Treas., William Dana Selbert; Sec., Herbert D. Selbert. Addresses of all, Office of Co.

#### The Financial Situation.

It will always be a distinctive feature of the Presidential campaign of 1928 that trade and business have proceeded without much regard to it. The seasonal recession, ordinarily characteristic of the summer months, has been almost entirely absent the present year. Particularly is this true regarding the iron and steel industry, accounts concerning which keep steadily growing better, these accounts being especially cheering the current week. Contrary to the contentions of certain commentators who insist that Presidential elections never do have an unsettling effect upon industrial activity, it is necessary to go back only four years, to the Presidential election of 1924, to find an occasion when the pending Presidential campaign exercised a deeply and a highly disturbing effect-when, indeed, an actual slump in business of large proportions occurred. And this slump found its strongest manifestation in the iron and steel trades, which to-day are giving such manifold signs of activity.

In 1924 production of steel dropped from 4,187,942 tons in the month of March to only 1,869,416 tons in July (a shrinkage of considerably more than 50%), and 2,541,501 tons in August, and the make of iron fell from 3,466,086 tons in March to 1,784,899 tons in July (also a reduction of almost one-half), and 1,887,145 tons in August, all the months mentioned having contained 26 days. In contrast, note the experience the present year. In March of the current year the output of steel ingots was 4,507,520 tons with 27 working days in the month; in July with only 25 working days in the month, the output was 3,811,573 tons and in August with 27 working days the output was 4,178,481 tons. It will be seen that comparing August with March, both having the

same number of days, the falling off was barely 8%, notwithstanding the heat of the summer, whereas in 1924, as we have seen, the shrinkage between March and July was over 50% and between March and August about 40%. In the case of the production of iron the exhibit is much the same; whereas in 1924 the shrinkage between March and August was about 40%, on the other hand during the current year there has been scarcely any contraction at all, the make of iron in March 1928 having been 3,199,674 tons and in July and August 3,071,824 tons and 3,136,570 tons respectively.

The peculiarly gratifying feature is that during the current month of September the activity of the months immediately preceding has been fully maintained and even further increased. The trade papers, the present week, speak almost in glowing terms of the state of the steel trade. Thus the "Iron Age," in its issue of Thursday, says that "the inflow of business in the last month of the current quarter has proved more than enough to sustain a high rate of output-it has resulted in a gain. The operations of the U.S. Steel Corporation plants now average 85% of ingot capacity, compared with 75% a month ago. The rate of a leading independent is 86%. Among the producing districts, Chicago, Pittsburgh, and Youngstown alike have increased production, in each case reaching an average of close to 85%." It should be added that in September last year, when the seasonal recession was quite pronounced, the steel mills were engaged to only about 64@66% of capacity. The price situation is also growing more assuring. The "Iron Age" says on this point: "Now that specifying is drawing to a close for those mills that are accepting releases until the end of September, price uncertainty appears to be passing. While many buyers are not yet showing an interest in forward commitments, the number of fourth-quarter contracts so far closed is larger than expected." The "Iron Age's" composite price for finished steel remains unchanged for the eighth week at 2.348c. a pound. The "Age's" composite price for pig iron has advanced for the third consecutive week, now standing at \$17.71 a gross ton, within 4c. of the highest level to date in 1928, reached last February.

It is worth noting, too, that the railroads which for a dozen months or more have had dwindling traffic and revenues to contend with (as compared with the year immediately preceding) are at last showing signs of recovery in their returns. A rather significant indication in that respect is furnished by the statement of the loading of revenue freight on the railroads of the United States for the week ending Sept. 15. This proves to have been the largest of any week of the year thus far, the number of cars loaded running away in excess of a million, reaching in exact figures 1,138,312 cars. At the figures mentioned, the total shows an increase of 10,669 cars over the number in the corresponding week of 1927, something that has not happened very frequently during 1928, though 40,947 cars below the corresponding week two years ago.

The monthly returns of earnings of the railroads of the country for the month of August are also now coming to hand and after a long period of unfavorable comparisons (speaking of the roads as a whole) are likewise revealing improved results-at least more generally so than heretofore. Distinction, however, must be made between the different sections of the country. Not all as yet are able to make a better showing. One group of roads outdistances all other groups in the favorable character of the exhibits made. We refer to the roads and systems traversing the spring wheat territory of the Northwest. There an economic revolution has been effected as the result of two successive extremely bounteous harvests of spring wheat, following a long series of poor or indifferent crop yields. The effect has been, not only to give the favored roads a larger grain tonnage, but also a larger movement of merchandise and general freight owing to the greatly augmented purchasing power of the entire population. The roads in that part of the United States have for many months been giving a good account of themselves as a result of the excellent spring wheat harvest of 1927, standing out in sharp contrast in that respect with the roads in most other parts of the country, which have had falling traffic to contend with, and now that a similar abundant spring wheat crop is assured for 1928, their record of gains is being further extended. Thus the Milwaukee & St. Paul reports for August this year gross earnings of \$16,174,739 as against only \$14,967,419 in the same month last year and net earnings (above operating expenses, but before the deduction of taxes) of \$4,398,503 against \$2,748,244. Of course, this road is comparing with its receivership period of a year ago and presumably has had an especial advantage on that account, but improvement is also registered by the other large systems in the same territory, even if not to the same extent. The Chicago & North Western reports for the month gross of \$15,084,455 against \$14,631,848, with net operating income of \$3,623,243 against \$3,053,128; the Northern Pacific gross of \$9,137,259 against \$8,367,550 and net of \$2,950,287 against \$2,358,199 and the Great Northern gross of \$11,723,502 against \$11,003,396 and net operating income of \$3,381,629 against \$3,024,478.

The improvement also extends to the roads further south in the western half of the country, and even to those in the Southwest, though in this last instance we find some exceptions to the rule. The Union Pacific reports gross of \$21,358,474, against \$20,210,546, and net of \$7,964,426, against \$7,266,-868, and the Burlington & Quincy gross of \$16,356,-129 against \$15,184,344, with net operating income of \$4,707,669 against 4,106,930. The Atchinson shows gross of \$23,264,266 against \$21,720,985, and net of \$8,767,165 against \$7,099,571. The Southern Pacific reports gross of \$26,943,892, against \$26,-962,738, and net of \$8,030,934 against \$8,341,846. The Missouri Pacific (which suffered very severely a year ago from the overflow of the Mississippi River and its tributaries) has gross of \$12,048,118 against \$11,020,930, and net of \$3,370,463 against \$2,936,-587; and the St. Louis-San Francisco gross of \$8,-

018,037 against \$8,001,541 and net of \$2,289,627 against \$2,250,296.

Even Southern roads, in a section of the country which has had to contend with severe business depression for about two years, are now in a number of cases beginning to show indications of better results, though Florida roads and some of those connecting with Florida are still falling behind. The Southern Railway reports gross of \$12,607,305 against \$12,515,316, and net of \$3,786,572 against \$4,181,583. This is for the Southern Railway proper. For the Southern Railway system the showing is gross of \$16,646,397 against \$16,501,551, and net of \$5,067,454 against \$5,402,970. The Louisville & Nashville has gross of \$11,560,990 against \$13,040,-000, with net operating income of \$2,005,183 against \$2,833,741; and the Atlantic Coast Line gross of \$4,625,446 against \$5,206,790 and net of \$234,793 against \$271,436 and the Seaboard Air Line gross of \$4,153,972 against \$4,487,607, with net operating income of \$608,114 against \$776,185. The roads serving the Pocahontas coal region of course all make unfavorable comparisons with a year ago, since the district is non-union and coal mining was prosecuted on an unusual scale in 1927 when the union mines throughout the country were closed down owing to the strike. The Chesapeake & Ohio reports for the month this year gross of \$11,004,517 against \$12,355,229 in the month last year and net of \$3,958,747 against \$4,664,765.

Among the great east and west trunk lines, results are somewhat irregular, depending to some extent upon whether the roads were little or much affected by the strike in 1927 at the unionized bituminous coal mines. In the case of the Pennsylvania RR. system, the feature again is the large reduction in expenses. For the lines directly operated, east and west of Pittsburgh, the showing is gross of \$57,-416,369 against \$58,285,019, but net of \$16,622,093 against \$15,794,685. The New York Central reports gross of \$34,018,396, against \$34,415,465 and net of \$8,463,025 against \$9,127,002; the Baltimore & Ohio gross of \$21,709,323 against \$22,104,324 and net operating income of \$5,955,583 against \$5,177,151; the Lehigh Valley gross of \$6,527,407 against \$7,015,477 and net of \$2,056,290 against \$1,930,361; and the Erie gross of \$9,559,938 against \$9,865,923, and net of \$2,126,714 against \$2,022,110. The Wabash gives an exceptionally good account of itself, with gross of \$6,460,981 against \$5,841,458 and net of \$1,739,-152 against \$1,417,177. The anthracite carriers all make unfavorable comparisons, due to the falling off in the quantity of anthracite mined. The Reading reports gross of \$7,351,585 against \$7,945,290 and net of \$1,582,625 against \$1,968,668; the Lackawanna gross of \$6,962,826 against \$7,553,240 and net of \$2,121,474 against \$2,487,392.

Brokers' loans again show an increase in this week's Federal Reserve statement, being the fifth successive week of such increases. The increase this time is \$54,232,000 and it follows \$85,285,000 increase the previous week, \$95,982,000 increase two weeks ago, \$54,061,000 increase three weeks ago, and \$34,017,000 increase four weeks ago, making the total expansion for the five weeks \$323,577,000. Such figures speak so eloquently of what is going on in the speculative arena that there is no necessity for enlarging upon them. They furnish an interesting commentary also on the remarks made last week by

Roy A. Young, Governor of the Federal Reserve Board, in an address before the Indiana Bankers Association, saying that this growth in brokers' loans was giving the Federal Reserve authorities no concern—that this was a matter that would correct itself in due time. With the further addition this week, the total of these loans to brokers and dealers (secured by stocks and bonds) by the 45 reporting member banks in New York City is brought up to \$4,524,708,000. A year ago, on Sept. 28 1927, the total, already tremendously swollen, was no more than \$3,305,623,000. Thus within the twelve months the further expansion has been only a little less than 11/4 billion dollars. During the past week the loans made by these 45 reporting member banks for their own account decreased from \$925,153,000 to \$849,-506,000, while the loans made for account of outof-town banks increased from \$1,634,219,000 to \$1,-673,943,000 and the loans made "for account of others' from \$1,911,104,000 to \$2,001,259,000. It should not escape notice that these loans for account of others-aptly described "bootleggers loans" -have now passed the \$2,000,000,000 mark. Twelve months ago, on Sept. 28 1927, the aggregate of such loans was only \$917,632,000.

Borrowing of the member banks at the Reserve institutions is somewhat lower the present week, the discount holdings of the twelve Reserve institutions Sept. 26 being reported \$1,010,766,000 against \$1,-093,833,000 on Sept. 19. Of the reduction of \$83,-067,000, \$58,739,000 occurred at the Federal Reserve Bank of New York. Even as reduced, however, this member bank borrowing at the Reserve institutions at \$1,010,766,000 compares with only \$430,312,000 a year ago. Moreover, the Federal Reserve authorities have sought to offset, in part at least, diminution in member bank borrowing by adding to their holdings of acceptances purchased in the open market and also by increasing their holdings of U.S. Government securities. Acceptance holdings have risen during the week from \$237,189,000 to \$263,419,-000 and holdings of Government securities from \$224,727,000 to \$229,032,000. The result altogether is that total bill and security holdings now are \$1,507,797,000 against \$1,560,329,000 a week ago.

Whether any significance is to be attached to the diminished borrowing on the part of the member banks remains to be seen. On its face it would seem to be due to the large payments made by the U.S. Treasury in redemption of the Third Liberty Loan bonds out of the proceeds of the \$545,615,000 of new 41/2% Treasury certificates of indebtedness put out and the income tax collections on Sept. 15; \$965,-000,000 of the Third Liberty Loan bonds were still outstanding on Sept. 14 and of this amount \$733,-000,000 had been presented for payment up to and including Sept. 25 according to a statement given out on Wednesday night of the present week by the Secretary of the Treasury in which it was indicated that the Treasury would do more borrowing in October. In addition, Government deposits in the banks have been heavily increased during September. The statement issued by the Federal Reserve Board on Monday of the present week showed that Government deposits with the 635 reporting member banks in leading cities had increased almost \$140,000,000 in the week ending Sept. 19. Obviously, this large increase in Government deposits eased the situation of the member banks sufficiently to enable them to day, the copper stocks moved lower with the rest of

reduce somewhat their borrowing at the Federal Re-

Notwithstanding that the charge for call loan accommodation at the Stock Exchange tended lower most of the week-renewals having been effected at 61/2% on Thursday and at 6% on Friday, though with a spurt to 8% on the latter day—the stock market, after early strength, has been reactionary. And, paradoxical as it may seem, the reactionary tendency became most manifest when the call loan rate was lowest, namely, on Thursday and early on Friday. The explanation is doubtless found in the circumstance that there has been considerable selling to realize profits and also, as in preceding weeks, selling on the part of the powerful interests which are evidently engineering the rise, the idea being to prevent the market from assuming a runaway character as it has on more than one recent occasion threatened to do. On Saturday last, the market had to absorb much week-end selling, and as a consequence was more or less ragged and irregular. On Monday, notwithstanding that more or less selling was still encountered, the market displayed buoyancy all around with large and general advances. On Tuesday and Wednesday there was again considerable irregularity, but nevertheless with many new gains, especially in the case of a number of speculative favorites which were bid up with great rapidity. On Thursday, as already indicated, it was weak all around, while on Friday the weakness partook of the character of a slump until the last hour, when support appeared, and prices were bid up with great rapidity, as a result of which most of the early losses were recovered and some new advances established. The volume of transactions has continued large, running close up to or above 4,000,000 shares on every full day during the week. At the half-day session on Saturday last the sales aggregated 2,156,810 shares; on Monday they aggregated 4,240,850 shares; on Tuesday 4,599,390 shares; on Wednesday, 4,287,-000 shares; on Thursday 4,020,980 shares; and on Friday 3,706,500 shares. On the New York Curb Exchange the sales were 203,500 shares on Saturday; 810,830 shares on Monday; 786,950 shares Tuesday; 1,110,200 shares Wednesday; 1,053,700 shares Thursday; and 1,001,700 shares Friday.

Even though the market evinced a reactionary tendency, not a few stocks established new high records for the year. Among the stocks so distinguished may be mentioned (in addition to the copper stocks and the motor stocks separately enumerated below), the following among others: Advance Rumely, Air Reduction, Atlantic Refining, Cushman's Sons, Davison Chemical, Paramount Famous Lasky Corp., Goodyear Tire and Rubber Company, Montgomery Ward and Company, Murray Body, Otis Elevator, People's Gas Light & Coke, Phillips Petroleum, Pressed Steel Car, Pub. Serv. Corp. of New Jersey, Sinclair Cons. Oil, Timken Roller Bearing, Union Carbide & Carbon, United Biscuit, U. S. Industrial Alcohol and U. S. Steel.

The copper stocks again met with very confident buying, due to the continued urgent demand for the metal and its high price. All the following copper stocks established new high records for the year: Anaconda Copper, Inspiration Copper, Kennecott Copper, Magma Copper, Miami Copper, and Seneca Copper. In the depression on Thursday and Fri-

the list. Anaconda closed yesterday at 81% against | 1231/4 and Missouri-Kansas-Texas at 413/4 against 811/4, the close the previous Friday; Kennecott closed at 1001/4 against 993/4; Cerro de Pasco closed at 963/4 against 100; Greene Cananea at 1251/8 against 1313/4; Calumet & Hecla at 33 against 343/8; Chile Copper at 51 against 54%; and Granby Cop per at 661/4 against 641/8. U. S. Steel led the activity in the steel group and on Sept. 27 made a new high for the year at 1615%; it closed yesterday at 157% against 157% the previous Friday. Bethlehem Steel closed at 63 against 66%; Republic Iron & Steel at 801/8 against 851/2; Inland Steel at 69 against 71; and Ludlum Steel at 68 against 701/4.

General Motors continued in the forefront among the motor shares. It closed yesterday at 211 against 218 the previous Friday. Among the motor stocks that made new high records for the year are the following: Chandler-Cleveland Motor, Chrysler Corp., Hupp Motor Car, Packard Motor Car, and Willys-Overland. Chrysler closed yesterday at 1171/2 against 1103/4 the previous Friday; Studebaker closed at 80 against 823/8; Packard at 911/4 against 915/8; Nash at 901/2 against 935/8; Hudson at 843/4 against 85; and Hupp at 733/4 against 751/2. The rubber stocks were strong on the firmer tendency of crude rubber. U. S. Rubber closed yesterday at 381/2 against 361/2 the previous Friday, and the preferred at 671/2 against 651/8; Goodyear Tire & Rubber closed at 701/8 against 673%, and B. F. Goodrich at 837% against 823%. Among the oil stocks, Atlantic Refining closed yesterday at 183¾ against 183½ the previous Friday; Marland Oil at 385% against 405% and Standard Oil of New Jersey at 45% against 45%.

Among the high-priced specialties, Montgomery Ward & Co. distinguished itself for another spectacular spurt, touching 267 on Sept. 26, which compares with only 117 last January; it closed yesterday at 2531/4 against 252 the previous Friday; Radio Corporation closed at 2061/2 against 204; Warner Brothers Pictures, Inc., at 110% against 108; Paramount Famous Lasky at 1483/4 against 1401/2; Stewart-Warner at 1023/4 against 1031/8; Allied Chemical & Dye at 1991/2 against 196; Sears Roebuck at 147 against 1481/8; Union Carbide & Carbon at 1861/4 against 179; American Tel. & Tel. at 1793/4 against 1801/2; General Electric at 1641/4 against 1651/8; American Can at 1071/4 against 107; International Harvester at 2887/8 against 297; International Nickel at 123 against 1287/8; and Consolidated Gas at 781/8 against 781/9.

The railroad stocks were not particularly prominent in the dealings notwithstanding the generally favorable reports of earnings which came to hand for the month of August, excepting St. Louis South Western which registered a new high for the year at 119 on Sept. 22 and Canadian Pacific which closed yesterday at 2165% against 214 the previous Friday. St. Louis Southwestern closed yesterday at 115 against 1141/2 the previous Friday; New York Central closed at 174 against 1771/4; Baltimore & Ohio at 1125% against 114; Chesapeake & Ohio at 1821/2 against 184; Atchison at 191 against 193; Great Northern at 1001/2 against 1015/8; Northern Pacific at 1007/8 against 99; Wabash at 811/2 against 831/2; Union Pacific at 1981/2 against 1961/4; Southern Pacific at 1223/4 against 1243/4; New York Chicago & St. Louis at 124 against 125; Missouri Pacific at 713/4 against 731/4; St. Louis-San Francisco at 1151/2 against 1151/3; Milwaukee & St. Paul pref. at

Stock exchanges in important European centers have been firm and active throughout most of the past week, with continued improvement in sentiment apparent. Trading gained in volume as the cheerfulness increased and in a few sections of the respective lists prices were advanced with an ease that approached buoyancy. The dominant note, however, appears still to be one of caution because of uncertainty over gold movements and the difficulty of correctly gauging the effect of the numerous important international developments of recent weeks. The London Stock Exchange gave an excellent account of itself all week. The sessions began Monday with considerable animation in the miscellaneous group, one report describing the conditions as 'almost boomlike," insofar as tin shares were concerned. Specialties were again the center of activities Tuesday, with Chinese bonds coming in for a good deal of attention also. Oil stocks became increasingly popular in fairly large general dealings Wednesday and Thursday, although industrials were not much behind in interest. Communication shares were firm and active all week, but artificial silks were somewhat neglected. Gilt-edged securities were steady despite a continued outflow of gold to Germany and rumors of further shipments to New York. Yesterday's session was somewhat irregular at London, due to week-end profit-taking. nounced strength, however, was again shown in the oils, which continued strong and active on reports that the oil companies might come to some agreement with the Soviet Government.

The Paris Bourse was rather hesitant early this week with a tendency toward strength and activity developing in the later sessions. Definite improvement began Wednesday morning, with cash transactions most prominent although there was also a good deal of trading on account. A number of factors contributed to the improvement, chief among them the lower rates for money at New York and the more favorable political situation of France. Oils at Paris joined the world-wide swing toward higher levels Wednesday and continued their advance Thursday. Bank stocks joined in the upward movement, but professional selling appeared late Thursday and brought levels down again. Stocks as a whole nevertheless were firm. The Berlin Boerse was lively and confident throughout the week. Mining shares were most prominent Monday, but from Tuesday onward potash stocks alternated with specialties in the public favor. Artificial silks were particularly strong, Tuesday, while on Wednesday the publication of a favorable Reichsbank statement caused considerable activity in bank stocks generally. In the potash section, Selzdetfurth, Aschersleben and Westergeln were the favorites Thursday. There was also much activity in the electric section, with the buying attributed chiefly to foreign sources.

Official replies to the British note to Washington of August 1 and the French note of August 3, regarding the naval compromise agreement between those two Governments, were delivered to the Foreign Offices in London and Paris yesterday, and were made public in Washington last night. The identic 521/8 against 521/2; Rock Island at 1263/4 against notes were sharp in tone and they rejected curtly

the proffered agreement. "The Government of the United States feels that no useful purpose would be served by accepting as a basis of discussion the Franco-British proposal," the notes said. American Government," it was added, "has no objection to any agreement between France and Great Britain which those countries think will be to their advantage and in the interest of limitation of armaments, but naturally cannot consent that such an agreement should be applied to the United States." The specific objection raised by the United States Government, according to an Associated Press dispatch, is based on the contention that it would restrict only types of ships "peculiarly suited to the needs of the United States," and leave unlimited combat ships of greatest value to any nation having widely distributed fueling bases or great merchant marine tonnage.

The fact that an agreement had been reached between England and France was first nounced in the British House of Commons on July 30 by Sir Austen Chamberlain, Foreign Summaries were cabled to Wash-Secretary. ington, Rome and Tokio by the two Governments, but in accordance with British desires, the text was not made public. It was made known, however, that the agreement was in the form of memoranda, exchanged by the two Governments, in which a mutual basis for discussing naval disarmament before the Preparatory Commission on Disarmament of the League of Nations was laid down. An immense amount of conjecture was aroused with reference to the agreement in all countries with sizable navies. From semi-official intimations it rapidly appeared that the agreement dealt with four classes of vessels, as follows: 1, capital ships of more than 10,000 tons; 2, airplane carriers of more than 10,000 tons; 3, cruisers of 10,000 tons or less; 4, submarines of more than 600 tons.

The summary of the agreement was received in Washington with a coolness that American officials made no attempt to conceal. The portion of the agreement that covered capital ships and airplane carriers caused little apparent concern. There was every indication, however, of genuine misgiving over the section relating to cruisers. It was repeatedly intimated in Washington that the agreement appeared designed to checkmate the American Government's desire to build sufficient 10,000 cruisers for the needs of its navy, while permitting Great Britain an unlimited number of the small cruisers adaptable to the British navy's needs. Moreover, there was distinct questioning as to whether the summary cabled to Washington revealed all of the agreement between the two Governments. This was followed by assertions in Paris dispatches to New York newspapers that an unrevealed part of the agreement provided for British support of the French position on conscripts in land armies. It was also suggested with some degree of plausibility that Great Britain and France had revived their entente and would be found on the same side of most important international questions hereafter. Such statements aroused the keenest interest all over the world. Foreign Minister Briand of France and Lord Cushendun of England both stated definitely in Geneva early this month that no secret clauses were contained in the agreement. Rumors that the Anglo-French entente had been revived in great part nevertheless persisted.

The American note on the compromise agreement was prepared by Secretary of State Frank B. Kellogg through frequent consultations with President Coolidge. Pending its publication, it was emphasized in Washington that the American policy would remain one of dealing with such matters openly at duly convoked international gatherings such as the Preparatory Disarmament Commission of the League of Nations. "Moreover, it was made plain," a Washington dispatch of Tuesday to the New York "Times" said, "that with American naval policy clearly defined since the conference at Geneva last year, the naval construction program of the Coolidge Administration would be pressed, pending any real accomplishments toward naval limitation by international agreement."

Reports from London during the past week again made clear, as they had many times previously, that the compromise agreement would be dropped if any of the three Governments to which it was submitted found it unacceptable. Such efforts to allay the storm of conjecture regarding the agreement and its possible collateral understandings were, however, of no avail. The Fascist newspapers of Rome did not hesitate to insist that an understanding had been reached for the mutual disposition of French and British aircraft in the event of hostilities with other powers. In Germany it was accepted as a foregone conclusion that a profound understanding had been reached between Great Britain and France, an understanding which, in the German view, nullified the Locarno compacts. The German press, accordingly, was disposed to re-examine the military and diplomatic position of the country, with a distinct tendency toward postulating closer political and industrial relations between Germany and the United States on the one hand, and between Germany and Russia on the other. In Russia, the press came out flatly, Monday, with the assertion that an understanding has been reached between England and France which involves aerial as well as naval collaboration in the event of war.

It is apparent from these indications of a state of mind in Europe that the Anglo-French naval compromise agreement may easily mark a turning point of European affairs, whether its authors intended it as such or not. The suspicions of all of Europe have been definitely aroused as to the mutual intentions of England and France, and it may be doubted whether they can readily be allayed. Despite definite assertions by the highest officials of the British and French Governments that the agreement contemplates nothing more than a preliminary naval disarmament rapprochement, the opinion is becoming deeply rooted on the Continent that a far-reaching entente has been effected. It would not mean the end of the agreement if America disagreed to its terms, says Edwin L. James, Paris correspondent of the New York "Times," in a dispatch of September 21. "That would not dispose of the understanding between London and Paris," he writes, "for whatever replies America, Italy and Japan may make it will probably be found that the understanding represents a position which England and France will support in future negotiations regarding limitation of To this was added an assertion by the same correspondent from London, Monday, that "It can now be stated publicly on the highest authority that Great Britain has decided not to oppose further the French key position on land disarmament. In

other words, British diplomats will no longer fight against trained reserves, which the continental nations, led by France, have refused to limit." British officials, Mr. James added, do not describe their change of front on land armaments as part of a political bargain. They describe it as a conclusion reached entirely independently after a careful deliberation, he reported.

The Ninth Assembly of the League of Nations concluded its deliberations Wednesday and adjourned shortly after noon on that day with very few accomplishments to its credit. The most that can be said of the sessions, which began September 3, was that they served to bring together the plenipotentiaries of Germany, France, Great Britain, Belgium, Italy and Japan, for the private pourparlers which resulted in a preliminary arrangement for settlement of the Rhineland occupation question. Save for the two speeches which Chancellor Mueller of Germany and Foreign Minister Briand of France addressed to each other from the rostrum of the League body, the plenary sessions of the Assembly were almost devoid of interest. The matter of greatest importance before the Assembly was the determination of a date for the next meeting of the Preparatory Dis-In its previous meetings, armament Commission. the Preparatory Commission had brought its work to the point where actual disarmament proposals were believed to be no longer avoidable. There was, therefore, the keenest interest in the proceedings of the Third Commission of the present Assembly, which was delegated to consider the problem. After more than three weeks of deliberation, the Third Commission drafted a resolution on September 25 expressing the hope that the Preparatory Commission will be able to meet early next year. The resolution intimated that if at such a time the present naval disarmament uncertainty between the United States on the one hand, and Great Britain and France on the other, had not been adjusted, the gathering must be postponed. This resolution, drawn up by M. Joseph Paul-Boncour of France, was adopted by the Assembly, Tuesday, with the delegates from Germany and Hungary pointedly abstaining from voting.

Efforts to draft a resolution regarding the Preparatory Commission meeting and clear up the work of the Assembly were begun late last week, but quickly developed into an acrimonious dispute between Count von Bernstorff, of Germany, and Lord Cushendun, of Great Britain. Lord Cushendun, according to a Geneva dispatch to the New York "Herald Tribune," desired the Third Commission to set a date for a conference on sea-power limitation which would precede the Preparatory Commission meeting, but Count von Bernstorff protested the step strongly. He declared that the naval powers should try to agree, but if they could not, then the League must make one last great effort. The resolution, accordingly, was sent back to the drafting committee. Lord Cushendun, out of patience with the proceedings, left for London last Saturday. No great changes were made in the wording of the resolution, and when it came up for a vote Saturday, Count von Bernstorff abstained from voting and abruptly left the Commission meeting. General Tanczos, of Hungary, also did not vote.

When the resolution came up for final considera-

briefly expressed his disillusionment over what he considered negative, even "humiliating" results. The German delegate, who spoke after him, made what was described in a dispatch to the New York "Times," as "an exceedigly careful speech in which he opened up real hostilities to the League program, which will probably not be fully developed until the Council meets next December." The chief note of the speech, the report added, was that Germany "was still ready to collaborate and sitll clung to the hope that the disarmament program would go on." Taken as a whole, the speech was said to have sounded more like a warning than a direct challenge. Sir Godfrey Locker-Lampson, speaking for Great Britain maintained that all efforts must be made to prepare a general conference, but that at the same time it would be a catastrophe if the conference met without proper preparation. M. Joseph Paul-Boncour ended the discussion with an encomium on the work of the League.

In the final plenary session, Wednesday, the League Assembly approved a "general act," drawn up by Nicholas Politis of Greece, as a reinforcement of the general treaty for the renunciation of war as an instrument of national policy which fifteen worldpowers signed at Paris August 27. Under the "general act," the signatory nations would undertake to settle all disputes between themselves by pacific means. Subjects which the nations considered of strictly domesti: jurisdiction would be reserved from the operation of the act. In order to advance the cause of pacific settlement of international disputes, the League's entire series of model treaties for conciliation, arbitration and non-aggression was ordered sent to all Governments. Herluf Zahle, the Danish President of the Assembly, in declaring the meetings closed, lauded the frankness with which some of the questions had been discussed. He remarked that there had been a certain measure of disappointment over disarmament at a moment when new hopes for it had been born. "While the Assembly has found the progress of disarmament slow," he concluded, "it received plain warnings from organizations representing millions of men and women, which presented memorials insisting that there be no faltering in the determination to achieve a reduction in armaments."

Unremitting efforts are being made in England to revive the depressed British coal industry and thus re-employ the several hundred thousand miners made idle by the depression. The extent of the decline in the industry is revealed by the official figures published in the London Board of Trade Journal for Aug. 22. In the second quarter of this year it was estimated that 56,842,300 tons of salable coal were raised, as compared with 64,280,500 in the first quarter and with 61,859,800 in the second quarter of last year. The average number of wage earners in the industry was computed for the second quarter of this year at 930,300, as contrasted with 961,200 in the first quarter and with 1,022,700 in the second quarter last year. As a further indication of the seriousness of the situation, the Board of Trade Journal remarked: "Reckoned on the tonnage of coal produced and imported, less the tonnage shipped abroad, the quantity of coal available for consumption in Great Britain amounted to 38,750,000 tons during the quarter ended June 1928, or nearly 8,000,tion in the Assembly Tuesday, General Tanczos | 000 tons less than in the previous quarter and 4,500,-

000 tons less than in the June quarter, 1927." A Government committee, appointed to consider this situation, submitted a report Sept. 23. The committee was headed by Lord Melchett, formerly Sir Alfred Mond. The report was notable chiefly for its practical and definite suggestions for introducing modern scientific methods into the coal industry. In a London dispatch to the New York "Times," the report was described as suggesting a greater use of powdered coal on ships in order to restore some of the usefulness of coal which oil and electricity took away, and recommending a greater use of low-grade fuels and organized research into the production of coke by-products, "a field in which other nations have made more rapid progress than England."

Reactionary Nationalists in Germany began a campaign Monday against the republican form of Government by demanding a popular referendum on the question of setting aside the Parliamentary system and bringing back the monarchy in one form or another. The semi-militaristic organization of war veterans, banded together under the name of the Steel Helmets, was used as the vehicle for bringing the campaign to public notice. A petition for a referendum on altering the form of the Government was circulated by this group at Magdeburg and the 5,000 signatures necessary for its consideration by the authorities at Berlin were readily secured. Should the Minister of the Interior permit the matter to proceed, the petitioners, under the law, must assemble the signatures of 5,000,000 eligible voters, after which the popular referendum will be called. In the national voting 20,000,000 Germans, or half the voters of the country, would have to register their approval, and not even the most optimistic of the Nationalists believe that such widespread approval would be granted. "Germania," itself one of the most reactionary of Berlin journals, said editorially Wednesday "If the German National Party wants to expose itself to a sure and painful defeat, it, in company with the Steel Helmet organization, will call the German nation to arms against the Weimar Constitution. After such proceedings they will be wiser than before."

Faced with the problem of supplying Russian peasants with manufactured goods at reasonable prices, the Soviet Government has been issuing a number of more or less urgent intimations that it would welcome the return of foreign capital to that country practically on capitalist terms. A decree promulgated last week indicates that Russia has decided to admit foreign concessionaires in all branches of industry, including railways and other forms of transportation, mining, electricity, forestry, agriculture, communal or county development and roadway building projects. All Russia will be open to foreign investment and development, dispatches said, and particular efforts will be made to interest outside capital in the creation of a Russian motor car industry, the manufacture of machinery of all kinds and artificial silk. Every help will be extended to foreign investors and wherever possible tax and customs concessions will be made so as to provide an easy flow into the country of raw and finished The Russian harvest, according to a materials. Moscow dispatch of last Saturday to the New York "Times," is fully 100,000,000 bushels greater than

theless have been slow. "The peasants will not part with the grain unless they receive manufactured goods in exchange at a price they consider fair," the dispatch added. "Despite the fact that goods production is almost equivalent to that before the war, both urban and country demand has so greatly increased and production costs are so high, that it is impossible to supply the peasants," it was stated.

A detailed review of the Soviet economic situation was made Tuesday by M. Quibeshef, President of the Supreme Economic Council, and reported in a dispatch from Walter Duranty, Moscow correspondent of the New York "Times." "Industrial production is steadily increasing," the dispatch said, "but M. Quibeshef admits that the peasant demand for implements, fertilizers and manufactured goods is increasing faster still. The harvest totals 300,-000,000 poods more than last year, but the transport difficulties, especially since the best crop was in Siberia, will hamper its distribution during the coming months. The production of the individual laborer has improved, but the decrease in production costs is less than was planned. The metal and coal industries show a steady growth, but there were heavy losses from faulty labor discipline and absences from work, which generally means drunkenness. In the coming year it is planned to invest upward of 2,000,000,000 rubles, 400,000,000 more than in the current year, in industrial development, but the country is still dependent on foreign importation, which causes currency tension. The Industrial Council recently has been discussing the need for the import of pig iron as well as of machines and manufactures."

A treaty of friendship and conciliation between Greece and Italy was signed at the Foreign Ministry in Rome last Sunday by Premiers Eleutherios Venizelos and Benito Mussolini. The text of the treaty, as given out on the following day, closely resembles those made by Italy with almost all the countries of Eastern and Central Europe. It lays down rules for the conciliatory settlement of any conflict that may arise between the two countries incapable of settlement by ordinary diplomatic methods and provides for neutrality in the case of a conflict by either party with a third power or powers due to unprovoked aggression. "This treaty," says a Rome dispatch of Sept. 23 to the New York "Times," "crowns the gradual rapprochement between Italy and Greece which has been going on the last few years, after a period in which relations were very strained, following the Corfu incident. Premier Mussolini had set himself to gain the confidence and friendship of the Greek nation, and the treaty consecrates the excellent relations now existing between the two countries. Public opinion here expresses the strongest gratification that the first act of the Venizelos Government has been the signature of this treaty, which is also the first treaty of its kind that Greece has concluded with any foreign power." Premier Venizelos publicly expressed satisfaction, Monday, with the signature of the treaty and said it "was not directed against anybody." He expressed the hope that a solid concord of friendship would be built on it and added that as soon as certain questions regarding the port of Saloniki could be settled he hoped to conclude a similar pact with Yugoslavia. He added that as yet no pact had been made that of last year, but State grain collections never- with Turkey but that he would like to conclude one

as soon as possible. Premier Mussolini, in a Cabinet session held Monday and devoted mainly to foreign affairs, emphasized the "innate pacific character" of the Italian policy in the Near East.

A joint Congressional session of Mexican Senators and Deputies on Tuesday evening unanimously elected Emilio Portes Gil provisional President of the Mexican Republic to serve from Dec. 1 this year to February 5 1930. This resolves the question of a successor to President Calles, whose term of office expires Dec. 1. The extraordinary session of the Congress was decided upon by the Mexican leaders shortly after the assassination on July 17, of President-elect Alvaro Obregon, whose demise left the country without a duly constituted successor to President Calles. In the balloting Tuesday, a total of 277 votes was cast. Extraordinary elections for a constitutional President will be held on the third Sunday of November, 1929, and the Executive then elected will serve for the balance of the full term of six years ending November 30, 1934. Portes Gil, who is only thirty-seven years old, held the post of Secretary of the Interior in President Calles's Cabinet. He was elected Governor of Tamaulipas in 1924 and has had a distinguished career as a lawyer and administrator, but is not a military man.

The newly-elected President has been a firm supporter of his two predecessors, General Obregon and President Calles. His record shows that he is deeply interested in child welfare, that he is opposed to gambling and drinking and that he favors great liberty of the press. After his election he gave a statement to the press which said: "My policy will be inspired by the highest principles of social equity and justice. My task will be to continue the policies developed by President Calles in all branches of public administration and also to produce the fulfillment of the social program outlined by the late General Obregon." It may be taken for granted, a Mexico City dispatch to the New York "Times" said, that Senor Gil will endeavor to develop the friendly relations existing with the United States. It is also understood, the report added, that he will look sympathetically for some exit from the Catho-

lic impasse.

Several additional developments in Mexico presage continuance of the improvement in relations between Washington and Mexico City that began with the appointment of Dwight W. Morrow as Ambassador to Mexico last December. The Confederation of National Chambers of Commerce in the Mexican capital announced on Sept. 13 that Mexican corporations devoted to any other purposes than those of agriculture, even if partly or wholly controlled by foreigners, may acquire lands within and without the prohibited zones in the terms of section 4 of Article XXVII of the Constitution of 1917, provided that the permission of the Ministry of Foreign Relations, according to Article VIII of the law regulating section 1 of Article XXVII, is obtained. The Confederation gave out the statement as a direct communication from the Ministry of Foreign Affairs. "From the viewpoint of foreign investors in Mexico, the importance of this announcement cannot be overestimated," a Mexico City dispatch to the New York "Times" said. "It would appear to be a drastic concession on the part of the Government to foreign holdings, and evidence that the authorities have begun to treat the much-discussed land legis-

lation, as it regards foreigners, in that liberal spirit which Washington has sought all through the diplomatic exchanges on both the land and petroleum problems." To this was added on Sept. 19 an editorial plea by El Universal, one of the two important journals of the country, for fair dealing and security against undue risks for foreign capital, so that it may be attracted to Mexico and thus aid in the economic reconstruction of the country.

A three-sided arrangement which is looked upon as clarifying the rights of the United States as to important approaches to the projected interoceanic canal through Nicaragua has been arrived at by means of a treaty negotiated between Nicaragua and Colombia, and a subsequent exchange of notes between Colombia and the United States. Announcement of the signing of the treaty on March 24 through the good offices of the United States, and of the exchange of notes, was made by Secretary of State Kellogg in Washington late last week, simultaneously with the publication of official statements on the subject in Managua and Bogota. "Under the treaty," a Washington dispatch of Sept. 21 to the New York "Times" explained, "Nicaragua obtains the sovereignty of the Mosquito coast and of Great and Little Corn Islands, about forty miles off Bluefields on the Atlantic Coast, for which the United States holds leases and which will be of strategic value in commanding approaches to the projected canal. Ownership of the two islands and of the Mosquito coast, which stretches on the Atlantic from Cape Gracias a Dios to the San Juan River, has been in dispute between Nicaragua and Colombia for over a century.

"The compact, on the other hand, grants absolute sovereignty to Colombia over the islands of San Andres, Providencia, Santa Catalina and other small islands and keys which form a part of Andres Archipelago. These lie in the Atlantic about 150 miles off the Nicaraguan coast in the general latitude of Bluefields. The Keys of Roncador, Quita Suenos and Serrana, which lie from 150 to 200 miles off the Nicaraguan coast in the general latitude of Cape Gracias a Dios, are not included in the treaty, their sovereignty having been in dispute between Colombia and the United States and involving the question of discovery before Colombia acquired its independence. This issue has been placed on a status quo basis through an exchange of notes whereby the United States is permitted to continue lighthouse services it has established on the islands as aids to navigation and Colombia obtains the right to use the surrounding waters for fishing."

No changes have been reported this week in discount rates by any of the central banks of Europe. Rates continue at 7% in Germany; 6½% in Austria; 51/2% in Italy and Norway; 5% in Denmark and Madrid; 4½% in London, Holland and Sweden; 4% in Belgium, and 31/2% in France and Switzerland. In London open market discounts are now 41/8@ 4 3-16% for both long and short bills, against 4 3-16% for both on Friday of last week. Money on call in London was down to 2½% yesterday. At Paris open market discounts remain at 31/4% and in Switzerland at 33/8%.

The Bank of England in its latest statement, dealling with the week ended Sept. 26, reports a loss in

gold of £2,875,585 and an increase of notes in circulation of £721,000, causing a loss in the reserve of gold and notes in the banking department of £3,596,-000. The ratio of reserve to liabilities dropped this week from 53.18% to 51.54%; two weeks ago the ratio stood at 55.13% and at this time last year at 27.87%. Public deposits decreased £6,193,000, while "other" deposits increased £2,941,000. Loans on Government securities rose £3,617,000, but loans on other securities dropped £3,321,000. The Bank's stock of gold now totals £173,204,657, against £151,-092,288 in 1927 and £155,833,112 two years ago. Note circulation aggregates £134,494,000 in comparison with £136,505,190 last year. The Bank's minimum rate of discount (4½%) remains unchanged. Below we furnish comparisons of the various items of the Bank of England return for five years.

a Includes, beginning with April 29 1925, £27,000,000 gold coin and bullion previously held as security for currency note issues and which was transferred to the Bank of England on the British Government's decision to return to gold standard. b Beginning with the statement for April 29 1925, includes £27,000,000 of Bank of England notes issued in return for the same amount of gold coin and bullion held up to that time in redemption account of currency note issue.

In its statement for the week ending Sept. 22 the Bank of France reports a decrease in note circulation of 308,000,000 francs, reducing the total to 61,013,-456,640 francs. Total circulation last week aggregated 61,321,456,640 franes and the week before 61,552,456,640 francs. On the other hand, creditor current accounts rose 147,000,000 francs and current accounts and deposits gained 454,000,000 francs. Gold holdings now amount to 30,568,249,942 francs, due to a gain during the week of 71,086,608 francs. French commercial bills discounted rose 296,000,000 francs, bills bought abroad 136,000,000 francs and advances against securities 13,000,000 francs, while credit balances abroad dropped 365,055,255 francs. Below we furnish a comparison of the various items of the bank's return for the past three weeks.

A moderate and gradual relaxation of the prevailing tightness in money rates on the New York market occurred in the early part of this week, only to be succeeded yesterday by further stringency which raised call loan rates to the highest figure of the week. loan rates dropped slowly from a high of 7½% Monday to a low of 6% Wednesday, and Thursday, with trades at concessions of \( \frac{1}{4} \% \) to \( \frac{1}{2} \% \) reported in the outside market. Withdrawals by the banks totaled \$20,000,000 Tuesday and \$15,000,000 Wednesday. On further withdrawals of \$30,000,000 yesterday, the call loan rates spurted from 6% to 8%, closing for the week at the latter figure. Time loan rates continued unchanged at 71/4% to 71/2%, with more funds available in this department of the market than for some weeks past. The greater disposition to loan money for longer periods caused the bulk of the trading Thursday and Friday to be done at 71/4%. Brokers' loans against stock and bond collateral continued their upward course this week, the Federal Reserve Bank of New York reporting an increase for the week ended Wednesday night of \$54,232,000. Loans made by the 45 reporting member banks in New York are covered in the statement. The advance is the fifth consecutive one and it carries the total of such loans very close to the extreme high of June 6. Gold imports for the week ended Wednesday totaled \$2,798,-000, which included the shipment of \$2,434,000 from England which was announced as having been made last week. Exports for the week aggregated \$414,-000. Rumors were current during the week of fairly extensive gold shipments from Argentina.

Dealing in detail with the rates from day to day all loans on Monday were at 71/2% including renewals. On Tuesday renewals were again at 7½%, but with a decline in the general rate to 7%. On Wednesday renewals were at 7%, but the general rate fell to 6%. On Thursday the renewal rate was marked down to 61/2% and new loans were again at 6%. On Friday renewals were also at 6%, but in the afternoon there was a spurt to 8% on preparations for the 1st of the month payments. The steady rise in time loan rates was halted somewhat on Friday of the present week when the quotation for the 30, 60 and 90-day periods was reduced from  $7\frac{1}{4}$ @ $7\frac{1}{2}$ %, to  $7\frac{1}{4}$ %, while the figure for four, five and six-month maturities was lowered from 7@71/4% to 7% flat. The higher rates had prevailed throughout the forepart of the week. For commercial paper names of choice character maturing in four to six months are now quoted at 51/2%, with 90-day names of strong character selling at 51/4%. For names less well known the quotation

is  $5\frac{3}{4}\%$ . The rate for New England mill paper is  $5\frac{1}{2}$ @ $5\frac{3}{4}\%$ .

The posted rates of the American Acceptance Council for prime bankers' acceptances eligible for purchase by the Federal Reserve banks have not been changed during the week and remain at 45%% bid and 41½% asked for bills running 30 days and also for bills running 60 and 90 days, 4¾% bid and 45%% asked for 120 days, and 5% bid and 4½% asked for 150 and 180 days. The posted rate of the Acceptance Council for call loans against acceptances remained at 6% until Wednesday, when there was a reduction to 5½%. Open market rates for acceptances have remained unchanged as follows:

	SPOT	DELIVE	RY.			
	180	Days-	-150	Days-	-12	Days-
	Bid.	Asked.			Bid.	
Prime eligible bills		478	5	43%	434	45%
		Days-	60	Days-	30	Days-
	Btd.	Asked.	Btd.	Asked.	Bid.	Asked.
Prime eligible bills	45%	41/2	45%	436	45%	41/4

FOR DELIVERY WITHIN THIRTY DAYS.

Eligible member banks 4½ bid
Eligible non-member banks 4½ bid

There have been no changes this week in Federal Reserve Bank rates. The following is the schedule of rates now in effect for the various classes of paper at the different Reserve banks:

DISCOUNT RATES OF FEDERAL RESERVE BANKS ON ALL CLASS AND MATURITIES OF ELIGIBLE PAPER.

Federal Reserve Bank.	Rate in Effect	Date	Previous
	on Sept. 28.	Established.	Rate.

Sterling exchange continued under pressure through out the greater part of the week, although some firmness was noticeable on Thursday and Friday. The range this week has been from  $4.84\frac{1}{2}$  to  $4.84\frac{3}{4}$ for bankers' sight, compared with 4.84 19-32 to 4.84 13-16 last week. The range for cable transfers has been from 4.841/8 to 4.85 1-16, compared with 4.85 to 4.85 5-32 a week ago. The foreign exchange market has on the whole been extremely dull. The underlying causes affecting the sterling rate have undergone practically no change in the past few weeks, and, as frequently stated, are of a seasonal character, the pressure being further accentuated at this time owing to the high money rates prevailing here. Rumors were frequent during the week that heavy gold shipments were in progress from London to New York. It seems, however, that the predictions were unfounded and were based on the sharp bidding by American interests in London for openmarket gold. The American bidders seem to be invariably outbidden by German interests. Nevertheless, American bankers confidently believe that before the seasonal pressure comes to an end probably \$25,000,000 in gold may come to New York from London. If money rates continue to rule as high in New York as they have been during the past several weeks, London can hardly fail to lose a considerable amount of gold, and while the loss might strengthen the position of sterling, it would nevertheless be useless so far as making any impression in the New York collateral loan market is concerned. The gold exports which have been going from London

to Germany during the past several weeks have, of course, been an influence in retarding the decline in the London rate. However, this factor has been offset by dulness and hesitation in the London security markets resulting from the gold outflow. Bankers strongly incline to the belief that the central banking authorities will endeavor to shape policies so that no large amount of gold will come to New York from London. Even the purchase of open-market gold would not be welcome. Foreign exchange traders state that the Bank of England would prefer to lose gold in moderate amounts rather than increase its rediscount rate and affect business adversely.

This week the Bank of England shows a loss in gold holdings of £2,875,585. On Saturday last the Bank of England sold £101,000 in sovereigns and set aside £100,000 for the account of Switzerland. On Monday the Bank of England received £250,000 in sovereigns from South Africa and sold £31,000 in gold bars. On Tuesday the Bank sold £1,279,000 in gold bars. On Wednesday the Bank sold £924,000 in gold bars. On Thursday the Bank sold £818,000 in gold bars. By far the greater part of all this gold was sold to Germany. Approximately £1,000,000 of South African bar gold will be available in the London open market on next Tuesday and approximately £750,000 the following week. Banking circles are of the opinion that German interests will outbid for this gold. Yesterday the Bank of England sold £14,000 in gold bars, besides earmarking £750,000 for account of South Africa and £400,000 for Switzerland.

At the Port of New York the gold movement for the week September 20-26, inclusive, as reported by the Federal Reserve Bank of New York, consisted of imports of \$2,798,000, of which \$2,434,000 came from England, \$304,000 from British Malaya, and \$60,000 from Latin America. Gold exports totaled \$414,000, of which \$280,000 was shipped to Java, \$82,000 to Mexico, and \$52,000 to Germany. There was no Canadian movement of gold either to or from the Port of New York. Canadian exchange has been irregular this week. On Tuesday and Wednesday Montreal funds were at par. They went to a slight discount on Thursday and back to par on Friday. While Canada's credit requirements are heavy at this season, the Canadian banks seem to be keeping a considerable amount of money in the New York market, which constitutes a factor in the comparative weakness and irregularity in Canadian exchange.

Referring to day-to-day rates, sterling on Saturday last was under pressure. Bankers' sight was 4.84 9-16 @4.845%; cable transfers 4.84 15-16@4.85 1-32. On Monday pressure was renewed. The range was 4.84 9-16@4.845% for bankers' sight and 4.84 15-16 @4.84 31-32 for cable transfers. On Tuesday the market was dull and fractionally easier. The range was 4.84½@4.845% for bankers' sight and 4.847%@ 4.85 for cable transfers. On Wednesday the tone of the market was slightly stronger. Bankers' sight was 4.84 9-16@4.84 11-16; cable transfers, 4.84 15-16 @4.85. On Thursday sterling was stronger. range was 4.84 9-16@4.843/4 for bankers' sight and 4.85@4.85 1-16 for cable transfers. On Friday the range was 4.84 19-32@4.8434 for bankers' sight and 4.85@4.85 1-16 for cable transfers. Closing quotations yesterday were 4.845% for demand and 4.85 for cable transfers. Commercial sight bills finished at  $4.84\frac{1}{2}$ , 60-day bills at 4.80 13-16, 90-day bills at  $4.79\frac{1}{8}$ , documents for payment (60 days) at  $4.80\ 13-16$  and seven-day grain bills at  $4.83\frac{1}{8}$ . Cotton and grain for payment closed at  $4.84\frac{1}{2}$ .

The Continental exchanges with the exception of German marks and French francs have been inclined to reflect the weaker tone in sterling. In the case of French francs the higher quotations reported this week are the direct result of pegging operations of the Bank of France undertaken to prevent a loss of French gold to Germany or any other quarter. French francs ran up sharply at the close on Wednesday to 3.911/4 for cable transfers. They opened at 3.90 11-16. This was taken to indicate that the Bank of France was behind the buying. This week the Bank of France sight balances abroad show a reduction of 365,000,000 francs. Ever since the beginning of September the Bank of France has been selling dollars and sterling and buying francs in order to prevent the franc rate from falling. It is understood that French interests have been investing large sums in Germany and the United States and this outward flow from Paris has, of course, a weakening effect on the franc rate. The Bank of France has been transferring to private individuals and institutions in France on demand title to foreign balances hitherto owned by the Bank of France.

German marks are increasingly in demand, not only here, but in European centres. This week the Reichsbank shows an increase in its gold reserve of 25,673,000 marks. As noted above, most of the gold lost by the Bank of England and taken from the London open market has been for German account. London dispatches state that within the past week fully £3,600,000 were taken by Germany. This week another shipment of \$52,000 went from New York to Germany, making the seventh shipment of like amount within as many weeks. The strength of mark exchange in London is attributed to the short-term sterling loans to Germany which have been made mainly by French and other Continental lenders who have sterling balances in London. The Reichsbank is apparently sterilizing the gold imports rather than allow them to expand the credit basis. The rate on three-months commecrial loans in Germany is 11%. A London dispatch to Dow, Jones & Co. a few days ago quoted Charles E. Mitchell, President of the National City Bank of New York, as follows: "I expect a revival of German borrowing in New York, although on a reduced scale. I consider German conditions fundamentally German companies and institutions to which we have made loans are making satisfactory progress. German General Electric has modernized its plants along American lines."

Italian lire have shown a fractional ease during the week but have been steady on the whole. The weakness is partly due to seasonal causes—accumulating bills for grain importation and the practical cessation of tourist transfer to Italy. The Italian rate must nevertheless be considered as firm and considerable transfers to Italy are constantly being made in the form of immigrant remittances and for investment in the Italian security markets. The other Continental exchanges have been extremely dull.

The London check rate on Paris closed at 124.06 on Friday of this week, against 124.14 on Friday of last week. In New York sight bills on the French centre

finished at 3.90 13-16 against 3.90 7-16 a week ago; cable transfers at 3.91 1-16, against 3.90 11-16, and commercial sight bills at 3.90½, against 3.90 3-16. Antwerp belgas finished at 13.891/4 for checks and at 13.90 for cable transfers, as against 13.89 and 13.90 on Friday of last week. Final quotations for Berlin marks were 23.83 for checks and 23.84 for cable transfers, in comparison with 23.821/2 and 23.831/2 a week earlier. Italian lire closed at 5.223/4 for bankers sight bills and at 5.23 for cable transfers, as against 5.227% and 5.231%. Austrian schillings have not changed from 141/8. Exchange on Czechoslovakia finished at 2.9615, against 2.9615; on Bucharest at 0.61, against 0.61; on Poland at 11.25, against 11.25, and on Finland at 2.52, against 2.52. Greek exchange closed at 1.29 for checks and at 1.29  $\frac{1}{2}$ for cable transfers, against 1.29 and 1.291/2.

The exchanges on the countries neutral during the war have been dull in the New York market. The pressure on the Scandinavian exchanges arises chiefly from transactions abroad, and the New York quotations are little more than a reflection of European operations. Copenhagen exchange is especially weak with respect to Germany, which accounts for the shipment of 10,000,000 reichsmarks from Denmark to Berlin a few weeks ago. The margin between gold points of the Danish crown and the German mark is rather narrow, and gold taken from Copenhagen can be paid into the Reichsbank the same day. Danish exchange was likewise affected adversely this week by the difficulties experienced by the Copenhagen Private Bank. A cable to Dow, Jones & Co. on Thursday stated: "Shares of Copenhagen Private Bank fell  $7\frac{3}{4}\%$  on Wednesday on a turnover of 294,000 kroner, making the official quotation 59% of face value. Despite recent developments there is nothing like a run on the bank to-day. An official of the bank stated that the bank is prepared for any eventuality and to-day will honor all demands. A member of the council of the bank states there is no question whatever about State guarantee. It is understood that a London bank is about to reconstruct the capital of the Copenhagen bank, but depositors will not be affected." Holland guilders, the most active of the neutral currencies in this market, have been somewhat higher, although now under seasonal pressure. The guilder has been ruling without fluctuation around 40.10@40.11 for cable transfers. While this is far from the high of 40.39 attained this year, it is considered a good price at this season. Spanish pesetas have been steadier than in several weeks, although closing lower than a week ago.

Bankers' sight on Amsterdam finished on Friday at 40.0934, against 40.0734 on Friday of last week; cable transfers at 40.1134, against 40.0934, and commercial sight bills at 40.06½, against 40.05. Swiss francs closed at 19.2334 for bankers' sight bills and at 19.24½ for cable transfers, in comparison with 19.23½ and 19.24½ a week earlier. Copenhagen checks finished at 26.66 and cable transfers at 26.67, against 26.65½ and 26.66½. Checks on Sweden closed at 26.74 and cable transfers at 26.75, against 26.74½ and 26.75½, while checks on Norway finished at 26.65½ and cable transfers at 26.66½, against 26.65½ and 26.66½. Spanish pesetas closed at 16.47 for checks and at 16.48 for cable transfers, which compares with 16.51 and 16.52 a week earlier.

The South American exchanges have been steady. Interest attaches this week especially to the Argentine rate, owing to an announcement on Thursday that \$12,500,000 in gold was coming from Argentina to New York. According to advices received by foreign exchange brokers on Thursday, the Buenos Aires Government is planning a shipment to repay a short-term loan of like amount made to the Government by J. P. Morgan & Co. which expired on Wednesday. An offer was made to renew the loan at 71/2%, but the Argentine Government decided to repay in gold. The gold could not be shipped to New York at the present rate of exchange without loss of interest, but as it is a Government transaction, loss of interest does not enter into the calculations. Because of the position of the exchanges, the Government has chosen to send gold rather than to buy exchange. Newspaper dispatches during the week intimated that there would be a heavy gold movement from Argentina to New York purely as an exchange transaction within the next few weeks. Bankers familiar with the Buenos Aires market, however, say that most of the statements concerning the probability of gold imports from Argentina are too sanguine, as there are many factors making the business both undesirable and hazardous. The present movement does not mean a large movement on an exchange basis. Exchange traders feel that any gold moving from Buenos Aires to New York in the near future will be the result of a purely Governmental, not of a commercial, transaction. present is a time when exporters would rather accumulate pesos than go short of them. Argentine paper pesos closed yesterday at 42 1-16 for checks, as compared with 42 1-16 on Friday of last week, and at 421/8 for cable transfers, against 421/8. Brazilian milreis finished at 11.94 for checks and at 11.97 for cable transfers, against 11.94 and 11.97. Chilean exchange closed at 121/8 for checks and at 123-16 for cable transfers, against 121/8 and 12 3-16, and Peru at 3.99 for checks and at 4.00 for cable transfers, against 3.98 and 3.99.

The Far Eastern exchanges have been quiet. There have been no factors of importance affecting the Oriental quotations. Currently, as during many weeks past, the outstanding influences affecting the Eastern markets have been of a political character. The silver price continues to rule at a figure giving comparative firmness to the Chinese taels and Hongkong dollars. Owing to improvement in the Chinese domestic situation and to a somewhat more confident feeling of security, the Chinese centers are absorbing silver in large amounts. Japanese business conditions show little change from those prevailing during the past several months. The export of capital from Japan for investment in London and New York securities seems to continue. The banking situation in Japan has shown steady improvement. The fact that the Chinese continue to boycott Japanese goods is a factor detrimental to the yen quotation. Closing quotations for yen checks yesterday were 45.80 @46, against 45.81 @461/8 on Friday of last week; Hong Kong closed at 49.90@50½, against 49.90@50.00; Shanghai at 635½ @63 11-16, against 633½ @635½; Manila at 49¾, against 49¾; Singapore at 56 11-16, @56¾ against 56½; Bombay at 36½, against 36½, and Calcutta at 36½, against 36½.

Pursuant to the requirements of Section 522 of the Tariff Act of 1922, the Federal Reserve Bank is now

certifying daily to the Secretary of the Treasury the buying rate for cable transfers in the different countries of the world. We give below a record for the week just past:

FOREIGN EXCHANGE RATES CERTIFIED BY FEDERAL RESERVE BANKS TO TREASURY UNDER TARIFF ACT OF 1922, SEPT. 22 TO SEPT. 28, INCLUSIVE.

Owing to a marked disinclination on the part of two or three leading institutions among the New York Clearing House banks to keep up compiling the figures for us, we find ourselves obliged to discontinue the publication of the table we have been giving for so many years showing the shipments and receipts of currency to and from the interior.

As the Sub-Treasury was taken over by the Federal Reserve Bank on Dec. 6 1920, it is also no longer possible to show the effect of Government operations in the Clearing House institutions. The Federal Reserve Bank of New York was creditor at the Clearing House each day as follows:

DAILY CREDIT BALANCES OF NEW YORK FEDERAL RESERVE BANK AT CLEARING HOUSE.

Saturday,	Monday,	Tuesday,	Wednesd'y,	Thursday,	Friday,	Aggregate
Sept. 22.	Sept. 24.	Sept. 25.	Sept. 26.	Sept. 27.	Sept. 28.	for Week.
106 000 000	106,009,000	89 000 000	94,000,000	108.000.000	120.009.000	Cr.623,000,000

Note.—The foregoing beavy credits reflect the huge mass of checks which come to the New York Reserve bank from all parts of the country in the operation of, the Federal Reserve System's par collection scheme. These large credit balances however, reflect only a part of the Reserve Bank's operations with the Clearing House institutions, as only the items payable in New York City are represented in the daily balances. The large volume of checks on institutions located outside of New York are not accounted for in arriving at these balances, as such checks do not pass through the Clearing House but are deposited with the Federal Reserve Bank for collection for the account of the local Clearing House banks.

The following table indicates the amount of bullion in the principal European banks:

	S	ept. 27 1928		Sept. 29 1927.			
Banks of—	Gold.	Silver.	Total.	Gold.	Silver.	Total.

a These are the gold holdings of the Bank of France as reported in the new form of statement. b Gold holdings of the Bank of Germany are exclusive of gold held abroad, the amount of which the present year is £4,281,300. c As of Oct. 7 1924. d Silver is now reported at only a trifling sum.

#### The United States and the Check to Disarmament.

It had been generally expected that the ninth Assembly of the League of Nations, which closed its sessions on Wednesday, would fix a date for the meeting of the Preparatory Commission on Disarmament, and thereby pave the way for an early meeting of an international conference at which definite steps in the direction of disarmament would probably be taken. The Assembly adjourned not only without having taken the action which was expected of it, but with the clear impression among many of its members, as well as among those who had observed its proceedings, that the outlook for any practical agreement about disarmament was even more doubtful than it was when the Assembly convened, and that even the formal harmony among the League members which it has been a constant effort to maintain had been more than ordinarily strained. There is to be, it appears, some kind of informal discussion at Paris over the question of a meeting of the Preparatory Commission, under the direction of its President, Dr. Loudon of The Netherlands. If all goes well, the Commission may be called together early in 1929;; otherwise, apparently, the meeting will be indefinitely deferred.

For this untoward outcome of the Assembly's deliberations the primary responsibility is to be found in the secret treaty or agreement between Great Britain and France whose existence was first made publicly known last July. Precisely what the provisions of the treaty are is not yet known, for the text of the treaty has not been published, but there is a general impression that it embodies, in form or spirit, at least two proposals or understandings either of which, if it were to become effective, would render further discussion of disarmament futile. The first is an agreement under which Great Britain, in distributing some agreed global amount of naval tonnage among the various classes of armed vessels, will be free to build as many small cruisers, less than 10,000 tons, as it pleases, while France, which has less need for cruisers, will expand at its discretion its fleet of large submarines. The second is an understanding that Great Britain, in return for the naval predominance which it will thus enjoy, will make no objection to the continued military predominance of France on the Continent, and will acquiesce in the continuance of the system of compulsory military service by classes as opposed to the system of a volunteer army.

Discussion at Geneva brought out the fact that this treaty, far from being the practical step in the direction of armament limitation which British and French spokesmen earnestly represented it to be. was an obvious stumbling-block and a source of widespread suspicion and irritation. To begin with, the treaty represented a return to the methods of secret diplomacy, and while secret diplomacy still has its advocates, its use in this case became justifiably a ground for criticism and alarm. The naval part of the agreement, moreover, ran directly athwart the program of naval limitation which the United States had advocated in the three-Power conference at Geneva, and thereby seemed to array the two leading Powers of Europe in sharp opposition to the United States. On the naval side, the treaty looked very much like an attempt on the part of Great Britain

making an agreement in which it must have been known that the United States would not acquiesce. On the other hand, acceptance by Great Britain of French military hegemony in Europe meant inevitably a powerful stimulus to the system of compulsory military service in other countries than France; and compulsory service, with classes of scores or hundreds of thousands called up for training every year, means, of course, after a few years, a very large body of men with military training potentially available for war. It needed no argument to show that the treaty, whatever its provisions, was not only a striking rejoinder to the Kellogg anti-war treaty which a large number of Powers had just signed and to which the whole world had been invited to adhere, but was in fact a practical negation of the spirit of the Kellogg pact.

Geneva and Paris dispatches during the past week have reported a disposition, in certain European political circles, to hold the American Government largely responsible for the Geneva impasse, and to picture the United States in the double role of a world dictator and a kind of dog in the manger. It is not at the doors of the State Department or the White House that responsibility should be sought. The identical notes which Secretary Kellogg transmitted to Great Britain and France on Wednesday, the text of which was made public yesterday, make clear the position of the United States. "The Government of the United States," the note declares, "feels that no useful purpose would be served by accepting as a basis of discussion the Franco-British proposal." It has "no objection to any agreement between France and Great Britain which those countries think will be to their advantage and in the interest of limitation of armaments, but naturally cannot consent that such an agreement should be applied to the United States." That the treaty directly affected the United States was evident, as the note pointed out, from the fact that the naval restrictions embodied in the treaty applied only to types of vessels "peculiarly suited to the needs of the United States," while leaving without limitations types of vessels of greatest use to a nation which, like Great Britain, has widely scattered naval bases and a large merchant marine tonnage. The American note does not, apparently, close the door to another disarmament conference, but the questions with which such a conference would have to deal, if the Anglo-French treaty were taken as the basis for discussion, appear to be so far different from those originally proposed by the United States as to make the success of the Conference doubtful. Until this aspect of the situation has been cleared, Mr. Coolidge will undoubtedly continue to press upon Congress his naval construction program as a

reasonable measure of national defense. Now that the United States has made known its opposition, there are grounds for hoping that the Anglo-French treaty may be scrapped. The secrecy of the treaty has not only put it on the defensive, but a widespread revolt against this method of dealing with a great international interest has now to be reckoned with. The British Government has been subjected for weeks to a heavy fire of criticism in the press, not only for binding Great Britain and France together in the ways which the treaty is believed to provide, but quite as much for having so far bungled the business as to and France to steal a march on the United States by antagonize American opinion. Less circumstantial

reports tell of a growing political opposition to the treaty in France, based in part, it would seem, upon the conviction that the treaty will have the effect of increasing American sympathy for Germany, and upon the realization that, if naval competition is again to become the order of the day, the United States can easily outdistance Europe. The position of Germany, too, has changed. The refusal of the German delegation at the Geneva meeting of the League Assembly to accept a meaningless decision regarding the meeting of the Preparatory Commission showed unwonted independence, and the insistence of Chancellor Mueller upon a settlement of reparations and the withdrawal of Allied troops from the Rhineland has forced an issue that can not be lightly treated. The Italian Government has been opposed to the Anglo-French treaty from the first, and an inspired Italian newspaper at Rome has made itself responsible for the assertion that the treaty, in addition to its military and naval provisions, undertakes to deal with air forces also. At no recent meeting of the Assembly has the political unrest in southeastern Europe been more in evidence, and the unrest is not allayed by the appearance of a new Anglo-French entente, or by the prospect that those two Powers, which now dominate the League, may be found acting in concert in an effort to dominate the Balkans.

It is unfortunate that so many European statesmen should continue to think that the United States can in some way be dragged into an intimate connection with European political troubles, or that the refusal of the United States to become involved should so persistently be made the occasion of unfriendly criticism. About all that can be hoped for, apparently, is that the American attitude and the reasons for it may in due time be understood, and that the American policy of complete independence will be seen to have been the best possible thing for Europe. No better service can be rendered by the United States to the rest of the world than its firm refusal to be drawn into the net of foreign political complications, and its firm insistence that problems of general interest shall be settled with regard to the general good. Mr. Coolidge has repeatedly made clear his readiness to enter into a further discussion of armament limitation, but only on condition that armaments, when they shall have been remodeled, shall actually have been reduced. It is difficult to see in the contentions of Great Britain and France any real hope of armament reduction; the forces of war will be, perhaps, differently displayed, but their essential power will remain the same if not actually increased. As long as this attitude continues, the United States can have no option save to keep to its own course, safeguarding its own interests if unhappily they seem to be threatened, maintaining a friendly and tolerant temper toward any genuine difference of opinion regarding ways and means, but declining to debate issues that are unreal. Any Administration that does this will unquestionably have the support of American public opinion.

#### "Whispering."

There is too much boasting on the part of managers in this campaign; and there is too much whispering on the part of the people. And yet we hasten to say that in using the term "people" we do not mean all the people. Furthermore, it is necessary

to define "whispering." There are several kinds. First, there are a few wagging tongues that are downright malicious. There are a few, again, that are idle lookers-on and who merely repeat what they hear as a matter of news. There is still another class, not large, that discusses the floating stories as to their effect on the campaign. And there are those who in their zeal, in their efforts to advance a party's cause, cannot refrain, in making contrasts as to the personal character of candidates, from unconsciously referring to scurrilous stories which they hasten to say they "do not believe." The vast mass of the voters, it is a pleasure to believe, pass all this talk and print by as irrelevant, irresponsible. and unworthy of the attention of the electorate, as having little if any bearing on the campaign, and as beneath the duty and dignity of those who have the public welfare at heart.

There is nothing new in the fact that "whispering" is going on. It has attended campaigns in the past and will reappear in campaigns of the future. Men who "run" for high office are special targets for gossip, good, bad, and indifferent. Recent biographers have seen fit to dig up a lot of this trash about Washington, Jefferson, and others of that day. And we have only to go back to recent campaigns to find this tittle-tattle talk going on. As for to-day, it need not alarm us. The election will not be decided by the tale-bearers. And at most it is an unpleasant commentary upon a limited class of our citizens. We do not elect perfect men to office. To begin with, there are none. Nor does it follow that flaws in the character of candidates will so operate upon the government as to destroy We have had no disreputable Presidents. We will not have until the character of the masses sinks to a lower level than it now occupies. We have had no autocrats, dishonest men, or men who have used the Presidency for corrupt personal gain, in the Presidential chair.

The chief thing for us to consider now, granting that some "whispering" is going the rounds, is how much and how far it obscures campaign issues and prevents a proper review of personal character as it affects the conduct of office. Foibles may be facts, and yet not touch the official demeanor. we go to the past, we will find that drink did not, as a rule, corrupt the political morals of our chief representatives. Times have changed since then, and liquor is the terrible product of the "worm of the still." And whatever our views may be as to temperance or total abstinence, we must recognize and admit that the offense of "drinking" is now highly magnified and stands out as a tremendous evil. But it did not destroy the honor and honesty and intellectuality of those who in other days made, administered, and adjudicated the laws. Why should it do so now? We are far from arguing that the practice is desirable in the interest of men and governments. But we are looking through the lens of agitation and intense feeling.

This "personal" feature of a campaign is a draw-back to the balanced study of character and the earnest seeking for truth as to the public welfare. To print a lot of allusion, without disclosing what is said so that the lie may impale itself on its own error, is to add, unwittingly, to the zest for the scandal, if indeed there be a lie and there be a scandal. And as far as candidates and committees are concerned, they should once and for all stamp down on

the "whispering," and then keep silence. To try to run down the author and starter of this sort of thing is as futile as to try to find the origin of a whirlwind running down a road and to gather up the dust it scatters on the way. The attitude of reserve in a man who knows he is worthy should not be broken by recognizing some nit-wit here or yonder through any sort of a reply. No man who is intelligent and studious of the best for the country pays or should pay any attention to "whispers." Sobriety is an element of good character, and when it does not exist in public men it is open to all to see.

As for this "claim all" campaign, it deceives no one. We have been excusing it in the midsummer as a sort of customary madness. But it is plain to the most indifferent observer that until the polls close "no one knows." Our next ballyhoo by managers will be as to "drifts" and "trends." These will be equally uncertain and equally biased. Both parties have big campaign chests. You can make figures prove anything if allowed to select the figures. The whole effort of national committee work has become so extended and complicated that it tends to defeat itself. With no questions at issue but "wet or dry" and "farm relief," questions that are not questions, but "planks devised to get in on." six weeks before the election there are literally millions who do not know how they are going to vote; and who in the end will vote "as their fathers did" or according to "general party principles" or for the man they "like best." The huge talk of the Committee Chairmen is really chaff in the wind.

As for the new aids and accessories, they will be used to little effect. Flash Hoover on the screen in a Republican community and the applause will indicate Hoover is far ahead in the "running"; flash Smith on the screen in a Democratic community and the reverse will be true. There is not much argument in pictures of scenes and events rehearsed beforehand. As for the talking pictures, they are too much a novelty to be worth many votes. Theatres are not run for political purposes, and audiences do not pay to hear or see what may be seen or heard on street corners and house roofs. As for interminable harangues on parlor radios, though millions are given the "opportunity to hear," they will not hear; for among the friends gathered in to listen, there will be many irrepressibles who will comment and cannot be suppressed even when the hearing is good, and a speech interspersed with static is devoid of force.

It is too late to change the issues. There may be some event of great significance that will introduce a new topic. But the speeches are now all prepared and will be delivered as written. No whirlwind campaign such as Bryan gave the country seems to be looked for. The extreme misfortune of the campaign is that having no issues of nation-wide interest or nation-wide application, if perhaps we except "wet or dry," though this narrows down to a matter of personal preference, since nothing can actually be done by either side, the misfortune is that the election will be the end of a lot of sound and fury indicating nothing. Probably women will vote in larger numbers than ever before. Probably their emotions will be more aroused by "wet or dry" than farm relief. Probably they will decide the election. But can the campaign managers corral the women? He would be a hardy prophet who would dare to answer.

#### The Crops, Politics, and the Surplus.

Now, as the October sun throws the faint veil of Indian summer over the vast stretches of farm land in the Midwest, there is joy in the heart of the husbandman. For the crops are abundant and there is plenty for all. Not yet does he know of prices and markets, but the returns of his labor are ample and the wide world must eat to live. Corn, wheat and oats, if not a bumper crop, are nearly so. Far beyond his own needs are the yields of his fields. He works with nature, and this year, as for many years past, nature has been kind to him. He looks with satisfaction on the long lines of wheat shocks golden in the sunlight, on the waving phalanxes of the corn, bearing the full ears, that feed both man and beast, now maturing in the gentle rays of a bounteous autumn. Looking from his doorway as the twilight falls and the day is done, a feeling of thankfulness fills his heart. His toil has been rewarded; he has a personal surplus to sell, and the world must buy. He has won the first battle in the yearly struggle to make a living. Not governments, nor organizations, nor laws, have builded this independence, but himself—the greatest individualist among men! And while the hustings resound with pleas and theories and commitments, no politics can harm him where he stands.

But he must sell. Ah, there's the rub. Prices may not be to his liking, but with transportation at hand, with credit ample to move his crops, with an imperative demand for his personal surplus, there is about him not only the will to buy, but the necessity to consume. If the manufacturer has a surplus at his plant of the thousands and one articles the machine in a machine age produces, in countless instances he must create the will to buy and often the demand of necessity is lacking. It matters not to him that farm machinery is on the free list, or is not; he, too, must seek foreign lands for his personal surplus. And so great is his growth and power in the United States that he can supply the world. Nor does he hesitate to provide a personal surplus, but threads the highways of earth seeking buyers for his products and every year sees his foreign trade advancing. It may be that, in general, a protective tariff shutting out interchangeable foreign products acts to his advantage in the home market. But he, too, like the farmer, is producing a personal and an occupational surplus, and having saturated the home market, will soon be compelled to strike down his tariff walls and let in the exchangeable products of other lands, or find his hitherto "protection" a bar to his further advance, for no man or people or country can continue to sell who will not buy. And though the hustings ring with pleas and theories and commitments, no politics brought this condition about, but his own genius for initiative, invention and enterprise.

Here are two great absorbing, abiding problems. They are not made by politics and cannot be solved by politics. If a protective tariff in the past has aided manufacturers at the expense of all home buyers of their products, it has dug its own grave. The time will soon come when the goods must be let in to pay for the surplus sold abroad. If the farmer with others has been the victim of this tax process and selling in fall world markets, has not been able so to fix price, he cannot be helped by the same system now. If he can by co-operative marketing meet

this difficulty more efficiently, well and good, but he should beware of surrendering his individualism, to associations or government, that will deprive him, by limitations, fees or taxes, of the right to produce his personal surplus in his own way on his own farm. Politics, by some strange twist of our constitutional right and theory of rule, in this election campaign, is appealing to the voters in behalf of these two great fundamental industries. They are thus made to stand as opponents in the principles and policies of "making a living." On the contrary, they are natural aids to each other.

Trade is mutual and reciprocal. National laws stop at national boundaries. Natural law is universal and omnipresent. To produce a surplus is to fulfill the law of industrial and commercial being. Government can neither supply nor demand. If, as said, manufacture has had an advantage by our laws over agriculture, that time is past. The infant industry has grown to be a giant and grapples the world. Without artificial law, without "tariff," manufacture and agriculture may, can, must, work out their destiny under equality of opportunity. Their prices, their profits, their markets, can never be "equalized" by any law save the natural law of reciprocal relations in the complex conditions, growth and compulsions of an advancing civilization. Our political interferences in the logic of events are both a farce and a scandal. Manufacturers know it and most farmers know it, and some candidates know it. A bumper crop is worth more than any three months of political palaver and subterfuge.

What has sectionalism or socialism to do with the liberty under law we profess? For it is socialism to rule private and innocuous personal conduct by national law; and it is sectionalism to ask aid for a region or an industry indigenous thereto. Increase of foreign exports demands an increase in imports. Ships cannot come home empty at a profit. But you do not have to sell to the same country at which you buy. The bushel of wheat exchanges more nearly than any other product for all the world's products. An automobile will exchange naturally for raw material we do not produce. And all this rotating trade is the power behind all advance. Single political campaigns that ignore great fundamental facts for expedients and votes deceive the people and retard the great equalization that exists in reciprocal trade. The farmer is not blind to these truths. And there is no more an agricultural problem now than there was ten years ago and will be ten years hence, save for the effect of booms and wars.

Well, the crop comes near to a bumper one, thanks to natural and not congressional law. In little more than a month the campaign with all its asseverations, denials, controversies and prophecies, will be over. The crop remains. This is the perennial wealth of a favored country. It is ours under all administrations and for all time. The "politics" will soon be forgotten in the urgencies of trade. There may be laws, State and national, proposed, enacted or defeated; exchange will go on. Supply and demand will shift and veer with the wants and tastes of the people. And let it not be denied or forgotten that extravagance and demand for the non-essentials of comfortable life, with credit extended to the breaking point, make for inequalities of life and

borrowed money cannot last always. All is not gold that glitters. And campaigns are but interludes. Some kinds of reaction are inevitable.

#### The America of the Future.

The initial device which was to make America is starting up anew. The schools are under way for a new year of work and the colleges and universities are opening. The young life of the nation is taken in hand in preparation for what it shall have

Professor W. B. Munro of Harvard has in "Harper's Magazine" for September a keen fling at the colleges; but in spite of the "tonics" pressed upon them, our higher institutions of learning are setting the pace and sustaining the characteristic life of the nation. It is well, however, to know what others think of us, and in the "Atlantic" for September we find a high authority speaking. Professor Moritz J. Bonn of the University of Berlin made a profound mpression two years ago at the Williamstown Institute. He is of the family of one of the great bankers in Frankfort, and has brought a keen mind and the habit of intensive thought, with the economist's demand for definite results, into the service of a university teacher. He has, after extensive travel in this country, written an article on "The American Way," in which he analyzes the American situation with exceptional acuteness. It is important in itself, and is especially suggestive as we start anew our schools, the agency which plays so large a part in creating our ethos, the moral and mental, not to say the economic and political features of our national life.

He points out that the difference between Europe and America increases rather than diminishes. We are colonizing Europe with capital, machinery and men. Existing animadversion and antagonism are not due to racial causes. Europe is composed of States separated by differences deeper than the racial ones existing between the American States and their relatives in the old world. America has not encouraged segregation, but has sought to fuse all comers into a common nationality. When groups have tried segregation, which they are free to do, their children have yielded to surrounding influences, have struck their roots into the soil, and have inevitably begun to reflect in their speech and ways the features of the life about them. The American problem is simple—what is to be the character of the new American stock? It is no longer a question of what the foreign elements will give it. These will produce and retain marked regional traits, such as existed in the thirteen original States, but the now established and vital unity of the nation is bound to strengthen and solidify as time goes on.

Europe has developed by a spontaneous growth, America by a more conscious will power. European society has grown up much as things mature in American society is the product of a purposeful creation. The United States is the master work of the New England Puritans; their influence permeates the whole. The American Revolution was the beginning of a new age. Revolutions elsewhere were but breaks in a continuous flow. The American Revolution created a nation. It turned away from a traditional past and began a separate existence. That continues and accounts must some time run their course. "Prosperity" on for the gulf between America and Europe, which

is only deepened by the many powerful forms in which America's influence enters Europe to-day. The will that has deliberately made a new commonwealth is what appears in the entrance of American capital, American machines, American commercial and industrial organizations and devices, American architecture, and the like, into Europe. America believes in change, progress and ultimate perfectability, and is intent on proving it.

The Louisiana Purchase gave the American people their opportunity. It unlocked the marvel of the West, providing in its vast area and unlimited natural resources opportunity for every man, no matter whence he came, so that for once in human history all competitors could start without undue handicap. It made possible the evolution of a competitive capitalistic society in close accord with progressive liberalism. It expelled the lingering shadow of feudalism that hung over the South. A subsequent fratricidal war was the instrument, vastly destructive, that opened a new day.

After the era of free land had ended expansion could no longer be automatic. New forms of business arose and new contests and rivalries came on. American capitalism was often dishonest, and the country in working out its own salvation has not infrequently abused its opportunities, but it is learning that capitalism can only continue as a social system if it delivers the goods, and this must extend to all. The wage earner cannot be overlooked and the consumer rather than the producer is recognized as holding the key to the situation. Immigration is demanding new attention. melting pot theory may have operated with only moderate success, but Dr. Bonn feels that there is a kind of nation-wide transubstantiation at work from which a new American nation will arise, a people healthy in body and vigorous in mind, from whose spirit democracy will lift the face of political oppression, and modern business development the dread of poverty. The energetic influence of a democratic, nation-wide system of education is spreading new ideas, often half-baked ones, all over the country. Europe observes with interest what America will do as conditions inevitably undergo change. Will her driving force be spent? Her task may prove to be a kind of spiritual synthesis, a creative chemistry of the mind, more vital than any material development.

If America's social and economic system proves sound, the rest of the world must adopt it. Progress in the rest of the world has not been so fast in these directions. Notwithstanding our policy of isolation, we are pouring our wealth into Europe, establishing the tie of creditor and debtor, which will inevitably entail losses as well as gains; as Europe has experienced over and over, and which we must share. What will then be the attitude of the United States? Will it cut losses as Europe did, and recoup the values with a better interest the next time? Or will she try to use political and economic pressure? Deep in the American mind exists a feeling that America has a mission; does it witness to the presence of a sense of moral obligation to make the land and the people worthy of the great opportunities Providence has given them?

Bonn is convinced that notwithstanding what may be termed the conscious American imperialism of our capitalists, they will never try to gain lordship in the world in a deliberate effort for spoils and domination.

We are developing a very helpful form of economic control by establishing financial liens in all countries which will make us silent partners of the world. Danger comes when in the hour of destiny the possession of power accustomed to assure profit may become a justification of oppression. He fears not the vices but the over-pressed morals of American business men. It is a danger that would materialize only because "men who spend their lives within the empire of business so rarely learn the business of empire." That is, do not learn that the man himself is of so much greater value than business ever can be.

As to the possibility of American business men doing this, and the reality of the opportunity and the task, we may turn from a European to an American thinker and author. Henry Osborn Taylor, in his new book, "Human Values and Verities," (Macmillan), speaking of Italy in the fourteenth and following centuries, says: "These were centuries of human growth. There had come mechanical and chemical discoveries. Commerce extended; wealth and material civilization greatly increased. Knowledge grew and thought quickened; sculpture and painting were magnificent; scholarship was general and ardently pursued;" and he adds this: "In what province, what small corner of life, does not man in the creation of values and validities, Where have men not found or wend his way? created worth and truth in business, politics, war; no less than in the family, in social life, in religion, science and philosophy? Every imaginable part of life may be a sphere for vital endeavor."

So the world opens anew to-day for our young people. It also has something to say to us all, at least in the plans for them which appear in our conscious example as well as in our words.

#### Not His Brother's Keeper—The Address of Governor Roy A. Young of the Federal Reserve Board.

[Editorial Article in New York "Journal of Commerce," Saturday, Sept. 22. "Leaning across the bosom of the urgent West" or, in less poetic language, addressing the annual convention of the Indiana Bankers' Association, Governor Young, of the Federal Reserve Board, enters a general plea of: "Not Responsible." He says in effect, that the Federal Reserve Board is not the keeper of the credit interests of the country, and must not be taken as responsible for anything that goes In his own words, "If unsound credit practices have developed these will in due time correct themselves, and if some of the overindulgent get burnt during the period of correction they will have to shoulder the blame themselves and not attempt to shift it to someone else." This someone else is undoubtedly the Reserve System, so that in effect what Governor Young says is that the Reserve banks have no particular function or duty in what is going on at the present time.

And what is that? Well, Mr. Young describes it very accurately. He says that our bank reserves are about \$500,000,000 smaller than some months ago, and yet that our bankers have gone on enlarging the structure of credit notwithstanding that reserves have been shrinking steadily. In fact, Mr. Young sees a probable call for about \$300,000,000 more of Reserve credit, and he thinks that if in January next the member banks do not owe the System more than about \$1,000,000,000, "the situation will have been handled admirably." Enlargement of credit in this way is really a matter which is to be determined by circumstances. "So many factors have an influence on banking, that it is a mistake to arrive at the conclusion that the Federal Reserve System alone, through its policies, makes credit situations." Indeed the System has no control whatever over a great many factors which form the basis of its rates.

Were it not for the profound faith which Governor Young shows in an overruling financial providence which doeth all

things well, this would be an exceedingly discouraging analy-But the Governor is far from pessimistic. He thinks the Reserve banks are operating exactly as they should. indeed they are operating "just as the law intended that they should function," an opinion in which (parenthetically) it may be confidently stated he is incorrectly informed. view of this opinion, however, it is not strange that he should gaily remark that "many people in America seem to be more concerned about the present situation than the Reserve System"—an obvious fact, of which we can only say that "'Tis true, 'tis pity, and pity 'tis, 'tis true."

Thus Governor Young. Where have we heard about the same sentiments? Was it not from the financial Dalai Lama of the present Administration, Secretary Mellon? week ago, this authority himself announced that there was no occasion for worry about credit conditions, and that all was going on exactly as it should with every prospect pleasing and satisfactory. In these circumstances it might be heresy to differ with the opinions thus handed down In these circumstances it might from the highest sources. At any rate, the address of Governor Young as reported in the newspapers would appear to be a kind of footnote or explanatory comment upon the broad doctrines of credit and banking as applied to existing

conditions expounded by the Secretary of the Treasury.

Last week the brokers' loan account increased about \$95,000,000, and this week saw another expansion of about \$85,000,000. The result has been to bring the total up to within less than \$100,000,000 of peak and to induce the marking up of call money to 9% or higher. Incidentally the effect has been a very bad one upon the legitimate offering of sound investment securities, which bear moderate rates, and, incidentally, also very injurious to our foreign loan business, which is regarded, by many certainly, as an important factor in our present financial organization.

Banking circulars coming from authoritative quarters discussion is one frankly state the opinion that liquidity is now at a lower ebb

among our financial institutions than at any time in the past and that we shall either have to reimport gold, consent to a permanent inflation with corresponding high rates and high prices, or else do something to check the inflationary condition. As to all this, Governor Young has nothing to say. Those who have been overindulgent in credit will get "burnt" he thinks, and that is all there is to it. Some profound law of compensation is at work, rapping bad bankers sharply over the knuckles and thus subjecting them to the penalties of their peccadilloes. Above all sits the Reserve System, flattering itself that all is going just as it should, drawing its salaries and distributing cigars to member bankers when they call.

It is a great financial philosophy!

## "Bootleg Banking."

In the reprint in our issue of last Saturday of an article from the New York "Journal of Commerce" under the above caption some typographical errors crept into the last paragraph. We accordingly repeat this paragraph below with the errors eliminated:

Our whole banking situation is confused and unsatisfactory. It has grown steadily worse of recent years at a time when it should have been improving and assuming the premier position in the world. But notwithstanding the organization of the Federal Reserve System our banking authorities allowed the panic of 1927 to come on and then to be followed by the terrible epidemic of bank failures which occupied the first half of this decade. Now they have followed this with a stock market inflation and expansion that is practically unparalleled, and what will come after it is still to be seen. The current market criticism of them is directed chiefly at such elements of prudence as still remain. It is nowhere more ludicrous than in its citation of evils as if they were advantages. The bootleg banking discussion is one evidence of this disposition to put the cart

## Leonor F. Loree Denied Permission to Continue as Director of Missouri-Kansas-Texas RR—Inter-State Commerce Commission Vacates Authorization to Hold Similar Positions on Two Roads.

The Inter-State Commerce Commission in a decision dated Sept. 14, and made public Sept. 21, vacated and set aside its order of April 11 1925 authrorizing Leonor F. Loree to hold the position of director of the Missouri-Kansas-Texas RR. while continuing to act as director of the Kansas City Southern Ry. The Commission's decision reviews the circumstances that led to the entry of an order last June requesting Mr. Loree to show cause why the authorization given three years previously should not be revoked, and concludes that "in the light of the above facts, we are unable to find that the holding by Loree of the position of director of the Missouri Kansas-Texas while continuing to act as director of the Kansas City Southern would not adversely affect public or private interests."

Commissioners Aitchison and Porter wrote separate opinions, concurring with the report of the ma-Commissioners Aitchison stated that he regards the discussion of Mr. Loree's stock transactions as irrelevant and unnecessary. Commissioner Brainerd dissented from the majority report, stating that "what it is, if anything, that has happened since [April 11 1925] which now requires the withdrawal of authority once given to Mr. Loree to hold the position of director of the Missouri-Kansas-Texas is not made clear in the majority's report."

The report of the Commission-Finance Docket No. 1975, Sub. 2-dated Sept. 14, together with the concurring and dissenting opinions, follows in

On April 11 1925, division 4 entered an order authorizing Leonor F. On April 11 1925, division 4 entered an order authorizing Leonor F. Loree to hold, until the further order of the commission, inter alia, the positions of director of the Missouri-Kansas-Texas Railroad Company and of the Kansas City Southern Railway Company. This order revoked the supplemental order of February 6 1922, also entered by division 4, in which Loree was authorized to hold, inter alia, the position

vision 4, in which Loree was authorized to hold, inter alia, the position of director of the Kansas City Southern. These orders were issued in connection with applications filed by Loree under paragraph (12) of section 20a of the interstate commerce act, and no hearing was held on either application. By order of June 22 1928, this proceeding was reopened and assigned for hearing on June 29 1928, upon the question as to whether the order entered on April 11 1925 should be vacated and set aside and the application denied.

On June 28 1928, Loree petitioned the commission to grant a postponement of the hearing, to file a formal statement of charges, if any, which he might be called upon to meet, and to set the case for hearing before the whole commission. The hearing was held as ordered. Petitions of intervention were filed on behalf of the Waco, Beaumont, Trinity & Sabine Railway Company and R. C. Duff, and by Walter E. Meyer for himself and other stockholders of the St. Louis Southwestern Railway Company. No evidence was presented by Loree in his own behalf.

Loree also questioned our jurisdiction to revoke and set aside the finding and order of April 11 1925, authorizing him to hold the position of director of the Missouri-Kansas-Texas, or to limit the grant of authority 'until the further order of this commission.' We are of the opinion that we have jurisdiction.

At the time Loree filed his application for authority to serve as a director of the Missouri-Kansas-Texas he was chairman of the board of directors of the Kansas City Southern and the latter company had acquired 250,000 shares of the capital stock of the former. The desire of the owner of this large stock interest to be represented on the board of directors of the Missouri-Kansas-Texas was, of course, a factor which was before division 4 for consideration upon Loree's application, as was the fact that there appeared to be competition between those carriers, particularly on traffic moving between Kansas City, Mo., and points in Texas.

The testimony s

reached that the Kansas City Southern should consider the acquisition of control of other roads to be grouped into a system with the Kansas City Southern commenced a study of traffic relations in the Southwest and of the possibilities of consolidations, and a special committee was appointed to consider the matter with Loree as chairman. The conclusion was reached that the Kansas City Southern should consider the acquisition of control of other roads to be grouped into a system with the Kansas City Southern. About the middle of October, 1924, an attempt was made to acquire the stock of the St. Louis-San Francisco Railway Company in the open market, but after acquiring 1,400 shares the price advanced so rapidly that the idea was abandoned and the stock so acquired was sold during the latter part of the same month at a profit of \$11,786.50. Also in October, 1924, Otto Kahn, of Kuhn, Loeb & Company advised Loree that that firm and some of his associates were buying Missouri-Kansas-Texas stock and asked him if he desired to take an interest with them. Loree acquiesced, and on November 6 1924, buying Missouri-Kansas-Texas stock and asked him if he desired to take an interest with them. Loree acquiesced, and on November 6 1924, there were purchased for him 11,950 shares of common stock at \$19.68 per share, costing \$235,176. On November 7 1924, there were purchased for him 2,050 shares of common stock at \$21,25 per share, costing \$43,562.50, making the total cost, including brokerage commissions and interest, \$285,872.14. Loree testified that these purchases were made in the usual way without a specific order from him and without

the deposit of any margin; that he never puts up margin for anything he buys; that the brokers sometimes carry such purchases for him and he sometimes pays for the stock and takes it up, and that in such transactions he invests his credit, which the brokers consider the same as cash. In this instance the stock was carried by the brokers until sold. About November 10 1924, Kahn informed Loree that he had been approached by Swartwout & Appenzellar, a brokerage firm in New York. with an offer of sale of that firm's holdings of Missouri-Kansas-Texas stock, and asked Loree whether the Kansas City Southern desired to buy it. Loree presented the matter to the special committee, which decided to acquire the stock. On November 11 it purchased 25,000 shares firm and took options on 17,600 shares for delivery on November 25 and 50,000 shares for delivery on December 5. Kuhn, Loeb & Company received a commission of 50 cents per share on this stock. Following this action by the special committee, Loree notified Kahn that he this action by the special committee, Loree notified Kahn that he ing this action by the special committee, Loree nothing Kann that he did not want any more Missouri-Kansas-Texas stock purchased for him, and requested that the stock theretofore purchased for him be sold as soon as these Kansas City Southern purchases were completed.

The record shows that the 17,600 shares under option from Swartwouthern purchases.

The record shows that the 17,500 shares under option from Swartwoute Appenzellar were delivered on November 26 1924. On November 25 1924, Kuhn, Loeb & Company also sold to Kansas City Southern 50,000 shares, which stock was apparently owned by themselves and not included in the Swartwout & Appenzellar options. On December 5 the Kansas City Southern took delivery of the remaining 50,000 shares of the Swartwout & Appenzellar stock. Meanwhile there had been purchased in the market through two stock exchange firms a total of 19,600 been seed all of which were delivered to Kansas City Southern on Novembers.

chased in the market through two stock exchange firms a total of 19,600 shares, all of which were delivered to Kansas City Southern on November 20 1924. Consequently on December 5 1924, the Kansas City Southern held 162,200 shares of Missouri, Kansas & Texas common stock. Of this amount there had been purchased at private sale and by options all but 19,600 shares. The purchases of stock made in the open market, delivery of which was taken on November 20 1924, showed prices ranging from \$23.50 per share to \$25 per share.

In accord with Loree's instructions to Kuhn, Loeb & Company to sell his stock when these purchases were completed, on December 31924, 4,000 shares of Loree's stock were disposed of at \$28.06 per share, and the remainder was sold as follows for January delivery at seller's option: December 5 1924, 2,000 shares at \$32.375 per share; December 6 1924, 6,000 shares at \$32.25 per share, and December 8 1924, 2,000 shares at \$31.375 per share. The net profit to Loree on this transaction was \$144,708. was \$144.708.

Following exercise of the options to purchase Swartwout & Appen-zellar stock, and the purchase of the 50,000 shares from Kuhn, Loeb & Following exercise of the options to purchase Swartwout & Appenzellar stock, and the purchase of the 50,000 shares from Kuhn, Loeb & Company, together with the 19,600 shares purchased in the open market no further purchases were made by Kansas City Southern of Missouri-Kansas-Texas stock between December 5 1924, and January 26 1925. Between January 26 1925, and February 17 1925, the Kansas City Southern acquired 87,800 shares of Missouri-Kansas-Texas stock in the market, so that as of the latter date it held 250,000 shares which had been acquired at prices ranging from \$23.50 to \$38.50 per share. This stock was purchased through Kuhn, Loeb & Company, Boissevain & Company, Post & Flagg, and Ladenburg, Thalmann & Company. The record shows that no more stock was purchased until August 19 1925, but meanwhile, on April 10 1925, Loree had been elected to the board of directors of the Missouri-Kansas-Texas and was authorized to hold that position by our order of April 11 1925, referred to above. Following his election as a director, Loree was elected chairman of the board. Between August 19 1925, and October 15 1925, the Kansas City Southern purchased 100,000 shares additional of Missouri-Kansas-Texas stock at prices ranging from \$40 to \$43 per share making its total holdings 350,000 shares. The purchase price of this stock was \$11,381,550 and brokerage commissions amounted to \$84,467.50, making the total cost of \$11,466,017.50. The average price per share was approximately The average price per share was approximately

brokerage commissions amounted to \$84,467.50, making the total cost of \$11,466,017.50. The average price per share was approximately \$32.76.

On October 14 1925, the Kansas City Southern purchased from the Chicago, Rock Island & Pacific Railway Company 134,880 shares of preferred and 19,288 shares of common stock of the St. Louis Southwestern Railway Company, paying \$92 per share for the former and \$60 per share for the latter. On November 10 1925, the Kansas City Southern purchased in the open market through Ladenburg, Thalmann & Company 100 shares of preferred at \$73.50 per share, 20 shares of preferred at \$73.625 per share, 700 shares of common at \$53.625 per share, and 12 shares of common at \$53.625 per share. Upon completion of these latter purchases, the Kansas City Southern held 135,000 shares of preferred and 20,000 shares of common stock of the St. Louis Southwestern, the total cost including commissions on the stock bought in the market, being \$13,613,301.60. Subsequently all of this stock was sold at cost to the Missouri-Kansas-Texas, subject to our approval, that company paying \$7,000.000 in cash and giving notes for the balance. The stock is now held in escrow by the Central Union Trust Company of New York under an escrow agreement dated July 23 1926, and a supplemental escrow agreement dated November 18 1927. The record shows that the agreement between the Kansas City Southern and the Missouri-Kansas-Texas provides that in the event the latter company falls to pay the balance of the purchase price within 90 days after our approval of the transaction, the \$7,000,000 which it paid shall be forfeited to the Kansas City Southern and all of the stock shall revert to the latter company. It appears extremely doubtful that such a penalty clause would have been approved by any board of directors of the Missouri-Kansas-Texas uninfluenced by the Kansas City Southern.

After the purchase of the St. Louis Southwestern stock by the Kansas-City Southern, consideration was given to various plans for financing the

was not tenable, whereupon Up the grove asked the Kansas City Southern whether it would take over the 100,000 shares of Missouri-Kansas-Texas stock which his company had bought. Following negotiations arrangements were made to take over the stock as of a date six months after our findings in the Southwestern case. The average price paid for this stock by the St. Louis Southwestern was \$44.80 per share.

Under date of October 30 1925, Loree filed with us an application for authority to hold the position of director of the St. Louis Southwestern case. Loree

on June 9 1927, following our decision in the Southwestern case, Loree requested that this application be withdrawn.

On July 24 1926, the Kansas City Southern filed an application under paragraph (2) of section 5 of the interstate commerce act for authority to acquire control of the Missouri-Kansas-Texas by purchase On July 24 1926, the Kansas City Southern filed an application under paragraph (2) of section 5 of the interstate commerce act for authority to acquire control of the Missouri-Kansas-rier filed a similar application acquired to the St. Louis Southwestern in the same application by our report and order in Proposed Unification of Southwestern Lines, supra, dated May 3 1927, we found that the proposed acquisitions of control would not be in the public interest and the applications were dended. Following that action, Upthegrove asked the Kansas City Southern whether it would take over the 100,000 shares of Missouri-Kansas-Texas stock which was held by the St. Louis Southwestern. Loree testified that while the Kansas City Southern felt that it was not legally or morally obligated to take over this stock, business considerations appeared to make such action advisable. Anticipating the tender of the stock, the Kansas City Southern commenced selling it in the market through Ladenburg. Thalmann & Company and before November 1 1927, when the stock was delivered, I near the consideration of the Kansas City Southern to take over the stock held by the Stansas City Southern to take over the stock held by the St. Louis Southwestern. The St. Louis Southwestern received for its stock the amount which it had paid for it, plus interest at the rate of 4½ per cent per annum. In view of the fact had of 1927, when the kansas City Southern to take over the stock held by the St. Louis Southwestern. The St. Louis Southwestern received for its stock the amount which it had paid for it, plus interest at the rate of 4½ per cent per annum. In view of the fact that on June 20 1927, when the kansas City Southern commenced selling the 61,400 share, mentioned above the highest price was \$56,375 per share, and the lowest price received for any of that block up to October 20 1927, was \$45.50 per share, it is not apparent why Upthegrove should have sought that of the Mansas City Southern members and the standard to the Kansas City Southern was obl of capital stock, and on the same date the latter carrier filed a similar application to acquire control of the St. Louis Southwestern in the same

very friendly to Duff and had given him assistance in connection with the operation of his properties and also in connection with proposed extensions of his line from Weldon to Waco, Texas, and from Livingston to Beaumont and Port Arthur, Texas, both of which have been authorized by us. The Missouri-Kansas-Texas had favored the proposed extensions because of the fact that they would enable it to gain access to Beaumont and Port Arthur from Waco. The extension of Duff's line to Port Arthur had been strongly opposed by the Kansas City Southern. Following the adoption of the plan for unification of the southwestern lines, and the election of Loree as chairman of the board of directors of the Missouri-Kansas-Texas, the attitude 1 Texar

toward Duff changed and the support formerly given him was withdrawn. At the hearing in the Southwestern case, the following testimony was given by C. N. Whitehead, then president of the Missouri-Kansas-Texas:

Q. (By Mr. Duff) Mr. Whitehead, you say conditions have changed. If the application of the Kansas City Southern under Finance Docket No. 5679 should be refused by the commission, the conditions will be restored, will they not\$

A. I think so, if it is decided that the Kansas City Scuthern and the Missouri-Kansas-Texas may not combine, I assume Missouri-Kansas-Texas will be left where it was before.

If the Kansas City Southern relinquishes, or is required to relinquish and relinquishes, its control which it has and disposes of the stock, and your property comes back into your hands and your management, then the attitude of the Missouri-Kansas-Texas may again be studied and considered from the standpoint of the Katy, unembarassed by that of the Kansas City Southern?

A. Yes, sir.

The record shows that at the time of issuance by division 4 of its order of April 11 1925, the Kansas City Southern held 250,000 shares of the stock of the Missouri-Kansas-Texas and that Loree was chairman of the board of directors of the former company. It also shows that the Kansas City Southern has divested itself of its holdings of Missouri-Kansas-Texas stock. In our report in Proposed Unification of Southwestern Lines, supra, we said:

. . . The M-K-T competes with the K. C. Southern for traffic moving from or through Kansas City to the Gulf for export and on imports coming through the Gulf ports to and beyond Kansas City. Also through their connections between Houston and Beaumont they compete for traffic originating in the Houston-Galveston district and in the Beaumont-Port Arthur district for Missouri River destinations. In fact, all eastern and northern Tease may be recarded as competitive. mont-Port Arthur district for Missouri River destinations. In fact, all eastern and northern Texas may be regarded as competitive territory as between the K. C. Southern and the M-K-T for traffic moving between that territory and Kansas City, since such traffic from points on only one of those lines, or from points not reached by either of them, may move hundreds of miles over either of those lines.

In the light of the above facts, we are unable to find that the holding by Loree of the position of director of the Missouri-Kansas-Texas while continuing to act as director of the Wasses-City Season.

continuing to act as director of the Kansas City Southern would not adversely affect public or private interests.

That portion of our order of April 11 1925, authorizing Loree to hold the positions of director of the Missouri-Kansas-Texas will be vacated and set aside. An appropriate supplemental order will be entered.

Commissioner Aitchison, concurring, said:

I concur in the result, but regard the discussion of Mr. Loree's stock transactions as irrelevant and unnecessary.

Commissioner Porter, concurring, said:

I concur in the principle underlying the majority report. But in vio of the pendency of the cases involving the unification of these lines believe the decision should have been postponed and this case deterCommissioner Brainerd, dissenting, said:

I assume that the showing made on April 11 1925, fully justified the finding and order then made by division 4 that neither public nor private interests would be adversely affected by Mr. Loree's holding the position of director of the several carriers therein named. What it is, if anything, that has happened since which now requires the withdrawal of authority once given to Mr. Loree to hold the position of director of the Missouri-Kansas-Texas Railroad Company is not made clear in the majority's report. The facts recited are addressed largely to the efforts made and now being made by the Missouri-Kansas-Texas Railroad Company, the Kansas City Southern Railway Company and the St. Louis Southern report. The facts recited are addressed larger and before the fact of the fact

SUPPLEMENTAL ORDER.
At the General Session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 14th day of September, A. D. 1928

In the Matter of Authorization, Under Paragraph (12) of Section 20a of the Interstate Commerce Act, to Hold the Positions of Officer or Director of More Than One Carrier.

Finance Docket No. 1975-Sub. 2. Application of Leonor F. Loree. A hearing and further consideration of the record in the above-entitled proceeding having been had and the capacitation of the record in the above-entitled. proceeding having been had, and the commission having, on the date hereof, made and filed a report containing its findings of fact and conclusions thereon, which said report is hereby referred to and made a

part hereof: part nereor:

It is ordered, That that portion of the order entered in this proceeding on April 11 1925, authorizing Leonor F. Loree to hold the position of director of the Missouri-Kansas-Texas Railroad Company, be, and it it hereby, vacated and and set aside.

It is further ordered, That except as herein modified, said order of April 11 1925, shall remain and continue in full force and effect.

By the commission.

By the commission.

(Seal.) George B. McGinty, Secretary.

(1) The order authorizes Mr. Loree to serve as director of the following carriers: Albany & Susquehanna Railroad Company; Chateaugay & Lake Placid Railway Company, Cooperstown & Charlotte Valley Railroad Company, Cooperstown & Susquehanna Valley Railroad Company; Brie Railroad Company; Greenwich & Johnsonville Railway Company; Kansas City Southern Railway Company; Mechanicville & Fort Edward Railroad Company; Missouri-Kansas-Texas Railroad Company; New York, Ontario & Western Railway Company; Northern Coal & Iron Company; Ontario, Carbondale & Scranton Railway Company; Port Jervis, Monticello & Summitville Railroad Company; Rensselaer & Saratoga Railroad Company; Rutland & Whitehall Railroad Company; Schoharie Valley Railway Company; Seaboard Air Line Railway Company; Ticonderoga Railroad Company Troy Union Railroad Company; Wheeling & Lake Erie Railway Company; and Wilkes-Barre Connecting Railroad Company.

# Indications of Business Activity

#### STATE OF TRADE-COMMERCIAL EPITOME.

Friday Night, Sept. 28 1928.

The trade of the country has been benefitted by lower Cooler weather has prevailed everywhere. temperatures. Thr has been killing frost in many parts of the Central West, as well as the Northwest. Even in Missouri it has been as low as 32 degrees. Minimum temperatures in the thirties and forties have prevailed over the entire South. The retail trade has been whipped up by such temperatures all over the United States. This has reacted favorably upon the cotton mills, for instance. A better business has been reported, not only in the Worth Street district here, but also at Fall River, and in some of the big centers of the Carolinas. Raw cotton here has advanced recently about 2c. a pound and cotton goods 1/8 to 1/4c. under the stimulus of a better demand for both raw and manufactured material. Large Wall Street and Western interests are supposed to be favorably impressed with the possibility of higher prices for raw cotton and have been operating accordingly, on a very successful scale. Spinners have been "calling" cotton steadily and hedge sales have not made much impression until to-day, when there was a natural reaction at the Cotton Exchange. The bullish factors in raw cotton during the week have been cold weather and rain and persistent reports of deterioration in the crop in much of the belt. Furthermore, there has been a tendency to reduce the crop estimates well below the last one by the Government on Sept. 8 of 14,439,000 bales. fact, there is an idea that the Government's estimate may fall somewhat below 14,000,000 in the next report on Oct. 8, the real date of which, however, is Oct. 1. Wool has been steady with a fair demand. The branches which have been most favorably affected by the more bracing weather in the jobbing and retail trade are heavy drygoods, clothing, and silk fabrics; also hats, blankets, shoes, furs, and stoves, not to mention both soft and hard coal.

In steel there has been a fair business and the outlook is considered encouraging. The automobile industry is the best buyer of steel. There is some demand from the railroads for rails. Also there is a demand for iron and steel implements, notably from the tractor industry. The output of the steel mills is noticeably larger than a year ago, and manufacturers are hopeful of getting higher prices for the fourth quarter. Scrap has been firm, and copper higher, as well as tin. Live stock, on the other hand, has been in less demand, while receipts at the same time have been rather large and prices lower. Hogs are down to the lowest prices seen since the end of June. Wheat has been rather firm, despite large receipts and a poor export demand. The visible supply in the United States is up to 103,400,000, the largest since the days of the war, but the market at times has been short. The Canadian pool has not been selling for hedge acount. The crop in Western Russia is said to be small. In the wheat trading at Chicago it is said that politics has had some influence. September corn has declined under liquidation, but other months have advanced. There has been a heavy frost over the central and northern sections of the corn belt. Moreover, supplies of old corn are down to a low level, and it is believed that this country itself can readily enough consume a crop of 3,000,000,000 bushels. The high prices current for cattle and hogs (compared with a year ago) suggests that the feeding demand for corn this season may Oats have been steady, as the visible supply is about 9,000,000 bushels smaller than a year ago, and the cheapness of this grain may cause large consumption on the farms. Of rye, there has been recently a certain amount of European buying and prices have shown distinct strength, as the supplies are small all over the country. September is 4 cents higher. Provisions have declined this week owing partly to liquidation of the September delivery and partly to the lower prices for hogs, with impending heavy receipts. Raw sugar declined partly because of hedge selling by Europe against recent large purchases of Java sugar. Besides there has been no great domestic demand for either raw or refined here of late. Coffee dropped on September delivery as the end of the month drew near, and other months declined in lesser degree. Cost and freight prices at times were lower, but of late the spot trade has improved somewhat and roasters are supposed to be carrying only light stocks.

The output of automobiles has to all appearance risen to a new peak. Certainly the general impression is that the daily output for September will show an increase over the high record for August. At Detroit, however, this week, after seven weeks of rising totals, the employment shows a decrease as compared with last week of about 3,200. The total employed, nevertheless, is close to 300,000, or in exact figures 297,573, which shows an increase over the same time last year of 101,000 and over the total of 1926 at this time of 63,573. Carloadings for the week ending Sept. 15 reached the largest total thus far this year. It is true that five out of eight groups in these figures showed a smaller total than for the same week last year, but for all that the grand total is somewhat larger than a year ago. Railroad earnings for August show a slight increase in both gross and net, despite the small decrease in carloadings, mostly of coal, not a large revenue producer. Railroad traffic at the West just now is large, with no shortage of cars in the Central West, though something of the kind is seemingly threatened in the Northwest.

On the Stock Exchange, after active enthusiastic and rising markets, stocks on Thursday declined 4 to 6 points, notwithstanding call money was down to 6% and plentiful. The ticker on some days was 42 minutes behind the actual transactions and it was only by telephoning to brokers on the floor of the Exchange that any clear idea of prices at the moment could be had. The difference between such prices and those on the belated tape was sometimes 5 to 6 points. To-day stocks declined for a time and then suddenly rallied sharply in the face of 8% call money after an early 6% rate as banks called \$30,000,000 to meet month-end requirements. Auto stocks and specialties rallied strongly. Bonds were quiet and inclined to weaken. London was quiet and steady.

Fall River, Mass., wired that contract sales of some eight or ten different styles of 38-inch goods at full market prices and totaling a fairly large yardage were made there and that the sales, following so closely upon the increased contract sales of 25-inch constructions reported last week, had created a much more optimistic feeling. At New Bedford, Mass., on Sept. 26, the New Bedford Cotton Manufacturers' Association voted unanimously to accept the recommendation made jointly on the 25th inst. by the State Board of Conciliation and Arbitration and the Citizens' Mediation Committee that the strike here be settled on the compromise basis of a 5% cut in wages. Later, New Bedford seemed more hopeful of an early ending of the strike. At Greenville, S. C., mills report a much better demand and prices rising. Charlotte, N. C., wired that the demand was more encouraging.

It has been cooler here and almost wintry at times. On the 25th inst. it was 46 degrees. At Boston it was 44 to 63; Chicago 40 to 70; Cincinnati 50 to 62; Cleveland 46 to 54; Detroit 44 to 48; Helena 36 to 64; Kansas City 44 to 62; Los Angeles 52 to 72; Milwaukee 40 to 52; St. Paul 34 to 48; Montreal 42 to 54; Omaha 38 to 54; Philadelphia 46 to 60; Portland, Me., 42 to 62, San Francisco, 52 to 60; Seattle 44 to 62; St. Louis 48 to 62. It has been down to freezing point in the Dakotas, Iowa, Nebraska, Wyoming and Tennessee; in the 40's all over the South and on the 25th 37 to 39 degrees in parts of the cotton belt. There have been snow flurries in northern New York, heavy snowfalls in Michigan. At Williston, N. D., on the 25th, it was 18 degrees. Chicago had a brief snowfall on that day, the first on record for the month of September, the earliest heretofore having been Oct. 9 1906 and 1925. The average date for snow there is Oct. 31. Pennsylvania had its first snowfall on the 25th. Here on that date overcoats and furs were worn, but in the evening came rain which by 10 p. m. developed into a sharp thunderstorm with vivid lightning. In Canada it has been down to 10 degrees.

Sept. 26 here was the coldest on record with a temperature of 43 degrees at 6 a.m. Nothing like it has ever been seen in September since 1887 when on the 26th of this

month it was 45 degrees. This year on the 26th, Massachusetts and Pennsylvania had snow flurries and water froze in pails at one point in that State. Williston, N. D., had a temperature of 18 degrees. In Ontario, Canada, fruit and tobacco crops were damaged. It was 34 to 50 at Chicago, 34 to 64 at Cincinnati, 36 to 54 at Cleveland, 34 to 48 at Detroit, 30 to 48 at St. Paul, 44 to 60 at Kansas City, 34 to 52 at Milwaukee, and 44 to 60 at Philadelphia. Today it was still cool with temperatures 48 to 58 degrees. In Boston it was 46 to 58, Chicago 40 to 62, Cincinnati 40 to 52, Cleveland 42 to 58, Detroit 40 to 58, St. Paul 34 to 58, Milwaukee 42 to 62 and Philadelphia 50 to 64.

#### Federal Reserve Board's Summary of Business Conditions in the United States-Increase in Industrial Activity-Further Advance in Wholesale Prices.

The Federal Reserve Board, in its "Monthly Summary of Business Conditions" in the United States, issued Sept. 27, states that the "volume of industrial and trade activity increased in August, and there was a further advance in wholesale commodity prices. Reserve bank credit outstanding increased in September, reflecting in part seasonal demands for currency and credit. Money rates remained firm," says the Board, its statement continuing:

Production.

Production of both manufactures and minerals increased considerably Production of both manufactures and minerals increased considerably in August, the output of manufacturing plants being larger than at this season of any earlier year. Automobile production was in record volume in August, and available information indicates than output was maintained by many producers at high level during September. Iron and steel production continued large in August and September, and output of nonferrous metals increased between July and August. Textile mill activity, which had been somewhat reduced in recent months, also showed a substantial increase. Factory employment and payrolls have increased since midsummer and in August were close to the levels of a year ago. In the building industry there was evidence of recession in a sharp decline after the early summer in contracts awarded, which were in smaller volume during August than in the corresponding month of any year since 1924. In the first three weeks of September, however, awards were somewhat larger than last year. than last year

Estimates of the Department of Agriculture for Sept. 1 indicate that yields of principal crops will be larger than last year and above the average for the preceding five years.

for the preceding five years.

Trade.

Distribution of commodities showed seasonal increases in August, although sales in most lines of wholesale and retail trade did not equal the unusually large sales of August 1927. Department stores increased as is usual in August, but continued smaller than a year ago, while inventories in several lines of wholesale trade were somewhat larger than last year. Freight car loadings were in about the same volume in August as a year earlier. Shipments of miscellaneous commodities and grains were larger and those of coal, livestock, and forest products smaller than last year.

and those of coal, livestock, and forest products smaller than last year. Prices.

The general level of commodity prices increased in August and the Bureau of Labor Statistics index, at 98.9% of the 1926 average, was the highest in nearly two years. Increases in August were chiefly in the prices of livestock and livestock products, which are now higher than at any time since 1920. There were also small increases in fuels, metals and buildings materials. Grains and cotton showed sharp declines, and there were decreases also in hides and skins and wool. Since the first of September there have been some declines in livestock and meats, and a sharp further decrease in cotton, while prices of pig iron, copper and petroleum have advanced.

Bank Credit.

Between the middle of August and the middle of September there was a considerable increase in the loans and investments of member banks in leading cities. Part of the increase was in loans on securities and part reflected a seasonal increase in other loans. Deposits of the member banks also increased during the period.

also increased during the period.

Volume of Reserve Bank credit outstanding increased during the four weeks ending Sept. 19 in response to seasonal demands for currency and growth in member bank reserve requirements. The increase in total bills and securities was largely in holdings of acceptances and in discounts for

and securities was largely in hotological member banks. During the same period there were further increases in open-market rates on collateral loans and on commercial paper, while rates on bankers' acceptances were reduced from  $\frac{16}{2}$ % to  $\frac{4}{2}$ %.

#### National Bank of Commerce in New York Looks for Good Fall Business-Fall and Early Winter Peak of Credit.

In discussing the business prospect under date of Sept.

In discussing the business prospect under date of Sept. 20 the National Bank of Commerce in New York said:
Fall business will be good. A high rate of industrial operation through the summer has resulted in a general feeling of confidence regarding the balance of 1928, and plentiful harvests and the prospect of full employment through the fall promise an active demand for the innumerable articles that make up the necessities of modern living. A normal seasonal increase in business is clearly in prospect, which will compare the more favorably with 1927 because of the declining trend of the latter part of that year.

The greatest activity in manufacture continues to center about the steel and steel-using industries. The current year seems likely to prove

The greatest activity in manufacture continues to center about the steel and steel-using industries. The current year seems likely to prove one of the best the steel industry has ever enjoyed.

Signs of improvement are apparent in the textile field, which so far this year has been a sore spot in the industrial situation. In the cotton industry there was a gratifying turn in August, when production of piece goods recovered somewhat from the low level of July. New orders and shipments improved even more and as a result the stock figure showed a moderate decline—the first in a year's time. September moreover has shown further evidence of a better demand for cotton goods. Wool manufacture is still clar but tready buying of silks was reflected last month in a sharp increase decine—the first in a year's time. September moreover has shown further evidence of a better demand for cotton goods. Wool manufacture is still slow, but steady buying of silks was reflected last month in a sharp increase in production. Demand for rayon products continues to exercise the full capacity of that industry, despite considerable addition to plant equipment. Thus far, relatively high money rates have had no tangible effect on industrial operations and it is hardly likely that they will materially influence activity for several months to come. However, the trend of construction, which is perhaps most directly affected by higher capital costs, is worth attention. The Dodge figures of contracts awarded reached the peak in May at about \$670,000,000. Since then they have steadily declined. For July, the total was \$583,000,000: for August, \$517,000,000. A good part of this drop is seasonal. The August decline, however, was contrary to the usual seasonal trend, and the contract figure was the lowest for that month of any year since 1924. While this does not indicate a slackening of current construction, and it is yet too early to determine whether a slackening is to come, the building of the past has been stimulated by low costs of capital which are now absent. A moderate decline in construction work some months hence would not, therefore, be surprising.

Fall retail trade has as yet hardly more than begun, but good volume is noted in the sections of the West that have already experienced some cool weather. With a favorable background of industrial employment and good crop yields, it seems likely that the present expectations of a substantial increase in retail trade over the latter part of last year will be realized.

#### Index Number of Retail Food Prices.

As stated in these columns Sept. 22 (page 1583) the retail food index issued by the Bureau of Labor Statistics of the United States Department of Labor shows for Aug. 15 1928, an increase of a little less than 1% since July 15 1928; an increase of a little more than 1% since Aug. 15 1927; and an increase of 52.8% since Aug. 15 1913. The index number (1913=100.0) was 152.4 in Aug. 1927; 152.8 in July 1928; and 154.2 in Aug. 1928. The index numbers made available by the Bureau follow:

INDEX NUMBERS OF RETAIL PRICES OF THE PRINCIPAL ARTICLES OF FOOD IN THE UNITED STATES.

# Industrial Activity Based on Electrical Consumption Ahead of Last Year—Nine Months Period Up 5%

Operations of general manufacturing plants of the country in the first nine months of the year, as measured by consumption of electrical energy, have been almost 5% greater than those of the same time last year and the period ranks as one of the most prosperous in the history of American industry, according to Robert M. Davis, Statistical Editor of the McGraw-Hill publications. "Outstanding as a factor has been the almost entire absence of the so-called summer slump," Mr. Davis declares, "and in a number of instances important industrial groups reported summer operations of a higher order than those of the early spring period." Mr. Davis goes on to say-

a higher order than those of the early spring period." Mr. Davis goes on to say—

"The rate of manufacturing activity from March to the close of the third quarter did not vary by more than 4%, as against approximately 10% in the corresponding period last year.

"Of eleven leading industrial groups, only two—lumber and its products and the textile industry—reported an average rate of operations during the nine months under that for the same period in 1927. The manufacture of automobiles and equipment, including parts, leads in the gain over 1927, the increase amounting to 29.5%. The chemicals and allied products group follows with a gain of 21.8%. Rolling mills and steel plants increased their operations by 5.4%, and the ferrous and non-ferrous metal working plants gained in rate of operations to the extent of 13.8%.

"Manufacturing operations, however, have not been on the same high plane in all sections of the country. The plants in the North Central States reported the greatest gains over last year with an average for the nine-months period of 9.6%. This has been due largely to the record operations in the automobile industry and the increased activity in the metal working plants. The Middle Atlantic States reported general manufacturing for the nine months as 9.3% above the same period last year. The chemicals and allied products group led in this section with an increase of 27.6%, followed by the metal working industry with operations 6.6% greater than last year.

"Manufacturing activity in New England, the South and the Western States have not been quite up to the mark set last year. The metal working industry in the New England district increased its rate of operations over last year by 12%, but this was offset by a decline in activity in textile plants resulted in a drop for the South in manufacturing of about 3.3%. In the Western district, which covers the Rocky Mountain and the Pacific Coast States, the rate of operations was only slightly below that of 1927.

"There is every reason to believe that the

"There is every reason to believe that the year will show a volume of manufacturing operations about 4% greater than that for the whole of 1927, which is close to the annual rate of growth normally expected of American industry in general."

#### Guaranty Trust Company's Views of Conditions-Business Activity Not Affected by Presidential Elections Nor High Interest Rates.

A continued high level of general trade activity, with seasonal expansion in some lines, and a further tightening of money rates have been the outstanding features of the business situation during the current month, states the issue of "The Guaranty Survey," published Sept. 24 by the Guaranty Trust Company of New York. "The fall stimulus is under way, and at present there is reasonable prospect for a continuance of sustained business activity to the end of the year, at least," "The Survey" continues. Although money conditions have undoubtedly operated in some instances as a check on trade volumes, neither high interest rates nor the uncertain influences traditionally ascribed to approaching Presidential elections have served to bring about a lower level of activity or to dampen the spirit of optimism that has been developing in business circles for several weeks, according to "The Survey," which says:

"The course of trade this year forms an interesting contrast with the trend in 1924, the year of the last Presidential campaign. At that time the spring and summer months witnessed the most drastic industrial curtailment that had occurred since the post-war crisis; while this year the summer recession that has come to be regarded as entirely normal has hardly appeared at all. This change is probably due mainly to economic, rather than political, factors.

#### No Sign of Severe Money Shortage

"As for the influence of money conditions, there has as yet been little evidence of any real shortage of funds for commercial purposes. To be sure, the higher level of rates must be regarded as an indication of less plentiful supplies of loanable funds than were available a few months ago; and, from the point of view of general business, the very fact that higher returns must now be paid for the use of borrowed money is a factor of no little importance. Nevertheless, funds for legitimate uses are still forthcoming in sufficient amounts at the terms quoted.

Whether the increasing demands of the autumn and winter will continue to be met as successfully remains to be seen. Although the use of bank credit for speculative purposes has never resulted in a lasting scarcity of commercial funds, such a situation may exist for a short time. So far, however, it certainly cannot be said that a period of severe shortage is in prospect.

#### Union Trust Co. of Cleveland Reports Outlook for Industrial Earnings Most Favorable of Year.

The upward swing of business which began in the spring and gained momentum during the summer is continuing

into the autumn, says the Union Trust Co., Cleveland. The outlook for industrial earnings is the most favorable of the year, according to the bank. "Expectations of a steady flow of prosperity during the autumn are based upon excellent crop prospects, good demand and large outputs of motor cars, and the stiffening of steel and other commodity says the bank in its magazine "Trade Winds," prices," issued Sept. 22. It also says:

issued Sept. 22. It also says:

"The credit situation and continuing speculative enthusiasm present a difficult problem, but one which should not develop to such a point as to embarrass the ordinary conduct of business.

"It is interesting to note that the rising trend in industrial and general business activity and profits has almost exactly paralleled the season's trend of improvement in crop conditions and agricultural prospects. The continuing high purchasing power of the farmer should give promise of good markets for industrial products, not only this autumn, but far into the spring.

"Farm prosperity may indeed be accounted one of the factors which is

"Farm prosperity may indeed be accounted one of the factors which is continuing to maintain the demand for automobiles at its present high level. This is being reflected in high production schedules of motor accessories, steel and other automobile supplies. What is even more significant than the continuance of iron and steel activity at a high rate is fact that after a long decline, prices have begun to rise materially."

#### High Monthly Record in Indiana Building Contracts During August.

Building contracts in Indiana during August reached a high monthly record for the year; auto accessories continued their upward march, while auto production is rapidly overtaking its former record. These reports on Indiana business conditions during August are contained in the current issue of the "Indiana Business Review," published monthly by the Fletcher American National Bank of Indianapolis. Edwin J. Kunst, manager of the Indianapolis division of the Indiana University Bureau of Business Research, prepares the report. The review says:

"The general upturn in most State business indicators this summer has been encouraging. August again showed gains over last year in nearly all lines of production and distribution for which data are available. Employment indexes showed a slight summer recession, but were above last year in July and August. Pig iron production was ahead of last year and did not show as great a seasonal slump for the month."

"The Review" shows that retail and wholesale trade followed the usual trend of summer slackness, but in most cases remained above last year's record. New automobile sales made a notable advance, especially in the truck division, while used car sales were also above normal for the month. Freight car loadings increased, as did grain receipts, especially in the case of oats. Live stock receipts were still below standard. An increase in bank debits and savings deposits more than offset the decline in postal receipts and bank clearings.

#### Dr. Lewis H. Haney of New York University Sees Building Situation As Retarding Factor in General Business Conditions.

In his monthly analysis of business conditions, Dr. Lewis Haney, Director of the New York University Bureau of Business Research, emphasizes the building situation. Dr. Haney says:

Dr. Haney says:

The important news affecting business has not been the announcement of a small importation of gold from England. That is a seasonal occurrence and was to have been anticipated. England took only a small part of the \$700,000,000 in gold that we have exported—about \$40,000,000—and is not likely to ship back even that amount.

Certainly Mr. Mellon's cautious statement that business is good has little importance. He held out no hope of lower money rates.

The really big news item has been the report on building activity in August. This shows a continued decline. The total floor space in new contracts in August was only 78,873,000 square feet, which compares with over \$2,000.000 in July and nearly 94,000.000 in June. The August decline, moreover, was contrary to the usual trend at this season. The value of contemplated new construction in August was only \$612,000,000 against \$648,000.000 in July and over one billion dollars in June. Usually August has shown a gain over July. Moreover, permits for building houses, office buildings, and stores in cities fell off more than usual. The total value in a list of representative cities last month was around \$275,000,000 which

buildings, and stores in cities fell off more than usual. The total value in a list of representative cities last month was around \$275,000,000 which compared with about \$281,000,000 in July.

During the first week of September the decline continued.

This is much as anticipated. Building in some sections has been going ahead at a pretty rapid rate this summer, and a good deal of it has been quite speculative. Meanwhile, residential rents, at least, have been gradually declining. Now the high money rates are checking the flow of funds into securities such as mortgage bonds. It has become increasingly difficult to sell bonds yielding even 5—6%, now that money rates are over 7%. Such a condition nearly always brings a decline in building operations.

Dr. Haney concludes that "while business in general promises to continue in large volume during the remainder of the year, the reduction in building is a retarding factor that will have widespread effects. It goes far toward explaining the fact that railway freight traffic in August was smaller than a year ago."

#### Building in New York Metropolitan Zone Passes Billion-Dollar Mark for Year.

Building activities in New York's Metropolitan Zone are running into new high records and are far outstripping all other sections of the United States, according to figures made public by S. W. Straus & Co. Building plans filed and permits issued in 53 cities and towns of the zone, including New York City, for August reached a total of \$106,493,329, compared with \$100,211,630 for the previous August, a gain of more than 6%. This is in striking contrast with reports from more than 500 leading cities and towns of the United States outside the Metropolitan Zone, which in August reported aggregate building permit losses of 18%. S. W.

Straus & Co. go on to say:

The volume of building now in progress throughout the New York
Metropolitan zone is greater than the activities of all the leading cities and
towns of Pennsylvania, Illinois, California and Ohio combined, which are
the leading building States of the country after New York.

Local building operations for the year 1928 have undoubtedly reached the
billion-dollar mark and by the end of the current month will have gone con-

Local building operations for the year 1928 have undoubtedly reached the billion-dollar mark and by the end of the current month will have gone considerably beyond that figure as the total for the entire zone at the end of August was \$917,083,983. This figure compares with \$825,667,669 for August 1927, a gain of 11%. In no other metropolitan section of the United States are there any building activities comparable in proportions or similar in growth.

While building in the Chicago zone has been well sustained since the first of the year, these activities have been only about one-third of the volume of the New York zone.

Both York zone and Newark continue month after month to find places

of the New York zone.

Both Yonkers and Newark continue month after month to find places among the 25 leading building cities of the country. Yonkers in August ranked as the seventh city in the country, being exceeded in building volume only by New York, Chicago, Philadelphia, Detroit, Los Angeles and Cleveland. Newark ranked fourteenth, being ahead of such large population centres as Washington, Baltimore and San Francisco.

Building regulation country in the 63 leading centres of the

Building permits issued or plans filed in the 63 leading centres of the Metropolitan Zone for August compared as follows:

	Aug. 1928.	Aug. 1927.		Aug. 1928.	Aug. 1927

#### Revision of National Association of Real Estate Board's Monthly Index-Changes Base to Year 1926-August Activity Measured by Index Figure of 91.3.

Change of base in calculation of its monthly index of real estate market activity is announced by the National Association of Real Estate Boards. In its announcement, the association says:

The year 1926, which has been adopted as its new base by the United States Department of Labor in revising the method of compiling its index of wholesale prices, and by Professor Irving Fisher in revising his weekly index number of wholesale prices, and which is coming into general use by statisticians as a norm against which to measure present trends, is taken as the base of the Association's revised index series.

The previous base of the Association's index, which has been published.

The previous base of the Association's index, which has been published since 1923, has been the monthly average number of real estate instruments recorded for the years 1916 to 1923 inclusive.

This period included pre-war, war time and early post-war years which were not typical, and with which there is no longer reason to compare market activities.

The Association has further revised its index by basing it exclusively upon the number of deeds recorded in each city or county reporting, instead of upon the total number of instruments recorded, a category which

included mortgages.

The value of the index has been further strengthened by enlargement of the list of cities from whose records it is derived.

of the list of cities from whose records it is derived.

The index has previously been based on reports from 41 cities. The revised index is based on reports from 58 cities.

The reports are, in each case, from the official records.

Real estate market activity for the month of August 1928 as measured by the new base is indicated by the index figure of 91.3.

The Association points out that the figure for August 1928, and for all subsequent months constitute a new series not comparable with the former series of index numbers, and that figures from the present series should not be used in conjunction with figures from the former series.

The new index number of the real esetate market is based on the number of deeds recorded in the following 58 cities:

Akron, Ohio
Albuquerque, N. M.
Amarillo, Texas
Atlanta, Ga
Baltimore, Md.
Bolse, Idaho
Boston, Mass.
Brooklyn, N. Y.
Charleston, W. Va.
Chicago, Ill.
Cleveland, Ohio
Columbus, Ohio
Dayton, Ohio
Denver, Colo.
Detroit, Mich.

#### Bank of Montreal Forecasts Excellent Autumn Trade in Canada-Huge Wheat Harvest.

Excellent autumn business is in prospect in virtually all departments of Canadian trade, according to the Bank of Montreal. The general business situation presents few weak spots, the bank states. "A Wheat harvest, the largest in the history of the Dominion and an estimated 110,000,000 bushels greater than 1927, will be a great aid to business," according to the bank's summary. "The crop has been "The crop has been safely gathered and threshing as well advanced. Although there has been a drop in wheat prices, this recession will be offset by an increase of 25% in yield as well as generally higher grades so that the value of the crop is not expected to vary widely from that of last season. Central and eastern provinces have good field and fruit crops." The bank also

states:

"The upward trend of foreign trade continues with an increase in August imports of \$13,409,000 and exports of \$18,277,000 compared with August 1927. In the first five months of the fiscal year, continuous expansion of foreign commerce in Canada has brought the total near the high water mark of 1928. The aggregate is now \$1,041,078,000.

"The fall in commodity prices must be considered to appreciate the significance of the trade recovery. This item reaches little less than 40% so that in volume, current movements of imports and exports greatly exceed those of any previous period in the history of the Dominion. The maintenance of a favorable balance of trade is also satisfactory.'

#### Department of Commerce Monthly Indexes of Production, Stocks and Unfilled Orders

The Department of Commerce makes public, as follows, its indexes of production stocks and unfilled orders for August.

Production

The marketings of animal products and crops were lower than a year ago. The output of forest products, although greater than in the previous month, was also lower than in August, 1927. The production of manufacturers, according to the index of the Federal Reserve Board, was greater than in either the previous month or August of last year, after adjustments for seasonal conditions. Mineral production, though showing an increase over July, was smaller than a year ago.

Commodity Stocks

The index of commodity stocks as of the end of August showed a gain over the previous month but was lower than a year ago. As compared with last year, both raw materials and manufactured commodities were held in smaller quantities.

Unfilled Orders

The index of unfilled orders of manufacturers at the end of August showed a decline from both the previous month and the same month last year. Declines from the previous month were registered in unfilled orders year. Decines from the previous month were registered in unfilled orders for textiles, transportation equipment and lumber, the iron and steel group remaining unchanged. Compared with a year ago, textiles and transportation equipment showed smaller orders, while iron and steel and lumber manufacturers had larger orders on their books.

The index numbers of the Department of Commerce are given below, together with the industrial production index of the Ecderal Reserve Board.

7-d Nob 1092 1095—100	19	28.	1927.

#### Decline in Detroit Employment

The Detroit Employers Association reports employment figures for the week ended Sept. 25 as 297,573, a decrease of 3,186 from last week, but an increase of 100,993 over the corresponding period of last year.

#### Loading of Railroad Revenue Freight on the Increase.

Loading of revenue freight for the week ended on Sept. 15 was the largest of any one week so far this year, amounting to 1,138,312 cars, the Car Service Division of the American Railway Association announced on Sept. 26. This was an increase of 147,270 cars above the preceding week this year, when loadings were somewhat reduced owing to the observance of the Labor Day holiday. The total for the week of Sept. 15 was also an increase of 10,669 cars over the same week in 1927 but a decrease of 40,947 cars below the

corresponding week two years ago. Details follow:
Miscellaneous freight loading for the week totaled 460,398 cars, an increase of 12,067 cars above the corresponding week last year and 8,983 cars above the same week in 1926.

crease of 12.067 cars above the corresponding week last year and 8,983 cars above the same week in 1926.

Coal loading totaled 180,678 cars, a decrease of 2,133 cars below the same week in 1927 and 25,400 cars below the same period two years ago. Grain and grain products loading amounted to 57,014 cars, a decrease of 3,641 cars below the same week last year but 7,437 cars above the same week in 1926. In the western districts alone, grain and grain products loading totaled 43,356 cars, a decrease of 1,914 cars below the same week in 1927.

Live stock loading amounted to 34,336 cars, an increase of 2,571 cars over the same week last year but 5,207 cars below the same week in 1926. In the western districts alone, live stock loading totaled 26,530 cars, an increase of 2,655 cars compared with the same week in 1927.

Loading of merchandise and less than carload lot freight totaled 266,713 cars, a decrease of 1,837 cars below the same week in 1927 and 2,669 cars below the corresponding week two years ago.

Forest products loading amounted to 65,511 cars, 3,767 cars below the same week last year and 7,548 cars under the same week in 1926.

Ore loading totaled 63,930 cars, 7,419 cars above the same week in 1927 but 13,879 cars below the corresponding week in 1926.

Cloke loading amounted to 9,732 cars, ten cars below the same week in 1927 and 2,664 cars below the corresponding week in 1926.

All districts reported increases in the total loading of all commodities compared with the same week last year except the Pocahontas and Southern, which showed decreases, but all except the Central-western and Southern, which showed decreases compared with the same period two years ago.

Loading of revenue freight in 1928 compared with the two previous years, follows:

	1928.	1927.	1926.
Four weeks in January	3,447,723	3,756,660	3,686,696
Four weeks in February	3,589,694	3,801,918	3,677,332
Five weeks in March	4,752,031	4,982,547	4.805,700
Four weeks in April	3,738,295	3,875,589	3,862,703
Four weeks in May	4,006,058	4,108,472	4,145,820
Five weeks in June	4,923,304	4,995.854	5,154,981
Four weeks in July	3.942.931	3.913.761	4.148.118
Four weeks in August	4,230.809	4,249,846	4,388,118
Week ended Sept. 1	1,116,948	1,117,360	1,143,448
Week ended Sept. 8	991,042	989,799	1.024,998
Week ended Sept. 15	1,138,312	1,127,643	1,179,259
Total	-35,877.147	36,919,449	37,217,173

#### Continued Increase in Industrial Consumption of Electric Power in Philadelphia Federal Reserve District.

The Federal Reserve Bank of Philadelphia reports that the use of electrical energy by industries was over 6% larger in August than in July and 23% greater than in the same month last year. Total sales of electricity increased about 3% in the month and over 19% in the year. Production of electric power by 12 central stations was 4% larger than in July and surpassed the amount generated a year earlier by over 16%. The Bank's statistics follow:

#### August Sales of Automobiles in Philadelphia Federal Reserve District.

In its report on the automobile trade in its district during

August, the Federal Reserve Bank of Philadelphia says:
Retail sales of new passenger cars during August by 12 distributors in
this district declined both in number and value as compared with the preceding month and a year before, but deferred payment sales showed a
marked gain over a month and year earlier. Business in used cars declined sharply.
Wholesale sales decreased in number but not in value from July to
August, and were similarly larger in the same month last year. Stocks
of new cars at the end of the month were much smaller than a month and
a year before, while inventories of used cars showed a pronounced gain,
especially as compared with August 1927. especially as compared with August 1927.

#### Industrial Situation in Illinois-Analysis by Cities.

Sidney W. Wilcox, Chief of the Bureau of Labor Statistics of the Illinois Department of Labor, in his review of the industrial situation in Illinois by cities, states that they industrial outlook as reflected in state payroll and employ-Free employment information continues to improve. ment summaries also indicate better conditions, the ratio declining from 151 applicants per 100 jobs to 138 in August. With the return of hundreds of students to schools during

the coming month this ratio may be expected to improve In his analysis of the situation by cities, Mr. even more.

even more. In his analysis of the situation by cities, Mr. Wilcox, under date of Sept. 15, also states:

Reports coming from Moline-Rock Island indicate further gains in farm implement factories, and several significant additions have been reported by automobile manufacturers. One large metal plant in the central part of the State recently announced its intentions of retooling its plants to meet modern needs and has posted a temporary layoff notice that will affect approximately 260 employees.

The coal mining situation continues to improve and has already helped to reduce the extent of unemployment. Additional help has been received from State-wide road building projects which is now offering a steady market for men.

The agricultural employment situation has been good, although some

The coal mining situation continues to improve and has already helped to reduce the extent of unemployment. Additional help has been received from State-wide road building projects which is now offering a steady market for men.

The agricultural employment situation has been good, although some unemployment is to be expected at the present time. With wheat harvest being completed early and the corn husking season being some weeks away, the demand for harvest hands has slackened except in districts enably. Danville and Bloomington where the canning industry is busing engaged. Aurora.—The employment situation in Aurora has continuoudly agricultural districts which have been busily engaged in threshing. As a result the unemployment ratio of the free employment orfin has declined, largely because of large largely extensed to a state of the st

layoffs.

Joliet.—Reports from Joliet fail to show any central upward or downward movement during August. Factory employment in reporting establishments has scored a 2.3% gain largely because of increases in two metal plants. Other lines showed only slight changes from a month ago. The free employment ratio has increased from 126 in July to 130 in August. Building permits show a falling off. Harvesting activities are now nearing completion so that a slackening in the demand for farm help has become Building permits show a falling off. Harvesting activities are now near in completion so that a slackening in the demand for farm help has become

completion so that a slackening in the demand for farm help has become apparent.

Moline-Rock Island.—Employment in the Moline-Rock Island district has improved according to all available information which indicates that employment is again picking up in the large agricultural implement establishments in this locality. There has been one notable reduction, however. While the automobile accessory industry is not full represented, the reports received by the Bureau indicate a falling off in employment. The extent of unemployment as indicated by the free employment office ratio is less than either last month or a year ago.

Peoria.—The conditions of employment in the Peoria district are slightly less favorable according to both the free employment office index and the reports from leading manufacturers. The present falling off of factory employment is a reversal of last year's movement, although there have been a number of August declines during recent years. Among the outstanding reductions which have been reported during August the dismissal of forty workers by a brick yard owner and the laying off of 67 employees in a metal establishment are the largest. Of the additions which have been reported the greatest occurred in an automotive establishment whose payroll showed an addition of 88 workers.

Quincy.—Fifteen Quincy manufacturers report that they have added 5.3% more names to their payrolls. Leather products establishments and printing shops led in the pickup which also received support from metal factories. The free employment ratio indicates that the conditions of unemployment are closely comparable with those of a month ago, although they are much improved when compared with August 1927.

Rockford.—A shortage of machinists, molders, tool makers, hammersmiths and patternmakers has developed in Rockford as a result of industrial expansion which has taken place during the last month. Fifty leading factory owners representing all leading lines, notably metals and furniture, report 3.4% more workers. The Rockford free employment office reports indicate that jobs have been easier to get in that office than in any other office in the State. The present upward movement in furniture and metals indicates that prospects are very good for the coming winter in Rockford.

Rockford.

Springfield.—While the payrolls of the majority of reporting firms show only slight changes, two outstanding differences appear which have affected considerable numbers of workers. Because of changes to be made in a metal products factory, 264 workers have received a temporary layoff notice, and in another establishment 808 employees have returned from a vacation. The coal mining situation in this locality has continued to improve, and is now giving employment to a large number of able bodied man.

men.

Sterling-Rock Falls.—A gain of 5.7% in the volume of factory employment in the Sterling-Rock Falls district is noted. The metal group, which comprises a large part of the industrial community, is to be attributed with a large share of the recent pickup which has been unusually great when compared with other centers.

The monthly summary of industrial conditions in Illinois was given in our issue of Sept. 22, page 1585.

#### Merchandising Conditions in Chicago Federal Reserve District-Gain in Wholesale and Department Store Trade.

In its summary of merchandising conditions in its district the Federal Reserve Bank of Chicago has the following to say in its Monthly Business Conditions Report, dated Oct

say in its Monthly Business Conditions Report, dated Oct. 1: Wholesale Trade.—August sales in six lines of wholesale trade reporting to this bank totaled larger than in the preceding month, and in four groups also increased over a year ago. In the first eight months of 1928, reporting wholesale drug firms had sales aggregating 3.4% more than in the corresponding period of 1927, wholesale shoes showed an increase of 4.6% and electrical supplies a gain of 5.6%; wholesale dry goods, grocery and hardware firms indicated declines in this comparison of 4.2, 1.9, and 4.1% respectively. Collections for the majority of reporting lines were larger in August than in the preceding month and were above a year ago. Prices in general were indicated as firm or steady.

#### Department Store Trade.

Department Store Trade.

Total sales during August of 104 department stores in the Seventh district exceeded those of the preceding month by 9.5%, but were only 0.7% heavier than in August last year. Both the larger and the smaller cities showed sales increases in the monthly comparison, with Chicago, Detroit and Milwaukee likewise indicating gains over a year ago. Sales by Indianapolis firms and by 57 stores in smaller centers were less in total volume than last August. District sales for the first eight months of 1928 aggregated 4.5% more than in the same period of 1927. Stocks on hand August 31 were heavier than either a month previous or a year ago by 7.1 and 3.3% respectively. The ratio of sales to average stocks, or stock turnover, was 29.6% for August compared with 30.4% in July; for the year to date turnover was 246.7% against 245.6% last year. Collections fell off 11.7% in August from July, but exceeded those a year ago by 8.8%. Accounts receivable on Aug. 31 were 1.0% smaller than a month previous and 7.4% larger than on the corresponding date of 1927. August collections averaged 35.9% of accounts receivable July 31, compared with 35.7% a year ago.

Retail Shoe Trade.

#### Retail Shoe Trade.

Retail Shoe Trade.

Total sales during August of 25 dealers and the shoe sections of 22 department stores decreased 1.7% from July, but gained 0.7% as compared with a year ago. Individually, 14 dealers and 14 department stores reported gains in the month to-month comparison. Sales for the year through August aggregated 1.3% below the corresponding period of 1927. Stocks of shoes on hand Aug. 31 of 40 firms averaged 12.6% heavier than a month previous and 11.6% above a year ago. Accounts receivable at the end of the month declined 15.5% from July 31 and 9.5% from Aug. 31 1927, according to the reports of 18 dealers. Collections during the month were 24.4% less than in July, but aggregated 9.3% more than last August. The ratio of accounts receivable to sales during the month averaged 60.6% for August, 61.5% for July, and 62.6% a year ago.

#### Retail Furniture Trade.

Retail Furniture Trade.

Sales of furniture during August increased 33.1% over the preceding month but were 2.2% smaller than a year ago, according to the reports of 23 retail dealers and the furniture sections of 26 department stores in the district. Gains in installment sales of 18 dealers averaged 48.5% more and 7.9% less in the respective monthly and yearly comparisons. Total collections by 21 dealers were 4.4% heavier in August than in July but fell 1.9% below the level of last August, while collections on installment accounts gained 2.7 and declined 5.5% in the respective comparisons. Accounts receivable Aug. 31 totaled 1.7% more than on July 31 and 0.4% above the corresponding date of 1927. Stocks on hand of dealers and department stores averaged 2.9% heavier than a month previous and were 4.8% larger than a year ago.

#### Chain Store Trade

Chain Store Trade.

A further slight gain (0.5%) was recorded for August over July in the number of chain stores operated by 25 companies, and the number remained, as in the preceding month, more than 20% greater than a year ago. Total sales increased 4.5 and 16.6%, respectively, in the monthly and yearly comparisons, while average sales per store gained 4.0% over July but were 3.0% below last August. Men's clothing, shoe, and furniture chains indicate declines in the month-to-month comparison; cigar, musical instrument, shoe, furniture, and women's clothing chains had smaller sales than in August 1927, with 5-and-10-cent stores, and the grocery, drug, and men's clothing groups reporting gains. clothing groups reporting gains.

#### Industrial Employment Conditions in Chicago Federal Reserve District.

The Federal Reserve Bank of Chicago states that "employment reports for August indicate a general return to industrial activity after the seasonal quiet of July. Payroll amounts especially gave evidence of a reaction, increases in all but one of the groups, that of food products, following uniform declines of the preceding month." The Bank, in surveying industrial employment conditions in its "Business

surveying industrial employment conditions in its "Business Conditions" report, Oct. 1, adds:

In volume of employment there were declines in the textiles, and the stone, clay and glass products groups, as well as in food products. The aggregate gain for the period July 15 to Aug. 15 amounted to 1.9% in number of workers and 6.5% in amount of payrolls. This compares with losses of 0.6 and 6.1%, respectively, for the preceding period. In the metals and metal products group gains of 4.8% in men and 8.2% in payrolls approximately balanced the previous losses of 4.1 and 8.9% respectively. The vehicles group showed substantial increases in both men and payrolls, a condition reflected also in the reports from the Employers' Association of Detroit according to which the volume of employment in that city was 5.5% larger on Aug. 15 than four weeks earlier, and 7.2% higher on Sept. 11 than on Aug. 15.

The coal industry continued to add more workers, while building and construction work experienced a slight decline in activity. At the free employment offices the ratio of applicants to available positions showed an improvement, dropping from 151% to 138 in Illinois, from 153 to 113 in Indiana, and from 256 to 215 in Iowa.

#### Business Conditions in Southwest as Viewed By Los Angeles Chamber of Commerce—Continued Improvement in Employment Conditions.

In its Southwest Business Review, covering the month of August, the Los Angeles Chamber of Commerce states that "there has been an unusual amount of business activity during the month. Speeding up of general business which as a rule is not expected until early in September, has been asserting itself during August. Wholesale prices are turning stronger. There has been a much improved demand on the wholesaler for stock. Collections continue exceptionally good. Retail trade has been of a seasonal variety with greatest demand for vacation goods and lines which are shown on early fall display." The Chamber of Commerce employment index shows the best improvement of any period during

ment index shows the best improvement of any period during the year. The Review also states in part:

Postal receipts regarded by many as one of the most dependable local records, continue to show a substantial increase over the same period of 1927. Bank clearings are normal though showing a slight falling off from the early summer months. Stock exchange transactions are mounting into larger figures again and indicate the growing importance of Los Angeles as a financial centre. The construction industry shows a slowing up. Building permit records show approximately 10% less volume for 1928 compared with the same period for 1927. The rest of the calendar year looks quite promising. Agricultural yields are better than estimated with general prices quite satisfactory. Livestock continues in demand and is bringing good prices. Feed range conditions are spotted and rain is needed.

#### Employment

Employment

The Chamber of Commerce Index of employment for the month of August stood at 109.8 compared to 105.3 for July and 108.1 for August of last year. This month marks the third consecutive month of improvement in the employment situation this year, and the second consecutive month in which the employment index exceeded the same month of last year.

With only one exception, each of the ten industrial groups shows an improved employment situation with reference to last year; this one exception; the iron and steel group; stood at 82.1 compared with 103.3 for August of 1927 and 86.6 for last month.

The industrial groups making the largest gains in groups.

1927 and 86.6 for last month.

The industrial groups making the largest gains in employment during August were rubber goods, clay products, furniture and fixtures and mill work. Food products manufacturers, wearing apparel establishments and printing and lithographing plants showed only slight increases. Motion picture employment although seasonally quiet was improved over last year. The oil industry showed a moderate but satisfactory gain in employment. Employment for the summer has been on a much higher level than last year and if the usual fall rise is experienced, should be very good for the balance of the year.

#### Construction Industries

The construction industry while continuing steady is running somewhat lower than the same period of last year, as the following official permit record will indicate:

It is also most interesting to note that Los Angeles proper has for months It is also most interesting to note that Los Angeles proper has for montage past represented from 33% to 40% of all the building permit volume for the entire State of California. For the month of July 1928 Los Angeles represented almost 37% of the total California Building permit record. There is every indication that the remaining months of the year will show heavy construction records and in some quarters there is a prediction that by the close of the year Los Angeles will match her 1927 record.

#### International Typographical Union Rejects Proposal For a 40-Hour Week.

The International Typographical Union at its annual convention at Charleston S. C. on Sept. 13 voted down overwhelmingly a proposal of the New York delegation for a forty hour working week. The Associated Press advices

Also Stated:

A proposal to allow local unions to declare a strike without the sanction of the Executive Council of the International Union was defeated.

The convention also voted down a plan to permit a local union to strike without first notifying the International President in the event that a publisher or proprietor declines to arbitrate.

#### New Automobile Models Announced

The Durant Motor Co. of New York, Inc., it was announced this week, has on exhibition at its show rooms in this city two new models, viz: the Durant Four and the Durant Six Cylinder Series "60." These cars have new advanced body lines and are more complete in equipment.

The Chrysler Corp. has added a 5-passenger Custom phaeton to its "75" line, listing with standard equipment, at \$1,795. A 7-passenger phaeton is expected to be added to this line in the near future.

The Gardner Motor Co., Inc. recently announced three new series of cars, ranging from \$1,295 to \$2,395.

#### August Automobile Production in Canada and the United States.

August production of automobiles in Canada, as reported to the Department of Commerce by the Dominion Bureau of Statistics, was as follows: Passenger cars, 24,274; trucks, 6,971, as compared with production in July of 20,122 passenger cars and 5,104 trucks, and production in August, 1927, of 10,139 passenger cars and 2,387 trucks.

Corrected reports from manufacturers of motor vehicles in the United States have necessitated a revision in the August production figures previously given. The revised figure covering domestic production of passenger cars is 398,689 and of trucks, 59,824, each being larger than for any previous month on record. The total domestic production of passenger cars and trucks in August, due to revisions in the figures, was 458,513, also the largest ever recorded for a single month.

#### August Biggest Month in History For Automotive Parts and Accessory Business—Output Continuing At High Rate.

The automotive parts and accessory business in August had the biggest month in its history. While car and truck manufacturers were setting a new monthly record, makers of motors, bodies and other original equipment naturally were operating at high levels. They fell a little short of the peak attained in March which was their record, but exceptionally large August volume in service parts, accessory and service equipment brought factory shipments for the parts industry generally to a point never before reached, according to the Motor and Accessory Manufacturers Association. Preliminary reprots of September production and distribution indicate another high month and orders and prospects leave little doubt that the fourth quarter will be a record-breaker. After noting the foregoing the Motor and Accessory Manufacturers Association goes on to say:

Accessory Manufacturers Association goes on to say: Aggregate shipments to the car and truck manufacturers and the wholesale trade by a large and representative group of M. & A. M. A. members in August were 212% of January, 1925, the base index used in the compilations for the monthly Business Bulletin of the Association. This compares with 207% in March and 201% in May this year, while all previous months had been below 200%. August last year yielded an aggregate of 155%. For original equipment makers August was the second greatest month. The shipments index was 230 as compared with 203 in July and 155 last August. The March index this year was 231, declining steadily to 200 in

June. Previous highs were March, 1927, with an index of 195, and October,

1925, with 214.

Service parts makers had an August index of 176, their third greatest month and slightly exceeded only by business in May this year and in 1926. The July index was 148 and August last year 169.

Accessory sales to the trade in August showed their most vigorous upturn of the year. The index of shipments was 147 as compared with 112 in July and lesser figures for all the previous months except May, whose index was 113. Last year's August index was 115.

Makers of service equipment, that is, garage machinery and tools, had an August index of 148 as compared with 120 in July and 134 in August last year. August was also better than June this year and only slightly below the

an August mas also better than June this year and only slightly below the February to May levels.

#### Lumber Industry Reports Permanent Revival.

The lumber industry reports a net gain of sales for 1928 to date, according to the National Lumber Manufacturers Association. This advance contrasts with a decline of 6% during 1927 and nearly 4% during 1926. The outlook is declared encouraging, and is largely attributed to the effectiveness of the trade extension activities of various lumber organizations.

Reports for the week ended Sept. 22 from 877 softwood and hardwood (units) mills, show an increase in production to a total of 399,868,000 feet, and a gain in shipments, which total 413,932,000 feet, but orders went down to 403,244,000 feet. Based on mill averages, there were appreciable gains in all three items in the hardwood group. In the softwood group the West Coast Lumbermen's Association reported production for 228 identical mills at 194,-334,924, against a weekly operating capacity of 230,561,043 and an average weekly production this year of 186,685,841 The Southern Pine Association reported production of 203 units (161 mills) at 73,777,340 feet, which was almost 14% under the three-year average production.

#### Unfilled Orders Increase.

Unfilled Orders Increase.

The unfilled orders of 346 Southern Pine and West Coast mills at the end of last week amounted to 882,146,043 feet, as against 877,289,345 feet for 335 mills the previous week. The 161 identical Southern Pine mills in the group showed unfilled orders of 289,110,080 feet last week, as against 289,450,560 feet for the week before. For the 185 West Coast mills the unfilled orders were 593,035,963 feet, as against 587,838,785 feet for 174 mills a week earlier.

Altogether the 543 reporting softwood mills had shipments 102% and orders 99% of actual production. For the Southern Pine mills these percentages were respectively 118 and 118; and for the West Coast mills 102 and 98.

102 and 98.

Of the reporting mills, the 495 with an established normal production for the week of 382,765,000 feet, gave actual production 89%, shipments 91%, and orders 88% thereof.

The following table compares the lumber movement, as reflected by the reporting mills of eight softwood and two hardwood regional associations, for the two weeks indicated: the two weeks indicated:

	Past V	Veek.	Preceding Week 1928. (Revised).		
	Softwood.	Hardwood.	Softwood.	Hardwood.	
Oblemente	543 346,170,000 352,833,000 341,543,000	53,698,000	323,244,000 332,853,000	54,528,000 59,893,000	

<sup>\*</sup> A unit is 35,000 feet of daily production capacity.

#### West Coast Movement.

The West Coast Lumbermen's Association wires from Seattle that new business for the 185 identical mills reporting for the week ended Sept. 22 amounted to 168,830,797 feet, shipments 174,776,408 and production 171,-952,178. Unfilled orders totaled 593,035,963 feet.

#### Southern Pine Reports.

Southern Pine Reports.

The Southern Pine Association reports from New Orleans that for 161 mills reporting, shipments were 18.29% above production and orders were 17.83% above production and 0.39% below shipments. New business taken during the week amounted to 86,928,800 feet (previous week 91,447,824); shipments, 87,269,280 (previous week 81,384,992); and production 73,777,735 feet (previous week 73,859,490). The normal production (three-year average) of these mills is 85,730,340 feet. Of the 159 mills reporting running time, 73 operated full time, 8 overtime. Five mills were shut down and the rest operated from one to six days.

The Western Pine Manufacturers' Association of Portland, Ore., reports production from 33 mills as 36,457,000 feet, as compared with a normal production for the week of 33,026,000. Twenty-four mills the week earlier reported production as 23,128,000 feet. There were marked increases in shipments and new business last week, due to the larger number of reporting mills.

ing mills.

The California White and Sugar Pine Manufacturers' Association of San Francisco reports production from 20 milts as 32,891,000 feet (62% of the total cut of the California pine region), as compared with a normal figure for the week of 31,837,000. Twenty-three mills the week before reported production as 33,965,000 feet. There were considerable decreases in ship-

production as 33,965,000 feet. There were considerable decreases in shipments and orders last week.

The California Redwood Association of San Francisco, reports production from 14 mills as 6,116,000 feet, compared with a normal figure of 7,453,000. Sixteen mills the preceding week reported production as 7,891,000 feet. Suppments showed some decrease last week and new business a slight gain. The North Carolina Pine Association of Norfolk, Va., reports production from 74 mills as 5,641,000 feet, against a normal production for the week of 15,690,000. Seventy mills the previous week reported production as 8,897,000 feet. There were marked decreases in shipments and new business last week.

ness last week.

The Northern Pine Manufacturers' Association of Minneapolis, Minn., reports production from 8 mills as 13,689,000 feet, as compared with a normal figure for the week of 13,345,000, and for the week earlier 11,869,000. Shipments showed a substantial increase while new business was somewhat below that reported for the week before.

The Northern Hemlock and Hardwood Manufacturers' Association of Oshkosh, Wis., (in its softwood production) reports production from 48 mills as 5,646,000 feet, as compared with a normal production for the week of 21,456,000, and for the preceding week 6,047,000. Shipments decreased slightly while new business increased considerably.

#### Hardwood Reports

Hardwood Reports

The Northern Hemlock and Hardwood Manufacturers' Association of Oshkosh, Wis., reports production from 75 units as 6,545,000 feet, as compared with a normal figure for the week of 15,709,000. Seventy-nine units the previous week reported production as 7,207,000 feet. There was a slight increase in shipments last week, and a good gain in new business. The Hardwood Manufacturers' Institute of Memphis, Tenn., reports production from 334 units as 47,153,000 feet, as against a normal production for the week of 60,160,000. Three hundred and forty-two units the week before reported production as 47,321,000 feet. Shipments were about the same last week with an appreciable gain in new business.

#### West Coast Lumbermen's Association Weekly Report.

According to the West Coast Lumbermen's Association, reports from 187 mills show that for the week ended Sept. 15 orders were 28.5% over production and that shipments exceeded output by 5.8%. The Association's statement follows:

WEEKLY REPORT OF PRODUCTION, ORDERS AND SHIPMENTS.
187 mills report for week ending Sept. 15 1928,
(All mills reporting production, orders and shipments.)

Production. Orders. Shipments.

#### Canadian Newsprint Production Increased During August.

August.

The following is from the Toronto "Globe" of Sept. 15.

The Newsprint Service Bureau monthly bulletin says: Production of newsprint in Canada during August, 1928, amounted to 200,656 tons, and shipments to 196,894 tons. Production in the United States was 115,940 tons, and shipments 114,530 tons, making a total Canadian and United States newsprint production of 316,596 tons, and shipments of 311,433 tons, During August 20,930 tons of newsprint were made in Newfoundland and 1,671 tons in Mexico, so that the total North American production for the month amounted to 339,197 tons.

The Canadian mills producted 206,109 tons more in the first eight months of 1928 than in 1927, which was an increase of 15%. The United States output was 76,436 tons, or 7% less than for the first eight months of 1927. Production in Newfoundland was 18,406 tons, or 14% more, and in Mexico 1,082 tons more, making a total North American increase of 149,161 tons, or 6% over the first eight months of 1927

During August the Canadian mills operated at 78.0 of rated capacity, and the United States mills at 77.4% or rated capacity. Stocks of newsprint paper at Canadian mills totaled 52,108 tons at the end of August, and at United States mills 40,838 tons, making a combined total of 92,946 tons, which was equivalent to 6.2 days' average production.

#### Canadian Exports of Newsprint in August Valued at \$11,473,052, Compared with \$10,675,536 in August, 1927.

Ottawa Advices Sept. 24 to the Montreal "Gazette" stated:
Wood pulp exports of all kinds during August, 1928, were valued at
\$3,618,205, as against \$4,469,897 worth of the same commodities exported
in August, 1927. Of this \$2,874,155 worth went to the United States,
\$200,281 to Great Britain and \$543,769 to other countries including Ger-

\$200,281 to Great Britain and \$543,769 to other countries including Germany, France, Belgium, Italy and Japan.

During the same month there was exported to the United States 178,970 cords of pulpwood valued at \$1,854,224, while in August, 1927, the export of pulpwood to the United States was 180,416 cords valued at \$1,924,730.

Newsprint exports in August were valued at \$11,473,052 and in August 1927, \$10,675,536. Of this amount \$10,180,387 worth went to the United States, \$607,836 to the United Kingdom, \$257,930 to Australia, \$107,632 to New Zealand, \$165,680 to Argentine and \$62,669 to Cuba.

Exports of book paper decreased from \$62,161 worth in August of last year to \$361,135 during August, 1928. Kraft paper exports for the same months increased from \$129,623 last year to \$146,730 this year. The total value of paper and manufacturers of paper in August was \$11,945,270 and the value shipped to the United Kingdom was \$719,726, to the United States \$10,299,345 and to other countries \$926,190.

#### British Spinners Recommend Merger To Cut Costs in American Section.

According to a cablegram from London Sept. 23 to the New York "Journal of Commerce" the special subcommittee of the Federation of Master Cotton Spinners' Association has reached the conclusion that the essential step toward rehabilitating the trade is the reduction of financial overhead costs to an economic figure and that the piecemeal writing down of capital and financial sacrifices in individual cases are

ineffective. The cablegram further says:
It is convinced that a reorganization of the American cotton section along the lines of an amalgamation of interests promises the greatest measure

of success.

In order to find out how many companies might be brought within the scope of the proposed amalgamation scheme, they have sent out another questionnaire to spinners returnable next Thursday asking the net results of their trading for the years 1923 to 1927, the interest paid on borrowed money and the depreciation allowed in the same period.

The subcommittee specially urged all reconstructed companies to furnish the information to enable the Federation of Master Cotton Spinners' Association to determine which concerns come within the scope of the provisions of the scheme.

The proposed amalgamation is in addition to the Lancashire Textile Corporation formed by the Cotton Yarn Association and will not compete with it.

#### International Conference on Sugar Restriction Cancelled.

According to Associated Press advices from Berlin Sept. 22 sugar-raising countries outside of Europe, particularly Cuba and Java, are generally blamed here for the failure of the projected conference among sugar producers. These advices state that it proved impossible to obtain agreement

advices state that it proved impossible to obtain agreement with them on restricted output. The Berlin accounts add: Representatives of the sugar industry in Germany, Poland and Czechoslovakia decided yesterday to cancel the international conference called for next month.

The Amsterdam negotiations of November, 1927, are stated to have established clearly that the Java planters would refuse to make restrictions. The Cuban tentative proposal to reduce production, which hinged on the Javanese attitude, also came to naught.

Yesterday's conference was attended by twenty-five producers, including five Poles, two Czechs and one Dutchman. The Germans and the Poles made efforts to arrive at least at some sort of an agreement to raise consumption and to regulate exports, but the Czechs moved that negotiations on the proposal for the next month's international conference cease at once. The motion was accepted after a long debate, during which the Czechs were accused of dumping on the German market.

Last year's Berlin convention fixing the joint exports of Germany, Poland and Czechoslovakia at 1,150,000 tons therefore lapses automatically.

#### Cuban Association to Hold Referendum to Determine Upon Continuance of Cuban Sugar Export Corporation.

From the "Wall Street Journal" of Sept. 26 we take the following Havana advices:

The Association of Hacendados and Colonos has agreed to hold a referendum among its members to determine whether they favor continuation of the Sugar Export Corporation next year.

The Export Corporation has sold 78,126 tons of sugar to Europe since the ban on shipments was raised in August.

At a meeting of the National Association of Colonos, held in Camaguey, the Secretary of the Association declared it was necessary for Cuba to denounce the Reciprocity Treaty with the United States.

#### To Consider Cuban Sugar Curb.

According to Havana advices Sept. 28 to the "Wall Street News" Cuban sugar growers will shortly hold a conference to consider curtailment of production without government intervention.

#### Gov. General Stimson of Philippines Opposed to Timberlake Resolution Limiting Duty Free Sugar Exports to U.S.

A plea for the definite appreciation of the unselfish motives of Americans in the Philippines as a means of strengthening the policy of free trade and consequently of killing the Timberlake resolution, was made by Governor General Stimson at Manila on Sept. 21 in addressing the delegates of the sixth annual convention of the Philippines Sugar Association. The members of the Association were the

Association. The members of the Association were the guests of the Governor at a luncheon according to Manila advices to the "Times," which said:

The Governor General told the delegates that the present move to limit sugar imports by the United States was due to the Filipinos' actions indicating to America a lack of appreciation of the unselfish motives behind the free trade policy. On the other hand every action of the Filipinos which indicated confidence in the United States would aid in overthrowing the Timberlake resolution and all others of the same class. He told the convention he had opposed and would oppose the Timberlake resolution strenuously.

Governor General Stimson declared that he considered the resolution unjust to the Filipinos in their effort to build up their industries, and he thought it would destroy good-will and cooperation with the Government of the Philippines. He fully agreed with the warnings of the seriousness of the situation and the need for a careful campaign to fight the reactionary move against the Philippine sugar interests.

A 100% backing by all planters and members of the Philippine Sugar ssociation was pledged today for an effort to defeat the Timberlake ciation was pledged today for an effort to defeat the Timberlake ution. The 300 delegates unanimously adopted a resolution giving Board of Trustees full power to name a committee to carry the to the United States. It was suggested that Rafael Alunan, Section 1. resolution. The 300 delegates the Board of Trustees ful fight to the United States. retary of Agriculture, should be sent to the United States to lead the fight.

ngnt.

Leading sugar men here plan to draw up a petition to the Government
to relieve Alunan temporarily to enable him to make the trip.

According to the "Journal of Commerce" Gov.-Gen. Stimson advocated greater agricultural and sugar developments in the islands through the use of private capital. quoted as saying:

quoted as saying:

"In the sugar industry under our present laws it is not easy to raise the capital necessary for such a relation. In many of the centrals I visited the capital had only been raised by the use of Government funds, through the agency of the Philippine National Bank, a method which is not only hazardous to the Government, but which, owing to the limitation of our revenues, can no longer be indulged in.

"Private capital in the future must be invoked to play this part, not only in sugar, but in our other industries where such aid and leadership from capital is needed."

The opposition of the Philippine Sugar Association to the Timberlake resolution was referred to in our issue of Sept. 22, page 1590.

#### Petroleum and Its Products-Expect Large Output Increase in California

Although domestic crude oil production continues on the ncrease, the markets have remained in firm position the past week. Rumors of an impending advance in posted prices for high gravity Midcontinent crude were still being heard, and it was felt that some action along these lines would be taken by the close of the year in the event that gasoline prices hold around current levels. The success which has attended efforts to keep production in Oklahoma and West Texas under control has been a potent factor in making for a stabilized market for domestic crude oil, marking as it does a definite step to prevent a flood of low-priced crude being thrown on the market through uneconomic and unrestricted production in the flush producing pools in these areas. Operators are somewhat concerned, however, over the outlook in California. Extensive field operations are reported in that State, and it is expected that considerable new production will come in early in 1929. Operators have not yet forgotten how the flush production in California pools in 1923 put the entire domestic market in a demoralized state which lasted for two years or more, and are apprehensive of a repetition of such a condition.

Demand for high gravity, or so-called "sweet" crude, on the part of refiners who have large gasoline committments to meet, but who do not wish to add further to their stocks of fuel oil, has been a factor in making for a strong market for light crude. On the whole, the domestic crude oil price structure is now regarded as being in fairly stable position, and with a continued curtailment program on the part of operators in the Southwest, and no sensational rise in Caliifornia production figures, the outlook is favorable for the

remainder of the year at least.

Continued heavy imports of Venezuelan and Colombian crude are reported at Atlantic seaboard refineries, and this movement is expected to continue around current levels, notwithstanding any curtailment program which may be inaugurated in South American fields. Efforts of world oil leaders in this direction will be exercised not so much toward a curtailment of present production, but rather the postponement of further exploitation and development work until world markets are in position to absorb the increased output, it is intimated. Quotations are as follows:

Pennsylvania         \$3.35 Bradford         \$3.35 Illinois         \$1.50 Corning         1.80 Lima         1.60 Wyoming, 37 deg         1.45 Log
Oklahoma, Kansas and Texas—     40-40.9     \$1.56     Elk Basin.     \$1.4       32-32.9     1.16     Big Muddy.     1.3       44 and above.     1.76     Lance Creek.     1.4       Louislana and Arkansas—     Bellevue.     1.2       32-32.9     1.16     Markham.     1.0       35-35.9     1.31     Somerset.     1.7
Spindletop, 35 deg. and up 1.37

#### KEROSENE HIGHER-GASOLINE STEADY.

Kerosene sales showed a sharp increase last week, the advent of cold weather stimulating consumption materially. Sinclair Refining Co. on Sept. 28 advanced its tank car price 1/2c. a gallon to 9 cents at New York, Philadelphia, Tiverton, R. I., and Portsmouth, Va.; 8¾c. at Charleston, S. C., Jacksonville and Tampa; 8½c. at New Orleans and 8c. at Houston. The Acewood Petroleum Corp. followed in the advance at New York, but up to the close of the market Sept. 28, other refiners were still 1/2c. under the Sinclair

schedule. The Chicago kerosene market rremained steady throughout the week.

U. S. Motor gasoline was still quoted at 1134c. a gallon at principal Atlantic seaboard terminals last week, but this price was being shaded by 1/4c. or more, and it was expected that leading refiners would shortly reduce the market. It was generally expected that a 1/4c. cut would be made, to 111/2c. a gallon. Cold weather had curtailed consumption during the week. The tank wagon market was unchanged at 18c. a gallon in New York and New England. Prices in Oklahoma and North Texas remained steady.

Cold weather stimulated furnace oil business materially, refiners moving out large quantities on contract during the week, at firm prices. The start of the winter demand for furnace oil had brought about a firmer feeling on fuel oil, although that product remained unchanged at \$1.05 a barrel at terminals. Among some operators, there was a tendency to look for a lower market on fuel oil toward the close of the year. On Jan. 1 1929, the Gulf Oil Corp. contracts with the Shipping Board go into effect at Atlantic ports, the prices named in these contracts being about 15c. a barrel under the present spot quotation.

Refiners were moving gas oil in larger quantities during the week. Artificial gas companies in the New York area were taking stocks in better volume against contracts, and the lower grades were coming in for good demand as furnace

According to unofficial reports from Tulsa gasoline holdings of Mid-Continent refiners Sept. 1 were the smallest for many years, being estimated at 1,950,000 barrels, a decline of 125,000 barrels during August. Holdings of Oklahoma refiners were off 125,000 barrels for the month, while stocks of Kansas refiners declined 50,000 barrels, holdings in North and West Txeas 30,000 barrels higher, and in Louisiana and Arkansas 20,000 barrels higher. finers in the Mid-Continent area were increasing their runs of crude. Runs in the area Sept. 1 amounted to 535,000 barrels, the highest on record for the territory. Refiners were running as much hi h gravity oil as possible, to obtain maximum gasoline yield and minimum fuel oil residue. Prices are:

#### Crude Oil Output in United States Shows Slight Increase.

The American Petroleum Institute estimates that the daily average gross crude oil production in the United States for the week ended Sept. 22 1928 was 2,508,850 barrels as compared with 2,504,900 barrels for the preceding week, an increase of 3,950 barrels. Compared with the output of 2,534,100 barrels per day for the week ended Sept. 24 1927, the current figure shows a decrease of 25,250 barrels daily. The daily average production east of California for the latest week was 1,877,350 barrels, as compared with 1,869,300 barrels, an increase of 8,050 barrels. The following are estimates of daily average gross production (in barrels) by districts for the periods stated:

#### Oil Restriction For Venezuela Planned.-Will Take the Form of Not Developing New Sources at This Time.

It is stated in the New York "Journal of Commerce" that it became known on Sept. 23 from an authoritative source that the plan for curtailment of Venezuelan crude oil output, as arrived at by the heads of the large international petroleum companies meeting in conferences in Scotland, will take the specific form of an agreement between the factors corcerned in the exploitation of the fields in that country, not to open up new sources until such time as it is apparent that world market conditions warrant renewed expansion. The paper quoted said further:

paper quoted said further:

This will mean that instead of cutting down existing output in Venezuela, as has been widely assumed since the return to this country of Walter C. Teagle, President of the Standard Oil Co. of New Jersey, following his conversations with Sir Henri Deterding, Managing Director of the Royal Dutch Shell group, and Sir John Cadman, head of the Anglo-Persian Oil Co., a British Government-owned concern, the process of restriction will be much more gradual, and far less drastic than would be an abrupt cut in production. production.

production.

Venezuelan production is practically all controlled by three companies, Royal Dutch Shell, Standard Oil Co. of Indiana, through Lago Oil & Transport, and Gulf Oil Co. Standard Oil Co. of New Jersey now occupies a commanding position in Venezuela, through the purchase last spring of the Creole Syndicate which was changed to the position of a subsidiary under the name of the Creole Oil Co. The New Jersey Standard thereupon advanced \$8,000,000 to the new subsidiary for use in an immediate expansion in that country.

nces in Scotland

It is expected that such agreement as is finally arrived at will be of such a nature that it can be modified on comparatively short notice. That is to a nature that it can be modified on comparatively short notice. That is to say, if it becomes apparent that consumptive requirements show a tendency to outdistance production of crude, and the opening up of new sources in Venezuela appears desirable, little delay would be occasioned in expanding

Venezuelan oil production in August totaled 9,031,052 barrels, a Venezuelan oil production in August totaled 9,031,052 barrels, a daily average of 291,325 barrels, compared with a record of 9,397,541 barrels, or 303,146 daily in July. It will thus be seen that August production decreased compared with July, due, it is understood, to causes other than artificial restriction. August shipments totaled 8,933,390 barrels, or 288,175 daily, against 8,807,594 barrels, or 284,116 daily, in July.

By way of contrast, in August, 1927, oil production in Venezuela was reurned by O'Shaughaessy's South American Oil Reports, as 5,290,807 bar-

rels, averaging 170.671 daily, while shipments were 4,487,662 barrels, or 144,763 daily.

As regards world restriction of crude oil that was held to be something apart from the Venezuela plan. So far as could be learned, no concrete steps have been taken in this direction beyond the conviction developed at the Scottish conferences that curtailment was most desirable for the well-being of the industry as a whole. It is apparent from Mr. Teagie's outgiving that concerted plan comprehending inclusion of large and small producers, would meet with the co-operation of the men who mat in Scotland producers, would meet with the co-operation of the men who met in Scotland.

#### U. S. Note to Colombia Seeking Reconsideration of Cancellation of Barco Oil Concession.

Announcement that the State Department at Washington had asked the Colombian Government to reconsider its recent cancellation of the Barco oil concession, was contained in the newspaper "El Tiempo," according to Associated Press accounts from Bogota Sept. 21. On Sept. 22 a cablegram from Bogota to the "Herald-Tribune" carried the following advices in the matter:

The Senate and Chamber of Deputies to-day gave the administration a unanimous vote of confidence on its refusal to interver **e in** the cancellation of the 5.000,000 acre Barco concession, the principal interest in which had been held by the Gulf Oil Company of Pennsylvania and other American companies

companies.

Foreign Minister Uribe has laid the entire matter before the national Congress, including a note from the State Department at Washington, dated September 17, in which the American government commented on the fact that Colombia had not responded to a previous note asking that the American companies be granted a thirty day period in which to present additional briefs on the cancellation.

additional briefs on the cancellation.

In announcing the cancellation of the contract, Minister of Industry Montalvo, whose department is directly concerned in the matter, declared that the government's action was caused by the fact that the companies had not developed the property within the time specified in the contract. The government now contends that that matter is one for the Colembian courts and that the government must, therefore, refuse to countenance diplomatic intervention by the Foreign Office on behalf of foreign interests.

The confidence resolution of the Chamber declared: "This Chamber emphasizes its irrevocable adhesion to the international policy of firmness and dignity—as that followed by the government in rejecting at any time any intervention by a foreign government in matters, the decision in which belong to the national courts."

Dr. Carlos Uribe. Foreign Minister, announced on Sont

Dr. Carlos Uribe, Foreign Minister, announced on Sept. 25 that Colombia had replied to the protest of the United States, growing out of the cancellation of the Barco concession. The Associated Press accounts from Bogota Sept. 25 in reporting this, said:

He [Dr. Urihe] said the Government did not care to make the note public but that he would read it at a public session of Congress if that body in-

but that he would read it at a public session of Congress if that body insisted.

The American protest followed refusal of the Colombian Government to permit Samuel H. Piles, United States Minister, to petition for a hearing for the American oil companies holding the Barco concession.

Students paraded yesterday expressing their approval of the Government's stand and that of Congress in "rejecting American intervention." President Abadia Mendez, in an impromptu speech to the students, said that there was no intervention and that the American Government had really asked for nothing more than information regarding the status of negotiations with the oil interests. He added that relations between the two countries were as cordial as before.

The Secretary of Industry to-day ordered that a detailed analysis of Colombia's oil be made. This information will be sent to the world's petroleum markets. The measure resulted from reports that Colombian oil of excellent quality was being blended with inferior grade in American markets to make the low grade oils salable.

It was also announced to-day that the treaty commission of the Foreign Office has held several meetings to study the proposed commercial treaty with the United States.

It was stated in the "Sun" of Sept. 21 that the Barco con-

It was stated in the "Sun" of Sept. 21 that the Barco concession is one of the largest oil grants ever made by the

Government of Colombia. It went on to say:

It covers upward of 1,200,000 acres of oil lands. The original concessionaire was a native of Colombia. Virgilio Barco. In 1918 be transferred his concession with the consent of the Government, to the Colombian Petroleum Co., which in turn was owned 75% by the Gulf Oil Corp. and 25% by the Caribo Syndicate, Ltd.

According to the "United States Daily" of Sept. 24 the background and present status of the dispute between the oil company and the Colombian Government as made available at the Department of State follows:

#### Canceled by Decree

Canceled by Decree

The Barco concession was canceled by a decree of the Columbian Government in March, 1926. The Gulf Refining Company filed a memorandum regarding this, showing that the grounds stated by the government did not hold. To this the Columbian Government did not reply, but informed the Department of State informally that although the cancellation of the lease was not justifiable under the terms referred to in the decree of March, 1926, yet the lease was canceled on other grounds.

The Gulf Refining Company then asked the Department to ask the Colombian Government on its behalf if the company could file a memorandum within 30 days. To this the Colombian Government replied that the question was a private one between it and the Gulf Refining Company.

#### Surprise Expressed

Surprise Expressed

The reply of the Department of State which has just recently been dispatched expresses surprise that the Colombian Government, contrary to a procedure customary between friendly nations, declines to answer a straightforward question of fact and attempts to deny to a friendly government the right to make inquiries on behalf of its nationals.

The Department points out that the United States has requested nothing of the Colombian Government that it would not grant to the Colombian Government in similar instances or to any other interests. Moreover, the United States cannot permit the refusal of the Colombian Government to deal with this matter in the manner usual between friendly nations to cause the United States to desist from according such assistance and protection to American citizens as may be proper and necessary.

Accordingly the United States will continue to follow with interest, further progress of this case

## Copper Demand Brisk Despite Higher Price—Foreign and Domestic Sales So Far This Month Placed at Close to 440,000,000 Pounds.

Activity in copper at higher prices has been the feature in the non-ferrous metal market this week. Lead has continued in good demand at unchanged prices. Tin prices advanced slightly on better demand from speculative sources. Zinc was quiet, but firm for all positions, "Engineering and Mining Journal" reports. The activity in copper and lead is interpreted as reflecting keen demand for fabricated products on the part of consumers. The paper

referred to goes on to say:

Though the total volume of sales of copper has been somewhat lower than the record-breaking totals of the two preceding weeks, it was still approximately three times as great as a normal week's business. It is true that considerably more than half brought only 15c., the publication points out, but at the same time a substantial tonnage changed hands at 15½c. delivered. On Monday, the export quotation was raised from 15½c. to

livered. On Monday, the export quotation was raised from 15½c. to 15½c., c. i. f.
Foreign and domestic sales of copper so far this month have reached the phenomenal total of about 440,000,000 pounds. In connection with the recent activity it is believed that many buyers reached the conclusion that 14.75c. copper would not be passed and allowed their supply to dwindle to a minimum. When in the face of substantial buying producers advanced their price to 15c., consumers became panic stricken and endeavored to meet their needs farther ahead. Coincidently the customers of the fabricators saw the price advance and promptly flooded them with orders, thereby adding to the demand for refined metal. Of course behind this buying is the excellent condition of business generally.

# Arizona Copper Companies Announce 10% Increase in Miners' Wage

Associated Press advices from Bisbee, Ariz., yesterday (Sept. 28) said:

Three of the leading mining companies of Arizona have announced a 10% increase in wages of miners, effective October 1. Approximately 15,000 Arizona miners will be affected. The increase is contingent on the price of copper continuing at 15 cents or above, which has been the case for several days.

Announcements of the companies—the Phelps Dodge Corporation, Calumet and Arizona Company and the Shattuck Denn Corporation—said that while the increase applied directly only to miners on a daily wage, similar increases would be given to employees paid on a monthly basis. The increase in mine pay rolls will total more than \$2,500,000 annually it was said.

#### New National Metal Exchange Expected to Stimulate American Trading in Tin.

A widening of the present world market for tin with American demand playing a much greater part in setting the true market value of the metal is expected in the proposed re-organization of the New York Metal Exchange into the National Metal Exchange permitting dealing in futures which previously have been traded in actively only in London. The Exchange, which will specialize in tin, will, it is claimed, give New York a tin market comparable to that in London, which in the past has been alone in setting the price of this product. Incident to the opening of the National Metal Exchange it is stated:

The entrance of American consumer demand as a more active element

Metal Exchange it is stated:

The entrance of American consumer demand as a more active element in establishing tin prices will be welcomed both in the American and foreign markets. Too often in the past have prices been above or below their true values because of the disproportionate influence exerted by far distant markets on the large supplies of the metal consumed in the United States. The active entrance of United States into the world's tin market is in line with the general trend that has been evidencing itself in this country for the past several years, namely the increased participation of United States in the field of commodity markets. This is illustrated by the rapid growth and increasing importance of the New York Cotton Exchange, the New York Rubber Exchange, the Cocoa Ecxchange, the recently organized Raw Silk Exchange, and other commodity trading centres.

No longer than 4 years ago American dealers in cotton and cocoa, representing the world's greatest consumer, United States, had little to do with setting the true prices of these products, the markets being made in London where the supplies were largely controlled. Since there was no place in United States equipped to deal in "futures," it was necessary that all "hedging" be done in London. At present the New York and London Cotton and Cocoa Exchanges operate side by side and each contributes its share in the fixing of true prices for those products. As a result there has been a great widening of the market for those products with consequent stimulation of the use of these products.

The necessity for American buyers becoming a real factor in the tin market is emphasized by the fact that at present United States producing virtually no tin, although it has a financial stake in South American tin mines, the American tin plate industry to-day leads the world. In addition our automobile industry is continually using more and more tin in babbit and other alloys.

The entrance of the American purchaser into the tin market through the new National Me

An item regarding the newly organized National Metal Exchange appeared in our issue of Aug. 25, page 1030.

#### Steel Output Higher as Rail Buying Movement Begins-Volume of Steel Business and Pressure for Deliveries Stiffen Price Situation-Pig Iron Prices Again Increase.

Expanding demands from the railroads, together with unabated pressure for material by the automobile industry, are strengthening the position of steel producers, according to the "Iron Age" of Sept. 27, in its summary of iron and steel conditions. The "Age" continues:

The inflow of business in the last month of this quarter has proved more than enough to sustain a high rate of output—it has resulted in a gain. The operations of Steel Corporation plants now average 85% of ingot capacity, compared with 75% a month ago. The rate of a leading independent is 86%. Among the producing districts, Chicago, Pittsburgh and Youngstown alike have increased production, in each case reaching an average of close to 85%. of close to 85%.

of close to 85%.

Mill backlogs, after being built up by liberal specifications against expiring contracts, have been reinforced by orders for 155,500 tons of rails, mostly for winter rolling. Of this total the Louisville & Nashville bought 50,000 tons, the Chesapeake & Ohio 45,500 tons, the Union Pacific 40,000 tons and the Great Northern 15,000 tons. The New York Central and the Pennsylvania are expected to enter the market shortly for 200,000 tons

With the launching of the customary fall rail buying movements come more insistent reports that the railroads will soon make liberal purchases of

The large volume of business on the books and still coming, in some The large volume of business on the books and still coming, in some cases with increased emphasis on prompt shipment, has stiffened the mills' attitude on prices. The failure of producers to fix a uniform deadline for shipping orders against third quarter contracts for bars, plates. shapes and sheets caused confusion, which they hope to prevent three months hence by general adherence to Dec. 15 as the last day for specifications.

Now that specifying is drawing to a close for those mills that are accepting releases until the end of September, price uncertainty appears to be passing. While many buyers are not yet showing an interest in forward commitments, the number of fourth-quarter contracts so far closed is larger than expected. At least one large user of bars succeeded in covering 1.85c., Pittsburgh, but a preponderant number of contracts for bars, plates and shapes closed to date have brought 1.90c. to 2c., a full advance of \$2 a ton over third-quarter figures.

quarter figures.

Specifying was heaviest in sheets, and some buyers are covered for fully 60 days; yet the price advances asked for fourth quarter are apparently not

60 days; yet the price advances asked for fourth quarter are apparently not impeding contracting.

With some consumers, particularly the automobile industry, prices have become secondary to deliveries. The motor car makers, after setting a new monthly record for production in August, are taking more steel than ever before at this season and expect to maintain present operations through October. Mills face a pressure for shipments indicating that much of the steel now being rolled is passing directly into consumption. In certain instances buyers are dividing orders among several producers to insure deliveries when wanted.

The improved tage of prices of finished steel has extended to semi-finished.

deliveries when wanted.

The improved tone of prices of finished steel has extended to semi-finished material, and it now seems probable that fourth-quarter contracts will carry advances of \$1 a ton on sheet bars and \$1 to \$2 a ton on billets and slabs.

A decline in inquiry for fabricated steel and backwardness of pending projects, reported from some market centers, has caused mills to extend protections on plain material and has raised doubts regarding the trend of construction activity.

In pig iron, the fourth-quarter buying movement is largely over, although sales by Clayeland producers totaled 35,000 tons for the week. Fortified

In pig iron, the fourth-quarter buying movement is largely over, although sales by Cleveland producers totaled 35,000 tons for the week. Fortified by liberal bookings, furnaces are holding firmly to recent price advances. Blast furnace stocks are being reduced, and, if demand holds at the present rate through the coming quarter, producers that had large accumulations early this year will have little stock iron left. Shipping orders from the automotive industry indicate that it will take as much iron next month as in Sentember. in September.

in September.

Scrap prices, although as a rule no longer rising, remain strong.

British makers of ferromanganese, according to our London cable, have raised prices \$5 a ton, to \$110, American seaboard, duty paid.

Copper advanced another ¼c, a lb. to 15.25c., delivered Connecticut Valley, on Sept. 24. Sales for the month established a new recent record at over 200,000 net tons, of which 70,000 tons is for export.

"The "Iron Age" composite price for pig iron has advanced for the third consecutive week, now standing at \$17.71 a gross ton, within 4c, of the highest level to date this year, reached in February. The finished steel composite remains unchanged for the eighth week at 2.348c, a lb., as the following table shows: table shows:

One week ago       2.348c         One month ago       2.348c         One year ago       2.346c         10-year pre-war average       1.689c	One month ago
output of finished steel.  High. Low.	mingham.
19252.504c. Feb. 14 2.314c. Jan. 3 19272.453c. Jan. 4 2.293c. Oct. 25 19262.453c. Jan. 5 2.403c. May 18 19252.560c. Jan. 6 2.396c. Aug. 18	1927 19.71 Jan 4 17.54 Nov 1 1926 21.54 Jan. 5 19.46 July 13 1925 22.50 Jan. 13 18.96 July 17 1924 22.88 Feb. 26 19.21 Nov. 3

Following several weeks of almost unprecedented activity, the iron and steel markets are more tranquil, the "Iron Trade Review," in its weekly summary, Sept. 27, says. Most consumers have specified fully their third-quarter contracts, some have purchased supplementally, and for a majority the mildly, deferred condition of mill deliveries insures a good flow of material into October. With producers quoting higher prices on most products, the general run of consumers is content to absorb current commitments and defer making new ones, continues the "Review," which is further quoted:

But production is climbing to higher levels. September shipments of some large interests are setting an all-time record. As if to step into the breach as small and moderate-size buyers relax, tonnage outlets for iron and steel are opening up. Important bridge and structural projects are developing, some large pipe lines are maturing and rall requirements now being placed or in early prospect aggregate 400,000 tons.

A survey by "Iron Trade Review" of consumers' steel stocks in the more important consuming centers fails to disclose any noteworthy expansion Following several weeks of almost unprecedented activity,

in the past 60 days. The occasional increase that is revealed is attributed to the necessities of accelerated consumption. In fact, considering the higher rate of consumption, users' stocks on Oct. 1 will be relatively lighter than 60 days ago. It is apparent that the record steel production of July, August and probably also September has its roots in definite consumptive requirements.

Pig iron prices appear to be holding firmly at recently advanced levels, but in steel the situation is more spotty. Such contracts as have been written for steel bars, plates and shapes have generally carried a \$2 rise. Sheet producers are waging a determined fight for higher prices and a reduced cash discount; some large consumers have accepted both conditions while others, notably some automotive interests, have tendered business on the old basis only to have it refused. Extensions of third-quarter prices on tonnage requirements of hot rolled strip have been granted, but advances have been won from some cold strip users. No more than the usual irregularities are apparent in wire products. Semi-finished quotations have not yet been tested, coke is steady and scrap is calmer.

Rail awards include 45,500 tons by the Chesapeake & Ohio, 40,000 tons by the Northern Pacific, 15,000 tons by the Great Northern and 5,200 tons by the Northern Pacific, 15,000 tons by the Great Northern and 5,200 tons by the Pansylvania an unstated tonnage. Chicago district mills have benefited chiefly by actual business placed and part will be rolled next quarter. The Canadian National railroad has bought 20 locomotives and has 35 pending.

So heavy have soft steel bar specifications been at Chicago the past three

The Canadian National railroad has bought 20 locomotives and has opending.

So heavy have soft steel bar specifications been at Chicago the past three weeks that the record of late March has been approached and deliveries on some sizes are thirty days deferred. One plate mill at Pittsburgh is booked solid through the fourth quarter. Featuring prospect structural work is a 20,000-ton bridge at New York on which bids will be asked shortly.

Sheet demand has surged in to Chicago mills sufficiently to provide mills there with the best backlogs this year. Rumors of higher prices in that district persist. Automotive requirements in the Pittsburgh and Youngstown districts are persistent and conform with continuation of the August record in automotive production. A showdown on the revised sheet dis-I in automotive production. A showdown on the revised sheet dis-seems certain this week, and producers have rarely been more

united.

Shipments of pig iron have been so accelerated the past week that the August rate has been surpassed and the September movement therefore will be the heaviest this year. The lake furnaces are the most active, 37,000 tons having been placed at Cleveland this week. Modest premiums are being paid at St. Louis for spot delivery and 10,000 tons of foundry and malleable iron is on inquiry there.

A sharp rise in the operating rate of Steel corporation subsidiaries to 84% which also describes the average for independent producers, seems to assure an ingot record for September. A banked stack has been lighted at Gary, Ind., resulting in a fractional advance in the ingot rate at Chicago to 81%, contrasted with 60% a year ago. Buffalo producers hold at 87% and Pittsburgh at about 85. Mahoning valley independents are averaging 87% this week, or 10 points above corporation units.

British makers of railroad equipment have booked good export business

this week, or 10 points above corporation units.

British makers of railroad equipment have booked good export business in the past week, according to a cable to "Iron Trade Review." German exports are increasing and prices are more profitable. Belgian prices are rising, while French prices are firm. European rail makers have advanced the market 60 cents per ton.

For the sixth consecutive week the Iron Trade Review composite of 14 leading iron and steel products has risen. This week it advanced six cents, to \$35.29. At the start of the present upward movement this index stood at \$34.89. at \$34.89.

Ingot production of the United States Steel Corp. in the past week was at better than 85% of capacity, states the "Wall Street Journal" of Sept. 25. This compares with a shade over 79% in the preceding week, or an increase of 6%. Two weeks ago the corporation was running at around 77%, continues the "Journal," adding:

Independent steel companies also have increased operations, but the gain is not as large as that of the Steel Corp., because some of the smaller units among the independents did not move ahead as sharply as the larger companies. Bethlehem Steel is running at about the same rate as the Steel Corp., namely between 85% and 86%, while Republic is credited with slightly higher figures. The Youngstown Sheet & Tube and Inland Steel also have increased their activities.

For all the independents the average is now around 85% compared with slightly better than 81% in the previous week, or an increase of a little less than 4%. Two weeks ago the independent average was between 78% and 79%.

79%.

For the entire industry the rate is 85%. This compares with a fraction over 80% a week ago and about 78% two weeks ago.

Comparisons with operations at this time a year ago indicate the extent of the improvement in recent weeks. In the final week of September in 1927 the Steel Corp. was running at 66%, with independents at about 64% and the average slightly better than 65%.

Because October is usually a month for active steel mill operations, it is likely that further improvement will be shown in the next few weeks, and many authorities are predicting a record production for the month.

#### Monthly Production of Coal in August.

Below are given the first estimates of production of bituminous coal, by States, for the month of August. tribution of the tonnage is based in part (except for certain States which themselves supply authentic data) on figures of loadings by railroad divisions, furnished to the U. S Bureau of Mines by the American Railway Association and by officials of certain roads, and in part on reports of waterway shipments made by the U.S. Engineer office. The total production of bituminous coal for the country as a whole in August is estimated at 41,108,000 net tons, in comparison with 36,276,000 tons in July. The average daily rate of output in August was 1,523,000 tons, an increase of 72,000 tons, or 5% over the average daily rate of 1,451,000 tons for July.

Anthracite production in the month of August amounted to 6,883,000 net tons, as compared with 4,475,000 tons in The average daily rate of output in August was 255,000 tons, an increase of 42.5% over the rate of 179,000 ons for the month of July.

#### Bituminous Coal and Anthracite Production Recovers from Holiday Losses-Slight Change in Coke Output.

Production of bituminous coal and anthracite in the full week ended Sept. 15 recovered from the losses sustained in the preceding week during which Labor Day, Sept. 3, was observed as a holiday. According to the United States Bureau of Mines, output of bituminous coal rose from 8,935,000 net tons in the holiday week to 10,177,000 tons 8,935,000 net tons in the holiday week to 10,177,000 tons in the following week, a gain of 1,242,000 tons. This was an increase of 741,000 net tons over the preceding full time week ended Sept. 1 1928 and also a gain of 529,000 tons over the output in the week ended Sept. 17 1927. Anthracite production during the week ended Sept. 15 totaled 1,409,000 net tons, an increase of 293,000 tons as compared with the preceding week. Compared with the corresponding week one year ago, the current output, however, shows a loss of 204,000 tons, states the Bureau of Mines report from which we quote as follows:

The total production of soft coal during the week ended Sept. 15, includ-

We quote as follows:

The total production of soft coal during the week ended Sept. 15, including lignite and coal coked at the mines, is estimated at 10,177,000 net tons. This is an increase of 1,242,000 tons over the output in the holiday week preceding, and is the highest weekly production recorded since that for the week of March 10. Production during the week in 1927 corresponding with that of Sept. 15 amounted to 9,648,000 tons.

Estimated United States Production of Bituminous Coal (Net Tons), Incl. Coal Coked.

## Current Events and Discussions

#### The Week with the Federal Reserve Banks.

The consolidated statement of condition of the Federal Reserve banks on Sept. 26, made public by the Federal Reserve Board, and which deals with the results for the 12 Reserve banks combined, shows a decrease for the week of \$83,100,000 in holdings of discounted bills and increases of \$26,200,000 in bills bought in open market, and of \$4,300,000 in United States securities. Member bank reserve deposits declined \$44,700,000 and Government deposits \$32,700,000. Total bills and securities were \$52,500,000 below the amount held on Sept. 19. After noting these facts, the Federal Reserve Board proceeds as follows:

The principal changes in holdings of discounted bills were decreases of \$58,700,000 at the Federal Reserve Bank or New York, \$23,900,000 at San Francisco, \$3,900,000 at Kansas City, and \$3,000,000 at St. Louis. and increases of \$4,300,000 at Chicago and \$3,300,000 at Dallas. The System's

mcreases of \$4,300,000 at Chicago and \$3,300,000 at Dallas. The System's holdings of bills bought in open market increased \$26,200,000, of certificates of indebtedness \$2,700,000, of Treasury notes \$1,200,000 and of United States bonds \$400,000.

Federal Reserve note circulation decreased \$4,100,000 at the Federal Reserve Bank of New York and \$1,400,000 at San Francisco, and increased \$3,700,000 at Cleveland, \$1,900,000 at Chicago ,\$1,300,000 at Dallas and \$2,100,000 at all Federal Reserve banks.

The statement in full, in comparison with the preceding week, and with the corresponding date last year, will be found on subsequent pages—namely, pages 1773 and 1774. A summary of changes in the principal assets and liabilities of the Reserve banks during the week and the year ending Sept. 26 is as follows:

	Increase (+) or	Decrease (-)

#### Returns of Member Banks for New York and Chicago Federal Reserve Districts-Brokers' Loans.

Beginning with the returns for June 29 1927, the Federal Reserve Board also began to give out the figures of the member banks in the New York Federal Reserve District, as well as those in the Chicago Reserve District, on Thursdays, simultaneously with the figures for the Reserve banks themselves, and for the same week, instead of waiting until the following Monday, before which time the statistics covering the entire body of reporting member banks-now 635—cannot be got ready.

The following is the statement for the New York member banks and that for the Chicago member banks thus issued in advance of the full statement of the member banks, which latter will not be available until the coming Monday. New York statement, of course, also includes the brokers' loans of reporting member banks, which this week show an increase of \$54,232,000, the grand aggregate of these loans on Sept. 26 being \$4,524,708,000. This total is only \$38,532,000 below the peak figure of \$4,563,240,000 registered on June 6.

Secured by U. S. Govt. obligations...

As explained above, the statements for the New York and Chicago member banks are now given out on Thursdays, simultaneously with the figures for the Reserve banks them selves, and covering the same week, instead of being held until the following Monday, before which time the statistics covering the entire body of reporting member banks, now 635, cannot be got ready.

In the following will be found the comments of the Federal Reserve Board respecting the returns of the entire body of reporting member banks of the Federal Reserve System for

reporting member banks of the Federal Reserve System for the week ended with the close of business Sept. 19:

Largely in connection with the Treasury's quarterly fiscal operations, the Federal Reserve Board's condition statement of 635 reporting member banks in leading cities as of Sept. 19 shows a decline for the week of \$99,-000,000 in net demand deposits and increases of \$140,000,000 in Government deposits, of \$134,000,000 in Government securities, of \$23,000,000 in time deposits, of \$54,000,000 in loans and discounts, and of \$37,000,-000 in borrowings from the Federal Reserve banks.

Loans on stocks and bonds, including United States Government obligations, were \$65,000,000 above the Sept. 12 total at all reporting banks, an increase of \$62,000,000 being shown for reporting banks in the New York district, of \$17,000,000 in the Chicago district, and of \$10,000,000 in the Philadelphia district, and decreases of \$10,000,000 and \$9,000,000, respectively, in the Cleveland and Atlanta districts. "All other" loans and discounts declined \$11,000,000 at all reporting banks, \$26,000,000 in the San Francisco district, \$16,000,000 in the New York district, and \$9,000,000

in the Boston district, and increased \$20,000,000 in the Chicago district and \$7,000,000 in the Atlanta district.

Substantial increases in Government security holdings were reported for member banks in nearly all districts, the total increase being \$134,000,000, while holdings of other bonds, stocks and securities increased \$6,000,000 at banks in the Philadelphia district and \$1,000,000 at all reporting banks. Net demand deposits, which at all reporting banks were \$99,000,000 below the Sept. 12 total, declined \$70,000,000 in the New York district, \$11,000,000 in the Atlanta district, and \$6,000,000 in the Kansas City district. Time deposits declined \$10,000,000 at reporting banks in the San Francisco districts and increased \$19,000,000 in the New York district, \$8.000,000 in the Chicago district, \$6,000,000 in the Philadelphia district, and \$23,000,000 at all reporting banks. All districts participated in the increase of \$140,000,000 in Government deposits.

The principal changes in borrowings from Federal Reserve banks for the week were increases of \$41,000,000 at reporting banks in the New York district, \$18,000,000 in the Chicago district, \$6,000,000 in the Boston district and \$5,000,000 in the Atlanta district, and decreases of \$16,000,000 and \$12,000,000, respectively, in the Cleveland and San Francisco districts. A summary of the principal assets and liabilities of 635 reporting member banks, together with changes during the week and the year ending Sept. 19 1928, follows:

1020, 1010 48.		Increase (+) or Decrease (-

#### Summary of Conditions in World's Markets According to Cablegrams and Other Reports to the Department of Commerce.

The Department of Commerce at Washington releases for publication Sept. 29 the following summary of market conditions abroad, based on advices by cable and radio:

#### AUSTRALIA.

The trend in Australia toward general optimism continues, although there is still some hesitancy due to drought conditions in certain wheat areas. The strike of waterside workers is also affecting the general situation. Efforts to settle the strike have falled in all important parts except Sydney. Practically all coastal shipping has stopped and overseas shipping has been effected. The Government has endorsed the ship owners suggestions that calls be made for free labor but it is likely that the strike may continue for some time. Many industries are already curtailing operations as a result of the strike. The radio market was active in August and September but was being influenced by sales of old stocks of obsolete sets at reduced prices. Automotive business is improved as a result of favorable weather and fair seasonal prospects as spring onens. asonal prospects as spring opens

#### AUSTRIA.

Continued stability characterized the industrial trade situation in Austria Continued stability characterized the industrial trade situation in Austria during September, the cotton textile industry being the only conspicuous exception to the generally satisfactory conditions in all important lines. Fear of a serious setback from higher money rates has largely disappeared and confidence is felt in well-informed quarters that the present situation will continue at least until winter. The money market is easy, but rates are held on a parity with the international markets. Unemployment remains at a record low point, but a seasonal increase is expected shortly. Recent rains have helped the sugar beet and late fodder crops, nevertheless the fodder shortage throughout the Danube area may be serious during the coming winter.

#### BELGIUM.

The Belgian Parliament adjourned on Sept. 21 and is scheduled to reconvene on Nov. 6. The budget for 1928 which has been discussed throughout the session has not been passed as a whole, but a number of the sections of which it is composed have been approved by Parliament Accordingly, final action on the budget can not be taken before November. Provisional credits to cover requirements during the next three months were voted before the Parliamentary recess.

#### BRITISH MALAYA.

Trade continues slack and no improvement is anticipated until after November first. Some uneasiness in official and commercial circles is being caused by decreased public revenues. Credit conditions continue tight and money is scarce. Importers in general are buying cautiously. Textile ordering is slow. but supplies appear sufficient for demand. Department store sales throughout Malaya show a decrease and are only slightly stimulated by bargain offerings. A heavy accumulation of rubber stocks by November first is expected and transportation companies are making elaborate preparations to handle the tonnage.

#### CANADA.

CANADA.

Domestic, wholesale and retail trade is increasing gradually under the stimulus of fall buying of drygoods, clothing and boots and shoes, all of which are reported to be moving in good volume throughout Eastern and Western Canada. Business in groceries, confectionery, and hardware is also strong and heavy demand for motor trucks and farm implements continues to characterize the Prairie trade. Building materials also continue in demand although the value of permits registered in August declined by about 52% from July and by about 41%.

Movement of new crop wheat to the seaboard has been on an unprecedented scale during the past week. Receipts of 10,340,000 bushels by country elevators on Sept. 18 constitutes a record. On that date of last

year receipts were only 644,000 bushels because of the considerably later harvest. With weather conditions again favorable after showers over the week end of Sept. 15, threshing is general and is nearly completed in Manitoba and Saskatchewan. Yields have been variable but generally high although loss in grade from frosts in Alberta is apparently greater than expected. Lake and canal traffic returns for August record an unusually heavy grain movement for that mouth heavy grain movement for that month.

#### HAWAII.

HAWAII.

The growth of business in Honolulu continues on a normal scale. Retail business during the past month has been moderately active and collections satisfactory. Pre-holiday shipments by wholesalers have been heavy. Interisland freight traffic has been active although passenger business has been seasonally slower. Without an increase in area this year's cane output is locally estimated at 25,000 tons over the previous crep. This excess production compensates for low sugar prices and all sugar companies are reporting a moderate profit. The mid-summer pineapple harvest has almost ended. Canners continue to pack one or two days a week and will not go back to full time until the winter pack commences in December. Distribution of canned pineapples this season has been the best in the history of the industry, and many crops have already been sold out.

#### INDIA.

Little change in the Indian business situation was noted during the month and production and trade throughout the country was appreciably less than a year ago. The Tata Steel Co. strike has been settled by compromise but a deadlock continues in Bombay. Crop reports are fairly satisfactory except in northwest India where late rains and pests have caused considerable damage. Most commodity prices have declined during the past month due to reduced export demand. Orders for forward shipment of staple importations are difficult due to the uncertainty of havant clearance during the lines are difficult due to the uncertainty of bazaar clearances during the

lines are diricult due to the directainty of based and the approaching holidays.

The jute forecast was somewhat higher than generally expected and the market weakened slightly on the information. Burlaps have declined slightly with little business being transacted in near positions.

#### NETHERLAND EAST INDIES.

Despite uncertainties confronting the sugar and rubber markets, which are causing large importers to exercise caution, business in general continues tavorable. Import trade in stapies for the native market is benefitting from the improved purchasing power of the native, resulting from excellent crop returns. European textile importers, however, report dull market conditions and continued Chinese boycotting of Japanese goods With the exception of sugar, export markets are active. Due to continued lack of forward sales the sugar market remains dull. Latest local estimates place the current crop at over 2.900,000 long tons.

#### PHILIPPINE ISLANDS.

PHILIPPINE ISLANDS.

Although somewhat affected by the rainy season, general business in August was fairly good and showed improvement over the previous month. Chiefly because of lower export prices, however, the business level was under that of the same month last year. The chief improvement was in the textile market which was much better than July. Dealers, however, continue to order for immediate needs only, but stocks in general are sufficient for demands. Sales of medium and low priced automobiles predominate and are on the increase. Regulations regarding hired cars are causing some concern in the second-hand market. Bus lines are increasingly active. Demand for flour is good, and canned mackerel gains in popularity. The sugar outlook is favorable and an increase of 10% in the crop is estimated here. Copra and abaca production continues heavy, with lower prices in each export market. each export market.

Recent noteworthy developments in Sweden add stability to the favorable trend in the present general economic situation. The resumption of work in the iron mines on Sept. 1 is expected to have a beneficial influence on retail business in the affected areas and to restore gradually the purchasing power of the workers. Warm and dry weather has improved the outlook for crops and although the harvest will be late this year it is believed that the yield will be about normal. The election to the second chamber which has just been held was a victory for the conservatives who gained several seats. The money market showed no marked changes during August with the exception of net foreign credits at the private banks which increased to 177,000,000 crowns, a gain of 27,000,000 crowns during the month. Quotations on the stock exchange made large advances following the election results. Sales of wearing appearel have been low during the subnormal summer and makes it necessary to carry considerable stocks over the winter. over the winter.

#### UNITED KINGDOM.

Unemployment registers in Great Britain showed that on Sept. 10 a total of 1.300.000 persons were on the lists as seeking employment; this figure represented a decrease of 25,000 in the week and it was also the lowest total reported since the latter part of July. Unemployment, however, is still heavier than it was a year ago by about 250,000 workpeople. On the other hand, the British Board of Trade Journal, in a special article in its Sept. 13 issue, pointed out that British manufactured goods were exported in August to a yellow exceeding 550,000,000 an appurit greater by pearly in August to a value exceeding £50,000,000 an amount greater by nearly £2,500,000 than the Aug. 1927 valuation.

#### Sales of Exchange by Paris Continue-Bank of France Placing 50,000,000 Francs Per Day on the Market-All Sales in Dollars.

In a statement to the effect that it is still evident that the Bank of France has been parting willingly with the dollar ex-

Bank of France has been parting willingly with the dollar exchange which it has had to sell in order to control the market, a message Sept. 21 from Paris to the "Times" continues:

The large sales of foreign bills by the bank did not begin until early in September, but they have subsequently been maintained on the scale of about 50,000,000 francs per day, whereas during the whole of August such sales amounted to only 36,000,000 francs.

All of the sales this month appear to have been dollar exchange, the rate for which has touched the gold export point, whereas the rate for sterling and other currencies did not. In the matter of sterling bills, the bank probably finds holdings of commercial credits preferable to taking treasury bills, for the reason that interest on the coupons of the latter is liable to the 18% French tax.

Credits still held by the bank in the American market are estimated

the 18% French tax.

Credits still held by the bank in the American market are estimated in well-informed quarters as not less than 20,000,000,000 francs. Under such circumstances it is felt that gold exports from Europe to New York are likely to be made only from London, where exchange has already virtually reached the gold export point. But French bankers find it difficult to determine the probable amount of shipments even from the British market.

The Paris exchange market is colorless, a natural result of the complete control which has been asserted by the bank. Weakness in sterling,

which has lately fallen from 124 23 to 124.16, was ascribed to large sales

on German account.

The magnitude of the bank's transactions may be judged from the fact that money loaned to the market by the Bank of France and the four lending private banks has increased between August of last year and the present date by 11,600,000,000 francs. This increase was made up of 7,35,-000,000 addition to discounts, more than 3,000,000,000 to current accounts and 1,200,000,000 to advances against collateral loans on the Stock Exchange. The present aggregate is 34,000,000,000 francs, as against 22,-500,000,000 a year ago.

#### British Gold to New York Designated "Special Transaction."

A special cablegram from London Sept. 21 was published as follows in the "Times":

as follows in the "Times":

The £500,000 gold withdrawal for New York, more than a week ago, is still regarded as a "special transaction," and it has not been repeated even with sterling at an equally low rate. The London market is under the impression that "publicity value," plus favorable influences upon Wall Street, was an important factor in this particular transaction.

Nevertheless, the shipment could only have anticipated an entirely logical movement of the kind, seeing that sterling was virtually at the point where the covering of remittances to New York in gold was more profitable than using cable transfers of exchange.

#### British Labor Party Urges Control of Bank of England By Public Corporation in Which Labor Would Be Represented.

Control of the Bank of England by a public corporation comprising representatives of the Treasury, Board of Trade, industrial interests, labor and the co-operative movement will be advocated by the labor party in the coming campaign for the general election, according to copyright advices Sept. 20 from London to the New York "Times", which further said:

further said:

The party Executive Council issued to-day a supplement to its platform, urging the necessity for closer popular supervision of banking, and decrying the government's post-war handling of national policy on currency and credit without consulting Parliament.

"There are grounds for profound disquiet," the Labor manifesto says, "that during the years of 1920 to 1925 the financial interests were able, almost without challenge, to force the nation up the long road of deflation."

Serious industrial and social consequences were involved, the party recalls, yet in the adoption and carrying out of the policy there was "astonishingly little political discussion."

The conclusion which the party draws is that there is too little con-

The conclusion which the party draws is that there is too little connection between political democracy and the forces which control this kind

of policy.

The influence of the British Co-operative Party, which, politics aside, is a great chain of co-operative stores and banks throughout the country. Is seen in the banking and currency manifesto issued on the eve of the party conference as an after-thought to the main trend of the Labor Party's program.

program.

The co-operative movement, which in itself is engaged in banking, has been attacking the increasing centralization of British bank control, one of the most striking features of the period of trade depression since 1920. The Labor Party hitherto has been apathetic on the point.

To-day's program calls for "such changes in the banking and financial system as will secure that the available supply of credit and savings shall be used for enterprises of national advantage as distinct from those which the second security into the best most before necessarily injuries and an inquiry into the best most of the second are useless or socially injurious and an inquiry into the best method for

achieving this purpose.

"It asks also for an extension of existing banking facilities for persons of small means and the spread of municipal and co-operative banks

throughout the country.

Declaring that the currency question is less a national than a world issue, it asks the government to carry out the proposals of the Genoa Conference of 1922 for regulating the value of gold by international agree-

ment.

The Labor Party's proposal to alter the structure of the Bank of England, which is a private corporation, acting always as a matter of practice rather than on constitutional provision in co-operation with the Chancellor of the Exchequer.comes on the same day as an unusual meeting of Bank of England stockholders. The half-yearly meeting usually is a somnolent affair, attended by two or three persons, at which a report for the six months of operation is read. An occasional genteel "Hear, Hear" interrupts the reading. reading.

This time, however, a new shareholder named Hargreaves arose and invited the Governor to reply to a criticism recently expressed in the Midland Bank Magazine that the "Old Lady of Threadneedle Street" was unduly increasing her reserves. It was suggested also, that it might be a good thing if the Governor enlightened the public periodically on matters of financial interest, as presidents of other large banks did at the annual meetings. He also "ventured the opinion" that the Bank's Constitution was "archaic" and ought to be brought up to date. He felt it would not be a bad idea to have the heads of England's "big five" banks represented on the Bank of England Board of Directors.

Montagu Norman, Governor of the Bank, thanked the new shareholder for his suggestions, but said he did not care to deal with them.

"As I understand it," he said, "Mr. Hargreaves suggests that certain persons whom he calls bankers, a very elastic term, should have seats on this court. That is a point which has been debated on and off for a hundred years and so far as I am aware no argument has ever been brought forward to justify it."

The bank showed a profit for the half-year ended Aug. 31 of £700,182

forward to justify it.

The bank showed a profit for the half-year ended Aug. 31 of £700,182 (about \$3,500,000) and declared a half-yearly dividend of 6%, payable on

#### Higher German Rail Rates Granted-Certain American Exports and German Imports Exempt.

According to the New York "Journal of Commerce" of Sept. 19 the German Railroad Co. issued on Sept. 18 a statement announcing that an increase ranging from 10 to 11% on freight and passenger tariffs has been granted by the Leipzig Special Tribunal, and that the new tariffs become

effective Oct. 1. The new rates it is stated, have to do with various lines of American export products, as well as certain goods imported into the United States from Germany. The German Railroad Co.'s statement is given as follows

in the paper quoted:

"It is the desire of the German Railway Co. not to disturb at present the pleasant commercial relations between foreign countries and Germany. The German Railroad Co. has therefore decided to except from the general increases of freight rates certain exceptional tariffs for the exportation and importation of goods, several transit tariffs and combined tariffs, which have been issued mutually by the German Railroad Co. and the railroad companies of the neighboring States of Germany. According to this decision the present rates for certain American export commodities will be left undisturbed until further notice. In this category are the following: Burlap, cotton, linters, wool, bananas and certain fruits, hemp, grain, flour, beans, peas, etc.

beans, peas, etc.

"The same measure applies also for the importation of certain German goods into the United States:

"Thuringia and Nuremberg manufactured goods as toys, ordinary musical "Thuringia and Nuremberg manufactured goods as toys, ordinary musical instruments, dolls, artificial flowers, Christmas tree ornaments, paper goods, glass beads, certain woodware, basketware; etc.; iron and steel cutlery; goods manufactured of aluminum, copper, lead; glass and glassware; cardboard, wood pulp, yarns, ribbons and tissues of cotton; earthenware, crockery, porcelain, etc.

"The rates for these articles will not be increased only in those instances where special tariffs are provided for their exportation or importation.

"The free freight rate service of the German Railroad Co., Freight Information Office, 11 Broadway is prepared to answer all inquirels with re-

mation Office, 11 Broadway, is prepared to answer all inquirels with respect to the above information and interested parties are invited to make ample use of this service."

## Death of Baron J. Neuflize-Dean of Bank of France Regents Aided His Country in U. S. during the

Baron Jean de Neuflize, dean of the Regents of the Bank Bank of France and father of the United States representative of that Bank, died in Paris on Sept. 21 at the age of 78. Baron Jean de Neuflize was also Vice-President of the Paris, Lyons & Marseilles Railway, Chairman of the Board of Directors of the Ottoman Bank and President of the Evian Mineral Water Society. The New York "Times" in its report of the Baron's death, says:

Baron de Neuflize was in this country much of the time between the sign-

"Baron de Neuflize was in this country much of the time between the signing of the armistice and 1920, as representative of the Bank of France. He played a notable role in the negotiations attendant upon the extension of of French credits here, and on numerous occasions soon after the war asserted that France would make a speedy recovery.

He came to this country shortly before the entry of the United States into the World War, and in February, 1918, made a public address here in which he asserted that materials available then in France were sufficient to arm fifty American divisions. Before his visit he had served two years in the Franch Army.

arm fifty American divisions. Before his visit he had served two years in the French Army.

In persuading American banking interests to extend credits to France Baron Neuflize argued that psychology had much to do with the financial dependability of a nation and pointed to the recovery of the French nation after the Franco-Prussian War as indicating that the mental attitude of the French people made extension of credit to them "safe."

He frequently took exception to the tendency in some American circles to lump European problems as one, and asked that France be considered apart from the rest, as having special problems and special facilities for meeting them.

#### Large German Gold Reserve Factor in Reparations Deal-Belief Here \$250,000,000 Accumulated since 1926 Could Be Shifted.

Writing in the New York "Journal of Commerce" of Sept. 27, Jules I. Bogen states:

27, Jules I. Bogen states:

It is reliably reported in international banking circles here that a part of the gold reserve of the German Reichsbank may be transferred to this country in connection with the proposed plan for a general settlement of the reparations and inter-Allied debt obligations.

The transfer of any substantial portion of the German gold reserve to this market, ostensibly for the purpose of facilitating the payment by France of the \$400,000,000 war supplies debt due next Aug. 1, would naturally have a profound effect on domestic credit conditions. It would permit the member banks to sharply reduce their rediscounts at the Federal Reserve Bank and in that way to further reduce the check on borrowings for speculative purposes which results from the high rates now maintained on rediscounts. It is doubtful if such a transaction would meet the favor of banking authorities here for this reason.

\*\*Record Gold Holdings\*\*.

#### Record Gold Holdings.

Record Gold Holdings.

The accumulation of gold by the Reichsbank has been persistent since the stabilization in 1924, and has been going on at an accelerated pace in the last few months. At the time of the stabilization of the mark the gold reserve at the German central bank amounted to \$18,700,000 reichsmarks. At the beginning of this year this total had been more than doubled, the reserve amounting to 1,864,643,000 marks. During the first nine months of this year a further gain of nearly 500,000,000 marks, or \$130,000,000, has taken place, in the face of a rise in interest rates in the United States, which would normally tend to drain gold out of Germany.

Despite the sharp reduction in the volume of German financing in this market, Germany continues to be a leading taker of gold in the world market. Several British shipments of the yellow metal to Germany have been announced lately, and from week to week the Reichsbank announces a new high record gold reserve as gold is also absorbed from Russia. The greater part of the recent gold acquisitions of Germany, in fact, have come from the latter source. The mark has been practically at the upper gold point with respect to the pound sterling for some time, the mark being quoted in New York at the present time at a premium, despite the fact that the dollar itself is quoted at practically the upper gold point in London. Hence, further gold shipments from London to Germany are generally expected.

The strength of the mark has caused considerable surprise in many quarters, especially in view of the adverse trade balance of Gemany and the slowing down in Ameican financing. The most usual explanation is the heavy movement of French short term capital into Germany, attracted by the high rates to be found there. The French thus have largely replaced the Americans as the chief purveyors of capital to the Germans

#### Could Shift \$250,000,000.

Could Shift \$250,000,000.

Were the German gold reserve to be reduced to the level of Jan. 1, 1926, it would permit the transfer of more than \$250,000,000 in gold out of the country. This will put Germany into a position to offer the Allies, in the event of further bargaining as to an immediate reparations settlement, a large amount of cash in the form of gold as well as bonds. in view of the large cash payment France will face next August, if she does not accept the Mellon-Berenger agreement, it is pointed out, this gives the Germans a strong bargaining position.

It is important to remember that one important reason for Germany's need of a large gold reserve is the large and regular payments she makes on account of reparations. Should a reduction of these payments be arranged there would be less reason for maintaining the gold stock at the present level. Above all, with the office of the transfer agent eliminated, the Allies would no longer be interested in seeing that Germany's gold reserve is at a maximum in order to assure the transfer of reparations payments out of the country.

of the country.

of the country.

It is generally agreed in informed circles here that the payment due by France to this country next August on account of the war supplies debt is becoming the most pressing immediate financial problem in Europe. The French have given clear indication that they will not sign the Mellon-Berenger agreement, at least not unless they are safeguarded against possible future reductions in reparations payments by Germany. Such a concession this Government has so far been unwilling to make. Hence the French are faced with a so-called "commercial debt" of \$400,000,000 on account of the post-war sale of war supplies, a debt which does not fall within the same category as the other interallied debts. Despite the large gold reserves of the Bank of France, the recency of the stabilization and the general future uncertainty make the payment of so large a sum in cash out of these reserves of the Bank of France a hazardous operation.

#### Reichsbank Takes More Russian Gold-Denmark and England Have Also Made Shipments to Berlin Market—London Expected to Provide Gold for New York.

From Berlin Sept. 21 the "Times" reported the following:

The further addition of 40,437,000 marks to the Reichsbank's gold reserve for the second week of September, making nearly 70,000,000 marks in a month, came mainly from Russia and Denmark, but a small remainder resulted from arbitrage deals with London. Berlin bankers expect that imports of gold by the United States will continue. It is not expected here that the Bank of England can avoid parting with gold for New York, but it also is not considered that the Bank will need to raise its discount rate in order to protect its gold reserve, since it already has surplus gold holdings totaling some twenty millions sterling which has not been used for credit expansion.

The official German explanation of why London is more affected than the Continental markets by the recent money tension at New York is that, on the Continent, the Bank of France's exchange market policy has operated as a counterweight to the high money in America. The French reserves of exchange, which were kept in London before stabilization of the franc, have now been largely distributed among the markets of Central Europe, where they have replaced the funds withdrawn by America. This has partly explained the recent firmness of mark exchange and the weakness of sterling. further addition of 40,437,000 marks to the Reichsbank's

has partly explaness of sterling.

On the same date (Sept. 21) a London account to the "Times" stated:

Efforts here to keep the bank's gold holdings reasonably in hand without recourse to raising of the bank rate, plus efforts of the Federal Reserve authorities to meet legitimate trade requirements, will, it is hoped, confine gold exports to the United States to moderate dimensions. But there is obviously such considerable difference of opinion among American bankers as to what the actual credit demands will be between now and the end of the year that bankers here find themselves incapable of expressing any definite opinion concerning the possible extent of gold

Anomalies of Money Market.

Anomalies of Money Market.

Their view is that if trade, business and the stock market should enter on a boom together in America a cautious attitude in other countries is clearly desirable, in view of the close connection now firmly established between all financial centres. Notwithstanding London's actual loss of gold this month and the further withdrawals that appear to be in sight, considerable difficulty is being experienced in maintaining discount rates. This somewhat anomalous position is due to the comparative scarcity of bills, coupled with a keen demand for three-month drafts, which, owing to the fact that they mature at the end of the year, are extremely profitable. These conditions, however, are probably only temporary, and firmer London money rates are anticipated soon.

In the case of Germany, sterling exchange has fallen so considerably, as measured in reichsmarks, that gold is now being sent in large amounts from London to Berlin. Last Tuesday Germany took £500,000 from the open market here, and on Thursday it purchased £700,000 gold from the Bank of England.

Why Germany Takes Gold.

Why Germany Takes Gold.

Why Germany Takes Gold.

This gold represents credits which Germany has been obliged to obtain in London, either to replace funds lost to America or because American bankers were unable to continue making advances on the same scale as hitherto. If Germany's actual foreign trade balance were the only influence, sterling should stand at a considerable premium on marks, instead of marks commanding a premium on sterling.

#### Americans Organize Bank in Berlin-Join German Financiers in Institution To Make Industrial

Stating that the Central Bank for German Industry, organized by prominent American and German financial

institutions, was incorporated in Berlin on Sept. 20, advices on that day from Berlin to the New York "Times" added:

Four New York concerns—Blair & Co., the Equitable Trust, International Germanic Co. and E. H. Rollins—are participating.

The President of the institution, the purpose of which is to make loans to smaller industrial concerns in Germany, is Dr. Peter Reinhold, former Minister of Finance.

The capitalization is 17,500,000 marks. However, this capitalization is 17,500,000 marks.

Minister of Finance.

The capitalization is 17,500,000 marks. However, this sum is merely working capital and efforts to raise a loan in the United States of \$15,-000,000 or more will be undertaken immediately.

For some time German industry has suffered, according to financial experts, through the inability of smaller institutions to obtain loans at a reasonable figure. Only concerns such as Krupp and the German General Electric, which are able to borrow large sums, could float loans abroad. At present the bank will lend sums from \$10,000 up and borrowers will be able to get money at something less than 8% for long-term loans.

The National Association of German Industry is represented in the new organization, one of its directors being a member of the Executive Committee.

#### Romolo Angelone on Return from Abroad Reports Italian Economic Situation Sound-Treasury Statement at the End of August.

Romolo Angelone, Commercial Attache to the Royal Italian Embassy, returing to this country from an extensive trip to Italy, made the following statement on Sept. 25 regarding the economic and financial situation of his country:

regarding the economic and financial situation of his country:

"The Italian economic situation is basically sound for all the effects resulting from the return of the country to the gold standard have been fully discounted and surpassed. A very important benefit resulting from the stabilization of the lira at the present level, is to be found in the movement of industrial concentration and rationalization; as a final result the key industries have now a larger output, with substantially lower costs of production, resulting from the adoption of better and unified methods." The trend of unemployment towards a rapid reduction offers the best confirmation to this statement. As a matter of fact from January to July, 1928, unemployment has been reduced by wholly 50%; the unemployment situation in Italy is shown in the following table:

1928—

Fully unemployed Partially unemployed January

439.211

76.321

March

411.785

months, was caused by increased importation of raw materials, a ment which would indicate a greater industrial activity during future months.

"With the beginning of the current financial year (July 1 1928—June 30 1929) a reorganization has been inaugurated in the accounting presentation of the Treasury Statement, corresponding to the beginning of a new period of Fascist finance, that of ordinary administration of the revenue now placed on a normal and permanent basis.

"The Treasury Statement at the end of August last, shows a cash balance of 1,032,115,285 lira, the actual receipts for the first two months of the current financial year, have reached 2.917 millions, while the expenditures have amounted to 2.953 million lire, with a small deficit of 36 million lire, resulting from a lower yield of the income tax, whose returns have a highly seasonal character, and do not correspond exactly to the estimates which are made a full year ahead, said deficit will disappear totally during the next month. The internal debt stood, on August 31, at 86.611 million lire, showing an increase of 229 millions over the preceding month, as a result of larger deposits kept by the treasury with authorized Italian banks. Bank notes in circulation amounted to 71,140 million lire, with a decrease of 254 millions over the previous month; treasury bills were reduced by 31 million lire."

#### National Loan Urged to Aid Building Shortage in France.

Special correspondence from Paris, Sept. 17 to the New York "Journal of Commerce" is published as follows in its issue of Sept. 27:

Attention throughout the country is being concentrated at the present time on the nation-wide housing shortage and the inadequate public utility facilities available to numerous communities throughout France. The abnormal conditions of the war and inflation prevented the cities and villages of the country from keeping pace with their requirements, so that following the stabilization this now stands out as the leading domestic problem of the moment.

Within a few weeks district elections will be held, and early next year the municipal elections will again offer an occasion for the discussion of this local problem.

Within a few weeks district elections will be held, and early next year the municipal elections will again offer an occasion for the discussion of this local problem.

Describing the private and public construction needs as they now exist. Charles Dumont says in "Actualities";

"Numerous villages, as well as the great cities and their suburbs, are becoming highly restive under current conditions. Unhealthy housing, obsolete street paving, inadequate lighting, unsound water systems, insufficient schools, outgrown hospitals—all these explain the statistics which show that the death rate of France is among the highest.

"Large sums are indispensable for purposes of housing, utility construction and public hygiene, but they cannot come from the local budgets. The latter are already overburdened and can stand no new imposts.

"It remains then to finance local reconstruction out of the national budget. How can the State stand any further burden?

"I have already suggested that a loan be issued of several billions of francs, which will be used both to pay off the most burdensome loans at high rates incurred by local governments and then to furnish capital to invest in new urgently needed projects. The issue of tax-exempt State bonds wild cut in half the present cost of raising capital for local improvements. Experience has shown that to grant the use of a superior credit is the least costly of all forms of aid.

"The national Government can then establish conventions with the cities relative to the disbursement of the proceeds of the loan and the meeting of interest and principal payments upon it. The Minister of Finance will have jurisdiction over the matter and he can see to it that cities which are poorly managed and appear incapable of supporting the charges on the loan share apportioned to them.

"Issued in the Interest of all the departments, hundreds of cities and thousands of villages, the National Public Health Loan would be based

solely on the credit of the State. It would, under present conditions, be issued on a lower interest basis than the last  $5\frac{1}{2}\%$  consolidation loan.

"Finally, the State can aid the local administration in making up for nearly 15 years of delayed building through allocating reparation payments in kind for this purpose. Arranging for the proper deliveries from Germany, it would be possible to reduce by 40 to 50% the average cost of materials, machinery and equipment urgently needed for this purpose.

"Our people have been patient as long as great national problems remained unsolved, but the stabilization of the franc is now accomplished. The housing shortage, the inadequate transit facilities, the lack of water and electric light and power cannot continue. A united effort is now needed to end these evils."

#### Rumania's Receipts for Eight Months of Current Year \$8,000,000 in Excess of Expenditures.

Government receipts for the first eight months of the current year amount to approximately \$119,575,000 according to the Roumanian Minister of Finance. Expenditures for the same period total \$111,442,000, leaving a surplus of about \$8,066,900. The budget for the fiscal year 1928 calls for \$237,770,000, but as the major part of the collections are made during the last half of the year, the present situation is regarded as highly favorable. It is stated that despite the fact that the Roumanian tax rate is among the lowest in Europe, she has had a balanced budget since the year 1921-22. In that year an actual surplus of \$3,822,000 was reported. Last year the surplus amounted to \$18,657,000.

#### Bulgarian Bank Loan-Foreign Financial Houses to Make Advances During October

According to the "Evening Post" of Sept. 25, Managing Director Malan of the recently established Banque Hypothecaire to Bulgarie has left London for Geneva to sign an agreement with a group of foreign financial houses for a mortgage loan. It is also stated that an advance of 4,800,000 Swiss francs will be granted in October. Part of the loan is expected to be issued in London

#### Soviet Bank's Head To Seek Loans In U. S.—A. L. Scheinman's Description as State Bank Head Seen Scheinman's P as Move to Give Him More Leeway in Negotiations.

A. L. Scheinman, until recently President of the Gosbank, or Soviet State Bank, will try to visit the United States soon after the elections to try to interest American capitalists in financing Russian industrial and other undertakings says a message from Berlin, Sept. 21 to the "Times," which goes on to state:

This indicates that M. Scheinman's resignation as head of the Soviet financial institution was offered and accepted merely as a means of giving him more liberty in conducting negotiations than he would have as an official

of the Moscow regime.

At present M. Scheinman is taking the cure at Carlsbad.

That the Soviet is now willing to give liberal pledges as security and attractive concessions to private ventures is now intimated in Russian circles here, although the diehards of Leninism insist moves to obtain money must not involve any concessions in the principles laid down by the first Communist Dictator of Russia.

Further advices, from Moscow, Sept. 23, to the same

paper said in part:

paper Said in part:

The most pressing problem for the Soviet Union to-day is how to supply the peasants with manufactured goods at reasonable prices. As shown in previous dispatches, this is not likely to be achieved in the near future without considerable foreign credits, but unless the problem is solved the State grain collections and State control over agriculture generally cannot be satisfactory.

This is immensely important because agriculture is and must remain for many years the backbone of the Soviet economic system. But is

This is immensely important because agriculture is and must remain for many years the backbone of the Soviet economic system. But it is a dangerous error to suppose that the Soviet is on the verge of bankruptcy or is ready to accept any conditions which foreigners may wish to impose. What Lenin said when he introduced the New Economic Policy still holds

good:
"If we get foreign capital on terms we can accept our progress will be much more rapid. But we can and will manage without it rather than abandon our principles."

Textile Exports Favorable.

Textile Exports Favorable.

The grain collections during the past fortnight have shown marked improvement and the realization of 301,000,000 rubles of the new 500,000,000-000-ruble industrialization loan in less than two months indicates financial strength, not financial weakness. Nearing the end of the first ten months of the current fiscal year it is stated that 140,000,000 meters of textile goods have been exported to Russia's Eastern neighbors, a total which compares favorably with 192,000,000 meters exported in the record year of 1013 of 1913.

In some quarters here it is suggested that textiles, instead of being exported, should be sent to the villages to exchange for grain. But the Soviet is looking to the future and is building up markets against the day when the industrialization plan shall be completed.

#### Seeks Link With America.

Seeks Link With America.

On the other hand, there is reason to believe that the Soviet wishes to emerge from the present economic and diplomatic impasse with the United States and Great Britain and that it would be prepared to go half way or more to meet foreign conditions, if that can be done without "losing face." Thus the Soviet could not and would not renounce the Comintern and it could not and would not accept a "Dawes plan" for Russia nor financial control by the League of Nations like that arranged for Austria. But it might possibly give acceptable guarantees that no funds should be transferred from Moscow to the American or British Communist Party, and American "financial advisers" might be welcomed to co-operate in the utilization of a lean or credits.

Not even Stalin could go much further. Any talk of pledging railroads or State properties or of abrogating the labor laws and giving foreigners a free hand is pure nonsense. Even should the Kremlin be willing to take such steps its supporters would refuse. The still active "Opposition" forces—it is admitted by one of Stalin's chief henchmen, Uglanob, that their intrigues have not yet been wholly curtailed—would seize the opportunity of regaining power against what they would term "traitors to the revolution." revolution.

# Under Secretary of Treasury Mills Makes Deposition for Banks on Soviet Gold Case.

From the "Times" of Sept. 21 we take the following:

The suit of the Bank of France to recover \$5,200,000 in gold sent to the Chase National Bank and the Equitable Trust Co. by the Soviet State Bank and later reported brought from Ogden L. Mills, Under-Secretary of the Treasurer, a deposition made before Mary E. Smott, a notary public in Washington, and filed yesterday in the Federal Court here. Mr. Mills had been asked by the two banking institutions what attitude the Government assay office would take if the gold was brought here to be explanated for currency.

exchanged for currency.
"I told them," said Mr. Mills, "that the stand of the Government, taken in 1920, had not changed: that the Government declined to accept gold of Soviet origin as it might be subjected to attack internationally."

The last reference to the matter appeared in our issue of Aug. 11, page 768.

### Hungary Plans Loans to Small Industries.

The Washington correspondent of the New York "Journal of Commerce" announced on Sept. 21 that the Hungarian Ministry of Finance has been authorized to establish an institute for the issuance of bonds on behalf of small industrial establishments which are unable to borrow abroad on their own account, it was reported to the Department of Commerce by Commercial Attache H. Lawrence Groves at Vienna. The share capital of the proposed institution will be 10,000,000 pengos (\$1,750,000), according to the report, of which the State will subscribe 8,000,000 pengos and banks and industrial establishments 2,000,000 pengos.

#### Argentina Decides Against Renewal of \$12,000,000 Loan Because of High Money Rates-Repayment of Loan.

On Sept. 26 Buenos Aires advices (Associated Press) said: The Minister of Finance has instructed the Argentine Ambassador at Washington to cancel Treasury bonds amounting to \$12,000,000 expiring today. The Minister said that interest of 7½% asked by New York bankers to renew the loan, was too high.

A United Press dispatch from Buenos Aires is quoted as follows from the "Wall Street Journal" of Sept. 27.

Follows from the "Wall Street Journal" of Sept. 27.

President Alvear has signed a decree instructing the Argentine embassy at Washington to cancel the 12,000,000 peso loan which has fallen due and which J. P. Morgan & Co. and National City Bank had offered to renew for six months at 7½%.

The decree said such high rate of interest is not justified by Argentina's present credit standing and the renewal of the loan is therefore impossible. The statement added that President Alvear considers the present a convenient time in the interests of the country to liquidate the whole debt and consolidate it with another fund or substitute short term notes for it.

The repayment of the Argentine loan was noted as fol-

The repayment of the Argentine loan was noted as follows in the New York "Journal of Commerce" of Sept. 28:

The Argentine Government yesterday repaid its \$12,00,000 short term loan to J. P. Morgan & Co. Following a visit of the Argentine Ambassador to New York on Tuesday checks for the total amount were drawn on New York banks, in which Argentina held deposits, it was learned. The loan was a certificate and was not limited for public offering. offering.

offering.

The reports from Argentina of a gold export to repay the loan to be shipped on the Munson liner American Legion, which leaves Buenos Aires October 4, found no confirmation yesterday at the steamship office. It was stated that no advices have been received in New York of arrangements for a gold shipment.

Foreign exchange dealers stated yesterday that the Argentine Government having repaid its Morgan loan through an overdraft on New York banks might make up the sum through a gold shipment. The direct connection between a gold shipment and the house of Morgan was positively denied.

The Argentine Government has accumulated gold stock through the past year, and, according to agencies in touch with Argentine bankers, would be in a position to export gold. There are no restrictions on such shipments. The total gold holdings of the country are now above \$625,000,000. They were around \$560,000,000 a year and a half ago.

The first statement that gold is to be shipped came from Argentine newspapers Wednesdays. No official confirmation to these rumors has thus far been given.

thus far been given.

### American Loan to Finnish Bank.

From the "Wall Street News" of yesterday we take the following Oslo advices:

The National City Co. and Lee, Higginson & Co. of New York have contracted for a \$10,000,000 issue of 6% bonds of the Bostads Hypothek Bank of Helsingfors, at 94½. The issue runs for 33 years.

#### Danish Bank Closes its Doors.

Associated Press advices yesterday (Sept. 28) stated:
The Privatebanke, the second largest Danish private bank, failed to open its doors today. The bank has suffered heavy losses chiefly through interests in a German manufacturing plant. A conference which lasted all night at the Ministry of Trade failed to reach a basis for recon-

The bank's last statement showed a capital of 60,000,000 kroner (\$15,000,000), a reserve of 15,000,000 kroner (\$3,750,000) and a working surplus of 5,000,000 kroner (\$1,250,000).

#### Offering of \$20,000,000 Rhine-Westphalia Electric Power Corp. Bonds.

The National City Co. offered Sept. 26 at 94 and interest yielding about 6.49% a new issue of \$20,000,000 Rhine-Westphalia Electric Power Corp. consolidated mortgage 6% gold bonds, due Aug. 1 1953, with stock purchase rights for "American shares." A substantial amount of the bonds, it A substantial amount of the bonds, it is announced, has been withdrawn by Credit Suisse, Zurich, for Switzerland. The corporation, with its subsidiaries, comprises one of the largest electric light and power systems in Europe with respect to property value, earnings, capacity of power stations and number of customers. The territory served embraces a large part of the Rhineland, including the Ruhr District, the most important industrial section of Germany, with an area of approximately 9,360 square miles and a population of more than 8,000,000.

Each \$1,000 bond will carry a stock purchase right entitling the holder to purchase, after Jan. 1 1929, and on or before Aug. 1 1931, a certificate of the National City Bank of New York representing four "merican shares," each representing in turn the deposit with the trustee's agent in Berlin of 100 Reichsmarks, about \$23.80 par value of the common capital stock (bearer shares) of the corporation, fully paid and nonassessable. The price to be paid for each American share will be as follows: If exercised after Jan. 1 1929, and prior to Aug. 1 1929, \$50 per share; on and after Aug. 1 1929 and prior to Aug. 1 1930, \$52.50 a share; after Aug. 1 1930 and on or prior to Aug. 1 1931, \$55 a share, after which date the purchase warrants will be void. On the basis of the current market price of the German shares on the Berlin Stock Exchange, the equivalent quotation would be approximately \$50 per American share.

Proceeds from the sale of the bonds will be used to reimburse the corporation in part for expenditures in connection with important property additions, to provide funds for further acquisitions and for other corporate purposes. Further details regarding the offering are given in our "Investment News Department" on a subsequent page.

#### Offering of \$10,000,000 6% Bonds of Finland Residential Mortgage Bank-Books Closed.

A banking group headed by The National City Company and including Lee, Higginson & Co.; Guaranty Company of New York;; Brown Brothers & Co.; The New York Trust Company and Continental National Company offered on Sept. 28 at 941/2 and interest, yielding 6.40%, a new issue of \$10,000,000 Finland Residential Mortgage Bank first mortgage collateral sinking fund 6% gold bonds. A substantial portion of the issue has been withdrawn by European banks, including \$1,300,000 by Finlands Bank, Kansallis-Osake-Pankki and Nordiska Foreningsbanken, in Helsingfors, Finland. The books on that portion of the loan offered in the United States were closed at noon yesterday (Sept. 28), the bonds, it is stated, having been over subscribed. The bonds will be dated Sept. 1 1928 and will mature Sept. 1 1961. They wil lbe redeemable in whole or in part on any interest date after March 1 1933 on 30 day's notice at 100% of the principal thereof. The Trust Indenture will provide for a cumulative Sinking Fund, with semi-annual payments beginning immediately, payable either in cash of bonds of this issue. Cash payments will be applied to the redemption of bonds at 100%. The bonds will be in coupon form in denominations of \$1,000 and \$500, registerable as to principal only. Principal, interest (March 1 and September 1) and sinking fund will be payable in New York City in United States gold coin of the present standard of weight and fineness, without deduction for any present or future Finnish taxes, in time of war as well as in time of peace, irrespective of the nationality of the holders, at the head office of The National City Bank of New York, Trustee. Principal and interest will also be collectible, at the option of the holders, either at the city office of The National City Bank of New York, in London, England, in pounds sterling, or at the head office of Finlands Bank, in Helsingfors, Finland, in Finnish marks, in each case at the then current buying rate of such office for sight exchange on New York City, New York. Finlands Bank, Helsingfors, is Co-Trustee. In advices to the bankers floating the bonds Otto Stenroth, Chairman of the Board of Directors, and Arvo Linturi, Managing Director of the Finland Residential Mortgage Bank, state:

Finland Residential Mortgage Bank was established in 1927, pursuant to special legislation, to provide long-term credit on residential property in the cities, towns, boroughs and other urban districts of Finland. It is a mutual association composed of the property owners to whom loans are

granted and is not operated for profit. The association was formed with

granted and is not operated for profit. The association was formed with the active assistance of the Finnish Government, which contributed a guaranty fund consisting of its own 5% bonds to the principal amount of 100-000.000 Finnish gold marks (equivalent to \$2.518.500). Three of the seven members of the board of directors are appointed by the Government, and the approval of the Government is necessary for the amendment of the articles of association or the issuance of bonds.

The business of the association is restricted to the granting of mortgage loans not exceeding 55% of the appraised value of the property covered, represented by qualified mortgages, payable in gold. In addition to liability for their loans, the mortgagors, as members of the association, are, within the limits mentioned in the accompanying letter, jointly and severally liable for the debts and losses of the association, if any, and, as security for such liability, give to the association additional mortgages, payable in gold, for an amount equal to 10% of their leans in addition to, but ranking equally in lien with, the mortgages given in respect of their loans.

These bonds will at all times be secured by the specific pledge of qualified and additional mortgages (or cash or bonds of this issue, in lieu thereof) of an aggregate unamortized principal amount equal to the aggregate principal amount of these bonds outstanding. After Sept. 1 1943 these bonds must be secured by an equal amount of qualified mortgages (or cash, in lieu thereof), leaving the additional mortgages accompanying the latter pledged as excess security. Prior to this date additional mortgages may constitute not more than 9% of such specific security.

The bonds in common with other outstanding obligations of the association will have the further security of: (a) The joint and several liability of the association; and (c) the guaranty fund, consisting of the Finnish Government 5% bonds above mentioned

The articles of association limit the aggregate of the outstanding bond

its total habilities.

Mortgage institutions in Finland have granted long-term loans on urban residential property for the past 35 years; the records show that defaults have been extremely rare and that in every such case the security has been more than sufficient to enable the lender to recover in full.

#### Drawing of American Portion of Greek Refugee Loan of 1924.

Speyer & Co. announce that \$39,000 bonds of the American portion of the Greek Government 7% Refugee Loan of 1924 have been drawn for redemption at par on Nov. 1 1928. Of this amount, \$33,000 bonds were drawn for the regular semiannual sinking fund, and the balance of \$6,000 bonds out of additional funds received from the sale of land to refugees.

#### Proposed Hungarian Protestant Union Loan of \$5,000,000.

The floating of a \$5,000,000 bond issue of the Protestant Central Credit Union of Hungary which was to have been put on the market this week by E. H. Rollins & Sons and J. G. White & Co., Inc., has, we learn, been indefinetely postponed. The issue is in the form of 7% Thirty-five year sinking fund gold bonds, to be retired by semi-annual drawings at par. These bonds constitute the only funded debt of the Union. The Protestant Central Credit Union of Hungary is a corporation with membership in the Hungarian Central Mutual Credit Institute which is the central association of Hungarian mutual credit associations, and is controlled and supervised by the Hungarian Government. The Protestant Central Credit Union takes care of the financial requirements of the Hungarian Reformed and Lutheran parishes and it raises funds to be re-loaned for extensions of church properties, for purchases of income producing holdings and repayment of short-term obligations. These churches have been established for over 400 years and are permitted by law to collect taxes from the parishioners who constitute about 30% of Hungary's population. Total revenues of these churches amount to about \$5,140,000 annually and there is no record of default on the part of any Hungarian Protestant Church or community.

## Offering of City of Cologne Bonds in London

Higginson and Co., London, who purchased £1,150,000 6% 25-year Sterling bonds of the City of Cologne completed. Underwriting arrangements on Sept. 26 and the bonds were offered for sale on Sept. 27 at 951/2. ceeds of the loan will be used in the extension and development of the city owned electricity, gas and water works.

# Bonds of Republic of Peru Drawn for Redemption.

Holders of Republic of Peru, Peruvian National Loan, 6% external sinking fund gold bonds, first series, due Dec. 1 1960, are being notified by J. & W. Seligman & Co. and The National City Bank of New York, fiscal agents, that \$257,500 principal amount of these bonds have been drawn by lot for redemption on Dec. 1 next. Drawn bonds may be redeemed on or after that date at their principal amount at the office of J. & W. Seligman & Co., 54 Wall St., and The National City Bank of New York, 55 Wall St., New York. Interest on all drawn bonds will cease to accrue on Dec. 1 1928.

Bonds of Rio Grande do Sul (U. S. of Brazil) Drawn for Redemption.

The Equitable Trust Co. of New York, as fiscal agent has notified holders of State of Rio Grande do Sul (United States of Brazil) consolidated municipal loan 40-year 7% sinking fund gold bonds, due June 1 1967, to the effect that \$10,000 principal amount of these bonds has been called for redemption at par and accrued interest on Dec. 1, out of moneys in the sinking fund and available for such purposes. Payment on the drawn bonds will be made upon surrender at the office of The Equitable Trust Co. of New York, 11 Broad St., on Dec. 1, after which date interest on the drawn bonds will cease.

Bonds of U. S. of Brazil Drawn for Redemption.

Dillon, Read & Co., as American fiscal agents for the United States of Brazil, announce that \$239,500 principal amount of the country's 61/2% external sinking fund bonds of 1927, have been designated by lot for redemption on October 15 1928 out of the sinking fund. Payment will be made at par and accrued interest at the offices of Dillon, Read & Co. in New York; N. Y. Rothschild & Sons, London; Mendelssohn & Co., Amsterdam; Credit Suisse, Zurich or Aktienbolaget Svenska Handelsbanken, Stockholm.

Bonds of Department of Cundinamarca Drawn for Redemption.

J. & W. Seligman & Co., fiscal agent, is issuing a notice to holders of Department of Cundinamarca external secured 61/2% sinking fund gold bonds, due Nov. 1 1959, stating that \$60,000 principal amount of these bonds have been drawn by lot for redemption at their principal amount and accrued interest, on Nov. 1 1928 at the office of the fiscal agent, 54 Wall St., New York. Interest on drawn bonds will cease to accrue on Nov. 1.

Bonds of Kingdom of Belgium Drawn For Redemption.

J. P. Morgan & Co. and the Guaranty Trust Company of New York, as sinking fund administrators have issued a notice to holders of Kingdom of Belgium Stabilization Loan 1926 external sinking fund 7% gold bonds, due Nov. 1 1956, announcing that \$476,000 principal amount of the Londs of this issue have been drawn by lot for redemption on Nov. 1, next, at 105. Bonds so drawn will be redemed and paid on that date at the office of J. P. Morgan & Co., 23 Wall Street, or at the principal office of the Guaranty Trust Company of New York, 140 Broadway, New York. Interest will cease on all drawn bonds on Nov. 1.

Bonds of Czechoslovak State Loan of 1922 Drawn for Redemption.

Kuhn, Loeb & Co., the National City Bank of New York and Kidder, Peabody & Co. have issued a notice to holders of bonds of the Czechoslovak State Loan of 1922 that \$104,100 principal amount of the 8% bonds of the first portion of the loan due April 1 1951 and \$60,800 principal amount of the 8% series B bonds, due Oct. 1 1952, have been drawn by lot for redemption at par on Oct. 1 1928. Bonds so drawn will be paid on and after the redemption date at the offices of Kuhn, Loeb & Co., Kidder, Peabody & Co. and the National City Bank of New York. Interest on the drawn bonds will cease from Oct. 1.

# Credit of \$25,000,000 to Yugoslava Planned-German Concerns to Furnish It in Railway Materials —Part for Reparations.

Under date of Sept. 22 advices from Berlin to the New York "Times" stated:

York "Times" stated:

Two German concerns, the United Steel and the German General Electric, have about completed plans for giving Yugoslavia credits on purchases of railroad materials, rolling stock and electrical equipment from German firms to the amount of \$25,000,000.

Part of this sum will be charged off against reparations in kind due to that country, while the remainder will be guaranteed by German Government bonds from the Belgrade Government.

This deal is similar to one made with Russia several years ago giving purchasers of German manufactured goods long credits as a means of building up German export trade and stimulating industry. What it actually means is that American money lent to Germany will be relent to Yugoslavia at a slightly higher rate than was paid for on the New York markets by the German borrowers.

The original plan for selling on credit hinged on ability to raise a loan in New York covering the entire amount of the credit extended, though there is a probability now that this scheme may be changed to a much smaller sun, since part could be charged off against reparation payments in kind.

The terms as offered by United Steel and German General Electric,

The terms as offered by United Steel and German General Electric, known as A. E. G., call for 7% nominal interest, with 3% added for amortization and bank charges. The credits extend over a period of 10 years.

The political situation in Yugoslavia might prevent the conclusion of this deal at the present time, it was learned to-day from a Deputy of the Croatian Party now in Berlin. The Croatian, Dalmatians and Slovenes assert that they will not recognize any debts contracted by Belgrade, and should they come into power will take the Government in hand with a clean

slate, repudiating all obligations of the former regime.

Until the political status is firmer the contracts of the German concerns will not be signed, but as soon as assurance of solid government is given the agreement will be completed and carried out.

It was stated in previous advices from Belgrade (Sept 21) that the loan to Jugoslavia, of 100,000,000 gold marks, would run for 10 years at 7%,

#### Expected Withdrawal of Argentina from League of Nations-No Provision for Dues in Budget.

The following Buenos Aires advices are from the "Times": The following Buenos Aires advices are from the "Times": It is expected that the incoming administration will formally withdraw Argentina from the League of Nations, since the Chamber of Deputies which the President-elect's party controls has eliminated from the budget of 1929 an item providing 500,000 pesos for payment of dues.

Congress has approved this item yearly since 1923 but has never ratified Argentina's membership, and the country has never been officially represented at the League meetings. Since President-elect Irigoyen withdraw the delegation and support in 1920 during his first Presidency.

President Alvear, his successor, was a strong supporter of the League but was unable to obtain congressional approval or withdrawal.

President Alvear, his successor, was a strong supporter of t but was unable to obtain congressional approval or withdrawal.

#### Bonds of Republic of Chile Drawn for Redemption.

The National City Bank of New York, as fiscal agent, has issued a notice to holders of Republic of Chile 20-year 7% external loan sinking fund gold bonds, due Nov. 1 1942, to the effect that \$229,000 aggregate principal amount of the bonds has been drawn by lot for redemption at par on Nov. 1 out of sinking fund moneys. Payment on the drawn bonds will be made Nov. 1 at the head office of the National City Bank of New York, 55 Wall Street, after which date interest on the drawn bonds will cease.

#### Early Action on Recommendations of Attorney General Ottinger's Committee to Combat Loan Sharks Urged by President Roome of Excelsior Savings Bank.

Action as soon as possible by the State Legislature to carry out recommendations of Attorney General Ottinger's committee on the loan shark problem is urgently needed to combat the evil, declares Reginald Roome, President of the

combat the evil, declares Reginald Roome, President of the Excelsior Savings Bank of New York. Mr. Roome says:

The only permanent way to put the loan shark out of business is to make it just as easy and confidential for the small borrower to get a loan from some legitimate source. Attorney-General Ottinger's committee has done the masses of the people of the State a great service in studying their problem considerately and constructively.

The committee points the way to the real solution in designating the savings banks as media for lending to small borrowers on a business basis. The 149 savings banks of the State, serving over 4,800,000 depositors, are strategically located and effectively organized to give the small borrower all the necessary service, and ample funds are available. The people have learned to have the utmost confidence in the savings banks and it is the duty of the State to help them express that confidence in time of need.

ings banks and it is the duty of the State to help them express that confidence in time of need.

More important even than that is the fact that the savings banks are the only institutions organized exclusively for the purpose of transforming the borrower into a saver. For decades the mutual savings banks have developed an efficient administrative system for collecting and investing small savings. Costs of administration have been reduced to a minimum and depositors benefit by absolute safety and a high interest rate which in recent years has frequently exceeded the return from highly speculative securities. The Excelsior Savings Bank, for instance, has just declared a dividend increasing its rate to 4½%.

It is high time that public attention be turned to the small borrower who needs help in the time of dire personal distress. Our banking machinery and resources have been too much diverted to the stock market borrower. It is significant and not reassuring that the volume of brokers' loans by New York City banks now exceeds the total of all deposits in all the savings banks of the State. No attention has been paid to the fact that last April, for the first time, the volume of brokers' loans by 61 Federal Reserve member banks in New York City passed the savings bank total. Brokers' loans at the end of April stood at \$4,282,000,000 while all the thrift of all the savings bank depositors in the State had accumulated \$4,262,000,000. There should therefore be available adequate funds for the man who is frighting illness, debts or other misfortune as well as the man who is struggling with the ticker tape.

The committee's report to the Attorney General was

The committee's report to the Attorney General was referred to in our issue of Sept. 15, page 1474.

#### New Quotation System to Be Inaugurated on New York Stock Exchange Oct. 1-Telephone Stations to Be Operated in Connection with Certain Posts.

The intention of the New York Stock Exchange to put into operation on Monday next, Oct. 1, a new quotation system was made known by the Committee of Arrangements on Sept. 27. Through the new system, says the "Times," member firms will be enabled to obtain quotations from the floor of the Exchange without delay, even during times of heaviest trading, will be placed in operation on The paper quoted likewise said:

Monday. The paper quoted likewise said:

At the beginning the system will be in operation only at Posts 3, 8, 15, 16, 11 and 23, but eventually it will be extended to all posts.

Among the active stocks that will be served, starting Monday, are Chrysler, Erie, Studebaker, Armour, General Gas and Electric, New York Central and Paramount.

The announcement of the Committee of Arrangements

follows

To the Members of the Exchange: The new quotation system with

To the Members of the Exchange:

The new quotation system with which the Committee of Arrangements has been experimenting for some time will be placed in operation on Monday, October 1, 1928, at Posts 3, 8, 15, 16, 22 and 23.

At each of these posts there will be telephone stations in charge of clerks who will report the bid and asked quotations for every stock at that post as the market changes to operators at quotation boards in a central room, which boards will be connected through switch-boards to stations at the end of the telephone booth sections on the

in a central room, which boards will be connected through switch-boards to stations at the end of the telephone booth sections on the

floor.
Requests for quotations should be sent from members' offices over their board wires to their telephone clerks on the Floor in the customary manner. Members' telephone clerks who receive requests from their offices for quotations will hand the slip to the quotation clerk in charge of their telephone booth. That clerk will make a connection with the central quotation room, from which he will instantly secure the desired quotation and give it to the member's telephone clerk for transmission back to the office. Requests for quotations from posts which are served by the new quotation system must not be sent through the tubes. The Exchange will not assume responsibility for any mistakes that may be made by its employees in quoting stocks, or through the use of the quotation system.

It is planned later to extend the system to every post, and ultimately to connect the central operating room by wire with members' offices, so that quotations may be directly obtained by members from their offices.

their offices.

The Committee believes that the new system will prove of great advantage to all member firms and their customers and will appreciate receiving your cooperation and that of your employees.

Very truly yours,

COMMITTIEE OF ARRANGEMENTS.

#### R. L. Bamford, New York Stock Exchange Superintendent of Telegraph and Reporters, Retires.

Richard L. Bamford, for thirty years superintendent of telegraph and reporters on the Floor of the New York Stock Exchange and for a number of years the man who twice each day has sounded the gong which opened and closed business on the Exchange, will retire from active duty on October 1. Mr. Bamford, who is 64 years of age, first began his work on the Floor of the Exchange as a telegraph operator for the Commercial Telegram Company, a ticker service which was then operated in competition with the Gold & Stock Telegraph Company.

During the forty-five years of active duty in the reporting of securities quotations, Mr. Bamford has seen transactions mount from forty thousand shares a day to more than five millian shares; he has seen the price of Stock Exchange seats rise from \$14,000 to \$415,000, and the number of stocks cleared through the Clearing House from ten to more than four hundred. He has served through the administrations of sixteen presidents of the Exchange from Alfred S. Hatch to E. H. H. Simmons, and has known many of the great speculative figures of a generation ago whose names have carried through the years and who are remembered today as the greatest leaders of their day.

#### Members of New York Produce Exchange Indorse Plans for Security Trading.

At the New York Produce Exchange yesterday (Sept. 28) the ballot on New By-Laws empowering the Board of Managers to make rules and otherwise establish trading in securities resulted almost unanimously in favor of the By-Laws proposed. There were only two votes against the proposal. William Boatty, President of the Exchange, said: "The active interest taken by members was particularly gratifying. The officers of the Exchange were pleased to greet members who had not visited the Exchange for quite some time, but in their enthusiasm for trading in securities on the Exchange, made it a special point to be present and vote today."

The floor of the Exchange is assuming an entirely new appearance with the locating of the telephone booths and other furnishings for the New Securities Department. Working out the details of organization and collection of data for the Securities Trading some time, it is stated, is still required for the completion of the rules and regulations and also to provide additional needed facilities for the new activities on the Produce Exchange. Reference to the proposed move was made in these columns June 2, page 3389, and Sept. 22, page 1602.

#### W. D. Moore & Co., Former New York Stock Exchange House, in Bankruptcy.

On Sept. 20 an involuntary petition in bankruptcy was filed in the United States District Court by petitioning creditors against the former New York Stock Exchange Exchange house of W. D. Moore & Co. of 71 Broadway. The petition is filed against the partners, Harry M. Curtiss, Spencer Wyman Aldrich, Ernest V. Clark and Norman W. Halliday,

who traded under the name of W. D. Moore & Co., according to the "Wall Street News" of the same date. the creditors amounted to a little over \$60,000.

W. D. Moore & Co. failed on Aug. 9. The firm was automatically suspended from the New York Stock Exchange on the same day, when it notified the exchange of its inability to meet its engagements. Subsequently Thomas A. Mc-Grath was appointed receiver. The last reference to its affairs appeared in our issue of Sept. 1, page 1191.

Governor Young of Federal Reserve Board Says Conditions Over Most of Which System Has No Control Form Basis of Reserve Bank Credit Policies and Rates-If Overindulgent Are "Burnt" They Must Shoulder Blame—\$300,000,000 Additional Reserve Credit Needed Before End of Year.

Addressing the Indiana Bankers' Association at Gary Ind., on Sept. 20 Roy A. Young, Governor of the Federal Reserve Board, declared that "the Reserve Banks are functioning just as the law intended that they should function." He also made the statement that "many people in America seem to be more concerned about the present situation than the Federal Reserve system is. If unsound credit practices have developed" he continued "these practices will in time correct themselves, and if some of the over-indulgent get burnt' during the period of correction, they will have to shoulder the blame themselves and not attempt to shift it to some one else." Toward the end of his address Governor Young likewise asserted that "it is reasonable to believe from what I have cited that conditions, over many of which the system has no control, form the basis of Reserve Bank

the system has no control, form the basis of Reserve Bank Credit policies and rates." His address, presented under the title "Present Credit Conditions" is reproduced as follows from the "United States Daily."

Representatives of Federal Reserve banks have appeared before audiences so many times to describe currency, discount, and other operations of the system that to-day I am going to digress somewhat and talk about the present credit situation. This is a large subject, but inasmuch as I am speaking to an audience that is quite familiar with banking practice, I feel I will be able to get over to you a concise story in the time that has been allotted to me.

feel I will be able to get over to you a concise story in the time that has been allotted to me.

In order to bring the picture up to date, it is necessary to review what has happened during the past eight years. Gold is the basis of our credit structure, and while the gold standard, perhaps, has some faults, it is the best basis that has yet been devised and public faith in its efficiency has been demonstrated conclusively during the past five years by the willingness and eagerness with which many countries have returned to some form of gold standard. All that has happened for the past eight years, therefore, can best be reviewed by referring to gold movements.

Gold Sent to America.

#### Gold Sent to America.

Gold Sent to America.

Since September 1920, and up to December 1924, gold flowed into the United States continuously, the net important movement for the period aggregating approximately \$1,660,000,000. From September 1920, to the spring of 1922, the gold received from abroad was used largely by member banks to reduce their borrowings from the Federal Reserve banks and thus improve the general condition of the member banks and the reserve position of the Reserve banks. Generally speaking, gold received during this period did not, therefore, become a part of the reserves of member banks and did not form the basis of credit expansion.

Between 1922 and 1924 gold imports were sufficient to meet the country's growing demand for currency, and in addition to increase the reserves of member banks which were thus enabled to expand their loans and investments without increasing their borrowings at the Federal reserve banks. From 1924 to the spring of 1927 the gold imports just about offset gold exports, so that the total increase in gold holdings of our country between September 1920 and the spring of 1927 aggregated, as I have stated before, approximately \$1,660,000,000.

With this addition to the gold basis, through the inverted pyramid principle of credit, banks were able to expand tremendously. All of this growth, however, could not go into the old-fashioned forms of credit based upon production and distribution otherwise known as eligible paper, and the investment credit market.

\*\*Investments Expanded\*\*.\*\*

With this stimulus and to seek other forms of credit. Naturally they turned to the investment credit market.

Investments Expanded.

With this stimulus and support from the banks throughout the country, the investment bankers accepted the opportunity and financed not only new enterprise by long-time credits, but old established enterprise as well, with the result that the proportion of eligible paper diminished in the portfolios of the banks withit the proportion of investment credit held by the banks increased rapidly. For all of the banks of the United States as of June 30 1928, the figures are approximately as follows:

United States Government bonds, \$6,000,000,000; other stocks and bonds, \$12,000,000,000; loans on securities (of which amount \$3,000,000,000,000; security, \$5,000,000,000; loans to customers (of which amount it is estimated that approximately \$5,000,000,000 is eligible paper held by member banks) \$20,000,000,000; total loans and investments, \$56,000,000,000.

There has been some complaint of late that investment and speculative credit have not received their proportion of the bank credit available, but it seems to me from these figures—when you add the total amount of bonds to the total amount lent on securities and arrive at the total of \$31,000,000,000,000—that these forms of credit have been treated liberally by the banks. All of this expansion of credit, up to May 1927, was accomplished without increasing the amount of Federal Reserve credit; because the figures show that except for seasonal and holiday currency requirements, the total assets of the Reserve System have continued around \$1,000,000,000,000 since 1922.

Gold Movement Reversed.

In May of 1927, however, something happened to which the American business public and financial interests did not attach sufficient importance. This was a reversal in the direction of gold movements. From May until the early part of November the Reserve System offset the exports of gold

by purchases of United States Government securities, feeling that the time was not opportune to disturb our own domestic situation when the regular seasonal agricultural requirements were on and stabilization plans for some of our foreign friends were not completed—and stabilization of foreign currencies, indirectly, was of great importance to our domestic situations.

During November and December, when gold cotinued to flow from this country, the System did not offset the export movements. This should have had the effect of retarding the rapid growth of credit, but it did not, largely because any increase in Federal Reserve Bank credit at that time was interpreted by the banks and the public as being in response to customary seasonal requirements, even though it had gone \$200,000,000 higher than the year before.

before.

The return flow of holiday currency in the latter part of December and early part of January was greater than it had been in any year for five years, and therefore the System sold additional Government securities to partly offset this return flow. Gold holdings changed but little during the months of January and February, but credit expanded at more than the normal rate, and certainly there was no evidence that this additional credit was required for business.

#### Bank Loans Explained.

There is an impression in the minds of many people, including some bank-There is an impression in the minds of many people, including some bankers, that a member bank deliberately borrows from its Reserve Bank
at a low rate to enable it to lend at a higher rate solely for the profit in the
transaction. I have been associated with the System for ten years, and I
can say without fear of contradiction that this seldom happens. What
does happen generally, however, is this:

A member bank accumulates deposits in the ordinary course of its business,
and, if it expects to continue its business at a profit, it must employ those
funds almost instantaneously in the credit field that offers the best rates
consistent with safety. Later it has a reduction in deposits and must

runds almost instantaneously in the credit field that offers the best rates consistent with safety. Later it has a reduction in deposits and must replenish its reserve in one of two ways. One is by borrowing from the Federal Reserve Bank, and the other is by selling some of its readily marketable assets. In the great majority of cases the member bank which has wide fluctuations in its deposits borrows from the Reserve Bank. By doing this the bank avoids disturbing its portfolio and uses the Reserve Bank for the legitimate purpose of bridging over a temporary shortage in

reserves.

Naturally, when the rediscount rate is low and the open-market rate high, there is an incentive for the banker to continue to borrow rather than to curtail his investments. When this practice becomes simultaneously general it furnishes one reason, but only one, for raising the rediscount rates.

There was evidence of this in February, with the result that a 4% rate was initiated by the directors of the various Federal Reserve Banks. However, the credit continued to expand and the banks continued to borrow from the Federal Reserve Banks on rediscounts to make up the loss in gold and the sale of Government securities. No one particular bank was in debt any great length of time; in fact, the information we have in Washington is that the bank that borrowed to cover a loss of deposits got out of debt by liquidating some of its ineligible assets.

When it did so, however, directly or indirectly, it made it necessary for some other bank to borrow and so the borrowings of member banks were passed around from one bank to another withour reducing the total indebtedness of the member banks to the Federal Reserve Banks, but on the con-

edness of the member banks to the Federal Reserve Banks, but on the con-trary, increasing it.

Again, in April, the directors of one of the Federal Reserve Banks initiated

Again, in April, the directors of one of the Federal Reserve Banks initiated a rediscount rate of 4½%. This was eventually followed by all of the other Reserve Banks. By June the member banks owed the System approximately \$1,000,000,000 upon rediscounts and were in a position where they could not get out of debt so readily by shifting the load from one bank to another; in fact, the load centered mostly in the larger cities.

There was a rapid increase in discounts in the latter part of June and also in July, some of which, of course, represented currency requirements, but the increase had the earmarks of further pyramiding of credit and not of being the old-fashioned credit based upon production and distribution, with the result that some of the Federal Reserve Banks, where many of their member banks were heavy borrowers, initiated a rediscount rate of 5%. This action, however, was not taken in the four strictly agricultural districts west of the Mississippi River where a 4½% rate is still maintained, largely because the member banks were not heavy borrowers and because it was at the time of the year when legitimate seasonal agricultural requirements had to be met. ments had to be met

From June up to the present time there has been but little change in the gold holdings of the United States. The System has not sold additional Government securities since that time and has undertaken no open market

Government securities since that time and has undertaken no open market operations, except of a temporary nature.

To summarize, the banking system of America built up a credit structure by resorting to the inverted pyramid principle of credit on \$4,600,000,000 of gold which we held in May 1927, and to-day, on \$4,100,000,000, it is not only supporting that credit structure but a much larger one. This is shown by the June 30 reports of member banks which indicate an increase above last year of \$2,500,000,000 in loans and investments. To support this credit structure, member banks have found it necessary to increase their borrowings at the Federal Reserve Banks approximately \$500,000,000.

From this it seems to me that the Reserve Banks are functioning just as the law intended that they should function. Miscalculations as to the future always have and perhaps always will occur with the banks and the business public and that is one of the reasons why we need Reserve banks; in other words, institutions which enable the public to adjust their miscalculations in an orderly and systematic way.

So many factors have an influence on banking that it is a mistake to arrive at the conclusion that the Federal Reserve System alone, through its policies, makes credit situations. It is reasonable to believe from what I have cited that conditions, over many of which the System has no control, form the basis of Reserve bank credit policies and rates.

form the basis of Reserve bank credit policies and rates.

Many people in America seem to be more concerned about the present situation than the Federal Reserve System is. If unsound credit practices have developed, these practices will in time correct themselves, and if some of the over-indulgent get "burnt" during the period of correction, they will have to shoulder the blame themselves and not attempt to shift it to someone else.

## Conditions Affect Policies.

Great concern is expressed over the mystery of Federal Reserve policies. Dissatisfaction is expressed because the Federal Reserve System refrains from prediction and can not always anticipate. I have stated to you that conditions, to a large extent, bring about Federal Reserve policies rather than that Federal Reserve policies bring about conditions. That is just the posi-tion of the System at the moment.

If past experience means anything, we know that the additional Reserve

credit needed between now and Dec. 31 will aggregate approximately \$300,000,000. This will come from the usual seasonal requirements of agriculture and business. It is the expectation of the System that this additional credit will be secured by the member banks rediscounting without hesitancy to take care of these requirements and that they will lend to their customers at reasonable rates.

It further expects that this additional Reserve credit will not be used in further expanding a bank credit situation that grew up when our gold reserves were \$500,000,000 larger than they are now and which has continued to grow while the reserves have been shrinking.

If after January, 1929, following the return flow of holiday currency, the banks still owe the System approximately \$1,000,000,000 in rediscounts, I, personally, will feel that the situation has been handled admirably, and I shall have no cause for concern, because with the tradition which the member banks have about borrowing continually from the Federal Reserve System, a debt to the System of \$1,000,000,000 will have a more modernating effect upon the too rapid growth of bank credit than any other single condition that I know of.

#### Forthcoming Treasury Offering-Financing to Complete Redemption of Third Liberty Loan Bonds.

Announcement of plans relative to an early offering of a new Treasury issue was made on Sept. 26 by Secretary of the Treasurer Mellon, who indicated that the purpose of the proposed Government securities would be to complete the redemption of the outstanding Third Liberty Loan bonds. The Secretary's announcement follows:

Secretary Seminumeement follows.

Secretary Mellon to-day announced that, in accordance with established procedure, notice has been given to the banks of the country, through the Federal Reserve Banks, that there will be an effering of Treasury securities early in October. This new issue will complete the program of financing occasioned by the maturity of the Third Liberty Loan on Sept. 15 iast.

Experience has demonstrated that in the case of the long-term war issues, which were widely distributed, maturing bends are not all presented

issues, which were widely distributed, maturing bends are not all presented on the maturity date, but a large number are presented for redemption over a considerable period of time.

In the case of the Third Liberty Loan bonds, \$955,000,000 were outstanding on Sept. 14. Only \$475,000,000 were presented on Sept. 15, and up to and including Sept. 25, \$733,000,000 had been presented.

Accordingly, in order to avoid borrowing in excess of actual needs and to save unnecessary interest charges, the Treasury Department on Sept. 15, in connection with its usual quarterly financing, made provision for the redemption of such Third Liberty Loan bonds as might reasonably be anticipated would be presented for payment prior to Oct. 15. The October issue of securities, which in amount will be substantially smaller than the offering dated Sept. 15, is intended to furnish the necessary funds to redeem the Third Liberty Loan bonds still outstanding, as well as to provide for the financial needs of the Government up to Dec. 15 1928.

The September offering of \$525,000,000 4½% Treasury

The September offering of \$525,000,000 4½% Treasury certificates of indebtedness was referred to in our issue of Sept. 8, page 1339, and last week (page 1605) we gave the figures of subscriptions and allotments. The "Herald-Tribune" of yesterday (Sept. 28) commenting on the proposed issue said in part:

posed issue said in part:
Government bond experts are of the opinion that the coming issue will be dated Oct. 15, will be from \$200,000,000 to \$250,000,000 in amount, and will have to bear at least 4½% interest, and possibly 4¾ or 4¾%. As usual, the market conditions which prevail just before the announcement of the offering, expected around Oct. 8, will determine the int. rate. Inquiry in banking circles revealed that banks expect better deposit privileges with the coming issue than accompanied the Sept. 15 offering of \$550,000,000 4½s, and that this might bring more heavy subscriptions for the new issue. Government deposits in New York banks, recently created by their subscriptions to the Sept. 15 certificates, have been rapidly withdrawn by the Treasury for the redemption of Third Liberties. Yes-

created by their subscriptions to the Sept. 15 certificates, have been rapidly withdrawn by the Treasury for the redemption of Third Liberties. Yesterday's Federal Reserve statement shows Government deposits with New York City reporting banks at \$44,528,000 as against \$126,934,000 for the same week of 1927.

Surprise at the announcement of a new issue was expressed in some quarters in view of the statement of Secretary Mellon in connection with the previous issue that "the final redemption of the third Liberty loan brings to a close the vast operations begun by the Treasury in 1927.". Yesterday's statement set forth, however, that "this new issue will complete the program of financing occasioned by the maturity of the third Liberty loan on Sept. 15."

The 4½% certificates dated Sept. 15, are now selling at a discount. They closed yesterday at 99 28-32 bid, 99 30-32 asked. This makes their yield 4.59% as against their offering price, which made the yield 4½%. It is for this reason that bond experts feel that the impending issue may carry an interest rate of 45%%.

ary an interest rate of 45%.

Bond circles are confident that the issue will be the last before the Dec. 15 refinancing operations. At that time three issues, aggregating about \$824,000,000, mature, and another refinancing operation is in prospect. About \$97,000,000 interest on foreign debts is due the United States at that time, and with tax payments and other quarterly settlements the turn-over is expected to come close to \$2,000,000,000.

The following notice of the forthcoming issue has been sent by the New York Federal Reserve Bank to the banking institutions of this District.

### FEDERAL RESERVE BANK OF NEW YORK.

New Treasury Issue.

New Treasury Issue.

Preliminary Notice of Offering and Methods of Filing Subscriptions.

To All Member Banks, State Banks, Trust Companies and
Savings Banks in the Second Federal Reserve District:

From advices received from the Treasury Department of the United States, this bank is enabled to transmit to banking institutions in this dis-

trict the following information:

1. That a Treasury offering may be expected shortly.

2. That the subscription books may be closed by the Treasury without

2. That the subscription books may be closed by the Treasury without advance notice, and therefore,
3. That each subscribing bank, upon receipt of information as to the terms of the Treasury offering (either in the press, through the mails or by telegram) should promptly file with the Federal Reserve Bank any subscriptions for itself and its customers. This is important, as no guarantee can be given as to the period the subscription books may remain open, and subscribing banks, even before receipt of official subscription blanks, may file their subscriptions by telegram or by mail with the Federal Reserve Bank. Any subscriptions so filed by telegram or mail in advance of receipt by subscribing bank of subscription blanks furnished for the particular issue should be confirmed immediately by mail, and on the blank provided, when such blank shall have been received.

4. That if the terms of the offering when announced provide for both cash subscriptions and subscriptions for which payment may be tendered

in other securities, the subscribing bank should prepare its subscriptions in such manner as to indicate the method by which it proposes to make payment and the respective par amounts of securities, if any, to be tendered in

Classification of Subscriptions, &c.

Bank Customers' Subscriptions.—With regard to issues, subscriptions to which the Treasury determines for the purpose of allotment shall be considered as on a cash basis irrespective of whether or not payment is to be made in cash or in securities, the following classification will be required of subscriptions made for account of customers, stating the number of subscriptions in each classification will be required. subscriptions in each class:

of subscriptions made for account of customers, stating the number of subscriptions in each class:

Class A—Subscriptions for \$1,000 or less for any one subscriber;
Class B—Subscriptions for over \$1,000, but not exceeding \$10,000;
Class D—Subscriptions for over \$1,000, but not exceeding \$50,000;
Class E—Subscriptions for over \$50,000, but not exceeding \$100,000;
Class E—Subscriptions for over \$500,000, but not exceeding \$500,000;
Class G—Subscriptions for over \$500,000, but not exceeding \$500,000;
Class G—Subscriptions for over \$1,000,000.

Where the maturing securities are not by the instructions accompanying the offering given a preference they shall be treated as cash and such subscriptions to be paid for in securities should be included in the classification.

Bank Subscriptions.—A subscription for a bank's own account should not be included in the above classification of subscriptions for account of customers but should be clearly indicated as for the bank's own account and in addition to subscriptions for customers.

Subscriptions Not Classified.—Where under the terms of an offering or under instructions accompanying an offering, the Treasury agrees to allot new securities in full for any of its securities maturing on the date of the new issue or on any later date, subscriptions to be paid for in such securities should not be classified.

Application Forms to Be Furnished.

#### Application Forms to Be Furnished.

Application Forms to Be Furnished.

When the terms of the offering are announced, notice thereof, together with subscription blanks, will be mailed promptly by this bank to banking institutions in this district. Should notice and subscription blanks for any reason be delayed in reaching such institutions this bank will nevertheless receive subscriptions either by letter or telegraph. It is suggested that subscriptions be promptly transmitted to this bank.

If it be found necessary to telegraph subscriptions they should be confirmed immediately either by letter or on subscription blank, setting forth the classifications indicated above and method of payment, and clearly stating that the confirmation is not an original subscription so that duplication may be avoided.

Very truly yours, BENJ. STRONG, Governor.

Senator Pine To Protest to Federal Reserve Board Against Policies Affecting Small Agricultural Banks.—Seeks Cessation of Policy of Deflating Banks in Farm Areas.-Money Assembled for New York Use, Is Claim.

The following advices from the Washington correspondent of the New York "Journal of Commerce," under date of

Sept. 21 were published in the Sept. 22 issue of that paper:
Charging that the bank examiners, eperating under instructions from the Government in Washington, are "running the small banks in the agricultural sections," Senator W. B. Pine of Oklahoma is carrying a protest to deficials of the Federal Reserve Board and officials of the Treasury. In conferences which he is negotiating, Senator Pine will present a demand that the Government cease its policy of deflating the banks in the agricultural areas, which, he declared to-day, have shown no signs of diminution since its inception in May 1920.

the Government cease as policy of the shown no signs of diminution since lies inception in May 1920.

Senator Pine has brought with him to Washington data showing the movement of money stores in the smaller banks of the West and Southwest, the trend being away from local financing to investments in bonds and other securities. He is demanding that the office of the Comptroller and the Federal Reserve Board reverse their instructions to the bank examiners, which, he said, literally are "to clean the banks out."

How well these instructions have been followed, Senator Pine said to-day may be seen in the balance sheets of the smaller banks. He cited the affairs of one institution having \$1,000,000 in deposits, which on May 4 1920, had loaned to its customers \$235,000, which amount had been reduced Dec. 31 1927, to \$42,000. In 1920 it had no money on call, to money tied up in other than United States bonds, and it held no commercial paper. In 1927 it had \$185,000 in commercial paper, \$131,000 in other than Government bonds and \$130,000 in call loans.

### Would Stop Drain.

Another bank, he said, with about \$1,750,000 in deposits, had none of its money in outside commercial loans in 1920, but at the close of 1927 it had \$617.000 thus invested. On the other hand, in 1920, its local loans and discounts to its own customers were \$646,682, while at the later period they were but \$275,000. Its holdings in bonds and warrants went from \$28,326 to 1920 to \$468,723 in 1927.

were but \$275.000. Its holdings in bonds and warrants went from \$28,326 in 1920 to \$468,783 in 1927.

Senator Pine pointed out that it was easy to see what was being done. He charged that the money is being assembled locally in the agricultural centers for use in New York City. It is not the money that comes to these small banks that is intended for investment purposes, but it is the money that normally is the circulating medium of the territory, he asserted. He explained that when the loans were called the result was a contraction of local industry. He wants the Administration to slow up this draining of the agricultural sections.

Asked as to the value of the paper that is being called by the banks, Senator Pine declared the paper is good until the Government says it is bad. The Government, he asserted, has control of all of the credit of the United States; when it says paper in a given bank is bad then it cannot be good paper. However, the bankers in the section involved hold a different idea, and should the Government change its viewpoint they believe it "would be the best paper in the United States."

The Oklahoman related how the examiners would enter a bank and devented the content of the content the content of the content o

ent idea, and should the Government of the United States."

"would be the best paper in the United States."

The Oklahoman related how the examiners would enter a bank and denominate this or that plece of paper as being too slow, and then there is a demand that it be taken out of the institution. It is mercantile paper and loans to farmers largely involved and, he added, under pressure from Washington, this class of credit is being reduced in the less densely populated areas until it is fast reaching a minimum. Senator Pine expressed the epinion that in the larger centers the more powerful banks would not listen to the same kind of dictation that the smaller institutions were forced to submit to.

#### Refers to Testimony.

Senator Pine referred to-day to the testimony before the Senate Committee on Banking and Currency incident to its investigation of the brokers' loan situation last spring. It was brought out at that time that many

country bankers were professing that they were being forced into the stock market, or into the investment market, either as buyers of securities or as lenders on such collateral. These loans were said to have been carried because the banks could not get enough business at home, the real fact in the case being that changes of methods automatically deprived them of loans that they need at home, and diverted their resources into an entirely different kind of loan, it was declared.

Reference has been made to testimony before the committee by Dr. H. Parker Willis, as a banking expert, wherein he stated that a bank is a public service corporation, with one of its functions that of shifting capital into the various lines in which it ought to go. "A wisely managed able bank," he said. "is one which gives to every man, according to his necessities, and withholds from every one capital when he is not likely to use it, on the whole for the best interests of the community.

"If a business is not doing weil, or is not wisely handled," said Dr. Willis, "the banker's duty is to shut down on its credit until changes are made there." With this Senator Pine is in accord. What he is aiming at is the movement away from the locality of depositors of funds that would ordinarily be available for the use of local industry—the merchant and the farmer—and not be bottled up for the use of interests in distant parts of the country.

"The result of the deflation operations of the Government in my local-

—and not be bottled up for the use of interests in distant parts of the country.

"The result of the deflation operations of the Government in my locality," declared Senator Pine, "and I can speak for other agricultural areas, is that the small business men, their loans recalled, have had to curtail their activities and reduce their stocks. Some have folded up their tents and departed from the business world; others have cut their floor space in half and the released space either is vacant or utilized by a chain store whose money receipts are exported to the main offices of the operators.

"The operation of the deflation policy has gone far enough now, in my opinion. I am going to present these facts and views to the authorities here and when Congress reconvenes I am going to seek the enactment of legislation that I believe will help meet the situation complained of. For one thing, I would have each of the Federal Reserve districts represented on the Board, on the theory that with representation the needs of each locality will be fully known to the board. Prior to 1926 six of the then sitting eight members were from the Northeastern quarter of the United States and to my mind they administered the law so that it met the interests of business in the territory from which its membership came, a territory in each instance where they were fully advised as to existing conditions."

#### Alfred du Pont Indicates His Support of Herbert Hoover for President-Samuel Vauclain, Daniel Guggenheim and George Eastman Also Voice Approval of Republican Candidate.

Some of those who have declared themselves in favor of Herbert Hoover, the Republican candidate for President. are Samuel Vauclain, President of the Baldwin Locomotive Works, George Eastman, of Rochester, N. Y., Daniel Guggenheim, of Guggenheim Brothers, and E. I. du Pont, the last named said to be one of the largest individual stockholders in E. I. du Pont de Nemours & Co. An announcement to the effect that in a cablegram from Europe Sept. 21, Mr. du Pont announced that he would vote for Mr. Hoover was contained in a Wilmington, Del., dispatch to the "Times" from which we quote the following:

the "Times" from which we quote the following:

"As I view the present campaign," Mr. du Pont said, "the paramount issue which overshadows all others is national prosperity. American business must continue on the sound economic basis on which it now rests and whatever small disturbances are in evidence must be straightened out.

"Mr. Hoover is a man who can iron out whatever economic problems exist and direct governmental affairs in such a way as to keep American business and the American standard of living on the present high plane.

"Mr. Hoover is a self-made man, who has risen from the ranks, not by the aid of some mighty organization back of him, but by his own efforts and upon his own merits. During the great World War and since then Hoover has had his finger on the pulse of American life, and he knows from first-hand knowledge of the problems which must be met by the man who is elected to the Presidency in November."

Pierre S. du Pont, Chairman of the board of the du Pont Company, has declared for Governor Smith and Lammont du Pont, President of the company, has announced for Hoover. Irenee du Pont, another official of the company, several weeks ago described the Republican Party's stand on prohibition as "cowardly," but added he hoped something would happen "between now and election day which will permit me conscientiously to vote the Republican ticket again."

Mr. Vauclain announced that he would support Mr.

Mr. Vauclain announced that he would support Mr. Hoover in the following statement made public at Washington, Sept. 15:

ington, Sept. 15:

"Upon my return from South America I wish to state my reasons for supporting Mr. Hoover for the Presidency.

"Mr. Hoover possesses all those qualities necessary to insure a safe, aggressive and intelligent administration to the affairs of this Government. He has served his country faithfully and efficiently in every position of trust assigned him, and has made the office held by him under the present Administration of the greatest value to our country.

"Mr. Hoover is an engineer of world-wide acclaim. His judgment has been practical in all things, and under the greatest stress he has always been tranquil, determined and successful. He is a gentleman, a scholar, an executive, and at all times his head is level and firmly set upon his shoulders.

shoulders.

"He is the ideal man to deal with the more important matters pertaining to the continuation of our present position among the nations of the world. In every country I have visited his name gives confidence in everything to which it may be attached.

"The protective tariff, the needs of agriculture, corporation rights, governmental control, reduction of the national debt, reduction of taxes, are, in my judgment, the most important matters for consideration during the next administration.

administration. "Prohibition, however, has been thrust into this campaign, and it is expected by the opponents of prohibition that the defeat of Mr. Hoover will cause the Eighteenth Amendment to be stricken from the Constitution. Prohibition is a delusion and a snare in so far as the issues of this campaign for President of the United States are concerned. "I am opposed to any retrograde movement. 'I have been interested in Mr. Hoover for many years because of his ability to look ahead and his capacity to formulate and direct large under-

"The nation needs Mr. Hoover's leadership because it needs an engineer who can keep the trains running on the main line, and not be sidetracked because of wet and dry trouble on a siding."

#### R. L. Agassiz of Calumet & Hecla Consolidated Copper Co. to Support Gov. Smith for President-Dr. Van Dyke also Indorses Democratic Candidate.

The "World" of Sept. 20 stated that Gov. Smith has acquired another Republican convert-Rodolphe L. Agassiz, Chairman of the Board of Directors of the Calumet and Hecla Consolidated Copper Company. The account in the "World" said:

A resident of Hamilton, Mass., Mr. Agassiz is well known in Boston, New York and Chicago, and is a director of Walter Baker Company, Ltd., the Edison Electric Illuminating Company, the State Street Trust Company and the American Trust Company of Boston.

"A doubt seems to exist in the minds of some persons who are opposed to the Eighteenth Amendment and its interpretation by Congress in the Volstead act as to whether the election of Gov. Smith would accomplish any practical good," said Mr. Agassiz in a statement announcing his bolt of the Republican ticket.

"Mr. Hoover has given his personal approval to the principle of the

the Republican ticket.

"Mr. Hoover has given his personal approval to the principle of the mendment in these words: 'I do not favor a repeal of the Eighteenth Amendment.

Amendment."

"The platform of the Republican Party is eminently satisfactory to the Anti-Saloon League and its adherents. These bodies are supporting Mr. Hoover's candidacy with enthusiasm.

"Although the Democratic platform is indefinite on the subject, pro-

hibition has been clearly made the issue by Gov. Smith and already

hibition has been clearly made the issue by Gov. Smith and already dominates the campaign.

"If Gov. Smith should be elected the country would have sent to Congress the message for which that body has been waiting for years—namely, that the citizens of the United States want their Constitutional right to enjoy liberty and happiness.

"Even if the personnel of Congress were not greatly changed, which it probably would be were Gov. Smith elected, the attitude of that body in regard to remedial legislation on this all important subject would be completely altered.

"The number of Congressmen of all parties who are 'dry' by conviction is not large, probably not many more than 100 in all. The number who are 'dry' through fear of the Anti-Saloon League and its sympathizers is large indeed. These men would welcome opportunity to vote according to their convictions. to their convictions.

to their convictions.

"The effect on the policy of the Republican Party as such would be revolutionary. The party managers would discover over night that the alliance with the Anti-Saloon League had cost the party the election. That alliance would be dissolved. The only reason why either party has in the past been influenced by the Anti-Saloon League is because both parties feared that the league and its adherents held the balance of power. Once explode that myth and their influence in politics will be no longer a menace."

According to the "Times" of Sept. 16, Dr. Henry van Dyke, author, educator, diplomat and Presbyterian clergyman, who recently denounced the injection of religious prejudice into the Presidential campaign, made definite announcement on Sept. 15 that he intended to vote for Governor Smith. The announcement was in a letter to Frank L. Polk, President of the College League for Alfred E. Smith. Dr. van Dyke was reported as stating:

"I have no hesitation in saying that I propose to vote for Governor Smith, because I regard him as the ablest, most outspoken and fearless of the candidates for the Presidency. In these respects he very much re-

of the candidates for the Presidency. In these respects he very much resembles Grover Cleveland.

"The support of Tammany did not injure or hamper Cleveland and I do not think it I lwiinjure or hamper Smith. I believe that he will go into office without any pre-election pledge, except the great pledge to do his full duty as an executive officer under the Constitution—a pledge which he has always made and kept as Governor."

#### Iowa Farmers' Union Declares Against Herbert Hoover -Gov. Smith Indirectly Indorsed.

Senator Brookhart, one time leader of the farm revolt in Iowa, on Sept. 20 failed to carry the Iowa Farmers' Union with him in his support of Herbert Hoover, says a Des Moines dispatch to the New York "Times" which gave the following account of the session on Sept. 20:

He spoke this afternoon before the convention of the union, composed of 450 delegates, representing about 150,000 farmers in eighty of Iowa's ninety-nine counties. At the conclusion of his speech the union passed resolutions condemning Hoover and indirectly endorsing the candidacy of Governor Smith.

Being a non-partisan farm body, the delegates did not go the full dis-tance in endorsing Governor Smith, but after unanimously adopting the

resolutions they rose from their seats and sang "The Sidewalks of New

Senator Brookhart left the hall during the demonstration.

The resolutions adopted "unqualifiedly endorse the resolutions of the Corn Belt Committee, adopted Aug. 31," which endorsed the Democratic farm platform and tacitly the candidacy of Smith. In regard to Hoover the resolutions said:

"The nomination of Herbert Hoover at Kansas City, pledged as he is to the carrying out of the Coolidge policies and with his record of injustice to agriculture, should be resented at the polls by every farmer in the Middle West."

Senator Brookhart's addrses dealt largely with what he termed the "double crossing" of the farmers by George N. Peek, Chairman of the Committee of Twenty-two; Frank Murphy, legislative representative of the Corn Belt Committee, and William Hirth, Chairman of that organization.

These three, Senator Brookhart asserted, delayed action on the McNary-Haugen bill until late in the session of Congress, hoping "it would be vetoed and that the veto could be used as campaign material for their Tammany candidate."

The Senator lauded Mr. Hoover as the war-time friend of the farmer, declaring that Hoover's determination to maintain the wheat price meant more to the farmers than all the speeches Peek, Murphy and Hirth had ever made

ever made.

He disclosed that shortly before President Coolidge returned the McNary-Haugen bill unsigned he, on the advice of Hoover, went to the President seeking to influence favorable action. Denying that Hoover had anything to do with the writing of the veto message, Brookhart declared that his attempt to influence the President came to naught because "Ogden Mills was already writing the veto message."

#### Secretary of Agriculture Jardine Criticizes Gov. Smith's Statements on Farm Relief.

William M. Jardine, Secretary of Agriculture, commenting on Governor Smith's Omaha speech of Sept. 18, is quoted in the "Herald Tribune" of Sept. 22 as stating:

the "Herald Tribune" of Sept. 22 as stating:

"In his speech at Omaha Governor Smith denied the Underwood tariff to be his model and thus again reversed himself on this important issue.

"On farm relief in his Omaha talk he came out flat-footed for the McNary-Haugen measure, which measure proposes to lift the price of all farm commodities to the domestic consumer by taking enough of each crop off of the home market to force the price up and sell the surplus abroad to our competitors, at whatever it will bring. In almost the same breath, he tells the consumers of the country that this will not raise living costs to them. Either Governor Smith is grossly ignorant in the field of practical economics, or he is deliberately misrepresenting the truth. I don't believe the majority of consumers or farmers of the United States can be that easily fooled. They are far more competent of thinking straight than the Governor apparently gives them credit of being."

Following his return to Washington on Sept. 17 from a tour of the western States, Secretary Jardine was reported as asserting that if Governor Smith is elected and tariff rates are reduced to the schedules of the Underwood act, "as the Governor forecast in his speech of acceptance," the entire farm industry will be thrown into a state of demoralization. The "Times" from which the foregoing is taken,

further indicated Secretary Jardine's views as follows:
There has been a "distinct improvement" in farm conditions in the past
seven years, he [Secretary Jardine] said, and if the farmer repudiates the
policies of the Administration there would be another revision of the tariff
downward, with the prospect that many farm products would be placed on

downward, with the prospect that many term products as corn and this country. 'The Democratic free list also included such farm products as corn and

cornmeal, eggs, fruit and berries, hides, meats, milk and cream, nuts, oil cake, potatoes, rye and rye flour, sago, soya beans, swine and sheep, wool and woll wastes. All these products are now granted protection under

and woll wastes. All these products are now granted proceeded under the Republican tariff.

"If Governor Smith is elected and carries with him a Democratic Congress and the present tariff on sugar is abolished or even lowered, the beet sugar industry will be annihilated, \$250,000,000 now invested in beet sugar factories will be wiped out and their thousands of American employees will be idle."

#### Farmers Oppose Herbert Hoover in Northwest, According to Former Senator Hansbrough-Smith Independent League.

It was stated in a Washington dispatch Sept. 23 to the "Times" that former Senator H. C. Hansbrough, who has gone to Minneapolis to open offices of the Smith Independent League in the West Hotel there, reported to Democratic headquarters that "the Northwest is afire with opposition to the Republican ticket." The paper quoted also contained the following:

Mr. Hansbrough, a Republican, formed the league, which is basing its attacks on the Hoover-Curtis ticket upon the agricultural issue. The total deflation in five States alone during the period of Republican rule represents \$3,611,000,000 on farm values, he said, and wheat prices have dropped from \$2.20 a bushel under the Wilson administration to 75 cents "on the mere nomination of Herbert Hoover."

"In some quarters an attempt is being made to confuse the actual facts in the case," said Senator Hansbrough, "and, while friends of Governor Smith are willing to stand by his record, the friends of Mr. Hoover are not.

Hoover are not.

"The object and determined purpose of the Smith Independent League is to bring the facts home to the farmers and the struggling masses in every part of the five States of Montana, the two Dakotas, Minnesota and Wisconsin. In doing so we intend to co-operate with all other Smith organizations.

organizations.

"The most potent argument we have to offer is contained in facts which are indisputable. From 1920 to 1927 farm properties throughout the United States have decreased in value nearly forty billions of dollars.

"Farm value shrinkages during the five years from 1920 were in Wisconsin, \$405,000,000; Minnesota, \$1,062,000,000; North Dakota, \$568,000,000; South Dakota, \$1,165,000,000; Montana, \$411,064,000, a total deflation of \$3,611,064,000 in these five States.

"During this campaign we intend to drive these facts home to the farmers in this section. They may go 'dry,' they may go 'wet,' and, of course, they will go on worshiping the one God, but they and their children cannot go hungry. The first law of nature is self-preservation. In this latter respect they have had no help from Herbert Hoover, Republican candidate for President."

#### President Lewis of United Mine Workers of America in Commending Herbert Hoover's Newark Address Says Latter Penetrates Industrial Problem in Employment Declaration.

John L. Lewis, President of the United Mine Workers of America, commenting on Sept. 18 on the Newark, N. J. speech of Herbert Hoover on Sept. 17, declared that "Mr Hoover penetrates the heart of America's industrial and economic problem when he declares for full and stable employment for the workers of America." An Associated Press dispatch from Springfield, Ill., reporting this, quoted

Mr. 'Lewis as saying:

His Newark address reveals his intimate and comprehensive grasp of the economic factors which are the every day concern of the average American. His specific declarations in favor of high wages, free collective bargaining, restrictions on the use of injunctions in labor disputes, tariff schedules protective of American labor, continuance of immigration restrictions, further expansion of our foreign export trade and Governmental assistance to the depressed textile and bituminous coal industries constitute a program that should carry an intense appeal to very thoughtful citizen.

#### Orange Typographical Union Voices Disapproval of New Jersey State Federation of Labor in Indorsing Gov. Smith for President.

The following advices from Orange, N. J., Sept. 18 appeared in the "Times:"

appeared in the "Times:"
A letter protesting the endorsement of Governor Smith by the New Jersey State Federation of Labor will be sent on Wednesday to the Federation by Herbert Schaffer, Sec.-Treas. of the Orange Typographical Union. The Federation action was condemned by the suburban body, which includes printers in the Oranges, Montclair and Bloomfield.

At its meeting last night Smith and Hoover were both said to be not representatives of labor. John M. Hague, an officer of the union more than twenty-five years, said the State body would not have endorsed Smith were it not for Mayor Frank Hague of Jersey City. No particular candidate was endorsed, and the protest was unanimous.

Switchmen's Union Declares against Gov. Smith. The "Evening Post" printed the following Associated

Press dispatch from Chicago, Sept. 25:

Election of Governor Smith would be "A menace to organized labor."

Dan G. Smith, leader of the Switchmen's Union of North America, said to-day upon his appointment as director of labor of the Western Republican campaign headquarters by James W. Good, manager.

"Herbert Hoover is generally regarded by organized labor as safe,' said Mr. Smith. "He is a student of economics and his policies are sound."

#### Business Men Offer Services to Aid Department of Commerce in Retail Credit Survey.

In furtherance of the study which the Commerce Department is making of retail credit throughout the country at the request of the National Retail Credit Association, fortynine members of the association have volunteered their services as chairmen of their particular State organizations to co-operate in securing the necessary information. The National Retail Credit Association asked the Department of Commerce to undertake the survey, being convinced on the basis of its intimate knowledge of credit conditions, that there is a serious lack of reliable information regarding credit and censequently, many conclusions are being reached which may be false and even dangerous. It is also felt that information of this type should be collected by a governmental agency so that the results can be made readily available to every one on an impartial basis with absolute assurance that the separate returns of firms and individuals will be held strictly confidential. The principal questions asked are based upon three major subjects-cash transactions, open credit, and deferred or installment payments. Other questions relate to the monthly balance, collections, bad debts, and the detailed administration of credits.

#### Wood Railway Cars Not to Be Discarded.

According to the National Lumber Manufacturers Association, it was learned Sept. 22, at the offices of the American Railway Association, that there is no truth in the widely

published report that the railways would abandon the construction of wood freight cars after Jan. 1 1931. The erroneous report was derived from the fact that the rules of the Association provide for steel underframing on cars built after that date. Most wood cars are now built in that way. There is no intention of replacing such cars with all-steel cars. It was pointed out at the officers of the Association that whatever are the merits of steel, freight cars made entirely of it are not suited to all commodities.

### Federal Board of Mediation Terminates Efforts to Effect Agreement in Western Rail Wage Controversy.

The Federal Board of Mediation announced in Chicago on Sept. 16 that it had terminated its efforts toward bringing about an agreement between the Western railroads and the trainmen and conductors unions. According to the Asso'-ciated Press accounts, Samuel E. Winslow, Chairman of

the Federal Board, issued the following statement:

In behalf of the Board, the mediation proceedings have been terminated for the reason that the carriers and the employees' organizations were unable to reach an agreement

The same account said:

'Ine Same account said:

E. P. Curtis, President of the Order of Railway Conductors, and A. F. Whitney, head of the Brotherhood of Railroad Trainmen, said no immediate action on the strike vote could be taken and indicated the next move should come from the Government. They promised an official statement shortly on labor's position in the wage controversy. J. W. Higgins, Chairman of the Board of Railway Managers, had no statement to make concerning the carriers' attitude.

the Board of Kaliway Managers, and no statement to carriers' attitude.

"The railroads will be asked again directly what they have been asked in mediation," said Mr. Curtis. "Then if they refuse to accept our proposal the employees will be free to take any action deemed necessary and desirable. A refusal will mean trouble, which may eventually mean that we will cult wanting trains.

able. A refusal will mean trouble, which may eventually mean that we will quit running trains.

"The main point in dispute is not that the employees have refused to arbitrate the certain question, but that they have declined to execute an agreement in advance that they will arbitrate potential cases which the carriers may submit at a future date, say within sixty or ninety days.

"We construe the law to mean that arbitration features are intended to be employed when parties are in dispute over certain specific questions before them in discussion and that it is not intended that employees would commit themselves to the arbitration of disputes which are not before them for consideration.

"The organizations have been urging the railroad committees to bring

"The organizations have been urging the railroad committees to bring into the negotiations the specific question regarding the rules which they desire considered and, if necessary, arbitrated."

The wage demands were referred to in these columns Sept. 8, page 1343.

#### Further Developments in Injunction Suit Brought by Security Trust & Savings Bank of Los Angeles Against Use of Word "Security" by United Security Bank & Trust Co. of San Francisco.

In a decision handed down on Sept. 5 the Supreme Court of California denied the application of the United Security Bank & Trust Co. of San Francisco (a Giannini institution) for a writ of prohibition to prevent the Orange County Superior Court and Judge James L. Allen from proceeding with the injunction suit brought by the Security Trust & Savings Bank of Los Angeles early in the current year asking that the San Francisco bank be enjoined from using the word "security" in its title. By this decision the case reverts to the Superior Court of Orange County.

We quote below in full from the San Francisco "Chronicle"

We quote below in full from the San Francisco "Chroniele" of Sept. 6 in the matter:

The bitter legal contest over the use of the word "security" in the corporation name of the United Security Bank and Trust Company of San Francisco will have to be fought out in the Superior Court of Orange county, according to a decision of the State Supreme Court handed down yesterday.

The high court denied the application of the local corporation one of the A. P. Giannini interests, for a writ of prohibition to prevent the Orange county court and Judge James L. Allen from proceeding with an injunction suit brought by the Security Trust and Savings Bank of Los Angeles asking that the San Francisco concern be enjoined from using the word "security" in its name.

In appealing to the Supreme Court for a writ to quash the proceedings in the lower court, the United Security Bank and Trust Company set forth that it had obtained a certificate from Will C. Wood, State superintendent of banks, authorizing the use of the word. The local bank contended that Wood's action in view of his powers under the State banking act was conclusive.

clusive.

In denying the application and sending the case back to the Orange county court, the Supreme Court held that the chief question involved is whether the Los Angeles bank is estopped from legal action in the Orange county court by the State bank superintendent's issuance of the certificate, and in this, the Supreme Court held, the Superior Court has the right to proceed in a case involving the name of a corporation and the certificate obtained from Wood can be considered only as a defense.

The contention that Wood was right in issuing the certificate must first be presented to the Orange county court, and until that court has rendered some judgment the Supreme Court cannot interfere, the decision stated. The high court held further that one of the issues in the case involves the construction of certain provisions of the bank act. Construing of these provisions, the high court ruled, is within the power of the Suprior Court. If the trial court makes error, the matter may then be carried up to the Supreme Court.

The decision was signed by Chief Justice William H. Waste and his associates on the Supreme bench with the exception of Justice J. W. Preston, who voluntarily disqualified himself.

We referred at length to the matter in our issue of June 16

last, page 3705. Since the proceedings were started the name

of the San Francisco institution has been changed from Security Bank & Trust Co. to United Security Bank & Trust Co.

#### Annual Convention of American Bankers' Association at Philadelphia Next Week.

The deliberations of the American Bankers' Association in annual convention at Philadelphia next week, Oct. 1 to 4 -will serve to focus the attention of the banking fraternity The details of the programs of the general on that city. convention and the various sections have already been given in these columns (Sept. 15, page 1478 and Sept. 22, page 1609). The speakers, as we have indicated will include Gov. Roy A. Young of the Federal Reserve Board, Comptroller of the Currency McIntosh, Representative McFadden, &c. Gov. Young will address the general convention; Comptroller McIntosh will be a speaker before the National Bank Division, while Representative McFadden will address the Clearing House section.

#### American Bankers Association Convention Financial Library Exhibit.

The financial division of the Special Libraries Association representing sixty bank libraries in the United States, has completed final arrangements for its model financial library exhibit to be presented at the American Bankers Association Convention in Philadelphia, Oct. 1 to 4. The exhibit, which is sponsored and financed by the various banks, is presented to assist bankers in obtaining the latest and most authoritative financial information. Interesting features will be elaborate clipping files, lists of foreign publications published in English, bibliographical aids to government publications on banking and finance. Ethel Baxter, Librarian of the American Bankers Association and Chairman of the Committee of the financial group of the Special Librarians Association, is in charge of the exhibit. She will be assisted by Emma Boyer, Librarian, Union Trust Co., Cleveland; Edna Casterline, Librarian, Mellon National Bank, Pittsburgh, and Florence Wagner, Librarian, Wall Street Journal. A special study is being prepared for this exhibit which will show how the library may serve the bank.

# Caution Against Negotiation of Stolen Montgomery Ward & Co. Shares.

On Sept. 10 1928 the following described securities were stolen from the offices of Edward B. Smith & Co. by a person who impersonated a messenger of the brokerage firm entitled to the said securities:

to the said securities:

No. 74,413, representing one hundred (100) shares Montgomery Ward & Co., Inc., registered in the name of Horace T. Fishburn.

No. 74,231, representing one hundred (100) shares Montgomery Ward & Co., Inc., registered in the name of Logan & Bryan.

No. 70,399, representing twenty (20) shares Montgomery Ward & Co., Inc., registered in the name of Logan & Bryan.

No. 70,246, representing eighty (80) shares Montgomery Ward & Co., Inc., registered in the name of Logan & Bryan.

No. 63,199, representing one hundred (100) shares Montgomery Ward & Co., Inc., registered in the name of E. F. Hutton & Co.

No. 73,653, representing one hundred (100) shares Montgomery Ward & Co., Inc., registered in the name of Tucker, Anthony Co.

No. C-22,684, representing one hundred (100) shares Montgomery Ward & Co., Inc., registered in the name of Niblack Thorne.

No. C-22,803, representing one hundred (100) shares Montgomery Ward & Co., Inc., registered in the name of James H. Oliphant & Co.

Bigham, Englar & Jones, 64 Wall Street, as attorneys for

Bigham, Englar & Jones, 64 Wall Street, as attorneys for Edward B. Smith & Co., advise that further transfer of the above securities has been stopped and a general notice of the theft has been broadcast over the New York Stock Exchange ticker and the news ticker. A reward of \$5,000 has been offered for the recovery of the securities and information leading to the arrest and conviction of the thief.

#### Return to Standard Time.

Daylight saving time will end today, the official time for the return to standard time being 2 A. M., Sunday, Sept. 30, when the clocks will be turned back one hour. The Federal Reserve Bank of New York issues the following notice in the matter:

FEDERAL RESERVE BANK
OF NEW YORK
(Circular No. 873, September 25, 1928
(Superseding Circular No. 840)
RETURN TO STANDARD TIME

To all Banks, Trust Companies, Savings Banks, and Bankers in the Second Federal Reserve District:

Beginning on Monday, October 1, 1928, this bank and its Buffalo Branch will open and close for business in accordance with standard time which becomes effective in New York City and in the City of Buffalo by the retarding of one hour at 2 a. m. on Sunday, September 30, 1928.

Clearings at the New York Clearing House will take place at 10 a. m., and at the Buffalo Clearing House at 10 a. m. on week days and 9:30 a. m. on Saturdays.

Very truly yours, Benj. Strong, Governor.

The Federal Reserve Bank of Chicago has also issued a

notice as follows: Effective September 30, Chicago Banks, in compliance with the Daylight Saving Ordinance, will turn their clocks back one hour, reverting to Central Standard Time.

There will be no change in banking hours, which are from 9 a. m. to 2 p. m., daily, except Saturday, when they are from 9 a. m. to 12 M.

# ITEMS ABOUT BANKS, TRUST COMPANIES, ETC.

The New York Stock Exchange membership of Raymond J. Schweizer, deceased, was reported posted for transfer to W. E. Tobias, Jr., the consideration being stated as \$415,000. This is the same as the last preceding sale. Membership transfer for a nominal consideration as follows: that of Marshall Pask to John Fitzpatrick; that of Edwin T. Crooks to Archie M. Reid.

An associate membership on the New York Produce Exchange was reported sold for \$13,500.

A Boston Stock Exchange membership was reported sold for \$26,000. The last preceding sale was for \$20,000.

William Palmer Smith, a former Governor of the New York Stock Exchange and a member of the brokerage firm of Breese & Smith, died on Sept. 27 at his home in Plainfield, N. J. Mr. Smith until recently had continued business under the firm name following the death of Mr. Breese some time

On Monday, Sept. 10, the Central National Bank opened its third branch office at 82nd St. and First Ave. in the Yorkville District of Manhattan, offering complete banking

facilities and providing safe deposit facilities.

In order to handle its increasing business the Board of Directors of the Bank appointed three additional officers: August J. Weiss, who entered the Central National Bank at its inception in January 1926 as a member of the Credit Department, was appointed Assistant Cashier and placed in Mr. Weiss is Vicecharge of the new Yorkville office. President of the New York Chapter of the National Institute of Credit, and a member of the New York Credit Men's Association. Edward B. Concannon, a Bronx resident and prior to the opening of the branch at 62-64 East Mt. Eden Ave. was Assistant Manager at the Burnside and Jerome Ave. office of the bank. Mr. Concannon has been appointed Assistant Cashier. Prior to joining the Central National Bank he was with the Federal Reserve Bank of New York. Andrew A. Allan, who likewise has been a member of the Central National Bank since its inception has been appointed Mr. Allan was formerly Chief Cashier of the Auditor. Gulf, Florida and Alabama RR. and when he came North he later became Treasurer of the Ford Mica Co. after which he was affiliated with the New York Joint Stock Land Bank.

Under the armed guard of police and private officers millions of dollars in cash and securities, were transported through the mid-town section late on Sept. 22, when the Chatham Phenix National Bank & Trust Co. of this city moved its branch offices, formerly located at Seventh Ave. and 39th St., to 205 W. 39th St. Portions of the sidewalk on the south side of 39th St. were removed and the basement wall of the bank's present location pierced to give access to the safe deposit boxes in the basement. These were moved in sections and replaced in identical arrangement in the bank's new quarters. The transfer began shortly after 4 p. m. and was completed before night-fall. The Bank was in operation on Monday morning Sept. 24. Although complete installations have been made at 205 W. 39th St., Chatham Phenix branch will be housed there only tem-On the site vacated, construction will begin immediately on a 30-story structure. The Chatham Phenix will occupy the ground floor of this building and will return to its corner on Seventh Ave. and 39th St. in the autumn of 1929. Plans for the permanent quarters are said to contemplate one of the most complete banking houses in uptown New York. Robert C. Brown, Vice-President of the Chatham Phenix, supervised the moving of the branch office, of which John M. McGrath, Vice-President, will be in charge.

Howard B. Smith was appointed Trust Officer of the Chemical National Bank of this city on Sept. 27. Smith has been Trust Officer of the Bank of America for a number of years. He is President of the New York Stock Transfer Association. Charles E. Kimball, Jr., and John Nicholas Assistant Trust Officers of the Chemical National Bank were appointed Trust Officers and Wallace C. Von Arx was made Assistant Trust Officer.

Charles Henry Godfrey, retired banker and former partner in the Philadelphia banking firm of Drexel, Morgan & Co., died on September 24 at Rumson, N. J. Mr. Godfrey was eighty-nine years of age.

Benjamin E. Smythe, Second Vice-President of the Chase National Bank of this city in charge of the bank's branch at 191 Montague Street, Brooklyn, died on September 25 in the Chase National Bank Building at 20 Pine Street, Manhattan. Mr. Smythe was 58 years of age. At the time of Mr. Smythe's appointment on August 5 1925 as Assistant Vice-President of the Chase National Bank in charge of the banks Hamilton Trust branch in Brooklyn, the monthly magazine of the Chase National said:

He [Mr. Smythe] began his banking career with the Chemical National Bank, where he remained for many years, working for some time under Mr. William H. Porter, formerly a Vice-President of the Chase National. Mr. Smythe retired from the Chemical to start a new bank, the Gramatan National Bank in Bronxville, Westchester County, which he organized and of which he was Cashier and later President. He resigned the presidency of the Gramatan National to become Vice-President of the Scandinavian Trust Company of New York. In September, 1923, he came to the Chase, being assigned to special work with Mr. Purdy. Mr. Smythe has for a number of years been active in the New York State Bankers Association and the American Bankers Association. In 1917 he was Vice-President of the former, and in 1918, President. From 1919 to 1922 he was a member of the A.B.A. Council and has served on important committees, including the Protective, the Finance, and the State Legislative Committee, serving on the latter as Chairman.

Arthur S. Kleeman was elected a director of the Manufacturers Trust Company of this city on September 24. Mr. Kleeman is a Vice-President of the bank in charge of its investment department.

The Bronx County Trust Co. of this city on Sept. 19 opened a branch office at White Plains Ave. and 233rd St. The new office will be known as the Wakefield office.

Frederick T. Moses was elected a Director of the Providence National Bank, Providence, R. I., at a meeting of the Board on Sept. 17.

Frederick I. Pugsley, Cashier of the Westchester County National Bank of Peekskill, N. Y., and President of the Westchester County Bankers Association, has recently completed a tabulation of the banking resources of Westchester County as of June 30 1928. The total resources of the sixty-one banks amounts to \$395,756,846, an increase in one year of more than thirty-one million dollars. There are thirty-one National Banks in the County with resources of \$141,639,708; nineteen State Banks and Trust Companies with resources of \$129,790,102 and eleven Savings Banks with resources of \$124,327,036. Mr. Pugsley's records do not disclose that any new banks have been opened during the past year although several organizations are under way and will probably be opened for business in the near future.

Kelley Graham, President of the First National Bank of Jersey City, has been elected a director of the First National Bank of Milburn, Essex County, N. J. Interest is lent to the announcement by the fact that Mr. Graham has been instrumental in negotiating the terms of a merger of the First National Bank of Jersey City and the Lincoln Trust Co., which, it is stated, will give the enlarged First National resources of more than \$30,000,000. The merger proposal has been approved by the directors of both banks and will soon be submitted to stockholders for ratification. A point of interest incident to the merger is the fact that when the McFadden bill, extending the scope of national banks, became law in the spring of 1927, the First National of Jersey City was the first national bank in the United States to be granted permission to open branch banks. These were the "Old Bergen" branch at 89 Monticello Ave. and the "Hudson City" branch at 286 Central Ave. Acquisition of the Lincoln Trust Co. will give the First National the main office of that institution at Montgomery and Washington Sts. and its new uptown branch in Bergen Square adjacent to Journal Square. With its headquarters at 1 Exchange Place, the First National Bank of Jersey City will thus have five completely equipped offices throughout Jersey City.

At a meeting of the stockholders of the Guardian Trust

consolidation agreement between the Guardian Trust Company of New Jersey and the Broad and Market National Bank and Trust Company was given by the stockholders. The stockholders of the Broad and Market National Bank and Trust Company also approved the consolidation the same day. This action taken by the stockholders of both institutions makes the consolidation effective. The consolidated bank will be known as the New Jersey National Bank and Trust Company. The statement of the new bank, based upon figures at the close of business Sept. 27 shows capital, surplus and profits of \$4,000,000 and deposits in excess of \$20,000,000. The Board of Directors consists of the Directors of both the Guardian Trust Company and the Broad and Market National Bank. The New Jersey National Bank and Trust Company will open for business on Sept. 28. For the next two weeks the bank will occupy the present quarters of the Guardian Trust Company of New Jersey and the Broad and Market National Bank and Trust Company. After that time, the new bank will be established in its new quarters at the corner of Broad and Market Streets. Previous reference to the consolidation was made in these columns Sept. 15, page 1479.

Vice-Chancellor Backes of New Jersey on Sept. 25 signed an order ending the receivership of the New Jersey Bankers' Securities Co. On Sept. 21 the stockholders of the company approved the settlement between Harry H. Weinberger, former President, and the corporation that received the tentative approval of Vice-Chancellor Backes Sept. 4. They also elected a board of directors that he tentatively had approved. The Newark "News" of Sept. 21, said:

approved. The Newark 'News' of Sept. 21, Said:
Under the terms of the settlement Mr. Weinberger is to return \$2,500,000
to the company, giving security to guarantee fulfilment of the obligation.
In addition each of nine other directors or former directors will pledge
himself to the extent of \$50,000 as a guaranter that the agreement will be carried out.

carried out.

The ten directors chosen to-day are: Edward I. Edwards, Bernard L. Stafford. John J. Roegner, Robert Armstrong, George E. Morrissey, William W. Evans, James F. Minturn, Stewart C. Ross, Abraham Jelin, and John F. McCormick.

Of these, four, Senator Edwards, Supreme Court Justice Minturn, Mr. Roegner and Mr. Evens, are present directors and among the guarantors.

Edwards May Be President.

It is expected that the directors will elect Senator Edwards President and Mr. Jelin, Vice-President and Manager.

Pending clearing up of the matter, Vice-Chancellor Backes has held jurisdiction over the affairs of the company by postponing hearings in the receivership proceedings against it. John J. Stamler, who has been acting as President of the company at the request of the Vice-Chancellor and through whose unremunerated efforts the settlement was brought about, automatically retires. automatically retires.

The Board of Directors of the Hibernia Bank & Trust Co. of New Orleans has declared a quarterly dividend at the rate of 5%, or \$1.25 per share, on its \$25 par value shares. This dividend combines the dividend of the bank on its own stock and the dividend on the common stock of Hibernia Securities Co., Inc., held in trust for the stockholders of the bank. On the old stock of \$100 par value the regular quarterly dividend was \$4.50 per share and in addition Hibernia Securities Co., Inc., paid separately a quarterly dividend of 50c. a share, making a total of \$5 per share, so that the total disbursement remains the same as before. The board of directors has also declared the usual quarterly dividend on the salaries of the employees, the amount for each employee being determined by the length of service and size of salary. Every employee participates in this distribution.

The American Colonial Trust Co. of Porto Rico opened for business on Sept. 17th with offices on the third floor of the American Colonial Bank of Porto Rico. The new company has a paid in capital of \$100,000, and the shares are all held by the American Colonial Bank of Porto Rico, excepting the qualifying shares of the directors. The officers of the new company are: William Schall, President; F. M. Schall, Vice-President; H. L. Cochran, Vice-President; Salvador Suau, Trust Officer; D. P. Campbell, Secretary; and Rafael Cabrera Torres, Treasurer. The directors are: William Schall, F. M. Schall, H. L. Cochran, Salvador Suau, E. S. Paine, W. R. Bennett, Eduardo Giorgetti, Adolfo Valdes, Jose Hernandez Usera, Cecilio Moran, Dionisio Trigo, A. Rauschenplat, O. B. Frazer, Rafael Carrion and J. Henri Brown. As there was no legislation in Porto Rico regarding corporate trusts, the American Colonial Bank of Porto Rico had such legislation passed, and the new corporation is the first trust company to operate in Porto Rico under the new

The American Colonial Bank of Porto Rico, San Juan, Company of New Jersey held on Sept. 27, approval of the Porto Rico, announces the election of C. Stewart Graham and D. P. Campbell as Assistant Vice-Presidents and members of the Board of Directors. Mr. Graham has had wide experience in banking, as formerly he was manager of the Banco Mercantil Americano del Peru; later he was National Bank Examiner in the Second Federal Reserve District, and more recently Foreign Representative of the Bank of America, New York, in Colombia. Mr. Campbell was formerly Auditor, and later Assistant Cashier of the American Colonial Bank of Porto Rico.

The National City Co. has prepared what is believed to be the first pamphlet issued by any American Investment organization written exclusively in Chinese. A Cady, manager of the company's Shanghai branch, has written the A. B. C. of investment for the benefit of Chinese investors and the pamphlet contains, in addition information concerning the organization together with a description of various bond issues floated by the National City. A supplementary booklet, also written in Chinese, gives the latest statement of condition of the National City Bank of New York.

At the regular monthly meeting of the directors of the First Citizens' Trust Co. of Columbus, Ohio, on Sept. 20 Robert H. Schryver, Chairman of the Board of Directors, tendered his resignation, according to the Columbus "Ohio State Journal" of Sept. 21. Prior to the merger of the First National Bank and the Citizens' Trust & Savings Bank last spring to form the present organization, Mr. Schryver was president of the latter institution. It is understood, that Mr. Schryver intends to devote his undivided attention to his property interests in Ohio and elsewhere. In regretfully accepting Mr. Schryver's resignation, the directors of the First Citizens' Trust Co. adopted a resolution tendering their appreciation of his many years of devoted service and expressing their cordial good wishes for his continued success and welfare.

From the Chicago "Post" of Sept. 18 we learn that John Bain, executive head of 11 of Chicago's outlying banks, and his associates in the directorate of the Armitage State Bank of Chicago, recently purchased a modern bank building at Armitage and Kimball Aves., that city, and the bank was to be moved to its new quarters on Sept. 22. capital of the Armitage State Bank, the paper mentioned said, is to be increased to \$200,000, and the surplus to \$50,000. As of Sept. 13 the total resources of the institution were \$657,000. The officers of the bank are as follows: John Bain, Chairman of the Board and President; John H. Bain, Jr., Vice-President and Cashier; C. C. Zillman, Vice-President and Erwin Larsen and Theodore Zillman, Assistant Cashiers.

Associated Press advices from Omaha, Neb. on Sept. 20' printed in the New York "Times" of the following day, stated that three Nebraska banks were in the hands of the State Banking Department on that day because of alleged irregularities, and county and State authorities, armed with a warrant charging embezzlement of \$67,000, were searching for Paul Wupper, President of the institutions. The banks are the Beemer State Bank at Beemer, the State Bank of McLean and the State Bank of Morse Bluff. J. F. McLain, State Bank Examiner, was reported as saying the shortage at the Beemer bank might reach \$400,000. The deficit was discovered, the dispatch said, when State bank examiners checked Mr. Wupper's accounts at the Beemer bank on Sept. 17. Following a conference with the examiners and officials, Mr. Wupper and G. C. Meyer, Vice-President of the Beemer bank, left for Lincoln, Neb., where Mr. Wupper said he hoped to raise the money. Failing to get the money at Lincoln, Mr. Meyer said, the last he saw of President Wupper was in Omaha, when the latter told him he was going to see a friend in Chicago from whom he hoped to borrow the money to cover the shortage. Mr. Wupper, the dispatch furthermore stated, has been President of the Beemer bank for more than 20 years, and Mayor of Beemer for 16 years. A later dispatch by the Associated Press from Lincoln (Sept. 21), appearing in the Omaha "Bee" of the following day, reported that the State Guaranty Commission on that day had sent A. A. Held to take over the Beemer State Bank, and put Charles Stone in charge of the institution. George Parker of Newcastle, Neb., a member of the Commission, it was said, would become receiver of the bank, which has approximately \$750,000 of deposit liabilities. According to the Omaha "Bee" of the same date (Sept. 21) Paul Wupper, the missing President, on Sept. 18, the day after the examiners appeared at the Beemer

bank, called at the State Department of Trade and Commerce in Lincoln to protest against the closing of the bank. This paper said in part:

This paper said in part:

That the State Department of Trade and Commerce, familiar with the shortage of at least \$67,000 from the Beemer bank, allowed Paul Wupper, missing president, to leave for parts unknown, was revealed Thursday (Sept. 20) in an interview with Secretary Clarence Bliss by the Associated Press.

Mr. Bliss said that Mr. Wupper came to Lincoln Tuesday, the day after the examiners appeared, to protest against the closing of the bank, as Examiners J. F. McClain and L. C. Sorenson had recommended. The secretary prided himself on prompt action is the case, he declared.

"He claimed he could raise the money right away to make good the discrepancy by disposing of a ranch he owned," Bliss declared.

Bank examiners said that conditions had been in the present condition in the bank for nearly 12 years, although an examination last May showed nothing wrong.

nothing wrong.

Late Thursday afternoon State Sheriff Condit, to whom the direction of the search for Wupper has been given, said that absolutely nothing was known of the missing banker's location.

The St. Louis "Globe-Democrat" of Sept. 21 reported the opening the previous day of a new bank in Belleville, Ill., the Belleville National Bank, making the fifth financial institution in that city. The new bank, which was recently chartered by the Comptroller of the Currency is capitalized at \$100,000 and has a surplus of \$50,000. The officers are: Lee Grandcolas, Chairman of the Board; John Wilbret, President; P. C. Otwell, First Vice-President; Walter Freudenberg, Second Vice-President; F. William Keiner, Cashier, and Walter Kottmann, Assistant Cashier.

A dispatch from Tulsa, Okla., on September 21, printed in the "Wall Street News" of the same date, reported that the First Trust and First National Bank of Tulsa, Okla., and the First Trust and Savings Bank of that city had consolidated under the title of the First National Bank and Trust Company of Tulsa. Otis McClintock is Pesident of the enlarged bank, it was stated. Mr. McClintock is Vice-President of the Independent Oil and Gas Company.

That the proposed merger of the City Savings Bank and the Fidelity Bank & Trust Co., Memphis, Tenn. institutions, with the Manhattan Savings Bank & Trust Co. of that city was to become effective on Monday of this week (Sept. 24) was indicated in the Memphis "Appeal" of Sept. 21, which stated that the directorates of the three institutions had formally approved the consolidation on Sept. 20. As part of the merger plan the capital of the Manhattan Savings Bank & Trust Co. was increased from \$150,000 to \$350,000. It has a surplus of \$400,000 and deposits of \$9,000,000. Hirsh Morris, said to be the oldest bank President in point of service in Memphis, continues to head the enlarged bank, while William White, former President of the City Savings Bank, has been made Executive Vice-President. Other Officers of the enlarged bank are: Charles J. Haase, W. E. Standsbury (former President of the Fidelity Bank & Trust Co.), J. D. McDowell, Frank T. Cochran, D. D. Robertson, L. G. Van Ness, J. P. Longon, H. W. Hurt, W. C. Mc-Daniel and F. C. Dickson, Vice-Presidents, Eldredge Armistead, Cashier; Lee Weed and S. N. Castle, Assistant Cashiers, and W. Murrah, Trust Officer. Three new directors have been added to the board of the enlarged bank; these are T. H. Tutwiler, President of the Memphis Street Railway Co., Rogers Caldwell of Nashville, Tenn. and Edward. Potter, Jr. also of Nashville. The new bank has an executive committee consisting of the following directors: E. G. Willingham, Chairman; Hirsh Morris, William White, Wassell Randolph, T. H. Tutwiler, Rogers Caldwell, W. E. Stansbury, Edward Potter, Jr. and Mitchell Rosenthal.

For the time being the enlarged bank is operating two branches, the Fidelity branch in the former quarters of the Fidelity Bank & Trust Co. (with W. E. Stansbury, former President of the Fidelity Bank & Trust Co. as Executive Officer) and the City Savings branch in the former quarters of the City Savings Bank. In a later issue (Sept. 22) the Memphis paper stated that the City Savings Bank Building at the Northeast corner of Madison Avenue and Second Street (which building and that of the Fidelity Bank & Trust Co. were not included in the merger) was the previous day acquired by the Manhattan Savings Bank & Trust Co. in a real estate transaction involving \$250,000 and that the purchase would be followed on that afternoon (Sept. 22) by the acquisition of the building immediately North of the bank building, fronting 80 feet on Second Street and extending back 70 feet, the latter transaction involving several hundred thousand dollars. Continuing this paper said:

The purchase of the City Savings Bank Building was authorized at a meeting yesterday afternoon of the executive committee of the enlarged Manhattan institution. As soon as plans are completed by Hanker & Cairns, local architects, the property will be extensively improved and converted into one of the most modern banking houses in the south.

Reference to the proposed merger of these banks was made in the "Chronicle" of July 21, last, page 365.

The proposed consolidation merger of the American National Bank of Richmond, Va., and its affiliated institution, the American Trust Co., under the title of the American Bank & Trust Co. was approved by the respective stockholders of the banks recently, according to advices from Richmond on Sept. 17, appearing on the "Wall Street News" of the same date. The enlarged institution, the dispatch said, on Jan. 1 1929 will have combined capital and surplus of approximately \$5,250,000, and will be one of the ten largest banks South of Baltimore. Reference to the proposed union of these banks was made in the "Chronicle" of May 26, page 3247.

An Associated Press dispatch from Dublin, Ga., on Sept. 24, printed in the New York "Times" of the following day, reported that the First National Bank of Dublin, an institution capitalized at \$200,000, was closed on that day (Sept. 24), leaving the town without a bank. According to an announcement by H. S. Day, Vice-President, the bank was closed to oenserve its assets and negotiations are under way for a large bank to take over the institution. The bank, which was organized in 1920, in its latest statement showed deposits of between \$700,000 and \$1,000,000, it was said.

On Sept. 20 the Houston National Bank, Houston, Tex., opened for business in its handsome new bank building, recently completed at a cost of \$1,000,000, as reported in the Houston "Post" of Sept. 19. It occupies the same site as the bank's old home at Main St. and Franklin Ave. The formal opening of the building, it was stated, would not take place for several weeks, according to C. S. E. Holland, the bank's President. The following description of the interior of the new baking home is taken from the

Houston paper: The building is three stories, but has the height of six. The d from the main floor to the dome of the handsome ceiling is 55 feet from the main floor to the dome of the handsome celling is 55 feet. The transit, auditing and mail departments are located on the mezzanine and the safety deposit, funds and record vaults in the basement. The third floor is devoted to directors' rooms and other departments. The lobby of the bank, finished in imported marble and Italian travertine, is 45 by 90 feet. Cages and banking windows are finished in bronze, as is all of the grill work. The ceiling is elaborately decorated in the mosaic design. The figures are painted, giving the appesance of sculpture. In low relief, and the balcony with its beautiful arches is in harmony The ceiling is lighted indirectly, huge bowls on pedestals on the railing around the balcony containing lights. Full length windows also supply plenty of natural light to the spacious lobby. From the centre a stairway department. Surrounding the opening of the stairway on the main floor is the marble check desk, where 30 people may be accommodated at one time. The bank has 17 cages. A feature of the bank is the 46-ton vault which guards the boxes of depositors. Despite its weight, it swings open easily. easily

The Houston National Bank is one of the oldest banks in Houston, having been organized in 1876 by the late Henry S. Fox. It is capitalized at \$1,000,000 and had total deposits on June 30 of \$15,560,859. Its officers, in addition to President Holland, are as follows: R. S. Sterling, Chairman of the Board; Melvin Rouff, Joseph F. Meyer Jr., and J. W. Fincher, active Vice-Presidents; Dr. J. Allen Kyle, George L. H. Koehler, A. E. Kerr, F. P. Sterling, and J. Milton Howe, Vice-Presidents; T. M. McDonald, Cashier; K. V. Hahn and Bryan Sparks, Asst. Cashiers, and N. F. Pennington, Auditor.

A dispatch from Austin, Tex. to the Houston "Post" on Sept. 11 reported the closing within the previous week of five inter-related Southwest Texas State banks. stringency in the live stock industry dating back to deflation days, the dispatch said, was blamed for the banks' embarrassment. The institutions, all under the same ownership, are the Yoakum State Bank, capital \$100,000, the First State Bank of Hallettsville, First State Bank of Westhoff, Security State Bank of Alice, and State Bank of Orange Grove. The last mentioned bank closed its doors on Sept. 10. The affairs of all the banks have been placed in the hands of the State Banking Department. Philip Welhausen, President of the Yoakum institution, the dispatch stated, was also President of all the other institutions; he had resigned his office a few days previously, according to the State Banking Department. A later dispatch (Sept. 13) from Austin to the Dallas "News" in reporting the failure said:

"News" in reporting the failure said:

Driscoll and Welhausen interests owned the Yoakum State Bank, which was the central institution for the other 4 establishments, and on its closing the subsidiaries did likewise. Each of the smaller institutions is understood to have had deposits with the Yoakum bank.

Plans for re-organization and continuation of the business for the 4 smaller banks are under way and no effect of the closings will be felt by other banks in that territory, it is said. Re-organization is not expected for the Yoakum bank, however.

The Board of Directors of the Los Angeles, First National Trust & Savings Bank, Los Angeles, at its meeting on Sept. 21, accepted the resignation of Peter Tognazzini as a member of the Executive Board of the San Louis Obispo Branch, and and elected his son, Benjamin A. Tognazzini, to succeed him. The elder Mr. Tognazzini is relieving himself of many interests and responsibilities on account of his advanced years and ill health.

Advices from Pasadena on Sept. 17, printed in the Los Angeles "Times" of the following day, stated that Reese H. Taylor, Superintendent of the Llewellyn Iron Works of Los Angeles, had been unanimously elected on that day a member of the executive board of the Pasadena branch of the Los Angeles, First National Bank, Los Angeles.

The election of Culbert W. Faries as an Assistant Trust Officer of the Los Angeles-First National Trust and Savings Bank, Los Angeles, was announced on September 23 following a meeting of the Board of Directors of that institution. Mr. Faries has taken up his duties in the corporate trusts and agencies department of the banks of which W. N. Bucklin, Jr., Vice-President, is the manager. He goes to the Los Angeles bank from San Francisco where he has been Secretary and Treasurer and Office Engineer for the Feather River Power Company since July 1925, and also Office Engineer with the Constant Angle Arch Dam Co. since August 1921, including the period of his affiliation with the Feather River Power Co.

W. M. Crandall, Escrow Officer, Los Angeles, First National Trust & Savings Bank and C. E. Lones, Manager, Avalon & Vernon Branch, Los Angeles, First National Trust & Savings Bank, were the speakers on Sept. 21 at the dinner meeting of the East Side Bankers Association, held in the club rooms of the Administration Building, in the Central Manufacturing District. Mr. Crandall, a former president of the California Escrow Association, spoke on "The History of Escrows." Mr. Lones, who is First Vice-President of the Los Angeles Chapter, American Institute of Banking and Chairman of the chapter's Education Committee had as his subject "The 1928-29 Education Program in the American Institute of Banking. The East Side Association comprises in its members the Managers and Assistant Managers of the thirteen branch banks and the Presidents and Cashiers of the three independent banks, all east of the Los Angeles

That Bank of Italy and Bancitaly Corp. stockholders are to receive one share of Bank of America, New York, capital stock for each 40 shares of Bank of Italy and Bancitaly Corp. stock owned as of Nov. 1, was reported in the following dispatch from San Francisco yesterday (Sept. 28) to the "Wall Street Journal":

"Wall Street Journal":

Bancitaly Corp. announces distribution to stockholders of Bank of Italy, and Bancitaly Corp. of one share of capital stock of Bank of America for each 40 shares of Bank of Italy and Bancitaly Corp., owned, payable Jan. 1 to stock of record Nov. 1. On basis of present price of Bank of America, this means Bank of Italy and Bancitaly Corp. stockholders will receive the equivalent of a special dividend of \$5 a share. The tota value of stock aggregates more than \$35,000,000.

Stockholders of Bancitaly Corp. and Bank of Italy, who subscribed for Bank of America at \$225 earlier in the year, are given a sufficient additional advantage so that for each five shares originally purchased they will now own eight shares. These subscriptions were on the basis of one share for 24 of Bancitaly or Bank of Italy held.

The Pacific National Bank—a recently organized Seattle institution—opened very auspiciously on Sept. 17, according to the Seattle "Post-Intelligencer" of Sept. 18. Large quantities of flowers, the gifts of other banks, bond houses, and Seattle business men, were sent to mark the occasion and throughout the day the banking rooms were thronged with visitors, the bank being obliged to re-open in the evening from 7 until 10 to accommodate all who wished to attend. Deposits for the day were estimated at \$2,000,000. The new bank and its affiliated securities company, the Pacific National Co., have between them combined paid-in capital and surplus of \$3,750,000. William Calvert, President of the San Juan Fishing & Packing Co., is Chairman of the Board of the new institution, while George H. Greenwood is President. Mr. Greenwood went to Seattle recently from Spokane, Wash., to head the new bank. In the latter city he was a Vice-President of the Old National Bank & Union Trust Co. Items regarding the organization of the new Pacific National Bank appeared in the "Chronicle" of June 16 and July 28, pages 3710 and 506, respectively.

Advices from Montreal on Sept. 21 to the New York "Journal of Commerce" stated that the shareholders of the Canadian Bank of Commerce (head office Toronto) at their special meeting at which they ratified the proposed merger of the Standard Bank of Canada with the institution, also amended the bank's by-laws in such a manner as to permit of the addition of former directors of the Standard Bank to the board. S. H. Logan, the present General Manager of the Canadian Bank of Commerce, will hold the same position in the enlarged bank and will also become a member of the board of directors, while Arthur F. White, now President of the Standard Bank of Canada, will also be elected a director of the new institution, along with T. H. Wood, A. M. M. Kirkpatrick, F. W. Cowan, A. R. Auld and W. K. George, directors of the Standard. The Standard Bank will lose its identity on Oct. 31 and the new directors will be elected Nov. 1.

#### THE WEEK ON THE NEW YORK STOCK EXCHANGE.

The stock market was active and strong early in the week, but subsequently displayed considerable irregularity on profit-taking, which, however, was confined largely to speculative industrials, motor shares and specialties. of the features of the early part of the week was the demand for copper stocks, which moved briskly upward and in numerous cases advanced into new high ground. Motor shares have been somewhat erratic, though General Motors at one time raised its top to the highest level in its history. The Federal Reserve Bank's weekly statement of brokers loans showed a further increase of \$54,232,000. Call money ranged downward from 71/2% on Monday to 6% on Wednesday and Thursday, but spurted to 8% on Friday. market slipped back on Saturday and many of the highly speculative issues that have been most active in the trading moved fractionally downward. General Motors, for instance, was heavily sold and closed with a substantial loss. Radio Corp., Du Pont, Wright Aero and Montgomery-Ward were also weak and closed at lower levels. Copper stocks continued to show considerable strength during the early trading, but dropped back in the closing hour. was also true of Chrysler Motors and Hupp, but Hudson was strong all through the session and closed with a net gain of 13/4 points. Oil stocks were comparatively strong, Atlantic Refining gaining six points to a new high above 189. The market resumed its upward swing on Monday with the motor stocks leading the advance. Chrysler forged ahead into new high ground and closed with a net gain of 31/4 points for the day. Hudson, Graham-Paige and Chandler-Cleveland were other strong features. United States Steel common moved into new high ground above 161 and closed at 1605% with a gain of nearly three points. Copper stocks continued to advance, Greene-Cananea shooting forward more than five points to above 135. Anaconda reached a new top at 84 1/8 and Kennecott reached a new peak at 102. Chile Copper, Calumet & Arizona and most of the others sold at higher prices. Public Service of New Jersey sold up to 69 %. Specialties continued their advance under the leadership of Union Carbide & Carbon which advanced about 10 points to 190.

The market opened strong on Tuesday but became erratic as the day advanced. Public utilities were particularly strong, National Power & Light again assuming the leadership of the group with a gain of two points to a new top above 43. Consolidated Gas crossed 81 at its high for the day, but slipped back to 791/4 and closed with a net gain of one point. Copper shares lost none of their buoyancy, new highs being recorded by Calumet & Arizona, Anaconda and Kennecott. Motor stocks did not do so well, General Motors dropping back to 211, followed by Chrysler which was off about two points and Hudson which moved in a similar way. Merchandising securities were well up with the leaders, Montgomery-Ward advancing into new high ground above 265. Sears-Roebuck also bounded forward about six points to 153%. Wright Aero made a sharp advance of 12 points and closed around 172. Curtiss, on the other hand, was off about four points and closed at 1461/2. On Wednesday trading slowed down somewhat, though prices as a rule were higher. Public utilities continued to attract considerable speculative attention, especially low-priced stocks like Louisville Gas & Electric, Electric Power & Light and National Power & Light. Consolidated Gas and Public Service of N. J. were also in demand at improving prices. Oil stocks attracted increasing attention, particularly such shares as Pan-American "B," Skelly Oil,

Atlantic Refining and Texas Corp. General Motors improved about five points. Chrysler reached a record top; Hudson sold up to 891/2 at its high for the day, and Hupp closed at 76½, as compared with its previous final at 74¾. United States Steel common moved forward and again sold above 160 and most of the independent issues made further progress upward. Montgomery-Ward reached the highest top in its history and Radio Corp. advanced more than 10 points and crossed 210. Pittsburgh & West Virginia and Delaware & Hudson were the strong spots of the railroad group, the latter swinging upward about four

The market suffered a severe setback on Thursday, particularly in the forenoon when the heavy realizing sales carried prices to lower levels. As the day advanced some of the early losses were recovered. General Motors broke to 209, but later rallied to 210 where it was off about four points from the previous close. United States Steel was down about a point from its new top level of 1613/4 and most of the independent issues were lower. Specialties moved upward and downward, Case Threshing Machine, for example, broke from 363 to 351, but in the rally later in the day recovered to 358, Wright Aero moved around in a similar way and many of the high class speculative issues slipped back with losses ranging from five to 10 points. Railroad stocks improved and sharp advances were recorded in St. Louis-Southwestern which reached a record top with a gain of five points to 119, though it receded to 1145% in the closing hour. Kansas City Southern, Reading, Rock Island, Missouri-Kansas-Texas and Texas & Pacific were also outstanding strong features of the rails. Most of the securities that were strong earlier in the week receded from one to two points. Continued irregularity characterized the movements of prices during the greater part of the session on Friday and the trend of the market was generally toward lower levels until the last half hour when a moderate rally carried a number of the more active issues to higher levels. Railroad shares were in actvie demand at improving prices, the strong stocks including such securities as Kansas City Southern, Rock Island, Missouri-Pacific and Atlantic Coast Line. Specialties moved sharply upward under the guidance of A. M. Byers which reached a new peak at 135 with a net gain of 10 points. Johns-Manville also moved into new high ground with a gain of five points and Gillette Safety Razor reached its best with a gain of nearly seven United States Steel common receded a point or more below its previous close. Chrysler was the outstanding strong issue of the motor group and closed with a net Other strong issues included American gain of 61/4 points. Can which gained 21/8 points to 1073/4, American Zine & Lead which improved nearly two points and Mexican Seaboard which scored a net gain of 21/4 points to 321/4. final tone was good.

#### THE CURB MARKET.

There was a broad and active market for Curb securities this week and despite profit-taking and money market conditions, prices generally moved to higher levels. Rolling Mill, com. advanced from 973/4 to 107, reacted to 103 and closed to-day at 104½. Balaban & Katz, com. sold up from 80¾ to 90¼ and at 89½ finally. Bancitaly Corp. was off from 1287/8 to 125 but to-day sold up to 132, the close being at 130. A distribution of Bank of America stock was announced. Bohn Aluminum & Brass advanced from 74 to 781/8, dropped to 73 and closed to-day at 75. Checker Cab Mfg., com. moved up from 56 to 63%. Columbia Graphophone gained over 12 points to 851/4. Marion Steam Shovel improved from 50 to 57% and sold finally at 561/2. Sparks Withington & Co. jumped from 132 to 1497/8, and reacted finally to 140. Utilities held fairly well. Amer. Gas & Elec., com. moved up from 172 to 1841/2 and closed to-day at 180. Elec. Bond & Share Securities advanced about eight points to 135%, but reacted finally to 1281/4. Among oils Standard Oil of Ky. rose from 1291/2 to 140 but reacted to 132½. Pantepec Oil of Venezuela on heavy transaction sold up from 12¾ to 15¼ and closed to-day at Venezuelan Petroleum was also heavily traded in from 434 to 81/8 and at 71/4 finally.

A complete record of Curb Market transactions for the week will be found on page 1792.

## THE ENGLISH GOLD AND SILVER MARKETS.

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of Sept. 12, 1928:

The Bank of England gold reserve against notes on the 5th inst. constituted a fresh high record, namely £173,897,335 (as compared with £173,154,489 on the previous Wednesday), and represents an increase of £19,991,020 since April 29 1925—when an effective gold standard was

In the open market this week about £436.000 bar gold was available The bulk of this amount—about £332,000—was secured for Germany, the balance being absorbed by the requirements of India and the Home and Continental Trade.

The following movements of gold to and from the Bank of England have been announced, showing a net influx of £11,000 during the week under review:

TOATON						
	Sept. 6.	Sept. 7.	Sept. 8.	Sept. 10.	Sept. 11.	Sent. 12.
Received	_£100,000	Nil	Nil	£500,000	Nil	Nil

The receipts on the 6th and 10th inst. were in sovereigns from Arabia and South Africa respectively. The £528,000 sovereigns withdrawn were destined as follow: Canada, £500,000; Holland, £18,000 and Spain £10,000. The following were the United Kingdom imports and exports of gold

registered from mid-da	y on the 3rd in	ast, to mid-day on the 10th i	nst.:
Imports-		Exports-	
British South Africa Arabia	£1,355,428 100,000 25,380	Germany Switzerland Austria	£32,300 39,570 23,855

Other countries\_\_\_\_ 22,561 £1,480,808 £118,286

The Transvaal output of gold for the month of August last amounted to 891,863 fine ounces, constituting a new high record monthly production, the highest hitherto recorded being in May last when the output was 886,186 fine ounces. The output for July 1928 was 867,211 fine ounces, and for August 1927, 863,345 fine ounces.

The following was the composition of the Indian Gold Standard Reserve on Aug. 31 1928:

SILVER.

SILVER.

The market has been quieter in tone, and although prices have fluctuated they have shown a tendency to sag. The quotations of the 7th inst.—26½d. for cash and 26½d. for two months—were the lowest recorded since April 26 and May 5 last for the respective deliveries.

China has been a consistent buyer and supplies have been forthcoming from the Continent and the Indian Bazaars; America has been rather more willing to sell.

The difference between the continent and the selection of the selection of the continent and the selection of the

The difference between the cash and two months quotations narrowed to 1-16d, on the 10th inst. owing to the carrying forward by bear operators of contracts falling due. However, the premium of 1/8d, on silver for two months delivery was re-established yesterday. The Bulletin issued from the Office of the High Commissioner for Canada gives the finally revised statistics of Canada's silver production for 1927 as published by the Dominion Bureau of Statistics at Ottawa. The outpit for 1927 amounted to 22,736,698 fine ounces, as compared with 22,371,924 fine ounces for 1926. British Columbia and Ontario were the principal producers, the former province contributing 11,040,445 fine ounces and the latter 9,307,953 fine ounces.

The following were the United Kingdom imports and exports of silver registered from mid-day on the 3rd inst. to mid-day on the 10th inst.:

### COURSE OF BANK CLEARINGS.

Bank clearings the present week will again show a satisfactory increase compared with a year ago. Preliminary figures compiled by us, based upon telegraphic advices from the chief cities of the country, indicate that for the week ending to-day (Saturday, Sept. 29) bank exchanges for all the cities of the United States from which it is possible to obtain weekly returns will be 10.2% larger than for the corresponding week last year. The total stands at \$11,961,-375,519, against \$10,857,127,831 for the same week in 1927. At this centre there is a gain for the five days ending Friday of 26.3%. Our comparative summary for the week follows:

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them to-day inasmuch as the week ends to-day (Saturday), and the Saturday figures will not be available until noon to-day. Accordingly, in the above the last day of the week has in all cases had to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results for the week previous—the week ended Sept. 22. For that week there is an increase of 13.6%, the 1928 aggregate of clearings for the whole country being \$12,211,412,622, against \$10,753,684,070 in the same week of 1927. Outside of this city the increase is 13.9%. The bank exchanges at this centre record a gain of 13.3%. We group the

cities now according to the Federal Reserve districts in which they are located and from this it appears that in the New York Reserve District (including this city) there is an improvement of 13.3% in the Boston Reserve District of 15.2% and in the Philadelphia Reserve District of 6.4%. The Cleveland Reserve District shows a gain of 15.8%, but the Richmond Reserve District has suffered a loss of 0.4%, and the Atlanta Reserve District has suffered a loss of 0.4%, and the Atlanta Reserve District of 13.1%. In the Chicago Reserve District the totals are larger by 16.5%, in the St. Louis Reserve District by 15.0% and in the Minneapolis Reserve District by 9.0%. In the Kansas City Reserve District the expansion reaches 23.2%; in the Dallas Reserve District it is 13.9%, and in the San Francisco Reserve District 23.7%.

28.7%.

In the following we furnish a summary by Federal Reserve districts:

a Transfer books not closed for this dividend. d Correction. e Payable in stock. Payable in common stock. g Payable in scrip. h On account of accumulated dividends. f Payable in preferred stock.

dividends. J Payable in preferred stock.

I Associated Gas & Electric dividends payable in cash or in class A stock as follows: On \$6 pref 3.33-100 shares class A stock; on original preferred, 2.26-100 of a share of class A stock; and class A stock for each share held.

Payable in common stock but subject to stockholders meeting Oct. 15.

May be applied to the purchase of additional common A stock at rate of 1-50th of a share for each share held at rate of \$30 per share.

Patitish American Tobacco dividend is 10d. per share. All transfers received in order in London on or before Sept. 3 will be in time for payment of dividend te transferees.

transferees.

s Subject to stockholders meeting Oct. 16.
t Dividend is 9d. per share less expenses for depositary.
u Schulte Retall Stores declared 2% in stock, payable ½% quarterly.
v Holland Furnace dividend payable either 62½c in cash or 2% in stock.
to Payable either in cash or class A stock at rate of one-fortieth share; class B payable either in cash or class B stock at rate of one-fortieth share.

Weekly Return of New York City Clearing House. Beginning with Mar. 31, the New York City Clearing House Association discontinued giving out all statements previously issued and now makes only the barest kind of a report. The new return shows nothing but the deposits, along with the capital and surplus. We give it below in full:

STATEMENT OF THE MEMBERS OF THE NEW YORK CLEARING HOUSE ASSOCIATION FOR THE WEEK ENDED SATURDAY SEPT. 22 1928.

Philadelphia Banks.—The Philadelphia Clearing House return for the week ended Sept. 22, with comparative figures for the two weeks preceding, is given below. Reserve requirements for members of the Federal Reserve System are 10% on demand deposits and 3% on time deposits, all to be kept with the Federal Reserve Bank. "Cash in vaults" is not a part of legal reserve. For trust companies not members of the Federal Reserve System the reserve required is 10% on demand deposits and includes "Reserve with legal depositaries" and "Cash in vaults."

Beginning with the return for the week ended May 14, the

Philadelphia Clearing House Association discontinued showing the reserves and whether reserves held are above or below requirements. This will account for the queries at the end of the table.

## Weekly Return of the Federal Reserve Board.

The following is the return issued by the Federal Reserve Board Thursday afternoon, Sept. 27 and showing the condition of the twelve Reserve banks at the close of business on Wednesday. In the first table we present the results for the system as a whole in comparison with the figures for the seven preceding weeks and with those of the corresponding week last year. The second table shows the resources and liabilities separately for each of the twelve banks. The Federal Reserve Agents' Accounts (third table following) gives details regarding transactions in Federal Reserve notes between the Comptroller and Reserve Agents and between the latter and Federal Reserve banks. The Reserve Board's comment upon the returns for the latest week appears on page 1745, being the first item in our department of "Current Events and Discussions."

NOTE.—Beginning with the statement of Oct. 7 1925, two new items were added in order to show separately the amount of balances held abroad and amounts fue to torsign correspondents. In addition, the caption "All other earning assets," previously made up of Federal Intermediate Credit bank debentures, was changed to "Other securities," and the caption "Total earning assets" to "Total bills and securities." The latter term was adopted as a more accurate description of the total of the total of the Gederal Reserve Act, which, it was stated, are the only items included therein:

## Weekly Return for the Member Banks of the Federal Reserve System.

Following is the weekly statement issued by the Federal Reserve Board, giving the principal items of the resources and liabilities of the 635 member banks from which weekly returns are obtained. These figures are always a week behind those for the Reserve banks themselves. Definitions of the different items in the statement were given in the statement of Dec. 12 1917, published in the "Chronicle" of Dec. 29 1917, page 2523. The comment of the Reserve Board upon the figures for the latest week appears in our department of "Current Events and Discussions," on page 1743 immediately following which we also give the figures of New York and Chicago reporting member banks for a week later.

PRINCIPAL RESOURCES AND LIABILITIES OF ALL REPORTING MEMBER BANKS IN EACH FEDERAL RESERVE DISTRICT AS AT CLOSE OF BUSINESS SEPT. 19 1928 (In theusands of dollars).

Ratio of total reserves to deposit and Fed's R 'a' ve note liabilities combined.		62.7%	78,6%
Contingent liability on bills purchased		02.1 70	
for foreign correspondents		77,906,000	53,391,000

NOTE.—Beginning with the statement of Oct. 7 1925, two new items were added in order to show separately the amount of balances held abroad and amounts due oreign correspondents. In addition, the caption, "All other earing assets," previously made up of Federal Intermediate Credit Bank debentures, was changed to her securities," and the caption, "Total earning assets" to "Total bills and securities," The latter term was adopted as a more accurate description of the total of discounts, acceptances and securities acquired under the provision of Sections 13 and 14 of the Federal Reserve Act, which, it was stated, are the only items included

# Bankers' Gazette.

Wall Street, Friday Night, Sept. 28 1928.

### New York Curb Market—Weekly and Yearly Record

In the following extensive list we furnish a complete record of the transactions on the New York Curb Market for the week beginning on Saturday last (Sept. 22) and ending the present Friday (Sept. 28). It is compiled entirely from the daily reports of the Curb Market itself, and is intended to include every security, whether stock or bonds, in which any dealings occurred during the week covered:

Week Ended Sept. 28.	300 0000	Week's		Sales   for	Ran	ge sinc	e Jan.	1.		Friday Last Sale	Week's		for Week.	Rang	e Stne	e Jan. 1

#### FINANCIAL REPORTS.

Financial Reports.—An index to annual reports of steam railroads, public utility and miscellaneous companies which have been published during the preceding month will be given on the first Saturday of each month. This index will not include reports in the issue of the "Chronicle" in which it is published. The latest index will be found in the issue of Sept. 1. The next will appear in that of Oct. 6.

# Pittsburgh Steel Co. and Subsidiary Companies. (Annual Report—Year Ended June 30 '1928.)

President Homer D. Williams, Pittsburgh, Sept. 20, wrote in substance:

Shipments.—Total steel products for year ended June 30 1928 amounted to 384,083 net tons.

#### COMPARATIVE INVENTORIES AT JUNE 30.

General.—In accordance with the action taken at a special meeting of the stockholders held Apr. 12 1928, authorizing an increase of the indebtedness of the company in the sum of \$16,000,000, there were \$11,000,000 of 20-year 6% sinking fund debenture gold bonds issued, and the proceeds applied to plant improvements and the payment of all outstanding bonds, gold notes, bank loans, mortgages, &c., the last of which were retired Sept. 1 1928.

A special fund of \$2,100,000 was set aside for improvements out of this issue and contracts have been made for a modern new steam plant, an additional electric generating turbine, and partial electrification of the mills to effect economies in manufacture, and certain changes and improvements in the mills to increase output and make new sizes and grades of steel demanded by the trade.

The physical condition of the plants was fully maintained during the year, \$2,862,003 having been expended on maintenance, repairs and replacements. Regular quarterly cash dividends of 1½% on the preferred stock were paid during the year. No dividends were paid to common stockholders during the year as directors thought it best to conserve the cash position of the company.

### GENERAL INVESTMENT NEWS

#### STEAM RAILROADS.

Western Trunk Lines to Ask Higher Rates.—Western trunk lines informed the I.-S. C. Commission Sept. 22, that they will soon file an application asking for an increase in freight rates throughout the Western section of the United States. The "Sun" Sept. 22, p. 17.

Number of Freight Cars Installed and Locomotives Placed in Service.—Class I rallroads in the first eight months this year installed 42,572 freight cars, according to reports filed by the carriers with the Car Service Division of the American Railway Association. Compared with the corresponding period last year, this was a reduction of 9,702 in the number of freight cars installed. Freight cars on order on Sept. 1 this year totaled 9,257, compared with 18,764 on the same date last year. In the month of August the railroads installed 6,718 freight cars compared with 7,131 in August last year.

Locomotives placed in service by the Class 1 rallroads during the first eight months in 1928 totaled 995, which was a decrease of 304 compared with the corresponding period last year. Locomotives installed in August 114, compared with 104 placed in service in August 127. Locomotives on order on Sept. 1 1928 totaled 100, compared with 207 on the same date in 1927.

These figures as to freight cars and locomotives include new and leased equipment.

Freight Cars in Need of Repairs.—Class I railroads on Sept. 1 had 149,252 freight cars in need of repair, or 6.6% of the number on line, according to reports just filed by the carriers with the Car Service Division of the American Railway Association. This was a decrease of 4,803 cars below the number reported on Aug. 15, at which time there were 154,055, or 6.9%. Freight cars in need of heavy repairs on Sept. 1 totaled 109,010, or 4.8%, a decrease of 205 compared with Aug. 15. while freight cars in need of light repairs totaled 40,242, or 1.8%, a decrease of 4,598 compared with Aug. 15.

Locomotives in Need of Repairs.—A new low record for all time in the number of locomotives in need of repair was established by the railroads of this country on Sept. 1, according to reports filed by the carriers with the Car Service Division of the American Railway Association. The number in need of repair on that date was 7,954, or 13.4% of the number on line. This record was established in the face of the fact that at this season of the year freight traffic is always heavier than at any other time. The record established on Sept. 1 exceeded by 52 locomotives the best previous record attained on July 1 this year.

This new low record which applies to all steam locomotives, more than reaches the goal set, so far as motive power is concerned, by the railroads of this country in 1923, when a program was adopted by them calling for the maintenance of adequate and efficient transportation service. At that time, the goal agreed upon called for a reduction to 15% in the number of steam locomotives in need of repair on Sept. 1 was a decrease of 873 compared with the number in need of repair on Sept. 1 was a decrease of 830 compared with the number in need of repair on Sept. 1 was a decrease of 873 compared with the number in need of repair on Sept. 1 had 6,504 serviceable locomotives in storage, compared with 6,712 on Aug. 15.

Matters Covered in 'Chronicle' of Sept. 22.—(a) British Railroads save by wage cut, p. 1599. (b) Draft new

Baltimore & Ohio RR.—Abandonment of Portion of Line.
The I.-S. C. Commission on Sept. 14 issued a certificate authorizing the Coal & Coke Railway to abandon a portion [1.61 miles] of its Turner branch in Kanawha County, W. Va., and the Baltimore & Ohio RR. to abandon operation thereof.—V. 127, p. 1520, 678.

Belgian National Rys.—Earnings.—
The New York agency of the Banque Belge pour l'Etranger has received by cable the following official information regarding the gross earnings (taxes deducted) of the Belgian National Rys., during the month of August 1928:

Transportation of passengers and luggage.—Frs. 85,000,000

Preight—183,700,000
Other sources—6,300,000

Total Frs. 275,000,000 These figures compared with total gross income (taxes deducted) of Frs. 262,900,000 for the month of July 1928 and Frs. 243,700,000 for the month of June 1928.—V. 127, p. 1386.

month of June 1928.—V. 127, p. 1386.

Bloomsburg & Sullivan RR.—Sale.—

Default having been made in the payment of the principal of the bonds dated June 23 1898 and due Jan. 1 1928, and of the 6 months' interest due on said date, and the company having failed to make good the default after notice as required by the mortgage, Fidelity-Philadelphia Trust Co., trustee, will sell at public auction at the front door of the County Court House of Columbia County, Bloomsburg, Pa., on Oct. 23 1928, all the right, title, interest, estate and ownership of company. The railroad and property shall be sold in one lot and as an entirety.

Fidelity-Philadelphia Trust Co. as trustee, mortgagee, claims there is now due upon the mortgage on account of principal, the sum of \$178,900, with netrest from July 1 1927.—V. 126, p. 861.

Boston Railroad Holding Co.—New Director.— F. C. Dumaine has been elected a director, succeeding the late C. F. Choate Jr.—V. 117, p. 2108.

Canadian National Rys.—Places Equipment Order.—
An order for locomotives has been placed by this company with the Montreal Locomotive Works, Ltd., this order being the first part of a total of 55 locomotives which are required to increase the motive power of the system. The 20 ordered in Montreal are for freight and passenger service, and the balance will be for similar service with a number of locomotives for switching purposes.—V. 127, p. 678.

total of 55 locomotives which are required to increase the motive power of the system. The 20 ordered in Montreal are for freight and passenger service, and the balance will be for similar service with a number of locomotives for switching purposes.—V. 127, p. 678.

Central Indiana Ry.—Abandonment of Part of Lines.— The company has been granted permission by the I.-S. C. Commission to continue operation of that part of its Waveland Junction-Muncie line between Anderson and Lebanon, Ind., a distance of approximately 42 miles, and to abandon the portions between Muncie and Anderson, 18 miles; between Lebanon and Waveland Junctions, 34 miles, and its line from Sand Creek to Brazil 21 miles.

The Commission has canceled a certificate of public convenience and necessity; issued March 29 1927, to the company authorizing abandonment of all its lines on the condition that the company should sell them or any part of them to any persons desiring to purchase for continued operation and offering to pay not less than their fair net salvage value.

Since then the Cleveland, Cincinnati, Chicago & St. Louis and the Panhandle, a subsidiary of the Pennsylvania, have offered to purchase the line between Anderson and Lebanon, for \$500,000, and have concluded that the Central Indiana should continue to operate that part of its properties and abandon the remainder.—V. 124, p. 2583.

Chesapeake & Ohio Ry.—G. S. Kemp Answers G. C. Scott in Controversy over Van Sweringen Merger Plans.—

Counsel for the Van Sweringen brothers offered to the committee of the minority stockholders of the Chesapeake & Ohio representation on the board of directors in return for the committee's support before the I.-S. C. Commission in obtaining permission to buy Pere Marquette stock, it was said by George S. Kemp, leader of the minority committee. Mr. Kemp of Bryan, Kemp & Co., Richmond, Va., made the statement in denying the recent assertion of George Cole Scott of Scott & Stringfellow of Richmond, a director of the C. & O., that the Kemp committee sopposi

Chicago & North Western Railway.—Bonds.—
The I.-S. O. Commission on Sept. 18 authorized the company to procure the authentication and delivery of \$28,456,000 of 1st & ref. mtge. gold bonds; said bonds to be held by it until the further order of the commission. V. 126, p. 3749.

Columbus & Greenville Railway.—Notes.—
The I.-S. C. Commission on Sept. 14 authorized the company to issue not exceeding \$101,000 of promissory notes or lease warrants in connection with the procurement of two gas-electric motor cars and two trailer cars.—V. 119, p. 1281.

Delaware, Lackawanna & Western RR.-Electrification.

Direct current of 3,000 volts will be used by the road for propelling suburban trains on 173 miles of track to be electrified in the Northern New

Jersey zone, it has been announced. This high-voltage system was decided upon because it seems the best suited to meet the operating requirements applying in both suburban and main line service, in the event that later on it is considered desirable to carry the electrification of the road over the Pocono Mountains to Scranton and the anthracite coal fields.—V. 126, p. 2298.

Denver & Rio Grande Western RR .- Abandonment of

Denver & Rio Grande Western RR.—Abandonment of Branch Line—Listing.—

The I.-S. C. Commission on Sept. 14 issued a certificate authorizing the company to abandon its Floresta Branch extending from Crested Butte in a general westerly direction approximately 10.7 miles to Floresta, all in Gunnison County, Colo.

The New York Stock Exchange has authorized the listing of \$12,000,000 ref. & improv. mtge. 5% gold bonds, series "B," maturing April 1 1978.

Earnings 6 Months Ended June 30 1928.

Hudson & Manhattan RR.—Stock Issue Approved.—
The New Jersey P. U. Commission on Sept. 17 approved the application of the company for approval of the issuance of \$5,631,000 common stock to be used for conversion of \$52,500 shares of non-cumul. pref. stock and \$944,000 of 1st mtge. 4½ % gold bonds. Both of the latter issues are now outstanding.—V. 126, p. 2306.

International Rys. of Central America.—Pref. Stock Sold.—J. Henry Schroder Banking Corp., Blyth, Witter & Co. and White, Weld & Co. have sold an issue of \$3,000,000 5% cumulative participating preferred stock. The shares participate equally and ratably with the common in any year after the latter has received \$5, are non-callable and have full voting power. This offering does not represent new financing by the company.

after the latter has received \$5, are non-callable and have full voting power. This offering does not represent new financing by the company.

Company.—Organized in New Jersey in 1904 to acquire previously existing lines, now operates over 760 miles of railroad in the Republics of Guatemala and Salvador. The road comprises the principal railroad in Central America, and in Guatemala extends from the Atlantic Coast to the Pacific Coast via Guatemala City. Company carries over its lines substantially the entire production of the United Fruit Co. within the region served by Company has had under construction.

shares now outstanding. d Without giving effect to participation of preferred.

Net earnings before fixed charges and Federal taxes for the first 8 months. Of the current year were 26% larger than in the same period of last year. Of the total funded debt outstanding with the public, approximately 42% or \$11,500,000 was issued to finance the above mentioned 197 miles of new road, from which only relatively small earnings have as yet been derived for the reason that through connection with Atlantic ports has not yet been established.

Capitalization.—The capital stock and funded debt outstanding with the public are as follows:

Funded debt.

\$26,983,522
Preferred stock (authorized and outstanding) 10,000,000
Common stock (authorized, 500,000 shares) 11,000 obs.

The issuance of additional funded debt is restricted, as stated in the letter of which this is a summary.

Listed.—Preferred stock listed on the New York Stock Exchange.—V. 127, p. 1672.

Minneapolis & St. Louis RR.—Listing.—
The New York Stock Exchange has authorized the listing of Guaranty Trust Co. certificates of deposit representing \$8,667,000 refunding & extension mtge. 5% gold bonds due Feb. 1 1962, with coupons due Aug. 1 1923 attached.—V. 127, p. 679.

Missouri-Kansas-Texas RR.—Leonor F. Loree Denied Directorship on Road.—Commission Vacates Authorization to Hold Similar Positions on Two Roads.—Adverse Effect Found on Interests of Public.—Three Commissioners Write Separate Opinions, One Dissenting on Ground No Cause for Action Is Shown.—See under "Current Events and Discussions" on receding regress of this insue

Shown.—See under "Current Events and Discussions" on preceding pages of this issue.

The "Wall Street Journal" Sept. 25 had the following:

L. F. Loree, whose authority to sit as a director on the board of the Missouri-Kansas-Texas RR. has been revoked by the I.-S. C. Commission, told the commission in the hearing held at Washington in June that he would be "very glad" to get off the board of the Missouri-Kansas-Texas if ordered to do so by the commission.

The statement of Mr. Loree's attitude in the matter of holding directorships on the boards of both the Katy and the Kansas City Southern was made during the hearing on commission's order to show cause why he should not relinquish the Katy post.

He stated: "I would like, if counsel has not already explained my position, to say that if the commission feels as a general proposition that the sitting on two boards of companies that are proposed to be brought together under the consolidation sections is detrimental, I shall bow with entire willingness to any finding of that kind. I want to be helpful. I think I may continue to be hopeful, and I do not want to occupy a position that will be obstructing. If this commission feels I should get off of one of these boards I will be very glad to do so."

Another statement of Loree's earlier in the hearings was: "We would be very much disappointed if eventually we do not get the three properties put together in one transportation system." Properties referred to are the Katy, Cotton Belt and Kansas City Southern roads.—V. 127, p. 1251.

New Orleans Texas & Mexico Ry.—Interest Payment.—

New Orleans Texas & Mexico Ry.—Interest Payment.—
The company has declared interest to the amount of  $2\frac{1}{2}$ % to be payable on the 5% non-cumul. income bonds, series A, for the 6 months' period ended June 30 1928, and will, on and after Oct. 1 1928, at its office, 120 Broadway, N. Y. City, make payment of such interest upon presentation and surrender of coupon No. 24, appertaining to said bonds.—V. 127, p.405.

Ohio River & Western Ry.—Sale.— See Pennsylvania Ohio & Detroit RR.—V. 125, p. 1705.

Pennsylvania, Ohio & Detroit RR .- Acquisition and

Operation of Line.—

The I.-S. C. Commission on Sept. 15 issued a certificate authorizing the company to acquire, and the Pennsylvania RR., lessee, to operate, that portion of the line of railroad of the Ohio River & Western Railway extending from Zanesville to Lawton, 9.12 miles, all in Muskingum County, O.—V. 127, p. 1251.

Union Pacific RR.—Operation of Line.—
The I.-S. C. Commission on Sept. 14 issued a certificate authorizing the company to operate a line of railroad extending from the end of a track known as the Wyandotte spur in a general northerly and northwesterly direction a distance of 2.91 miles, all in Wyandotte County, Kans.—V. 127, p. 406.

Yazoo & Mississippi Valley RR.—Abandonment of Branch Line.—

The I.-S. C. Commission on Sept. 14 issued a certificate authorizing the company to abandon a branch line of railroad extending from Lamont to Moores, a distance of 4.36 miles, all in Bouvar County, Miss.—V. 126,

### PUBLIC UTILITIES

American States Public Service Co.—Bonds Offered.—An additional issue of \$1,600,000 1st lien 5½% gold bonds, series A, due May 1 1948, is being offered at 95½ and int., to yield over 5.85%, by Peabody, Smith & Co., Inc., and Davis, Longstaff & Co. These bonds are listed on the Chicago Stock Exchange Chicago Stock Exchange.

Chicago Stock Exchange.

The company will, through its subsidiaries, own and manage properties supplying water and (or) artificial gas for domestic and commercial purposes to a portion of the cities of Los Angeles and Sacramento and 26 additional cities and suburban communities, also in California. Company will serve more than 31,000 customers in a territory the population of which is growing, it is estimated, at the rate of approximately 20% a year.

Annual earnings of the properties for the year ended July 31 1928, after deducting all operating expenses, maintenance and taxes other than Federal income tax, as reported, are approximately 2.65 times the annual interest charges on all first lien bonds. The appraised value of these properties as reported on the basis of reproduction cost new, less depreciation, is in excess of \$6,000,000. The subsidiary companies will have no outstanding funded debt upon completion of this financing. Compare V. 127, p. 1523, 1673.

American Superpower Corp.—Preferred Stock Offered.—
Bonbright & Co., Inc., are offering at \$99½ a share and dividend, to yield over 6%, an additional issue of 60,000 shares 1st preferred stock, \$6 series (no par value).

Data from Letter of L. K. Thorne, President of the Corporation.
Company.—Corporation was organized in Delaware, Oct. 26 1923, with broad powers to acquire and hold securities of electric power and light companies, to construct, operate or lease power stations and transmission lines and to act as fiscal agent for electric power and light properties.

The corporation holds for investment the common stocks of a number of successful and progressive companies in the electric light and power business. Its earnings consist primarily of dividends on these stocks. In addition, it has received fees in connection with the underwriting of offerings of additional stocks of certain of the companies in which it is interested, and has sold at substantial profits certain of its holdings. While the corporation is not limited by its charter as to the character of the investments that it may make, it is primarily concerned with the development of the electric power and light industry, and is particularly interested in the development, through interconnection, of large power systems along so-called "superpower" lines.

Present Holdings.—The corporation owns substantial interests in the following companies: Public Service Corp. of N. J.; Commonwealth Power

Corp., United Gas Improvement Co., Penn-Ohio Securities Corp., Utility Shares Corp., Southeastern Power & Light Co., National Power & Light Co., United Illuminating Co., United Light and Power Co., Electric Power & Light Corp., American & Foreign Power Co., Inc., Electric Bond & Share Securities Corp., American Gas & Electric Co., Waterbury Gas & Electric Co., Waterbury Gas Light Co., Penn-Ohio Edison Co., Consolidated Gas, Electric Light & Power Co. of Baltimore, Consolidated Gas, Co. of N. Y., American Power & Light Co., Columbia Gas & Electric Corp., Cities Service Co., and Detroit Edison Co. It also has holdings in several other companies.

Purpose.—Proceeds from the sale of this preferred stock will be used.

other companies.

Purpose.—Proceeds from the sale of this preferred stock will be used for the acquisition of additional interests in certain electric light and power

Associated Gas & Electric Co.—First Step for Conversion \$10,000,000 of 51/2% Convertible Debentures Nearly Exhausted.-

The company in a letter to holders of its 5½% convertible debentures due 1977, states that the amount of these debentures presented for conversion has been so large that the opportunity of converting on the most favorable basis provided in the indenture for the first \$10,000,000 is nearly exhausted. It is pointed out that when this occurs the basis of conversion for the next \$5,000,000 becomes \$115 principal amount of debentures, instead of \$110 for units of two shares of class "A" and one share of common stock of a present market value of approximately \$120.50. Holders are advised that if they still wish to take advantage of this offer they should send in their debentures at once. Unless this is done the opportunity of converting their debentures on the terms of the first step will have expired and the debentures will be converted on the terms of the next higher group open, namely \$115 per unit of 2 shares of class A and 1 share of common the converted on the terms of the next higher group open, namely \$115 per unit of 2 shares of class A and 1 share of common the converted on the terms of the next higher group open, namely \$115 per unit of 2 shares of class A and 1 share of common the converted on the terms of the next higher group open, namely \$115 per unit of 2 shares of class A and 1 share of common the converted on the terms of the next higher group open.

open, namely \$115 per unit of 2 shares of class A and 1 share of common stock.

In lieu of their inability to take advantage of the more favorable of the two conversion features, the company has decided to offer the holders the same privilege of exchange for class A stock or \$5 preferred and common stock, as has already been offered to the holders of \$6.50 dividend preferred stock. This offer provides for the exchange for each \$100 of debentures either 2 and 1-10th shares of class A stock or 1 and 1-10 shares of the new \$5 dividend preferred atock and 1-10th share of common stock. All stock to be exchanged under these offers must be received by Oct. 15 1928.

If the holders of the 5½% convertible debentures prefer to have them accepted at their call price of 105 upon subscriptions to the new 10-year 5½% investment certificates which are being offered to stockholders of Associated Gas & Electric Co, on "Rights," they are advised to deposit each \$1,000 5½% debenture at \$1,050 cash value and interest to be applied to the purchase of 5½% investment certificates at \$990 for each \$1,000 principal amount.

It is the policy of the company to retire the 5½% convertible debentures by conversion, exchange or purchase as rapidly as is practicable. In line with the general plan which underlies this policy, it has recently made limited offers for the conversion of its high yield preferred stocks and convertible securities and for the few issues of underlying bonds and preferred stocks which remain outstanding. It is stated that these exchange offers are being very generally availed of by the holders of such securities. See V. 127, p. 1673, 1523.

Electric Sales.—

Electric Sales .-

Electric Sales.—
The properties of the Associated System in Nova Scotia, New Brunswick and Prince Edward Island showed an increase in the output of electricity for the week ended Sept. 15 of 33.2% over the corresponding period for the preceding year and for the four weeks ended Sept. 15 showed an increase of nearly 31% over the preceding year.

The expansion of business and agriculture in Western Kentucky and Tennessee is continuing, the output of the Kentucky-Tennessee properties showing increases of 18.1% for the week and 19.5% for the four weeks in the output of electricity. Other properties, especially Staten Island where ground has just been broken for the construction of a third bridge connecting Staten Island with New Jersey shows increases of 144.5% for the week and 18.9% for the four weeks, while the Central and Western New York properties showed increases of 14% to 16%. Notwithstanding the ending of the summer season on Cape Cod the output of the Cape and Vineyard Electric Co, showed an increase of 13.1% for the week and 14.3% for the four weeks, while New Hampshire properties showed increases of more than 16% for both the week and the four weeks.—V. 127, p. 1673.

British Columbia Power Corp., Ltd.—Initial Din.—

British Columbia Power Corp., Ltd.—Initial Div.—
An initial quarterly dividend of 50 cents per share has been declared on the class A stock, no par value, payable Oct. 15 to holders of record Sept. 30. See offering in V. 126, p. 3296.

Brooklyn Borough Gas Co.—Extra Preferred Dividend.—
The directors have declared an extra dividend of 6½ cents a share in addition to the regular quarterly dividend of 75 cents a share on the 6% cum. partic. pref. stock, payable Oct. 1 to holders of record Sept. 17. Like amounts have been paid quarterly since July 1 1927.—V. 126, p. 4080.

Central Cities Telephone Co., Chicago.—Listed.—
The Baltimore Stock Exchange has authorized the listing of \$200,000 additional first lien collateral sinking fund 6% gold bonds, series of 1927.

Total \$4,799,154 Total \$4,799,154 V. 125, p. 2806, 2670.

Central Maine Power Co.—Tenders.— The State Street Trust Co., trustee, cor, State and Congress Sts., Boston, Mass., will until Oct. 5 receive bids for the sale to it of 1st mtge, bonds to an amount sufficient to exhaust \$46,782.—V. 127, p. 1674.

Central Power Co. (Del.).—Acquisition.—
The municipality of Unadilla, Neb., recently sold their entire interest and holding in the municipal electric distribution system to the above company. The latter was granted a 30-year franchise and also a 10-year street lighting and pumping contract.—V. 126, p. 2642.

#### Central Power & Light Co., San Antonio, Tex. Contract .-

The company's proposal to the Maverick County Water Improvement District No. 1, has been accepted. Under this contract the company will purchase water from the District in the following amounts: \$270,000 per year for the first 5 years: \$265,000 per year for the second 5 years, and \$222,000 per year thereafter.

This water will be delivered to the company at a point near its proposed hydro-electric plant, providing an 80-foot head between the point of delivery and the river bed. This water will permit the development of approximately 10,000 h.p. The facilities of the irrigation district will be used to convey the water by gravity from the point of intake to the hydroplant.

used to convey the water by gravity from the point of intake to the hydroplant.

The irrigation phase of the project will serve 60,000 acres. Sale of irrigation district bonds has been deferred pending the completion of negotiations for purchase of water by the company.—V. 126, p. 2787.

Central States Electric Co.—Listing.—
There have been placed on the Boston Stock Exchange list, temporary certificates for 100,000 shares (authorized 750,000 shares) convertible preferred stock-optional dividend series, with authority to add on notice of issuance and payment, 10,000 additional shares.—V. 126, p. 3114.

Central Vermont Ry.—Tenders for 500 Automobile Cars.—Announcement has been made by George A. Gaston and Judge John W. Redmond, receivers, that tenders have been called for 500 automobile cars for use on the lines of the railway. The cars will be of the rear end loading type and will embody all the latest features for the fast handling of automobiles. Tenders have also been called for 2 additional freight engines of the most modern and powerful type. These are in addition to 8 similar engines that were recently ordered for the Central Vermont lines. The automobile cars are intended to take care of the rapidly increasing automobile traffic which originates on the Grand Trunk Western lines of Canada's great transportation system and is carried over the Central Vermont for New England points.—V. 127, p. 405.

Cincinnati Gas & Electric Co.—Definitive Bonds.

Cincinnati Gas & Electric Co.—Definitive Bonds.
The Guaranty Trust Co. of New York is now prepared to deliver definitive 1st mtge. series A 4% gold bonds due April 1 1968, against the surrender for cancellation of its interim receipts for such bonds now outstanding. (For offering, see V. 126, p. 2308.).—V. 126, p. 2962.

Coast Counties Gas & Electric Co., San Francisco.—
Control Acquired by A. E. Fitkin & Co., Inc.—
A. E. Fitkin & Co., Inc., has acquired control of the above company through purchase of the common stock and 2nd pref. stock. The Coast Counties company owns and operates gas and electric properties serving more than 50 communities comprising a population estimated at 80,000 in the Counties of Santa Cruz, Santa Clara, Monterey, San Benito and Contra Costa, Calif.

Direction of the properties will be in the hands of the United States Engineering Corp., the personnel of which managed the National Public Service Corp., Inland Power & Light Co. and Western United Gas & Electric Co.

A dispatch from San Erancisco states that the

A dispatch from San Francisco states that the price to be paid for the common stock is \$250 per share and for the 2nd pref. stock \$130 per share. All persons wishing to take advantage of the offer must deposit their stock with the Bank of California in San Francisco within 14 days.—V. 127, p. 106.

Colonial Utilities Corp.—Initial Preferred Dividend.

The directors have declared an initial quarterly dividend of \$1.62\footnote{1.62}\$ per share on the 1st pref. stock, payable Oct. 1 to holders of record Sept. 29. See also V. 127, p. 1102, 1389.

Commonwealth Power Corp.—Listing.—
The New York Stock Exchange has authorized the listing of 149,551 shares of common stock (no par value) on official notice of issuance and payment in full, making the total amount applied for 1,645,054 shares. (See V. 127, p. 1389.)

Consolidated Gas Co. of New York .- Listing-

Consolidated Gas Co. of New York.—Listing—Common Stock Split-Up Two for One—Pro Forma Balance Sheet.—
The New York Stock Exchange has authorized the listing of 6,120,000 additional shares of common stock (no par value) on official notice of issuance, and 900,000 additional shares of \$5 cumulative preferred stock (no par value), on official notice of issuance and upon payment in full making the total amount applied for 2,100,000 shares of preferred stock and 10,440,000 shares of common stock.

Authority for and Purpose of Issue.—The issue of the additional shares of preferred and common stock was recommended by the board of trustees at a meeting held on May 15 and was authorized by the stockholders July

16 1928. The issuance of 900,000 additional shares of preferred stock and 1,800,000 shares of common stock was also approved by the Public Service Commission by an order dated Aug. 9. The increase in the authorized number of shares of common stock from 4,320,000 to 12,000,000 shares was effected by a certificate of increase filed in the office of the Secretary of State of New York on Aug. 11.

4,320,000 shares of common stock are being issued to the holders of record at the close of business on Aug. 17 1928 of the previously issued shares of common stock, at the rate of one additional share for each share previously outstanding, for the purpose of effecting a split-up of the previously outstanding common stock, two shares for one.

900,000 additional shares of the \$5 cumulative preferred stock and 1,800,000 additional shares of the common stock are to be issued in exchange for the 900,000 shares of the capital stock of the Brooklyn Edison Co., (constituting its entire outstanding capital stock), at the rate of two shares of such common stock and one share of such preferred stock for each share of capital stock of the Brooklyn Edison Co.

Pro-Forma Balance Sheet of Dec. 31 1927.

Consumers Power Co. (Me.) - Series \$5 Cumul. Pref.

Stock Offered to Shareholders.—

The stockholders at the annual meeting held Aug. 7 1928 authorized an increase of 250,000 shares without par value in the authorized preferred stock the new shares to rank equally with the previously authorized preferred stock and to be issued from time to time in one or more series. Such preferred stock can be issued and sold only when authorized by the Michigan P. U. Commission for capital expenditures, including the acquisition of property, the construction, completion, extension or improvement of facilities or for the improvement or maintenance of service, made necessary by the growth of the company and the increased demands for service.

A series of \$5 cumul. pref. stock without par value, with dividends payable Q.-J. 1, entitled upon dissolution to 100 and divs. and callable upon 60 days notice at 105 and divs. has been created and all stockholders are being offered an opportunity to purchase stock of said series at \$95 per share and accrued dividends to date of payment.

Subscriptions under this offer will be received up to and including Oct. 8, and may be paid in full or in installments, under this company's time payment plan of a down payment of \$10 per share and the balance in monthly installments of \$10 per share with a final payment of \$5.—V. 127.

Duquesne Light Co.—60 000 Kilevacti Payment of \$5.—V. 127.

Duquesne Light Co.—60,000 Kilowatt Power Station.—

Halford Erickson, Vice-President in charge of operation of the Byllesby Engineering & Management Corp. announces authorization has been made for the construction of a 60,000 kilowatt capacity steam electric generating plant in Pittsburgh, for the Duquesne Light Co., one of the Standard Gas & Electric Co., group of utilities. The cost of the initial installation of this new station will be approximately \$9,000,000, and it will be located adjacent to the Duquesne company's switch house, and south of the present power station, on Brunot Island.

The power house building will be large enough to house two 60,000 kilowatt turbo-generators and 6 boilers, but at present only one 60,000 kilowatt unit and 3 boilers are to be installed, provision being made for future extension to the station. It is estimated the completed station will cost \$13,500,000.

According to Mr. Erickson, work of drawing the plans for the new station will start immediately. Actual construction work will start late this year and continue through 1929.—V. 126, p. 3297.

Eastern Massachusetts Street Ry.—New Directors—To

Eastern Massachusetts Street Ry .- New Directors-To Increase Fares.

Increase Fares.—

H. R. Hardwick and F. H. Baird of Hayden, Stone & Co. and N. L. Amster have been elected directors, succeeding L. Sherman Adams, Roger Amory and F. T. Miller.

The public trustees announce a general increase in fares in all divisions of the system to take effect Oct. 1. The advance in fares is due to the award of the board of arbitration of an increase in wages of 3c. an hour. There will be no change in the rate of cash fare for the present, this rate being 10c. in all divisions. In general, the ticket fares will be changed by reducing the number of rides on the ticket.—V. 127, p. 1524.

-V. 126, p. 2789. Electric Bond & Share Securities Corp.—Rights. The directors voted to offer pro rata to the common stockholders of record Oct. 4, the privilege of subscribing at \$90 per share for one share of common stock for each 3 shares of common stock held. This will call for the issuance of 801.275 shares of authorized common stock. Payment for subscriptions is to be made at the office of the corporation, 2 Rector St., on or before Oct. 31.

The entire issue has been underwritten by a syndicate headed by Bonbright & Co., Inc., at the offering price.

Assets and Surplus Aug. 31 1928.—

Pres. S. Z. Mitchell in a letter to stockholder Sect. 25.

Assets and Surplus Aug. 31 1928.—
Pres. S. Z. Mitchell, in a letter to stockholders Sept. 25 says:
The assets of Electric Bond & Share Securities Corp. as of Aug. 31 1928, include cash and call loans receivable of \$83.355,252, notes and loans receivable of \$20.650,000, accrued interest and dividends receivable of \$372,474, prepaid taxes of \$7,023, miscellaneous investments (carried at cost) of \$764,325 and the following securities of Electric Bond & Share Co.—300 shares of 6% preferred stock and 700,000 shares of common stock (being the entire amount of outstanding common stock of Electric Bond & Share Co.).

The company as of Aug. 31 1928, had no debt, except \$1,346, representing sundry accounts payable. Its surplus (entirely earned) was \$3,321,249. It had outstanding 2,403,816 shares of capital stock, all of one class and without nominal or par value, on which dividends are paid quarterly at the annual rate of \$1 per share.—V. 126, p. 2474.

Electric Public Utilities Co.—Definitive Bonds Ready.—
Definitive 3-year 5% gold bonds, due May 1 1931, are now ready for delivery in exchange for outstanding interim certificates at the Guaranty Trust Co. of New York. For offering, see V. 126, p. 3115.

delivery in exchange for outstanding interim colored and delivery in exchange for outstanding see V. 126, p. 3115.

Federal Light & Traction Co.—Listing.—

The New York Stock Exchange has authorized the listing on or after Oct. 1 1928 of not exceeding \$65,820 common stock (par \$15) on official notice of issuance as a stock dividend, making the total amount applied for \$6,648,975 common stock.

The company's statement to the New York Stock Exchange says: Since June 6 1928 the Trinidad Electric Transmission, Railway & Gas Co. has acquired from the Aguilar Light & Power Co. the electric light and power plant, franchises and other assets heretofore operated and owned by the latter company at Aguilar, Colo.

The New Mexico Power Co. has acquired the electric light and power plant and assets heretofore operated under the name of Springer Light & Power Co. at Springer, N. Mex.

Opens New Section .-

Opens New Section.—
The highest transmission voltage in Canada has been started with the opening of the new Quebec section between Paugan Falls and Toronto, with operation at 220,000 volts. Twelve transformers for operation at 220,000 volts were supplied to the company by the Canadian General Electric Co., Ltd. Nine of these transformers are rated at 19,000 kv.a., 25 cycles, and step the generator voltage up from 6,600 to 220,000 volts. The remaining three are rated at 20,000 kv.a., 25 cycles, and will be used to supply power to a 110,000-volt transmission system from the 220,000-volt line. The generating stations of the Gatineau company are approximately 250 miles from Toronto.—V. 126, p. 4081.

General Water Works Corp.—Initial Dividend.—
The directors have declared an initial quarterly dividend of \$1.75 per share on the \$7 series preferred stock, payable Oct. 1 toholders of record Sept. 20. See offering in V. 127, p. 1524.

Grand Rapids Grand Haven & Muskegon Ry.—Sale.—
The property will be sold at foreclosure on Oct. 25, under the direction of Kirk E. Wicks, Master in Chancery. Certain properties including several lots which have been released from the mortgage, will not be sold. The announcement reads that all bids, whether for the entire property or only certain parcels, will be submitted to the Court for its further proceedings, including reception of further bids in open Court at a date to be announced later.—V. 126, p. 1980.

gold bonds, series "C," 4½% (see description in V. 126, p. 1659).

Data from Letter of E. W. Hill, Vice-President of the Company.

Business.—Company does the entire electric power and light and gas business in Memphis, Tenn., and supplies electric power and light to the remainder of Shelby County, serving a population estimated at 210,000. Of the company's gross earnings from operation for the 12 months ended Aug. 31 1928, about 73% was derived from sale of electricity and about 27% from manufactured gas. Company expects to begin distributing natural gas to its consumers early in 1929, having recently made a long-term contract with the Memphis Natural Gas Co. for a supply of natural gas from the Monroe and Richland gas fields in northern Louislana.

Company owns all the capital stock of the local street railway company, which is operated on an economic basis, and it supplies at wholesale all the current used by that company.

Property.—The property includes an electric generating station with a present installed generating capacity of 54,000 kw., a water gas plant having a daily capacity of 12,000,000 cu. ft., and extensive electric and gas distributing systems.

Purpose.—Proceeds will be used to reimburse the company for expenditures made for additions to property and for other corporate purposes.

Security.—These bonds are to be direct obligations of the company and will rank equally with the \$9,775,000 bonds series A and C now outstanding.

They will be secured by a direct first mortgage upon a substantial portion of the present property, including the company's electric generating station, and a direct mortgage upon the remainder of the physical property, subject only to two closed issues of underlying mortgage bonds aggregating \$1,734,000 principal amount outstanding and maturing in 1929 and 1931, respectively.

Valuation.—The valuation for rate-making purposes of the company's properties as of Aug. 31 1928, based upon an appraisal made in 1920 by independent engineers designated by the Tennessee Railroad

Net earnings for the 12 months ended Aug. 31 1928 amounted to more than 334 times the \$699,075 annual interest requirements on total funded debt as shown above.

Supervision.—The company's operations are supervised (under the direction and control of its board of directors) by the Electric Bond & Share Co.—V. 126, p. 1659.

Montreal Light, Heat & Power Consolidated.—

Dividend Rate Increased.—

The directors have declared a quarterly dividend of 60 cents per share on the common stock, no par value, payable Oct. 31 to holders of record Sept. 30. Previously, the company paid quarterly dividends of 50 cents per share.—V. 126, p. 577.

per share.—V. 126, p. 547.

Mountain States Power Co.—Starts New Line.—
Work has been started by the company on 70 mlles of 33,000-volt transmission line extending from Lovell to Worland, Wyo., by way of Greybull, in order to deliver power from the transmission system of the United States Reclamation Service, now serving Lovell, to the town of Greybull and Worland, according to C. M. Brewer, Vice-President and General Manager.

and Worland, according to the Manager.

Manager.

This line will also be in a position to serve other towns in the Big Horn This line will also be in a position to serve other towns in the Big Horn Valley such as Basin and Manderson. Work on this project was started Aug. 15 and was scheduled for completion on Oct. 15. To date approximately 30 miles of poles have been placed and the proposed construction schedule is being maintained.

The purpose of this development is to provide power in order that isolated plants at Greybull and Worland may be replaced, both plants having become inadequate to meet the demand for service in this territory.—V. 127, p. 1526.

North American Co.—Listing.—
The New York Stock Exchange has authorized the listing on or after Oct. 1 1928 of 121,948 additional shares common stock without par value, on official notice of issuance as a stock dividend.

Radio Corp. of America.—Wireless Service is Proposed for Business Centers—Corporation Announces Plan to Link More than 30 Cities in New System.

Extension of the wireless communication system of the corporation to 30 more of the principal commercial centers of the United States, for which 148 channels in the short wave band would be employed, including those already allocated the corporation, was proposed before the Federal Radio Commission Sept. 26. Colonel Manton Davis, General Counsel for the corporation, presented arguments in behalf of the corporation's application for 33 additional standard channels in the continental point to point band, which would be "doubled up" so as to provide 67 frequencies, and which, included with present trans-oceanic frequencies assigned the corporation would make available the 148 channels.

During the presentation of testimony, witnesses on behalf of the corporation emphasized the urgent need for a domestic radio network to operate as a "feeder" for the R. C. A. trans-oceanic system, and also to operate as a "feeder" for the R. C. A. trans-oceanic system, and also to operate as a companie of the continental bounds of the United States. Competition with the land line telegraph and cable companies, they stated, places the corporation at a disadvantage. Setting up the continental network would ultimately lead to a reduction of message rates to the public just as has been the case in the trans-Atlantic cable and radio competition, Colonel Davis contended.

A discussion of law as t pertains to telegraph and radio competition, between the Chairman of the Radio Commission, Ira E. Robinson, and Colonel Davis contended.

A discussion of law as t pertains to telegraph and radio competition, between the Chairman of the Radio Commission, Ira E. Robinson, sated that there are at present available wire facilities to handle domestic high speed traffic. "Shall

Summary of Letter of Messrs. Henke and Schmitz, Man. Directors.

Summary of Letter of Messrs. Henke and Schmitz, Man. Directors.

Company.—The corporation has experienced a remarkable growth since its organization in 1898, and at the present time, with its subsidiary companies, comprises one of the largest electric light and power systems in Europe with respect to property value, earnings, capacity of power stations and number of customers served. The business of the corporation is especially well integrated. Electric energy is generated in corporation's power stations from fuel obtained from the adjoining coal mines of subsidiary companies, and is supplied to over 440,000 industria and residential customers through the corporation's high tension transmission lines and distribution systems.

The territory served has an area of about 9,360 square miles, and includes a large part of the Rhineland, extending from the Netherlands frontier on the north and west, into the Province of Westphalia on the east, and south to the River Nahe. This area includes the Ruhr District, the most important industrial section of Germany, and also the so-called Siegerland, known for its iron ore deposits. As there are numerous industries of a widely diversified character, the propserity of the territory is not dependent on the success of any one business. The communities entirely supplied by the system have a population of over 8,000,000 and include the cities of Essen, Muhlhelm-Ruhr, Gelsenkirchen, Crefeld, Munchen-Gladbach, Wesel, Osnabruck, Remscheld, Solingen, Siegen, Bingen, Kreuznach and Neuss, In addition, the corporation furnishes electric energy to large portions of the cities of Cologne, Dusseldorf, Duisburg, Coblenz and Oberhausen, and to the extensive plants of the largest inland harbor of Europe at Ruhrort. The electric output of 1,650,000,000 diowatt-hours for the fiscal year moded June 30 9128, was the greatest in the history of the corporation; and of this amount, about 81% was generated in the corporation's power sta

United Light & Power Co. (Md.).—Purchase of American Light & Traction Explained.—In connection with the acquisition of the American Light & Traction Co., the United Light & Power Co. has issued the following explanation of the transactions involving change of control:

The recent acquisition of the controlling interest in American Light & Traction Co. by United Light & Railways Co. of Delaware, a wholly subpublic financing.

The only additional funded obligation of the consolidated group consists of \$26,872,970 of 5% 20-year debentures of the United American Co., a newly organized subsidiary of United Light & Railways Co. There were also issued 150,000 shares of class "A" common stock of United Light & Power Co. These securities passed to the Koppers interests. The consideration received by United Light & Railways Co. for these securities was the holdings of preferred and common stocks of American Light & Traction Co. owned by the Koppers interests.

The final effect of these transactions has been to increase the equity exhent. This is also true of the securities of the United Light & Power Co. Earnings available for securities of these companies have also increased materially, as demonstrated by the fact that consolidated net earnings of the combined properties for 12 months ended July 31 1928, were equivalent to \$1.31 a share of United Light & Power Co. common stock, compared with 93 cents a share for the 12 months ended July 31 1928, which did not include consolidated earnings of American Light & Traction Co.—V. 127, p. 1677, 1528.

United Public Utilities Co. (N. J.).—Pref. Stock Offered.

United Public Utilities Co. (N. J.).—Pref. Stock Offered.—Thompson Ross & Co. and Hale, Waters & Co., are offering an additional issue of 15,000 shares \$6 dividend series preferred stock (no par value) at \$91.50 and div., yielding over 6.55%.

Over 6.55%.

Transfer Agents: Bankers Trust Co., New York and Central Trust Co. of Ill., Chicago. Registrars: Seaboard National Bank of the City of New York and National Bank of the Republicof Chicago.

Listed.—This stock is listed on the Chicago Stock Exchange.

Data from Letter of Ernst Jacobson, Pres. of the Company.—A New Jersey corporation. Owns all of the outstanding bonds, indebtedness (except current indebtedness not in excess of current assets) and at least 95% of the capital stock of operating subsidiaries furnishing public utility service to a centralized group of 58 communities in the territory lying between Dayton, Ohio, and Winchester, Ind., and to a centralized group of 78 communities in North and South Dakota, and fur-

nishing ice service in Anniston and Mobile, Ala., Fort Worth, Tex., Fort Smith, Ark., and to nine communities in Louisiana, including New Orleans. Company also controls, through subsidiaries, the distribution system supplying natural gas to the domestic population of Fort Smith, Ark. Electric light and power is supplied to 27,369 customers in 128 communities an gas to 19,634 consumers in 23 communities. The combined population of the territory supplied with electric light and power and gas service alone is estimated to be in excess of 250,000.

The properties of the operating subsidiaries include electric power stations having a combined generating capacity of 22,337 h.p.; ice plants having a daily ice-making capacity of 1,585 tons; gas plants of 395,000 cubic feet daily capacity, supplemented by natural gas; 1,026 miles of electric transmission lines: 287 miles of gas distribution mains and 148 miles of gas transmission lines.

Assets.—Net assets of the company, based on valuations by independent engineers, with subsequent additions at cost, indicate a value of over \$200 per share for this preferred stock.

The New York Stock Exchange has authorized the listing of 23,000 additional shares of class A stock without par value, on official notice of issuance and payment in full, making the total amount applied for 748,000 shares of class A stock.

On Sept. 4 1928, the directors authorized the issuance of 17,875 shares of the 23,000 shares of class of stock embraced in the present application to continue the corporation's policy of offering such stock to class A stock-holders in lieu of cash dividend for the current quarter of 50 cents per share, payable Oct. 1 1928, such sale to be at the rate of \$20 per share. On the same date the directors approved the sale of the remaining 5,125 shares for cash. The proceeds are to be used for the acquisition of additional properties.

The exchange has also authorized the listing of \$20,000,000 5½% 20 year gold debentures.

Acme Syndicate, Ltd.—To Increase Directorate.—
The directors have decided to increase the directorate to 15 members, and a meeting was called for Sept. 29 at which time stockholders will vote on the proposal. The corporation was organized in June for the purpose of financing medium sized industrial and mercantile enterprises. C. Lester Horn is Chairman of the board.

Five new directors were added to the company's board this week. They are James A. Councilor, of Washington, D. C.: George C. Van Tuyl, Jr., V.-Pres, of the North American Title & Guaranty Co.; J. Lewis Luchenbach, V.-Pres, of the American Bureau of Shipping: Gilbert P. Taylor, also of the American Bureau of Shipping and C. O. Yoakum, of the General Securities Corp. of Birmingham, Ala.—V. 126, p. 3451.

Acoustic Products Co.—To Offer Stock.—
E. F. Gillespie & Co. Inc. has purchased for public offering next week 20 000 shares of common stock of this company better known as "Sonora" which represents the merger in 1927 of the Sonora Phonograph Co. Inc. the Premier Laboratory Co. and the Bidhamson Corp. The company plans to cover the entire field in sound reproduction both recorded and broadcast and will also specialize in the synchronization of sound with film for use in theaters, churches, schools and auditoriums.—V. 125 p. 2150, 1974.

Advance-Rumely Co.—Dividend Outlook.—

"There is no thought of resuming dividends on the preferred stock," according to an official of the company, commenting on the outlook for dividend resumption.

"We will owe the banks about \$3,000,000 at the end of the year," he said. "There has been no discussion or even suggestion of a merger of our company with any other company and we know of no reason why our stock, especially the common, should rise to its present high market prices. "However, our deliveries from Jan. 1 1928, up to the present are about 23% ahead of deliveries for the same period of last year and due to the fact that last year we liquidated a big inventory of machinery that was carried over from the year before, our factory operations this year were very much heavier than in 1927 with a resultant saving in factory overhead, and we believe that instead of winding up the year with a substantial loss, as was the case in 1927, we will wind up this year with a modest profit."—V. 126. p. 1984.

Aluminum Co. of America. - Six New Complaints Sub-

Aluminum Co. of America.—Six New Complaints Submitted Against Company.—

Amendments to the original complaint, alleging that the company has in six instances engaged in practices in violation of the Act of 1914 creating the Federal Trade Commission in addition to violations charged in the original complaint against that company were submitted to the Federal Trade Commission.

Four amendments were offered by Mr. Whiteley. The first amendment applied to the first count, charging violation of the Clayton Act against unlawful restraints and monopolies, and was of minor importance. No objection was raised by the respondents.

The remaining amendments fell under the second count, which charges unfair practices in violation of the Federal Trade Commission. Act. The second paragraph of this count charges that the Aluminum Co., has employed a scheme to gain monopoly of the said castings industry of the United States by using six specified practices.

The second amendment would insert in the introductory clause of this paragraph the words "and is now using, among others, the following practices, to wit." The same insertion is made in paragraph 3, which charges a monopolistic scheme to gain, by specified practices, nonopoly of aluminum raw material, of aluminum ingots and sheets, of secondary aluminum, and of aluminum fabricated products.

The chief of counsel of the Aluminum Co., William W. Smith, opposed these amendments on the grounds that they would "remove the limits" heretofore placed in the investigation of the complaint.

The last amendment offered would add six specified practices to those listed under paragraph 3 in the original complaint. These practices charges the specific charges might as well be omitted entirely and the respondent be not acquainted with the charges against it," declared Mr. Smith.

The last amendment offered would add six specified practices to those listed under paragraph 3 in the original complaint. These practices charge the respondent with acquiring water-power or riparian rights, with

to shipments, is expanded into "schemes" which have no relation whatsever to shipments.

The continued Mr. Smith. Mr. Smith of the strongy, is unfair to the respondent continued Mr. Smith. Mr. Smith of the strongy, is unfair to the respondent continued Mr. Smith. American Commercial Alcohol Corp.—Definitive Bonds.
The National City Co., W. M. Schall & Co. and Bower, Pogue. Pond & Vivian, announce that definitive 1st mtge. bonds are ready for delivery in exchange for interim certificates at the office of the National City Co., 52 Wall St., N. Y. City.
These bonds, which carry stock purchase warrants giving the holder the right to purchase 5 shares of common stock for each \$1,000 bond at a price of \$30 per share compared with current quotations of \$70 a share, were offered in April of this year at 98 and int. to yield 6.20% and are now selling at approximately 112. (For offering, see V. 126, p. 2793.)—V.127, p. 1255.

American Eagle Aircraft Co.—Financing.—
Public financing for the company will shortly be announced by a banking roup headed by Billings. Ward & Co. The American Eagle Aircraft Co. at present producing 18 planes a week and is reported to have on hand 70 unfilled orders. Financing will provide funds for additional plants and equipment which will enable the company to increase their output our times.

American Ice Co.—Earnings.—

American Ice Co.—Earnings.—

August earnings of the company before Federal taxes and depreciation were \$1,151,463. This represents an increase of 43.1% over August of last year and was the best month in the company's history.

Pres. Charles C. Small says: "In both July and August the company's earnings reached new high peaks. The hot weather of these months was a favoring factor, although the results of other months have also been good. For example, earnings for the first 8 months of the present year, before Federal taxes and depreciation, have amounted to \$3,872,000, an increase of 27.5% for the same period of last year. It now appears that the current year will be the company's best."

The directors have declared the usual quarterly dividends of 1½% on the preferred stock and 50 cents a share on the common, both payable Oct. 25 to holders of record Oct. 5.—V. 127, p. 1678.

American Sumatra Tobacco Co.—To Increase Stock.—

American Sumatra Tobacco Co.—To Increase Stock.—
The stockholders will vote Oct. 17 on increasing the authorized common stock (no par value) from 175,000 shares to 225,000 shares.

A 3% stock dividend has been declared on the common stock, subject to the approval of the above proposed increase, payable Nov. 15 to holders of record Nov. 1. See also V. 127, p. 1678.

American Trustee Share Corp.—Div. on Ser. B Shs.—
The Diversified Trustee Shares have declared a semi-annual dividend of 87.196 cents per share on the series B shares, payable Oct. 1. This brings the annual dividend for 1928 to \$1.30355.—V. 126, p. 3931.

American Wholesale Corp.—Preferred Stock Called.—
All the 7% cum. pref. stock has been called for redemption on Jan. 2 1929 at 110 and div. at the Central Union Trust Co., 80 Broadway, N. Y. City. Books for the transfer of the preferred stock will be closed on and after Dec. 18 next.—V. 127, p. 550.

after Dec. 18 next.—v. 127, p. 550.

Anderson (Ind.) Theatre Realty Co.—Preferred Stock Offered.—The Meyer-Kiser Bank, Indianapolis, recently offered at par and div. \$300,000, 6% 1st preferred stock. The stock is to be secured by a new theatre, store and commercial building in the heart of the business district of Anderson, Ind., held under a 99-year leasehold, valued, with theatre fixtures, at \$500,000.

The stock is dated Sept. 1 1928, due annually Sept. 1 1930-1943. Divs. payable Q-M. Callable at 101½ up to and incl. Sept. 1 1934, and at 101 thereafter.

The stock is dated Sept. 1 1928, due annually Sept. 1 1930-1943. Divs. payable Q-M. Callable at 101½ up to and incl. Sept. 1 1934, and at 101 thereafter.

Location and Building.—Company has acquired on advantageous terms the 99-year leasehold estate in an irregularly shaped piece of ground at the north-east corner of 12th and Meridian Sts., Anderson, Ind. This plot has frontage of 114 ft. on Meridian St. and a depth of 120 ft. on 12th St., and in addition to the square thus formed, an additional plot 72 by 58 feet in the rear of the Meridian St. frontage, thus providing an "L" shaped piece of ground. This location is in the very heart of Anderson's business section.

Upon this site the company is erecting a 3-story fireproof theatre, store and commercial building at a cost of \$450,000. This building will be constructed entirely of fireproof steel and reinforced concrete with granite and terra cotta trim, in Spanish type, and from an architectural standpoint will be one of the outstanding edifices of the City of Anderson.

The north portion of the building will be devoted to a moving picture theatre of the latest type, containing in excess of 1,600 seats, with storerooms on either side of the lobby. The south half of the building will be devoted to mercantile storerooms.

Income.—The theatre portion of the building has been leased and will produce a gross rental of \$28,000 per annum, and the income of the mercantile portion of the building has been conservatively estimated at \$37,000, a total gross income of \$55,000 per annum, whereas expenses of every nature have been liberally estimated at \$29,000 per annum, leaving a net income available for the obligations of the preferred stock of \$36,000 per annum, or double maximum dividend charges.

Sinking Fund.—Company agrees to pay monthly to the underwriters as fiscal agents for the first preferred stock, one-twelfth of the amount necessary to meet each year's dividend and retirement requirements.

Atlantic & Pacific International Corp.—Financial

Atlantic & Pacific International Corp. - Financial Statement.-

Statement.—
The statement as of Aug. 31 1928, shows 27.6% of the corporation's resources in cash and call loans compared with 46% in cash and call a few weeks earlier. The company which operates as an international investment trust, had its investments distributed as of August 31 as follows: Bonds 47.8%, preferred stocks 7.6%, common stocks 17%, money on call 16.5%. Government securities comprised 11.3% of resources, industrials 32.6%, public utilities 15.7%, banking institutions 8%, railroad 4.8%. Geographically, distribution was as follows: United States and Canada 64%, including 27 issues and its cash and call loans; Germany, 23.9% in 20 issues; France, 3.5% in 2 issues; Hungary, 2.8% in two issues; Japan, 2.3% in 2 issues; Austria, 2.1% in 3 issues; Italy, 1.1% and Jugoslavia, 0.3% in 1 issue each.

—V. 127, p. 263.

Atlas Plywood Corp.—Acquires Canadian Company.—
The corporation has acquired for cash the properties of the Bedford Mfg.
Co. of Waterloo, Que. The plant of the latter will be equipped as a plywood veneer mill, Ralph M. Buck, President of the Atlas company, announced. The main mill building will be in operation by November, with a weekly production capacity of 400,000 square feet of plywood. There is a duty of about 30% on American plywood products entering Canada.—V.

Backstay Welt Co.—New Financing.—

New financing is expected shortly consisting of 30,000 shares of common stock. The company, an Indiana company, is the outgrowth of apartner-ship formed in 1889 and supplies approximately 60% of the demand of the automobile industry for welts, gamps, molding and binding used principally for trimming, weather-stripping and elimination of noise and friction. The financing is to be made by Fletcher American Co. Minton, Lampert & Co., and Ralph A, Bard & Co.

The financing is to be made by Fletcher American Co; Minton, Lampert & Co., and Ralph A, Bard & Co.

Baltimore Brick Co.—Bond Retirement, &c.—
In explaining the decision of the board to retire all bonded indebtedness and at the same time defer preferred dividends, President Carroll Van Ness made the following statement:

"The funds necessary to retire the issue have come largely from the sale from time to time of real estate owned by the company from which the clay has been removed, and from other real estate no longer needed in the operation of the company. The company's corporate mortgage wisely provided that a portion of the proceeds of such sales of real estate could be used to acquire additional clay lands, of which the company has availed itself.

"The trustee has purchased a large portion of the bond issue in the open market, and interest on these bonds has been used to augment the proceeds from the sale of real estate and in turn applied to the acquisition of bonds. The outstanding bonds, with July 1 1929, and subsequent coupons should be detached and collected in the usual manner.

"During the last 5½ years up to April 1 1928, dividends have been paid on the preferred stock at 6% per annum, thus taking care of the 5% regular dividend rate and paying 1% per annum on account of the accumulation, in this way reducing the accumulated dividends from 82% in 1923, to 74% in 1928. As the semi-annual dividends of 3% each, paid respectively in Sept. 1927, and March 1928, were paid largely out of accumulated surplus, and as the current earnings of the company are not sufficient in themselves to warrant the payment of the 6 months' dividend now due, the directors have decided that it would be wise to conserve the resources of the company until such time as business conditions, which have not been satisfactory for nearly two years, warrant the resumption of such dividends."

Barnsdall Corp.—Resumes Dividend.—The directors

Barnsdall Corp.—Resumes Dividend.—The directors have declared a dividend of 50 cents per share, payable Oct. 31 to holders of record Oct. 10. The last previous dividend was 2½% in class A stock on Feb. 6 1928. A similar stock distribution was made on Nov. 1 1927., while on Apr. 5 and July 15 1927, quarterly cash payments of 62½ cents per share (2½%) were made.—V. 127, p. 955, 685.

Blaw Knox Co., Pittsburgh.—To Increase Stock.— The stockholders will vote Oct. 11 on increasing the authorized common stock from 360,000 shares, par \$25, to 1,500,000 shares of no par value.—V. 127, p. 412.

Bendix Corp. (III.)—Tenders.—
The Union Trust Co., trustee, 7 South Dearborn St., Chicago, III., will until Sept. 29 receive bids for the sale to it of 5-year 6% sinking fund secured gold notes to an amount sufficient to exhaust \$100,000, at a price not exceeding 101 and int.—V. 127, p. 1393.

Black & Decker Mfg. Co.—Dividend Dates.—
The quarterly dividend of 25c. per share recently declared on the common stock is payable Sept. 29 to holders of record Sept. 21. Previously quarterly dividends of 20c. per share were paid on this issue. Compare V. 127, p. 1679.

V. 127, p. 1679.

(E. W.) Bliss Co.—Plans Aero Motors Production.—
Production of the Bristol "Jupiter" airplane motor probably will be started in the United States before the end of the year by this company, which was recently given an exclusive license for the manufacture and sale of the engines in this country, it is announced. Two model motors from the plants of the Bristol Airplane Co., Ltd., at Bristol, England, have arrived in this country and will be given exhausted tests by the United States Government preliminary to the beginning of manufacturing operations by the Bliss company. Changes in the Bliss plants are being speeded up to permit production of the new motor on a large scale as soon as the tests are completed. The "Jupiter" engine is considered the most highly perfected motor of the static radial air-cooled type.

The Bliss company, which is one of the oldest American manufacturers of various types of machinery, operates plants in Brooklyn, N. Y., Hastings, Mich., Salem and Cleveland, O., and in Paris and London.—V. 127, p.

Blue Ribbon Ltd., Winnipeg.—Initial Common Div.—
The directors have declared an initial quarterly dividend of 50c. per share on the common stock, no par value, payable Oct. 1.
The directors have also declared a quarterly dividend (No. 2) of 13/8% on the 31/8% cumul. conv. red. pref. stock (par \$50), payable Nov. 1 to holders of record Oct. 15. An initial dividend of like amount was paid on the pref. stock on Aug 1 last.—V. 127, p. 412

on the pref. stock on Aug 1 last.—V. 127, p. 412

Boeing Airplane Co.—Operations in August.—
A 61% increase in eastbound air mail from the San Francisco Bay cities over the Boeing Air Transport, Inc., for the month of August is reported by W. G. Harron, Vice-President in charge of traffic. Total poundage o Pacific Air Transport planes flying between Seattle and Los Angeles increased 71%. Eastbound mail carried by Boeing Air Transport during July totaled 9,519 pounds, as compared with 15,402 pounds for August. During July the Pacific Air Transport coast line carried 8,890

pounds. August loads totaled 15,170 pounds. Northbound mail on the Pacific Coast exceeded southbound mail in volume by about one-third. During July there were 181 passengers carried by the Boeing Air Transport, Inc.

An air mail route direct from Chicago to Atlanta cutting many hours from the transit time of letters and express from the far West to the Southeast, will go into operation within the next 6 months, according to the terms of a contret awarded recently by Postmaster-General New to the Interstate Airlines, Inc., of Chicago. The route is 790 miles long, and passes through Terre Haute, Evansville, Nashville and Chattanooga, with a spur from Evansville to St. Louis. It will make connection at Atlanta with the Atlanta-New Orleans route, and with a route to be established from Atlanta to Miami. Connection will be made at Chicago with the St. Paul-Minneapolis line, Kansas City, and with Boeing Air Transport, transcontinental trunkline which feeds all lines serving the Pacific Coast. The new line will be flown on a 7-hour schedule, which is an average of more than 100 miles per hour.—V. 127, p. 111.

flown on a 7-hour schedule, which is an average of more than 100 miles per hour.—V. 127, p. 111.

Borden Co.—Listing.—

The New York Stock Exchange has authorized the listing of 15,416 additional shares of capital stock (par \$50) on official notice of issuance, in part payment for the assets and business of Thompson's Malted Milk Co. and its associated company, Thompson's Malted Milk Co. of Canada, Ltd.; and 8,000 additional shares of capital stock, on official notice of issuance, in payment for the assets and business of Clover Leaf Milk Co., making the total amount applied for to date 1,250,348 shares (of an aggregate par value of \$62,517,400).

All of said stock is, or will be when issued, full paid and non-assessable with no personal liability attaching to stockholders.

Under authority of resolutions duly adopted by the board of directors, at a meeting held Aug. 7, the officers of the company authorized the following transactions:

(a) The purchase by the company of all the assets and business of Thompson Malted Milk Co., Wisconsin, and of Thompson's Malted Milk Co. of Canada, Limited, part payment to be made by the issue and delivery of 15,416 shares of capital stock of the company, and the assumption by the company of all liabilities (excepting certain tax liabilities) of each of the corporations existing at the time of purchase; and further payment to be made by furnishing funds for the redemption at the earliest practicable redemption date of \$492,500 preferred stock (par value \$25 per share) of Thompson's Malted Milk Co., redeemable at \$27.50 per share) of Thompson's Malted Milk Co., redeemable at \$27.50 per share of closing.

(b) The purchase of all the assets and business of Clover Leaf Milk Co. (Ili.), payment to be made by the issue and delivery of \$,000 shares of capital stock and the assumption by the company of all liabilities (excepting certain tax liabilities) of the corporation existing at the time of purchase.—V. 127, p. 1531.

Boston Rubber Shoe Co.—Stock Decreased. The company has filed with the Massachusetts Comp The company has filed with the Massachusetts Commissioner of Corporations and Taxation articles of amendment whereby the authorized capital stock is reduced from \$5,000,000, par \$100, to \$1,000,000, by the purchase for retirement of 40,000 shares of stock at par.—V. 123. p. 2144.

Boston Woven Hose & Rubber Co.—Extra Div.—
The directors have declared an extra dividend of \$1 per share on tommon stock, payable Dec. 15 to holders of record Dec. 1. The regularity dividend of \$1.50 per share was paid on Sept. 15. The compa on Nov. 15 1927 paid an extra dividend of \$2 per share on this issue. V. 125, p. 1976.

Bullard Machine Tool Co.—Extra Dividend.—
The directors have declared an extra dividend of 50 cents per share on the common stock, no par value, payable Oct. 15 to holders of record Sept. 29. An extra dividend of file amount was paid on July 31 last.
The directors also declared the regular quarterly dividend of 37½ cents per share on the common stock, payable Sept. 29 to holders of record Sept. 18.—V. 127, p. 551.

Canada Foundries & Forgings, Ltd.—Initial Dividend.—An initial quarterly dividend of 37½ cents per share has been declared on the class A shares, no par value, payable Oct. 15 to holders of record Oct. 1. This stock was recently issued in exchange for the recently outstanding 7% pref, stock on the basis of 4 class A shares for each pref, share. See V. 127, p. 264.

Canadian Fairbanks-Morse Co., Ltd.—3% Back Div.—
The directors have declared a dividend of 3% on the pref. stock on account of accumulations, in addition to the regular quarterly dividend of 11%%, both payable Oct. 15 to holders of record Sept. 29. A similar distribution on account of arrearages was made on Mar. 15 and July 16 of this year.—V. 126, p. 3932.

Canadian Industries, Ltd.—Extra Dividend.—
The directors have declared an extra dividend of 25 cents per share in addition to the regular quarterly dividend of 50 cents per share on the commenstack, no par value, payable Oct. 31 to holders of record Sept. 30.—V. 127, p. 551.

Canadian Westinghouse Co.—New Officers.— H. U. Hart has been appointed Vice-President and Chief Engineer and corge R. Kerr Vice-President and Treasurer.—V. 126, p. 2970.

Central Aguirre Sugar Co.—Recapitalization Plan.— he following letter, dated Sept. 20 1928, has been sent

Central Aguirre Sugar Co.—Recapitalization Plan.—
The following letter, dated Sept. 20 1928, has been sent to stockholders:

You are a stockholder in Central Aguirre Sugar Co., a Porto Rican corporation which at the present time has outstanding 180,000 common shares (par \$20). A number of the larger stockholders, who together own more than a majority of the cutstanding shares, think it advisable that the present par value shares be exchanged for new no par shares on the basis of four new shares for each share now held. As the laws of Porto Rico contain no provision for the issue of no par shares by Porto Rican corporations, it has been proposed that a new holding company be formed in the United States and that the present stockholders transfer their present holdings to the new company and receive in exchange four no par common shares of the new company and receive in exchange four no par common shares of the new company for each share so transferred.

The formation of such a holding company requires no official act on the part of the officers or directors of the company. However, directors have felt that the demand of stockholders for a new holding company was sufficiently urgent to justify them in taking the initiative. They have accordingly considered the matter in conjunction with your officers and executive committee and have come to the conclusion that the proposal has merit, and that sufficiently substantial advantages will accrue to the stockholders to justify this action. Consequently directors have designated an informal committee to take such steps in the matter as they deemed to be advisable.

The committee has accordingly organized a new company in the nature of a voluntary association under a declaration of trust called Central Aguirre Associates, with authorized transferable certificates consisting of 720,000 no par common shares which will be sufficient to accomplish the proposed exchange.

The committee has designated United States Mortagae & Trust Co., 55 Ocdar St., N. Y. City, and the First Na

entitled upon surrender of your certificates of deposit. There will be no charge to depositing stockholders. All expenses in connection with the proposed plan will be paid by Central Aguirre Associates.
All communications to the committee should be addressed to J. B. Keyes, Secretary, 45 Milk Street, Boston, Mass.

Committee.—Charles G. Bancroft, John Farr, Charles G. Meyer and James H. Post.—V. 127, p. 1680.

Central Atlantic States Service Corp.—Dividend.—
The directors have declared the regular quarterly dividend of 1%% on the 7% cumul. pref. stock, payable Oct. 1 to holders of record Sept. 25.—V. 126, p. 2152.

V. 126, p. 2152.

Checker Cab Mfg. Corp.—Registrar.—
The National Bank of Commerce in New York has been appointed registrar of the common stock.—V. 127, p. 1531, 1107.

Chevrolet Motor Co.—Produces 5,000,000th Car.—
The company produced its five millionth car, Sept. 8, a little more than 8 months after the four millionth car was produced, Jan. 11. Early this month the company passed its 1927 record of slightly more than 1,000,000 cars. It required a little more than 10 years for the company to build its firse 1,000,000 cars. The last 4,000,000 were produced in a little more than 5 years, and the last 2,000,000 in a little less than 20 months.
During the first 6 months of this year, the company sold 50% of all automobiles sold in its price class, against 40% in 1927. The following record shows when the company passed the successive millionth marks:
Car No. 1,000,000, Feb. 27 1923; Car No. 2,000,000, July 10 1925; car No. 3,000,000, Jun. 12 1927; car No. 4,000,000, Jan. 11 1928; and car No. 5,000,000. Sept. 8 1928.

("Wall Street Journal.")—V. 127, p. 1107.

Clark—Howard Business Block, Chicago.—Bonds

Dated Oct. 1 1928; due serially Oct. 1 1929 to 1938, both incl. Principas and int. payable (A. & O.) at the Merchants Trust Co., St. Paul, Minn, trustee and registrar, without deduction for any normal Federal income taxes up to 2% per annum. Denom. \$500 and \$1,000c\*. Red. all or part on any int. date on 30 days' notice, at a premium of ½ of 1%, for each year or fraction thereof of unexpired term, but at a minimum of 2%.

Company is the country's largest manufacturer of ladders and household woodenware, producing a complete line of both of these items. Its principal products are ironing tables, stepladders, extension ladders, clothes racks, and skirt and pastry boards, manufactured under exclusive patents, and featuring the nationally advertised "Rid-Jid" brand. These products enjoy a nation-wide sale through leading jobbers, department stores, mall order houses, electric power companies, &c.

Business was founded in 1878 and incorp, in Minnesota in 1889, management having been in the hands of the Clark family for 3 generations. The poperations of the company have been profitable every year but one for the past 50 years.

Earnings.—The following is a statement of the net earnings of the company (adjusted for certain non-recurring interest charges) as certified by Ernst & Ernst, accountants and auditors.

Cal. Year——1923. 1924—1925. 1926. 1927.

Net earns. bef. deprec. \$148,499 \$116,890 \$225,367 \$163,906 \$192,161 Depreciation charges—12,519 13,090 13,921 15,561 19,091

Net earns aft. deprec. 315,980 103,800 211,446 148,344 175,099

The annual net earnings after depreciation but before Federal taxes, for the above 5-year period averaged over 10 times maximum interest requirements on these debentures, and for the year 1927 were over 11.6 times such requirements.

The company's net sales for the 5-year period ending Dec. 31 1927, have averaged in excess of \$1,000,000 per year.

Assets.—The compolitated balance sheet as of June 30 1923, adjusted t

debenture.

Claude Neon Federal Co.—Suit.—

Claude Neon Federal Co. and Claude Neon Light's, Inc., Sept. 21 filed in the District Court of the United States for the Northern District of Illinois, Eastern Division, suit for a permanent injunction and for an accounting against the Q. R. S. Co. and Lu-Mi-Nus Signs, Inc., covering the manufacture, lease or sale of Neon Tube signs. The suit is based on the Georges Claude patent, No. 1.125.476, System of Illuminating by Luminescent Tubes. Motion was also filed for order to show cause why a preliminary injunction should not issue against Q. R. S. Co. and Lu-Mi-Nus Signs, Inc. The motion is based, in part, on a decision of the U.S. Circuit Court of Appeals for the second Circuit, (New York) holding the Georges Claude patent in suit, No. 1.125.476 valid and infringed.

Claude patent in suit. No. 1,125,476 valid and infringed.

Club Aluminum Utensil Co.—Contract.—

The company has entered into a contract with International Silver Co. of Meriden, Com., one of the largest silver ware manufacturers in the world, to supply its organization with Rogers Bros. 1847 silver plate, which will be sold on a club plan similar to that used in merchandising of its aluminum-ware.

President William A. Burnette states that a subsidiary sales organization has been perfected to distribute this additional product in large volume enabling the company to compete satisfactorily with ordinary retail prices and still maintain its regular margin of profits.

Two new products have been selected by the Club Aluminum Utensil Co. for addition to their regular lines of aluminum ware and Club Health Products. Experimental sales tests will be started on these items during October under direction of sales groups trained in the club plan used in the merchandising of the company's proved products. Pres. William A. Burnette expects that sales of these new items will reach a volume sufficiently large to place each in a separate department.—V. 127, p. 957.

Columbia Baking Co.—Initial Preferred Dividend.—

cently large to place each in a separate department.—V. 127, p. 957.

Columbia Baking Co.—Initial Preferred Dividend.—
The directors have declared an initial quarterly dividend of \$1.75 a share on the 1st pref. stock, payable Oct. 1 to holders of record Sept. 25. The company was incorporated last May and in June absorbed the Southern Baking Co. (V. 126, p. 3775.)

Columbia Graphophone Co., Ltd.—Stock Increase, &c.—The shareholders, at their annual meeting, approved modification in the articles of incorporation and approved an increase in the capital stocy ar, each, to provide for a bonus and for general purposes.

Sir George Croydon Marks, Chairman, stated that the increase in the service fund was due to exchange of shares of this company, at a substantial premium, for shares of associated companies. Since the close of the financial year, the company has purchased 5 acres of land adjoining the main London factory and is erecting a new plant which will be ready for production during the coming season. See also V. 127, p. 1681, 1531.

Commercial Investment Trust Corp.—Listina.—

Commercial Investment Trust Corp.—Listing.—
The New York Stock Exchange has authorized the listing of 21,966 additional shares of common stock (no par value) on official notice of issuance or payment in full, in the acquisition of common stock and prefix stock of Peierls, Buhler & Co., Inc., making the total amount applied for 513,466 shares.

The corporation will issue 16,466 shares of its common stock in consideration for a majority of the common stock of Peierls, Buhler & Co., Inc., and, in connection with the completion of acquisition of the remaining common stock and not less than 76% of the pref. stock of Peierls, Buhler & Co., Inc., the corporation will issue from time to time 5,500 shares o

its common stock for cash consideration to be fixed by the board of directors, but in no event to be less than the stated value of the shares of comstock of the corporation. Contracts providing for such purchase and the purchase of not less than 76% of the pref. stock of Peieris, Buhler & Co., Inc., were entered into on Aug. 30 1928.—V. 127, p. 1394.

Dayton Rubber Mfg. Co.—Earnings.—
J. A. MacMillan, President and General Manager, reports that the net profit of the company for August, before depreciation and taxes, was \$141,303.—V. 122. p. 3647.

De Forest Radio Co.—New Directors.—

Three directors have been added to the board of directors, namely: Powel Crosley, Jr. (President of the Crosley Radio Corp., Cincinnati, O.), Vincent Bendix (President of the Bendix Corp., South Bend, Ind.), and P. Chauncey Anderson (of the law firm of Pendleton, Anderson, Iselin & Riggs, New York). The original board of directors included the following: A. J. Drexel Biddle, Jr. (Chairman), Victor C. Bell, James I. Bush, P. L. Deutsch, James W. Garside (President), Orlando P. Metcalf, Wiley R. Reynolds, Harris Hammond, and Arthur B. Westervelt.

President Garside, at the annual stockholders' meeting, reported rapid progress in re-equipping the company's large plant in Jersey City, and in securing the engineering and production personnel, as well as building up an efficient business and sales organization. The plans for the coming year, which include a steadily increasing production until an annual vacuum tube production of 5,000,000 is attained, were discussed and received the full approval of the representatives of the stockholders.—V. 127, p. 828.

Devoe & Raynolds Co., Inc.—New Chairman.—
It is announced that de Lancey Kountze has been elected Chairman of the board of directors, replacing Dr. I. W. Drummond, resigned.—V. 127, p. 1395.

p. 1395.

Distillers Corp.-Seagrams, Ltd.—Initial Dividend.—
The directors have declared an interim dividend of 25 cents per share, payable Oct. 15 to holders of record Sept. 30.
This company was incorporated on March 2 1928, as a holding company, to acquire stock of the Distillers Corp., Ltd., and of the Joseph E. Seagram & Sons, Ltd.
In a letter to the shareholders, President William H. Ross states that the directors have only drawn from the subsidiary companies such divs. as are justified out of the profits of the 5 months' trading from March 2 to July 31 1928.

It is not intended to close the accounts of this company until Sept. 20 1929, which will permit of a further 12 months' results being obtained from the subsidiary companies to July 31 1929, being the close of their respective fiscal years, and a resolution to that effect was passed by the directors at a meeting held on Sept. 19.

Dodge Brothers, Inc.—To Redeem Remaining Preference

Dodge Brothers, Inc.—To Redeem Remaining Preference Stock (About 14,000 Shares) at \$105.—

The corporation early this week announced that all but about 14,000 shares of the \$37,500 shares of preference stock formerly outstanding have now been exchanged share for share for stock of the Chrysler Corp. and that arrangements have been completed for calling for redemption at \$105 per share and accrued dividends, this small residue of the preference stock, amounting to about 1½% of the total stock.

The corporation has therefore ceased to make exchanges of Chrysler stock for Dodge preference stock and will proceed with the formal steps for the redemption of the remaining preference stock. The next available redemption date is Jan. 15 1929 and the redemption price on such date, including accrued dividends, will amount to \$108.50 per share.—V. 127, p. 1681, 1395.

(E. I.) du Pont deNemours & Co.—Acquisition.—
The company has acquired the alum plant of the North Hudson Chemical
Co., located at Albany, N. Y. Operation of the plant was taken over by
the duPont company Sept. 15. This acquisition gives the duPont company
two alum plants, the other being located at Philadelpria. Sales of production of both plants will be directed from the company's sales of fice in
New York. ("Oil, Paint & Drug Reporter.")—V. 127, p. 542, 553.

The earnings for the eight months ended Aug. 31 1928 are equivalent after preferred dividends to \$3.11 per share on the common stock. This compares with \$2.39 per share for the same period in the preceding year. The corporation in August purchased and canceled 800 shares of its 7% cumulative preferred stock, thus reducing the amount of preferred stock outstanding to \$920,000 per value.—V. 127, p. 1681.

cumulative preferred stock, thus reducing the amount of preferred stock outstanding to \$920,000 par value.—V. 127, p. 1681.

Empire Oil & Refining Co.—New Refinery.—
Plans were announced last week by officials of the Cities Service Co. for the construction of the ninth oil refinery for the Cities Service organization. The refinery will be built for the Empire Oil & Refining Co., a subsidiary, at a point in the upper Mississippi Valley, probably in eastern Iowa. It will be the fifth plant for the Empire companies.

The refinery, which will contain the latest and most modern equipment. Will be built to supply the rapidly growing demand in the upper Mississippi Valley for Empire refined products, which are distributed by the Cities Service Oil Co., a subsidiary. The latter company now serves 1,400 communities in 13 Middle Western States with Cities Service oils and gasolines. The new refinery will have an initial capacity of 10,000 barrels of crude oil daily, and this capacity will be increased at an early date to 20,000 barrels daily.

A 10-inch all-welded oil pipe line will be built from Augusta, Kan., to the refinery. This line will have an ultimate maximum daily capacity of 40,000 barrels of crude oil.

The Empire now owns and operates refineries at Ponca City, Cushing and Okmulgee, Okla., and at Gainesville, Texas. Other Cities Service refineries are at Titusville, Pa.; Petty Island, Philadelphia, Pa., and East Braintree, Mass.—V. 126, p. 1360.

Data from Letter of A. Lincoln Filene, Chairman, Boston, Sept. 25.

ferred stock and the common stock on the New York and Boston Stock Exchanges.

Data from Letter of A. Lincoln Filene, Chairman, Boston, Sept. 25.

Business.—Company through its main store in Boston and its 10 branch stores and shops in other localities in New England, is en a ed in the retailing of clothing and accessories for men, women and children. The business, although thus specialized, ranks second in size amont the retail department store enterprises of New England, being in my belief one of the fargest, if not the lar est, of its kind in the country.

In 1856 William Filene, the founder, opened a store in Salem, Mass., and in 1831 a store in Boston, selling furs, gloves, vells, trimminrs and laces. In 1901 this business was taken over by Edward A. Filene and the present Chairman under the firm name of William Filene & Sons. The enterprise grew steadily in volume and scope, necessitating frequent additions to the space occupied.

In 1903 the business was incorporated in Mass, with a capital stock of \$150,000 under the present name of Wm. Filene's Sons Co. In 1906 the capital stock was increased and some of the shares distributed to a number of the executives.

\$150.000 under the present name of Wm. Flene's sons co. In 1900 the capital stock was increased and some of the shares distributed to a number of the executives.

In Sept. 1912 the Filene store moved into a new building at the corner of Washington and Summer Sts., Boston, especially designed for the business, covering about half of a city block and having eight stories and three basements. At the same time new merchandise departments, including complete men's shors, were added. The result of this step was an increase of over 75. in business during the first year, followed by a continued growth which made subsequent enlargements necessary during ensuing years, until the store now ranks with the larger stores of the country. During the last 10 years, small branch shops have been opened at verthampton. Wellestey, south Hadley, Hyannis, Magnolia and Falmouth, Mass.; Portland and York Harber, Me., and Providence, R. I.

During the current year the company opened a three-story and basement store in Worcester, Mass., which is showing satisfactory results.

In 1923 the company purchased the common stock of the Freeland Lomis Co., an old-established corporation operating two stores in Boston unler the name Continental Clothing House. These stores, retailing men's clothing, furnishings, hats, and shoes, are now being profitably operated under their original name.

Earnin s.—The net sales of Wm. Filene's Sons Co. and its net profits after deducting all charges, including depreciation, and after Federal income taxes at the rate of 12% in lieu of Federal income and capital stock taxes actually paid, as certified by Herbert F. French Co., public accountants and auditors, were as follows:

First Trust Bank, Inc., N. Y. City.—Larger Extra Div.
The First Fiscal Corp. announced that the directors of the First Trust
Bank, Inc., have declared the third quarterly dividend as follows: A
regular of 12½c. per share and an extra of 5½c. per share to be paid to
stockholders of record Oct. 31 1928, payable on Dec. 1 1928.
Previous quarterly cash dividends paid are as follows: (1) June 1 1928,
12½c. per share regular; (2) Sept. 1 1928, 12½c. per share regular, and
2½c. per share extra.

Fisk Rubber Co.—Defers Preferred Dividends.—
The directors on Sept. 27 voted to defer the quarterly dividends of 134% on the cumul. 1st. preferred, conv. 2nd pref., and the conv. 1st pref. stocks, due at this time. Dividends on the pref. stocks are cumulative at the rate of 7% per annum. This rate was paid to Aug. 1, 1928.—V. 127, p. 1109.

(H. H.) Franklin Mfg. Co.—Common Dividends.—
The directors have declared a quarterly dividend of 50 cents per share on the common stock, no par value, payable Oct. 20 to holders of record Oct. 10. A like amount was paid on this issue on July 20 last, when the first disbursement on the common stock since July 1921 was made.

John E. Williams, formerly merchandising and advertising counsel, has been elected Vice-President in charge of sales.—V. 127, p. 689.

Franklin Surety Co.—New Directors.— Louis Carroll and Lazarus White have been elected directors.—V. 127.

Lons Carron and Lazarus white have been elected directors.—V. 127, p. 1682.

Frink Corporation.—Earnings.—

The corporation reports net sales of \$1.284.394, exclusive of Frank Realty Co., Inc., for the period from Nov. 7 1927 to June 30 1928. Manufacturing, selling, administrative expenses, &c., amounted to \$1.102.256, leaving a profit from operations of \$182.138. Other income, including proceeds from life insurance policy amounting to \$100.000, less other deductions, amounted to \$133.891, leaving net profits before deducting bonneses, int. charges, bond discount, depreciation and Federal taxes of \$316.299.

The report also shows total assets on June 30 of \$2.974.650, of which cash amounts to \$73,434; marketable securities, at cost, \$265.071; notes and accounts receivable, less reserve, \$234.068, and inventories, at cost, \$414.124. Fixed assets, less reserve for depreciation, are carried at \$822.086 while good-will is carried at \$1. Earned surplus was shown as \$170.970, and capital surplus \$141.266, making a total surplus of \$312.236.

Earnings for the calendar year of 1928 are estimated as follows: net sales, \$2.010.356; profit from operations, \$285.085; other income at \$53.046; and net profit at \$338.131 on an equivalent basis, but exclusive of proceeds of life insurance policy.—V. 126, p. 1988; V. 125, p. 2816.

Galena-Signal Oil Co. (Pa.).—Selling Agreement.—

The company has entered into a 20-year agreement with the Standard Oil Co. of California under which the latter will market Galena oils and greases in the western part of the United States and certain foreign territories.—V. 127, p. 1683, 829.

Gemmer Manufacturing Co.—Earnings.—

Gemmer Manufacturing Co.—Earnings.—
Earnings for the first 6 months of 1928 reported by the company amounted to \$335,398, after allowing for all charges, including Federal taxes. This is greater than the amount earned in the entire year 1927, amounting to \$281,185, and is in excess of 5 times the dividend requirements on the class A stock. These earnings are at an annual rate of \$16.77 per share on the class A stock and \$5.50 per share on the class B stock, after allowing for class A dividends. If all the class A stock was converted into class B stock, earnings would be at the annual rate of \$4.79 per share.

General American Tank Car Corp.—Subscriptions.— Subscriptions for the additional common stock, which will be offered common stock holders of record Oct. 1 at \$65 per share, are payable at e Chatham Phenix National Bank & Trust Co., 149 Broadway, N. Y. tty. See also V. 127, p. 1683.

General Laundry Machinery Corp.—Unfilled Orders, etc.
The corporation reports unfilled orders on hand as of June 30, 1928 showed an increase of 100% over the same period of last year. Net earnings, after depreciation, bond interest and taxes, available for dividends on the common stock amounted to \$184,773 for the six months ended June 30,1928. This is equivalent to \$1.84 a share, or at the annual rate of \$3.24 a share in 1927 and \$3.22 a share in 1926—V. 126, p. 2798.

General Motors Corp .- President Sloan on the Outlook.

sequivalent to \$1.84 a share, or at the annual rate of \$3.24 a share in 1927 and \$3.22 a share in 1926—V. 126, p. 2798.

General Motors Corp.—President Sloan on the Outlook.—Among the passengers sailing Friday night (Sept. 21) on the S. S. "Olympic" for Cherbourg was Alfred P. Sloan Jr., President of General Motors. Before sailing Mr. Sloan issued a statement on the outlook, which follows:

With two of my associates I am leaving for a month's absence on an operating trip visiting the corporation's foreign subsidiaries. This is the routine trip which is customarily made by a group of General Motors executives at this time each year. There is no special significance to be attached to it.

General Motors operations abroad are each year increasing in importance both in their contribution to our total volume of business as well as to our profit account. The American car is gaining rapidly in popular favor in all overseas markets and it is our hope and ambition to obtain a larger part of the market than we now enjoy. It is expected that the corporation's total shipments overseas this year will be 290,000 cars and trucks. This will involve a value to General Motors on a wholesale basis of approximately \$205,000,000. We are confident that this is only the beginning if we can measure up to the opportunity presented.

An official property of the corporation's at this time are satisfactory. A confident rate. For the first nine months of this year expecting a necellent rate. For the first nine months of this year they can be a compared to the second of the entire year 1927, therefore, it appears reasonable to suppose that we should report this year the largest earnings in our history.

Stocks of General Motors cars in the field are relatively the smallest that they have been at this season for many years past. As a matter of fact, in some lines there is a shortaxe which is handicapping us. Our new series of cars recently announced—Cadillac, LaSalle and Buick—are taxing the capacities of their respective plants. The favorab

General Vending Corp. of Va.—Stock Purchase Warrants.

F. J. Lisman & Co. have issued the following statement:

"We have received many inquiries from General Vending bondholders regarding the status of the stock purchase warrants attached to the bonds.

"We are pleased to advise you that provision has been made so that holders of such warrants may, upon the exercise theerof, receive at their option two shares of common stock (voting trust certificates) of 'Camco' for each share of common stock of General Vending Corp. called for by such warrants at the prices set forth therein.

"We would also advise you that Consolidated Automatic Merchandising Corp., 'Camco,' has unconditionally guaranteed the above mentioned bonds.

bonds. "In order to avoid the inconvenience to bondholders necessarily involved in having the guaranty endorsed on the bonds, it has been arranged so that no such endorsement is required and that instead a copy of the guaranty agreement, a duplicate original of which is on file with the trustee, Central Union Trust Co., So Broadway, N. Y. City, certified by Consolidated Automatic Merchandising Corp., will be furnished by us to bondholders on application to dealers from whom the bonds were purchased by them. A certified copy of said guaranty agreement has also been placed on file with each Stock Exchange on which the bonds are listed."—V. 127, p. 1534.

Glidden Co.—Listing.—

The New York Stock Exchange has authorized the listing of 100,000 additional shares of capital stock (no par value) upon official notice of issuance and payment in full making the total amount applied for 500,000 shares. (See also V. 127, p. 1258.)

Gold Dust Corp.—Rights.—
The common stockholders of record Sept. 25 have been given the right to subscribe on or before Oct. 15 for additional common stock (no par

value) at \$80 per share in the ratio of one new share for each 2 shares held. Subscriptions are payable at the New York Trust Co., 100 Broadway, N. Y. City. The purpose of this offering is to reimburse the company for the acquisition of control of the American Linseed Co.

The stockholders will vote Oct. 15 on increasing the authorized common stock from 325,000 shares to 1,000,000 shares.—V. 127, p. 1534.

Goodyear Tire & Rubber Co., Akron, O.—Reopens Offer Made to Preferred Stockholders.—

The stockholders have been notified that the privilege of exchanging preferred stock for 1st preferred stock on the basis of one share of the former for 1% shares of the latter will be reopened for the months of October and November.—V. 127, p. 948.

Der and November.—V. 127, p. 948.

Gotham Silk Hosiery Co., Inc.—Rights.—

The common stockholders of record Oct. 1 will be given the right to subscribe on or before Oct. 22 for approximately 220,000 shares of no par value capital stock of the Gotham Knitbac Machine Corp, at \$11 per share on the basis of one share of Knitbac stock for each two shares of Hosiery common stock held. Payment should be made at the National Bank of Commerce, 31 Nassau St., New York City.

Holders of outstanding stock purchase warrants for common stock of the Gotham Silk Hosiery Co., Inc., will be entitled to rights accruing to holders of common stock under this offer, only if they exercise their rights to purchase such common stock under such warrants, on or before the record date, Oct. 1 1928.

Of the authorized 1,100,000 shares of no par value capital stock of the Knitbac Corporation, 550,000 shares have been acquired by the Gotham Silk Hosiery Co., Inc., without cost, and 300,000 shares will be issued to the inventors. See also V. 127, p. 1683.

Cranite City Steel Co.—To Increase Common Stock and

Granite City Steel Co.—To Increase Common Stock and Reduce Preferred Shares.—

Reduce Preferred Shares.—

The stockholders will vote Oct. 5 on increasing the authorized common stock (no par value) from 155,918 shares to 250,000 shares.

Following approval of this increase, the board plans to reduce the preferred stock to \$2,000,000 from \$4,000,000 by the purchase fo 20,000 shares. Arrangements have been made to purchase this stock from Hayden, Stone & Co. at 101 or \$4 a share under the callable price. This arrangement is subject to the right of the preferred holders to sell their shares pro-rata to the company up to the amount to be purchased.

It is intended to use the proceeds of the sale of the common stock for this purpose. Announcement to stockholders states, however, that it is not proposed to issue at once all additional common shares if increase is authorized. Stock to be issued will be offered common shareholders protata to their holdings at a price to be determined.—V. 126, p. 3457, 3764.

(W. T.) Grant Co. (Del.) — Rights—Realty Comporation.

(W. T.) Grant Co. (Del.).—Rights—Realty Corporation to Retire Preferred Stock.—President C. E. Freeman, Sept. 19, says in substance:

Says in substance:

The directors have decided to sell 31.700 shares of unissued capital stock without par value, and to give the stockholders the privilege of buying the same at \$70 per share.

The proceeds of the sale will be given to the W. T. Grant Co. (Massachusetts Corporation), the entire capital stock of which is owned by this corporation, and that Company will in turn give as much of the same to the W. T. Grant Realty Corp., the entire common capital stock of which it owns, as it will require to enable that company to call in and pay off its entire outstanding 7% pref. stock, and the balance will be used by the W. T. Grant Co. (of Massachusetts) for the purpose of opening new and additional stores, &c.

entire outstanding 7% pref. stock, and the blander with 6 date by £20 for far Co. (of Massachusetts) for the purpose of opening new and additional stores, &c.

The volume of business of the W. T. Grant Co. (of Massachusetts), the operating company, continues to increase. Two hundred stores are now in operation, 43 having been opened since Jan. 31, 1928. As a result of these new stores together with the growth in the old stores sales have increased more than 25% for the first seven months of the current fiscal year over the corresponding period last year. Sales for the entire fiscal year ending Jan. 31, 1929 are conservatively estimated at over \$53,000,000. New stores are being opened as rapidly as desirable locations can be secured. It is expected that 20 additional stores will be opened before Jan. 31, 1929. The stockholders of record Oct. 1, 1928 will be entitled to subscribe on or before Oct. 30 for one share of the additional stock for each 16 shares he will subscriptions are payable at the Guaranty Trust Co., 140 Broadway, N. Y. City.

Shares now offered to stockholders which are not subscribed for and paid for above set forth have been underwritten at a price higher than the price at which the shares are being offered to stockholders.

Any stockholder desiring to sell his warrants for full shares or fractional warrants, or to purchase fractional warrants in order to permit subscription for full shares, may do so through Lehman Brothers, 16 William St., N. Y. City or Blake Brothers & Co., 5 Nassau St., N. Y. City. See also V. 127, p. 1684.

Gravbar Bldg. (Eastern Offices, Inc.), New York.—

Craybar Bldg. (Eastern Offices, Inc.), New York.—
Bonds Offered.—Public offering was made Sept. 25 of an issue of \$10,500,000 1st mtge. leasehold sinking fund 5% bonds, series A, by Halsey, Stuart & Co.; Harris, Forbes & Co., and Graham, Parsons & Co. at 92½ and interest.

Dated June 1 1928: due June 1 1946. Interest payable J. & D. in New York and Chicago. Red. all or part by lot on any int. date upon 45 days' notice, at 103 to and incl. June 1 1933: thereafter at 102 to and incl. June 1 1938; thereafter at 101 to and incl. June 1 1934, and thereafter until maturity at par, plus int. in each case. Denom. \$1,000 and \$500 e\*. Chase National Bank, New York, trustee. Company has covenanted to provide a semi-annual sinking fund for series A bonds, commencing Dec. 1 1934, in amounts sufficient to retire prior to maturity over 38% of the principal amount of such bonds. Interest payable without deduction for any normal Federal income tax not exceeding 2% per annum. Company has agreed to reimburse resident holders of these bonds upon proper request within 60 days after payment, for the Penn. or Conn. personal property taxs not in excess of 5 mills per annum, or for the Mass. income tax on the interest, not exceeding 6% thereof per annum. Security.—A 1st mtge. on the 30-story Graybar Bullding, the equipment contained therein, and on the leasehold estate. The bullding and leasehold have recently been appraised by Horace 8. Ely & Co. as having a value of \$18,000,000. On the basis of this valuation, these bonds constitute a 58% loan.

Mortgage Provisions.—Series A bonds have been issued and are secured by the same mortgage securing \$1,500,000 of series B bonds (subordinate in lien to series A bonds) maturing semi-annually Dec. I 1928 to and incl. Dec. 1 1934. Provision has been made in the mortgage whereby all of series B bonds, or part by lot, may be placed on a parity in lien with series A bonds, when and to the extent that reappraisal of the property shall indicate that the principal amount of the then outstanding serie

the mortgage.

Serial Mortgage Bonds Offered.—Halsey, Stuart & Co., Inc., and Graham, Parsons & Co. are also offering \$1,500,000 serial mtge. leasehold 5½% gold bonds, series B.

Series B bonds will be dated June 1 1928 and will mature serially in semi-annual installments of \$120,000, beginning Dec. 1 1928 to and incl. June 1 1934, the remaining \$60,000 principal amount maturing Dec. 1 1934. Int. will be payable semi-annually June 1 and Dec. 1 at the Chicago and New York offices of Halsey, Stuart & Co., Inc., without deduction for any normal Federal income tax now or hereafter deductible at the source, not in excess of 2% per annum. Denom. \$1,000 and \$500 ex. Red., all or part, by lot on any int. date upon 45 days' notice, at following prices; Series A, at 103% to and incl. June 1 1933; thereafter at 102% to and incl. June 1 1938; thereafter at 101% to and incl. June 1 1943, and thereafter until maturity at the principal amount, plus int. in each case; series B at 103 plus int. prior to maturity. Company will agree to reimburse resident holders of these bonds upon proper request within

60 days after payment, for the Pa. or Conn. personal property taxes, not in excess of 4 mills per annum; the Md. 4½-mills tax; the Calif. personal property tax not in excess of 5 mills per annum, or for the Mass. income tax on the int. not exceeding 6% thereof per annum.

Data from Letter of John R. Todd, Pres. of Eastern Offices, Inc.

Data from Letter of John R. Todd, Pres. of Eastern Offices, Inc.

Properly.—The Graybar Building, completed in 1927, is one of the three largest office buildings in the world. The site, comprising the area of an entire block adjacent to the Grand Central Terminal, is one of the most central and accessible office building locations in New York City—the building connecting directly with the Grand Central Terminal and the subway lines converging at that point. In addition to the Graybar Electric Co., Inc., the largest distributor of electrical supplies in the United States, many other nationally known organizations have offices in the bldg. Leasehold.—A subsidiary of the New York Central R.R. has leased to Eastern Offices, Inc., the site occupied by the building for three rental periods extending to Nov. 1 1988 (subject to lessor's right to purchase the building in 1967 at its then value) and the owner of the land during said lease is to pay one-half the annual tax upon the land as if unimproved and lease is to pay one-half the annual tax upon the land as if unimproved and one-half of all assessments levied against the property for local improvements. The first rental period extends to Nov. 1 1946 or beyond the maturity of these bonds, with a maximum annual ground rental, exclusive of taxes, &c., of \$300,000. There can be no mortgage ahead of this leasehold. Earnings.—Earnings of the recently completed building, on the basis of operating results to date and giving effect only to executed leases, have been estimated by an independent certified public accountant, for the year ending April 30 1929, as follows:

32,847,414

Oper. expenses, maint., Insurance, ground rent & gen. taxes.

1,271,881

Net income, before depreciation & Federal tax.

\$1,575,533

Net income, before depreciation & Federal tax. \$1,575.533

Maximum annual interest on series A bonds. 525.000

Maximum annual interest on series B bonds. 78.750

Approximately 94½% of the total net rentable area of the building has been leased and it is expected that favorable leases with selected tenants for the remaining space will be made within a short time. The average life of the leases now in effect is approximately 9½ years.

Purpose.—The proceeds from the sale of these bonds, together with other funds, have been applied toward the refunding of \$10,000,000 of bonds bearing a higher interest rate.—V. 127, p. 1684.

Great Falls Manufacturing Co.—Meeting Postponed.—
The special meeting of the stockholders was adjourned to Nov. 23 1928, because the special stockholders' committee, authorized to take such action as was deemed expedient to liquidate the corporation, has not completed its report.—V. 126, p. 4090.

Guaranty Co. of New Jersey.—Larger Dividend.—
The directors have declared a quarterly dividend of 2% (20 cents per share), payable Oct. 1 to holders of record Sept. 20. On July 2 last, a quarterly disbursement of 1½% was made as compared with an initial quarterly payment made on April 2 1928.—V. 126, p. 1988.

Harbison-Walker Refractories Co.—Listing.—
The New York Stock Exchange has authorized the listing of 1.440,000 shares of common stock (no par value) in exchange for the outstanding 360,000 shares of common stock (par \$100), each share of the outstanding common stock (par \$100) to be exchanged for 4 shares of common stock without par value.

Comparative Balance Sheet.

June 30'28. Dec. 31 '27. June 30'28 Dec.31' 27. -V. 127, p. 1684.

Hayes Body Corp.—Business at New Record.—
"With 2,000 men working full time in its Grand Rapids plant, and 500 men working overtime in the Ionia plant, the corporation is enjoying the best business in its history," according to President W. W. Hoagland. "Delivery of Plymouth bodies to Chrysler began on Sept.18, five days ahead of schedule, and delivery of De Soto bodies will begin Sept. 24," Mr. Hoagland reported. "Willys-Overland has increased its September schedule 100 bodies per day. Reo deliveries continue as per schedule, and Marmon deliveries will begin in quantity Oct. 1."—V. 127, p. 1684.

Heights Ice Co — Trustee.—
The Scaboard National Bank of the City of New York was recently appointed trustee of an issue of 1st lien & purchase money 6% gold bonds, dated June 1 1928.

Herman Nelson Corp.—Regular Dividends.—
The directors have declared the regular quarterly cash dividend of 50 cents per share, payable Oct. 1 to holders of record Sept. 18. A similar distribution was made on July 2 last, prior to which quarterly dividends of 30 cents per share were paid.
A stock distribution of 1% (previously declared) is payable Oct. 1 to holders of record Sept. 18. Like amounts were paid in stock in each of the two preceding quarters, while in January last a 2% stock dividend was paid.—V. 126, p. 3457.

Heyden Chemical Corp.—Initial Dividend.—
It is announced that the directors have declared an annual dividend of 7% on the 7% pref. stock (for the year ended Sept. 30), payable Oct. 1 to holders of record Sept. 25. Last week it was erroneously stated that the company had declared a quarterly dividend of 134% on this issue.—V. 127, p. 1684.

Hupp Motor Car Corp.—Changes in Personnel.—
At a meeting of the directors last week, A. Von Schlegell, first vice-president and secretary-treasurer, resigned from active executive duties.
The board elected the following executive officers: Charles D. Hastings, chairman; DuBois Young, president and general manager; R. S. Cole formerly general sales manager, elected vice president, in charge of sales; W. S. Graham, formerly production manager, elected vice-president in charge of manufacturing; Ralph R. Lyons, formerly comptroller, elected treasurer, and George E. Roehm, formerly assistant secretary, elected secretary.—V. 127, p. 1684.

Hygrade Food Products Corp .- Proposed Bond Re-

During the latter part of November 1927, J. A. Sisto & Co. offered \$1.000.000 Ist & ref. mtgs. conv. 6% gold bonds, due Dec. I 1937, at 99½ and int. (V. 125, p. 2944). Less than one year from the original offering date, practically all of these bonds have been converted into common stock, and on or before Oct. I 1928, a notice will be published, calling the remaining outstanding bonds at 105 and int. with the right to convert bonds into stock continuing to redemption date, Dec. I 1928. Each \$1.000 bond is convertible into common stock at \$17.50 per share or into approximately 57 shares.—V. 127, p. 961.

Independent Oil & Gas Co.—Larger Dividend.— The directors have declared a quarterly dividend of 37½ cents per share the common stock, no par value, payable Oct. 31 to holders of record t. 15. Formerly the company paid quarterly dividends of 25 cents per

share.

Pres. E. H. Moore stated that the Board felt warranted in declaring this dividend in view of the satisfactory condition of the company due to its additional and varied earning facilities as well as the confidence of the Board in the future of the industry.

"Net earnings for the current quarter, after all charges and including earnings of recently acquired Manhattan Oll Co., are estimated to exceed \$2,000,000," Pres. Moore said.—V. 127, p. 831, 556.

Indiana Pipe Line Co.—Extra Dividend of \$5.—
The directors have declared an extra dividend of 10% (\$5 per share) on the outstanding \$5,000,000 capital stock, par \$50 in addition to the usual quarterly dividend of 2% (\$1 per share), both payable Nov. 15 to holders of record Oct. 26. In each of the 5 preceding quarters, the company paid an extra dividend of \$1 per share. On Dec. 22 1927 the company also made a special distribution of 30% (\$15 per share).—V. 126, p. 4091.

Intercontinental Investment Corp.—Initial Com. Div.

At a recent meeting of the board, the corporation placed its common stock on a dividend basis of \$1 per share per annum, payable quarterly. The first dividend of 25 cents per share will be payable Oct. 1 to holders of record Sept. 25. This investment trust was organized Aug. 22 1927, at which time preferred and common stock were sold in units, each unit comprising 1 share of pref. stock of \$100 par value and 4 shares of common stock of no par value.

The directors also declared the regular quarterly dividend of \$1.50 per share on the preferred stock.

William A. Adams, Vice-President of the Alwyn Corp., N. Y., is a director.

International Business Machines Corp.—Bonds.— It is announced that \$1,000,000 of the 30-year 6% s. f. gold bonds, due July 1 1941, will be retired on Jan. 1 next. There are at present \$5,327,500 of the bonds outstanding.—V. 127, p. 556.

International Germanic Co., Ltd.—Dividend No. 2.—
The directors have declared a regular quarterly dividend of 75 cents per share on the preference stock, payable Oct. 1 to holders of record Sept. 25. An initial dividend of \$1.50 per share (covering the first two quarters of 1928) was paid on this issue on July 2 last.—V. 127. p. 692, 556.

quarters of 1928) was paid on this issue on July 2 last.—V. 127.p. 692, 556.

International Paper Co.—Awarded Govt. Contract.—

The International Envelope Corp., a subsidiary, has been a araded the contract for supplying the U. S. Post Office Department with 12,800,000,000 stamped envelopes and newspaper wrappers for the four-year period commencing Jan. 1 1929.

The International Envelope Corp. was the lowest bidder with a bid of \$13,209,793, which was \$105,000 below the bid of the present supplier.

The paper will be supplied by the International Paper Co. and the envelopes will be made by International Envelope Corp., in which it is understood the Standard Envelope Mfg. Co. of Cleveland has an interest.

This contract is another step by the International Paper Co. towards diversification of products. The company has grown from a \$100,000,000 company in 1924, when its principal product was newsprint, to the proposed \$550,000,000 company which will come into existence when the new holding company, the International Paper & Power Co., is formed and takes over the additional New England Power Association stock. More than half of the new company's assets will be public utility properties and the balance well diversified, including plants producing newsprint, writing and book paper, envelopes, sulphite pulp for rayon, sanitary napkins, wrapping paper, bags, cement sacks, wall board, mulch paper, and many other products.

Completing Paper Bag Plant at Bastrop, La.—

other products.

Completing Paper Bag Plant at Bastrop, La.—
Machinery is now being installed in the paper bag plant which the International Paper Co. is building at Bastrop, La., and the plant will soon be in operation. Of a daily capacity of 35 tons of grocery bags, the plant will be owned and operated by the Continental Paper & Bag Corporation, a subsidiary. It is being built in conjunction with one of the two kraft paper mills of the International at Bastrop, and will use a part of the product of that mill in the manufacture of paper bags.

With bag plants at Rumford Falls, Me.; Brooklyn, N. Y.; Wellsburg, W. Va.; Marinette. Wis.; and Ottawa, Ont.; the International Paper Co. ranks as one of the largest manufacturers of paper bags in the world.—
V. 127, p. 1536.

International Printing Ink Corp.—Earnings.—

The corporation in the first earnings statement since its consolidation of four leading ink manufacturers, reports consolidated net profits for the six months ended June 30 1928 of \$870.779, equivalent after allowing for six months' dividends on the preferred stock to \$2.58 a share on the common stock now outstanding. Earnings for full year 1927, based on results of predecessor companies, were \$1.694.470, equivalent to \$4.98 a share on the common stock. Consolidated sales were \$9.137.992 for the first six months ended June 30 1928, compared with \$16.836.386 for the full year 1927.

The consolidated balance sheet at June 30 1928 shows current assets of \$8.543.250 as compared with current liabilities of \$2.490.696.

John M. Tuttle, President, says that sales of the corporation for the two months ended Aug. 31 1928 ran 10% in excess of sales during the corresponding period of 1927, and two of the operating subsidiaries, Queen City and Philip Ruxton, Inc., reported sales for August in excess of any month in their history. Since the consolidation on May 31 1928, important plant improvements have been made and operating economies effected. Further developments include the expansion of the laboratory division and the concentration of raw material purchases.

The regular quarterly dividends of 62½ cents per share on the common and \$1.50 per share on the preferred were declared Sept. 17, payable Nov. 1 to holders of record Oct. 15.—V. 127, p. 1537.

International Safety Razor Corp.—Outlook.—

International Safety Razor Corp.—Outlook.—

All indications point to 1928 as a record year for the corporation, with net profits for the year amounting to about \$650,000 an increase of 50% over 1927, according to Pres. A. H. Bryant. This would exceed \$4 per share on the 135,000 shares of no par "B" stock, after provision for dividends of \$2.40 per share on 40,000 shares of class "A" stock. Earnings in 1927 amounted to \$423,187, equivalent to \$2.42 per share on the class "B" stock.

Mr. Bryant stated that it is likely that the present annual dividend rate of \$2 per share on the class "B" stock may be increased to \$2.50, or on extra distribution made, in the near future. Plants of the company, it is stated, are at present operating at capacity. As soon as production facilities have caught up with present demand, the company will enter upon a national advertising campaign which should make itself felt in increased sales volumes and net earnings during 1929.—V. 127, p. 1111.

International Salt Co.—Tanderse

national advertising campaign which should make itself felt in increased sales volumes and net earnings during 1929.—V. 127, p. 1111.

International Salt Co.—Tenders.—

The United States Mortgage & Trust Co., trustee, 55 Cedar St., N. Y. City will until Oct. 10 receive bids for the sale to it of 1st consol, collattrust mige, bonds to an amount sufficient to exhaust \$92,344 at a price not including 105 and int.—V. 127, p. 557.

Irvin Cobb Hotel, Paducah, Ky.—Bonds Offered.—

The Louisville National Bank & Trust Co. and Block, Fetter & Trost, Louisville, Ky., are offering \$400,000 lst (closed) mtge. 6% serial gold bonds at par and int.

Dated Oct. 1 1928; due serially Oct. 1 1929 to Oct. 1 1938. Principal and int. (A. & O.) payable at the Louisville National Bank & Trust Co., Louisville, Ky., trustee. Denom. \$500 and \$1,000. Red. all or part on any int. date upon 60 days notice at a premium of 2% in addition to principal and interest.

The Irvin Cobb Hotel will be situated on the corner of Sixth and Broadway, Paducah, Ky. The property has 88 ft. fronting on Broadway and 165 ft. on Sixth 8t. The hotel, to be completed about February 1929, will be eight stories in height and contain 201 rooms, all equipped with bath. The hotel will be of Old English style of structure and of fireproof construction.

These bonds will be a direct obligation of Adolph Weil and secured by a closed first mortrage on the land and by the hotel building now being erected. Fee simple ownership is guaranteed by the Louisville Title Co.

The hotel has been leased for 25 years at an average not rental which will show earnings of approximately 2½ times the Interest requirements on the total issue of bonds. The lessee will pay all State, county and municipal taxes on the property and

Italo Petroleum Corp. of America.—Initial Div., &c.—An initial annual dividend of 7% has been declared on the 7% pref. ock, payable Nov. 1 to holders of record Oct. 15.

Proposal to Change Par Value of Stock—New Well.—
The directors have called a special stockholders meeting for Oct. 24, for purpose of voting upon a proposal calling for a change in par value of the outstanding common and preferred shares. The plan calls for an exchange of 10 shares each of the outstanding \$1\$ par value common or preferred stock for one share each of new common or preferred stock without par value. Vice-President A. G. Wilkes announced that the company has just brought in a 5,300 barrel well in the Signal Hill field in California, where the company is now said to be the third largest producer. Fourteen additional wells are being drilled in this field under the direction of Robert McKeon, Vice-President in charge of operations.—V. 127, p. 1537.

stock.

Assets.—The properties of the corporation have been appraised as of April 30 1928, by the American Appraisal Co. at \$1,693,522. Net assets after giving effect to present financing, as shown in the accompanying balance sheet, as of April 30 1928, amount to \$2,106,002, equivalent to \$210 per share of 7% cumulative convertible first preferred stock. Current assets amount to \$719,294.47.

Purpose.—The net proceeds of the sale of 7% cumulative convertible first preferred stock will be applied to the liquidation of liabilities of the companies consolidating to form Liberty Dairy Products Corp. All of the net assets, except a small part for which cash will be paid, will be turned over to Liberty Dairy Products Corp. in exchange for common stock. Management and control of the corporation will remain in the hands of the men who have been responsible for the successful growth of the predecessor companies.

Listing.—Corporation will make application to list this stock on the Pittsburgh Stock Exchange.

Liquid Carbonic Corp. (Del.).—Dividend Rate Increased—Extra Disbursement of 25 Cemts Declared.—
The directors have declared an extra dividend of 25c. per share and a quarterly dividend of \$1 per share on the outstanding 147,073 shares of common stock, no par value, both payable Nov. 1 to holders of record Oct. 20. From Nov. 1 1926 to Aug. 1 1928, incl., quarterly disbursements of 90 cents per share were made.—V. 126, p. 2978.

London Malayan Tin Trust, Ltd.—Tin Combine With Resources of £40,000,000 Effected in Europe.—
The formation of a great new combine of British tin producing interests operating in the Malayan Peninsula was officially announced Sept. 26 by

the An 13-Oriental Adiang Corp., the Tin Selection Trust and the London Tin Syndicate, which are already associated in the most powerful combination of tin producing companies in the world.

The new combine, which is called the Lendon Malayan Tin Trust, Ltd., will have an authorized capital of £2,000,000 of which 1,249,000 shares of £1 each are to be offered for public subscription shortly. It will control 16 important Malayan companies which hold an aggregate of more than 780,000,000 cubic yards of proved dredgeable alluvial, with reserves exceeding 260,000 tons of thi noxide, valued at more than 240,000,000. The associated companies own a fleet of 20 of the largest and most modern tin dredges in the world and control between them approximately 12% of the total world output.

The new trust has been formed by the Anglo-Oriental Mining Corp, and the London Tin Syndicate in association with W. P. Hammon and Newton Cleveland, senior members of the Yuba Associated Engineers of San Francisco, which manaze some of the largest alluvial dredge mining fields in the world, together with F. G. Pratten and Malcolm Newman, directors of Alluvial Tin (Malaya) Ltd.

The board of directors will consist of John Howeson, Chairman of Angloriental Mining Corp., Sir Alfred Henry Ashbolt, Chairman of the Harbour Tin Dredging Group, Sir William Daniel Henry, Chairman of the Tin Selection Trust, W. P. Hammon, senior member of the Yuba Associated Enfineers, California, and E. G. Pratten, Chairman of Alluvial Tin (Malaya) Ltd. Consulting engineers of the trust are the Yuba Associated Enfineers and the Anglo-Oriental Mining Corp.

The significance of this merving of eastern companies rests in the fact that the production and marketing of the world's tin will henceforth mainly be in the hands of four great combines, each of which possesses a co-ordinated asles and production or anization. Production has been or, anized for some time in Bolivia, the Dutch East Indies and Nigeria, three of the greatest through the sale and production or aniz

field.

In expert circles in London it is believed that the merger will strengthen the position of producing companies throughout the world and bring added stability to the tin industry generally.

the position of producing companies throughout the world and bring added stability to the tin industry generally.

McGraw-Hill Publishing Co., Inc.—Consolidation.—

Affiliation of the Bragdon. Lord & Nagle Co., publisher of "Textile World," oldest business paper in its field, with the McGraw-Hill Publishing Co. was announced Sept. 24 by James H. McGraw, President of the latter organization. The consolidation adds a new and important division to the McGraw-Hill organization and increases its business, industrial and engineering publications to 23.

In addition to "Textile Word," which was established in 1868, the merger includes the Consolidated Textile Catalog, "Textile Advance News," Official American Textile Directory, the American Knitting Trade Directory and a group of technical books devoted to the textile industry.

The Bragdon, Lord & Nagle organization will operate as a separate division of the McGraw-Hill company and its management will continue as President, Frank L. Nagle as chairman of the board and H. O. Barnes as Secretary. Joseph H. Bragdon will be Vice-President and General Manager. Mr. Lord and Mr. Bragdon become members of the board of directors of the McGraw-Hill Publishing Co. and Mr. Bragdon joins its executive committee.

Affiliation of the Bragdon, Lord & Nagle Co., with the McGraw-Hill organization marks the second large-scale development to be effected by the latter company within three months. On June 29, Mr. McGraw announced a merzer with the A. W. Shaw Co. of Chicago which, as a division of the McGraw-Hill Co., is the publisher of the "Magazine of Business," devoted to the general executive interests of all business, and of "System." In addition to the broad sweep of business, the McGraw-Hill publications cover the fields of metal mining, coal, the electrical industry, food manufacture, industrial management, power, electric rallway and baransportation, machine tools, civil engineering and heavy construction, radio and chemical engineering. The "Textile World" covers the major dranch

McKesson & Robbins, Inc. (Md.)—Mutualization Plan.—
Formal announcement of a mutualization plan for the drug supply industry is expected to be made Nov. 1 by McKesson & Robbins, Inc., and affiliated companies which undertook recently a grouping of 15 leading wholesale drug companies.

Details concerning the consolidation, which involves companies with selling power of \$100,000,000, revealed recently that the new company's adjusted balance sheet carries goodwill at \$1. Ultimately, the present group of companies is expected to be increased to 50, covering every important trading territory in the country and having a capitalization of between \$259,009,000 and \$300,000.000.

Under the plan to be announced, reliable reports indicate, wholesalers who are parties to the consolidation will assume the position of distributing stations for every national manufacturer of drug products at the disposal of every independent and individual retailer in the country. For the first time in the history of drug jobbing in the United States retailers will have a voice in the management and conduct of the supply depots from which they derive their supplies. Completion of the consolidation in practice and in fact will bring about a mutualization of national manufacturers and individual retailers with the latter fully represented on the board of directors of the house with which they do business and also on the retailers' advisory committee which will direct the policy of meeting competition. The mutualization plan, which is expected to be in operation by the first of the year, provides that retailers, in order to receive the utmost advantages, are neither required to make capital investment unless they wish to do so, nor to make deposits with the corporation in order to secure

their requirements at the lowest possible cost. Without being forced to pay for goods in advance, retailers will have the distinct advantage of colective advertising, collective window and counter display and co-operation in coping with chain store advertising and merchandising programs.

The plan places the retailer in a position to advertise collectively and sell merchandise on the same terms and under the same conditions as those established by chain store systems and department stores.

The consumer will not be compelled to travel miles to secure chain store prices but will find available in the neighborhood drug store at the same price such merchandise as chain and department stores so extensively advertise. The advantage of this plan from the public point of view is obvious when one considers that individual and independent retailers in this country now number 54,000 and distribute 85% of all drug products consumed. From an economic viewpoint the plan also is of benefit since it enables more consumers to purchase at cut prices and assures the independent and individual retailer equal advantages with the chain stores.

Leading national manufacturers already are cooperating with the new organization in perfecting plans whereby depots of the new organization will be used as a clearing house to furnish retailers' requirements at the lowest possible cost to the retailers themselves. Aside from paying the public or the individual druggist a good return on the capital invested by them in securities of the company, profits such as accrue will be distributed to all retailers who are members of the mutualization group to be utilized in meeting all merchandising methods employed by chain store systems. (Compare also V. 127, p. 1539-1686).

The Guaranty Trust Co. of New York has been appointed transfer agent for 1,084,409 shares of common stock, no par value, and 320,000 shares of preference stock, series A. 7%, convertible, \$50 par value. (See V. 127, p. 1539-1686).

Magnin Building, Hollywood, Calif.—Bonds Offered.—Strassburg & Co. and Dean Witter & Co., San Francisco, Calif., are offering at 100 and int. \$260,000 1st mtge. 5½%

Calif., are offering at 100 and int. \$260,000 1st mtge. 5½% sinking fund gold bonds.

Dated Sept. 1 1928; due Sept. 1 1938. Principal and int. (M. & S.) payable at Wells Farro Bank & Union Trust Co., San Francisco, trustee. Denom. \$1,000. Callable all or part on any int. date on 40 days notice at 103 and int. up to and incl. Sept. 1 1935; thereafter at a reduction of ½ of 1% for each succeeding 6 months. Interest payable without deduction for any normal Federal income tax not exceeding 2%. Exempt from personal property tax in California.

These bonds will be the joint and several obligation of E. John Magnin and Grover A. Magnin and in addition thereto will be secured by a first closed mortgage on certain real property together with improvements thereon located on Hollywood Boulevard in Hollywood, Calif. These premises are at present occupied by I. Magnin & Co.

Based on appraisals of the land and present buildings, plus the cost of improvements, the completed property will have a value of \$601,736.

The property, together with improvements, has been leased to I. Magnin & Co. for 10 years beginning Sept. 1 1928, at a minimum annual rental which substantially exceeds maximum annual interest and sinking fund requirements.

-Earnings.-Marchant Calculating Machine Co.-

The company reports net earnings after depreciation but before Federal taxes for the first eight months of the year of \$242,573.

A letter to stockholders directs attention to the fact that all of the bank indebtedness has been paid in full and that all accumulated preferred stock dividends have been liquidated. Quick assets exceed total liabilities by more than 15 to 1 and cash in bank and on hand is in excess of \$120,000.—V. 127, p. 116.

Marion Steam Shovel Co.—75°2 Common Dividend.—
The directors have declared the regular dividend of 1½% on the pref. stock, and the regular quarterly dividend of 75 cents per share on the common stock of no par value, (which was recently increased from 50,000 to 100,000 shares), both payable Oct. 1 to holders of record Sept. 20. This is at the rate of \$3 per share per annum on the present common shares and is equivalent to \$6 per share per annum on the common stock outstanding prior to the payment Aug. 15 1928 of the 100% stock dividend. On the old 50,000 shares of common stock, quarterly dividends of 75 cents per share were paid from July 1 1927 to July 2 1928 incl.—V. 127, p. 962.

Maytag Co. (Del.)—To Enter European Field.—
The company has taken the first steps in the development of the export field in sending a representative to Germany, where preliminary surveys indicate that a large potential market exists for the washing machine, it is announced. A quantity of machines has been shipped for initial display and demonstration and arrangements have been made to secure the coperation of important electric interests in Germany in the marketing of the machine.
Sales of the Canadian branch for the first half of 1928 were over 60% ahead of the corresponding half of 1927.—V. 127, p. 1687.

Meadows Manufacturing Co. (Md.) .- Sells Patent, &c.,

Meadows Manufacturing Co. (Md.).—Sells Patent, &c., Rights to Bucket Elevators.—
The Hayes Mfg. Co., Galva, Ill., has taken over the patent rights, manufacturing rights and patterns of the Meadows Mfg. Co., for its line of portable, power and bucket elevators, and will continue production at the Galva plant. The Meadows company desires to devote its entire time to the manufacture and sale of its washing machines, hence the sale of the elevator line.—V. 125, p. 3650.

elevator line.—V. 125, p. 3650.

Melville Shoe Corp.—Listing.—
The New York Stock Exchange has authorized the listing of 354,132 shares of common stock (no par value), which are issued and outstanding, with authority to add to the list 22,908 shares of common stock, on official notice of issuance and payment in full upon exercise of outstanding com. stock purchase warrants. See also V. 127, p. 270, 693, 833.

Metal & Mining Shares, Inc.—Initial Dividends.—
The directors have declared the first quarterly dividend on the 6% cumul. pref. stock, par \$50, and a dividend of 30 cents per share on the no par common stock. Both dividends are payable Oct. 1 to holders of record Sept. 21. See also V. 127, p. 963, 270.

Material Eliza Luciurance Co.—Personnel.—

Sept. 21. See also V. 127. p. 963, 270.

Metropolis Fire Insurance Co.—Personnel.—
Officers and Directors.—James Cunnion, Pres. (Pres., Industrial & Investing Corp.); Chas B. McLauchlin, Vice-Pres., Counsel. (member of firm, Van Gordon & McLauchlin); John A. Campbell, Treasurer (Gen., Agent. Farmers & Traders Insurance Co.); H. T. Owen, Secretary (Treas., Industrial & Investing Corp.); Isaac Arndt (Pres., I. Arndt & Co., Inc., Insurance); Jacob S. Strahl (Pres., Judea Life Insurance Co., Justice, Municipal Court. Brooklyn, N. Y.); Robert A. Cools (commercial stationer and printer, New York City.); James Cunnion Jr. (Sec. & Treas., Public Security Bond & Mortgage Corp.); Edward Shipman (Union Indemnity Co.); A. Holzman (wholesale tobacco merchant); Henry De Sola Mendes (Pres., H. D. Mendes & Co.); Joseph Coghlan (Insurance); Albert Cole Bogert (U. S. Postmaster, Yonkers, N. Y.).—V. 127, p. 1540.

Metropolitan Chain Stores, Inc.—Expansion.—
The corporation opened in Montreal on Sept. 22 one of the largest chain stores in the five-cent to \$1 line on the American continent. The store

occupies a new three-story and basement concrete and steel building having 26,840 square feet of floor space of which more than half will be used for sales and the remainder for offices and stock.

The opening of this new store is in line with the company's extensive program of expansion inaugurated earlier in the year with the proceeds from the sale of additional pref. stock. The corporation, according to President E. W. Livingston, is now operating 98 stores in the United States and Canada. Before the close of 1929 it is expected about 40 new stores will be added to the chain, 12 of which are now under construction and will be opened during the current year.—V. 127, p. 1540, 833.

Metropolitan Royalty Corp.—Acquisit'n—New Director.

The corporation has purchased 266.5 full royalty acres in the western part of the Chalk Field, in Howard County, Tex., situated 125 miles northeast of Hendricks Field, Winkler County.

John O. Cosgrove, a director of the Federal Reserve Bank of Philadelphia, has recently been elected a director of the above corporation.

Missouri State Life Insurance Co.—Business Gains.—
The company reports a gain of \$60,120,640 in paid for business for the months of 1928, as compared with the same period of 1927. According o President Hillsman Taylor a total volume of \$182,166,681 in paid for surance was turned in during the 8 months of 1928 as against \$122,046,041 or the same period in 1927. These figures represent both group and ordiary business.—V. 127, p. 1540.

Missouri River Sioux City Bridge Co.—Dividend.— The directors have declared the regular quarterly dividend of \$1.75 per share on the preferred stock, payable Oct. 15 to holders of record Sept. 30. See also V. 126, p. 1823.

Murray Corp. of America.—New Control.—
Announcement is made by the corporation of a change in control of its common stock. The new interests are represented by new directors elected on Sept. 26 as follows: C. W. Avery, A. P. Dowell, Charles Widman, H. O. Barker (Chairman of the Board); C. P. Curtis, D. W. Gurnett (a

partner of Gurnett & Co. of Boston); J. C. Marckley and C. C. Gibson, (President of the Mullins Mfg. Co.)
C. W. Avery, formerly assistant to the President, has been elected President, succeeding William R. Wilson.
Charles Widman has been elected Vice-President in charge of sales. The officers of Secretary and Treasurer were not filled at the meeting. A. P. Dowell was elected Vice-President in charge of manufacturing.—V. 127, p. 1113, 117.

National Food Products Corp.—Earnings.—
The corporation reports net income, applicable to dividends, for the 12 months ended June 30 1928, of \$218,226. Gross income for the period to-taled \$281,183, which represents interest and dividends received and the portion of net income of subsidiary and controlled companies applicable to the investment therein of the corporation. Corporation's surplus as of June 30 amounted to \$1,113,698.—V. 126, p. 1824, 1365, 1051, 729, 261; V. 124, p. 2602; V. 123, p. 3046; V. 122, p. 2665, 2203.

National Manufacture & Stores Corp.—Sales.—

Month of August—

1928. 1927. Increase.
1928. \$564,441 \$492,025 \$72,416 

National Radiator Corp.—Defers Preferred Dividend.—
The directors have voted to defer the usual quarterly dividend of \$1.75 per share ordinarily due about Nov. 1 on the \$7 cumul. conv. pref. stock, no par value. This rate had been paid since Nov. 1 1927.
The new management states that earnings do not justify payment of the dividend at this time.—v. 127, p. 695.

The new management states that earnings do not justify payment of the dividend at this time.— \, 127, p. 695.

National Surety Co.—To Increase Capital, &c.—

A special meeting of stockholders has been called for Oct. 10 to ratify a proposal of the directors to increase the capital stock from \$15,000,000, par \$100, to \$16,000,000, par \$50. Reduction in the par value of the stock from \$100 to \$50 will result in an exchange of shares on a basis of 2 shares of the \$50 par value stock for each share of \$100 par value stock held as of Oct. 10. Other business to be transacted at the meeting includes authorization of an increase in the number of the directors from \$1 to 63.

The increase in capitalization will be subject to the condition that at least two-thirds of the present stockholders waive their right to subscribe to the new stock and authorize the sale of the new stock, upon which waivers are thus received, to the company's employees, agents, managers and others (except to the chairman, vice-chairman, president and directors who are not salaried officers of the company). The subscription price for the new stock also will be determined at the meeting.

A change in date of the annual meeting of stockholders from the third Tuesday to the last Tuesday in January each year and of the annual meeting of the board of directors from the third to the last Tuesday in January also will be up for discussion and vote at special meeting.—V. 127, p. 1540

Nehi Corp.—Admitted to Curb.—

Nehi Corp.—Admitted to Curb.—

The 20,000 allotment certificates representing a new issue of 20,000 shares of \$5.25 cumul. pref. stock recently offered by Schluter & Co., Inc., and Oliver J. Anderson & Co., were admitted to trading on the New York Curb on Sept. 22, the opening sale being 87½. The shares were offered in units of one share of preferred and one share of full voting com. stock at \$85 per unit. See V. 127, p. 1687.

Neve Drug Stores, Inc.—Dividend No. 2.—
The directors have declared a quarterly dividend (No. 2) or 70 cents a share on the convertible A stock, payable Oct. 15 to holders of record Oct. 5. An initial quarterly dividend of like amount was paid on July 15 last.—V. 126, p. 4096.

New England Oil Refining Co.-Temporarily Stops Oil

New England Oil Refining Co.—Temporarity Stops Oil Refining Operations at Fall River.—
Regarding the many rumors in connection with the closing down of the plant of the company at Fall River, the company states officially that it has temporarily ceased its manufacturing operations on account of the large stock of finished goods on hand and the company's policy of liquidating those stocks before bringing in additional supplies of oil. This cessation of refining at Fall River in no way affects the distribution of the company's commodities, in fact the New England company and its distributing subsidiary, the Mayflower Oil Co. today are better situated so far as the supply of raw material is concerned than ever before, it is announced.—V. 127, p. 421, 1262.

New Jersey Shares Corp.—Hambleton & Co. Hav No Con-

New Jersey Shares Corp.—Hambleton & Co. Has No Connection with Company.—
In view of newspaper reports as to the recent hearing of the Davis Committee surveying the New Jersey State Department of Banking and Insurance, Hambleton & Co., Inc., makes the following statement:
"Neither Hambleton & Co., Inc., nor any of its officers or directors, or its affiliated companies, has at the present time any connection with or is in any way interested in New Jersey Shares Corp. Any such connection was terminated on Jan. 9 1928 at the request of Hambleton & Co., Inc. The sales contract between Hambleton & Co., Inc., and New Jersey Shares Corp., which was entered into on Oct. 8 1927, and ratified by the stockholders of New Jersey Shares Corp., was canceled by mutual agreement at such time."—V. 125, p. 3493.

Niagara Alkali Co., and Electro Bleaching Gas Co.—

Niagara Alkali Co. and Electro Bleaching Gas Co.

Bonds Called ..

Bonds Called.—
Certain bonds aggregating \$100,000 have been called for redemption Nov. 1, at par and int., and a premium of ½ of 1% for each 6 months between the date of redemption and the maturity of the particular bonds so-called for redemption. Payment will be made at the Maine Trust Co. of Buffalo, trustee, Buffalo, N. Y., or at the Second Ward Savings Bank, Milwaukee, Wis.—V. 118, p. 211.

North Butte Mining Co.—Sale of Stock Assured.—
President Paul A. Gow Sept. 5 says in substance:
The directors are convinced that by reason of the vicious attack made upon the company by the bondholders' committee late in the month of May, many Eastern stockholders were deterred and falled to make their subscription for treasury stock, which expired on June 1. However, in the face of this opposition subscriptions were received for 335,851 shares of treasury stock, a mounting to \$839,627. Of this amount over \$400,000 was subscribed in Butte, where all of the North Butte properties are situated and where the personnel of the board of directors and officers is known. Subscriptions for treasury stock exceed the estimated indebtedness by approximately \$100,000 and will insure the payment of all obligations of the company.

The directors have entered into a contract with responsible interests

and where the personnel of the board of directors and officers is known. Subscriptions for treasury stock exceed the estimated indebtedness by approximately \$100,000 and will insure the payment of all obligations of the company.

The directors have entered into a contract with responsible interests covering the balance of stock remaining unsubscribed at a price considerably more than its par value, and aggregating over \$1,000,000 net, and we expect the company to be in a position during the month of November in the present year to resume operations in its properties.

The Granite Mountain Mine will be reopened and ores produced from reserves in stopes now open.

The East Side properties of North Butte, embracing about 1,100 acres, will be developed through the Main Range shaft, now 2,200 feet deep. This property is on the direct easterly extension of the principal copper-liver veins of the Butte District. (See also V. 127, p. 559.)

Ohio Leather Co.—Clears Up Accruals on 1st Pref. Stock.

The directors have declared the regular quarterly dividend of \$2 a share and a dividend of \$3 a share on account of accumulation on the 1st preferred stock, both payable Oct. 1 to holders of record Sept. 20. Like amounts were paid on Jan. 1 and April 1 last. The payment on Oct. 1 will clear up all arrearages on this issue.—V. 127, p. 696.

Oliver United Filters, Inc.—Initial "B" Dividend.—

The directors have declared an initial quarterly dividend of 37½ cents per share on the "B" stock, no par value, payable Nov. 1 to holders of record Oct. 17. An initial dividend at this rate was paid Aug. 1 on the "A" stock for the period from May 17 to Aug. 1. See V. 127, p. 272, 835.

101-110 Central Park West, Inc.—Definitive Ctfs.—
Definitive certificates are now ready for delivery in exchange for outstanding interims. See offering in V.127, p. 272.

Packard Electric Co., Warren, O.—Extra Dividend, &c.
The directors have declared an extra dividend of 50c. per share in addition to a regular quarterly dividend of \$1 per share on the outstanding 30.600 shares of common stock (no par value), both payable Oct. 15 to holders of record Sept. 29. On Jan. 15, April 15 and July 15 last an extra dividend of 30c. per share was paid in addition to a regular quarterly disbursement of 70c. per share.—V. 126, p. 3940.

Paramount Famous Lasky Corp.—Listing.—
The New York Stock Exchange has authorized the listing of 2.063,517 shares common stock (no par value) upon official notice of issuance in exchange for 687,839 shares of common stock (no par value) now outstanding and listed in the ratio of 3 shares of new common stock for each share of old common stock.—V. 127, p. 1540, 835.

Petoskey (Mich.) Portland Cement Co.-Notes Offered. —Continental National Co., Chicago, recently offered \$1,500,000 serial 6% gold notes at 100 and int. for 1929-33 maturities and  $99\frac{1}{2}$  and int. for 1934-38 maturities.

\$1,500,000 serial 6% gold notes at 100 and int. for 1929-33 maturities and 99½ and int. for 1934-38 maturities.

Dated Aug. 1 1928; due \$150,000 each Aug. 1 1929 to 1938 incl. Principal and int. (F. & A.) payable at Continental National Bank & Trust Co. of Chicago, trustee. Denom. \$1,000 and \$500c\*. Redeemable on any interest date after Aug. 1 1929, on 30 days' notice at 100 and int. plus a premium of ½ of 1% for each year or part thereof prior to maturity, the premium in no case to exceed 3%.

Data from Letter of J. B. John, President of the Company.

Business.—Company, incorporated in Delaware in February, 1917, operates a modern cement mill of 1,500.000 barrels annual capacity at Petoskey, Mich. The location of the plant on Little Traverse Bay affords excellent shipping facilities by water as well as by rail. The lake shippments are handled at the company's own concrete dock. Directly adjacent to its mill the company owns an extensive limestone quarry, estimated to contain sufficient stone above lake level to supply the requirements of the present mill for at least 100 years.

The product is sold under the trade name of Petoskey Portland Cement and through the strong dealer organization which the company has buil' up. it receives a steady demand and wide distribution.

Earnings.—The sales and earnings of the company for the three years ended Dec. 31 1927, were as follows:

—Net Earn. Bef. Int. and Fed. Taxes—

Before Deprec. After Deprec. Times Max'm and Deplet'n and Deplet'n Int. Data from Letter of Otto Paschkes, Pres. of the Corporation.

History.—Corporation is being organized in Delaware to acquire the entire business and assets of the company of the same name incorporated in New York on March 19 1924. This company began business with a nominal investment and the business has grown steadily without additional capital.

capital.

Corporation manufactures essential units for manufacturers of radio receivers, transmitters, power supply devices and television apparatus. The principal products made by the company are filter blocks, paper condensers, bake-lite molded condensers, resistance units, voltage regulators and radio accessories. Company sells to the leading radio set manufacturers throughout the country and also markets its products through some of the leading chain store organizations. In addition, distribution of the company's products has recently established in England, South America, Australia and Canada.

The company's manufacturing operations are carried on in New York

and Canada.

The company's manufacturing operations are carried on in New York City where it leases a plant on advantageous terms.

Earnings.—The business has shown a net profit in each year since its inception. Net earnings as reported by the Auditors for the 28 months ending July 31 1928, after all charges including provision for Federal income taxes, have been as follows:

July 31 1928, after all charges including provision for Federal income taxes, have been as follows:

—Year ending March 31—4 Mos. end.

1927 1928 July 31 1928

Net earnings (as above) \$15,660 \$85,922 \$31,950

The above shows net earnings for 12 months ending March 31 1928 of approximately \$3 per share on the presently issued and outstanding stock. Comparison of the company's monthly sales this year show an increase of 150%—250% over last year's similar periods. With the additional working capital made available by this financing the company expects materially increased earnings.

Dividend.—It is the intention of the directors to authorize the payment of dividends at the rate of \$1.50 per share per annum payable quarterly, January, April, July and October first.

Purpose.—Proceeds will be used to increase the company's manufacturing facilities and for additional working capital.

turing facilities and for additional working capital.

Procter & Gamble Co.—New Director.—

Henry Walter has been elected a director to represent employes of the Staten Island, N. Y., plant.—V. 127, p. 561.

Purity Bakeries Corp.—To Acquire Cushman's Sons, Inc.

—M. L. Molan, President of Purity Bakeries Corp., has authorized the following announcement:

After a considerable period of negotiation, under date of Sept. 25, the Purity Bakeries Corp. has made an offer to stockholders of Cushman's Sons, Inc., to exchange common stock of Purity company for common stock of Cushman company on the basis of five shares of Purity company stock for each three shares of Cushman's common stock. Substantially

all the large holders of common stock of the Cushman company have given their assurance that they will make the exchange. Purity Bakeries Corp. has arranged with Cushman's Sons, Inc., of N. Y. City, to have the operation of the wholesale baking business of Cushman's placed under the management of Purity company.

Purity Bakeries Corp. was organized in Dec. 1924 and owns and operates through its subsidiary companies 34 plants located in 12 States, including the cities of Chicago, Detroit, Cleveland, Newark, Cincinnati, Pittsburgh, St. Louis, Indianapolis, Kansas City, Memphis, Toledo, Columbus, Minneapolis, St. Paul, Hamilton, Duluth, Flint, Wichita Falls, Muskogee, Springfield, Decatur, Burlington and Sedalia.

Additionally, it has very recently acquired the controlling interest in the stock of the Dixie Baking Co. of Texas, which in turn controls the operation of five plants in Texas, located in Dallas, Houston, Fort Worth, Beaumont and Abilene.

The Cushman company, formed in 1914, was the result of the consolidation of the business originally established by Sylvester Cushman and hissons in 1886 and of other business conducted by other members of the Cushman family, and also the business of Herschman & Bleier, founded in 1867.

The Cushman company at the present time operates nine wholesale plants and operates in its store business in Greater New York and nearby localities 186 stores.

As the result of these plans the staff of Purity company will lend their

The Cushman company and operates in Greater New York and record and operates in its store business in Greater New York and record 186 stores.

As the result of these plans the staff of Purity company will lend their abilities to the wholesale division of Cushman's, while the staff of Cushman's will be enabled to devote their attention more specifically to the management, development and extension of its store business.

The businesses to be affiliated will represent the aggregate annual output of approximately \$45,000,000.—V. 127, p. 423.

Rainbow Luminous Products, Inc.—Rainbow Light, Inc. Opens Two New Plants.—

The Rainbow Light, Inc., manufacturers of luminous tube electric display lighting, and the operating subsidiary of Rainbow Luminous Products, Inc., is opening two new production plants located in Pittsburgh and Boston to handle the greatly increased business in those districts and to relieve the Detroit and Long Island City plants formerly serving this area, it was anounced by President E. C. Bull.

In addition to the two new plants, the capacity of the Detroit plant is again being enlarged for the second time in 60 days. The main plant at Long Island City, N. Y., is also being enlarged by 50% of its present capacity.

pacity.

Although sales of both Rainbow Luminous electric tubes and complete signs established a new high record during the second quarter of this year, sales during the present quarter have increased 500% over the previous record. The company at the present time is making installations for 20 of the largest national advertisers in the country, and local business in the branch plant territories has more than kept pace, according to Walter E. Skiff, General Sales Manager.

The six Rainbow Light, Inc., plants, located in Long Island City, Chicago, Cleveland, Detroit, Kansas City, and, through Neale Rainbow Light, Inc., in Los Angeles, have been operating at full capacity for some time.—
V. 127, p. 696.

Republic Iron & Steel Co.—Listing, &c.—
The New York Stock Exchange has authorized the listing of not exceeding 115.824 additional shares (no par value) common stock, (a) 31,500 shares thereof on official notice of issuance in partial payment for all the issued and outstanding common stock of Steel & Tubes, Inc (new corp.) and (b) 84.324 shares thereof on official notice of issuance to the holders of class "A" shares of the new corporation which are to be issued, making the total applied for to date 740,343 shares.

The Republic company, under date of Aug. 14 1928, entered into an agreement with Steel & Tubes, Inc. (called the "Tubes Co."), pursuant to the terms of which the Republic company has caused to be organized a new corp., which on or before Oct. 1 1928, will acquire all the property and assets, including the good-will of the Tubes company.

The capital securities of the new corporation (Steel & Tubes, Inc.) on or about Oct. 1 1928, follow:

\*\*Authorized.\*\* Outstanding, Class "A" (no. par).

Richfield Oil Co. of California.—Listing.— The San Francisco Stock Exchange has authorized the listing of 175,000 additional shares of common stock (par \$25) making the total amount listed 2,100,881 shares.—V. 127. p. 1263, 1690.

Richmond Ice Co. (& Subs.).—Earnings.—
Net income for August 1928 available for interest and depreciation was \$69,666, against \$49,501 for August 1927. For the 12 months ending Aug. 1 1928 the company's earnings were \$241,580, against \$221,415 for 12 months ending July 1 1928, and \$214,188 for 12 months ending June 20 1928.—V. 125, p. 3653.

Ross Gear & Tool Co.—Estimated Earnings.—
Earnings for the first nine months of 1928 are estimated in excess of \$600,000 after all charges, including Federal taxes, by Edward A. Ross, President. This is equal to \$4 per share on the 150,000 shares of common stock, which is at an annual rate of \$5.33 per share.

The management reports that the number of steering gear shipments for the third quarter are 112% greater than for the same period of 1927, and exceed the second quarter of this year by 10%. Previous experience has shown that the third quarter is usually less than the second quarter. This large increase is said to be due in part to the large increase in the number of gears sold for replacement throughout the country.

The October schedule is reported as the largest in the history of the company.—V. 127, p. 561.

Ross Stores, Inc.—Merger Rumors Denied.—
President Benjamin Bachrack last week stated that all rumors as to consolidation of the corporation with any other chain store organization were absolutely without foundation. The corporation is not considering any consolidation, but is proceeding with the development of its own business along constructive lines prevously determined upon, it was further stated.—V. 127, p. 1690.

-V. 127, p. 1690.

Rumidor Corp. (N. J.).—Dividend Prospects.—

President R. D. Zucker announces that the corporation intends to inaugurate dividends on the common stock for payment on or about Jan. 1 1929, with an initial regular quarterly payment of 50 cents per share, placing the common stock on a regular annual \$2 basis. From present indications it appears likely that an extra dividend of 50 cents will be paid in addition to the first regular quarterly payment, it is said.

Sales of Rumidors have been increasing rapidly, according to Mr. Zucker. A large contract was recently closed with the American Tobacco Co. and there are other large contracts in immediate prospect. Also, the "refili" business, a big factor in the corporation's trade, has been showing corresponding increases.—V. 127, p. 1690.

Safeway Stores, Inc. (Md.)—Proposed Consolidation.— ee Sanitary Grocery Co., Inc., below.—V. 127, p. 1540,

Sanitary Grocery Co., Inc.—To Merger With Safeway Stores, Inc.—Offer to Stockholders.—

President E. G. Yonker confirms the report that an offer of 3 shares of Safeway Stores common stock as at present constituted) in exchange for 5 shares of Safeway Stores common stock will be presently submitted to the stockholders. It is expected that before this proposition can be consummated Safeway common stock will be increased either by a stock dividend of 400% or by a 5-to-1 split, in which event one share of Sanitary will receive in exchange 3 shares of new Safeway stock. As a part of the new developments, Sanitary preferred stock will be called but prior to redemption the preferred stockholders will be entitled to convert their stock into common and receive the pro-rata shares of Safeway common in exchange according to the plan.

In his remarks, Mr. Yonker states as follows: "Safeway Stores operates 933 grocery stores, 289 markets and 6 bakeries, the largest chain west of the Mississippi River. The gross volume of Safeway in 1927 was in excess of \$76,000.000. The Safeway company first came into prominence in 1925 through the acquisition of several chains in California and in July 1926 it joined with the Skaggs organization. At the time these 2 organizations joined forces they had 869 stores and total volume of business of approximately \$38,700.000, while the sales of 1928 are expected to exceed \$100.000,000.

"Sanitary Grocery Co., Inc., was originally established in 1909 with 23 stores. At the time of its incorporation in 1927, when the present management took charge, it had 312 stores and a sales volume of about \$15,000.000. At the end of the calendar year 1927, the company had 368 stores and did a volume of business amounting to over \$17,700.000. In Sept. 1927, the company acquired a chain of 49 Piggly Wiggly self-service stores and meat markets operating in Washington and vicinity and these stores are being successfully operated under the Sanitary management. Last May the company acquired a chain of 49 Piggly Wig

in Richmond, Va. I estimate that the volume of business of the Sanitary Grocery Co. this year should be approximately \$25,000,000.

"I shall be President of the corporation which will operate the Sanitary Stores, while my associate, H. V. Hoskinson, will be Vice-President. Both of us are large stockholders in the present Sanitary company and we will vote in favor of the plan. Apart from this I shall become a Vice-President of Safeway Stores, Inc., with headquarters in Washington. We plan to increase stores in our immediate territory as fast as good locations are available."—V. 127, p. 1541, 836.

Shares in the South, Inc.—Investment Trust Organized Specialize in Southern Securities—Sponsored by Caldwell

Formation of a new investment trust, Shares in the South, Inc., has been announced by Caldwell & Co., investment bankers. The trust, which will have offices in New York and Nashville, is the first organized for the explicit purpose of investing in the securities of Southern enterprises. The shares, it is stated, will be listed on the New Orleans Stock Exchange. A large part of the common stock of the trust has already been subscribed for by officers and employees of Caldwell & Co.

Shares in the South, Inc., has been incorporated in Delaware with an authorized capitalization of 250,000 shares of no par common stock, of which it is planned to issue 50,000 shares of no par common stock, of which it is planned to issue 50,000 shares in the near future. It will be conducted as an investment trust of the corporation type, similar to those which have proven highly successful in England and Scotland.

The investment trust will use the funds received through the sale of its capital stock to invest in the stocks and bonds of the various types of Southern corporations, including railroads, public utilities, insurance companies, banks and industrial concerns.

Officers and directors of Shares in the South, Inc., will be composed of officers of Caldwell & Co., who will give the investment trust their personal supervision. Rogers Caldwell, President of Caldwell & Co., will be President of Shares in the South, Inc. Other officers will be DeWitt Carter, V.-Pres, E. J. Heitzeberg, V.-Pres, Fred K. Kirtland, Treas; and T. W. Goodloe, Sec. Directors will include H. C. Alexander, Jack M. Bass, Rogers Caldwell, DeWitt Carter, T. W. Goodloe, E. J., Heitzeberg, C. H. Hutton, Fred K. Kirtland, Frank D. Marr and R. L. Voss.

Sharon (Pa.) Steel Hoop Co.—New Director.— B. E. Kibbee, Vice-President in charge of sales, has been elected a rector to fill a vacancy.—V. 126, p. 3774.

Sharp Manufacturing Co.—Subscriptions Asked.—
President Joseph T. Kennedy is notifying stockholders that it will be necessary for them to subscribe to approximately \$1,000,000 of prior preference stock or notes to enable the mill to continue in operation. If stockholders or others do not express a willingness to subscribe the required funds by Oct. 1 a special meeting of stockholders will be called to vote on liquidation.—V. 127, p. 1117.

Sheffield Steel Co.—50% Stock Dividend.—
The directors have declared a 50% stock dividend on the communication, no par value, payable Oct. 10 to holders of record Oct. 5. A 33 1-stock distribution was made on July 1 last. Compare V. 126, p. 3774.

Southern Sugar Co.—To Finance New Sugar Mill by Sale of Preferred Stock.—

To finance construction of a third sugar mill of 2,500-ton daily capacity at Canal Point, Fla., the company announces an issue of 35,000 shares of 7% cumulative preferred stock.

The company recently has completed the sale of \$4,500 000 of preferred stock to finance two sugar mills erected at Clewiston and Canal Point, Fla. The new mill will give the company in 1929 a total grinding capacity of 4,500 tons per day.

The company's development, when fully completed, will it is said, be capable of producing on its 110.844 acres of Everglades land, about 450,000 tons of sugar annually.—V. 127, p. 1690.

SUllivan Machinery Co.—Outlook—Status.

Vice-President A. E. Blackwood says in substance: "We look for a greater demand for our products, and, in consequence, anticipate a better fourth quarter than in 1927. Unfilled orders have increased considerably since Jan. 1. Invoiced business for the first 8 months of this year is some 6% less than for the same period of last year.

"Cash on hand Sept. 1 amounted to \$1.065.664, against \$970.211 at Dec. 31, last; notes receivable were \$459.320, as compared with \$198.297 at the end of last year; and accounts payable Aug. 1 were \$334.848 against \$399.908 at Dec. 31.1927.

"There has been a decided increase in production at the Michigan City plant and a satisfactory improvement in production at the Claremont (N. H.) plant.

"Naturally, we cannot definitely predict the final results for this year but we feel confident that our dividend will be earned, and indications are that our income statement will compare favorably with that of 1927."—
V. 127, p. 1400.

Superior Oil Corp.—Chairman Elected.—

Transcontinental Oil Co.—Production.—

Information has been received by this company that the regular semimonthly gauge of producing wells in the Yates Pool, Pecos County, Tex.,
was taken on Sept. 15 1928, and indicated a production from the field of
3.835.105 barrels per day, an increase over the Sept. 1 production of
slightly over 409,000 barrels. The Transcontinental-Mid Kansas production from the field as of Sept. 15, gauged 1,697,626 barrels per day,
an increase of over 306,000 barrels per day as against the run of Sept. 1.
This increase in production for the joint property was due to the fact that
7 wells were deepened, which increased their flow substantially, and 5 new
wells have been brought in with an aggregate daily production of 192,066
barrels.

Wells were been brought in with an aggregate daily producted barrels.

Transcontinental-Mid Kansas holdings are now entitled to approximately 45% of the oil being marketed through the pipe lines under the proration agreement, and whereas the amount marketed as of Sept. 1 for the 2 companies ran slightly over 28,000 barrels per day, the joint oil delivered to the pipe line as of Sept. 15, and thereafter will amount to 32,600 barrels per day, increasing Transcontinental's share to 16,300 barrels per day.—V. 127, p. 1400.

Triplex Safety Glass Co. of North America, Inc.-Final Dividend of 15%.—

H. State income tax up to 3% of the interest per annum refunded.

Company.—The business was established Apr. 1 1924 in Mineola, L. Li, with a paid in capital of \$65.000 by a group of about 20 men, nearly all of whom were officers and directors of State and National Banks in Long Island. As of June 30 1928. its capital, surplus and deferred income reserves amounted to \$3.153.762.09, with assets (after giving effect to this financing) of \$6.211.316.85.

The company operated for a year and a half exclusively in Nassau County, with a view of testing thoroughly the principles on which it was founded. These tests having proved uniformly satisfactory, the company began to expand in a conservative way, making close affiliations with bankers in community after community until its operations now include Queens, Suffok and Nassau Counties in Long Island, and New York and Westchester Counties, all being in the Greater New York metropolitan zone. 4 Guaranty.—The bonds are unconditionally guaranteed by endorsement both as to principal and interest by the Mortgage (Tile Guaranty Co. of America. This company is a subsidiary corporation of the United States Bond & Mortgage Corp., with a paid-in capital stock and surplus of \$300,-000. An increase in the capital stock and surplus of New York under voted by the board of directors

out. An increase in the capital stock and surplus to \$1,000,000 has been approved by the board of directors of the parent corporation and has been approved by the Insurance Department of the State of New York under whose regulations and supervision the guaranty company operates. Under the insurance laws of the State of New York the funds of the guaranty company must be segregated and kept apart from those of any affiliated corporations.

Compare also V. 126, p. 3777.—V. 127, p. 1266.

United States Foil Co.—Initial Class B Dividend.—
The directors have declared an initial quarterly dividend of 25 cents per share on the class B common stock, no par value, payable Oct. 1 to holders of record Sept. 15. See also V. 127, p. 1266, 1119.

\*\*Capitalization—\*\* 70,000 shs. 70,000 shs. 70,000 shs. History.—Company, organized under Wisconsin Law in 1919, is engaged in the manufacture of both front and rear axles for trucks ranging in capacity from 1½ to 7 tons. Rear axles, which comprise over 96% of the total axle production, are designed with either double reduction or worm drive. Company ranks first among axle manufacturers in the production of double reduction drive and second in worm drive axles. The double reduction type, which constitutes a large majority of the total number of axle, which patents ever developed under the President's direction.

The strong position of the company from a sales standpoint is evidenced by the fact that it supplies axles to more than half of the truck manufacturers in the United States. The annual purchases of the largest single customer constitute less than 15% of the company's total business. In addition to its axle business, the company manufactures a line of miscellaneous products, including tractor transmissions and roller bearing journal boxes.

Company's plants are located on about 80,600 square feet of land on the Chicago and North Western Belt line in Oshkosh, Wis. The plant buildings, all constructed between 1912 and 1926, occupy about 50,000 square feet, exclusive of the office and certain adjacent small buildings. Sales and Earnings.—Net sales have shown a steady increase in every year from 1921 to 1927, inclusive, and results for the first 6 months of 1928 indicate the best year in the company's history, both from the standpoint of net profits and net sales.

1927 1926

Yarns Corp. of America.—Stock Offered.—Doroshaw & Co., New York, are offering at \$16.75 per share, to yield over 7%, 18,000 shares convertible class A stock (no par value).

Initial Dividend .-The directors have declared an initial quarterly dividend of 30 cents per share on the outstanding convertible class A stock, payable Oct. 1 to holders of record Sept. 29. See offering in V. 127, p. 839.

Yellow Cab Co., Baltimore, Md.—Pref. Stock Sold.—Gillet & Co., Baltimore recently offered and sold \$300,000 cumulative 7% prior preferred stock (par \$100) in units of one share of common stock and two shares of prior preferred stock at \$200 per unit.

Stock at \$200 per unit.

Dividends payable Q.-M. Red. on any div. date upon 30 days' notice at \$107.50 per share and divs. This stock is free from the Maryland securities tax of 4% mills and the dividends received from it are free from the present normal Federal income tax. Transfer agent, Union Trust Co., Maryland, Baltimore, Md. Issuance approved by the P. S. Commission of Maryland.

Data from Letter of W. W. Cloud, Pres. & Genl. Mgr. of the Company. Company.—Organized in Maryland early in 1909, being among the ploneer taxicab companies in America, and has been in continuous operation since organization. Business has shown marked progress since its inception and for years the company has done the major part of the taxicab business in the City of Baltimore and its suburbs. In addition to operating a fleet of more than 200 taxicabs, the company also owns valuable leasehold real estate.

#### COMMERCIAL EPITOME

[The introductory remarks formerly appearing here will now be found in an earlier part of the paper immediately following the editorial matter, in a department headed "INDICATIONS OF BUSINESS ACTIVITY."]

Friday Night, Sept. 28 1928.

COFFEE.—On the apot was quiet and steady early in the week; Rio 7s, then were 17½c.; Santos 4s, 23½ to 23¾c; Victoria 7s and 8s, 16¾c.

Later trade was moderate at steady prices. Santos 4s, 23½ to 24c, Rio 7s 17½c; Victoria 7s-8s 17c. Within a week 30,000 bags of Robustas it is said have been bought back by the original sellers.

Some reports said that the

Some reports said that the weather in coffee growing districts was cloudy in all sections. Any rain would greatly relieve the situation.

One comment was that the market continued to be considerably below shipping parity with Brazil.

On the 24th inst. cost and freight offers were unchanged to slightly higher.

On the 25th inst. cost and freight offers were about unchanged.

slightly higher.
On the 25th inst. cost and freight offers were about unchanged.
On the 27th inst., cost and freight offers were generally lower. Santos Bourbon 2-3s were quoted at 24c.; 3s at 23¾c. to 23.80c.; 3-4s at 22.80 to 23.10c.; 3-5s at 22½ to 22.65c.; 4-5s at 22.20 to 22¾c.; 5s at 22.15c.; 5-6s at 21.90c.; to 22.65c.; 6s at 21.65c.; 6-7s at 20.90c.; 7-8s at 18.10 to 20.60c.; part Bourbon 2-3s at 24c.; 3-5s at 22.85c. Peaberry 4s at 22¼c.; 4-5s at 22½c.; 5-6s at 21.90c.; in combination prompt 3-5s were offered at 22.40c. and 4-5s at 22¼c. The deliveries of Brazilian coffee last week were 150,600 bags against 154,876 m the preceding week and 176,105 bags for the corresponding week last year. Futures on the 24th inst. advanced 5 to 15 points; sales of Rio were 7,250 bags and of Santos 13,750 bags. Covering and supposedly European and Brazilian buying with higher Santos cost and freight prices accounted for the rise. Another comment was as follows: "The fact that Rio holders are aware that they have sold as much coffee as they can expect to, to Europe, and are now turning their attention to our importers and roasters has at times tended to an easier tone, but Brazil is offering sufficient support to at least maintain present levels if not to advance them. A further sentimental effect resulted from the news of continued drought in Sao Paulo. Serious results to the Santos outturn are feared unless rain is had shortly."

Sao Paulo, Brazil cabled that the dry season in the coffee regions of Sao Carlos, Arraguara and Douradense is causing alarm.

The "West Corum" has landed 14,000 bags of Brazilian

alarm.

alarm.

The "West Corum" has landed 14,000 bags of Brazilian coffee at Houston and the "Conehattan" 10,000 bags at Baltimore, all of which is going at once into consumption and does not appear in the visible supply.

To-day Rio futures closed 5 points lower to 3 points higher with sales of 10,000 bags. Santos futures were 2 points off to 3 higher with sales of 16,000 bags. Final prices for the week show decline of 14 points on December Rio and 20 points on December Santos. points on December Santos.

Rio coffee prices closed as follows:

Spot unofficial — Mar.—21.33@—July—20.68@—bid Dec.—21.80@—May.—20.97@—Sept.—20.30@—bid SUGAR.—Prompt Cuban raws were quiet for a time at 21/4c. c. & f. and 4.02c. delivered. Some inquiry from Europe and Canada for shipment broke the monotony a little but the bids were unacceptable. A leading importer of Porto Rican sugars had reports that damage done to the growing cane in Porto Rico by the hurricance amounts to fully 25% of the entire acreage. Some of it may revive during the remaining three months of growth weather but in any event there is a fear of a reduction in sucrose content. Receipts at United States Atlantic ports for the week were 48,343 tons against 56,355 in the previous week and 40,453 in the same week last year; meltings 61,000 tons against 58,000 in previous week and 54,000 last year; importers' stocks 260,122 tons against 271,301 in previous week and 134,977 last year; refiners' stocks 94,298 against 95,776 in previous week and 51,872 last year; total stocks, 354,420 against 367,077 in previous week and 186,849 last year. One report of the Cuban crop movement for the week ending Sept. 22nd, was: receipts 51,895 tons; exports 91,763 and stock 501,620 tons.The exports were distributed asfollows: To New York 19,267 tons; Philadelphia 13,276; Boston 4,643; Baltimore 1,433; New Orleans 20,092; Savannah 4,379; Interior of United States, including Charleston 2,084 tons; Canada 3,174 tons; United Kingdom 19,865; France 2,757; Canary Island 157; Central America 56. The meltings

of all refiners from January 1st to September 15th according to the Sugar Institute were 3,275,383 long tons against 3,721,219 last year.

On the 25th inst. 1,500 tons Cuban raws sold out of store at 3.93c. delivered. It was said on the 26th inst. that some 25,000 tons of Java whites for October-November-December shipment had been made to the Continent on the basis of 12s. 9d. c. i. f. On the 27th inst. the sale of 120,000 of Java

shipment had been made to the Continent on the basis of 12s. 9d. c. i. f. On the 27th inst. the sale of 120,000 of Java sugars was confirmed by early London cables. It consisted of raws not browns and was sold for December to March shipment at a price equal to 10s. 3d. c. i. f. or about 2.03c. f. o. b. Cuba. Tate Lyle is said to have taken 50,000 tons of the block, the Continent 70,000. There was a report that 25,000 tons of Java whites have been sold to the Continent at 12s. 9d., probably a resale from the original block. Havana cabled: "Instructions have been given for chartering ships to carry the balance of 300,000 tons of Cuban sugar sold to England as difficulties between Czarnikow Rionda Co. and Tate & Lyle, the British refiners, have been settled. Aurelio Portuondo, member of the Sugar Export Corp. and H. Fanjul, President of Cuban Trading Co., have sailed for the United States." Havana cabled that the Cuban Export Corp. has been completely dissolved. Other cables said that the decree of dissolution has not yet been issued, but was expected momentarily. This was called bullish. Prague cabled that after general rains last week the weather was fine. The weight of beets with tops is given as 426 grams, without tops at 295 grams and the sucrose yield was 17.77%. Last year, the figures respectively were: 460, 371 and 17.25%.

Hamburg cabled that the market was steadier with the dryness continuing and partly delaying harvesting.

Prague cabled: "General rainfall in Europe during the past three days but it has come too late to do good. The weather is cold. It is believed that Licht's estimate, which is now about due will be below that of Dr. Mikusch's which was issued about the end of August."

Refined was 5.40c with a rather better demand.

Future on the 24th inst. declined 4 points with sales of

Refined was 5.40c with a rather better demand.
Future on the 24th inst. declined 4 points with sales of 28,900 tons. No aggressive demand appeared. British buyers it is supposed are less anxious after recent estimated purchases of 200,000 tons of Java white for shipment west of Suez added to the purchases of Cuba a short time ago. They may feel secure for the rest of the year. A prospective large carryover of Cuban raws is not forgotten; it is indeed underlined. And yet there was no very marked pressure underlined. And yet there was no very marked pressure to sell futures.

Regardless of the selling by big producing interests and the prospects of large supplies for next year, they contend in certain quarters that all known bear factors have by this time been discounted and that present prices are intrinsically very cheap. Even if Java's next crop will be increased 500,000 tons or more and European consumption is reported as increased 14%, the decrease in exports some assert offsets this. The next Cuban crop is expected to show a substantial increase. Early reports of damage due to the

increased 500,000 tons or more and European consumption is reported as increased 14%, the decrease in exports some assert offsets this. The next Cuban crop is expected to show a substantial increase. Early reports of damage due to the hurricane in Porto Rico were much over-estimated and is now known to be less than 20%. With all these facts some are dubois about the possibility of a sustained advance during the remainder of this year. Some said that there is a reasonable expectation of a crop of around 4,600,000 tons of Cuban with a possibility under favorable conditions of 5,000,000 tons. They add with the acknowldged increased demand for Cuban sugar from Great Britain during 1928 a Cuban crop of 4,600,000 tons ought not to be a heavy burden on prices for raw sugars in New York. It is suggested that present prices will increase the consumption the world over to such an extent that present, or lower prices, will ultimately prove to be the foundation for a permanent change in the whole sugar situation.

The stock of raw sugar in licensed werehouses to-day is 1,740,084 bags against 1,943,402 bags on Aug. 31st and 2,367,218 bags on May 26th, when it was at its highest. The raw suger market had a much better tone yesterday. Of Cuba for October shipment 14,000 bags were sold at 2.7-32c. c. & f. New York. Canada bought 19,500 bags for first week in October shipment at 2.20c. c. & f. Licht's preliminary estimate of the crop of all Europe is as follows: Germany, 1,600,000 metric tons against 1,655,000 last year; Czechoslovakia, 1.040,000 metric tons against 1,240,000 last year; France, 810,000 against 865,000 last year; Belgium, 260,000 against 275,000 last year; England, 225,000 against 500,000 last year; Roland, 640,000 against 500,000 last year; Roland, 225,000 against 230,000 last year; Roland, 240,000 metric tons against 1,500,000 last year; total all Europe, 7,807,000 metric tons against 8,016,000 last year; total all Europe, 7,807,000 metric tons against 8,016,000

Licht reports that September weather for the growing crop was chiefly unfavorable. To-day futures closed 3 to 5 points lower with sales of 34,600 tons. They ended 8 points lower than a week ago. Prompt raws were quoted at 23-16c. or 3.96c. delivered.

Sugar prices closed as follows:

LARD.—On the spot was weaker late last week with the demand smaller. Prime Western 12.05 to 12.15c in tierces c.i.f. New York; refined Continent 14½c; South America 14¾c; Brazil 15¾c.

Futures on the 22nd inst. at one time advanced 5 to 7 points but reacted later, owing to a decline in hogs and a break of 7½c in September corn. Liverpool advanced 6d to 1s. Deliveries of bellies on September contracts on the 22nd inst. at Chicago were 250,000 lbs. Hog receipts at Western points were 28,000 against 18,400 a week before and 17,000 last year.

Today prices declined 12 to 17 points. There was quite a little selling of October. Cash trade was small. Hogs were 10 to 15c higher. Western hog receipts were 62,000 against 51,000 a year ago. Chica o expects 5,000 tomorrow. Final prices show a decline for the week of 50 to 60 points.

DAILY CLOSING PRICES OF LARD FUTURES IN CHICAGO.

Cheese, 24 to 28c. Eggs, medium to extras, 29½ to 39c.

OILS.—Linseed was in only fair demand but steady. Crushers asked 10c. for raw oil in barrels, carlots and 10.8c. in single barrels. Consumption has been very large but stocks are ample. The strength of flaxseed has done more than anything else to maintain prices. Cocoanut, Coast, tanks, 75%c.; spot, N. Y. tanks, 8c.; Corn, crude, barrels, 10¾c.; tanks, f.o.b. mill, 8¾s to 8¾c. Olive, Den., \$1.35 to \$1.40. Chinawood, N. Y. drums, carlots, spot, 15½c.; Pacific Coast, tanks, spot, 14c. Soya bean, barrels, N. Y., 12¾c.; tanks, coast, 9¾c. Lard, prime, 16½c.; extra strained winter, N. Y., 13¾c. Cod, Newfoundland, 68c. Turpentine, 52½ to 58c. Rosin, \$9.60 to\$11.05. Cottonseed oil sales to-day, including switches, 11,200 barrels. P. Crude S. E., 8¾c. Prices closed as follows:

[Tables of prices usually appearing here will be found on an earlier page in our department of "Business Indications," in an article entitled "Petroleum and Its Products."]

RUBBER.—On the 24th inst. advanced 20 to 40 points on futures and 25 points on outside prices. Trading slowed down on account of the Jewish holiday. The sales were force behind the advance. The London stock decreased 226 tons. New York on the 24th closed with Sept. 18.10 to 18.20c; October 18.10c; December 18.20 to 18.30c; January 18.20c March 18.30c. Spot price 18.20c. BB contracts: September 17.90c; October 17.80c; November 17.70c; December, 17.60c; January 17.40c; February 17.40c; March 17.40c; April 17.40c; May 17. 40c; June 17.40c; July 17.30c; August

17.40c. In London under the stimulus of a brisk demand 17.40c. In London under the stimulus of a brisk demand for landed c.i.f. terms from America prices advanced 1-16 to ½d Spot and Oct. 83/d to 8 7-16d; November 8½ to 8 9-16d to 85/d; January-March 8 11-16d to 83/d. In London on Sept. 24th the stock was as follows: 31,884 tons against 32,110 a week previous, 32,815 a month ago, 67,253 a year ago and 34,587 two years ago. In Singapore on Sept. 24th October 81/d; October-December 8 3-16d; January-March 8 3-16d.

on Sept. 24th October 8¼d; October-December 8 3-16d; January-March 8 3-16d.

London closed on the 22nd inst. unchanged to 1-16d. net higher. Spot-September and October, 8 5-16d.; November, 8 7-16d. and January-March, 8 11-16d. Singapore on the 22nd closed dull and unchanged; No. 3 amber crepe, 7¾d., a decline of 1-16d. On the 25th inst. London closed steady and 1-16 to ⅓d. higher, with spot-October 8½d.;November, 8 9-16d.; December, 8 11-16d. and January-March 8 13-16d. On the 26th inst. New York advanced 10 points on some months and fell 10 points on others after all month at one time were off 10 to 20 points. Consumption for September is estimated in one case at 40,000 tons or 3,000 to 4,000 tons less than the August figure. The present month has one day less of course. Imports of crude for September are put at about 40,000 tons. Prices here on the 26th inst. closed at 18.30 to 18.40c. for October; 18.40c. for December, 18.30c. for January and 18.50 to 18.60c. for May. B. B. contracts: October-November and December, 18c.; January, 1929, February, March, April, May and June, 17.70c.; July, 17.90c.; August, 17.80c.; spot, 18.20c. Outside prices: Smoked ribbed sheets, spot, September and October, 18½ to 18¾c.; October-December and January-March, 18¾ to 18½c.; October-December and January-March, 18¾ to 18½c.; April-June, 18½ to 18¾c. In London on Sept. 26th the tone was firmer especially for spot and nearby rubber with good local speculative and Continental demand. Singapore was firmer especially for spot and nearby rubber with good local speculative and Continental demand. Singapore was firmer and 1-16d. higher. In London spot and September, 8¾d.; October, 8½d.; November, 8 11-16d.; December, 8¾d.; January-March, 87½d., or 1-16 to ⅓d. higher for theday.

The memoers of the Rubber Exchange of New York are signing a petition seeking to have a day appointed to vote on the proposition to make Saturday, Oct. 13, the day

January-March, 8½d., or 1-16 to ½d. higher for theday. The memoers of the Rubber Exchange of New York are signing a petition seeking to have a day appointed to vote on the proposition to make Saturday, Oct. 13, the day after Columbus Day, an extra Exchange holiday. Some argued that consumption continues at a very satisfactory rate with estimates early in the week for the current month of anywhere from 35,000 to 37,500 tons. American consular officers at Singapore, Penang, Colombo, Batavia, Sourabaya, Medan, London, and Liverpool, who vise invoices on all rubber shipped to the United States from Malaya, Ceylon, and the Netherland East Indies, and practically all from the United Kingdom, report by cable the following amounts of rubber invoiced during the week ended Sept. 15 1928 as compared to amounts invoiced during the three preceding weeks: Sept. 15, 8,724 long tons; Sept. 8, 7,880; Sept. 1, 8,553, and Aug. 25, 10,671 long tons. In London to-day prices closed unchanged to ½d. lower: Spot-Oct., 8½d.; Nov., 8 9-16d.; Dec., 8½d., and Jan.-Mar., 8¾d. The trade looks for a decrease of about 200 tons in the London stock on Monday. To-day prices closed 10 points lower to 10 points higher with sales of 150 lots. Final prices are 20 to 30 points higher than a week ago.

week ago.

HIDES.—Frigorifico hides were in fair demand. Sales included 32,000 Argentine steers at 23 11-16c. to 23 13-16c. Country hides were quiet. Sellers and buyers' ideas are rather far apart. Common dry hides were in rather better demand and as a rule steady. City packer remained quiet. Packers were not offering their September production of native and branded steer hides. Last sales included it is stated a lot of spready native steers at 26½c.; butt brands at 23c. and Colorados at 22c. Common dry Cucuta, 35c.; Orinoco and Santa Marta, 34c.; Maracaibo, Laguayra and Savanilla, 33c.; Central America, 33½c. New York City calfskins, 5-7s, 2.45c.; 7-9s, 2.90c.; 9-12s, 3.80c.

OCEAN FREIGHTS.—Coal rates advanced. Other rates were steady.

OCEAN FREIGHTS.—Coal rates advanced. Other rates were steady.

CHARTERS included grain from Montreal to Constantinople, 20½c.\* Oct. 15-31; 33,000 grs. Montreal, Nov. 5-25, to Marseilles, 17½c.; Montreal Oct. 15-25, to Beirut, Piraeus, Patras, 23s. for heavy grain, flour, option 27c.; Montreal to Greece, Oct. 25-Nov. 10, 4s.; 20.000 grs. Montreal. pushed. Pennsylvania broadleaf filler 10c.; broadleaf binder 20 to 25½c; Porto Rico 60 to 80c.; Connecticut top leaf 21c.; No. 1 second 1925 crop 65c.; seed fillers 20c; medium wrappers 65c.; dark wrappers 1925 crop 40c.

COAL.—Prices have been firmer in Southern low volatiles at the West stimulated by cold weather and a better demand. Chicago, Cleveland and Cincinnati have had a larger trade Chicago, Cleveland and Cincinnati have had a larger trade especially Chicago. Hampton Road's trade has increased somewhat in high and low southern volatile. In New England business has been unsatisfactory but this does not seem likely to continue. To New York shipments of soft coal were large. Retail dealers here have been buying anthracite more freely. Bituminous f. o. b. piers navy standard \$5.25 to \$5.60; high volatile steam, \$4.30 to \$4.60; high grade medium volatile, \$4.90 to \$5. Anthracite, f. o. b. mines, company, grate, \$8.25; stove, \$9.10; pea, \$4.50 to \$5; rice, \$1.75 to \$2.25; egg, \$8.75; nut, \$8.75; buckwheat, \$2.75 to \$5.25; barley, \$1.25 to \$1.75.

COPPER.—Domestic demand fell off but export business

COPPER.—Domestic demand fell off but export business COPPER.—Domestic demand fell off but export business was fair. Domestic consumers' requirements seem to be well covered over the rest of the year. In a few cases December needs will have to be covered. It is probable however that many over-bought for November and that this copper will be carried well into December. Foreign consumers on the other hand have contracted for only about

December needs will have to be covered. It is probable however that many over-bought for November and that this copper will be carried well into December. Foreign consumers on the other hand have contracted for only about half of their October requirements and for little if any November and December. Lake shipments are falling off. Prices were 15½c c. i. f. Europe and 15½c delivered Connecticut Valley. In London on the 26th inst. spot standard declined 1s 3d to £64 11s 3d; futures fell 2s to £65 2s 6d; sales 50 tons spot and 250 futures; electrolytic unchanged at £71 5s for spot and £71 15s for futures.

Of late trade has been less active but steady. Lake 15¼ to 15¾c; electrolytic 15¼c. London on the 27th inst. declined 1s 3d on standard to £64 10s; futures of 2s 6d to £65; sales 200 tons spot and 350 futures. Electrolytic £71 5s.

TIN was in fair demand. Sales here on the 26th inst. were 300 tons. Consumers bought on a fair scale. A sale of May was made at 48½c on the 26th. Prices advanced that day ¼ to ¾c. October sold at 48¾ to 48½c., November at 48½ to 48¾c., and December at 48¾ to 48½c., November at 48½ to 48¾c. and December at 48¾ to 48½c., November at 48½ to 48¾c. and December at 48½ to 48¾c., November at 48½ to 48½c. Eastern c. i. London on the 26th inst. standard dropped 10s. to £223 for spot and £218 10s. for futures; sales 50 tons spot and 550 futures; spot Straits unchanged at £226. Eastern c. i. f. London declined 10s. to £220 15s. on sales of 175 tons. Of late trade has been good; sales 500 tons. Spot Straits, 49¾c., October, 49½c.; November, 49¾c. In London on the 27th inst. standard advanced £1 10s. to £224 10s.; futures up £1 17s. 6d. to £220 7s. 6d.; sales 100 tons spot and 900 futures; spot Straits 15s. higher at £226 15s.; fastern c. i. London up £1 10s. to £222 5s. with sales of 175 tons. The organization of a new combination of British tin producing interests operating in the Malayan Peninsula was officially announced on the 26th inst. by the Anglo-Oriental Mining Corp., the Tin Selection

13s. 9d. for spot and £21 8s. 9d. for futures; sales, 150 tons spot and 400 futures.

ZINC was in fair demand and steady at 6.25c. East St. Louis. Production last week was abnormally low but is expected to show an increase in the present one. Brass special showed a premium of 10 points over slab zinc in August according to the American Zinc Institute. In London on the 26th inst. spot advanced 3s. 9d. to £24 2s. 6d.; futures up 2s. 6d. to £24 6s. 3d.; sales, 325 tons futures. Of late new features have been wanting and prices have remained at 6.25c. at East St. Louis and 6.35c. for brass special and \$40 per ton for ore. London on the 27th inst. fell 2s. 6d. to £24 for spot and £24 3s. 9d. for futures; sales, 25 tons spot and 300 futures.

STEEL has been firm with an increased output and a good demand from the automobile trade. Prompt deliveries are exacted by this branch of industry. Machine tools are in excellent demand. Some predict a bigger demand for rail equipment before long. The composite price of iron and steel products advanced for the sixth week in succession. This time it is 6 cents to \$35.29. Finished steel is unchanged and has been the last two months. Specifications are rather large. Orders moreover are reported for 155,000 tons of rails, mostly for winter delivery. Bars have sold at 1.85c, Pittsburgh but in most cases bars, plates and shapes sell it is said at 1.90 to 2c or \$2. a ton higher than prices for the

third quarter. Sheets are most wanted. The tin plate output has fallen off at Pittsburgh. Birmingham and Youngstown talk hopefully. At Puttsburgh there is a fair demand for tin plate except from can makers. The output is about 70 per cent. The price is still \$5.25 per base box Pittsburgh. Fourth quarter sales of bolts and nuts are generally at 60 to 70 off. Rivest 2.90e Pittsburgh, for structural and 70 to 10 off for small stress. Specifications are considered to the control of the

In London on Sept. 27th offerings 10,000 bales mostly of speculator's lots of greasy merinos and crossbreds. Demand good especially from the Continent. Prices generally unchanged. Withdrawals were fewer however. New Zealand greasy crossbred best 58s realized 25½d; 50s, 20½d; 46s 19d and 44s-46s, 18d. Details:

Sydney, 2,399 bales; greasy merinos, 19 to 27½d. Queensland, 1,165 bales; greasy merinos, 16 to 23½d; scoured merinos, 39½ to 44d; greasy crossbreds, 20 to 23d. Victoria, 2,744 bales; greasy merinos, 22 to 29½d; scoured crossbreds, 24 to 34d. West Australia, 1,081 bales; greasy merinos, 15½ to 26d. Kenya, 292 bales; greasy merinos, 16 to 18d. New Zealand, 2,165 bales; greasy crossbreds, 15 to 25½d. Cape, 158 bales; greasy merinos, 14 to 20d. Victoria greasy comebacks were quoted at 25 to 29d. New Zealand slipes, 13 to 24d. In London on Sept. 27th offerings 10,000 bales mostly of

#### COTTON

Friday Night, Sept. 28 1928.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 417,651 bales, against 336,659 bales last week and 242,040 bales the previous week, making the total receipts since Aug. 1 1928 1,459,544 bales, against 1,939,214 bales for the same period of 1927, showing a decrease since Aug. 1 1928 of 479,670 bales.

Receipts at-	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.	Total.

\*Beginning with the season of 1926, Houston figures include movement of cotton previously reported by Houston as an interior town. The distinction between port and town has been abandoned.

The exports for the week ending this evening reach a total of 143,339 bales, of which 16,034 were to Great Britain, 13,730 to France, 44,208 to Germany, 6,049 to Italy, 54,844 to Japan and China, and 8,474 to other destinations. In the corresponding week last year total exports were 154,923 bales. For the season to date aggregate exports have been 842,408 bales, against 963,618 bales in the same period of the previous season. Below are the exports for the week.

Table 1951	Exported to—

Note.—Exports to Canada.—It has never been our practice to include in the above table reports of cotton shipments to Canada, the reason being that virtually all the cotton destined to the Dominion comes overland and it is impossible to get returns concerning the same from week to week, while reports from the customs districts on the Canadian border are always very slow in coming to hand. In view however, of the numerous inquiries we are receiving regarding the matter, we will say that for the month of August the exports to the Dominion the preceding season have been 8.035 bales. In the corresponding month of the preceding season the exports were 8.218 bales. For the twelve months ended July 31 1928 there were 239,562 bales exported as against 274,919 bales for the corresponding twelve months of 1926-27.

In addition to above exports, our telegrams to-night also give us the following amounts of cotton on shipboard, not cleared, at the ports named:

	On Shipboard Not Cleared for-							
Sept. 28 at-	Great Britain.	France.	Ger- many.	Other Foreign	Coast- wise.	Total.	Leaving Stock.

\*Estimated.

Speculation in cotton for future delivery has been active at rapidly advancing prices, owing to inclement weather, some bad crop reports and a very plain tendency to reduce crop estimates. The current idea is that in the next Government report, to be issued on Oct. 8, the estimate will be below 14,000,000 bales against 14,439,000 on Sept. 8, this year, 12,955,000 the final crop last year, and 17,911,000 in 1926. The minimum temperatures have been in the lower forties and even at times in the thirties. The 30s have been noted in Texas, Tennessee, Missouri (32) Arkansas, Alabama, and Georgia. General rains fell on Wednesday and Thursday in Texas, and in Georgia and Texas to-day. They were as a rule considered harmful. They might lower the grade. It is feared that this will be a low grade crop. Veterans in the business fear that the supply of cotton above % of an inch will be none too plentiful this year. There have been fears of an unusually early killing frost above % of an inch will be none too plentiful this year. There have been fears of an unusually early killing frost this year. This to a certain extent has dominated the markets. In parts of Texas a late date of frost is highly desirable. Shedding, rust, and attacks by weevil and boll worms are still a source of complaint. The weevil has recently hit a large area, it is said, in the northern belt. An unusually low percentage of lint to seed is reported over the belt, especially in Texas and Louisiana. It turned out that the recent hurricanes and cloudbursts in Georgia and the Carolinas had done much greater harm to cotton than had been supposed. A sharp decrease in the crop of the Atlantic States was the result, though reports of a loss of % of a million bales are considered more or less exaggerated. Some say 150,000 bales. Perhaps that is more probable. Steady deterioration has been persistently reported throughout most of the belt. Prospects of a top crop in Texas and many other parts of the belt are said to be poor. to be poor,

Meantime, spot cotton has been in good demand at a very sharp advance. The basis has been firmer. England, the Continent, Russia and Japan have all, it is stated, bought spot cotton more freely. Japanese advices intimate that the trade of Japan will have to buy freely. Some New England mills have bought. There is growing rope of an early settlement, perhaps to-day, of the strike at New Bedford, now in its twenty-fourth week. Carolina mills are doing a more encouraging trade. Manchester has had a good demand for cloths. The Government weekly report stated that high winds, heavy rains and flooded lowlands did much demand for cloths. The Government weekly report stated that high winds, heavy rains and flooded lowlands did much damage to cotton in the more eastern portions of the belt, especially in the Carolinas and southeastern Georgia, where the crop deteriorated steadily with much shedding, bolls rotting and seed sprouting. In the Central States of the belt the week was generally fair and mostly cool and while the coolness retarded development in some places, the crop generally opened rapidly and picking and ginning made good advance under the prevailing favorable weather for field work. Boll rot continued in portions of this area. In Oklahoma the week was rainless and cotton made fair to good progress. It is opening nicely, but prematurely in the dry western areas; picking and ginning advanced rapidly dry western areas; picking and ginning advanced rapidly

in the central and eastern portions and is well under way in much of the West. In Texas there is little change in the general situation except for deterioration in northwest ern districts. The crop is made in the east, with top crop prospects poor, while cool, cloudy weather retarded opening in the western portion; dryness following earlier rank growth, has caused excessive shedding in the northwest. Picking advanced well until stopped by rain the middle of the west. the week.

On the 24th inst. the Census report on ginning was consid-

On the 24th inst. the Census report on ginning was considered in the main bullish. It put the total up to Sept. 16 at 2,498,252 bales against 3,504,995 up to the same date last year and 2,509,103 in 1926. It included Texas with 1,662,695 bales against 1,684,291 for the same time in 1927 and 1,100,017 in 1926; Miss., 219,081 against 364,141 last year and 256,306 in 1926; Louisiana 199,824 against 221,609 in 1927 and 172,321 in 1926; Georgia 111,485 against 474,766 last year and 344,128 in 1926; Arkansas 105,132 against 90,228 last year and 132,735 in 1926.

In the speculation here, Wall Street, Chicago, Detroit, California, the Southwest and Europe have bought. The "wire" houses have had better business. Hedge sales have lagged far behind most of the time, the trade buying. October went to a discount on the 25th inst. of 4 to 5 points under December, when delivery notices were issued for 4,200 bales out of a certificated stock of 7,237 bales. But later in the week October went to a premium of 3 to 5 points over December. During most of the week, profit taking has been easily absorbed. To-day prices declined owing to lower cables than due, increased hedge selling, more or less liquidation, a certain amount of short selling and the fact that over much of the belt the weather was considered more favorable. The general rains in Georgia and Teyas have veralled. dation, a certain amount of short selling and the fact that over much of the belt the weather was considered more favorable. The general rains in Georgia and Texas have no great effect. The technical position was weaker after recent quick advance of 2c. Hedge selling increased both in New York and Liverpool. On the other hand, some of the crop reports from Texas and other parts of the belt were still unfavorable. Liverpool, the trade and shorts were buying. Some thought the market on the whole gave a very ing. Some thought the market on the whole gave a very good account of itself. Final prices show a rise for the week of 65 to 85 points. Spot cotton closed at 19.30c. for middling, an advance of 85 points.

The following averages of the differences between grades, as figured from the Sept. 20 quotations of the ten markets designated by the Secretary of Agriculture, are the differences from middling established for deliveries in the New York market on Sept. 27:

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Foreign stocks as well as afloat, are this week's returns, and consequently all foreign figures are brought down to Thursday evening. But to make the total the complete figures for to-night (Friday), we add the item of exports from the United States, including in it the exports of Friday only.

COTTON GINNING REPORT.—The Bureau of the Census on Sept. 24 issued the following report showing the number of bales of cotton ginned in each of the cotton-growing States the present season up to Sept. 16, in comparison with corresponding figures for the two preceding seasons. It appears that up to Sept. 16 1927 2,498,252 bales of cotton were ginned, against 3,504,995 bales for the corresponding period a year ago, but comparing with 2,509,-103 bales two years ago.

Number of bales of cotton gimmed from the growth of 1928 prior to Sept. 16 1928, and comparative statistics to the corresponding date in 1927 and 1926.

State.	Running Bales (Counting Round as Half Bales and Excluding Linters).

United States	*2,498.252	*3,504,995	*2,509,103		

United States \*2,498.252 \*3,504,995 \*2,509,103

\* Includes 88,761 bales of the crop of 1928 ginned prior to Aug. 1 which was counted in the supply for the season of 1927-28, compared with 162,283 and 47,770 bales of the crops of 1927 and 1926.

The statistics in this report include 103,266 round bales for 1928; 100,739 for 1927, and 61,651 for 1926.

The statistics for 1928 in this report are subject to correction when checked against the individual returns of the ginners being transmitted by mail. The corrected statistics of the quantity of cotton ginned this season prior to Sept. 1, are 956,711 bales.

\*\*Consumption, Stocks. Imports and Exports—United States.—Cotton consumed during the month of August 1928 amounted to 526,729 bales. Cotton on hand in consuming establishments on Aug. 31 was 782.068 bales, and in public storage and at compresses 1.188.861 bales. The number of active consuming cotton spindles for the month was 28,243.508, The total imports for the month of August 1928 were 25,258 bales and the exports of domestic cotton, including linters, were 25,489 bales.

World Statistics.—The estimated world's production of commercial cotton exclusive of linters, grown in 1927, as compiled from various sources is 23,204,000 bales counting American in running bales and foreign in bales of 478 pounds lint, while the consumption of cotton (exclusive of linters in the United States) for the year ending July 31 1927, was approximately 25,869,000 bales. The total number of spinning cotton spindles, both active and idle, is about 165,000,000.

WEATHER REPORTS BY TELEGRAPH—Reports to

WEATHER REPORTS BY TELEGRAPH.—Reports to us by telegraph this evening indicate that the weather during the week has been mostly cool with considerable rainfall in Texas and the eastern section of the cotton belt. High winds in some of the eastern states were damaging to cotton. In those states where there has been too much rain, there has been much shedding and rotting of bolls. Although the cool weather retarded development, the crop as a rule is opening rapidly and picking and ginning have made good advance.

Texas.—The cotton crop is made in the eastern section of this state and the prospects for a top crop are considered poor. Cool, cloudy and wet weather has retarded opening of bolls in the western section. Picking advanced well until stopped by rain.

Mobile, Ala.—The first two days of the week picking was retarded by rain. The remainder of the week has been clear and good progress has been made in picking. Movement of cotton from plantations is brisk. Much cotton is still unpicked in the upper counties, but there is not much left in the lower counties.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the putports.

The above statement shows: (1) That the total receipts from the plantations since Aug. 1 1928 are 1,626,170 bales: in 1927 were 2,213,867 bales, and in 1926 were 2,187,503 bales. (2) That although the receipts at the outports the past week were 417,651 bales, the actual movement from plantations was 543,853 bales, stocks at interior towns having increased 126,202 bales during the week. Last year receipts from the plantations for the week were 529,041 bales and for 1926 they were 680,612 bales.

Bombay— 1928 1927 1926	1,000	14,000 14,000 17,000	10,000	45,000 25,000 19,000	6,000 9,000 1,000	81,000 56,000 61,000	210,000 128,000 130,000	297,000 193,000 192,000	
Other India 1928 1927 1926	3,000 1,000	3,000 6,000 27,000		3,000 9,000 28,000	10,000 12,500 7,000	61,000 102,000 80,000		71,000 114,500 87,000	
Total all— 1928 1927 1926	4,000 1,000	17,000 20,000 44,000		48,000 34,000 47,000	16,000 21,500 8,000	142,000 158,000 141,000	210,000 128,000 130,000	368,000 307,500 279,000	

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 2,000 bales. Exports from all India ports record an increase of 14,000 bales during the week, and since Aug. 1 show an increase of 60,500 bales. increase of 60,500 bales.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—We now receive weekly a cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, Sept. 26.	1928. 225,000 486,454		19	27.	1926.		
Receipts (cantars)— This week Since Aug. 1			240,000 750,997		165,000 415,315		
Export (bales)—	This Week.	Since Aug. 1.	This Week.	Since Aug. 1.	This Week.	Since Aug. 1.	
To Liverpool To Manchester, &c. To Continent and India To America	3,000 4,000	11,846 16,043 43,996 12,461	4,750 5,250 5,750	14,146 44,793	4,750 7,250 1,250	25,259 16,629 33,627 8,677	
Total exports	7,000	84,346	15,750	91,339	13,250	84,192	

Note.—A cantar is 99 lbs. Egyptian bales weigh about 750 lbs.
This statement shows that the receipts for the week ending Sept. 26 were 225,000 cantars and the foreign shipments 7,000 bales.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market in yarns is firm and in cloths is steady. Demand for both yarn and cloth is improving. We give prices to-day below and leave those for previous weeks of this and last year for comparison:

#### BREADSTUFFS

Friday Night, Sept. 28 1928.

Friday Night, Sept. 28 1928.

Flour was without features of very striking interest. Prices have risen, however, even if the demand was not active. Small lots satisfy the average buyer. An anchor to windward for the mills was the firmness and activity in mill feed. It is more profitable than it was. It set up a bar to an advance in flour. The idea seemed to be "let well enough alone." Fair clearances were made from New York, but they were largely of Canadian flour for the Continent. The reports are persistent that new export business is small. Stocks of flour at New York in the various railroad yards were put by the Inspection Department of the New York Produce Exchange at 1,223 cars against 1,233 cars a week ago and 1,025 cars last year. Later prices advanced in response to the upward trend of cash wheat advanced in response to the upward trend of cash wheat

wheat prices have been quite well maintained in spite of a big increase in the visible supply and the lack of any aggressive export buying. On the 22d inst. prices ended ¼ to ½c. lower in Chicago and ¼ to 1½c. lower in Winnipeg. Liverpool did not respond fully to the Chicago rise of the 21st. A rally of nearly 2 to 2½c. came at one time, but it did not hold. Yet hedge selling was unexpectedly small. Mills bought December at Minneapolis. Liverpool advanced 2½ to 3½d. owing, it was said, to the recent sharp upturn in North American markets. Stronger Canadian and Argentine shippers' offers and active covering on the part of millers clinched the nail. The weather was reported in the main favorable. On the 24th inst. prices at one time rallied 1½ to 2c. from the earlier low, but ended virtually or actually unchanged. Liverpool declined for a time, but closed ¼ to ½d. higher. Commission houses had a good many orders to buy on breaks. Yet beneficial rains occurred in Argentine and Australia. Country marketings and arrivals at Winnipeg were large. The United States visible supply increased last week 7,500,000 bushels against 5,358,000 in the same week last year and the total is now up to such rather striking figures as 103,382,000 bushels against 75,226,000 a year ago. The increase, it is believed, will go further from the spring wheat movement and some increase in the winter wheat marketing. Export demand was poor. The weather in the American and Canadian Northwest was called good. The forecast was for clear weather. Wheat prices have been quite well maintained in spite weather.

To-day prices ended ¼c. lower to ¼c. higher at Chicago, %c. lower at Minneapolis and ¼ to %c. higher at Winnipeg. Fluctuations at Chicago were within narrow limits. Early prices were lower with cables disappointing and export demand quieter. But professional and commission house buying held the dealing. Export roles at the role of the dealing. prices were lower with cables disappointing and export demand quieter. But professional and commission house buying halted the decline. Export sales at the end of the day were estimated at 500,000 to 600,000 bushels, mostly Manitoba. The "Modern Miller" reported delay in seeding of winter wheat and plowing owing to a lack of moisture in the ground. Threshing of spring wheat is nearly completed. Bradstreets' North American exports for the week were 8,359,000 bushels, against 12,218,000 last year. World's shipments are expected to be 10,947,000 this week. Argentine shipped 2,260,000 bushels and Australia 512,000. Argentine cabled that wheat there would arrive at interior gentine cabled that wheat there would arrive at interior points in the north before Dec. 1. Final prices show an advance for the week on December of %c., but other months are % to 1c. lower.

Indian corn has dropped 7 cents on Sept. under liquidation, but other months have been firm with frosty weather and a steady demand. The feeding demand will probably be large. Prices declined 7½c. on September on the 22d inst. on general liquidation. It uncovered stop orders. Cash markets declining, pulled down September. Country offerings increased somewhat. On the 24th inst. Sept. fell 3c. but later regained 2c. of this loss, despite scattered liquidation. Final prices were 1c. net lower on September and 1c. up on later months. Distant months rallied. Frost, even if it could do no serious harm, is still a word to conand 1c. up on later months. Distant months rallied. Frost, even if it could do no serious harm, is still a word to conjure with. Receipts of old corn were larger, about 350 cars, but offerings for forward shipment were small. A good shipping demand prevailed at the recent decline, which struck shippers as an opportunity. The United States visible supply decreased last week 667,000 bushels against an increase in the same week last year of 1,039,000 bushels; total 7,195,000 against 23,733 last year.

To-day prices ended ½c. lower to ½c. higher. Liquidation of September caused an early decline, but like in wheat buying by commission houses and professionals, together with covering of shorts, brought about an advance. Export sales were reported of 300,000 to 500,000 bushels. The cash demand was fair. Some frosts were reported, but had little influence. Receipts were fair. Final prices show a decline on September for the week of 7½c., while other months are ½ to 1c. higher.

1/2 to 1c. higher.

March 78½ 79½ 79½ 80% 80% 80%

Oats prices have been quite well maintained, with stocks small and farm consumption likely to be large. On the 22d inst. prices ended %c. lower to ½c. higher, the latter on September on small trading. Oats were overshadowed by the other items in the grain list with their activity or their sharp fluctuations. On the 24th inst. prices ended unchanged to ½c. lower. Distant months showed the most steadiness; near months weakened, with trade not active, and the United States visible supply increased last week 1.051.000 bushels against practically no increase last year 1,051,000 bushels against practically no increase last year. The total is now 15,664,000 against 25,133,000 a year ago. To-day prices advanced ¼ to 1c. There was a fair de-

and. Shorts were covering and country offerings were not liberal. Cash markets were steady and receipts light. The strength of other grain helped. Commission houses were buying. The open interest in September at Chicago was 1,537,000 bushels yesterday. Final prices are unchanged to %c. higher as compared with those of a week ago.

RYE.—September has been tightly held and has risen over 4 cents net, while other months have also been firm with stocks rather meager all over the country. On the 22d inst. prices ended 7%c. lower to ½c. higher. September was higher. Shorts were covering in this month. Other months were depressed by the decline in wheat. On the 24th inst. prices ended 1 to 1½c. higher with a good and persistent cash demand and no burdensome movement of the crop. The United States visible supply, it is true, increased las tweek 462,000 bushels against a decrease in the same week last year of 994,000. The total is 2,274,000 bushels against 2,323,000 a year ago. The steadiness of the demand is what counts. To-day prices closed ¼ to 2½c. higher with the demand fair, shorts covering and offerings small. Hedging sales were not large. Cash rye was firm. Mills were said to be inquiring for old rye. Little or no export demand appeared. The open interest in September rye yestrday was 465,000 bushels. Final prices show an advance for the week of 1 to 4¼c. for the week of 1 to 41/4c.

WEATHER BULLETIN FOR THE WEEK ENDED SEPT. 26.—The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended Sept. 26, follows:

issued by the Department of Agriculture, indicating the influence of the weather for the week ended Sept. 26, follows:

At the beginning of the week the tropical storm was central near Savannah, Ga., and on the morning of the 19th over extreme eastern North Carolina, attended by further heavy rains and high winds in Atlantic Coast districts. Thence it moved northward, with greatly decreased intensity, over central Virginia, western Pennsylvania, and the eastern Great Lakes, with quite general rains over the Northeast and the upper Ohio Valley, Otherwise the weather during the week was mostly fair, except for wide-spread showers in the North-Central States about the middle, and general rains near the close in Gulf districts, resulting from a depression in the Gulf of Mexico. These latter rains were moderate to heavy in extreme southern sections, including considerable portions of Texas.

There was a sharp drop in temperature over the Northwestern States on the 20th, when high pressure occupied that area, and after a brief period of warmer weather, another cool wave overspread the northern Great Plains which brought freezing temperatures as far south as northern Nebraska on the morning of the 25th at about the average date for the first killing frost in that section.

Chart I shows that the week, as a whole, was very cool in nearly all sections east of the Rocky Mountains, the temperatures being especially low for the season in the central valley States where the weekly means ranged mostly from 7 to 12 deg. below normal. Along the Atlantic Coast nearly normal temperatures prevailed, and west of the Rocky Mountains the period was generally warm, the week averaging mostly from 3 deg. to as much as 9 deg. above normal. The chart shows also that freezing temperatures were reported from first-order stations along the northern border from New England to the Rocky Mountains, and extending into the Great Plains as far south as extreme northern Nebraska, while in the interior valleys the minima for the week were only slig

western portions of the country, particularly in the Pacific Northwest and the western parts of the Great Plains States.

At the close of the week killing frost overspread the central-northern portions of the country, and light to heavy deposits occurred in exposed places as far south as northern Tennessee, which did some damage to late truck crops and gardens. The harm to staple crops, however, was relatively small, in general, because of their advanced state. In the upper Mississippi Valley, particularly in Iowa, the frost was three weeks earlier than last year and about 10 days ahead of the average date of its first occurred, but to the northward and northwestward this year's frost occurred at about the average date.

SMALL GRAINS—Fair weather and much sunshine were favorable for threshing in the late northern and northwestern districts of the country, and this work is now well along. Plowing and the seeding of winter wheat and other grains made slow progress in much of the grain areas, because of the dry, hard condition of the soil. Many complaints of dryness were received from the Ohio Valley States, southern Missouri, and in most sections of the Plains from northern Texas northward, with rain badly needed in the last-named area. It continued too dry also in Montana, most Rocky Mountain districts, and in the Pacific Northwest. Rice threshing was delayed in the west Gulf area. Grain sorghums are maturing rapidly in the Southwest, and broom corn harvest is well advanced in Oklahoma.

CORN.—The frosts that overspread part of the Corn Belt the latter part of the week caused only light injury to the crop, in general, with the bulk safe in most sections. Corn was mostly safe in the Ohio Valley with only scattered damage reported; good progress in silo filling was noted. In Iowa about four-fifths was reported safe. Killing frost occurred in this State on the 23d and 25th which was three weeks earlier than last year and 10 days earlier than normal; the average per cent that escaped frost injury during the past fiv

opened rapidity, and possible weather for field work. Boll for consider the pravailing favorable weather for field work. Boll for consider the property of this area.

In Oklahoma the week was rainless and cotton made fair to good progress. It is opening nicely, but prematurely in the dry western areas; picking and ginning advanced rapidly in the central and eastern portions, and is well under way in much of the west. In Texas there is little change in the general situation, except for deterioration in northwestern districts. The crop is made in the east with top crop prospects poor, while cool, cloudy weather retarded opening in the western portion; dryness, following earlier rank growth, has caused excessive shedding in the northwest. Picking advanced well, until stopped by rain the middle

The Weather Bureau also furnishes the following resume of the conditions in the different States:

ness, following earlier rank prowth, has caused excessive shedding in the forthweek.

THE DRY GOODS TRADE

THE DRY GOODS TRADE

New York, Friday Night, Sept. 28 1928.

The week's business in textiles showed a very sanguine disposition. The colder weather stimulated activity in many directions, and a much stronger demand set in for fall goods. It is reported that distribution is progressing at a swifter pace, and buyers are placing confidence in an extended season. This applies particularly to the woolens and worsteds, where an expanded fall business has dwarfed interest in the important spring openings. With regard to cottons, an increased volume of sales, which testifies to the growing confidence of buyers in the matter of values, has had the effect of putting many lines which have sold unreasonably close to cost, on a steadier and more profitable basis. Spot business has been very active and it is said in some quarters that it might be considerably more so were it not for limitations imposed by the prevalent curtailment policy. An average price reduction of 5% on many of the new staple linens has caused a very encouraging increase in the demand, which heretofore has been practically confined to novelties. Silk consumption continues at a high rate, business going forward in spite of some dissatisfaction with prices. Interest is directed to the openings of spring silks, which are almost at hand. Rayons are in a strong position, and it is thought that there will be no important price revision in the near future. New uses are expected to absorb the increased production for the year. the year.

DOMESTIC COTTON GOODS.—The improvement noted in the domestic cotton goods markets during the past few in the domestic cotton goods markets during the past few weeks has become more general. Demand has embraced a wider variety of goods and in some instances it has been estimated that it equalled, if not exceeded, production. Interest in both gray and fine goods has been most gratifying, and with sentiment more cheerful than it has been for some time, it is believed that further expansion is probable, before any material slump appears. Print cloths have been particularly active and factors report a dearth of certain of the more popular constructions. Business in most certain of the more popular constructions. Business in most of the fine goods such as broadcloths and some of the finer of the fine goods such as broadcloths and some of the finer counts has approximated good volume as they are wanted for printing and converting. Nevertheless, production of the latter type is not believed to be in excess of 50% of capacity and it is considered likely that curtailment of production will continue to be practiced until a still stronger statistical position can be discerned. Prices have been decidedly better and in a number of directions a reasonable profit has been obtainable. For instance, print cloths are being held at ¼c. higher than they were a week ago, and in several other directions a similar condition prevails. The current improvement is principally attributed to the expanding operations of retail stores which have taken a good proportion of the merchandise, but undoubtedly the extensive buying by the automobile manufacturers who have been largely accountable for the improvement. Automobile makers have established a record output for last month, and with the production of cars also high this month, facand with the production of cars also high this month, factors are of the opinion that similar conditions will prevail during October, and possibly until the end of the year. Print cloths 28-inch 64 x 60's construction are quoted at 6½c., and 27-inch 64 x 60's at 5½c. Graygoods in the 39-inch 68 x 72's construction are quoted at 8½c., and 80 x 80's at 1016c. 80's at 101/2c.

WOOLEN GOODS.—The colder weather of the last few days brought about a further and more marked expansion of days brought about a further and more marked expansion of business in fall woolen and worsted goods. The accelerated demand for spot fabrics emphasized the shortness of stocks and caused buyers who had not provided for their needs difficulty in placing orders. With the market occupied by this movement, interest in The American Woolen Company's formal opening of women's dress, suit and coat fabrics for the coming spring season was considerably less than under ordinary circumstances, even though many lines were offered at exceptionally attractive prices. In view of the existing activity, and indications that the present season will be extended later than usual, some of the other factors are deferring spring showings until as late as Oct. 15. in are deferring spring showings until as late as Oct. 15, in order to catch the market in a more attentive mood.

FOREIGN DRY GOODS.—While not progressing as far as could be desired, conditions in the linen market have shown a marked improvement during the week. Merchants report a steadily increasing number of individual orders, with prospects of some continuity of demand even after the inevitable slackening in holiday goods activities portended during the course of the next month or so. Meanwhile, the depend for storless which we the devend for storless which we then devend for storless which we the devend for storless which we take the devend for storless which we have the devend for storless which we have the devended of the storless which we have the storless where the storless which we have the sto during the course of the next month or so. Meanwhile, the demand for staples which, up till now, has been more or less completely overshadowed by that for novelties in striking colors and designs, is assuming a more definite shape. Prices have been recently reduced to a more equable basis, and buyers are beginning a covering movement which is conceded capable of development. Recent activity in burlaps has been interesting as sales made here for future shipment from Calcutta are reported to be the largest in several months, and it is stated that the trade is well covered for the remainder of the year. Light weights are quoted at 7.15c. to 7.20c., and heavies at 10.25c. to 10.30c.

Baltimore, Md.—Proposed Constitutional Amendment.—At the general election to be held on Nov. 6, a proposed constitutional amendment regulating the compensation of the members of both Houses of the General Assembly of Maryland will be submitted to the voters. The amendment in official form is as follows:

Whereas, at the January Session of the General Assembly of Maryland, held in the year 1927, an Act was passed, to wit: Chapter 379 proposing an amendment to the Constitution of Maryland, title "Legislative Department," regulating the compensation of the members of both Houses of the General Assembly of Maryland; in words and figures as follows:

an amendment to the Constitution of Maryland, title "Legislative Department." regulating the compensation of the members of both Houses of the General Assembly of Maryland; in words and figures as follows:

CHAPTER 379

An Act to propose an amendment to Section 15 of Article III. of the Constitution of the State of Maryland, title "Legislative Department." regulating the compensation of the members of both Houses of the General Assembly of Maryland, and to provide for the submission of said amendment to the qualified voters of the State of Maryland for adoption or rejection.

Section 1. Be it enacted by the General Assembly of Maryland (three-fifths of all the members of each of the two Houses concurring). That the following be and the same is hereby proposed as an amendment to Section 15 of Article III. of the Constitution of the State of Maryland. Itle "Legislative Department." the same if adopted by the legally qualified voters of the State, as herein provided, to become Section 15 of Article III. of the Constitution of the State of Maryland.

15. The General Assembly may continue its session so long as in its indigment the public interest may require for a period of not longer than 90 days; and each member thereof shall receive a compensation of \$15 per diem for every day he shall attend the session, but not for such days as he may be absent, unless absent on account of sickness or by leave of the House of which he is a member and he shall also receive such mileage as may be allowed by law not exceeding 20 cents per mile; and the presiding officer of each House shall receive an additional compensation of \$5 per day. When the General Assembly shall be convened by proclamation of the Governor, the session shall not continue longer than 30 days, and in such case the compensation shall be the same as herein precipied.

Section 2. And be if further enacted by the authority aforesaid, That said aforegoing section hereby proposed as an amendment to the Constitution of the State of Maryland, and the said general el

Chicago, Ill.—New Tax System Will Be Sought by City.—
Herbert D. Simpson, Associate Professor of Economics at
Northwestern University, has written an article now appearing in the current issue of the "National Municipal Review"
in which he describes the inequalities of assessments throughout the city. Dr. Simpson declares that there are more
than twenty bodies which have the power to levy taxes. He
further states that the financing method now in operation
has come from constitutional and legislative enactments,
which date back almost a century and advices installation
of a new system. The New York "Times" of Sept. 15 had
the following article on the subject:

The City of Chicago, which has been one of the heaviest borrowers in

the following article on the subject:

The City of Chicago, which has been one of the heaviest borrowers in the municipal bond market in recent years, due to the development of its system of parks and its sanitation, faces a complete readjustment of its system of parks and its sanitation, faces a complete readjustment of its tax rates. A scientific attempt will be made to unravel the inequalities of Chicago's assessments, which fermerly deviated from uniformity on an average of 40%, according to Herbert D. Simpson, Associate Professor of Economics at Northwestern University, in the current issue of the National Municipal Review.

Due to its rapid growth in population and wealth, Chicago is spending nearly \$260,000,000 a year in governmental activities, according to Dr. Simpson. In the expenditure of these funds several governmental bodies participate, including, besides the State Legislature and the Cook County Board of Commissioners, the City Council, the Board of Education, the Sanitary District, the Forest Preserve District, certain 'itownships' within the city which still maintain the power to levy taxes, sixteen park boards and certain other special bodies, which bring the total to more than a score.

System Called Inefficient.

the city which still maintain the power to levy taxes, sixteen park boards and certain other special bodies, which bring the total to more than a score.

System Called Inefficient.

"The expenditure of public money in Chicago is not only a large business but a very heterogeneous one, carried on oy a surprising variety of agencies, with a confusing division of responsibility and with apparently no co-ordination among spending bodies or purposes of expenditure;" Dr. Simpson says. "Any private business of comparable size that would attempt to conduct its financial affairs through such an organization would certainly ge bankrupt. The only reason the City of Chicago has not gone into receivership is that its citizens have managed their private business better than their public and have accumulated sufficient surpluses in the one account to offset deficits in the other.

"In short, wealth has increased so rapidly during the past decade that, in spite of wasteful and extravagant expenditures, the government has remained solvent. Of all taxes collected to provide for these expenditures, the greenal property tax still constitutes more than 90%. This general system of taxation and assessment has come down in varying portions, from constitutional and legislative enactments of 1898 and 1848, portions of it, in fact, from 1818.

Study Made by Author.

By the time any system of taxation has been in operation for a century more or less, it would seem appropriate to undertake some accurate appraisal of its results, and this the writer, in conjunction with the staff of the Institute for Research in Land Economies, attempted to do for Chicago in the Summer of 1926."

The inequalities in the city's assessments run as high as 40%, according to Dr. Simpson, who characterizes the over-assessment of property as "confiscation," amounting annually to more than \$30,000,000. He asserts that such taxes collected go, not to increase the revenue of the city government, but merely to replace payments that should have been made by other prope

Cook County (P. O. Chicago), III.—County Seeks Gas Tax Receipts.—According to report, the County Board has made a bid for a portion of the \$6,700,000 that has been collected under the gas tax, which was held unconstitutional. The Board estimates its proportionate share at \$2,400,000, to be used for highway improvements. There are \$1 other counties that are also claiming their shares. The fund is now bound up by litigation set in motion by the oil companies. The County Board charged in a resolution that the companies had instituted the injunction proceedings for their own benefit. own benefit.

Dallas, Tex.—Public Opinion Solicited on Bond Expenditures.—In an effort to regulate the spending of money through large bond issues for civic improvements a citizen's association is circulating a questionnaire among the city's prominent business men asking for their opinion on the disposition of available and future funds which will enable the city to give the property owners and taxpayers a guarantee that, in the future, needless tax burdens will not be put upon them. The following report on the action appeared in the Dallas "News" of Sept. 23:

Means of safeguarding the expenditure of money under the \$100,000.000 improvement program Dallas is launching are sought by the Kessler Plan Association in a questionnaire sent out Saturday by Dr. E. H. Cary, President, to several hundred civic leaders in Dallas.

"I don't believe people in Dallas realize it yet, Dr. Cary said. "but in addition to the three ound issues totaling \$37,000.000 voted last December and April there will be assessments against individual property owners along the routes of street opening and widening projects, there will be dedications of land for boulevard, parkway and park purposes in the city and county. Thus, during the next 10 years the property owners of Dallas, city and county will pay for public improvements through bonds, assessments and dedications of land to a total of around \$100,000,000.

ments and dedications of land to a total of around \$100,000,000,000.

Control of Funds.

Control of the vast reservour of bond money is in the hands of five different independent boards and commissions, he said, and the direction of the millions of dollars in special assessments will be under the control of 20 or 30 different assessment boards.

"Honesty and good intentions no doubt will always prevail, he said, "but these various groups, being elective or appointive, will inevitably change from year to year in personnel. Such a situation demands that an association of private citizens shall exercise a steadying influence for economy and wise spending during the crucial years of the improvement program. The Kessler Plan Association, he said, must rededicate itself to the objective of shouldering this responsibility to the little home owner and the big taxpayer alike.

The association must continue to work to convince property owners of the ultimate benefits of the improvement projects, he pointed out, so the unified plan of through trafficways will not be disrupted because property owners along certain sections have not been completely sold.

To Prevent Overloading.

owners along certain sections have not been completely sold.

To Prevent Overloading.

To Prevent Overloading.

One of the most serious problems confronting the association is to bring about the co-ordination of planning projects, he suggested, to prevent the overloading of the real estate market in Dallas.

He cited the comprenensive zoning enabling act which has been available and in effect since it was passed by the Legislature June 19 1927.

Each month's delay in putting this into effect, he said, is costing Dallas property owners hundreds of thousands of dollars. Residential districts are being spoiled and the already overloading supply of suburban store buildings is being increased.

He suggests, among other things, that property owners be given the benefit of the 15-year payment plan along street rerision projects; that a tangible start toward zoning be made by proper racial grouping and segregation.

Careful study of taxation as applied to city, county and town planning, he suggests, will go far toward giving the property owners and taxpayers a guarantee that needless tax burdens will not be placed on them.

Research Bureau Urged.

guarantee that needless tax burdens will not be placed on them.

Research Bureau Urged.

Since Dallas and the Kessler Plan Association have become the fountain head of help to citizens concerned about efficient government. Dr. Cary calls attention to the need of having a bureau of municipal government research, with a large library of books, pamphlets and individual reports on city planning, taxation and all phases of city and county administration. "Our selfish interests alone would call for the extension of our helping hand to smaller cities and towns of Dallas County," he asserted, "since the expansion of Dallas toward the far borders of the county seem inevitable. The best interests and the future growth of these smaller cities, such as Garland, Mesquite, Grand Prairie, Richardson, Carrollton and others have prompted a strong desire on their part for the correct planning of all Dallas County. Lancaster, with its recent bond program, is a fruitful example of co-operation between the association and leader in these respective communities."

Indiana, State of.—Levies Revised to Fit Tax Rate.—In order to allow the present State tax rate of \$0.23 on each \$100 of taxable property to remain as it now stands, the members of the State Tax Board on Sept. 19 announced that they would distribute individual levies so as to permit the retention of the present rate. This action was approved by Governor Ed. Jackson. The following outline of the preposed distribution of levies is taken from the Indianarchis proposed distribution of levies is taken from the Indianapolis "News" of Sept. 19:

"News" of Sept. 19:

When the State officials began consideration of the levy for 1929 tax payment purposes they were faced with the necessity of adding to the list of levies the 2-cent levy created by the 1927 legislature for the benefit of the four State educational institutions of higher learning—Indiana and Purdue Universities and the normal schools at Terre Haute and Muncie. All levies except the State general fund rate and the teachers' retirement fund are specified by the legislature, so the shifting to care for the 2-cent additional rate had to be done by the State efficials in these two funds. The State officials said they also found Tuesday that the levy of 5 mills for corn borer relief, which was created by the 1927 legislature, will cease to operate at the end of 1928.

The tax board then absorbed the 2-cent increase by reducing the State general fund levy from 12.15 cents to 10.45 cents and increasing the State tuition fund rate from 1.8 cents to 2 cents. State officials agreed that the reduction in the general fund levy would reduce the State's daily balances next year considerably.

Aside from the two levies fixed by the tax board Wednesday and the new 2-cent levy, other individual levies which are included in the State tax at eare: State tuition, 7 cents; World War Memorial, 6 mills; Dunes State Park, 2 mills; Indiana Board of Agriculture, 2.5 mills; State forestry, 1 mill, and the George Rogers Clark memorial, 4 mills. The tax board also fixed the State poll tax at \$1.50, which included 50 cents for school purposes and \$1 for State revenues.

Panama(Republic of).—Bonds Called for Redemption.—We

Panama(Republic of).—Bonds Called for Redemption.—We are informed that all the outstanding 30 and 35-year 6½% external secured sinking fund gold bonds of the republic, due on Dec. 1 1956 and June 1 1961, respectively, will be redeemed at 103 on Dec. 1 next at the head office of the National City Bank of New York, fiscal agency, 55 Wall St., New York. #### CANADA, its Provinces and Municipalities.

BARFORD TOWNSHIP (P. O. Coaticook), Que.—BOND OFFERING
—Sealed bids will be received by E. Gerin, Secretary-Treasmer, until 8
p. m. on Oct. 1 for the purchase of a \$14,000 issue of 5% semi-annual improvement bonds. Dated Sept. 1 1928. Due serially in 40 years.

BRANDON SCHOOL DISTRICT (P. O. Brandon), Manitoba.— BONDS NOT SOLD.—The \$125,000 issue of 51%% school bonds offered on Sept. 15—V. 127, p. 1286—was not sold as the bids were all rejected. The school board has decided to defer the sale for a few months. Due in 1956.

BRIDGEBURG, Ont.—BOND OFFERING.—Sealed bids were received until 7.30 p. m. on Sept. 28, by A. S. Jackson, Town Clerk, for the purchase of two issues of bonds aggregating \$102.432 as follows: \$77.432 local improvement bonds. Due in 15 years. 25,000 5% high school bonds. Due in 30 years.

BRITISH COLUMBIA (Province of)—BOND SALE.—A special dispatch to the Wall Street "Journal" of Sept. 27 reports that the Province has sold \$6,000,000 bonds at a rate of 4.91% to a syndicate including the Canadian Bank of Commerce, the Dominion Securities Corp., Wood, Gundy & Co., A. E. Ames & Co. and a New York City firm. The news report goes on to state:

This is the first sale in years in which the Province did not call for public tenders. Plan was adopted due to the condition of the bond market and the prevailing high prices at public tenders.

Of the bonds \$4,000,000 is to refund maturing treasury certificates and \$2,000,000 to refund short-term Pacific Great Eastern Ry, and University of British Columbia building bonds.

GRAND MERE, Que.—BOND OFFERING.—Sealed bids will be received until 5 p. m. on Oct. 1 by A. Desilets, Secretary-Treasurer, for the purchase of a \$50,000 issue of 5% semi-annual improvement bonds. Dated Sept. 1 1928. Due serially in 30 years.

MIDDLESEX COUNTY (P. O. London), Ont.—BONDS NOT SOLD.— Two issues of 5% bonds aggregating \$132,748.50 were unsuccessfully of-fered for sale on Sept. 19 as all the olds were rejected. The issues are as follows: \$84,000 improvement bonds and \$48,748.50 improvement bonds.

NORTH VANCOUVER, B. C.— $BOND\ SALE$ .—An issue of \$40.282.10 5% improvement bonds has recently been purchased by an unknown investor. Due in 1943.

ONTARIO (Province of).—NOTE SALE.—The "Wail Street Journal" of Sept. 26 states that the Province has sold a \$10,000.000 issue of one-year treasury notes in London on a 5.118% basis. The Wail Street "Journal" commented on the sale as follows:

Sale by Province of Ontario of \$10,000,000 one-year treasury note in London on a 5.118% basis is the first sale by Ontario in England since 1905. One banker says it simply shows that the London market is again decidedly cheaper than that of New York, where he estimates it would have cost 5½% to make the flotation. If the New York market continues tight, as it seems likely to do in his opinion, he expects further Canadian flotations will find their way to London, where funds are freer.

There is a report that hitherto the Bank of England has frowned on Canadian financing, presumably to preserve English free funds for domestic trade demands. The present loan, placed through the instrumentality of the Bank of Montreal, is thought to indicate either a change of front by the Bank of England authortics or the presence of sufficient surplus funds in the London market beyond the bank's control. In either case, it is believed further Canadian financing may be expected in London, both by Ontario and other provinces. The present Ontario sale is understood to epresent the balance of the year's financing which had been withheld to ry to secure a better price.

ONTARIO COUNTY (P. O. Whitby), Ont.—BOND OFFERING.—Sealed bids will be received until noon on Oct. 1 by E. A. McKay, County Treasurer, for the purchase of a \$200,000 issue of 5½% semi-annual county bonds. Due in 5 years.

**POINT GREY, B. C.**—BOND SALE.—An issue of \$177,067.54 5% imprevement bonds was purchased by an unknown investor during July. Due in 1958. BOND SALE.—A \$96,852.19 issue of 5% local improvement bonds was also disposed of in July. Due in 1938.

PRINCE GEORGE, B. C.—BOND~SALE.—An \$18,000 issue of  $5\frac{1}{2}$ % electric light extension bonds has been purchased by an unknown investor. Due in 1943.

REVELSTOKE, B. C.— $BOND\ SALE$ .—A \$25,000 issue of 5% improvement bonds has recently been disposed of. Due in 1948.

VICTORIAVILLE, Que.—BOND OFFERING.—Sealed bids will be received until noon on Oct. 1 by W. Fortier, Secretary-Treasurer, for the purchase of a \$75.000 issue of 5% semi-annual improvement bonds. Dated Sept. 1 1928. Due serially in 40 years. Payable at local bank.

WRIGHT TOWNSHIP (P. O. Wright), Que.—BONDS NOT SOLD.—The \$40,000 issue of  $5\frac{1}{2}$ % improvement bonds offered on Sept. 4—V. 127, p. 1286—was not sold as no bids were received for the issue.
