a beneficiary of the co-operative movement as the work spreads and its usefulness increases. CONNECTED LOAD.

CONNECTED LOAD.

The following is a comparative statement of the connected load of Southern California Edison Company and subsidiary companies, by installations on consumers' premises at the close of the year 1919 as compared with 1918:

METERS.

| Total | |

-----\$9,209,523 58 (*Net after credit for gas properties sold.) GENERAL.

GENERAL. California, and particularly our section of the State, is experiencing a growth and development exceeding anything in the past. With the great influx of population and the many natural resources and opportunities at hand, the com-ing year gives promise of substantial increases in all lines of business activity. The one great essential is a cheap and abundant supply of power. Owing to the scant fuel deposits of the State, the development of its water power is recognized as a public and economic necessity. This company's pro-gram of water power development is designed to meet these inevitable demands.

inevitable demands. Our relations with the public have been most satisfactory. The company is in splendid repute throughout the territory it serves and its rates are regarded as fair and equitable. At a time when labor unrest is more or less provalent, we are pleased to say that our organization has evidenced a loyalty and solidarity that serve to exemplify the splendid relations that have existed between officers and employees in the past.

relations that have existed between the been efficiently in the past. The company's plants and properties have been efficiently conducted and maintained. Such matters as insurance and depreciation are carefully and adequately provided for. All indications point to one of the biggest and most successful years in the company's history. Yours very truly, W. A. BRACKENRIDGE, President.

Deduct: Provision for depreciation.

carried to surplus......\$1,983,182.70 We have examined the books and accounts of the Southern California Edison Company for the year ending December 31 1919, from which the above statement has been prepared. Miscellaneous charges aggregating \$20,221 62 (net) have been charged direct to surplus in accordance with the classifi-cation of accounts prescribed by the Railroad Commission of the State of California. The only portion of the earnings or expenses of owned or controlled companies which has been included is dividends or interest received from such com-panies.

Subject to the foregoing and the sufficiency of the provision for depreciation, we certify that, in our opinion, the above statement fairly and correctly sets forth the results of the operations for the year.

February 16 1920.

MIDVALE STEEL AND ORDNANCE COMPANY

FOURTH ANNUAL REPORT-FOR THE FISCAL YEAR ENDED DECEMBER 31 1919.

7 West 10th Street, Wilmington, Delaware.

Wilmington, Delaware. To the Stockholders: The year 1919, while fairly satisfactory as to final results, presented many difficult and perplexing problems. Very early in the year a general hesitation in business became apparent, due to readjustment from war conditions. This resulted in a material decrease in orders, so that we were only able to operate at about sixty (60) per cent of our normal capacity for the first eight months. Labor troubles in the fall further reduced our operations, so that for the entire year our total production was only about fifty (50%) per cent of our normal capacity. During the year we added to our ore reserves by purchasing a substantial interest in the Mesabi Iron Company, a cor-poration which has been formed for the purpose of mining and beneficiating the extensive deposits containing magnetic iron owned by it on the eastern end of the Mesabi Range in Minnesota.

Minnesota.

iron owned by it on the eastern end of the Mesabi Range in Minnesota. The importance of proper home surroundings for em-ployees has been recognized by this Company since its organization, and efforts have been made to improve living conditions in the various communities in which the works are located, by acquiring property and erecting buildings which, while furnishing modern conveniences, were within the means of the workmen. We believe that the interests of the Company are identical with those of the communities in which the various plants are located, and that the ideal American community is one in which all, or at least a majority, of the eitizens own their own homes. The subject of homes for employees was considered at the meeting of the elected representatives of employees and officials of the company, held in Philadelphia, May 10th 1919. The hope was then expressed by the employees' representatives, that the Company would extend its activi-ties in the matter. War conditions have accentuated the necessity for addi-tional homes, and in order to meet the needs of our work-men in this respect, and to establish a system which will be uniform for all of the different communities affected, the Board of Directors, at the meeting held June 4th, 1919, adopted a resolution which, among other things, provided a fund of \$2,500,000 to institute an extensive and reasonable Home Building Plan. This plan, in substance, provides for loaning to our workmen, under proper safeguards, an amount not in excess of ninety (90%) per cent of the value

of the home to be purchased or built. These loans are liquidated by regular monthly payments to be made over a term not in excess of twelve (12) years. Of the above amount, \$1,026,032 52 have been expended in loans to three hundred and fifty-six (356) employees. The Board of Directors, at a meeting held May 7th 1919, authorized the establishment of a Pension Plan for em-ployees. This provides for a uniform pension of \$30 00 per month, regardless of position, wages or salary prior to retire-ment. Retirement on pension will be compulsory upon reaching the age of seventy (70) years, provided the employee has previously completed twenty-five (25) years of service. Employees may be retired either at their own request, or by the Company, after reaching the age of sixty-five (65) years, and having completed twenty-five (25) years of service. Any employee who becomes permanently and totally incapacitated as a result of disease or injuries, for which compensation is not being paid or provided under Work-men's Compensation laws, and who has then been fifteen (15) years or longer continuously in the service will be eligible for a pension.

(15) years or longer continuously in the service will be eligible for a pension. The status of our Pension Plan as of December 31st, 1919, is shown on page 18 [pamphlet report]. Desiring to have as many of our employees as possible in-terested in the actual ownership of the Company, they were offered the opportunity in January, 1917, to purchase stock in the Company, to be paid for by monthly installments. This offer was renewed each succeeding January. During the three years, 1917, 1918 and 1919, three thousand two hundred and fifty-four (3,254) certificates for fourteen thousand and twenty-eight (14,028) shares have been paid for and delivered to employees. for and delivered to employees. Our Plan for Representation of Employees, which was in-

Our Plan for Representation of Employees, when was me augurated October 1st, 1918, received a severe test during the year 1919. Under the auspices of a number of labor organizations, a general strike in the steel industry was called on September 22nd, 1919, with varying results as far as our different plants were concerned. At out Nicetown plant, there was no response whatever on the part of our men to this attempt to disrupt the pleasant relations existing between the Company and its employees.

on the part of our men to this attempt to disrupt the pleasant relations existing between the Company and its employees. At Coatesville, our operations were seriously curtailed for only about one week. At Johnstown, a sufficient number of men failed to report for work on September 22nd, to seriously curtail our operations.

BONDED DEBT AND SINKING FUNDS.

The aggregate outstanding Bonded Debt of the Company is \$25,739,500, exclusive of \$6,636,000 Five Per Cent First and Refunding Mortgage Bonds held in Treasury, and \$1,-000,000 of bonds of the Cumberland & Pennsylvania Railroad Company, issued under its mortgage of April 1 1891. The securities in the Sinking Fund of this mortgage, with the annual accretions, will provide ample funds for retirement of the bonds at their maturity. Included in the above outstanding Bonded Debt are \$5,873,500 of the \$6,500,000 Ten-Year Six Per Cent Convertible Secured Gold Bonds, \$626,500 of the said Bonds having been converted into Stock prior to December 31 1919. Of the authorized issue of \$40,000,000 First and Refunding Mortgage Bonds dated December 1 1910 there have been issued:

issued:

\$10,720,000 which are included in the above amount of outstanding bonds. 1,620,000 since purchased and held by the Sinking Fund. 5,500,000 pledged under the Ten-Year Six Per Cent Convertible Mortgage. 6,636,000 held in the Treasury.

There have been reserved and held for future requirements: \$9,146,000 to provide for the retirement of an equal amount of other bond issues of the Company. 5,978,000 to provide for future development and additions to the property.

The combined Sinking Fund Account for the year under the various mortgages, other than the Railroad mortgage, is:

Total Less \$279,000 par value of bonds purchased during the year at a cost of 258,019 42 258,019 42

Balance in and due Funds December 31 1919......\$178,524 88

| | 50 | 892 | 5.0 |
| | 0.000 | 1242.00 | and the |

\$66,078 39

The above forty-six bonds, plus twelve hundred and twenty-seven bonds purchased in prior years, make a total of one million two hundred and seventy-three thousand dollars par value of bonds cauceled and in the Sinking Fund December 31 1919. Of the amount in and due the fund, \$15,234 70 is applicable to the purchase of additional coal-bearing lands.

REMARKS.

The tonnage output for the year was approximately ten per cent less than for the preceding year. This loss of pro-duction is, of course, disappointing, but must be considered in connection with the fact that the total loss in bituminous coal production in the country for the year was approxi-mately twenty-two per cent when compared with the pre-ceding year. The industry as a whole has suffered from the failure of the railroad companies to furnish necessary transportation.

C. W. WATSON, President.

------TONNAGE.

COAL MINED BY THE CONSOLIDATION COAL COMPANY.

BARNSDALL CORPORATION

FIRST ANNUAL STATEMENT 1919.

To the Stockholders:

New York, March 1 1920.

One of the interesting things America has done is to add to the list of poets, prophets, and scientists, the masters of finance. They, all of them, drink from the same well of knowledge; they, all of them, see the vision of something that is not yet, but is to be. It is the proof of their leadership that they look into the future with eyes that see things potential and undreamed of by the men about them. Theodore N. Barnsdall stands among these seers.

As early as 1859, when Col. E. L. Drake was drilling his first well on Oil Creek, near Titusville, Pennsylvania, young Barnsdall was neglecting his school in a near-by village because of his keen interest in the drilling operations. In the year 1867 Mr. Barnsdall "worked" on his first oil well, and continuously since that time the Barnsdall Interests have been active in the production of oil and gas in nearly all the fields in the United States and Canada.

Mr. Barnsdall's vision came as he watched the drilling of the "Drake well" and it continued to beckon all his life; he followed it, and when he passed away his Estate possessed oil, gas and mining properties of uncounted potential wealth.

Mr. Barnsdall selected the Honorable S. S. Mehard (deceased) and Robert Law, Jr., as his executors and trustees, who continued the operation and development of the various properties until May 9 1919, at which time the Orphans' Court of Allegheny County. Pennsylvania, accepted the final report of the executors. The Court issued a Decree of Distribution and released the executors and trustees on May 21 1919.

May 23 1919 all the interests of the T. N. Barnsdal Estate were merged into the Barnsdall Corporation, the operations of all these interests for the year 1919 being included in the financial statements. The organization, therefore, as it exists to-day is less than a year old, though it really represents the continuous operation of a group of properties, the visions of which Mr. Barnsdall saw at the drilling of the original "Drake well."

MINING DIVISION.

The development of gold, silver, copper, lead, zinc, and coal properties always had a great fascination for Mr. Barnsdall. His interest in this direction led him to acquire a number of mining properties, a few of which the Corporation is developing along conservative lines. Early in 1920 our subsidiary company, the Barnsdall Zine Company, will be one of the largest producers of lead and zine in the great Missouri-Oklahoma-Kansas district.

The development work on one of our copper properties has been continuous for several years and has now reached a point to justify the installation of a concentrating mill, the machinery for which has been ordered. It is expected that this property will begin earning a substantial revenue about July 1 1920.

The Corporation has recently acquired by purchase the two largest producing properties of "Tripoli" in the world, and will operate them under the name of the "American Tripoli Company." The name "Tripoli" has long been applied to these deposits, which are non-metallic in character and are enormous beds of puresilica lying but a few feet under the surface and easily quarried and manufactured into various products. The data of this unit of the Mining Division will appear in detail on a subsequent page [pamphlet report].

Your attention is called to the Barnsdall Coal Company, all of the stock of which is owned by the Corporation. The property consists of 17,000 acres of coal land in Wyoming County, West Virginia. We do not expect to develop this property in the near future although drill work at a number of places has apparently well defined the value of the property.

Our representative, who recently visited the City of Mexico, confirms our letter records that the Mexican Government recognizes our valuable concessions at Pinos Altos and Santa Barbara in the State of Chihuahua. As soon as conditions justify it, we will resume the operation of these mines which were closed at the outbreak of revolutionary disturbances.

Other mining properties now owned by the Corporation and having great potential value will be developed as rapidly as possible in a conservative way, and the next one to receive our attention will probably be a large gold and silver mine. As a whole, therefore, a careful analysis of our Mining Division convinces us that Mr. Barnsdall's vision will be realized as fully in this direction as it was in the oil situation.

PETROLEUM DIVISION.

The properties operated by the oil and gas division are being developed likewise in a conservative manner—leases are secured when desirable and surrendered when undesirable.

Our Tulsa, Oklahoma, office was established for the special purpose of keeping in close touch with the operations of all companies in new fields, and through this channel we have secured valuable leases. A lease recently purchased in the Beggs District, Oklahoma, is being developed and operated by our Victor Oil Company, and promises to be among the most valuable properties in this prolific field.

We have also secured large acreage in Louisiana which will be tested during 1920.

The properties of the Pittsburgh Oil & Gas Company in the eastern fields, as well as its holdings in Oklahoma, are being improved and the production increased.

The Potter Gas Company, with its large number of small wells in one of the oldest gas fields in the United States, is maintaining its earnings in a satisfactory manner, and through its subsidiaries, the Potter Oil Company of California and the Potter Oil Company of West Virginia, is building up a fine production.

A summary of the wells owned and the territory leased in each State by our underlying companies is as follows, and the details of each company will be found on subsequent pages [pamphlet report]:

| State- Gas New York I Pennsylvania 1 Ohio. 475 West Virginia 475 Kentucky 1 Indiana 1 Illinois 1 Kansas 0 Oklahoma 1 Texas 1 California 1 Colorado 0 | olt & Gas 22 92 | WELLS. 0/l. 14 351 184 251 2 38 1341 109 3 40 | Operated. 343 26615.75 3991.04 21624.18 250 178 26784.82 1392.75 40 768.32 | res Unoperated., 40662.1 2536 26274.7 7182.55 1160 6050.91 24122.38 72948.2 176 2225.46 |
|--|-----------------------|--|--|--|
| Total Wells | 94 | 2333 2903 | 81987.86 | 6792 190210.3 272198.16 |

The Consolidated Balance Sheet exhibits the combined assets and liabilities of the Barnsdall Corporation and subsidiary companies of which the entire capital stock is owned. The value of the properties as shown are those at which they were acquired by the Barnsdall Corporation and such subsidiary companies, and do not reflect enhancement due to development, discovery and economic conditions.

Investments in shares of affiliated companies of which the Barnsdall Corporation owns part only of the capital stock, such as Pittsburgh Oil & Gas Company, Potter Gas Company and Moneton Tramways, Electricity & Gas Company, Limited, are carried at the actual cost of such shares. The total dividends received in the year from such investments (somewhat less in amount that the proportion of actual Properties:

earnings applicable to the stock owned) are included in the Consolidated Statement of Income.

We are heartily in accord with progressive policies of successful and rapidly growing business enterprises. Therefore, our associates, officers and employees, responsible for the rapid expansion of Barnsdall Corporation affairs, are accomplishing excellent results through efficient, loyal and enthusiastic team work in the brief history of our organization. The life of every employee in each of the subsidiary companies is insured, without any expense to the employee, the amount of policy being calculated in accordance with the length of time the employee has been in our service. The Corporation, in addition to protecting the families, or other beneficiaries, through life insurance, offered an opportunity to each employee to become a shareholder in the Barnsdall Corporation through an attractive stock purchase arrangement by deferred payments at less than par. A fund is also set aside during every year for the distribution of a "bonus" based on the responsibilities of the position and the length of time each employee has been in the service of the Corporation or its subsidiary companies.

During the many years of intimate association in private and business life with Mr. Barnsdall, the writer was never able to grasp the scope of his tremendous imagination in

business affairs. He seemed to be possessed of supernatural insight in acquiring properties of rare value. His colossal courage went hand in hand with a determination to discover and develop natural resources. Toward the end of his remarkable career he stated that he did not realize the value of his possessions, and it was his wish that his affairs be kept intact and conservatively developed. Every effort has been exerted to maintain the organization of young men which surrounded Mr. Barnsdall in the last ten or twelve years of his lifetime. His affairs seemed to fall into two important divisions-Petroleum and Mines. Thus, with a painstaking and efficient organization extending throughout the country, the properties are receiving constant and diligent care and are in splendid condition, although we feel keenly the absence of the "Master Mind." The officers and employees, shortly after Mr. Barnsdall's death, sought to find some emblem which would represent the dominating element of his great personality and likewise represent the real character of his business dealings throughout his lifetime, and thus wherever is found the influence of the Barnsdall Corporation the basis of its very existence will "Be Square."

Board of Directors.

ROBERT LAW, JR., President.

BARNSDALL CORPORATION AND SUBSIDIARY COMPANIES.

The Commercial Times.

COMMERCIAL EPITOME

Friday Night, March 19 1920.

Trade has brightened up somewhat. In most parts of the country weather has been better, though to-day and last night there were violent storms in the West which naturally interfered with business there for the time being. But in the East clear and milder weather has helped retail trade, especially as Easter is only two weeks off. Also wholesale and jobbing trade has increased a little. Yet it is true that with credits inflated, prices high and the cost of doing business still abnormally great with an unwonted absorption of capital there is still a disposition to keep within conservative limits especially as to ordering for future delivery. There is plainly a tendency to limit purchases to present needs. Nowhere is trade as active as it was at the peak in 1919. although taking the country over and allowing for the activity in manufactures it is still larger than it was in the days before the war. Collections too are better. Failures though more numerous than recently and for the same time last year are much smaller than in previous years. The rise in stocks and in sterling exchange have cheered the commercial world. So has the speedy collapse of the so-called revolution in Germany. Events in that country are sharply watched, but it is hoped that the forces which make for the best interests of Germany have permanently got the upper hand. Meanwhile the demand even to satisfy immediate wants puts the mills and factories on their mettle to supply it. In some sections it is true bad roads, bad weather, strikes, or scarcity of raw material and of cars hurt trade. It is gratifying to notice, however, that cars are a little more plentiful. And the output of iron and steel is increasing. There is a wide demand for steel. The sales of building materials are large including lumber, paints, oils and hard-

There is a wide demand for steel. The sales of building materials are large including lumber, paints, oils and hard-ware. Efforts are being made by the New York City authorities to promote building. The shortage in housing is great all over the country. Raw silk has declined. The but raw wool following recent Government auctions is quiet. Woolen stocks are said to be unsuually large. Prices of live animals are lower. Credits in general trade, notably to wool following recent Government auctions is quiet. Woolen stocks are said to be unsuually large. A prices of live animals are lower. Credits in general trade, notably to whole alers, are not so readily extended as they vere earlier of the part of 60 days. Building is in some sections hampered by the exorbitant demands of labor, high prices for materials and bad weather in a very sovere winter. Farm work is very backward on the cotton crop at the South. Parts of the West need rain while others are hampered by the vere advances it. will deeline in price. The conservative element in business maintains that there parts at the year advances it. will deeline in price. The conservative element in business maintains that there is presistent deflation of loans of prices through a cautious but production may be increased. Meanwhile the times are arrive, that the times call for ceonomy, thrift and hard work, that be buy is still high, if not rising. He is one of the largest buy one of the country's manufactures. Reduce his buying power and it hits the mills and factories throughout the united States. Prices are considered to high for the great the for the country's manufactures. They are so high that the doment and purposes much the same as adding to the issues of paper currency. The dollar practically shifts in the difference on the same as adding to the issues of paper currency. The dollar practically shifts in the difference on the same as adding to the issues of paper currency. The dollar practically shifts in the difference on the same as adding to the issues of pape

Cincinnati. Operators, he thinks, may make new contracts after April, without regard for prices fixed in October, 1919. Anthracite operators, it is stated, have produced a volume of income tax reports to prove that wages have more than kept pace with the increase in cost of living. They state that a 30% wage advance and a 7-hour day will increase the cost of coal at least \$2 per ton to the consumer. And where is all this to end? In the summer when work is slack at the mines the operatives could get high wages in nearby grain fields, but it is said that they refuse to work there. Strikes are in progress among cotton mill workers at Fall River. It is pointed out that wages have been advanced in the textile industries since the beginning of the war by something like 140%, which is much more than the increase cost of living, as calculated by the official authorities. At the same time production has been reduced by shortening the hours of labor and the lessened efficiency of the oper-ative. The output of cloth has been reduced to the dis-advantage of the country at large. The shortage of freight cars in New England remains acute. The Boston & Maine may be forced to put on another freight embargo. Freight cars in New England remains acute. The Boston & Maine may be forced to put on another freight embargo. Freight houses are clogged with goods on which careless receivers are paying storage. Cars are idle on tracks fully loaded, while demurrage is being paid. Big sand and dust storms occurred in the Southwest to-day and a blizzard in the northwest. In the eastern Rocky Mountain regions the wind within the last 24 hours has been as high as 47 to 100 miles an hour. In Nebraska high winds, it is feared, may do some damage to winter wheat. There was a furious storm of sleet and snow with high winds in Iowa, Minnesota, South Dakota and Wisconsin, a storm as bad as any that has occurred this winter. It handicapped railroad and wire communications.

communications. LARD firmer; prime Western, 21.55@21.65c; refined to the Continent, 23.75c; South American, 24c; Brazil in kegs, 25c Futures have advanced with hogs. Commis-sion houses have been buying. This has been a feature. So has the light run of hogs at the West. Holland has granted a loan to Germany, and this may mean a better export trade. At any rate, it caused more or less buying at one time. On the other hand, packers have been sellers, on the advance, to a rather liberal extent. Cash lard sold at Chicago on the 17th inst, at 9 cents under May to a carrier an unusually large discount. The semi-monthly statement of stocks at Chicago was also, moreover, considered bearish. To-day prices advanced and then reacted, ending somewhat higher for the week.

SUGAR advanced on a good demand. Sales of late in-clude Cuba at 11c. c.i.f. March loading; later 11¼c. asked and 11c. bid. Porto Rico is reported scarce and wanted at the same parity with Cuba, or 12.04c. c.i.f. San Domin-gos afloat sold at 10 7-16c. c.i.f. delivered to a local refiner. St. Croix second half April shipment sold at 11½c. c.i.f. delivered to trade buyer. Forty to fifty thousand bags of Cuba March-April shipment (North Side) sold at 10½c f.o.b. to operators earlier in the week; Cuba first half of April ship-ment (North Side) sold at 10½c. f.o.b. to an operator; 40,000 to 50,000 bags Porto Rico in port afloat or prompt shipment sold at 11¾c. c.i.f. delivered to a local refiner. Refined has been in brisk demand. Deliveries are better. For the week ending March 17 receipts of sugar in the United States were 63,447 tons, or decidedly smaller than in the previous week, when they were 112,116 tons. All this and talk of dry weather and hints of reduction in crop estimates

have had much to do with stimulating the demand and adhave had much to do with stimulating the demand and ad-vancing prices. Reports of dry weather and intimations of damage thereby are in some quarters considered exag-gerated. Also the receipts at Cuban ports hast week reached the liberal total of 156,953 tons. With better railroad facili-ties it is believed they would be larger. Granulated, 14@ 14½e. To-day sugar futures were more active at higher prices. They end well above those of a week ago. __cts_11.70@11.75 September _____cts_11.60@11.65 _____t55@11.65 December _____@____ May_____

\$2 271%. Common to good strained rosin \$18. PETROLEUM in keen demand and steady; refined in barrels 23,50@24,50c.; bulk 15@16c.; cases 27@28c. Gaso-line in good demand and steady; motor in steel barrels 28.½c.; corsumers 30.½c.; gas machine steel, 47.½c. Royalties on oil production from Government land under the claims for relief section of the oil land leasing bill are fixed at 12½ to 33.1-3% in regulations issued by the Interior Department. It is reported that the Baku oil fields in Russia were captured by the Bolsheviki. Governor Hobby, of Texas, has ordered sent to the Texas-Oklahoma, a force deemed sufficient to hold the oil land involved in the dispute between Texas and Oklahoma, and to surrender them to no one except upon a decree from the United States Supreme Court. Produc-tion of crude oil in the California district in February was 274,026 barrels a day, an increase of 939 barrels a day as compared with January. The total crude stocks as of February were 28,738,921 barrels, a decrease of 872,704 barrels during the month. New daily production was 13,825 barrels. Pernextenta State States Barkburnett 33.50 barrels

are making rapid progress in export business.

COPPER more active and steady; electrolytic 18^{1} /c. Tin lower at 58^{3} /sc. Lead in fair demand and steady at 9@91/c. Zinc lower at 8.623/c. for spot St. Louis.

Tin lower at 58³5c. Lead in fair demand and steady at 96914c. Zine lower at 8.6215c. for spot St. Louis. PIG IRON has latterly been quieter, though it is said that high European markets are now accessible to the American product. Export trade may improve before very long. Latterly, however, offerings have increased. Basic sold at \$41 50. Eastern Penn, has been quoted here on the basis of \$43 for No. 2 plain, with higher grades \$44@\$45. There is rather better demand for basic iron. STEEL business is still hampered by a shortage of cars, locomotives and coal. It is believed, however, that a promising future opens out for trade with South America and the far East. Brazil, it is said, will need much. China wants steel, it is said in large quantities. The Duteh East Indies are a not uninviting field. They have already bought quite freely this year in the United States. In the Far East railroad construction is one of the big outflets. Continental Europe may buy freely in this country. Canada may be a buyer here also. Meantime prices are firm. Production lags behind deliveries due. Floods in the Ohio Valley eer-tainly have not helped matters. Some 40,000 boxes of tim plate were destroyed by fires at Pittsburgh. Nails and sheets are at premiums. It is said that English shippers are feeling in this market for plates. It is stated that of 300,000 tons of ship-building material owned by the United States Government 20,000 tons have been sold to England, 8,000 tons to Italy and 10,000 to Japan with 15,000 tons likely to go to Scotland.

COTTON

Friday Night, Mar. 19 1920. THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 114,627 bales, against 122,886 bales last week and 133,449 bales the previous week, making the total receipts since Aug. 1 1919 5,705,259 bales, against 3,980,007 bales for the same period of 1918-19, showing an increase since Aug. 1 1919 of 1,725,252 bales.

Including 1,500 for Japan. * Estimated.

^a Including 1,500 for Japan. ^a Estimated. Speculation in cotton for future delivery has latterly been more active at advancing prices. Liverpool has been rising and has bought on quite a liberal scale here. So have trade interests. March reached a new high level of 40.39c. This has frightened shorts in May and July. What contributed largely to their perturbation was a reduction in the certifi-cated stock here on the 18th inst. to 1,220 bales. Of course the certificated stock here has been small for many months The second shorts in May and July. What contributed largely to their perturbation was a reduction in the certificated stock here on the 18th inst. to 1,220 bales. Of course the certificated stock here has been small for many months. But this latest reduction seems to be an impressive object lesson. At any rate, there was heavy covering in May and July, partly on the strength of it, and all months on the list rose to a new high level. The exports on the 17th and 18th instants reached a very respectable aggregate. And efforts are being made to secure credits for Germany. Meanwhile one steamer is reported to be loading cotton for Germany at Galveston. And several other German steamers, it is said, will arrive there before long for the same purpose. Foreign exchange after declining early in the week has latterly advanced. The rise in the stock market has also had a more or less favorable effect. Money, moreover, has kept down around 7 to 9% on cell. Silver in London advanced 216d. on the 18th inst. Poland is to get a loan from Great Britain. This may help American sales of cotton to Europe. A bill has been introduced in Congress to provide credits for about \$1,000,000,000 looking to the promotion of trade with Germany with eollateral in the shape of German property held by the United States Government in this country, German-owned securities, &c. The Bank of England rate of discount has not been raised.
Furthermore, the weather at the South, more particularly in the eastern section of the belt, has been de alse of the work as is a serious obstacle to the making up of lost time. In the days before the ware back are of our weeks late on the average, and in some sections as much as six weeks. One serious trouble, too, is the searcity of labor at the South. It is searce, dear and inefficient. This prevents a serious obstacle to the making up of lost time. In the days before the war backwardness of the season was often retrieved by subsequent good weather and hard work. As things now stand some think that ther

stand some think that there will be not a little land that will have to remain idle. Meantime there is some export de-mand reported in the Atlantic States. And in most sections of the belt spot holders are said to be firm, especially on the better grades. Trade interests here have been steady buyers. In some cases hedges have been covered in the old erop months and put out again in the new. That is sup-posed to be one reason why new crop months have not al-ways kept pace with the old crop in the upward movement of prices. of price

Finally although the market was undoubtedly disturbed for a time by news of a revolution in Germany it was re-assured later in the week by the return of Ebert and the

On the other hand the advance has recently been so rapid and so sharp that it is argued a reaction is due. In less than

THE CHRONICLE

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Foreign stocks, as well as the afloat, are this week's returns, and consequently all foreign figures are brought down to Thursday evening. But to make the total the complete figures for to-night (Friday), we add the item of exports from the United States, including in it the exports of Friday only.

WEATHER REPORTS BY TELEGRAPH.—Advices to us by telegraph from the South this evening denote that comparatively dry weather has been the rule in the South-west during the week, but at some points elsewhere there has been rather too much rain. From Texas we are advised that cotton is being planted in the Rio Grande section and in other portions of the State preparatory work is under way where possible. In the belt as a whole farm work is back-ward on account of rainy weather. Galveston, Tex.—Cloudy weather with light showers at scattered localities prevailed during the week. Cotton is being planted in the Rio Grande section. In other portions of the State preparations for planting are under way where possible. Rain on three days of the week. The rainfall has been two hundredths of an inch. Average thermometer 59, highest 70, lowest 48. *Abilene*, Tex.—There has been no rain the past week. The thermometer has averaged 60, the highest being 80 and the lowest 40.

lowest 40. Brownsville, Tex.-

-There has been no rain during the week.

The thermometer has averaged 63, ranging from 40 to 86. Dallas, Tex.—It has been dry all the week. The ther-mometer ranged from 44 to 82, average 63. Palestine, Tex.—Rain on one day of the week. The rainfall has been two hundredths of an inch. Average thermometer 61, highest 80, lowest 42.

San Antonio, Tex.—Dry all the week. The thermometer has averaged 60, the highest being 82 and the lowest 38. New Orleans, La.—We have had rain on one day during the past week, to the extent of sixteen hundredths of an inch. Shreveport, La.—There has been rain on one day the past week, to the extent of thirteen hundredths of an inch. The thermometer has ranged from 42 to 80. Vicksburg, Miss.—Average thermometer 62, highest 80, lowest 40.

lowest 40.

Vicksburg, Miss.—Average thermometer 62, highest 80, lowest 40.
Mobile, Ala.—Farm work is two to three weeks behind on account of rain and is making slow progress. There has been rain on one day of the week to the extent of fifty-one hundredths of an inch. The thermometer has averaged 63, the highest being 77 and the lowest 45.
Selma, Ala.—We have had rain on five days during the past week, to the extent of three inches and fifty-five hundredths. The thermometer averaged 59, ranging from 32 to 80.
Savannah, Ga.—It has rained on three days during the week, to the extent of one and two hundredths. The thermometer ranged from 40 to 76, averaging 60.
Charleston, S. C.—Rain on two days of the week. The rainfall has been one inch and ten hundredths. Average thermometer 55, highest 72, lowest 37.
Charleston, S. C.—It has rained during the week to the extent of three inches and one hundredth. The thermometer has averaged 54, the highest being 71 and the lowest 30.
Gen. Stephen M. Weld, founder and head of the cotton house of Stephen M. Weld & Co., died Tuesday at Boea Grande, Fla. The immediate cause of death was given as a elot of blood on the heart, although he had not been in excellent health for some time. Mr. Weld was born in Jamaica Phin, Mass., 78 years ago, graduated from Harvard in the class of 1860, and soon after was commissioned a lieutenant in the 18th Massachusetts Volunteers and served with the Army of the Potomac through the Civil War. After returning to private life Gen. Weld founded the cotton house which has been known under his name since. He was also a member of several clubs, a Vice-President and Trustee of the Dedham Institution for Savings, a director of the Old Colony Trust, Bay State Trust, West End Street Railway and the Norfolk Mutual Fire Insurance Co. He was also a member of Charles W. Carroll Post, G. A. R., of Dedham.
We have received this week a complimentary copy of "Cotton Facts." issued by the Shepperson Publishi

of Charles W. Carroll Post, G. A. R., of Dedham. —We have received this week a complimentary copy of "Cotton Faets," issued by the Shepperson Publishing Co. of this eity. The present edition contains not only all the important statistics of previous issues, but several new features, including war risk rates on cotton, freight rates to Liverpool before, during and after the war, general cotton statistics of Great Britain since 1801, Fall River wages, &c. The book, as in all years since the death of Colonel Shep-person, has been compiled and edited by Mr. Carl Geller. With this issue announcement is made that the younger daughters of Colonel Shepperson have purchased the entire control of the Shepperson Publishing Co. and have asso-ciated with them several gentlemen well known in the cotton trade, making up a board of directors as follows: Wm. V. King, President; C. W. Shepperson-Bull, Vice-President; James F. Maury, Secretary and Treasurer; Julian A. Acosta and George M. Shutt. WORLD'S SUPPLY AND TAKINGS OF COTTON.

BREADSTUFFS

Friday Night, Mar. 19 1920. Flour has been quiet as a rule. Some brands have been bought on a moderate scale. Yet some predict higher prices. Others view the future with more or less apprehension. What will happen when the Grain Corporation ceases to be? Meanwhile the lower grades are in somewhat better demand for export. The Mediterranean markets are buying first and second clears here. This has sensibly lightened the load of such grades. And the House of Representatives on the 15th inst. sanctioned the sale to Poland, Austria and Armenia of 5,000,000 bbls, of soft wheat flour. These countries will be glad to get it. And there has been some export demand from Africa and a certain amount of trade may result. Egypt was trying to buy it is said corn flour here. It is said to have ordered 147,000 tons of white corn flour. Canada would be willing to sell flour, it is intimated, considerably under recent prices. The Minneapolis "North-western Miller" said that large stocks held by buyers and particularly bakers and uncertainty as to the future course of the wheat market were mainly responsible for the lack of business, adding: "The feed market is active at rising business, adding: The feed market is active at rising prices, as the curtailment of milling operations is expected to result in a mill feed shortage. The output last week showed a material reduction. The spring wheat mills reported a total representing only 31% of capacity, the Kansas group of hard winter wheat mills about 54% of capacity, and the Toledo group of soft winter wheat mills about 35%."

about 35%." Wheat has latterly fallen 3 to 5 cents owing to rather larger receipts and the dullness of the flour trade. This makes mills indifferent as to buying. The visible supply decreased last week, however, 1,142,000 bushels. That brings it down to 49,026,000 bushels against 111,582,000 bushels a year ago. The Price Current Grain Reporter says that the seeding of oats is progressing northward slowly with indications of some increase in the acreage. Winter wheat conditions continue to decline. It is of course not yet possible to determine the damage wrought by the Hessian Fly or by winter killing, but in Kansas and Oklahoma rain is badly needed and already the light soils of those States have begun to drift with the high winds. In Germany the poor people are suffering from the shortage of food stuffs and present high prices. The revolution in that country was declared in some despatches to be due to economics. One hundred thousand bushels of eorn were shipped to Antwerp from the Black Sea ports. This may be suggestive. If corn, what eventually of wheat? Belgium has officially raised the price of wheat to 60 franes per quintal. Rou-mania, it is said, will eventually have to make fair exports in order to improve exchange. Czechoslavia has authorized the exportation of 1,000 wagons of corn. There has been a moderate export demand at New York for wheat. It is said that latterly more business has been done. Early in the week prices were 5 to 8 cents lower than last week, with offerings larger. Wheat has latterly fallen 3 to 5 cents owing to rather

Note the second of the second second

at five other ports including Santa Bahia Blanea and part of Buenos Ayres have proclaimed a sympathetic strike which is holding up overseas shipments. Argentine coastwise and river commerce has been paralyzed for nearly a month by a strike of steamship erews with no signs of an immediate settlement notwithstanding efforts to that end made by the Government and business firms. On the other hand prices of corn have already had a very sharp advance. Since Feb. 9th, May has advanced some 32 cents with only slight reactions. And the heavy covering of late on a nine cent rise has reduced the short interest. At any rate the tech-nical position is not considered so strong as it was. Some even claim that it is weak. And the visible supply increased last week 138,000 bushels as against a decrease in the same week last year of 633,000 bushels. The present total is 5,281,000 bushels against 3,374,000 bushels a year ago. The total of rye is 19,584,000 bushels against 15,227,000 a year ago. To-day prices declined. Heavy liquidation occurred at Chicago. The East has been cancelling pur-chases of cash corn on a rather liberal scale lately. Hogs were lower. Corn ends higher for the week however. DAILY OLOSING PRICES OF CORN FUTURES IN CHICAGO.

the week.

NEWS ITEMS.

NEWSTITEMS. Erie, Erie County, Pa.—Annexation Decision by Superior Court.—Judge Henry M. Trexler of the Superior Court, on March 12 overruled the decision of the late Judge E. L. Whittelsey of the local court and held that proceedings to annex portions of Millcreek township to the City of Erie were legal. The Cleveland "Plain Dealer" says: "Judge Trexler's opinion means that a territory practically as large as the present city will be added, and it also is be-lieved that it will change Erie from a third class to a second class city, thereby changing its system of government. "The Census Bureau at Washington has agreed to hold up the population of the affected area until a decision was reached on the annexation case so that it could be added

up the population of the affected area until a decision was reached on the annexation case so that it could be added to the total of the present city. "The property to be annexed surrounds the city on three sides and a large part of it has been developed. It will bring into the city several hundred houses erected by the Government during the war. "Opponents claimed that annexation of the territory would increase taxes and that valuable property was being allowed to remain outside the limits of the annexed section. "The case may be carried to the Supreme Court." Memphis. Shelby, County, Tenn - Low, Authorisian

allowed to remain outside the limits of the annexed section. "The case may be carried to the Supreme Court." Memphis, Shelby County, Tenn.—Law Authorizing Bonds Held Valid.—The constitutionality of the Act of the Tennessee Legislature authorizing Shelby County and the dity of Memphis to issue bonds for the crection of a public market and auditorium building was upheld when Judge H. W. Laughlin on March 9 overruled the demurrer to the dity of Memphis to issue bonds for the crection of a public market and auditorium building was upheld when Judge H. W. Laughlin on March 9 overruled the demurrer to the dity is condemnation suit. The case is to be appealed to the Tennessee Supreme Court. The Memphis "Appeal" says: The Court did not comment upon the case in handing down the decision, Judge Laughlin merely stating that the demurrer was overruled. The accurt did not comment upon the case in handing down the decision, Judge Laughlin merely stating that the demurrer was overruled. The court did not comment upon the case in handing down the decision, Judge Laughlin merely stating that the demurrer was overruled. The court did not comment upon the case in handing down the decision, Judge Laughlin the comment upon the case in handing down the decision, Judge Laughlin the comment upon the case in handing down the decision, Judge Laughlin the comment is a state of the second weeks ago and was argued before Judge Laughlin in Circuit Court March 4. The case was taken under advisement, the decision being dual Shelby County was referred to by mane in the body of the Act. He contended that this fact made the Act amee in the body of the Act. He contended that this fact made the Act and the chief one being that Shelby County was the ends of counties the rescent of the proposed and torium and market houses was not for a particular the chief one being that Shelby County was the ends of the advised in market and audiorium is unquestioned. Act. He took the pool ton y was the height in therefore the sound

sudiorium and market house will be built. Seattle, King County, Wash.—Bridge Bonds Voted.— Results on Charter Amendments.—At the election held March 2 \$1,500,000 Spokane Street bridge bonds were voted and of the 14 amendments to the city of Seattle's charter, those proposing to increase the salaries of the city councilmen, corporation council, city treasurer and city comptroller and changing the election day from March to May were defeated.
