Change of Address of Publication.

The Commercial & Financial Chronicle, having long suffered from inadequate facilities for handling its growing size and growing subscription list, has moved into new and larger quarters, and is now located at

William Street, corner Spruce.
P. O. Box 958. New York City.

International Bank Concealments—Involvement of the Federal Reserve System.

[Editorial in New York "Journal of Commerce," Feb. 8 1930.]

As the facts about the new international bank become better known, it grows more and more evident that there is no method of controlling or supervising its operations in this country. This is in spite of the fact that those who are promoting the new institution manifestly expect and believe that they will derive their chief support and resources from the Federal Reserve System. The new bank is to be represented in this country by some private banker; it is to have no overt or directly observable connection with the Reserve System; but there is already plenty of evidence that its influence upon our financial organization is to be of the most positive sort.

President Hoover, as is well known, gave orders now some eight months ago, that there should be no participation by any Federal Reserve bank or by any member of the Federal Reserve banking staff in the management of the new institution. He took the position that the system should, in no circumstances, designate directors or aid in the local organization or establishment of the international institution or of its American branch, if any. The order was given the utmost publicity and was emphasized in every way. There has, however, apparently been little more than a nominal observance of it, and everyone connected with the system is well enough aware that there is to be none, but that the relations between the system and this bank are to continue and to be surreptitious. Legal opinion has been had, so it is stated, that the President exceeded his powers in the issuance of the order that was given out by Secretary Stimson in the premises, and that there is no reason why the members and officers of the Reserve System should not do about as they please in the matter of relationships with the bank so long as they do not openly violate (as a matter of prudence) the specific terms of the President's order.

The question, nevertheless, is not one that can be dismissed in this technical manner. The new bank has practically determined upon the appointment of the President Chairman of a Reserve bank as its President; and it is understood that there will be large deposits of gold taken from our reserves, with the new bank, as soon as it is well started. But there seems to be no way of getting any authentic statement of what is happening, and Congressmen and others, charged with the duty of following what is being done in a financial way, assert that their efforts to get information as to what is going forward are unsuccessful.

Indeed, an officer of one of the Reserve banks in a recent speech made at a private meeting enlarged upon the fact that, with the new banks in existence, it would be far more possible than now to escape from the "snooping" and spying of reporters and to do whatever seemed needful in the direction of further centralization without being subject to rebuke or interference. One of the most eminent of foreign central bankers, himself not much of an advocate of the new bank, has spoken of it as having among its chief merits the fact that it would serve as a "central bankers' club" whose doings would not only conduce to greater centralization but would at the same time be more private and less open to public inspection than they can be under existing circumstances. That such will obviously be the case is indisputable.

The "Journal of Commerce" has in the past fully supported the action of the President as regards this bank. It is, however, not enough to do what he has done. Grant that the bank is a good thing if we will—or believe that it is a dangerous and insidious proposal if we will—in either case there is every reason why the American public should be fully informed through its officers and representatives exactly what are the relations of our banks (and particularly of our Federal Reserve banks) with such a new central institution as is now being proposed. This would be true in any event, but it is doubly true where the Federal Reserve banks are the required holders of the ultimate reserve funds of the nation and where they necessarily act as the conservators and managers of the Government's current funds.

Congress ought not to sit idly by and allow this intrigue in international finance to proceed further without finding out exactly what is going forward. The Federal Reserve Board for some reason not known to the general public

Digitized for FRASER

Federal Reserve Bank of St. Louis

plainly feels that it cannot take the initiative in this matter, cannot inform itself more fully, and cannot, above all, apply any corrective to conditions of which it does not approve. Therefore, the legislative body ought to act, and act in a way that will conserve the essential interests of the country by providing for full and authentic data covering the situation. This is a demand that should be insisted on by all, quite regardless of the question whether they do or do not sympathize with the idea of a bank of the sort that is being organized or of our taking a large share in it by permitting it to hold a part of our banking reserve.

The Editor of the New York "Journal of Commerce," in which the above article appeared, is H. Parker Willis, who, acting as expert adviser at the time to the House Committee on Banking and Currency, drafted the Federal Reserve Act, and hence may be credited with entire familiarity as to its scope and purpose. The same doubts and suspicions expressed by him in the foregoing article, as to whether the injunction of the President that the Federal Reserve System shall not in any way become involved or connected with the Bank for International Settlements, which is presently to be launched, and which doubts and suspicions are shared in by many others, were voiced in a speech delivered in the House of Representatives at Washington on Monday of last week. As the speech was printed in full in our issue of last week (pages 1058-1061), we reproduce here only the closing portion of it, as follows:

It is apparent, as evidenced by subsequent activities, that they (the New York Federal Reserve authorities) are completely ignoring Secretary Stimson's direct order, which it is understood was authorized by the President, and the same co-operation is apparently quietly going on, ignoring the State Department's order on the theory that the law gives the Federal Reserve banks the legal right to do that which the Administration has attempted to prohibit.

This, of course, raises a most interesting departmental situation. The State Department has charge of diplomatic relations with foreign countries. The Treasury Department and the Federal Reserve System are charged with financial relations, both domestic and international, and if the State Department, in possession of diplomatic information, issues an order forbidding international financial relationships through the Treasury Department and the Federal Reserve banks, certainly there must be important reasons therefor. And inasmuch as this whole international relationship, so far as Federal Reserve banks are concerned, is being conducted under the authority of Section 14 of the Federal Reserve Act, and believing, as I do, that Congress never intended that Section 14 should convey this authority, is it not about time that Congress took notice of this situation and ascertained the facts and the scope of the intentions of the Federal Reserve management in regard to the past, present, and future plans on international finance?

After Mr. McFadden's address, the "Journal of Commerce" again referred to the subject, in its issue of Feb. 14. This article we also reproduce, as follows:

Chairman McFadden of the House Committee on Banking and Currency, has furnished, in an address on the floor of the House, a review of the objects and methods of those who are organizing the new International Bank, which ought to have the attention of everyone who is interested in the future welfare of our foreign trade, and of our domestic finance as well.

We do not need to go into the specific details stated by Mr. McFadden, or to consider the individual and firm names which he uses, to reach a conclusion that the general state of things which Mr. McFadden complains of—viz., the surreptitious participation of the Reserve banking system in an enterprise (The International Bank), for which it has no legal power of affiliation, and in which the President has already directed that no Federal Reserve bank shall share—is unquestionably as described, and unquestionably serious. Mr. McFadden gives a detailed story of events that have received practically no public attention whatever, but are of the greatest national significance. We may differ as we will about the League of Nations and the international debts, and a variety of other questions to which this matter is allied, but we cannot doubt the absolute necessity of maintaining control of our own international relationships and of having them dealt with by qualified and authorized representatives of the public. That condition is not now being fulfilled, but quite the contrary.

Mr. McFadden quotes the statement of one of the officers of the local Reserve bank (since denied by the latter, but amply confirmed by those who heard it as well as borne out by events), to the effect that the Reserve banking system will act as correspondent to the new establishment, and will make "important deposits of gold" in it. He further calls special attention to the fact that the statutes of the new establishment have been prepared in such a way as to avoid the necessity of getting any legislative sanction or support. Precisely the same statement is being made in England at this same time. Thus there is no reason to doubt the actual facts as set forth by Mr. McFadden, and amply confirmed by many who are cognizant with them.

In these circumstances, it seems a shortsighted policy for the press to minimize Mr. McFadden's efforts or to sneer at the state of things to which he has called attention. It is, in fact, a real state of affairs which he sets forth, and the problem it presents is one that comes close to the very root of our whole present system of international, economic, and financial arrangements. Why should it not be fully discussed? Mr. McFadden has done valuable work in directing attention to it.

It remains only to add, as emphasizing the need of getting implicit assurances that the gold holdings of the Reserve Banks are not, in large part or in small part, in the shape of deposits or otherwise, to be put at the command of the Bank for International Settlements, that Gates W. McGarrah, Federal Reserve Agent at New York, is to be the head of the International Settlements Bank, that W. Randolph Burgess, Assistant Reserve Agent at New York spent weeks in Europe last year to lend a helping hand in the organization of the new institution, and that last night George L. Harrison, at present Governor of the Federal Reserve Bank of New York, sailed for Europe aboard the White Star liner Majestic for some unannounced purpose, yet one not unlikely to be associated with the setting up of the new institution. All this tends to establish such close and intimate relations with the International Bank that inasmuch as the Reserve Banks carry the entire gold reserves of the country, and it is a matter of such vital importance that these reserves shall not be trenched upon, it behooves every thoughtful person to see to it that the Reserve Banks maintain a position of absolute independence free from any alliance with the new institution in conformance with the order of the President and the Secretary of State.

The Financial Situation.

Things have taken an unfavorable turn the present week, and this is reflected in a sharp break in the stock market after several weeks of almost continuously rising prices. The tone is decidedly less confident, and the disposition now is to paint the future in more subdued colors than has been the wont of late. As a matter of fact, it would be no easy task to invest the immediate future with a bright aspect, at a time when prices for both grain and cotton have been tumbling to new low figures for the season, and the price of silver has reached a new low level in all time—which is the unfortunate record of the present week.

Federal Reserve Bank of St. Louis

Accounts regarding the steel trade continue good, with the rate of production still rising and nearing full capacity, a decided anomaly at a time when general business is notedly depressed, but the reports are now tinged with intimations that caution must be exercised and expectations of further recovery be moderated, besides which it may well be questioned whether the steel trade, as also some of the other trade indexes so commonly accepted as a measure of business activity, furnish a true guide to actual conditions in times like the present. With steel production up to 80% of capacity, in some districts even 85% or higher, one gets the idea that things are going along swimmingly, and that the industrial reverses occasioned by the bursting last autumn of the stock bubble may already be regarded as an event of the remote past, with its adverse influence upon general trade exhausted. One needs, however, only to engage the ordinary business man in conversation to discover that such views are entirely erroneous and sadly at variance with the actual facts, and also in conflict with the optimistic expressions that come in such profuse fashion from Washington and which would have us believe that all is well.

It is really surprising to find how common is the statement by the ordinary business man, not that his business now is only 50 or 60% of what it was at this time in 1929, but rather that it is no more than 25 or 30% of what it was then. Verily, trade indices, professionally "weighted," no one knows how, to allow for so-called seasonal fluctuations, but invariably computed to show that nothing is wrong, are calculated, it need scarcely be urged, to lead the student far astray at the moment. Figures of bank clearings tell a story quite their own as to what is going on in certain sections of the country. At the financial centers these figures of bank clearings are obviously not reliable as to the extent of the falling off in trade, since they were unduly swollen last year by the speculative debauch in the stock market, which served to enlarge clearings figures to an inordinate degree, while now stock speculation has shrunk back to merely normal proportions, but a decrease at Detroit, for instance, of 25% for the week ending Feb. 15, following 33.0% in the week ending Feb. 8, carry a significance as to conditions in that automobile center that cannot be gainsaid, and the same is true of the heavy declines at other points, where the influence of unlicensed stock speculation in 1929 was slight or possibly entirely absent.

The high degree of activity in the steel trade, by the way, is largely ascribable to the orders which have come in such liberal volume from the railroads, but which have now pretty nearly exhausted their stimulating influence even in that quarter. This explains the note of caution that is now coming from the iron trade papers regarding prospects of further recovery in the iron and steel trade. Thus we find the "Iron Age" saying editorially this week that "the steel trade will do well not to expect too much activity to be added to the present volume," and that "it would not take a great many months of so-called 'recovery' at only a moderate rate month by month to carry steel to a higher peak than ever," hence the advice that there is ground for arguing that, "on the whole, recovery from that particular occurrence is complete." In its customary weekly trade review, the "Iron Age" tells us that "steel production has made a further slight gain, but has lost the momentum that caused it to rise so rapidly in January." Demand is uneven, it is stated, with declines in certain districts offset by increases in others. The contrast is especially sharp, it appears, in automotive steels, with Pittsburgh reporting heavier, and other centers lighter, releases. "Ingot output at Pittsburgh, 75% a week ago, is now nearly 80% of capacity, and a similar rate prevails in the Valley. Raw steel production, however, appears to average 5 to 10 points above finishing mill operations, indicating the accumulation of surplus metal to meet expected expansion of demand in the spring. At Chicago, new business has receded, but specifications fully support an ingot output of 90%. Average raw steel production for the country at large is estimated at 82%, with the Steel Corp. rate at 85%." The accounts in the "Iron Trade Review" of Cleveland are to the same effect, that publication saying:

"Producers are not unmindful of the fact that the support of the railroads is now at its maximum. Through May specifications for track material and car and locomotive steel will be high, but there will be practically no replacement of this tonnage. Likewise, much of the structural material for spring building projects already has been placed.

"With the general manufacturing trade proceeding cautiously, it is increasingly apparent that whatever added vigor accrues to the market in the next 60 days must come from the automotive industry in the first instance and the oil, water and gas industry, as reflected in demand for pipe, in the second."

Unfortunately, too, renewed depression has marked the grain and the cotton markets the present week, as indicated at the outset of this article. Despite the intervention of the Federal Farm Loan Board, and doubtless because of it, grain and cotton prices have again been tumbling in a perfectly alarming fashion. The March option for wheat at Chicago on Thursday got down to $1.07¾, which compares with $1.20⅛ on Thursday of last week. On Jan. 2 of the present year the March option for wheat at Chicago sold at $1.33⅞, and on Aug. 1 of last year this option sold at $1.61¼. Certainly there is nothing calculated to promote trade revival in that circumstance. Meanwhile the Federal Farm Board, through the farm co-operatives, is continuing its activities. Whether the co-operative bodies are buying much or little at any one time no one knows. The one fact that stands out pre-eminently is that their efforts are proving unavailing in checking the downward course of values. The experience goes to show the folly of the whole undertaking. The Farm Board is still understood to be extending loans to the farm co-operatives at the prices fixed on Oct. 26 of last year, when it announced its readiness to make supplemental loans up to $1.25 at Minneapolis and St. Louis and up to $1.18 per bushel at Chicago. It would seem as if this policy could not continue indefinitely, even though the Farm Board appears to have almost unlimited means at command..

Plainly at this stage the operations of the Farm Board are proving harmful, instead of doing the good that was expected to result from the same. Some miracle may occur in the shape of a world-wide catastrophe to the new wheat crop, to help the Farm Board and the co-operatives out of their dilemma, but the situation at present is that enormous stocks of wheat are being withheld from market through the assistance of the Farm Board. These stocks must, sooner or later, be disposed of, and so long as

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

that continues they must remain an element of great weakness. In the meantime, intending buyers will refrain from purchasing, fearing collapse. We stated a week ago that no little concern was being felt in the business world regarding the outcome, and the developments since then have deepened this concern. The drop in wheat has carried other grains with it, and thus the plight of the great farming interests is growing steadily worse.

The experience in the case of cotton is proving the same. The Farm Board has fixed an artificial price for cotton and finds itself unable to maintain it. As shown in our issue of Feb. 1, the Federal Farm Board, on Oct. 21 last, when spot cotton on the New York Cotton Exchange was selling above 18c. a pound, announced that it considered the price too low, and "in order to assist cotton farmers to hold back their crop and at the same time have money with which to pay their obligations," indicated its willingness to lend to cotton co-operatives "sums sufficient to bring the total amount borrowed from all sources by such associations to 16c. per pound on graded and classified cotton, basis middling 7/8-inch staple, less proper deductions to cover freight to port concentration points." Schedules of prices were attached, to show the loan per pound at 10 designated Southern spot markets, these prices running from 15.34c. at Memphis to 16.59c. at New Orleans. Spot cotton at New Orleans this week for the middling grade sold down to 15.03c. On Oct. 21 last the New Orleans spot price was 17.73c. Cotton at such prices is cheap—gol-darnedly cheap—but the Farm Board, having created an unnatural market, consumers who would otherwise buy freely against future needs, are holding aloof, not knowing what will happen next. Thus Government meddling is proving to the detriment of the Southern planter just as it is to the Western grain farmer.

In another part of the world, illustration is just now being seen of the complete absorption of all powers by self-constituted government, and the ruthless application of the same to the population with no means of escape and even with its willing acquiescence. In Soviet Russia we are seeing Government run riot. On Tuesday wireless dispatches from Moscow, dated the day before, were published in the New York "Times," saying that "every church in Chita, Eastern Siberia, has been closed by order of the local Soviets after an organized anti-God demonstration by 10,000 persons with torches, in weather 8 degrees below zero." It was added that "To-day's issue of the weekly "The Godless One," official organ of the Moscow Godless League, insists upon the immediate closing of every church left in the City of Moscow and throughout the great province of Moscow, which is bigger than Scotland." A little further below in the same column of the New York "Times" we find an Associated Press dispatch from Moscow, also dated Feb. 17, saying that "Moscow authorities to-day decreed that all restaurants in the city should have nine meatless days each month, it being hoped thus to save both meat and fuel." The cablegram then goes on to say: "Under present conditions a laboring member of the population is allowed an average of half a pound of meat daily, but even this sharp rationing system has failed to relieve the crisis which led authorities recently to establish a 'collective' of all cattle ranches after the manner of the collective farms." All this is interesting as showing that when the energies of a population are suppressed, even with the acquiescence of the population, under the influence of frenzied zeal, poverty and destitution are the inevitable result.

Brokers' loans are now slowly increasing weak by weak. Otherwise the returns possess no features of interest. This week's statement reveals a further increase of $44,000,000, following $48,000,000 increase last week and $57,000,000 increase the week before, making $149,000,000 expansion for the three weeks and bringing the grand total of these loans on securities to brokers and dealers by the reporting member banks in New York City up to $3,494,000,000, at which figure, however, comparison is with $5,477,000,000 a year ago on Feb. 20 1929. The loans for own account are a little higher than a week ago, at $962,000,000 against $924,000,000; the loans for account of out-of-town banks are a little lower, at $987,000,000 against $989,000,000, while the loans "for account of others" stand at $1,545,000,000 the present week against $1,536,000,000 last week.

The returns of the Federal Reserve Bank show relatively slight changes as compared with last week. Discount holdings of the 12 Reserve Banks, reflecting member bank borrowing, are slightly reduced, standing at $376,943,000 as against $381,914,000. On the other hand the holdings of acceptances are somewhat higher, at $281,057,000, against $276,084,000, and holdings of Government securities are also somewhat larger at $480,615,000 against $478,560,000. As a result of these changes total bill and security holdings, which are the measure of the volume of Reserve credit outstanding, foot up $1,152,895,000 the present week as against $1,147,838,000 last week. The amount of Federal Reserve notes in circulation was reduced during the week from $1,682,444,000 to $1,656,161,000, while gold reserves increased from $2,974,978,000 to $2,977,518,000.

The stock market, after several weeks of rising prices, suffered a severe break the present week. The break came abruptly on Wednesday and was continued during Thursday, but with a partial recovery on Friday. As a consequence, heavy losses appear in a good part of the stock list. The reasons for the sudden reversal of the course of prices are not altogether clear, at least to the ordinary observer, and yet would appear to lie on the surface. The controlling considerations appear to have been the more guarded accounts regarding the recovery in the steel trade, the failure of general trade to measure up to expectations, the further sharp declines in prices on the grain and cotton exchanges, and perhaps also a feeling that the upward reaction in prices from the low levels reached during the stock market panic of last October-November had been carried too far. Besides, these realizing sales have been on a large scale, the holders being doubtless impelled to throw over some of their stocks by the considerations just noted.

Much of the buying of stocks in recent weeks has been on behalf of foreign purchasers whose takings since the first of January have been on a very extensive scale. Such buying has not materially slackened the present week, and this buying explains the further weakening in exchange rates on London, on Paris, and on a number of other important foreign centers which has been a feature of the week. The

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

drop in the stock market has occurred in face of this further absorption of stock on foreign account. The selling to realize profits and doubtless also considerable short selling were of quite unusual magnitude and seemed to proceed from all quarters and to extend to all classes of share properties. The railroad shares did not escape in the general downward movement, and here a further depressing influence was the very unfavorable exhibits made by the few income statements for the month of January which have come in during the course of the week. Yesterday, however, the announcement that the Inter-State Commerce Commission had sanctioned the merger of the Great Northern and the Northern Pacific, though without the Burlington & Quincy, gave tone to the whole railroad list and aided in bringing about a general upward reaction throughout the market.

The volume of trading on the Stock Exchange has been of about the same proportions as in other recent weeks. On the New York Stock Exchange the sales at the half-day session on Saturday were 1,696,920 shares; on the full day Monday they were 3,289,170 shares; on Tuesday, 3,795,310 shares; on Wednesday, 3,484,810 shares; on Thursday, 3,661,070 shares, and on Friday, 2,566,570 shares. On the New York Curb Exchange the sales last Saturday were 471,100 shares; on Monday, 817,100 shares; on Tuesday, 808,100 shares; on Wednesday, 941,600 shares; on Thursday, 975,500 shares, and on Friday 628,700 shares.

Prices in many instances show net losses for the week, though there is also a numerous body of gains. American Can closed yesterday at 137⅞ against 143⅜ on Friday of last week; United States Industrial Alcohol at 118¾ against 120¾; Commercial Solvents at 31¼ against 30; Corn Products at 94½ against 95¾; Shattuck & Co. at 44 against 45¾; Columbia Graphophone at 29¼ against 29¾; Brooklyn Union Gas at 174½ against 163; North American at 107¾ against 107¼; American Water Works at 104 against 105¾; Electric Power & Light at 61 against 64½; Pacific Gas & Elec. at 61⅞ against 61½; Standard Gas & Elec. at 119⅜ against 123; Consolidated Gas of N. Y. at 120¾ against 119; Columbia Gas & Elec. at 90 against 91⅛; Public Service of N. J. at 94⅝ against 94; International Harvester at 91⅜ against 90; Sears, Roebuck & Co. at 89 against 90⅜; Montgomery Ward & Co. at 46 against 42⅜; Woolworth at 63⅛ against 63½; Safeway Stores at 103¼ against 107; Western Union Telegraph at 210 against 213; Amer. Tel. & Tel. at 233¼ against 231⅝, and Int. Tel. & Tel. at 69¾ against 68⅞.

Allied Chemical & Dye closed yesterday at 271¼ against 276 on Friday of last week; Davison Chemical at 38⅝ against 33⅛; E. I. du Pont de Nemours at 124⅛ against 127⅛; Radio Corp. at 45¼ against 42⅝; General Elec. at 72½ against 76; National Cash Register at 74¾ against 77⅝; Fox Film A at 32¼ against 30⅝; International Combustion Engineering at 6¾ against 6⅝; International Nickel at 37½ against 37⅞; A. M. Byers at 84½ against 87; Timken Roller Bearing at 76⅛ against 78⅝; Warner Bros. Pictures at 61½ against 61⅞; Mack Trucks at 79 against 80½; Yellow Truck & Coach at 20½ against 22; Johns-Manville at 134 against 142; National Dairy Products at 49¾ against 50¾; National Bellas Hess at 11⅝ against 13¼; Associated Dry Goods at 31⅛ against 33¾; Lambert Co. at 103⅛ against 104¼; Texas Gulf Sulphur at 61 against 63¾, and Kolster Radio at 3 against 3.

The steel shares have shared in the general decline. United States Steel closed yesterday at 183 against 189¼ on Friday of last week; Bethlehem Steel at 100 against 102, and Republic Iron & Steel at 76¼ against 78½. The motor stocks have also been heavy. General Motors closed yesterday at 42½ against 43⅜ on Friday of last week; Nash Motors at 61 against 51½; Chrysler at 38¼ against 38; Packard Motors at 18¼ against 16½; Hudson Motor Car at 56 against 58, and Hupp Motors at 22 against 22. The rubber group has moved downward with the general market. Goodyear Rubber & Tire closed yesterday at 81⅝ against 83½ on Friday of last week; B. F. Goodrich at 47 against 47¼; United States Rubber at 26½ against 27⅜, and the preferred at 52 against bid 51.

Railroad stocks, led by New York Central, have been weak, though with the recovery already noted on Friday. Pennsylvania RR. closed yesterday at 82¼ against 84⅛ on Friday of last week; New York Central at 184 against 191½; Erie RR. at 59⅞ against 63⅜; Del. & Hudson at 173 against 178½; Baltimore & Ohio at 116½ against 118¼; New Haven at 121 against 122⅜; Union Pacific at 227½ against 231⅞; Southern Pacific at 124 against 124; Missouri Pacific at 92 against 92; St. Louis-San Francisco at 112 against 113; Missouri-Kansas-Texas at 54¼ against 58; Rock Island at 120½ against 125⅛; Great Northern at 99¾ against 99, and Northern Pacific at 95⅜ against 93⅞.

The oil shares have declined with the rest. Standard Oil of N. J. closed yesterday at 59⅛ against 61⅞ on Friday of last week; Simms Petroleum at 24½ against 25; Skelly Oil at 29 against 29⅝; Atlantic Refining at ex-div. 38½ against 40⅞; Texas Corp. at 51½ against 52⅞; Pan American B at 51⅝ against 52⅞; Phillips Petroleum at 30⅜ against 30¾; Richfield Oil at 23⅞ against 23½; Standard Oil of N. Y. at 31½ against 32¼, and Pure Oil at 21⅝ against 22⅜.

The copper shares have been no exception to the rule. Anaconda Copper closed yesterday at 72 against 76 on Friday of last week; Kennecott Copper at 56 against 58¼; Calumet & Hecla at 29½ against 30½; Andes Copper at 33½ against 34⅞; Inspiration Copper at 26¾ against 28¾; Calumet & Arizona at 76¾ against 84; Granby Consolidated Copper at 55½ against 57; American Smelting & Refining at 71⅞ against 73⅞, and U. S. Smelting & Refining at 33¼ against 33⅞.

Stock exchanges in the important European financial centers remain hesitant and uncertain with trading of small proportions and the main trend of prices slightly downward. Statistics of trade and industry are not considered encouraging and a decided tendency to reduce labor forces is reported in some over-expanded industries. Business developments in Europe are viewed as dependent to a great extent on the course of affairs in America, but in this respect much uncertainty exists. Political matters, such as the fall of the Tardieu Cabinet in France Monday also have contributed to the instability of financial markets. Cabinets in all of the larger European countries are based on insecure parliamentary support and there is constant apprehension of Governmental change and experiment. The purely financial outlook, however, continues to improve. Although the last reductions of central bank rates have only just been placed in effect, discussion

turned this week to the possibility of additional cuts at London and Berlin. London also reports greater activity in the market for new capital issues owing to oversubscription last week of a short-term Indian Government loan. Several large new issues are impending at London, reports state, but the tendency is to make haste slowly as the market's ability to absorb new capital issues is still limited.

The London Stock Exchange was dull in the opening session of the week, and prices worked downward to some extent. British funds were easier on evidence of tightness in the money market. British industrials were featured by a drop in shares of the Inveresk Paper Company, while international issues also lost ground. After a further weak opening Tuesday, prices of leading British industrials recovered, giving a better tone to the market. Rhodesian copper stocks also improved, but gilt-edged securities were again depressed. French bonds listed on the London market were but little affected by the fall of the Tardieu Cabinet. A more confident tone prevailed at London Wednesday, with improved reports from New York contributing to the general cheerfulness. Gilt-edged stocks remained dull and quotations were again shaded, but the industrial section made progress while international issues advanced substantially. The Stock Exchange relapsed into extreme quietness Thursday, partly in consequence of a drop in international issues which followed disquieting dispatches from New York. Easier conditions in the money market caused slight increases in the gilt-edged section, but prices in most other departments of the market were inclined to sag. Gilt-edged issues were steady at London yesterday, but other sections of the market were irregular.

The Paris Bourse was dull and heavy Monday, with uneasiness over the political situation much in evidence. Selling developed on a fairly widespread scale and prices of French and foreign stocks alike were forced to levels much below the previous quotations. Slight improvement occurred toward the end of the day, with partial recovery taking place in a few issues such as Suez and Pechiney. Fall of the Tardieu Government late Monday caused some apprehension regarding the action of the Bourse Tuesday, but prices remained comparatively unaffected by the crisis. Trading remained slack and the course of prices was again downward, but not on an alarming scale. Rentes weakened decidedly and Suez shares also fell sharply, but the decline was gentle in other departments. The belief gained ground Wednesday that the new Government to be formed in Paris might favor heavier reduction of taxes than was proposed by the Tardieu Cabinet, and some optimism was caused on the Bourse by this circumstance. Trading was slightly better and prices as a whole moved slowly upward. This was succeeded, however, by irregularity Thursday and an almost completely stagnant market. Selling outweighed buying as the political crisis continued and prices moved downward to a degree. Prices on the Bourse were easy yesterday, owing to the formation of a Radical Government.

The Berlin Boerse was quiet and irregular in the first session of the week. The tendency was influenced by a drop in Siemens shares in the early trading, but improvement set in later and most of the losses were recovered. Trading was of small proportions and price changes also were of minor importance. Tuesday's session on the Boerse was characterized by general weakness, with international issues showing the most pronounced losses. Chemical shares and artificial silk stocks led the market downward. Uncertainty in the political situation prepared the ground for successful bear attacks, dispatches said. Further weakness followed in Wednesday's session, but the losses were less pronounced. Trading was of small proportions and business dwindled almost to the vanishing point toward the close of the session. Although the opening Thursday was somewhat uneasy, covering purchases by bear operators soon produced a better tone and leading stocks advanced several points. Swiss purchases of electrical issues listed on the Boerse aided the recovery. The artificial silk group advanced sharply, while improvement also took place in chemical issues. The Boerse was steady yesterday, and previous gains were maintained.

Proceedings of the London naval armaments conference have been brought to the stage where all five delegations have issued preliminary statements on naval aims and requirements, permitting the thirty accredited representatives to discuss the basic material considerations involved in limitation and reduction. Dino Grandi, Foreign Minister of the Rome Government, issued a statement on the Italian position at the conference Wednesday, following in this respect the precedent set by the United States, British, French and Japanese delegations in previous weeks. Even before the Italian declaration was made, discussion of means for securing a five-power naval accord on all classes of vessels had been started. These negotiations were based largely on the statement given out by Premier Tardieu Feb. 13, in which French naval tonnage on Dec. 31 1936 is to be 724,479 English tons under the present program. The more important discussions were brought to a sudden halt, however, by the unexpected and peculiarly untimely fall of the French Cabinet Monday on a minor issue. Other delegations in London were immediately notified by the French that neither the French diplomats nor the French experts would take part in the naval negotiations until further notice. As a result of the situation thus produced, the leading delegates of the United States, Britain, Italy and Japan consulted Wednesday and decided to adjourn the conference for a week so that the French statesmen might have an opportunity to adjust their domestic situation. A short official communication was issued Wednesday stating that the naval conference would stand adjourned until Wednesday, Feb. 26. The committee of naval experts is to continue in the meantime the "work upon which it is now engaged."

Difficulties faced by the conference in achieving its widely heralded aims of limitations and reduction appeared over the past week-end in ever graver light. M. Tardieu's statement on France's naval needs and the French building program until 1936 was viewed as the particular stumbling block to reduction. A door to reduction was opened by Premier Tardieu, however, before he left London Feb. 14 to attend a Cabinet meeting in Paris. In a conversation with Prime Minister MacDonald, a dispatch to the New York "Times" reported, M. Tardieu stated that the French would reduce their naval program in the measure in which they received guarantees of security. On the basis of semi-official declarations

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

in French quarters, the dispatch added that "the French Premier meant that if all nations represented here were to agree to consult in case of danger of war he would cut his program by 10%, while if they would agree in advance not to aid the aggressor in another war by supplying munitions and food, he would cut 20%." Britain is ready to make such an agreement not to help the aggressor, the dispatch said, and it was considered therefore that the force of M. Tardieu's suggestion fell chiefly on the American delegation. Some members of the American delegation in London were disposed to weigh the proposal, it was indicated, but the majority were definitely opposed. In Washington, moreover, the suggestion "failed to bring any sympathetic response in authoritative quarters," according to a special to the New York "Times."

The conference, which began Jan. 21, has thus rounded out its first month with very little in the way of definite accomplishments. The high hopes at first entertained in various quarters have all been disposed of, a London report to the New York "Times" said. "As the conference approaches its second month it has been settled that battleships are not going to be done away with," the dispatch continued. "It is settled that submarines will still submerge when the meeting is over, and reduction has got so far into limbo that the statesmen have now realized that the chief results of the London conference will be some of the finest naval construction programs the world has yet seen. Italy will never be able to build what she demands. France will build most of what she demands. The Japanese will get an extra cruiser or two. Britain has considerable replacement to do. And for the United States to carry out the program the conference will provide for us to achieve parity with Britain by 1936 will call for building which will leave only small change out of $1,000,000,000." It was considered assured, however, that the meeting will result in a treaty of limitations on all classes of vessels, which "will be something that never existed before." There is a definite prospect, in addition, of a further conference in 1935, at which time greater progress is considered likely.

No change in the French position at the conference is likely because of the Cabinet crisis at Paris. The Tardieu Cabinet fell on a domestic issue having not the remotest connection with the naval program of the country. Moreover, all French leaders are in substantial agreement on the needs of the country as outlined by M. Tardieu. In a report of Tuesday by Edwin L. James, general European correspondent of the "Times," it was pointed out that "the paralysis of the naval conference because of the absence of the French is a very good indication of their key position. England will not fix her figures until she knows the French figures, and the Americans cannot fix theirs until they know Britain's. The Japanese fleet depends on the size of the American navy, while Italy stands pat on parity with France." The chief difficulty of the London gathering, it was contended, lies in the mistake the Washington conference of 1922 made with regard to France, in placing the French naval strength at one-third of that of America or England and below that of Japan. "There has been in France ever since a determination to overcome what they regard as an indignity," the dispatch added, "and now the London conference reaps the results of the error of the Washington conference. The French intend to place themselves about in the position Japan occupies with regard to England or America. They have the money to build up to this position and they are going to do it, treaty or no treaty, unless they get political assurances, which they calculate are worth so much tonnage."

Italian naval policy remains virtually the same as when the conference opened in the Royal Gallery of the House of Lords. A statement on the Italian position, issued Wednesday by Signor Grandi, began with a confirmation of previous Italian declarations. The desire for theoretical parity with France was reiterated in the statement that "Italy is prepared, a priori, to accept as a limit for her armaments any figure, no matter how low, provided it be not exceeded by any other Continental power." Italy's geographical position was described as "particularly unfavorable," since she has not the advantage of an ocean frontier, and moreover possesses no extra-Mediterranean naval bases. "Italy's problem is that of insuring her existence and not only that of safeguarding distant territories subject to her sovereignty or influence," the statement said. Italy, nevertheless, "strongly advocates reduction of naval armaments," and in tables of naval strengths appended to the statement, application of the principle of reduction is suggested from the Italian viewpoint. This consists chiefly of a willingness to postpone capital ship construction until 1936, and to consider abolition of capital ships. With regard to other classes of vessels, Signor Grandi declared specifically that Italian needs are governed by the strongest fleet possessed by any other Continental power.

Adjournment of the conference, which followed, was taken on the initiative of Secretary of State Stimson, who assumed the position that negotiations among the remaining delegations in the absence of the French might cause irritation. The atmosphere of the meeting, dispatches said, was distinctly less optimistic at the time of adjournment than in previous weeks. "It has been noticeable," a London report to the New York "Times" said, "that the American delegation has lost much of the optimistic enthusiasm which marked them up to this week. Even if the French were present the conference would still face difficult days. Not that there is any doubt that a limitation treaty will be written, but the statesmen have made too many political promises which they find themselves unable to carry out. Both the British and Americans misjudged the French stand, as they now are quite willing to admit." An address throwing some further light on the American position at the conference was delivered by Senator Joseph T. Robinson, Wednesday, before the American newspaper correspondents in London. Mr. Robinson gave little encouragement to suggestions for political arrangements. "My understanding is," he said, "that the people of the United States quite generally adhere to the traditional policy of our Government to avoid, if possible, involvement in European politics. They would repudiate emphatically any treaty expressly or impliedly obligating our Government to employ the army or the navy for the enforcement of obligations assumed by other nations. It is for this reason that they do not encourage their delegates to this conference to join in guarantees of security respecting areas remote from territory or possessions of the United States."

The Cabinet formed in France last November by Andre Tardieu was defeated in the Chamber of Deputies Monday on a minor issue, precipitating a national political crisis of great embarrassment because of the several important international conferences in progress. M. Tardieu has recently devoted all his time to the naval limitation conference in London, which, as stated above, has been adjourned for a week pending the formation of a new Government in France. An international gathering at Geneva for consideration of tariffs and a conference in Paris on the Eastern European reparations problem also have been halted by the fall of the Tardieu Cabinet. The development was totally unexpected at this time, even though it was well known that the Tardieu Government rested on a slim and insecure majority in the Chamber. Party differences would be held in leash, it was thought, until the naval conference ended and ratification of the Young plan protocol had been effected. These differences were suddenly brought to bear, however, in a debate on the budget, conducted for the Government by Finance Minister Henri Cheron. The insistence of the Finance Minister on retention of taxes to which the majority of the Deputies objected rolled up a storm of opposition which finally turned the Government out of office when M. Cheron made further tax concessions the occasion for a vote of confidence. A vote of no-confidence resulted by a majority of only five, and the Tardieu Government resigned in a body a few hours later.

M. Tardieu was forced to assume the role of a passive observer as the vote of 286 to 281 was taken which ended his first Cabinet. He returned to Paris from London late last week and was confined to his home with an attack of influenza. M. Cheron, as ranking member of the Cabinet in the absence of M. Tardieu, opposed steadily the efforts of the Deputies to secure reconsideration of proposed tax reductions. A strong campaign had been waged against the Finance Minister, who was accused of making the State "monstrously rich." During the debate, Monday, M. Cheron proposed the utilization of part of the large French surplus for the liquidation of some of her foreign debt. "I would like," he said, "to refund $75,000,000 of the 1928 loan and to buy on the American market the loans of $100,000,000 each issued in 1921 and 1924." Available records do not indicate the response of the Chamber to this suggestion. The first indication of an unfavorable vote occurred on a provision in the finance bill reducing the tax on unimproved property from 18 to 16%, which met with strong disapproval on the ground that the reduction was insufficient. A vote of confidence was demanded on this measure by M. Cheron, and the Government's majority was whittled down to 20. Finally, an effort was made to press through further reduction in the taxes paid by small shopkeepers whose wives work in the shop but receive no salary. M. Cheron again objected and asked for a vote of confidence. This time, however, the result was adverse and the coalition Cabinet formed on Nov. 2 last by the Center and Right Center parties came to an end. A survey of the voting indicated, according to a Paris report to the New York "Times," that the Republican-Socialist followers of Foreign Minister Aristide Briand deserted M. Tardieu and brought about his downfall.

President Gaston Doumergue promptly began, Tuesday, the round of political conferences that always precedes the formation of a new Cabinet in Paris. Such discussions are necessitated by the numerous parties in the Chamber and the fact that none has a sufficiently heavy representation to make it dominant. Former Premier Poincare, who resigned because of illness last summer, was the first leader called to the Elysee Palace. Although much recovered from his illness and several operations, M. Poincare informed the President that his physicians strongly advised him to remain out of politics for some time to come. It was remarked in Paris dispatches that he would consent to serve only in the event of a grave national crisis. After additional conferences, President Doumergue called upon Camille Chautemps, leader of the Radical-Socialist party, to form a Cabinet. M. Chautemps began late Thursday to form a Government of the Left and Left Center parties. M. Tardieu was asked to join the Cabinet as Minister of Marine and Vice-President of the Council of Ministers, so that he could return to London and continue the naval negotiations, but the former Premier declined. M. Briand, however, who holds something of a key position in the Chamber, agreed to accept the portfolio of Foreign Minister in the new Cabinet, and M. Chautemps was encouraged thereby to continue his efforts to form a Ministry. A tentative Cabinet was completed by M. Chautemps early yesterday, but his plans were upset by the refusal of the Left-Republicans, headed by M. Tardieu, to support the new Government. The Premier-designate asked President Doumergue for more time at noon, and proceeded to rearrange his portfolios. The new Ministry is expected to seek support chiefly from the Socialists, and its existence therefore is considered precarious.

M. Chautemps succeeded late yesterday in his endeavors to form a Cabinet. He informed President Doumergue that his slate had been completed and on leaving the Elysee Palace he announced that the Cabinet would meet to-morrow to frame the Ministerial declaration, which will be read to the Chamber of Deputies and the Senate on Tuesday. He also stated that he would start for London Wednesday with Foreign Minister Briand and several other Ministers to continue the negotiations at the London naval conference. The Cabinet is representative almost completely of the Left parties in the Chamber, and its majority in that body is likely to be very small. M. Chautemps will be President of the Council and Minister of the Interior in the new Government. Other portfolios and their holders will be: Minister of Justice and Vice-Prisedent of the Chamber, Theodore Steeg; Foreign Affairs, Aristide Briand; Finance, Charles Dumont; War, Rene Besnard; Navy, Albert Sarraut; Merchant Marine, Charles Danielou; Public Instruction, Senator Jean Durand; Public Works, Edouard Deladier (leader of the Radical Socialist party outside the Chamber); Commerce, Senator Georges Bonnet; Agriculture, Correze Queuille; Pensions, Dr. Gallet; Work, Louis Loucheur; Air, Laurent Eynac; Colonies, Lucien La Moureux; Minister of Telephone and Telegraph, Julian Durand, and Finance Budget (a new Ministry), Maurice Palmade.

Several minor advances have again been made in the protracted international endeavor to give complete operating effect to the new Young plan of German reparations payments and the Bank for International Settlements, which is an integral part of

Digitized for FRASER

Federal Reserve Bank of St. Louis

the plan. Ratification by the German Reichstag of the Young plan protocol which the interested governments adopted at The Hague Jan. 20 is looked for within a few days. After this important action is taken, ratification will be sought in the parliaments of the creditor governments. A confident expectation that these definitive steps will present no great difficulties was indicated in the past week by arrangements to bring the Reichsbank into conformity with the plan and by the leasing of quarters at Basle for the temporary home of the Bank for International Settlements. A meeting of shareholders of the Reichsbank was held in Berlin last Saturday, and the new Reichsbank law was approved by an overwhelming majority. The law effects changes in the distribution of profits, the participation of the stockholders being limited beyond the guaranteed dividend of 8%, while the participation of the Reich Government is enlarged. Dr. Hjalmar Schacht, President of the Reichsbank, explained at the meeting that the arrangement will become valid only if the Young plan protocol is ratified by the Parliaments of the interested countries.

Temporary quarters of the Bank for International Settlements are to be set up in Basle, Switzerland, at the Hotel de l'Univers et de Savoy pending extensive alterations to the Kirschgarten House, which will house the bank permanently. In the meantime the make-up of the Board of Directors of the new institution has been virtually completed, according to a Washington report of Tuesday to the New York "Herald Tribune." The French directors are to be Emile Moreau, Governor of the Bank of France; Baron Brincard, President of the Credit Lyonnais, and Baron der Vogue, President of the Suez Canal Co. Sir Charles Addis, of the Hongkong & Shanghai Banking Corp., has been chosen definitely, the dispatch indicates, as one of the two British directors. The Belgian directors will be Emile Francqui, Vice-Governor of the Societe Generale de Belgique, and Paul van Zeeland of the Bank of Belgium. The United States will have as representatives of the private banking interests that will subscribe to the capital of the bank Gates W. McGarrah, now Chairman of the Board of the Federal Reserve Bank of New York, and Leon Fraser, New York attorney. The complete list of directors is to be made up, the dispatch stated, at a meeting in Rome early next week, which is to be attended by the Governors of the central banks of Britain, France, Germany, Belgium and Italy.

Difficulties were again encountered this week in the attempt to settle the problem of Eastern European reparations payments. Meetings of the committee named at The Hague to adjust this matter have been taking place in Paris under the chairmanship of Louis Loucheur, who was Minister of Labor in the Tardieu Government. The French Cabinet crisis brought the deliberations to a complete halt, but it was indicated in a Paris dispatch of Wednesday to the New York "Times" that an impasse had previously been reached. Although the technical labors of the meeting are virtually completed, signing of the accord has been delayed by the disposition of some powers to rescind concessions agreed to at The Hague. "The large powers now appear to regard the continued dispute with very little patience," the dispatch continued. "When the conference is renewed as soon as a new French Government is formed, they threaten to take matters into their own hands, as they are licensed to do in accordance with the treaties. Thus the strongest pressure is being put upon the smaller powers to come to some sort of agreement among themselves, for otherwise they face the prospect of France, Britain and Italy assuming complete charge of the negotiations and of consequently being forced to submit to a settlement which would very probably be a compromise for everybody concerned."

Formal sessions were begun at Geneva Monday of the conference called by the League of Nations to consider the advisability of a "customs truce" among European nations for a period of two or three years. The gathering resulted directly from the suggestions made by M. Aristide Briand of France at the League Assembly meeting last September for closer economic integration of European countries. The plans of the veteran French statesman remained conveniently vague, but the idea gained considerable renown and widespread discussions took place of the economic "United States of Europe" visualized in the suggestions. As a first step toward the desired end the current conference was called and non-European countries also were invited to attend the meeting. Twenty-nine States, mostly European, were represented at the opening session. The United States was represented by an observer, Edwin C. Wilson, first Secretary of the American Embassy at Paris. Colombia, Peru and Japan were the only non-European countries with fully accredited delegates present.

A broad conception of European economic organization was urged in the opening address of the Chairman, Count Carl von Moltke, of Denmark. The "tariff truce" which the meeting was called to consider might better be described by the more technical expression "consolidation of duties," the Chairman said. He laid much stress on the fact that for the first time in the economic sphere the League of Nations was witnessing the same direct contacts between responsible statesmen which in the political field has produced unquestionable results. M. Paul Hymans of Belgium also addressed the gathering in the opening session, warning the larger States of the danger of a new tariff war. William Graham, President of the Board of Trade, spoke in Tuesday's session. The British Minister declared there had been "widespread misunderstanding" of the purpose of the conference, and he added that it would be disastrous merely to stabilize tariffs for two or three years at existing levels. "The object of the conference," Mr. Graham continued, "is to induce fresh undertakings against tariff increases and trade impediments, and then, in the favorable atmosphere thus created, to make efforts looking toward the lowest possible reduction." Dr. Rudolph Schmidt, who spoke for Germany, pleaded for curtailment of the excessive protectionism and economic nationalism of recent years. Italian views on the proposed tariff truce were contributed Wednesday by Giuseppe Bottai, Italian Minister of Fascist Corporations. Collective agreements of an economic character were criticized frankly by Signor Bottai as "premature in their character and inapplicable in practice." "Signor Bottai made it evident that he had come to bury the project, not to praise it," a Geneva dispatch to the New York "Herald Tribune" said. Approval of the idea of a tariff truce was expressed for Portugal Thursday by Dr. A. Monteiro, who added the reser-

Federal Reserve Bank of St. Louis

vation; however, that retroactive agreements would not be acceptable to the Lisbon Government. The Netherlands was arrayed in favor of the project by H. Colijn, who deplored the tendency to make reservations and declared that pessimism was unjustified.

A drastic swing toward the Left, or extreme communistic doctrines, has characterized the policy of the Russian Dictatorship in recent weeks, with the sweeping program of "socialization" embracing all phases of Russian existence. Joseph Stalin, Secretary General of the Central Committee of the Communist Party and the real Dictator of Russia, initiated the Leftward swing, partly as a consequence of factional disputes within the party last year. The Soviet leader made clear recently that the New Economic policy (Nep) is to be retained for some time longer, but he also stated that features of it will be discarded from time to time, as they no longer appear to serve the "work of socialism." Under this policy private initiative has been permitted in varying degrees since it was promulgated by Lenin. "Lenin said," M. Stalin declared some days ago, "that the Nep was retreat, but not defeat—preparation for a new attack on capitalist elements in town and country. Lenin said the Nep was introduced seriously and for a long period, but he never said it was introduced forever." The current trend of Russian policy was described in a Moscow dispatch from Walter Duranty, correspondent of the New York "Times," as that of retaining convenient features of the Nep such as banking, money exchange and the usual financial machinery of commerce and industry, while aiming nevertheless at systematic elimination of private enterprises on all but the smallest scale.

One feature of the Soviet program which has gained particular prominence in the past week concerns the attack of the Kremlin leaders on religious associations in Soviet Russia. Decrees have been issued severely limiting the activities of prelates and curtailing the legal rights of churchly bodies. Numerous churches have been closed throughout Russia and a five-year "anti-Christian plan" has been adopted, which aims at "a Godless Moscow and a Godless collectivized village." This program has called forth a flood of protests from many quarters. Some uncertainty has been introduced, however, by statements made by the Metropolitan Sergius, chief patriarch of the Russian Orthodox Church, last Sunday. In reply to questions put by newspaper men, this dignitary declared that religion never has been and is not now persecuted in the Soviet Union. Churches were closed, he said, not on the initiative of the authorities, but at the request of the people, in some cases at the request of the church goers themselves. It would appear, nevertheless, that strong objection is being voiced toward other faiths by the adherents of communism, who regard that doctrine as itself much of a religion.

In the economic sphere two features of the current Soviet policy stand out as of particular importance, as they indicate a return to the militant communism of the years 1918 to 1921. The first is the exorbitant taxation of all forms of private enterprise, while the second is the drive for rural socialization. Any enterprise larger than a small store or booth in the market-place is subjected to such heavy taxation as to amount to virtual confiscation, Mr. Duranty reports. A Moscow dispatch of Feb. 15 to the Associated Press adds the further detail that confiscation of private property is taking place on a huge scale for non-payment of taxes owed the Government by the "parasitical" classes. The rural-socialization program is a portentous one for the Soviet regime, since is involves collectivization of important grain producing regions in which small land holdings predominate. An attempt to apply a similar program 10 years ago very nearly caused a downfall of the Communist regime. It is on the friendly tolerance of the Russian peasants, comprising 90% of the Russian people, that the small body of communists relies and alienation of this tolerance is a dangerous procedure. Rural socialization has so far been applied successfully only in the case of the Kulaks, or proprietors of relatively large tracts. Against these the peasants usually make common cause with the communists. The trend toward small farms is indicated by the increase of such holdings from 20,000,000 in the first year of the Soviet regime to 30,000,000 by the end of 1928. Regional collectivization, which reports state is now to be tried, would affect the numerous small proprietors who have always objected decidedly to the process, and it is likely, therefore, to produce some interesting results.

There have been no changes this week in the discount rates of any of the European central banks. Rates continue at 7% in Italy; at 6½% in Austria and Hungary; at 6% in Germany; at 5½% in Spain; at 5% in Norway and Denmark; at 4½% in Great Britain and Sweden; at 4% in Holland; at 3½% in Belgium and Switzerland, and at 3% in France. In the London open market discounts for short bills yesterday were 3⅞% against 4% on Friday of last week, and 3 13/16% for long bills against 3 15/16% the previous Friday. Money on call in London yesterday was 3¼%. At Paris the open market rate remains at 3%, and in Switzerland at 2¾%.

In its statement as for the week ended Feb. 15, the Bank of France reports a gain in gold holdings of 16,135,129 francs, raising the total of the item to 42,947,183,759 francs. Gold holdings in the corresponding week last year amounted to 34,026,098,489 francs. Bills bought abroad declined 2,000,000 francs, while credit balances abroad remain unchanged at 6,978,710,853 francs. Notes in circulation contracted 357,000,000 francs, reducing the total of notes outstanding to 69,071,985,655 francs, as compared with 62,618,999,005 francs at the corresponding week last year. A decline also appears in French commercial bills discounted of 349,000,000 francs, in advances against securities of 67,000,000 francs, and in creditor current accounts of 152,000,000 francs. Below we compare the various items for the past two weeks as well as with the corresponding week last year:

Federal Reserve Bank of St. Louis

ings. As this was accompanied by a contraction of £2,422,000 in circulation, reserves increased £2,562,000. The bank's total gold holdings now amount to £151,638,500 in comparison with £150,850,938 a year ago. Loans on Government securities fell off £6,130,000 and those on other securities £1,450,452. The latter is subdivided into "discounts and advances," which decreased £3,230,492, and securities which increased £1,780,040. There was shown a decrease in public deposits of £4,066,000 and in other deposits of £981,698. Other deposits consist of bankers accounts and other accounts. The former rose £83,369 and the latter fell off £1,065,067. The reserve ratio is now 61.47%, having risen from 56.43% a week ago and compares with 50.15% last year. The discount rate is unchanged at 4½%. Below we compare the various items for five years:

a On Nov. 29 1928 the fiduciary currency was amalgamated with Bank of England note issues adding at that time £234,199,000 to the amount of Bank of England notes outstanding.

The Bank of Germany in its statement for the second week of February shows another gain in gold and bullion, this time of 25,073,000 marks. The total of gold is now 2,351,014,000 marks, which compares with 2,728,910,000 marks last year and 1,886,389,000 marks the year before. Reserve in foreign currency and silver and other coin register increases of 7,729,000 marks and 15,509,000 marks, while the items of deposits abroad and investments remain unchanged. Notes in circulation decreased 214,600,000 marks, reducing the total of the item to 4,166,354,000 marks, as compared with 4,077,262,000 marks in the corresponding week last year. An increase is recorded in notes on other German banks of 2,746,000 marks, in advances of 23,495,000 marks, and in other assets of 2,234,000 marks. Bills of exchange and checks and other liabilities register declines of 240,248,000 marks and 51,579,000 marks, while the item of other daily maturing obligations reveal a gain of 51,226,000 marks. Below we furnish a comparison of the various items of the bank's return for the past three years:

Money rates in the New York market remained this week at the easy levels established in previous weeks. Call loans on the Stock Exchange was steady in the earlier sessions at 4½% for all transactions, but a drop to 4% occurred yesterday as lenders were anxious to place their funds over the holiday. Withdrawals by the banks amounted to $30,000,000 Monday, $10,000,000 Tuesday, and $20,000,000 Thursday. Notwithstanding these withdrawals, funds were in larger supply than demand in most sessions of the market, and an overflow into the unofficial "Street" market occurred on most days. Street funds were available at 4%, or a concession of ½% from the official rate, Tuesday, Wednesday and Thursday. Greater ease prevailed yesterday and a concession of a full 1% was named in the unofficial market, so that trades were effected at 3%. Time loans remained unchanged. Brokers' loans against stock and bond collateral, as reported for the week ended Wednesday by the Federal Reserve Bank of New York, increased $44,000,000, making a total increase of $166,000,000 since the recent low point was reached on Dec. 24 1929. Gold movements at New York for the week ended Wednesday consisted of imports of $7,495,000 and exports of $10,000. No net change occurred in the stock of gold held earmarked for foreign account.

Dealing in detail with the call loan rates on the Stock Exchange from day to day, all loaning on Monday, Tuesday, Wednesday and Thursday was at 4½%, including renewals. On Friday there was a drop to 4%, which was the only rate for the day. The market for time money was easier on Monday and Tuesday, but firmed up again later. Rates each day have been 4¼@4½% for 30 days, 4½@4¾% for 60 days and for 90 days to four months, and 4¾@5% for five months and six months. The market for commercial paper displayed continued improvement, due in part to the large increase in bank buying. Rates for names of choice character maturing in four to six months continue at 4½@4¾%. Names less well known are quoted at 4¾@5%, with New England mill paper at 5%.

The market for prime bank acceptances continued fairly active during the early part of the week, but the volume of business diminished as the week advanced. The Reserve Banks increased their holdings of acceptances during the week from $276,084,000 to $281,057,000. Their holdings of acceptances for their foreign correspondents fell from $523,891,000 to $518,664,000. The posted rates of the American Acceptance Council remain at 3⅞% bid and 3¾% asked for bills running 30 days, and also for 60 and 90 days, and likewise for 120 days, and 4% bid and 3⅞% asked for 150 and 180 days. The Acceptance Council no longer gives the rates for call loans secured by acceptances, the rate varying widely. Open market rates for acceptances have also remained unchanged, as follows:

Sterling exchange has been dull and irregular, moving down to new lows for the year on Tuesday and Wednesday, but making a sharp recovery on Thursday in an active market. In Wednesday's trading sterling cable transfers sold as low as 4.85⅞, touching a new low for the year. On Thursday the rate moved up to 4.86¼ toward the close, and this figure was again reached on Friday. The range this week has been from 4.85½ to 4.85⅞ for bankers' sight, compared with 4.85 11-16 to 4.86⅛ last week. The range for cable transfers has been from 4.85⅞ to 4.86¼, compared with 4.86 15-32 to 4.86⅜ a week ago. Current rates compare with the high for the year of 4.88 1-16 for cable transfers reached in January. The low rates which prevailed on Tuesday and Wednesday left sterling about one cent above the gold import point to New York. Figures used in theoretical calculations of the gold point at this time are 4.84 15-16 to 4.85. However, gold losses by England do not seem an immediate prospect. The comparative firmness of Thursday's and Friday's market was attributed to weakness in the stock market here which induced profit taking by foreign investors and created a brisk demand for sterling. At the same time there were some evidences of a revival of public interest in the London Stock Exchange. In the main the weakness of sterling since January is believed to be due to the transfer of balances to this side both on account of sums due and for investment. The London money market has been showing ease for some time and on Wednesday 3-months bills were quoted in London at 3 27-32%.

The weekly Bank of England statement illustrates the attempts of the Bank to prevent further softening of rates. Total contraction of holdings of securities and advances amounted to more than £9,000,000 during the week ended Feb. 20 and in addition there was a reduction of circulation by about £2,422,000. At the same time the institution's banking reserves rose to a record high since consolidation of the note issue, and the ratio of reserves to deposit liabilities stood at 61.47% against 50.15% a year ago. Bankers say that the impression exists in London that a further reduction in the Bank of England rate should be possible at no very distant date. The feeling arises from the movement of large amounts of gold now on the way to London from Australia and South Africa. The total amount so far in sight exceeds £9,000,000. That the Bank of England views the outlook with confidence seems to be indicated by the fact that during the past few weeks it has offered no competition for gold arriving in the open market. The Bank's withdrawal from the market has enabled Germany to acquire the weekly arrivals of gold at a profitable price and in satisfaction of credits which it has acquired directly or indirectly in the London market. This week again German interests have taken all open market offerings. Normally sterling should be relatively firm at this season and continue so until around August. London dispatches state that the weakness of sterling at New York is partly due to what may be termed a mild "flight from the pound" because in addition to the transfer of French funds from London to other markets, including New York, there is a revival of British interest in American securities. Unless greater confidence is established in the London security markets this movement of funds from London to New York must continue. This week the Bank of England shows an increase in gold holdings of £139,281, the total standing at £151,638,500, compared with £150,850,938 a year ago. On Saturday the Bank of England sold £8,608 in gold bars and exported £2,000 in sovereigns and bought £8 in foreign gold coin. On Monday the Bank sold £1,719 in gold bars. On Tuesday the Bank seems to have taken none of the open market gold. Of the total of £903,000 available approximately £850,000 was taken for account of Germany. Approximately £2,000,000 gold was shipped to Spain for London during the week representing balances of £4,000,000 gold authorized by the Spanish Government for shipment to London to support peseta exchange. Approximately £500,000 of this gold was offered in the open market in London on Wednesday and taken for German account. To the surprise of the market £1,500,000 of the Spanish gold offered on Thursday was taken for German account. The price paid by the German interests was 84s. 11d.

At the Port of New York the gold movement for the week Feb. 13-Feb. 19 inclusive, as reported by the Federal Reserve Bank of New York, consisted of imports of $7,495,000, of which $5,432,000 came from Brazil, $1,956,000 from Bolivia, and $107,000 chiefly from other Latin American countries. Gold exports totaled $10,000 to Germany. The Reserve Bank reported no change in gold earmarked for foreign account. In tabular form the gold movement at the Port of New York for the week ended Feb. 19, as reported by the Federal Reserve Bank of New York, was as follows:

GOLD MOVEMENT AT NEW YORK, FEB. 13-FEB. 19, INCLUSIVE.

Imports.	*Exports.*
$5,432,000 from Brazil	$10,000 to Germany
1,956,000 from Bolivia	
107,000 chiefly from other Latin American countries	
$7,495,000 total	$10,000 total

Net Change in Gold Earmarked for Foreign Account.
None.

Canadian exchange moved more favorably to Montreal during the week. frequently equaling the best level of the year. Since October and November, when Montreal funds were quoted at the widest discount for any normal post-war period, exchange on Montreal has tended, in view of lack of attraction in New York, toward a steady appreciation. Usually at this season Canadian funds are at a premium against American dollars, but the wheat situation and the reluctance of Canadian bankers to ship gold have prevented appreciation at this time. On Saturday Montreal funds were at 25-32 of 1% discount; on Monday at 23-32 of 1%; on Tuesday at 39-64; on Wednesday at 9-16; on Thursday at 7-16, and on Friday at 17-32 of 1% discount.

Referring to day-to-day rates sterling exchange on Saturday last displayed an easy tone. Bankers' sight was 4.95 11-16@4.85 13-16; cable transfers, 4.86⅛@4.86 3-16. On Monday exchange continued under pressure. The range was 4.85 17-32@4.85¾ for bankers' sight and 4.86 1-32@4.96 3-32 for cable

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

transfers. On Tuesday the market continued under pressure. Bankers' sight was 4.85½@4.85⅝, cable transfers, 4.85 15-16@4.86. On Wednseday the market was irregular and sterling moved to a new low for the year. The range was 4.85½@4.85⅝ for bankers' sight and 4.85⅞@4.86 for cable transfers. On Thursday the market became active and firmer. The range was 4.85⅝@4.85⅞ for bankers' sight and 4.86@4.86¼ for cable transfers. On Friday firmness continued, the range was 4.85 11-16 @4.85⅞ for bankers' sight and 4.86 11-16@4.86¼ for cable transfers. Closing quotations on Friday were 4.85 25-32 for demand and 4.86 5-32 for cable transfers. Commercial sight bills finished at 4.85⅝, sixty-day bills at 4.82 3-16, ninety-day bills at 4.80 11-16, documents for payment (60 days) at 4.82 3-16, and seven-day grain bills at 4.85 1-16. Cotton and grain for payment closed at 4.85⅝.

Exchange on the Continental countries has been irregular and weak, following the trend of sterling, with a slight firmness developing in Thursday's market in sympathy with sterling. German marks are relatively firmer than the other European rates and more in demand, largely due to transfers of funds from other centres to supply German credit needs. As noted above, German interests again secured the major share of the open market gold on offer in London. The steady flow of funds to the German centres is bringing about an appreciable ease in the Berlin money market and bankers are expecting a further reduction in the Reichsbank's official rediscount rate, which continues at 6%. Paris, Zurich, and Amsterdam seem to be at present the chief lenders to Berlin. Berlin dispatches state that the Reichsbank is opposing further purchases of London gold by German arbitrage houses. It is stated that without any additional strengthening of its own gold reserves the Reichsbank could increase its credit to domestic trade by at lease 1,000,000,000 marks. Arbitrage houses, however, desire to buy gold notwithstanding the Reichsbank's wish to the contrary. Financial circles say that the Reichsbank cannot prevent arbitrage purchases except by reducing its discount rate and that this is one reason for expecting such a reduction. The Reichsbank statement for the week ended Feb. 15 shows an increase in gold holdings of 26,000,000 marks, the total standing at 2,351,000,000 marks.

French francs following the general trend of the European exchanges moved down to a new low for the year at 3.91 in Wednesday's trading, which compares with the high for the year of 3.93 15-16. Dollar parity is 3.92. Finance Minister Henri Cheron, who resigned with the Tardieu ministry, in a speech before the Chamber of Deputies last week implied that the placing of French funds abroad, which is regarded not only as inevitable but desirable because of the low rate prevailing in market, would be accomplished in such a way as to have little depressing effect on the franc. This was to have been arranged by having the Bank of France dispose of portions of its large holdings of sterling and dollars to those wishing to export funds. Such a move would obviate the selling of francs against dollars and sterling in the exchange markets of London and New York. At the same time by absorbing francs in return for its holdings of foreign exchange the Bank of France would be enabled to contract its note circulation, which would in itself have a firming influence on francs. However, a new government may bring a new policy to bear in this respect. Governor Moreau of the Bank of France has expressed himself publicly in favor of a free gold market at Paris, with no move to be made to counteract exports within reason as a result of declining exchange rates. At present rates further gold imports by Paris seem to be precluded.

The London check rate on Paris closed at 124.30 on Friday of this week, against 124.17 on Friday of last week. In New York sight bills on the French center finished at 3.90 15-16, against 3.91¼ on Friday of last week; cable transfers at 3.91 3-16 against 3.91½; and commercial sight bills at 3.90¾, against 3.91. Antwerp belgas finished at 13.91½ for checks and at 13.92½ for cable transfers, against 13.92½ and 13.93½. Final quotations for Berlin marks were 23.86½ for checks and 23.87½ for cable transfers, in comparison with 23.66¼ and 23.87¼ a week earlier. Italian lire closed at 5.23⅜ for bankers' sight bills and at 5.23⅝ for cable transfers, against 5.23 1-16 and 5.23 5.16 on Friday of last week. Austrian schillings closed at 14¼, against 14¼. Exchange on Czechoslovakia finished at 2.96, against 2.96; on Bucharest at 0.60½ against 0.60½; on Poland at 11.25, against 11.25; and on Finland at 2.52, against 2.52. Greek exchange closed at 1.30 for bankers' sight and at 1.30¼ for cable transfers, against 1.30 and 1.30¼.

Exchange on the countries neutral during the war have reflected the main trends of sterling and the Continentals, although the fluctuations have been within narrow limits and trading in these currencies in the New York market has been relatively dull. Holland guilders, the more active of the neutrals, are relatively weak. In Monday's trading guilder cables sold as low as 40.08, a new low for the year, which compares with a high for the year of 40.34½ and with dollar parity of 40.20. The weakness in the guilder is attributed largely to the demand for other currencies in Amsterdam, chiefly to supply foreign credit and security markets. There is believed to be an especially strong flow of Dutch funds to Germany and it is currently reported that there is a movement of Holland funds for investment purposes to both London and New York. The Scandinavian exchanges have been dull but relatively steady. Spanish pesetas, while fluctuating more widely than any other European unit owing to speculative operations, confined chiefly to the European market, have again been weak. As noted above in the report on sterling exchange, approximately £2,000,000 of Spanish gold was sent to London to support peseta exchange. To the surprise of bankers this gold was offered in the open market and practically all of it was taken for German account.

Bankers' sight on Amsterdam finished on Friday at 40.07, against 40.06¾ on Friday of last week; cable transfers at 40.09, against 40.08¾; and commercial sight bills at 40.04, against 40.03½. Swiss francs closed at 19.28½ for bankers' sight bills and at 19.29½ for cable transfers, in comparison with 19.28¾ and 19.29¾ a week earlier. Copenhagen checks finished at 26.75½ and cable transfers at 26.77, against 26.76½ and 26.78. Checks on Sweden closed at 26.81 and cable transfers at 26.82½, against 26.80½ and 26.82; while checks on Norway finished at 26.71½ and cable transfers at 26.73, against 26.71½ and 26.73. Spanish pesetas closed at 12.32

for checks and at 12.33 for cable transfers, which compares with 12.49 and 12.50 a week earlier.

The South American exchanges have been relatively steadier, owing largely to gold exports throughout the past few months from Buenos Aires and Rio de Janeiro to New York and London. Nevertheless, Argentine and Brazilian exchange while currently steadier continue to display an easy undertone. The weakness in Argentine, as frequently noted, is ascribed chiefly to the low prices of Argentine products. Recent advices state that the inelasticity of the Argentine currency, rather than the loss of gold, was responsible for the recent closing of the Argentine conversion office. Of course, the cessation of foreign lending combined with the lower prices for agricultural products, was largely responsible for the outflow of gold from Argentina prior to the closing of the conversion office. A current review of the Bank of America, N. A., says that the inelasticity of the Argentine currency results from the fact that as the gold reserves of the conversion office diminish, the number of paper pesos in circulation is automatically reduced. For every gold peso withdrawn from the conversion office 2.27 paper pesos must be retired from circulation. Consequently the loss of about $5,000,000 gold pesos from the conversion office between June 30 1928 and Dec. 20 1929 resulted in a very considerable contraction in the volume of paper money in circulation, with some little accompanying inconvenience to Argentine trade and industry. As a result, toward the latter part of 1929 the ratio of gold in the conversion office to paper pesos in circulation still remained around 80%. Argentine paper pesos closed at 37 11-16 for checks, as compared with 37 11-16 on Friday of last week; and at 37 3-16 for cable transfers, against 37¾. Brazilian milreis finished at 11 3-16 for bankers' sight and at 11¼ for cable transfers, against 10 15-16 and 11. Chilean exchange closed at 12 9-16 for checks and at 12⅛ for cable transfers, against 12 1-16 and 12⅛; Peru at 4.00 for checks and at 40.01 for cable transfers, against 4.00 and 4.01.

The Far Eastern exchanges are essentially unchanged from the past several weeks. Chinese quotations are ruling low and fluctuating almost strictly with the low prices current for silver which the present week tumbled further to another new low in all time. Japanese yen are steady and practically pegged as the result of the credits established in London and New York. Recent dispatches from Tokio say that a part of Japan's campaign for rationalizing industry must include an attempt to contract note issue within the empire and thereby reduce prices, according to the governor of the Bank of Japan. Closing quotations for yen checks yesterday were 49.15@49 7-16, against 49⅛@49 7-16. Hongkong closed at 38⅛@39 9-16, against 38⅝@38 11-16; Shanghai at 48@48¼, against 48¾@49⅛;Manila at 49⅞, against 49½; Singapore at 56⅛@56⅝, against 56 3-16@56⅝; Bombay at 36 5-16, against 36⅜; and Calcutta at 36 5-16, against 36⅜.

Pursuant to the requirements of Section 522 of the Tariff Act of 1922, the Federal Reserve Bank is now certifying daily to the Secretary of the Treasury the buying rate for cable transfers in the different countries of the world. We give below a record for the week just past:

Owing to a marked disinclination on the part of two or three leading institutions among the New York Clearing House banks to keep up compiling the figures for us, we find ourselves obliged to discontinue the publication of the table we have been giving for so many years showing the shipments and receipts of currency to and from the interior.

As the Sub-Treasury was taken over by the Federal Reserve Bank on Dec. 6 1920, it is also no longer possible to show the effect of Government operations in the Clearing House institutions. The Federal Reserve Bank of New York was creditor at the Clearing House each day as follows:

DAILY CREDIT BALANCES OF NEW YORK FEDERAL RESERVE BANK AT CLEARING HOUSE.

Saturday, Feb. 15.	Monday, Feb. 17.	Tuesday, Feb. 18.	Wednesday Feb. 19.	Thursday, Feb. 20.	Friday, Feb. 21.	Aggregate for Week.
$	$	$	$	$	$	$
157,000,000	145,000,000	169,000,000	133,000,000	128,000,000	167,000,000	Cr. 874,000,000

Note.—The foregoing heavy credits reflect the huge mass of checks which come to the New York Reserve Bank from all parts of the country in the operation of the Federal Reserve System's par collection scheme. These large credit balances, however, reflect only a part of the Reserve Bank's operations with the Clearing House institutions, as only the items payable in New York City are represented in the daily balances. The large volume of checks on institutions located outside of New York are not accounted for in arriving at these balances, as such checks do not pass through the Clearing House but are deposited with the Federal Reserve Bank for collection for the account of the local Clearing House banks.

The following table indicates the amount of bullion in the principal European banks:

Banks of—	February 20 1930.			February 21 1929.		
	Gold.	Silver.	Total.	Gold.	Silver.	Total.

The London Conference and the Change of Government in France.

The unexpected fall of the Tardieu Government on Monday, and the decision on Wednesday to adjourn the Naval Conference for one week, call a halt in the work of a conference whose progress has already been slow, and delay still further the agreement which everybody hopes may still be reached. Fortunately, the overthrow of the Tardieu Ministry was not due to dissatisfaction with the policy of M. Tardieu at London; on the contrary, there has been every reason to believe that his course has had the general approval of public opinion in France without regard to party. A finance bill, carrying with it the reduction of some taxes and the retention of others, has been under fire in the Chamber of Deputies ever since it was introduced, the strict economy upon which the Finance Minister, M. Cheron, stoutly insisted having offered a number of points of attack. The defeat of the Government on a minor item of the bill was one of those "flukes" of which French politics afford a good many illustrations, the Government itself being caught unawares and the adverse majority being, apparently, as much a surprise to the Opposition as it was to the Government supporters.

The action of the Government in promptly resigning, while it was strictly in line with political precedent, constituted in fact a bold challenge to the Opposition to take over the control of affairs and make good the criticisms in which it has continually indulged. It will be recalled that the accession of M. Tardieu to power was preceded by an interregnum of several weeks in which a number of Opposition leaders, representing particularly the two powerful groups of Socialists and Radical Socialists, were invited to form Ministries but failed to obtain the necessary support. M. Tardieu, whose Ministry was received with unexpected favor and addressed itself to its task with notable energy, is thought to have erred in thinking that his support was stronger than it really was, and his prolonged absences from Paris, first at The Hague during the reparations conference, and immediately thereafter at London, doubtless contributed to give his opponents the opportunity of obstruction of which they made unexpected use. Failing M. Poincare, whose return to power would have been generally acclaimed, but whose health forbade him to assume the labors of the premiership. M. Tardieu carried the war into the enemy's camp by suggesting to President Doumergue that the Opposition should be given a chance to try its hand. The result was the reported formation on Friday of a Ministry representing a coalition of the Left parties, with Camille Chautemps as Premier and M. Briand as Foreign Minister. Paris dispatches, however, expressed serious doubt whether the new Ministry would last long, and forecast the probable return of M. Tardieu with a reconstructed Cabinet.

Aside from the unavoidable delay, there is no reason to expect that the change of Government will make any important difference in the French demands at London or weaken the influence of France in the Conference. The French demands, embodied in the statement issued on Feb. 11 asking for a fleet of 724,479 English tons by the end of 1936, with 240,000 tons of the amount to be built during that period, contained nothing new. The general nature of the French demands was known weeks before the Conference met, and the statement of Feb. 11 was only a concrete presentation of what all along had been expected. There is very little reason to think that any French Government, whether radical or conservative, will modify claims which embody what France has long since decided is necessary for its defense. There is less reason for so thinking because the French tonnage figures, large as they are, represent also a determination on the part of France to recover the relative position in naval strength of which it has always felt that the Washington Conference deprived it. It has been galling to French national pride to realize that, as a result of the Washington agreement, France ranks as a naval Power below Japan, and the great personal popularity of M. Briand has not won him forgiveness for his lack of diplomatic skill at the Washington parley.

Nevertheless, at two points in particular the French position in the Conference is disturbing. It has been increasingly evident, as the Conference has proceeded, that whatever other agreements were eventually concluded, it was unlikely that there would be any actual reduction of present naval tonnage. Doubt began when it was realized, as it appears not to have been realized at the beginning, that the much talked of cruiser parity between Great Britain and the United States, at whatever figure it was fixed, would still call for extensive cruiser building by the United States if theoretical parity was to become actual. The doubt was strengthened by the demand of Italy for a tonnage equal to that of any other Continental Power, by the practical conclusion that neither the battleship nor the submarine would be abolished, and by the discovery that the United States had included in its program a new battleship equal in tonnage and cost to the British "Rodney" and "Nelson" type. The doubt became virtually a certainty when France, in its statement of Feb. 11, reiterated the demands which it had outlined in its earlier reply to the invitation to the Conference. The utmost, apparently, that is now to be expected of the Conference is that it may agree to some limitation of armaments, for a period say of five years, at the end of which time another Conference may be convened to attack the question of reduction. Unless the whole atmosphere of the Conference undergoes some radical change, we shall have, when the sessions are over, the prospect of larger naval armaments than there are now, with only the check of some agreed limitation to prevent additional construction from going too far.

As far as reduction is concerned, then, the present outlook is not favorable for the well-meant plans of Mr. Hoover and Mr. Ramsay MacDonald. The second point in the French program is at least equally serious. In presenting the French demands to the Conference, M. Tardieu has made it plain that the tonnage figures can be lowered only if France receives from the Powers some further assurance of security. It might with propriety be asked what more security France can wish than it now enjoys. It has the discriminatory provisions of the Treaty of Versailles, the League of Nations, the World Court, the treaties of alliance with Poland, Rumania and Czechoslovakia, and the Paris peace pact. It is constructing an elaborate line of fortifications along its entire eastern and northeastern frontier at an estimated cost, over five years, of 2,000,000,000

Federal Reserve Bank of St. Louis

francs, and it has the largest and best equipped army in the world. If ever a country could be regarded as secure, France would seem to be that country.

Recent dispatches from London, however, have outlined two possibilities, against both of which the United States in particular may well be on its guard. One is the suggestion of a kind of Mediterranean Locarno, a naval undertaking of non-aggression and mutual guaranty in that region; the other, described as an implementation of the Paris Pact, involves an agreement among the Powers to consult together in the event of a threatened war regarding the course to be taken to avoid hostilities. To each or both of these agreements it is covertly hoped that the United States may in some way be induced to become a party. In other words, the United States is to embrace a proposition for becoming involved in some near or remote way in European politics as the only alternative to an agreement under which France will be at liberty to increase its naval tonnage by 240,000 tons in the next five years, and with Italy also free to build as large a proportion of that amount as it may see fit.

There are disquieting rumors that some members or attaches of the American delegation, alarmed at the prospect of having to abandon hope of securing naval reduction, are inclined to favor some form of American participation as a means of holding France and Italy in check. London dispatches on Thursday were especially disturbing on this point. We are glad to see that Senator Robinson, however, speaking for the delegation at a luncheon given by the American correspondents on Wednesday, repudiated with some emphasis the suggestion. "My understanding is," he said, "that the people of the United States quite generally adhere to the traditional policy of our Government to avoid, if possible, involvement in European politics. They would repudiate emphatically any treaty expressly or impliedly obligating our Government to employ the army or the navy for the enforcement of obligations assumed by other nations. It is for this reason that they do not encourage their delegates to this Conference to join in guaranties of security respecting areas remote from territory or possessions of the United States."

Senator Robinson spoke only of guaranties affecting foreign territory. His disclaimer is equally applicable, however, to any agreement having for its object the enforcement of the Paris Pact. It requires little imagination to see that an agreement of that kind would be used by European Powers to drag the United States into controversies or threatened controversies in which it had no concern, each Power that thought it had the better case bidding for American support. It should be pointed out, moreover, that American participation in a security agreement for France, or, for that matter, the conclusion of such an agreement with the United States left out, would not necessarily lower very greatly the demands of France. The correspondent of the New York "Times" suggests that France might be expected to modify its tonnage demands by 20% of M. Tardieu's figure. Twenty per cent of 240,000 tons, the amount which France asks to build in the next five years, is 48,000 tons, but even with this reduction the figure would still contemplate 192,000 tons of new construction. Any conceivable reduction greater than 20% that France may be disposed to accept would still leave a figure for new construction so large as entirely to defeat one of the two main purposes of the London Conference unless, indeed, the 20% is meant to apply to the aggregate tonnage instead of merely to the proposed increase.

It is earnestly to be hoped that the American delegation, faced with a suggestion of an indeterminate something called security which the Powers are asked to guarantee by some kind of an agreement, will adhere staunchly to the American policy of non-interference in European affairs, and will not allow the Paris peace pact to be used as an instrument for dislodging the United States from its practical and sensible position as an independent Power. Beyond that, it is to be hoped that the Conference, when it resumes its sessions, may be able to effect some substantial limitation of the armament burden, even if nothing fairly to be called reduction can be achieved.

Rotation In Office.

After the civil war, and when the Republican party had long enjoyed uninterrupted success at the national elections, there arose a political theory known as "rotation in office." It was advanced by the Democratic party, which, in a way, practiced what it preached, since it frowned upon more than two terms to the same man in any elective office. The main thought in the national politics of the principle or policy a this time was to rotate the Republicans out of Federal offices and rotate the Democrats in. After a time this plea had its effect. Locally, there were not offices enough to go around—why not give them a wider distribution, since to so many they were evidently desirable?

How much effect this had on the popular vote it would be hard to determine, but it always tended to crystallize "the opposition" and thus cement the party. Whether it ultimately influenced the concrete doctrine that a President, by "unwritten law" should have two terms and no more, no one can say. But that became a popular belief which commanded both the parties and which even entered into their convention deliberations and remains a force to this day.

The nomination of Charles Evans Hughes to be Presiding Justice of the Supreme Court, immediately, almost, on the retirement of Chief Justice Taft, recently occasioned some sharp criticism on the floor of the Senate when the nomination, approved by the appropriate committee, and finally confirmed by the Senate, came before that body for consideration. Briefly, it was held by some of the objectors that Mr. Hughes, both in his former decisions when a member and in his recent practice before that body, evinced a strong belief in the "rights of property" as against the "rights of man"—that feeling thus he must have incorporated into his mentality, his being, views and attitudes which these objectors held must control him in future decisions on kindred or similar cases to come before the Court. No bias was charged; no lack of pure and disinterested integrity; no failure in ability and highmindedness and fairness. On the contrary, Mr. Hughes was pronounced a leading, high-minded American.

The question of a possible difference between an advocate and a judge was raised during the debate, but was adroitly turned aside by Senator Borah, then speaking as an objector, by asking whether it was possible to conceive of so great an attorney, advocating, before a Court of which he had been a mem-

Federal Reserve Bank of St. Louis

ber, on great and grave Constitutional questions, views, affecting the people for years and years to come, that he did not personally entertain. We pass by the cases cited in the debate, save mention of one in which Mr. Hughes, as former Judge, allegedly wrote the opinion, in which it was charged the rights of States in fixing rates in intra-State commerce were wholly annulled. It is sufficient, then, to point out the gravity attaching to the nomination of a Chief Justice of this august tribunal. And from this point we may proceed to discuss some of the other issues inevitably involved. And first, we may consider the distribution of these offices in the interest of a blending of opinion.

Four-to-five decisions are often rendered. But, as we understand the procedure of the Court, always in advance the Court sits, in banc, in strict privacy, and informally, on the briefs presented, discusses the case, before allotting it to one member to put in shape for an opinion. On this presentation there is a vote in which there may be affirmation or dissent, the majority being the final opinion of the Court. Would it not appear from this that a wide selection from the most eminent jurists and lawyers of the country is incumbent on the President in making his nominations? So that should a nominee have evinced a leaning toward the "rights of man" (we use these terms in a broad sense to present two contrasting Constitutional attitudes) or, on the other hand, a leaning toward the "rights of property," would his fitness not thereby become questionable, since great questions involving these two attitudes, fraught with vast importance, now impend upon us?

It may be answered that no great jurist or lawyer fit to sit in this Court has not opinions one way or the other, and that minute investigation of their records would be impossible and in the end defeat its own efficacy. But this much is true, that rotation, or as we here use it, wide distribution, will tend to lessen the possibility of "packing" or "stacking" the Court whether unintentionally or otherwise. Here is a case where both the President and his nominee are above suspicion. But it happens that the nominee has made an impression on the country (and the Senate) by his pronounced views. This unusual condition of sharp objection occurs thereby. Now, if some Federal Judge of a lower Court of less pronounced decisions, or some lawyer of wide and eminent practice, had been selected this condition would have been avoided.

Mr. Hughes has had a distinguished career. Whether we regard a seat in the International Court as the highest honor that can come to a lawyer, or not, he has had that. He has had the preferment of a candidacy for President, which he left the Supreme Court to accept. He has held the highest Cabinet position. He has been Governor of our greatest State. In many other respects he also possesses unusual qualifications for the Chief Justiceship, so his selection was natural and fitting, when once it became known that he could be prevailed upon to accept. Our thought is simply that, barring exceptional instances like this one, it might be well in making future selections to bear in mind the claims of lower Court judges. In a word, a broad stand upon the fundamentals of Constitutional government by lower Federal Judges or well-known attorneys of country-wide reputation can be ascertained and out of these ranks vacancies might be filled.

The Country's Foreign Trade in 1929.

Much the same progress was made in the development of our foreign trade during the year just closed, as in most of the other years back to 1922. Both exports and imports of merchandise have shown more or less increase during the greater part of this period. Some little irregularity occurred in the value of imports for two or three of these years, but the general trend has been upward. Merchandise exports in 1929 were the highest since 1920, and the same is true of the imports, with the single exception of the year 1926, when the total was slightly higher than last year.

Merchandise exports last year amounted to $5,241,262,276, and imports to $4,400,126,019. For the preceding year the value of exports was $5,128,356,434 and of imports $4,091,444,394. The increase in exports in 1929 over 1928 was $112,905,842, while the increase in imports amounted to $308,681,625. Reference to the following table will show that the movement in merchandise exports each year since 1922 has been almost constantly upward. On the other hand imports, while at a much higher value now than in either 1921 or 1922, suffered some reversal in the two years following 1926. The larger gain in imports in 1929 as compared with the preceding year reflects in part the setback that occurred in 1928. For much the same reason the balance of trade for last year, while heavy, was considerably below the amount for 1928. Last year exports were in excess of imports by $841,136,257 while for the preceding year the excess of exports was $1,036,912,040. For the whole period covering the years back to 1900 there has been constantly a balance on the export side. In the following table the value of merchandise exports and of imports is given for many years:

U. S. MERCHANDISE EXPORTS AND IMPORTS (CALENDAR YEARS).

Cal. Year.	Exports.	Imports.	Excess.	Total Trade.
	$	$	$	$
1902	1,360,685,933	969,316,870	Exp. 391,369,063	2,330,002,903
1903	1,484,753,083	995,494,327	Exp. 489,258,756	480,247,410

A casual examination of the above record discloses the fact that the years covering the war period, 1915 to 1920, served as a dividing line in our foreign trade from what it formerly was under the old conditions. Exports during the war, largely of war materials, were in enormous volume, and continued so for two or three years thereafter. On the other hand imports during the war period, as was to be expected, were in comparatively moderate amount, although showing some increase, especially at the end of the war.

In some measure, a much higher range of commodity prices during the war and for a year or two following the close of that world catastrophe, increased values in all departments of commerce.

Federal Reserve Bank of St. Louis

This condition is reflected in the foreign trade figures covering that period, both in exports and imports. In 1920 and '21 commodity prices broke sharply, and for a year or two were at a lower range. Some recovery followed but at no time have values returned to the high level prevailing in 1919 and 1920. To some extent the increased or decreased value of our foreign trade during the intervening period, reflects the higher or lower range of prices. For the past two years, however, this variation has been very slight, though it is necessary to make an exception as to cotton in exports and coffee, sugar and rubber in imports.

The increase in exports last year over the preceding year was practically all of it in the first nine months of 1929. Exports in April were reduced as compared with that month in 1928; also, in October, while in November and December there was a marked falling off in exports in comparison with the preceding year. Raw cotton contributed materially to the reduced value of exports for the entire year but especially for the two closing months of 1929. The decline in the value of cotton exports for November and December from those months in 1928 was no less than $69,770,000, while for exports other than cotton, there was also a decrease of $82,080,000. For the full year of 1929 cotton exports were $149,179,000 smaller in value than in 1928, the reduction being equivalent to 16.2%. As to quantity, cotton exports last year were 7,580,400 bales, a decrease of 1,152,500 bales from 1928, or 13.2%. The relatively heavier loss in the value of cotton in 1929, reflects the lower range of cotton export prices in that year. On the other hand, exports other than cotton last year exceeded in value those of 1928 by $262,085,000, the increase being 6.2%. Undoubtedly much of the decline in exports in the closing months of 1929 (imports also were reduced materially) was due to the stock market collapse in October-November. A further reduction also appears in our foreign trade for the opening months of 1930, reflecting much the same conditions.

In the following table the changes from year to year in a number of leading staple articles of export, such as machinery, ores, textiles, petroleum, chemicals, cotton, breadstuffs and provisions, are shown; also the relation that each of these articles bears to the total movement from this country to foreign ports. The compilation covers four years.

Exports (000 Omitted)	1929. $	Ratio to Total	1928. $	Ratio to Total	1927. $	Ratio to Total	1926. $	Ratio to Total

* Omitting raw cotton.

A review of the above record of exports will show the important changes that have taken place in the last few years, in our shipments abroad. Cotton has surrendered first place in export shipments to machinery lines. In the latter are included motor cars and trucks, agricultural machinery and all other classes. In the four years under review in the above table the value of exports of machinery shows an increase of nearly 60%. The metal division, including ores, iron and steel, copper, etc., also holds a high place, and the amount has increased each year. Exports of petroleum and other oils, gasoline, etc., are for a larger amount each year since 1926, while for chemicals the value has shown a progressive gain. Exports of provisions have barely held their own for the past three years, but are considerably reduced in value as compared with shipments formerly made.

Machinery lines lead all others by a wide margin. Shipments abroad of automobiles last year were in excess of any preceding year, the value being $539,201,000 against $500,176,000 in 1928. In the past eight years exports of automobiles have doubled. Next to motor cars in the machinery class, is industrial machinery, exports last year having a value of $277,754,000 against $224,804,000 in 1928. This is followed by agricultural machinery, for which exports were valued at $140,800,000 as compared with $116,651,000 in the preceding year. In electrical lines, foreign shipments for the year just closed amounted to $121,365,000 against $90,780,000 in 1928. These four classes of machinery constitute nearly 90% of all exports in this particular division.

In ores and other manufactures of metals, there was also a substantial gain last year, and the value of exports for 1929 was considerably in excess of earlier years. Exports of structural steel products were larger last year than in the preceding year; also of iron and steel plates and sheets, and a small gain appears in tin plate. Exports of copper were larger last year than in 1928, but a decrease is shown in lead, zinc and brass and bronze metal. In the chemicals division there has been a somewhat larger movement each year for a number of years past and exports last year were considerably higher than for 1928. In petroleum products, exports were greater than in either 1928 or 1927, although the increase over 1926 was very small. Shipments abroad of crude petroleum and of gasoline were substantially higher last year than in 1928 and the same is true of lubricating oils, but for illuminating and fuel oils quite a decrease appears.

It is in cotton and grains that the most unsatisfactory showing is made. Cotton exports vary considerably from year to year as may be expected. For the year just closed they were only 14.7% of total exports, the lowest ratio for many years. In 1928 the ratio was 17.9% and in 1928 it was 21.6%. In breadstuffs, largely of wheat and wheat flour, the movement last year was very much reduced as compared with each of the three preceding years. Breadstuffs have ceased to hold as important a place in our export trade as formerly. Wheat shipments are much the largest item in this division and there was a marked reduction last year in the exports of that commodity, not only in the value but in quantity as well. Exports of barley, oats and rye were also considerably reduced last year, but corn shipments continued to gain for the year just closed. Exports of wheat flour were somewhat larger last year than in either of the two preceding years.

In considering imports of merchandise, there are four products which hold a very important place in our purchases abroad and which should first be disposed of. These are coffee, sugar, silk and rubber, the aggregate value of the four constituting from one-quarter to one-third of our total imports. Last year the value equalled about 27% of all imports, against 25% in 1928. In quantity, receipts last year for three of these four commodities were con-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

siderably larger than in 1928, these three being sugar, silk and crude rubber, while the fourth, coffee, showed only a small increase. In value, a loss appears in last year's return for coffee and rubber. This reflects a lower range of import prices in 1929 for these products, the decline in rubber being quite marked. Import prices for sugar were also considerably lower in 1929 than in 1928 and in the face of this there was a large increase in importations last year. The value of sugar imports in 1929, however, was only slightly higher than in the previous year. As to raw silk, both quantity and value were very much higher last year than in 1928.

In the following table the value of imports of a number of the leading lines in our foreign trade is shown for a period of years. Altogether these separate classes constitute more than 80% of all our merchandise imports. In addition to the value shown, the ratio that such amount bears to the total of all imports is given:

Imports (000 *Omitted*)	1929. $	*Ratio to Total*	1928. $	*Ratio to Total*	1927. $	*Ratio to Total*	1926. $	*Ratio to Total*
Coffee	302,397	6.9	309,648	7.6	264,275	6.2	322,746	7.3

Total all	4,400,126	100.0	4,091,444	100.0	4,184,742	100.0	4,430,888	100.0

* Animal products and vegetable. x Largely hides and furs.

A further consideration of the above record of imports will show that there was a small gain last year in our purchases abroad in other textiles, such as wool and wool manufactures and cottons, but a falling off in jute and rayon manufactures. Hides were reduced but leathers and furs show an increase. A somewhat larger movement appears for wood, paper base stock and paper. The same is true as to minerals and ores, and the increase in this division is quite large; likewise, for non-metallic minerals, the latter comprising very largely petroleum products. Of the ten leading classifications into which the above import statement is separated only two show a reduction in value for the year just closed, coffee and rubber, but for both of these products the actual receipts last year were in excess of those of the preceding year, this being especially true as to rubber, where the gain was very heavy.

Separated by geographical sections exports last year to Europe fell off to quite an amount, owing chiefly to a considerable reduction in shipments to Germany, to Italy and to the Netherlands. The value of our export trade with Great Britain last year was practically the same as in 1928. There was quite an increase in exports to France, to Russia, and to some of the smaller European countries. Canada continues to hold a high place in our export trade, and shipments to Mexico again showed an increase last year. The most important gain, however, was to South America, including Brazil, Chile, Peru and Venezuela. Exports to China and Japan were lower last year than in 1928, but to South Africa and to Egypt there was a gain.

As to imports the movement was larger from all of the six grand divisions into which the report is separated. Our imports from Europe were larger, mainly because of the heavier shipments from Germany, France, Italy, and most of the other continental countries. From Great Britain, however, there was a decrease. Canada shows a good gain, but from Mexico and Central America a reduction appears. Cuba reports a slight increase, reflecting sugar shipments, but Brazil a decrease owing to the lower price of coffee. Imports from other South American countries were heavier. From the far East there was quite a gain, that for Japan reflecting the larger importations of silk. Imports from Australia were slightly larger last year; also, from South Africa, while from Egypt the increase was marked.

There was another shift last year in the gold movement, imports again exceeding exports. Gold imports for the year just closed amounted to $291,649,000, while exports were $116,583,000, the excess of imports being $175,066,000. For the preceding year gold imports were $168,887,000 and exports $560,760,000, the latter being in excess of imports by $391,873,000. In the past ten years, exports have exceeded imports in only two years, 1928 and 1925, the net movement of gold to this country having been very heavy. Both exports and imports of silver last year were slightly reduced as compared with the preceding year, but net exports of silver for 1929 of $19,467,000, were practically the same as in 1928 when the amount was $19,265,000. In the following table the gold and silver movement is shown for a long series of years, with the net amount for each:

Year ending Dec. 31.	*GOLD.*			*SILVER.*		
	Exports.	*Imports.*	*Excess of Exports (+) or Imports (—).*	*Exports.*	*Imports.*	*Excess of Exports (+) or Imports (—).*

1929	116,583,000	291,649,000	—175,066,000	83,407,000	63,940,000	+19,467,000

The net movement of our trade abroad covering merchandise and the precious metals, continues heavily on the export side as it has for many years. The balance for 1929 was quite as favorable as it was in 1927 and 1925, and much more so than in 1926. In 1928 the amount was exceptionally high, hence the large reduction which appears in the year just closed. Merchandise exports in 1928 were well up with those of last year, but merchandise imports were lower than in any year back to 1924, so that the trade balance on merchandise account in 1928 was exceptionally heavy. Furthermore, there was a very large net gold movement to this country, which contributed heavily to the final balance. In the following table we indicate the balance under each of the different heads, as well as the final balance, for each of the last five years:

TRADE BALANCES FOR CALENDAR YEARS FOR MERCHANDISE. GOLD AND SILVER COMBINED.

Excess of—	1929.	1928.	1927.	1926.	1925.
	$	$	$	$	$

Gross and Net Earnings of United States Railroads for the Month of December

Earnings of United States railroads for December 1929 make a very unfavorable comparison with the corresponding month of the previous year. The falling off in the gross revenues reflects the slump in trade and industry which followed as the immediate result of the crash on the Stock Exchange in October-November. The shrinkage in the net earnings, far exceeding both in amount and in ratio the loss in the gross revenues, follows as a result of the same cause, namely, the reaction in trade and the slackening of industrial activity, but was evidently accentuated by a desire on the part of railroad managers to heed and comply with the injunction of President Hoover to refrain as far as possible from the taking of steps calculated to lead to large scale unemployment; as a consequence, expenses were not curtailed in proportion to the falling off in traffic and in gross revenue. As a matter of fact, expenses were not curtailed at all, speaking of the roads collectively, but actually proved heavier than in the same month of the previous year in face of the great shrinkage in revenues. Obviously, a situation must be characterized as anomalous where the whole loss in gross revenues, and more, too, counts as a loss in net. Stated in brief, our compilations show a decrease in gross earnings of $26,767,999, or 5.62%, attended by an augmentation in expenses of $4,418,072, thereby producing a loss in net in the large sum of $32,186,071, or 23.12%. In tabular form, the grand totals for the two years are as follows:

Month of December—	1929.	1928.	*Inc. (+) or Dec. (—).*	
Miles of road (179 roads)	241,864	240,773	+1,091	0.45%
Gross earnings	$468,182,822	$495,950,821	—$27,767,999	5.62%
Operating expenses	361,867,655	357,449,583	+4,418,072	1.23%
Ratio of expenses to earnings	77.29%	72.06%	+5.23%	------
Net earnings	$106,315,167	$138,501,238	—$32,186,071	23.12%

Evidences of the slump in trade during the month are to be found on every side. The automobile trade suffered perhaps most of all, if the number of cars turned out may be taken as a guide. It is, of course, seasonal for automobile production to proceed on a lessened scale during December, but on this occasion there was not only a large falling off, as compared with the earlier months of the year, but also as compared with the same month in the previous year. The truth is, production in December 1929 proved little more than half that of December 1928, the number of motor vehicles turned out having been only 119,950, as against 234,116 in December 1928. The steel trade, so largely dependent upon orders from the automobile industry, showed contraction hardly less striking, steel ingot production being estimated by the American Iron & Steel Association at 2,896,269 tons for December 1929 as against 4,018,208 tons in the same month of the previous year. The make of pigiron did not shrink to quite the same extent, and yet only 2,836,916 tons were produced in December 1929 as against 3,369,846 tons in December 1928. Building activity has for a long time been on a diminished scale, and, according to the statistics compiled by the F. W. Dodge Corp., the contracts awarded in December 1929 covered an outlay of $316,368,100 as against $432,756,300 in December 1928. To cap the climax, the Western grain movement also fell considerably below that of the previous year, as shown more at length in a separate paragraph further along in this article. Fortunately for the roads, the coal traffic, which is an important item of freight with nearly all the roads, was well maintained, and the output of bituminous coal in the United States during December aggregated 46,200,000 tons against 44,083,000 tons the previous year, while the production of Pennsylvania anthracite was 7,658,000 tons against 6,114,000 tons. The weekly figures of carloadings reported by the American Railway Association furnish a sort of composite picture of the general trade situation, and from these it appears that only 3,340,993 cars of revenue freight were moved during four weeks of December 1929, as against 3,517,035 carloads in the corresponding four weeks of the previous year.

The losses in earnings, as far as the separate roads are concerned, extend to all sections of the country and embrace all classes of roads, though a few exceptions to the rule are to be found. The Pennsylvania RR. naturally heads the list of decreases, showing a falling off of $3,327,980 in gross; in the net the decrease reaches $2,540,237. The New York Central reports a shrinkage of $917,961 in gross and of no less than $4,708,384 in net earnings; in this case it is explained that the expenses in December of the previous year contained a special credit item of $2,800,000 in connection with a readjustment of pension reserves. But even with this item completely eliminated, a decrease in net of $1,908,384 would still appear. The Baltimore & Ohio shows $1,690,013 loss in gross and $1,994,670 loss in net. The Erie has suffered a decrease of $1,025,949 in gross and of $788,452 innet. The Wabash falls behind $858,955 in gross and $976,598 in net.

In the Northwest the exhibits are of like character. The Milwaukee & St. Paul suffers a shrinkage of $932,559 in gross and of $1,110,954 in net. The Northern Pacific reports $859,790 decrease in gross and $1,080,311 in net. The "Soo" road shows $336,319 loss in gross and $311,590 in net. The Great Northern is an exception to the rule because of a special credit to expenses in amount of $1,686,282, and with $1,415,863 shrinkage in gross shows an expansion in net earnings of $993,138. The Southern Pacific loses $784,062 in gross and $424,778 in net; the Missouri Pacific $740,860 in gross and $488,587 in net; the Union Pacific $1,182,680 in gross and $953,344 in net; the Burlington & Quincy $701,609 in gross and $189,485 in net; the St. Louis-San Francisco $497,922 in gross and $613,544 in net; the Atchison $1,552,573 in gross and $2,980,507 in net.

The Rock Island is an exception to the rule, having added $344,846 to gross and $56,551 to net; while the Missouri-Kansas-Texas, though showing $613,354 loss in gross, has to its credit a gain of $234,884 in net.

The Norfolk & Western, presumably by reason of a larger coal traffic, has added $246,398 to gross and $279,956 to net, but the Chesapeake & Ohio, while having added $422,039 to gross, reports a loss of no less than $918,046 in net. The Virginian Ry. shows a gain of $187,633 in gross and of $60,500 in net. In the South the Southern Ry. shows $975,374 diminution in gross and $1,103,417 in net; the Mobile & Ohio $267,807 in gross and $172,699 in net, and the Atlantic Coast Line $451,701 decrease in gross and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

$464,402 in net. The Louisville & Nashville, on the other hand, is one of the exceptions to the rule, and though having lost $441,344 in gross, has converted this into a gain of $227,836 in net. The Florida East Coast reports $94,732 increase in gross with $78,957 decrease in net, and the Seaboard Air Line, while having lost $354,595 in gross, exhibits $27,905 gain in net. In the following we show all changes for the separate roads for amounts in excess of $100,000, whether increases or decreases, and in both gross and net:

PRINCIPAL CHANGES IN GROSS EARNINGS FOR THE MONTH OF DECEMBER, 1929.

	Increase.		Decrease.
C C C & St Louis	$651,898	Atlantic Coast Line	$451,701

Detroit Toledo & Ironton	568,652		
Texas & Pacific	544,041	Total (61 roads)	$34,607,984

a These figures merely cover the operations of the New York Central itself. Including the various auxiliary and controlled roads, like the Michigan Central, the "Big Four," &c., the result is a decrease of $6,582,091.

When the roads are arranged in groups or geographical divisions according to their location, we find what would be expected from the observations above, that each of the three leading districts into which the country is divided, namely, the Eastern District, the Southern District, and the Western District, shows decreases in gross and net alike, and the same is true of all the different regions in each of the districts with the single exception that the Pocahontas region shows an increase in gross though not in the net. Our summary by groups is as below. As previously explained, we group the roads to conform with the classification of the Inter-State Commerce Commission. The boundaries of the different groups and regions are indicated in the footnote to the table:

SUMMARY BY DISTRICTS AND REGIONS.

District and Region. Month of December—	Gross Earnings 1929.	1928.	Inc. (+) or Dec. (—). $	%

NOTE.—We have changed our grouping of the roads to conform to the classification of the Inter-State Commerce Commission, and the following indicates the confines of the different groups and regions:

EASTERN DISTRICT.

New England Region.—This region comprises the New England States.

Great Lakes Region.—This region comprises the section on the Canadian boundary between New England and the westerly shore of Lake Michigan to Chicago, and north of a line from Chicago via Pittsburgh to New York.

Central Eastern Region.—This region comprises the section south of the Great Lakes Region, east of a line from Chicago through Peoria to St. Louis and the Mississippi River to the mouth of the Ohio River, and north of the Ohio River to Parkersburg, W. Va., and a line thence to the southwestern corner of Maryland and by the Potomac River to its mouth.

SOUTHERN DISTRICT.

Pocahontas Region.—This region comprises the section north of the southern boundary of Virginia, east of Kentucky and the Ohio River north to Parkersburg, W. Va., and south of a line from Parkersburg to the southwestern corner of Maryland and thence by the Potomac River to its mouth.

Southern Region.—This region comprises the section east of the Mississippi River and south of the Ohio River to a point near Kenova, W. Va., and a line thence following the eastern boundary of Kentucky and the southern boundary of Virginia to the Atlantic.

WESTERN DISTRICT.

Northwestern Region.—This region comprises the section adjoining Canada lying west of the Great Lakes region, north of a line from Chicago to Omaha and thence to Portland and by the Columbia River to the Pacific.

Central Western Region.—This region comprises the section south of the Northwestern region, west of a line from Chicago to Peoria and thence to St. Louis, and north of a line from St. Louis to Kansas City and thence to El Paso and by the Mexican boundary to the Pacific.

Southwestern Region.—This region comprises the section lying between the Mississippi River south of St. Louis and a line from St. Louis to Kansas City and thence to El Paso and by the Rio Grande to the Gulf of Mexico.

Western roads, taking them as a whole, again suffered a big contraction in their grain traffic. Not only was there a falling off in the wheat movement, with the single exception of rye (the movement of which was on a greatly increased scale) all the different cereals contributed to the decrease. The receipts of wheat at the Western primary markets for the five weeks ending Dec. 31 1929 were only 24,779,000 bushels, as against 30,352,000 bushels in the corresponding five weeks of 1928; the receipts of corn only 34,659,000 bushels against 39,944,000; the receipts of oats 8,252,000 bushels against 11,204,000 bushels; of barley 3,899,000 bushels against 5,599,000, but of rye 5,342,000 bushels as compared with 1,603,000 bushels. For the five cereals (wheat, corn, oats, barley, and rye) combined, the receipts for the five weeks in 1929 aggregated only 76,931,000 bushels, as against 88,702,000 bushels in the corresponding period of 1928. The details of the Western grain movement, in our usual form, are set out in the table was now subjoin:

WESTERN FLOUR AND GRAIN RECEIPTS.

5 Weeks Ended Dec. 28.	Flour (bbls.)	Wheat (bush)	Corn (bush.)	Oats (bush.)	Barley (bush.)	Rye (bush.)
Chicago—						
1929	961,000	292,000	10,403,000	1,405,000	437,000	4,058,000

The Western live stock movement also appears to have been on a lower scale than in December 1928. At Chicago the receipts comprised 20,024 carloads in December 1929 against 22,133 carloads in December 1928; at Kansas City, 8,485 carloads against 7,286 carloads, and at Omaha 5,954 cars, against 5,206 cars.

As to the cotton movement in the South, this, too, was on a reduced scale as compared with December 1928. Gross shipments overland in December 1929 aggregated 150,261 bales as against 171,900 bales in December 1928, but comparing with 138,903 bales in December 1927; 229,232 bales in December 1926, and 245,888 bales in December 1925. Receipts of the staple at the Southern outports in December 1929 were 1,107,014 bales as against 1,260,645 bales in December 1928, 695,985 bales in December 1927, 1,606,850 bales in December 1926, 1,313,425 bales in December 1925, and 1,376,675 in December 1924, as will be seen by the following table:

RESULTS FOR EARLIER YEARS.

It seems proper to point out that the falling off in earnings in December 1929 quite generally came after gains in gross and net in December of the previous year, modifying somewhat unfavorable conclusions. The previous year virtually all circumstances and conditions combined to bring about favorable results, and our compilations then showed $27,178,944 gain in gross earnings attended by a reduction in expenses of $21,265,477, thus yielding a gain in net in the large sum of $48,444,421, or over 54%. On the other hand, it must also be borne in mind that these superb gains followed a heavy loss in gross in December 1927 and, in the case of the net, losses in both 1927 and 1926. In December 1927 our compilations recorded $59,294,705 falling off in gross and $28,169,018 in net. In December 1926 the exhibit was a poor one, there having then been only $2,943,972 gain in gross and $15,267,349 loss in net. In the years prior to 1926 likewise the December showing was somewhat disappointing. In December 1925 the exhibit was quite an indifferent one, due to the strike at the anthracite mines, with the complete stoppage of the mining of hard coal involved, this having operated to pull down the earnings of the anthracite carriers, all of which suffered heavy losses in gross and net alike at that time. Stated in brief, our compilations for December 1925 showed no more than $18,591,184 increase in gross, or 3.69%, and $10,354,676 increase in net, or 8.34%, notwithstanding the country was then enjoying great prosperity. In the previous year, too, the improvement was rather moderate, our tables for December 1924 having shown only $11,308,819 gain in gross, or 2.29%, though the net earnings of the roads by reasons of the growing efficiency with which they are being operated, increased $17,998,730, or 16.90%. On the other hand, this followed losses in both gross and net in the year preceding (1923). The contraction in the gross in December 1923 (as compared with 1922) was not large, relatively speaking, being $19,212,804, or 3.75%, but it testified to a slackening in trade, of which much had been heard in the summer and autumn of 1923. This falling off of $19,212,804 in the gross was attended by a reduction in expenses of $16,773,652, leaving nevertheless a small falling off in the net, viz.: $2,439,152. In considering this shrinkage in gross and net, however, in December 1923, the circumstance should not be overlooked that comparison then was with extremely heavy totals in the year preceding (1922)—so much so that some falling off in traffic and revenues was rendered inevitable, as a matter of course, the moment the slackening of trade made its influence felt. In reviewing the results for December of this year (1922), we noted as an interesting fact that as the country got farther away from the disturbing influence of the coal miners' strike of the previous spring and summer and of the railway shopmen's strike of the summer, the returns of earnings were becoming better. The addition to the gross in December 1922 over December 1921 was no less than $87,735,590, or 20.66%, and though this was attended by an augmentation in expenses in amount of $52,530,924, there remained an increase in the net of $35,204,666, or 45.87%.

There was, however, a qualifying consideration to take into account in connection with the big gain made in December 1922. Comparison was with a period of intense business depression in the previous year, our tabulations for December 1921 having shown $120,615,992 falling off in the gross earnings, though accompanied by a curtailment in expenses in the huge sum of $144,215,090, leaving, hence, a gain in net of $23,599,098. As it happened, too, this gain in the net in December 1921 followed a moderate gain in the net in December 1920, making the December statement for 1922 the third consecutive one in which improvement in the net had been recorded.

It is proper to state that the improvement in the net in December 1920 followed entirely from the higher schedules of passenger and freight rates which had then been put into effect a short while before. In December of that year business depression had already begun and a marked falling off in traffic had occurred. But owing to the advance in rates referred to, the falling off in traffic was obscured. Our tabulations for December 1920 showed a gain of $96,073,439 in gross and of $13,804,825 in

the net. Moreover, this small gain in net succeeded a while series of losses in net in the same month of the years immediately preceding. In the following we furnish the December summaries for each year back to 1906. For 1910, 1909 and 1908 we use the Inter-State Commerce totals, but for the preceding years (when the Commission had not yet begun to require monthly earnings) we give the results just as registered by our own tables each year—a portion of the railroad mileage of the country being then always unrepresented in the totals, owing to the refusal of some of the roads at that time to give out monthly figures for publication.

New York Attorney General Ward Backs Bill to License Brokers—Measure Aimed at Swindlers in Securities and Tipster Sheet Publishers Presented.

Drafted and endorsed by Attorney General Ward, a bill was introduced in both Houses of the Legislature at Albany on Feb. 19 for licensing stock brokers and dealers in securities. A dispatch to the New York "Times," from which we quote, went on to say:

Designed to supplement the Martin Anti-stock Fraud Act by providing means for eliminating fraudulent brokers, the measure also is aimed at tipster sheets, against which Federal Attorney Tuttle conducted a drive in New York City last fall. The bill would require that licenses be taken out not only by brokers but by all publications other than a daily newspaper of general scope and character, furnishing information concerning securities or the market price of securities.

"Thousands of persons throughout the State are victims yearly of fraudulent stock operators," Attorney General Ward said. "The Martin Act does not reach the root of the trouble. It prevents the aspect of locking the stable after the horse has been stolen. The bill now presented protects the legitimate security dealers and is aimed at what may be termed the common thief."

The measure was introduced by Senator Hickey and Assemblyman Gimbrone, Republicans, of Erie. The license fee for security dealers in New York City would be $100 a year. Brokers in second-class cities would pay $50 and in smaller cities $25.

In applying for a license every broker would have to supply a bond of $5,000, but not more than $50,000 in bonds would be required from any one firm. No license would be issued to any individual or firm restrained by a final Court decree from selling securities or previously convicted in any State or in any Federal Court of fraud in selling or advertising securities.

The regulations would become effective Jan. 1 next, and five experienced brokers, selected by the Secretary of State and sitting as an advisory committee, would assist the State Department in the administration of

Another provision of the bill would prohibit the splitting of commissions

Another provision of the bill would prohibit the splitting of commissions with non-licensed persons. Violations of the law would be misdemeanors, punishable by a fine of $5,000 or one year's imprisonment or both. The Department of State would publish an annual list of licensed brokers.

The bill does not apply to banks, savings institutions or trust companies, or to security transactions of a purely private character. The measure also exempts the distribution by a corporation of capital stock, bonds or other security to its stockholders as stock dividends or distributions from surplus.

Charge Stock Pool Netted $6,000,000—Officials of New York State Bureau of Securities Say Trio Manipulated Gyrations in Advance-Rumely Shares.

The following is from the New York "Times" of Feb. 8:

For the first time since the Martin Act went into effect in 1920, the State Bureau of Securities took action yesterday against persons accused of operating a pool in stock listed on the New York Stock Exchange. Abner S. Werblin, Leonard J. Rollnick and William L. Jarvis were temporarily enjoined from further dealings in stocks and securities by Supreme Court Justice Lewis L. Fawcett in Brooklyn on motion of Assistant Attorney General Watson Washburn, head of the Bureau. They were alleged to have conducted a pool in stock of the Advance-Rumley Co., manufacturers of farm implements, and with the aid of a Boston financial paper and by other means, to have reaped a profit estimated as high as $6,000,000.

Soon after the injunction was obtained, Mr. Washburn served papers on Werblin and Rollnick, directing them to appear Feb. 19 in the Supreme Court to show cause why they should not be permanently enjoined. Jarvis was out of the city. On Feb. 19 Mr. Washburn will apply also for the appointment of a receiver for the trio and for an order directing the men to turn over their books and records.

Jarvis, who lives in Boston, is reported to have been connected with George Graham Rice, stock promoter and published of tipster sheets, convicted in December of 1928 of using the mails to defraud in the promotion of Idaho Copper Co. stock. Werblin, who lives at 1192 Park Avenue, and whose office is at 57 Wall Street, was a witness at Rice's trial. Rollnick lives at the Hotel Plaza.

After questioning the two New York men yesterday, Mr. Washburn said that he is investigating operations in several other stocks listed on the New York Stock Exchange in which he suspects pools are engineering the movements.

Stock Takes Big Jump.

He pointed out that Advance-Rumley stock went through a spectacular rise last spring, reaching as high as $119 for preferred and $104⅞ for common on May 1, and then dropped with widespread losses to small investors. This, Mr. Washburn said, was due to the operations of the three men. Not only did they control 100,000 or 262,000 shares of Advance-Rumley stock in April, but they had induced the general public to purchase large amounts, he said. They sold most of their individual holdings at an average of $100 a share for common and $90 for preferred, Mr. Washburn declared, having purchased at an average of $60 for preferred and $50 for common.

The Assistant Attorney General, in asking the injunction, said that Rollnick and Jarvis agreed early last year to finance the purchases of Advance-Rumley stock and Werblin agreed to act as pool manager and agent in making purchases and sales. Pursuant to this agreement, Werblin purchased and sold large blocks of this stock through many brokers on the New York Stock Exchange in his own name or in the name of Rollnick, but all for the account of Rollnick and Jarvis.

Large Blocks of Stock Carried.

By April Werblin was carrying on balance with various brokers for Rollnick and Jarvis about 50,000 shares each of preferred and common stock of a total outstanding capital stock of Advance-Rumley of 125,000 shares preferred and 137,000 shares of common, both of $100 par value.

Mr. Washburn then charged that Rollnick and Jarvis controlled the "Financial Debater-Criterion, Inc.," of 185 Devonshire Street, Boston, a tipster sheet which purported to give impartial advice to its subscribers upon the course of stock market prices, in return for a subscription fee of $5 a year.

Mr. Washburn named in his affidavit also Morris Singer, who, he said, consented to a final decree enjoining him from fraudulent practices in the sale of securities last November but who was publishing a financial advisory service last spring that purported to give impartial advice to subscribers in return for 10% of the profits derived from this advice.

Mr. Washburn accused the three men also of paying large sums to various contact men, publicity agents and customers' men throughout the country, in return for which these men advised purchase of Advance-Rumley stock.

After May 1 the price of the stock declined. On May 7 the preferred stock closed at $72.50, and the common at $62.50 on the New York Stock Exchange. Thereafter the shares continued to fall steadily, reaching lows of $15 for preferred and $7 for common in November.

Despite the decline, the "Financial Debater-Criterion," according to Mr. Washburn, advised the purchase of Advance-Rumley stock on May 8, 15 and 22, ascribing the break to bear raids.

Lester R. Bachner, of 27 Adar Street, counsel for Werblin and Rollnick, issued the following statement:

"L. J. Rollnick and A. S. Werblin, when informed of the procuring of the injunction, denied engaging in any fraudulent practices and stated that they would contest vigorously the application for a permanent injunction. They further stated that they conducted legitimate trades in Advance-Rumley stock almost a year ago; denied employing any tipster sheets and were surprised that the Attorney General saw fit to single them out for attack, when their operations were proper and in accordance with the accepted practice in Wall Street. Every trade made by them was in conformity with the rules of the New York Stock Exchange. They further denied that Mr. Jarvis was in any way interested in their operations."

The application for a permanent injunction will be made in Special Term, Part I, of Brooklyn Supreme Court, at 10 A. M. on Feb. 19.

H. B. Cahan of Philadelphia Seeks $1,039,000 from Two Brokerage Houses as a Result of Stock Market Losses.

From Philadelphia, Feb. 19, a dispatch to the New York "Times" said:

As an echo of last fall's stock market slump, Harry B. Cahan began suit in the Federal District Court here to-day for the recovery of $1,039,000 which, he contends, he lost through the failure of his brokers to carry out contracts.

Mr. Cahan filed claims of $707,500 against Henry L. Doherty & Co. and $332,400 against Green, Ellis & Anderson. On Oct. 30, he says, he gave the Doherty firm an order, which he declares was accepted, to buy for him 60,000 shares of Cities Service, 20,000 at $48 and 40,000 at $20, and that the next day he gave to Green, Ellis & Anderson an order to sell 40,000 shares of Cities Service short.

In spite of demands made for several days, Mr. Cahan alleges, the Doherty firm did not make delivery and in the meantime Green, Ellis & Anderson had sold 40,000 shares short for him, and were insisting that he protect them in the transaction. They borrowed money from private sources to protect him, he alleges, cutting his profits to $200 instead of $332,400, which he contends he would have realized had his orders been followed.

RECORD OF PRICES OF WISCONSIN SECURITIES FOR 1929.

There is no Stock Exchange in Milwaukee, but we have obtained from the First Wisconsin Company of Milwaukee the following list of high and low prices for the calendar year 1929 on the stocks and bonds which are traded in more or less actively by Wisconsin bond houses. Some important securities, like the different issues of Milwaukee Electric Railway & Light bonds, are listed on the New York Stock Exchange and appear regularly in our records for the New York market. These, therefore, are omitted from the present list.

RECORD OF PRICES OF NORTHWESTERN SECURITIES DURING 1929.

Lane, Piper & Jaffray of Minneapolis have kindly prepared for us the following list of high and low prices for the calendar year 1929 on securities which are traded in more or less actively in the Twin Cities. The list does not include securities listed on the New York Stock Exchange, such as the Twin City Rapid Transit stocks and the Wisconsin Central stocks. These appear regularly in our records for the New York market.

HIGH AND LOW PRICES OF NORTHWESTERN SECURITIES DURING CALENDAR YEAR 1929.

A Favorable Situation in the Northwest.

By J. L. Seybold, Vice-President of Wells-Dickey Co. of Minneapolis.

Assurance of generally sound business conditions in the Northwest by leading bankers and business men promise well for the future of this Northwest. General trade conditions continue quite favorable. The bank check barometer has recorded some gains and some losses in the last few weeks, compared with the corresponding weeks of a year ago. The policy of the Farm Board and their reactions upon the wheat market are being followed with great interest.

A decided improvement in the banking conditions in the Northwest is revealed in recent business reports, the latest Ninth Federal Reserve District business review disclosing the fact that there had been fewer bank failures in this territory in 1929 than in any year since 1922.

There were 84 suspensions in Minnesota, North Dakota, South Dakota, and Montana in the year, a reduction of 10 from 1928 and of 56 from 1927. A further strengthening of the general business situation was revealed in the report for business failures, which were the smallest in number since 1923 and total 717, a reduction of 213 as compared with 1928 and of 460 from 1927. The number of farm bankruptcies also was the smallest since 1922, with a reduction of 67 from 1928 and of 550 from 1927.

The investment trend in this section turned somewhat as it has in other parts of the country. Those houses who in the past specialized in the handling of well secured bonds, even before the stock market broke, anticipated the day when the investment trend would turn and are now doing a normal business in response to the demand for "security." Those who have always preached the gospel of "lower rate with higher quality" now find justification for re-emphasis of this conservative policy. The country has been in a speculative atmosphere. For several years it has been accumulating and intensifying. It seems sound investment practice to return to the faith of our fathers and get back to real security and view the market price as a secondary consideration.

The chief factor governing market prices is psychology. We are led to believe that on the price of money and other material considerations our future depends. But the question arises whether back of these material factors it is not the mental attitude of those having money to spend or invest which actually determines prosperity—and market price inevitably follows prosperity or depression in this country of unrestricted natural wealth.

If, therefore, the public mind is focused on the stock tape instead of upon work, production, thrift, wise spending, and sound investment, market price ultimately in each such poisoned cycle must end in the drastic readjustment we have recently witnessed. The prices of good bonds and stocks of soundly managed companies will eventually vindicate themselves and be the first choice of intelligent investors. Market price indicates quantity of demand relative to supply. In the months just past demand has been for those companies of the speculative kind rather than for known quality of security.

Resume of Operations on Minneapolis-St. Paul Stock Exchange for 1929.

By N. P. McKinnon, Sec.-Treas. Minneapolis-St. Paul Stock Exchange.

A definite and important place in the business life of the Northwest is being filled by its newest major enterprise—the Minneapolis-St. Paul Stock Exchange, a product of the year 1929. Planned carefully after many years of study, the Exchange is an established project, steadily growing, daily serving its purpose of providing a ready market for securities of the Northwest.

The Exchange was formally opened on Jan. 28 1929 with 1,298 shares trading. Public interest was roused to such a point that the accommodations of the Exchange were taxed to an overflow and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

many late arrivals did not gain admittance to the visitors' gallery.

Its record of accomplishment is already impressive. In the first 10½ months of its existence, the Exchange handled over 710,000 shares of stock and $677,500 par value bonds with a total value of $46,301,781.78. The average daily volume for the first six months was 1,416 shares per day. The last 4½ months averaged better than 5,000 shares per day. The peak volume was reached on Oct. 29, when 18,335 shares traded. At the end of its first year, Jan. 28 1930, it will have a much larger figure which will compare favorably with the year's business of many of the Exchanges in existence much longer. That its growth has been steady is evidenced by the fact that at the opening there were 54 stocks and six bonds in the Listed and Jnlistedl Section, which has grown to 81 stocks and 59 bonds.

At the time of the organization there were 38 memberships sold with 60 authorized. At the present time, the full authorized number has been sold, which indicates the spirit with which the Exchange has been received. While the authorized number of memberships was sold to those who co-operated in making the Exchange possible for $1,000 each, the value rose quickly and in September the first bid for a seat was $2,200. Shortly after, this bid was raised to $5,500, and only two weeks later a membership was transferred at $6,500.

Not only has the Exchange furnished a means for Northwest investors to trade securities readily, but it has served to focus attention on Northwest business. This factor will be regarded as of increasing importance as time goes on, for money from this region will be invested in its business and profits of Northwest corporations will be returned to investors at home.

The volume of business and the steady increase as the existence of the Exchange and its availability become better known, illustrate the need of the Exchange in the Northwest. Knowledge of securities of the Northwest, necessarily limited to a narrow circle before, has become available to the public at large since the formation of the Exchange.

In the recent readjustment of market values, the Minneapolis-St. Paul Stock Exchange proved its ability to render valuable service to the investing public of this section.

If the record of 1929 is any indication of the success of the Minneapolis-St. Paul Stock Exchange, it is reasonable to expect that the coming year and each succeeding year will see an increasing recognition of the services the Exchange has to offer.

Group Banking in the Northwest—Benefits Resulting to Communities, Depositors and Member Banks, as Told by the Group Largest in Number of Affiliates and Extent of Territory Covered.

[By J. E. Neville, Northwest Bancorporation.]

Much will be learned, no doubt, of group banking growth and its operation in the hearing that the House Committee on Banking and Currency shortly will hold in Washington. Throughout 1929, when growth was rapid, attention was drawn principally to centers where group organizations had been formed. There has been an intimate, immediate and increasing interest in the Northwest and Middle West States where many community-prominent or State-prominent banks became members. But group banking in this early part of 1930 has passed from regional or sectional interest into national interest and is part, and a very important part, of what has become a foremost public question.

President Hoover, Mr. Mellon, Mr. Pole, Mr. McFadden and others whose opinions are valued have expressed themselves clearly on the general problem of our banking system. But there has been and still is some lack of clarity in the public mind as between chain banking, the ownership or control of a number of banks by one or more individuals, and group banking. Here is group banking as we define it:

"A banking system whereby a number of corporately independent financial institutions, retaining their own identity, capital, personnel and management, are co-ordinated, through majority stock ownership, by a supervising holding company, operated by the banking interests of the territory which it serves."

Northwest Bancorporation was organized in January 1929. There was in Minneapolis an affiliated group comprising the Northwestern National Bank and the Minnesota Loan & Trust Co. and five other smaller banks, and these were a nucleus. Northwest Bancorporation was capitalized at $75,000,000, which at a later time was changed to an authorized capitalization of $300,000,000. Of this total, $82,000,000 now is outstanding. It is a holding company. It exchanges its stock for the stock of the bank that becomes affiliated on such basis of exchange as may be agreed upon. The affiliated bank remains in every respect a separate entity, carrying on its own business, shaping its own policies, making its own decisions regarding loans and service to customers and all that constitutes the business of the bank. On this basis Northwest Bancorporation began, and coincident with the bringing in of the Minneapolis group, the First National Bank & Trust Co. of Fargo, the oldest and largest bank in that city, and the First National Bank of Mason City became members, followed shortly by the National Bank of La Crosse, Wisc.

Thereafter the growth was rapid. The First and American National, the largest bank at the head of the lakes in Duluth, and the Security National, the largest in South Dakota at Sioux Falls, joined the group, the Duluth bank having affiliation with important mining interests of northern Minnesota. Not long thereafter banks in Montana became members and a notable feature was the joining of the group by several banks prominent in the livestock industry located at South Omaha, Sioux City, and South St. Paul. About this time interest in the operations of Northwest Bancorporation having become widespread, and Mr. E. W. Decker, President, made this statement:

"The financial history of the country over a period of years proves beyond a doubt the necessity for a system of banking that will insure greater financial stability and provide a broader and better service than has been heretofore possible by independent banking units. The prosperity and progress of a community must necessarily depend upon the wealth produced by its basic industries. Unless these industries are provided with adequate banking facilities year in and year out, there are apt to be times when individual communities must suffer from depressions affecting one locality or industry. Here was a definite problem vitally affecting the future development of the Northwest's industry and commerce. Along with other bankers and business men, we of the Northwestern National Bank felt a growing sense of responsibility for the financial welfare of this territory. A study of banking systems and methods in vogue throughout the civilized world brought us to the decision that some form of group banking would be the logical solution at this time. Based upon our knowledge of the Northwest and the temperament of its people, we came to the conclusion that the financial needs of the Northwest could best be served by the union of strong, independent banks continuing under the local management of men whose life-long interests have been in this Northwest territory and who are vitally concerned in the future prosperity of industry and agriculture here. Out of this study of conditions and needs, we began the grouping of important independent banks, and the Northwest Bancorporation came into existence as a corporate entity."

There has developed meanwhile an interesting change in the situation relative to the attitude of many banks in Minneapolis territory. In the initial stages the plan of Northwest Bancorporation was explained to banks with

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the suggestion that from the standpoint of their own position and service to their communities, membership in the group would be desirable. Many of the earlier contacts were made on the basis of an approach by Northwest Bancorporation. At a later time, however, contacts were formed by an approach on the part of banks whose officers and directors had considered the advisability of membership in the group, and this has continued.

In the earlier part of 1929 the contacts made by the Northwest Bancorporation principally were with banks of prominence and large size, relatively speaking. The Midland National Bank & Trust Co. of Minneapolis, and the Metropolitan National Bank of Minneapolis became members later in the year, and in addition to the larger banks that formed the initial group or came in thereafter that have already been referred to, the Iowa-Des Moines National Bank, the largest bank in Iowa, Daly Bank & Trust Co., Anaconda; Great Falls National Bank, Great Falls, and the Union Bank & Trust Co., Helena, Mont., became members; likewise, the First National Bank, Aberdeen, and the National Bank of Huron, S. Dak., while in Omaha, Nebr., the United States National and the Stock Yards National joined, also the Spokane and Eastern Trust Co. of Spokane, Washington. The First National banks of Winona and Albert Lea, and the National Citizens' of Mankato, Minn., also became members. But activities of Northwest Bancorporation were not confined to banks of larger size, and in the group are 23 banks of $25,000 capital or less. Some of these came into the group when the Union Investment Co. of Minneapolis, which had been operating since 1903, became a member, bringing in 31 banks. Until recently, Northwest Bancorporation had no contact in St. Paul, sister city to Minneapolis, but the Empire National Bank of St. Paul now is a member.

In extending its operations, Northwest Bancorporation has not confined itself to the Ninth Federal Reserve District. Six of the smaller Union Investment banks that became members are in the neighboring State, Wisconsin, and one in the Seventh, or Chicago, Reserve District, and in the Seventh District also are the banks at Mason City, Sioux City and Des Moines, Iowa. In Omaha, in the capital city, Lincoln, and again by contacts at Fairbury, Nebr., the Tenth Reserve District was entered, while the joining of the group by the bank at Spokane and later coming in of a smaller bank at Cheney, Washington, carried Northwest Bancorporation into the Twelfth Reserve District.

Minnesota shows by far the largest figures for deposits or combined resources of affiliated banks, not only because there are the greatest number of members in that State, but because of the size of the Minneapolis and St. Paul banks that are in the group. But Northwest Bancorporation has group members in eight States, Minnesota, Wisconsin, Iowa, Nebraska, South Dakota, Montana and Washington. These are the comparisons, the figures being of Dec. 31 1929:

	No. of Banks.	*Capital.*	*Surplus.*	*Undivided Profits.*	*Deposits.*	*Total Resources.*
Minnesota	48	$14,022,000	$7,833,000	$4,442,000	$214,884,012	$259,087,339
So. Dakota	11	1,200,000	865,000	517,032	25,169,380	28,534,328
No. Dakota	9	905,000	474,000	262,294	16,855,756	18,891,010
Montana	8	1,100,000	695,000	394,633	17,933,900	20,415,718
Wisconsin	7	675,000	340,500	304,987	8,169,236	10,102,397
Nebraska	6	2,275,000	1,260,000	644,980	40,854,837	45,835,264
Iowa	4	2,800,000	1,450,000	425,782	47,799,017	56,151,339
Washington	2	1,050,000	265,000	296,542	14,059,299	15,746,541
	95					

The background against which Northwest Bancorporation has been building is an important consideration if one is fully to understand the favorable manner in which it has been received in the Northwest and Middle West. Mr. Pole, in commenting on the adverse happenings of past years in which nearly 5,000 banks disappeared, made use of the expression, "a breakdown of the rural banking system." If this expression was applicable to the situation as a whole, it was particularly applicable in this part of the United States. During the 10 years ending Dec. 31 1929 in the Ninth Federal Reserve District, 1,517 banks were closed, tieing up deposits of $369,000,000; 227 banks were reopened with deposits of $60,000,000; 1,290 banks remained closed with tied up deposits of $309,000,000. Of this $309,000,000 there have been recoveries of from 30% to 50%.

The story of banking troubles in the Northwest has been told and retold. By the permanent closing of these 1,290 banks many communities, and, of course, a great many business men, farmers and other individuals suffered severely. If, on Dec. 31 1919, for example, when there were 3,824 banks in the Ninth District, one had been possessed of $100,000 cash and had opened a deposit account with every bank in the Ninth Reserve District, and had been able to foresee, he would have known that in the 10 years ahead about one account of every three would be tied up in a permanently closed bank and 30% of his principal involved.

Northwest Bancorporation was not organized as a remedial agency. Primarily it represents an effort of bankers themselves to bring about better banking, to measure up to new requirements, to fit more adequately and efficiently into the new industrial, commercial and agricultural picture, to meet the needs of a business world that has undergone vast changes in the past two decades and to bring greater assurance of safety to the depositor and give better service to all. Frankly, it expects also to aid its affiliated institutions in making their operations more profitable. It has been said that if a banker cannot make a profit he is in the poorest business he could possibly be in—a business, the failure of which involves not only his own welfare, but that of many others.

Many illustrations of reconstructive work are available. To take one that is typical—Moorhead, Minn., has 6,000 people and is the county seat of Clay County in the Red River Valley where the river divides Minnesota and North Dakota. The First Moorhead National Bank, one of the oldest in that part of the State, with deposits $2,200,000, closed its doors Dec. 22 1928. Northwest Bancorporation organized a new bank, which opened Mar. 25 1929, giving immediate facilities, and on May 2 1929, in accordance with agreement in the organization plan, the new bank paid one million dollars to depositors of the closed bank. These deposits had been made by people scattered over the county and when the new bank announced that the $1,000,000 was available, notwithstanding the fact that funds having been tied up, many old depositors found it absolutely necessary to draw cash, more than $750,000 remained in the new bank. Moreover, money received in the interim for sale of farm produce and hoarded because of timidity was deposited in the new bank, following restoration of confidence. The new bank paid dollar for dollar for all assets which were acquired, leaving all the balance of the assets in the hands of the receivers to collect as possible. No advantage was taken of the liquidating bank which was left in position to proceed with its collections of assets without jeopardizing the position of the depositors' interest in the old bank.

Two principal considerations have entered into our explanations of the purposes, activities and benefts of our group organization; benefit to the community and the people therein and benefit to the bank joining the group. We have pointed out these major benefits to the patrons of the banks and the communities.

Communities will be insured greater financial stability and will be provided with broader and better service than has been possible by independent unit banks.

Regardless of temporary depressions affecting one locality or industry, every bank will be able to render uniform and continuous service.

Adequate resources will be available for financing the needs of business enterprises in communities served by Bancorporation banks.

Perpetual and continuous management is assured for men and women who wish to provide trust company management for their estates.

We have emphasized the more favorable position of the borrower in the country town. In localities where other unit banks have failed or were known to be weak, bankers whose institutions remained solvent have been cautious about extending their loan total because of possibility of adverse effect on them of troubles of other banks.

And in further pointing out the advantages we have called attention to opportunities for:

Increased General Banking Facilities.

These facilities include checking, savings, safe deposit boxes, loans, investment, travel funds, letters of credit, foreign exchange, safe keeping.

Management of Estates and Trusts.

Through the Bancorporation and its affiliated banks and trust companies, each member bank has available nearly half a century of trust company experience, with improved

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

and complete facilities for the management of estates and trusts.

Investment Securities.

Diversified bonds and other securities for sound and profitable investment, together with investment counsel from leading banking authorities in the Northwest. Private or leased wires are available which connect with the principal markets of the world, enabling individual banks to buy or sell securities without delay upon request of clients.

Elasticity of Credit.

A greater elasticity of credit is assured, making each city served by banks affiliated with the Northwest Bancorporation independent of conditions affecting one locality or one industry.

Financing Industry.

With the combined buying power of the affiliated banks each organization will be able to underwrite and distribute entire issues of bonds and other securities for the development of public utilities and other local business enterprises, and for the city, State or country needs. Affiliated banks will also be in a position to buy securities on a more profitable basis, by reason of the increased buying power of the entire group.

Banking Counsel.

Under local management, each bank is a vital part of its community, and offers to its customers the financial counsel of its officers and directors, backed up by the experience represented in the Northwest Bancorporation.

We have shown these major advantages to the bank becoming a member of the group.

Prestige in Public Mind from Connection with Strong Group.

Stabilizing and strengthening the general situation. We have seen hoarded money brought in for deposit in localities where people had long been timid.

Ability to take care of larger financial requirements of the community than could otherwise be met.

Enlarged earnings possibilities—every bank able, through Bancorporation channels, to buy securities on more profitable basis and also attract trust business.

Fidelity bonds: Every person employed in the banks that comprise the Northwest Bancorporation group is under bond of $250,000. This large individual coverage has been obtained at less cost than the inadequate coverage formerly carried.

Buying of equipment: Assistance to smaller banks in procuring equipment not obtainable in their own communities and advantages of greater uniformity in stationery.

A definite advertising plan with expert service.

An organized new business department working to bring new accounts to affiliated banks.

Maintenance of strong financial position through central examining board, placing at the disposal of each bank technical advice of the central organization staff.

Conference of group members, allowing exchange of information which will help each bank with problems of management, operation and in new business efforts.

Research department: Through Northwest Bancorporation every affiliated bank finds available the help of the analysis and research departments, affording facilities that a small bank could not provide for itself.

As there are 113 members of the Board of Directors of Northwest Bancorporation and more than 700 directors of the various affiliated institutions, and as Northwest Bancorporation now has nearly 12,000 stockholders, we have pointed out that from the standpoint of the stockholders:

They are partners in a business owned principally by people connected with and largely interested in the success of some unit of that business.

Against a condition of difficulty of sale of bank stock holdings at fair price and the necessity for finding a purchaser there is now a ready market for a more marketable stock.

Northwest Bancorporation stock is listed on the Chicago Stock Exchange and is traded on the Minneapolis-St. Paul Stock Exchange, where is has an active market.

There is a greater element of security through stock ownership of a holding corporation owning banks in communities diversified as to industry.

Greater opportunity for enhancement in value is present in Northwest Bancorporation stock than would ordinarily be the case with stock of the average unit bank.

A conservative dividend policy has been maintained. Northwest Bancorporation pays $1.80 annually, or 45c. quarterly, on $50 par stock. It earned in 1929 two and a half times the dividend, the earnings applicable to stock outstanding being a little better than $4.50 a share.

Below are the banks or trust companies comprising the Northwest Bancorporation group, the figures being of Dec. 31 1929, date of last Comptroller's call:

NORTHWEST BANCORPORATION, MINNEAPOLIS, MINN.

Minnesota Plans Loans to Farmers—State to Make $3,000,000 Available for Agriculturists.

Minnesota, through its Rural Credit Department, plans to loan farmers about $3,000,000 this year, it was stated at the office of Governor Theodore Christianson, according to St. Paul accounts Feb. 15 to the "United States Daily." These advices also state:

A request for purchase of this amount of the rural credit bonds by the State trust funds was made public, and announcement made that the request had been granted.

In addition, W. H. Lamson, Secretary of the State Investment Board, announced orally, the trust funds will loan the Department $675,000 on certificates of indebtedness, to meet interest payments due. Some of this is extension of time on previous similar loans, and part will be paid back later in the year as interest payments are made by borrowers.

Many Applications Filed.

Bonds previously issued by the Rural Credit Department total $52,500,000, according to a statement submitted to the Governor by Ole O. Sageng, Chairman of the Rural Credit Bureau.

His statement also shows that 17,093 applications for loans totaling $91,882,121 have been filed since the Department started operations in July, 1923. Of these 10,056 have been closed, for loans totaling $46,471,100, while 529 have been approved for loans of $2,365,600, but not closed. Cancellations after approval have totaled 1,310, for loans of $6,182,600.

The Department's balance sheet, submitted to the Governor, shows first mortgage loans of $46,741,100, with payments on principal made by borrowers totaling $2,346,408.65, leaving the net amount outstanding on mortgages $44,124,691.35.

Real Estate Evaluated.

Real estate held by the Department is listed as worth $7,980,520. Most of this real estate was taken in under foreclosures of loans made during the first few years' operation. Since then the Department has been reorganized, Mr. Sageng stated orally, and there have been comparatively few foreclosures on the later loans.

The rural credit machinery was set up to alleviate the depressing conditions in agriculture in 1922 and 1923, with provision made for low interest rate loans. Loans are made under an amortization plan, by which the borrower pays 6¼% per annum on the total loan. Interest is at the rate of 5½%, and the loans pay up under this plan, H. H. Flowers, Secretary, explained, in about 35½ years. Interest on the bonds issued ranges from 4 to 4¾%. The bonds now being issued will bear an interest rate of 4.15%.

Indications of Business Activity

THE STATE OF TRADE—COMMERCIAL EPITOME.

Friday Night, Feb. 21 1930.

One of the remarkable things in the week's history is the sprink-like weather all over the country, with temperatures in the upper 60s and even touching 70. It tends to stimulate spring business. Shipments of goods are on a larger scale. Field work is stimulated by the open weather. Sales of the lighter weight fabrics are larger. It is true that a decline of 6c. or more in wheat is a drawback, and cotton also fell to a price that had not been expected. Steel operations have fallen off somewhat, though sales here and there have gained slightly. Steel scrap is higher. The automobile trade has not been buying much steel, but it is said that the February output of cars will in reality turn out to be larger than that in the longer month of January. The demand for rails has been small, but a good demand has prevailed for tank plates. The oil companies have been buying pipe sparingly, and there has also been some falling off in the business of fabricating plants. On the other hand, manufacturers of agricultural implements are taking liberal supplies. A better demand has prevailed for copper and brass. Petroleum and its products have declined. The coal trade, of course, has been affected by the abnormal weather, although this cannot be expected to last. It has often happened in past years that such weather has prevailed around Washington's Birthday, but of course it has always turned out to be highly deceptive. It is plainly useless to expect a continuance of such high record temperatures here as 66 to 68 degrees such as have prevailed in New York of late, not to mention 70 in Cincinnati, 60 to 68 in other parts of the Central West, still less 58 in St. Paul. But meanwhile such weather has, as already intimated, stimulated certain lines of trade. One of the incidents of the week is the notable activity in the manufacture of bathing suits.

Cotton goods have declined in a dull week, and print cloths 64x60's, which recently sold at 6½c., are said to be selling now and then at 6⅜c. Second hands are also cutting into mill prices. Sheetings have been dull. Only a small business has been done in fine and fancy cloths. But finished goods have sold better than recently in both the primary and secondary markets for spot and early shipment. There has even been some buying for fall requirements. Most of the business has been in printed goods. Broad silks have had quite a good sale, especially new printed fabrics for spring. But woolens and worsteds continue to drag. The American Woolen Co. announced that the continual decline in the wool market has been sufficient to justify a readjustment of prices downward on serges, unfinished worsteds, cheviots, Frenchbacks, and serge pencil stripes for the fall of 1930. And such prices will be effective at once. Similar action is expected by other large producers. Raw silk was weaker with trade dull.

As to the decline in wheat of 6 to 7c., it was partly due to the dullness of export trade, but to-day there was a sudden and sharp rise in Liverpool which came as a great surprise, and with it sales for export estimated at anywhere from 2,000,000 to 4,000,000 bushels, though it was mostly Canadian wheat. Argentine wheat has been pressing on the Liverpool market all the week and there has been very heavy liquidation at Chicago and Winnipeg. In fact, Winnipeg has at times clearly led the decline. And delegates of the Canadian wheat pool who recently visited London, it is understood, in quest of financial aid are said to have returned disappointed and much discouraged. Corn has not declined nearly as much as wheat, for receipts have not increased materially. The weather has been better, but the roads are bad. Of course corn has been affected by the sharp drop in wheat. Oats and rye, especially rye, have sympathized with the decline in wheat. Cotton has declined $2.50 a bale, partly under the influence of the bad break in the wheat maret, and also because of a report that the Farm Board's estimated holdings of co-operative cotton here of some 300,000 bales have been shifted to distant months, in which case the Farm Board is not expected to stop the March notices here on the 25th inst., when they are likely to be heavy. The certificated stock here is 92,000 bales. But to-day the decline slackened; in fact, at one time cotton prices were a little higher in a concededly short market. Provisions have declined as a matter of course with grain, but to-day there were signs of a better technical position and lard was 10 points higher. Sugar shows practically no net change for the week, though at one time it was dull, weak and unsettled. There is no expectation at the present time of any restriction of the Cuban crop this year, about two-thirds of the mills having voted against it. In the middle of the week there was a sharp advance, owing to rumors that British refiners were negotiating for 1,000,000 tons of Cuban sugar. Nobody seems to believe it now, but for the time being it plainly had an effect. The Single Selling Agency is trying to ascertain what the requirements of the refiners in this country amount to for March. The result of this query may be some stimulant to business. At the present time spot and nearby sugar is not selling well, even on the basis of 1.73 c. & f. for Cubas. Coffee has advanced ½ to ¾c., partly because Brazilian markets have been acting better and partly because a short account has been built up here. A banking corporation makes the statement that Brazil can recover from the recent sharp break in prices and is financially able to handle the situation.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

This of itself did not a little to inject greater snap and confidence into the situation at home and abroad. It is recognized, however, that improvement will come only gradually in the coffee business anywhere. Rubber advanced ½c., with persistent talk to the effect that there will be a restriction in tapping. Also there has been covering of shorts and more or less trade demand. Rubber consumption in January showed a gain of 55.8% over December, but a decrease as compared with January last year of 14.7%. Car loadings for six weeks show a decrease of something over 6% as compared with 1929, and 2.7% as compared with 1928. Hides have declined 30 to 40 points. Cocoa is about 10 points lower. Employment shows a percentage of 90.2% for the factories the lowest in some years. Machinery and machine tool reports from all over the country indicate that while conditions show steady improvement, the volume of orders placed is not yet all it should be, according to "American Machinist." New York dealers are said to consider business fair, with railway inquiries and export sales the most important developments during the past week.

Stocks and bonds were higher to-day, after a bad break on Wednesday and Thursday. Brokers' loans gained $44,000,000, but attracted little attention. Wheat was higher, and for a time cotton was stronger and even higher, and if it ended lower for the day the change was not marked. To some it looks as though the commodity markets in general were short after a great decline in grain and a considerable drop in cotton. The tendency has been to regard commodities in general as a "sale" until the present time there is believed to be a large short interest in these fields of speculation.

Foreign exchange was depressed early in the week. Spanish pesetas were the lowest on the 17th inst. in 32 years, coincident with present labor disturbances in Spain. They were eight to the dollar in Madrid. Boston wired that the unsettled condition of the cotton market was reported to have retarded yarn sales in the Boston district during the past week and the volume of small proportions. At the same time it was said that a large New Bedford mill has secured business which will give it a 30,000-pound weekly output for some time.

At Lawrence, Mass., a surplus of labor in the textile industry continues. Mill conditions have changed little during the past few weeks. There is a slight increase in employment at some plants and decreases in others. A number of the mills are reported to be working on yarn orders, while the finishing departments continue on a curtailed schedule. The Pacific Mills, it was announced, made a net profit of $1,031,168 in 1929 as against a net loss of $600,751 in 1928. New Bedford, Mass., reported that the Beacon Co. earned in 1929, $529,475, against $353,159 in 1928. Providence, R. I., reports said that cotton fabrics are becoming consistently more popular with women, according to speakers at the Pawtucket Valley textile show. Representatives of the Cotton Textile Institute pointed out the increasing use of cotton broadcloth in foundation garments, while comment on color styles supported the popularity of black and white for women's spring clothes. Providence reported employment gains in the textile industry of Rhode Island during January, but the cotton industry showed a decline compared with the same month last year of 22.8%. Lewiston, Me., wired optimistic opinions as to the outlook for the New England textile industry. Manchester, N. H., wired that the cotton department of the Amoskeag Mfg. Co. will operate to-morrow, Washington's Birthday, but the worsted and mechanical divisions will close to-day for the week-end. There are sufficient orders in the cotton department to warrant running the different looms on the Washington Birthday holiday, and operatives have been asked to report on the regular hours for the half day. At Atco, Ga., the Clearwater Mill No. 3 announced a reduction in working time for all operatives from 60 to 55 hours per week. Despite the reduction, pay remains practically the same, officials state.

At Johnson City, Tenn., on Feb. 14, 15% reduction in the production of the American Bemberg Corp. was announced. A similar reduction is already in effect at the plant of the American Glanzstoff Corp. The Bemberg plant manufactures Bemberg rayon and Glanzstoff produces rayon. A drop in artificial silk caused the curtailment. At North Chelmsford, Mass., a resumption of operations at the Silesia Mills of the United States Worsted Co. is expected shortly. The mills have been closed for about a year following a slackening in orders and lately they passed into the hands of a Boston financial house following court litigation.

Following a snowfall of 3½ inches on the 15th inst., New York on the 16th had the coldest weather of the season, i.e., 7 degrees accompanied by much suffering among the poor. Thousands sought refuge in the many lodging houses of the city. The cold was rendered worse by an icy gale of 40 to 48 miles an hour. The range of temperatures here was 7 to 21 degrees. Cold weather and a blizzard struck New England. Cape Cod was cut off by an all-night storm and four feet of snow. But the cold broke at the West and the forecast was for warmer weather here on the 17th inst. Overnight, Boston had 8 to 10 degrees; Chicago, 10 to 26; Cincinnati, 8 to 28; Cleveland, 8 to 22; Detroit, 2 to 16; Kansas City, 22 to 60; Milwaukee, 4 to 24; St. Paul, 4 to 20; Montreal, 8 below to zero; Omaha, 22 to 54; Philadelphia, 8 to 20 above; Phoenix, 50 to 84; Pittsburgh, 4 to 20; Portland, Me., 2 to 8; Portland, Ore., 48 to 60; San Francisco, 56 to 74; Seattle, 50 to 54; St. Louis, 12 to 44; Winnipeg 8 below to 18 above. In New York on the 17th inst. it was again 7 degrees here; highest 27.

It was abnormally warm in the West on the 17th inst. with 40 to 54 degrees on the Canadian border, 44 in Chicago, 52 in Cincinnati, 40 in Cleveland, 42 in Milwaukee, 64 in Kansas City, 38 in Minneapolis, and 28 in Philadelphia. On the 18th inst. it was warmer here, 20 to 42 degrees. Chicago had 32 to 52, Cincinnati, 42 to 60; Cleveland, 36 to 58; Milwaukee, 32 to 50; Minneapolis, 22 to 50, and Kansas City, to cap the climax, 48 to 74, the latter being within 2 degrees of summer heat.

Yesterday the temperature in New York City was 66 degrees, a freak spring day here, with the low point not below 45 degrees. This is the highest for Feb. 20 on record. Last Sunday and Monday New York's low temperature was 7 degrees. On the 20th people laid aside overcoats. Atlantic City had 69 degrees. In parts of Massachusetts it was 62, the highest in 74 years. In other parts of that State it was 64. To-day the high point was even more remarkable. It reached 68 degrees. The lowest was 52. The forecast was fair and slightly colder to-night, with increasing cloudiness to-morrow. Overnight it was 52 to 68 in Boston, 46 to 64 in Chicago, 42 to 70 in Cincinnati, 52 to 68 in Cleveland, 44 to 62 in Detroit, 46 to 60 in Milwaukee, 54 to 66 in Kansas City, 44 to 58 in St. Paul, 50 to 70 in St. Louis, 30 to 42 in Winnipeg, 38 to 54 in Seattle.

Col. Leonard P. Ayres of Cleveland Trust Co. Says Bottom of Business Decline Appears to Have Been Reached.

In the view of Col. Leonard P. Ayres, Vice-President of the Cleveland Trust Co. of Cleveland, Ohio, "the bottom of the business decline appears to have been reached." In the Business Bulletin of the institution, issued Feb. 15, Col. Ayres makes the foregoing statement and says:

The evidences of this are to be found in the increase of activity in the iron and steel industry, in the rapidly expanding output of the automobile industry, in the notable improvement in business sentiment, and in the increasing strength and activity of the security markets. General business is still subnormal, but conditions do not appear to be getting worse in many lines, or in important ones, and they are certainly improving in some that are fundamentally significant.

General business recovery may, or may not, make rapid progress in the immediate future. We appear to have reached the bottom of the business valley, but we do not yet known how wide the valley may be. In the two most recent periods of sub-normal business, in 1924 and 1927, recovery began as soon as the bottom of the declines had been reached, but in nearly all the previous recession periods definite recovery was longer delayed. It now seems probable that in this present case recovery will be prompt, but that is not yet true.

Building construction has not yet turned definitely upward, and that is particularly true of residence construction which is exceptionally slow. However the severe winter may be holding building back, and meanwhile it is well to note that while construction is still below normal, the figures are not getting worse as the weeks pass. Freight traffic on the railroads has not yet showed signs of improvement, but it is not showing notable decreases, and here again it may be that the severe weather is in part responsible for some of the decreased activity.

In the stock market prices have made a more rapid recovery since the middle of November than that which followed any one of the seven previous bear markets of this century. With the lowering of the rediscount rate of the Federal Reserve Bank of New York there is increased probability that this upward trend will be sustained. Moreover the resulting increased ease of credit should greatly facilitate the floating of bond issues, and thus make available important amounts of new funds for the financing of new construction, and the purchase of new machinery and equipment.

Business Activity.

General business activity was slightly lower in January than it was in December. The decrease from the closing month of last year to the first one of 1930 was so slight that it is clear that the business decline that has

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

been under way since last June has been checked, but it is not yet possible to show definitely that the turn at the bottom has been reached. In reality these statements refer to industrial production rather than to general business activity, for the index on which they are based, and from which the diagram in this column was made, is a composite of data relating to such matters as iron and steel production, automobile output, building construction, railroad freight loadings, and the like, but not including wholesale and retail trade, or employment, or financial transactions. * * *

In 1920 industrial activity declined from the high levels of the post-war prosperity into the serious depression of 1921. That depression was both deep and long, but by early 1923 new high levels of active business had been reached. Since that time there have been three periods of slow business; one in 1924, another at the close of 1927, and this present period.

The level of business activity at the present time is lower than it was at the bottom of the decline of 1927, but not so low as it was in the summer of 1924, and it is not nearly so low as it was in 1921. The most hopeful fact about it is that its rate of decrease has been checked, for this probably means that the bottom has been reached, or nearly reached. In 1921 the first check in the decline below the normal level indicated that the bottom had been nearly reached. In the depressed periods of 1924 and 1927 the corresponding slowing of the decline indicated in each case that the bottom had been reached, and in both instances the recovery was rapid.

Fund Fundamentals.

Business recovery will be achieved when the fundamental lines of industrial activity get back to normal. This has not yet happened in the case of any one of the more important basal industries, but there are encouraging evidences that the process of recovery is under way. In the diagram [this we omit.—Ed.] the four sections show the weekly changes since the beginning of last October in four of the most important of the fundamental industries. In each case the line shows from week to week the degree of activity as computed on the basis of the past records. The 100% lines show what would have been normal levels of activity, while the four irregular lines show the actual activity as percentages of those normals.

The line for building is based on the value of contracts let in 37 States. It is most irregular. At the time of the conferences of business leaders held in Washington following the stock market decline, it quickly rose well above the 100 level. Again just after the beginning of the new year it rose above the theoretical normal level. Since then it has declined again. Its general trend seems to be a rising one, but not as yet decisively so.

The diagram for car loadings shows the line running slightly below normal, and declining rather than advancing. The volume of freight being delivered to the railroads is still relatively low, and the figures during recent weeks would have made an even poorer showing had it not been for the fact that the exceptionally severe winter weather has resulted in unusually large shipments of coal. The decline in the shipments of other forms of freight has been even greater than the diagram indicates.

Activity in the iron and steel industry fell steadily and rapidly from early October to the second week of January. It then turned up, and has made sustained progress since that time. This is the most hopeful indicator that we have that a real turn for the better in industrial activity may have been reached.

Automobile production was still at a high level last October, and its decline to the third week of December was swift and drastic. Since then there has been a considerable recovery to levels that are still well below normal, but which may probably be bettered during the weeks just ahead. This recovery is largely due to the activity of the Ford and Chevrolet plants which have ambitious schedules for February and March. If these schedules can be adjered to they will go far toward insuring a general recovery of business activity by spring.

Iron and Steel.

The growing optimism of business sentiment during the past month has been largely based on the steady increase of activity in the fundamentally important iron and steel industry. Early in January the activity of the steel industry was at a little less than 60% of theoretical full capacity. Each week since then there has been an improvement until now activity is more than 77%. Moreover 16 additional blast furnaces were put into active production furing the month, and most of them were brought in during the last two weeks of January.

These are business developments of real importance, for it is an old and well tested rule that the iron and steel industry increases its rate of output only in response to demands from productive industry. Usually such increases as this present one during times of slow business mark the turning point toward general recovery, and probably that is what is happening now. Sometimes the industry makes a false start, as it did in January of 1924 when 17 blast furnaces were brought in with 21 more added in the next two months, only to be followed by a decrease of 124 furnaces in the four succeeding months.

There is one consideration which indicates the wisdom of restraint in increased activity in iron and steel as surely marking the turn toward the better in general business. This is that the prices of iron and steel products have been steadily falling as the output has increased. Possibly demands or steel are less urgent than the increased activity would seem to indicate.

Stock Prices.

Prices of the more popular common stocks are still discounting the future a long way ahead, despite the radical mark-downs of last October and November. Perhaps this is not to be wondered at, for the stocks most eagerly bought by speculators and investors almost always sell at levels which result in relatively low yields, except during times of prolonged business depression. In the diagram the lines represent the changing prices of four groups of stocks each week during the past 12 months. The prices are not in dollars, but in multiples of the dividends paid. Thus the utility stocks were selling at the end of January for 35 times their dividends. In order to get $10 of dividend income from these stocks the investor would have had to buy $350 worth of the stocks, and the yield would have been less than 3%.

All the lines are based on the compilations of the Standard Statistics Co. The utility stocks comprise a group of 20 issues. A year ago they were selling for 38 times their dividends, and yielding 2.6%. In September they were selling for almost 61 times, and yielding less than 1.7% They are now back nearly to their prices of a year ago, and are selling for 35 times their dividends.

There are 50 issues included in the industrial group. These stocks have recovered less than the utility issues, and are selling at distinctly more reasonable prices than they were at this time last year. They were then selling for nearly 30 times their dividends, and yielding about 3.4%. Now they are selling for about 22 times, and their yield is about 4.6%.

A year ago the industrial stocks were priced much higher than the rail issues, but now the two groups are close together in market valuation. The stocks making up the rail group are 20 in number. They sell for about 5%. At the end of August they were selling for 26 times their dividends, and the yield was about 3.8%.

The group of preferred stocks is made up of 20 issues of high grade industrials. They did not participate in the bull move of last summer, and their prices suffered hardly at all in the crash of the autumn. During the entire past year they have been selling for about 18 times their dividends, and their yield is about 5.6%. They neither promise future enhancement, nor threaten present hazard.

Conditions Not Ripe for Major Business Expansion According to Brookmire Economic Service—Federal Reserve Resources Should Not Be Drawn on Recklessly.

The "secondary boom" which usually follows the collapse of an overextended industrial structure is under way but a permanent revival is still some months distant, according to the latest analysis of business conditions by the Brookmire Economic Service, Inc. Although the public buying power has not been crippled so badly as was feared at first, the analysis adds, the over-bought condition of consumers and the banking position need further liquidation, "which may easily take another six months."

"The appearance of ease in the banking position is to a degree spurious," says the "Brookmire Forecaster." The latter adds:

It has been known for the past two or three years that banking assets lacked much in liquidity. This condition has been intensified by the events of the last six months and more credit is now undoubtedly frozen than at any time since 1921. The prompt easing of money rates since the panic has been due largely to Federal Reserve action. It is unquestionably Federal Reserve credit which has tided the banks through the crisis. The Reserve System still has resources which can be drawn upon, but not recklessly. Our excess gold supplies are largely mythical. The fact is that we are a debtor nation on short-term account—although a creditor nation on long-term investments—and the ordinary reserves against our billion or so of net current indebtedness to foreigners are inadequate. If we should set aside a 70% gold reserve against these—which is double the 35% required against Federal Reserve Bank deposits—our excess of gold would be practically wiped out.

The public buying power, while it is not crippled so badly by the stock market crash as was at first feared, can not reasonably be expected to absorb in the near future any such number of new motor cars and houses as in the past year or tow. Savings have been more or less depleted; current earnings have been reduced, and installment obligations incurred during the last year have not yet been paid off. There has not been time for any correction of the over-built condition of the cities; moreover, there are many unsold structures overhanging the market. The number of both new and used cars in the hands of distributors is generally recognized as extremely burdensome.

There is yet a considerable carryover of buying power from the active business period of the last two years. Despite the recession of demand in various directions, there still remains unsatisfied needs. The requirements of the railroads for electrical equipment and motive power involving plans for steady pursuit of electrification programs are an outstanding example. There is an undoubted need for public buildings such as hospitals, prisons, institutions and various municipal structures—some of which, at least, must be satisfied regardless of current developments.

All of this imples that no further sharp collapse immediately impends. Business at present is going forward and will probably continue to go forward through February at least. Beyond that the course of events is doubtful. The only conclusion which can be supported at present is that our resources are not adequate to support a major expansion.

Employment in Manufacturing Industries in December 1929 Lower Than Two Preceding Months But Higher Than in December 1928, According to National Industrial Conference Board.

Employment in the manufacturing industries in the United States during the month of December 1929, while lower than in October and November, still was slightly higher than in December of the previous year, according to data collected by the National Industrial Conference Board, 247 Park Ave., New York, from about 1,700 manufacturing establishments located in various sections of the country and representing 25 major divisions of the manufacturing industry.

In order adequately to appraise the nature of the decline in activity which occurred during the latter part of 1929, the Conference Board points out, it must be taken into consideration that employment in the earlier part of 1929 reached the peak level of 1923, and this in spite of the much increased productivity per worker achieved through technological progress during the past decade. The peak of employment in 1929 occurred in May, and the net decline between May peak and December amounted to less than 10%, even though the usual midwinter seasonal decline was an added factor in the situation. The Board under date of Feb. 12 also said:

A significant phase of the depression during the last quarter of 1929 was the fact that wage rates remained practically unaffected, as indicated by the hourly earnings per worker in 25 major manufacturing industries reported by the Conference Board. Hourly average earnings per worker were 58 cents (that is, the total payrolls divided by aggregate man-hours), throughout October, November and December 1929 as against 57 during the corresponding months of the previous year. Average weekly earnings in December 1929 reflected the effect of part time work or reduced schedules of working hours, but were higher than in November, and only slightly below those of December 1928, indicating that the decline had slowed up or had run its course.

With no general accumulation of stocks, and in consideration of the drastic reductions in production schedules during the latter part of 1929 in those industries which had most contributed to the high activity in the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

earlier part of 1929, the Conference Board's analysis seems to point to a seasonal increase in industrial activity from now on.

In the following table are given the index numbers for employment and average weekly and hourly earnings in 25 divisions of manufacturing for the last three months of the years 1929, 1928 and 1923, the latter being one of the best years following the adjustment period 1920-1921: It will be noted that average weekly and hourly earnings both in 1928 and 1929 were higher than in 1923.

Year.	Employment Index. (1920=100)	Average Weekly Earnings. (July 1914=100)	Average Hourly Earnings. (July 1914=100)
1923—October	88	216	229
November	87	215	228
December	87	215	228
1928—October	82.9	221	235
November	81.9	219	234
December	83.3	221	233
1929—October	90.0	230	238
November	86.3	217	237
December	83.5	220	238

Gain of 4% in January in Industrial Activity Based on Consumption of Electricity.

That industrial activity in the United States during January made a 4.6% gain as compared with December, but was 8.1% below the mark established in January 1929, is shown in the consumption of electrical energy by more than 3,600 manufacturing plants throughout the country, "Electrical World" reports. General manufacturing reached the low point in the present cycle in December but a marked upward swing became evident in the figures for January operations. The "Electrical World," under date of Feb. 16, also says:

Manufacturing operations in the three principal industrial sections of the country all reported a higher rate of activity in January as compared with December. New England's gain was 12.6%; the Middle Atlantic States, 4.4% and the North Central States, 17.4%. Continued drops in manufacturing activity were reported for the Southern States, with 15.6%, and the Western States, with 8.7%. Every section of the country, however, reported manufacturing activity last month was lower than in January 1929.

For the first time since last August, the automobile industry, including the manufacture of parts and accessories, showed greater productive activity. The January rate of operations in this industry was 25.7% above that reported for December, but was still 33.2% under January of last year.

Six manufacturing groups reported the rate of January operations exceeded December in the following proportions: rubber products, 32.2%; automobiles, including the manufacture of parts and accessories, 25.7%; rolling mills and steel plants, 18.7%; food products, 18.0%; leather products, 3.7%; shipbuilding, 3.2%; and textiles, 2.4%. Stone. clay and glass manufacturing, experiencing the largest drop in activity compared with December with 15.0%, was followed by paper and pulp with 8.6%, chemical products, 7.7%, lumber products, 5.7% and metal working plants 0.4%.

Comparing January operations with those of January 1929, three manufacturing groups reported increases and 9 reported declines.

Rolling mills and steel plants, while recording an 18.7% gain in activity as compared with December, were still operating on a plane 6.5% under January last year. Textiles reported an upward trend during January, but were still operating at a rate 13.1% under January 1929.

The rate of manufacturing activity in January, compared with December 1929, and January 1929, all figures adjusted to 26 working days and based on consumption of electrical energy as reported to "Electrical World" (monthly average 1923-25 equals 100) follows:

	Jan. 1930.	Dec. 1929.	Jan. 1929.
All industrial groups	121.8	116.4	132.5
Metals group	132.3	124.9	142.6
Iron and steel	143.1	120.5	153.5
Metal working plants	126.7	127.2	135.8
Leather	92.3	89.0	94.3
Textiles	112.4	109.8	129.4
Lumber	87.5	92.3	107.4
Automobiles	99.8	79.4	149.4
Paper and pulp	120.8	132.1	126.2
Rubber	144.4	108.4	148.2
Chemicals	136.7	148.0	129.2
Food	132.3	112.1	128.0
Shipbuilding	124.4	120.4	108.2

Silberling Research Corporation Sees Business and Industrial Activity In Process of Severe and Prolonged Recession—Recovery Expected to Begin About August.

"It is now sufficiently clear to everyone who is willing to look facts squarely in the face that general business and industrial activity in the United States is now in process of a fairly severe, prolonged, and widespread recession," says the Silberling Research Corp., Ltd., in surveying the "Outlook for National Business and Basic Industries," under date of Feb. 1. Further reviewing the situation, it says:

Those who find advantage in making plans on the basis of the developments most likely to occur in the future are now keenly interested in whether recent news suggesting revival of activity is significant and how soon a definite turn of events will begin to place the index of general business once more in an advancing direction.

During the last few weeks much has been said about a sharp upturn in steel production. We believe this is the result of special factors, such as construction, railway, and, to a less extent, automotive demands which are in the nature of a temporary spurt, such as brought about a very similar bulge during the spring decline in 1924. With the main current of activity and demand decidedly on the decline, and much weakness in individual industries still to appear in tangible form, we look for a renewal period of recession during the late spring and summer.

Our Teleometer (statistical forecasting device) indicates that the depression in general industrial and business conditions will last until about August, when a definite recovery will begin. It is difficult to time this with precision, but there is excellent evidence for this revival coming during the third quarter, and reaching normal by the end of the year. The year 1930 will probably go down in our business annals as slightly farther below normal than 1924, with a roughly similar effect upon general commodity prices and corporate earnings.

The level of wholesale prices will encounter further rather serious weakening influences during the first six months of 1930. Our measurements indicate that a tendency toward stabilization will develop during the summer, after which some tendency toward moderate firmness can be expected.

There are two factors which will continue to have a depressing effect on enterprise throughout the first three quarters of the year. In the first place, a drastic decline in stock prices has always in the past been followed for nearly a year by subnormal and irregular business activity. Secondly, unfavorable conditions in almost all major countries of the world, and especially the Orient and South America, will greatly restrict the export markets from which such high returns were obtained last year and for which prevailing hopes are likely to be revised materially as the year progresses. Offsetting these, however, are the factors of ample credit supply and good farm purchasing-power, which are tangible and powerful bulwarks of prosperity.

Business Conditions as Viewed by Los Angeles Chamber of Commerce.

Summarizing local general business conditions during January, the "Southwest Business Review," issued by the Los Angeles Chamber of Commerce, says:

Inventories and readjustment of programs usually slow up business at the beginning of each year. January 1930, however, is characterized by a spirit of confidence and optimism not experienced in several years. This confidence seems justified by local statistical records.

Continuing in opposition to the national trend, Los Angeles has made a very encouraging beginning with building permits, which were 21% ahead of January 1929, and 128% higher than in December 1929. Postal receipts for December placed Los Angeles in fifth place among the major cities of the country with an increase over the previous December of 10.43%, and January 1930 continued the climb with an increase of about 4.6% over January 1929.

Employment in January showed a Chamber of Commerce index figure of 89.7, as against 91.5 of last January. Stock Exchange transactions also dropped off to the lowest point in the last two and a half years, while bank clearings were lower than in both December and January 1929.

Merchandising, according to the Irving Fisher index, is improved. Apparrel, millinery and furniture manufacture are expanding. Motion pictures are in good condition, while mining and petroleum are achieving stability through reduced production. Water commerce and agriculture are in excellent condition, and the neighboring States report conditions generally favorable.

Continued Decline in Wholesale Prices in January Reported by Bureau of Labor Statistics.

The recession of wholesale prices which began in August 1929 continued into January of the present year, as shown by information collected in leading markets of the country by the Bureau of Labor Statistics of the United States Department of Labor. The Bureau's advices Feb. 19 continue:

The Bureau's weighted index number, with prices in 1926 as 100.0, stands at 93.4 for January, compared with 94.2 for December 1929, a decrease of slightly more than three-fourths of 1%. This is the lowest level reached since April 1922, when the index number was 93.2. Compared with January 1929, with an index number of 97.2, a decrease of nearly 4% is shown. Based on these figures, the purchasing power of the dollar in January 1929 was 102.9, December 1929 was 106.2, and January 1930 was 107.1, compared with 100.0 for the year 1926.

Farm products as a whole showed a decrease of nearly 1%. Pronounced increases in all livestock and poultry prices being more than offset by the decided decreases in the prices of grains, cotton, eggs, lemons, oranges, and wool.

The decrease in foods was almost 1½%. Butter, cheese, cured fish, rye flour, dried fruits, pepper, and most vegetable oils showed lower prices in January, while lamb, mutton, ham, fresh pork, and poultry showed increased prices.

The hides and leather products group recorded the greatest drop in prices, with a decrease of more than 2%. All sub-groups showed a falling off as compared with the preceding month.

Weakening markets for cotton goods, woolen and worsted goods, and other textile products caused a drop of over 1% for textile products. Silk and rayon showed a slight increase.

Anthracite coal was stationary, while bituminous coal, coke and petroleum products moved downward. The fuel and lighting group, as a whole, decreased 1¼%.

Nails, steel bars, steel plates, tin plate, and wire fence declined slightly in price, as did also bar silver, slab zinc, and the general average for automobiles. Agricultural implements and sewing machines remained at the December level.

A slight advance in lumber and cement prices was offset by declines in paint materials, brick, and other building materials.

Chemicals and drugs as a whole, including fertilizer materials and prepared fertilizers receded only slightly in price. No change was shown for housefurnishing goods.

In the group of miscellaneous commodities there were declines in cattle feed, crude rubber, and other miscellaneous, while paper and pulp and automobile tires did not change in average prices.

A decrease was shown for each of the groups classified as raw materials, semi-manufactured articles, finished products, and non-agricultural commodities.

Of the 550 commodities or price series for which comparable information for December and January was collected, increases were shown in 90 instances and decreases in 203 instances. In 257 instances no change in price was reported.

Comparing prices in January with those of a year ago, as measured by changes in the index numbers, it is seen that considerable decreases have taken place in hides and leather products, textile products, farm products, fuel and lighting materials, and chemicals and drugs. Foods, metals and metal products, building materials, and miscellaneous commodities are somewhat lower than in January 1929, while housefurnishing goods show a minor advance.

Building Contracts Increased in January—Record Volume of Contemplated Construction According to F. W. Dodge Corporation.

For the first time in nine years the January total of building and engineering contracts exceeded the total of the preceding December, according to F. W. Dodge Corp. It is true that last month's increase over the immediately preceding month was only 2%, but the month of January normally falls behind December and has done so consistently even in the biggest boom years, such declines having ranged anywhere from 5 to 29%. In January 1921 the contract increase over December 1920 marked the turning point from a prolonged building recession; this January's contract record may likewise mark the turning point of the current recession. In addition to the 2% increase in contracts, January had the highest recorded volume of contemplated new construction.

Building and engineering contracts let last month in the 37 States east of the Rocky Mountains amounted to $323,975,200. In addition to the 2% increase over December in dollar volume, there was a 4% increase in number of projects reported. The month's contract-volume in dollars was 21% behind that of January 1929. Among the important classes of construction expenditures contracted for in January were: $112,065,200, or 35% of all construction, for public works and utilities; $66,631,900, or 21%, for residential buildings; $54,052,300, or 17%, for commercial buildings; $38,266,200, or 12%, for industrial buildings, and $19,009,200, or 6%, for educational buildings.

Contemplated new work reported in the 37 States during January amounted to $1,455,349,600, by far the largest total of newly planned work recorded for any single month.

These contemplated projects represented a 68% increase over the amount reported in December 1929 and a 78% increase over the amount reported in January 1929. Out of this enormous total $808,211,400 consisted of plans for public works and utilities projects, including large subway work being planned for New York City, and $647,138,200 for new building work in the plan stage. Details are as follows:

New England States.

Contracts let for new building and engineering work in the New England States during January amounted to $17,860,300. Compared with the preceding month's total of $15,946,000, January's record shows an increase of 12%; compared with the January 1929 total, there was a drop of 39%.

The residential class was the most active in the month with $5,846,700, or 33% of all construction. Public works and utilities ranked second with $4,420,500, or 25%; commercial buildings totaled $2,366,100, or 13%, and educational buildings amounted to $1,971,800, or 11%.

New work reported as contemplated in the month reached a total of $54,075,700, against $47,938,900 for December, an increase of 13%; compared with the January record there was a decline of 1%.

Metropolitan New York and Vicinity.

New building and engineering work contracted for during January in Metropolitan New York and vicinity (Northern New Jersey, New York City, Long Island, Westchester, Orange, Putnam and Rockland Counties) amounted to $69,222,500. When compared, the past month's total showed a drp of 35% from December and a decrease of 24% from January 1929.

Analysis of the month's total showed the following active classes of construction expenditures: $28,847,600, or 42% of all construction, for public works and utilities; $16,704,600, or 24%, for residential buildings; $10,104,000, or 15%, for commercial buildings, and $5,194,700, or 8%, for educational buildings.

In contrast with the month's decline in construction contracts, the amount of new construction contracts, the amount of new work reported as contemplated was the highest ever recorded for this territory. The month's total amounted to $707,390,900, compared with $263,286,600 for December and $152,060,900 for January 1929.

Up-State New York.

Construction contracts awarded during January in Up-State New York (including all counties north of Orange, Putnam and Rockland) reached a total of $9,011,800. This was an increase of 4% over December, but when compared with the January 1929 figure there was a drop of 16%.

The following were the most active types of building started during the month: $3,437,900, or 38%, for public works and utilities; $1,630,600, or 18%, for residential buildings; $1,333,400, or 15%, for public buildings, and $1,211,900, or 13%, for commercial projects.

During the month of January new work reported as contemplated reached the enormous amount of $74,042,700 against $24,527,000 in December and $10,248,000 for contemplated projects reported in January 1929.

Middle Atlantic States.

January contracts awarded for new building and engineering work showed a tremendous increase over the preceding month in the Middle Atlantic States. Last month's contract total amounted to $67,248,000, while the total for December 1929 was $21,389,900 and the January 1929 total for $49,083,400.

Analysis of the January 1930 construction record showed the following outstanding classes of work: $31,958,200, or 48% of the total, for public works and utilities; $9,876,600, or 15%, for residential buildings; $8,905,900, or 13%, for commercial buildings, and $5,376,300, or 8%, for public buildings.

During the past month there was $109,403,600 worth of new work reported in contemplation. This figure was almost the same as the amount reported in the preceding month, but there was a loss of 19% from the amount reported in the corresponding month of 1929.

Pittsburgh Territory.

The Pittsburgh District (Western Pennsylvania, West Virginia, Ohio and Kentucky) had $37,677,800 in contracts for new building and engineering work during the past month. This figure was 38% in excess of the December 1929 total, but there was a loss of 34% from the total for January of a year ago.

Included in the past month's contract total were the following items of interest: $11,781,300, or 31% of all construction, for commercial buildings; $8,237,300, or 22%, for residential buildings; $7,406,800, or 20%, for public works and utilities, and $3,532,500, or 9%, for industrial projects.

New contemplated work reported during the past month reached a total of $149,623,300, which was more than double the amount reported in December and 7% ahead of the amount reported in January of last year.

Southern Michigan.

A total amount of $9,900,200 was contracted for in new building and engineering work during January in the Southern peninsula of Michigan. There was a decline of 64% from the December total and a drop of 40% from January 1929.

Included in the month's record were the following active types of construction expenditures: $2,537,700, or 26% of the total, for residential buildings; $2,254,500, or 23%, for commercial projects; $1,739,800, or 18%, for public works and utilities, and $725,500, or 7%, for educational buildings.

New contemplated work reported last month reached a total of $27,599,200, against $95,224,700 in December and $29,825,000 in January 1929.

Chicago Territory.

In the Chicago Territory (Northern Illinois, Indiana, Iowa and Eastern and Southern Wisconsin) there was $31,647,800 worth of contracts let for new building and engineering work in January. The above figure represents a loss of 43% from December and a decline of 53% from January 1929.

The residential class was the most prominent during the month. This type of building had a total of $8,944,200, or 28% of all construction; public works and utilities amounted to $6,966,900, or 22%; commercial buildings totaled $6,541,800, or 21%, and industrial buildings amounted to $5,492,600, or 17%.

New projects reported as contemplated in January amounted to $105,587,400, against $104,717,600 in December, an increase of 1%; compared with the January 1929 total of $125,572,600 there was a drop of 16%.

Central Northwest.

January construction contracts awarded in the Central Northwest (Minnesota, the Dakotas, Northern Michigan and Northwest Wisconsin) amounted to $2,497,000. This figure was 64% less than the total for December, and there was a decrease of 62% from the January 1929 total.

Analysis of the past month's record showed the following active classes of construction expenditures: $998,100, or 40% of the total, for public works and utilities; $516,100, or 21%, for commercial buildings; $513,700, or 21%, for residential buildings, and $250,000, or 10%, for hospitals and institutions.

New building and engineering work reported in the contemplated stage amounted to $7,857,000, against $8,662,600 for the preceding month, a drop of 9%; compared with the January 1929 total of $14,553,800, the decrease was 46%.

St. Louis Territory.

Building and engineering contracts were let last month in the St. Louis district (Southern Illinois, Eastern Missouri, Northeast Arkansas, Western

Digitized for FRASER

Federal Reserve Bank of St. Louis

Tennessee and Northwest Mississippi) to the amount of $8,269,800. This was a gain of 17% over the preceding month's total, but there was a loss of 46% from the total for January 1929.

Last month's record included the following important items: $2,861,000, or 35% of all construction, for industrial buildings; $1,893,400, or 23%, for residential buildings; $1,661,900, or 20%, for public works and utilities, and $794,500, or 10%, for commercial projects.

Contemplated new work reported in January reached a total of $26,-968,400, against $25,514,500 for December, an increase of 6%; compared with the January 1929 total, there was a loss of 23%.

Kansas City Territory.

New building and engineering contracts let in Kansas City district (Western Missouri, Kansas, Oklahoma and Nebraska) during January amounted to $15,938,900. This was an increase of 74% over the December total, but it was 15% less than the total for January of last year.

The following were the most active types of building in the month: $6,351,800, or 40% of all construction, for public works and utilities; $2,837,600, or 18%, for commercial projects; $2,514,000, or 16%, for industrial plants, and $2,511,600, or 16%, for residential buildings.

The amount of new work reported as contemplated during January amounted to $34,152,600, which was 16% greater than the December total, but was off 6% from the January 1929 figure.

Texas.

In the State of Texas there was $18,116,300 worth of new building and engineering work contracted for during January. This was an increase of 50% over the preceding month and an increase of 14% over the January 1929 record.

The public works and utilities class was the outstanding feature in the month, with a total of $9,024,700, or 50% of all construction. Residential building ranked second with $3,514,500, or 19%; commercial buildings totaled $3,145,400, or 17%, and educational buildings amounted to $1,301,300, or 7%.

During the month there was $26,531,200 worth of new contemplated projects reported in this State, against $30,834,500 for December, a drop of 14%; compared with the January 1929 total, the decrease was 31%.

New Orleans Territory.

January construction contracts awarded in the New Oreans district (Louisiana, Western and Southern Arkansas, Eastern and Southern Mississippi) were more than four times the amount contracted for in December and over twice the amount let in January 1929. The month's total amounted to $15,063,600 against $3,763,700 in December and $6,046,300 in the corresponding month of last year.

The outstanding feature in the month was the public works and utilities class, with $6,643,200, or 44% of all construction. Industrial buildings amounted to $6,253,300, or 42%; residential buildings totaled $1,094,400, or 7%, and commercial projects amounted to $695,500, or 5%.

New contemplated work reported last month reached a total of $12,-263,400. This figure was 23% less than the December total, but there was an increase of 11% over the amount reported in the corresponding month of 1929.

Southeastern Territory.

New construction contracts awarded in the Southeastern district (the Carolinas, Georgia, Florida, Alabama, Eastern Tennessee) during the past month amounted to $21,523,200. Compared with the total for December this was an increase of 47%, and compared with the January 1929 total of $26,886,400, there was a drop of 20%.

Included in the month's total were the following active classes of construction expenditures: $10,225,200, or 48% of the total, for industrial plants; $3,327,000, or 15%, for residential buildings; $2,897,700, or 13%, for commercial buildings, and $2,607,800, or 12%, for public works and utilities.

Contemplated projects reported during the month reached a total of **$119,854,200.** This figure was more than three times greater than the amount reported in December and in January of last year.

Loading of Railroad Revenue Freight Continues Low.

Loading of revenue freight for the week ended on Feb. 8, totaled 886,581 cars, the Car Service Division of the American Railway Association announced on Feb. 18. This was a decrease of 12,313 cars below the preceding week this year and a reduction of 69,400 cars under the same week in 1929 as well as a reduction of 19,896 cars under the same week in 1928. Details are outlined as follows:

Miscellaneous freight loading for the week of Feb. 8 totaled 308,669 cars, 20,383 cars below the same week in 1929 and 9,929 cars below the corresponding week in 1928.

Loading of merchandise less than carload lot freight amounted to 241,426 cars, a reduction of 7,399 cars under the same week last year and 8,910 cars under the same week two years ago.

Coal loading amounted to 193,755 cars, a decrease of 26,244 cars under the same week in 1929 but 24,809 cars above the same week in 1928.

Forest products loading amounted to 53,524 cars, 6,255 cars below the same week last year and 14,791 cars under the corresponding week in 1928.

Ore loading amounted to 7,976 cars, a decrease of 1,361 cars under the same week in 1929 and 536 cars below the corresponding week two years ago.

Coke loading amounted to 11,713 cars, a decrease of 1,918 cars under the corresponding week last year and 1,023 cars below the same week in 1928.

Grain and grain products loading for the week totaled 43,739 cars, a reduction of 4,098 cars under the corresponding week in 1929 and 2,451 cars below the same period in 1928. In the Western districts alone, grain and grain products loading amounted to 30,254 cars, a reduction of 2,674 cars under the same week in 1929.

Live stock loading totalled 25,779 cars, 1,742 cars below the same week in 1929 and 7,065 cars below the corresponding week in 1928. In the Western districts alone, live stock loading amounted to 20,330 cars, a decrease of 594 cars compared with the same week last year.

All districts reported reductions in the total loading of all commodities compared with the same week last year while all except the Pocahontas and Central Western districts reported decreases compared with the same week in 1928.

Loading of revenue freight in 1930 compared with the two previous years follows:

	1930.	1929.	1928.
Four weeks in January	3,349,424	3,571,455	3,448,895
Week ended Feb. 1	898,894	947,154	926,262
Week ended Feb. 8	886,581	955,981	906,477
Total	5,134,899	5,474,590	5,281,634

Chain Store Sales Reflect Improvement—January Sales up 9.38%.

In view of the small increases in earnings for 1929 reported by some chain store companies, and slight decreases by others, the January results of 58 chain store companies, as reported by Merrill, Lynch & Co., show gratifying results. January sales of this group aggregate $222,243,080 compared with $203,177,466 in Jan. 1929, an increase of 9.38%. It is apparent that the chains were not suffering in January from the poor weather conditions which existed in November and December of last year. Merrill, Lynch & Co. states:

Particularly significant was the increase reported by Safeway Stores of 23.73%. This is the first time that Safeway reports for both years the sales on all stores now operated. Sales as reported each month previously in 1929 showed all sales for that year including new stores. The sales figures reported each month during 1928 were for a much smaller number of stores operated in that year. This necessarily caused the reporting of a larger increase in sales during 1929 than will be apparent from now on, as practically the entire unit will now be reported for 1930 and 1929.

It is understood that in spite of the generous increases being reported by many chain store companies, some corporations will concentrate this year more on profits than on sales. In several cases it is understood that while a normal increase in volume will be aimed at, even greater efforts will be used towards putting into effect efficiencies and economies which will increase the net per dollar of sales, with a view to increasing total net profits above last year's figures.

A comparative table follows:

Month of January—	1930.	1929.	*% Inc.*
Sears-Roebuck (Jan. 2-Jan. 29)	$26,820,165	$24,501,008	9.46

Governor Roosevelt of New York Sees Marked Advance in Bettering Agricultural Conditions—With Saturation Point in Industrial Production Looks for Trend from City to Country Life.

Before the State College of Agriculture at Ithaca, New York, on Feb. 14, Gov. Franklin D. Roosevelt observed that "because of definite Governmental aid of all kinds, through the State Administration and Legislature, marked advance has been made along economic and social lines for the bettering of agricultural conditions." The Governor noted that during the past few years the urban and suburban communities have offered a better chance for industrial employment than ever before. He likewise noted that "there is necessarily a limit to the continuance of the migration from the country to the city and he said "I look in fact for a swing of the pendulum in the other direction." Many economists, he added, "are seriously questioning whether we have not for the time being reached the saturation point of industrial production." He furthermore stated that "there are more people in the cities of the United States who are looking for jobs than at any time within many years." The effect of this condition, Governor Roosevelt contends, is that there will be less opportunity for young people to go from the farm to the city, and that "by the same token many people from the cities will give more serious attention than in the past to the possibility of moving to the country."

Digitized for FRASER

Federal Reserve Bank of St. Louis

The great objective aims at making country life in every way as desirable as city life. "All sorts of factors are involved," the Governor said, "better roads, better markets, better schools, better health facilities, better churches, lower rates for electricity, lower rates for telephones." The Governor's speech follows:

I think we are all agreed that the year 1929 will go down into history as affording the greatest amount of substantial progress for the agricultural interests of the State in modern times. Because of a more general and whole-hearted co-operation on the part of all of the interests affected and because of definite governmental aid of all kinds through the State Administration and Legislature marked advance has been made along ecomonic and social lines for the bettering of agricultural conditions.

The broad attitude of intelligent interest in agriculture continues, and further important steps are being taken this year to round out what we may well call a full program.

The time has come, however, to pause for a moment and ask ourselves the definite question of what the objective of all of this interest and co-operation is? Are we passing these new laws and spending all of this new money merely to correct existing conditions? In other words, is this a mere correctional policy or does it go much further? If it does go further, what is it aiming at?

To answer this question it is necessary to give a very brief survey of the fundamental reasons for the relative decline of agricultural prosperity in our State during the past decade.

The first reason is the economic one. We have come to realize that many thousands of acres in this State have been cultivated at a loss— acres which are not under modern conditions suitable for agriculture.

Secondly, we have used mnany thousands of acres of soil for growing crops unsuited to the particular soil.

Third we have allowed thoroughly antiquated marketing processes to continue without intelligent change to meet the economic growth of the cities. For instance, we have built up a marvelous system of State highways, without providing either the feeders to those roads at one end or the market facilities at the other end. Finally, we have only just begun to reorganize the tax burden so as to eliminate its inequalities.

The other reason for the past and present troubles is the social one. Modern civilization has brought wholly new methods of living. We must admit very definitely that one of the principal causes for the trek of thousands of people, especially the young people, from the farm to the city has been because the farms have been cut off from the amusements and interests which the urban communities provide.

Modern inventions, such as the radio, the telephone and the automobile, are helping to correct a lopsided situation, but we must take a more intelligent interest in the whole problem of making farm life more socially interesting as well as more financially profitable. That this can be done is evidenced by the actual cases of a growing group of individual families who are worthy to be listed as master farmers.

In the same category of social needs comes the development of educational facilities in the rural communities. Much has been done, yet we still have a long way to go to make all rural education come up to the standards which have been already set.

Another definite problem of the future relates to the health of the rural communities. We are all distressed by the growing difficulty of obtaining adequate medical service and care. In many communities the actual cost of medical care is almost prohibitive, and in many the medical facilities are themselves almost lacking.

In the same way we are facing the problem of the country church. The old days of the local dominie who could live with his family on a salary of $500 a year have gone by. We are confronted definitely in most communities with a multiplicity of church buildings, a multiplicity of different sects and the unfortunate injection of the high cost of living into our religion.

These are the outstanding economic and social causes of agricultural decline. And there is what might be called the supplementary reason that during these past years the urban and suburban communities have offered a better chance for industrial employment than ever before and also a better chance to obtain social advantages.

Fallacies of the Pessimists.

It is all very well for gloomy people to talk about the almost complete disappearance of farm life in America. They cite the advance of chemical science with the suggestion that within another generation one acre of land will grow enough chemical ingredients to make possible the manufacture in pill form of concentrated breakfasts for 10,000 human beings. They insist that the human race will be perfectly happy in another generation in taking in the early morning a pill out of one bottle labeled poached eggs, another pill out of another bottle labeled oatmeal and cream, and a third pill out of another bottle labeled one glass of milk.

We can all agree that this delightful theory is wholly false, and one example that proves its falsity is the fact that where 20 years ago the production of vegetable crops in this State for canning purposes was one of our most important cash crops, to-day the use of canned goods by the people in the cities has greatly fallen off because they have learned to use fresh vegetables, even through the Winter months, vegetables which are grown in the southern parts of the United States and even in the tropics.

Limit to Continuance of Migration from Country to City.

Furthermore, there is necessarily a limit to the continuance of the migration from the country to the city, and I look in fact for a swing of the pendulum in the other direction. Things all point that way. Industrially the United States has made not only the greatest strides in history in this generation, but perhaps has come to the period when industrial expansion will slow up.

In other words, many economists are seriously questioning whether we have not for the time being reached the saturation point of industrial production calling for a period of digestion for a number of years to come. No matter how anxious we may be to prevent any panic of thought over the unemployment situation at this time, we must nevertheless recognize the fact that there are more poeple in the cities of the United States who are walking the streets looking for jobs than at any time within many years.

The effect of this condition—for it is a condition and not a theory—is that there will be less opportunity for young people to go from the farm to the city in the next few years and find work awaiting them. By the same token many people from the cities will give more serious attention than in the past to the possibility of moving to the country.

How happy is the family to-day located on a farm in New York State and able to say every day as they get up in the morning and as they go to bed at night:

"We at least have no fear of starvation, we at least have no fear of losing our job. We may not be getting very rich but at least we are able to go on with our lives without suffering and without drastic change."

This great objective that I have been speaking about aims at the great fundamental of making country life in every way as desirable as city life, an objective which will from the economic side make possible the earning of an adequate compensation and on the social the enjoyment of all of the necessary advantages which exist to-day in the cities.

All sorts of factors are involved; better roads, better markets, better schools, better health facilities, better churches, lower rates for electricity, lower rates for telephones. Let us keep the objective definitely before us as we work year after year on the individual problems leading to that objective.

Perhaps great betterment can be obtained through the development of the idea of regional planning—applying for example for every city in the State the same principle which has already been applied to the milk supply for New York City.

As an example of how the administration in Albany is seeking to develop better facilities throughout the whole State, I have just sent a letter to the mayors and health officers of all of the principal up-State cities asking them to come to Albany on March 11 for a conference looking toward the establishment of regional milk sheds for the further elimination of bootleg milk and cream coming into our State from far distant points.

Further Decline in Factory Employment and Wages in Pennsylvania and Delaware in January.

Factory employment and wage payments in this section declined further in January, according to indices compiled by the Department of Statistics and Research of the Philadelphia Federal Reserve Bank in co-operation with the Pennsylvania Department of Labor and Industry on the basis of about 900 reports received from 51 manufacturing industries. The Federal Reserve Bank of Philadelphia, in making public the details of the compilation on Feb.19, says:

The number of factory workers in Pennsylvania showed a drop of 1.3% between December and January, all groups, except metal products and transportation equipment, reporting fewer workers than in the preceding month. Last year at the same time, when manufacturing industries were recovering from low levels, employment was on the increase. In comparison with a year ago, however, the number of wage earners in January was about 4.0% larger. The building materials groups alone reported fewer workers than in January 1929.

Wage disbursements by Pennsylvania factories also showed a decrease of 1.4% from December to January, all groups except metals having smaller payrolls. Compared with a year ago, wage payments were 2.9% larger. The groups comprising manufactures of building materials, however, had a rather sharp decline in payrolls as compared with January 1929.

Employee-hours worked in Pennsylvania factories in January declined about 1.3%, according to 557 reports representing 47 industries. The only groups that showed a larger number of hours worked than in December were those manufacturing metal, chemical, leather, food and tobacco products.

Delaware factories reported a decline of 2.8% in the number of wage earners and 4.2% in the volume of wage disbursements between December and January. The group consisting of metal products showed a slight gain in employment, but a decline in wage payments. Foods and tobacco and stone, clay and glass products alone had larger wage payments than in December.

The statistics follow:

Review of Building Situation in Illinois During January—Falling Off in Building Permits.

Building permits issued during January 1930 in 45 reporting cities of Illinois, authorized 794 building projects with an estimated cost of $7,443,357. This estimated cost is unusually low even for the season, 12.3% below December and 55.4% below the figure for January a year ago. Howard B. Myers, Chief of the Bureau of Labor Statistics and Research of the Illinois Department of Labor, in reporting this Feb. 13, added:

For Chicago 389 building projects were authorized with an estimated cost of $5,957,025. This estimated cost shows an increase of 6.9% over December, but nevertheless is lower than for any other month since January 1921, except the month of May 1921, in which month labor disputes caused a sharp reduction in the issue of permits. The Chicago figure for January 1930 is 56% lower than the figure for January 1929.

Outside of Chicago a fairly general decline was evident. Of 21 reporting cities located within the metropolitan area surrounding Chicago, 12 issued permits for construction work with a valuation lower than that of the previous month. The remaining 9—Berwyn, Forest Park, Glencoe, Glen Ellyn, La Grange, Maywood, River Forest, West Chicago and Wilmette—exceeded the valuation for December. Only 4 of these cities—Blue Island, Lake Forest, West Chicago and Wheaton—exceeded the valuation of a year ago.

Of the 23 reporting cities outside the metropolitan area only 6—Aurora, Canton, Decatur, Freeport, Quincy and Springfield—showed an increase in valuation over the preceding month. Only 7—Canton, Danville, Decatur, Elgin, Joliet, Quincy and Springfield—had an estimated valuation which was above that of a year ago. The large increase in the Springfield figures was due mainly to the issuance of permits for the erection of a large bakery plant and an addition to a produce storage house in that city.

In the 45 cities as a whole, 33.7% of the estimated cost for building projects was to be expended for residential building, 55.1% for non-residential building and 11.2% for additions, alterations, repairs and installations. In Chicago 28.5% of the estimated cost was to be expended for residential building, 62.8% for non-residential building and 8.7% for additions, alterations, repairs and installations.

For the cities in the metropolitan area, excluding Chicago, 65.4% of the estimated cost was for residential building, 17.8% for non-residential building and 16.8% for additions, alterations, repairs and installations, while for the cities outside the metropolitan area the corresponding percentages are 45.7, 29.2 and 25.1.

Of the total number of permits issued during January, 178 were for residential building with an estimated cost of $2,507,350, planned to provide accommodations for 424 families. Seventy-four of these buildings with an estimated cost of $1,699,700, providing accommodations for 302 families, were to be erected in Chicago. This valuation is 46.4% less than a month ago and 74.3% less than a year ago.

In the metropolitan area, excluding Chicago, permits were issued for 37 residential buildings with an estimated cost of $427,800, providing housekeeping accommodations for 41 families. For cities outside the metropolitan area permits were issued for 67 residential buildings, estimated to cost $379,850, to provide accommodations for 81 families. Both of these valuations are less than the corresponding valuations for a month ago and a year ago.

Permits for non-residential buildings for all cities totaled 213, which were estimated to cost $4,101,855, of which amount $3,742,000, or 91.2%, was for construction work in Chicago, 2.9% was for construction in the metropolitan area, excluding Chicago, and 5.9% was for construction work in the cities outside the metropolitan area. The large increase in non-residential building for Chicago is largely accounted for by the issuance of a permit for the erection of a college within the city, estimated to cost $1,500,000.

Permits for additions, alterations, repairs and installations were issued for 403 buildings with an estimated cost of $834,152. Of this expenditure, 61.8% was to be made in Chicago, 13.2% was to be made in the metropolitan area, excluding Chicago, and 25% was to be made in the cities outside the metropolitan area.

Increase in Sugar Duty Proposed by Sweden to Protect Domestic Sugar Growers.

Associated Press accounts from Stockholm Feb. 19 stated:

An increase in the import duty on sugar of three oere, or nearly half a cent a pound, has been proposed by the Swedish Government in order to protect the domestic sugar beet growers.

When announced in the Riksdag, the proposal met with strong and immediate opposition from the Social Democrats.

Increased sugar duties were first mentioned when the present Conservative cabinet headed by former Admiral Arvid Lindman, came into power more than two years ago. At the time the Government also suggested abolition of the domestic sugar tax of four oere a kilogram.

Cuba's Sugar Output Put at 4,300,000 Tons—Department of Agriculture Makes Estimate for Season—Production Behind Last Year's.

Total sugar production in Cuba during the present grinding season will not exceed 4,300,000 long tons, according to estimates compiled by the Department of Agriculture up to Feb. 18. A cablegram from Havana on that date to the New York "Times" reporting this added:

Production in the first 15 days of this month totaled 513,000 tons, and the amount manufactured since the beginning of the season, 1,034,000 tons, compared with 1,900,000 tons at the same date last year.

Representatives of sugar mills and cane planters who contributed more than half of the total production of the sugar crop of the last grinding season cast their votes to-day against any measure on the part of the Government to restrict the present sugar crop or to prohibit further planting of cane on the island. Representatives of 95 out of 156 sugar mills now grinding have also affixed their signatures to a document which has been sent to President Machado by the Association of Mill Owners and Cane Planters of Santa Clara Province stating their opposition to the idea

It has been known for some time that important sugar interests were planning a campaign to have the President issue a decree limiting the sugar crop to not exceeding 4,500,000 tons or perhaps less, as well as prohibiting further planting of sugar cane. The protest filed to-day has been well received in financial circles.

Millowners Opposed to Cuban Sugar Restrictions.

From the "Wall Street Journal" of Feb. 18 we take the following Havana advices:

In view of the fact that powerful sugar interests are conducting an active campaign favoring restriction of the 1929-1930 sugar crop, a meeting of 86 mills was held on Monday at which it was voted to notify President Machado that the mill owners represented were opposed to such restrictions, or to limiting the sowings of cane. Among those present at the meeting were representatives of the American Sugar Refining Co., Cuban American Sugar Co., Hershey Co., Guantanamo Sugar Co. and General Sugar Co.

Industrial Situation in Illinois During January—Increase in Unemployment and Wages.

Surveying the industrial situation in Illinois during January, Howard B. Myers, Chief of the Bureau of Statistics and Research of the Illinois Department of Labor, has the following to say, under date of Feb. 19:

Manufacturing industries of the State registered a decline of 1.5% in employment and 5.3% in payrolls for the period Dec. 15 to Jan. 15.

Non-manufacturing industries reduced employment 3.8% and wage payments 4.9% during this period.

The combined loss for all reporting industries amounted to 2.3% in employment and 5.1% in total wage payments.

Industrial employment as reported for Jan. 15 was 2.3% lower than a month earlier, manufacturing as well as non-manufacturing industries contributing to the decline. In the latter division, the large volume of temporary workers laid off after the close of the holiday season by mail-order houses and department stores and the continued contraction in building operations added greatly to the amount of unemployment. While the curtailment in employment for the manufacturing industries was less than during the previous reporting period—1.5% as against 3.3%—the loss in payroll totals was greater, 5.3% as compared with 4.9%.

Of the 10 major industrial groups into which the reporting manufacturing concerns have been classified, including the group of miscellaneous manufacturing, all but one registered a smaller volume of employment on Jan. 15 than a month previous. The exception to the general trend was the clothing and millinery group in which the manufacture of women's dresses and hats was seasonally active. The gain in this group, however, was slight—1.2% in number of workers—and was not accompanied by a corresponding increase in the payroll figure. One of the five groups under the non-manufacturing division, services which include hotels, restaurants and laundries, also registered increased activity, adding 3.4% more workers and increasing wage payments 2.4%.

With the exception of these two groups, all major industries showed a smaller volume of employment than on Dec. 15, the declines ranging from 0.1% in paper and printing to 31.4% in building and contracting work. Losses in wage payments in these groups were 2.0 and 41.8%, resepctively.

The metal industries group showed considerable variations in the employment trend in different localities, and also in the different lines of manufacture which it includes. In most cities for which a gain in employment is reported, the improvement was due to an increase in working forces in the metal industries group. Among the lines of manufacture included in this group, brass, copper, and zinc concerns reported a gain. At the car and locomotive shops the expansion in operations reported a month earlier continued, and employment showed a further, although smaller, increase. Automobile and accessories plants resumed operations after a temporary shut-down, an increase of 33.3% for the month marking the reaction from the decline of 33.8% reported a month ago. The manufacture of agricultural implements also registered some increase in activity—employment gaining 0.2% and payrolls 1.4%. Other metal industries, however, showed substantial declines, the most important, iron and steel, laying off 4.0% of its working forces and reducing its payrolls 3.9%. Cooking and heating apparatus reported a curtailment of 6.2% in number of workers and 7.8% in wage payments, while electric apparatus decreased employment 2.3% and payrolls 11.6%. An even heavier decline in the payroll totals was recorded for the manufacture of watches and jewelry, where the seasonal inactivity was reflected in a reduction of 16.6% in the wage payments as against a loss of 1.2% in the number of workers employed.

Despite the heavy losses in industrial employment that have prevailed during the past four months, the level in several of the reporting industries is still above that of a year ago. The index for the metal industries as a whole was 107.2 for January 1930, as compared with 105.1 for January 1929. Furs and leather goods stood at 94.5 as compared with 93.6 a year ago; printing and paper goods registered 111.8 as against 102.8; and the index for textiles was 89.9 as compared with 89.8.

The most drastic declines in manufacturing employment since a year ago are those in the stone, clay, and glass products group, and the wood products group. In the former, all the industries except glass manufacture shared in the decrease, while in the wood products classification all reporting lines have reduced their volume of employment. The index of employment in the building and contracting industry was also considerably below the figure for January 1929.

While there has been a considerable amount of planning for public construction work that might alleviate the existing unemployment problem, little has as yet been actually accomplished in that line.

In his analysis of the industrial situation by cities Mr. Myers says:

The free employment offices of the State report a general increase in unemployment during January, the ratio of applicants for work to the number of available positions rising from the previous month's figure in 12 out of the 13 reporting cities for which an unemployment ratio can be computed and standing at a considerably higher level than a year ago in 10 of these cities. The ratio in Peoria was less in January than in December, and was considerably less than the ratio for January 1930. Quincy and East St. Louis were also more favorably situated than a year ago, according to these unemployment figures. The average for all of the reporting cities was 257.2 in January this year compared with 177.0 for December and 181.8 for January 1929.

Clerical workers appeared to be the most seriously affected by the prevailing unemployment, the ratio for this group more than doubling in the past month. The increase in the ratio, however, was considerable in all of the industrial groups for which the figures are available, building and construction trades as well as metals and machinery workers contributing heavily to this increase.

Five of the 15 reporting cities for which the manufacturing employment figures are tabulated separately to show the changes from month to month registered some gain in the number of factory workers employed, and of these five cities three registered an increase in payroll figures as well. These latter cities were Cicero, East St. Louis, and Rock Island.

Aurora.—The declines of 4.6% in employment and 14.5% in wage payments for the month were the largest reported since the beginning of the present depression. The unemployment ratio was 180.9 as against 154.7 in December.

Bloomington.—The heavy losses in employment that have been reported during the past several months for this city continued into January, when an additional curtailment of 5.2% in number of men employed and 13.2% in payrolls was recorded. Reports from the superintendent of the free employment office, however, reflect a somewhat more favorable situation, as a number of important plants are gradually taking back their men and expect to be running with full forces by early March.

Chicago.—The industries manufacturing furs and leather goods and clothing and millinery maintained their working forces, but practically all other groups showed a decline. Manufacturers employing a total of 151,321 wage earners reported a 1.8% decline in employment and a 5.8% decrease in wage payments. The unemployment ratio was high, 343.6 in January as against 202.5 in December and 197.3 a year ago.

Cicero.—The volume of employment reported for this city in January showed an increase for the first time since last September, the losses during the intervening months amounting to 16.3, 12.2, and 24.0%, respectively. The increase in January was 1.6% in employment and 2.7% in payrolls. The unemployment ratio is still the highest for any of the reporting cities in which the free employment offices of the State are located.

Danville.—Several brick plants closed down during the month, and others have been working on five-day schedules with about half their normal forces. This fact accounts largely for the declines of 6.8% in employment and 9.4% in payroll totals which were reported.

Decatur.—Steel mills, will paper and corn products plants, women's ready-to-wear garment factories, and most of the foundries were reported to be working full time. Part time schedules were reported for factories engaged in producing agricultural implements, plumbing supplies, and soda fountain fixtures, and also for the railway shops. The decline in employment was slight, 0.3%, while payrolls were reduced 4.7%. A large surplus of labor is reflected in the unemployment ratio of 355.8, which was considerably higher than the ratios of 198.6 for December and 166.2 for a year ago.

East St. Louis.—In this city the volume of employment registered a gain for January and payroll figures showed a substantial increase. A local glass plant, which resumed operations after being closed down for the repair of one of its furnaces, accounted for some of this improvement. Plants were generally working full time, and conditions are improving.

Joliet.—A decline of 13.0% in employment and 13.5% in payrolls was largely due to a two weeks' shutdown at the local steel mill. The blast furnace that had been closed down was again in operation after the middle of the month, but this was after the period covered by the report. Plants in general were working with reduced forces but on full time schedules.

Moline.—While a decline of 2.1% in employment and 3.9% in payrolls was reported for January 15 as compared with a month earlier, there was a distanct improvement noted during the latter part of the month in the local manufacturing plants. Most of them were working full time, and one reported overtime work.

Peoria.—While some manufacturing plants were operating on part time schedules and with reduced forces, none has suspended operations entirely. The agricultural implement plants expect to get back to full schedules by early March. Disputes at the coal mines of the Crescent Coal Co. during January interfered with production to some extent. While there has been a surplus of transient labor, a shortage of certain types of skilled labor was also reported. The decline in number of workers employed in reporting manufacturing plants was 2.2.%.

Quincy.—The garment industry was reported to be working full time, and a pump and governor plant was working both day and night shifts.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Operations in the stove industry have slowed down, but forces have been maintained. The decline reported for the period was slight, totaling 0.3%.

Rockford.—The decline of 2.5% in employment was somewhat less than the decreases registered during the previous two reporting periods. Factories producing farm machinery and some milling machinery plants were working full time, but other factories have reduced either forces or time schedules. Some building and construction work is planned for February, and an industrial improvement is expected to be in evidence by March.

Rock Island.—An increase of 0.9% in manufacturing employment was reported for January, following the gain of 1.0% during December. All plants are working full time and the International Harvester Co. has been increasing its forces. A growing demand for the light Farmall tractor, particularly from abroad, is causing a gradual expansion at this plant.

Springfield.—Reports on manufacturing employment for this city show an increase of 2.0% in the number of workers employed, but a loss of 2.6% in the total wage payments. The Pillsbury Flour Mill Co. opened a local plant early in February, which is estimated to give employment to about 300 workers. Coal mines have been active. A large projected building program is being delayed by adverse weather conditions, but this is expected to provide employment for a considerable number of unemployed workers in the near future. Increased activity at the Allis-Chalmers Co. plant was responsible for part of the increase in employment.

Sterling-Rock Falls.—Manufacturing plants in this territory increased employment 2.1%, but reduced wage payments 3.1%. The metal industry was mainly responsible for the reported changes.

The statistics follow:

COURSE OF EMPLOYMENT AND EARNINGS IN ILLINOIS DURING JANUARY 1930.

Note.—The footnotes previously a part of the above tabulations have been omitted due to the fact that all firms reporting volume of employment are now also giving the corresponding payroll figures.

Lumber Orders Slightly Under Production.

Lumber orders were 3% less and shipments 6% less than production for the week ended Feb. 15, it is indicated in reports from 831 hardwood and softwood mills to the National Lumber Manufacturers' Association. These reports gave combined production as 328,300,000 feet. A week earlier, with shipments and orders in the same relation as for the latest week, 828 mills gave production as 308,073,000 feet. Marked improvement in the relation to cut of hardwood orders and shipments is noted for the two weeks. Among the softwoods, 511 mills reported unfilled orders on hand Feb. 15 as the equivalent of 23 days' production, the same equivalent reported a week earlier by 515 softwood mills. For the week, as compared with last year, 411 identical softwood mills reported production 7% above, shipments 11% less and orders 13% less than for the same week last year; for hardwoods, 216 identical mills gave production 14% less, shipments 20% less and orders 19% under the volume for the week last year.

Lumber orders reported for the week ended Feb. 15 1930 by 617 softwood mills totaled 278,637,000 feet, or 3% below the production of the same mills. Shipments as reported for the same week were 271,680,000 feet, or 5% below production. Production was 287,314,000 feet.

Reports from 237 hardwood mills give new business as 38,890,000 feet, or 5% below production. Shipments as reported for the same week were 36,991,000 feet, or 10% below production. Production was 40,986,000 feet. The Association's statement further says:

Unfilled Orders.

Reports from 511 softwood mills give unfilled orders of 1,035,909,000 feet on Feb. 15 1930, or the equivalent of 23 days' production. This is based upon production of latest calendar year—300-day year—and may be compared with unfilled orders of 515 softwood mills on Feb. 8 1930 of 1,063,889,000 feet, the equivalent of 23 days' production.

The 366 identical softwood mills report unfilled orders as 962,866,000 feet on Feb. 15 1930, as compared with 1,158,908,000 feet for the same week a year ago. Last week's production of 411 identical softwood mills was 219,570,000 feet, and a year ago it was 206,164,000 feet; shipments were respectively 214,118,000 feet and 240,614,000; and orders received 216,765,000 feet and 249,593,000. In the case of hardwoods, 216 identical mills reported production last week and a year ago 37,493,000 feet and 43,534,000; shipments, 33,766,000 feet and 42,416,000; and orders 35,984,000 feet and 44,213,000.

West Coast Movement.

The West Coast Lumbermen's Association wired from Seattle that new business for the 212 mills reporting for the week ended Feb. 15 totaled 146,278,000 feet, of which 43,972,000 feet was for domestic cargo delivery and 26,366,000 feet export. New business by rail amounted to 67,309,000 feet. Shipments totaled 150,392,000 feet, of which 57,552,000 feet moved coastwise and intercoastal and 22,961,000 feet export. Rail shipments totaled 61,247,000 feet and local deliveries 8,632,000 feet. Unshipped orders totaled 63,0228,000 feet, of which domestic cargo orders totaled 256,296,000 feet, foreign 166,363,000 feet and rail trade 207,569,000 feet. Weekly capacity of these mills is 247,586,000 feet. For the six weeks ended Feb. 8, 140 identical mills reported orders 12.2% over production and shipments were 5.5% over production. The same mills showed a decrease in inventories of 1.8% on Feb. 8 as compared with Jan. 1.

Southern Pine Reports.

The Southern Pine Association reported from New Orleans that for 146 mills reporting, shipments were 9% below production, and orders 6% above production and 16% above shipments New business taken during the week amounted to 66,465,000 feet, (previous week 52,374,000 at 143 mills); shipments, 57,351,000 feet (previous week 50,589,000), and production 62,754,000 feet (previous week 59,685,000). The three-year average production of these mills is 70,352,000 feet. Orders on hand at the end of the week were 184,401,000 feet at 114 mills. The 135 identical mills reported a decrease in production of 7% and in new business an increase of 6% as compared with the same week a year ago.

The Western Pine Manufacturers Association of Portland, Ore., reported production from 77 mills as 25,209,000 feet, shipments 28,580,000 and new business 31,752,000. Sixty identical mills reported an increase in production of 1% and a decrease in new business of 15% in comparison with 1929.

The California White and Sugar Pine Manufacturers' Association of San Francisco reported production from 19 mills as 4,184,000 feet, shipments 14,728,000 and orders 14,178,000. The same number of mills reported a decrease of 39% in production and of 29% in orders when compared with last year.

The Northern Pine Manufacturers' Association of Minneapolis, Minn., reported production from eight mills as 1,925,000 feet, shipments 3,392,000 and new business 3,140,000. The same number of mills reported production 25% more and new business 25% more, than that reported for the corresponding week a year ago.

The Northern Hemlock and Hardwood Manufacturers' Association of Oshkosh, Wis., reported production from 23 mills as 3,817,000 feet, shipments 1,541,000 and orders 2,369,000. Twenty-two identical mills reported production 26% more and orders 6% less than that reported for last year.

The North Carolina Pine Association of Norfolk, Va., reported production from 119 mills as 10,534,000 feet, shipments 10,586,000 and new business 8,477,000. Thirty-nine identical mills reported a decrease of 6% in production and of 28% in new business when compared with 1929.

The California Redwood Association of San Francisco reported production from 13 mills as 6,484,000 feet, shipments 5,110,000 and orders 5,978,000. The same number of mills reported a 45% increase in production and a 29% increase in orders in comparison with the same period a year ago.

Hardwood Reports.

The Hardwood Manufacturers' Institute of Memphis, Tenn., reported production from 214 mills as 33,913,000 feet, shipments 32,679,000 and new business 35,620,000. Reports from 194 identical mills showed a 12%

Digitized for FRASER

Federal Reserve Bank of St. Louis

decrease in production and a 16% decrease in new business when compared with last year.

The Northern Hemlock and Hardwood Manufacturers' Association of Oshkosh, Wis., reported production from 23 mills as 7,073,000 feet, shipments 4,312,000 and orders 3,270,000. Twenty-two identical mills reported production 23% less and orders 38% less than that reported for 1929.

West Coast Lumbermen's Association Weekly Report.

According to the West Coast Lumbermen's Association reports from 213 mills show that for the week ended Feb. 8, 1930, orders and shipments were 10.39% and 16.18%, respectively below production which latter amounted to 158,006,144 feet. The Association's statement follows:

WEEKLY REPORT OF PRODUCTION, ORDERS, AND SHIPMENTS.
213 mills report for week ended Feb. 8 1930.
(All mills reporting production, orders and shipments.)

Production ..... 158,006,144 feet.
Orders ..... 141,586,637 feet (10.39% under production)
Shipments ..... 132,437,203 feet (16.18% under production)

COMPARISON OF CURRENT AND PAST PRODUCTION AND WEEKLY OPERATING CAPACITY (297 IDENTICAL MILLS.)
(All mills reporting production for 1929 aad 1930 to date.)

Actual production week ended Feb. 8 1930 ..... 178,177,762 feet
Average weekly production, 6 weeks ended Feb. 8 1930 ..... 137,194,566f eet
Average weekly production during 1929 ..... 203,152,852 feet
Average weekly production last three years ..... 210,933,628 feet
* Weekly operating capacity ..... 291,508,073 feet

* Weekly operating capcity is based on averaged hourly production for the 12 last months preceding mill check and the normal number of operating hours per week.

WEEKLY COMPARISON (IN FEET) FOR 212 IDENTICAL MILLS—1930.

Decline in Cotton Prices Attributed by A. Norden & Co. of New York Cotton Exchange to Loss of Faith in Federal Farm Board.

The drastic decline in cotton prices during the last week is attributed by A. Norden & Co., members of the New York Cotton Exchange, to liquidation of long accounts that lost faith in the ability of the Federal Farm Board to bring about an upward movement or even to sustain prices at previous levels. In a review of the market Feb. 8 they said:

The further sharp decline which took place during the week was principally due to liquidation of tired holders who had lost faith in the ability of the Federal Farm Board to bring about an upward movement of prices. At the close on Oct. 21 when the Board announced to the world that they believed the price at which cotton was then selling to be too low, March, May and July contracts were quoted at 18.41, 18.71 and 18.83 respectively, last night March closed at 16.05, May at 16.29 and July at 16.50.

All but one of the principal co-operatives availed themselves of the Farm Board's offer to supplementary funds, by means of which they were able, at the Board's suggestion, to make loans, to members, of approximately 16 cents per pound, basis middling. When the price of cotton in the South fell appreciably below the loan basis, the necessity for prompt and practical action on the part of the Board became apparent. They rose to the occasion by approving arrangements made by the newly organized American Cotton Co-operative Association to take over all marketing activities of the various member State co-operative associations, and to finance the handling of all cotton (which term we understand to include futures) now held by those associations. According to an official announcement, the Board has made a loan to the American Association of an ample amount to carry out the above program.

It subsequently developed that the co-operatives, in conducting their optional pools, had accumulated futures contracts covering a considerable amount of cotton—unofficially estimated at upwards of 200,000 bales. These contracts are now being concentrated in the hands of one of the leading New York Cotton Exchange houses, which is believed to be acting for the Government through the American Co-operative Association, and the possibility of them being hurriedly thrown on the market in the event of further declines has been removed. However, although the situation is brighter in some repects, it provides no sound basis for optimism. The large contract holdings of co-operatives have been brought to the attention of the trade and of the public, and the impression has undoubtedly been formed that, while they are in strong hands, they will be liquidated as soon as possible without loss. Consequently, until these contracts have been sold and thoroughly digested their existence may be expected to act as a decided damper on bullish enthusiasm.

A. Norden & Co. Predict Continued Unsatisfactory Conditions in Cotton Market Until Free Market Prevails and Prices Decline—Stabilization Corporation Would Advertise Weakness of Market.

The cotton market will continue to be unsatisfactory until a free market prevails and until prices decline to a level at which consumption is sufficiently stimulated to bring about an adjustment between supply and demand, say A. Norden & Co., members of the New York Cotton Exchange, in their weekly market summary issued Feb. 17. The increasing popularity of foreign growths can only be successfully combatted if American producers concentrate on growing cotton of good quality which can be profitably marketed on a competitive basis with that grown abroad, the report states. It adds:

The formation of a stabilization corporation for the purpose of surplus control operations would inevitably advertise the weakness of the American cotton situation, antagonize foreign spinners and stimulate the demand for outside growths. With regard to the effect of current quotations on farmers' planting intentions, it should be remembered that the majority of producers marketed their crop last autumn, received a relatively good price for it, and, in consequence, are unlikely to favor acreage reduction this year. As for the possibility that the co-operatives' contracts will be held until deliveries are made against them, we see nothing constructive in it. We believe that the short end of these contracts is very largely in the hands of interests who have cotton for sale and that there is little likelihood of a squeeze. Even if a large quantity of cotton is taken up and segregated, it would not be lost sight of and would unquestionably exert a bearish influence on the price ideas of buyers.

Members of New York Cotton Exchange to Act Feb. 24 on Amendment Eliminating Differential on Deliveries at Southern Points.

The Board of Managers of the New York Cotton Exchange on Feb. 14 called a meeting of the members for Feb. 24, at noon, to consider amendments to the by-laws designed to eliminate the 35-point differential now existing on cotton delivered on Exchange contracts at southern points. The proposed amendments were approved by the board at a meeting held Feb. 14. "It is believed by the board that if the proposal is approved by the membership it will be of benefit to the cotton trade in general and will assist in the orderly marketing and distribution of the cotton crop," President Gardiner H. Miller said following the meeting.

At the Feb 24 meeting the members of the Exchange, if they approve of the proposed amendments, will set a day for a ballot to be taken and if the vote is favorable the amendments will become effective the day following their adoption. In the event the members approve the amendments, the first new month to be traded in will be October, 1930, and beginning that month and up to and including January, 1931,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

deliveries can be made in both old and new contracts. The present, or so-called old contract, will expire on Jan. 31 1931. The 35-point differential now in effect was adopted by the Exchange in November, 1928, along with southern deliveries and became effective on new southern delivery contracts traded in during January, 1929 for October,1929, delivered.

Activity in the Cotton Spinning Industry for January 1930.

The Department of Commerce announced on Feb. 20 that according to preliminary figures compiled by the Bureau of the Census, 34,630,866 cotton spinning spindles were in place in the United States on Jan. 31 1930 of which 29,198,134 were operated at some time during the month, compared with 29,069,510 for December, 29,649,394 for November, 30,134,716 for October, 30,037,922 for September 30,236,880 for August and 30,753,168 for January 1929. The aggregate number of active spindle hours reported for the month was 8,173,380,372. During January the normal time of operation was 26½ days (allowance being made for the observance of New Year's Day in some localities) compared with 25 for December, 25¼ for November, 26¾ for October, 24½ for September and 27 for August. Based on an activity of 8.88 hours per day the average number of spindles operated during January was 34,733,046 or at 100.3% capacity on a single shift basis. This percentage compares with 88.2 for December, 100.9 for November, 108.7 for October, 104 for September, 97.7 for August, and 111 for January 1929. The average number of active spindle hours per spindle in place for the month was 236. The total number of cotton spinning spindles in place, the number active, the number of active spindle hours and the average hours per spindle in place, by States, are shown in the following statement:

State.	Spinning Spindles.		Active Spindle Hours for January.	
	In Place Jan. 31.	Active During January.	Total.	Average per Spindle in Place.

Country's Foreign Trade in January—Imports and Exports.

The Bureau of Statistics of the Department of Commerce at Washington on Feb. 14 issued its statement on the foreign trade of the United States for January and the 7 months ended with January. The value of merchandise exported in January 1930 was $417,000,000, as compared with $488,023,000 in January 1929. The imports of merchandise are provisionally computed at $312,000,000 in January the present year, as against $368,897,000 in January the previous year, leaving a favorable balance in the merchandise movement for the month of January 1930 of $105,000,000. Last year in January there was a favorable trade balance on the merchandise movement of $119,126,000. Imports for the 7 months of 1929-30 have been $2,424,986,000, as against $2,374,409,000 for the corresponding 7 months of 1928-29. The merchandise exports for the 7 months of 1929-30 have been $3,034,971,000, against $3,238,391,000, giving a favorable trade balance of $609,985,000 in 1929-30, against a favorable trade balance of $863,982,000 in 1928-29. Gold imports totaled $12,908,000 in January, against $48,577,000 in the corresponding month in the previous year, and for the 7 months were $123,050,000, as against $134,497,000. Gold exports in January were $8,948,000, against only $1,378,000 in January 1929. For the 7 months in 1929-30 the exports of the metal foot up $118,480,000, against $106,620,000 in the 7 months of 1928-29. Silver imports for the 7 months of 1929-30 have been $35,961,000, as against $44,926,000 in 1928-29, and silver exports $47,942,000, as against $53,314,000. Following is the complete official report:

Canadian Provinces Ready to Back Loans to Wheat Pool.

Canadian Press advices Feb. 17 from Winnipeg, Man., were given in the New York "Times" of Feb. 18:

Banks that have lost money to the wheat pool have not asked the Manitoba Government that the guarantee of 15% margin be maintained, Premier John Bracken said to-day.

The Premier gave assurance that the Province, in co-operation with Saskatchewan and Alberta, stands ready to carry out the undertaking to guarantee the pool's loan margin should prices decline to levels necessitating such action.

Drop in Wheat Values at Winnipeg—Pool's Margin with Lending Banks Reported as Maintained.

The New York "Times" reported the following from Winnipeg (Man.) Feb. 17 (Associated Press):

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Wheat values, weakened by the pummeling of bear traders, tumbled to-day to the lowest marks since early last Summer. At one time the prices broke 5¾ cents below Saturday's close, but they climbed back to from 4⅛ to 4⅝ cents loss for the day.

The most drastic drop was in the July future, a 4⅝-cent loss to $1.20⅞ to $1.21. May wheat slipped down 4½ cents to $1.18⅞ a bushel and October 4⅛ cents to $1.21 to $1.21⅛.

George McIvor, general sales manager of the Canadian wheat pool, announced:

"The pool's margin with lending banks is still maintained. Any statements made on the pool's margin with the banks are either propaganda or mere surmise. It is absolutely impossible for any one other than pool or bank executives to determine even approximately at what market price the pool's margin with the banks would become impaired.

"The pool is not required to maintain a margin of 15 cents over and above the price of the pool's initial payment. The pool's agreement with the banks calls for the former to keep on deposit with the banks collateral valued at current market prices equal in value to 15% more than the total amount of the banks' loans to the pool, which total is constantly changing as sales of pool grain progress and also as the amount of grain at country points, in transit, &c., changes."

$2,000,000 Grain Failure Announced at Winnipeg.

The New York "Journal of Commerce" has the following to say in a Winnipeg, Man., dispatch Feb. 17:

The Winnipeg Grain Exchange last night officially announced the suspension of the Electric Elevator Co. from membership.

The directors of the company, it is understood, are endeavoring to reorganize the company to protect the shareholders. The company's losses are estimated at $2,000,000, and the Bank of Montreal has seized all the wheat in the company's elevator at Fort William to protect its cash advances to the company.

The actual failure of the company occurred some 3 or 4 weeks ago and became generally known at that time, the understanding being that the losses were largely in coarse grains. Prices broke sharply to-day on the announcement, losing 4¼c. to 4½c. a bushel.

Activity of the Wool Weaving Industry During December.

The Wool Institute under date of Feb. 19 reports that there was an increase of billings in December 1929 as compared with the previous month, partially offsetting the decrease of the November-October 1929 period. The survey also ays:

The trend of production was opposite to that of billings, the December 1929 volume decreasing in comparison with that of November 1929. The percentage of decrease was greater than that of the December-November 1928 period.

The stocks on hand in excess of orders on Dec. 31 1929 were 5% greater than those of Nov. 30 1929.

The December 1929 volume of production, billings and stocks was less than that of December 1928.

DECEMBER ACTIVITY
(Linear Yardage adjusted to a 6-4 Basis)

Production	9,017,402 yards
Billings	9,661,114 yards
Stock on hand	7,501,455 yards
Value of billings	$18,155,182

Australian Wool Growers Organize to Stabilize Prices.

From the New York "Sun" we take the following Melbourne (Australia) Associated Press accounts Jan. 31:

A group of one hundred Victorian and Riverina wool growers has agreed to the formation of a new wool growers' organization for the stabilization of wool prices.

The new organization is named the Australian National Wool Gorwers and Publicity League.

The growers have agreed to a compulsory levy of 5 shillings on every £100 sterling worth of wool sold in order to provide funds for a publicity campaign to promote the more extensive use of wool.

Approval by State Governments of Australia's Proposal to Stabalize Wheat Through Pooling Arrangement.

Associated Press accounts from Canberra, Australia, Feb. 18 stated:

Most of the State Governments to-day approved the Federal Government's proposal for stabilizing the Australian wheat movement by setting up a marketing pool with boards in each State under one big Commonwealth Board.

Representatives of the wheat growers, however, who also attended the conference, unanimously adopted a resolution in favor of a compulsory pool controlled by the growers themselves, instead of by Government boards.

The Government proposed to guarantee a price of 96 cents a bushel for wheat delivered at country railway sidings for the next year, but the growers' representatives want this price effective for 3 years.

The whole project will now be taken under discussion by the State Governments and the various associations of wheat growers.

Australia's Wheat Estimate.

Canadian Press advices from Ottawa (Ont.) Feb. 17 had the following to say regarding the Australian Wheat yield:

An Australian wheat yield of 125,000,000 bushels for the season of 1929-30 is indicated in the second forecast cabled by the Commonwealth Statistician at Canberra to the Dominion Bureau of Statistics here. The wheat acreage of 14,063,000 is smaller by more than 100,000 acres then the previous season, when the yield was 159,497,000 bushels. The average for the 5 years 1923-24 to 1927-28 was 136,604,000 bushels from 10,839,000 acres.

Transactions in Grain Futures During January on Chicago Board of Trade and Other Markets.

Revised figures showing the volume of trading in grain futures on the Board of Trade of the City of Chicago, by days, during the month of January, together with monthly totals for all "Contract Markets" as reported by the Grain Futures Administration, of the U. S. Department of Agriculture, were made public Feb. 6 by the Grain Exchange Supervisor at Chicago. For the month of January 1930 the total transactions at all markets reached 1,632,610,000 bushels, compared with 1,879,548,000 bushels in the same month last year. On the Chicago Board of Trade the transactions in January 1930 totaled 1,413,159,000 bushels, as against 1,630,016,000 bushels in the same month 1929. Below we give deatils for January, the figures representing sales only, there being an equal volume of purchases:

Agriculturists in Quito (Ecuador) Move to Cut Wheat Imports by Improving Domestic Quality.

A cablegram from Guayaquil, Ecuador, Feb. 18, to the New York "Times" said in part:

Highland agriculturists meeting in Quito decided to-day that improvement of the quality of domestic flour was necessary to supplant the foreign product, imported largely from the United States to the value of $1,000,000 a year

Federal Reserve Bank of St. Louis

The Government is sponsoring the project and promised aid in selection of seed wheat and lower freight rates to the coast. The question of a protective tariff was not determined.

Census Report on Cotton Consumed in January.

Under date of Feb. 14 1930 the Census Bureau issued its report showing cotton consumed, cotton on hand, active cotton spindles, and imports and exports of cotton for the month of January, 1930 and 1929. Cotton consumed amounted to 577,235 bales of lint and 62,393 bales of linters, compared with 453,892 bales of lint and 53,544 bales of linters in December 1929 and 668,286 bales of lint, and 69,359 bales of linters in January 1929. It will be seen that there is a decrease under January 1929 in the total lint and linters combined of 98,017 bales, or 13.3%. The following is the statement complete:

Note.—Linters exported, not included above, were 12,572 bales during January in 1930 and 27,226 bales in 1929; 65,129 bales for the 6 months ended Jan. 31 in 1930 and 103,345 bales in 1929. The distribution for January 1930 follows: United Kingdom, 476; Netherlands, 293; France, 2,870; Germany, 5,208; Italy, 885; Belgium, 1,804; Canada, 1,032; Newfoundland, 4.

WORLD STATISTICS.

The estimated world's production of commercial cotton, exclusive of linters, grown in 1928, as compiled from various sources is 25,611,000 bales, counting American in running bales and foreign in bales of 478 pounds lint, while the consumption of cotton (exclusive of linters in the United States) for the year ended July 31 1929 was approximately 25,782,000 bales. The total number of spinning cotton spindles, both active and idle is about 164,000,000.

Cottonseed Oil Production During January.

On Feb. 13 the Bureau of the Census issued the following statement showing cottonseed received, crushed and on hand and cottonseed products manufactured, shipped out, on hand, and exports during the month of January 1930 and 1929:

COTTON SEED RECEIVED, CRUSHED AND ON HAND (TONS).

Petroleum and Its Products—Crude Price Situation in Turmoil—Standard of New Jersey Defends Cut—Others Denounce Reductions as Unwarranted.

The crude price situation came to a boiling point during the past week with statements pro and con holding the attention of the entire industry. The Standard Oil Co. of New Jersey, which started the present trouble last month when it cut the price of crude in Mid-Continent, issued a statement defending its action on the ground of over production, declaring that "we believe that conservation and the prosperity of the industry cannot be realized while additions are being made to the already burdensome stocks" and pointing out that "fluctuations in the price of crude and all other commodities are not ultimately controlled by individuals and corporations, but by conditions."

Meanwhile, other factors in the Mid-Continent crude price situation were freely placing the blame on a "war of competition" which they declared is being waged in the East between Standard of New Jersey and Shell Union. Oil well operators are increasing their efforts to bring about a successful program of curtailment, impetus being given this move by the crude oil price cuts of the past week, made in every producing field from the Rocky Mountain States eastward.

On Feb. 13 the Sinclair Crude Oil Purchasing Co. reduced its Mid-Continent scale to that inaugurated by the Standard subsidiaries in January, ranging from 17 to 41 cents a barrel. This was followed on Feb. 15 by similar action on the part of Prairie Oil & Gas Co. in Mid-Continent. On the same day Rocky Mountain crudes were cut 8 to 27 cents by the Midwest Refining Co. and Ohio Oil Co. The Ohio Oil Co. also cut Central States crude from 10 to 18 cents. On Feb. 17 the Seep Agency cut Pennsylvania crude 25 cents and other Appalachian crudes 15 to 18 cents.

It was declared significant that when the Sinclair reduction was made, this being the first break since the original cuts in January, Mr. Sinclair declared the reductions to be "inequitable and a backward economic step." Likewise the Prairie expressed its belief in the unsoundness of the move, but pointed out that it was impossible to continue paying more than its competitors or its competitors' customers. The Prairie concluded by expressing the hope that the "producers and refiners alike will continue their councils for co-operation, and by concerted effort and mutual co-operation readjust conditions which of themselves will restore to the average producer of both crude oil and refined products a reasonable price."

The prices in Mid-Continent are now down to the schedule which was effective from Jan. 25 to May 20 last year. This is 60 cents a barrel for oil heavier than 25 degrees A.P.I., with a 6-cent differential per degree of gravity up to 32 degrees, and a 3-cent differential up to 44 degrees gravity. Oil of 44 degrees or lighter takes a top price of $1.44 a barrel. The price of 36 gravity crude, regarded as the average, $1.20 a barrel.

The annual meeting of the Petroleum Division, American Institute of Mining and Metallurgical Engineers, held this week brought forth many statements regarding the crude

Digitized for FRASER

Federal Reserve Bank of St. Louis

situation, the most important being the decision that the 1930 production of crude will depend upon the course followed by operators in abiding by the different voluntary programs of conservation.

Production for the week ended Feb. 15 showed a daily increase of 39,150 barrels, due entirely to California producers, who increased that State's daily average output by 43,100 barrels.

Changes in crude prices follow:

Feb. 13.—Sinclair Crude Oil Purchasing Co. met Humble-Carter-Magnolia 17 to 41 cents per barrel in Mid-Continent.

Feb. 15.—Prairie Oil & Gas Co. met Mid-Continent reductions, adopting the same scale.

Feb. 15.—Midwest Refining Co. and Ohio Oil Co. cut Rocky Mountain crudes 8 to 27 cents per barrel.

Feb. 15.—Ohio Oil Co. cut Central States crude 10 to 18 cents per barrel.

Feb. 17—Seep Agency cut Pennsylvania crude 25 cents per barrel and other Appalachian crudes 15 to 18 cents per barrel.

REFINED PRODUCTS—NO IMMEDIATE ACTION ON PRICES FOLLOWING CRUDE CUTS—STANDARD OF NEW JERSEY REDUCES TANK CAR GASOLINE IN NEW YORK ONLY—JOBBING DEMAND EASY IN ALL FIELDS.

Although there has been no definite downward trend in refined products' prices following the general cut in crude, it is generally believed in the industry here that a downward revision will shortly be made, when the affect of the lower crude prices is realized.

On Tuesday, Feb. 18, the Standard Oil Co. of New Jersey reduced tank car gasoline ¼ cent per gallon to 8½ cents per gallon in New York only. The price remains unchanged at 8¾ cents per gallon throughout the rest of the S. O. N. J.

There has been an almost total lack of new business in gasoline, but much was expected of the Washington Birthday week-end, coupled with the fact that the few preceding days brought almost spring-like weather, with a resultant jump in motoring.

Kerosene is in an unsettled condition. Consumption thus far this winter has not been up to expectations, and it is reported that accumulated stocks are larger than usual. However, refiners are holding to their posted price of 7¾ cents per gallon.

The general price structure of refined products is weaker than it has been for some time, and buyers are holding back, awaiting some definite indication of what the trend will be. One section of the market which is holding fairly steady is the domestic heating oil division. No price shading has been noted, and demand continues on a level and substantial basis.

Refiners report large shipments against contracts, and stocks in refineries are not especially large.

Marine fuel oils are unchanged, with steady movement. There was a slight improvement noted in lubricating oils this week, but no changes were announced in prices.

Price changes:

Feb. 17.—Standard of Indiana lowered gasoline tank wagon price 2 cents per gallon throughout territory.

Feb. 18—Standard of New Jersey lowered tank car gasoline ¼ cent per gallon to 8½ cents per gallon in New York only. Price remains 8¾ cents per gallon throughout rest of its territory.

Rate of Crude Petroleum Output at Lower Rate in December—Inventories of All Oils Higher.

According to reports received by the Bureau of Mines, Department of Commerce, the production of crude petroleum in the United States during December 1929 amounted to 80,339,000 barrels, a daily average of 2,592,000 barrels. This represents a small decline from the previous month. The curtailment inaugurated in November was continued throughout December, and the majority of the fields and States declined in output. The Oklahoma City field increased its output from a daily average of 55,000 barrels in November to 74,000 barrels in December. The Santa Fe Springs, Calif., field showed a small increase, but both West Texas and Seminole continued on the down grade. Although the production of crude remained nearly stationary, the demand for refining purposes decreased and stocks increased. Pipe-line and tank-farm stocks east of California were lower —335,084,000 barrels, against 336,028,000 barrels; but stocks held by refiners increased during the month from 44,235,000 barrels to 46,195,000 barrels. Stocks of refinable crude in California decreased, but this was more than compensated by an increase in heavy crude and fuel stocks.

Total stocks of all oils amounted to 682,069,000 barrels on Dec. 31 1929, an increase of 3,595,000 barrels over the previous month. This increase is in contrast to a decrease in these stocks of over 3,000,000 barrels in November. The Bureau's report further adds:

In general, the output of the flush producing areas declined in December. The daily average output of the greater Seminole area amounted to 311,000 barrels, as compared with 326,000 barrels daily in November. This decline was due principally to a continued curtailment of new work as well as to the natural decline of the old wells. Oklahoma City reached a new peak at 74,000 barrels daily in December, an increase over November of 19,000 barrels. The output of the West Texas area continued to decline as the total new initial production fell to the lowest point in many months. Production at Long Beach fell off again, but Santa Fe Springs was slightly higher following the drastic curtailment of the previous month.

Stocks of Seminole were again drawn on and amounted to 17,444,000 barrels, as compared with 17,754,000 barrels the previous month.

In general, there were fewer oil wells completed in the flush fields in December, and the total number of wells drilling on Dec. 31 in the four fields of Seminole, West Texas, Long Beach and Santa Fe Springs amounted to 720 as compared with 760 on Nov. 30.

c From "Oil & Gas Journal."

The production of gasoline for the month totaled 37,133,000 barrels, a daily average of 1,198,000 barrels, and a decline from the previous month of 46,000 barrels, or 4%. Imports of gasoline amounted to 716,000 barrels, exports to 5,964,000 barrels, the latter a material increase over November. Stocks of gasoline increased sharply and amounted to 43,115,000 barrels on Dec. 31, as compared with 37,780,000 barrels the previous month and 33,066,000 barrels a year ago. The indicated domestic demand was 26,550,000 barrels, a daily average of 856,000 barrels, which compares with 857,000 barrels daily for December 1928. At the current rate of domestic demand, the gasoline stocks as of Dec. 31 represent 41 days' supply as compared with 32 days' supply on hand a month ago and 34 days' supply on hand a year ago, continues the Bureau, which also goes on to say:

The domestic demand for kerosene increased 12% over Novmeber and stocks were reduced to 9,039,000 barrels from 9,366,000 the previous month. Cracking rose to a new high level, which, with an increase in demand of fuel oil for heating purposes, caused a material withdrawal from stocks of gas oil and fuel oil east of California. The statistical position of both lubricants and was remained practically unchanged.

The refinery data of this report were compiled from schedules of 346 refineries with an aggregate daily recorded crude-oil capacity of 3,617,940 barrels, covering, as far as the Bureau is able to determine, all operations during December. These refineries operated at 72% of their recorded

i East of California. j Includes 2,841,000 barrels tops.

Crude Oil Output in United States Again Rises.

The American Petroleum Institute estimates that the daily average gross crude oil production in the United States for the week ended Feb. 15 1930 was 2,652,950 barrels, as compared with 2,613,800 barrels for the preceding week, an increase of 39,150 barrels. Compared with the output for the week ended Feb. 16 1929 of 2,674,900 barrels daily, the current figure represents a decrease of 21,950 barrels per day. The daily average production east of California for the week ended Feb. 15 1930 was 1,901,950 barrels, as compared with 1,905,900 barrels for the preceding week, a decrease of 3,950 barrels. The following are estimates of daily average gross production, by districts:

The estimated daily average gross production for the Mid-Continent Field, including Oklahoma, Kansas, Panhandle, North, West Central, West, East Central and Southwest Texas, North Louisiana and Arkansas, for the week ended Feb. 15, was 1,491,900 barrels, as compared with 1,495,100 barrels for the preceding week, a decrease of 3,200 barrels. The Mid-Continent production, excluding Smackover (Arkansas) heavy oil, was 1,450,600 barrels, as compared with 1,454,000 barrels, a decrease of 3,400 barrels.

The production figures of certain pools in the various districts for the current week, compared with the previous week, in barrels of 42 gals., follow:

Weekly Refinery Statistics for the United States.

According to the American Petroleum Institute, companies aggregating 3,483,400 barrels, or 95.4% of the 3,650,900-barrel estimated daily potential refining capacity of the plants operating in the United States during the week ended Feb. 15 1930, report that the crude runs to stills for the week show that these companies operated to 71.4% of their total capacity. Figures published last week show that companies aggregating 3,484,400 barrels, or 95.4% of the 3,650,-900 barrel estimated daily potential refining capacity of all plants operating in the United States during that week, but which operated to only 69.7% of their total capacity, contributed to that report. The report for the week ended Feb. 15 1930 follows:

CRUDE RUNS TO STILLS, GASOLINE AND GAS AND FUEL OIL STOCKS, WEEK ENDED FEBRUARY 15 1930.

Note.—All crude runs to stills and stocks figures follow exactly the present Bureau of Mines definitions. In California, stocks of heavy crude and all grades of fuel oil are included under the heading "Gas and Fuel Oil Stocks." Crude oil runs to stills include both foreign and domestic crude.

Production and Shipments of Portland Cement Decline —Inventories Increase.

The Portland cement industry in January 1930 produced 8,498,000 barrels, shipped 4,955,000 barrels from the mills, and had in stock at the end of the month 27,094,000 barrels, according to the United States Bureau of Mines, Department of Commerce. The production of Portland cement in January 1930 showed a decrease of 14% and shipments a decrease of 13.2%, as compared wtih January 1929. Portland cement stocks at the mills were 1.1% higher than a year ago.

In the following statement of relation of production to capacity the total output of finished cement is compared with the estimated capacity of 165 plants at the close of January 1930, and of 160 plants at the close of January 1929. In addition to the capacity of the new plants which began operating during the 12 months ended Jan. 31 1930, the estimates include increased capacity due to extensions and improvements at old plants during the period.

RELATION OF PRODUCTION TO CAPACITY.

Federal Reserve Bank of St. Louis

the month of January, according to returns compiled by the American Petroleum Institute from reports made to it by representative companies. The net change shown by the reporting companies accounts for the increases and decreases in general crude oil stocks, including crude oil in transit, but not producers' stocks at the wells.

Fair Trade in Copper—Demand for Tin Improves—Lead Steady—Zinc Prices Unsettled.

Steady improvement in the demand for fabricated copper featured the market for non-ferrous metals in the past week, reports "Engineering & Mining Journal Metal and Mineral Markets." Business booked by brass mills was the largest in some time. Sales of copper to domestic consumers were in fair volume. Export business continues at a good rate, total sales for the month to date now being 23,000 long tons. Prices held at 18 cents, Connecticut, and 18⅛ cents, Middle West. The report goes on to add:

Total orders for lead booked in the last week were in somewhat larger volume than a week ago. A considerable part of this tonnage was specifications on contract, with cable manufacturers the most active buyers. Most of the orders placed were for February shipment although an occasional sale went through for March and April. Prices were unchanged at 6.10 cents, St. Louis, and 6.25 cents, New York.

Zinc business remained quiet, although the volume was slightly higher than last week. Prices realized were lower, notwithstanding the higher market for zinc concentrate in the Tri-State district. Prompt, as well as April-May shipment zinc sold at 5.15 cents, East St. Louis.

Tin buying improved during the week with a fairly good demand from consuming intersts, largely for early shipment. Prompt tin is in strong hands and there is no disposition to unload at concessions, but forward shipment continues to command a premium. May tin is quoted at from ⅜ to ¾ cents premium over spot. Prices varied within narrow limits, the market gradually working upward from 38½ cents to 39 cents.

Steel Output Increases Slightly—Demand Grows Uneven—Prices Unchanged.

Steel production has made a further slight gain, but has lost the momentum that caused it to rise so rapidly in January, reports the "Iron Age" in its current issue. Demand is uneven, with declines in certain districts offset by increases in others. This contrast is especially sharp in automotive steels. with Pittsburgh reporting heavier, and other centers lighter releases, states the "Age," adding:

Ingot output at Pittsburgh, 75% a week ago, is now nearly 80% of capacity and a similar rate prevails in the Valley. Raw steel producion, however, appears to average 5 to 10 points above, finishing mill operations, indicating the accumulation of surplus metal to meet expected expansion of demand in the spring. At Chicago, new business has receded but specifications fully support an ingot output of 90%. Average raw steel production for the country at large is estimated at 82%, with the Steel Corp. rate at 85%.

Requirements of consuming industries show little change. Motor car manufacturers outside of Ford and Chevrolet are adhering to a cautious policy in ordering steel and their February output will exceed that of January by only a small margin. All automobile companies are stocking up their dealers, but until spring buying by car users gets under way, they will have no accurate measure of ultimate demand. Current automotive consumption of steel is estimated at 60% of normal.

The railroads and heavy construction are still giving the market conspicuous support. With the rail buying movement virtually concluded, orders placed by small Western lines at Chicago totaled 15,000 tons. Business in track supplies aggregated 11,000 tons. Freight cars placed during the week numbered 2,471, including 1,800 for the Louisville & Nashville and 500 for the Canadian Pacific.

Structural steel lettings, at 32,000 tons, compare with bookings of more than 50,000 tons in each of the three previous weeks. New inquiries, at 52,000 tons, were the largest this year. Reinforcing bar awards, totaling more than 8,000 tons. were the heaviest for any week since early in November.

Residential construction remains at a low ebb, and makers of merchant pipe, radiators and sanitary ware have been unable to increase their production schedules.

Tin plate output is undergoing seasonal growth, with two or three mills now running at close to capacity. The outlook in oil country pipe is not promising, but considerable line pipe steel may soon be released to the mills. Fresh inquiries for oil storage tanks, calling for 10,000 tons of plates, have raised the amount of pending tankage steel to 30,000 tons. Steel demand from the farm equipment industry is sustained at a high level.

Finished steel prices, barring scattered irregularities, are holding their own. Scrap has undergone a general advance at Chicago, with heavy melting grade up another 25c. a ton, but other old material markets are largely unchanged, though steady.

Pig iron buying is at close range and foundry melt is uneven, although showing a slow expansion in the aggregate. The greatest improvement is reported at Chicago, where February shipments promise to exceed those of last month by more than 12%. Many producers lack satisfactory backlogs, in view of short-term sales, but active capacity has been augmented by the blowing in of a merchant furnace at Buffalo and a steel works stack in the Youngstown district. A Delaware River cast iron pipe maker has bought 10,000 tons of iron for barge shipment.

Last year's prices on Lake Superior iron ore are likely to be re-established for the coming season. In 1929 the market advanced 25c. a ton, the first price change in four years. As a result of the slowing down of the iron and steel industry in the closing months of last year, consumers have larger stocks of ore on their furnace yeards than they would be normally carrying at this time.

Fabricated steel bookings in January are put at 261,800 tons, compared with 319,550 tons in December and 227,150 tons in November.

Swedish works will supply 1,200 tons of stainless steel plates for the Assouan Dam in Egypt at a price of $584,400.

The "Iron Age" composite prices are unchanged, pig iron at $18 a ton and finished steel at 2.305c. a lb. Pig iron is 38c. a gross ton lower than a year ago; finished steel is $1.72 a net ton lower, as the following table shows:

Finished Steel. Feb. 18, 1930, 2.305c a Lb.	
One week ago	2.305c.
One month ago	2.312c.
One year ago	2.391c.
10 years pre-war average	1.689c.

Based on steel bars, beams, tank plates, wire, rails, blck pipe and black sheets. These products make 87% of the United States output of finished steel.

	High.		Low.	
1929	$18.71	May 14	$18.21	Dec. 17
1928	18.59	Nov. 27	17.04	July 24
1927	19.71	Jan. 4	17.54	Nov. 1
1926	21.54	Jan. 5	19.46	July 13
1925	22.50	Jan. 13	18.96	July 7

Steel ingot production continues to increase, the "Wall Street Journal" of Feb. 18 stated. The U. S. Steel Corp. is now running at between 85% and 86% of its theorectical ingot capacity, compared with between 83% and 84% a week ago and 80% two weeks ago, added the "Journal," further stating:

Independents have not gained as much as the leading interest, because some of the smaller units have not changed their rate. However, for all the independents, the rate is now 77%, against 76% in the preceding week and 73% two weeks ago.

The steel industry is now producing ingots at 81% of capacity, contrasted with 79% to 80% a week ago and about 76½% two weeks ago.

At this time last year the Steel Corp. was running at better than 90%, with independents around 86% and the average was about 88%.

In the corresponding week of 1928 the rate for the Steel Corp. was in excess of 90%. Independents were down to 78%, and the average was 84%.

Considerable significance can be attached to the fact that steel operations have continued to gain in the past week. It was generally agreed in authoritative circles that the test in the steel situation would come about the middle of the current month. If new business was sufficient to keep activities going in this period it was believed that operations would continue to gain into March and reach the peak of the year either next month or April.

Apparently the orders coming to the steel companies have been satisfactory, because the operating managers of the various companies would not continue the high rate of production unless they considered it justified by incoming business and the outlook.

Structual steel has been quite an important factor in recent weeks. Fabricating shops have been figuring on good-sized orders, and they have been placing contracts with the steel makers to cover their requirements. The growing tendency to use steel in construction work of buildings has been one of the outstanding features of the situation in recent months.

There is also a good demand from automobile companies. Since the beginning of the year the buying by the motor makers has been much larger than had been anticipated when the pronounced lull existed late last year. However, the auto demand is not yet as large as it was at this time a year ago.

Railroad contracts are responsible for much of the present steel ingot activity. Leading rail makers are working at a high rate. The carriers are also taking tonnages in tie fastenings, splice bars, nuts, bolts, tie plates, &c., all of which are necessary in connection with the spring work for laying the rails now being delivered.

A feature of the steel situation, which is causing encouragement, is the slight improvement which has been noted in the price structure. There is a tendency to firm moderately in one or two directions, but as yet the degree of stability desired has not been reached. However, reports from a number of districts points out that price concessions are not being granted now as freely as they were late last year and early in January, and it is hoped that with continued activity in production and good buying the price situation will be adjusted upward in the near future.

The "American Metal Market" says:

The steel trade's recovery from the direct influences of the stock market collapse was nearly completed by the end of January and there has been little further recovery to date. In various lines, as in standard pipe, buyers are anticipating Spring less than usual, tending to defer their purchases. In the automobile industry there is less than average production for the time of year.

Other important consuming lines are doing fairly well, quite well for the time of year.

Seasonal improvement is to be expected for many weeksas the peak is reasonably certain to come later than usual. In four of the last six years March has been the peak month in production.

Whether railroad and building requirements can sustain the market until other major consumers, especially the automotive industry, come back is the key to the iron and steel situation, says the "Iron Trade Review" of Cleveland this week. The "Review" continues:

On the whole, producers believe they will. They appraise the present halting condition of the market as the usual vagary of February in demand and production. They look for the month to be a corridor between a fair January and the spring upturn normally starting in March.

Nevertheless, producers are not unmindful of the fact that the support of the railroads is now at its maximum. Through May specification sfor track material and car and locomotive steel will be high, but there will be practically no replacement of this tonnage. Likewise, much of the structural material for spring building projects already has been placed.

With the general manufacturing trade proceeding cautiously, it is increasingly apparent that whatever added vigor accrues to the market in the next 60 days must come from the automotive industry in the first instance and the oil, water and gas industry, as reflected in demand for pipe, in the second.

There is no diminution of the general expectation that 1930 will be the reverse of 1929 and build up to a market climax rather than achieve it in the early months, but some who were optimistic when January opened so briskly now expect the process to be slower. Considered in relation to postwar conditions, 1930 may be nearer a "normal" year than 1929. Indeed, despite the poor showing as contrasted with a year ago, current pig iron production measures up to the average of the last ten Februaries, while the steel ingot rate is 15% ahead.

Determination to advance prices for the second quarter is manifest, especially among the flat-rolled steel interests, as failure to regain shortly the ground lost last month means postponement of the effort until fall. Concessions are less frequent in sheets and strip, except to the automotive trade. More irregularities have appeared in plates and shapes in some districts, increasing the spotty effect of the heavy finished steel market, but to the general trade bars, plates and shapes are on the basis of 1.85c., Pittsburgh.

Federal Reserve Bank of St. Louis

Structural steel awards this week at 28,000 tons show a reduction from the 60,662 tons of last week but exceed the 21,500 tons of a year ago. Bridge work continues an important factor, with an 11,000-ton office building and a 4,500-ton subway section let in New York. Slightly more inquiry is pending.

February purchases of freight cars passed 16,400, the largest since October, when the Louisville & Nashville placed 1800. Canadian Pacific has ordered 500, including passenger. Pending passenger car inquiry at 275 is the heaviest in months. Chicago mills have booked 12,500 tons of rails and 12,000 tons of track fastenings.

Ten thousand tons additional inquiry for tanks has come out at Chicago, making 30,000 to 35,000 tons pending there. Manufacturers' wire sales are fair in all districts, while nail demand lags. Sheet buying is spotty, being lower this week at Youngstown and higher at Pittsburgh. Line pipe is more active, some large inquiries promising to mature and 49 miles of 20-inch line for Cities Service Co. subsidiaries being booked by the A. O. Smith Corp.

Shipments of pig iron continue to expand moderately, with small sales being made for second quarter. Pig iron generally presents a more stable, solid market than finished steel. Prices on pig iron are unchanged save for a $1 reduction in Canada. Coke continues dull and unchanged. Scrap dealers are more confident, refusing to sell short and asking more than consumers are now willing to pay. Some producers are piling semi-finshed steel.

Steel corporation subsidiaries this week are at 85-86% against 83 last week and 90 a year ago. Independent producers are at 77%, compared with 76 last week and 86 a year ago. This places the entire industry at 81%, contrasted with 79-80 a week ago and 8 a year ago. Chicago mills are close to 90%, Pittsburgh at 75, Youngstown at 76 and Buffalo at 74. At Cleveland 30 out of 34 open hearths are active.

With European iron and steel markets quiet, producers abroad are bending their energies to consummating mergers and perfecting selling syndicates. Reports that American producers who are large factors in the export field will join European interests in a cartel to stabilize international competition and prices are founded more on hope than on fact at this time. Britain produced slightly more pig iron and steel ingots in January than December, but fewer units were active Feb. 1 than Jan. 1. British imports last month expanded faster than exports.

For the fourth consecutive week the "Iron Trade Review" composite of 14 leading iron and steel products stands at $35.24, indicating the downward price movement is at or near bottom. This compares with an average of $35.56 for January.

Production of Bituminous Coal and Pennsylvania Anthracite Declines.

According to the United States Bureau of Mines, Department of Commerce, 10,936,000 net tons of bituminous coal and 1,745,000 tons of Pennsylvania anthracite were produced during the week ended Feb. 8 1930, as compared with 11,628,000 tons of bituminous coal and 1,861,000 tons of Pennsylvania anthracite in the preceding week and 12,070,000 tons of bituminous coal and 1,829,000 tons of Pennsylvania anthracite during the week ended Feb. 9 1929.

For the coal year to Feb. 8 1930, the production of bituminous coal totaled 449,510,000 net tons as against 436,158,000 tons in the coal year to Feb. 9 1929. The Bureau's statement says

BITUMINOUS COAL

The total production of soft coal during the week ended Feb 8 1930, including lignite and coal coked at the mines, is estimated at 10,936,000 net tons. Compared with the revised estimate for the preceding week, this shows a decrease of 692,000 tons, or 6%. Production during the week in 1929 corresponding with that of Feb. 8 amounted to 12,070,000 tons.

Estimated United States Production of Bituminous Coal (Net Tons)'

	1929-30		1928-29	
Week Ended—	*Week.*	*Coal Yr.to Date.*	*Week.*	*Coal Yr.to Date.*

a Revised since last report. b Subject to revision.

The total production of soft coal during the present coal year to Feb. 8 (approximately 265 working days) amounts to 449,510,000 net tons. Figures for corresponding periods in other recent coal years are given below:

1928-29 ---------436,158,000 net tons
1927-28 ---------407,456,000 net tons
1926-27 ---------500,861,000 net tons
1925-26 ---------460,395,000 net tons

As already indicated by the revised figures above, the total production of soft coal for the country as a whole during the week ended Feb. 1 is estimated at 11,628,000 net tons. Compared with the output in the preceding week, this shows a decrease of 75,000 tons, or 0.6%. The following table apportions the tonnage by States and gives comparable figures for other recent years:

Estimated Weekly Production of Coal by States (Net Tons).

Anthracite Shipments Declined in January 1930.

Shipments of anthracite for the month of January 1930, as reported to the Anthracite Bureau of Information, Philadelphia, amounted to 5,405,788 gross tons. This is a decrease as compared with shipments during the preceding month of December 1929, of 425,746 tons, and when compared with the month of January 1929, shows a decrease of 406,184 tons.

Shipments by originating carriers (in gross tons) are as follows:

	Jan. 1930.	*Jan. 1929.*	*Dec. 1929.*	*Dec. 1928.*

Current Events and Discussions

The Week with the Federal Reserve Banks.

The consolidated statement of condition of the Federal Reserve banks on Feb. 19, made public by the Federal Reserve Board, and which deals with the result for the 12 Reserve banks combined, shows a decrease for the week of $5,000,000 in holdings of discounted bills and an increase of $5,000,000 in holdings of bills bought in open market and of $2,100,000 in Government securities. Member bank reserve deposits increased, $7,800,000, Government deposits $37,200,000 and cash reserves $3,500,000, while Federal Reserve note circulation declined $26,300,000. Total bills and securities were $5,100,000 above the amount reported a week ago. After noting these facts, the Federal Reserve Board proceeds as follows:

The principal changes in holdings of discounted bills for the week were decreases of $11,900,000 at the Federal Reserve Bank of Chicago, $7,100,000 at Kansas City and $5,200,000 at Cleveland, and increases of $9,500,000 at New York and $4,200,000 at Dallas. The System's holdings of bills bought in open market increased $5,000,000 of Treasury notes $14,400,000 and of United States bonds $200,000, while holdings of Treasury certificates and bills declined $12,500,000.

Federal Reserve note circulation declined $14,500,000 during the week at the Federal Reserve Bank of New York, $6,500,000 at San Francisco and $5,100,000 at Cleveland, and increased $7,300,000 at Dallas.

The statement in full, in comparison with the preceding week and with the corresponding date last year, will be found on subsequent pages—namely, pages 1235 and 1236.

A summary of the principal assets and liabilities of the Reserve banks, together with changes during the week and the year ended Feb. 19, is as follows:

Returns of Member Banks for New York and Chicago Federal Reserve Districts—Brokers' Loans.

Beginning with the returns for June 29 1927, the Federal Reserve Board also commenced to give out the figures of the member banks in the New York Federal Reserve District, as well as those in the Chicago Reserve District, on Thursdays, simultaneously with the figures for the Reserve Banks themselves, *and for the same week*, instead of waiting until the following Monday, before which time the statistics covering the entire body of reporting member banks in 101 cities cannot be got ready.

Below is the statement for the New York member banks and that for the Chicago member banks thus issued in advance of the full statement of the member banks, which latter will not be available until the coming Monday. The New York statement, of course, also includes the brokers' loans of reporting member banks. The grand aggregate of these brokers' loans the present week shows an increase of $44,000,000, the total on Feb. 19 1930 being $3,494,000,000 as compared with $6,804,000,000, the high record in all time established on Oct. 2 1929 and $5,477,000,000 on Feb. 20 1929.

Complete Returns of the Member Banks of the Federal Reserve System for the Preceding Week.

As explained above, the statements for the New York and Chicago member banks are now given out on Thursdays, simultaneously with the figures for the Reserve banks themselves, and covering the same week, instead of being held until the following Monday, before which time the statistics covering the entire body of reporting member banks, in 101 cities, cannot be got ready.

Beginning with the statement of Jan. 9 1929, the loan figures exclude "Acceptances of other banks and bills of exchange or drafts sold with endorsement," and include all real estate mortgages and mortgage loans held by the banks; previously acceptances of other banks and bills sold with endorsement were included with loans, and some of the banks included mortgages in investments. Loans secured by U. S. Government obligations are no longer shown separately, only the total of loans on securities being given. Furthermore, borrowings at the Federal Reserve are not now subdivided to show the amount secured by U. S. Government obligations and those secured by commercial paper, only a lump total of the two being given. The figures have also been revised to exclude a bank in San Francisco district, with loans and investments of $135,000,000 on Jan. 2 1929, which was merged with a non-member bank.

In the following will be found the comments of the Federal Reserve Board respecting the returns of the entire body of reporting member banks of the Federal Reserve System for the week ended with the close of business Feb. 12:

The Federal Reserve Board's condition statement of weekly reporting member banks in leading cities on Feb. 12 shows decreases for the week of $27,000,000 in loans and investments, $33,000,000 in net demand deposits, $7,000,000 in time deposits and $9,000,000 in Government deposits, and an increase of $12,000,000 in borrowings from Federal Reserve banks.

Loans on securities decreased $17,000,000 at reporting member banks in the Chicago district and $10,000,000 at all reporting banks. "All other" loans declined $27,000,000 at all reporting banks and $28,000,000 in the New York district, and increased $11,000,000 in the Boston district.

Holdings of U. S. Government securities increased $18,000,000 in the New York district and $19,000,000 at all reporting banks, while holdings of other securities show a decline of $8,000,000.

The principal changes in borrowings from Federal Reserve banks for the week comprise an increase of $30,000,000 at the Federal Reserve Bank of New York and decreases of $9,000,000 each at Chicago and San Francisco.

A summary of the principal assets and liabilities of weekly reporting member banks, together with changes during the week and the year ending Feb. 12 1930, follows:

	Feb. 11-12 '30.	Increase (+) or Decrease (—) Since Feb. 5 1930.	Since Feb. 13 1929.
	$	$	$
Loans and investments—total	22,100,000,000	—27,000,000	—140,000,000
Loans—total	16,588,000,000	—37,000,000	+358,000,000
On securities	7,681,000,000	—10,000,000	+166,000,000

Due to banks	2,848,000,000	—50,000,000	—79,000,000
Borrowings from Fed. Res. banks	185,000,000	+12,000,000	—484,000,000

Summary of Conditions in World Markets, According to Cablegrams and Other Reports to the Department of Commerce.

The Department of Commerce at Washington releases for publication Feb. 22, the following summary of market conditions abroad, based on advices by cable and radio:

ARGENTINA.

Business is still dull in Argentina. The gold deposited with Argentine embassies and legations reached the sum of 15,556,000 gold pesos. A first official estimate is to the effect that the area planted to corn this year amounts to 5,521,000 hectares, an increase of 13% over the previous year, but that owing to the drought, heat and smut, the output will be smaller. Local tire prices increased 10%, but the discount is the same.

AUSTRALIA.

The Federal Loan Council at a recent conference voted to further reduce Federal loans for the time being, and the Commonwealth Bank has announced that at £7,000,000 gold shipment will be sent to London in the near future to meet accruing obligations. Wool continued firm at recent sales. The embargo on peanuts has been extended.

BELGIUM.

The rather quiet situation of Belgian industries has continued as expected with no change likely before spring. Metallurgy has become slightly more optimistic, owing to progress in the steel cartel negotiations and of price fixing at higher levels. The demand for industrial coal has remained only moderate as a result of industrial conditions and continued mild weather has prevented any quickening in the demand for domestic grades. The important textile group of industries has encountered financial difficulties but support by the banks has been extended and a one year moratorium has been granted by the principal creditors. Retail trade is extremely dull. The Belgian bourse is stagnant and the expected improvement has failed to materialize. Call money rates have strengthened during the past two weeks and now range from 2½ to 3%; funds, however, remain plentiful. A ministerial decree of February 12 authorizes the Credit Communal de Belgique to float an issue of 500,000,000 francs of internal 5½% bonds, about 300,000,000 francs of this amount will probably be issued around March 1.

BRAZIL.

Indications point to a slight improvement in import business in Rio de Janeiro. In Santos, coffee exports continue heavy and the market firm. Exchange has been slightly weaker. On Feb. 13, $6,000,000 worth of gold was shipped to the United States, principally by the Bank of Brazil.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

BRITISH MALAYA.

Rubber estate returns indicate declining production during the early wintering season. As yet there has been no appreciable effect on the output of tin from the cessation of Sunday mining operations. Local markets are quiet, awaiting recovery in rubber and tin prices with some optimism.

CANADA.

The seasonal revival in general activity in the past few weeks has bettered early expectations, but it is probably less pronounced than at the beginning of 1929. Trade is particularly good in the Maritime Provinces, with Nova Scotia factories and shipyards well employed. Both wholesale and retail ines in Winnipeg show improvement and good conditions are reported from the Peace River district and from Southwestern Alberta. Saskatchewan Province is estimated by one authority to have suffered a 25% decline in purchasing power as the result of the low wheat harvest in 1929. Pig iron demand is reported to have improved in January. Carbon black prices have dropped one cent per pound and buyers are reported to be operating in the open market and not inclined to commit themselves to contracts. In the light of the dependence of the general trade outlook on the wheat export movement, returns of January shipments of that commodity are not encouraging; the 4,994,000 bushels exported during the month are lower by 76% than shipments in the first month of 1929; flour exports of 503,000 barrels are down 46% in the same comparison. Lakehead wheat stocks on Feb. 7 totaled 50,948,994 bushels. Trade Commissioner Brookhart at Winnipeg reports that the 1930 budget for both Manitoba and Alberta show substantial increases in the estimates of receipts and expenditures. No important change is announced in Alberta taxes, but the gasoline tax in Manitoba has been raised from 2 to 5 cents per Imperial gallon. Trade Commissioner Sabine, Montreal, reports the announcement of a 1930 land service program by the Canadian Pacific Ry. Co. involving expenditures of approximately $50,000,000, which may later be supplemented. Approximately $14,500,000 will be required for purchases of new equipment and the conversion and improvement of existing passenger, baggage and freight equipment. Additional rail facilities will be provided for Western Canada at an estimated cost of $10,000,000, and for Eastern Canada at an estimated cost of $8,000,000. Other expenditures listed include an appropriation of $3,500,000 for hotels.

CHINA.

Business in general in the Shanghai area continues extremely dull, with immediate outlook unfavorable. Based on former customs tariffs, January collections at Shanghai show an import decrease from one year ago of 36% and a decline of 3% in exports. January coastal trade declined approximately 25% and transit dues 47%. Shipments of merchandise from Shanghai to the United States during January totaled $4,480,000, compared with $5,124,000 in January of last year. Through expresss trains are operating on the Peking-Hankow and Tientsin-Pukow lines, but little freight traffic is being handled as both lines, including the Lughai line, are given over mainly to military purposes. Customs collections at Tsingtao during 1929 are reported by Consul W. Roderick Dorsey to total 6,450,000 haikwan taels ($4,128,000), an increase of 95% over the previous year, due largely to a heavier import and export traffic. The volume of dutiable import commodities increased by approximately 14%. Business in Manchuria continues stagnant, due to Chinese holidays and unfavorable exchange rates. Merchants in North Manchuria are optimistic regarding future business, but no immediate orders are in sight. Less optimism, however, is manifested by merchants in South Manchuria.

CZECHOSLOVAKIA.

Industrial activity in Czechoslovakia is uneven, with a continued downward tendency in many lines, notably coal, sawmills, paper, textiles, shoes, hats and chemicgls. December pig iron output amounted to 138,000 tons and that of steel to 148,000, representing decreases of 3,000 and 30,000 tons, respectively, in a month. While the latest unemployment figure is only 50,000, it represents a 20% increase in one month. December exports were valued at 2,151,000,000 crowns and imports at 1,842,000,000 crowns, bringing the total favorable balance for 1929 to 497,000,000 crowns, as compared with 2,016,000,000 crowns in 1928. Raw sugar production for the quarter ended Dec. 31 totaled 1,013,000 metric tons, or 1.4% below the corresponding period of 1928; exports during the same quarter amounted to 230,000 tons, or 18% lower than in the 1928 period.

FINLAND.

Finnish imports of agricultural machinery are expected to decrease because of stocks on hand and inability of the rural population to make purchases; imports of sawmill machinery are falling off, and the market for most import articles for consumption is depressed, with fair stocks on hand; general improvement is not expected within six months. The steel industries continue depressed and most of the export industries are affected by weak markets and severe competition. The lack of frost and snow has retarded lumbering operations and accentuated unemployment. The financial market remains tight; both the number of bankruptcies and the amount of protested bills attained record totals for a single month as well as for a whole year. Considerable interest is being displayed in financial circles in the possibility of securing long-term State and private loans from France. The cost-of-living index, the import and export price indexes, wholesale turnover and foreign shipping continued their decline during December. The stock exchange index rose 1 point, with turnover 50% less than in November. Both imports and exports decreased during December, with an unfavorable balance for the first time since May. The total value of foreign trade in 1929 was 6% less than in 1928, but the trade balance was less unfavorable by 1,200,000,000 marks. Total trade with the United States was over 20% lower in value than in 1928. Note circulation at the end of November was the lowest since January 1927. The 1929 stock exchange turnover was one-third of the 1928 total. Wholesale turnover and foreign shipping decreased slightly in 1929. The cost-of-living index in December was the lowest since May 1928. The import and export price indexes for 1929 were below those of 1928.

FRANCE.

The wholesale price index at the end of January showed a further decline to 576 as compared to 588 a month earlier. The index for national products was 606 as against 620 in the previous month and that for imported products 521 as against 530. On a gold basis the general index declined to 117 from 119. The Paris retail price index at the end of January was 609 as compared with 614 a month earlier, the first decline to be recorded over a considerable period. On a gold basis the retail index amounted to 124 as against 125 for December.

INDIA.

Customs revenue for January indicated a considerable increase in imports for that month compared with December and for January, 1929. According to indications, receipts of sugar, pneumatic tires, tubes, railway plant, and rolling stock were heavier, and considerable increases were shown in exports of jute and rice. Imports of iron, steel, cutlery, hardware, automobiles, motor cycles, mineral oil, yarn, colored piecegoods, tobacco and matches declined in January.

JAPAN.

Commercial activity in Japan is at a low ebb pending results of the general election to be held on February 20. Total foreign trade for the first ten days of February amounted to 87,614,000 yen. The import excess for the same period was 11,100,000 yen. The Bank of Japan note issue has decreased 78,000,000 yen since the removal of the gold embargo on Jan. 11. Since that date, gold to the amount of 61,000,000 yen has been exported. (1 yen equals $0.4912 at current rate of exchange.). A further curtailment of 3% production is advocated, bringing total curtailment to date up to 41%. It is quite probable that the total production restriction will reach 50%.

NETHERLAND EAST INDIES

The Java Bank rate was lowered by ½% on February 10 due to improvement in the Netherlands exchange and to a lowering of the European rate. The Java Bank discount rate is now 5%. According to local trade estimates the 1929 Sumatran tobacco crop will equal about 234,500 bales.

PANAMA.

Total imports into the Republic of Panama during the calendar year 1929 amounted to $18,400,000. Of this total $12,360,000 came from the United States. As compared with 1928 the total imports increased by $2,060,000. A substantial part of this increase is attributed to the construction work carried on throughout the year. The President of Panama has signed a contract authorizing the Scadta Airways to operate air linesover the territory of Panama. It is stated that the Panama Railroad has furnished $500,000 to be used in the erection of Canal Zone quarters on the Pacific side of the isthmus. The Canal Zone is considering the erection of a building costing between $200,000 and $300,000 to house steamship companies operating on the isthmus.

PERU.

The Peruvian Congress, prior to its adjournment on Feb. 8, passed all the financial bills which were under consideration. The moreim portant of these bills were the stabilization of the Peruvian pound (Lp) at $4.00, changes in the Reserve Bank Laws to enable it to function under the new monetary standard, and the authorization to pay off short term loans due the National loan syndicate. As of Jan. 31, the gold reserve was Lp. 5,092,104, note circulation of the Reserve Bank totaled Lp. 6,101,588 and bank clearings were Lp. 6,839.060.

The Department's summary also includes the following with regard to the island possessions of the United States:

PHILIPPINE ISLANDS.

General business is sluggish on account of the continued low prices of staple export commodities. Heavy stocks of imported merchandise, however, are gradually being worked down as a result of lower arrivals. The credit situation and collections have improved slightly in rice districts in Northern Luzon but in all abaca and coconut areas situation is unimproved with collections bad and credits much restricted. The textile market continues unsatisfactory and local buyers are holding off awaiting the trend of market conditions in the United States. Sugar grinding is well advanced and the principal centrals have milled about 55% of the estimated crop. Very poor demand and heavy arrivals during the past fortnight, with a probability of continued heavy shipments for the next three weeks, are causing abaca producers and dealers to release stocks at unprofitable prices. Very few sellers are willing to contract ahead on declining price quotations. Receipts of abaca during the week ended Feb. 10 were 34,030 bales and exports amounted to 39,105 bales, of which 13,052 went to the United States. Stocks are reported as amounting to 176,625 bales. Production of copra continues very light and only three oil mills are operating. All buying markets are weak and to-day's prices for warehouse grade resecado are, Manila, Cebu, and Legaspi, 10.875 pesos per picul; and Hondagua, 10.625 pesos. Receipts of copra at Manila during the first 11 days of February totaled 70,669 sacks.

Directorate of Bank for International Settlements Nearly Filled—Messrs. Moreau and Brincard to Serve for France—Addis for Britain—McGarrah and Fraser for America.

The makeup of the board of directors of the Bank for International Settlements has been virtually completed, it was learned in authoritative circles at Washington on Feb. 18 (we quote from the New York "Herald Tribune"), and an announcement of the names of the directors chosen by the Governors of the several Central Banks is expected to be made from Rome next week. The further account in the "Herald Tribune" from Washington Feb. 18 stated:

The French directors, it is learned definitely, will be Emile Moreau, Governor of the Bank of France; Baron Brincard, President of the Credit Lyonnais, one of the largest commercial banks in Paris, and Baron der Vogue, President of the Suez Canal Co.

Belgium's Two Directors.

One of the two English directors will be Sir Charles Addis, Vice-President of the Hongkong and Shanghai Bank, who was a delegate, following the death of Lord Revelstoke, to the experts' conference which drew up the Young plan in Paris a year ago. Whether Montagu Norman, Governor of the Bank of England, will exercise his prerogative, as Governor Moreau is exercising his, to name himself to the International Bank's Board is not yet known, but it is considered quite probable.

Belgium's two directors will be Emile Francqui, Vice-Governor of the Societe Generale de Belgique, Brussels, who was a member of both the Young and Dawes plan committees, and Paul van Zeeland, of the Bank of Belgium, who is now a member of the sub-committee which is completing plans for the setting up of the new bank.

The United States will have Gates W. McGarrah, now Chairman of the Board and Federal Reserve Agent of the Federal Reserve Bank of New York and Leon Fraser, New York attorney who for three years was general counsel for the Dawes plan, on the board of directors of the international bank.

Meeting in Rome February 26.

Indication has not yet come from Germany as to the names of the three directors which the country will be allowed to have on the Bank's board. Well informed persons here have heard rumors of the identity of the German directors, but as the reports are unofficial it is not known how much faith should be placed in them. No information is yet available regarding Italy's

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

directors, although it is held quite probable that Governor Stringher of the Bank of Italy will himself serve as one of the directors.

Governor Norman of the Bank of England, Governor Moreau of the Bank of France, Governor Franck of the Bank of Belgium, Governor Schacht of the Reichsbank and Governor Stringher of the Bank of Italy are scheduled to meet in Rome on Feb. 26 to compile finally the list of directors of the new Bank. Inasmuch as it is already agreed—except, perhaps, in the case of Germany—just who the Bank's directors will be, it is thought that the Governors will announce the names of the international bank's directors on the first day of their meeting in Rome.

Another matter for the Governors to decide at their Rome meeting is whether Pierre Quesnay, of the Bank of France, will receive the appointment as managing director of the new Bank.

It was originally planned that the Central Bank Governors would meet in Rome on Feb. 15, but at the last moment a postponement until next week was asked by one of the Governors.

The information here is that Mr. McGarrah and Mr. Fraser most likely will sail for Europe within the next two weeks, probably around March 1, and will proceed to Basle, Switzerland, where the new bank will be located, for the first meeting of directors probably on March 10. At that meeting the directors are scheduled to proceed formally with the election of Mr. McGarrah as Chairman of the Board and President of the Bank of International Settlements. It is expected that from among the directors several Vice-Presidents will be chosen. The information reaching Washington is that Mr. Fraser will be selected Deputy President.

Moreau Helps Stabilize Franc.

Emile Moreau has been Governor of the Bank of France, one of the most important banks of issue in the world, since 1926, having been appointed by Premier Caillaux to succeed Governor Robineau. Governor Moreau played a prominent role in the stabilization of the French franc and his work in defending the franc and insuring its stability was recognized by his promotion in Feb. 1927, to the rank of Grand Office of the Legion of Honor.

M. Moreau began his banking career in 1906 when he was appointed a director of the Bank of Algeria. Five years later he was made its director general. As Governor of the Bank of France M. Moreau occupies an unusually important role in world finance because of the large gold reserve now at the institution's command.

Baron Brincard is one of France's commercial bankers by virtue of the position he holds as President of the administrative council of Credit Lyonnais. Baron Brincard also is an administrator of the Societe Fonciere Lyonnaise, of the Credit Union of National Industry and of the Compagnie des Forges de Chatillon. He is an officer of the Legion of Honor.

Sir Charles Stewart Addis is a British financial authority of international reputation. Born in Nov. 1861, he received an appointment in 1830 to the London office of the Hongkong and Shanghai Bank. In 1886 he was sent to China as Manager of the Bank's Peking branch, where he remained until 1905, when he was recalled to become joint Manager in London. In 1911 he was appointed London Manager of the Hongkong and Shanghai Bank and in 1913 was knighted.

After the Dawes Plan was adopted, he was made British representative on the general council of the Reichsbank, a position which Mr. McGarrah has held for the United States. He was appointed alternate to the experts' conference in Paris early last year and upon the death of Lord Revelstoke he was named head of the British delegation to the conference.

The board of directors of the International Bank will have no more colorful member than Emile Francqui, of Belgium, former Minister of Finance, veteran of the Congo and China, who, because of his efforts to stabilize the Belgian franc, was to Belgium what Poincare was to France. He was described at the Paris conference where he was the chief Belgian delegate, as "a physically magnified Poincare, sharp and unreserved where the French premier is cold and impersonal. M. Francqui has been described as burly of figure, burly of voice." He is rated as the richest man in Belgium and among the 12 richest men in Europe. When M. Franck sees fit to retire as the Governor of the Bank of Belgium, M. Francquil is slated to succeed him.

In 1924 M. Francqui was a member of the committee which drew up the Dawes Plan. Two years later, when the Belgian currency began its rapid descent he was appointed Minister of Finance and in a few weeks succeeded in stabilizing the currency and floating the funded debt. After having completed this task he resigned his portfolio and resumed his business career. He is now Vice-Governor of the Societe Generale de Belgique.

Paul Van Zeeland was associate delegate to the Baden-Baden conference last Fall at which the statutes of the Bank for International Settlements were drawn up. He attended the later meetings of the Bank's organization committee at The Hague last month and was appointed a member of the sub-commitee to perfect the final plans for the opening of the Bank in April.

Jacob Gould Schurman Calls Young Reparations Plan Best—But Ex-Ambassador Says Test of Time is Needed on Germany's Capacity to Pay.

The Young Plan for the settlement of German reparations s "probably the best settlement that could have been worked out at the present time" and time alone can correct whatever deficiencies it may have. Dr. Jacob Gould Schurman, until recently American Ambassador to Germany, said at a dinner given in his honor on Feb. 17 in the Hotel Astor, New York, by the Board of Trade for German-American Commerce. The New York "Times" of Feb. 18 is authority for the foregoing and its account goes on to say:

Predicting the early ratification of the plan and the adoption of all auxiliary enabling legislation by the Reichstag, Dr. Schurman said that "time will tell us—and that before many years have elapsed—if the Young Plan is to be brought into better harmony with Germany's future capacity to pay."

"The conferences of government representatives and financial experts who have formulated the Young Plan have undoubtedly done a good piece of work," Dr. Schurman said. "It is probably the best settlement that could have been worked out at the present time. While Germany disclaims responsibility for starting the World War, she recognizes that having lost it she must in accordance with the hard practice of the past, pay such tribute as the victorious nations impose upon her to the limit of her ability.

Bank Could Handle Emergencies.

"The experts differ as to the ability of Germany to carry for two generations the burdens formulated in the Young Plan. But the Bank for International Settlements may be regarded as a standing committee of financial experts, competent to deal with emergencies as they may arise from time to time. Germany will in the next few weeks enact the legislation necessary to put the Hague agreements into effect and with them the withdrawal of foreign troops from German soil, foreign control of German finances and foreign intervention in the administration of German affairs will entirely disappear."

Dr. Schurman regarded this achievement as due to the wise and constructive "real politik" pursued by post-war Germany, notably through the instrumentality of the late Dr. Gustav Stresemann, who for more than five years guided German foreign policy. Asserting that the nationalist forces of Germany had failed to understand the real nature of the situation confronting Germany or to grasp the possibilities of a policy of understanding and fulfillment as a means of rehabilitating the nation and restoring Germany as a power among the family of nations, Dr. Schurman spoke of the great services performed in this respect by the Centre Party and the parties of the Left. It is these parties, led by men like Wirth and Rathenau, who prepared the road for the later successes of Dr. Stresemann, the former Ambassador asserted. Of Dr. Stresemann he said that "his name will be writ large in the history of his country—one of the first, perhaps the first, after the supreme name of Hindenburg, the Washington of modern Germany."

Reviews Post-War Problems.

Dr. Schurman reviewed at length the developments of Germany after the war, the trials and perils of the inflation period and of the Ruhr occupation, and the gradual ascendancy of Germany to her present improved condition.

"These were great years for Germany," Dr. Schurman said in speaking of the period of Dr Stresemann's work. "They were heartening and encouraging to the German people. Nay, more, they furnished proof and illustration of the mettle of which the German people are made and the great--I had almost said the super-human--tasks of which they are capable."

About 300 persons attended the dinner. Others who spoke were Acting Mayor Joseph V. McKee; Wolf von Dewall, Editor of the "Frankfurter-Zeitung," who is in the United States on a lecture tour for the League of Nations Association; Professor A. Busse of Hunter College, and Justice Edward J. Gavegan of the Supreme Court. Herman A. Metz, President of the Board of Trade, was toastmaster.

Plea to German Banks for Carrying Out of Young Plan—Nation's Leaders Sign Manifesto to Financial Houses.

The following Associated Press accounts from Berlin on Feb. 19 appeared in the New York "World":

A nationwide call to Germans to put their financial house in order, enabling the Reich to carry out the Young plan, was issued in manifesto form to-day, bearing the signatures of hundreds of leading figures in Germany.

Although the appeal did not specify what measures were to be adopted, it urged the general necessity to place the Republic's financial and economic system upon an entirely different basis, the keynote being that no money must be spent without adequate returns.

The Young plan cannot be fulfilled unless a large surplus of exports is secured, the manifesto said. Therefore, German production must be put in a position to meet foreign competition both at home and abroad. The manifesto also urged taxation reform, relief for industry from crushing burdens and far reaching aid to agriculture.

The signatories included Dr. Hjalmar Schacht, head of the Reichsbank and leading industrial magnates such as Carl Duisberg and Conrad von Borsig, bankers such as Max Warburg and Jacon Goldschmidt. Other signatories were Dr. Hugo Echener, former Chancellor Luther, Ludwig Kastl and Carl Melchoir, who were members of the Paris Reparations Conference; Count Keyserling, Adolf von Harnack and Phillip Heineken, President of the North German Lloyd.

Former Chancellor Joseph Wirth, Minister of occupied territories, and the Nationalist die-hard Baron Axel Von Freytag-Loringhoven nearly came to blows in Reichstag committee session to-day.

The dispute came at the end of debate on the Young plan and resulted from allegations regarding leakages of confidential information to Nationalist newspapers. Friends intervened when recriminations became personal and the two men started for each other with clenched fists.

London Silver at New Low Record.

A Central News cablegram from London Feb. 20 to the New York News Bureau said:

Bar silver quotations to-day were: Spot 19 13-16d. and forward 19 11-16. both off ⅛d. These are new low record figures.

The previous day (Feb. 19) the London advices to the Bureau stated:

Bar silver quotations to-day were: Spot 19 15-16d., off ⅛d., and forward 19 13-16d., down 3-16d. These figures equal the low record prices made on Feb. 4 last.

New York Bar Silver at New Low.

The New York News Bureau Feb. 20 said:

Handy & Harman quoted commercial bar silver per .999 fine ounce at 42⅜c., off ¼c., and Mexican dollars at 31⅜c., a deline of ¼c. These prices are anew low record.

Handy & Harman yesterday (Feb. 21) quoted commercial bar silver per .999 fine ounce at 43¼c., up ⅜c., and Mexican dollars at 32c. up ⅛c.

Sir Esme Howard, British Ambassador to U. S. Terminates Diplomatic Career.

A farewell luncheon by the British Empire Chamber of Commerce to Sir Esme Howard, British Ambassador to the United States, was given yesterday, Feb. 21, at the Whitehall Club, 17 Battery Place, New York City. Among other guests were Sir John Broderick, Commercial Counsellor, British Embassy, Washington, D. C., Sir Mark Sheldon of Sydney, Australia, and Sir Harry Armstrong, Consul General, New York. The previous day (Feb. 20) Sir Esme delivered an address at a dinner given in his honor at the Hotel Plaza, New York, by the Pilgrims of the United States.

Federal Reserve Bank of St. Louis

A dispatch from Washington, Feb. 20 to the New York "Times" said:

Sir Esme Howard, for the last six years British Ambassador to the United States, closed his career here to-day and went to New York City preparatory to sailing for England Saturday on the Majestic. His departure marked the end of an active diplomatic career, extending over 44 years, as he is retiring under the age law. He is 66 years old.

Sir Esme presented his letters of recall to President Hoover at the White House and then said farewell to Joseph P. Cotton, Acting Secretary of State.

With Lady Isabella, he departed for New York this afternnon, being escorted to the train by the staffs of the British Embassy and the legations of the British dominions, representatives of the Foreign Diplomatic Corps, and by Mr. Cotton and Wilbur J. Carr, Assistant Secretary of State, as the representatives of the American Government.

Death of Alexander P. Moore, Ambassador to Poland.

Alexander P. Moore, United States Ambassador to Poland, died in Los Angeles on Feb. 17. Associated Press advices from that city, said:

A seemingly minor cold, which rapidly developed into bronchial pneumonia, caused the death of the former Pittsburgh newspaperman, who recently was appointed America's first Ambassador to Poland. His illness never permitted him an opportunity to serve in the foreign post. Prior to this last appointment he had served as Ambassador to Spain and Peru.

From a Los Angeles dispatch to the New York "Times" we take the following:

Ambassador Moore, who had been seriously ill since Feb. 3, sank into a coma early this morning. As the morning hours passed he began sinking rapidly and it was apparent that death was near. Several relatives were at the bedside when he died, at 12.25 p. m.

An examination of Mr. Moore two weeks ago showed him to be suffering acutely from a tubercular infection, which for several months he had mistaken for a severe cold. He was removed from Palm Springs to the Pottenger Sanatorium at Monrovia, and last Friday was brought to the California Hospital here in a critical condition.

Last August, while on leave from his duties as Ambassador to Peru, Mr. Moore went to the home of Charles Chaplin, where he was under the care of a nurse for several weeks, in an attempt to regain his health. From there he went to Palm Springs and later to the Monrovia Sanatorium, where the tubercular condition was disclosed. An attack of bronchial pneumonia hastened his death.

The body will be taken to Pittsburgh for burial.

French Loans Made In U. S. May Be Refunded—M. Cheron Maps $275,000,000 Redemption of Issues Bearing High Interest.

Copyright advices as follows from Paris Feb. 17 are taken from the New York "Herald Tribune":

The French Treasury's sinking fund for the public debt may negotiate in the course of this year conversion or advanced refunding of loans granted by American banks to French State railways, cities and shipping companies.

These were arranged at the time when France was in a difficult financial situation and could obtain foreign credit only at high interest rates, and most of these loans were issued at a rate ranging from 6½% to 7½. Now that money is very cheap in France and other markets and the Treasury holds in New York $400,000,000 in foreign currency, it is urged that part or all of this sum should be employed to repay loans before they mature.

During the financial debate at the Chamber of Deputies, M. Cheron declared that if he has any extra money he will use it not to reduce French taxes but to liquidate some of her foreign debts.

"I would like," he said, "to refund $75,000,000 of the 1928 loan and to buy on the American market 7½% loans of $100,000,000 each issued in 1921 and 1924."

Some financial experts propose to have these American loans introduced on the French Bourse, so that they could pass into French hands. Among these foreign loans, the high interest of which is worrying the French Treasury, are about 30 loans emitted in New York or Amsterdam. The most important among them are the three various types of French rentes, at 5½, 7½ and 7%; five loans to the Eastern Northern Lyons-Mediterranean and Orleans Railways, loans to the City of Paris and various other towns and to Messageries Maritime and Trans-Atlantic Co. The Eastern Railway decided to liquidate its debt of $20,000, beginning on May 1.

The total of French loans granted by American banks is estimated at $517,860,000.

French Government Discussing Issue of "Mobilization Loan" Under Young Reparation Plan.

The French Finance Ministry is examining into the conditions which will be necessary for issuing in France the bonds for mobilizing part of the German reparation payments under the Young plan according to Paris accounts Feb. 14 to the New York "Times" which likewise said:

The Government's intention is to apply the proceeds of such subscription to partial redemption of French rentes issued during the war, but no details have yet been fixed.

The main problem to be solved has to do with the varying taxes imposed on such operations in the different countries where the mobilization bonds will be issued. Means must be discovered to prevent such divergence in the tax rate from hindering complete unification of these securities and thus preserving their international nature. It is felt that the only means of accomplising this purpose will be a definite agreement between the creditor nations.

French Debt Cut 22,000,000,000 Francs—Redeemable Issue Increased but Floating and Short-Term Obligations Cut Heavily.

The following Paris advices Feb. 7 appeared in the New York "Times":

The outline of the condition of the French public debt, made to the Finance Committee of the Chamber of Deputies by the Finance Minister, while admitting that the domestic debt in the past four years has been reduced only from 286,600 million francs to 267,000 millions, shows on the other hand that there have been great changes in its composition as a consequence of recent refunding operations. For example, the floating debt has been reduced from 93,500 millions to 38,800 millions and the short-term debt from 41,700 millions to 22,200 millions. The perpetual debt has also decreased from 101,700 millions to 98,500 millions.

The redeemable debt alone has increased, rising from 52,000 millions to 107,000 millions. The Caisse Autonome, which originally took charge of 46,850 million francs of defense bonds, had on Dec. 30 only 20 millions of two-year bonds in circulation. Furthermore, the Caisse d'Amortissement redeemed in 1929 no less than 5,500 millions of French rentes. The result is a reduction of 22,000 millions in the domestic debt of the French Government.

300,000,000 Franc Finnish Loan.

In its Feb. 17 issue the "Wall Street Journal" reported the following from Paris:

Issue has been announced of 5% loan of 300,000,000 francs for Central Agricultural Credit Bank of Finland at 97%. Bonds will be issued in francs, Finnish gold marks, Swedish crowns and sterling. Credit Lyonnais heads syndicate making issue.

Spain Considering Renewing Gold Basis—Finance Minister Tells of Action as Peseta Falls to New Low Record.

Wireless advices Feb. 18 from Madrid to the New York "Times" state that Finance Minister Manuel Arguelles issued a note on that day announcing the intention of the government to re-establish the gold standard. The "Times" advices said:

The statement came after the peseta had reached a new 30-year low of 8.33 to the dollar, rallying at the close to 8.22, which is lower than at any period of the dictatorship.

Senor Arguelles said in effect:

"I am busy revising the financial work of the dictatorship, cutting down wasteful methods of the distribution of funds by re-establishing previously existing laws to check the waste. There will be retrenchments in all departments, the most difficult being in the Public Works.

"I shall start no new work. I plan to reduce present construction and spread the payments for present undertakings over a long period of years.

"The peseta problem, is interesting the Government most, just now, as it affects all business and commerce more or less, and there is but one way of settling it, that suggested by the committees on stabilization."

A report has been circulated in Madrid and Barcelona financial circles that Senor Arguelles wants to establish a foreign credit for a period of 10 years or more which would make the use of foreign gold unnecessary.

Senor Arguelles said he would abide by the decision of the committee studying the gold standard.

Gold and Silver Imported Into and Exported from the United States, by Countries, in January.

The Bureau of Foreign and Domestic Commerce of the Department of Commerce at Washington has made public its monthly report showing the imports and exports of gold and silver into and from the United States during the month of Jan. 1930. The gold exports were $8,947,593. The imports were $12,908,350, of which $5,430,103 came from Brazil and $3,157,724 from Canada. Of the exports of the metal $8,497,306 went to France. Below is the report:

GOLD AND SILVER EXPORTED FROM AND IMPORTED INTO THE UNITED STATES, BY COUNTRIES.

Value of Peseta Lowest Since 1898—Spanish Unit of Currency at 8.11 to the Dollar.

From Madrid Feb. 17 a wireless message to the New York "Times" said:

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The peseta fell to-day lower than at any time during the dictatorship of General Primo de Rivera and to its lowest point since 1898, finally resting at 8.11 to the dollar after a day of fluctuation. The unsettled political situation making possible a rapid decline in the value of money not on a gold basis is considered the cause, coupled with the fact that the adverse trade balance has put surplus pesetas on the open market.

Many bankers here are compaining of the manner in which small labor demonstrations are alleged to have been magnified into revolutions against the monarchy by certain sections of the foreign press. The streets of Madrid are perfectly safe and the Governmnet has the entire situation well in hand.

Strikes of 600 factory workers at Barcelona and 6,000 iron workers at Sagunto have been reported. The strike at Sagunto is an isolated case and the Government is interested only because its intervention is compulsory by a law projected under the dictatorship and this may be a test case as to whether the method of compulsion can be continued.

German Reichsbank Changes Its Dividend System—Shareholders Adopt New Plan by Vote of 15,000 to 700—Record Profits in 1929—President Schacht Outlines Operations of Gold Discount Bank to Aid Country's Industries.

The new Reichsbank law, which changes the plan for distribution of profits and compensation of shareholders and for limitation of their profit sharing, was accepted on Feb. 15 by an overwhelming majority, 15,000 against 700 votes, at the Reichsbank's shareholders' general meeting. A cablegram from Berlin to the New York "Times," in reporting this, said:

According to the new plan, the shareholders will receive a fixed dividend of 12% annually, which will be determined after the following system:

An 8% dividend is guaranteed as before, for which the necessary amount will be deducted from the total net profit. Of the remaining profit the Reich will receive 75% and the shareholders 25%. The next 20,000,000 marks will be divided between the Reich and the shareholders in the ratios of 90 and 10%, while the respective figures for the remaining profit are 95 and 5%.

Stock for Shareholders.

As compensation for their reduced chances of profit share the shareholders are to receive gratis one new Reichsbank share plus one share in the Gold Discount Bank of a nominal value of £10 for every four shares of 100 marks nominal value of the Reichsbank held.

Dr. Hjalmar Schacht, President of the Reichsbank, in introducing the new plan and last year's report, succeeded with his usual calm and energy in mastering the situation and soon offset the opposition's attacks. Touching the subject of gold movements last year, which greatly irritated the financial world, Dr. Schacht said that "banks of emission should strive in future to subdue uneasiness and unthriftiness caused by great gold movement," and he added: "I hope the Bank for International Payments will lend a helpful hand in this direction."

Apropos of the new law, Dr. Schacht said the arrangements would become valid only if the Young plan and the bills connected with it were ratified by the various interested parliaments. He informed the meeting that the new shares of the Gold Discount Bank and the Reichbank share would be free from the special capital tax and income tax, according to information conveyed to him by the Finance Minister.

With regard to the Gold Discount Bank, Dr. Schacht said, the reparation burdens necessitated increased exports. The export industry needed large capital to compete with foreign countries. The Gold Discount Bank would attempt to furnish the necessary credits, for which purpose it would contract new loans in addition to its own capital. The bank would mainly finance shipments of industrial goods manufactured in Germany, which in turn would relieve the unemployment situation.

The Reichsbank's Report.

The Reichsbank's annual report shows that its profits never were so high as during the past year. The gross profit increased from 158,000,000 to 170,000,000 marks, while the net profit amounted to 70,000,000 marks. Of this sum, 15,000,000 marks was set aside for the surety fund and 31,000,000 for the gratis shares for shareholders, which left a net profit of 25,588,893 marks. This amount was divided as follows: 14,734,572 marks paid shareholders in the form of a 12% dividend, the Reich received 5,324,033 marks and the balance was set aside for legal reserve. The dividend will be distributed among 11,304 shareholders, who possess 1,227,881 shares of 100 marks nominal value.

At the end of December, 1929, the Reichsbank's total cover amounted to 3,109,000,000 marks, including 2,300,000,000 in gold, 400,000,000 in foreign currency and a hidden reserve of 409,000,000 marks in foreign currency.

Shareholders of German Reichsbank Owning Pre-War Notes Seek Compensation.

Associated Press accounts from Berlin, Feb. 15, said:

To-day's general meeting of shareholders of the Reichsbank was the scene of lively debate when a small group of dissatisfied shareholders and owners of large in pre-war bank notes demanded certain compensation. The leader of this group, Herr Winter, tried to deliver a speech touching on the political angle, but all of his motions were voted down by an overwhelming majority.

New Bank of England Built for 1,000 Years—"Old Lady of Threadneedle Street" Will Appear in Thoroughly Up-to-Date Guise.

The following special correspondence to the New York "Times" from London Feb. 4, appeared in the Feb. 16 issue of that paper:

Fifty vaults, with steel and concrete walls eight feet thick, will be a striking feature of the new Bank of England, now in course of construction. One of them is 50 feet below the level of Threadneedle St.

Arrangements almost melodramatic in character have been made for the protection of the vaults in the event of civil disturbance or a raid by thieves. Despite the fact that their doors, which open by electricity, weigh eight tons each, plans have been made for flooding the vaults in emergency.

This would be carried out simply by pressing any one of three electric buttons, which are being connected to the vaults from the inside of the bank itself from a point "somewhere in London," and from another place 10 miles outside the metropolis. While the completed building might be captured, it could not bd destroyed, for its walls will be made thick enough to withstand the most powerful guns or bombs.

Meanwhile, the new works are being guarded by a detachment of soldiers, a practice recently defended by Tom Shaw, Minister of War, on the ground that the Bank of England was the Government's banker and responsible for the register of Government loans and for the country's gold reserve.

A large open court will replace the old Garden Court. Around it the new bank will rise in a group of pavilions and terraces, lighted by overhead windows of vitaglass, through which the sun's natural ultra-violet rays will reach the clerks at their desks below, thus creating an artificially sunlit basement. Lloyds are the pioneers in this "Brighter Bank" movement.

The new building, which is being erected to last for at least 1,000 years at a cost of $25,000,000, will not be completed until 1935. During the excavation work for the vaults many relics of old London were unearthed. One of them was a pipe-clay statuette of Venus, a very rare piece of work by a Roman artist, which has been presented to the British Museum.

Prospective Free State (Ireland) National Loan.

From Dublin Feb. 13 advices to the New York "Times" said:

Speaking during the week-end at the annual dinner of the Society of Accountants in Dublin, Ernest Blythe, Minister of Finance, disclosed that a Free State National loan probably would be floated in Autumn, if not earlier. He rejoiced that the country's finances stood the test in the recent depression in the money market, and the drop in the bank rate arouses his hope that the second installment of the National loan will be issued on more favorable terms. He said previous issues were necessitated by abnormal conditions, but that future issues would be made entirely for productive purposes, such as the Arthur development, the Shannon scheme and the housing project.

The difficulties over the colonial stock act may result in Mr. Blythe investigating the possibilities of a United States market, but at the same time London is not yet closed to him. Although the Free State Government still firmly adheres to its decision not to give the British Legislature the right of veto over Saor State legislation, as required by the act, there still seems to be a possibility of an agreement. The alternative course is suggested in the report of the experts' conference, which says:

"The general question of the terms on which loans are raised by one part of the British Commonwealth and should be given the privilege of admission to the trustee list in another part calls naturally for determination by the Government of the latter, and it is for the other Governments to decide whether they will avail themselves of the privilege on the terms specified."

This obviously was intended to smooth the path of the Saor State to the British market, but Mr. Blythe has taken the precaution in the meantime to open negotiations with Wall Street. The amount of the loan will be $25,000,000.

An item was published in our issue of Feb. 15, page 1053, denying reports that the Government of the Irish Free State has dispatched a representative to sound the opinion of Wall Street on the floating of a loan here.

Policy of British Government with Reference to India Sterling Securities.

We have been favored, by the British Library of Information, with the following copy of a letter, sent out by the India office, stating the policy of the British Government with reference to India Sterling Securities:

India Office,
Whitehall, S. W. 1.
January 27 1930.

Dear Sir: I am directed by the Secretary of State for India to acknowledge the receipt of your letter of the 13th Jan. and in reply to say that, as you are doubtless aware, India sterling securities, while issued under the authority of Act of Parliament and charged on the Revenues of India, are not guaranteed by the British Government. Like many other stocks including stocks issued by a Dominion under the Colonial Stock Acts, they are by law constituted stocks in which British trustees are authorized to invest; but that is a separate question.

The Secretary of State cannot undertake to deal with hypothetical contingencies; but at the same time, in view of the tenour of your letter, I am directed by him to say that His Majesty's present Government have no intention of allowing a state of things to arise in India in which repudiation of debt could become a practical possibility, and that it is inconceivable to him that, in dealing with any scheme of constitutional change in India, Parliament could fail to provide safeguards, should they be needed, against a breach of the conditions under which these loans were issued.

In view of the interest to the general public of the questions which you have raised, this reply is being published in the Press.

Yours faithfully, A. Hirtzel.

Irish Republic Donors to Get 59 Cents on $1—131,322 Subscribers to $2,538,033 de Valera Fund to be Reimbursed.

The $2,538,033 gained from Irish sympathizers in the United States by the eloquent pleas of Eamon de Valera in 1920, with which he intended to finance partially the Irish Republic, will be immediately returned to 131,322 subscribers, it was stated in the New York "Herald-Tribune" of Feb. 9, from which we also take the following:

This announcement was contained in a report filed yesterday in the office of the Manhattan County Clerk by receivers for the fund, who have passed two years in locating the subscribers, scattered from coast to coast.

Heretofore it had been thought that only 30 cents could be paid on the dollar, but the report yesterday revealed that 59 cents of each dollar would be returned. There were numerous rejected claims, one of the principal ones being that of $100,000 by the Friends of Irish Freedom, for which there will doubtless be future litigation.

Federal Reserve Bank of St. Louis

It was said at the Receivers' office, 117 Liberty St., that proverbial Irish sentimentality had retarded the efforts to liquidate the subscriptions. There were many who at first preferred to keep the pretty green bonds of the proposed Irish republic as a tangible relic of a noble dream. Instead of redeeming the bonds they tacked them up on the walls as specific evidence of their part in the struggle for Irish freedom.

This sentiment did not last, however. Eleven thousand claimants were interviewed, a card index covering 365,000 identities was prepared, and the intricate work of finding just who subscribed and just how much they subscribed proceeded. About 61,000 letters were mailed. * * *

Supreme Court Justice A. Peters, in June 1927, granted a receivership and ordered the money returned to the subscribers. Previously he had dismissed an action brought by the Irish Free State which sought the money of its antagonist on the ground that it had superseded the Irish Republic and therefore was entitled to its assets. Justice Peters ruled that there never had been an Irish Republic save in the minds of its proponents and that therefore the Irish Free State could not have superseded it.

Attorneys for the receiver said yesterday they would apply on Feb. 14 for a court order confirming their report and that it would in all probability be given. The receivers are Peter J. Brady, President of the Federation Bank & Trust Co.; J. Edward Murphy, an attorney at 165 Broadway, and State Senator John L. Buckley.

Of the $2,538,033 on hand, $2,149,434 will be distributed, the remainder being used for attorneys' fees, receivership fees and expenses.

Eamon de Valera came to this country in 1920 and made an ardent appeal for funds to perpetuate the Irish Republic. He spoke in New York, Chicago, Boston and many other cities before crowds of Irish-Americans.

Proposed $80,000,000 Cuban Loan.

The New York "Times" reports the following cablegram from Havana Feb. 20:

Legal documents for the new financial transaction of $80,000,000 between the Cuban Government and the Chase National Bank of New York will be signed in the Presidential Palace at 9 a. m. on Tuesday, according to an announcement made to-day by the Secretary of the Treasury. The bonds would be placed on the market in New York.

Inelastic Currency System, According to Bank of America, Responsible for Closing of Argentine Conversion Office, Rather Than Loss of Gold.

An inelastic currency system rather than loss of gold was directly responsible for the closing of the Argentine Conversion Office last December, according to the current review of the Bank of America. An almost complete cessation of foreign lending and the low prices obtained for agricultural products did cause a considerable flow of gold from Argentina beginning in 1928. The greater part of the gold exported, however, came from the stocks of the Banco de la Nacion, the Argentine National Bank, and private banks, while less than half the amount represented gold shipped from the Conversion Office. The Review states:

The inelasticity of the Argentine currency results from the fact that as the gold reserves of the Conversion Office diminish the number of paper pesos in circulation is automatically reduced. For every gold peso withdrawn from the Conversion Office, 2.27 paper pesos must be retired from circulation. Consequently, the loss of about 85,000,000 gold pesos from the Conversion Office between June 30 1928 and Dec. 20 1929 resulted in a very considerable contraction in the volume of paper money in circulation, with some little accompanying inconvenience to Argentine trade and industry. As a result, toward the latter part of 1929 the ratio of gold in the Conversion Office to paper pesos in circulation still remained in the neighborhood of 80.

In 1927 and the first part of 1928, when the foreign trade balance was favorable and a fairly large volume of loans had been placed abroad, there was a gold import movement of considerable size into Argentina. By June 30 1928 the gold supply of the country had reached a peak of 655,000,000 gold pesos. This was reflected in some expansion in the paper currency outstanding which increased between June 30 1927 and June 30 1928 from 1,324,000,000 to 1,440,000,000 pesos. The increase in circulation, however, was not in proportion to the increase in the total gold supply of the country. While the addition to the country's gold stock represented an increase of nearly 38%, the circulation of paper pesos increased only about 9%.

In spite of its growing importance in international trade, the bank says, Argentina is still in a relatively early stage of industrial development and is obliged to depend upon imports for the major part of its requirements of manufactured goods. Argentina, the bank finds, can be compared with the United States of about a half century ago, when its railroads, organizations for marketing its products and the opening up of vast areas of land to cattle raising or agriculture, all represented to a great extent the investment of foreign capital.

6% Chile Gold Loan.

The following from Paris appeared in the "Wall Street Journal" of Feb. 20:

Issue has been announced at 92½ of French portion of 6% Republic of Chile 32-year gold loan, which totals 60,000,000 Swiss francs. French syndicate, comprising Banque de Paris, Societe General, Comptoir d'Escompte and Credit Lyonnais, is offering 35,000,000, while the balance is being placed in Holland and Switzerland by Mendelssohn Credit Suisse.

Department of Cundinamarca Reports Increase in Pledged Revenues.

According to an advance report of the Adminstrador Principal de Hacienda of the Department of Cundinamarca, Colombia, received by J. & W. Seligman & Co., fiscal agents for the Department's secured 6½% sinking fund gold bonds due 1959, revenues pledged as security for the bonds, less municipal participations, amounted for the fiscal year ended June 30 1929 to 4,983,578 pesos. or $4,850,516 at par of exchange, as compared with 4,209,683 pesos ($4,097,284) for the preceding fiscal year. Service charges of $900,200 on the bonds, it is pointed out, were thus covered 5.39 times in the fiscal year 1929. The pledged revenues include gross revenues from the distilled liquor monopoly and from taxes on other liquors, slaughter houses, and tobacco, after deducting municipal participations.

Three Bulgarian Banks Merge—Largely as Result of Agricultural Depression.

A wireless message from Sofia Feb. 19 to the New York "Times" said:

An agreement for the fusion of three of the most important Bulgarian banks was signed to-day in the presence of Premier Liaptcheff. The National Credit Bank, the Bulgarika Bank and the Franco-Bulgarian Bank will be united in a new institution named the Union of Bulgarian Banks, with a capital of about $1,000,000, the Bulgarian National Bank, with the assent of the League of Nations Commissioner, M. Charon, having guaranteed its deposits.

The fusion was largely the result of agricultural depression in Bulgaria.

Bonds of Hungarian-Italian Bank To Be Retired.

Hallgarten & Co., announce that $9,500 principal amount of Hungarian-Italian Bank, Ltd. (Magyar-Olasz Bank Reszvenytarsasag), 7½% 35-year sinking fund mortgage gold bonds, series AC, dated Oct. 1 1928, due Oct. 1 1963, have been tendered to the sinking fund for retirement, leaving $2,763,000 par value of bonds outstanding.

City Savings Bank Co., Ltd., of Budapest Annual Report.

It is stated that the annual report for the year 1929, of City Savings Bank Co. Ltd. of Budapest, shows a net profit of Pengoe 1,967,836.58 ($344,174.62) as compared with Pengoe 1,941,720.66 ($339,606.93) for 1928. It is further stated:

In August 1929, the company paid an interim dividend of Pengoe 2 ($.3498) per share (4%) and the Board of Directors will propose at the annual meeting of the company to be held on March 8 1930, that a final dividend of Pengoe 4 ($.6996) (8%) be paid. This makes an aggregate of Pengoe 6 ($1.0494) (12%) for the year 1929, which is the same rate as that paid for the year 1928.

The report states that total deposits at Dec. 31 1929, amounted to Pengoe 42,016,413.50 ($7,348,670.71) as compared with Pengoe 41,016,713.79 ($7,173,823.24) at Dec. 31 1928.

During the year 1929, the company granted mortgage loans totaling Pengoe 1,127,628.98 ($97,222.30) and issued mortgage bonds aggregating Pengoe 1,286,028.20 ($224,926.33) as a result of which, the total of mortgage loans granted by the Bank, increased to Pengoe 30,987,814.32 ($5,419,768.72) and the outstanding mortgage bonds increased to Pengoe 27,279,430.80 ($4,771,172.44).

Japanese Plan Price Deflation—Part of Campaign for Rationalization of Industry in Country.

From the "Wall Street Journal" of Feb. 17 we take the following Tokio advices:

Part of Japan's campaign for rationalization of industry must be an attempt to contract note issue within the Empire and thereby reduce prices, according to Hisaakira Hijikata, Governor of the Bank of Japan.

In spite of the marked declines which have taken place in Japanese wholesale prices since July, when gold embargo removal became a practical certainty, the index of wholesale prices, if July 1914 be taken as a base, remains about 15% above New York, 20% above London and 35% above Paris.

Governor Hijikata asserted that contraction of currency must be considered a prime essential of Japan's program for increasing its international competitive power. Less money in circulation will bring down prices, bring about a cheaper if not a lower scale of living and thereby enable the country to manufacture and sell to better advantage.

Governor Hijikata admitted that the task of contracting note issue and bringing wholesale prices into alignment with the international market would not be easy. In all probability, he said, Japan will be obliged to go about the process gradually, since some of the necessary means are not readily at hand.

Chief of these is Bank of Japan's control of the money market. This, Mr. Hijikata pointed out, is almost completely lacking. During the 1927 panic and the year which followed it, Bank of Japan was obliged to make heavy emergency loans. In order to deflate circulation it was necessary for the central bank to call in practically all its commercial loans and discounts and to sell its holdings of Government bonds. On Jan. 18, for example, the total advances of the Bank of Japan were 661,000,000 yen, with emergency loans accounting for almost 600,000,000 yen.

Speeds Emergency Loan Payments.

Under such circumstances, the bank obviously is in no position to control commercial paper rates. Governor Hijikata is doing his best to speed payment of the emergency loans but with no hope of more than partial success. The borrowing banks have almost eight years in which to repay and present indications are that the Government, which guaranteed the loans, will be left to pay the piper to the tune of 400,000,000 yen or more.

The only orthodox solution which remains is that the Bank of Japan should throw its Government bonds on the market. But this, for the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

time being, is out of the question. The bond market has been vacillating and the Government is watching over it carefully.

In November, to harden prices, the Bank of Japan was ordered to buy 41,000,000 yen worth of Government bonds. To reverse the process would do little to promote confidence at a time when confidence is essential. However, Mr. Hijikata said, the time may come when money market conditions will allow this step. He does not expect to have suitable bonds, for those now held by the central bank are of the unpopular long maturities, but he knows that he can make an exchange with the Deposits Bureau for bonds running to 25 years or less, which the public is willing to take.

Might Increase Bank Deposits.

There is, however, an unorthodox manner of contracting note issue and Mr. Hijikata confesses that he is giving it careful study. It is not the issue of new Government bonds, for Finance Minister Inouye is pledged not to resort to these. It is increasing the Government deposits in the Bank of Japan. For the last year or so these have ranged between 410,000,000 and 690,000,000 yen, averaging about 575,000,000 yen. The Jan. 11 figure was 453,000,000 yen. If the Government were to institute further economies and allow the attendant surplus to remain in the Bank of Japan, currency deflation would be almost automatic. If this is not immediately possible, Mr. Hijikata said, the Government can bring about the same results by issuing Treasury bills, which by law cannot run for more than a year, and allowing the proceeds to remain in the bank.

Following figures, taken at random, show the progress which has been made in this direction without resort to the unorthodox method mentioned above. It must be remembered that the Bank of Japan has the right to issue notes up to the total of its gold holdings and above that figure against the security of commercial bills and Government bonds.

Brazil's Economic Progress Should Be Aided By Thorough Adjustment of Coffee Situation, Says J. Henry Schroder Banking Corp.

Expressing confidence that Brazil will be able to right her present difficulties arising out of the crash in coffee prices, the J. Henry Schroder Banking Corp., an associate of the British banking firm which has taken a prominent part in Brazilian financing for a period of years, states that a thorough adjustment of the coffee position in that country would in the long run have a lasting and beneficial effect on Brazil's economic progress. Any solution of the present difficulty, it is pointed out, must set up safeguards against a recurrence of the present demoralization in the coffee industry. One hopeful possibility as far as the result is concerned it is stated, is that owing to the 1928-29 and 1929-30 crop and the much lower price for the product, Brazil's percentage of total world coffee sales may be increased, irrespective of any increase in total world consumption. On the subject of financial aid to coffee producers, the Schroder firm says in its monthly Finance and Trade Commentary, made available Feb. 16:

With the help of the Banco do Brasil and of a short term credit recently extended to the Sao Paulo Government by a combined London and New York banking group, Sao Paulo is in a position to move its entire 1929-30 crop by making advances to farmers at approximately $5 per bag. It is obvious that the facilities extended by the Banco do Brasil and by foreign bankers alone have not provided all the funds needed for financing this large crop, but it must be remembered that a large portion of the crop had already been financed by the Banco do Estado do Sao Paulo and by private banks prior to the outbreak of the crisis in October of last year, and that as coffee is exported, and thereby previous advances made on a higher price basis are repaid, the Banco do Estado and other banks will be in a position to make new advances which should enable the farmers to move their entire 1929-30 crop.

As of July 1 1930 the total coffee stocks stored in the interior of Brazil exclusive of stocks in the ports, are estimated at around 18,000,000 bags, provided shipments during the next five months continue at the same rate as in the past. Of this unsold stock, practically all will be held in Sao Paulo. Brazil's immediate coffee problem is, therefore, almost exclusively Sao Paulo's problem.

Noting that the 1930-31 coffee crop of Brazil will probably be less than 12,000,000 bags, the Schroder firm points out that the future production trend should be downward. Certain old coffee plantations which are now being operated at a relatively high cost of production, may have to be abandoned. The firm adds:

In addition farm laborers, in partial compensation for the drastic reduction in wages recently made, are now in many cases allowed to grow foodstuffs between coffee trees, which according to past experience should reduce the yield of the coffee trees quite considerably. It is, moreover, well known that during the past year hardly any new planting has been done in the State of Sao Paulo. There are, therefore, reasonable prospects of some reduction in coffee production during the next few years as a result of entirely natural forces.

It is very difficult to give any accurate figures as to the present cost of production, but taking into account the recent reduction in wages, the various coffee taxes, and the cost of transportation from up-country to the ports, but excluding all interest charges of any kind, the present average cost of production in Sao Paulo is probably very near, and in some cases above present prices.

Austen P. Fox Finds Money Tight in Mortgage Field—Cites Difficulties Encountered by Bronx Builders.

Maintenance of a ready market for first mortgage realty bonds on the Real Estate Securities Exchange or other sales mediums is urged by Austen P. Fox, President of Austen P. Fox & Co., mortgage bankers, as the solution of many of the financing problems facing property owners and builders, according to an account in the New York "Times" of Feb. 16, which further said:

Speaking at a meeting of the Property Owners' Association last week at 1 East Tremont Ave., the Bronx, with a view to organization of a holding company for the combined holdings of a group of property holders, Mr. Fox explained that the object was "to keep their investments from being swept away because of the tight mortgage market."

"It is not fair to be led into a state of optimism by a number of flowery-worded slogans that money is easier and that real estate will have its best year this year," he said. "In Bronx County three years or so ago owners and builders got all the mortgage money they asked for, and in many instances more than they asked for if they would pay for it. To-day these mortgages are expiring, and builders are scurrying about for renewals or new mortgages and find that even though they may have reduced their mortgages through amortizations during recent years, they are unable to get an amount anywhere near the sum due, and in some instances are unable to get any mortgage. They even offer unusual bonuses, but if they do not accept what is offered to them the consequence is foreclosure.

"This same situation exists to a degree in Manhattan also, where property is considered 'prime' for loaning and renting purposes; and a similar condition is found in the other boroughs and adjoining coounties. Title companies hold many unsold mortgages and foreclosed properties.

"Investors who would like to buy guaranteed mortgages and mortgage certificates are backward in doing so, because they have learned that frequently there is no ready market for these securities in case they must borrow or sell on short notice.

"If some of our large companies would pay as much attention to maintaining a market for their securities as they are doing in selling them and would lend against them liberally or buy them back when necessary, such obligations would not be thrown on the open markets at discounts to yield as high as 10%, and thereby drive investors to other fields, and much more money would be available from small buyers.

"We must not look for money at the present time for less than 6%, and the quicker we get together on this basis the sooner will relief come."

Trading Centre Formed for Long Island Securities.

According to the New York "Times" of Feb. 12 the first Balist Corp. has been organized as the initial combination stock clearing house, trading center and holding company to operate in the Brooklyn, Queens and Long Island territory. Continuing the "Times" said:

It will be a central clearing house and trading centre for the more than 300 securities from that territory reputed to have no other regular market.

The new corporation, according to James J. Fradkin, President, will offer quotations on virtually all stock issues of Brooklyn and Long Island companies. It is intended to be of particular assistance to those who have not found markets for such securities. The company will also purchase securities as permanent investments from time to time, but will buy and sell on a trading basis.

Defeats Bill to Curb Insurance Companies—New York Assembly by Tie Vote Rejects Measure Penalizing Contesting of Claims.

After an hour's debate the New York State Assembly on Feb. 17 defeated a bill by Assemblyman Meyer Alterman, New York Democrat, which would have permitted judges to impose an additional 15% on a life insurance policy when the company loses a claim which it has contested. The vote on the measure was 63 to 63, but 76 votes were necessary for its passage. A dispatch from Albany to the New York "Times" notes this, and further states:

In defending the bill, Assemblyman Alterman declared that it was designed to protect widows and orphans.

"There are some life insurance companies that are always trying to do widows out of their mite," said Mr. Alterman. "The life insurance companies always are broadcasting about the claims they pay but they never tell about all the claims they dispute."

Assemblyman Harry McKay, Republican, of Rochester, declared that the enactment of the bill would mean that the "honest" life insurance companies would be penalized for the faults of a few companies.

"It will mean higher life insurance rates," said Mr. McKay.

"This is nothing more or less than class legislation, and when we get down to business in this House and forget about class legislation we will be getting somewhere," said Assemblyman Horace Stone, Republican, of Syracuse.

Market Value of Shares Listed on New York Stock Exchange $69,008,836,529 on February 1—Increase as Compared with Jan. 2 Figures—Classification of Listed Stocks.

As of Feb. 1 1930 there were 1,297 stock issues aggregating 1,164,715,742 shares listed on the New York Stock Exchange, with a total market value of $69,008,836,529.

This compares with 1,297 stock issues aggregating 1,127,682,468 shares listed on the New York Stock Exchange Jan. 2, with a total market value of $64,707,878,131. In making public the Feb. 2 figures on Feb. 20, the Stock Exchange said:

As of Feb. 1 1930, New York Stock Exchange member borrowings on security collateral amounted to $3,984,768,065. The ratio of security loans to market values of all listed stocks on this date was therefore 5.77%.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

As of Jan. 2 1930 member borrowings on security collateral amounted to $3,989,510,273. The ratio of security loans to market values of all listed stocks on that date was therefore 6.16%. In the following table, covering the six months, listed stocks are classified by leading industrial groups, with the aggregate market value and average share price for each. It will be seen that the market value of these listed stocks on Sept. 1 was $89,668,276,854 as compared with $69,008,836,529 on Feb. 1.

Transamerica Corporation to Apply for Listing on Four Big Stock Exchanges.

Advices from San Francisco on Wednesday of this week (Feb. 19) to the "Wall Street Journal" reported Elisha Walker, Chairman of the Transamerica Corporation, upon his arrival in San Francisco with Jene Monnet, Vice-Chairman of the corporation, as saying that it was planned to apply later for listing of Transamerica stock on New York Stock Exchange, London Stock Exchange, and Paris and Amsterdam Bourses. The dispatch also quoted Mr. Monnet as saying that Transamerica plans extension of business into South America as well as broader European activity. In its issue of Thursday (Feb. 20) the New York "Times" in the same matter said in part:

Mr. Walker's visit to the Pacific Coast is to attend the meeting of Transamerica directors next week. The project of listing Transamerica, now a Curb stock, on the Stock Exchange may be taken up at that meeting, it was learned.

Transamerica is a $1,000,000,000 company and controls among other interests, the Bank of America in New York, the Bank of Italy in California, the Bank of America in California and the Banca d'America e d'Italia in Milan. Total resources of the banking and other companies controlled by Transamerica come to more than $2,000,000,000, the resources of the Bank of Italy alone exceeding $1,000,000,000.

New York Curb Exchange Suspends Irving Robins for 30 Days.

Announcement was made on Thursday of this week (Feb. 20) by the New York Curb Exchange that Irving Robins had been suspended from regular membership in the Exchange for 30 days for a violation of Article XVII, Section 7, of the constitution, which in substance forbids the violation of just and equitable principles of trade, according to yesterday's New York "Times," Feb. 21, which added:

In view of the mild sentence imposed on Mr. Robins, it was understood that his violation of the rule was slight.

Construction of Addition to New York Curb Exchange To Start Feb. 20.

Construction on the new 14-story addition to the New York Curb Exchange started Feb. 20, and as a result notices have been posted in front of the present building requesting members to hereafter use the rear entrances on Greenwich St. It is expected that the new addition will be completed in Feb. 1931. As we have already indicated the structure will embrace the entire site covering an area of 178 feet front by 181 feet deep which is now only partially occupied by the present building. When completed the trading floor area will comprise 14,132 square feet compared with an old board room area of 9,598 square feet and will contain 24 trading posts of a new and much improved design, as against 16 trading posts now in use. The height of the new board room will extend five stories.

The recently acquired Hamilton Building adjoining the present Exchange building will not be razed in connection with the present building plans. The proposed addition to the Curb's quarters was referred to in our issues of Jan. 4, page 51, and Jan. 25, page 563.

Few Changes in Committees of New York Curb Exchange.

Announcement of the composition of its committees for the ensuing year was made on Feb. 14 by the New York Curb Exchange. With the exception of the Nominating Committee which is re-nominated each year, only a few changes were made. Fred H. Brendle, Clarence L. Eckstein, Walter P. McCaffray and John P. McCormack, new members of the Board of Governors, succeeding Herbert Oppenheimer, E. E. Spencer, George Scott Whiting and Vincent E. O'Neill were assigned to the various committees to fill vacancies. Aside from the election of the new members of the Board of Governors, the resignation of George Scott Whiting, as Vice-President and a member of the Board of Governors, because of pressure of business and the retirements of Vincent E. O'Neill, a Governor of long standing, were the two outstanding changes in the general personnel of the various committees.

Camp, Thorne & Co., Investment Brokers, Chicago, in Receivership.

A voluntary petition in bankruptcy was filed on Feb. 17 in the Federal District Court of Chicago by the investment brokerage house of Camp, Thorne & Co., 29 South La Salle St., that city, followed by the appointment of Fred E. Hummel as receiver by Federal Judge Wilkerson, according to the Chicago "Journal of Commerce" of Feb. 18, from which we quote further as follows:

Attorney Michael Gesas said there were liabilities of $575,000 to which might be added $500,000 more by law suits and other causes. He said the assets, although once worth $750,000, had shrunk to $250,000 in value.

The firm was organized about 10 years ago by William C. Camp, then the husband of Mrs. Katherine Gordon Thorne Camp, widow of William C. Thorne, who had been Vice-President of Montgomery, Ward and Co. Mr. Camp was reputed to have inherited $1,000,000 from his father.

Mr. Gesas said the principal business of the company had been in connection with Central American utility bonds. He said that if these bonds could be marketed, a reorganization of the brokerage firm might be possible.

Champ C. Brown & Co., Philadelphia Brokerage Firm, Fails.

Failure of the brokerage firm of Champ C. Brown & Co., with offices in the Real Estate Trust Building, Philadelphia, and its suspension from the Philadelphia Stock Exchange,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

were announced on Feb. 17. In reporting the matter the Philadelphia "Ledger" of the next day said:

The only information relative to the closing of the company was the statement from the Exchange that the firm was unable to meet its engagements. Champ C. Brown has been a member of the Philadelphia Exchange since 1911.

Increase in Membership of Board of Governors of Chicago Stock Exchange.

Eight of 9 additional members of the Board of Governors of the Chicago Stock Exchange were named on Feb. 13 by R. Arthur Wood, President, and approved by the Board. The ninth new member, increasing the board membership from 16 to 25, will be named later. The 8 named are:

Latham R. Reed, New York City, E. A. Pierce & Co.; Edward E. MacCrone, Detroit, E. E. MacCrone & Co.; James E. Bennett, Chicago, James E. Bennett & Co.; Charles Sincere, Chicago, Charles Sincere & Co.; Charles C. Renshaw, Chicago, Mitchell, Hutchins & Co.; Clarence G. Troup, Chicago, Lamborn, Hutchings & Co. Mr. Troup is Vice-President of the Chicago Curb Exchange.; W. B. McMillan, Chicago, W. B. McMillan & Co., and James P. Molloy, Chicago, not a member of a firm.

It was the plan of the Exchange to name 3 of the new 9 members from the out-of-town membership. Of the 8 named to-day, two are from out-of-town, Reed of New York, and MacCrone of Detroit, and it is expected that the 9th, when named, will be from some other city than Chicago.

Change in Commission Rates of Chicago Stock Exchange.

The Board of Governors of the Chicago Stock Exchange passed a resolution on Feb. 5 providing for a change in commission rates on stock and bond transactions. According to the new plan, the minimum commission on transactions in stocks, except in stocks selling for less than $1, per share, where the transaction involves $200 or more, shall be not less than $5, and where the transaction involves less than $200, shall be not less than $3. The minimum commission, under the resolution, on transactions in bonds shall not be less than $2.50. Under the old rule, the minimum commission on bonds was $2 and the minimum commission on stock transactions, irrespective of the amount involved, was $5. The new resolution, it was announced, would become effective after being posted for one week.

One Hundred Memberships on Chicago Stock Exchange Transferred Since 100% Seat Dividend was Declared.

One hundred memberships on the Chicago Stock Exchange have been transferred to new hands since the 100% seat dividend was declared on Sept. 5 1929. This was announced on Feb. 5 by the Exchange following approval by the Board of Governors of membership transfers to Joseph Mattison, New York, and Thomas G. Wheelock, Chicago. It was pointed out that exactly five months had elapsed since the seat dividend was declared, making an average of twenty seat transfers each month. The dividend increased the number of Chicago Exchange memberships from 235 to 470. With 100 of the seats transferred, 95 of them dividend seats, the number of members now stands at 330, with 140 members still holding two seats.

In giving out these figures, it was explained at the Exchange that the sales arranged, but not yet formally approved by the Board of Governors, are not included in the 100 seat transfers in the past five months. There is a score of sales arranged, awaiting formal approval. Before a transfer is made, notice must be posted and formal action taken, not only by the committee on admissions but by the Board itself.

Exchange officials pointed out that if the remaining seats are sold as rapidly as the first dividend seats, all the new seats will have been disposed of within the next six months. Of the 100 seats sold in the last five months, 95 were dividend seats and 5 were original seats. The last price was $30,000. Only 44 seats are on the books of the Exchange as for sale. Of these, 38 are in to sell at $50,000 or more, and the other 6 at between $33,000 and $45,000.

Inactive Stock Department of Chicago Stock Exchange.

An inactive stock department, completing the specialist system inaugurated on the Chicago Stock Exchange several months ago, was started in January, it was announced Jan. 23, by C. T. Atkinson, Secretary of the Exchange. "Due to the most satisfactory experience the Exchange has had through the establishment of the specialist system, the committee on arrangements has taken a step still further to improve the execution of orders on the floor by installing the inactive stock department," Mr. Atkinson's statement said. It was stated that the list of stocks in the inactive department would include all of the stocks listed on the Exchange not now handled by an authorized specialist. "In other words," Mr. Atkinson explained, "every stock listed on the Exchange will have someone definitely looking after the welfare of the execution of orders on the floor." It was pointed out that this inactive list would change from time to time. When an inactive stock becomes active enough to justify it, a specialist will be appointed to supervise it and it will be put on the active trading list. For all stocks in the so-called inactive list, unless otherwise specified, the unit of trading will be 10 shares and trades in 10 shares or more will be printed on the quotation ticker tape. The regular round-lot on the Chicago Exchange is 50 shares.

Approximately 300 of the 550 stocks listed on the Chicago Exchange are named in the so-called inactive group sent out to members announcing the new department. However, as Mr. Atkinson pointed out, the word "inactive" is somewhat of a misnomer, since in reality the list is all of those stocks without an authorized specialist.

All Stock of New Chicago Stock Clearing Corporation Taken Over by Chicago Stock Exchange.

All the stock of the new Chicago Stock Clearing Corp. has been taken over by the Chicago Stock Exchange, it was announced on Jan. 23. The Exchange has approved payment of $200,000 for the stock. It was stated that while all the details as to the deposits to be made by Exchange members taking advantage of the Stock Clearing Corp. have not been worked out, it was definitely decided that the minimum deposit be $5,000. Deposits over that amount will depend on the amount of the member's clearings. It is estimated that a total of more than a million dollars in deposits will be built up. Each member's deposit establishes that member's credit in the Stock Clearing Corp. The officers of the new Chicago Stock Clearing Corp. were given in our issue of Jan. 25, page 563.

Cashiers Association of Wall Street Elects Officers at Annual Banquet.

The third annual banquet and entertainment of the Cashiers Association of Wall Street, Inc., was held this week at the Brooklyn Elks Building. The following officers were elected for the ensuing year:

President, Harold E. Winston of H. L. Doherty & Co.; First Vice-President, Edward Ifland of Lawrence Cohen & Co.; Second Vice-President, Geo. Failey of George H. Burr & Co.; Treasurer, Chris Dunn of Baker Kellogg & Co., Inc., and Secretary, James D. McMeekan of J. Roy Prosser & Co.

E. Noel Brown of Shields & Co., the organizer and retiring first president, was elected honorary president. The officers were installed by Louis G. Shields, of Shields & Co.

Meeting of Chicago and Cook County Bankers' Association to Be Held in Chicago, Feb. 27.

The Feb. 27 meeting of the Chicago and Cook County Bankers' Association at Chicago will hear discussions of two of the day's most vital financial developments, the investment trust and the development of the trust department. John A. Reynolds, Vice-President of the Union Trust Co., Detroit, will be the speaker on trust department development. The American Bankers' Association recognized Mr. Reynold's outstanding ability by appointing him Chairman of the Trust Development Committee of their Trust Company Section. He is also active in the Trust Development Committees of the Financial Advertisers Association. Harold E. Wood, Vice-President of the Foreman-State Corp., the other speaker, will discuss "Investment Trusts" at the same meeting, which will be held at the Mid-Day Club at 6:30 p. m.

Funds for New Assay Office in New York Asked in Appropriation Bill—Treasury Will Get More From Sale of Present Site Than New Structure Will Cost.

Funds for the construction of the new New York assay office would be made available immediately, with the approval of the first deficiency bill recommended to the House on Feb. 17 by the Appropriations Committee, Washington accounts to the New York "Times" in indicatihg this, add:

Under the terms of the bill, the new assay office would be included in the $23,040,000 public building appropriation of 1926, and such part of that as the building of the new plant required would be made available at once.

In his testimony before the committee in support of this section of the deficiency bill, James A. Wetmore, acting supervising architect of the

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Treasury, said that the new building was estimated to cost about $3,765.000. The old site, he said, is being sold for $6,501,000, and therefore about $2,800,000 would be turned back in the final result of the deal.

References to the new assay office were made in our issues of July 27 1929, page 573 and Nov. 30 1929, page 3420.

National Bank Resources $28,882,483,000 On December 31—Increase As Compared With October, But Below December 1928 Figures.

Comptroller of the Currency John W. Pole, announced on Feb. 12 that the aggregate resources of the 7,408 reporting National banks in the continental United States, Alaska, and Hawaii on Dec. 31, 1929, the date of the recent call for statements of condition, amounted to $28,882,483,000, exceeding by $958,173,000 the amount reported by 7,473 banks as of Oct. 4, 1929, the date of the previous call, but were $1,706,673,000 less than the resources of 7,635 banks on Dec. 31, 1928, the date of the corresponding call a year ago, when the aggregate resources were more than 30½ billion dollars. The Comptroller's announcement also says:

Loans and discounts, including rediscounts, on Dec. 31, 1929, amounted to $15,150,046,000, showing an increase of $188,169,000 since Oct. 4, 1929, but a decrease of $129,585,000 in the year.

Investments in United States Government securities of $2,612,087,000, which amount included bonds deposited with the Treasurer of the United States to secure circulating notes outstanding, showed decreases in the three and twelve month periods of $92,787,000 and $396,636,000, respectively. Other miscellaneous bonds, stocks and securities totaling $3,845,756,000 showed an increase of $104,742,000 since the date of the previous call, but a reduction of $272,839,000 in the year.

Balances due from correspondent banks and bankers of $4,761,093,000, which amount includes reserve with the Federal Reserve Banks of $1,348,046,000, were $470,476,000 more than three months previous, but $919,916,000 less than reported on December 31, 1928. Cash in vaults, $393,330,000, showed increases since October, 1929, and December, 1928, of $45,968,000 and $5,201,000, respectively.

The paid in capital stock of the reporting associations was $1,704,473,000, exceeding by $33,199,000 teh paid in capital on Oct. 4, and was $87,997,000 greater than this item on Dec. 31, 1928. Surplus funds of $1,548,376,000 and net undivided profits, excluding reserve accounts, of $497,043,000, a total of $2,045,419,000, showed a reduction of $25,695,000 since October, 1929, but an increase of $63,592,000 in the year.

Circulating notes outstanding aggregating $646,420,000 were $5,316,000 more than three months previous, but $3,985,000 less than reported on Dec. 31, 1928.

The total deposits on Dec. 31, 1929, aggregated $22,773,493,000, which was an increase of $871,496,000 since the date of the previous call, but a decrease of $1,573,887,000 in the 12-month period. Included in total deposits are balances due correspondent banks and bankers and cashiers' and certified checks, etc., of $3,146,301,000, demand deposits of $11,192,750,000, which include United States deposits of $103,318,000, and time deposits of $8,434,442,000. In the item of time deposits are included postal savings of $96,767,000, time certificates of deposit of $1,308,242,000, and deposits evidenced by savings pass books of $6,024,199,000, the latter figure being represented by 15,660,840 accounts.

The aggregate liability for money borrowed on account of bills payable of $397,411,000 and rediscounts of $148,176,000, was $545,587,000. Money borrowed on Oct. 4, 1929, was $657,572,000, and on Dec. 31, 1928, $785,309,000.

The percentage of loans and discounts to total deposits on Dec. 31, 1929, was 66.52, compared with 68.31 on Oct. 4, 1929, and 62.76 on Dec. 31, 1928.

Increase of Over 1000% in Resources of Detroit Banks in 25 Years Revealed in Compilation by First National Bank of Detroit.

An increase of more than 1000% in the resources of Detroit banks over a period of 25 years is disclosed by a compilation prepared by Felix M. Farrell, statistician of the First National Bank in Detroit. Aggregate resources of the city's banking institutions at the end of 1929 are reported as totaling $1,236,625,982 compared with $110,860,778 in 1904. During the same period surplus and undivided profits grew from $5,813,345 to $94,320,486, a gain of 1522%. The number of banks in Detroit increased during these 25 years from 19 to 24, many institutions meanwhile having lost their identity in the trend toward fewer and larger banking institutions. The latter trend is clearly evidenced in the gain of nearly 600% in capitalization from $8,900,000 in 1904 to $61,625,000 in 1929. The number of National banks decreased from 5 to 2, the number of trust companies increasing from 2 to 10, and the number of State banks remaining unchanged at 12.

Bankers' Acceptances Show Small Seasonal Reductions —Jan. 31 Total $1,692,793,891—Falling Off of $39,642,497 as Compared with Dec. 31.

A seasonal reduction in the volume of bankers' acceptances manifested itself in the report of the American Acceptance Council, made public Feb. 18, on the survey taken as of Jan. 31, when the total volume of bills outstanding was shown to have declined $39,642,497. Robert H. Bean, Executive Secretary of the American Acceptance Council, in his survey says:

The new total of $1,692,793,891 compared with the total of $1,279,271,163 outstanding on Jan. 31 1929 shows an increase of $413,522,728 over last year.

With few exceptions the peak of the acceptance business is reached each year at the end of December, after which there is a gradual reduction, as credits are liquidated and the season crop requirements are satisfied.

For the past three weeks the discount market dealers have had increasing difficulty in securing any considerable volume of bills, giving rise to the belief that the available supply was rapidly diminishing. The reduction of only $39,000,000, while not fully supporting this theory, does indicate a normal turn in the volume and promising lower levels during the next few months.

Part of the market difficulty in recent weeks has been due to the disinclination of some of the large accepting banks to dispose of their accepted bills at the current rates, a decision also partly influenced by the easy cash position of the banks. At the end of January the total of bills accepted and ready for the market, but not sold, amounted to $73,000,000.

The most important decrease to be noted in the current survey is in import credits, which fell off $46,000,000 from $383,000,000 in December to $336,200,000 on Jan. 31. Export credits followed with a reduction of $14,000,000 from $524,100,000 to $509,800,000. Dollar exchange bills declined $9,000,000 and domestic shipment bills fell off $2,800,000.

To offset this falling off of $71,000,000 in these four groups, the volume of acceptances used to finance the storage of goods abroad or the shipments between foreign countries, increased $29,000,000 and domestic warehouse credits increased $4,000,000.

The use of American bank credit in foreign countries continue sto expand, notwithstanding the seasonal fluctuations in this country, showing a constand gain throughout the past year to a total of $470,000,000, or nearly double that which was reported a year ago.

This class of acceptance business is constantly available to American banks in large volume but particularly so when rates in foreign centres are above those prevailing here, as they are at present. Furthermore, it gives the bill market a very fine volume of high-quality dollar acceptances used in world trade financing and does much to enhance the prestige of our banking institutions.

The banks and bankers in the New York Federal Reserve district had $35,000,000 fewer outstanding bills on Jan. 31 than a month ago and Boston $5,000,000 less, while Cleveland, Chicago aad San Francisco banks increased their volume by a total of $8,000,000. The San Francisco district volume now stands at $76,000,000, the highest on record.

Through three reductions since early in January, open market bill rates are now at the lowest quotation since April 1928, and seem to be in perfect accord with other rates for money and credit.

The rates at this date are as follows:

30	3⅞	3¾
60	3⅞	3¾
90	3⅞	3¾
120	3⅞	3¾
150	4	3⅞
180	4	3⅞

Details made available by Mr. Bean follow:

TOTAL OF BANKERS' ACCEPTANCES OUTSTANDING FOR ENTIRE COUNTRY, BY FEDERAL RESERVE DISTRICTS.

Branch Banks Needless, According to G. R. Meyercord, Former President of Illinois Manufacturing Association—Believes Present System Ample to Care for All Needs of Manufacturer.

Some of the objections to further extension of branch banking from the viewpoint of a manufacturer are outlined by George R. Meyercord, former President of the Illinois Manufacturers' Association, it is learned from the Chicago "Journal of Commerce" of Feb. 11, which indicates as follows what Mr. Meyercord has to say:

"Branch banking," states Mr. Meyercord in a bulletin issued to members of the Illinois Manufacturers' Association, "has become a live issue. Sudden and simultaneous interest in it is taken by politicians, bankers and bank customers.

"Comptroller of the Currency J. W. Pole took his stand before the convention of the American Bankers' Association a few months ago in favor of legalized National bank branches. The Beedy bill, recently introduced in the House, appears to be the legislative vehicle for Mr. Pole's plan. The new McFadden bill would put State banks of the Reserve System, bank holding companies, security companies and the other bank-affiliated concerns under the supervision of the Comptroller of the Currency. Then

Federal Reserve Bank of St. Louis

there is the Strong bill in the House, which aims to abolish all chain and branch banking.

Big Bankers Oppose Branches.

"It is a mistake to assume that most bankers, or even most big bankers, are in favor of branch banking. New York interests, for example, have so long held practically a monopoly of the largest financing operations that they are likely to view with apprehension any move calculated to build up power elsewhere. Public expressions made so far seem to indicate that bankers large and small throughout the country are divided in their opinions.

"Branch banking in my opinion is primarily a problem for bank customers, rather than for banks. A bank, after all, is merely a service organization and any change which may reduce the availability or the equitable value of its service to business is distinctly a step backward. That is the kind of a step this country will not take. Unless there is a clearly visible gain to business through such an extension of banking facilities, the whole scheme should be discarded. If it is evident that disadvantage may accrue to any legitimate activities, the whole scheme must be discarded.

Many Objections Evident.

"Many of the objections to branch banking are self-evident. The greatest efficiency of a normal human being placed in charge of a branch bank in a small city must lie in his ability to say 'No,' which is made easy for him by the shifting of responsibility to the central bank when that course becomes the discreet one. Important loans must be passed upon by the central office; loans which are unimportant (to the bank, that is, not to the customer!), if decided by the local manager, must be decided wholly on a balance sheet and collateral basis, for the reason that he knows little of the local items of character and intangible values.

"The local manager of a branch bank is destined never to know what he should know about those items, particularly if he is a good banker and an ambitious man, for whatever promotion he may work for and earn will move him on to a still newer post, where his 'Noes' may be still further developed. He cannot take root in the soil of any community. In his knowledge of local habits and personal equations he can never compete with the home-grown banker, who authorizes a loan to one because he personally knows it will be repaid, and to another because he has watched the constructive character of the borrower since boyhood.

Morgan Placed Character First.

"It should never be forgotten that one of the greatest of all bankers, J. P. Morgan, the elder, placed character above balance sheets as a guide to financial reliability."

Mr. Meyercord apprehends that if a National branch banking system were adopted in this country as in Canada, assuming that similar conditions would prevail under similar circumstances, every new community would find itself with several banks opened by the different larger banks. The losses sustained by these non-paying branch banks would have to be borne by customers elsewhere, which would mean the burden would fall upon business enterprises in the large industrial centers.

"Canada's experience," continued Mr. Meyercord, "indicates that more banks are opened under the branch banking system than the country needs. The United States under such a system probably would have about 48,500 banks, nearly twice as many as it now has. Even now many of our banks in rural communities are not earning any return on the banking capital invested. Some are actually losing. It is not likely that one single additional branch bank would be profitable. There would be an accumulation of losses sustained in the rural centers, which would be paid for by the manufacturing and trading industries in increased rates on their borrowings.

Would Restrain Competition.

"The vastness of the banks and their ramifications would inevitably restrain competition, particularly to the smaller manufacturer when he wished to create mortgages on his factory. The unrestricted competition now existing in the bond market would be almost entirely eliminated, as the banks would all go into the bond and mortgage business.

"Due to the very limited number of central banks, the effect would be that a manufacturer would have to consult his local branch bank manager and almost entirely depend upon him to place the bond issue. That, in the long run, would be certain to mean that a larger commission would be paid and a higher rate. The natural result would be that all other banks approached would send him back to his own banker. His credit would immediately be under a cloud if he attempted to get money elsewhere.

Petty Charges Would Result.

"Probably many petty charges would creep into vogue, such as a check collection charge, the income from which would produce annually so vast a sum as to amount to more than is now lost by bank failures.

"The banking system as it now stands is amply able to take care of all requirements of industry. The manufacturer has nothing to gain, all to lose, by the extension of branch banking."

Branch Banking Found to Offer No Preventive of Financial Ills Says Oklahoma State Bank Commissioner—Sound Management, Not Size, Gives Safety, He States.

Branch or group banking affords no specific cure for banking ills, in the opinion of C. G. Shull, State Bank Commissioner, as recently expressed before the Oklahoma State Bankers' Association. The remedy, Mr. Shull stated, is better banking. In an Oklahoma City dispatch, Feb. 7, the "United States Daily" reports this, and adds:

There are banks operating, however, Mr. Shull stated, in communities too small to support them.

"There are bankers here," he said, "operating a bank in a community which has two banks where only one is needed and can be supported. I want to ask that you go home with a determination to correct the situation yourself before it is too late."

The number of Oklahoma cities that will support a trust department is very limited, in the opinion of Mr. Shull, and he has on several occasions advised bankers in medium-sized county-seat towns not to attempt to organize a trust business.

"This is a special line of banking," Mr. Shull stated, "and needs trained officers, and the field of operation must be rather large to be profitable. At such points where there is some trust business, still not enough to support a department, I would suggest an affiliation with some well-owned and well-organized trust company, on the basis of sharing in the profits."

An authorized summary of his address on branch, group, and chain banking follows in full text:

In all the defense of branch or group banking the idea predominates that better trained and more capable management can be secured in the operation of large branches. That, to my mind, is the real meat in the cocoanut. After all, it is a question of management. The bigness of a bank is not necessary for safety or profit.

We have small country banks in this country and in Oklahoma that are just as safe and just as profitable as the larger institutions. This proves one thing, and that is that management is what is necessary to make the unit bank profitable and safe.

I will say to the individual banker there is no need to worry over group or branch bank competition, but go home with your mind made up that you will properly equip yourself with banking knowledge to enable you to formulate and follow successful banking policies in the operation of your institution.

Branch or group banking affords no specific cure for banking ills. The Bankers' Trust Co. of Atlanta closed its doors, and 83 banks of that chain in Georgia and Florida went down with the parent bank. Overexpansion and frozen credit can occur under one system as well as another.

Sound Policies Required.

The Home Bank of Canada, with 78 branches, failed and the Merchants' Bank of Canada, with 400 branches, practically failed and had to be absorbed by another large bank, assisted by the Canadian Government. It is not a question of system, but a question of management that safeguards the banking business. System and size cannot be substituted for sound policy and capable administration.

It is not necessary to make fundamental changes in our banking systems, and it is not necessary for the unit banker to give up his independence, but it is necessary for him to properly equip himself with knowledge of sound operation methods and with modern credit machinery and modern securities information. He must be prepared to furnish complete and satisfactory banking service in keeping with sound banking principles and wise banking policies.

I want to say in answer to those who belong to the McFadden school of banking, who favor one banking system for the country, namely, the National system, that in my opinion it does not coincide with our principles of government, nor is it for the best interests of the people of this country.

Both Systems Needed.

Our Government is founded on the principle that one department of state is a check on the other. The welfare of the average citizen demands two systems of banks—National and State. The National system, especially since the organization of the Federal Reserve Banks, has materially raised the standard of banking practices in this country. The State systems have been benefited as much as the National.

If we had only State banks I am firmly convinced we would have more slipshod and careless banking in the land to-day. On the other hand, if the State banking systems were wiped out of existence and the entire resources of the country were under the supervision of the Comptroller of the Currency and the Federal Reserve Banks, we would have the most autocratic money power this world has ever witnessed.

We do not need revolutionary changes in our banking system. Unit banking has been one of the main causes and the source of the inspiration and progress as of the United States of America.

The individual bankers can solve this question themselves. They must bring themselves to a realization that there are banking practices, that there is banking technique, by which they must abide and about which they must inform themselves, which will convert their institutions into permanent and profitable institutions. The remedy is not branch or group banking, but better banking.

W. J. Evans, of American Institute of Banking, Asserts Branch System Will Not Displace Unit Banks.

"The old unit bank will always fill a definite need in its community, despite claims that branch banking will make the unit banks obsolete," W. J. Evans, President of the American Institute of Banking, said at the twenty-ninth annual dinner of the New York Chapter in the Hotel Astor, Feb. 15. Mr. Evans, of Dallas, Tex., was the guest of honor at the dinner, at which Alan G. Warner, President of the New York Chapter, presided. Mr. Evans is quoted thus in the New York "Times," which states that bankers at the speakers' table included Philip A. Benson, President of the New York Savings Bank Association; George McLaughlin, President of the Brooklyn Trust Co.; J. Stewart Baker, President of the Bank of Manhattan Trust Co.; Henry A. Patten, President of the Corn Exchange Bank & Trust Co.; Charles S. McCain, President of the Chase National Bank; Winthrop Aldrich, President of the Equitable Trust Co.; Harry E. Ward, President of the Irving Trust Co.; John McHugh, Chairman of the Executive Committee of the Chase National Bank; J. Herbert Case, Deputy Governor of the Federal Reserve Bank; William K. Payne, President of the New York State Bankers' Association, and Joseph A. Broderick, Superintendent of Banking of New York.

Meeting of Federal Advisory Council in Washington —F. O. Wetmore Re-elected President.

Frank O. Wetmore of Chicago was re-elected President and B. A. McKinney of Dallas, Vice-President at the meeting of the Federal Advisory Council in Washington on Feb. 18. Washington accounts to the New York "Journal of Commerce" that day said:

The Council had an extensive meeting with the Federal Reserve Board, and it was understood that general business conditions and the money market situation were discussed. Developments within the Reserve system

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

during the last few weeks have been featured by reductions in the rediscount rates, which brought the banks at New York, Chicago, Boston and Kansas City to the 4% rate, with the others at 4½%.

Members of the Council were understood to have approved the rate reductions, feeling that conditions in the various Reserve districts justified the changes. It was anticipated that some of the 4½% banks might reduce to 4% within a short time.

Besides the officers, ex-officio members, the Executive Committee for the coming year will be composed of William C. Potter, representing the New York district; L. L. Rue of Philadelphia; Harris Creech of Cleveland, and Walter W. Smith of St. Louis.

Other members of the Council are: Frank K. Hallett of Boston, John Poole of Richmond, J. P. Butler, Jr., of Atlanta, George H. Prince of Minneapolis, Walter S. McLucas of Kansas City and F. L. Lipman of San Francisco.

It was understood that all recommendations of the Council related to inter-bank business.

Governor Harrison of New York Federal Reserve Bank Sails for Europe.

George L. Harrison, Governor of the Federal Reserve Bank of New York, was a passenger on the steamer Majestic which sailed for Europe last night (Feb. 21). He expects to return in a few weeks.

Revised Distribution of Earnings in Reserve System Proposed in Senate Bill of Senator Fletcher—Larger Dividends to Member Banks.

A change in the method of distributing surplus earnings of Federal Reserve banks would be made under the provisions of a bill (S. 3564) introduced in the Senate by Senator Fletcher (Dem.), of Florida, ranking minority member of the Senate Committee on Banking and Currency. This is made known in the "United States Daily" of Feb. 17, which says:

Under present law, Mr. Fletcher stated orally, on Feb. 15, the net earnings of Federal Reserve banks are distributed as follows: A cumulative dividend of 6% is paid to the stockholding member banks on the amount of paid-in capital stock held by them; earnings over and above such dividend requirements are transferred to the surplus account of the Reserve bank until that fund equals the subscribed capital stock of the Reserve bank, which is 200% of the paid-in capital stock; when that figure has been reached in the surplus account, additional earnings are distributed, 10% to surplus and 90% to the United States Government as a franchise tax.

For the year 1929, according to figures made public in the Federal Reserve "Bulletin" for February 1930, the Senator continued, 12 Federal Reserve banks had combined net earnings of $36,402,741. Of this, $9,583,913 was distributed in dividends, $22,535,597 was transferred to the surplus accounts of the 12 banks, and a franchise tax of $4,283,231 was paid to the United States Government.

Five of the Federal Reserve banks, those located in Boston, New York, Philadelphia, Cleveland, and San Francisco, not having accumulated a surplus equal to their paid-in capital stock, contributed nothing in 1929 as a franchise tax to the United States Government.

There has been considerable demand in recent months from the member banks of the Federal Reserve System, according to Mr. Fletcher, for a greater share in the earnings of the Reserve banks. Several Florida banks have communicated with him urging legislation to that end, Mr. Fletcher stated.

Changes Are Proposed.

The bill which he has introduced would provide, as at present, for the payment of a dividend of 6% upon paid-in capital stock, and the accumulation of a surplus equal to the subscribed capital stock; but for earnings in excess of these requirements to be distributed 10% to surplus and 90% to member banks on a pro rata basis measured by average reserve balance carried with the regional banks.

The Federal Reserve banks contribute much to the United States Government in free services by functioning as fiscal agents, Mr. Fletcher stated, and, moreover, by the terms of the Federal Reserve Act, the Government has a residual interest in the assets of the banks, since there is a provision that "should a Federal Reserve bank be dissolved or go into liquidation, any surplus remaining, after payment of all debts, dividend requirements as hereinbefore provided, and the par value of the stock, shall be paid to and become the property of the United States."

It seems wholly proper, Mr. Fletcher stated, that the member banks who have contributed all of the capital stock of the Reserve banks and who are required by law to carry their entire reserve as balance on the books of the Reserve banks should receive a greater share in the profits of the Reserve banks.

Does Not Affect Surplus.

Mr. Fletcher pointed out that the plan proposed by him makes no incursions into the building up of an adequate surplus for the Reserve banks. Had his proposal been enacted into law and applicable to the Reserve bank earnings for the year 1929 the same amount would have been paid to the member banks in the form of dividends and the same amount transferred to surplus. Ninety per cent. of the $4,283,231 which went to the United States Government in the form of a franchise tax would have been distributed, however, among the member banks of seven Federal Reserve Districts.

In addition to the seven Federal Reserve banks which already have accumulated surplus equal to their subscribed capital, the Federal Reserve Banks of Boston, Cleveland, and San Francisco have nearly reached that figure, leaving the banks in New York and Philadelphia as the only ones which would not be able for some time to make some distribution of excess earnings to their members.

Amendment Is Offered.

The bill (S. 3564) introduced by Senator Fletcher follows in full text:

To amend Section 7 of the Federal Reserve Act, as amended.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first and second paragraphs of Section 7 of the Act of Dec. 23 1913, known as the Federal Reserve Act (United States Code, Title 12, Sections 289, 290), as amended, be amended and re-enacted to read as follows:

"Sec. 7. After all necessary expenses of a Federal Reserve bank have been paid or provided for, the stockholders shall be entitled to receive an annual dividend of 6% on the paid-in capital stock, which dividend shall be cumulative. After the aforesaid dividend claims have been fully met, the net earnings shall be paid into a surplus fund until it shall amount to 100% of the subscribed capital stock of such bank, and thereafter 10% of such earnings shall be paid into surplus and 90% shall be paid at the end of each calendar year to the stockholders on a pro rata basis of distribution in accordance with rules and regulations which shall be prescribed by the Federal Reserve Board.

"Should a Federal Reserve bank be dissolved or go into liquidation, any surplus remaining, after the payment of all debts, dividend requirements as hereinbefore provided, and the par value of the stock, shall be paid to and become the property of the United States."

Amendments to Federal Reserve Act Proposed By Senator Norbeck — Freedom from Attachment Against Reserve Banks Sought Until Decision Is Reached on Suit.

Federal Reserve banks would be free from attachment or execution against them or their property before final judgment in any suit, action, or proceeding in any State, county, municipal, or Federal Court, under the terms of a bill (S. 3626) introduced Feb. 19 by Senator Norbeck (Rep.), of South Dakota, Chairman of the Senate Committee on Banking and Currency. Stating this, the "United States Daily" adds:

Under the present Federal Reserve Act, Reserve banks have power "to sue and be sued, complain and defend, in any Court of law or equity." The proposed amendment to the Act provides as follows:

"That the fourth subdivision of the fourth paragraph of section 4 of the Federal Reserve Act be amended to read as follows: Fourth, to sue and be sued, complain and defend, in any court of law or equity; but no attachment or execution shall be issued against such bank or its property before final judgment in any suit, action or proceeding in any State, county, municipal or United States court."

A second bill introduced by Senator Norbeck (S. 3627) provides for an amendment to the Act to enable National banks voluntarily to surrender the right to exercise trust powers and to relieve themselves of the necessity of complying with the laws governing banks exercising such powers, by filing with the Federal Reserve Board a certified copy of a resolution of its board of directors.

Companion bills have been introduced in the House, H. R. 10035 by Representative Fenn (Rep.), of Wethersfield, Conn., and H. R. 10036 by Representative Golder (Rep.), of Philadelphia, Pa., both members of the Banking and Currency Committee of the House.

Bill Proposing to Fine Perpetrator of Run on National Bank.

A bill proposing to place a fine on any person who maliciously starts a "run on any National or State member bank of the Federal Reserve System" was introduced in the House on Feb. 1 by Representative Hooper (Rep.), Michigan. According to the New York "Journal of Commerce," the measure would impose a fine of not more than $5,000 or imprisonment not to exceed five years, or both, on anyone who circulates a false report concerning a National or State member bank which tends to impute insolvency or unsound financial condition of the banks.

Inquiry by House Committee Into Chain and Branch Banking to Start Feb. 25—Comptroller of Currency Pole to be First Witness—Proposed Amendment to Federal Farm Loan Act.

The proposed inquiry into branch and chain banking, called for in the resolution agreed to by the House of Representatives on Feb. 10, will be brought under way by the House Committee on Banking and Currency on Tuesday next, Feb. 25. The resolution was given in our issue of Feb. 25, page 1057. The Washington correspondent of the New York "Journal of Commerce" writing under date of Feb. 20, said:

Disregarding the Administration's proposal to have experts of the Federal Reserve Board, Treasury Department and the American Bankers' Association participate at hearings, the House Committee on Banking and Currency to-day finally agreed upon plans for the long heralded investigation of branch and chain banking with a view to determining needs for legislation.

The program calls for opening hearings next Tuesday, with Comptroller of the Currency John W. Pole as the first witness. Hearings are to be held three days each week, on Tuesday, Wednesday and Thursday, from 10:30 a. m. to 1 p. m.

Mellon to Follow Pole.

Following the appearance of Mr. Pole, whose testimony may require several days, the committee will hear Secretary Mellon, Undersecretary Mills or one of the Assistant Secretaries of the Treasury. Gov. Young and other members of the Federal Reserve Board then will be heard, followed by representatives of the 12 Reserve banks, starting with the New York Bank. Finally proponents and opponents of branch and chain banking will be heard.

Action of the Committee to-day follows a spirited wrangle at Tuesday's meeting over the suggestion of Chairman McFadden to have the Committee extend invitations to the Federal Reserve Board, Treasury Department, Comptroller of the Currency and the American Bankers' Association to assign experts to act in an advisory capacity at the hearings. McFadden, whose unrelenting efforts of the past two months were credited with getting the inquiry under way, was said to have acted at the request of the Administration. Representative Carroll L. Beedy (Rep.), Maine, led the opposition against the Administration's proposal.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Although the committee rejected the Administration's proposal to have "advisors" sit in during the hearings, Chairman McFadden explained that a disposition was shown at to-day's session to call in experts if needed at any time.

Hearing on Letts Bill Amending Federal Farm Loan Act.

Immediately after mapping the program for the inquiry the committee called a hearing for to-morrow to consider the Letts' bill proposing to amend the Federal Farm Loan Act so as to extend the time of assessing and enforcing the liability of shareholders and the liquidation of banks under the law. Paul Bester, Commissioner of the Farm Loan Board, and Chester Morrill, general counsel, will appear in support of the legislation, which is recommended by the Treasury. Representatives Fitzgerald (Rep.) of Ohio and Rainey (Dem.) of Illinois also will appear.

In addressing the House yesterday on the subject of branch and chain banking Chairman McFadden said he doubted whether the Committee will be ready to submit legislation at this session of Congress. "If, however, it is possible for us to come to definite conclusions," he added, "I do not want to shut the door by making a promise that we will not make definite recommendations."

By opening the hearings on branch and chain banking with the testimony of the Comptroller of the Currency the Committee indicated that the McFadden measure proposing to enlarge the functions of that bureau would be used as a vehicle for the inquiry.

"The Comptroller of the Currency," Mr. McFadden said yesterday in addressing the House, "in his annual report to Congress calls attention to the serious situation confronting the national banks of the country because of various developments in branch and chain banking." Mr. Pole recommends, he said, that branch banking under the national system be permitted to extend to trade areas without regard to Federal Reserve districts.

"Those bankers," Mr. McFadden added, "who are engaged in holding company or chain banking apparently are engaged in this particular form of banking simply as a makeshift, awaiting and hoping for the time when branch banking will be extended so as to permit them to carry on their operations as legitimate branch bankers."

In its advices from Washington, Feb. 19 stating that the Banking and Currency Committee discussed the proposed banking study on Feb. 18, but its meeting resulted in a dispute over the Administration's proposal to have experts of the Federal Reserve System, Treasury Department and the American Bankers' Association "sit in" with members of the committee at hearings on the branch and chain banking investigation, the "Journal of Commerce" stated:

Mr. McFadden's views were disclosed on the floor of the House to-day during a colloquy between himself and Minority Floor Leader Garner, who undertook to draw from the Banking and Currency Committee chairman a positive statement that no banking legislation may be anticipated at this session. It was the Banking and Currency Committee's calendar day, and following the passage of four banking measures the Chairman laid before the House what Mr. McFadden termed "a sort of historical review" on branch and chain banking.

Points to Changed Conditions.

"The gentleman (McFadden) has made a very illuminating statement converning branch banking, group banking and chain banking," interposed Mr. Garner as the colloquy got under way. "Does the gentleman approve of the tendency of the day in that direction?"

"I will say to the gentleman (Garner)," the Chairman replied, "I am speaking with a view of a study of this question and I am trying to hold my own mind in a judicial attitude. If I were compelled to answer the gentleman, and I am sure he is not going to force me to do so, I do not know at the moment just what I would suggest. This is one of the reasons our Committee should take up a study of this question. So much has been happening within the past year to change former conditions, that I think it is well for the members of our Committee, and well for the members of this House, to know exactly what is taking place and try to formulate a plan which will deal with the situation in the manner in which it should be dealt with."

"The gentleman seems to be in possession of a good deal of facts," observed Mr. Garner.

"I am trying to relate the facts as I understand them," returned Mr. McFadden, adding that "it is a sort of historical review."

"As I understand, the gentleman is going to try to confirm these facts as he understands them by an investigation," the minority leader said.

"By a study and not an investigation," the Banking and Currency Committee Chairman insisted.

"I presume before the gentleman enters into a study of it, he will try, undoubtedly, to get the facts upon which to apply his mind," inquired Mr. Garner.

"Yes," snapped Mr. McFadden.

"And the gentleman's Committee, I presume, will make an investigation to the extent of getting some facts before it begins its study," came back Mr. Garner.

"We are going to endeavor to do that," assured Mr. McFadden.

Report at Next Session.

Later, Mr. McFadden told the House that if national legislation is necessary he thought it would flow as a natural consequence of this study. He invited suggestions from members of the House, explaining that he felt sure that his Committee would be pleased to have such suggestions.

Further pressed for enlightenment as to when the House may hope for a statement as to what should be done, if anything, Mr. McFadden explained that the Rules Committee's resolution authorizing the proposed inquiry does not provide that "we shall report our findings at the end of the Congress but, apparently, we must infer that the report shall be filed before the next session of Congress."

In his speech, comprising 22 typewritten pages, Mr. McFadden declared that in any grant of authority to extend branch banking, the question is bound to arise: "What will be the future of the Federal Reserve System." He said that there is no doubt in his mind that if branch banking is extended so as to permit nation-wide branch banking, chain or group banking will largely become a thing of the past.

"If branch banking is extended only to the State to the Federal Reserve District or to the trade area, district chain banking will not be satisfied," he contended, "but will continue to expand, and this undoubtedly will result in the ultimate control by New York, and possibly Chicago, of all of the independent groups throughout the country."

This, he said, will mean that "we have chain banking to the extent of controlling ownership in those groups where control can be had, branch banking within trade areas, and unit banking in those localities where its independence can be maintained in competition with the highly developed plans of group and chain banking." He pointed out that with this development advanced as far as it has that the City of New York can largely dominate and control the election of the directors of the Federal Reserve Bank in the second district. He also pointed out that in the twin cities of the Northwest—St. Paul and Minneapolis—through the control of the Northwestern Banking Corp. of the banks in several of the adjacent States, that they can dominate the election of the directors and thus control the management of the Federal Reserve Bank for their district.

Mr. McFadden's remarks precipitated a discussion of the Bank of Italy and its 297 branches. Replying to questions, Mr. McFadden said he understood control of the stock of the holding company of the Bank of Italy which was the Bancitaly Corp. was taken over by the Transamerica Corp. of New York. This latter company, he said, now is the holding company and owns control of all of the affiliated banks of the former Bancitaly company, which included the Bank of California.

"This same acquisition," he said "now includes the Bank of America in New York, the Bank of America in California, with its many branches, and large holdings of stock in many banks throughout the country."

On Feb. 18 the same paper reported the following from its Washington correspondent:

Vigorous opposition tothe Administration's policy of having experts of the Federal Reserve system, the Treasury Department and the American Bankers' Association "sit in" with members of the House Committee on Banking and Currency in writing branch and chain banking legislation blocked efforts of Chairman Louis T. McFadden (Rep.), Pennsylvania, to map plans for hearings at a meeting to-day . . .

Asks Advice.

The row was reported to have been precipitated when Representative Corroll L. Beedy (Rep.), Maine, opposed Chairman McFadden's suggestion that the Committee extend invitations to the Federal Reserve Board to assign to the Committee Randolph Burgess, Assistant Federal Reserve agent of the New York Federal Reserve Bank, to act in an advisory capacity. Mr. McFadden was also understood to have carried out his plans of asking the Committee to invite the American Bankers' Association to assign to the Committee its general counsel., Thomas B. Paton, the Federal Reserve Board to assign E. A. Goldenweiser, head of the Statistical and Economic Division of the Board, and the Comptroller of the Currency to designate for the same service F. G. Awalt, Deputy Comptroller of the Currency.

While neither Messrs Beedy nor McFadden would respond to interrogations of the reported disagreement, two of their colleagues present at the session, discussed the matter to some extent. Both gave similar accounts to the effect that Mr. Burgress was the target of Mr. Beedy's attack upon the recommendation of the Chairman. who was undertsood to be carrying out the wishes of the Administration in seeking to have such banking experts act in advisory capacities in the course of the inquiry and ultimately the drafting of legislation. No concrete reasons which the Maine member may gave given for his reported objection to the New York Reserve Bank's Agent were divulged.

In one quarter the report was circulated that reports gained circulation that Mr. Beedy received considerable support from his colleagues with respect to having the experts sit in during the drafting of legislation at sessions which supposedly would be executive. However, even the reports from those overhearing the Committee proceedings through the door transom were indefinite on this point.

Tenders of $186,183,000 Received for $50,000,000 Treasury Bill Offering—Bids of $56,108,000 Accepted—Average Price 99.174.

Tenders of $186,183,000 were received by the Treasury Department at Washington for the $50,000,000, or thereabouts, of Treasury bills, for which bids were asked by Secretary Mellon on Feb. 10. The offering was referred to in these columns Feb. 15, page 1061. The total amount of bids accepted, according to Secretary Mellon's announcement, was $56,108,000. The bills, as we have previously noted, are issued under the authority of the amendment to the Second Liberty Loan Act, signed by President Hoover on June 17 1929; the bills are payable at maturity without interest, and are sold on a discount basis to the highest bidder. Secretary Mellon's announcement of Feb. 14 regarding the bids accepted follows:

"The Secretary of the Treasury announced that the tenders for $50,000,000 or thereabouts of Treasury bills which were offered on Feb. 11 were opened at the Federal Reserve Bank on Feb. 14.

"The total amount applied for was $186,183,000. The highest bid was 99.250 equivalent to an interest rate of about 3% on an annual basis. The lowest bid accepted was 99.125, equivalent to an interest rate of about 3¼% on an annual basis. The total amount of bids accepted was $56,108,000. The average price of Treasury bills to be issued is 99.174. The average annual rate on a bank discount basis is about 3.30%."

The Treasury Department does not make known the names of the successful bidders. The Marine Trust Co. of Buffalo, the largest bank in the chain controlled by the Marine Midland Corp., announced on Feb. 15 that it had purchased $50,000,000 of the $56,108,000 new Treasury bills. This was noted in the New York "Times" of Feb. 16, which further stated:

Of the remaining $6,108,000, a block of $1,000,000 went to C. F. Childs & Co., Inc., and the balance to various banks and dealers.

The price paid by the Marine Trust Co. for its block was 99.178. Re-offering of the issue will be made at 99.209, to yield the investor approximately 3.164%. The average price paid for the $56,108,000 was 99.174, or about a 3.30% basis. The bills are dated Feb. 18 and will mature on May 18.

Although the original announcement of the sale made by Secretary Mellon called for the sale of only $50,000,000 of bills, the right was reserved to award bills in excess of this amount. Thus, the re-offering prices on such of the $6,108,000 bills as are placed on the market will differ from the price quoted on the principal block owing to the fact that various prices were paid.

The new issue represents the second offering of non-interest bearing Treasury bills, the first, in the amount of $100,000,000, having been made in mid-December. Of this amount, $69,395,000 went to the International Manhattan Co., Inc., and Salomon Brothers & Hutzler, bidding jointly. The bankers re-offered their portion of the issue on a 3.125% basis. This issue will mature on March 17.

In view of the comparatively limited amount of short term tax-exempt issues available in the open market, it was said yesterday by the bankers

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

that the fact that bids were received by the Treasury in excess of three times the amount awarded was not surprising.

Details of the $50,000,000 issue were given in these columns Feb. 15, page 1061. In the case of the $100,000,000 offering of Treasury bills in December, tenders of $223,901,000 were received, and the total amount of bids accepted was $100,000,000. The highest bid was 99.310, equivalent to an interest rate of about 2¾% on an annual basis. The average price of bills accepted was 99.181—the average annual rate on a bank discount basis being about 3¼%. The results of the offering of the $100,000,000 issue were given in these columns Dec. 21, page 3903.

Forthcoming Treasury Issue.

Notice of a new Treasury issue is indicated in the following circular issued this week by the Federal Reserve Bank of New York:

[Circular No. 961, Feb. 18 1930.]

NEW TREASURY ISSUE—PRELIMINARY NOTICE OF OFFERING AND METHODS OF FILING SUBSCRIPTIONS.

To All Member Banks, State Banks, Trust Companies and Savings Banks in the Second Federal Reserve District:

From advices received from the Treasury Department of the United States, this bank is enabled to transmit to banking institutions in this district the following information:

1. That a Treasury offering may be expected shortly.

2. That the subscription books may be closed by the Treasury without advance notice, and therefore,

3. That each subscribing bank, upon receipt of information as to the terms of the Treasury offering (either in the press, through the mails or by telegram) should promptly file with the Federal Reserve Bank any subscriptions for itself and its customers. This is important, as no guarantee can be given as to the period the subscription books may remain open, and subscribing banks, even before receipt of official subscription blanks, may file their subscriptions by telegram or by mail with the Federal Reserve Bank. Any subscriptions so filed by telegram or mail in advance of receipt by subscribing bank of subscription blanks furnished for the particular issue should be confirmed immediately by mail, and on the blank provided, when such blank shall have been received.

4. That if the terms of the offering when announced provide for both cash subscriptions and subscriptions for which payment may be tendered in other securities, the subscribing bank should prepare its subscriptions in such manner as to indicate the method by which it proposes to make payment and the respective par amounts of securities, if any, to be tendered in payment.

Classification of Subscriptions, &c.

Bank Customers' Subscriptions.—With regard to issues, subscriptions to which the Treasury determines for the purpose of allotment shall be considered as on a cash basis irrespective of whether or not payment is to be made in cash or in securities, the following classification will be required of subscriptions made for account of customers, stating the number of subscriptions in each class:

Class A—Subscriptions for $1,000 or less for any one subscriber;
Class B—Subscriptions for over $1,000, but not exceeding $10,000;
Class C—Subscriptions for over $10,000, but not exceeding $50,000;
Class D—Subscriptions for over $50,000, but not exceeding $100,000;
Class E—Subscriptions for over $100,000, but not exceeding $500,000;
Class F—Subscriptions for over $500,000, but not exceeding $1,000,000;
Class G—Subscriptions for over $1,000,000.

Where the maturing securities are not by the instructions accompanying the offering given a preference, they shall be treated as cash and such subscriptions to be paid for in securities should be included in the classification.

Bank Subscriptions.—A subscription for a bank's own account should not be included in the above classification of subscriptions for account of customers, but should be clearly indicated as for the bank's own account and in addition to subscriptions for customers.

Subscriptions Not Classified.—Where under the terms of an offering or under instructions accompanying an offering, the Treasury agrees to allot new securities *in full* for any of its securities maturing on the date of the new issue or on any later date, subscriptions to be paid for in such securities *should not be classified.*

Application Forms to Be Furnished.

When the terms of the offering are announced, notice thereof, together with subscription blanks, will be mailed promptly by this bank to banking institutions in this district. Should notice and subscription blanks for any reason be delayed in reaching such institutions this bank will nevertheless receive subscriptions either by letter or telegraph. It is suggested that subscriptions be promptly transmitted to this bank.

If it be found necessary to telegraph subscriptions they should be confirmed immediately either by letter or on subscription blank, setting forth the classifications indicated above and method of payment, and clearly stating that the confirmation is not an original subscription so that duplication may be avoided.

Subscriptions cannot be received until the terms of the offering are publicly announced by the Secretary of the Treasury.

GEORGE L. HARRISON, *Governor.*

New Size Currency Available in All Denominations, According to Federal Reserve Bank of New York.

The Federal Reserve Bank of New York issued this week the following circular regarding the new size currency:

[Circular No. 962, Feb. 19 1930.]

NEW SIZE CURRENCY IN ALL DENOMINATIONS.

To All Member Banks, State Banks and Trust Companies in the Second Federal Reserve District:

During the period of conversion of the old size to the new size currency, which began last July, payments in the new series have been made only in denominations up to and including $100. The new size currency now is available in all kinds and denominations, and all banking institutions in this district are requested to forward to us for replacement, in the customary manner, all old size currency now in their possession whether in small or in large denominations.

In this connection, particular attention is invited to the fact that new size national bank notes also are available at the Treasury Department for replacing old size national bank notes.

GEORGE L. HARRISON, *Governor.*

Offering of $2,000,000 4¾% Bonds of New York State Land Bank.

An offering of $2,000,000 4¾% gold bonds of the Land Bank of the State of New York was announced as follows on Feb. 17 by David B. Hutton, Managing Director of the Bank:

The Land Bank of the State of New York offers for sale bonds in the amount of $2,000,000, or any part thereof, bearing date Mar. 1 or April 1 1930.

These bonds are sold at par, bear interest at the rate of 4¾% per annum payable semi-annually, mature for payment in equal installments over a period of 10 years, are registered as to principal and interest, and are sold in series only.

The Land Bank bonds are exempt from taxation as personal property in New York State, and the income received therefrom is exempt from the State income tax. The bonds are legal investments for savings banks (Article VI—section 239—sub-divisiion 10 banking law) and for trust and fiduciary funds.

The Dec. 31 1929 statement of the bank showed total resources of $15,609,387.92. Capital was $1,000,000. The guaranty fund was $24,700 and undivided earnings were $56,262.14. Land Bank bonds secured by first mortgages on improved real estate totaled $14,213,000 and advance payments for bond redemptions were $170,000. The Land Bank held $371,137.92 in cash. Loans on mortgages totaled $14,213,000 and issues of mortgages were $1,025,250.

Senate Action on Tariff Bill—Aluminum Duty Cut—Higher Duties on Cattle and Farm Products—Silver Duty Rejected.

As we indicate in another item in this i sue, President Hoover conferred, at a White House breakfast on Feb. 18, with Congressional leaders with a view to hastening action on pending legislation, and particularly the tariff bill. The President reached Washington on Feb. 17 after a brief sojourn in Florida, and one of the first matters to which his attention was directed after returning to his offices was the situation in the Senate—delay there on the tariff bill having blocked other legislation. The situation was outlined to the President on Feb. 17 by Representative John Q. Tilson, Republican leader of the House. The New York "Herald Tribune" of Feb. 17 indicating this as follows:

Representative Tilson told the President in a long conference in the executive office that legislative machinery had become so clogged in the Senate that it will be necessary for the House to take three-day recesses within a month unless something is done to remedy the situation.

Whether President Hoover would intervene personally in an endeavor to untangle the legislative snarl in the Senate was not made known at the White House. It was made quite clear, however, that Representative Tilson told the President frankly that when the House completed the work now before it, about three weeks hence, further progress would be seriously impeded by the Senate tie-up.

In our item of a week ago (pages 1062-1063) rega ding the Senate action on the tariff bill, we included what had been done on the measure up to Feb. 13. The debate on the confirmation of the nomination of Charles Evans Hughes as Chief Justice of the United States Supreme Court had served to interrupt the course of the bill for a time, but on Feb. 14 the Senate, in resuming its consideration of the tariff legislation, completed consideration of individual amendments offered to the earthenware schedule. The Washington dispatch Feb. 14 to the New York "Times" noting this, said:

To-morrow it will proceed to a discussion of the metal schedule, which embraces iron and steel and related products likely to stir up opposition on the part of the Coalition.

On motion of Senator Copeland of New York the Senate (Feb. 14) again revised the paragraph dealing with the duties on bottles, vials and jars used as containers for prefumes and other toilet articles.

Two Amendments Carried.

It fixed the rate on machine bottles at 40% ad valorem, instead of the duty of 65% heretofore approved, but retained the duty of 75% ad valorem on hand-made bottles as adopted several weeks ago on the recommendation of the New York Senator.

Higher rates were levied on children's, school and artists' paints by an amendment offered by Senator Walsh of Massachusetts. His proposal was adopted as a result of a statement he made that importers of these products were evading the existing duties upon assembled sets by bringing in the materials separately.

His amendment provides that tubes, jars, pans and other forms of the paints shall pay one cent each when weighing not exceeding 1½ pounds; 40% ad valorem when weighing in excess of 1½ pounds and 8½ cents per ounce in bulk or other form not included in the first two brackets. These sets, when assembled in sets, would bear a duty of 70% ad valorem.

Increase on Roofing Slates.

Agreement was reached on new rates for fluospar providing that when the product contains more than 93% of calcium fluoride it shall be taxed at $5.60 per ton and when containing not above 93% of calcium chloride it shall be dutiable at $8.40 a ton.

On motion of Senator Dale of Vermont the rate on roofing and other slates was increased from 15 to 25% ad valorem. The former rate was carried by the House bill and accepted by the Senate Finance Committee.

Efforts made by Senator Couzens of Michigan to obtain reconsideration of the action of the Senate in fixing a rate of 2 cents a pound on graphite (crystalline flake) instead of the duty of 20% ad valorem reported by the Finance Committee proved futile.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Senator Couzens said that since the adoption of an amendment offered by Senator Black of Alabama in November prescribing the cent-a-pound rate he had received information convincing him that the duty was unwarranted.

Senator Black protested against the action of manufacturers demanding "free raw materials" and asserted that the coalition was working to protect producers in the mines, the fields and the forest.

The Senate adhered to the specific rate provided for by the Black amendment.

On Feb. 15, owing to the inability to maintain a quorum, the Senate quit at the end of a two-hour session. The "Times," noting this, said:

On motion of Senator Barkley, Democrat of Kentucky the duty on sponge iron was fixed at 75 cents a ton, as compared with the rate of $2 a ton carried by the bill as reported. A motion by Senator Barkley that boron carbide be transferred to the free list was rejected. This product is taxed at 25% ad valorem by the bill.

The same dispatch (Feb. 15) said:

Passage of the tariff bill by the Senate early in March, which he now believes probable, will do a great deal to relieve business uncertainty, enlarge production and consumption and increase employment, Senator James E. Watson of Indiana, Republican floor leader, said to-day.

On Monday, Feb. 17, the Senate struck at the tariff rates on aluminum with the Aluminum Co. of America, in which Mellon interests are heavily concerned, under severe criticism, said a dispatch to the New York "Herald Tribune," from which the following is also taken:

The Democratic-Republican insurgent coalition forced the duties on crude and scrap aluminum down from 5 cents a pound to 2 cents, and on plates, sheets, bars, squares and the like from 9 cents to 3½ cents. It followed this up by cutting the duty on household utensils made of aluminum from 11 cents a pound and 55% ad valorem to 25%.

The fight on the aluminum rates, intended to force these rates back to the Underwood law level was led by Senator Thomas J. Walsh, Democrat, of Montana, backed by Senator Alben W. Barkley, Democrat, of Kentucky; Senator George W. Norris, Insurgent Republican, of Nebraska, and others of the coalition forces. The result was looked on by the coalition as the biggest victory for lower rates it has had since the contest over individual amendments opened.

The test came on a motion by Senator Walsh to reduce from 5 cents to 2 cents the duty on crude and scrap aluminum. This was carried, 41 to 39. Senator Walsh's amendment to reduce the duty on plates, sheets and various other forms of the product from 9 to 3½ cents then was adopted viva voce, and an amendment by Senator Barkley making the cut to 25% on household utensils carried, 41 to 30.

How Senators Voted.

The vote on the Walsh amendment to reduce crude and scrap aluminum from 5 cents to 2 cents a pound was: For the reduction, 41; Republicans, 15; Democrats, 26; against the reduction, 39; Democrats, 5; Republicans, 34.

* * *

Mellon Assailed in Debate.

The name of Andrew W. Mellon, Secretary of the Treasury, was drawn into the controversy repeatedly. Senator Norris brought up the old charge that Mr. Mellon is prohibited by law from being Secretary of the Treasury on the ground that he is engaged in the carrying on of trade or commerce.

Senator Walsh attacked the Aluminum Co. of America as "an ironbound and copper-rivited monopoly." He called attention to the fact that in 1922 the rates on crude aluminum were raised from 2 cents to 5 cents and on soils, plates, sheets, bars, rods, circles, disks, blanks, strips, rectangels and squares from 3½ cents to 9 cents. After that, he said, prices to consumers promptly went up.

"The Aluminum Co. of America," he said, "is the sole producer of aluminum in America. It controls innumerable subsidiary companies all over the world—in South America, in the countries of Europe, in Canada and in the United States. Not only is it the sole producer of aluminum, but controls all commercial supplies of bauxite in the United States out of which aluminum is made. Not only that, but it controls very largely the supply of bauxite coming from South America, from British and Dutch Guiana, as well as holdings in Europe."

No Competition Possible.

Because of its control of bauxite, he said, no competition could be organized in this country to compete.

"With its production in the United States and its subsidiaries in Europe and Canada," he continued, "it actually produces more than 50% of the world's surplus. It's annual production in the United States is 90,000 tons of a total of 230,000 tons produced in the world. Of the 38,000,000 pounds of crude aluminum imported into the United States, the greater portion comes from the properties of the Aluminum Co. of Canada."

Senator Walsh said the Aluminum Co. of America had declined to make public its cost of production, but the Federal Trade Commission investigated the prices charged for kitchen utensils and reported that the company had violated the consent decree of 1912 and the then Attorney General, now Associate Justice Harlan F. Stone, of the Supreme Court, held it was subject to prosecution for contempt. A new Attorney General came in, however, the Senator said, and the conclusion was reached there was no violation of the decree of 1912.

Senator Royal S. Copeland, Democrat, of New York, expressed fear the New York aluminum companies would be moved to the Saguenay River region of Canada.

The Senate voted on Feb. 18 to raise the tariff on live cattle ½ cent a pound above the rates proposed by the House and by the Senate's Finance Committee. We quote from the Washington account Feb. 18 to the New York "Times," this further stating:

Four Eastern Democrats, Senators Copeland and Wagner of New York; Walsh of Massachusetts and Harris of Georgia, registered the only dissenting votes.

The vote, 72 to 4, was taken on an amendment introduced by Senator Connally, Democrat, of Texas, who asked for rates of 2½ cents a pound for cattle under 700 pounds in weight and 3 cents for those above, against rates of 2 cents for those under 800 pounds and 2½ for those over that figure adopted by the House and recommended by the Finance Committee. The present rates are 1½ cents on cattle under 1,050 pounds and 2 cents on those weighing 1,050 pounds and over.

The decisive vote was not reached without a spirited debate in which Senator Connally withstood attacks by Senators Copeland and Walsh of Massachusetts on his motion. They raised the point of the increased cost to consumers which would result from higher duties on cattle.

Metals and Wood Rates Acted On—Duty on Silver Rejected.

The Senate returned to the agricultural schedule of the bill for the vote on the cattle rate after completing action on the metals and wood schedules.

On the metals schedule the Senate by 34 to 32 rejected an amendment by Senator Pittman of Nevada to put a duty of 30 cents an ounce on silver, now on the free list. The Democrats won on motions to reject increased levies on aluminum foil and metal household utensils containing electrical heating units.

Senator Copeland put through a motion to cut to 20% the duty on metal buckles worth over $1.66 2-3 a hundred, but lost on a proposal to eliminate a rise from 20 to 30% in the rate on new metal type. The Senate approved an increase in the duty on zinc-bearing ores.

Senator Copeland was defeated on an amendment to change the duty on wood flour from 33 1-3% to $3 a ton.

The Senate refused to change the duty on certain classifications of ply board after Senator Vandenburg, Republican, of Michigan, had asked that in addition to the 40% ad valorem rate which now obtains on all classes, a special duty of 2 cents a square foot be charged on ply board of beach and elder.

As to the action on the bill on Feb. 19, we quote the following from the "Times":

The Senate to-day proceeded with increases in rates in the agricultural schedule of the tariff bill item by item, to the disregard both of complaints from adminstration leaders as to the slow progress on the measure and of attacks by a few Eastern Democrats on amendments which they charged would boost the cost of foods to the consumer.

Senators Copeland and Walsh of Massachusetts, aided by Senator Wagner, who yesterday vainly opposed the rise in the duty on cattle, argued against most of the advances, but with no more success.

The debate was marked by a denunciation by Senator Blaine of Wisconsin, a member of the insurgent group, of some of the farm organization. He asserted that they had sought a rate of 40% ad valorem on cheese and substitutes, whereas he believed this to be inadequate.

Senator Brookhart tried to show that the farm groups had endorsed a rate of 42½%.

"That was after I served notice on the so-called farm organizations that if any amendment was proposed as they wanted it proposed, 40% ad valorem, I would take the floor and expose their combinations and consorting with the packers and processors," Senator Blaine retorted.

"Of Same Character as Lobbyists."

"I have no faith in the so-called farm prepresentatives. The farm representatives are the racketeers here, identically of the same character and of the same kind as Mr. Arnold and the whole pack of lobbyists who have been before Congress."

Mr. Blaine's reference was to J. A. Arnold, Washington manager of the Southern Tariff Association and the American Taxpayers' League, who has been a witness at recent senate lobby investigation hearings.

Fight on Higher Cattle Duties.

The Connelly amendment raising the cattle duties was assailed by Senator Copeland on the ground that the 6,000,000 residents of New York City, as well as the other urban populations, would have to pay more for an essential of life for the direct benefit of the farmers of the country. Some farmers, he added, were aided by various legislation, while others were not, but all classes besides the farmers would be taxed for the support of the latter in this measure.

Walsh Assails Senate's Action.

Senator Walsh, in a statement issued to-night, charged that the Senate, by its vote on the cattle rates, had virtually doubled the prevailing duties on beef.

"This indicates that the consumers of food are to have levied in the pending bill tariff duties heretofore undreamed of and the highest in tariff legislation," he continued.

"The shocking part of the debate and vote in the Senate to-day is that it reveals only a handful of opposition.

"It was to be expected that the so-called coalition of Democrats and farm bloc Republicans would support all of the efforts to increase duties even higher than the increase given by the committee on food products, but to-days' vote reveals that the Republican insurgents have frightened the old guard protectionists to such an extent that they are willing to vote for any duty proposed, however high it may be, in the agricultural schedule."

Action on Amendments.

The Senate approved an amendment by Mr. Blaine raising the cheese rate to at least 42% instead of the present 35%. As the bill now stands, it provides for a specific rate of 8 cents a pound on cheese and subsitutes, but states that the duty shall not work out to less than 42% ad valorem.

Senator Copeland departed from his general opposition to the rises to offer a motion, which was approved, putting the duty on romano cheese, made from sheep's milk, at 8 cents a pound. In the present law, the duty on Swiss cheese is 7½ cents, but not less than 37½% ad valorem, and on other cheese 5 cents, but not less than 25%.

Variety of Increases Approved.

A rate of 10 cents per pound on dates in container packages of ten pounds or less was adopted on motion of Senator Hayden of Arizona, by vote of 46 to 28. Senator Goldsborough, Republican, of Maryland, was successful in securing a rate of 8 cents per pound on canned oysters, now on the free list.

A rate of 15 cents a pound on alligator pears and mangoes was approved, on motion of Senator Fletcher of Florida.

The Senate adopted a proposal by Senator Thomas of Idaho to raise the duty on imported dried beans from 1¾ cents a pound to 3 cents. It also approved an amendment by Senator Fess of Ohio to increase the duty on sauerkraut from 35% ad valorem to 50%.

Approval was given to an amendment by Senator Vandenberg to make the rate on raw chicory 2 cents a pound. The existing rate is 1½ cents.

The duty on pineapples was increased from 22½ cents a crate, as in the present law, to 50 cents.

On motion by Senator Wagner spice seeds and unground spices were placed on the free list. Mr. Wagner argued that a tariff had been put on these products for revenue purposes, since they were not grown in the United States, and that it should be removed.

Defeat of efforts to impose a tariff on bread, and to increase the duty on lard, figured in the Senate action in Feb. 20, as to which the "Times" stated:

Efforts to impose a duty of 20% ad valorem on bread, now on the free list, and increase by 300% the rate on lard led to a lively Senate debate on the tariff to-day, accompanied by a warning by Senator Blaine, insurgent

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Republican, of Wisconsin, that if the Senate went too far in raising duties on foodstuffs it might afford President Hoover an "excuse" to veto the bill.

Senator Norbeck of South Dakota, another coalition member, also fought a number of amendments proposing increased duties on foodstuffs on the ground that the effect would weaken the export debenture amendment, by which payments on farm products are on the basis of half the tariff rate, and possibly result in a veto.

"If we are to retain the debenture amendment," said Mr. Blaine, "we do not want, by raising rates indiscriminately, to give excuses for the President to veto the measure. We should avoid bringing about such a situation."

The entire day's discussion was on the agricultural schedule, on which action was completed, with many rises voted. But the farm bloc split on several items, other members sharing the view of Senators Blaine and Norbeck that there was danger of Executive disapproval if the Senate did not hold foodstuff rates within reasonable limits.

Vote on Lard and Bread Items.

By a vote of 53 to 23, the Senate rejected the amendment, by Senator Brookhart, to raise the rate on lard from 1 cent to 4 cents a pound, instead of 3 cents, as proposed by the bill.

Without a roll-call the Senate defeated the amendment, by Senator Frazier, proposing the 20% levy on bread. It also rejected an amendment by Senator Brookhart to increase the duty on oleo oil from 1 cent to 3.7 cents a pound.

Other "farm" amendments had better luck. On motion of Senator Hawes, Democrat, of Missouri, a duty of 3 cents a pound instead of 50% ad valorem was levied on crude horse radish. A series of amendments by Senator Frazier, all adopted, increased the rates on mustard seed from 1 cent to 3 cents a pound; alfalfa seed, 5 to 8 cents a pound; alsike clover seed, 5 to 8 cents a pound; red clover seed, 1 to 2 cents a pound; sweet clover seed, 3 to 4 cents a pound.

In the paragraph taxing soy bean oil cake and soy bean oil cake meal at .3 cent a pound, a clause covering "all other oil cake from any vegetable" was included on motion of Senator Connally, Democrat, of Texas.

A strenuous effort was made by Senators Shortridge and Johnson, Republicans, of California, to increase rates on almonds and substitutes for almonds. This action was opposed by several Eastern Senators, among them Walsh of Massachusetts and Copeland. After long debate the amendment by Senator Shortridge was defeated.

Mr. Copeland withdrew an amendment he offered to restore the existing rates on almonds. The rates provided by the bill and approve by the Senate, marking moderate increase over present duties, are: Unshelled, 5½ cents a pound; shelled, 16½ cents; blanched, roasted or otherwise prepared, 18½ cents; mandalonas or almond substitutes, 18½ cents, and almond paste, 18½ cents.

Senator Copeland made an unsuccessful attempt to reduce the rate on kippered herring to 1¼ cents a pound, in place of the 3 cent duty of the bill, or the 25% duty now applied when packed in sanitary coverings.

Sees "Protection Gone Mad."

Senator Walsh of Massachusetts made a determined fight against the amendments to increase the duties on bread and lard.

"This is protection gone mad," he said.

In the case of lard he said the domestic production was more than 2,500,000,000 pounds, exports in excess of 700,000,000 pounds and imports none.

Speaking of the amendment offered by Mr. Frazier to impose a duty on bread, he said it was the most extraordinary proposition presented in connection with the bill.

"Tax bread for the hungry and the poor!" he said. "Is there no limit to our greed, to our excessive demands to put a tax even upon crumbs?"

"I will say to my friend from Massachusetts that organized labor has endorsed this proposition," Senator Frazier interjected.

"God save organized labor if that is true," replied Mr. Walsh.

Senator Copeland said he was "amazed" that any one should want to levy a customs on bread.

Senator Wheeler of Montana said a duty on bread would be effective from a protective standpoint only to a few makers in cities close to the Canadian border.

President Hoover Confers with Congressional Leaders To Expedite Passage of Legislation, Including Tariff Bill.

President Hoover, who returned to Washington on Feb. 17 following a brief vacation in Florida, gave almost immediate attention after reaching Washington to the Senate situation on the tariff bill. On Feb. 18 the President held a breakfast conference at the White House with members of the Senate and House on legislation pending in Congress. According to the "United States Daily," particular attention was given, it was said, to the tariff bill, and to the effect of delay in legislation on business and employment conditions. The paper quoted states that guests at the breakfast were Senators Smoot (Rep.) of Utah, Watson (Rep.) of Indiana, and McNary (Rep.) of Oregon, the Speaker of the House, Representative Longworth (Rep.) of Cincinnati, Ohio, and Representatives Tilson (Rep.) of New Haven Conn., majority leader, and Snell (Rep.) of Potsdam, N. Y., Chairman of the House Committee on Rules, and Representative Hawley (Rep.), Chairman of the House Committee on Ways and Means. The "Daily" went on to say:

Seek To Expedite Action.

After the breakfast, it was stated orally at the White House that the House leaders are anxious to expedite legislative matters. They have completed the major program of appropriation bills in the House and are likely to have a period of inaction due to delays in the Senate, it was said. At the conference there was a general discussion as to what might be done to expedite matters, chiefly the tariff, the delayed business that was regarded as of most pressing character.

The business situation of the country was described as more sensitive now than when the tariff bill was first projected. The delays in this bill have a tendency to slow down the country somewhat until business can foresee and adjust itself to the probable results, it was added.

Another phase of the discussion dealt with the co-operation of the entire business community, including agriculture and labor. Such co-operation is going on "magnificently" throughout the country, it was said. Greater co-operation in legislation would go far to help the present situation in the view of those who attended the conference.

The New York "Times" in its account of the White House conference, said in part (in a Washington dispatch Feb. 18):

No plan of campaign resulted, and despairingly the President's guests conceded that the Democrats and insurgent Republicans constituted a majority of the Senate, and no legislative progress was possible without their consent.

President Abandons Statement.

The President indicated to his breakfast guests that he might issue an explanatory statement which would serve to let the country know what was going on at the Capitol, and which would be a sort of appeal to the people. But he was dissuaded from taking that course. His Congressional counselors advised him that such a statement would have no effect on the dominating coalitionists.

According to House leaders, the situation due to the Senate's delay in passing the tariff bill means that all legislation on the House program, except the annual supply bills, must be abandoned. This applies to the various measures advocated by the President for strengthening prohibition enforcement, except the measure for transferring the Prohibition Bureau from the Treasury to the Department of Justice, which has passed the House.

The House leadership, as the President was told this morning, contemplates either taking a protracted recess if the Senate will consent, or resuming the practice of having perfunctory sessions of a few minutes twice a week, and adjourning for three days at a time until the Senate gets through with its rewriting of the tariff schedules and gives the House something to do.

Effect on Business a Problem.

As for President Hoover, he sees his legislative recommendations knocked into a cocked hat. He is particularly concerned, according to reliable information, over the effect of the conditions in the Senate on the business situation.

Business is reported to the Administration as being more sensitive now than when the tariff legislation was undertaken early last year, and at to-day's White House breakfast the idea was put forth that the delay in passing the tariff bill had a tendency to slow down industrial and business activities.

It was specifically indicated in the breakfast conversation that unless Congress gave the President the additional appropriations he desired for stimulating public construction, it would be necessary to discharge from 10,000 to 20,000 workers in March.

After the conference it was made known that Senate and House leaders would get together in the hope of speeding up the legislative program. But the whole tenor of what was said to the President was that the prospect was not encouraging.

As Speaker Longworth explained the legislative jam caused by the Senate's delay in passing the tariff bill, "the House is all dressed up with no place to go." General legislative measures, he said, could not be considered by the House while the tariff debate continued in the Senate and he saw little chance of relief.

It was brought out at the White House breakfast that the Administration is highly pleased with the co-operation it is receiving from what was described as "the entire business community, including agriculture and labor," in its endeavor to stimulate the business situation.

Senate Confirms Nomination Of Charles Evans Hughes As Chief Justice Of the U. S. Supreme Court.

The nomination of Charles Evans Hughes as Chief Justice of the United States Supreme Court, (favorably reported on Feb. 10 by the Senate Judiciary Committee by a vote of 10 to 2) was confirmed by the Senate on Feb. 13 by a vote of 52 to 26. The nomination wsa confirmed in the face of determined opposition on the part of the Progressives, aided by a group of Democrats, who carried on their fight for two days, it was noted by the Washington correspondent (Feb. 13) of the New York "Journal of Commerce" who at the same time stated:

This vote (52 to 26) followed a motion to recommit the nomination to the Judiciary Committee, which had failed when 49 Senators voiced their opposition and 31 Senators favored the proposal.

A previous vote of 45 to 35 defeated a motion to recess the Senate until 11 A. M. tomorrow, entered by Senator Norris (Rep.) of Nebraska.

In the final vote, Senator Fletcher (Dem.), Florida, and Barkley (Dem.), Kentucky, changed their vote as entered on the previous roll call and Senator Trammell (Dem.), Florida, recanted after having voted negatively both times, finally voting for the confirmation of Mr. Hughes. Senator Cutting (Rep.), New Mexico, who had voted to recommit, failed to vote on the motion to confirm Mr. Hughes.

The contest over the Hughes nomination had developed into a clean-cut issue between the Republicans and the Progressives and their Democratic allies, in character much the same as exists with respect to the tariff.

This fact was made apparent in the various speeches of today. Tribute was paid to Judge Hughes as being the foremost lawyer of the country and voicing the sentiment of many of his colleagues, Senator Norris said he wanted to concede to the nominee the same honesty in his position as he, Norris, exhibited in his own, and he said there was no question about his conscientiousness. But, Norris continued, he does not agree with the views held by Mr. Hughes and those who think as does the latter.

"I think those who hold his views are wrong, and that carried to Eits logical conclusion it will bring distress ultimately, perhaps ruin, to governments such as ours," he explained.

The question before the Senate was made the vehicle for the protest of the coalition against the decisions of the Supereme Court that are not in accordance with their outlook on such matters. It could be seen that back of the discussion was the hope that regardless of the outcome of the Hughes matter, the court would give heed to the attitude of the minority of the Senate which appears so antagonistic to its acts.

The coalitionists are resentful of the alleged usurpation of power by the Court and there has been a great deal of complaint of

Federal Reserve Bank of St. Louis

Federal Court action in imposing itself upon State public utility commissions, as in the case of the New York Telephone Co. rates and in the United States Supreme Court, the Baltimore street car fare case.

The attitude of Judge Hughes and his legal connection with big business was given as the cause of the apprehension of the opposition to his confirmation.

Following is the vote: For confirmation, 52—Republicans (38), Allen, Baird, Bingham, Capper, Dale, Deneen, Fess, Gillett, Glenn, Goff, Goldsborough, Gould, Greene, Grundy, Hale, Hastings, Hatfield, Hebret, Jones, Kean, Keyes, McCulloch, McNary, Oddie, Patterson, Phipps, Pine, Schall, Shortridge, Smoot, Stiewer, Sullivan, Thomas (Idaho., Townsend, Vandenberg, Walcott, Waterman and Watson; Democrats (14), Ashurst, Barkley, Broussard, Copeland, Fletcher, Harrison, Kendrick, Ransdell, Steck, Stephens, Swanson, Trammell, Wagner, Walsh (Massachusetts).

Against confirmation, 26—Republicans (11, Blaine, Borah, Brookhart, Couzens, Frazier, Johnson, LaFollette, McMaster, Norbeck, Norris, Nye; Democrats (15), Black, Blease, Bratton, Connolly, Dill, George, Glass, Harris, Hawes, McKellar, Overman, Sheppard, Simmons, Walsh (Montana) and Wheeler.

Paired: For—Robinson (Indiana), Reed, Metcalf, Republicans; and Robinson (Arkansas) and Brock, Democrats, 5. Against—Howell, Republican, Thomas (Oklahoma), Smith, Tydings, Democrats, and Shipstead, Farmer-Laobr, 3.

It was announced that Robinson and Moses, if present, would have voted aye, but no announcement was made as to Heflin and Kin.g Four who were not paired or annunoced were: Caraway, Cutting, Hayden and Pittman.

Following the confirmation of his nomination Mr. Hughes at his home in New York issued the following statement:

My appreciation of the honor of the appointment is outweighed by a deep sense of responsibility.

The ideals and principles relating to public service with which I entered public life twenty-five years ago, and which I have tried to exemplify in public office, I hold unaltered.

In facing this new and most important task I am heartened by the generous expressions I have received from all parts of our land. I wish to express my most grateful acknowledgment.

I expect to qualify and take my seat at the opening opening of the next session of the court.

Associated Press accounts from Washington yesterday (Feb. 14) published in the Brooklyn "Daily Eagle" said in part:

Undismayed by their failure to prevent confirmation of Charles Evans Hughes as Chief Justice of the United States, members of the Senate group which opposed him leveled an attack today on the Supreme Court and decisions which it has rendered.

Almost as soon as the Senate convened, Dill, Democrat, of Washington, was on his feet with the charge that the court had placed itself in politics. Vanderberg, Republican, of Michigan, rushed to the defense of the Court with the cry that he would not let such a challenge go unanswered.

Then the debate became general, drawing in Norris, Independent Republican of Nebraska, a leader of the anti-Hughes forces, and Walsh of Montana, the acting Democratic leader, who voted against his confirmation.

Brookhart Promises Amendment.

Senator Brookhart, Republican, Iowa, gave notice that he intended to offer a Constitutional amendment which would deprive the Supreme Court of the power to set aside actions of Congress.

"This power is not in the Constitution," he asserted. "It's a court-made law. I stand ready to take it to the country in every State of the Union, and I know the people are competent to elect members of Congress who will follow the Constitution."

The United States, Brookhart said, is the only nation in the world where the Supreme Court has power to set aside a legislative enactment.

"It is out of that power that this trouble has grown," he said. "The United States is the only great country in the world that has been plunged into a war because of that sort of decision—the Dred Scott decision."

Replying vehemently to Dill, Senator Vandenberg, Republican, Michigan, warned that the "masses will lose more when the Constitution and its guarantees go than they can lose in any intervening crisis on economic or political problems."

Senator Dill, in the most outspoken attack upon the Court in recent history, denounced its decisions upon valuations of public utilities which he said were fastening economic slavery upon the people.

People Will Force Change.

"If the people come to feel that the Supreme Court has become their oppressor and that the men upon it can't be removed, they will find the way to change it," Dill said. "The Constitution is conservative, but it provides the machinery for changing it. By action of two-thirds of the State Legislatures a convention can be called to write a new Constitution."

Dill also asserted "there is no human power that can keep the Supreme Court from becoming a political issue in the future" if the Court continues to exercise control over economic questions.

"When the people find that street car fares are up and being raised," he continued, "and find that is because of the valuation system imposed by the Supreme Court they are going to find out more about the Supreme Court. When they find that telephone and gas rates can't be reduced, they are going to ask who these men are who are saddling upon them these rates.

Can Use Ballot Box.

"It is up to Chief Justice Hughes, Justice Van Devanter, Justice Sutherland, Justice Butler, Justice Sanford and Justice McReynolds to say whether the Supreme Court in the future is going to be in politics.

Says Dill Holding "Post Mortem"

"They have practically said," he shouted, "that they will set aside rates that are less than 8%," adding that when the American people realize what this doctrine means they will not submit to it.

Norris took exception to Vandenberg's remark that Dill's discussion was a "post-mortem."

"We are dealing with a live problem that's part of our livelihood; that's part of our existence," said the Nebraskan.

If Supreme Court decisions on valuations were allowed to stand, he added, the power of State commissions to determine rates would be taken away.

It is stated that Mr. Hughes will take the oath of office as the eleventh Chief Justice on Feb. 24. His appointment to the post, following the resignation, owing to impaired health, of William Howard Taft, was noted in our issue of Feb. 8, page 917.

Charles E. Hughes Resigns From Hague Court.

Geneva advices Feb. 15 to the New York "Times" said:

Charles Evans Hughes to-day officially communicated to Sir Eric Drummond, the League Secretary General, his resignation as a Judge of the World Court.

"In view of my appointment as Chief Justice of the United States," he cabled, "I find it necessary to sever my connection with the Permanent Court of International Justice. With much regret I hereby resign as a member of the Court. This resignation is to take effect immediately. I have sent a similar message to President Anzilotti."

Signor Dionisio Anzilotti of Italy is the President of the World Court.

T. D. Thatcher Named to Succeed Charles E. Hughes, Jr. as Solicitor General.

Thomas Day Thatcher, Judge of the United States District Court for the Southern District of New York, was nominated by President Hoover on Feb. 20 to be Solicitor General, succeeding Charles Evans Hughes, Jr., who resigned following his father's appointment as Chief Justice of the United States Supreme Court.

Under Secretary of Treasury Ogden L. Mills in Review of Past Decade Finds View of Future "Distinctly Encouraging."

At a luncheon at the Union League Club in New York on Feb. 4, under Secretary of the Treasury Ogden L. Mills reviewed the past decade and pointed to the rapid recovery following the several business recessions of that period. "At the present time as we all know," said Mr. Mills, "we are experiencing a recession in trade and business the extent of which it is impossible to estimate at this moment." "But," he added, "if we journey back to 1920 and then review, be it ever so briefly, all that has happened in the last ten years, I think you will agree with me and say that a man would indeed have to be one of pretty poor spirit and courage not to look forward to the future with complete confidence" The luncheon at which Mr. Mills spoke was given by General Charles H. Sherrill and was attended by owners and editors of trade journals. Conditions abroad were likewise referred to by Mr. Mills, whose address follows:

I appreciate very much the compliment paid to me by Mr. Sherrill. I am very glad of this opportunity to fulfill the engagement which I was unable to keep last year. I did not want to come up here and simply discuss the business of the Treasury, which I find is only really interesting when we are about to reduce taxes, and I cannot promise that just now.

It occurred to me that it might be interesting, particularly when some of us may feel a little discouraged towards the business depression which we are experiencing, to review the events of the last ten years, particularly in the economic field, and take stock.

I think it is valuable as we begin a new decade, to look over the last, to cast your eyes backward and glance over the road that you have travelled, the difficulties that have been surmounted, the progress that has been made. I know of no better way of assuring the future than by these periodical surveys and by the consolidation of gains already achieved, and if this be generally true, it is all the more true of the eventful ten years through which we have just lived, which can fairly be described as the first decade of a new era. For just as the candles of the eighteenth century flickered and went out, so the flames of the French Revolution rose and Napeleon's legions carried a new spirit throughout Europe, so the overwhelming catastrophe of the World War may be said to have brought to a definite conclusion the nineteenth century, with its established order which, not so long since, seemed to us infinitely stable and enduring.

From the universal wreckage new forces were released. The political, social and economic structure, which to us seems so firmly fixed as to be susceptible to only gradual changes and had well nigh disintegrated, began to appear and emerge once more, but in new and more flexible form.

The history of the last ten years is the history of the re-establishment of order from chaos, of the building, pillar by pillar, of the foundation of a new structure, the ultimate form and character of which we are not able at this time to visualize. At times, progress has been painfully slow, and the difficulties we encountered almost insurmountable, but as we look back over the 10-year period, we must marvel at the rate of progress. Today, I am concerned with economic factors, which in a sense is logical enough. It is true with nations as well as with individuals, that the means of livelihood and a reasonable standard of living are the first consideration.

In 1920 and 1921, after a false and illusory industrial and trade revival, the economic fortunes of the world were at a very low ebb. It was almost universally true that industry and production were stagnant. Unemployment existed on a hitherto unknown scale. Trade was lifeless. The budgets of the principal countries were unbalanced. Unsecured currencies fluctuated widely and gave rise to all manner of almost insurmountable difficulties, affecting currencies and exchange. A huge volume of inter-Governmental debts, unsettled and unfunded, and a staggering reparation bill presented almost impassable barriers in the restoration of credit and to budgetary, currency and exchange stability.

Pre-War and Post-War Conditions.

Let me illustrate these general conditions with the following figures: World trade, which in 1913, aggregated approximately $42,000,000,000 had in 1921 sunk to $31,000,000,000 expressed in terms of 1913 dollars.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

In England, in 1920, there was a budgetary deficit of about $1,250,000,000, and the pound sterling was only worth $3.66. In France there was a budgetary deficit of about 38,000,000,000 francs, while the franc, which in 1919 was still worth 13 cents, had sunk to 7 cents and was destined in 1926 to be worth only 2 cents; large regions were still literally devastated, factories destroyed, roads and railroads torn up, villages and towns mere piles of brick and stone.

In Italy there was a budgetary deficit of almost 8,000,000,000 lire, while the lire itself, which in 1919 was still worth 11 cents, had fallen to about 4 cents and was to drop to 3 cents.

In Germany financial chaos had begun which was not to end until virtually the entire Governmental debt had been wiped out and Germany's entire currency had become valueless. Intergovernmental debts, exclusive of Germany's reparation bill, amounted to approximately $25,000,000,000, while Germany was being asked to pay the staggering sum of 136,000,000,000 gold marks.

Of course these bare figures do not begin to tell the tale of what these conditions spelled in terms of human suffering, misery and bitterness. All of the old landmarks by which men charted their economic course have been swept away. Established values had ceased to exist. Men groped their way in the dark, literally unable to see beyond the day. Ruin stared millions of people in the face, while industry and trade throughout the world seemed paralyzed.

And now move the hands of time ahead 10 years. We find a very different world indeed than the pre-war world, but in the main an ordered one. It is true that in vast and multitudinous China there is division, disorder and distress; it is true that Russia continues on a tremendous scale an economic and social experiment which seems to involve a fine disregard of past experience in this world and salvation in the next, the future of which and the final outcome of which it is impossible to determine. It is true that throughout our universe there is much unrest and many unsolved problems, and it is true, of course, that this New World still is in the plastic stage. But even so, order has been in the main restored, productive energies are everywhere at work and the forward march has once more been resumed.

For purposes of illustration, let me again turn to the same figures and factors in a number of typical countries: The aggregate of world trade has grown from $43,000,000,000 in 1921—and that is in terms of 1921 dollars—to $68,000,000,000 in 1928; the foreign trade of the United States has grown from $7,000,000,000 to more than $9,000,000,000; that of Great Britain from somewhat more than $7,000,000,000 to almost $10,000,000,000; of France from about $4,000,000,000 to about $1,000,000,000 to $2,000,000,000, and of Germany from $3,000,000,000 to over $6,000,000,000. In all of these countries budgets can, in general, be said to have been balanced, the gold standard or the gold exchange standard has been adopted and their currencies stabilized.

In England, while the unemployment problem has not been solved, yet it is true that there are several hundred thousand less unemployed than in 1921 and there has been a gradual and steady improvement in trade and industry. Italy, at one time so well-nigh overwhelmed by social, political and economic disorder, is now an efficient, strong and orderly modern State. France's fundamental economic position is stronger than ever. Her iron ore productive capacity has doubled, as compared with pre-war; the annual coal output has been enormously increased and immense resources have been developed in the way of electrical energy. The railway systems have been overhauled and modernized. Manufacturing capacity has been notably augmented, the devastated regions have been restored, there is practically no unemployment and their financial position is immensely strong.

As a result of rationalization, Germany has accomplished great reforms in her productive equipment, and her present industrial condition is vastly improved over what it was a short time ago. During 1929 Germany financial conditions were somewhat hampered, and, indeed, that has been true of the last two years, by a shortage of capital and by an outflow last year of short-erm funds, which had a very adverse effect on general business conditions. but nevertheless productive activity has been maintained at a relatively high level, and her merchandise exports have shown such an increase that if you take into consideration payments in kind, as well as Germany's foreign trade, last year showed a favorable balance.

It is much easier to state the stages of recovery than it is to analyze their real causes. Underneath the surface of course, at all times natural recuperative forces were at work. After the devastating shock and period of immediate readjustment, men and women, no matter how unsatisfactory or how hopeless conditions seemed to be, had to begin the work of reconstruction. There was no alternative. The debris had to be swept aside, the world had to be put in a position to live in, and as millions of men and women throughout the world began once more the business of earning their livelihood, the world, of course, began to assume a more normal appearance and the problems of the world began to assume a much clearer aspect. Moreover, it seems that on many occasions the force of circumstances, the hard, unyielding facts, were more productive of results than the foresight and wisdom of men. Thus a Dawes plan was preceded by the Ruhr invasion and the complete prostration of Germany, while stable currencies were not secured until, in spite of all experience, the possibilities of the printing press had once more been fully explored. Nevertheless, Statesmanship did make some notable contributions. Everything didn't just happen; some things were brought about.

Inter-Governmental debts were settled and funded on a basis which I think permits their liquidation without too great hardship on the part of the debtors, or too serious a burden on the exchanges. Debts aggregating more than $18,600,000,000, face value on the date of settlement were funded and scaled down to a present value of approximately $7,500,000,000 on a 5% basis. It would seem to me that in all this discussion of debt settlements too great emphasis was placed on the immediate difficulties and too little on future possibilities. Mr. Hoover when he was Secretary of Commerce once pointed out that in pre-war days the rest of the world owed Europe some $30,000,000,000 and never found any difficulty in paying interest on that vast sum.

It is true, of course, that this indebtedness grew gradually over a long period of years, so that foreign trade and foreign exchange was able to adopt itself or themselves gradually to the changing conditions. But when you consider the enormous growth that we witness in the productive powers of the nation here in the United States in the last ten years, who can afford to even speculate on what the productive powers of the world may be in the next ten years. It is true that foreign trade in pre-war days doubled every 20 years, and that rate of growth seems to have been fully restored to-day, so that when you take into consideration the probable future growth in world trade, it is highly probable that what seems to be a comparatively heavy burden to-day in regard to the debt payments will be a comparatively light one in the years to come.

It is hard to estimate the contribution to European economy made by the Dawes plan, and ultimately by the Young plan. It permitted a nation of 80,000,000 highly intelligent, well organized and industrious human beings to take their normal place in the economic structure of that all-important continent, while the Young plan, I hope, will constitute the final chapter in the long story of reparations, with all of the misery and hardship and bitterness that has accompanied its development.

Balanced budgets, that first fundamental requisite in any sound system of public finance, did not materialize without the courage on the part of Statesmen and of self-sacrifice on the part of people, and while I am speaking of balanced budgets I want to pause long enough to pay a tribute of respect and admiration to that great French statesman, Raymond Poincare. The present strong financial position of his country is due to a very great degree indeed to his courage and his statesmanship.

Stabilization of Currencies.

Then came stabilized currencies and the return of the gold standard, in which our country was enabled, through fortunate circumstances, to make a notable contribution. Not only through specific operations, intended to deal with gold movements, but through credits extended to a number of European banks of issue, the United States and the Federal Reserve System were enabled to make a very material contribution to the financial and economic rehabilitation abroad. Salvador, Lithuania, Latvia, Colombia, Sweden and Austria were put on a gold basis between January, 1920 and June, 1924, and I am reading this long list of countries because to me it is striking to see the extent to which the world's currencies were demoralized.

Germany followed in October, 1924, and the currencies of England, Australia, New Zealand, South Africa, Netherlands, Dutch East Indies, Hungary, and Danzig were established in April and May, 1925. Chile, Finland, Canada, Belgium, Denmark, Czechoslovakia, Guatemala and India followed at various times between July, 1926, and July 1927. During the fiscal year 1928 Ecuador, Argentina, Poland, Italy, Estonia, Norway, Greece and France were added in the months of August, October and December, 1927; January, May and June, 1928, and only a few weeks ago Japan lifted her gold embargo, thus returning to a free gold basis.

Finally, we cannot afford to underestimate, even in the economic sphere, the tremendous value of the growing sense of security, of the subsidence of war hatred and animosity, and of the ever-expanding realization of world solidarity. Nations have come to understand more and more that their own prosperity cannot be built up at the expense of the prosperity of some other nations, and that the well being of all is dependent upon the prosperity and health of each.

Thus, as we look back, we can see how, step by step, pillar by pillar, the foundations for new order have been laid—how we finally succeeded in establishing order and stability, the two elements without which progress, prosperity and happiness are unattainable.

Periods of Recessions.

It is particularly interesting to review the last ten years of our economic history, partly because of the vigor with which the difficulties of the transition period were overcome and partly because conditions in this country had such a significant bearing on world conditions. Ten years ago, as we all remember, we were passing through a critical period indeed. War restraints had just been removed; industry and trade, already expanded, responded rapidly to an expanding and increasing demand for goods, accompanied at the same time by apparently world-wide demand for the commodities which we produced. Immoderate activity developed and as the result of psychological and economic factors there ensued a period of price inflation, speculation, and extravagance which resulted in a sharp business recession in 1921, accompanied by credit stringency and by almost complete collapse in prices. The facts of this recession and the subsequent period of depression, I think, are too fresh in our minds to need elaboration. It is sufficient, I think, to recall that the inflationary conditions, which, in a large measure, were due to our war finance, had by 1922 sufficiently righted themselves to permit the period of recovery to set in. That process of recovery occupied most of the last 10 years which have just closed and the accomplishments of this period, I think, mark it off as a period apart in American economic history. From a low point reached in March, 1921, production in this country gradually increased, until in the middle of 1929 it had doubled.

One of the most significant trends to be noticed during this period is the tremendous increase in the per capita production, due, of course, to great improvements in management and machinery. At the same time a higher standard of living, accompanied as it was by an ever broadening market for all manner of goods, the creation of new goods and services, afforded wider opportunities for employment. There were, too, temporary recessions, one in 1924 and one in 1927, but on the whole throughout this period production and trade had been maintained at a very high level, while since 1921 prices which had fluctuated so violently during the war period in this country and so violently throughout the world during the post-war period until currencies were stabilized, hardly fluctuated at all, remaining at about 45% above the pre-war level.

The period may be characterized as one of rapid recovery and general prosperity, accompanied by largely increased corporate earnings, growth in individual income, increased real wages and generally satisfactory conditions of employment.

In addition significant changes have taken place in the organization of manufacturing and distributive enterprise. Integration and unification have accompanied a marked increase in the size of corporations, a development that might be readily illustrated by examples in the automotive industry, public utilities, in the field of retail trade, and more recently the field of banking.

The recovery, of course, has not been uniform in all lines of activity. Agriculture suffered conspicuously in 1921, and some branches of agriculture haven't as yet fully recovered. Difficulties have been encountered in some other industries, notably the textile industry and the coal industry. In the field of banking the excesses of the inflation period were reflected in a heavy number of bank failures, principally of the small banks in agricultural sections.

During the last decade we have continued to show large favorable balances in foreign trade. This net outflow of goods has been accompanied by an increase of our monetary gold stock, which has greatly strengthened our domestic banking situation and by an outflow of funds to other nations in the form of loans. The general state of prosperity which has existed in the United States, accompanied by easy credit conditions until 1929, was particularly favorable to these foreign loans, and, in fact, foreign securities were floated in this country up to 1929 at the rate of about a billion dollars a year, and played a very notable part both in the re-establishment of the gold standards abroad and in the economic rehabilitation of Europe.

Examination of the consumption of the most important ordinary commodities throws rather a striking light on what the purchasing power of the American people means in world economy. The population of the United States constitutes about 7% of the total world population. Yet that 7% consumes 48% of the world's total production of coffee, 53% of all of the tin, 56% of the crude rubber, 21% of the sugar, 72% of the raw silk, 36% of the coal, 42% of the pig iron, 47% of the copper, 69% of the crude petroleum and out of nearly 32,000,000 automobiles in use in the world on the first of January, 1929, 24,000,000 were to be found in these United States. The fact that this 7% of the world's population consumes this enormous proportion of the world's principal commodities gives you some idea what the

Federal Reserve Bank of St. Louis

prosperity and purchasing power of the American people means to world commerce, industry and the employment of labor.

Government Policy Big Help.

The country has, of course, benefited by a sound Governmental financial policy. We were enabled, very early in the decade, to begin to reduce the very high rates of war tax, and that of course, was of inestimable benefit to industry and trade. As you all know, we have had five tax reductions, I think, since 1921 and yet business, National income, has so expanded that these reductions have been to a very large extent offset by the increased revenues from our principal taxes, that is the income taxes. In any event, in addition to the large statutory amounts which are set aside each year for the reduction of our large debt, it has been found possible to put aside a very large amount every year from surplus, so that in the ten-year period from June 30 1919, to June 30 1929, our gross National debt has been reduced from approximately $25,500,000,000 to about$ 17,000,000,000 on June 30 last, or at a rate in excess of $850,000,000 a year.

Our recent prosperity is to be accounted for largely if we are going to generalize to a resourceful and industrious population, vigorous and able leadership, rich natural resources, sound administration of governmental affairs, and friendly and constructive international relations. In view of the strength of these basic factors in this country and of the steady improvement in political and economic conditions throughout the world, a long-term view of the future is distinctly encouraging.

At the present time, as we all know, we are experiencing a recession in trade and business, the extent of which it is impossible to estimate at this moment. But I think you will all agree with me that if we journey back to 1920 and then review, be it ever so briefly, all that has happened in the last ten years, I think you will agree with me and say that a man would indeed have to be one of pretty poor spirit and courage not to look forward to the future with complete confidence.

Under-Secretary of Treasury Mills Sees End of International Double Taxation—Details Legislative Plans for Reciprocal Exemption—Asks Similar Laws Abroad—Program Aims to Expand Business Among Nations.

Removal of international double taxation, a "real barrier to the expansion of international trade," was forecast on Feb. 14 by Ogden L. Mills, Under-Secretary of the Treasury, who announced formally that the Department expected to recommend to the present Congress legislation based on the principle of reciprocal exemption among the nations. The Washington advices to the New York "Herald Tribune" in reporting this added:

Secretary Mills addressed a conference called to discuss the general features of the proposed legislation and offer advice on the solution of some of the technical problems. He reminded those present that the general problem is of especial significance at this time because all the nations are realizing that its solution will eliminate a barrier which brings a retarding "of world production and growth of purchasing power."

Urges Similar Laws Abroad.

Of necessity, the elimination of the problem calls for agreement among the nations, and the general plan adopted by the International Chamber of Commerce is the basis for the legislation which this Government will be asked to enact in a program which calls for similar laws among other nations.

"The Treasury Department has taken as a basis for legislation this uniform code, which is the fruit of studies carried on over a number of years," Mr. Mills explained. "One of its principal underlying purposes is to facilitate the flow of capital to the countries needing it for development purposes by exempting the yield of this investment capital from taxation in the country of investment and taxing it only in the country of residence of the investor.

"This result is to be brought about by applying the principle of reciprocal exemption, as exemplified in the case of shipping profits, to income from capital received in the form of dividends and interests.

Sees Compensation for Exemption.

"It so far as the United States is concerned, any loss in revenue which might result from this reciprocal exemption would be more than compensated for by the partial elimination of the credit for foreign taxes provided for under existing statutes.

"The program further contemplates a more equitable system of taxation of international business by imposing taxes on the foreign enterprise only if it has a permanent establishment within the taxing country, thus exempting income from casual transactions or from sales effected through a bona fide broker or commission agent.

"In so far as those businesses having permanent establishments are concerned, it is hoped that ultimately all income will be subject to only one tax, the tax to be allocated on the basis of the profits realized within the taxing country. But in the meanwhile, since the treatment by a country of its own nationals or of corporations organized under its laws is not properly the subject of international agreement, the proposal is limited to restricting foreign countries from taxing profits other than those earned within their borders under some fair and well-defined rule of allocation.

Allocation of Profits Cited.

"The establishment of a fair rule of allocation or apportionment is a difficult and technical question. For instance, when a corporation manufactures in one country and sells in another through a permanent establishment, how are its profits to be allocated. If it produces its raw material in one country, processes in a second, turns it into manufactured articles in a third, and sells them in a fourth, how much profit is to be allocated to each country?

"There has recently been launched in practically all important countries with an income tax a study of methods of allocating or apportioning business profits with a view to devising uniform rules or principles susceptible to general application. This is work of an exceedingly difficult nature."

Irving Fisher Analyzes Securities Slump—Yale Economist, In New Book, Says Unsound Credit Was Chief Cause—Justifies Market's Rise—Declares Crash Might Have Been Avoided By Advance In Discount Rate.

An unsound credit situation, due to "general overextension of margin accounts," was chiefly responsible for the collapse in security values last Autumn, according to Irving Fisher, Professor of Economics at Yale University. His views are set forth at length in his new book, "The Stock Market Crash and After," published by the Macmillan Company. Noting this the New York "Times" of Feb. 16, indicated as follows Prof Fisher's observations.

"My own impression," says Professor Fisher, "has been and still is that the market went up principally because of sound, justified expectations of earnings, and only partly because of unreasoning and unintelligent mania for buying."

Citing the unsound credit situation as the "chief cause" of the break, the book states that bear raiders cleverly took advantage of this situation, selling 'short' in large blocks many of these stocks which had been unloaded upon the market and thrown into weak hands, thus precipitating distress selling and panic."

Professor Fisher in a preface to the book says that "readers will doubtless find some inconsistencies between my previous writings and the present book, as I have modified my opinions from time to time with the march of events and with the unfolding of evidence," and he adds: "I may, and probably shall, further modify them with subsequent developments." The book, he says, is in no sense "an attempt to justify opinions hitherto expressed," and was written "without reference to any previous expressions."

"I had stated my opinion in September, preceding the panic, that the market had reached its peak, as proved to be the case," he continues. "I also expressed the view that the recession would not be in the nature of a serious crash, in which I was mistaken. I also predicted that new plateau of stock prices would survive any recession. This has proved true."

Recalls the Panic of 1837.

In the introduction to the book there is enumerated the many reasons assigned for the stock break. "In this catalogue of wholesale and particular blamings," Professor Fisher says, "one is reminded of that old panic of 1837 in Van Buren's Administration, when the Associated Merchants of New York City published a resolution asking, 'On what constitutional or moral grounds can Martin Van Buren defend himself for having caused all the disasters under which the American people are suffering?'"

Professor Fisher cites the following four reasons "that may justify a rise in the price level of stocks: Because the earnings are continually plowed back into business instead of being declared in dividends, this plowing-back resulting in an accumulation at compound interest, so to speak; because the expected earnings will increase on account of technical progress within the industry; because less risk is believed to attach to those earnings than formerly, and because the 'basic' by which the discounting is made has been lowered." "When the situation is calmly examined," he goes on, 'it is found that all four of these causes were at work, tending to raise the prices on the stock market during the years preceding the panic of 1929."

The history of the crash, from the time it started on Sept. 6 until Nov. 14, when the market had steadied itself, is discussed in detail. The "outpouring of stocks, thrown on the market regardless of price," he says, "came in the whirl of blind panic. Many holders later found that they had incurred needless losses, while the buyers of the best of these stocks at the depth of the market demoralization, were fortunate indeed. It was manifest that many and capacious strong boxes had been emptied of their contents in the midst of the hysteria of selling."

Mental Picture of the Market.

Describing the state of mind at the time Professor Fisher continues:

"Favorable news made no impression on such a debacle. In vain the United States Steel Corporation reported quarterly earnings with net receipts in August, except for the preceding May, the largest of any month since the war, and with its total for the quarter exceeded only in the preceding quarter. The market had no ear for such news because it was deafened by the stentorian voices of banks calling upon brokers and individuals to repay their loans, while a Babel of brokers' yells and customers' bellows made the financial welkin resound like a supernatural jazz band. Deaf, blind and dizzy, the market fell, and then fell some more.

"The groups of men and women who watched the ticker tape unwind as their fortunes dwindled, or sat dumfounded in customers' rooms before the board as their riches took wings, were the visible symbols of silent thousands among the masses of the American people who had dumped their holdings into the lap of the stock market Moloch. One touch of nature had made the stock market trading world kin, and the butcher or baker who had lost a few stocks on margin drew the sympathy of millionaires who had helped swell the enormous totals of brokers' loans and whose margin defenses had likewise been shattered."

Professor Fisher says that "business was more scared than hurt" by the stock crash. After telling of the steps taken by President Hoover to stabilize business and restore confidence, the author says that the effect of this action "cannot, in the nature of things, be soon observable, except as a measure of reassurance."

Traces Causes of Decline.

The economist devotes twenty-five pages of his book to the "causes of the panic." Referring to opinions to the effect that the break was precipitated by foreign liquidation, he says that "few realize today that the greatest fall of stocks in British history, comparable only with the Baring panic of 1890, preceded and was an actuating cause of the American panic, and that a coincident fall in Paris and Berlin accompanied the British liquidation. It began with the failure of the banking house of Clarence Hatry in August, followed by his arrest in September and subsequent conviction for a gigantic forgery of stock certificates. This started the British liquidation in London and in New York."

He quotes Carl Snyder of the Federal Reserve Bank of New York as authority for the statement, referring to the war inflation of commodity prices, that the "long sustained rise in the level of such prices necessarily brought a huge increase in the earnings of common shares, and this naturally forced a valorization of these shares in terms of something like a 57-cent dollar."

Professor Fisher mentions, among the causes of the break, the refusal of the Public Service Commission of Massachusetts to permit the Edison Company of Boston to split its stock and the Federal law imposing a law on capital gains.

Discusses Credit Situation.

The book says that "doubtless it is true that the increase of credit allowances was too great," referring to the statement of Craig B. Hazlewood, president of the American Bankers Association, that security loans represented "too large a portion of the available credit of the country." "This is because," Professor Fisher adds, "the enlarged credit structure was altogether too susceptible to 'bear raids' not so much because it boosted

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

prices too high or that it materially diminished the availability of credit in commercial and industrial business, as that investors were overextending themselves on margin. True, overextension of credit raised prices somewhat. Without any overextension, however, such prices might still have risen nearly though not quite so high.

"It should be added that up to the time of the panic there had been no great complaint from business circles on account of lack of credits, except in the case of the building industry. It has seemed to me an open question how far such building recession as we have had in 1929 was caused by curtailment of credits and how far by overbuilding. But funds had been withdrawn from building and loan associations and from banks and other sources of mortgage loans, attracted by the higher rates of call and time loans for financing stock exchange transactions. Even so, it would seem that means might have been devised, from the ample credit resources of the Federal Reserve system, to accommodate the building industry as well as the stock market without curtailing the upward course of stock prices. The efforts of the Federal Reserve System to make money dear in the stock market tended to make it dear in the real estate market as well, despite their desire to avoid such effects."

It is asserted that "many will take seriously the contention of Fred I. Kent, director of the Bankers' Trust Company of New York, that the market fell because of fear engendered in the public mind by the action of the coalition bloc in Congress in connection with the tariff bill." Professor Fisher adds, however, that "big business had no reason to fear any fall in the tariff and little fear of harm if it were not raised."

The Yale economist considers the chief danger to business as a result of the market break the "panicy fear that might be communicated from the stock market." He adds that the measures taken by President Hoover were "well calculated to allay fear."

Reviews Merger Movement.

In a chapter devoted to the merger movement in business and industry, Professor Fisher says that nearly all of such consolidations resulted in increased profits to shareholders without any increase in the price of the product to the consumer, and then adds: "The more the industries themselves work in these directions, for the good of the consumer, the less the need of legislative interference and the greater the chance of their free development without hampering restrictions and according to the requirements of large-scale economy."

Professor Fisher holds in referring to the "flight from bonds to stocks" that "a potent reason for the long bull market rising to the plateau of stock prices of 1923-1930 is that there has been a material change during that period in the estimate of the public as to the risk of investing in common stocks."

It is contended by Professor Fisher that the disaster to American security holders "might have been avoided by a sharp increase in the discount rate during the Fall of 1928 or at any time up to the Spring of 1929, with comparatively little consequent hardship to business."

Considerable space is given to "the dividents of prohibition." After expressing the opinion that the alcoholic consumption of the country is but 10 or 15% of what it was, Professor Fisher says:

"Thus, prohibition, with all of its shortcomings, has probably had a part in raising the national income during the last few years, and so raising the earnings and prices of stocks."

In the concluding chapter of the book, discussing the "hopeful outlook," Professor Fisher says that "because of the solid achievements of the last seven years, their present continuance and the assurance that they will be prolonged into the immediate future, I feel that the threat to business due to the dislocation of purchasing power by reason of tranfers of stock holdings will be temporary."

James H. Perkins Reviews Uniform Trust Plan in Operation at City Bank Farmers Trust Co.—Efforts to Consolidate Investments of Trusts.

"The Uniform Trust" was the subject of an address by James H. Perkins, President of the City Bank Farmers Trust Co., New York City, before the Mid-winter Trust Conference, under the auspices of the Trust Company Division, American Bankers Association, at the Hotel Commodore, New York City, Feb. 19. Mr. Perkins' remarks follow:

The growth of the Trust business in the country has been so rapid that those responsible for its management have been busily devising improved methods of operation. One of the most difficult of the problems has been the proper review of the investments in the Trusts. It is a simple matter to review one hundred Trusts constantly; but when the numbers run into the thousands it is impossible for the senior men in the institutions to keep the investments of all these Trusts in their minds, or to review them frequently. This situation has brought about in various forms an effort to consolidate the investments of the Trusts so that they may receive the daily study of the best minds in the various companies. There have been devised plans which differ somewhat in detail, but which contain the same basic idea.

I have been asked to put before you this afternoon the structure of the plan which we have in operation at the City Bank Farmers Trust Co. I am discussing this plan only because I am more familiar with it than the others of similar character. I think, however, that the discussion of one plan will cover the broad lines of all of them. In our own case we created what we called the "Uniform Trusts", which, in essence, are voluntary revocable Trusts which contain a clause in them authorizing the Trust Company as Trustee to mingle the funds of Trusts made in this form for the purposes of investment. We have spent two years in working out the present plan, and feel that it is satisfactory and working well. In brief, it works as follows:

On the first Wednesday of each month the Trust Company will take Trusts of this character and place their money in a mingled fund. In order that each participating Trust in the fund shall have its proper proportion, the fund is divided into units of an original value of one dollar. The Trust is valued as of the first Wednesday of each month, and each Trust that participates is allotted on our books its proportion of that fund in units. In other words, let us assume that a man puts in $10,000, the first Wednesday of January, and by the first Wednesday of March the Trust has increased in value. The man who puts in $10,000, in March would be credited with a smaller number of units than the man who puts in his money on the first Wednesday of January. The result of this is that everybody comes into the fund at par, but every opening day the value of the fund changes either for better or worse, and those coming in have exactly the same financial relation to the fund as the then value of those who have previously established Trusts. The unit method is simply an accounting device used to establish the value of each Trust in the mingled fund at any specific time.

At this point I should like to say a word about the investment management, which is carried out in this manner: Every morning the senior officers of the Trust Company have on their desks a copy of the Trust with the investments at cost and at market, with a statement showing the proportion of the various classes of investment: as, for instance, x% in domestic bonds, x% in foreign bonds, x% in preferred stocks, industrial common stocks, rail common stocks, or public utility stocks. Every Wednesday a committee of the directors goes over this same report, discusses the policy to be pursued, and each individual holding in the fund. The diversification is attended with care, not only in relation to the kind of security, but in relation to the industry under consideration. In this way, the maker of the Trust receives large diversification and the most careful scrutiny of his investments. There are no limits placed on the Trustee, who may invest as he deems best; but, as a matter of practice, the policies are those that would naturally and automatically cover the investments of a Trust of this character.

The Trust provides that the income paid to the beneficiary may be at such rate as the Trustee determines. It is the belief of the organization that the current return will at least equal that of any well chosen, diversified fund. Whatever earnings are made in excess of those paid out to the beneficiary are added to the fund and increase the value of the units which the maker of the Trusts holds. As and if the value of the units increases, the maker of the Trust gets paid on the value of his holdings at the time payment is made. As an example, if a man puts in $10,000 into the fund and the value of his Trust increases to $12,000 and the rate paid should be 5%, he would receive 5% on $12,000 when the fund was worth that figure, or in that particular case 6% on his original investment.

In regard to the beneficiary, Trusts may be established for the benefit of an individual, in a joint tenancy form, and for a corporation. The Trust created for the benefit of an individual continues during the life of the beneficiary unless sooner terminated by the beneficiary or Trustee. Following the death of the beneficiary the Trustee will, within thirty days, after the presentation of a Surrogate's certificate evidencing the appointment of an executor or administrator, together with the Declaration of Trust and such waivers from the Governmental tax authorities as may be required, pay over to the executor or administrator the net worth of the Trust.

Trusts may be established in joint tenancy form so that they need not necessarily terminate upon the death of one of the beneficiaries. When trusts are established in joint tenancy arrangements can be made to have the income paid to either or both of the joint beneficiaries during their lives, and upon the death of one of the Trust will continue for the benefit of the survivor unless, of course, it is sooner terminated by revocation. A Trust to be established in joint tenancy form should read, for example, "John A. Doe and Mary B. Doe and the survivor of them as joint tenants." Upon the death of one of the joint tenants the Trust will be subject to Inheritance tax in the same manner that jointly owned property is taxable in the particular State of which the decedent was a resident.

When a Uniform Trust is established in joint tenancy form either of the joint beneficiaries may exercise all rights or powers with relation to the Trust.

If a Trust is to be established for the benefit of a corporation, the corporation in question should send to the Trust Company a copy of its articles of incorporation, a copy of its by-laws, and a certified copy of the resolution of its board of directors specifically authorizing the investment and giving certain officers power to execute such papers as may be necessary in connection with the establishment, assignment, or revocation of the Trust.

The Trust may be revoked on the first Wednesday in any month, and not later than 30 days after the Trustee has received notice of the desire to revoke the Trust it shall pay over to the beneficiary or his assignee the net worth of the trust fund on the date as of which revocation is made, that is, upon the nest ensuing first Wednesday in the month. Upon the revocation of any Trust the beneficiary is entitled to a proportionate share in profits realized and income collected and accrued, together with an amount representing the proportionate interest of his trust in the then current market value of the securities held for the account of all the Uniform Trusts.

Further than that, the beneficiary may revoke a part of his Trust. There is a provision in the Trust that at the option of the Trustee the beneficiary may be paid either in cash or in securities. Further, there is a provision that in case there is held in the Trust a security which is not immediately salable the Trustee may issue its certificate of beneficial interest in that security, to be liquidated at such time as the Trustee finds possible, or thinks wise.

The total income earned by the Trustee for the account of each Uniform Trust will be set forth on a statement and mailed each year to the beneficiary in ample time to enable him to incorporate the figures in his personal income tax return for the preceding calendar year. The total income earned with relation to each Uniform Trust will be properly subdivided for entry upon the return under the sources specified thereon. These figures will include all income collected and profits realized for the account of the trust, whether or not distributed. A method has been devised through a mathematical formula whereby an accurate allocation of income and profits may be made among the trusts in operation under the plan.

Upon the death of an individual beneficiary of a Uniform Trust the Trustee will, within 30 days following receipt of the Declaration of Trust together with a Surrogate's certificate evidencing the appointment of an executor or administrator, and such waivers as may be required, pay over to the executor or administrator the net worth of the Trust as ascertained by the Trustee, within the said 30-day period. The Trust will, of course, be subject to Inheritance tax in the same manner as other assets of the estate of the deceased beneficiary.

Upon the death of one of the beneficiaries of a Uniform Trust created in joint tenancy form, the estate of the decedent will be liable for an Inheritance tax in the same manner as jointly owned property is taxable in the State of which the deceased beneficiary was a resident. The Trustee will execute and deliver a Declaration of Trust in favor of the surviving beneficiary upon presentation of the original Declaration of Trust together with Surrogate's certificate and such waivers as may be required, depending upon the domicile of the decedent.

One of the elements of the operation is the appointment of an Auditor, and the plan provides that the Trust shall be examined periodically, not less than once a year. The Trustee will mail a copy of the Auditor's report to each beneficiary once a year, and in case any dispute takes place between the Trustee and the beneficiary it shall be referred to the Auditor for arbitration and his findings shall be final. The Auditor shall be the person or firm who may be appointed from time to time by the President of the Chamber of Commerce of the State of New York.

The form of the Declaration of Trust is somewhat similar to that of a stock certificate, except that is is a simple summary of the provisions of the Trust, and has on its back a form of Assignment of Revocation and a notice of Revocation.

An Assignment of the Right of Revocation is permitted in order that the maker of the Trust may use the trust instrument as collateral for a loan. Although it is provided that the Right of Revocation may be assigned, the Trust itself may not be assigned.

Movement for Constitutional Amendment Providing for Abolition of Federal Inheritance Tax Launched by Arkansas Taxpayers Association.

Circulation of a petition initiating a proposed constitutional amendment which, if ratified by the people next November would throw Arkansas squarely behind the movement seeking abolition of the Federal inheritance tax, has been launched by the Arkansas Taxpayers Association. The text of the amendment follows:

No inheritance tax shall hereafter be levied on the estates of deceased persons, except on estates taxed by the United States Government, and then not in excess of the amount of such Federal tax.

The announcement issued Feb. 4 by the Association says:

The petition, which will require the signatures of approximately 25,000 qualified electors before the amendment can be placed on the ballot, simply explains that the measure is proposed in order to prevent the assessment of a death tax greater than that levied by the Federal Government. Ratification would mean that if and when the Federal death tax is repealed the Arkansas State tax automatically would be discontinued inasmuch as the constitution would provide that the tax applied only upon estates taxed by the Government and that it should not be in excess of the Federal levy.

The Taxpayers Association, which for many months has been auditing legislative expenses and the expenses of various State departments over a period of years, did not stop with the inheritance tax porposal. Altogether the association is initiating seven amendments of which two, in addition to that concerning the death tax are of peculiar interest to business and invested capital in Arkansas. One of these would prohibit an increase in the total rate of the present property or any other tax for State purposes, without the approval of a majority of the prople at a special election called for that purpose.

The third amendment, of paramount interest to corporations, would hamstring Arkansas' notorious "back tax" law. Until last year the Attorney-General, at the instance of a taxpayer who believed the property of a corporation in the past was underassessed, was empowered to bring suit to recover the sum alleged due by reassessing the property involved. To all intents and purposes there was no limit to how many years back the State could go until the Legislature of 1929 amended the Act and fixed it at five years.

The law, incidentally, empowers the Governor to employ any attorneys that may be necessary to assist the Attorney-General, such special counsel to be compensated on a contingent basis, fixed by the court, not to exceed 20% of the actual recovery. The Act has cost corporations hundreds of thousands of dollars and, it is claimed by business men, has been responsible for the shunning of Arkansas by capital. The Taxpayers Association, in its audit of the records of the State Treasurer, has learned that the fees of one special assistant to the Attorney-General in the prosecution of back tax suits have amounted to more than $90,000 during the last six years. It is pointed out that if this attorney were allowed the maximum fee of 20% he, alone, collected more than $450,000 as a result of back tax actions handled by him during the six-year period.

The proposed amendment designed to remedy this situation provides that "after the assessment and full payment of any general property, privilege or excise tax, no proceedings shall be brought or maintained for the reassessment of the value on which it is based, except for actual fraud of the taxpayer."

Under the Arkansas constitution either the Legislature or the people may initiate constitutional amendments.

Joseph S. McCoy, Actuary of Treasury Department, Before Mid-Winter Trust Conference Reviews Statistics Covering Federal Returns For Estate Taxes.

Statistics covering Federal returns for estate taxes made during the calendar year 1928, were the subject of an address by Joseph S. McCoy, U. S. Government Actuary, of the Treasury Department, at Washington, before the Eleventh Mid-Winter Trust Conference, held under the auspicies of the Trust Company Division, American Bankers Association at the Hotel Commodore, New York City, Feb. 19. Mr. McCoy in his comments said:

The number of these returns, for resident decedents, was about 13½% less than the number for 1927, due to the increased exemption. Returns under the 1926 Act, with $100,000 specified exemption, increased about 15%. The estates returned had a gross value of three billion and a half dollars, a 12% increase, or $381,000,000 more than for 1927.

The "Statistics of Income for 1927," issued last September by the Bureau of Internal Revenue, contains statistics covering returns filed during the calendar year 1928. This does not mean that all the owners of these estates returned died during that year. Returns are due one year after the date of death, and this time may be extended. The tax return is not the actual tax collected during the year. The actual collections, to a considerable extent, are on account of taxes returned during prior years. The annual returns, however, do represent a normal year's mortality. True, it includes returns of deaths that occurred during prior years, but some occuring during that year will be returned later.

The number of returns filed during 1928 in behalf of resident decedents was 8,079. Of these, 7,609 covered deaths after Feb. 26 1926; 255 covered deaths that occurred prior to Feb. 26 1926 but after June 2 1924, taxed under the Revenue Act of 1924; 215 returns covered deaths that occurred prior to June 2 1924. In addition, 2,157 returns for non-resident decedents were filed. The returns filed on account of resident decedents had a gross value of $3,503,238,684. These included 6,116 taxable estates, valued at $3,181,719,062.

Allowable deductions totalling $1,238,290,401, reduced this to a net taxable value of $1,943,428,661, with tax amounting to $135,013,559. The share of the Federal Governmnet was $40,561,235, and that of the States etc., $94,452,324.

This does not mean that the Federal Government pays this amount to the State. It means that where a State collects death taxes, the Federal estate tax of a resident decedent is credited with this amount to a sum not in excess of 80% of the Federal tax. The total tax, the State tax being within this 80% limit, remains the same, but the Federal tax is reduced to this extent. This often enables the State to increase its revenue, without increasing taxes. New York benefitted this way, according to the returns for 1928, to the extent of about $46,500,000—more than the total share of the United States. The 1928 returns indicate that 15 States received the full 80% credit, while six additional ones received in excess of a 75% credit. The total of these credits was in excess of 70% of the total tax returned.

This maximum credit of 80% was not applicable in 1928 to all estates. All returns were not made under the provisions of the 1926 statute, which authorized this credit. Some, under the 1924 statute, allowed a 25% credit, and some, under prior statutes, allowed no such credits. Again, all States have not as yet taken advantage of this provision.

This tax actually collected during the calendar year 1928, instead of being $40,561,235, was $62,147,548. The "Revenue Act of 1926," now inforce, requires payment within one year from the date of death. The return is also required, by regulation, to be made within one year. In case of sickness or absence, collectors are authorized to extend the period for filing the return not in excess of 30 days from the due date. This does not, in itself, extend the time for payment. This must be granted by the Commissioner of Internal Revenue. In any case where the prompt payment of the tax would impose undue hardship, an extension or extensions will be granted for a period not to exceed in all five years. The term "undue hardship" means that it must appear that substantial financial loss would result from prompt payment. Of course, interest must be paid on over-due tax. When any payment is made after due date, unless an extension has been granted, interest on the unpaid part runs at 1% per month. If extension has been granted, however, interest begins six months after due date and runs, at 6% per annum. In case the tax, together with interest, is not paid by the final date of extension, then interest runs upon such unpaid amount, at the rate of 1% per month. That is, in certain cases, payment can be made six years after death, by receiving extensions, and paying interest at 6% per annum, for four and one-half years.

The specific exemption of $50,000 was doubled in 1926. In addition, the rates of tax were than materially changed. The maximum rate of 25% was reduced to a maximum of 20%, and the tax credit for payments to the States was then increased from 25% to 80%. For these reasons, a comparison of the total taxes collected from estates annually is meaningless.

Of the total gross estate returned for resident decedents during 1928, 43.3% in value was in the form of stocks of corporations; 17.4% in the form of real estate; 13.9% in the form of bonds; 11% in the form of mortgages, notes and cash; 6.1% in the form of miscellaneous property; 2.9% in the form of insurance; and 5.4% in miscellaneous forms. Of the holdings of bonds, 3.2% of the value of the estates consisted of United States bonds; 3.9% State and Municipal bonds, wholly tax-exempt, and 6.8% of other bonds. The average holding in real estate was a trifle more than for the prior year. As then shown, the smaller the estate, the larger was the proportion in realty. The 99 estates, having a gross value of less than $50,000, returned an average holding of over 30% in real estate. The 2,184 estates with a net value of less than $50,000 returned 27% in real estate. The 326 estates with net value of between $400,000 and $600,000, returned about 17% in real estate. The 110 estates with a net value of from $800,000 to $1,000,000, returned 14%, while the eight estates with a total net value in excess of 10 million dollars each, so returned only 10%.

The activity in the stock market continued during 1928 with increased force, caused by the wonderful prosperity of the corporate form of business, due largely to the repeal of the excess profits tax, pushing into active business the surplus funds held by corporations.

The percentage of the total gross estate held in the form of stocks of corporations returned during the calendar year 1926, was 37.4%; for 1927, 38.9%; and for 1928, 43.3%; or an increase of almost 16% in two years. As in previous years, the returns filed in 1928 showed that the holdings of corporate stocks increased rapidly with the size of the estate. The 99 estates with gross value of less than $50,000 each, held 16 1-3% in stocks. The 2,184 returns of those with net value of less than $50,000 each returned stocks amounting to 28½% of the total. The 326 estates with net values between $500,000 and $600,000 returned stocks amounting to 42 2-3%. The 110 estates with net values of between $800,000 and $1,000,000, returned stock amounting to 48¾%, while the eight estates with net values in excess of $10,000,000, returned stocks amounting to over 64% of their total.

The holding in the form of bonds was a little less than for the year 1926 or for 1927. The percentage so held increase fairly uniformly until net estates of between $1,000,000 and $1,500,000 were reached. Then it decreased irregularly until estates of between nine and ten million dollars, where the average holding in bonds was 5%.

Gross estates averaging less than $50,000 returned about 3½% in bonds of all kinds, less than 1% of the total estate being in the form of Government, State or municipal bonds. Net estates not in excess of $50,000 returned 12¼% in bonds, about 4¾% being Government bonds, including State and municipal. Net estates between $400,000 and $600,000 returned 15.4%, 6% being Government bonds of all kinds. Net estates between $1,000,000 and $1,500,000 returned about 20% in bonds, 11% being Government bonds of all kinds, 4% United States bonds. Net estates over $10,000,000 returned 13½% in bonds, about 8¼% being Government bonds of all kinds, 3¾% being United States bonds.

The holdings of the estates returning during 1928 consisting of mortgages, notes, cash, etc., were much smaller than for the previous two years. For 1928 this holding was 7.7%, as compared with 11.5% for 1927 and 11.4% for 1926, a decrease from 1927 of about 33%. The chances are that the large dividends being paid by corporations, and the increasing value of their stocks was the reason for this.

The number of estates consisting almost altogether of the receipts from insurance policies is without doubt, largest in New York. There are more large salaries paid and more persons must live, for business purposes, practically up to their salaries in New York than elsewhere. To save their dependents from being entirely destitute in case of their death, life insurance is imperative. Others, with incomes from property or investments, do not require insurance to such an extent.

Naturally, there is a limit to the number of these large salaries. We know that in 1928, 540,893 individuals returned taxable income to the Federal Government of $5,000 or more, received from salaries, commissions, etc., or in other words, income earned by their own personal services. Of these, 19,229 returned income in excess of $25,000 for the calendar year 1927. Of these, 746 returned such income in excess of $100,000, while four returned such income in excess of $1,000,000. The total of such income earned by these four persons totalled $6,527,363.

Of these, it is possible that, in case of death, some 12,000 would leave no estate other than the proceeds from insurance policies, and over one-half of them would be residents of New York. On the other hand, according to the report of the New York Insurance Commission, based upon the returns of nearly all the companies doing business in the United States, the average annual number of insurance policies terminated by death during the four years ending Dec. 31 1927, in the United States, was 135,750, valued at $349,958,750, or an average policy of $2,578. This average policy for 1927 was $2,685. The 4-year average for all policies terminated by any cause whatever was $2,457, and for 1927, $2,573. Compare these averages with the average insurance known to have been carried by decedents whose estates were returned to the United States for tax. The number of policies

Federal Reserve Bank of St. Louis

in force in the United States Dec. 31 1928 in excess of $50,000 each was 15,000.

The percentage of the total value of the estates for which returns were made to the Federal Government during 1928, in the form of insurance was 2.95%; for 1927 it was 2.83%; and for 1926, 2.68%. This shows a slight, but steady, increase. These statistics, however, do not tell the whole story. The average amount of insurance held by estates returning in 1926 was $6,896; in 1927, $9,510, and in 1928, $12,776.

The percentage of the value of the estate held in the form of insurance varies greatly. The smaller the estate the larger the percentage so held. In 1927, the 229 estates returning gross income of less than $50,000 each, held 7.89% of the total in the form of insurance. In 1928, the 99 returns for similar estates held 20¼% in the form of insurance. Many of these must have belonged to the large salary group, as insurance formed the largest part of the estate. These were the smallest estates returned, but they held the argest percentage of their total in insurance. The 1,864 non-taxable tates in 1928, with gross estates in excess of $50,000, carried insurance to e extent of 5.55%. The 2,184 returns of net estates not in excess of 0,000 returned insurance to the amount of 4% of the total. This per-ntage decreased rather irregularly, with a few recoveries, until net estates alued between $3,500,000 and $4,000,000 returned less than 1-5 of 1% of nsurance. The percentage again increased, irregularly, until the eight estates having net values in excess of $10,000,000 each, with an aggregate gross value of $331,880,866, returned only $14,540 in insurance. It must be remembered that we do not know how many policies were in force, nor the number included in any one estate, nor the number of estates including no insurance.

The remaining value of the estates reported consisted in property, 6%; transfer made within two years prior to date of death, 2½%; powers made in contemplation of death, ½ of 1%, and property from an estate taxed within five years, value at time of death of present decedent, about 2.4%.

The deductions allowed reduced the gross to a net taxable value of $1,943,428,661, a reduction of over 47%. The largest exemption or deduction was the $100,000 specific exemption under the 1926 Act, and the $50,000 under the 1924 Act. The number receiving the $100,000 was 7,609. This totalled, according to the report, $784,350,000, as compared with $798,910,000 for 1927.

The deduction for debt, which included unpaid mortgages, etc., amounted to $392,432,336, as compared with $310,596,254 for 1927. The deduction on account of charitable, public, and similar bequests was $216,099,140. For 1926 this was $130,974,586. Funeral and administration expenses amounted to $114,688,964, as compared with $129,578,621 for 1927. Property from an estate taxed within five years, valued at date of previous decedent's death, was $71,857,039, as compared with $73,482,328 for 1927. The only other allowable deduction was the insurance exemption. These totaled $1,661,225,428, as compared with $1,735,840,229 for 1927, and $1,504,212,412 for 1926.

The return schedule for estate tax, under the classification of funeral and administration expenses provides that the executors' or administrators' commissions shall not exceed the amount allowable by the law of the jurisdiction, and not in excess of that usually allowed in cases similar to the estate under audit. All expenses must be itemized.

The total of these deductions for all the 8,079 estates returning a gross of $3,503,238,684 was $144,688,964, an average of $17,909, or 4.13% of the average estate.

The average costs for the 1,963 non-taxable estates reporting was $7,577, or 8.24% of the gross. These alone varied materially from the genera average. All taxable estates from the smallest, with net income unde $50,000, to those with a net of over $6,000,000, had from 4.58% as a maxi mum to 3.6% as a minimum percentage of gross, deducted on account of these costs. Estates between $6,000,000 and $7,000,000 net had 2.82% for their costs, while the three estates with net between $7,000,000 and $8,000,-000 paid 5.45%. The eight estates with net in excess of $10,000,000, aggregating $331,880,866 gross, paid $1,951,342 average, or 4.7% of the gross.

In addition to the returns on account of resident decedents, there was filed, as already stated, 2,157 returns on account of non-resident decedents. Of these, six had no net estates; and 1,900 had net estates under $50,000 each. Only seven of these estates exceeded $1,000,000 each, the largest of which had a net estate of $1,730,983. The total tax returned was $1,541,433, with a tax credit of $143,409, leaving as the payments due the United States, $1,398,024.

A tabulation of all the statistics returned in the 8,079 returns of resident decedents, and the 2,157 returns of non-resident decedents made during 1928, would have cost the Government very little more than did the tabulation actually made. These would, however, be of infinitely more value. The Bureau of Internal Revenue—that great storehouse, and, seemingly grave, of unique information—does not seem to appreciate the value of its holdings. It is false economy to skimp where statistics are concerned. Tabulations along many lines would furnish a basis that would assist collections and increase revenue materially, in addition to the aid it would give many lines of outside business. A little increase in appropriations would possibly remedy this condition, and render the Bureau of general service, instead of it being merely a tax collector.

Relative to estates alone, statistics are easily available covering the form and cost of administration as distinguished from funeral expenses, the number of estates actually carrying insurance and the graduation as to the number of policies and amount of insurance so held, and many other items that appear on the face of the returns but which are not tabulated for the reports. The returns of all gross estates in excess of $50,000, administered within the United States, even if not taxable, should also be continued.

Consolidation Urged to Reduce Number of Banks in Iowa—Remedies Suggested by L. A. Andrew, State Superintendent of Banks for Overbanked Condition.

There is only one remedy for an overbanked condition, and that is consolidation, in the opinion of L. A. Andrew, State Superintendent of Banks, according to a statement made Feb. 12 in an address before Group 11 of the Iowa Bankers' Association at Keokuk. The past four years, Mr. Andrews said, have brought more change in Iowa banking conditions than any 50-year period of the past. Des Moines advices, Feb. 15, to the "United States Daily," from which we quote, went on to say:

Mr. Andrew outlined measures by which Iowa banks have been strengthened, chiefly through consolidations and co-operation with the banking department in instituting better practices; and indicated the necessity for the communities to live up to their obligations to the banks, as well as expecting the banks to bear their share of the burden.

"The community owes an obligation to the banks as well as the banks to the community," said Mr. Andrew. "The people of the community owe the bank fair treatment, as it has been proven that a bank is an economic necessity for a business community. People who try to tear down banking institutions, which it has taken years to build, hurt not only the bank but the town as well. Depositors in the bank should respect the contract made when money is deposited for six months or a year at interest, and the bank should insist on a full compliance with said contract. Borrowers should remember the banks are loaning the money of the depositors, for which they act as trustee, and furnish financial statement and proper security. Loans which cannot be paid out of business operations should be put on a first mortgage basis.

"A good bank's first duty is to its depositors. This is an obligation which is constant and should never be lost sight of at any time. The loans must be so arranged that demand deposits can be taken care of on demand. The people of Iowa are asking for stronger, better and safer banks and are willing to pay for good banking service. There has been more change in Iowa banking during the past four years than in any 50 years before.

"The small margin of profit now in the banking business requires that no known chance be taken in making a loan. This reduced profit results in another problem as a number of our smaller banks are not able to make expenses. For that reason consolidations must be made. There is only one remedy for an overbanked condition and that is a consolidation. Reports published this week show that there were 1,000 less banks in the United States on Jan. 1 this year than there were on Jan. 1 last year. This shows that the trend of consolidation is nation-wide," Mr. Andrew stated.

Dr. Atkins of Ames, Emerich & Co. Sees Changing Trends for Banks Increasing Deposits.

The best way for a bank to increase deposits, says Dr. Paul M. Atkins, economist, of Ames, Emerich & Co., in the latest number of Current Bank Briefs, is for bank officers to make and maintain personal contacts with prospective customers. Dr. Atkins points out the four necessary fundamental steps for banks to take in increasing their deposits in this manner. First, a survey of possible depositors should be made, followed by a survey of the bank's facilities for handling the maximum deposits. Third, the bank should always determine those depositors which should logically be doing business with the bank, many of which, for certain reasons, may be doing business with banks outside their actual "home territory." Fourth, and last, the bank should organize its officers into a systematic soliciting organization. Dr. Atkins said:

"Clients may be brought into the bank this way, but they cannot be retained unless the bank is equipped to give them proper service. Important part of this fact lies in adequate physical and financial equipment of the bank. From the standpoint of the depositor, the most essential factor is satisfactory liquidity, which depends in part on the possession of sound loans, in part on an adequate primary reserve, and in part on a properly constructed secondary reserve."

Warehouses Seek Stay of Loading Ban—Petition Court To Hold Up Inter-State Commerce Commission Order Which Prohibits Warehouses from Rendering Service to Railroads.

Petitions have been filed in the United States District Court at Philadelphia by the Merchants Warehouse Co., Pennsylvania Warehouse & Safe Deposit Co., and the Philadelphia Warehousing & Cold Storage Co., seeking a temporary stay or suspension of the Inter-State Commerce Commission's recent order which would prohibit the Pennsylvania RR., Reading Co., and the Baltimore & Ohio Railroad Co. from employing the warehouse companies to render transportation services for the carriers while acting as their agents. A Philadelphia dispatch Feb. 16 to the New York "Journal of Commerce" indicating this, says:

These services include loading and unloading freight for the carriers under contract, collecting the freight charges, assuming responsibility for the freight during the free period of storage allowed by the carriers and all other services in connection with the receipt and delivery of freight as performed by the carriers themselves.

The Commission's order which would become effective Feb. 25, resulted from a complaint filed with the Inter-State Commissioners by James Gallagher and the Northeastern Warehouse Co., Walter A. Bailey and the Terminal Warehouse Co. They alleged payments made by the carriers were discriminatory, unjust and prejudicial to them and also that the practice was in violation of the Inter-State Commerce Act.

The petition filed by William A. Glasgow Jr., M. Hampton Todd, and Allen S. Olmstead 2d. for the Merchants Warehouse Co. points out that the practice of employing certain warehouses under contract to perform services which the carriers must perform under its tariffs is not a violation of the Inter-State Commerce Act and, therefore, should not be annulled. It is further contended that the Commission's order is "beyond its jurisdiction and power for the reason that the Inter-State Commerce Act does not delegate power to the committee to interfere with the right of a carrier to employ exclusively a particular agent, or to supervise, control, or regulate the designation by the carriers of terminal stations, or of the internal management of station, or of the payment of compensation for the internal management of the stations."

Numerous trade and commercial organizations of this city, including the Commercial Exchange, Board of Trade, manufacturers' representatives and the Grocers' and Importers' Exchange, interveners in the original action, said discontinuance of the practice would be greatly inconvenient to business interests of the city and that the practice has added much to the economic convenience and expedition in the handling of freight shipments here.

Federal Reserve Bank of St. Louis

If the temporary stay or suspension is not granted changes will have to be made in the warehouse company's schedule of charges which it must collect from its customers and otherwise disturb and amend its established practice of conducting its warehouse business, officials said. It also will mean that shippers and receivers of freight will have to pay for the unloading of their freight at the various railroad freight stations or load or unload the cars at their own expense. This, it was pointed out, virtually amounts to an increase in the total freight transporation charges, which either must be borne by the buyer or seller of the merchandise.

Trades bodies object to the discontinuance of the present practice and the contemplated substitution of new and higher costs to merchants to do business in Philadelphia, contending that the rail carriers would be given revenue which they are not seeking, unnecessarily burdening the public.

ITEMS ABOUT BANKS, TRUST COMPANIES, ETC.

Arrangements were reported made this week for the transfer of a New York Stock Exchange membership for $400,000, ex-rights. The last preceding sale was for $399,000.

The New York Coffee & Sugar Exchange membership of Samuel Newburger was sold this week to Farr & Co. for $14,000, a decline of $500 from the last preceding sale.

Arrangements were made early in the week for the sale of a Chicago Stock Exchange membership for $32,000. The previous sale was $31,000. To-day arrangements were reported for the sale of two memberships for $32,500 each.

The Irving Trust Co. of New York announced on Feb. 17 that a lease had been signed preliminary to the removal of its Market and Fulton Office from the location it has occupied at 81 Fulton St. for more than 40 years, to the northeast corner of Fulton and William Sts., in the Royal Insurance Building. In its new home, the office will have commodious banking quarters on the ground and second floors, and additional space in the basement for new and improved safe deposit vaults. The removal will take place early in May. The Market and Fulton office has been in its present location since the building at 81 Fulton St. was erected by the Market and Fulton National Bank in 1889. This structure is soon to be torn down to make way for the erection of an extension to the Royal Insurance Building.

The ninth annual dinner to the employees of the New York Stock Exchange who have participated in athletic activities was given on Feb. 19 by the Committee of Arrangements in the Stock Exchange Luncheon Club. The dinner was attended by more than 300 employees of the Exchange, members of its teams in baseball, basketball, soccer, track, cross-country, bowling, golf, rifle and tennis, and the officers of the Exchange, including Richard Whitney, Vice-President; Oliver C. Billings, Chairman of the Committee of Arrangements; James C. Auchincloss, Arthur F. Broderick, Arthur G. Delany, Peter J. Maloney, William B. Potts, Erastus T. Tefft, Blair S. Williams, and other Governors and members of the Exchange. Prizes for excellence in various sports were presented by Richard Whitney, the Vice-President of the Exchange, representing the Committee of Arrangements.

Hunter S. Marston, for the past 10 years Vice-President of Bancamerica-Blair Corp. and its predecessor, Blair & Co., Inc., and a member of the organization since 1908, was elected President of Bancamerica-Blair Corp. at a meeting of the board of directors held Feb. 18. Mr. Marston succeeds Elisha Walker, recently elected Chairman of the Board and active executive head of the Transamerica Corp., which claims to be the largest securities holding and investment company in the world, having resources of over $1,000,000,000. Bancamerica-Blair Corp. is the securities affiliate of the Bank of America, N. A., which is one of the oldest banks in the United States. The selection of Mr. Marston as President of Bancamerica-Blair Corp. by his associates places at the helm of this organization the son of Edgar L. Marston (retired), one of the original members and for many years one of the active heads of the old predecessor firm of Blair & Co. which was organized in 1890. Incident to the election of Mr. Marston as President and chief executive of Bancamerica-Blair, it was also announced that Mr. Walker, while devoting practically all of his time to Transamerica-Blair Corp., will continue as Chairman of the Board of Bancamerica-Blair Corp. With the exception of one interruption during the World War, Mr. Marston, since his graduation from Brown University in 1908, has always been affiliated with Bancamerica-Blair and its predecessor corporation. He is a director or trustee in many corporations, the more important of which are Transamerica Corp., Bank of America, N. A., Northwestern Trust Co., Merchants Trust Co., First National Bank of St. Paul, Tidewater-Associated Oil, Petroleum Corp. of America, Oil Well Supply Co., American Home Products, Chesebrough Mfg. Co. Bancamerica-Blair Corp., and its predecessors Blair & Co., Inc. and the old private banking firm of Blair & Co., has for more than 40 years been one of the leading banking firms in the country. Bancamerica-Blair Corp. now maintains 28 offices in the United States and one each in London and Paris. In addition to the main office in New York, domestic branches are located in Albany, Atlanta, Baltimore, Boston, Buffalo, Chicago, Cincinnati, Cleveland, Davenport, Des Moines, Hartford, Los Angeles, Milwaukee, Minneapolis, Omaha, Philadelphia, Pittsburgh, Portland, Ore., Providence, San Francisco, Scranton, Seattle, St. Louis, St. Paul, Syracuse, San Diego and Columbus.

The Comptroller of the Currency in announcing approval by his office on Feb. 15 of the consolidation of the Murray Hill Trust Co. of New York with the Bank of America National Association, New York, says:

The consolidated bank has 21 branches, all located in the City of New York, which were branches of the Bank of America National Association and which were in operation on Feb. 25 1927. Twenty-four branches of the Bank of America National Association which were authorized since Feb. 25 1927 were re-authorized for the consolidated bank.

The merger was referred to in these columns Jan. 11, page 235, and Feb. 15, page 1063. The merger became effective Feb. 15. The Bank of America, which had a capital of $35,775,300, has increased it to $36,775,300. The Murray Hill Trust Co. had a capital of $2,000,000.

S. Sloane Colt, who has been a Vice-President of the National City Bank, was elected Vice-President of Bankers Trust Co. of New York at the regular meeting of the board of directors on Feb. 18. Mr. Colt was a Vice-President of Farmers Loan and Trust Co. until its affiliation with the National City Bank and since June of last year has held the same office with the National City Bank. He will assume his new duties on March 15. Mr. Colt who was born on July 13 1892 entered the employ of Farmers Loan and Trust Co. in 1914 and became a Vice-President in 1925. He is a director of the Royal Exchange Assurance, Public Fire Insurance Co., The Mortgage-Bond Co. of New York, the Tuxedo National Bank and several other corporations.

Harry H. Pond has tendered his resignation as a Vice-President of the Chase National Bank of New York, which will become effective April 1. It is Mr. Pond's desire to devote his time to the further development of his Plainfield banking interests. Besides being President of The Plainfield Trust Co., Mr. Pond is Vice-President and Director of the Plainfield Title and Mortgage Guaranty Co.; Chairman of the Board of the Guaranty Trust Co. of Plainfield; and a Director of the Plainfield National Bank. Mr. Pond has been prominent in New Jersey and New York banking circles and has been a member of many committees that have tended to widen the scope of service to depositors and add to the soundness of financial institutions. Mr. Pond started as a messenger in the Vineland National Bank, later becoming Cashier. He was the organizer of the Savings Bank of Cumberland County, which he afterward merged with the Vineland Trust Co. For several years he was the active head of both the Vineland National Bank and the Vineland Trust Co. In 1910 Mr. Pond located in Plainfield becoming Secretary and Treasurer of the Plainfield Trust Co. A year later, in 1911, he became President of the New Jersey State Bankers Association. In 1913, although continuing as a member of the Board of Directors of the Plainfield Trust Co. and Vice-President of that institution, he resigned as active officer of that company to become a Vice-President of the Mechanics and Metals National Bank of New York, which has since merged with the Chase National Bank. In 1923, at the death of Orville T. Waring—the First President of the Plainfield Trust Co.—Mr. Pond accepted the Presidency of that institution, which position he has since held, in addition to his New York connection as a Vice-President of the Chase National Bank. During the World War, Mr. Pond served as Chairman of one of the Liberty Loan campaigns. He has served as a member of the Board of Governors of Muhlenberg Hospital, a portion of which time he was President of the Board. For 23 years he has been on the Board of Managers of the New Jersey State School at Vineland, and is President of the Board.

At the regular meeting of the board of directors of the National City Bank of New York held Feb. 18, the resignation of S. Sloan Colt as Vice-President was accepted.

Federal Reserve Bank of St. Louis

Guaranty Trust Co. of New York announces the appointment of Daniel B. Grant as a Vice-President. Mr. Grant has been joint manager of the Guaranty Trust Co. offices in England.

Philip De Ronde, President of the Hibernia Trust Co. of New York, issued a statement on Feb. 19 relative to rumors of a merger of that institution with uptown banking houses. The statement follows:

Some days ago an article appearing in the New York newspapers gave the impression that negotiations looking toward the merger of certain uptown banking institutions with the Hibernia Trust Co. had practically been completed. While it is a fact that conversations had taken place with that end in view, it is equally a fact that nothing resulted therefrom. It is not, therefore, the present intention of the Hibernia Trust Co. to negotiate the acquisition of these or any other uptown banks.

Central Hanover Bank & Trust Co. of New York announces the appointment of Harry A. Trautmann as Assistant Vice-President. Mr. Trautmann has been associated with Central Hanover since 1919 and at the time of his appointment was Assistant Secretary. He is in charge of the purchasing department of the institution.

Jackson E. Reynolds, President of the First National Bank of New York, and Chairman of the organization committee of the Bank for International Settlements, will be the guest of honor and speaker at a luncheon of the Bond Club of New York, to be held at the Bankers' Club on Tuesday, Feb. 25, at 12:15 o'clock.

The new 50-story building—headquarters of the Irving Trust Company—constructed entirely of granite and limestone, is rapidly taking shape at the head of Wall Street. At the intersection of Wall Street and Broadway a ponderous cornerstone, inscribed "Irving Trust Co., 1930," was set in place with impressive ceremonies a few days ago. More than 400 carloads of limestone will be required for this unique building. Railroad men say this is one of the largest movements of building stone that ever entered New York, and they speak of it as "four miles of stone," meaning about 100 cars to the mile.

The Irving Trust Co.'s architects, Voorhees, Gmelin & Walker, say that the building when completed will be an impressive picture in stone; simple, dignified and beautiful. Simplicity and beauty, they declare, will be achieved by an unusual feature of their design—the angled walls. Bent frame windows, specially designed, will conform to the angles of these massive stone walls. Instead, therefore, of an outside appearance resembling a great wall broken by rows of deep sunk glass, these curved windows will seem an integral part of the walls. From far below the level of Broadway and Wall Street, on foundations anchored to bedrock, the steel frame destined to support this massive edifice is rapidly rising. At the same time preparations are well advanced for installation of the three-story vault. Resting on its foundation, cut into solid rock, this vault will occupy virtually the entire block front along Wall Street, between Broadway and New Street, with a depth from front to rear of about 40 feet. Like that of the Federal Reserve Bank of New York, the stronghold deep below Wall Street will be protected by the best of mechanical, chemical and electrical safeguards, and further protected by a surrounding wall of water, impenetrable except by use of submarine apparatus.

On Feb. 17 the National City Bank of New York opened its new three-story branch building at the northwest corner of Seventh Avenue and 34th Street, one block north of the Pennsylvania Station. The new unit, conforming to the general architectural scheme set by the bank's management for all new branch buildings, will offer complete banking, investment, trust and safe deposit facilities of the National City organization in an important district in midtown New York where are located many hotels and where may be found headquarters for several important industries. The branch is the thirty-ninth to be opened in Greater New York. The compound interest department of the branch will be open from 8:30 to 6 on weekdays and from 8:30 to 3 on Saturdays, while the hours for the commercial department will be from 9 to 4 on weekdays and 9 to 1 on Saturdays.

Permanent certificates on the capital stock of Marine Midland Corp. (organized last year by New York and Buffalo financial interests) are now ready in exchange for temporary certificates at the Marine Trust Co. of Buffalo, Bankers Trust Co., New York, and First National Bank of Boston.

Harry P. Dungan has been appointed assistant manager of the Bedford branch of the Lafayette National Bank of Brooklyn.

It is announced that Chester D. Pugsley, Vice-Chairman of the Board of Directors of the Westchester County National Bank of Peekskill, New York, has become the fourteenth largest stockholder of the Irving Trust Co. of New York, which has over fifty thousand stockholders. It is also stated that he holds 1½% of the Lloyds Casualty Co. stock.

The officers and directors of the Second National Bank of Cooperstown, N. Y., announce the opening of their new bank building to-day, Feb. 22.

On Feb. 8 the Torrington National Bank of Torrington, Conn., and the Torrington Trust Co. were consolidated under the title of the Torrington National Bank & Trust Co. The new bank is capitalized at $400,000.

On Feb. 10 the Camden Safe Deposit & Trust Co. of Camden, N. J., one of the largest New Jersey banks, opened a handsome new banking home at Broadway and Market Streets, that city. The new building, it is understood, represents an outlay of $2,000,000. The expanding activities of the bank, which was founded in 1873, made larger quarters necessary to provide larger facilities. The personnel of the institution is as follows: Ephraim Tomlinson, President; W. J. Sewell, Jr., F. Herbert Fulton, Frank S. Norcross and Joseph Lippincott, Vice-Presidents; Clarence H. Polhemus, Treasurer; Russell L. Sammis, Secretary; John H. Annis, Trust Officer; C. Chester Craig, C. Merrill Schlosser and Edward M. Potter, Assistant Trust Officers; E. Robert Trudel, Jr., Henry Freeland and Walter T. Pratt, Assistant Treasurers; Harold Runce, Real Estate Officer, and George Reynolds, Solicitor. The Camden Safe Deposit & Trust Co. maintains two branches, one at Cape May City and the other at Gloucester City, N. J.

William E. Green, President of the Trenton Banking Co., Trenton, N. J., died at his home in that city on Feb. 18 after a long illness. Mr. Green was born in Trenton in 1878 and received his education at Lawrenceville School and Princeton University, being graduated from the latter in 1902. In addition to his banking connection, Mr. Green was a director of the Prudential Insurance Co., the New Jersey Bell Telephone Co. and the United New Jersey Railroad & Canal Co.

That a new financial institution in Lemoyne, Pa., has been chartered by the Comptroller of the Currency under the title of the West Shore National Bank and would at once begin the erection of a $45,000 bank building, was reported in a press dispatch from Harrisburg, on Feb. 17, appearing in the Philadelphia "Ledger" of the following day. The new bank is capitalized at $100,000 with surplus of $20,000. C. S. Willis is President; Oscar Wolfensberger, Secretary, and C. M. Mussellman, Treasurer.

The Southwestern National Bank of Philadelphia on Wednesday of this week (Feb. 19) opened its new building at the southeast corner of Broad and South Streets, according to the Philadelphia "Ledger" of that date. The new building, a model of modern bank architecture, is of stone with bronze doors and trimmings. The main street floor is occupied by four stores, two on each side of the central entrance to the bank's quarters, which opens to a wide stairway leading to the main banking floor. The new structure represents an expenditure of $250,000. The bank was founded July 19 1886. Its present personnel is composed almost entirely of men who have had long records of service with the institution. Eugene Walter, President has been with the institution since 1900. John Scott Jr., Chairman of the board of directors, started with the bank forty-four years ago. John M. Dotterer, Vice-President and Trust Officer, has been with the institution for twenty years. Harry S. Pollock, Cashier, entered the bank twenty-eight years ago, and Joseph Weaver, Assistant Cashier, has seen fifteen years' service with the institution.

W. C. Fitzgerald, a Vice-President of the Corn Exchange National Bank & Trust Co. of Philadelphia, on Feb. 18 was made a director and Secretary of the board, according to the Philadelphia "Ledger" of Feb. 19.

Federal Reserve Bank of St. Louis

H. C. McCaughan, heretofore an Assistant Treasurer of the Union Trust Co. of Pittsburgh, Pa., was recently appointed President of the Erie Trust Co. of Erie, Pa., according to the Pittsburgh "Post-Gazette" of Feb. 18. Mr. McCaughan succeeds in the Presidency of the Erie bank F. F. Curtze, who has become Chairman of the board of directors.

The Central National Bank of Portsmouth, Ohio, with capital of $200,000, and the Security Bank of Portsmouth, capitalized at $300,000, were merged on Feb. 5. The new organization is known is the Security Central National Bank of Portsmouth, and is capitalized at $500,000.

The failure of two small Indiana banks, namely the State Bank of Pierceton, capitalized at $40,000, and the Monroe State Bank, at Monroe, with capital of $25,000, was reported in the "Wall Street Journal" of Feb. 19, which further stated that the closing of the institutions was the result of exhausted credits and "frozen" resources.

On Feb. 3 the First National Bank of Logan, Ohio, changed its title to the First-Rempel National Bank of Logan.

Fred Uhlmann, President of the Uhlmann Grain Co., has been made a director of the Straus National Bank & Trust Co. of Chicago, according to the Chicago "Journal of Commerce" of Feb. 14.

John J. Mitchell, a son of John J. Mitchell, late Chairman of the board of the Illinois Merchants Trust Co. of Chicago, has resigned his position as Assistant to Vice-President of the Continental Illinois Bank & Trust Co., effective Mar. 1, according to the Chicago "Journal of Commerce" of Feb. 18, which continuing said:

Mr. Mitchell did not disclose his future plans, but it is understood he will devote most of his time to the affairs of the numerous aviation companies with which he is affiliated in various capacities. He is Secretary and Treasurer of the National Air Transport, Inc., and also of the Aviation Securities Corp. He also is a director of numerous other companies identified with aviation, as well as of other corporations, including the Commonwealth Edison Co. and the Chicago & Alton RR.

Mr. Mitchell has been extremely active in aviation affairs in the last five years.

Further referring to the failure, on Dec. 28, of the Progressive State Bank of Chicago, noted in the "Chronicle" of Jan. 4 (page 64), the Chicago "Journal of Commerce" of Feb. 12 stated that the previous day State Auditor Oscar Nelson appointed as receiver for the institution the Chicago Title & Trust Co. under a bill filed by Attorney General Oscar Carlstrom and confirmed by Judge Hugo Friend. Gerson Guthman is President of the closed bank, which is capitalized at $200,000, with surplus of $40,000 and deposits of $500,000.

Acquisition of the banking business of the Transportation Bank of Chicago by the Congress Trust & Savings Bank of that city was approved by the respective directors of the institutions, subject to the approval of the shareholders, on Feb. 20, according to the Chicago "Journal of Commerce" of the next day. The acquired bank has deposits of approximately $2,500,000, while the Congress Trust & Savings Bank has deposits of about $3,000,000. "Deposit liabilities of the Transportation Bank will be assumed by the Congress Trust & Savings Bank, which also will take over sufficient assets to cover these liabilities. The remaining assets of the Transportation Bank are to be liquidated, it is understood. There will be no exchange of stock." George C. Jewett, President of the Transportation Bank, will become Vice-Chairman of the Board of Directors of the Congress Trust & Savings Bank and will have an active part in its management, while Daniel E. Lupton, Cashier of the acquired bank since its organization, will also join the personnel of the enlarged bank. The directorate of the latter will be augmented by some of the directors of the Transportation Bank. The present quarters of the Congress Trust & Savings Bank, at Wabash Avenue and Congress Street, will be enlarged to take care of the business of both institutions. Until this is effected, each bank will continue to operate at its present location. The Chicago paper went on to say in part:

The Congress Trust and Savings was formed in 1927 with a capital and surplus of $330,000 and in serving the southeast section of the loop and the near south side, it has shown a steady growth. Its capital, surplus and undivided profits as of Dec. 31 1929, totaled $646,000. Philip F. W. Peck, Chairman of the board of directors, was one of the principal factors in its organization.

In the latter part of 1929 an affiliate of the Central Trust Co. of Illinois acquired a substantial stock interest in the bank and J. Sanford Otis, Vice-President of the Central-Illinois Company, was elected to the board of the Congress Trust. William Fuller Gregson was elected President of the bank at the annual meeting in January and will continue to serve in that capacity in the enlarged institution.

Included on the board of directors of the Congress Trust are: V. R. Bucklin, Vice-President of the Stewart-Warner Corp.; Alfred Cowles, director of the Continental Illinois Bank and Trust Co.; Mitchell D. Follansbee, Attorney; Robert H. McElroy, Vice-President of the Standard Oil Company of Indiana; Robert H. McCormick; A. H. Revell, Jr. of Alexander H. Revell and Co., and E. J. Stevens of the Stevens Hotel.

Interests identified with the printing trade organized the Transportation Bank in 1920 and since that time the institution has served the southwest portion of the loop. Mr. Jewett was elected President of the bank about three years ago. He was formerly President of the Federal Land Bank and Federal Intermediate Credit Bank of Spokane, Wash.

The transactions incident to the uniting of the banking businesses of the two institutions are being supervised by an advisory committee composed of A. R. Floreen, Vice-President of the Central Trust Co. of Illinois; Mr. Gregson, Mr. Jewett, Edward T. Kelly, President of E. T. Kelly Co., Mr. Otis and Mr. Peck.

In further reference to the affairs of the People's State Bank of Maywood, Ill., which, as noted in our issue of Feb. 15, page 1064, was closed for examination on Feb. 8 by State Auditor Oscar Nelson, following the alleged confession of its President, Elmer P. Langguth, that he had appropriated funds of the institution for his own use, Chicago advices to the New York "Times" on Feb. 18 contained the following:

Miss Elsie Gordon, John Reed and Edward R. Carleton, employes of the People's State Bank of Maywood, Ill., which was closed 10 days ago, were arrested to-night and will be taken before the grand jury to-morrow.

Indictments are expected against Elmer P. Langguth, President of the bank, and Miss Lavergne Lindgren, cashier, who were accused of embezzlements aggregating $173,000.

The depositors held a meeting to-day to discuss the reorganization that would permit the reopening of the bank through refinancing.

Effective Feb. 1, the Abram Rutt National Bank, Casey, Iowa, capitalized at $50,000, was placed in voluntary liquidation. The institution has been taken over by the Citizens' Savings Bank of Casey.

The Transportation Brotherhoods National Bank of Minneapolis, Minn., (capitalized at $200,000) was placed in voluntary liquidation on Feb. 4. The institution was absorbed by the Marquette National Bank of Minneapolis and the Marquette Trust Co.

A charter was issued by the Comptroller of the Currency on Feb. 8 for the Nebraska National Bank of Grand Island, Neb. The new bank, which is a conversion of the Nebraska State Bank of Grand Island, is capitalized at $100,000. A. J. Guendel is President.

The First Bank Stock Corp. (headquarters St. Paul and Minneapolis) established an earnings rate of $2.41 per share, or 9.65% on the $25 par value of its stock, during the period of its operations up to Dec. 31 1929, the annual report to the stockholders adopted by the corporation's board of directors discloses. In his report to the directors, P. J. Leeman, Vice-President and General Manager, pointed out that the earnings were nearly two and one half times dividend requirements at the established dividend rate of $1 per share. Projected on an annual basis, operating income of the corporation would approximate $7,282,652.04. Of the corporation's authorized capitalization of 10,000,000 shares, 3,016,870 shares were outstanding, held by approximately 16,000 stockholders. In discussing the operations of the corporation, the report said in part:

Total deposits of banks in the group as of Dec. 31 were $359,939,180. Since acquisition, banks in the country districts have shown an increase in deposits of $1,334,987, which we regard as most satisfactory in view of the fact that the Dec. 31 statements usually show a seasonal decline

Since the last meeting of the board on Nov 5, 31 additional banks have affiliated with the corporation, bringing the total of affiliates to 92.

A consolidated statement of the corporations which we control as of Dec. 31 1929 shows total resources of $446,915,233.70. In addition, the First Bank Stock Corp. has assets, exclusive of stocks in banks and other corporations, totaling $7,926,031, composed of cash on hand, bonds and securities, commercial paper and notes receivable, making total resources of $454,841,266.

The corporation has pending negotiations for the affiliation of a number of banks, acquisition of which will be announced from time to time. However, our policy at the present time is to devote our efforts almost exclusively to the management of the banks already in the system, rather than to the acquisition of institutions. . . .

We are looking forward to a year of substantial progress. The benefits of group operation should be reflected in expanded activities throughout the entire system. We are developing the facilities of our units in the credit, investment and trust fields, thus increasing their earning capacity, and at the same time are accomplishing economies through the central clearance functions of the corporation.

Election of four additional members of the board to the corporation's executive committee, expanding the membership of the committee to 15, was announced by Clive T. Jaffray, Chairman of the Board.

The Comptroller of the Currency on Feb. 5 granted a charter for the First National Bank of Lewellen, Neb., representing a conversion of the Bank of Lewellen. The new institution is capitalized at $50,000. S. P. Delatour is President and B. C. Delatour, Cashier.

Federal Reserve Bank of St. Louis

Effective Jan. 28, the Farmers' & Merchants National Bank of Milbank, S. D., with capital of $75,000, was placed in voluntary liquidation. The institution is succeeded by the Farmers' & Merchants' National Bank in Milbank.

As of Feb. 1, the First National Bank of Iola, Kans., capital $50,000, was placed in voluntary liquidation. The Iola National Bank of the same place absorbed the institution.

That the Mercantile Commerce Bank & Trust Co. of St. Louis, Mo., has adopted an old-age retirement program, providing pension provisions for approximately 550 employees, underwritten by the Metropolitan Life Insurance Co., was reported in the New York "Times" of Feb. 16, which went on to say:

The program includes also $2,000,000 of group life insurance, $1,000,000 accidental death and dismemberment protection and weekly sick and non-occupational accident benefits.

The bank will pay the entire cost of pensions based on service before the plan became effective, while the cost of pensions based on service after the plan was adopted, as well as the various group insurance features, will be met by deposits on the part of both the bank and the employees.

A proposal to consolidate the National City Bank of St. Louis and the Franklin-American Trust Co. of that city, under the title of the latter, will be submitted to the respective stockholders of the institutions shortly, according to a St. Louis dispatch by the Associated Press on Feb. 20, printed in the New York "Times" of yesterday, Feb. 21. The enlarged Franklin-American Trust Co. will have resources of more than $46,000,000. We quote further from the dispatch as follows:

The merger, which in effect will be an acquisition of National City by Franklin-American for approximately $1,500,000, was approved yesterday (Feb. 19) by the directors. It would strengthen the trust company's position as St. Louis's fourth largest bank.

The appointment of W. L. Gregory as Cashier of the Guaranty Bank & Trust Co., St. Louis, was announced on Feb. 11 by the directors, according to the St. Louis "Globe-Democrat" of Feb. 12. For the past seven years Mr. Gregory has been connected with the Federal Reserve Bank of St. Louis, and since January 1928 has been acting Assistant Federal Reserve Agent. He served in the War Savings, Transit, Bank Relations, Audit, Bank Examinations and Federal Reserve Agent Departments. During the World War Mr. Gregory served on a United States naval cruiser in the North Atlantic fleet, which convoyed troop ships to France. After the war he went to Buenos Aires as submanager of the American Express Co. in Argentina.

According to a dispatch from Jefferson City, Mo., on Feb. 7 to the St. Louis "Globe-Democrat," State Finance Commissioner for Missouri S. L. Cantley on that day issued a charter to the First Security State Bank of Charleston, Mississippi County, "which place, since Jan. 2, when the Bank of Charleston was closed by its directors, presented the situation of a city of 5,000 population and a county seat without banking facilities." The new bank, which, it was stated, would be ready for business in a few days, has a paid-up capital of $30,000, a surplus of $5,000, and undivided profits of $5,000. Among the incorporators of the new bank, it was said, are several prominent business men of St. Louis, including William H. Danforth, President of the Ralston Purina Mills Co.; E. D. Nims, President of the Southwestern Bell Telephone Co.; former Judge Rhodes E. Cave, and Hillsman Taylor.

A consolidation of the Cleveland Bank & Trust Co. of Shelby, Cleveland Co., N. C., with the Union Trust Co. of that place was announced on Feb. 14 by Charles C. Blanton, President of the latter, according to advices from Shelby on that date, appearing in the Raleigh "News & Observer" of the next day. At the same time Mr. Blanton announced that the Union Trust Co. would on Feb. 17 open banking offices in Rutherfordton and Forest City, two Rutherford Co. towns, where local banks closed their doors last week. The enlarged Union Trust Co. has a capital structure of nearly $500,000 and total resources of approximately $2,000,000. In addition to its main office in Shelby, the company had four branches located in Cleveland Co., prior to the opening of the branches in Rutherford Co. mentioned above. In conclusion the dispatch said:

Mr. Blanton, head of the Union Trust, is also President of the First National Bank of Shelby, which has a capital structure of $900,000 and resources of more than five million dollars.

The directors of the Cleveland Bank and Trust Co., which was headed by William Lineberger, were automatically made directors of the Union Trust Co. by the consolidation of the two institutions. The merger of the two banks and the spreading out of the consolidated bank make of Shelby the strongest banking center in this section of the two Carolinas.

Advices from Richmond, Va., on Feb. 15 to the "Wall Street Journal" reported that a consolidation of the First National Bank of Hickory, N. C., and the Consolidated Trust Co. of that place, has been agreed upon by the respective directors of the institutions, subject to the approval of the shareholders and banking authorities. Union of the banks would bring together resources totaling $4,000,000, the dispatch said.

With reference to a proposed merger of the Central Savings Bank & Trust Co. of Covington, Ky., with the People's-Liberty Bank & Trust Co. of that City, the possibility of which was indicated in our issue of Jan. 11, page 240, the Cincinnati "Enquirer" of Feb. 12 stated that the previous day James B. Brown, President of the BancoKentucky Co. and the National Bank of Kentucky, Louisville, and John H. Schulte, President of the Central Savings Bank & Trust Co., Covington, were added to the Board of Directors of the People's-Liberty Bank & Trust Co., and that L. B. Wilson (formerly a Vice-President) was appointed President of the institution. Other officers were chosen as follows: George E. Engel, T. S. Hamilton and Polk Laffoon, Vice-Presidents; Frank R. Evans, Cashier; Joseph N. Cuni, Trust Officer, and Clifford Homan, Auditor. The paper mentioned furthermore said: "With consummation of the proposed merger of the Central Savings Bank & Trust Co. and the Peoples-Liberty, the institution will have resources exceeding $12,000,000." As noted in our previous item, Mr. Brown and Mr. Wilson together own the controlling interest in the People's-Liberty Bank & Trust Co., Mr. Brown on Jan. 3 having purchased the stock of the institution owned by United States Senator Richard P. Ernst, who was Chairman of the Board and President of the bank. Mr. Brown had also several months previously acquired a large block of the stock of the Central Savings Bank & Trust Co.

Purchase of the Farmers' & Merchants' Bank of Williamston, N. C., on Feb. 13 by the Branch Banking & Trust Co. of Wilson, N. C., was reported in a dispatch from Williamston on that date, appearing in the Raleigh "News & Observer" of Feb. 14. The new bank opened Feb. 13 with the same personnel as heretofore, it is understood, except that Dr. John D. Biggs, who retired as President of the institution. H. D. Bateman is President of the Branch Banking & Trust Co. of Wilson and Simon S. Lawrence, Cashier.

That on Feb. 11 the First National Bank of Montgomery, Ala., had taken over the Fourth National Bank of that city to avert a "serious situation" was reported in advices from Montgomery on that date to the New York "Times." The absorbed bank, it was said, had experienced a mild "run" the previous day, Feb. 10. The dispatch went on to say:

With the announcement of the merger came a disclosure that the affairs of the Fourth National Bank had been under investigation by the Montgomery Clearing House since Friday, and the absorption, made on approval of Eugene R. Black, governor of the Atlanta Federal Reserve Bank, was decided on when no other solution could be found, according to A. M. Baldwin, chairman of the First National's board of directors.

Moving to establish confidence in the banking situation here, Governor Bibb Graves directed that $400,000 of State funds be distributed as deposits among the three banks of the city, the First National, the Alabama National and the Union Bank & Trust Co.

Henry M. Hobbie was president of the Fourth National, which was capitalized at $500,000 and showed in its last statement a surplus of $100,000 and individed profits of $283,000. The First National is capitalized at $1,000,000 and lists its surplus at $775,000. W. C. Bowman is President.

From a press dispatch from Benson, N. C., on Jan. 27, printed in the Raleigh "News & Observer" of the next day, it is learned that the First & Citizens' Bank & Trust Co. of Smithfield, N. C., opened for business in Benson on that day, taking over the deposits of the Citizens' Bank & Trust Co. of Benson, and would, according to a statement by R. P. Holding, Cashier of the Smithfield bank, continue to operate a complete banking business in the former banking house of the Benson institution. The dispatch went on to say that the First & Citizens' Bank & Trust Co. is now operating in Smithfield and Dunn, and the opening for business in Benson is in keeping with the development and progress of the institution. It has combined capital, surplus and undivided profits of more than $265,000 and resources in excess of $1,500,000.

Assets of the Bank of Commerce of Spartanburg, S. C., were on Feb. 17 taken over by the Central National Bank of the same place, under supervision of a representative of the Comptroller of the Currency, according to a dispatch from

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Spartanburg on Feb. 17 to the Jacksonville (Fla.) "State." Under the terms of the merger the dispatch said, the Central National Bank assumes the assets of the Bank of Commerce, and through plans outlined by officials, the transfer of accounts of the depositors in the Bank of Commerce to the Central National Bank progressed in orderly manner during the day, although officials reported that there were some withdrawals.

That the Hargis Bank & Trust Co. of Jackson, Ky., had failed to open for business but that no public announcement of the reason had been made, was reported in advices on Feb. 15 from Richmond, Va., to the "Wall Street Journal." The institution, of which A. H. Hargis is President, has combined capital and surplus of $150,000 and resources of $1,400,000, according to the dispatch.

We are advised that the First National Bank in Palm Beach, Fla., organized two years ago under the auspices of the Central Hanover Bank & Trust Co., and the National City Bank, New York, reports that deposits to date are in excess of $3,500,000. F. A. Shaughnessy, President of the bank and formerly connected with the Central Hanover, stated that business in Palm Beach is good, that there is more activity and that the hotels are doing as much business as last season. Directors of the bank include Lindsay Bradford, Vice-President City Bank Farmers' Trust Co., New York; D. F. Goodell, Vice-President Central Farmers' Trust Co., West Palm Beach; William S. Gray, Jr., Vice-President, Central Hanover Bank & Trust Co., New York; John F. Harris, Harris, Upham & Co., investment bankers, New York; Edward F. Hutton, Chairman General Foods Corp.; John C. King; J. Leonard Replogle; Wiley R. Reynolds, Chairman Reynolds Spring Co.; Howard W. Selby, President Central Farmers' Trust Co.; F. A. Shaughnessy, President of the bank; Edward Shearson, Shearson, Hammill & Co., investment bankers, New York; Charles A. Wight, Vice-President, National City Bank, New York, and J. P. Cochrane.

The closing on Feb. 14 of the Exchange National Bank of Shreveport, La., was reported in the fol'owing dispatch by the United Press from Shreveport on that day, appearing in the New York "Evening World" of the same date:

The Exchange National Bank, with deposits exceeding $3,000,000, failed to open for business to-day. A statement by Minor Merriwether, President, expressed the belief that depositors would be protected and that the bank would reopen following reorganization. The bank was capitalized for $300,000 and had been in operation 10 years.

On Jan. 30 the First National Bank of Whitesboro, Tex., with capital of $50,000, went into voluntary liquidation. The institution was absorbed by the City National Bank of Whitesboro, the latter subsequently changing its title to the Whitesboro National Bank.

The First National Bank of Anaheim, Calif., with capital of $200,000, went into voluntary liquidation on Jan. 16. The institution was taken over by the Bank of America of California, Los Angeles.

Announcement was made on Feb. 13 by H. R. Erkes, Vice-President and Chairman of the Board of Management, Southern Division, of the Bank of Italy National Trust & Savings Association (head office San Francisco) of the promotion of Herman A. Nater, heretofore head of the business extension department of the institution in Southern California to the office of a Vice-President by the general executive committee of the bank. In making according to the Los Angeles "Times" of Feb. 14. In making the announcement Mr. Erkes said:

This deserved promotion which has come to Mr. Nater, is recognition of his executive ability as head of the development program of the Bank of Italy in Southern California. He has just completed 10 years' service with our institution.

A press dispatch from Southgate (Los Angeles Co.) Cal. on Feb. 7, appearing in the Los Angeles "Times" of the following day, reported that C. W. Welter for 11 years engaged in the banking business in Southgate and Walnut Park (Los Angeles Co.) had purchased the controlling interest in the Southgate National Bank from O. E. McCartney, who had been President of the institution for the past two or three years. The latter had resigned the Presidency because of ill health, (but continues as a member of the Board of Directors) and has been succeeded by Mr. Welter. Completing the personnel are Otis Fry, Vice-President; A. F. Ullrich, Cashier, and Jay J. Smith, Assistant Cashier and Escrow Officer. John Hunt, with the Walnut Park National Bank, had also been chosen an Assistant Cashier of the Southgate National Bank, it was said.

The New York Agency of the Standard Bank of South Africa, Ltd., reports the receipt of advices from the London office Feb. 19 stating that Sir Roderick Roy Wilson has been appointed to the seat on the Board of Directors of the Bank rendered vacant by the death of J. F. Finlay.

The net profit of the Swiss Bank Corp. for the year ended Dec. 31 1929 (incl. the carry forward of £28,611 from the previous year), are reported as £724,343 against £644,200 for 1928 (incl. a carry forward of £28,308 from 1927). At the Annual General Meeting to take place on Feb. 28, the Board will recommend the allocation of £20,000 to the Pension Fund and £40,000 to the Reserve Fund for the extension of the Head Office premises in Basle; they further propose to pay a dividend of 8% as for the preceding year, to place £80,000 to the Reserve Fund and to carry forward £40,770. The Reserve Fund, including the amount now carried forward, will thus reach a total of £2,080,000, i.e., 32½% of the paid up share capital of £6,400,000.

THE WEEK ON THE NEW YORK STOCK EXCHANGE.

The New York stock market has been reactionary the present we k. In the early part of the week the general trend of prices was somewhat mixed, though the gains outnumbered the declines. As the week advanced conditions were reversed, and the declines outnumbered the advances. Speculative attention has been directed, largely to the public utilities, though the industrial shares and steel stocks have from time to time displayed moderate activity. Railroad issues have made little or no progress, and copper stocks, oil shares and motors have been without noteworthy movement. The weekly report of the Federal Reserve Bank, made public after the close of business on Thursday, showed an increase of $44,000,000 in broker's loans. Call money renewed at 4½% on Monday and continued unchanged until Friday when the rate dropped to 4%.

The stock market turned emphatically downward on Saturday, the day's decline running from two to six points in a dozen or more of the leading speculative favorites. United States Steel assumed the leadership in the early trading, but soon slipped downward under pressure and closed with a net loss of three points. Railway equipments were bid up in response in response to increasing orders and such stocks as American Rolling Mills, General Railway Signal, Cutler Hammer and American Machine & Foundry, displayed considerable strength and closed from two to three points higher. Eastman Kodak which moved ahead 12 points on Friday lost half of its gain and losses of from two to four or more points were recorded by United States Industrial Alcohol, National Lead, American Tobacco "B", Johns-Manville, Goodyear Rubber, J. I. Case and DuPont. Railroad shares also felt the downward surge.

The market was weak and reactionary during the forenoon on Monday, though it rallied after midsession and closed somewhat higher. The strength of the motor stocks was the outstanding feature of the afternoon trading, the demand centering around General Motors, Chrysler, Hupp, Hudson, Pierce Arrow and Packard, most of which closed at substnatially higher levels. American Tobacco "B" at 241 was five points higher, and National Supply reached a new top for 1930. Oil shares continued weak and a number of new lows for 1930 were recorded before the close. Standard Oil of New Jersey was especially hard hit and dropped more than four points. Copper shares were under pressure and Anaconda dropped to a new low on the current movement, while most of the lesser lights did likewise. Stocks rallied in the closing hour and many of the more popular issues gained ground. Eastman Kodak for instance soared 11 points and gains of from two to eight or more points were scored by Columbia Carbon, National Air Transport, J. I. Case, American Rolling Mills and Simmons. Many standard stocks, however, were in supply and these included United States Steel, General Electric and New York Central. Public utilities were in good demand throughout the day, Consolidated Gas being taken in large blocks and there was considerable buying in Brooklyn Union Gas, Standard Gas & Electric and Col. Gas & Electric.

Stock prices again advanced on Tuesday and many new tops were registered despite the brief set back at the close.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

In the public utilities the strong feature was Amer. Tel. & Tel. which was taken in large blocks and crossed 236 to the highest peak since the break in October. Other utilities in popular favor were Consolidated Gas and Brooklyn Union Gas, both of which reached new high ground for the movement. Western Union Telegraph, Public Service of N. J., and Columbia Gas were also noteworthy for their strength. United States Steel, common surged forward and sold above 189 and Republic Iron and Steel and Gulf States Steel reached new tops in connection with the present merger situation. The most noteworthy of the industrial group were International Harvester which broke into new high ground, Eastman Kodak which has been one oft he strongest features of recent markets, Coca Cola, National Biscuit, Warner Bros. and General Theatre Equipment.

Public utilities were the popular issues on Wednesday and forged steadily upward to higher levels, though the rest of the market was reactionary. In a number of issues there was real weakness and the oil and copper shares were still depressed. Railroad issues were more or less irregular though New Haven made a new top for 1930 and Chesapeake & Ohio moved forward 1½ points to 232½. Early in the session new tops were recorded by such pivotable issues as Western Union, Public Service of New Jersey, North American Co., American Water Works and Amer. Tel. & Tel. Westinghouse Elec. & Mfg. was particularly buoyant and sold up to 182, closing at 179 with a net gain of 1½ points, but General Electric slipped back a point or more.

Stock market prices yielded under heavy selling on Thursday and while several brisk rallies occurred during the session the final figures were sharply lower. United States Steel, for instance was off nearly seven points as it closed at 182, General Electric at 72 was down eight points.Railroad stocks were without noteworthy movement except New York Central which dropped seven points to 171, and oils, motors and coppers continued to sag. The stock market was more or less of a pre-holiday affair on Friday and aside from a brief rally in the railroad group, trading was listless and changes were within narrow limits. Early gains of two to eight or more points were scored on the rebound from Thursday's closing prices but failed to hold and such stocks as United States Steel, American Can, General Electric and other speculative favorites lost most of their gains when the rally flattened out. The railroad shares that closed at higher levels included among others Chicago & North Western 2¼ points to 88½, Atlantic Coast Line two points to 172, New York Central three points to 184, Norfolk & Western 9¾ points to 264¼ and Wabash two points to 56. Copper shares were slightly higher and public utilities displayed some improvement and so did the motor stocks, but the advances were not especially noteworthy. The New York Stock Exchange, the Curb Market and the commodity markets will be closed to-day in observance of Washington's birthday.

THE CURB EXCHANGE.

The Curb Exchange was irregular this week, profit taking at times contributing to check the forward movement. Changes however for the most part have been small. The approaching holiday also has curtailed business materially. Among investment trusts Fourth National Investors sold up from 41⅝ to 49 reacted to 44½ and closed to-day at 46. Third Nat. Investors gained three points to 45 but fell back to 41½ finally. Lehman Corp. dropped from 85⅝ to 82 and ends the week at 83¼. Insull Utility Investment, com. sold down from 69¼ to 66½ and at 66⅞ finally. Goldman Sachs Trading eased off at first from 39⅝ to 38⅜, then advanced to 41⅜ reacting finally to 39¼. Utilities continue prominent. Amer. & Foreign Power warrants weakened at first 70⅛ to 69⅝, sold up to 76¼ and fell back to 70⅛. The close to-day was at 71¼. Amer. Gas & Elec., com. improved at first from 133 to 141⅜, declined to 133½ and ends the week at 136⅞. Commonwealth Edison from 282½ dropped to 275 recovered to 281¾ and sold finally at 278¾. Electric Bond & Share com. lost over six points to 95⅜ and finished to-day at 97. United Light & Power, class A, was heavily traded in up from 38⅜ to 42⅞ the close to-day being at 41. Elsewhere fluctuations mostly have been desultary and of little significance.

A complete record of Curb Exchange transactions for the week will be found on page 1256.

COURSE OF BANK CLEARINGS.

Bank clearings this week will again show a decrease as compared with a year ago. Preliminary figures compiled by us, based upon telegraphic advices from the chief cities of the country, indicate that for the week ended to-day (Saturday, Feb. 22) bank exchanges for all the cities of the United States from which it is possible to obtain weekly returns will fall 21.5% below those for the corresponding week last year. Our preliminary total stands at $9,110,735,016, against $11,595,540,662 for the same week in 1929. Our comparative summary for the week follows:

Clearings—Returns by Telegraph. Week Ended Feb. 22.	1930.	1929.	Per Cent.
New York	$5,507,000,000	$5,855,000,000	—5.9
Chicago	543,849,871	521,901,986	+14.2
Philadelphia	506,000,000	432,000,000	+7.1
Boston	395,000,000	337,000,000	+16.2
Kansas City	116,150,175	92,902,108	+36.0
St. Louis	114,100,000	103,700,000	+10.0
San Francisco	174,906,948	151,155,000	+15.8
Los Angeles	164,170,000	167,618,000	—2.1
Pittsburgh	146,281,124	124,928,891	+17.9
Detroit	158,371,014	162,636,361	—2.7
Cleveland	112,419,696	101,255,360	+11.0
Baltimore	85,260,278	65,302,542	+30.6
New Orleans	53,053,000	48,270,888	+7.9
Thirteen cities, 5 days	$8,076,562,106	$8,163,671,136	—1.1
Other cities, 5 days	1,034,172,910	933,512,985	+10.8
Total all cities, 5 days	$9,110,735,016	$9,097,184,121	+0.1
All cities, 1 day	Holiday	2,498,356,541	0.0
Total all cities for week	$9,110,735,016	$11,595,540,662	—21.5

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them to-day, inasmuch as the week ends to-day (Saturday) and the Saturday figures will not be available until noon to-day. Accordingly, in the above the last day of the week has in all cases had to be estimated.

In the elaborate detailed statements, however, which we present further below, we are able to give final and complete results for the week previous—the week ended Feb. 15. For that week there is a decrease of 23.3%, the aggregate of clearings for the whole country being $9,726,425,966 against $12,671,811,982 in the same week of 1929. Outside of this city the decrease is 14.1%, while the bank clearings at this centre record a loss of 28.0%. We group the cities now

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

according to the Federal Reserve districts in which they are located, and from this it appears that in the New York Reserve District, including this city, there is a decrease of 27.7%, in the Boston Reserve district of 6.5% and in the Philadelphia Reserve district of 3.7%. The Cleveland Reserve district falls 10.0% behind, the Richmond Reserve District 6.6% and the Atlanta Reserve District 29.3%. In the Chicago Reserve District the totals are smaller by 23.4%, in the St. Louis Reserve District by 14.3% and in the Minneapolis Reserve District, by 11.0%. In the Kansas City Reserve District the totals show a shrinkage of 5.0%, in the Dallas Reserve District of 23.1% and in the San Francisco Reserve District of 17.0%.

In the following we furnish a summary by Federal Reserve districts:

Federal Reserve Bank of St. Louis

THE ENGLISH GOLD AND SILVER MARKETS.

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of Feb. 5 1930:

GOLD.

The Bank of England gold reserve against notes amounted to £150,134,547 on the 29th ultimo (as compared with £151,058,475 on the previous Wednesday), and represents a decrease of £3,771,768 since April 29 1925—when an effective gold standard was resumed.

In addition to the £27,000 of South African bar gold, about £307,000 bar gold forming part of a shipment of £2,000,000 from Spain was offered in the open market yesterday. At the price realized, 84s. 10⅞d. per fine ounce, there was a keen demand from Germany, about £1,065,000 being taken for that country. The balance of about £69,000 was divided between the Home and Continental trade (£49,000) and India (£20,000).

£1,000,000 of the gold from Spain was received by the Bank of England yesterday as indicated below. The balance of about £680,000 was dealt with in the open market to-day and was secured for Germany at 84s. 11d. per fine ounce.

Movements of gold as announced by the Bank of England show a net influx of £622,665 during the week under review. Receipts amounted to £1,040,056, which included £1,000,000 in bar gold from Spain and £40,000 sovereigns from Australia. Of the withdrawals, amounting to £417,391, £400,000 was in sovereigns "set aside."

The following were the United Kingdom imports and exports of gold registered from mid-day on the 27th ultimo to mid-day on the 3rd inst.:

Imports—		*Exports*—	
Brazil	£40,800	Germany	£582,770
Uruguay	23,027	France	12,308
British South Africa	479,236	Switzerland	18,800
Australia	40,000	British India	15,752
Other countries	10,295	Other countries	10,861
	£593,358		£640,491

The Southern Rhodesian gold output for the month of December 1929 amounted to 46,829 ounces, as compared with 46,219 ounces for November 1929 and 44,772 ounces for December 1928.

SILVER.

The market has been poorly supported, and, with supplies freely offered, prices have declined sharply, a new low record being established yesterday when quotations reached 19 15-16d. and 19 13-16d. for cash and two months' delivery respectively.

On the reopening of the Shanghai market after the China New Year holidays the exchange showed weakness, nevertheless yesterday and to-day some buying orders have been received from this quarter.

Their demand for silver for shipment being satisfied for the time being the Indian Bazaars have proved disposed to sell, and, with supplies forthcoming from other quarters, demand—being confined mostly to covering operations by bears—has been inadequate to withstand the pressure.

America has continued rather inactive but has made some sales here during the week.

The following were the United Kingdom imports and exports of silver registered from mid-day on the 27th ultimo to mid-day on the 3rd inst.:

Imports—		*Exports*—	
France	£53,618	British India	£357,782
United States	120,541	Other countries	10,040
Mexico	58,396		
Canada	30,691		
Other countries	246		
	£263,492		£367,822

aa Commercial Investment Trust conv. pref. dividend payable in com. stock at rate of 1-52nd share common unless company is notified on or before March 17 of shareholders' desire to take cash—$1.50 per share.

bb Unless advised on or before close of business March 18 by stockholders of his desire to take cash Peoples Light & Power dividend will be paid in class A com. stock at rate of 1-50th share for each share held.

Weekly Return of New York City Clearing House.—Beginning with Mar. 31 1928, the New York City Clearing House Association discontinued giving out all statements previously issued and now makes only the barest kind of a report. The new returns show nothing but the deposits, along with the capital and surplus. We give it below in full:

Philadelphia Banks.—The Philadelphia Clearing House return for the week ending Feb. 15, with comparative figures for the two weeks preceding, is given below. Reserve requirements for members of the Federal Reserve System are 10% on demand deposits and 3% on time deposits, all to be kept with the Federal Reserve Bank. "Cash in vaults" is not a part of legal reserve. For trust companies not members of the Federal Reserve System the reserve required is 10% on demand deposits and includes "Reserve with legal depositaries" and "Cash in vaults."

Beginning with the return for the week ending May 14 1928, *the Philadelphia Clearing House Association discontinued showing the reserves and whether reserves held are above or below requirements.* This will account for the queries at the end of the table.

Two Ciphers (00) omitted.	Week Ended Feb. 15 1930.			Feb. 8. 1930.	Feb. 1 1930.

Federal Reserve Bank of St. Louis

Weekly Return of the Federal Reserve Board.

The following is the return issued by the Federal Reserve Board Thursday afternoon, Feb. 20, and showing the condition of the twelve Reserve banks at the close of business on Wednesday. In the first table we present the results for the system as a whole in comparison with the figures for the seven preceding weeks and with those of the corresponding week last year. The second table shows the resources and liabilities separately for each of the twelve banks. The Federal Reserve Agents' Accounts (third table following) gives details regarding transactions in Federal Reserve notes between the Comptroller and Reserve Agents and between the latter and Federal Reserve banks. *The Reserve Board's Comment upon the returns for the latest week appears on page* 1197, *being the first item in our department of "Current Events and Discussions."*

NOTE.—Beginning with the statement of Oct. 7 1925, two new items were added in order to show separately the amount of balances held abroad and amounts due to foreign correspondents. In addition, the caption, "All other earning assets," previously made up of Foreign Intermediate Credit Bank debentures, was changed to "Other securities," and the caption, "Total earning assets" to "Total bills and securities." The latter item was adopted as a more accurate description of the total of the discounts, acceptances and securities acquired under the provision of Sections 13 and 14 of the Federal Reserve Act, which, it was stated, are the only items included therein.

WEEKLY STATEMENT OF RESOURCES AND LIABILITIES OF EACH OF THE 12 FEDERAL RESERVE BANKS AT CLOSE OF BUSINESS FEB. 19 1930.

Weekly Return for the Member Banks of the Federal Reserve System.

Following is the weekly statement issued by the Federal Reserve Board, giving the principal items of the resources and liabilities of the member banks in 101 cities from which weekly returns are obtained. These figures are always a week behind those for the Reserve banks themselves. Definitions of the different items in the statement were given in the statement of Dec. 12 1917, published in the "Chronicle" of Dec. 29 1917, page 3475. *The comment of the Reserve Board upon the figures for the latest week appears in our department of "Current Events and Discussions," on page* 1198, immediately preceding which we also give the figures of New York and Chicago reporting member banks *for a week later.*

Beginning with the statement of Jan. 9 1929, the loan figures exclude "Acceptances of other banks and bills of exchange or drafts sold with endorsement, and include all real estate mortgages and mortgage loans held by the bank. Previously acceptances of other banks and bills sold with endorsement were included with loans, and some of the banks included mortgages in investments. Loans secured by U. S. Government obligations are no longer shown separately, only the total of loans on securities being given. Furthermore, borrowing at the Federal Reserve are not any more subdivided to show the amount secured by U. S. obligations and those secured by commercial paper, only a lump total being given. The number of report in banks is now omitted, in its place the number of cities included has been substituted. The figures have also been revised to exclude a bank to the San Francisco district with loans and investments of $135,000,000 on Jan.2 which recently merged with a non-member bank. The figures are now given in round millions instead of in thousands.

PRINCIPAL RESOURCES AND LIABILITIES OF ALL REPORTING MEMBER BANKS IN EACH FEDERAL RESERVE DISTRICT AS AT CLOSE OF BUSINESS FEB. 11-12 1930 (In millions of dollars).

Contingent liability on bills purchased for foreign correspondence	171,440,000	171,029,000	94,791,000

NOTE.—Beginning with the statement of Oct. 7 1925, two new items were added in order to show separately the amount of balances held abroad and amounts due to foreign correspondents. In addition, the caption "All other earning assets," previously made up of Federal Intermediate Credit bank debentures, was changed to "Other securities," and the caption "Total earning assets" to "Total bills and securities." The latter term was adopted as a more accurate description of the total of the discount acceptances and securities acquired under the provisions of Sections 13 and 14 of the Federal Reserve Act, which, it was stated, are the only items included therein.

New York Curb Exchange—Weekly and Yearly Record

In the following extensive list we furnish a complete record of the transactions on the New York Curb Exchange for the week beginning on Saturday last (Feb. 15 1930) and ending the present Friday (Feb. 21 1930). It is compiled entirely from the daily reports of the Curb Exchange itself and is intended to include every security, whether stock or bonds, in which any dealings occurred during the week covered.

Week Ended Feb. 21. Stocks— Par.	Friday Last Sale Price.	Week's Range of Prices. Low.	High.	Sales for Week. Shares.	Range Since Jan. 1. Low.		High.

Latest Gross Earnings by Weeks.—In the table which follows we sum up separately the earnings for the second week of February. The table covers seven roads and shows 13.03% decrease under the same week last year:

Second Week of February.	1930.	1929.	Increase.	Decrease.
Canadian National	$4,140,981	$4,873,408	------	$732,427
Canadian Pacific	2,898,000	3,426,000	------	528,000
Minneapolis & St Louis	267,495	320,493	------	52,998
Mobile & Ohio	302,218	343,150	------	40,932
Southern Railway	3,339,747	3,700,897	------	361,150
St Louis Southwestern	437,300	488,524	------	51,224
Western Maryland	368,922	366,303	$2,619	------
Total (7 roads)	$11,754,663	$13,518,775	$2,619	$1,466,731
Net decrease (13.03%)			------	$1,464,012

In the table which follows we also complete our summary of the earnings for the first week of February:

First Week of February.	1930.	1929.	Increase.	Decrease.
Previously reported (5 roads)	$7,863,685	$8,825,790	$446	$992,551
Georgia & Florida	22,300	26,200	------	3,900
Mobile & Ohio	269,597	318,151	------	48,554
Southern Railway	3,287,484	3,731,668	------	444,184
Total (8 roads)	$11,443,076	$12,901,809	$446	$1,489,189
Net decrease (11.32%)			------	$1,488,743

In the following table we show the weekly earnings for a number of weeks past:

Week.	Current Year.	Previous Year.	Increase or Decrease.	Per Cent.
	$	$	$	
1st week Nov. (7 roads)	10,016,635	11,582,851	—1,576,216	12.53
2d week Nov. (8 roads)	13,321,885	17,436,765	—4,114,880	23.18
3rd week Nov. (7 roads)	9,461,558	11,553,954	—2,082,396	18.11
4th week Nov. (7 roads)	16,167,720	21,192,292	—5,024,572	23.72
1st week Dec. (6 roads)	12,513,496	15,718,973	—3,205,478	20.40
2nd week Dec. (8 roads)	12,570,553	15,524,333	—2,953,780	19.03
3d week Dec. (7 roads)	9,444,380	10,803,703	—1,360,323	12.59
4th week Dec. (6 roads)	10,087,804	11,840,065	—1,752,261	14.80
1st week Jan. (7 roads)	6,803,011	7,657,759	—854,748	11.17
2d week Jan. (8 roads)	10,755,827	12,059,865	—1,303,018	10.81
3d week Jan. (8 roads)	11,532,884	12,989,338	—1,456,454	11.21
4th week Jan. (7 roads)	16,464,287	19,001,026	—2,536,739	13.37
1st week Feb. (8 roads)	11,443,076	12,901,809	—1,488,743	11.32
2d week Feb (7 roads)	11,754,663	13,518,775	—1,466,731	13.03

We also give the following comparisons of the monthly totals of railroad earnings, both gross and net (the net before the deduction of taxes), both being very comprehensive. They include all the Class 1 roads in the country.

Month.	Gross Earnings.			Length of Road.	
	1929.	1928.	Inc. (+) or Dec. (—).	1929.	1928.
	$	$	$	Miles.	Miles.

The Baldwin Locomotive Works.

(*19th Annual Report—Year Ended Dec. 31 1929.*)

President S. M. Vauclain says in substance:

The consolidated statements for 1929 include the locomotive business and that of company's wholly owned subsidiaries, Standard Steel Works Co. and Southwark Foundry & Machine Co., also that of the Midvale Co. of which the company owns 106,222 shares of the capital stock out of 200,000 shares outstanding.

The results of operations for the year just ended were satisfactory in all lines of business except locomotives, in which they were substantially more favorable than for the previous year. The volume of business on hand at the beginning of 1930 is greater than for some years past.

During the past year the 200,000 shares of $100 par value common stock previously outstanding were exchanged for 800,000 shares of common stock (no par). An additional 43,000 shares of this new common stock were issued in exchange for all of the preferred and common stock of Southwark Foundry & Machine Co., engaged in the production of heavy and special machinery and equipment. This company has been located for many years at Fourth St. and Washington Ave., Philadelphia. Plans have been completed for the removal of all of its activities to space available in the Eddystone plant, where it will continue to be operated as a separate business. It is expected that these removal activities will be completed during 1930. The present site of the Southwark plant is now being offered for sale.

Subsequent to the acquisition of Southwark Foundry & Machine Co., the Baldwin-Southwark Corp. was organized. The holdings of the company in Southwark Foundry & Machine Co. were exchanged for 53,750 shares of the capital stock of Baldwin-Southwark Corp. which is all of the issued and outstanding stock of this company. Southwark operations will be carried on in the name of Baldwin-Southwark Corp. as soon as they are removed to Eddystone.

The company also acquired during the year just closed 110,000 shares of the common stock of General Steel Castings Corp., which later acquired the plant and business of the Commonwealth Steel Co. at Granite City, Ill., and is now erecting a large steel foundry adjacent to the locomotive plant at Eddystone. General Steel Castings Corp. is engaging in the production of steel castings for locomotives and cars and will provide the company with an adequate source of supply for its steel castings requirements in the future.

Early in the past year company acquired, for the sum of $537,500, 3,500 shares, or all of the class "A" pref. stock and 22,500 shares, or 45% of the com. stock, of the George D. Whitcomb Co. engaged in the production of industrial locomotives. The plant of this company is located at Rochelle, Ill.

Settlement has been effected with the Treasury Department of all Federal tax questions through the year 1927. These matters have been under discussion with the Federal tax authorities for some years and the settlement effected resulted in a payment to the company by the Treasury Department of $2,129,007.

The completion of the plant at Eddystone, and the acquisition of company's holdings in the capital stock of General Steel Castings Corp. have somewhat depleted its working capital. In order to replace this working capital, authority is being asked of the stockholders to incur indebtedness to a maximum of $15,000,000, in addition to the outstanding funded debt.

Continental Can Co., Inc. (of New York).

(*17th Annual Report—Year Ended Dec. 31 1929.*)

Carle C. Conway, President, Feb. 13, said in part:

At Dec. 31 1929 1,725,045 shares of common stock were outstanding, compared with 1,459,991 shares at the end of 1928. Of the common shares issued during the year 205,217 shares were issued for cash to stockholders and employees on subscription and the balance in connection with properties acquired.

There are no notes payable, excepting a purchase money mortgage, amounting to $100,000. Inventories have been priced at cost or market, whichever is lower.

During the year new factories were constructed at Los Angeles and Oakland, Calif., and additions were made to six of company's other plants. Expenditures for these and other plant improvements amounted to $6,993,980.

The facilities of the company were further extended through the acquisition during the year of six can manufacturing companies, one manufacturer of corrugated shipping containers and one manufacturer of can-making machinery.

Although the production of principal canning crops in 1929 was materially greater than in 1928, there is no evidence of overproduction in the industry, nor is there any curtailment in demand for cans from this source. The company's output of general line cans is showing a constantly increasing trend.

On Jan. 15 1930 the outstanding preferred stock was redeemed at $125 per share and div., leaving only the common shares outstanding.

Childs Company, New York.

(Annual Report—Year Ended Dec. 31 1929.)

S. Willard Smith, Vice-President, says in substance:

Results.—The net profit after depreciation was in excess of that of the previous year by $274,713. If from the 1928 income there be excluded the non-recurring profit on the sale of the securities of Savoy-Plaza Corp., which sale had no counterpart during 1929, the increase of the 1929 net profits over those of 1928 amounts to $1,331,768 .

Management.—The board of directors elected on March 7 1929, have gone vigorously at the task of rehabilitating the earning power of the company. No revolutionary changes in staff personnel have been made. The capable, experienced men who, through many years of loyal and effective work, have built up the company have been urged to continue their work along those lines which have proved successful. During each of the nine months of 1929 after your last meeting, the company's sales were in excess of the sales for the comparable month of the preceding year. The gain varied from 1.6% to 12.6%, but it was persistent. The fact of continued gain clearly indicates a revived interest in our establishments by the consuming public, because there has been no increase in the number of operating units.

The corporation brought suit for the recovery of the amount expended between Jan. 30 and March 7 1929, by the then officers of the corporation for the purpose of controlling the stockholders' meeting held on the latter date. A proposal to settle the suit by compromise was made to the directors in Jan. 1930, and was accepted as being in the best interest of the company.

Operating Units.—At Dec. 31 1929, there were 114 restaurants in operation. This was a net decrease of one restaurant as compared with the number of units in operation at the beginning of the year. Two new units were opened in N. Y. City, and the restaurant on Euclid Ave., Cleveland, was reopened. Four restaurants were discontinued, one because of lease expiration, and three because the operations were not profitable.

Two important leases that were negotiated during the year should be mentioned in this report. One was of premises in the Savoy Plaza Annex on 59th St., near Fifth Ave., New York. A restaurant named "Spanish Garden" was opened at this location in November, and has since been in successful operation.

The other lease referred to was of premises at 423 Lexington Ave., near the easterly entrances to the Grand Central Terminal. The restaurant is now being equipped and it will be opened in the near future.

Capital Stock.—The only change in the capital stock outstanding was the issuance of 274 shares of common stock in exchange for an equal amount of fractional scrip retired.

Funded Debt.—Funded debt was reduced by $345,000 during the year.

Surplus Adjustments.—During the year, the computation of the charge against income for depreciation of the buildings, establishments, plants and equipment was revised. Consideration was given to the special facts relative to each location. In connection with this revision of the current depreciation charges, it was decided to charge off to surplus account all the unamortized costs of establishments that had been closed prior to the current fiscal year. Also, the reserves for taxes were adjusted so as to state the tax liability in an amount equal to the total of the maximum assessments proposed by the taxing authorities. The result of all these adjustments was a net debit to surplus account as of Dec. 31 1928, of $194,585.

American Equities Co.

(Annual Report—Year Ended Dec. 31 1929.)

Burton A. Howe, President, says in part:

The item shown in the balance sheet under the caption of "short term loans and securities sold or under contract for sale" represents short term loans to independent companies and investments in securities of such companies sold or under contract for sale.

"Marketable securities" as set forth in the balance sheet are at cost. The market value of these same securities as of Dec. 31 1929 was approximately $3,096,443 and these same securities as of Jan. 15 1930 had a market value of approximately $3,199,142.

The securities of the companies contained in the list (below) were purchased after careful analysis had been made as to the earnings and the financial position of the companies and in the opinion of your board represent a satisfactory investment for a portion of the company's funds.

"Investments in corporations in the formulation of whose policies this company participates" include ownership of the voting common stock of the companies below named in the percentages set forth: General Water Works and Electric Corp., 100%; Union Power Corp., 47%; Southern Cities Utilities Co., 29%, and Intercontinents Power Co., 27%.

Among the items carried as "syndicate participations and miscellaneous investments" are certain investments which could not otherwise be classified and participations in transactions that cannot be disclosed at this time without possibly embarrassing negotiations which are being conducted.

By reason of the recent market conditions, the company has been afforded the unusual opportunity of being able to purchase its common stock at prices materially lower than the book value of the stock. It is the present thought of the directors that this stock can either be sold through the company's bankers at a profit to the company, or cancelled.

It is proposed to continue the company's policy of keeping its funds principally employed in the investment in securities of corporations in the formulation of whose policies and in the direction of whose affairs the company participates, and from time to time, when favorable opportunities occur, the company proposes to acquire substantial interests in other and additional corporations. In addition to furthering the development of such corporations, company will continue to employ its surplus funds on a temporary basis as it has in the past.

The earnings statement for the period from Aug. 21 to Dec. 31 1929 was published in V. 130, p. 624.

BALANCE SHEET DEC. 31 1929.

Continental Shares, Inc.

(Annual Report—Year Ended Dec. 31 1929.)

President W. R. Burwell states in part:

The past year was one of further expansion for company. It added $26,322,900 to its preferred stock capital and $45,876,115 to its common stock and surplus, thus increasing the amount of its capital and surplus from $29,770,334 at the close of 1928 to $101,969,349 on Dec. 31 1929.

While corporation places some of its funds in stocks purely for investment, its chief purpose is to acquire substantial holdings, either alone or in co-operation with other important interests, in prominent companies in such basic industries as steel, rubber and public utilities. These larger investments are held with a view to promoting the interests of the companies

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

concerned through co-operation in their financial and industrial activities. The list of its holdings does not present at first glance the full picture of the company's influence in many situations. It is for example, the possessor of the stocks of certain companies which have important affiliations on account of their own security holdings. One of these companies is the Cliffs Corp. in which Continental Shares has a large interest. The Cliffs Corp. owns very substantial amounts of the stocks of Republic Iron & Steel Co., Inland Steel Co., Youngstown Sheet & Tube Co., Central Alloy Steel Corp. and Wheeling Steel Corp., and except for a few shares it owns all the outstanding common stock of the Cleveland Cliffs Iron Co. The latter includes among its properties the largest body of iron ore in the Lake Superior region next to that of the United States Steel Corp. The Cleveland Cliffs Iron Co. also has important investments in steel stocks including among others a substantial interest in the Otis Steel Co.

Goodyear Shares, Inc., another company with important relationships in which Continental Shares owns 277 of a total of 1,000 shares, has 285,105 shares of Goodyear Tire & Rubber Co. Continental Shares, Inc., is also the largest stockholder in the Lehigh Coal & Navigation Co., which has important public utility relationships and a controlling interest in several key railroads.

As an example of one phase of the company's activities there was announced, at the end of the year, the completion of negotiations for a merger of independent steel interests. Company has been a large holder of steel stocks since it was incorporated and has taken a leading part in the various steps which have preceded the successful termination of these negotiations.

The companies proposed to be joined together in the new steel combination are Republic Iron & Steel Co., Central Alloy Steel Corp., Donner Steel Co., Witherow Steel Co., Interstate Iron & Steel Co., Union Drawn Steel Co., the Bourne Fuller Co., and Trumbull Cliffs Co. These producing units have an aggregate steel ingot capacity of 4,735,000 tons annually, total assets of approximately $335,000,000 and combined sales of $250,000,000, and they will comprise the third largest steel company in the United States.

Shenandoah Corporation.

(Annual Report—Period Ended Dec. 31 1929.)

President C. F. Stone reports in substance:

The total cash income for the approximately five-month period of operations amounted to $3,273,783, consisting of $598,583 dividends and interest and $2,675,200 net profits realized on sale of securities. After deducting interest and expenses, the net cash income amounted to $2,923,407. This does not include income from stock dividends in the amount of $2,314,260, being the aggregate market value thereof following the dividend record dates; nor does it include net cash income of Blue Ridge Corp. (see that company) applicable to its common stock owned by your corporation, which, in the approximately 4½ months of operations of that company, amounted to $1,129,587.

Net assets, based on Dec. 31 1929 market prices, less reserves, as noted in the balance sheet, were $98,272,123, represented by 850,120 shares ($50 par) preference stock and 5,891,087 shares (no par) common stock. Assets initially acquired upon organization amounted to $102,500,000, represented by 1,000,000 shares of preference stock and 5,000,000 shares of common stock. In other words, the value of assets behind each share of $50 preference stock increased from $102.50 at organization to $115.60 at Dec. 31 1929. The value of assets applicable to common stock outstanding Dec. 31 1929 was $1.03 less per share than at organization.

Your corporation was organized July 23 1929 in Delaware under the sponsorship of the Goldman Sachs Trading Corp. and Central States Electric Corp.

In connection with the financing of its participation in the organization of Blue Ridge Corp. in August 1929, the outstanding capital stock was increased from the original issue of 1,000,000 shares of preference stock ($50 par) and 5,000,000 shares of common stock (no par) by the issue of an additional 750,000 shares of each class. Subsequently, 899,780 shares of preference stock were acquired by the corporation at favorable prices and retired, reducing the preference stock now outstanding to 850,120 shares. Common stock was further increased to 5,891,087 shares now outstanding by the issue of 150 shares upon conversion of peference stock and 140,937 shares as dividends on preference stock and common stock.

On Dec. 31 1929 the stock records showed 11,429 holders of preference stock and 12,457 holders of common stock.

As of Nov 30 1929 a reserve of $37,166,730 was created by appropriation from capital surplus and applied to reduce to then market prices the book value of investments, other than capital investments in controlled and affiliated companies and syndicate participations not then terminated. On the other hand, the acquisition and retirement by your corporation of the preference stock mentioned above and the acquisition of certain other securities upon terms representing, in effect, a substantial contribution to capital, resulted in an important addition to net assets. The aggregate market value of such other securities acquired plus the total par value of preference stock retired, exceeded the combined cost thereof by $31,005,059. This capital gain has offset to that extent the appropriation from capital surplus mentioned above.

No application of capital surplus was made to write down holdings in controlled and affiliated companies below cost, inasmuch as your directors believe that the market prices of these holdings did not adequately measure their real value to your corporation. The largest of these holdings, Blue Ridge Corp. common stock, measured merely by market prices of its underlying assets, had a value at Dec. 31 1929 of about 8% below cost to corporation, whereas such value is now above cost as a result of the advance in market prices since the close of last year.

In any case where the corporation has a substantial interest in common stock of an affiliated company which in turn has a substantial interest in the common stock of this cotporation, your directors consider it prudent and conservative to value the common stock of such affiliated company below market by the amount of a reserve estimated to adjust the effect of such cross-holding of stock. This reserve will be revised periodically in accordance with a definite fromula adopted to accomplish such adjustment.

In the valuation of net assets of the corporation, wherever mentioned in this report, reserves for cross-holdings accordingly have been deducted from market values; also, holdings of stock in Blue Ridge Corp. have been taken on the basis of market prices of its underlying assets, after deduction of similar cross-holding reserves.

On Dec. 31 1929 the corporation had investments in common stocks of the following companies:

Bethlehem Steel Corp.	The Goldman Sachs Trading Corp.
Blue Ridge Corp.	Kraft-Phenix Cheese Corp.
Central States Electric Corp.	The May Department Stores Co.
Commercial Investment Trust Corp.	The North American Co.
Consolidated Gas, Electric Light & Power Co. of Baltimore	Pacific Gas & Electric Co.
Electric Bond & Share Co.	Pacific Lighting Corp.
	Southern California Edison Co

and in preference stock of Blue Ridge Corp.

Corporation controls through its own holdings and through Blue Ridge Corp. blocks of common stocks and other securities sufficiently varied in number to give broad investment diversification, and large enough to enable your corporation to benefit liberally from the future growth and development of a number of our leading utility and industrial companies.

STATEMENT OF INCOME FROM JULY 23 1929 TO DEC. 31 1929.

Income—Cash dividends	$548,874
Interest	49,709
Profit realized on sale of securities (net)	2,675,200
Stock dividends	See a
Total cash income	$3,273,783
Interest paid	164,006
Expense	186,371
Net cash income for the period	$2,923,407
Dividends—On optional 6% convertible preference stock, paid in common stock	b$737,145
Less—Cash received from subscribers in respect of accrued (cash) dividends on preference stock	262,500
	$474,645
Dividends on common stock, 1½% paid in common stock—b	1,162,680
Balance, Dec. 31 1929	$1,286,081

a Reserve for investments has been provided out of capital surplus, except to the extent of periodic stock dividends received which were applied, as of Dec. 31 1929, in reduction of book value of investments. Such stock dividends previously had been taken into income at $2,314,260, the aggregate market value thereof immediately after the respective dividend record dates.

b Amounts equal to capital and capital surplus per share of common stock thus issued, aggregating $13.48 per share, have been transferred to capital and capital surplus, respectively.

STATEMENT OF CAPITAL SURPLUS DEC. 31 1929.

Value of consideration received for capital stock issued in exess of amount capitalized with respect thereto	$49,001,981
Amount transferred from operating surplus upon issuance of common stock as dividends	1,195,142
Total	$50,197,123
Deduct—Reserve applied as of Nov. 30 1929 in reduction of book value of investments, other than capital investments in controlled and affiliated companies and syndicate participations, to market prices as of that date	37,166,730
Less—Net credit arising from acquisition of 899,780 shares of preference stock of the corporation, retired prior to Dec. 31 1929, and of other securities	31,005,060
Net deduction	$6,161,671
Balance, Dec. 31 1929, per balance sheet	$44,035,453

BALANCE SHEET DEC. 31 1929.

Assets—		*Liabilities*—	
Capital investments in controlled & affil. cos. at cost	$87,500,000	Loans payable	$6,000,000
Other investments at cost, less reserve	29,414,642	Acc'ts pay. for securs. purch.	55,139
Syndicate participa., at cost	4,971,675	Res've for accrued expenses	63,242
Acc'ts rec. for securs. sold	107,203	Preference stock	42,506,000
Divs. rec. & interest accrued	141,944	Common stock	x29,459,683
Cash	1,270,135	Capital surplus	44,035,453
		Operating surplus	1,286,081
Total	$123,405,599	Total	$123,405,599

Note.—At closing market prices on Dec. 31 1929, less reserve estimated to adjust cross-holdings of stock, the aggregate value of the capital investments, taking the common stock of Blue Ridge Corp. on the basis of the market value of its underlying assets, less similar reserve, was $67,691,143; and the value of other investments and syndicate participations was $35,180,080, a total of $102,871,223.

x Authorized 15,000,000 shs. (no par value); issued, 5,891,086; reserved for (*a*) conversion of preference stock, 1,275,180 shs., and (*b*) dividends on preference stock, 945,315 shs.—V. 130, p. 303.

Blue Ridge Corporation.

(Annual Report—Period Ended Dec. 31 1929.)

President C. F. Stone states in substance:

The total cash income of the corporation for the approximately 4½-month period of operations amounted to $2,650,364, consisting of $2,150,994 dividends and interest and $499,370 net profits realized on sale of securities. After deducting expenses, the net cash income was $2,420,245. This does not include income from stock dividends in the amount of $1,872,897, being the aggregate market value thereof following the dividend record dates.

The cash income of the corporation from assets now owned, based on current interest and dividend rates and interest of 4% on cash balances and after allowing for estimated expenses and taxes, is 1.6 times the cash dividend requirement of the outstanding preference stock. Such cash income does not include any income from stock dividends or profits on sale of securities.

Net assets, based on Dec. 31 1929 market prices, less reserves, were $128,523,798, represented by 1,154,101 shares of $50 par value preference stock and 7,483,694 shares of no par value common stock. The value of assets behind each share of $50 preference stock at Dec. 31 1929 thus amounted to $111.36 per share, as compared to $117.09 per share based on total capital paid in for stock. The value of assets applicable to common stock outstanding Dec. 31 1929 was $1.56 less per share than the average amount paid in therefor.

Federal Reserve Bank of St. Louis

Corporation was organized Aug. 12 1929 in Delaware at the instance of Shenandoah Corp. (see that company), which initially acquired for cash 6,250,000 shares, or more than 80% of the total common stock. Shenandoah Corp. has not only retained its original holding intact, but has added to it.

Upon organization 1,000,000 shares of preference stock ($50 par) and 7,250,000 shares of common stock (no par) were issued. Subsequently additional preference stock and common stock, 228,301 shares of each class, were issued in exchange for miscellaneous securities as contemplated by the plan of organization, and 5,393 additional shares of common stock were issued as dividends on preference stock. Later the corporation acquired at favorable prices and retired 74,200 shares of preference stock, leaving 1,154,101 shares of preference stock and 7,483,694 shares of common stock now outstanding.

On Dec. 31 1929 the stock records showed 14,131 holders of preference stock and 18,554 holders of common stock.

As of Nov. 30 1929, a reserve of $35,762,863 was created by appropriation from capital surplus and applied to reduce to then market prices the book value of investments other than syndicate participations not then terminated. On the other hand, the acquisition and retirement of the preference stock mentioned above and the acquisition of a large block of common stock of Central States Electric Corp. upon terms representing, in effect, a substantial contribution to capital, resulted in an important addition to net assets. The aggregate market value (less reserve for cross-holdings) of such stock of Central States Electric Corp. plus the total par value of preference stock retired, exceeded the combined cost thereof by $25,422,541. This capital gain has offset to that extent the appropriation from capital surplus mentioned above.

In any case where the corporation has a substantial interest in common stock of an affiliated company, which in turn has a substantial interest in the common stock of this corporation, your directors consider it prudent and conservative to value the common stock of such affiliated company below market by the amount of a reserve estimated to adjust the effect of such cross-holding of stock. This reserve will be revised periodically in accordance with a definite formula adopted to accomplish such adjustment. In the valuation of net assets of the corporation, wherever mentioned in this report, reserves for cross-holdings accordingly have been deducted from market values.

On Dec. 31 1929 after the retirement of preference stock mentioned above, corporation had net assets, based on closing market prices on that date, of $128,523,798, which included $10,316,590 in cash and call loans, $11,583,000 in bonds, $18,501,600 in pref. stocks and $87,359,535 in common stocks. Corporation has neither bank loans nor funded debt.

STATEMENT OF INCOME FROM AUG. 12 1929 TO DEC. 31 1929.

Income—Cash dividends	$1,446,858
Interest	704,136
Profit realized on sale of securities (net)	499,370
Stock dividends	See a
Total cash income	$2,650,365
Expenses	230,119
Net cash income for the period	$2,420,246
Dividends on optional 6% convertible preference stock—	
Paid in cash	$791,793
Paid in common stock	b50,479
Total	$842,272
Less—Cash received from subscribers in respect of accrued (cash) dividends on preference stock	40,417
Balance Dec. 31 1929, per balance sheet	$1,618,391

a Reserve for investments has been provided out of capital surplus, except to the extent of periodic stock dividends received, which were applied, as of Dec. 31 1929, in reduction of book value of investments. Such stock dividends previously had been taken into income at $1,872,897, the aggregate market value thereof immediately after the respective dividend record dates. b Amounts equal to capital and capital surplus per share of common stock thus issued, aggregating $9.36 per share, have been transferred to capital and capital surplus, respectively.

STATEMENT OF CAPITAL SURPLUS DEC. 31 1929.

Value of consideration received for capital stock issued in excess of amount capitalized with respect thereto	$44,955,019
Amount transferred from operating surplus upon issuance of common stock as dividend	23,514
Balance	$44,978,533
Deduct—Reserve applied as of Nov. 30 1929 in reduction of book value of investments, other than syndicate participations, to market prices as of that date	35,762,863
Less—Net credit arising from acquisition of 74,200 shares of preference stock of the corporation retired prior to Dec. 31 1929 and of other securities	25,422,541
Net deduction	$10,340,322
Balance Dec. 31 1929, per balance sheet	$34,638,211

BALANCE SHEET DEC. 31 1929.

Assets—		*Liabilities*—	
Investments at cost, less res.	$116,748,338	Accts. payable for sec. purch.	$309,380
Syndicate particip., at cost	3,552,120	Reserve for accrued expenses	58,040
Dividends receivable and interest accrued	1,130,493	Preference stock	57,705,050
Call loans	5,100,000	Common stock	x37,418,470
Cash	5,216,590	Capital surplus	34,638,211
		Operating surplus	1,618,391
Total	$131,747,541	Total	$131,747,541

x Authorized, 30,000,000 shares (no par); issued, 7,483,694; reserved for (a) conversion of preference stock, 1,731,151 shares, (b) dividends on preference stock, 1,148,708 shares and (c) exercise of warrants (to purchase at any time shares of common stock at $20 per share) issuable as of Jan. 1 1930 to Shenandoah Corp., 228,301 shares.

Note.—The aggregate value of investments and syndicate participations on the basis of closing market prices on Dec. 31 1929, less reserve estimated to adjust cross-holdings of stock, was $117,444,135.

Companies in Which Common Stock Investments Were Held Dec. 31 1929.

Union Oil Company of Califonria.

(Annual Report—Year Ended Dec. 31, 1929)

W. L. Stewart, President, and G. H. Forster. Comptroller, in their remarks to stockholders state in substance:

Results.—The profits from operations for 1929 show an increase over 1928 due largely to the increased production of light gravity refining crude from the Santa Fe Springs Field and increased gasoline business.

The charges to income for labor and incidental costs of new drilling were about $2,450,000 more than for the year 1928, occasioned by increased drilling in the Santa Fe Springs area, necessitated by these requirements and the protection of the company's properties from drainage by adjoining wells.

During the year a final settlement of Federal income taxes to Dec. 31 1924, was reached with the U. S. Government. The reserve provided out of former years' profits, together with $300,000 charged against current income, is now in excess of probable requirements for Federal income taxes for the years 1925 to 1929 inclusive.

The disbursements for State, county and city taxes amounted to $1,668,340 and in addition $6,124,286 was paid to the States and Provinces in which the company operates, for gasoline sales taxes. The company's contribution to the Employees' Provident Fund amounted to $419,734 for 1929, as compared with $473,603 for the previous year.

Production, subject to royalties, of crude oil and natural gasoline in 1929 was 22,602,487 barrels as compared with 13,735,843 barrels in 1928, an increase of 8,866,644 barrels. This increase was due to the production from the company's holdings at Santa Fe Springs, which showed an increase of about 10,344,000 barrels during the year. The average production of crude oil and natural gasoline (from 595 wells), on Jan. 1 1930, was approximately 58,600 barrels daily. In addition 191 wells were shut in and as a result of the program of conservation adopted by the operators in the Santa Fe Springs and Signal Hill Fields, the production from 82 wells is being curtailed. The crude oil purchases of the company at the present time average 67,000 barrels daily.

The production of crude oil in the State of California in 1929 totaled 292,036,911 barrels, an increase of 60,054,314 barrels over 1928, and surpassed the former record established during 1923 of 263,728,895 barrels. Production of natural gasoline during the year just closed aggregated 20,083,889 barrels as compared with 13,985,742 barrels during 1928, an increase of 6,098,147 barrels, the total production of crude oil and natural gasoline in 1929 being 312,120,800 barrels as against 245,968,339 barrels in 1928.

The company's production and purchases of crude oil for the year totaled 46,571,971 barrels, and including production and purchases of natural gasoline and purchases of refined and semi-refined products, aggregated 50,733,016 barrels, or 16% of the total production of the State as compared with 39,195,465 barrels and 16% in 1928.

Sales for the year amounted to $88,864,518, an increase of $3,496,748 over the year 1928. The quantity of all products marketed in 1929 totaled 37,060,000 barrels, an increase of 3,157,000 barrels over 1928.

Properties.—Company now owns in fee, or mineral rights fee, 600,396 acres and holds under lease contract 111,865 acres.

In addition company owns a one-half interest in concessions in Venezuela, held jointly with the Pantepec Oil Co. of Venezuela, approximately 880,000 acres. The company also owns a small interest in the Matador Development Co., which controls 404,000 acres in the State of Texas.

Expenditures for new drilling and field development amounted to $10,999,318, while the charge against income for drilling expenditures, wells abandoned, and depreciation, was $8,410,241. The balance of oil wells and development, after deducting the reserves for depreciation and drilling expenditures was $15,810,624, representing 868 wells producing or shut in, 147 wells drilling or inactive and subsidiary field facilities.

The additions to pipe lines and storage system during the year amounted to $932,820 and consisted principally of additions to the pipe line gathering system, the reconditioning of storage reservoirs at San Luis Obispo and Stewart totaling 1,526,000 barrels, and the erection of steel tankage aggregating 380,000 barrels.

At Dec. 31 1929, the company owned 495 miles of trunk pipe lines and 403 miles of gathering lines. The combined daily maximum capacity of the pipe lines is about 245,000 barrels. The total working capacity of all crude and refined oil storage approximates 39,013,000 barrels.

The additions to steamships and marine equipment amounted to $70,180. Company now owns 12 steamships and 21 barges, motor boats, &c., having a total carrying capacity of approximately 857,000 barrels.

Expenditures for additions to refineries, natural gasoline absorption plants and gas facilities amounted to $3,529,196, consisting mainly of the construction of a fuel oil topping and viscosity reduction plant, steel tankage (1,022,000 barrels) and shop buildings at Los Angeles refinery; improvements at oleum refinery; construction of a 1,600 h.p. gas compressor at Santa Fe Springs; extension of the gas gathering and fuel lines and increasing the Bell absorption plant (Santa Fe Springs) to a capacity of 50,000,000 cubic feet per day. The capacity of the natural gasoline plants is at present 135,000,000 cubic feet per day. The normal daily crude output and cracking capacity of the refineries is about 135,000 barrels per day.

Marketing station expenditures totaled $3,531,894 which includes the cost of 62 new distributing stations and 129 service stations opened during the year and the purchase of 53 tank cars, 132 automobiles, 129 trucks, 2 airplanes and 1 barge (3,000-barrel capacity). There are now 455 domestic and foreign bulk sales stations and commission agencies and 574 retail service stations in operation and the equipment owned by the company includes 725 tank cars, 1,240 auto trucks, 245 automobiles and 4 airplanes.

The Atlantic Union Oil Co., Ltd., which is the distributing company in Australia and New Zealand (owned jointly with the Atlantic Refining Co.), showed a normal expansion during the year. Products are being distributed through marine terminals at Melbourne and Sydney, Australia and Auckland and Wellington, New Zealand, and marketed through 30 bulk depots and approximately 800 retail sales depots and commission agencies, the sales by the latter due to their location at inland points, consisting chiefly of package goods.

GENERAL INVESTMENT NEWS.

STEAM RAILROADS.

Senate Confirms H. M. Tate as Commissioner.—Nomination is approved 48 to 18. N. Y. "Times," Feb. 21, page 4.

New York Litherage Case.—I.-S. C. Commission assigns hearing to April 22 for complaints and interveners. "Wall Street Journal," Feb. 14, page 8.

New Terminal Held Need of Long Island RR.—Commissioner Godley of Transit Commission says only way to end commuter jam is to build L. I. City station. N. Y. "Times," Feb. 18, page 25.

Rail Bus Hearing Set for March 27.—I.-S. C. Commission orders examiners to take testimony in New York City in Pennsylvania proposal. N. Y. "Times," Feb. 20, page 43.

Freight Rates Cut on Tidewater Coal.—New England railroads are told by the I.-S. C. Commission to adopt lower schedule by April 7. N. Y "Times," Feb. 21, page 39.

Surplus Freight Cars.—Class I railroads on Feb. 8 had 373,825 surplus freight cars in good repair and immediately available for service, the car service division of the American Railway Association announced. This was a decrease of 18,727 cars compared with Jan. 31, at which time there were 392,552 cars. Surplus coal cars on Feb. 8 totaled 116,758, a decrease of 6,711 cars within approximately a week, while surplus box cars totaled 203,820, a decrease of 13,204 for the same period. Reports also showed 26,121 surplus stock cars, an increase of 1,781 over the number reported on Jan. 31, while surplus refrigerator cars totaled 13,233, a decrease of 594 for the same period.

Freight Cars in Need of Repairs.—Class I railroads on Feb. 1 had 124,260 freight cars in need of repair or 5.6% of the number on line, according to the car service division of the American Railway Association. This was an increase of 5,344 cars over the number in need of repair on Jan. 15, at which time there were 118,916, or 5.4%. Freight cars in need of heavy repair on Feb. 1 totaled 83,899, or 3.8%, a decrease of 2,048 cars compared with the number on Jan. 15, while freight cars in need of light repair totaled 40,361, or 1.8%, an increase of 7,392 compared with Jan. 15.

Locomotives in Need of Repair.—Class I railroads of this country on Feb. 1 had 7,937 locomotives in need of repair or 14.1% of the number on line, according to reports just filed by the carriers with the car service division of the American Railway Association. This was a decrease of 724 compared with the number in need of repair on Jan. 15, at which time there were 8,661, or 15.3%. Locomotives in need of classified repairs on Feb. 1 totaled 4,282, or 7.6%, a decrease of 356 compared with January 15, while 3,655, or 6.5%, were in need of running repairs, a decrease of 368 under the number in need of such repair on Jan. 15. Class 1 railroads on Feb. 1 had 5,958 serviceable locomotives in storage compared with 6,193 on Jan. 15.

Baltimore & Ohio RR.—*Control by Company of Buffalo Rochester & Pittsburgh Ry. Approved.*—The acquisition by the company of control of the Buffalo Rochester & Pittsburgh Ry. by purchase of its capital stock was conditionally approved and authorized by the I.-S. C. Commission Feb. 11. The report of the Commission says in part:

On June 8, 1929, the B. & O. filed an application under paragraph (2) of section 5 of the interstate commerce act for authority to acquire control of the Buffalo, Rochester & Pittsburgh Ry. by purchase of a majority of its capital stock. By contract, dated March 1 1929, the applicant agreed to purchase, subject to our approval, from the Alleghany Corp. 43,024 shares of the 6% non-cumulative preferred stock, and 96,927 shares of the common stock of the B. R. & P., these amounts constituting 84.82% of the outstanding stock of that company. The additional shares not covered by the agreement amount to 16,976 shares of preferred and 8,073 shares of common stock. The purchase price of the contract shares is $14,263,216, plus interest at 6% from date of agreement to date of settlement, less dividends paid, with interest from date of payment. Should the purchase be consummated, applicant proposes to offer to purchase the remaining shares at the same net price per share and states its willingness to have approval of the purchase conditioned upon such an offer.

The Delaware & Hudson Co., the Pennsylvania RR., the Wabash Railway, the Pittsburgh & West Virginia Railway, the Mt. Jewett, Kinzua & Riterville RR., the Rochester & Pittsburgh Coal Co., the City of Rochester, N. Y., commercial organizations of that city and of Buffalo, N. Y., and various glass companies, were permitted to intervene. Hearing has been held, a proposed report served, briefs filed, and argument heard.

Under date of Dec. 13 1927, we issued a report and order in Finance Docket No. 5656, denying an application of the Delaware & Hudson Co. for authority to lease the railroad of the B. R. & P. The applicant herein intervened in that proceeding in opposition to the proposed lease, and the Delaware & Hudson has now similarly intervened in opposition to the proposed control of the B. R. & P. by the applicant. By stipulation, those portions of the record in No. 5656 which are material and relevant to the present issue are available for use in this proceeding. The evidence bearing upon the properties, operations, and relationships of the applicant and the B. R. & P. in this case is largely the same as in the former, and the statements in the former report, 131 I.C.C. 750, concerning those matters may be followed with only minor additions and variations.

In reference to the applicant, it is only necessary to mention that its system reaches the Atlantic ports of Baltimore, Philadelphia, and New York on the east, and the ports of Fairport, Cleveland, Lorain, Sandusky, and Toledo on Lake Erie, and of Chicago on Lake Michigan. It does not reach Buffalo. The B. R. & P. operates about 600 miles of road, its main line extending north and south through western Pennsylvania and western New York. It branches on the north to reach the cities of Buffalo and Rochester, N. Y., together with the port on Lake Ontario, just north of Rochester, from which point a car ferry is operated to Cobourg, Ont., where connection is made with the Canadian National Railways. On the south, the B. R. & P. serves the bituminous coal districts of western Pennsylvania by means of various short branches, and by the use of trackage over the applicant's lines it reaches the cities of Pittsburgh, Butler, and New Castle, Pa. The principal traffic of the B. R. & P. consists of bituminous coal, most of which originates on its lines. The word "coal," unless otherwise stated, will hereinafter be understood to mean bituminous coal. For the year 1928, said to be fairly typical of recent years, the B. R. & P. transported about 6,200,000 tons of coal, of which about 5,500,000 tons originated on its lines. The number of tons of revenue freight of all kinds carried by the B. R. & P. in that year was about 11,300,000.

The property of the B. R. & P. is in generally good condition. For the three years ended Dec. 31 1928, its average net income after interest charges was $729,347. It has outstanding capital stock of the par value of $16,500,000 and funded debt amounting to $36,903,600, on which the average interest rate is 4 64%. Its balance sheet as of Dec. 31 1928, shows a profit and loss credit balance of $3,139,996 and a total corporate surplus of $7,864,267. There are no important maturities of funded debt prior to Sept. 1 1937, when $4,427,000 of 5% bonds will fall due. It is stated that income for recent years has been adversely affected by unusually large retirements of equipment and partial suspension of operations in coal fields, both causes being temporary.

The applicant represents that it has enjoyed close relotionship with the B. R. & P. for nearly 30 years, under contracts giving the latter the right to use applicant's line between Butler and New Castle, where the B. R. & P. has constructed its own terminals, and between Ribold Junction (near Butler) and Pittsburgh, with joint use of the applicant's stations and facilities in Pittsburgh. These contracts give the B. R. & P. the rights of an originating carrier in Pittsburgh and New Castle. The principal contract provides that the right to use the tracks and other facilities thereby given shall not be assigned or transferred to another railroad company without the written consent of the applicant. These contracts were renewed in 1918 for a period of 25 years. . . .

The principal allegations of the applicant in support of its proposed control of the B. R. & P. are as follows:

It is represented that such control will afford opportunity for substantial economics through increased co-ordination of operations. Applicant's comptroller presented an itemized statement showing in detail the reduction in operating expenses that could be effected by unification of train and yard operations on the joint facilities covered by the contracts with the B. R. & P. At present each carrier conducts its own freight train operations over the joint tracks, but applicant proposes to reduce the number of trains from 14 to 10, resulting in a monthly saving of $26,400, or $316,800 per year. Yard operations at Butler and New Castle would be combined at an annual saving of $52,219, and passenger and freight train operations between Butler and Pittsburgh and on the lines extending northward to Jewett, Pa., would be consolidated at an annual saving of $78,888, making a total of $447,907. In order to effect this saving, however, it would be necessary to reconstruct and strengthen certain bridges at an expense estimated at $900,000. Other economies are proposed through co-ordination of other facilities and services, discontinuance of separate traffic agencies, etc., the total, as estimated by the witness, exceeding $600,000 per year.

It is further represented that following the acquisition of control there would be more extensive and intensive use of existing facilities and equipment, especially in the greater use of the applicant's grain elevators at Baltimore and the use of applicant's box car equipment in supplying the needs of the B. R. & P. In this connection applicant desires to develop further the route from Buffalo to Baltimore by way of the B. R. & P. and its own line. At present the only through line between those cities under control of one carrier is that of the Pennsylvania. Heretofore the applicant has received most of its eastbound ex lake traffic at Fairport, O., but the growing importance of Buffalo as a port has tended to divert traffic from Fairport to Buffalo, particularly package freight from Lake Michigan and Lake Superior ports, and the applicant has been frequently solicited to provide a route through Buffalo to points on its system.

It is also testified that in recent years Buffalo has rapidly increased in importance as a grain and milling center and Minneapolis has corresponding declined in importance. In the year 1928, 6,137,173 bushels of grain, were shipped from Buffalo to Baltimore. Applicant seeks to develop movement of this traffic over its proposed route through Buffalo and for that purpose its supply of box-car equipment would supply the deficiencies of the B. R. & P. in that respect, and the southbound movement of grain would tend to balance the traffic on the B. R. & P., which is now predominantly northbound. By greater use of the port of Buffalo the applicant will regain traffic which it has lost through the disadvantages of the service through Fairport. Should its application be approved, the applicant proposes to establish one-line rates via its own line and that of the B. R. & P. wherever present tariffs provide increased rates for a two-line haul.

It is also represented that with control of the B. R. & P. new routes will be established between certain territories where present routes involve departures from the fourth section of the act. The applicant pledges itself to maintain all existing routes and channels of trade. Under the contracts previously described, the B. R. & P. is excluded from certain territories as to traffic subject to the contracts, but with the acquisition of control this restriction would be removed. Provision of more adequate terminal facilities at Pittsburgh is necessary and for that purpose the applicant desires to secure the control of certain land now owned by the B. R. & P.

Another important consideration urged by the applicant is that through acquisition of control of the B. R. & P. its plan for the establishment of a new short line between Chicago and New York will be promoted. As stated in the report in No. 5656, this plan contemplates the inclusion in the new route of about 80 miles of the line of the B. R. & P., between Butler and Du Bois, Pa. The proposed route would consist of the present line of the applicant from Chicago through New Castle to Butler, thence over the B. R. & P. to Du Bois, thence over other existing lines or by new construction, or a combination of the two methods, to Williamsport, and thence by the Reading and the Central of New Jersey to New York.

As the applicant has large financial interests in the two carriers last named, the entire route from Chicago to New York, except for the 120 miles from Du Bois to Williamsport, would be over applicant's lines or over roads in which it is substantially interested. This proposed route, it is pointed out, would pass north of Pittsburgh and would thus reduce the congestion in that area. It would be from 75 to 80 miles shorter than applicant's present route, and would in fact be shorter than any other route between Chicago and New York except that of the Pennsylvania, being only 4 miles longer than that. It would also have an advantage over the Pennsylvania route in that its maximum elevation would be 1,525 feet as against a maximum of over 2,000 feet on the Pennsylvania.

Applicant represents that establishment of this new route would avoid the necessity of an expenditure on its lines just west of Pittsburgh of between $30,000,000 and $40,000,000. Should the applicant fail to secure rights over the existing lines between Du Bois and Williamsport, it proposes to construct its own line to the extent necessary to bridge this gap. It has now pending before us an application for authority to acquire control of the Buffalo & Susquehanna Railroad Corp., which, if granted, will enable it to use the line of that carrier for a distance of about 50 miles, between Du Bois and Driftwood, Pa.

So far as competition for the haul of particular shipments is concerned, the relations of the applicant and the B. R. & P. are complementary rather than competitive. There is some competition of this character in the service to and from points near Pittsburgh. The commodity, or so-called "market" competition, is more important. . . .

The city of Rochester, N. Y., and its Chamber of Commerce, the Chamber of Commerce of Buffalo, N. Y., and the Rochester & Pittsburgh Coal Co, intervened in support of the application. . . .

The Delaware & Hudson opposed the application on the ground, first, that we denied its application in No. 5656 for the controlling reason that disposition of the B. R. & P. should await other decisions respecting the application of section 5 of the act to railroads in the East, and that a similar rule should be applied in the present case; second, that the location of the B. R. & P. with reference to the physical, industrial, and commercial geography of the Eastern States is such that its disposition should await more comprehensive action in the application of section 5 to the railroads in that region than is possible in this proceeding; third, that no public interest has been established in the proposed acquisition of control by the applicant; fourth, that the union of the Delaware & Hudson and B. R. & P. would be in the public interest; and fifth, that no adequate reason has been shown for a determination in this case in advance of the broader decisions under section 5 in respect of railroads in the East. The president of the Delaware & Hudson stated for the record that he had been authorized to make a cash offer to take over the B. R. & P. stock, now under contract to the applicant, subject to our approval, at the price proposed to be paid by the applicant, which he considered reasonable. Since the hearing the Delaware & Hudson has filed with us an application for authority to acquire control of many railroads in the northeastern portion offhe United States, including New England. Among these roads are the B. R. & P., the Reading, and the Central of New Jersey.

The Pennsylvania RR. also intervened in opposition to the application. It offered no testimony but filed a brief in which it referred to the various proposals that have been made regarding the future of the B. R. & P. and urged that in determining the status of that carrier in any particular system we should act only in a proceeding in which the interest of the public at large and of all carriers, including the Pennsylvania, in eastern territory can be given proper consideration. As an intervener it is interested because its system is in competition with the system of the applicant and its lines in the future will comprise one of the large ssygems in eastern trunk line territory upon which the public must rely for transportation service. These views were affirmed on oral argument.

The Wabash Railway and the Pittsburgh & West Virginia Railway similarly opposed the application in their briefs, the former joining generally in the view of the Delaware & Hudson, and the latter questioning the sufficiency of the showing made by the applicant that its proposed acquisition of control would be in the public interest from an operating standpoint. Subsequent to the submission of briefs, however, our complete plan of consolidation, 159 I.C.C. 522, Docket No. 12964, was issued, and at oral argument both the Wabash Railway and the Pittsburgh & West Virginia Railway withdrew all opposition to the pending application.

It cannot be conceded that a decision upon this application should be controlled by our action upon the application of the Delaware & Hudson looking to a lease of the B. R. & P. The reasons for that action were stated in the report, 131 I.C.C. 750, but it may be mentioned here that the properties of the Delaware & Hudson and of the B. R. & P. had, and have, no direct connection, and their traffic and geographical relationships are not so close as those between the applicant and the B. R. & P. Further, the proposal in that case was to lease and not merely to acquire a controlling interest through stock ownership. The former method involves complete consolidation of operations and discontinuance of operating reports by the lessor company. In the present case it is understood that no such unification is at present contemplated. It appears that under the present contract the applicant and the B. R. & P. maintain joint agencies on the lines jointly operated, although maintaining separate train service. As understood, it is planned to extend this combination to the train operations over the tracks affected. Complete cessation of train operations on these tracks by either company could not be effected without authority from us under section 1 of the act. Therefore, it is necessary to assume that a division of revenue and expense would be necessary, analogous to the present separation of maintenance expense on a wheelage basis. Much co-ordination in the interest of more economical administration and operation is possible without the loss of the operating identity of the B. R. & P.

Digitized for FRASER

Federal Reserve Bank of St. Louis

In appraising the merit of this application but little weight can be given to the element of public interest involved in the proposed development of increased traffic between Buffalo and Baltimore via the B. R. & P. It is borne in mind that the route has long been in existence, apparently without the development of much traffic. It passes through Pittsburgh and is some 200 miles longer than that of the Pennsylvania. The operating characteristics of the latter are not shown of record, but it appears that there are a considerable number of heavy grades on the B. R. & P., principally against southbound traffic. For a distance of about 40 miles southeast of Buffalo the ruling grade is 89 feet per mile, equivalent to 1.69 per cent, and other grades are nearly as severe. The utility of the B. R. & P. as a route to points to the south and southwest, reached more directly by way of the applicant's system, is more apparent.

To secure the advantages in economy and efficiency here indicated as possible through the greater co-ordination of operations of joint facilities, and other benefits which will be promoted by more complete identity of interest, the application will be granted, *but with the conditions* that routes and channels of trade via existing gateways now employed for the movement of traffic of the B. R. & P. shall be kept open and efficiently maintained, so far as within applicant's power, unless otherwise authorized by us, and that, until our further order, the operations, accounts and statistics of the B. R. & P. shall be maintained in such manner as to preserve the continuity of records for purposes of comparison. The continued offer for 6 months to acquire the remaining outstanding shares of the B. R. & P. at the same price as agreed to be paid for the shares purchased from the Alleghany Corp. should be regarded as a further condition of our approval.

Since the submission of briefs but prior to oral argument in this proceeding, we issued our complete plan of consolidation, in which, among others, the lines of the B. R. & P., the Buffalo & Susquehanna, the Reading, and the Central of New Jersey are assigned to the Baltimore & Ohio system. At the oral argument question arose as to the relationship between this and other proceedings under section 5 (2) and proceedings under the provisions of paragraphs (4), (5) and (6) of the same section dealing with a complete plan of consolidation. The Delaware & Hudson was permitted to file a memorandum of its views, to which the applicant replied.

It is the position of the Delaware & Hudson that the vital factor of public interest under section 5 is the preservation of competition between carriers that any action taken in this proceeding must be based upon evidence in the record pertaining thereto, and in the absence of stipulation we cannot take cognizance of matters arising after the record is closed; that we have no power to preserve a *status quo*, but on the contrary must make either a final order granting the application or an order dismissing the petition without prejudice; and that, after a plan of consolidation has been announced, the allocation of any particular line can be made only after a hearing which will afford opportunity for consideration of the relationship of that line to the plan as a whole. For example, the intervener urges that we are not in position to give weight to the proposed establishment of the applicant's new through line to New York City without proof that there is at least reasonable prospect that the applicant can and will acquire the Central of New Jersey, and that to do so would commit us in advance in a way contrary to the spirit of the act, unjust to the public and to actual and potential parties. Such evidence, it is contended, belongs to a hearing which takes the complete plan into account, along with other evidence. To these contentions the applicant rejoins that we may and should consider our complete plan in connection with the pending application, and that we are not bound by the strict processes of judicial procedure. The applicant also expresses the view that applications for authority to acquire control under section 5 (2) which are not in conformity with our complete plan must be preceded by formal reopening of the consolidation proceeding.

Approaching the question from opposite directions, both applicant and intervener thus conclude that section 5 (2) is in some degree superseded by our plan. It is unnecessary, in disposing of this case, to consider the status of an application under section 5 (2) for an acquisition of control which is not in conformity with the grouping of lines under our complete plan, or to pass upon the merits of all of the contentions raised by the intervener and the applicant. The application is in harmony with the plan and there is evidence in this record of sufficient probable public benefits to justify the control of the B. R. & P. by the Baltimore & Ohio, as proposed, regardless of the possible utility of a portion of the B. R. & P. as part of the proposed new route of the applicant. As to the matter of competition, it is sufficient to point out that the provisions of paragraph (8) of section 5, suspending in certain cases the application of the antitrust laws, are as applicable to proceedings under section 5 (2) as to those under the consolidation provisions of the section.

The Mt. Jewett, Kinzua & Riterville RR. intervened for the purpose of securing the inclusion of its line of railroad as a part of the Baltimore & Ohio system, and placed in the record evidence concerning its history, operations, connections, and other circumstances. The line of this intervener is about 18 miles in length, connecting at two points with the line of the B. R. & P. Operation over 8 miles of the line has been discontinued owing to lack of traffic. The intervener suggests that either 4 to 6 miles of the remainder be abandoned, leaving but one connection with the trunk line, the portion to be retained serving certain industries at Kushequa, Pa. The record does not justify any conclusion regarding the retention or disposition of any portion of intervener's line. It raises the presumption, however, that if the circumstances warrant continued operation of the intervener's line or any part thereof, such operation should be conducted by the B. R. & P. The applicant in its application made a general proposal for treatment of short or weak lines, involving determination by us under certain circumstances. The intervener considered the proposal fair. The present record does not afford a satisfactory basis for any final order as to this property. Our approval of the application will therefore carry as a condition precedent that the applicant shall agree and undertake to abide by such findings as we may hereafter make with respect to the taking over or operation of the intervener's line, or both, or such findings as may be made in an ancillary proceeding or arbitration, if that course shall be found by us to be suitable, and the record will be held open for such supplementary proceedings as may be found necessary to that end. Our order will accordingly not become effective until such agreement and undertaking is filed with us.

We find that the acquisition of control of the Buffalo, Rochester & Pittsburgh Railway by the applicant, as proposed, and under the conditions hereinbefore named, will be in the public interest, and that the consideration to be paid for the stock is just and reasonable. An order of authorization will accordingly be issued.

Commissioner Eastman concurring in part says:

I have no objection to an acquisition of control of the Buffalo, Rochester & Pittsburgh by the Baltimore & Ohio, and believe that for the present, and possibly for all time, such control is desirable. However, an acquisition of control under section 5 (2) is, or ought to be, a different thing from a consolidation under section 5 (6), and should properly be regarded as more in the nature of a temporary or tentative arrangement. For this reason it will often be the part of wisdom, in approving such acquisitions of control, to attach a condition which will make it possible for us in the future to bring about a transfer of the property to some other system, in a way, of course, which will protect the carrier making the original acquisition against loss.

Such a condition seems to me particularly appropriate here. The reasons advanced in favor of control by the Baltimore & Ohio are not very impressive, and upon analysis I am left with the throught that the Baltimore & Ohio is chiefly interested in gaining control of that portion of the line of the Buffalo, Rochester & Pittsburgh which it hopes it may be able to use in developing a new route between Chicago and New York. It is by no means impossible that when we get further into the consolidation problem we may find that at least the remainder of the Buffalo, Rochester & Pittsburgh system might better be under some other control. For example, one of the most doubtful features of the consolidation plan which we have adopted is, in my judgment, the allocation of the Erie and the closely competitive Lackawanna to the same system. If it should eventually prove desirable, as I suggested in connection with the report on the consolidation plan, to create a separate Lackawanna system, including such lines as the Delaware & Hudson and the Lehigh Valley, all or part of the Buffalo, Rochester & Pittsburgh might well fit in better with such a system than with the Buffalo, Rochester & Pittsburgh.

For these reasons I believe that our approval here of the acquisition of control should have been accompanied by a condition, such as I have suggested, enabling a different disposition of all or a part of the property to be made later. Nor do I believe that such a condition, if properly worded, would be detrimental to either the Buffalo, Rochester & Pittsburgh or the Baltimore & Ohio.—V. 130, p. 1109.

Canadian National Ry.—*Listing.*—

The New York Stock Exchange has authorized the listing of $59,328,800 40-year 5% guaranteed gold bonds, due Oct. 1 1969 (guaranteed by the Government of the Dominion of Canada); $671,200 of bonds on official notice of issuance and sale to officers and employees, when, paid in full, making the total amount applied for $60,000,000. V. 130, p. 794.

Canadian Pacific Ry.—$50,000,000 *Expansion Program*

The company has announced its $50,000,000 expansion program for 1930. This calls for an expenditure of $14,442,000 for equipment; $3,000,000 on telegraphs; $3,500,000 on hotels; $10,000,000 on Western branch lines and terminals; $7,500,000 on Eastern branch lines and terminals; and approximately $9,250,000 on usual maintenance expenditure. This program is in addition, of course, to large expenditures on ocean steamships which are now in course of construction.

It is proposed during the present year to extend the Soningdale Line to Baljennie; to build a further extension to the branch which will connect Nipawin and Prince Albert, to provide terminal facilities at North Battleford; to complete the branch from Lake Johnston into Archive, complete the line from Arrowwood into Blackie, and, in conjunction with the Canadian National, to build the line from Bulwark into Alliance in Alberta. It has also been decided to commence work on a branch line from Prince Albert to Lac Labiche and to complete the grading from Debden to Meadow Lake, a distance of 90 miles. This particular line is designed to serve the Beaver Lake district.

Orders Equipment.—

This company has ordered from the Canadian Car & Foundry Co. 250 75-ton coal cars, 50 sleeping cars, 3 mail cars, 5 compartment car frames, 2 overnight sleeping car frames and 14 parlor car frames for slightly more than $2,000,000. It also has ordered from the National Steel Car Co. 250 refrigerator cars, 10 baggage cars, 8 dining car frames, 13 first-class passenger car frames and 7 smoking car frames for slightly less than $2,500,000. V. 130, p. 1109.

Central of Georgia Ry.—*Bonds.*—

The I.-S. C. Commission Feb. 7 authorized the company to procure the authentication and delivery of $319,000 of ref. & gen. mtge. 5% bonds, series C, in partial reimbursement for capital expenditures. V. 128, p. 3678.

Chicago Burlington & Quincy RR.—*To Be Segregated from Great Northern-Northern Pacific.*—See Great Northern Pacific Ry. below.—V. 130, p. 133.

Chicago Milwaukee St. Paul & Pacific RR.—*Abandon.*

The I.-S. C. Commission Feb. 5 issued a certificate authorizing the company to abandon part of one of its branch lines of railroad, which part extends from Disque in a westerly direction to Twin Rivers, a distance of approximately 10 miles, all in Clallam County, Wash.—V. 130, p. 616.

Chicago & North Western Ry.—*Common and Preferred Dividends Payable Quarterly Hereafter.*—The directors have declared a quarterly dividend of 1¼% on the common stock and 1¾% on the pref. stock, both payable March 31 to holders of record March 4. Previously the company paid semi-annual dividends on both issues, the last payment being made on this basis on Dec. 31 1929, viz.: 2½% on common and 3½% on pref. stock. (See V. 129, p. 3007.).—V. 130, p. 1109.

Georgia Carolina & Northern Ry.—*Bonds Offered.*—Chase Securities Corp., New York, are offering the unsold balance of $1,200,000 1st mtge. extended 6% bonds at 100 and interest.

Principal and interest (J. & J.), payable at office or agency of Seaboard Air Line Railway New York, or at the office of Continental Co., Baltimore. Callable on 30 days' notice at 101 and interest up to and including July 1 1930, and thereafter at par and interest plus a premium of ¼% of such principal amount for each full year to elapse between the date designated for redemption and July 1 1934. Mercantile Trust Co. of Baltimore, trustee.

The first mortgage extended 6% bonds, due July 1 1934, an underlying lien of the Seaboard Air Line Railway, are secured by a 1st (closed) mtge. at the rate of approximately $20,000 per mile on 266 miles (from Monroe, N. C., to Inman Park, near Atlanta, Ga.) of main line railroad of the Seaboard System between the cities of Richmond, Atlanta and Birmingham.

The mileage covered by the Georgia, Carolina & Northern Ry. 1st mtge. is most important to the Seaboard Air Line Ry. While it comprises only 5.9% of the total mileage of the system, it is estimated by the management that approximately 15% of the Seaboard Air Line Railway's gross revenue is derived from the traffic which passes over all or a part of the Georgia, Carolina & Northern Ry., which would indicate a net income to the system derived from this traffic of an amount sufficient to pay the interest charges on these bonds over 3½ times.—V. 129, p. 470.

Great Northern Ry.—*Unification Plan Approved.*—See Great Northern Pacific Ry. above.—V. 130, p. 618.

Great Northern Pacific Ry —*Commission Ratifies Merger of Great Northern-Northern Pacfuc Roads—Rules Burlington Must Be Given Up.*—The I.-S. C. Commission has approved the proposal of Great Northern Pacific Ry. to acquire control of Northern Pacific and Great Northern railroads under a 99-year lease and by stock ownership. Stock control will be effectuated by exchange of stock in the new company, the Great Northern Pacific, on a share-for-share basis. The record was held open further to provide for arrangements to be made with reference to exclusion of the Chicago Burlington & Quincy RR. Commissioner Eastman dissented, as did Chairman McManamy.

The record in the case was held open for the submission to the Commission by the applicants for the Commission's consideration and approval of a supplemental plan or proposal, which, while not altering the application in other respects, shall give acceptable assurance and provide that:

(1) That Burlington shall be divorced from control by the Northern companies within a reasonable period of time, such period to be stated as nearly as may be practicable.

(2) A bonafide and feasible plan for the acquisition and operation of all the so-called short lines of railroad named in the Great Northern-Northern Pacific System, No. 12 of the Consolidation Plan, except such of them as may be found by the Commission to be unnecessary.

(3) A comprehensive program and statement of proposed policy in the matter of the unified operation of terminals, or its equivalent.

(4) Suitable assurance that the Chicago, Milwaukee, St. Paul & Pacific RR., upon fair terms, may have access from Spokane to Portland and intervening points, over the lines of the Spokane, Portland & Seattle Railway.

The project includes the leasing of the Spokane, Portland & Seattle for 99 years, which road is controlled by the Northern through stock ownership.

The commission withheld entry of a formal order in the case and issuance of its certificate authorizing the merger pending fulfillment of the conditions imposed.

Commissioner Lewis in a concurring expression declared he neither favored the Northern unification in this instance nor that part of the Consolidation Plan which would combine them. He stated it was his conviction that public interest would best be served by maintaining the present situation as between the two Northerns and the Burlington.—V. 125, p. 1047.

Morris & Essex RR.—*Bonds Authorized.*—

The I.-S. C. Commission Feb. 8 authorized the Delaware Lackawanna & Western RR. to sell at not less than 101¼ and int. $10,000,000 of construction-mortgage gold bonds, series A, of the Morris & Essex RR., and use the proceeds to provide in part for expenditures made and to be made for additions and betterments on its railroad system.

The Commission also authorized the Delaware Lackawanna & Western to sell at not less than 94¼ and int. not exceeding $15,000,000 of Morris & Essex RR. construction-mortgage gold bonds, series B, and use the

Federal Reserve Bank of St. Louis

proceeds to reimburse its treasury, retire temporary bank loans, and provide in part for expenditures made and to be made for additions and betterments on its railroad system during the year 1930. See V. 130, p 1110.

New York Central RR.—*Would Acquire Road.*—The company has applied to the I.-S. C. Commission for authority to acquire and operate the Ulster & Delaware RR. The carrier was ordered to take in this short line in the Commission's decision in New York Central unification case. Following arbitration, New York Central has agreed to pay $1,813,333 for the line, which operates 163 miles of road in New York State.—V. 130, p. 1110.

New York Chicago & St. Louis RR.—*Listing.*—The New York Stock Exchange has authorized the listing of $20,000,000 3-year 6% gold notes, due Oct. 1 1932.

Income Account Ten Months Ended Oct. 31 1929.

Railway operating revenues	$48,320,461
Railway operating expenses	31,794,969
Equipment retirements and depreciation	1,798,036

Dividend appropriations	3,138,912
Balance transferred to profit and loss	$3,873,494

—V. 130, p. 1110.

Northern Pacific RR.—*Unification Plan Approved.*—See Great Northern Pacific Ry. above.—V. 130, p. 619.

Pennsylvania RR.—*Earnings 17.64% in 1929.*—The full income account of the company for 1929 was made public Feb. 20. The net income last year reached a new high record of $101,360,971. This was an increase of $18,943,595 over the 1928 figures, which, in turn, had exceeded the results of any previous year. Last year marked the fourth successive 12 months' period in which the company has achieved a new high record in net income. An official statement further says:

The volume of business handled in 1929, while greater than that of 1928, was not as large as that moved in the peak years of 1923 and 1926. The record-breaking net income earned last year was the direct result of an intensive program of efficiency and exonomy in every phase of operations and the heavy expenditures made in recent years to improve and extend the company's transportation property.

The net income earned in 1929 was equivalent to 17.64% on the $574,756,400 capital stock outstanding at the close of the year; the 8% dividend being earned more than twice over. By comparison, the net income for 1928 was $82,507,613, equivalent to 14.69% on the stock outstanding on Dec. 31 of that year. The net income per share of stock in 1929 ($50 par value) was $8.82 as compared with $7.35 in 1928.

Dividends paid during 1929 amounted to $46,835,965. This was the largest dividend disbursement in the company's history, marking an increase of $8,664,343 over payments made in 1928. A total of more than $900,000,000 has been paid by the Railroad in dividends since its inception in 1846.

During 1929 the sum of $4,962,852 was applied to sinking and other reserve funds, and $636,558 to advances to and construction expenditures upon leased and affiliated lines. The balance of the net income, amounting to $48,925,595 was transferred to profit and loss, bringing the total profit and loss account, as of Dec. 31 1929 to $230,834,073.

The railway operating revenues for 1929 amounted to $682,702,931, an increase of $32,135,614 over the previous year. The largest single item of increase was freight revenue, which showed an advance of $25,602,005 over 1928. This was, of course, brought about by the increased volume of business handled, already referred to, the expansion in traffic being particularly notable in the coal, coke, ore and miscellaneous less-than-carload freight movement. The number of loaded cars moved in 1929 showed an increase of 4.6% as compared with 1928.

The passenger revenues, in contrast, showed a decrease of $1,596,106 reflecting the continued effect of motor vehicle operations upon rail traffic. It is noteworthy, however, that the per cent. of decrease in 1929 was by far the lowest recorded in the last three years, indicating the probability that the company's rail passenger business is becoming stabilized.

Railway operating expenses showed an advance of $12,978,958 over the previous year, the increase resulting largely from heavier transportation and maintenance expenditures necessary to take care of the greater volume of business offered. It is worthy of note, however, that while railway operating revenues increased 4.9%, expenses advanced only 2.7%.

Non-operating income, representing chiefly dividends on stocks owned and interest on investments, totaled $48,791,499, an increase of $4,255,841 due to the company's increased investments especially in its leased and affiliated companies and to higher dividends.

The gross income before deduction of fixed charges, rent for leased roads, &c., was $181,931,126, an increase of $20,288,481.

Deductions from gross income, consisting chiefly of rentals of leased lines, nterest on the funded and unfunded debt, and miscellaneous rents, amounted to $80,570,155, a net increase of $1,344,885. Interest on funded debt, however, showed a decrease of over $1,000,000 due principally to the retirement of equipment trust certificates in 1928 and 1929.

The final result for the year was the net income of $101,360,971, as given above, out of which appropriations were made to sinking and other reserve funds, dividends were paid, funds supplied for further improvement of the property and equipment, and a balance provided to sustain the company's credit.

During the year the railroad, rolling stock and other equipment of the company was fully maintained.

Further Electrification.—

Announcement is made that all steam trains on the company's main ine between New York, Philadelphia, Baltimore and Washington are now operating under the double protection of continuous cab signals, supplementing the automatic block signals, except on a few short sections where installation of the cab signal apparatus is of necessity awaiting the completion of other current improvement work. The company's newly developed cab signal system augments, and greatly extends, the effectiveness of the wayside automatic block signal system, which has been in general use for many years.

The total cost of preparing for full cab signal operation on the New York-Washington line, which will be accomplished within six months, will exceed $3,000,000. This covers the placing of necessary apparatus along the right-of-way, and specially equiping more than 400 locomotives. It also includes the cost of applying cab signal equipment to 200 multiple-unit cars for use in electrically operated trains between Philadelphia and Wilmington and Philadelphia and Trenton.

The next step in the extension of cab signal operation on the Pennsylvania RR. will be an installation on the Pittsburgh Division, between Altoona and Pittsburgh. The directors have already authorized an expenditure of approximately $2,000,000 for this purpose.

The outstanding feature of the Pennsylvania's cab signal system is that it brings the indications of track conditions ahead into the cab right in front of both the engineman and the fireman and then demands positive assurance that the signals have been observed.

The mechanism involved is electricaily operated, and it reproduces continuously, on two light panels in the engine cab, miniature reproductions of the wayside automatic signals. One panel is on the engineman's side and hte other on the fireman's side t has both men, regardless of rain, snow or fog, always have clearly before them indications of traffic conditions ahead.

Pere Marquette Ry.—*Extra Dividend of $2 per Share.*—The directors have declared an extra dividend of $2 per share on the outstanding common stock, par $100, in addition to the regular quarterly dividend of $1.50 per share, both payable April 1 to holders of record March 8. An extra dividend of $2 per share was also paid on the com. stock on April 1 1929, on April 2 1928, on April 3 1927 and on May 1 1926. (See also "Railway and Industrial Compendium" of Nov. 29 1929, page 115).—V. 129, p. 2679.

Pittsburgh & West Virginia Ry.—*Construction.*—The I.-S. C. Commission Feb. 7 issued a certificate authorizing the company to construct a branch line of railroad approximately six miles in length in Washington County, Pa.

The report of the Commission says in part:

This application is related to the authorization given in "Proposed Construction by P. & W. Va. Ry.," 138 I. C. C. 755, Finance Docket No. 6229, decided June 12 1928, in which the applicant herein was authorized to construct an extension of its line, known as the Connellsville extension, which is now under construction. That line is to extend from a point on the West Side Belt RR., a part of the applicant's system, to Connellsville, Pa., a distance of about 38 miles. Its primary purpose, as stated in the report, is to effect connection with the Western Maryland Ry. at Connellsville, thus giving the applicant an outlet to the east without using the rails of a competing carrier, and, with the line of the Western Maryland on the east and the Wheeling & Lake Erie Ry. and its connections on the west, to form a new through route between Baltimore and the Middle West. A large part of the traffic of the extension was proposed to be derived from two very important industrial districts on the Monongahela River, at Donora and Monessen, respectively.

No application is pending for the construction at Monessen and that feature of the applicant's plans is mentioned here only for its bearing upon the general plan.

The proposed branch, as surveyed, would be 5.79 miles in length and would extend from a point on the Connellsville extension near its crossing of Pigeon Creek, down the valley of Pigeon Creek to a point of connection with the Donora Southern RR. near the Monongahela River, to be known as Baird. There is no community at Baird, but the city of Donora has some 14,000 inhabitants who are dependent almost entirely upon the business of the American Steel & Wire Co. . . .

The proposed branch would be single-track but built for heavy loads. Applicant's estimate of its cost is $1,397,030, which is not questioned on the record. A witness for the Donora Southern testified that his company had recently considered the construction of a line along the same route to connect with the Connellsville extension of the applicant, and its estimate of cost was $1,400,000. Construction is proposed to be commenced immediately upon receipt of authorization and to be completed within four months thereafter. It is proposed to finance the construction from current cash or by the sale of bonds. No additional equipment is considered necessary. . . .

Based upon these and other considerations, the Pennsylvania strongly insists that there is no showing of public convenience and necessity for the construction of the branch. Its road along the Monongahela River between Donora and Pittsburgh has a ruling grade of three-tenths of 1% and consists of from two to four tracks as compared with the single-track line of the applicant. The intervener also submits evidence that it has on its own tracks ample ground for additional industries at Donora and that its Monongahela line is at present operated much below its capacity. The fact that traffic on this line has not increased materially during recent years is ascribed to the increasing use of the river.

The arguments of the intervener in this record are substantially similar to those submitted by the interveners in opposition to the construction of the Connellsville extension, as authorized in "Proposed Construction by P. & W. Va. Ry.," supra. Upon consideration of the record in that proceeding, we said that the two strongest arguments in favor of the new line were (1) that it would open a new route through the Pittsburgh district which would avoid the yards and junction points where congestion is now liable to occur; and (2) that it would provide a permanent connection between the Pittsburgh & West Virginia and the Western Maryland, so that they might, in combination with the Wheeling & Lake Erie, and possibly the Wabash, furnish a new and independent through route from the steel-producing territory, Lake Erie and points beyond to the port of Baltimore. The "steel-producing territory" included the Pittsburgh district and the Monongahela Valley. It is shown in the present record as well as in the former that the applicant relied largely upon the prospect of traffic to and from Donora and Monessen in justification of the proposed construction of the extension. This record indicates that the industries at those points contribute about 90% of the total rail traffic afforded by the industries in the Monongahela Valley. Notwithstanding the apparent infirmities in the revenue estimates of the applicant, the record justifies the conclusion that the proposed branch will carry a substantial traffic and be a valuable addition to the transportation facilities of the section.—V. 130, p. 1110.

Seaboard Air Line Ry.—*Abandonment—Director.*—The I.-S. C. Commission Feb. 4 issued a certificate authorizing the company and the Kissimmee River Ry. to abandon part of a branch line of railroad which extends from mile post 875.3 to Nalaca, 15.1 miles, all in Polk County, Fla.

L. A. Yerkes, President of du Pont Rayon Co. and a director of E. I. du Pont de Nemours Co. has been elected a director of the Seaboard Air Line Ry.—V. 130, p. 1110, 795.

Tulsa Union Depot Co.—*Bonds Sold.*—Continental Illinois Co., Inc., offered Feb. 19 at 95 and int. $1,700,000 1st mtge. 30-year 4½% sinking fund gold bonds. The issue has been oversubscribed.

Dated July 1 1929; due July 1 1959. Interest payable J. & J. at Interstate Trust Co., New York, trustee. Redeemable on any int. date on 60 days' notice at 102½% and int. if redeemed on or before July 1 1954, and thereafter at 100% and int. plus a premium of ¼ of 1% for each six months between the redemption date and the date of maturity. Authorizes $2,000,000.

St. Louis-San Francisco Ry., Atchison Topeka & Santa Fe Ry., and Missouri-Kansas-Texas RR. are jointly and severally liable, under the terms of a lease dated June 19 1929 to pay to the trustee sums sufficient to pay the interest from time to time accruing on these bonds and to meet the requirements of the sinking fund calculated to retire all of these bond by maturity at the prevailing redemption prices.

Organization.—Company will construct and operate a modern union passenger station at Tulsa, Okla., for the joint use of the above railroads which together own all the capital stock of the company.

Security.—This issue will be secured by a direct first mortgage on land owned in fee, leasehold interest in other property and air rights and the station and facilities to be constructed. The lease of the station and facilities is assigned to the trustee as additional security.

Sinking Fund.—Company will pay annually to the trustee, beginning April 15 1930, an amount equal to 3 1-3% of the greatest amount of bonds at any time issued and outstanding, taken at the prevailing redemption price. Bonds will be called by lot and cancelled.—V. 129, p. 2679.

Ulster & Delaware RR.—*Sale to N. Y. Central.*—See New York Central RR. above.—V. 129, p. 3471.

Union Pacific RR.—*New Director.*—David F. Houston, President of the Mutual Life Insurance Co., has been elected a member of the board of directors of the Union Pacific RR. Mr. Houston is also a director of the Delaware Lackawanna & Western RR., the Guaranty Trust Co., the American Telephone & Telegraph Co. and the New York Telephone Co.—V. 129, p. 3959.

Associated Telephone Utilities Co.—*Expansion.*

In its Pacific Coast expansion program for 1930, the Associated Telephone Co., Ltd., a subsidiary, will spend more than $2,000,000, most of which will go for improvements in the Los Angeles area, according to an announcement by officials. A 3-year program calls for the expenditure of more than $1,000,000 annually in the Long Beach area.

Betterments and additions planned for the year at Long Beach will total $1,571,000. A new central office building designed to eventually house four units of automatic equipment, involving an expenditure of $280,000 is being rushed to completion and will be put in service by early spring. The Long Beach additions are being hurried to meet the demands of three enterprises in that area which will have a total invested capital of $21,000,000.

At Redondo Beach, where a recent development in the United States Steel Co.'s western plant has caused a considerable increase in population, the Associated subsidiary plans to spend $362,500. The project includes an automatic telephone plant to replace the present manual system, together with a new central office building.

Construction of a $60,000 plant for the Associated properties is under way at Westminster, Cal., and will be in full operation, it is expected, early in July.

Bolsa, Midway City, Westminster, New Westminster and Barber City will all be incorporated in the new system. At present they are served by the Huntington Beach Exchange also owned by the Associated Telephone Utilities Co.

Additional cable facilities costing $20,000 are being installed at Pullman, Wash., by another subsidiary, The Interstate Utilities Co., to increase service for the 3,500 students at Washington State College there.—V. 130, p. 969.

Canada Electric Co., Ltd.—*Control.*—

See Central States Power & Light Corp. below.—V. 123, p. 1381.

Canadian Hydro-Electric Corp., Ltd.—*Continued Its Expansion in 1929.*—

The year 1929 was one of continued expansion and growth for this corporation, it is announced. Additional generators were placed in operation in its hydro-electric plants, new transmission and distribution lines were completed, substations were built, and a large amount of general miscellaneous construction work was carried through to completion during the year. These activities resulted in adding considerably to the installed capacity of the corporation's subsidiaries—Gatineau Power Co. and Saint John River Power Co.—to meet the growing demand for electric energy, and in further unifying and co-ordinating the distribution facilities of Gatineau Electric Light Co., Ltd., another subsidiary of the corporation.

Generators of an aggregate capacity of 83,000 h.p. were installed in the Farmers, Chelsea and Bryson hydro-electric plants of Gatineau Power Co. In the Farmers power house on the Gatineau River, the additional 24,000 h.p. unit raised its total installed capacity to 96,000 h.p. and the 34,000 h.p. generator started in the Chelsea station, a mile above Farmers, increased its installed capacity to 136,000 h.p. With the addition of these generators, the Gatineau Power Co. now has 439,000 h.p. installed and in operation in its four plants on the Gatineau River.

During the year, another storage dam on the upper Gatineau River was completed. The new dam, storing the water of Lake Cabonga, and the present Mercier storage dam, form reservoirs ranking with the large water storage systems of the world. The two reservoirs have a combined capacity of 145 billion cubic feet, or 1 2-3ds times that of the reservoir created by the famous Assouan dam on the Nile River in Egypt.

Located in the heart of one of the great timberland areas of Canadian International Paper Co., the Cabonga dam is 46 miles above the Mercier dam and forms a reservoir draining a territory of 1,150 square miles. The new reservoir materially assists the Mercier reservoir in regulating the flow of the Gatineau River. If no water went into the river from any other source the storage in the two reservoirs would permit the four plants below—at Corbeau Rapids, Paugan, Chelsea and Farmers—to operate at full capacity 10 hours a day for over 250 days, or about 10 months of working days.

On Aug. 21 the Gatineau Power Co. began to deliver to the Hydro-Electric Power Commission of Ontario additional electric power scheduled under contracts for delivery Oct. 1. By the middle of September, all of the power scheduled for delivery on Oct. 1 had already been taken. On Oct. 16, the Gatineau Power Co. began the delivery to the Commission of an additional 20,000 h.p. of electric power originally scheduled for delivery on Oct. 1 1930. Under its three contracts with the Commission, Gatineau Power is now delivering 182,000 h.p. of which 150,000 h.p. is being sent by the Commission in the Toronto area to supplement the power from Niagara Falls. The present deliveries of 182,000 h.p. to the Commission reflect an increase of 76,000 h.p. over the amount being delivered by Gatineau Power Co. a year ago.

Work was started on the new single circuit 220,000 volt Paugan-Chats Falls transmission line, this being a duplicate of the line that has been in operation since Oct. 1928, and will be used in conjunction with it for the contract requirements of the Hydro-Electric Power Commission of Ontario.

The third additional generator installed during the year in the plants of Gatineau Power Co. was in its Bryson plant located on the Ottawa River 50 miles above the city of Ottawa. The generator has a capacity of 25,000 h.p. and raises to 50,000 h.p., the installed capacity of the Bryson station. With the starting of the additional generator, the aggregate installed capacity in the plants of Gatineau Power Co. was increased to 562,600 h.p.

A new 110,000 volt transmission line connecting the Bryson plant with the Val Tetreau terminal station, in the city of Hull, was completed last year. The new line is a single-circuit steel tower line 49 miles in length and was built so that the whole system may operate at 110,000 volts. The original 66,000 volt line connecting the Bryson station with the rest of the system is being operated at 11,000 volts and will be used for distribution purposes. It is expected that several small municipalities will be connected to the line early this year.

Construction work on the Val Tetreau 110,000 volt switching station which was started in 1928, was finished last year. It interconnects 12 generating stations on the Ottawa River, the Gatineau River, and other tributaries, with a total installed 60-cycle capacity of 276,000 h.p.

During 1929 a new 110,000 volt transmission line was completed between Gatineau and Hawkesbury, Ontario. This is a single-circuit steeltower line—5½ miles in length. Two electric boilers were installed in the Hawkesbury bleached sulphite pulp mill of Canadian International Paper Co. bleached sulphite pulp mill of Canadian International Paper Co.

A new 13,200 volt transmission line was built from the L'Annonciation plant to St. Jovite, a distance of 32 miles.

In addition to changing the Bryson—Val Tetreau transmission line from 66,000 volts to 11,000 volts, Gatineau Electric Light Co., Ltd., in 1929 carried to completion a large number of other projects. New transmission and distribution lines were built throughout the various divisions of the system, the most important of which was the 13,200 volt aluminum line, 32 miles in length, constructed to serve Conception, Labelle and L'Annonciation. Substations were built in 1929 at the Chaudiere and Farmers power houses, and at Chelsea, Farm Point, Wrightville, Bois Franc, Bell Plago and L'Annonciation. The substation at Como was rebuilt and the one at St. Lin is also being rebuilt.

A retail store of Gatineau Electric Light Co., Ltd., was completed in St. Jerome, a sub-office was opened at St. Jovite and an extension was made to the store and office at Maniwaki. The street lighting system at Aylmer was entirely renovated and a street lighting system was installed at Angers.

Saint John River Power Co. during 1929 completed the installation of the second and third generators at its Grand Falls, New Brunswick, hydro-electric plant. These generators are 20,000 h.p. each and increased the installed capacity of the plant to 60,000 h.p. Toward the end of the year, the additional generators were tuned up to deliver power to the new Dalhousie newsprint paper mill of New Brunswick International Paper Co.

A transmission line connecting the Grand Falls plant and the Dalhousie Mill was also completed last year. Work on clearing the 100-foot right-of-way was started early in March and was practically completed by the end of June. The line is operated at 132,000 volts and is a steel tower line 104 miles long. The standard towers in the line are 60 feet high and 606 towers were required. The spans between the towers vary from 500 feet to 2,000 feet, the average span being 900 feet. The tower type in use on the line has only recently come into considerable favor in Canada for high voltage lines. The first line of this type, completed in 1928, was the transmission line from the Paugan hydro-electric plant of the Gatineau Power Co. to Toronto, which was also the first 220,000 volt line in the Dominion.—V. 130, p. 796.

Central States Electric Corp.—*Stock Dividend.*—

The directors have declared the regular quart. div. of 10c. in cash and 2½% in stock on the common stock, payable April 1 to holders of record March 5. Like amounts were paid on Oct. 1 1929 and on Jan. 1 1930.

The regular quarterly dividend of 1¾% on the 7% preferred, 1½% on the 6% preferred, $1.50 in cash or 3-32 of a share of common stock on the convertible optional preferred stock, 1928 series, and a quarterly div. of $1.50 in cash or 3-43 of a share of common stock on the convertible optional preferred stock, 1929 series, were also declared, all payable April 1 to holders of record March 5.—V. 129, p. 3634.

Central States Power & Light Corp.—*Bonds Sold.*—

An additional issue of $3,000,000 1st mtge. & 1st lien gold bonds, 5½% series due 1953, has been sold at 90 and int. by Chase Securities Corp., Pynchon & Co., West & Co., Central-Illinois Co., Inc., and W. S. Hammond & Co. Bonds are dated Jan. 1 1928; due Jan. 1 1953.

Data from Letter of H. C. Orton, President of the Corporation.

Business and Properties.—Corporation (organized in Delaware in 1925) furnishes electric light and power and (or) gas and (or) other public utility services to 128 cities and communities located in the States of Iowa, Kentucky, Louisiana, Minnesota, Mississippi, Oklahoma and Texas. Through subsidiaries, controlled by ownership of more than 99% of all outstanding stocks, it also serves 62 communities in the States of Alabama, Missouri, North Dakota and in New Brunswick, Canada. The total population of the territories served by the system is approximately 331,000 and its customers exceed 49,000. The combined annual electric output is about 28,000,000 k.w.h., the electric properties including seven steam generating generating stations, and 1,397 miles of electric transmission lines. Total annual sales of natural gas approximate 15,500,000,000 cubic feet.

In addition to the above described properties, the corporation is acquiring Canada Electric Co., Ltd., and the Eastern Electric & Development Co., Ltd., and directly and (or) through a subsidiary, the properties of Western Counties Gas Co. and the gas property of the Rubana Oil Co. The Canadian companies supply electric light and power to an important industrial and mining territory in northwestern Nova Scotia and to several communities in New Brunswick.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The properties being acquired from Western Counties Gas Co. and the Rubana Oil Co. comprise gas leases on 650 acres in central Oklahoma having wells with an open flow capacity of 26,000,000 cubic feet daily, together with transmission lines and distribution systems in eight towns where the corporation has franchises for retail distribution.

Capitalization—	*Authorized.*	*Outstanding.*
1st mtge. & 1st lien gold bonds, 5½% series	a	$13,500,000

Common stock (no par)	50,000 shs.	40,600 shs.

a Issuance of additional bonds restricted by provisions of the mortgage.

Earnings.—The consolidated condensed statement of revenue and expense for the 12 months ended Nov. 30 1929 of corporation and subsidiary and controlled companies, including the companies and properties being acquired as above stated, was as follows:

Gross earnings	$4,658,707
Operating expenses, maintenance and taxes (other than Federal and State income taxes) and minority interest in earnings	2,604,771
Net earnings (before interest, reserves, &c.)	$2,053,936
Annual interest requirements on $13,500,000 1st mtge. & 1st lien gold bonds, 5½% series due 1953 (incl. this issue)	$742,500

Net earnings (before interest, reserves, &c.), as shown above, were equivalent to over 2¾ times annual interest requirements.

Security.—Bonds are secured by a direct first mortgage on all real estate, plants, transmission lines, distribution systems and other fixed public utility properties of the corporation now directly owned (located in Iowa, Kentucky, Louisiana, Minnesota, Mississippi, Oklahoma and Texas), or hereafter acquired (subject, as to after-acquired properties, to prior liens within limits permitted by the mortgage), and by the pledge of all outstanding bonds and more than 99% of all outstanding capital stocks of subsidiaries owning properties situated in Alabama, Missouri, North Dakota and in Canada.

The properties owned by the corporation and its subsidiaries have been appraised by independent engineers, on the basis of cost to reproduce new, less physical depreciation, plus an allowance for "going concern value," at more than $21,000,000. Adding to this the value of the properties now being acquired, likewise appraised by independent engineers on the same basis, the total will be in excess of $24,000,000.

Purpose.—Proceeds of the present financing will be used to provide part of the funds with which to make payment for the properties being acquired, and for other corporate purposes.

Management.—Corporation has the benefit of the management of Utilities Power & Light Corp., through that corporation's control of its common stock.—V. 129, p. 278.

Chicago South Bend & Northern Indiana Ry.—*Depos.*

Holders of certificates of deposit representing the securities of the company affected by the reorganization plan are being notified by the reorganization committee to surrender their certificates in transferable form to the depository, The National City Bank of New York, and to pay $25 with respect to each $1,000 principal amount of bonds represented by certificates of deposit to the depository on or before March 1. Deposit of bond entitled to share in the plan will be accepted up to the close of business March 1. The securities affected by the reorganization include Northern Indiana Ry. 1st cons. mtge. 5% gold bonds, La Porte & Michigan City Traction Co. 5% 25-year 1st mtge. gold bonds and Chicago South Bend & Northern Indiana Ry. 1st mtge 5% 30-year gold bonds.

Securities of the Northern Indiana Ry., Inc., the new company, are expected to be ready for delivery on and after April 1.—V. 130, p. 796.

The New York Stock Exchange having received notice from this corporation of the declaration of a dividend of 25% on the common stock, no par value, payable March 31 to holders of record Feb. 28, the Committee on Securities rules that said common stock be not quoted ex, said dividend until April 1. (See V. 129, p. 3010.).—V. 130, p. 1112.

Commonwealth Edison Co.—*To Increase Stock, &c.*—

The stockholders will vote Feb. 24 on increasing the authorized capital stock from $150,000,000 to $200,000,000 and on increasing the number of directors from 9 to 13.—V. 130, p. 971.

Commonwealth & Southern Corp.—*Listing, etc.*—

The New York Stock Exchange has authorized the listing of 1,354,924 shares pref. stock $6 series (no par value) and 2,022,444 additional shares common stock (no par value) on official notice of issuance in exchange for securities of other companies, making a total applied for 1,354,924 shares of pref. stock $6 series and 51,632,065 shares common stock.

On Jan. 7 1930 directors approved a plan of merger and consolidation to be voted upon by the stockholders of the respective companies which, upon completion, will result in the issuance of pref. stock $6 series, common stock and option warrants of the Commonwealth & Southern Corp. for the pref. stock, common stock and option warrants of the following Companies: Allied Power & Light Corp., Commonwealth Power Corp., Penn-Ohio Edison Co. and Southeastern Power & Light Co. (See V. 130, p. 285.)

Announcement was made on Feb. 19 by the Commonwealth & Southern Corp. that its new preferred stock $6 series common stock and options are ready for issuance to the holders of preferred and common stock and options of the companies involved in the recent plan of consolidation and merger. Norice has been sent to such holders that they may receive certificates for the securities to which they are entitled, together with any cash adjustments of dividends on preferred stocks exchanged, by sending in their certificates to transfer agents, The Commonwealth & Southern Corp., 20 Pine St., N. Y. City. The preferred stock $6 series and additional common stock of the Commonwealth & Southern Corp. has been listed on the New York Stock Exchange.

T. A. Kenney and E. A. Yates have been elected members of the board of directors and vice-presidents of the Commonwealth & Southern Corp. Messrs. Kenney and Yates previously were vice-presidents and directors, respectively of the former Commonwealth Power Corp. and the Southeastern Power & Light Co.

The *Commonwealth Southeastern Corp.*, formed on Feb. 14 in Maine to take over the Commonwealth Power Corp., and the Southeastern Power & Light Corp., is a temporary vehicle to permit the merger of the latter two companies, which are Maine corporations, into the Commonwealth & Southern Corp., a Delaware company. The Commonwealth Southeastern Corp. is to be dissolved after the legal and practical details of the merger have been carried out. The new corporation was formed on Feb. 14 at Augusta, Me., with an authorized capital of 27,000,000 shares of common stock at $1 par and 1,000,000 shares of preferred stock, without par. The new corporation may also acquire the interests of the Allied Power & Light Corp., the Penn-Ohio Edison Co., and the Commonwealth & Southern Corp., all incorporated in Delaware, according to the notice filed with the Attorney General.

Officers of the new corporation are: President, Thomas W. Martin, Birmingham, Ala.; Vice-President, T. A. Kenney, Bronxville, N. Y.; Secretary, Stephen A. Dawley; Treasurer, H. G. Kessler.—V. 130, p. 1112.

Community Water Service Co.—1930 *Expenditures.*—

Approximately $3,000,000 will be extended in 1930 by this company for additions and improvements to the works of its subsidiary companies, Reeves J. Newsom, executive Vice-President of the Community system, announced. This construction program, including important projects in the Westchester County and Greenwich, Conn., units of the system, will be carried out without resort to additional financing, Mr. Newsom said.

"The largest single expenditure will be in the completion of the connections between the New Rochelle System and the Catskill Aqueduct," said Mr. Newsom. "These works will include 24-inch and 20-inch pipe lines, pumping stations, a reservoir, and standpipes which will enable the company to abandon the local Westchester reservoirs as its emergency supply. Other major projects include the connecting of the plants along the shore south of Boston into a combined system using one source of supply, the construction of works in new communities near Dedham, Mass., and Peoria, Ill., not previously served, the changing of the systems at Greensburg, Pa., and Marion, Ohio, and the suburbs of Camden, N. J., to furnish filtered water, and the beginning of the development of the additional sources of supply of the Greenwich, Conn. system."

The larger part of the total to be expended is for extensions of service to take care of the rapidly growing communities served by the company's subsidiaries.—V. 130, p. 136.

Hamilton Gas Co.—*Board of Directors.*—

At the annual meeting of the stockholders held Feb. 17 1930, the following directors were elected for the ensuing year: W. Angamar Larner (President), Arthur Peck (of Harper & Turner, Philadelphia), Douglas Thomas (Executive Vice-President of Baltimore Trust Co., Baltimore), Chester W. Larner (President of Larner Engineering Co., Philadelphia), Eugene L. Norton (of Norton & Co., New York), Charles M. Snaith (of Snaith & Collins, Weston, W. Va.), Louis A. Johnson (of Steptoe & Johnson, Clarksburg and Charleston, W. Va.), Philip V. R. Van Wyck (formerly Vice-President of New York Telephone Co., New York), Hugh Peters (of New York), and Wallace T. Perkins (Vice-President of Chatham & Phenix National Bank & Trust Co., New York).—V. 130, p. 1114.

Houston (Tex.) Lighting & Power Co.—*Bonds Offered.*—

Halsey, Stuart & Co., Inc., and W. C. Langley & Co. are offering at 97½, yielding about 5.19%, an additional issue of $2,000,000 1st lien & ref. mtge. gold bonds, series A 5%. Dated March 1 1923; due March 1 1953.

Data from Letter of S. R. Bertron Jr., President & General Manager.

Company.—Incorp. Jan. 8 1906 in Texas. Supplies electric power and light service in a growing and prosperous section of Texas to a total of 73 communities, including the City of Houston, which has been successfully served by the company for more than 20 years. Total population of the territory served is estimated at 358,000.

At Dec. 31 1929, the company served 89,622 electric customers, as compared with 48,526 at Dec. 31 1924, an increase of 84%. The output for the 12 months ended Dec. 31 1929, amounted to 510,247,000 k.w.h., as compared with 161,307,100 k.w.h. for the calendar year 1924, an increase of 216%.

The company's physical property includes installed generating capacity of 132,956 k.w. The principal generating plant is the Deepwater station which is located on a tract of land covering an area of more than 90 acres on the Houston Ship Channel, about 10 miles from the center of Houston. This station, which is one of the largest in the South, is designed and partially built for an ultimate capacity of 180,000 k.w. and it has a present installation of 100,000 k.w., consisting of one 35,000 k.w., one 25,000 k.w. and two 20,000 k.w. turbo-generators, together with boilers and all the necessary auxiliary machinery. Company has recently authorized for construction 47,000 kilowatts additional capacity. Three independent

33,000 volt transmission lines connect the Deepwater station with the company's Gable Street electric station in Houston and its distribution system, and these transmission lines are supplemented by a 66,000 volt network.

Company owns an extensive system of transmission and distribution lines, aggregating 2,016 miles, which radiates from the center of the City and extends from the Deepwater station into Harris County and 7 other adjoining counties, interconnecting all communities served. During 1929 the company made net additions of 111 miles to its distribution system and 214 miles to its high voltage transmission lines.

International Railway (Buffalo).—*Earnings.*—

Calendar Years—	1929.	1928.	1927.
Operating revenue	$10,975,851	$11,116,653	$11,192,908
Operation and taxes	9,036,143	9,086,823	9,733,797
Operating income	$1,939,708	$2,029,830	$1,459,111
Non-operating income	92,621	56,913	50,139
Gross income	$2,032,329	$2,086,743	$1,509,250
Fixed charges	1,292,128	1,352,998	1,440,341
Net income	$740,200	$733,744	$68,909

Note.—The net income for 1927 is after deducting $340,171 for amortization of intangible capital. The net income for 1927 before deducting amortization amounted to $409,080 which is the amount that should be compared with $740,200 for 1929 and $733,744 for 1928.—V. 129, p. 3011.

Interstate Public Service Co.—*Business Shows Increase.*

Sales of electric energy in the first 11 months' period of 1929 totaled 208,649,363 k.w.h., compared with 180,817,120 k.w.h. in the 11 month period of 1928, an increase of more than 15%.

Sales of gas in the first 11 months of 1929 were 598,798,100 cubic feet, compared with 572,185,900 cubic feet in the corresponding period of 1928, an increase of 4½%.

Pipe line connections with new sources of gas supply were recently completed. On Jan. 15, New Albany and Jeffersonville were supplied for the first time with gas purchased from the Louisville Gas & Electric Co. The Louisville company built a pipe line across the new municipal bridge over the Ohio river to Jeffersonville. This pipe line was connected with a line built by the Inter State company between Jeffersonville and New Albany. These two cities had previously been supplied by two gas manufacturing plants, one located in each town. As a result of this new arrangement, the towns are now interconnected and adequate and reliable service is assured through the company's contract for the purchase of gas from Louisville. The two local gas plants will be retained as standby units.

Martinsville is now being supplied with gas purchased under contract from the Indiana Consumers Gas & By Products Co., of Terre Haute. The Terre Haute company built a pipe line from Terre Haute to Martinsville where it connects with a line extending from Martinsville to Bloomington built by the Inter State. The Gas plant at Bloomington is being kept in commission as a standby unit.

The contracts for the purchase of gas from outside sources enable the company to meet the increased demand for service without additional expenditure for additions to its gas manufacturing plants in the three cities.

The Inter State electric railway business between Indianapolis and Louisville has increased substantially since the new railroad bridge across the Ohio River was completed last summer and operation of trains into the heart of Louisville resumed.

The Big Four railroad bridge over the Ohio River between Jeffersonville and Louisville has been rebuilt and the Inter State company, which has an operating agreement for trackage rights on the bridge, now runs trains from the center of Indianapolis to downtown Louisville without change. Eight limited trains are operated each way between Indianapolis and Louisville daily and parlor dining car and sleeping car service is maintained.

A new electric distribution center, one of the largest in southern Indiana, recently was placed in service by the company at Bloomington. A new substation, with a capacity of 15,000 kilowatts—more than double the former capacity at this point—distributes energy for the city of Bloomington and for the numerous quarries and mills in the Bloomington-Bedford limestone district. The substation is interconnected with a 66,000 volt transmission line from Indianapolis and with four 33,000 volt lines from Bedford and the Edwardsport generating plant.

Provisions for an additional source of electricity for Winamac and surrounding territory are being made by the extension of a power line from a point 5½ miles east of Star City to the line of the Northern Indiana Public Service Co. two miles distant. Electrical energy will be supplied to the town of Pulaski by Inter State. It will be furnished from the Monticello substation and carried to Pulaski on an extension of the Winamac Star City Line.

The Inter-State company, in a petition filed recently with the Indiana Commission, asks the approval of the purchase of the Columbus Gas Light Co., of Columbus, Ind.

The Commission late in 1929 approved the Indiana company's purchase of the electric substation and distribution system at Taylorsville, Ind., from the Taylorsville Light & Power Co. Inter-State had furnished current at wholesale to the Taylorsville company for some time.—V. 130, p. 620.

Jacksonville Traction Co.—*Earnings.*—

Calendar Years—	1929.	1928.	1927.

x Pursuant to order of Florida RR. Commission, retirement accruals must be included in monthly operating expenses on the entire property and beginning January 1927, such an accrual was included. Figures for 1927 have been adjusted to a comparative basis.—V. 128, p. 1396.

Louisville Ry.—*Plans Sale of $3,000,000 Bonds for Refinancing Proposal.*—

A plan to sell two power plants and all substations of this company to to the H. M. Byllesby Management & Engineering Co. for $3,000,000 and an underwriting of $3,000,000 in refunding bonds by a syndicate of five investment houses in Louisville have been announced for the refinancing of $6,000,000 in 1st mtge. 6% bonds due on July 1 1930.

In consideration of the plan worked out by James P. Barnes, President of the railway company, the company must sign a contract to buy its power from the Louisville Gas & Electric Co., a Byllesby subsidiary. Negotiations on the refinancing have been under way for some time and are said to be in a fair way to a successful issue. (New York "Times.")—V. 124, p. 2279.

—V. 129, p. 1592.

Manhattan (Elevated) Ry.—*Records on Fare Hearing Summoned.*—

Justice Bijur has issued an order calling on the Transit Commission to surrender to the Supreme Court all the records of the hearings it held on the Interborough Rapid Transit Co.'s application for a 10c-ent fare. The hearings of the Commission resulted in the disapproval of the application by that body.

The order gives the Commission 20 days in which to comply. The company's purpose in getting the records before the court is to obtain a review of the application for the increase, in the hope that the court will be more favorably impressed by arguments for the fare increase than was the Commission.

The request of the Interborough Rapid Transit for a 10-cent fare was filed with the Commission June 19 last and on Sept. 18 a decision was handed down by the Commission rejecting the petition. On Dec. 14 the Commission refused the company's request to reopen the case.

The rejection was based on the ground that the Interborough's application was in violation of restraining orders issued in the pending state court actions brought against the city and the Commission.—V. 129, p. 3800.

Midland United Co.—1½% *Stock Dividend.*—

The directors have declared a 1½% stock dividend on the common stock, payable on March 24 to holders of record March 1 1930. An initial distribution of like amount was made on this stock on Dec. 24 last.—V. 130, p. 798.

Milwaukee Electric Ry. & Light Co.—*Definitive Bonds.*

The Central Hanover Bank & Trust Co. announces that definitive ref. 1st mtge. 5% gold bonds, series B, will be available in exchange for outstanding temporaries on and after Feb. 24.—V. 129, p. 4138.

New England Power Association.—*January Output.*—

This association produced 156,137,000 k.w.h. of electric energy in January, a new high record for that month, 3% over January 1929, and 36% over January 1928. In the 12 months ended Jan. 31 the output of the association was 1,755,855,000 k.w.h., an increase of 24% over the 12 months ended Jan. 31 1929, and 55% over the 12 months ended Jan. 31, 1928.

The Association is expending $20,000,000 for construction work this year in New Hampshire, Vermont, Massachusetts and Rhode Island. This amount is approximately equal to the expenditure of the Association last year when 125 construction jobs were under way providing continuous employment throughout the year for a force of 2,750 men. The most important single construction project of the Association is its new 200,000 h.p. hydro-electric development on the upper Connecticut River at the Lower Fifteen Mile Falls site which will be in operation Oct. 1. This is the largest hydro-electric development scheduled for completion in the United States this year and will be the second largest hydro-electric station east of Niagara Falls.—V. 130, p. 973.

New York State Rys —*Protective Committees Formed for Utica & Mohawk Valley Ry. and Utica Belt Line Street RR.*—

Committees have been organized to protect the interest of the holders of the 4½% 40-year mtge. gold bonds of Utica & Mohawk Valley Ry., and

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

1st mtge. 5% 50-year gold bonds and 2nd mtge. 5% 40-year gold bonds of Utica Belt Line Street RR.

Oneida National Bank & Trust Co. of Utica; Citizens Trust Co. of Utica, N. Y.; Utica Trust & Deposit Co., and Utica National Bank & Trust Co. are named as depositaries.

All holders of these bonds are urged to deposit them immediately with one of the depositaries mentioned.

Utica Belt Line Street RR.—Committee.—Robert A. Middleton, C. Roy Newkirk, A. G. Miller, R. H. Balch and D. L. Mott.

Utica & Mohawk Valley Ry. Committee.—Edward D. Ibbotson, C. Loomis Allen, R. E. Crouse, A. James Eckert and O. Judd McKeown.

Charles W. Childs, 238 Genesee St., Utica, N. Y. is Secretary, and Dunmore, Ferris & Dewey, First National Bank Building, Utica, N. Y., are counsel for both committees.—V. 130, p. 973.

New York Telephone Co.—*Tenders.*—

The Guaranty Trust Co. of New York, trustee, 140 Broadway, N. Y. City will until March 28 receive bids for the sale to it of 30-year s. f. 6% gold deb. bonds, due Feb. 1 1949; to an amount sufficient to exhaust $337,429, at a price not exceeding 110 and int.—V. 130, p. 973.

Niagara Hudson Power Corp.—*Estimated Earnings.*—

Earnings of this corporation for the year 1929 were equal to approximately 60 cents per share, it is estimated by Waterman, Bonn & Co., members of the New York Stock Exchange. It is further estimated that net earnings for 1930 will be close to 90 cents per share. The St. Regis Paper Co., the largest single stockholder of Niagara Hudson Power Corp. will show total earnings for 1929 of between $1.25 and $1.50 per share, the firm states. Of the common stock of the St. Regis company 25% is owned by the Eastern States Power Co., a holding company.—V. 129, p. 3326.

North American Co.—*Expansion, &c.*—

President Frank L. Dame, in a letter to the stockholders, says:

Washington Rate Reduction.—Customers of Potomac Electric Power Co. in Washington, D. C. and vicinity will save $650,000 during 1930 as the result of the company's sixth consecutive annual reduction of electric rates, which took effect Jan. 1. Users of domestic service gain the largest proportionate benefit from the decreased rates, although the reductions are applicable to various uses of electricity. Household electric rates have decreased 53% since 1924.

Increased Facilities in California.—Construction of additional steam electric generating facilities will be started soon by San Joaquin Light and Power Corp. The capacity of the new unit will be 35,000 kilowatts and the cost of the building and equipment will be approximately $3,500,000. It is planned to use natural gas fuel from nearby gas fields, although the furnaces will be equipped to burn oil in case of emergency. The building will be of modern steel and concrete construction, and will be similar in design to the new steam electric generating plant at San Francisco which was placed in operation late in 1929 by Great Western Power Co. of California, another North American subsidiary. Work has been started on enlargement of the Merced Falls hydro-electric plant of San Joaquin Light & Power Corp., increasing the capacity from 500 to 3,500 kilowatts.

Progress of Missouri Hydro Project.—The $30,000,000 hydro-electric development at Bagnell, Mo., on the Osage River, which is to give the Missiouri-Illinois-Iowa system its second large hydro plant, is progressing rapidly. Housing facilities, roads, sewers, water system, hospital, refrigerating plant, school, &c., have been constructed and are in service, as is a temporary power plant of 3,000 kilowatts capacity which supplies service to the project. Excavation and cofferdam work for the spillway section are well under way. Approximately 18,000 acres of timber land in the reservoir section are to be cleared. Of this area, 7,000 acres are under contract for clearing. Initial capacity of this plant will be 129,000 kilowatts. Union Electric Light and Power Co. expects to start operation of the plant late in 1931.

New Construction in Ohio.—One of the most important construction undertakings of The Cleveland Electric Illuminating Co. during 1930, next to the new power plant which is being built near Ashtabula, will be a new 132,000 volt steel-tower transmission line, 69 miles in length. It will connect the Ashtabula plant with a new step-down substation at Northfield, where the current will be transformed for distrubtion in Great Cleveland. Work is progressing on the Ashtabula plant, the first three units of which, of 50,000 kilowatts capacity each, it is expected will be placed in service this year. Other construction during 1930 will include a third rotary converter in the Canal Road sub-station, built last year with the installation of two converters of 6,500 kilowatts capacity, and the enlargement of 16 substations in the Greater Cleveland area. There are more than 1,500 men employed on the company's construction work now under progress.

Developments in Wisconsin-Michigan.—The Wisconsin-Michigan subsidiaries are carrying forward according to schedule their programs of extending and improving public service facilities to meet the growing demands of the territories served. Major developments under way include engineering and other work preliminary to installation of a large steam electric generating station at Port Washington, Wis., by the Milwaukee Electric Ry. & Light Co.; addition of 75,400 kilowatts capacity at Lakeside power plant of Wisconsin Electric Power Co.; further extension of the high pressure gas system of Wisconsin Gas & Electric Co., and extension of electric service facilities into new territory by Wisconsin Michigan Power Co. On Jan. 21 the electors of Port Washington approved sale of their municipal electric generating plant to the Milwaukee Electric Ry. & Light Co. by a vote of 1,456 to 38. The Chicago, Milwaukee, St. Paul & Pacific RR. recently contracted to purchase from the Milwaukee Electric Railway & Light Co. the entire electric power requirements of its principal car and locomotive shops, located at Milwaukee. Present requirements are about 2,000 kilowatts, which soon will be increased materially on completion of a large shop addition. Wisconsin Gas & Electric Co. recently installed the largest bullet type high pressure gas holder in the United States. This holder, located at Waukesha, has a capacity of 354,000 cubic feet at 50 pounds pressure and serves as a storage reservoir for the company's 125-mile high pressure gas transmission line extending from Racine to Lake Mills and Whitewater.

Construction Budgets for 1930.—The North American Co.'s subsidiaries are providing for substantially increased expenditures during 1930 over 1929 for additions to plants and systems. Estimates of 1930 construction budgets aggregate upwards of $100,000,000 for new work authorized, including new projects and amounts carried over from 1929 in connection with large construction programs falling naturally into two or more calendar years. Of this amount it is estimated that about $57,000,000 will be expended during 1930, as compared with $50,000,000 expended during 1929.

Preliminary Consolidated Income Statement (Incl. Subsidiaries)

Pacific Northwest Public Service Co.—*Debentures Offered.*—Harris, Forbes & Co.; H. M. Byllesby & Co., Inc.; Halsey, Stuart & Co., Inc.; West & Co., and Albert E. Peirce & Co., Inc., are offering at 99½ and int. $16,000,000 6% convertible gold debentures.

Dated March 1 1930; due March 1 1950. Int. payable M. & S. at Harris, Forbes & Co. in N. Y. City or in Boston or Chicago. Callable in whole or in part on first day of any month on 30 days' notice at 100½ and int. through Sept. 1 1933; thereafter at 105 and int. through Sept. 1 1938; thereafter at 102½ and int. through Sept. 1 1943; thereafter at 101 and int. through Sept. 1 1949, and thereafter prior to maturity at 100 and int. Denom. $1,000 c*. Harris Trust & Savings Bank, Chicago, trustee. Company will agree to pay interest without deduction for any Federal income taxes not exceeding 2% per annum which it may be required or permitted to pay thereon or retain therefrom, and to reimburse the holders of these debentures for Pa., Conn., Md., Calif., Mass., Vt. or N. H. taxes of the character to the extent and upon the conditions provided in the indenture.

Data from Letter of Pres. Franklin T. Griffith, Dated Feb. 19 1930.

Company.—Incorp. in 1906 as Portland Ry., Lt. & Power Co., which name was later changed to Portland Electric Power Co. Will be an operating subsidiary of Central Public Service Corp. and will furnish, directly or through subsidiaries, light and power in Portland and over 75 other communities in western Oregon, conduct the gas business in Seattle, Wash., and operate city and interurban railway lines in Portland and adjacent territory. Company and its subsidiaries will serve over 107,000 electric customers and 60,000 gas customers located in a territory having an estimated population in excess of 800,000.

Properties.—Company's electric generating capacity aggregates 190,000 h.p., of which 115,000 h.p. is located in 6 hydro-electric plants and 75,000 h.p. in 3 reserve steam stations. To provide for the company's future power requirements, the hydro-electric station on the upper Clackamas River, which has at present an installed generating capacity of 35,000 h.p., has been designed for an ultimate capacity of 105,000 h.p. The major part of the electric output of the company is hydro-electric. The 3 reserve steam stations produce auxiliary power when required, and are located in a territory where a plentiful supply of wood waste from the large sawmills is available for fuel.

The transmission system of the company and its subsidiaries embraces over 800 miles of high-tension transmission lines which interconnect the hydro-electric plants and steam stations with 18 sub-stations located at the important load centres. Through interconnection with other large power companies, its transmission system forms an integral part of an extensive superpower system, extending from Seattle, Wash., to San Diego, Calif. Company supplies approximately three-quarters of the electric energy consumed in Portland and operates exclusively in the other communities served in Oregon, including Salem, Oregon City, Newberg and Hillsboro. Company's railway property includes 292 miles of track, of which 190 miles comprise the city railway system in Portland and 102 miles are interurban lines.

Through a subsidiary, Seattle Lighting Co., gas will be manufactured and distributed in Seattle, Wash. The gas manufacturing plants in Seattle have a rated capacity of 12,500,000 cu. ft. per day, and distribution is effected through 919 miles of gas mains.

Purpose.—Proceeds will be used to retire $6,935,000 of funded debt of the company maturing in 1930, to purchase substantially all of the common stock of Seattle Lighting Co. and for other corporate purposes.

Capitalization to Be Outstanding with Public (After Present Financing).

Common stock (no par)	x150,000 shs.
Preferred stocks (par or liquidating value)	y$25,121,900
6% convertible gold debentures, due 1950 (this issue)	16,000,000
1st lien & ref. mtge. bonds, 5½, 6 and 7½%, due 1946 to 1951	21,559,800
1st & ref. mtge. bonds, 5% due 1942	8,510,800
Divisional bonds, 5% due 1935	6,877,000
Subsidiary companies' bonds and preferred stocks	12,796,200

x 148,936 shares to be owned by Central Public Service Corp.
y Includes $174,900 stock subscribed for on partial payment plan.

Earnings.—The consolidated earnings of the company and its subsidiaries, including Seattle Lighting Co., for the 12 months ended Nov. 30 1929 and annual charges, after giving effect to the present financing and the application of the proceeds thereof, were as follows:

Gross revenues and other income		$15,510,315
Operating expenses, maint. and taxes (except Federal)		9,302,343
Net earnings before int., deprec., dividends, &c		$6,207,972
Annual interest and dividend requirements on sub. cos' bonds and pref. stocks and mtge. debt of the company to be outstanding (less $149,333 credit for int. during const.)	$2,639,013	
Annual int. requirements on this issue of debentures	960,000	3,599,013
Provision for depreciation		838,658

Net earnings, as above, were over 1.7 times the annual interest and dividend requirements on sub. cos' bonds and pref. stocks and the total funded debt of the company to be outstanding with the public on completion of this financing. Net earnings, as above, after deducting annual interest and dividend requirements on sub. cos' bonds and pref. stocks and annual interest requirements on the mtge. debt of the company, as above, were $3,568,959, or approximately 3.7 times the annual interest requirements on these debentures, and after deducting $838,658 for depreciation, were over 2.8 times the annual interest requirements on these debentures.

Conversion Privilege.—Under arrangements made with Central Public Service Corp., these debentures will be convertible at the holders' option, subject to the indenture provisions regarding certain stock dividends, stock offerings, recapitalization, successor corporations, &c., into 25 shares of class A stock of Central Public Service Corp. for each $1,000 of debentures at any time on or after Sept. 1 1930 and before Sept. 1 1933, with adjustments for interest and dividends. Debentures called for redemption either prior to or during the conversion period may be converted up to but not after the tenth day before the date set for redemption.

Upon the exercise of the conversion privilege, debentures must be presented at the office of the trustee under the indenture in Chicago, and class A stock will be delivered therefor within 30 days (or less, at the option of Central Public Service Corp.) after surrender of debentures.

Pacific Telephone & Telegraph Co.—*Rights.*—

The directors have authorized issuance of rights to purchase one additional share of common stock at $100 per share for each two shares of either preferred or common stock held of record March 7. Subscription privileges expire March 31 and may be made on installment plan.—V. 130, p. 1115.

Portland Electric Power Co.—*Changes Name.*—

See Pacific Northwest Public Service Co. above.—V. 130, p. 974.

Public Service Co-ordinated Transport.—*Acquisition.*—

Public Service Corp. of New Jersey.—*Acquires Yellow Cab, Inc., of Newark.*—

Control of Yellow Cab, Inc., of Newark, through the purchase of a majority of its capital stock, has been acquired by the Public Service Co-ordinated Transport, a subsidiary of the Public Service Corp. of New Jersey, according to an announcement made by M. R. Boylan, Vice-President of the transport company. As soon as details are arranged the new management will take over the active operation of the business. The cab company operates in Newark, East Orange, West Orange, South Orange, Maplewood, Bloomfield, Glen Ridge, Montclair, Harrison, Kearny, Elizabeth and Roselle Park.

"While some changes will be made in administration and operating details," said Mr. Boylan, "so far as the public is concerned there will be no

1930 Expansion.—

Nearly $27,000,000 has been authorized for the 1930 budget for this company, an operating subsidiary of the Public Service Corp. of New Jersey. This provides for new construction, extensions, improvements and betterments for both the electric and gas departments throughout the company's territory in New Jersey.

The major part of the funds for the electric department will be spent for extensions and reinforcements to the distribution system. More than $5,000,000 will be used for the construction of five new sub-stations, as well as the reconstruction of existing equipment in a number of present sub-stations.

The sum of $2,700,000 has been provided for reinforcing electric distributing lines and for the construction of underground conduits in all parts of the system.

In addition to these projects, about $2,500,000 will be spent in the generation department for replacements and improvements in power houses and new buildings.

Principal construction projects for the gas department involve an expenditure of nearly $5,000,000.

Record Sales.—

Sunday (Feb. 16), the coldest day of the winter so far, was marked by the gas department of this company, a subsidiary of the Public Service Corp. of New Jersey, by the largest send-out of gas in the company's history. In 24 hours 98,149,000 cubic feet were supplied to consumers. The largest previous days' output was on Jan. 19 of this year when 93,233,000 cubic feet were consumed.—V. 130, p. 974.

Seattle Lighting Co.—*New Control.*—

See Pacific Northwest Public Service Co. above.—V. 130, p. 623.

Shawinigan Water & Power Co.—*Bonds Offered.*—

An additional issue of $15,000,000 1st mtge. & Coll. trust sinking fund gold bonds, series C, 5%, is being offered at 98 and int., to yield over 5.10%, by Aldred & Co.; Brown Brothers & Co.; Lee, Higginson & Co.; Alex. Brown & Sons; Jackson & Curtis, and Minsch, Monell & Co., Inc. A banking group in Canada is offering a substantial amount of the above bonds.

Dated Feb. 1 1930; due Feb. 1 1970. Denom. $1,000 and $500c*. Principal and int. (F. & A.) payable, at holder's option, in N. Y. City in United States gold coin, in Montreal in Canadian gold coin or in London in pounds sterling at $4.86 2-3. Callable on 30 days' notice as a whole at any time, or in part on any int. date, at 106 and int. on or before Feb. 1 1935, premium thereafter decreasing 1% each 5 years to 1960, therafter at 100½ and int. to 1965, and thereafter without premium. Montreal Trust Co., trustee.

Capital Outstanding (Upon Completion of Present Financing).

Capital stock (no par value)	2,178,250 shs.

Data from Letter of Julian C. Smith, Vice-Pres. of the Company.

Business.—Company is one of the largest producers of hydro-electric power in the world. It owns, or controls through stock ownership or through contracts with affiliated companies, water powers and hydro-electric power in the Province of Quebec, aggregating over 2,000,000 h.p. Of this 803,650 h.p. is developed and in use and 55,000 h.p. additional is scheduled for installation during 1930.

The company owns 1,485 miles of high tension transmission lines, including lines to Montreal and the City of Quebec. In addition, 2,053 miles of distribution lines are owned or controlled. Electricity is furnished to 368 communities, comprising substantially all the larger cities and manufacturing districts in the Province of Quebec. Total population of territory served is approximately 2,400,000.

Security.—Secured by direct first mortgage on the company's lands, rights in lands, water powers, dams, power houses and transmission lines owned Oct. 1 1927, or since acquired and made the basis of issue of additional bonds; by pledge of certain first mortgage bonds of lelectric and manufacturing companies now controlled; and by a floating charge on all other assets now owned or hereafter acquired. Additional bonds are issuable under restrictions of the mortgage. Except as otherwise therein provided, the lien of the mortgage will not extend to other property or securities not made the basis of issue of additional bonds.

Total book value of properties (after depreciation) and securities covered by $66,107,500 bonds to be outstanding, will be more than $86,000,000, of which more than $70,000,000 comprises properties on which these bonds will be a direct first mortgage. Actual value of properties considerably exceeds book values. Total fixed assets (after depreciation) and securities owned, at book values, exceed $143,000,000; total funded debt, upon completion of this financing, will be $73,977,000.

Earnings Year Ended Dec. 31.

	Gr. Earns.	a*Net Earns.*	b*Int. Chgs.*	*Balance.*
1925	$6,702,034	$3,700,877	$1,334,538	$2,366,339
1926	7,660,207	4,417,067	1,459,744	2,957,323
1927	9,362,828	4,932,276	1,637,493	3,294,783
1928	11,562,331	7,098,523	2,250,000	4,848,523
1929	13,475,863	8,765,733	2,857,754	5,967,979

Note.—a Before depreciation and income taxes applicable to interest charges.

b Includes interest charged to capital account.

Net earnings for 1929 as above were $8,765,733, or 2.54 times the $3,450,610 annual interest on total funded debt to be outstanding upon completion of present financing.

Sinking Fund.—Sinking fund of 1% per annum on largest amount of first mortgage and collateral trust bonds outstanding in each year, is to be used for purchase or call and retirement of bonds issued under this mortgage.—V. 130, p. 1107.

Southern Bell Tel. & Tel. Co.—*Acquisitions.*—

The I.-S. C. Commission Jan. 28 approved the acquisition by the company of the properties of the Hartsville Home Telephone Co.

On Oct. 19 1929 the Bell company contracted to purchase the physical telephone properties of the Hartsville company, free from all liens and encumbrances, for $1,056.

The Commission Jan. 25 approved the acquisition by the company of certain telephone properties of John W. Miller, doing business as the Mesquite Telephone Co.—V. 129, p. 3327.

Southern California Edison Co.—*To Reclassify Preferred Stock—Rights.*—

The stockholders will vote on March 21 to approve amendments to the articles of incorporation, providing for a change of name from the present designation to the Southern California Edison Co., Ltd., a reclassification of the preferred stock by increasing the preferred stock, series B 6%, from $50,000,000 to $53,000,000, and the 5½% preferred, series C, from $45,000,000 to $66,000,000, at the same time reducing the 7% preferred stock, series A, from $30,000,000 to $27,000,000 and eliminating all of the $21,000,000 preferred stock, series D 5%, none of which has been issued. The two latter changes apply only to unissued stock. The life of the corporation has been extended from July 6 1959 to Dec. 31 1979, subject to the written consent of the stockholders.

The directors have authorized the issuance and sale of 283,000 shares of common stock to holders of common and (or) original preferred stock, at par, payable in cash. Each holder of common and (or) original pref. stock of on Feb. 28 1930 may subscribe for and purchase such common stock between March 25 1930 and April 21 1930 inclusive, at the rate of one share for every ten shares of common and (or) original pref. stock owned by the stockholder on Feb. 28 1930. No fractional shares will be issued.

To subscribe for and purchase shares, warrants must be surrendered between March 25 1930 and April 21 1930 incl., to Bankers Trust Co., 16 Wall St., N. Y. City, or to the Investment Department of the company, 306 West Third St., Los Angeles, Calif., accompanied by payment in full. Stockholders entitled to participate residing or sojourning in Alaska, Hawaii, Philippine Islands or foreign countries, except Canada and Mexico, will be permitted to subscribe for and purchase shares between March 25 1930 and May 31 1930 incl., provided, however, that in the event the purchase price shall be received after April 21 1930, interest at the rate of 8% per annum on the full purchase price from April 21 1930 to the date the same is received, shall be paid in addition to the purchase price.

New Bond Issue Authorized.—

The company's refunding mortgage gold bonds, series 5s, due in 1954, in the amount of $5,000,000, will be made available immediately, according to an announcement made last week by President R. H. Ballard, following information that the proposed issue had received the approval of the California RR. Commission.

No syndicate or underwriting will be employed in the distribution of these bonds, Mr. Ballard said. They will be marketed locally by the company's investment department in the same way as the company's stock. This department had recently completed the sale of $2,000,000 of similar bonds by this method of day-by-day over-the-counter sales, Mr. Ballard explained. "Money realized from the sale of these bonds will be applied to our construction budget of $23,601,058 for the extension of distribution facilities to care for the great amount of new business in prospect," Mr. Ballard stated. "We are planning to increase our total consumers' connected load 15% during 1930 and, while the year has barely started, we are convinced that our goal will be attained."—V. 130, p. 1115.

Standard Gas & Electric Co.—*Executive Committee.*—

President John J. O'Brien announces the appointment of an executive committee by the board of directors. The committee is composed of Mr. O'Brien, Chairman; A. C. Allyn, Victor Emanuel, Halford Erickson, Robert J. Graf and B. W. Lynch.—V. 130, p. 623.

United Corp.—*Sells Pref. Stock Holdings in United Gas Improvement Co.*—

In connection with the offering of 94,360 shares $5 pref. stock of the United Gas Improvement Co. (see below) it is understood that the shares offered are those which were received by the United Corp. in the recapitalization of the United Gas Improvement Co. The United Corp., it is believed, is retaining its interest in all the United Gas Improvement common stock acquired by it.

Last August stockholders of the United Gas Improvement Co. approved a recapitalization plan which provided that the old $50 par value com. stock be converted into 5 shares of no par common and one-eighth of a share of new $5 pref. stock for each share of old common.—V. 130, p. 459.

United Gas Improvement Co.—*Pref. Stock Offered.*—Drexel & Co. and Bonbright & Co., Inc., are offering 94,360 shares $5 div. pref. stock (no par value, non-voting). Price (ex-div. payable March 31 1930) $97.50 per share less an amount equal to int. at the rate of 5% per annum based on $100 per share from the date of payment to March 31 1930. The offering involves no new financing on the part of the company.

Transfer agents: J. P. Morgan Co., New York, and office of the company, Philadelphia. Registrars: Guaranty Trust Co. of New York, and Fidelity-Philadelphia Trust Co., Philadiphia. Dividends payable Q.-M. Preferred as to $5 cum. divs. and as to assets up to $100 pre share over com. stock. Red. all or part at any time upon 30 days' notice at $110 per share and divs. Dividends exempt from the present normal Federal income tax, free of present Penna. 4 mills personal property tax.

Capitalization—	*Authorized.*	*Outstanding.*
$5 dividend preferred stock (no par)	*5,000,000 shs.	506,396 shs.
Common stock (no par)	35,000,000 shs.	22,555,390 shs.

* Dividend rates and redemption terms may be changed (but not to exceed $8 per annum or $120 per share respectively) in respect to any portion of authorized, but unissued preferred stock with consent of majority of stockholders entitled to vote.

Data from Letter of John E. Zimmerman, Pres. of the Company.

Business.—Company was organized in 1882, and is among the oldest public utility holding and investment companies in the United States. It is also active in the operation and management of public utility properties. During 1929 the gross operating revenues of its utilitity subsidiaries were derived approximately 75% from electric light and power, 18% from gas and 7% from other sources.

The company's utility subsidiaries serve communities with a total population estimated at over 5,500,000 and furnish electric service in Philadelphia and adjacent territory in southeastern Pennsylvania; in Wilmington, Newark and the northern section of Delaware; in extensive territory in Connecticut, and in Erie, Pa.; Delaware and Marion, O., and Prescott, Ariz. Such subsidiaries also furnish gas in southeastern Pennsylvania adjacent to Philadelphia; in New Haven, Waterbury and other communities in Connecticut; in Hazleton, Kingston, Allentown, Bethlehem, Lebanon, Reading and Harrisburg, Pa.; Nashville, Tenn.; Concord, N. H., and Prescott, Ariz. The company through a subsidiary manages the municipal gas works of the city of Philadelphia. Street railway and bus service is furnished in Wilmington and Newark, Del., and in Media and Chester, Pa.

Company owns over 30% of the com. stock of Public Service Corp. of New Jersey, and also has large stockholdings in Niagara Hudson Power Corp., the Commonwealth & Southern Corp., Midland United Corp. and other companies.

In addition, the company and Public Service Corp. of New Jersey together own the entire capital stock of United Engineers & Constructors Inc., one of the large construction and engineering corporations in the country.

Airport Lighting, Inc.—*Makes Important Contract.*—

The corporation announces the completion of a contract with the General Electric Co., under the terms of which the latter company becomes the manufacturer of the Airport company's special equipment. A basis of reciprocal sales policy is embodied in the contract, so that the General Electric Co. will actively assist in the promotion of sales and generally recommend and catalog the system of Airport Lighting, Inc., while the latter company will act as a National dealer for the General Electric Co., quoting, recommending and selling all standard General Electric equipment applicable to the wiring and illumination of airports, parallel with its own.

Material benefits and extensive activity are expected as a result of the close co-operation of the two companies, this combination covering every phase of airport illumination, and permitting the rendering of a heretofore unachieved standard of service to the terminal and intermediary landing points of the aviation industry.

Airport Lighting, Inc., was organized during August 1929 for the purpose of annufacturing and installing at airports a system of night lighting known as the "Donaldson Automatic Night Landing System." The company has acquired all the issued and pending patent rights of Lt. John Shearman Donaldson, the inventor, to this system together with any future improvements and inventions relating to the same.

All airports, to obtain a rating permitting night flying, must provide for adequate night lighting; and the successful operation of airports, especially because of the rapid increase of both air mail, fast freight, and passenger lines operating on night schedules and the increasing use of privately owned 'planes, necessitates the installation of efficient lighting equipment to assure the utmost safety in night flying.

The Airport Lighting, Inc. system of ground lighting for airplanes removes much of the hazard of night landing. It comprises rows of lights set flush with the surface of the ground which provide non-glaring vertical beams of light at established intervals which positively identify to the pilot the location and ground level of the landing runway. Automatic means are provided to illuminate and signal the proper direction of approach to the runway best adapted by wind conditions for the landing.

The system has been in practical operation since last October at the Grosse Ile airport of the Detroit Aviation Corp. at Detroit, and at the Aviation Country Club at Hicksville, Long Island. To date over 100 airports throughout the United States have indicated their intention of installing the Airport Lighting, Inc. system in the near future.

Recent Department of Commerce statistics state that there are over 1,500 operating airports in the United States. Of these but 280 are lighted and partially equipped for night service. Applications are pending for 1,278 additional airports planned or under construction.

The magnitude of this recent development is best indicated by the estimates that over $350,000,000 has been expended on airport development during the past two years and that a further sum of approximately $300,000,000 will be expended on airport development during 1930.

The necessity for the above expansion is demonstrated by the following figures, compiled by Clarence M. Young, Assistant Secretary of Commerce, illustrating the progress of activities of the air services in 1928 and 1929, respectively:

	1929.	1928.
Miles flown	16,000,000	10,673,000
Passengers carried	85,000	49,000
Established airway mileage	35,000 miles	16,000 miles
Mail carried	8,000,000 lbs.	4,000,000 lbs.

Miscellaneous flying increased from some 18,000,000 miles in 1926 to 30,000,000 in 1927, 60,000,000 in 1928 and 125,000,000 in 1929.—V. 129, p. 1284.

Airstocks, Inc.—*To Dissolve.*—

The holders of voting trust certificates have been notified that the voting trustees have elected to terminate the voting trust agreement dated Jan. 1 1929. The agreement will be terminated on Feb. 24 1930.

Steps have been taken to dissolve the company, and it is anticipated that the dissolution will be completed, and that the amounts to which stockholders are entitled by way of final liquidating dividend will be available for distribution not later than March 7 1930.

White, Weld & Co., in a letter to the voting trust certificate holders, dated Feb. 13, state:

During January 1929 we caused the formation of your company in Delaware, in response to a demand from many of our clients for a medium through which stockholders might participate, with a diversified risk, in the development of aviation and allied industries, and might share in speculative commitments in these fields under a management in active touch with conditions.

The management has operated with recognition of the hazards of speculation in aviation securities, and, by reason of its intimate touch with its field, so handled its portfolio that it was largely uninvested at the time of the break in prices of aviation and allied stocks.

The paid-in capital and surplus arising from the issue and sale of capital stock aggregated $5,200,000; voting trust certificates representing 28,743 shares have been repurchased for a total of $1,310,121 by the company under the provisions of the certificate of incorporation and in the market. Deducting this latter sum from the $5,200,000 of paid-in capital and surplus, leaves a balance as of this date of $3,889,879, which is equivalent to $45.09 per share now outstanding. The present liquidating value is approximately $46.85 per share, a special dividend of $1 per share having been paid on Jan. 2 1930.

There are at the present time 86,257 shares outstanding, of which White, Weld & Co. own 47,076 shares acquired through purchase in the market and through exercise of options.

It is our intention to liquidate our holdings in the company, and it is our view that because of the moderate capital which would thereafter remain, the company should be dissolved and entirely liquidated by the distribution pro rata of the net assets of the company to the respective stockholders, including ourselves.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The board of directors and the voting trustees in accordance with their powers under the certificate of incorporation and the voting trust agreement, have taken appropriate action to cause the company to be dissolved, which dissolution we expect will become effective on or about Feb. 26 1930. The securities owned will be sold and such distribution will be made entirely in cash.

Allied Motor Industries, Inc.—*Sub. Co. Contract.*—

The Henney Motor Co., a subsidiary, announced on Feb. 14 the closing of a contract with the Auto-Lite Electric Co. of Toledo, undeer the terms of which the Ohio company will manufacture a special reversible electric motor for the operation of the patented three-way service table in Henney hearses. The motor will be unusually small in size but of exceptional power, it was stated.

"We could find no one to build these motors for us," said John W. Henney, President of the Henney company, "until we opened negotiations with the Auto-Lite company. Throughout 1929 we manufatcured the motor ourselves. The product was entirely satisfactory but the work was of a kind to which our plant is not adapted and we felt that, in the long run, it would be more economical to have the motors constructed by a company specializing in this work despite the heavy initial cost due to the necessity for creating special jigs, dies and tools. This work has now been done and our association with the Auto-Lite company assures us a permanent source of supply at whatever rate of production we may require."

Weatherproof Body Corp. Reports Sales Record.—

The Weatherproof Body Corp., associate of Allied Motor Industries, Inc., which manufactures truck cabs, bodies for commrecial motor vehicles and wood and metal parts for automobiles, reports net sales for January of $105,057, setting a new high record for this month and 13% more than those of Jan. 1929, which reached $93,117 and were more than twice the total of $45,340 attained in Jan. 1928. Record business for January continues the pace set last year when the company reported net sales of $2,315,199, or more than double its previous best year. E. C. Morine, President of Weatherproof Body Corp., said that the outlook for 1930 justified the hope that the year might again establish a record for net sales.—V. 130, p. 1117.

Alliance Investment Corp.—*Dividends.*—

The directors have declared the quarterly dividend of 20c. per share on the common stock, and a semi-annual dividend of $3 per share on the pref. stock, both payable April 1 to holders of record March 14 1930.

The fourth dividend of 1% in common, payable on the common stock, previously declared by the directors will be payable April 1, to holders of record March 14 1930. See also V. 129, p. 3328.

Earnings for Year Ended December 31 1929.

American Rolling Mill Co.—*Expansion.*—

President Charles R. Hook announces that this company has arranged with John Summers & Sons Co., Ltd., to manage and operate as an Armco unit the specialty sheet division of the Summers company's plant at Shetton, Chester, England.

John Summers & Sons Co., Ltd., are large producers of sheet steel, and have been associated with the American company for some years through license agreements covering the manufacture of Armco ingot iron, and dating from before the war.

The specialty sheet division of the Shetton Works, now to be put under Armco management, was only recently built, is of modern design and is laid out for rapid and convenient increase in capacity to whatever extent the growth in British demand for automobile and other high finish sheets may acquire.

In France, Armco is associated with Cie de Forges de Neuves Maisons at Chatillon and with others, and in Germany the Armco-Eisen, G. m. b. H., of Cologne, a subsidiary of the Armco International Corp., is operating under an agreement with the United Steel Co. of Germany—the Vereinigte Stahlwerke of Dusseldorf.

Operations in England under Armco management will be initiated promptly as the working organization is leaving Middletown, Ohio, before March 1.—V. 130, p. 291.

Bankers National Investing Corp.—*1% Stock Dividend*—Clarence Hodson & Co., Inc., announce that the Bankers National Investing Corp. has declared the regular quarterly dividend of 25 cents per share and 1% in stock on the common stocks, class A and class B, payable Feb. 25 to holders of record Feb. 17. Initial dividends of like amounts were paid on Nov. 25 last.—V. 129, p. 3476.

Bethlehem Steel Corp.—*To Change Date of Annual Meeting.*—The 25th annual meeting of the stockholders will be held on April 1, it is announced. Five directors will be elected for a term of three years, and the stockholders will vote on an amendment to the by-laws to change the date of the annual meeting to the second Tuesday in April instead of the first Tuesday as at present. Proxies are being solicited in the names of Charles M. Schwab, Eugene G. Grace, Grayson M.-P. Murphy, William C. Potter and Jercy A. Rockefeller.

Relief to Empolyees.—Benefits totalling $1,008,465 were paid last year to sick and disabled employees and dependents of deceased employees of this corporation and its subsidiaries, according to the fourth annual report of the company's relief plan just published.

In the 12 months' period ended Dec. 31 1929, there was paid out $484,016 in death benefits on account of 723 deaths and $524,449 in disability benefits to 8,774 participants on account of sickness or non-industrial accidents.

Since its inauguration on June 1 1926, $3,215,069 has been paid out under the Relief plan, which was adopted by Bethlehem in order to provide a uniform scale of benefits for all of its employees and their dependents.

The plan is open to all employees of the corporation in the United States, and at the end of 1929 over 96% of the eligible employees had elected to participate.—V. 130, p. 978.

Bloomingdale Bros., Inc.—*To Increase Board.*—A special meeting of stockholders has been called for Feb. 26 to vote upon the increase of the directorate of the company from 9 to 11 members and to amend the certificate of incorporation accordingly.—V. 130, p. 978.

a After deducting depreciation of $1,584,681. x Represented by 239,012 shares of no par value. y Includes $1,500,000 available for pref. dividends and sinking fund and to increase stated capital. z 23,603 shares, par $100, stated at preference value of $110 per share.—V. 129, p. 2861.

Bolsa Chica Oil Corp.—*New Ctfs. Ready.*—The California Commissioner of Corporations has authorized the corporation by supplemental permit dated Jan. 18 1930, to issue new stock certificates of the new $10 par value in exchange for old certificates of $1 par value. This applies to both A and B stock. One share of the $10 par stock will be issued in exchange for each 10 shares of $1 par stock.

The corporation has appointed the Farmers & Merchants National Bank of Los Angeles as transfer agent for both the class A and class B common stock, and such transfer agent will actually make the exchange of stock of the new $10 par value for stock of the old $1 par value. No certificates for fractional shares of the $10 par stock will be issued by the corporation. Any stockholder who would otherwise be entitled to receive a fraction of a share of either A or B stock (in addition to the total number of whole shares to which he is entitled) will receive in lieu thereof a scrip certificate for such fractional share which may be sold or which may be surrendered with other similar scrip certificates (purchased or otherwise obtained by such stockholder) in exchange for certificates for whole shares of stock. Such scrip certificates will be "bearer" certificates transferable by delivery and will be exchangeable for stock certificates only when surrendered in amounts aggregating one or more whole shares and only when so surrendered on or before Aug. 31 1930.

The reason for the change in the par value of the stock is the requirement of the Los Angeles Sotck Exchange that all par value stock listed on the Exchange have a par value of $10 or more. After Feb. 15 1930, the old stock of this corporation will not be transferable to other parties upon the stock books of the corporation and only the new stock will be so transferable. After Aug. 31 1930, no further scrip certificates will be issued for fractional shares and only stock certificates for whole shares of the new $10 par stock will be issued.

Transfer books of the corporation will be closed from Feb. 15 to Mar. 10 1930, inclusive, for the purpose of exchanging the old stock into the new.

At the special meeting of the stockholders held on Dec. 5 1929, (a) The number of common A stock was reduced from 4,000,000 to 400,000 and the par value of the shares increased from $1 to $10 per share; (b) The number of shares of common B stock was reduced from 1,000,000 to 100,000 and the par value of the shares increased from $1 to $10 per share.

The regular quarterly dividend of 2% on the "A" stock will be paid April 15 to holders of record March 31. Payment of this dividend will be one month later than usual, due to the fact that transfer books are closed from Feb. 15 to March 10 to permit the exchange of the old $1 par stock for the new $10 par. Books will be opened again March 11 to March 31 to permit transfers preceding the dividend, but will be closed again for 10 days after March 31.—V. 129, p. 3803.

—V. 128, p. 1231.

Borg-Warner Corp.—*Acquisition.*—This corporation, through its subsidiary, the Galesburg Coulter-Disc Co., on Feb. 13 announced the acquisition of the assets of Chicago Rolling Mills, Inc., located in West Pullman, Ill. Preferred stock of the Borg-Warner Corp. and an additional cash consideration are to be paid for the property.

Chicago Rolling Mills, Inc., acquired the West Pullman property in September of 1929. It comprises 17 acres of land, a group of buildings (including forge shops and a modern power plant) and adequate switch tracks and sidings for considerable expansion. A million dollar program of rehabilitation and conversion undertaken by the company's management will be continued under Galesburg Coulter-Disc ownership.

The acquisition gives the Galesburg Coulter-Disc Co. a plant in the rapidly developing steel district at the south end of Lake Michigan, in addition to its present finishing plant at Galesburg, Ill., and its rolling mill at Newcastle, Inc., President R. C. Ingersoll explained. The new property will be equipped to produce special steel for the agricultural implement, tractor, truck and automotive industries, as well as special steels and fabricated parts for other purposes.

"The need for additional facilities for future growth," Mr. Ingersoll said, "dictated the establishment of a plant in the Chicago district, and plans for this have been under consideration for some time.

"The use of special steels is growing in the automobile, agricultural and tractor industries and this purchase gives us facilities which can be expanded to meet the demands."

S. L. Ingersoll will be manager of this new unit of the Galesburg Coulter-Disc Co.

Business of Subsidiaries Increased.—January business of the Rockford Drilling Machine Co., a subsidiary, showed a substantial increase over January 1929, according to President C. S. Davis. Included in recent contracts is one for clutches from the American Austin Co., producers of a new light car which is the American edition of the British machine.

Increased activity of agricultural implement manufacturers is reflected in the reports of three subsidiaries of the Borg-Warner Corp., Mr. Davis added. The Wheeler-Schlebler Carburetor Co. at Indianapolis reports receipt of orders for tractor carburetors totaling $150,000 in the last 30 days. The Indiana Rolling Mill Co. at Newcastle, had the largest month's business in its history in January and reports an increase of 33% in its working force. The Galesburg Coulter-Disc Co. reports a 10% increase in sales of implement parts in January over the corresponding month of 1929 and a 33% increase in tractor parts business.

The Norge Corp., another subsidiary, plans an intensive selling campaign on a complete line of household electric refrigerators.—V. 130, p. 1119.

Brentano's, Inc. (Publishing House).—*Publishers To Extend Credit.*—The following is taken from the New York "Times," Feb. 18:

A committee of publishers in this city is arranging for the extension of credit totalling about $250,000, over a 5-year period, to Brentano's, one of the oldest and largest retail book houses in this country, according to a statement by William P. Chapman Jr., attorney for Brentano's and a member of its board of directors.

Reports that creditor publishers of the firm would actually take it over or that members of the Brentano family would retire from the management were scouted. Mr. Chapman said that in 1925 Brentano's had borrowed $350,000 to meet expenses partly caused by removal of its New York, Chicago and Washington stores to new quarters. Since, then, he explained, $58,000 has been paid off, but the firm needs additional working capital. Rather than borrow more money, Mr. Chapman said,

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

the firm had decided to ask credit from publishers for whom the Brentano stores form an important retail outlet.

"From 1909 to the close of the last fiscal year," Mr. Chapman said, "Brentano's total volume of sales has shown an upward curve, and in the last 15 years the house has sold $30,000,000 worth of books." An audit of the firm made by a representative of the publishers is regarded as favorable, Mr. Chapman added, and arrangements for the credit are virtually consummated.—V. 120, p. 1208.

x After depreciation of $720,918. y Represented by 300,000 no par shares.

Our usual income account for the year ended Dec. 31 1929 was published in V. 130, p. 1119.

British Type Investors, Inc.—*New Director.*—

Ralph W. Simonds has been elected a director. Mr. Simonds is also on the Board of Governors of the Detroit Stock Exchange and a former president of the Associated Stock Exchanges. He is president of Baker, Simonds & Co., Inc., and a director of the National Baking Co., and Yosemite Holding Corp.—V. 130, p. 978.

Bucyrus-Erie Co.—*Secures Order.*—

This company has received an order from the Anglo-Chilean Nitrate Co. for 24 large revolving shovels, involving more than $1,250,000, according to a Chicago dispatch. The shovels will be used for mining nitrate in northern Chile. This represents the largest single order the company has received in several years. Deliveries will start in May and continue until the end of year, adds the dispatch.—V. 129, p. 3639.

Bush Service Corp.—*Vice-President Elected.*—

Paul Fitzpatrick has resigned as Vice-President and director of the Credit Alliance Banking Corp., and from all official connection with its various affiliated companies, to accept the vice-presidency of the Bush Service Corp.—V. 129, p. 1120.

Bush Terminal Co.—*Larger Dividend.*—

The directors have declared a quarterly dividend of 62½c. a share on the common stock, placing the issue on $2.50 annual basis, as compared with $2 previously. The directors also declared the regular quarterly dividend of $1.75 a share on the debenture stock, payable April 15 to holders of record March 28. The common dividend will be paid May 1 to holders of record April 4.—V. 130, p. 1120.

Butterick Co.—*To Pay Off Notes.*—

The company has arranged with Halsey, Stuart & Co., Inc., for the payment of $2,000,000 of 5% notes outstanding, due March 1 1930. There will be no public financing in this connection.—V. 129, p. 3639.

Calumet & Arizona Mining Co.—*Lower Dividend.*—

The directors have declared a quarterly dividend of $1.50 a share on the capital stock, thereby reducing the annual rate to a $6 basis. Previously the company had been paying quarterly dividends of $2.50 a share or $10 annually since the spring of 1929. Prior to that the annual rate was $6 on the old Calumet & Arizona Mining Co. before the acquisition of the New Cornelia Copper Co. The pressnt dividend is payable March 24 to holders of record March 7.

Reduction of the quarterly rate is due to unusually heavy expenditures during current year on account of a program of construction and improvement at the mines and property and also because of the slack buying of copper metal.—V. 129, p. 3171.

Chain & General Equities, Inc.—*Annual Report.*—

President Paul Dudley Childs reports in brief:

The liquidating value of our portfolio reflects the present lower level o stock prices. Our investments, however, are largely in the chain store field, which has a well-deserved reputation for increasing profits in periods of business recession.

The chain store companies whose stocks we own (93% of which have reported) show an increase in sales from $1,844,594,181 in 1928 to $2,318,783,128 in 1929, an increase of 25.7%. As our heaviest investments are in the most rapidly growing companies, the growth available to our benefit, if averaged for our chain store portfolio as a whole, was 35%.

Since company has used only its cash resources in making its various investments, and has never utilized its borrowing ability we owe nothing to the banks, and our current position is thoroughly sound.

Claude-Neon Lights, Inc.—*Stockholders Committee.*—

A committee has been formed of the stockholders of the common stock. The purposes of this committee are to obtain accurate information as to the affairs of the corporation; to inquire into and report upon any suits pending against the corporation or its officers and to represent the stockholders who may join the committee at the next annual meeting.

The committee consists of Herman Bergoffen, Chairman, (Pres., National Skee-Ball Co., Inc.); Michael Edelstein, (C.P.A., member of the firm of Wright, Long & Co.), and D. D. Jaffin, with D. D. Jaffin, Sec., 165 Broadway, N. Y. City.—V. 129, p. 4143.

Coca-Cola Co.—*Annual Report.*—

R. W. Woodruff, President, says in part:

Points of immediate interest in the financial statement of the company and its subsidiaries for the year 1929 are these:

Sales in dollars show an increase over the preceding year of 12.99%.

Net profits show an increase over the preceding year of 25.21%.

Earnings per share of common stock, after dividends on the class A stock, deductions for taxes and additions to reserve, were $10.25.

Approximately 20% of the class A stock has been purchased by the company.

The ratio of current assets to current liabilities is 18 to 1.

Columbia River Longview Bridge Co.—*Bridge To Be Opened March 29.*—

The Washington and Oregon sections of the 10,000-ton cantilever span of the Columbia River Longview Bridge at Longview, Wash., have been successfully joined and it is expected that the bridge will be opened to traffic March 29, according to word received this week by J. & W. Seligman & Co. from Joseph T. Tynan, Vice-President of the Bethlehem Steel Corp., in charge of the construction at Longview, Wash. The bridge at present is the highest span over navigable waters in the United States and is one of the most important links in the North and South arterial highway system of the Pacific Voast.

Construction of the bridge is said to establish engineering records in the Pacific Coast section for speed and the handling of large masses of steel at great heights. The two arms of the central span, erected without the use of false work, came together with a deviation of only three-eighths of an inch. The structures will have been completed in approximately 16 months and will contain about 13,000 tons of steel. The cantilever span is 1,200 feet long and is 196 feet above the surface of the river.—V. 130, p. 627.

Commercial Credit Co., Baltimore.—*Correction.*—

In reporting the summary of operations for 1929 and 1928 in "Chronicle" of Feb. 15, p. 1108, the years over the columns were erroneously reported. Under the title "consolidated" the first column should have been 1929 and the second 1928. Similarly under title "company alone" the first column should have been 1929 and the second 1928.—V. 130, p. 1108.

Commercial Investment Trust Corp.—*New Directors.*—

The stockholders at their annual meeting on Feb. 18 elected two additional directors, Arthur Lehman of Lehman Bros. and Frank Altschul of Lazard Freres, thus giving representation on the board of these two bamking firms in addition to Dillon, Read & Co. who were previously represented. Other members of the board were re-elected.

At a subsequent meeting of the directors Henry Ittleson, President of the corporation, was re-elected and Edwin C. Vogel was elected to the newly created office of Chairman of the executive committee in lieu of Vice-President. All other officers were re-elected.

Regular quarterly dividends on the preferred and preference stocks and on the common stock of the corporation were declared.—V. 130, p. 964.

Commercial Solvents Corp.—2% *Stock Dividend.*—

The directors have declared a quarterly cash dividend of 25c. per share on the outstanding common stock, payable March 31 to holders of record March 10 1930.

The directors also declared a dividend payable in stock on March 31 to holders of record March 10 at the rate of 2 shares for each 100 shares then outstanding. Non-dividend bearing scrip certificates will be issued for fractional shares to which any stockholder may become entitled as a result of this stock dividend, and this scrip when aggregated will be exchangeable for full shares.

The company also paid 2% in stock on Nov. 1 1928 and on Apr. 1 and Oct. 1 1929. A quarterly cash dividend of 25c. per share was paid on the common stock on Jan. 1 last, the first on the present shares which were issued in exchange for the old common stock on the basis of 10 new shares for one old share.—V. 130, p. 1121.

Continental Sugar Co.—*Receiver.*—
Col. Thomas G. Gallagher, Vice-President & Gen. Manager has been named receiver by Judge George P. Hahn in Federal Court at Toledo.
Sigmund Sanger, attorney, was named special master for the receiver. The receiver was appointed on application of Grant D. Esterling, Detroit, and Charles J. Welch, New York.
The company has three refineries in Ohio and Michigan cities, and controls the Holland-St. Louis Sugar Co., which has three plants in Michigan and Indiana.
Assets of the company are placed at $6,000,000 and liabilities at $2,-000,000. The company will be reorganized, it said.—V. 129, p. 1918.

Courtaulds, Ltd., England.—6% *Common Div.*—*Earns.*
According to a London dispatch the company has declared a final dividend of 6% on the common stock, tax free, making 10% for the year.
The preliminary statement for the year ended Dec. 31 1929, shows a profit after expenses, depreciation and taxes of £3,743,827 of which £1,651,-856 was allocated to write down the company's continental industrial investments, leaving the balance of £2,091,971. In 1928 the net profit after expenses, depreciation and taxes was £5,171,996.—V. 127, p. 113.

Crown Cork & Seal Co., Baltimore.—*Tax Refund.*—
The Bureau of Internal Revenue reported the refunding of $180,987 to the above company of Baltimore, for over assessment of taxes in 1917 and 1918. —V. 128, p. 2274.

Cuba Cane Sugar Corp.—*Sale Approved.*—
See Cuban Cane Products Co., Inc., below.—V. 130, p. 1122.

Cuban Cane Products Co., Inc.—*Acquisition, &c.*—
Holders of certificates of deposit for debentures and preferred common stock of Cuba Cane Sugar Corp. are notified that Cuban Cane Products Co., Inc., which has been organized as the new company contemplated by the plan of reorganization dated July 25 1929, acquired the properties of Cuba Cane Sugar Corp. on Feb. 15 1930 under decree of the United States District Court for the Southern District of New York.
As provided in the Plan, Cuban Cane Products Co., Inc. will issue its debentures, common stock and option warrants to holders of certificates of deposit, and its common stock to depositors of preferred and common stock of Cuba Cane Sugar Corp. who have subscribed to common stock of the new company.
Application has been made to list the debentures and common stock of the new company on the New York Stock Exchange.
It is expected that the securities of the new company will be available for delivery on and after March 3. In order to obtain the debentures and common stock and option warrants to which they are entitled, the depositors and subscribers must surrender their certificates of deposit and subscription receipts to their respective depositaries named below. Subscription warrants may be exercised to and including March 10, 1930.
Holders of certificates of deposit for debentures of Cuba Cane Sugar Corp. will also be entitled to receive, upon surrender of their certificates, the Jan. 1 1930 interest coupons attached to the deposited debentures, which may thereupon be presented to the depositary for payment.
Holders of debentures who do not deposit by April 10 1930 can only do so thereafter by special leave of Court; and preferred and common stockholders who do not deposit by March 10 1930 cannot obtain subscription warrants except by like leave of Court. Such leave of Court can only be obtained as provided in an order entered Feb. 15 1930 in the receivership proceedings, and upon a showing that the security holder was prevented from depositing by circumstances beyond his control, or of special facts justifying such deposit.—V. 130, p. 1122.

De Forest Crosley Radio Co., Ltd.—*Initial Dividend.*—
An initial quarterly dividend of 20 cents per share has been declared, payable May 1 to holders of record April 15.—V. 129, p. 2081.

Detroit Steel Products Co.—*Change of Dates for the Payment of Dividends.*—
E. R. Ailes, Secretary and Treasurer, in a letter to the stockholders on March 1 will say:
As you know, for the past several years the company has paid eight dividends of 25 cents a share, or a total of $2 a year. Dividends have been paid on Feb. 1, March 1, May 1, June 1, August 1, Sept. 1, Nov. 1, and Dec. 1.
These dividends were not monthly, quarterly, or semi-annual, and considerable confusion has arisen in the minds of our stockholders as well as in financial circles. It was, therefore, decided to go to a quarterly basis.
As you know, a dividend of 25 cents a share was paid on Feb. 1, and the enclosed dividend of 25 cents a share payable March 1, makes a total of 50 cents for the first quarter.
The board has also declared its first quarterly dividend of 50 cents a share payable April 1 1930 to holders of record on March 20 1930.
The next date for the payment of a dividend will be July 1, and quarterly thereafter, as and when declared.—V. 130, p. 980.

Devoe & Raynolds, Inc.—*New Subsidiary Organized.*—
E. S. Blackledge, 3d Vice-President, has been appointed General Manager of Sales for the industrial divisions.
Since the opening of the current fiscal year the corporation has organized a new subsidiary known as the *Direct Stores, Inc.*, to which it has transferred its retail business. At present there are 37 stores operating under this new company, three having been opened this year. The new arrangement, besides giving greater efficiency, will effect certain economies.—V. 130, p. 980.

Dictaphone Corp.—*Record January Business.*—
The Dictaphone Sales Corp. reports January 1930 as the record January in its history, sales for the month showing a 12% increase over sales for the same period of the preceding year, which also set a high record for January sales.—V. 130, p. 294.

Domestic & Foreign Investors Corp.—*Assets.*—
Net assets as of Jan. 31 1930, with securities valued at market as of that date and after deducting all liabilities other than the debenture outstanding, were $4,179,535. Capitalization of the company consists of $2,500,000 20-year 5½% gold debentures, 5,000 shares of $6 cum. pref. stock and 75,000 shares of no par value common stock.
The debentures carry warrants entitling holders on the date the first dividend is declared on the common stock, or earlier at the option of the company, to receive 10 shares of common stock for each $1,000 debenture.
Indicated net assets for the debentures are $1,671 for each $1,000 debentures and the book value of the common stock is $15.06 per share.
The corporation was organized in July 1927, to buy, sell, hold and underwrite domestic and foreign securities and is managed by A. G. Becker & Co. Robert C. Schaffner of that investment organization is Chairman of the Board and Dr. David Friday, President.—V. 129, p. 1289.

Drug, Inc.—*Offer for Household Prdoucts.*—
The directors have approved, and are seeking the stockholders, consent to, a plan looking to acquisition of Household Products, Inc., on the basis of exchanging one share of Drug, Inc., for 1 2-5 shares of Household Products. As the Household company has 575,000 shares outstanding, the plan would involve 410,715 shares of Drug, Inc., and would increase the latter's outstanding stock from 2,743,713 to 3,154,428 shares.
To provide for this acquisition and other corporate requirements, the stockholders of Drug, Inc., will consider at the annual meeting on March 11 increasing the authorized capital stock from 3,000,000 to 5,000,000 shares. —V. 130, p. 629.

Durham Coal & Iron Co.—*Sale.*—
J. H. Jones, special master will sell the entire property at public auction March 15 at Chattanooga, Tenn. The upset price has been fixed at $396,000.

Eastman Kodak Co.—*Sub. Co. Plant Operating at Kingsport, Tenn.*—
The first production unit in the Tennessee Eastman Corp.'s new cellulose acetate plant at Kingsport, Tenn., was put into operation last week, according to an announcement. Full-scale production is expected to be reached by mid-summer.
Construction of the cellulose acetate plant began late in June. The manufacture of cellulose acetate, which is the basic ingredient of safety film for home motion pictures and for safety x-ray film, at present is carried on by the Eastman Kodak Co. at Kodak Park, its largest plant in Rochester, N. Y., using acetic acid and acetic anhydride produced by the Tennessee Eastman Corp. Shift of the manufacture of cellulose acetate to Kingsport is expected to effect economies because the necessary cotton, as well as the chemicals mentioned, is a product of the South.
The new cellulose acetate plant consists of a cotton preparation building, a cellulose acetate building, and an acid recovery plant. A new power plant which went under construction simultaneously with the cellulose acetate plant is already in operation. It will supply steam not only to the new buildings but also to the previously existing plant of the Tennessee Eastman Corp., which manufactures acetic acid and acetic anhydride in addition to methanol and other wood distillation products. A very complete water purification and filtration plant has also just been put into commission, the announcement added.—V. 130, p. 1122.

Eaton Axle & Spring Co.—*Proposed Merger.*—
The consolidation of this company and the Wilcox-Rich Corp. to form one of the largest manufacturers of automotive parts in the country, has been unanimously approved by the board of directors of the two companies, it was announced by J. O. Eaton, Chairman of board of Eaton company, and C. N. Higbie, Chairman of the board of Wilcox-Rich Corp. The plan of consolidation, which contemplates the exchange of Eaton capital stock for Wilcox-Rich class A stock, will be submitted to stockholders of both companies at an early date for their approval.
The balance sheets of the two companies, as of Dec. 31 1929, show combined assets of over $19,000,000. Combined earnings, after Federal taxes, for 1929 were over $2,900,000.
The Wilcox-Rich Corp. has four plants advantageously located in Detroit, Saginaw, Battle Creek and Marshall, Mich. It is engaged in the manufacture of valves, tappets, piston rings and other parts pertaining to gasoline motors, automobiles, airplanes and trucks. It also manufactures pump shafts, clutch levers, piston rods, Rich "red head" rivet sets for structural steel work and other forged parts and special tools. Its customers include practically all of the large automobile manufacturers as well as manufacturers of airplanes, tractors and marine, industrial Diesel engines. —V. 129, p. 2543.

834 Fifth Avenue Corp., N. Y. City.—*Loan.*—
S. W. Straus Investing Corp. has made a temporary loan of $2,400,000 to this corporation. The purpose of the loan is to complete the 14-story co-operative apartment building now under construction at 822-836 Fifth Ave., between 64th and 65th streets.

Eisler Electric Corp.—*Acquires Tungsten Electric Corp.*—*Rights.*—
Acquisition by the Eisler Corp., manufacturers of equipment and essential parts utilized in the production of vaccuum tubes, of the Tungsten Electric Corp., producers of tungsten and molybdenum products for the electrical equipment, automobile, aviation and many other important industries, is announced by President Charles Eisler.
The Eisler Electric Corp. will operate this company as a wholly owned subsidiary. The acquisition was effected principally through exchange of stock.
In conjunction with the taking over of this property rights are being offered to Eisler stockholders of record Feb. 21 to subscribe to 25,000 shares at $14 per share in the ratio of one share for each 11 shares held. These rights expire March 21.
Dr. Clemens Laise, founder and President of the Tungsten Electric Corp., will continue as executive head of operations of the Tungsten Electric Corp.
In announcing the acquisition, Mr. Eisler stated that he believed the consolidation of efforts of these two companies would result in a mutual benefit, inasmuch as the entire merchandising organ zation and facilities of the Eisler Electric Corp. will be utilized to further the distribution of the products of the Tungsten Electric Corp. Likewise, it gives to the corporation, he added, a well rounded line of equipment and solidly establishes it in the tungsten alloy industry, which has shown a tremendous development over the past several years and which has unusual opportunity for further expansion and development.—V. 130, p. 629.

Eitington Schild Co., Inc.—*Stock Decreased, etc.*—
The stockholders on Feb. 20 approved an amendment decreasing the authorized class B junior pref. stock from $18,823,715 to $15,293,002 and reducing the amount of capital allocable to the common stock from $9,891,915 to $7,361,202.
The stockholders also voted to eliminate the deficit incurred by the company during 1929, through heavy inventory write-offs caused by decline in fur prices last fall.—V. 130, p. 1122.

Electric Controller & Mfg. Co.—*Extra Dividend.*—
The directors have declared an extra dividend of $3 a share, and the regular quarterly dividend of $1.25 a share on the common stock, payable April 1 to holders of record March 20. At this time last year an extra disbursement of $1 a share was declared payable April 1 1929.—V. 129, p. 803.

Electric Elevator & Grain Co., Ltd.—*May Reorganize.*
—The Toronto "Globe" of Feb. 17 contains the following:
In an official statement issued Feb. 15, James R. Murray, Secretary of the Winnipeg Grain Exchange, disclosed the position of the above company, recently suspended from trading privileges and membership on the exchange.
Creditors of the company, Mr. Murray disclosed, probably will suffer losses approximating $2,000,000. Several grain firms are involved, but individual losses are not sufficient to cause financial embarrassment to any of them. Misuse of lake shippers' transfers caused some of the losses, Mr. Murray announced.
Plans for reorganizing and refinancing the company are under way, and, it is stated, there should be no loss to farmers or others holding warehouse receipts or bills of lading for grain unloaded in company elevators.

The statement by Sec. James R. Murray follows:
Reports, most of them grossly exaggerating the facts, have been rife for some time in connection with the failure of what was rumored to be one of the large firms doing business on the Winnipeg Grain Exchange. It has not been possible before this to give a comprehensive statement covering the situation.
The company, one of the smaller firms on the exchange, is the firm involved. On Jan. 18 it came to the notice of the Council of the Winnipeg Grain Exchange that this firm was in difficulty and the Council immediately cancelled its registration. This cancellation carried with it suspension of trading privileges and of the firm's membership in the grain exchange.
Although this occurred nearly four weeks ago, there has been no assignment, for the reason that directors of the company have been working on plans to reorganize and refinance the company, in an endeavor to protect the interests of the shareholders. Aside from the shareholders, the principal people interested are the Bank of Montreal, the Winnipeg Grain Exchange, the Lake Shippers' Clearance Association, and individual grain firms who had business dealings with the electric elevator at the Eelctric Terminal Elevator.
The amount of farmers' grain involved is comparatively small, as this firm has no country elevators and no extensive country commission business with farmers. There is some temporary inconvenience to these farmers, but

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

there should be no loss to them. The inconvenience arises through the assets of the company, as is usual in such cases, being held up pending either a reorganization or a legal distribution, as provided by statute.

Many grain firms having dealings with the Electric Elevator Company are creditors, but the sums involved in individual cases are not sufficient to have caused financial embarrassment to any of them.

Rumors to the effect that many leading firms have been seriously embarrassed through the failure of the Electric Elevator company have no foundation whatever in fact. Other rumors that certain firms, embarrassed by the company's difficulties, have since closed or sold out their grain offices are also without foundation. These latter rumors have reference to certain firms which have been in the grain business for only a few months, and it is common knowledge that the discontinuance of the grain departments of these firms is due entirely to other causes.

The grain exchange is taking steps to protect warehouse receipt holders against any loss which might accrue on receipts issued and registered through grain exchange machinery.

The operation of the elevator has been suspended for the time being through the action of the Board of Grain Commissioners in withdrawing the Government inspection and weighing services. It is understood that the object of the board in taking these steps was to maintain the present stock of grain intact until proper distribution to the rightful owners was determined.

The amount of loss to creditors is large for a firm of this size, but in no way approached what would be expected, from some of the rumors that have been current. As usual in such cases, auditing of the books and determining the exact situation is slow work, but it would appear from the best information available now that these losses will approximate $2,000,000. —V. 128, p. 3834.

Fashion Park Associates, Inc.—*Net Sales.*—

Net sales for the month of January 1930 amounted to $2,572,137. This total is after the elimination of sales between companies reporting and does not include the sales of those companies controlled but not entirely owned. —V. 129, p. 3971.

Fidelity Investment Association.—*Report.*—

The Association, devoted exclusively to the sale of annuities, reports an increase in resources of $3,066,249 in 1929 over 1928. There was also an increase of $15,768,000 in the amount of annuities placed in 1929 over 1928, of which $3,852,000 represented the gain in the last quarter of 1929.

"The year just closed," says the report by President D. A. Burt, "was the most successful in our history of more than 18 years not alone from the standpoint of growth in assets and volume of new business but also from the standpoint of sound, constructive effort.

"The outlook for the new year is an encouraging one. Business generally has a healthy prospect, the financial and banking situation is sound, the government enjoys our confidence and, regardless of stock market fluctuations the income and outgo of the average citizen will show no appreciable change over 1929."

Of the unissued 600,000 shares of common stock, 200,000 shares have been reserved for future sale to employees.

The board of directors will place the common stock upon an initial dividend basis of $2.50 per annum, payable quarterly on March 1, June 1, Sept. 1 and Dec. 1, first payment June 1 1930.

Data from Letter of James Simpson, Chairman and John McKinlay, President, Chicago, Feb. 17.

History and Business.—Company is the largest organization in the world devoted to the manufacture, importation, and wholesale and retail distribution of dry goods. Founded in 1865 by Marshall Field, it has grown through 65 years of successful operation, largely out of earnings to its present scope, with activities spreading throughout the world. Records of the business before 1872 were lost in the Chicago fire of 1871. In every one of the 58 years since then it has earned a substantial profit. The present company was incorporated in Illinois in 1901.

Aggressive developments in recent years and still in process have rendered the company's business to-day more diversified than ever before. Addition of a large retail store on the Pacific Coast and initiation of branch retail stores, both during the past year; acquisition of a group of small stores during the past two years; new manufacturing developments; and construction of the Merchandise Mart in Chicago stand out among these. Satisfactory results attending these steps promise continuation of the successful growth which has marked the institution from its inception.

Retail.—The main retail store, occupying an entire square block between State, Washington and Randolph Sts. and Wabash Ave., Chicago, and the men's store opposite, has become not so much a business as an institution of Chicago, with world-wide reputation unexcelled by any other retail organization. The retao store alone has 175,000 charge accounts. In July 1929, the Frederick & Nelson Store, Seattle, Wash., was purchased. This is the largest department store in Seattle and one of the most successful on the Pacific Coast. In Dec. 1923, the Davis store was acquired, at the opposite end of the Chicago Loop district from the main retail store. This addition to the organization of one of the city's great popular-priced stores has justified itself in increasing measure.

During 1929 there were constructed in Evanston and Oak Park, suburbs of Chicago, two branch stores which rank among the most completely equipped department stores in the country. These are branches of the main retail store, under the same name and management. Opened only in October and November 1929, results already been so satisfactory as to indicate the substantial potentialities of this type of store. In them is being built up an experience capable of further expansion by setting down other stores duplicating this unit type in other suitable communities. In 1928 the company began the purchase of small stores situated in other

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

cities. These have been added to only after careful study and perfection of organization, and to-day there are 15 in all, situated in smaller cities of the Middle West. These stores remain under their local names and are directly under the management of the wholesale department.

Wholesale.—The two large wholesale houses in Chicago and New York have 700 salesmen covering every county of the United States, and have more than 30,000 retail store accounts on their books. The wholesale department has 18 branch display sales rooms in the larger American cities. It also maintains offices in London, Paris, Japan, China, Switzerland and other parts of the world, well equipped with staffs of experts to assist their buyers..

Manufacturing.—The manufacturing department is represented by 25 mills and numerous factories producing over 60 important lines of quality merchandise distributed through the retail and wholesale organizations. These operations include four large manufacturing communities in North Carolina and Southern Virginia. The company's manufacturing activities as a whole are highly diversified, have shown good profits over many years, and the future is promising.

Merchandise Mart.—In May 1930 the wholesale organization and sales headquarters of the mills and factories will move into new quarters in this building, construction of which was begun in August 1928. It is the largest business building in the world, with 3,600,000 sq. ft. of gross floor space. Marshall Field & Co. will occupy about 50% of the total, their present wholesale, warehouse, and offices facilities, exclusive of the retail stores, occupying a combined space elsewhere equivalent to two-thirds that of the entire merchandise mart. This is now all in rented quarters. The remainder of the building, rented to others, will contain the sales displays of more than 1,000 leading manufacturers and wholesale distributors of merchandise.

In this building will be consolidated units of the company's wholesale, warehouse, and manufacturing activities now situated in nine separate locations about the City, which will result in greater efficient and a considerable saving in operating expense.

Gratifying progress has been made in the rental of the building. In addition to savings of present rentals represented by space to be occupied by Marshall Field & Co., leases have already been made aggregating annual rentals in excess of $850,000 and these should exceed $3,000,000 by completion.

Purpose.—Previously outstanding A and B stocks have been exchanged for common stock of this issue, in simplification of the company's capital structure. The majority of stock now offered for public subscription represents new financing to reimburse the treasury for expenditures in recent years on acquisitions and construction and other corporate purposes, the remainder being relinquished by present owners to afford an outside ownership adequate for the establishment of a public market.

Dividends.—Directors will place the common stock upon an initial dividend basis of $2.50 per annum, payable quarterly on March 1, June 1 Sept. 1 and Dec. 1 first payment June 1 1930.

Earnings.—Consolidated net sales and net earnings, after interest, taxes, depreciation, and all other charges, as certified by Arthur Andersen & Co., Certified Public Accountants, in recent years have been as follows, including profits of subsidiaries from date of acquisition, and after giving effect to a return of 5% on the additional capital provided through the sale of common stock over and above the amount applied in the retirement of notes payable, and after deducting estimated additional compensation of management:

The stockholders will vote Feb. 25 (not Feb. 18 as previously stated) on increasing the capital stock from $2,050,000, consisting of 8,000 shares of pref. stock par $100 each and 250,000 shares of common stock, par $5 to $3,300,000, consisting of 8,000 shares of pref. stock, par $100 and 500,000 shares of common stock, par $5 each.—V. 130, p. 981.

Fox Film Corp.—*Financing Plan.*—The financing plan for the Fox Film Corp. and Fox Theatres Corp., proposed by Bancamerica-Blair Corp., Lehman Bros., and Dillon, Read & Co., has been approved by directors of both companies and will be voted on by stockholders March 5. The plan follows:

The bankers in an introductory statement state:

While the investigation of your affairs [Fox Film Corp. and Fox Theatres Corp.] which we are making at your invitation has not been completed, the situation thus far disclosed indicates, in our judgment, that appxoximately $60,000,000 are needed to meet your immediate financial requirements. As you appreciate, this amount is substantially larger than the amount which we were at first advised would be required, and the necessity for this larger amount makes it the more imperative that the new securities to be created shall be sufficiently attractive to leave no doubt as to their marketability. We have endeavored, however, in the plan which we suggest to provide that the class A common stock purchase and conversion privileges of the new securities shall be at no lower price for the class A common stock than is necessary to accomplish this purpose, and in order to offset what ever dilution of the present stock may result, provision is made that all the new securities to be created shall be offered for subscription to existing stockholders, thus creating valuable rights which the stockholders may sell if they do not care to exercise them.

The plan suggested is as follows:

Securities to Be Created—(1) *Fox Film Corp.*

1. Fox Film Corp., will create an issue of $40,000,000 10-year 7% debentures, redeemable, in whole or in part, at option of corporation, or any int. date, on 30-days' notice, at par and int, plus a premium of 10% for 2 years from their date, of 7½% for the next 3 years, and thereafter of 5%. They shall bear stock purchase warrants which shall not be detachable except upon their exercise or upon the redemption of the debentures to which they are annexed, but upon redemption of any debentures the appurtenant warrants shall be detached and retained by the holders of such debentures. These warrants shall entitle the holders thereof to purchase at any time within 10 years from their date, 25 shares of class A common stock of Film in respect of each $1,000 of debentures, at a price to be determined by us at the time the issue is authorized, but not less than $20 per share during the first 3 years, $25 per share during the next 3 years and $30 per share during the last 4 years. The trust agreement under which the debentures are issued shall provide that the corporation shall in each year, after paying or providing for full cumulative dividends to date on the preferred stock herein mentioned, and before paying any dividends on the class A or class B common stock, set aside 20% of the remaining net earnings as a sinking fund to be applied to the redemption by lot of debentures at the then redemption price. The trust agreement shall also provide that all proceeds of the exercise by debenture holders of their stock purchase warrants shall be paid into the sinking fund and similarly applied. It shall contain appropriate provisions to protect the purchase warrants in the event of a merger, consolidation or sale of assets, and to prevent dilution in the event of stock split-up, stock dividends, rights to subscribe, or the like.

2. Film shall also authorize an issue of $25,000,000 7% cumulative pref. stock, which shall be convertible at its par value at the option of the holders at any time into class A common stock at a price to be determined by us at the time the issue is authorized, but not less than $20 per share during the first 5 years and thereafter $25 per share (with appropriate provisions to protect the conversion privilege in the event of a merger, consolidation or sale of assets and to prevent dilution in the event of stock split-ups, stock dividends, rights to subscribe or the like), shall be entitled to cumulative dividends at the rate of 7% per annum, payable quarterly before any payment upon the class A common stock or class B common stock, shall be entitled on liquidation to 110% of the par value thereof and accrued dividends before any payment upon the class A or class B common stock, and shall be redeemable at any time at the option of the corporation, in whole or in part, on 60 days, notice at 110 and divs., holders of stock called for redemption, however, to be entitled to exercise their right of conversion at any time up to the fifth day preceding the redemption date. Corporation shall not, without the affirmative vote of at least a majority in amount of the preferred stock, create any shares of stock having priority over, or on a parity with, such preferred stock as to either assets or dividends, or alter the preference of such preferred stock. No holder of preferred stock shall have any preemptive right to purchase or subscribe for any shares of stock or other securities.

The certificate of incorporation of Film will be amended so as to increase the number of the board of directors from eight to 12 and so as to provide,

(*a*) that so long as Film shall not be in default as to dividends as provide in paragraph (*b*) or (*c*) below the holders of the class A com. stock of Film shall have the right to elect five directors and the holders of the class B common stock shall have the right to elect seven directors.

(*b*) that if Film (not then being in default as to dividends on the pref. stock as provided in paragraph (*c*) below) shall fail to pay during any calendar year cash divs. aggregating at least $1 per share on each share of the class A com. stock and the class B com. stock, then and in that even the holders of the class A com. stock shall have the right to elect sevent directors and the holders of the class B com. stock shall have the right to elect five dirctors until such time as Film shall have paid in any 12 months period dividends aggregating $1 per share on the class A com. stock and the class B common stock, and

(*c*) that if Film shall fail to pay full cum. divs. to date upon the pref. stock for foru successive quarterly div. periods then and in that event and so long as there shall be any divs. in arrears upon the pref. stock the holders of the pref. stock shall be entitled to elect seven directors, the holders of the class A com. stock three directors, and the holders of the class B com. stock two directors.

(2) *Fox Theatres Corporation.*

Fox Theatres Corp. will create an issue of $40,000,000 10-year 7% conv. debentures, redeemable, in whole or in part, at the option of the corp. on any interest date, at 105 and int., convertible into class A com. stock of Theatres at a price to be determined by us at the time the issue is authorized but not less than $10 per share during the first year, and thereafter $15 per share, and to be secured by the pledge of Theatres' equity in the stock of Loew's, Inc., and such other collateral as Theatres may have available. The trust agreement shall provide that the corp. shall in each year, before paying any divs. on its class A or class B com. stock, set aside all of its net earnings up to the sum of $2,000,000, cumulatively, as a sinking fund to be applied to the purchase ot debentures at not exceeding the redemption price and to the extent debentures cannot be so purchased to the redemption of debentures.

Offerings to Stockholders.

The Film debentures and preferred stock shall be offered for subscription at their principal amount and par value to holders of the class A common stock and class B common stock of Film in proportion to their holdings thereof. At least 10 days notice shall be given of the meeting of the stockholders of Film to authorize the proceedings to carry out the plan, and at the time of the giving of such notice the stockholders of Film shall be advised that, subject to the stockholders' action at said meeting, stockholders of record of Film on the day following the date on which the issue shall be authorized shall be entitled during such period as we may determine, not less than one week from such record date, to subscribe for debentures; and said notice of meeting shall be accompanied by appropriate forms for the exercise by stockholders of such right of subscription, but unless we shall otherwise determine, no warrants or certificates evidencing such right shall be issued. The rights to subscribe to preferred stock shall be evidenced by warrants or certificates issuable to stockholders of record of Film on the day after the preferred stock is authorized by the stockholders of Film, and said rights shall expire 20 days after said date.

The Theatres debentures shall be offered for subscription at their principal amount to the holders of the class A common stock and class B common stock of Theatres in proportion to their holdings thereof. The rights to subscribe for the Theatres debentures shall be evidenced by warrants or certificates which shall be issued to stockholders of Theatres of record on a date not more than 10 days following the authorization of their issue by the stockholders of Theatres, and said rights to subscribe shall expire one year from said date or on the earlier call of the debentures for redemption.

Underwriting.

We will endeavor to organize a syndicate or syndicates (of which we may be managers and members) to underwrite said offerings to stockholders of Film of the Film debentures and preferred stock at the offering prices. The compensation of these syndicates and their syndicate managers shall aggregate an amount in cash equal to 9% of the aggregate principal amount and par value of the respective offerings, and in addition thereto, 65,000 shares of class A common stock of Film, fully paid and non-assessable.

The offering of the Theatres debentures to the stockholders of Theatres shall be underwritten by Film at the offering price, and as compensation therefor Film shall receive an amount in cash equal to 9% of the principal amount of the Theatres debentures offered. In view of the long period of time during which the Theatres stockholders are to be entitled to subscribe for the Theatres debentures and the immediate need of Theatres for cash, Film shall on the date of delivery of the Film debentures and preferred stock, take up the Theatres debentures, subject to the subscription rights of the Theatres stockholders.

We may, if we so determine, cause to be issued and sold at any time interim receipts or certificates calling for the delivery of any of the new securities if, as and when issued and delivered to us, and Film shall pay all expenses in connection with the printing and delivery thereof and shall make the usual adjustment for loss of interest in connection therewith.

Film shall, at our request, make application to list the Film debentures and pref. stock on such exchanges as we may designate. Film shall also furnish us with such information, and shall take such action, as we may reasonably request, in order to qualify the Film debentures and pref. stock for public issue under the so-called Blue Sky laws in the States where we may desire to offer said debentures and pref. stock.

Voting Trusts.

Inasmuch as the new money to be provided by the financing is approximately twice the present market value of the equity of Film, based on current quotations of its class A common stock, it is imperative that the holders of the new securities shall be assured of continuity of satisfactory management. To that end at least a majority of the outstanding shares of class B common stock of Film and all the shares of the class B common stock of Theatres shall be deposited under voting trusts, the voting trustees under both of which shall be satisfactory to us. Both voting trusts shall continue for a period of 5 years and thereafter so long as any of the Film debentures or Film pref. stock shall be outstanding, but not exceeding an additional 5 years. During the continuance of the voting trusts the entire voting power of the deposited stock shall be vested in the voting trustees, provided, however, that the voting trustees shall not, without the consent of at least

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

a majority in interest of the voting trust certificates exercise their voting power:

(a) to make any alteration or amendment of any provision of the certificate of incorporation of either of the corporations which would tend to change or diminish the voting power of the deposited class B common stock, except as contemplated by the foregoing plan;

(b) to sell or convey substantially all the property, rights, privileges and franchises of either of the corporations, except to the other of them, or, in the case of Film, unless the net earnings available for dividends on stock and sinking fund on the debentures shall in each of two consecutive years be less than $5,000,000;

(c) to merge or consolidate either corporation into or with another corporation, except into, or with, the other of the corporations, or, in the case of Film, unless the net earnings available for dividends on stock and sinking fund on the debentures shall in each of two consecutive years be less than $5,000,000; or

(d) to dissolve either of the corporations.

Prior to the delivery of the Film debentures and pref. stock there shall have been elected 12 directors of Film, all of whom shall be satisfactory to us, and a full board of directors of Theatres, which may include directors of Film, all of whom shall also be satisfactory to us, and the resignations of all officers of Film and Theatres shall be placed in the hands of the voting trustees.

Prior to the delivery of the Film debentures and pref. stock there shall have been elected a Chairman of the board, President, Treasurer and Comptroller of Film and Theatres satisfactory to us.

Disposition of Proceeds.—Theatres shall apply the net proceeds of the Theatres debentures approximately as follows:

$18,000,000 to the payment of Theatres' existing indebtedness to Film;
$15,000,000 to the payment of indebtedness to Electrical Research Products, Inc., and
$3,400,000 to miscellaneous corporate purposes.

Film shall apply the net proceeds of the offerings of the Film debentures and preferred stock approximately as follows:

$18,000,000, or such part thereof as may be necessary, to the payment of its underwriting obligations to Theatres;
$12,000,000, to the payment of the $12,000,000, principal amount, of 6% gold notes of Film, dated April 1 1929, due April 1 1930.
$14,300,000 to the payment of obligations incurred in connection with the acquisition of an interest in Gaumont-British Picture Corp., Ltd.;
$5,800,000 to the payment of unsecured bank loans, and
$9,050,000, and any part of the above-mentioned $18,000,000 not required to meet said underwriting obligations, for payment of indebtedness, construction requirements and miscellaneous corporate purposes.

Adjustment with Mr. Fox.

We understand that Mr. Fox has voluntarily offered and agreed to assign to Film all of his interest in Fox-Hearst Corp.

You have also advised us that Mr. Fox has personally paid for and now personally owns 90% of the stock of American Tri-Ergon Corp., and 50% of the stock of Grandeur Corp. [Then follows certain agreements between Mr. Fox and Fox Theatres Corp. and Fox Film Corp.]

We also understand that Mr. Fox and Film, and Mr. Fox and Theatres, have agreed to submit to arbitration under the arbitration law of New York whatever claims, if any, Film or Theatres, or any subsidiary of either of them, may have against him (other than as above provided for) or he may have against any of them. In each case one arbiter shall be appointed by Mr. Fox, one by Film or Theatres, as the case may be, after the election of the new boards of directors contemplated by the Plan, and one of the two arbiters thus chosen, or in the event of their failure to agree, by the court.

Compensation.

As compensation to us for our services in devising and carrying out the plan, there shall be issued and delivered to us, upon the date of delivery of the Film debentures and preferred stock, 135,000 shares of class A common stock of Film, fully paid and non-assessable.

[By letter dated Feb. 18 1930, Bancamerica-Blair Corp., Lehman Bros., and Dillon, Read & Co. have agreed that, at the option of Fox Film Corp., the corporation may issue and deliver, in lieu of the 65,000 shares of class A common stock mentioned above [under underwriting] and the 135,000 shares of class A common stock just mentioned, warrants or other evidences of options to purchase 500,000 shares of the class A common stock of Fox Film Corp., at the price of $20 per share, at any time within five years from the date of delivery of the Film debentures and preferred stock.]

You shall also reimburse us for the fees and disbursements of our auditors and counsel, whether or not the plan is consummated.

A circular letter dated Feb. 18, sent to the stockholders states in part:

Halsey, Stuart & Co., Inc., who in 1929 made a public issue of $12,000,000 one year notes, due April 1 1930, have, in court proceedings, urged the immediate appointment of receivers of the corporation. Directors have adopted a plan to avert such disaster.

Present Financial Difficulties.—Corporation faces over $45,000,000 of obligations matured or to mature within 60 days. In addition it has large commitments to meet during the current year, incurred in the acquisition of theatre properties or in the building of theatres. Over $7,000,000 of judgments have been obtained by various creditors, and only the indulgence of these creditors at the earnest solicitation of Frank J. Coleman, U. S. District Judge, has prevented the complete break up of the corporation's property.

Cause of Corporation's Financial Embarrassment.—The present heavy debt was incurred primarily in the acquisition of the English Gaumont circuit of theatres and in assisting Fox Theatres Corp. to acquire a substantial block of common stock of Loew's, Inc., both of which acquisitions the directors believe will prove to be profitable. Failure to effect refunding before the decline in market values of securities last autumn is the immediate cause of the corporation's financial embarrassment.

Receivership Unjustifiable and Disastrous.—While the appointment of receivers was being sought the company was enjoying the greatest earnings in its history, and notwithstanding the adverse effect of these company attacks upon the corporation's credit, its net earnings during January exceeded by approximately 50% the net earnings of Jan. 1929, the highest the corporation had theretofore attained.

It is the custom of motion picture exhibitors to purchase substantially their entire supply of pictures for a season during the period between May and August, and theatre owners will not contract for their pictures with any source of supply which they believe precarious. Furthermore, the Corporation's properties are located in every State of the United States and in almost every foreign country, which means that if there were receivership the unity of the enterprise would inevitably be destroyed. Receivership would, therefore, mean the substantial destruction of the corporation's business and the disintegration of its properties.

Efforts to Obtain Banking Assistance.—The corporation, in its extremity, invited Bancamerica-Blair Corp., Lehman Brothers, and Dillon, Read & Co., to investigate its affairs with a view to submitting a plan of financing.

From conversations had with Halsey, Stuart, and their counsel, it was understood that if any plan were proposed which would privide for the payment of the $12,000,000 of notes due April 1 1930 which had been sold to the public by them, and the $15,000,000 obligation to Electrical Research Products, Inc., they would offer no obstacle to its consummation. The plan does provide for paying all these debts in full.

Nevertheless, upon its presentation to the Court with the request that further adjournments of the receivership applications be had to enable the stockholders to take action upon the plan, counsel for Halsey, Stuart stated that they had other interests in the situation than the mere payment of the corporation's one year notes, and suggested that they be given an opportunity to prepare and submit to the stockholders some other plan than that which your board of directors have approved. Halsey, Stuart attempt to justify their position by the assertion of a 15-year monopoly of the right to sell your corporation's securities. Corporation's counsel advise that no such right was ever legally created and that even if any such right had been granted by corporation to Halsey, Stuart, they would have forfeited it when in the open court they urged the appointment of receivers of your corporation.

Halsey, Stuart Plan.—Until noon on Feb. 17, when notices of the stockholders' meeting were about to be mailed, and nearly a week after the acceptance by the board of the above plan, Halsey, Stuart had made no other suggestion than that, by the appointment of receivers and the ruin of your investment, they be given complete control of the management and operation of your corporation. This, notwithstanding the fact that Halsey, Stuart are asserting a claim of $1,000,000 against Fox Theatres Corp. for work alleged to have been done by them in endeavoring to formulate a plan.

On Feb. 17, for the first time, they submitted a financial plan. This plan contemplates the exchange of both the class A stock and the class B stock for common stock, all to be of one class, thus eliminating the present voting power of the class B stock. Such a change cannot be effected without the consent of the class B stock. Neither Mr. Fox nor any of the other holders of class B stock whom the directors have been able to consult, are willing so to consent. It also contemplates the deposit of all the new common stock under a voting trust, thus depriving the class A stockholders of that share in the management of the corporation which the plan approved by the board preserver to them. Furthermore, the securities contemplated by the Halsey, Stuart plan are not so far as their effect upon the interests of stockholders and their cost to the corporation is concerned, greatly different from those contemplated by the plan which your board has approved. The compensation which the Halsey, Stuart plan provides shall be given to those bankers, their associates and syndicates, for taking up the securities which it contemplates is, in the opinion of your board, even apart from the above mentioned $1,000,000 claim, at least as expensive to the corporation as that provided by the plan approved by the directors. Your board also find it difficult to see how bankers who in open court have stated that their interests lie beyond the payment of their just debts and have pressed for receivers, can, upon any terms, command the confidence of the stockholders. Accordingly, the Halsey, Stuart plan has been rejected by your board.

Offerings of New Securities to the Corporation's Stockholders.

(1) *Debentures.*—Holders of record of stock on the second day following the authorization of the issue of the debentures (which it is expected will be March 7) may subscribe for debentures, at the price of principal amount and accrued interest, in proportion to their respective holdings, that is, at the rate of $43.44 of debentures for each share of their stock. Subscriptions for the debentures will be accepted, however, only in multiples of $100. This right to subscribe will be held open for a period of 10 days from the record date.

(2) *Preferred Stock.*—Holders of record of stock on the second day following the authorization of the issue of the Preferred stock (which it is expected will be March 7) may subscribe for preferred stock, at its par value and accrued dividends, in proportion to their respective holdings, that is, at the rate of $27.15 par value of preferred stock for each share of their present stock. The subscription right under the warrants will expire 20 days after the record date.

Special Meeting of Stockholders to be Held March 5.—

A special meeting of stockholders will be held March 5 to take action upon the following proposals:

(a) To authorize and consent to the creation and issue of $40,000,000 10-year 7% sinking fund gold debentures (having warrants attached.)

(b) To authorize an amendment to the certificate of incorporation so that the total number of shares, including those previously authorized which the corporation may thenceforth have shall be 5,250,000 shares divided into (1) 250,000 shares of 7% cumulative convertible preferred stock (par $100); (2) 4,900,000 shares of class A common stock (no par value) and (3) 100,000 shares of class B common stock (no par value).

(c) To authorize an amendment to the certificate of incorporation increasing the number of directors from 8 to 12.

(d) To amend the by-laws relative to the voting rights of the classes of stock of the corporation as contemplated by the plan, to provide for a chairman of the board and to effect such other changes as are contemplated by the plan or as may be determined at the meeting.

Outline of Halsey, Stuart Plan.—

An outline of the Halsey-Stuart plan, which has been rejected by the directors of Fox Film Corp., follows:

Fox Film Corp. would authorize 3,850,000 shares of common stock there being but one class, with equal voting rights. The 820,660 shares of the present A stock outstanding would be exchanged for the new stock share for share and the 99,900 shares of B—now the voting stock—at the rate of 1½ shares for each one of the new.

An offering of 1,250,000 shares of the new stock would be made at $2 a share, pro rata to stockholders. The underwriters would receive $ on each share sold and $1.50 on each share not sold. One million shares would be reserved against the exercise of warrants and 500,000 under the bankers' option to purchase the lot at any time within five years at $20 a share. Stockholders would receive voting trust certificates.

The corporation would create $40,000,000 of 10-year 7% sinking fund debentures, which would be underwritten and offered to stockholders. The underwriters would get a 10% commission. The debentures would bear warrants to purchase 25 shares of common for each $1,000 of debentures at not less than $25 nor more than $30 per share.

The Theatre corporation would change its common capitalization in much the same way, and not less than two-thirds of the new stock would have to be represented by voting trust certificates. It would authorize an issue of $40,000,000 in 7% cumulative preferred stock, which the Film corporation would underwrite. Each share of preferred would be convertible for five years into ten shares of common at $10 a share, in voting trust certificates. The Film corporation would receive a $6 a share commission for underwriting the issue. It would be redeemable at $110.

The Film corporation would agree not to convert preferred it held, and to certain other conditions.

A 10-year voting trust would be set up for each company, the bankers to designate the trustees. The boards and officers would be subject to the approval of the bankers pending the first election, and provision would be made that during the life of the voting trust the trustees would control the directorates.

The bankers figured that, allowing for commissions, the net proceeds from the debentures would be $36,000,000 and from the stock $24,375,000, a total of $60,375,000.

This would apply to $12,000,000 of the Film corporation's gold notes due April 1; to $14,300,000 remaining due in the purchase of the Gaumont string of theatres in Great Britain; to $5,800,000 of unsecured loans; to the Film corporation's underwriting obligation, not in excess of $19,600,000, and to indebtedness, future acquisitions and improvements, and miscellaneous corporate purposes, not in excess of $8,675,000.

The Theatres corporation would apply the proceeds of the sale of preferred stock to paying its $18,000,000 debt already existent to the Film corporation, to paying the $15,000,000 it owes the Electrical Research Products Co., and to miscellaneous purposes in the sum of $4,600,000.

Committee of Class A Stockholders.—

The class "A" stockholders are advised that the committee (see below) some of whose members own and others represent large amounts of class "A" common stock has been organized at the request of class "A" stockholders. The committee believes that the threatened receivership of the corporation would be disastrous to the enterprise and its stockholders. In order that these stockholders may act in a body for the protection of their interests at the special meeting of the stockholders that has been called for March 5 1930, the committee invites the class "A" stockholders to entrust to the committee their proxies to vote their stock at that meeting.

Bankers of the highest standing—Bancamerica-Blair Corp., Lehman Brothers and Dillon, Read & Co., upon the invitation of the corporation and Fox Theatres Corp., have, after much study and effort, submitted a plan of financing which, if accepted by the stockholders, will avert receivership.

This plan, which has been approved and recommended by the board of directors and is about to be submitted to the stockholders for their action provides funds to meet the present crisis. It affords to all stockholders the opportunity to subscribe for new securities and to obtain whatever special benefits may accrue to the new securities to be created.

While the committee, as above stated, believes that under existing conditions the plan presented by the bankers is the only method available to avert a receivership, the committee reserves full liberty to act in such manner as may from time to time seem best calculated to protect the stockholders, and the proxies which it will request will be broad enough to permit the committee to vote for this plan or for any other plan that may be submitted to the stockholders' meeting.

Committee.—Morton F. Stern, Chairman (of J. S. Bache & Co.); James M. Beck (member of Congress and former Solicitor General of the U. S.); Frank M. Dick (of E. F. Hutton & Co.); Charles Eisele (of Newark, N. J.); Herbert Fleischacker (Pres., Anglo-American National Bank of San Francisco); Louis J. Horowitz (Chairman of Board, Thompson-Starrett Co.); John L. Kuser, Dryden Kuser, Edward A. Peirce (of A. E. Pierce & Co.) with Root, Clark, Buckner & Ballantine; Stroock & Stroock, Counsel, and E. D. Alyea, Secretary, 31 Nassau St., New York, N. Y.—V. 130, p. 1123.

Fox Theatres Corp.—*Financial Plan.*—See Fox Film Corp. above,

Special Meeting of Stockholders to be Held March 5.—

A special meeting of stockholders will be held March 5 for the following purposes:

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

1. To consider and take action upon the plan of financing.
2. To consider and take action upon the proposal to authorize and consent to the creation and issue by the corporation of $40,000,000 10-year 7% convertible debentures in such form and having such terms as may be determined by the board of directors.

The directors in a letter to the stockholders, dated Feb. 18, said in part:

Halsey, Stuart & Co., Inc., who in 1929 made a public offering of Fox Film Corp.'s 1-year notes, due April 1 1930, and who have made public offerings of numerous underlying securities of corporation's subsidiaries, have, in Court proceedings, pressed for the appointment of receivers for Fox Film Corp. with which corporation is affiliated. A receivership for Fox Film Corp. would inevitably, in the option of directors, lead to the appointment of receivers for corporation. Indeed, a proceeding for the appointment of such receivers is pending in the same court in which the application has been made for the appointment of receivers of Fox Film Corporation.

Cause of Corporation's Embarrassment.—In order to carry through the purchase of a substantial interest in the stock of Loew's, Inc., it became necessary for corporation to borrow substantial sums, including the following approximate amounts:

Loans from banks, secured by pledge of Loew's, Inc., stock as collateral	$26,500,000
Loan from Fox Film Corp., (largely out of the proceeds of the 1-year notes), now approximately	18,000,000
Loan from Electrical Research Products, Inc. (evidenced by notes endorsed by Fox Film Corp.)	15,000,000

The acquisition of stock in Loew's, Inc., was made with the expectation that Halsey, Stuart would at the proper time effect a refunding of the obligations thereby incurred. Failure to effect such refunding before the decline in market values of securities last autumn is the immediate cause of corporation's financial embarrassment.

Securities to Be Issued by the Corporation.—Under the approved plan corporation will issue $40,000,000 10-year 7% convertible debentures, redeemable at 105% and int., entitled to a sinking fund into which shall be paid all net earnings up to the sum of $2,000,000 cumulatively before paying any dividends on common stock, convertible into class A common stock, and to be secured by the pledge of corporation's equity in the stock of Loew's, Inc., and such other collateral as corporation may have available. The price at which the class A common stock may be taken on conversion is to be determined in the light of market conditions existing at the time the issue of the debentures is authorized, but is to be not less than $10 per share during the first year and thereafter $15 per share.

The proceeds of these debentures will be used to pay the indebtedness to Fox Film Corp. and Electrical Research Products, Inc., to reduce secured loans, and otherwise for corporate purposes.

Offering to Stockholders and Underwriting.—The stockholders of record on a date which will be later announced, and which will be shortly after the stockholders' meeting, will be entitled to subscribe for debentures, at principal amount and accrued int., in proportion to their stockholdings, that is, $20.19 of debentures for each share of stock held by them. This right of subscription will continue for one year and will be evidenced by appropriate forms of negotiable subscription warrants which will be issued to the stockholders. As debentures will be issued only in multiples of $100, warrants for fractional debentures will not entitle the holder thereof to subscribe for the fractions expressed therein, but will entitle the holder, when surrendered together with other fractional warrants in multiples of $100, to purchase debentures or to receive full debenture subscription warrants.

Thus if any stockholder feels unable himself to exercise his subscription rights, he may sell them and thereby immediately realize their cash value.

In view of the immediate need of the corporation for cash the entire issue will be underwritten for a cash commission of 9% by Fox Film Corp. which will take the entire issue immediately subject to the stockholders' right of subscription.

Management.—In order to insure to the holders of the new securities to be issued under the plan proper management, the plan provides for voting trusts of all the class B common stock of the corporation and at least a majority of the class B common stock of Fox Film Corp., to continue for 5 years and thereafter so long as any of the debentures or preferred stock of Fox Film Corp. shall be outstanding, but not exceeding an additional 5 years.

The entire first board of directors, after the adoption of the plan of both the corporation and Fox Film Corp., and a chairman of the board, president, treasurer and comptroller of both corporations, are required to be satisfactory to the bankers under the plan.—V. 130, p. 806.

French Line (La Compagnie Generale Transatlantique).—*Dividend on "American Shares."*—

The company has declared a dividend at the rate of 5% per annum, for the six months period, payable on the common B stock of 600 French francs par value on Feb. 27 1930. The Equitable Trust Co., as depositary, will receive net, after deduction of French taxes, equal to 12.30 francs per share and will make further announcement as to the rate of dividend on "American shares" and date of payment at a later date.—See also V. 129, p. 289.

Gately Chain Stores, Inc., St. Louis.—*Receivership.*—

Suit for a receiver to take charge and operate the company, for the protection of creditors and stockholders, was filed in United States District Court Feb. 14 at St. Louis by Shapleigh Hardware Co. and James J. Burke Co., which stated they are unsecured creditors of the firm.

The petition pointed out that, while the Gately firm is solvent, having assets greatly in excess of liabilities, officers of the concern have allowed its liquid assets to run so low as to be unable to pay present obligations.

The petition lists total assets of the firm at $470,000, including $220,000 in accounts receivable, said to be good and collectable; $150,000 merchandise on hand in the stores, and fixtures valued at $100,000.

General Instrument Corp.—*Acquisition.*—

The corporation has acquired the Carl A. Norgen Co., Inc. of Denver, Colo., manufacturers of pneumatic equipment. The entire plant of the latter company will be moved immediately to Los Angeles.—V. 129, p. 1597.

Voting Trust Terminates on Feb. 26.—

The voting trustees (Kerwin H. Fulton, George L. Johnson and George Armsby, in a letter to the holders of voting trust certificates for com. stock issued under the voting trust agreement, dated Feb. 26 1925, say in substance.

The voting trust agreement above referred to will terminate on Feb. 26 1930. The voting trust agreement provides that upon its termination the voting trustees, in exchange for and upon surrender of any voting trust certificate then outstanding and on payment, if the trustees shall so require, of a sum sufficient to reimburse them for any stamp taxes or other governmental charge in connection with such delivery, will deliver certificates for stock of the company of the class and to the amount called for by such voting trust certificate, and may require the holder of any such voting trust certificate to exchange it for certificates for capital stock of the company of the class and to the amount called for thereby.

Notice is therefore given that the holders of the outstanding voting trust certificates for common stock are hereby required to surrender their voting trust certificates to said depositary, the Bank of America National Association, 44 Wall St., N. Y. City, on Feb. 27 1930, duly endorsed in blank for transfer, and to receive in exchange therefor, certificates for common stock of the company to the amount called for by such voting trust certificates so surrendered.

All voting trust certificates so surrendered must be accompanied by United States and New York State stock transfer stamps each at the rate of 2 cents per share, or in lieu thereof the sum of 4 cents per share may be deposited with said depositary to reimburse the voting trustees for the United States and New York State stamp taxes payable in connection with such delivery. Such stamps must not be affixed to the voting trust certificates as they are required to cover the tax upon the transfer of stock certificates now held by the voting trustees.

The board of directors, at the suggestion of the voting trustees, have determined to omit the annual meeting of stockholders scheduled to be held on Feb. 17, but to issue a call for a special meeting of stockholders to be held on April 14 1930, at which the holders of common stock of record on April 1 1930, will be entitled to vote. This will enable the holders of voting trust certificates for common stock, who shall exchange their voting trust certificates for definitive certificates for common stock of the company prior to April 1 1930, to vote at the election for directors.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

The company is about to make application to the New York Stock Exchange for the listing of its common stock to become effective upon the termination of the voting trust agreement. We are informed by the Exchange that it is its practice to permit a continuance of trading in voting trust certificates only for a period of about 10 days after the listing of the common stock.—V. 129, p. 2691.

General Tire & Rubber Co.—*Sales Higher.*—

"With the month only half over, sales of General tires for February thus far are 18% ahead of the sales for February 1929," President W. O'Neil said. "Most of our distributors are reporting a gain in tire sales over the same period last year, particularly the larger distributors. Our telegraphic orders are four times as large as they were a year ago this time," said Mr. O'Neil.

—V. 130, p. 142.

Gleaner Combine Harvester Corp.—*Larger Dividend.*—

The directors have declared a quarterly dividend of 50 cents per share on the common stock, no par value, payable April 1 to holders of record March 18. A quarterly dividend of 25 cents per share was paid on this issue on Jan. 1 last. The latter distribution was equivalent to the quarterly dividend rate of $1 per share paid on the common stock outstanding prior to the distribution of the 300% stock dividend on Nov. 15 1929 to holders of record Nov. 5 1929.—V. 129, p. 3332.

Glidden Co., Cleveland.—1% *Stock Dividend.*—

The directors have declared the regular quarterly dividend of 50c. per share and an extra dividend of 1% in stock on the no par value common stock, and also the regular quarterly dividend of 1¾% on the preferred stock, all payable April 1 to holders of record March 12. Like amounts were paid on Oct. 1 1929 and on Jan. 2 1930. Previously the company paid 37½c. regular and 12½c. in cash each quarter.—V. 130, p. 295.

Greyhound Corp.—*Passenger Increase.*—

The corporation reports its lines between Chicago and New York had carried 188,980 passengers during January, against 174,509 in the same month of 1929. Average revenue per passenger increased in the same month to $2.16 from $1.87 a year ago, indicating the average distance travelled per passenger has increased.

Gross passenger revenue in January 1930 for the company's lines between Chicago and New York amounted to $407,517 against $325,643 for the same month last year, an increase of $81,874 or more than 25%.—V. 130, p. 1124.

Gulf States Steel Co.—*Expansion.*—

President W. H. Coverdale announced on Feb. 14 that between $17,000,000 and $20,000,000 would be spent in erecting and enlarging mills at Gadsden, Ala. He stated the program included a $1,000,000 blooming mill, a $2,000,000 plate mill and a $2,000,000 sheet mill. Additional steel furnaces, coke ovens and a power plant also are planned.

After the announcement city councilmen met and began preparations for the construction of streets through land recently bought by the steel company, on which Mr. Coverdale said the new mills would be erected.—V. 130, p. 1124.

Hambleton Corp.—*Initial Semi-Annual Dividend.*—

The corporation has declared an initial semi-annual dividend of $1.50 a share on the participating cumulative $3 preferred stock. The dividend is payable Mar. 1 to holders of record Feb. 21.

In its activities the corporation, for the first six months of operation, shows realized cash profit of approximately $100,000, which does not reflect any appreciation in the corporation's investments. Current balance sheet indicates book values in excess of the amount originally paid into the corporation. The corporation has no bank loans or bills payable in any form.

In connection with announcement of the initial dividend, it is stated that the plans and functions for which the corporation was formed, that of acquiring substantial interests in enterprises subject to development and expansion, have been largely completed and on a satisfactory basis. These accomplishments have been subsequent to the break in the market in October and November of last year, it is stated.—V. 129, p. 2692.

Indian Motocycle Co.—*Listing.*—

The New York Stock Exchange has authorized the listing of 60,000 additional shares of common stock (no par value) on official notice of issuance and payment in full pursuant to sale to underwriters, making the total amount applied for 200,000 shares of common stock.

The directors on Dec. 4 1929, adopted a resolution for the call of a special stockholders' meeting for Dec. 12 1929, at Springfield, Mass., to authorize an amendment to the Charter of the company for an increase of its com. stock of no par value in the amount of 100,000 shares. The special stockholders' meeting was on Dec. 12 1929, adjourned to Dec. 17 1929, at Springfield, Mass., at which latter time and place a majority of the stockholders of both classes in person or by proxy voted said amendment.

The directors, on Dec. 17 1929 authorized the issuance of 40,000 additional shares of stock and on Jan. 28 1930 authorized the issuance of 60,000 additional shares at not less than $5 per share. It is proposed with some of the proceeds of the sale of this stock to retire and cancel 1,120 shares of the preferred stock.

Indian Territory Illuminating Oil Co., Bartlesville, Okla.—*Change in Capital—Acquisition.*—

A special meeting of stockholders of this company, a subsidiary of the Cities Service Co., has been called for Feb. 26 to ratify a plan for the creation of new non-voting class A no-par common stock. It is planned to issue 1,250,000 shares of the new stock in connection with the recent acquisition of properties of the Foster Petroleum Corp., in Oklahoma.

The plan calls for a change in the present $1 par class B common to no par class B common. Voting rights will continue to be vested in the class B stock. The Cities Service Co. owns 68% of the present voting stock. Issuance of the new stock will not affect the voting control.

Under the plan submitted to stockholders provision is made for the issuance of either or both classes of common stock to finance future development of the Indian Territory company. An official said that the company would be in the market from time to time for new capital. See also Cities Service Co. in V. 130, p. 970.

Federal Reserve Bank of St. Louis

Insull Utility Investments, Inc.—1½% *Stock Dividend.*

The directors have declared a regular quarterly dividend of 1½% in stock on the common stock, payable April 15 to holders of record March 31. The dividend date is coincident with the date upon which a previously declared dividend (payable out of the earnings of 1929) will be paid and will be for a like amount of stock. Therefore holders of common stock will receive a total common stock dividend on April 15, equal to 3% of their holdings as of March 31.—V. 130, p. 632.

International Shoe Co., St. Louis.—*Production in* 1929.

The company has issued the following interesting figures based on their own records and those of the U. S. Department of Commerce in its bulletin of Feb. 7 1930. During the calendar year ended Dec. 31 1929, the total production of leather boots and shoes by all manufacturers was 361,402,183 pairs. For this same period International Shoe Co.'s production was 55,507,129 pairs, or more than 15% of the total.

The entire shoe industry showed an increase of 17,051,459 pairs over the corresponding period of the previous year, and for the same period the International Shoe Co. alone showed an increase of 7,281,134 pairs or more than 42% of the total increase. While all other manufacturers were producing 305,895,054 pairs for a gain of slightly more than 3% over their production of the previous year, the International Shoe Co. was producing 55,507,129 pairs for a gain in its own record of more than 15%.—V. 130, p. 810.

(Julius) Kayser & Co.—*Merger Rumor Denied.*—

This company has no intention of combining or amalgamating with any other company. Said President Henry L. Van Praag in denying recent reports linking the Kayser company in a consolidation with Gotham Silk Hosiery Co.

"Steadily growing demand for our products is keeping our plants working at capacity, and forcing expansion at some mills," he said, "and no appreciable economies or benefits would accrue from any merger at this time. The company has a wellrounded line of products, adequate distribution, both domestic and foreign, and with sufficient volume in sight to take care of normal expansion, we see no reason for consolidating with any other hosiery concern."

Export Sales Continue to Increase.—

Export sales of silk hosiery and underwear by the Julius Kayser Co. showed an increase of 10% for the fiscal year ended July 1 last, and this rate of increase has continued for the first half of the current year, said President Henry L. Van Praag. "Earnings from export operations have been improving steadily," he said, "and our revenue from foreign operations will be materially increased when our new plant at Melbourne, Australia, gets into production early in May."

South African sales of silk hosiery and underwear have been going forward at a rapid rate during the past few years, Mr. Van Praag said.—V. 130, p. 1125.

Kimberly-Clark Corp.—*To Convert Mill.*—

The corporation will convert the Atlas mill, which is its unit at Appleton, Wis., into a wall-paper printing plant, President F. J. Sensenbrenner announced on Feb. 17. The paper converting department, which has been operating steadily since the paper making department was closed in December, will be discontinued. Six well-paper printing machines have been purchased for immediate installation, and the plant probably will be ready for operation in two months. The specialties formerly turned out in the Atlas mill have been made in the Lake View mill since its opening the first of this year.—V. 129, p. 2869.

Kolster Radio Corp.—*Stockholders' Protective Committee.*

The holders of the common stock have been advised that the committee (see below) have been requested by a number of holders of the common stock to act as a committee to represent and protect their interests.

The need for such a committee is due to the following facts, according to the committee's announcement:

On Jan. 21 1930 the Court of Chancery of New Jersey, with the consent of the corporation, appointed receivers on the ground that its business has been conducted unprofitably and that the corporation is insolvent.

By order of that court a special master, appointed for that purpose, has been conducting an examination of the affairs of the corporation.

An application for a receiver in the State of Delaware has recently been filed in a stockholders' action, and this case will come on for hearing within a few days.

The stockholders are widely scattered and it is essential for the protection of their interests that the stockholders act in concert through a committee appointed for that purpose.

The Interstate Trust Co. of 37 Wall St., N. Y. City, has been designated the depositary of the committee. To conserve their interests, stockholders

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

should promptly forward their stock, properly endorsed for transfer, to the Interstate Trust Co. for deposit.

Committee.—A. Harry Moore, Chairman; Paul C. Beardslee, Lawrence M. Bainbridge, Martin K. Fowler, with Samuel J. Marshall, Sec., 1514 Pershing Square Bldg., N. Y. City, and Edwards, Murphy & Minton, 26 Liberty St., N. Y. City, and Hobart & Minard, 24 Branford Pl., Newark, N. J., counsel.—V. 130, p. 1125.

Lambert Co.—*Listing.*—

The New York Stock Exchange has authorized the listing of 50,000 additional shares of common stock, upon official notice of issuance, in exchange for all of the issued and outstanding capital stock of a new corporation to be formed to acquire all of the business and good will and certain assets of Pro-phy-lac-tic Brush Co. (Mass.), and 125,000 additional shares of common stock, upon official notice of issuance and payment in full, upon the exercise of certain options heretofore granted to 11 officers and employees of the corporation and (or) of its subsidiaries, making the total amounts applied for 873,996 shares.

Pro Forma Consolidated Balance Sheet Dec. 31 1929.

[After giving effect to the following transactions not yet consummated: (*a*) formation of new company and acquisition by it of business, goodwill and assets (except certain assets not deemed necessary to the conduct of business) and asumption by it of certain liabilities of Pro-phy-lac-tic Brush Co.; (*b*) acquisition by Lambert Co. of all of the outstanding capital stock of new company, and (*c*) issuance by Lambert Co. of 50,000 shares of its capital stock in exchange therefor.].

Lancaster Mills, Clinton, Mass.—*May Liquidate.*—

The stockholders on Feb. 21 will consider the matter of raising new capital or liquidating the company. According to Treasurer Robert R. West there was a loss last year of approximately $404,000 after all charges, including depreciation, as compared with an operating loss of $161,000 during the last half of 1928. Business obtainable in large volume last year, he says, was at such prices that profitable operation was impossible and that obtainable at profitable prices was of negligible volume.

"The company's losses in recent years," Mr. West says in a letter to stockholders, "had reduced its working capital to approximately $180,000 at the end of 1929, even after the sale of machinery and real estate for $280,000 cash. Operations in 1930 have resulted in further substantial reduction in working capital. Amory, Browne & Co., the selling agents, do not wish to continue indorsement of the company's notes after July 1 1930, and will not continue it after Dec. 31 1930."

"Whereas the outlook for any substantial return from liquidation, even to the preferred stockholder, is not promising, the directors do not feel, in view of market conditions, that they can recommend to any stockholders the contribution of additional capital to the company."—V. 127, p. 962.

Libbey-Owens Glass Co.—*New Contract.*—

A contract has been let by this company for a $500,000 addition to its $3,000,000 laminated glass unit which it recently completed and which has been found too small to supply automobile glass orders received. About 350 workers will be needed when the new unit starts operations in April, it is stated. At present 1,000 are employed in two 8-hour shifts. The unit will increase the company's laminated glass capacity to 25,000,000 square feet annually.—V. 130, p. 1125.

Loft, Inc.—*Writ Withdrawn.*—

The Delaware Chancery Court has dissolved a restraining order obtained against the company, by Charles G. Guth, President of Mavis Candies, Inc., a subsidiary, and discharged the rule for a preliminary injunction. The Court's action was taken on application of counsel for Guth.

The Court has set March 4 as the date of final hearing on Guth's application for a permanent injunction. Guth seeks to have the corporation enjoined from selling or transferring any of its assets or making any disbursements of corporate funds except those which are authorized by the directors and as may be proper and necessary to continue the current business of the company.—V. 130, p. 476.

Mathieson Alkali Works (Inc.).—*Annual Report.*—

President E. M. Allen says in part:

The earnings for 1929 were the largest in company's history each quarter exceeding the same quarter of the previous year. The year showed net earnings of $3.31 per share on common stock, after depreciation, Federal income tax and preferred dividends. This is equivalent to $14.63 per share on outstanding stock of a year ago, compared with $13.04 for 1928, $11.28 for 1927, $10.24 for 1926 and $8.78 for 1925.

During 1929 expenditures for new construction were the largest of any year under the present management, and while some of the projects were completed and put into operation during the past year, a large part will not be completed and operating until next summer. It was for these construction expenditures that the board elected to raise part of the money required, by giving the stockholders in September 1929 the right to subscribe to new stock on the basis of 1 share at $40 per share, for every 10 shares held, rather than do all this new work from earnings.

In the third quarter we accepted an attractive offer and sold our small organic chemical plant at Newark, N. Y. which will enable the company to secure materially greater returns from the proceeds of this sale, and what is more important, will enable all departments to concentrate on our regular line of heavy chemicals.

Matson Navigation Co.—*Larger Dividend.*—

The directors have declared a quarterly dividend of $1.50 per share, payable Feb. 15. This compares with $1 per share previously.—V. 128, p. 1569.

Mergenthaler Linotype Co.—25c. *Extra Dividend—Regular Quarterly Dividend Rate Increased.*—

The directors have declared an extra dividend of 25c. per share in addition to a regular quarterly dividend of $1.50 per share on the outstanding 256,000 shares of no par value capital stock, both payable March 31 to holders of record March 5. Like amounts were paid on Dec. 31 last. From June 30 1926 to Sept. 29 1928, incl., there were paid quarterly, in addition to the regular $1.25 dividend, an extra dividend of 25 cents per share. From Dec. 31 1928 to and incl. Sept. 30 1929, a regular dividend of $1.25 and an extra of 50c. per share were paid each quarter.—V. 129, p. 3335.

Middle States Oil Corp.—*Reorganization Completed.*—

The reorganization committee announces the successful completion of the reorganization of this company. New securities are being mailed to depositors under the plan of reorganization. The new corporation will be known as *Middle States Petroleum Corp.*

Joseph Glass, one of the receivers of the old company appointed by Judge Knox, has been elected President of the new company.

Norris T. Gilbert of Tulsa, Okla., was appointed 1st Vice-President and General Manager. Mr. Gilbert was formerly one of the ancillary receivers. He will be in charge of field operations.

Other officers elected were: Thaddeus G. Benton, Treasurer and Secretary; Conard E. Cooper, General Attorney; and Carl E. Lind, Comptroller.

The following directors were elected: Charles D. Barney, Matthew C. Brush, Frank B. Cahn, Henry S. Fleming, Norris T. Gilbert, Joseph Glass, Leavitt J. Hunt, James E. Sague, and Henry F. Whitney.

The voting trustees designated for all of the stock of the new company are: Matthew C. Brush, Frank B. Cahn, Henry S. Fleming, Joseph Glass and James E. Sague.

Messrs. Brush and Glass have been designated as the independent voting trustees.—V. 129, p. 4148.

See Middle States Oil Corp. above.—V. 130, p. 145.

Midland Steel Products Co.—*Listing.*—

The New York Stock Exchange has authorized the listing of 96,93 shares 8% cum. 1st pref. stock (par $100) and 242,325 shares common stock (no par value). Compare recapitalization plan in V. 129, p. 4149; V. 130 p. 1126.

(H.) Milgrim & Bros., Inc.—*New Store.*—

This corporation, in connection with their expansion program for 1930 announce that on March 3 next they will open their fifth store in the new Fisher Building, Detroit, Mich. The architectural design of this store is being executed in the style of the French Rennaisance, and will be one of the most elaborate in the country, occupying three floors. The company recently opened a shop at Miami Beach, Fla., to cater to their Southern clientele. The expansion program of the company is rapidly going ahead and everything points to a large increase in business for 1930, according to Mr. Milgrim.—V. 130, p. 3178.

Miller Rubber Co.—*Sale Approved.*—

The stockholders on Feb. 17 voted to accept the offer of the B. F. Goodrich Co. to purchase the Miller assets, property and good-will for 113,504 shares of Goodrich common stock and to assume the Miller company's liabilities. See also V. 130, p. 813.

Missouri-Kansas Pipe Line Co.—*Stock Increase, &c.*—

The stockholders on Feb. 17 voted to increase the authorized $5 par common stock from 700,000 shares to 5,000,000 shares and to create an issue of 5,000,000 shares of $1 par value class B stock. See further details in V. 130, p. 1126.

Moirs, Ltd., Halifax, N. S.—*New Directors, &c.*—

W. B. Proctor and J. L. Hetherington, both of Halifax, have been elected directors.

The board now consists of O. E. Smith (Pres.), J. C. MacKeen (V.-Pres.), J. H. Winfield (managing director), J. W. Moir (Chairman of the board), G. MacG. Mitchell, W. A. Moir, W. B. Proctor, J. L. Hetherington, I. W. Killam, H. P. Robinson, Archibald Fraser and Frank Stanfield.

Gross sales for 1929 are reported to have been $3,032,736 and net sales amounted to $2,907,673.—V. 125, p. 3651.

Moon Motor Car Co.—*Listing.*—

The New York Stock Exchange has authorized the listing of 150,000 additional shares of capital stock on official notice of issuance in exchange for Ruxton assets and not exceeding 100,000 additional shares of capital stock, on official notice that they have been sold to bankers at a price of not less than $5 per share, making the total amount applied for 350,000 shares.

Pursuant to resolution duly adopted by directors Jan. 29 1930, the company has been authorized to issue additional shares of its capital stock as follows: (*a*) 150,000 shares to the New Era Motors, Inc. (Del.), in exchange for the certain assets aggregating $762,912, and exclusive right to the name "Ruxton" and certain licenses giving right to manufacture front wheel drive automobiles under certain patents controlled by the New Era company essential to the manufacture of the Ruxton front-wheel-drive automobile; (*b*) 100,000 additional shares of capital stock without par value on official notice that they have been sold to bankers for a price of not less than $5 per share. The proceeds of same to be used for general corporate purpose.

—V. 130, p. 635.

National Lead Co.—3% *Stock Dividend.*—The directors have declared an extra dividend of 3% in addition to the regular quarterly dividend of 1¼% on the common stock, par $100, both payable March 31 to holders of record March 14. From June 1927 to December 1929 inclusive, the company paid quarterly dividends of 1¼% each.

In his statement to stockholders accompanying the report, President Edward J. Cornish said:

The management is of the opinion that current decreased interest rates will stimulate building and react favorably upon business; increasing interest and increasing taxes being the handicap to business progress. For this reason the board of directors, at its meeting, concluded to continue the usual quarterly dividend on the common stock of $1.25 a share, and in view of the exceptional earnings of the company for 1929 and strong cash position of the company, declare an extra dividend of $3, payable on March 31 to holders of record on March 14.

The board does not at this time contemplate any further change in dividend rate on common stock, and will adhere to its past policy of not increasing the regular dividend rate unless the board believes that such increased rate can be maintained as far into the future as reasonable men should attempt to see.

Nevada Consolidated Copper Co.—*Quarterly Report.*—

The report covering the fourth quarter of 1929 says:

The net production of copper from all sources for the fourth quarter, compared to that for the three preceding quarters of 1929, is shown in the following tabulation:

1929	*Net Lbs. Cop. Produced.*	*Ave. Monthly Production.*
Fourth quarter	55,086,066	18,362,022
Third quarter	60,190,553	20,063,517
Second quarter	72,616,900	24,205,633
First quarter	78,381,399	26,127,133

The total quantity of company ores milled and smelted during the quarter was 2,857,960 tons. Of this total 2,839,353 tons was concentrating ore, averaging 1.18% copper, and 18,607 tons was direct smelting ore shipped to smelters. In addition to company ores, 310,986 tons of custom ore was milled or smelted at the Nevada plants. The average daily tonnage of company ores milled at all concentrators was 30,863, as compared to 32,616 tons per day for the preceding quarter.

The average recovery in the form of concentrates from all company material milled during the period was 84.20% of the total copper contained therein, corresponding to 19.82 pounds of copper per ton treated, as compared to a recovery of 85.04% and 20.59 pounds per ton for the previous quarter.

The net cost per pound of copper produced, after crediting revenue from gold and silver and other miscellaneous earnings and income from subsidiaries was 9.14 cents, as compared with 9.32 cents for the third quarter. These costs include all operating and general charges of every kind except depreciation and reserve for Federal taxes.

Newmont Mining Corp.—*New Director.*—

Franz Schneider Jr., formerly financial editor of the New York "Sun," has been elected Vice-President and a director. On the board of directors he takes the place made vacant by the resignation of Vernon Monroe.—V. 129, p. 3976.

New York Dock Co.—*New Director, &c.*—

William J. Wason has been elected a director and a member of the executive committee, succeeding Challen R. Parker resigned. Mr. Wason is Vice-President and trustee of the Kings County Trust Co.—V. 129, p. 2697.

New York Transit Co.—*Extra Div.—Annual Report.*—

The directors have declared an extra dividend of 10c. a share in addition to the regular quarterly disbursement of 40c. a share on the $10 par capital stock, both payable Apr. 15 to holders of record Mar. 21. Like amounts were paid on Jan. 15 last.

President D. S. Bushnell, in the annual report, says in part:

During 1929 company handled 2,556,499 barrels of revenue-producing trunk line freight, compared with 2,233,246 barrels in 1928, an increase of 323,253 barrels or 14.47%. Company's gathering line in Cattaraugus County moving Pennsylvania grade crude through our local division handled 361,886 barrels in 1929 as compared with 294,153 barrels in 1928, an increase of 67,733 barrels or 23.03%.

In report for 1928 reference was made to the sale to the Columbia Gas & Electric Corp. interests of certain unused pipe line property in New York and New Jersey. During 1929 the formalities involved in this transaction were completed and the capital company having been reduced, a cash dis

tribution of $62 per share of old stock was made to stockholders together with two new shares of $10 par capital stock, in exchange for one old share of $100 par capital stock. The capital stock is now $1,000,000 consisting of 100,000 shares of $10 par value.

There still remain to be sold several pieces of property with buildings thereon and negotiations are now in progress toward this end. The amount involved in these transactions, however, will be small.

During 1929 an initial dividend of 40c. per share on the new stock was paid on Oct. 15, and dividends of 40c. per share and 10c. per share extra were declared, both payable Jan. 15 1930.

Otis Elevator Co.—*New Contract.*—

An elevator contract amounting to $2,900,000, the largest in the history of the building industry, has been awarded by Starrett Brothers, Inc., to the Otis Elevator Co. The contract calls for 66 cars, covering the elevator requirements of the new 85-story Empire State Building being erected on the site of the old Waldorf-Astoria Hotel.

According to A. J. Eken, Vice-President of Starrett Brothers, so many new problems were presented in designing the elevator equipment adequate to meeting the needs of the new 1,050-foot structure that it be ame necessary to develop a new type of car and machinery. The new cars will be able to make a new record in elevator speed of 1,200 feet a minute, although the city's present building code will hold their speed to 800 feet a minute; they are self-leveling and will run on an automatic dispatching system.—V. 129, p. 3811.

Pacific Associates, Inc.—*Annual Statement.*—

President De Lancey Lewis says in part:

Earnings for the past year have amounted to $5.14 per share on the total number of shares outstanding. Figuring on the basis of amount issued from time to time during the year, earnings were 3 2-10th times dividend requirements, after providing for income tax and paying non-recurring expenses of increase of capital and merger operations.

We have now on hand as of Dec. 31 1929, in surplus and undivided profits which are available for dividends, about $4 a share. In addition to this amount, normal income from dividend and interest on our securities amounts to about 90%, of our own dividend requirements, exclusive of operating profits. As most of our securities have an unbroken dividend record, we should be able, even under adverse general conditions, to pay our dividends without impairing our earned surplus, particularly since a number of our stocks have had an increase in dividends announced.

As to diversification of our funds, the portfolio of the company contains only six stocks in which it has an investment in excess of $100,000 eacn, as follows, size of investment being in the order named:

Pacific Mutual Life Insurance Co.	Claude Neon Elec. Products (Del.)
Pacific Finance Corp	Amer. Tel. & Tel. (stk. & conv. bds.)
Gladding McBean	Walalua Agricultural

The six securities constitute over 50% of the assets of the company, the largest being that in Pacific Mutual of $550,000.

Pacific Mutual Life Insurance Co., Los Angeles.—*Stock Increased—Rights.*—

A 10% increase in capitalization was approved by the stockholders at the annual meeting. This increase is in accord with the plan previously announced whereby the company will increase its capitalization 10% a year for the next 10 years through the issuance of rights to stockholders. The plan was placed in operation last August by the issuance of rights to stockholders of record Aug. 14 to subscribe to one additional share of stock at $50 for each 10 shares held.

The authorization by the stockholders increases the capital stock from 440,000 shares of $10 par to 484,000 shares.

Total assets increased $16,303,199 to $162,286,364 on Dec. 31 from $145,983,165 a year ago. Commenting on the assets of the company, President George I. Cochran said: "The market value has not decreased during the year and on the contrary exceed our book value by a very considerable sum. We are looking forward to 1930 as an exceptionally good year for many reasons.—V. 130, p. 300.

Parker Mills, Fall River.—*Sufficient Stock Deposited to Insure Acceptance of Plan.—Offer Extended.*—

Success or failure of the offer of the Berkshire Fine Spinning Associates, Inc., to take over the Parker Mills of Fall River and Warren, R. I., on a stock exchange basis is dependent upon the acceptance of terms by u bondholders, Parker Mills stockholders were told on Feb. 15, when final action was pontponed to Feb. 28. 28. Sufficient stock has been deposited to insure acceptance of the Berkshire terms by the corporation, officials declare.

The Berkshire corporation has extended its offer to March 1 to permit further consideration of the proposition by the bondholders, it was announced. According to the last financial statement of the Parker Mills, its bonds totaled $950,000, which includes those assumed when the corporation absorbed the Hargraves Mills. See also V. 130, p. 301.

Passwall Corp.—*Financial Report.*—

President F. T. Hepburn reports in part:

Corporation's charter was issued in August 1928 and its first capital from sale of its common stock was paid in during September 1928, but the greater portion of its $6 div. series pref. stock was not sold until after Nov. 1 1928 and while some business was transacted in 1928, no report was made for the portion of that year.

The almost continual rise in stock market prices during 1929 up to September permitted company's capital to be advantageously invested, and to show a very satisfactory appreciation in value prior to the market collapse in October and November. Before the collapse company sold sufficient of its securities to net a profit of approximately half of its then appreciation or paper profits. The October and November break in the market, however, carried prices to low points which showed a considerable

Digitized for FRASER

Federal Reserve Bank of St. Louis

depreciation in company's investments. The balance sheet herewith shows both cost and market value as of Dec. 31 1929. As of Jan. 31 1930, the market value of company's investment is only $298,257 less than their cost.

At the special stockholders' meeting held Oct. 7 1929 an amendment to the certificate of incorporation was approved which provided for a reclassification of its stock and the creation of a new series of pref. stock designated as $3 conv. pref., and for the conversion of the $6 div. series pref. into such new class of pref. stock at a date to be fixed by the board of directors. The board has since fixed the date of Feb. 20 1930, for such conversion. It is believed that this change is not only of distinct advantage to the preferred stockholders, but gives the company a much more marketable form of pref. stock for future financing.

Accts. receivable	4,767,714	4,948,651	Total (each side)	41,172,806	40,351,300

x Represented by 4,752,715 shares of no par value. y After deducting depreciation of $3,435,479.—V. 129, p. 3811.

Perfect Circle Co.—*To Increase Capital.*—

The stockholders will vote March 3 on increasing the authorized capital stock (no par) to 250,000 common shares from 162,500. The new stock would be available for issuance later in connection with additions to property and acquisition of additional properties.—V. 129, p. 3646.

Petroleum Corp. of America.—*Listing.*—

The London Stock Exchange has granted full permission for dealings in the shares of the above corporation and quotations will be recorded daily in the supplementary list.—V. 130, p. 814.

Pig'n Whistle Corp.—*Sales.*—

Sales for Month and 12 Months Ended Jan. 31.

1930—*Jan.*—1929.	*Increase.*	1930—12 *Mos.*—1929.	*Increase.*
$326,249 $302,831	$23,418	$3,838,966 $3,484,761	$354,205

Based upon the ratio of net earnings to gross sales in the fiscal year ended June 30 1929, sales for the past 12 months indicate that net profit will approximate $166,911, equal to 76c. a share on the 85,000 common shares after pref. dividend requirements. For the fiscal year ended June 30 1929, net profit amounted to 48c. a share on the same number of shares.—V. 130, p. 301.

Pilot Radio & Tube Corp.—*Net Sales.*—

Consolidated net sales of the Pilot Radio & Tube Corp. for January were $174,015, compared with $129,452 in January 1929, by the predecessor company, the Pilot Electric Manufacturing Co. The net sales of the Pilot Radio & Tube Corp. only in Jan. 1390 were $149,366.—V. 130, p. 301.

Plymouth Oil Co.—50c. *Dividend.*—

The directors have declared a dividend of 50c. per share, payable Mar. 15 to holders of record Mar. 5. A similar distribution was made four months ago.—V. 128, p. 3699.

Prairie Oil & Gas Co.—*Omits Extra Dividend.*—

The directors have declared the regular quarterly dividend of 50c. a share payable March 31 to holders of record Feb. 28. An extra of 25c. a share and a regular quarterly of 50c. a share were paid on Sept. 30 and Dec. 31 last.

Rainbow Luminous Products, Inc.—*Annual Report.*—

President Raymond R. Machlett says in part:

The condition of company has been materially improved during the past year. The neon patent status has been definitely decided, our volume of business has shown a material growth, our manufacturing and servicing facilities have been extended, new uses for our products have been developed, and finally our expenditures in time and money for the creation of a nation-wide market for our products have begun to bear fruitful returns.

Notwithstanding the fact that operations for the year 1929 show a profit, the greater part of that year was still a continuation of the development period in the history of your business.

The true measure of improvement in the financial condition of company during 1929 is found in the increase in the amount of unmatured rental and maintenance contracts receivable. The amount due us from such contracts at the end of 1929 was $637,037 greater than at the beginning of the year. The real gauge of financial progress, therefore, lies in this figure, no part of which has yet been included in the surplus account. According to our experience up to the close of 1929, the estimated deferred profits on Dec. 31 were $220,286. These deferred profits will become a part of the current profits of succeeding years.

The volume of business completed or in process in the factories of company during 1929 amounted to $2,302,786. The gross volume of sales of Rainbow equipped products in 1929 is estimated to be approximately $5,500,000, inclusive of sales made by sign manufacturers who purchased their tubing from the Rainbow plants. This figure can be compared with a volume of less than $3,000,000 derived from similar sources in 1928.

The charges to customers for completed signs and matured installment payments in 1929 was 58% greater than in 1928. This comparison, however, is not in itself an accurate index of growth, since it does not reflect the $676,498 unmatured accounts receivable at the close of the year.

Consolidated Balance Sheet Dec. 31 1929 (Incl. Rainbow Light Inc.).

Assets—		*Liabilities*—	
Cash	$431,499	Accounts payable	$101,730

x Represented by 122,684 no par shares. y Represented by 281,513 no par shares.—V. 129, p. 3978.

Railroad Shares Corp.—*Earnings.*—

Net earned surplus on Feb. 8 1930 was $236,444, an increase of $100,343 since Dec. 16 1929.—V. 130, p. 988.

Raybestos-Manhattan, Inc.—*Stock to Employees.*—

The directors have authorized offering of 11,500 shares of common stock to the employees at $39 a share, this stock to carry extra compensation of 50 cents a share annually to employees holding such shares one year or more. Stock offering represents shares accumulated in the open market and will not increase outstanding capital.—V. 130, p. 637.

Reliance Manufacturing Co. (Ill.).—*New Directors.*—

At the annual meeting of stockholders L. L. Chock, A. T. Bard and J. G. Pottinger were elected directors to fill vacancies.—V. 129, p. 3487.

Reo Motor Car Co.—*New Director.*—

William Robert Wilson, formerly Vice-President of the Irving National Bank and co-organizer of the Guardian Banking Group, with Edsel Ford and other Detroit motor executives, has been elected General Manager and a director of the Reo Motor Car Co. Richard H. Scott, formerly President and General Manager, will continue as President.—V. 129, p. 3024.

Republic Steel Corp.—*Extension of Time for Deposits.*—

The committee, acting under plan of consolidation in an announcement Feb. 17 says:

The committee is highly gratified by the response which the stockholders of the consolidating companies have made to the request for the deposit of stocks in support of the plan for the combination of the assets of these companies in a single corporation. Nevertheless, the committee is advised that many stockholders of these companies for various reasons have found it inconvenient or impossible to deposit their stocks within the time originally limited, to wit, Feb. 17 1930.

In view of the number of stockholders involved and the desirability of giving all of them an opportunity to assent to the plan, the committee has decided to extend the time for such deposits to and including March 1 1930. All stockholders who have not already deposited their stock are urged to do so within the period above specified.—V. 130, p. 988.

Retail Properties, Inc.—*Board of Directors.*—

Charles C. Nicholls, Jr., nationally known real estate expert, has been elected President. His election to the presidency of Retail Properties, Inc. is believed to foreshadow the company's increased activity in the retail store real estate field. Retail Properties, Inc. was organized in March 1929, by Otis & Co. and Harris, Forbes & Co. to acquire, hold or deal in real estate leases and property, especially suitable for retail store requirements. The company now owns property unencumbered by mortgage located in 22 cities in the United States and Canada. These properties are said by Mr. Nicholls to be 100% retail store locations, and the majority are occupied by outstanding retail store companies on a long-term lease basis

The directors of the company include, in addition to Mr. Nicholls, F. S. Burroughs and Sherman Damon of Harris, Forbes & Co.; J. N. Darrow, J. G. Gosling and Richard Inglis of Otis & Co.; and Hamilton C. Rickaby of Simpson, Thacher and Bartlett.—V. 130, p. 1128.

Research Investment Corp.—*Initial Common Dividend.*

The directors have declared an initial dividend of 75c. per share on the outstanding 20,000 shares of common stock, no par value, payable Mar. 1 to holders of record Feb. 20.—V. 129, p. 3337.

Formulae, trade marks, &c	1		
Prepaid rent, adv., insur., &c.	38,346	Total (each side)	$1,787,754

x Represented by 122,079 shares of $3 convertible pref. stock and 295,842 shares of common stock, both of no par value.—V. 129, p. 981.

Safeway Stores, Inc.—*January Sales.*—

Month of January—	1930.	1929.	*Increase.*
Sales	$18,439,302	x$14,902,759	$3,536,507

x This includes January sales on acquisitions subsequent to Jan. 1929.

Sales as reported each month previously in 1929 showed all sales for that year including new stores. The sales figures reported each month during 1928 were for a much smaller number of stores operated in that year. This necessarily caused the reporting of a larger increase in sales during 1929 than will be apparent from now on, as practically the entire unit will now be reported for 1930 and 1929.—V. 130, p. 479, 148.

St. Paul Garage Co. (Md.).—*Pref. Stock Offered.*—

Gillet & Co., Baltimore, are offering $750,000 7% cum. pref. stock at 100 and div. (carrying a bonus of one share of common stock and a warrant to purchase an additional share of common stock).

Dividends payable Q.-F. Red. all or part on any div. date, at $110 per share and dividend. Stock is free from the Maryland Securities tax of 4½ mills, and the dividends received from it are free from the present normal Federal income tax. Registrar and transfer agent, Baltimore Trust Co., Baltimore.

Data from Letter of John N. Mackall, Vice-President of the Company.

Company.—Has acquired a parcel of land located at the northwest corner of St. Paul and Saratoga Sts., Baltimore, Md., comprising approximately 37,000 square feet of area, for the purpose of constructing thereon and operating a modern automobile parking garage. The bulding is to be of brick and reinforced concrete, four stories in height above St. Paul St., and with a basement below St. Paul St. The foundations, columns and walls are designed to carry an additional three stories if desired at some later date. The initial capacity will be 1,000 cars, with an ultimate capacity of 1,500 cars.

Proposed Capitalization—	*Authorized.*	*Outstanding.*
Mortgages maturing within 15 years	$1,000,000	$1,000,000
7% cum. preferred stock (par $100)	1,000,000	750,000
Common stock (no par value)	50,000 shs.	*37,500 shs.

* Excluding the 7,500 shares reserved for exercise of warrants attached to preferred stock certificates.

Earnings.—Earnings to be expected from the garage under normal operating conditions, as determined after careful study, are estimated as follows:

Gross revenues (all sources)	$384,300
Operating expenses, taxes, maintenance, &c	151,500
Mortgage interest	60,000
Balance available pref. divs., Fed. inc. tax, deprec., &c	$172,800
Preferred dividends	52,500
Balance	$120,300

Earnings as shown above will be equivalent to over 3.29 times annual preferred dividend requirements, and after allowing for Federal income tax and depreciation, the balance remaining will be equivalent to more than $2 per share on each share of common stock to be outstanding upon completion of this financing.

Common Stock Bonus and Purchase Warrants.—Each share of the present issue of preferred stock carries with it a bonus of one full share of common stock, and has attached a warrant entitling the holder thereof to purchase an additional share of common stock, as now constituted, at $20 per share at any time except in the event the preferred stock is called for redemption, in which case warrants must be exercised prior to the redemption date. Funds derived from the exercise of these purchase warrants shall be applied to the construction of additional garage facilities and (or) to the retirement of mortgages or preferred stock.

Schnebbe Fire Protection Engineering Corp.—*Stocks Offered.*—E. Paul Young & Co., Inc., New York, are offering 5,000 shares (no par) pref. stock and 2,500 shares (no par) common stock in units of one share of pref. and ½ share of common at $48.50 per unit (plus pref. div.). See original offering in V. 129, p. 648.

Data from Letter of Fred D. Schnebbe, Pres. of the Corporation.

History.—Corporation was organized in 1924 in New York to conduct the business of installing and maintaining approved types of fire retarding equipment and the financing of such equipment by the savings effected through the reduced insurance costs. For the past three years business has approximately doubled in each succeeding year. Contracts now on hand in no instance extend over a period of more than 10 years. Such contracts are widely spread among a variety of businesses well diversified as to character and location.

Capitalization—	*Authorized.*	*Outstanding.*

Second National Investors Corp.—*To Report Quarterly.*

The inauguration of a policy of quarterly reporting for Second National Investors Corp., Third National Investors Corp. and Fourth National Investors Corp. has been announced by Fred Y. Presley, Pres. of National Investors Corp and affiliated companies, following a meeting of the board of directors held Feb. 14 1930.

These interim reports will contain a balance sheet, statement of income account and a comparison of net assets after adjustment for market value of securities owned. The holdings of each company will continue to be published annually in accordance with already established policy. This policy of quarterly reporting will go into effect for all affiliated companies of National Investors Corp. for the three months period ending Mar. 31 1930.—V. 130, p. 148.

Selected Industries Inc.—*Annual Report.*—

Holdings.—On Dec. 31 1929, company had invested $55,974,363 and had cash on hand and secured loans of $10,191,994. The investments may be classified as follows:

Railroads	$19,476,203
Tobaccos	9,376,069
Investment & finance	2,700,435
Oils	2,191,094
Industrials & miscellaneous	5,892,210
Bonds	98,835
Investments in special situations	16,219,517
Syndicate participations	20,000
Total	$55,974,363

On Dec. 31 1929, there was a shrinkage in the market value of listed securities amounting to $4,635,005 as against cost. On Jan. 27 1930, this shrinkage had decreased to $1,942,901. Company was able to advantageously buy on the market 93,304 units of its own allotment certificates, the retirement of which has increased capital surplus by an amount of $2,272,418, thereby more than wiping out the shrinkage in the market quotations of its investments as of Jan. 27 1930. By this operation company has also eliminated a substantial amount of its preferred stock and the dividend requirements thereon.

Southern Department Stores, Inc.—*Notes Offered.*—

Caldwell & Co., Nashville, Tenn., and Rogers Caldwell & Co., New York, recently offered $1,000,000 3-year 6% gold notes, series A, at 98 and int., to yield 6¾%.

Dated Jan. 1 1930; due Jan. 1 1933. Principal and int. (J. & J.) payable at Harris Trust & Savings Bank, Chicago, trustee, and Chemical Bank & Trust Co., New York, without deduction for normal Federal income tax not exceeding 2%. Company agrees to refund Penn., Conn. and Calif. taxes not in excess of 4 mills per annum, Maryland personal property tax not in excess of 4½% mills per annum, Kentucky, Virginia, Mich. and District of Columbia taxes not in excess of 5 mills per annum, Tenn. income tax on the interest not in excess of 5% per annum and Mass. income tax on the int. not in excess of 6% per annum. Denom. $1,000 and $500 c*. Red. all or part on any int. date upon 60 days notice at following prices and accrued int.: On or prior to Jan. 1 1931 at 101; thereafter to and incl. Jan. 1 1932 at 100½; and thereafter to maturity at principal amount.

Listed.—Notes are listed on the Chicago Stock Exchange.

Data from Letter of Joseph Eskind, Pres. of the Company.

History and Business.—Company was organized in Delaware in August 1928, as a holding and management company to consolidate the interests of several leading southern department stores into a chain merchandising system. Company has acquired and owns the following department store businesses: H. E. Bacon Co., Evansville, Ind., Drennen Co., Inc., Birmingham, Ala.; Lebeck Brothers, Nashville, Tenn.; John C. Lewis Co., Inc., Louisville, Ky.; and Herman Straus & Sons Co., Inc., Louisville, Ky.

Company, through subsidiaries, is engaged in the retail department store business, handling a wide variety of popular priced merchandise. The several stores of the system have each been in existence for 50 years or more, and rank among the leading retail stores in their respective cities, having combined net sales of over $6,000,000 per annum. Company, at present, controls 5 stores, having a total floor area of over 413,000 square feet, each located in the heart of the retail shopping district in its respective city.

Assets.—The consolidated balance sheet of company and subsidiaries as of July 31 1929, giving effect to the present financing, shows net tangible assets, after deducting preferred stock of the Drennen Co., Inc., subsidiary, of $2,035,809, equivalent to over $2,000 for each $1,000 note of this issue. The same balance sheet shows current assets of $2,257,196 and current liabilities of $903,589, or a net working capital of $1,353,607. Net current assets alone amount to over $1,300 for each $1,000 note of this issue.

Earnings.—The consolidated income account of the company and subsidiaries shows net income available for interest charges, before depreciation and Federal income tax, and before reflecting the benefits of consolidation, but after adjustment for certain non-recurring charges and after deducting dividends on the preferred stock of the Drennen Co., Inc., subsidiary, for the past three fiscal years of $738,328, or an annual average of $246,109, equivalent to 4.1 times annual interest requirements on these notes.

Corresponding net income for the fiscal year ended Jan. 31 1929, was equivalent to 4.4 times such interest requirements. Volume of sales for the 11 months ended Dec. 31 1929 was approximately the same as for the corresponding period of previous year.

Purpose.—Proceeds of notes, together with the proceeds from the sale of the preferred stock, will be used to satisfy obligations incurred in the acquisition of the constituent properties, for working capital and other corporate purposes.

Standard Oil Co. of Calif. (Del.).—19 *Companies Sued as Gasoline Trust—Government Accuses California Oil Concerns of Conspiracy To Fix Prices.*—

United States Attorney Hatfield filed suit, Feb. 15 against 19 California oil companies to enjoin them from "conspiracy to maintain an unfair price for gasoline."

The suit was filed in Federal District Court at San Francisco on orders from the Attorney General of the United States. The suit, aimed at the seven major and 12 smaller companies, also seeks to enjoin the companies from "engaging in violation" of the anti-trust laws.

The major oil companies named in the suit were the Associated Oil Co. of Calif., the Texas Oil Co. of Calif., the Union Oil Co. of Calif., the Standard Oil Co. of Calif., the Richfield Oil Co. of Calif., the General Petroleumm Corp. of Calif., and the Shell Oil Co. of Calif.—V. 130, p. 303.

Standard Oil Co. of Kansas.—*Quarterly Dividend.*—

The directors have declared a quarterly dividend of 50c. per share, payable March 15 to holders of record Feb. 28. On Dec. 16 last, the company paid an extra of 25c. per share and a quarterly dividend of 50c. per share.—V. 130, p. 480.

Standard Oil Co. (Nebraska).—*Report.*—

A. H. Richardson, President, says in part:

After the payment of $3.50 per share in dividends and the further set up of reserve for prospective annuitants and Federal income tax, $190,658 has been added to surplus for the year ended Dec. 31 1929.

Standard Steel Car Corp.—*Sub. Co. Contract.*—

A contract between the Polish firm of Lilpop, Rau & Loewenstein and the Standard Car Finance Corp. of America, a subsidiary of the Standard Steel Car Corp., for the financing of equipment for the Polish National Rys., was signed Feb. 4, in the offices of the National City Bank, it was announced on Feb. 6, by Aleksander Woytkiewicz, Financial Counsellor of the Legation of Poland.

The contract was signed by A. Rotwand, President of Lilpop, Rau & Loewenstein and of the Western Bank of Poland, on behalf of his company; and by Messrs. R. L. Gordon and Newman, on behalf of the Standard Car Finance Corp. The National City Bank will act as transferring agent for both parties.

Under the terms of the contract, it was stated by Mr. Woytkiewicz, the firm of Lilpop, Rau & Loewenstein agrees to deliver to the Polish National Rys. during a period of seven and 10 years, respectively, 14,000 freight cars and 1,000 passenger coaches on credits, advanced by the Standard Car Finance Corp. of $40,000,000 over a period of 10 years. Payment will be made to Lilpop, Rau & Loewenstein by the Polish Government in treasury notes, which the company will turn over to the Standard Car Finance Corp. for discounting.

Stressing the fact that the contract is of a purely financial character, Mr. Woytkiewicz pointed out that all the equipment specified in the contract will be manufactured in Poland, and will be built on the model of railroad equipment prevailing in Continental Europe.

While some additional machinery may be required, according to Mr. Woytkiewicz, the firm of Lilpop, Rau & Loewenstein has adequate facilities for production of the specified equipment, the company's plant having been almost completely rebuilt since 1915, when a considerable part of its equipment was, together with that of other Polish industries, transported to Central Russia as a war measure.

The contemplated purchase by the Standard Car Finance Corp. of a block of stock in the firm of Lilpop, Rau & Loewenstein, which had been under consideration during negotiations preliminary to the actual signing of the contract, has not figured in the present agreement, it was stated by Mr. Woytkiewicz, the Standard Car Finance Corp. confining itself, for the time being, to the extension to the Polish firm of the $40,000,000 credits.

"I believe," Mr. Woytkiewicz stated, "that both parties to the contract are pleased with the outcome. So far as Poland is concerned, there can be no question as to the importance of the arrangement. It is necessary that, in accordance with the Polish Government's program of reconstruction of the Polish National Rys., the railroad's rolling stock be increased. With the signing of the contract between Lilpop, Rau & Loewenstein and the Standard Car Finance Corp., the moneys that would have been required to that end can now be diverted to the financing of construction of new lines."—V. 130, p. 149.

Studebaker Corp.—*Stockholders Increase.*—

The corporation as of Dec. 31 1929 reports a total of 25,596 common stockholders on its books compared with 16,239 on Dec. 31 1928. This increase of 9,357 stockholders has been most rapid during recent months. The number of shareholders has continued to increase and the total reached 28,000 by the middle of February. Preferred stockholders decreased from 915 to 845 during 1929.

At their January meeting, the directors declared a dividend of $1.25 per share on the common stock and $1.75 per share on the preferred stock, payable March 1 to holders of record Feb. 10. This is the 60th consecutive quarterly dividend on the common stock and the 76th consecutive quarterly dividend on the preferred stock.—V. 130, p. 990.

Sun Oil Co., Phila.—*To Organize Pipe Line Company.*—

According to a Philadelphia, Pa., dispatch, the Sun Oil Co. has made an application to the Pennsylvania P. S. Commission for approval of the incorporation of the Susquehanna Pipe Line Co. to be formed to transport, store, insure and ship petroleum and refined petroleum products and to construct, maintain and operate pipe lines, tanks and facilities in Pennsylvania. Hearing on the application will be held March 5.

The New York Stock Exchange has authorized the listing of 50,000 shares preferred stock (par $100) on official notice of issuance and payment in full, making the total amount of pref. stock applied for 100,000 shs.

—V. 130, p. 817.

Swedish Ball Bearing Co.—*Expansion Program Completed in Germany.*—

The company has completed its expansion program in Germany, involving the merger of Fries & Hopfflinger and Fichtel & Sachs with the Vereinigte Kugellagerfabriken, the Swedish company's German affiliate, according to advices from Stockholm. The capital of the German company has been increased to 40,000,000 Reichsmarks.

The only remaining independent ball bearing plants in Germany are the Fischer plant at Schweinfurt and the Berlin-Karlsaruhener Industriewerke. The productive capacity of the S. K. F. company in Germany has been increased as a result of the expansion program to about 75 to 80% of the total demands of the German market.—V. 129, p. 143.

Swift & Co.—*Tax Refund.*—

The U. S. Court of Claims Feb. 17 held that the company is entitled to recover in its claim for $3,982,291 as refund of income tax. A further finding by the court covering accounting methods will establish the exact amount to be allowed the company.—V. 130, p. 281, 304.

Technicolor, Inc.—*On Curb.*—

The New York Curb Exchange has admitted to unlisted trading privileges 600,000 shares of common stock, no par value.—V. 128, p. 3370.

Texas Gulf Sulphur Co.—1929 *Dividends.*—Secretary H. F. J. Knobloch, Feb. 14, in a letter to the stockholders, says:

During the year 1929 this company paid four distributions to its stockholders, which distributions came from free surplus and reserve for depletion in the following proportions:

Date.	*Amount per Share.*	*From Free Surplus*	*From Deple. Reserve.*
March 15 1929	$1.00	95.6754%	4.3246%
June 15 1929	1.00	100.0000%	-------
Sept. 16 1929	1.00	100.0000%	-------
Dec. 16 1929	1.00	100.0000%	-------

We are advised that the distributions from depletion reserve are to be treated, under the Federal Revenue laws, as capital distributions.

The directors this week declared the regular quarterly dividend of $1 per share on the 2,540,000 shares of no par value capital stock, payable March 15 1930 to holders of record March 3.—V. 130, p. 965.

Thew Shovel Co.—*Larger Dividend.*—

The directors have declared a quarterly dividend of 45 cents per share on the common stock, payable Feb. 20 to holders of record Jan. 28. Previously, the company paid quarterly dividends of 40 cents per share on this issue.—V. 117, p. 902.

Thompson Products, Inc.—*Listing.*—

The New York Stock Exchange has authorized the listing of 263,160 shares (no par value) common stock on official notice of issuance in exchange for certificates of class "A" and class "B" stock.

Toronto Mortgage Co., Toronto, Can.—*Increases Cap.*

The company is increasing its capital from $724,550 to $1,000,000, par $50. The allotment price of $100 per share will increase the reserve by the same amount as the capital, bringing the reserve to $1,175,450.

Of the additional shares to be allotted, holders of record Feb. 28 will be allotted one new share for each three shares held. This allotment will increase the capital to $966,050, so the directors have decided also to allot 679 additional shares, in the ratio of one new share for each 21 held as at Feb. 28. (Toronto "Financial Post.").

Transcontinental Oil Co.—*Acquisition.*—

The company has closed a contract for the purchase of the assets of the Fuhrman Petroleum Co. for $1,050,000 cash and $450,000 to be paid out of one-fourth of the net oil production if, as and when produced. The properties consist of 36,468 acres in Oklahoma scattered through Creek, Hughes, Seminole, Okfuskee, Pontotoc, Garvin, Pottawatomie, Lincoln, Oklahoma, Cleveland, McLain, Logan, Custer, Harper, Grady, Caddo and Canadian counties, and 2,185 acres in Saline and McPherson counties, Kansas. Also 2,300 acres full royalty, practically all in Oklahoma.—V. 130, p. 818.

x Preference stock and common stock are of no par value. y Basic liquidation value 600,000 shares at $25 per share.

European Terminal Operations to be Concentrated at Hamburg

Concentration of European terminal operations of the United States Lines at Hamburg will greatly increase the freight volume handled by the Lines, Joseph F. Sheedy, Executive Vice-President, stated.

"We now have our own piers at Hamburg," Mr. Sheedy said, "and transfer of our operations to that port from Bremen has already been apparent in increasing westbound tonnage. Hamburg has about five times the volume of New York export business that Bremen handles, and has about 2½ times as much westbound freight tonnage as Bremen.

"Since our acquisition of the Hamburg terminal, we have appointed approximately 400 agents in Central Europe, in addition to a number of branch passenger and freight offices which United States Lines has established at strategic points.

"The Lines have had an appreciable increase in general cargo business since its transfer to Hamburg, with other eastbound freight not available to Bremen."

The United States Lines has established a number of branch ticket and freight offices in most European countries, Mr. Sheedy announced. "We now have established our own offices in all principal European cities, with headquarters in Paris," he stated. "The North German Lloyd was formerly the general agent for the Lines in Central Europe, but we took over these activities ourselves when the Lines passed from Government ownership. For our period of operation in the year 1929, during which North Atlantic traffic showed a falling off, we carried 2,200 more passengers than during the corresponding period of the preceding year. The European offices of United States Lines also take care of passenger and freight business of its American Merchant Lines."—V. 130, p. 306.

United States Rubber Co.—*Possible Resignation.*—

H. Stuart Hotchkiss, Vice-President of this company, Chairman of the General Rubber Co., and President of United States Rubber Plantations, Inc., has indicated his intention of resigning from these positions at the next annual meeting. John W. Bicknell, managing director of United States Rubber Plantations, Inc., will be elected president of that company, with headquarters in the Far East.—V. 130, p. 819.

United States Shares Corp.—*Transfer Agent.*—

The Central Hanover Bank & Trust Co. has been appointed transfer agent and registrar for 250,000 shares of 6% cumul. pref. stock, of $10 par value.—V. 129, p. 3816.

Utilities Hydro & Rails Shares Corp.—*Dividend.*—

The directors have declared a dividend of 14 cents per share, payable April 1 to holders of record March 15, using only about 60% of net earned surplus available for that purpose.—V. 130, p. 819.

Valentine & Co., New York.—*Depositary.*—

The Central Hanover Bank & Trust Co. has been appointed depositary under deposit agreement dated Feb. 15 1930 for 5,000 shares of 1st pref. stock, 650 shares of 2d pref. and 33,000 shares of common stock.—V. 126, p. 3945.

(The) Valspar Corp.—*Debentures Offered.*—An issue of $2,500,000 10-year 6% conv. gold debentures is being offered at 98½ and int., to yield over 6.20%,, by Brown Brothers & Co. and the Detroit Co., Inc.

Dated Feb. 1 1930: due Feb. 1 1940. Int. payable (F. & A.). Denom. $1,000. Prin. and int. payable in N. Y. City at the office of Brown Bros. & Co., paying agent. Corporation will refund upon application as provided in the indenture any Penn. or Conn. personal property tax not in excess of 4 mills or any Mass. income tax not to exceed 6% per annum. Red. as a whole at any time on 30 days' notice at 105 and int. if red. on or prior to Jan. 31 1931, with successive reductions in the premium of ½% on Feb. 1 1931 and on each Feb. 1 thereafter. New York Trust Co., trustee.

Convertible into common stock at any time up to maturity or any prior redemption date on the basis of 25 shares of common stock for each $1,000 of debentures with provision for adjustment of the conversion rate in certain events.

Data from Letter of L. Valentine Pulsifer, Pres. of the Corporation.

Business.—Corporation will constitute, directly or through subsidiaries one of the leading manufacturers of paint, varnish and lacquer in the United States. It will acquire substantially all of the capital stock of Valentine & Co. (and, through the latter, a majority stock interest in the Cie. des Vernis Valentine of France, and a substantial interest in a leading English paint company) and, directly or through a subsidiary, the business and assets of Con Ferro Paint & Varnish Co. of St. Louis, Mo. Corporation plans to acquire such further units from time to time as may prove advantageous in rounding out its activities.

Valentine & Co. is successor to a business established in 1832 and has made and distributed profits in every year since that date. Its products are known throughout the world under the trade-marked name of "Valspar" and over 50% of its output is sold in packaged form through more than 20,000 dealers. The company has recently undertaken a program of expansion of its activities which it is expected will result in substantially increased earnings. The acquisition of Con Ferro Paint & Varnish Co., the second largest manufacturer serving the "syndicate stores," will add a wholly complementary unit, whose products are distributed through nearly 4,000 individual stores, including several of the largest and best known chains.

Consolidated annual sales of Valentine & Co. and Con Ferro Paint & Varnish Co. (predecessor company) for the 5 years ended Nov. 30 1929, including proportionate sales of the French company, averaged $6,718,062, as compared with sales for the year ended Nov. 30 1929 of $6,988,924.

The corporation will own in the United States, directly or through its subsidiaries, 3 modern well equipped plants, two being in the New York Metropolitan district (one on deep water) and one in St. Louis, Mo. The Cie. des Vernis Valentine owns a modern plant in Paris, France, and the English company manufactures the "Valspar" products under the Valentine formulae and processes in two plants in England and one in Australia.

Earnings.—Consolidated net earnings of Valentine & Co. and Con Ferro Paint & Varnish Co. (predecessor company) for the 5 years ended Nov. 30 1929 (to which have been added the proportion of undistributed net earnings of the French company since its organization in 1925), were as follows:

Year ended Nov. 30—	1929.	1928.	b1927.	a1926.	a1925.
c Net earnings	$731,275	$393,510	$411,602	$555,585	$887,568

a Year ended Dec. 31 in case of Con Ferro Paint & Varnish Co. b Eleven months only in case of Con Ferro Paint & Varnish Co. c Excluding nonrecurring charges of $235,422 in 1925 and $52,142 in 1926, after depreciation but before Federal taxes.

Net earnings for year ended Nov. 30 1929, as above, equivalent to nearly 5 times annual interest requirement of this issue.

Assets.—Consolidated balance sheet of the combined companies as of Nov. 30 1929, adjusted to give effect to the present financing, shows net tangible assets, after adding proportion of net earnings of the French company, and after deducting all liabilities except these debentures, of $6,408,455. This is equivalent to more than $2,500 for each $1,000 debenture.

Net current assets on the same date amounted to $3,248,280, equivalent to nearly $1,300 for each $1,000 debenture.

Fixed assets carried on the balance sheet at $2,454,257, after depreciation.

Capitalization—	*Authorized.*	*Outstanding.*
10-year 6% conv. gold debentures	$6,000,000	$2,500,000
Common stock (no par)	x750,000 shs.	y202,480 shs.

x 62,500 shares reserved for conversion of these $2,500,000 debentures. y Including 4,480 shares which may be issued as part payament for Con FEFerro Paint & Varnish Co., but for which thecorporationmay subsitute cash.

Purchase Fund.—Indenture is to provide for a purchase fund, operating semi-annually commencing Feb. 1 1931, equivalent in each year to 15% of the consolidated net earnings of the corporation for the preceding fiscal year, after interest, depreciation and Federal taxes (as defined in the indenture), such fund not to exceed $150,000 in any year. This fund is to be available for the purchase of debentures if obtainable at not exceeding the redemption price prevailing at the time of such purchase, any unexpended balance at the end of any semi-annual period to revert to the corporation, all as to be provided in the indenture.

Warner-Quinlan Co.—50 *Stockholders of Municipal Service Corp. File Action for Damages.*—

The company and its officers were sued in the New York Supreme Court, Feb. 21, for $15,000,000 damages on the ground that they acquired control last April of the Municipal Service Corp. and have diverted all its valuable assets and practically put it out of business. The suit was brought by more than 50 stockholders of the Municipal Service Corp., including the firms of Thomas L. Manson & Co. and Hibbard Palmer & Kitchen.

D. Basil O'Connor, Counsel for the defendants, made this statement in behalf of the President of the Warner-Quinlan Co.:

"Mr. McFarland stated that the action is brought by a small number of the stockholders of the Municipal Service Corp. who have been badly misinformed as to the facts and induced to bring the action by parties having no knowledge of the affairs of either company. The Warner-Quinlan Co. will have no difficulty in convincing the Court that the action not only is based on extravagant and ridiculous statements, but is brought in bad faith, and that, in fact, the Warner-Quinlan Co.'s interest in the Municipal Service Corp. has worked to the great advantage of the Municipal Service Corp."—V. 129, p. 3491.

Washburn Wire Co., Providence, R. I.—*Plans Stock Split.*—

The directors in a letter to the stockholders propose to split the common stock on a basis of four new shares for one of the old, changing the capital structure from the present $11,000,000, composed of 35,000 shares of $100 par preferred and 75,000 shares of $100 par common. The new authorized capital would amount to 250,000 shares of no par value, and all of the same class.

Provided this recommendation is approved at the forthcoming meeting of the company, it is planned to distribute the new stock on the above-named basis, which will take up 200,000 shares of the authorized issue. The remaining 50,000 shares are not to be issued at present, but are to be held for future corporate development.

The preferred stock has been redeemed in entirety and is now held in the treasury of the company.—V. 123, p. 1517.

The New York Stock Exchange has authorized the listing on or after March 1 1930, of 600,000 shares of common stock, on official notice of issuance in exchange for present outstanding voting trust certificates and with authority to admit to the list additional permanent engraved certifi cates for 400,000 shares of com. stock upon official notice of issuance upon conversion of the conv. pref. stock.—V. 130, p. 991, 819.

Western Air Express Corp.—*Traffic Grows.*—

This corporation on its Los Angeles-Salt Lake City route carried a total of 757,683 pounds of mail in 1929, bringing a revenue of $2,272,802 through its contract with the U. S. Government. This compares with 385,534 pounds carried in 1928 at a cost to the Government of $1,155,476. While the company has not published statistics on total amount of mail carried on its two contracts, figures furnished by the Post Office Department show that in December last 84,442 pounds were carried on the Los Angeles-Salt Lake run compared with 65,624 pounds in the same month of the preceding year. Figures do not include the Government mail contract between Cheyenne and Pueblo, a distance of 199 miles, though revenues average between $5,000 and $8,000 monthly, depending on the volume.

Total gross revenues derived from airmail contracts in 1929 amounted to $2,354,984, compared with the total from all activities of $2,950,321 in the previous year. The following table indicates increase in poundage and receipts on the Salt Lake City-Los Angeles route in the past two years:

	Pounds Carried—		*Revenues*—

Wickwire Spencer Steel Co.—*Committee Reports.*—

The stockholders' protective committee in letter to the stockholders dated Feb. 15 stated in part:

It is just about one year since deposits of stock were requested to be made with the committee. Over 1,100 stockholders representing 246,184 shares of stock have given their support by depositing the stock and contributing the very small assessment of 3c. per share requested.

Stockholders are no doubt interested to know the results of this committee's activities. Up to the writing of this letter no actual change has taken place in the status of the common stockholders.

With my last letter to the stockholders I enclosed a notice of Judge Hazel's decision granting the common stock voting trust certificate holders the right to intervene and contest every step of the present receivership and reorganization. Since this decision was rendered, James O. Moore, Federal master, was appointed by Judge Hazel to hold hearings in regard to certain claims of the common stockholders and the class B noteholders in regard to certain alleged invalid provisions of the mortgages affecting the company. The hearings required 15 days attendance in court and were extended from time to time from August 1929 to January 1930, and have just been concluded.

The decision of the master is expected some time in March. Thereafter, either side has the right to file exceptions to the master's report, and from such exceptions Judge Hazel will hand down a decision probably in April or May. Whatever the outcome of this decision may be either side that feels aggrieved can appeal therefrom to the Circuit Court of Appeals. Therefore, the litigation is very likely to drag out sometime before the final decision is reached clarifying the rights of the various security holders.

The present proceedings do not adjudicate the fairness or unfairness of the proposed plan of reorganization. That question is not before the master at the present time, but is reserved for future hearings, to be determined only in the event that the master holds that the present mortgages are valid liens affecting the entire premises, and that the various plants of the company should be sold in foreclosure thereunder. From such later hearings and decisions as to the fairness or unfairness of the proposed plan of reorganization either side likewise has the right to appeal to the District Court and the Circuit Court of Appeals.

This committee is handicapped by the exceedingly small amount of funds it has at its disposal. It has to combate those who have shown an antagonistic attitude towards the stockholders. Without this committee's efforts the reorganization planned by the bondholders' committee would have become effective last October.

I am still firmly of the opinion that if this committee can carry on the legal battle it has started in the interest of the stockholders, we are bound to win out in the end, even against the great odds that we are facing.

Stockholders representing 246,184 shares have done their duty by giving aid with their deposit of stock and assessment. There are stockholders representing approximately 700,000 shares of stock who have failed to contribute their share to carry on this battle for their benefit. I therefore come to you again with the appeal to give us your financial support to carry on this fight for the protection of your own interests.

As it is highly unfair to those who have supported this committee that we should continue to protect the interests of stockholders who have not contributed their share of the expenses, we have decided to limit the time of acceptance of further deposits from holders of common stock voting trust certificates to March 15 1930.

A statement of the receipts and disbursements of stockholders committee shows receipts of $7,385 and disbursements of $6,261, leaving a cash balance $1,123.—V. 130, p. 482.

CURRENT NOTICES.

—Joseph Walker & Sons, 61 Broadway, N. Y., is celebrating the 75th anniversary of the founding of the firm, which was organized in 1855 by Francis T. and Joseph Walker, as Francis T. Walker & Brothers. On the cover of the brochure, outlining the history of the firm, is a reproduction of the letter written Jan. 11 1865 to Joseph Walker Jr., by M. Brodhead of the New York Stock Exchange informing him of his election to membership. The letter advised him that the initiation fee of $3,000 should be paid to the Treasurer before taking his seat. Continuing the firm's history the brochure states that just after the Civil War, Mr. Walker joined the New York Gold Exchange which was situated on New St., on the ground now occupied by a corner of the New York Stock Exchange Building. He became very active in gold transactions and for many years acted as agent for the United States Government in selling gold for the account of the Treasury Department. An original bill of sale now in possession of the firm shows that gold in 1868 was selling at a premium of 39⅜%. When the Mills Building, demolished several years ago, was completed, Mr. Walker moved into the new structure, and shortly after took his two sons, Joseph Walker Jr., and E. Robbins Walker into the firm. The firm then adopted the name of Joseph Walker & Sons. On Aug. 27 1918 Joseph Walker died and the firm was carried on by Joseph Walker Jr., E. Robbins Walker, his two sons, and Clarence H. Young. One year after the death of the founder, his grandson, Samuel Sloan Walker joined the firm. Joseph Walker Jr., died on April 15 1927, and his estate's interest in the present firm is carried on by his two sons, the present Joseph Walker Jr., and Samuel Sloan Walker, a general partner in the firm, as trustees and special partners. Besides Mr. Young and Mr. Walker, the other partners of the present firm are Henry S. Parker, Hugh G. M. Kelleher, Kenneth D. Hull and C. Frederick Fothingham.

—Henry P. Russell, senior partner of the New York Stock Exchange firm of Russell, Miller & Co., announces final details in connection with his firm's arrangements with Blyth & Co. to take over all of the latter's brokerage business in New York and on the Pacific Coast. Mr. Russell's statement follows the previous announcement by Blyth & Co. of its intention to withdraw entirely from the brokerage business in its various offices and to confine its activities exclusively to the investment banking field. Mr. Russell said that on Feb. 28 his firm will move from its present quarters at 50 Broadway to 120 Broadway, where it will occupy Blyth & Co.'s brokerage offices, the latter continuing its investment banking business in the same offices, but on the floor below. Lloyd W. Georgeson, manager of the Stock Exchange department of Blyth & Co., will continue in the same capacity with Russell, Miller & Co. No other executive changes are planned, according to Mr. Russell. Since its organization in 1921, Russell, Miller & Co. have opened branches in Port Chester, N. Y., Los Angeles, San Francisco and Monterey, Calif. With the addition of the Blyth & Co. brokerage offices, they will have another office in Los Angeles and also one in Long Beach, Calif., Seattle, Wash., and Portland, Ore. Besides Mr. Russell, the other partners of the firm are L. McK. Miller, J. D. Wing, G. G. Bass, W. J. Devereux, C. R. C. Steers, member of the New York Stock Exchange, and Harry Butcher, member of the New York Curb Exchange.

—The firm of E. E. MacCrone & Co., which for a number of years has conducted a stock exchange business in the State of Michigan, will retire from the brokerage business on Feb. 24 1930. Thenceforth it will devote its attention to the development of economic and corporate research work, which has constituted an important element of its business. The result of this work has been, and will continue to be, made available to the public through investment counsel service and investment trusts in which the firm is and may be interested. At the same time the firm will dispose of only one each of its two memberships on the New York, Chicago and Detroit Stock Exchanges, the second membership in each case being retained as an investment.

E. A. Pierce & Co., said to be the largest brokerage organization in the United States, will acquire the brokerage department and will continue the operation of their existing offices located in Detroit, Flint, Grand Rapids, Jackson, Lansing and Saginaw. Substantially the entire personnel of the brokerage department of the MacCrone organization will be connected with E. A. Pierce & Co., so that an uninterrupted service may be maintained.

The firm of E. E. MacCrone & Co. will, after Feb. 24, concentrate its activities in its offices on the twenty-fifth and twenty-sixth floors of the new Penobscot Building where its executive quarters have been located for some time.

—Formation of a new investment firm to be known as the First National Co. of Bridgeport, Conn., has been announced by Edmund S. Wolfe, President of the new organization and for 11 years President of the First National Bank & Trust Co. of Bridgeport. The company, which will be closely identified with the First National Bank & Trust Co. of Bridgeport, will specialize in conducting an investment security business and will maintain a complete investment service for the benefit of clients. At the start, operations of the new corporation, which will have offices in the First Bank & Trust Co. building in Bridgeport, will be confined to the New England territory and to the metropolitan area of New York. In addition to Mr. Wolfe, the officers of the company are: Clifford H. Ayres, Vice-President and General Manager; Charles H. Hurlinan, Secretary and Treasurer, who is also associated with the First National Bank & Trust Co. of Bridgeport, and William Rockel, Assistant Treasurer.

—R. M. Smythe, 2 Broadway, New York, has compiled and published a book on "Valuable Extinct Securities." In this book Mr. Smythe gives a list of over 1,500 extinct securities of good value from the records of the four principal dealers in the United States for 40 years and other useful information never published before. The book lists the companies alphabetically and states briefly what is known of the securities. A list of unforeclosed railroad bonds serves as a guide to show into what company and when the road issuing the obsolete securities was merged. In another chapter a list is given of banks which have merged with other institutions. Mr. Smythe, whose aversion to telephones has been frequently commented upon, had his telephone removed forty years ago. He was one of the first subscribers in New York having had 10 Broad for a number.

—The firm of Brand & Grumet has been dissolved and the former partners together with Albert Ehrenfreund, member of the New York Stock Exchange, have formed the firm of Brand, Grumet & Co as of Feb. 20. The new firm, which will be members of the New York Stock Exchange, and of the Association of Bank Stock Dealers, will transact a general commission brokerage business in stocks and bonds listed on the New York Stock Exchange, and continue to specialize in bank and insurance stocks at their old offices at 30 Broad St., New York. The personnel of the new firm will be Sylvester S. Brand, Louis S. Grumet, Albert Ehrenfreund, with Charles Milgrim as a special partner.

—William B. Oliver, retired Baltimore financier, died on Feb. 11 at his home in that city of pneumonia. As a young man Mr. Oliver was employed by the banking firm of William Fisher & Sons, where he met the late J. William Middendorf. In 1875 the two young men formed the Middendorf-Oliver Co., bankers and brokers. They did considerable financing of public utilities in the South until about 1902, when Mr. Oliver retired and the firm was dissolved. Following his retirement Mr. Oliver traveled extensively in the United States and Europe.

—Clarence Hodson & Co., Inc. is celebrating its thirty-seventh anniversary to-day. This investment house, which was founded in 1895 by the late Colonel Hodson, has financed fifty-six national banks, State banks and trust companies; a system of industrial banking companies, several insurance companies and, during the past year, an investment company. During the past fifteen years it has financed chains of small loan companies, which were consolidated in 1929 and transacted a business in excess of $58,000,000 for the year.

—John Hawkes Wilson & Co., accountants and industrial engineers, announce that Henry L. Lang, President of Lang & Co., insurance brokers of Philadelphia, New York and Los Angeles, and B. Atwood Robinson, President of the Intercontinent Import & Export Co. of Boston, have been elected to the board of directors. George A. McDonald, formerly President of The Chicopee National Bank of Springfield, Mass., has been elected a Vice-President, and Francis W. Hopkins Jr., Vice-President and Treasurer.

—Power laundries in the United States at present do an annual business of between $700,000,000 and $800,000,000, with an annual increase of about 15%, as compared with an increase of 7% in the production of electricity and 3.82% for gas, according to Bonner, Brooks & Co., N. Y., in a comprehensive analysis of Consolidated Laundries Corp. just issued. "Power laundries turn over their invested capital in less than a year while gas and electricity conerns need more than 5 years to do," states the firm.

—A. Duncan Shaw, well known in Pacific Coast financial circles, has become associated with Young-Clarke & Co., Los Angeles, as a general partner. Mr. Shaw was formerly a partner in the firm of Bond & Goodwin & Tucker, predecessors to Tucker Hunter Dulin & Co. For many years he was in charge of the Pacific northwest offices of that organization and came to Los Angeles over a year ago, to be associated with the management of their Southern California territory.

—The investment banking firm of Hale, Waters & Co. is opening a new office in Scranton, Pa., in the Rehrig Building, in charge of J. Stanley Hope. Associated with Mr. Hope are John M. Bredbenner, W. Henry L. Casho, Clarence P. Delahunty, Howard J. Kresge, James B. Ryon, Delos H. Thomas, Fred. B. Witchey and Read H. Wight, who will represent the company in Scranton, Williamsport, Wilkes-Barre, Pittston, Canton, Hazelton, Berwick, and Nescopeck.

—Alan K. Shaw, member of New York Curb Exchange, and George F. Dennis announce the formation of A. K. Shaw & Co., members of the New York Curb Exchange, to conduct a general brokerage business with offices at 33 Broadway, N. Y. Lynch & Co. of which Mr. Shaw was formerly floor member, has been dissolved by mutual consent.

—Bernard R. Hodge and George A. Jacquemot have been appointed manager and assistant manager respectively of the wholesale department of Julian E. Gray & Co., 72 Wall Street, New York City. Both formerly held the same positions with New York Shares Corp.

—The Continental Illinois Co., Chicago, announce the opening of an office in the Russ Building, San Francisco, by its affiliate, the Continental Illinois Co. of California. The office will operate under the management of Benjamin R. Brindley, Second Vice-President.

—A. G. Edwards & Sons, members of New York Stock Exchange, St. Louis, after residing at 410-412 Olive St. for nearly 30 years, are moving west into more spacious quarters at 409 N. Eighth St., opposite the Mercantile-Commerce Bank & Trust Co.

—Paul H. Myrick has joined the Philadelphia staff of Rudolph Guenther-Russell Law, Inc., financial advertising agency, as a specialist in bank advertising. Mr. Myrick was formerly with The Collins Service and with N. W. Ayer & Son.

—Bonner, Brooks & Co., Inc., announce the opening of 3 mid-Western branch offices: 425 Liberty Building Des Moines, Iowa; 428 Buhl Building, Detroit, Mich., and in the Merchants National Bank Building, Cedar Rapids, Iowa.

—Beard & Ayers, Inc., financial, industrial and corporate representatives, announce that Myles Bradley, formerly with General Motors Corp., is now resident Vice-President and general manager of their Detroit office.

—Harvey & Co. announce the opening of offices at 30 Broad St., New York, to deal in bank, insurance and unlisted securities. They will clear through Newman Bros. & Worms, members New York Stock Exchange.

—Announcement has been made that Charles A. Frank, formerly of the dissolved firm of Charles A. Frank & Co., had been admitted to partnership in the firm of Van Wyck & Sterling, 71 Broadway, New York.

—Parrish & Co., members of the New York Stock Exchange, announce that J. Marechal Brown Jr., formerly of Harrison, Smith & Co., has become associated with them as manager of their bond department.

—Luigi Criscuolo of Merrill, Lynch & Co. recently addressed the Philadelphia Association of Security Salesmen on "Chain Store Securities, Past and Future," at the Association's headquarters, 1420 Walnut St.

—Hardiman & Aronson, 50 Broadway, New York, have issued a table featuring 30 of the leading banks and trust companies of New York City. They have also analyzed the 1929 report of Goldman Sachs.

—W. K. Johnson & Co. have opened their new uptown office in the Lincoln Building at 60 East 42d St., N. Y. City, which will be under the management of Newton Foster and Emmett Keady.

—Robert T. Simpson has been appointed manager of the Pittsburgh office of West & Co. Mr. Simpson formerly was manager of the Johnstown, Pa., office of Harrison, Smith & Co.

—Fitch, Crossman & Co., members Philadelphia Stock Exchange, 225 South 15th St., Philadelphia, have opened a bank stock department under the management of Clifford R. Meloney.

—T. W. Satterthwaite, formerly a member of the New York Coffee and Sugar Exchange, has become associated with Jenks, Gwynne & Co., in their coffee and sugar department.

—James E. Durkin, formerly manager of the New York trading department of Harrison, Smith & Co., has become associated with White, Warren & Co., 149 Broadway, New York.

COMMERCIAL EPITOME

The introductory remarks formerly appearing here will now be found in an earlier part of this paper immediately following the editorial matter, in a department headed "INDICATIONS OF BUSINESS ACTIVITY."

Friday Night, Feb. 21 1930.

COFFEE on the spot was in moderate demand; Santos Bourbon 4s, 14 to 14½c.; Rio 7s, 10¼ to 10½c., and Victoria 7-8s, 9½ to 9¾c. Fair to good Cucuta, 15½ to 16c.; prime to choice, 16 to 17c.; washed, 18 to 19c.; Ocana, 15¾ to 16¼c.; Bucaramanga natural, 16 to 17c.; washed, 18½ to 19¼c.; Honda, Tolima and Giradot, 19¼ to 19¾c.; Medellin, 20½ to 21c.; Manizales, 19¼ to 19¾c.; Mexican washed, 19 to 20c.; Surinam, 13½ to 14½c.; Ankola, 24 to 32c.; Mandelling, 29 to 35c.; genuine Java, 29 to 31c.; Robusta, washed, 12¼ to 12½c.; natural, 10½ to 11c.; Mocha, 26½ to 27c.; Harrar, 21½ to 23c.; Abyssinian, 18¼ to 18¾c.; Guatemala prime, 18¼ to 19c.; good, 17½ to 18c.; Bourbon, 16 to 16½c. The arrivals of mild coffee in the United States thus far this month aggregated 216,816 bags against 213,140 for the same time last year. The deliveries were 175,616 bags for the same time, against 183,983 for last year. Stocks of mild coffee in the United States on Feb. 17 were 270,678 bags, against 232,732 a week ago and 399,662 last year. On the 15th inst. cost-and-freight offers in some cases were slightly easier. On the 18th inst. the supply of cost-and-freight offers was comparatively light and prices were mostly higher. The advances ranged from 15 to 50 points, according to seller. For prompt shipment, Santos Bourbon 2-3s were quoted at 15c.; 3s at 13½c.; 3-4s at 15.40c.; 3-5s at 13¼ to 13.35c.; 4-5s at 12.60 to 12.85c.; 5s at 12¼ to 12.60c.; 5-6s at 11¾ to 11½c.; 6s at 11.20 to 11¼c.; 6-7s at 10¼c.; 7s at 10c.; 7-8s at 8.40c. to 9½c.; part Bourbon, 3-4s at 13½c.; 3-5s at 12½ to 13c.; Peaberry 3s at 13¾c.; 4s at 12.60c.; rain-damaged Santos 7-8s at 9½c.; Rio 7s were here at 9.20c.; 7-8s at 9c.; Victoria 3s at 9.90c.; 4s at 9.55c.; 5s at 9¼c.; 6s at 8.90c.

On the 19th inst. cost and freight offers were generally higher. For prompt shipment, Santos Bourbon 2-3s were quoted at 15.35 to 15¾c.; 3s at 13½ to 13.60c.; 3-4s at 13¼ to 14.35c.; 3-5s at 12.70 to 13.95c.; 4-5s at 12¾ to 13.10c.; 5s at 12½ to 13.30c.; 5-6s at 11¾ to 12¼c.; 6s at 11 to 11.40c.; 6-7s at 10½ to 10¾c.; 7s at 10¼c.; 7-8s at 8.40 to 10.20c.; part Bourbon 2s at 14c.; 3s at 13½c.; 3-5s at 13c.; Peaberry 3s at 13¾c.; 3-4s at 15.70c.; 4s at 13.10c.; rain-dmaaged 7-8s at 10c.; Victoria 3s at 10.05c.; 4s at 9.70c.; 5s at 9.35c.; 6s at 9.00c.; 7s at 8.65c. and 7-8s at 8.45. On the 20th inst. the supply of cost and freight offers from Brazil was rather light, but prices were generally slightly lower. Santos Bourbon 2-3s were here at 15.45c.; 3s at 13.45c.; 3-4s at 13.15c.; 3-5s at 12½ to 14.15c.; 4-5s at 12.60c.; 5s at 12½ to 13½c.; 5-6s at 11¾ to 12c.; 6s at 10¾ to 11.20c.; 6-7s at 10½ to 10.90c.; 7s at 10¼c.; 7-8s at 8.40 to 10.40c.; part Bourbon 3-5s at 13c.; Peaberry 3-4s at 15.55c.; Rio 7s were here at 9.30c.; 7-8s at 9.10c.; Victoria 3s at 9.95c.; 4s at 9.60c.; 5s at 9.14c.; 6s at 8.90c.; 7s at 8.55c. and 7-8s at 8.35c. J. Henry Schroder Banking Corp. associate of the British banking firm which has taken a prominent part in Brazilian financing for a period of years, states that Brazil will be able to right her present difficulties arising from the crash in coffee prices and that a thorough adjustment of the coffee position in that country would, in the long run, have a lasting and beneficial effect on Brazil's economic progress. On the subject of financial aid to coffee producers, the banking firm says in its monthly Finance and Trade Commentary: "With the help of the Banco do Brazil and of a short term credit recently extended to the Sao Paulo Government by a combined London and New York banking group, Sao Paulo is in a position to move its entire 1929-30 crop by making advances to farmers at approximately $5 a bag. It is obvious that the facilities extended by the Banco do Brazil and by foreign bankers alone have not provided all the funds needed for financing this large crop, but it must be remembered that a large portion of the crop already had been financed by the Banco do Estado do Sao Paulo and by private banks prior to the outbreak of the crisis in October of last year, and that as coffee is exported, and thereby previous advances made on a higher price basis are repaid, the Banco do Estado and other banks will be in a position to make new advances which should enable the farmers to move their entire 1929-30 crop. As of July 1 1930, total coffee stocks stored in the interior of Brazil exclusive of stocks in the ports, are estimated at around 18,000,000 bags provided shipments during the next five months continue at the same rate as in the past. Of this unsold stock, practically all will be held in Sao Paulo, Brazil's immediate coffee problem is, therefore, almost exclusively Sao Paulo's problem."

Santos cabled on the 18th inst. that Europe and a large American importer were buying coffee there. Another report said that the Brazilian Government was buying. Futures on the 15th inst. were dull and irregular closing five points lower to two points higher with the near months the best sustained. Europe and Brazil bought a little. The political disorders continued in Brazil, but they were not regarded as significant. Further news as to coffee trade developments in Brazil were awaited. Meantime the trading on the 15th inst. was in only 15,000 bags. On the 17th inst. futures advanced 25 to 30 points on Santos with sales of 31,250 bags and 17 to 23 on Rio with sales of 16,000 bags. Brazil and Europe bought. A better financial situation was supposed to have been brought about in Brazil. Here the technical position was better. On the 18th inst. the rise in futures was 12 to 42 points. The feeling is more cheerful about Brazil's finances. The sales were 38,000 Santos and 17,000 Rio. Better cables from Brazil and Europe and buying by those countries had an effect. On the 19th inst. prices fell 8 to 22 points. Mild ended five points lower to five higher. The sales were 31,000 bags of Rio and 15,000 Santos. On the 20th inst. futures advanced 14 to 20 points in what looked like a short market. March liquidation was better taken. Not that the trading was very large. The total of Rio and Santos amounted to only 55,000 bags. Mild for March ended at 13.27c. nominal, May 12.37c., July 11.59c., Spot trading was small. To-day futures ended three points lower to five higher on Rio and three to nine points higher on Santos; sales were 18,000 Rio and 25,000 bags of Santos. Final prices show an advance for the week on Rio of 28 to 36 points and on Santos of 63 to 8[illegible] points.

Rio coffee prices closed as follows:

Spot (unofficial)	10¼	May	8.18	September	7.68@8.69
March	8.60@8.61	July	7.91	December	7.52@

Santos coffee prices closed as follows:

Spot (unofficial)		May	12.40@12.42	September	11.30@
March	13.24	July	11.68@nom.	December	11.01@nom.

COCOA ended to-day with March 8.96c.; May, 9.32 to 9.33c.; July, 9.63 to 9.64c. Sales were 239 lots. Final prices are 2 to 9 points lower for the week.

SUGAR.—Prompt Cuban was quiet at one time at 3.61 to 3.77c., nominally. Refined met with only a routine demand at 4.95c. here and elsewhere. Futures on the 15th inst. ended 1 to 2 points off with sales of 38,000 tons. The most active months were March and Dec., owing to the switches in them. Receipts at Cuban ports for the week week were 161,457 tons against 235,532 in the same week last year; exports, 10,465 tons against 119,865 last year; stock (consumption deducted), 491,281 tons against 710,630 last year; centrals grinding, 154 against 163 last year. Of the exports, Atlantic ports received 5,196 tons, New Orleans 2,259, interior United States 335, California 2,675 tons. Old-crop (1928-29) exports, 28,126 tons. Destination: Atlantic ports, 10,614 tons; New Orleans, 6,877; Savannah, 4,933; Europe, 5,702; stock, 75,343 tons. Receipts at United States Atlantic ports for the week were 26,014 tons against 43,852 in the previous week and 82,013 in the same week last year; meltings, 47,987 tons against 54,769 in the previous week and 54,841 in the same week last year; importers' stocks, 361,097 tons against 365,229 in the previous week and 89,527 last year; refiners' stocks, 143,571 against 161,412 in previous week and 103,299 last year; total stocks, 504,668 tons against 526,641 in previous week and 192,826 last year.

It turned out on the 17th inst. that 3,000 tons of Philippines in port at Boston sold on the 14th inst. at 3.55c. delivered, or 1 23-32c. c. & f. for Cuban. On the same date New Orleans bought 2,500 tons for early March arrival at New Orleans at an open price subject to the average of the market at date of arrival. Havana cabled on the 19th inst. that the Single Seller sold 3,000 tons of Cuban raws on the 15th inst. to a destination outside the United S ates at 1.65c. f.o.b. London was reported dull with sellers of parcels afloat at 7s. 4½d. c.i.f., or 1.44c. f.o.b. Cuba. Havana wired the U. P. on Feb. 18: "In view of the fact that powerful sugar interests are conducting an active campaign favoring restriction of the 1929-30 sugar crop, a meeting of 86 mills was held yesterday at which it was voted to notify President Machado that the mill owners represented were opposed to such restrictions, or to limiting the s wings of cane. Among those p esent at the meeting were representatives of the American Sugar Refining Co., Cuban American Sugar Co., Hershey Co., Guantanamo Sugar Co. and General Sugar Co."

It was reported that 20,000 bags of Porto Ricans due next Monday sold late on the 18th inst. at 3.50c. delivered, or a point better than 1 23-32c. c. & f. for Cubas. This is the lowest price accepted on raw sugars since last June. The Cuban Single Seller it was said sold 15,000 tons for ship-

Federal Reserve Bank of St. Louis

ment away from the United States at 1.57c. f.o.b., position not stated. The Sugar Club of Hanana reported Cuban production to the middle of February at 1,142,312 tons against 1,900,000 tons to the same date last year. Another sale on the 18th inst., not then reported, was 25,000 bags Porto Ricos due March 10 to New Orleans at 3.56½c. delivered, or 1 61-64c. c.&.f. for Cubas. On the 19th inst. 4,000 tons Philippines for March-April shipment sold at 3.62c. c.i.f., or a little more than 1 27-32c. c. & f. basis for Cubas. On the 19th inst. the trade was sceptical about the rumor that the Cuban Single Seller had accepted 1.56c. f.o.b. for 375,000 tons for shipment p obably over a period of three months, but believed negotiations for the sale of a block of raws are in progress. It was said that the above block sold to the United Kingdom at 1.56c. f.o.b.

On the 20th inst. a refiner bought 5,900 tons of Philippines due March 10 at 3.55c. delivered or 1 13-16c. c. & f. basis. The trade is awaiting with much interest the outcome of the inquiry made by the Cuban Single Seller as to American refiners' March requirements. Havana advices stated that Cuban production for the first half of February amounted to 513,851 tons. This compares with 707,000 tons for the same period last year, which was a record. from the beginning of the crop year to Feb. 15 the total out-turn this year was 1,197,000 tons and last year 1,904,000, tons. It was reported on the 18th inst. that negotiatios were under way with the Cuban Single Seller for 800,000 to 1,-000,000 tons of raw sugars for shipment over a certain period at a price in the neighborhood of 1.50c. f. o. b. The production in North America in 1929-30 was 8,379,000 long tons against 8,686,000 in 1928-29; in South America 1,744,000 against 1,792,000 in 1928-29; Europe 8,208,000 against 8,353,000 in 1928-29; Asia 7,560,000 against 7,836,000 in 1928-29; Africa 761,000 against 776,000; Oceania 600,000 against 614,000. The world's production was put at 27,-252,000 long tons against 28,057,000 last year. Consumption in North America was put at 7,587,000 against 7,301,000 last season; South America 1,549,000 against 1,509,000 last year; Europe 10,349,000 against 9,917,000 last year; Asia 7,185,000 against 7,094,000 last year; Africa 726,000 against 710,000 last year; Oceania 441,000 against 436,000 last year; total 27,837,000 long tons against 26,967,000 last year.

The report that freight room had been chartered for March shipment from Cuba to Odessa, Russia excited not a little comment. It was generally believed that the freight room, which was variously extimated at from 22,000 to 55,000 tons would be utilized for the shipment of sugar although there was no confirmation of this. In some quarters the chartering was connected with reports some time ago that f.o.b. business with Russia had been done, the price of 1.50c. f.o.b. being mentioned. The Cuban Department of Agriculture's figures of production to Feb. 15 are 1,114,312 tons and the average sucrose yield is given as 11.069%. On the 17th inst. futures ended unchanged to 2 points higher with sales of 48,600 tons of which fully 50% were switches mostly from March to later months. At one time prices were 1 to 3 points higher, but reacted later when it was reported that at 156 mills voted in Havana against any restriction of the crop. In London sales for April shipment were reported on the basis of 7s. 9d. while afloat was 7s. 4½d. and quiet. Havana Sugar Club stated the average rainfall in January in Cuba during the past 25 years as 1.94 inches. In January the total was 2.16 against 1.26 in 1929. Cuban here was 3.55 to 3.77c. Sales the latter part of last week it became known included 3,000 tons of Philippines in port at Boston on the basis of 3.55c. and 3,000 tons by the Single Selling Agency at 1.65c. f.o.b. for shipment outside the United States. Havana cabled on the 17th inst.: "It is reported in sugar circles that more than 50,000 tons of raw sugar have been sold to Russia for March shipment. Price has not been mentioned." On the 18th inst. futures declined for a time under continued selling pressure on the distant months by a Wall Street wire house and European connections. Prices ended 1 to 2 points higher after some early weakness due to March liquidation. But Cuban and trade interests bought. Wall Street sold July steadily. The total trading was about 44,000 tons half switches.

On the 19th inst. futures closed 1 point lower to 2 higher. At one time they were 2 to 4 points higher with sales of 62,500 tons. The trade bought. Cuban interests sold. On the 20th inst. futures declined 2 to 3 points, mainly because of heavy selling of December. Apparently there was some apprehension of notices on the 21st inst., though this may not have been the case. A seat on the Exchange sold for $14,000, a decline of $500. Cuban interests were believed to be large sellers. Sales for the day were 59,950 tons, of which 33 1-3% was in switches. Last week it turns out Russia bought 59,000 tons at 1.48½c., scattered mostly over March and April, with a couple of thousand tons in April and May. Refined was quiet at 4.95c. Raw sugar nominally 3.55 to 3.75c. To-day futures ended 1 to 2 points higher with sales of 38,600 tons. Offerings were promptly taken. London opened quiet for new contracts at ¾d. lower to ¾d. higher. Old contracts opened quiet and unchanged to ¾d. lower. To-day was first notice day for March deliveries, but no notices were issued. Final prices on futures show no change for the week.

Prices were as follows:

Spot (unofficial)--2 1-16	July----------1.88	December --2.04@nom.	
March------1.68@1.69	September--------1.94	January----2.05@nom.	
May--------1.78@1.79			

LARD on the spot was firm with prime Wes ern 11.50 to 11.60c.; Refined Continent, 11⅜c.; South America, 11⅝c.; Brazil, 12⅝c. Prime Western was 11.45 to 11.55c. later. On the 19th inst. spot dropped to 11.05 to 11.15c. for prime Western; 11⅛c. for refined to Continent; 11⅜c. for South America, and 12⅜c. for Brazil. Futures on the 15th inst. were 3 to 5 points lower with grain down and some hedge selling in lard as well as liquidation. In Liverpool lard was unchanged to 3d. higher. Hogs were unchanged to 10c. lower with $11.25 the top. That there is a large consumption of lard seems clear from the smallness of the increase in the stocks at the height of the packing season.

Futures on the 17th inst. declined 2 to 7 points with grain falling. Hogs were higher even though receipts at the West were 156,800 against 137,000 on the same date last year. Liverpool lard was unchanged to 6d. lower. Contract stocks of lard in the first half of Feb. increased 6,023,469 lbs. to 37,125,314 against 82,965,756 at the same time last year. The clearances from New York last week were 8,791,203 lbs. against 8,751,000 the week previously. Cash lard and ribs showed little change.

Futures on the 18th inst. declined 5 to 8 points or 15 points under the high at one time earlier in the day. Packers bought on the drop. Hogs were steady. Total Western receipts were 115,500 against 100,500 a year ago. Chicago received 27,000 hogs. Liverpool lard was unchanged to 3d. lower. Clearances of lard from New York were 5,854,000 lbs. to Dutch, German and English ports principally. Futures on the 19th inst. declined 25 to 30 points on stop orders, the vast fall in grain, weakness in cash lard and a decline of 10 to 15c. in hogs. On the 20th inst. futures closed unchanged to 5 points lower on moderate trading. A decline of 10 to 15 cents in hogs as well as the weakness or irregularity in grain had a certain effect; also some weakness in Liverpool. Exports from New York were 134,800 pounds. To-day futures were 7 to 10 points net higher with grain and hogs firmer, commission houses buying, shorts covering and the technical position better. The situation, in other words, has become short, as in so many other markets. Final prices show a decline, however, for the week of 30 to 38 points.

DAILY CLOSING PRICES OF LARD FUTURES IN CHICAGO.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
March delivery	11.02	11.00	10.95	10.70	10.65	10.75
May delivery	11.20-32	11.15	11.10	10.80	10.80	10.87
July delivery	11.42	11.37	11.32	11.05	11.02	11.10

PORK steady; Mess, $29.50; family, $34.50; fat back, $22 to $28. Ribs, 13.25c. Chicago. Beef firm; Mess, $25; packet, $25 to $26.; family, $28 to $29: extra India mess, $42 to $44; No. 1 canned corned beef, $3.10; No. 2, $5.50; six pounds, South America, $16.75; pickled tongues, $70 to $75. Cut meats firm; pickled hams, 10 to 20 lbs., 19½ to 21c.; pickled bellies, 6 to 12 lbs., 20 to 21¼c.; bellies, clear, dry salted boxed, 18 to 20 lbs., 15¾c.; 14 to 16 lbs., 16⅛c. Butter lower grades to high scoring, 28 to 36c. Cheese, flats, 18 to 26c.; daisies, 20½ to 24½c. Eggs, firsts to extras, 35 to 37c.; closely selected heavy, 37½ to 38c.; extra fancies, 1 to 2½c. above closely selected. Heavy receipts of eggs in the Chicago market are said to have caused a decline of 3½c. on the 19th inst. making the third consecutive day of heavy declines and bringing prices down to 29c., a loss of 10c. since last Monday.

OILS.—Linseed declined in sympathy with lower flaxseed markets. Prices recently were reduced 2 points for Feb.-Apr. delivery. Raw oil in carlots, cooperage basis, was offered at 14c., while in single barrels 14.8c. was asked. May-Aug. delivery was quoted 2 points higher. Cocoanut, Manila Coast tanks, 6⅜ to 6½c.; spot New York tanks, 6⅞ to 7c.; China wood, N. Y. drums, carlots, spot, 11 to 11¼c.; Pacific Coast futures, 9¾ to 10c.; soya bean, tanks, coast, 9 to 9½c.; edible olive, $2.25 to $2.40; lard, prime, 12½c.; extra strained winter, N. Y., 12½c.; cod, Newfoundland, 60c. Turpentine, 55 to 61¼c. Rosin, $7.45 to $9.35. Cottonseed oil sales to-day, including switches, 13,800 bbls. P. crude S. E., 7⅜c. bid. Prices closed as follows:

Spot--------8.40@ ---	April--------8.75@8.85	July--------9.27@ ---	
February-----8.40@ ---	May---------9.02@9.03	August -----9.33@9.40	
March------8.54@8.53	June---------9.00@9.15	September --9.41@9.43	

PETROLEUM.—Gasoline retail prices were reduced in territory covered by the Standard Oil Co. of Indiana and the Standard Oil Co. of Nebraska. No cuts are expected in eastern territories however. The lower prices did not affect Chicago and Detroit. The territory in which reductions were made covered only those parts of the Middle West in which quotations had not been cut at the time the smaller rates resulted in Eastern territories, when the cost-plus system was extended. Later on the spot demand for gasoline lagged, but there was a more active inquiry. United States Motor was freely offered at ½c. and it was intimated that 8c. would be accepted on a firm bid. Domestic heating oils were steady despite the weakness of other petroleum products. Marine fuel oils were in good demand with Grade C bunker oil $1.05 and Diesel oil $2. Kerosene was unchanged at 7¾c. for water white 41-43 gravity. Consumption fell off slightly owing to the recent warm weather. Lubricating oils were rather more active. Cylinder stocks were in better demand especially for export.

Tables of prices usually appearing here will be found on an earlier page in our department of "Business Indications," in an article entitled "Petroleum and Its Products."

RUBBER.—On the 15th inst. prices ended unchanged to 10 points lower with sales of 647 tons. London, it was no-

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

ticed, was 1-16d. lower. That was not ignored. Broadway, however, bought on a fair scale and uptown sold on balance. There was to say the least, however, no marked depression, despite increased stocks at consuming centres and the January consumption of 36,000 tons showed the suggestive increase of 13,000 tons over December. The unavoidable inference was that the daily output at the tire factories was increasing. Actual rubber was steady. New York closed on the 15th inst. with February 15.70c.; March, 15.90c.; May, 16.20 to 16.30c.; July, 16.70c.; Sept., 17.10. Outside prices: Ribbed smoked sheets, spot and Feb., 15⅞ to 16⅛c.; March, 16⅛ to 16⅜c.; April-June, 16⅜ to 16⅝c.; July-Sept., 17 to 17¼c.; Oct.-Dec., 17¾ to 18c. Spot first latex, 16⅜ to 16⅝c.; thin pale latex, 16½ to 16¾c. In London spot and Feb. were 7 15-16d. Singapore Feb. remained at 7½d. On the 17th inst. New York closed 10 to 30 points higher with sales for the day 625 tons. March ended at 16c. after touching 15.90c.; May sold at 16.30 to 16.50c., closing at 16.40c. to 16.50c.; July at 16.70 to 16.90c., closing at 16.80 to 16.90c.; Sept. at 17.10 to 17.30c., closing at 17.20 to 17.30c. Outside prices were generally unchanged. London advanced 1-16d. with spot and Feb. 8d.; March, 8 1-16d. Singapore, 7½d. for Feb. Stock in London, 62,659 tons, an increase for the week of 1,177 tons. In Liverpool 19,677 tons, a decrease of 84 tons. On the 18th inst. prices closed 10 to 30 points up with sales of 160 tons. In London the conference on restriction began and prices there advanced ⅛d., touching 8⅛d. for spot and Feb. Singapore rose 1-16d. to ⅛d. with Feb. 7⅝d. and April-June 8⅛d. Here, Feb. ended at 16.10 to 16.20c.; March, 16.30 to 16.40c.; May, 16.70c.; July, 17.10c.; Sept., 17.40 to 17.50c.; Oct., 17.60 to 17.70c.; Dec., 17.90 to 18c. Outside prices: Spot ribbed smoked and Feb., 16⅛ to 16⅜c.; March, 16¼ to 16½c.; April-June, 16¾ to 17c. Spot first latex, 16¼ to 16½c.; thin pale latex, 16½ to 16¾c.; clean thin brown crepe, 14⅝ to 14⅞c.; rolled brown crepe, 10⅜ to 10¾c.; No. 2 amber, 14⅞ to 15⅛c.; No. 3 amber, 14¾ to 15c.; No. 4 amber, 14½ to 14¾c.; Paras, upriver fine spot, 16¾ to 17c. coarse, 8½ to 8¾c.

New York on the 19th inst. advanced 20 to 40 points closing net unchanged to 10 points higher. Actual rubber advanced ⅛c. The rise was due to an announcement that Dutch Belgian, French and Swiss producers had voted to adopt the Anglo-Dutch committee's proposal for complete suspension of tapping during the whole month of May. New York closed with March, 16.30c.; May, 16.80c.; July, 17.20c.; Sept., 17.50c.; Oct., 17.60 to 17.80c.; Dec., 18c. Outside prices: Ribbed smoked sheets, spot and Feb., 16¼ to 16½c.; March, 16⅜ to 16⅝c.; April-June, 16⅞ to 17⅛c.; July-Sept., 17½ to 17¾c.; Oct.-Dec., 18 to 18¼d. Spot first latex, 16⅜ to 16⅝c.; thin pale latex, 16⅝ to 16⅞c.; clean thin brown crepe, 14¾ to 15c.; rolled brown crepe 10¾ to 10⅞c.; No. 2 amber, 15 to 15¼c.; No. 3 amber, 14⅞ to 15⅛c.; No. 4 amber, 14⅝ to 14⅞c. London advanced to 8¼d. for spot-Feb. Singapore Feb., 7¾d. Rubber Growers' Association in London is unanimous for tapping restriction provided that at least 70% of the Dutch plantation growers participate in the scheme. Another important meeting of the plantation interests has been set for March 5 next, at which time the British attitude will be made still clearer. London cabled, Feb. 19th: "An Amsterdam despatch to the "Financial Times" reports that Dutch rubber producers met on invitation of Dutch growers committee when restriction proposals will be submitted regarding result of discussions between the British and Dutch growers representatives. Proposals have big change of being adopted." Amsterdam cabled: "Rubber meeting proposal to stop production completely during May 1930, adopted almost unanimously." A private London cable on the 19th inst. said: "Rubber meeting to-day, committee agreed to cease tapping during May subject to ratification of 70% of the producers."

On the 20th inst. futures closed 10 to 30 points lower with sales of 1,840 tons. London was off 1-16 to ⅛d. Singapore dropped 5-16d. Some do not approve of the Amsterdam plan of stopping tapping for a month. It was figured to amount to 25,000 to 30,000 tons, deducted from the 1930 crop, and it is figured would establish an equilibrium between output and consumption. Some would prefer alternate tapping of 60 days' duration, or tapping every other day. They think that would have more effect. March closed at 16.10c., May at 16.50c., Sept. at 17.30c., Dec. at 17.80c. Ribed spot and Feb. 16⅛ to 16⅜c.; first latex 16¼ to 16½c. London spot 8 5.16d., Feb. 8 3-16d.; Singapore Mar. 7⅝d. To-day prices ended 20 to 40 points higher with sales of 954 tons. The cables helped prices upward; also covering on the eve of the holiday. London closed 1-16 to ⅛d. higher with spot-Feb. 8¼d.; Mar. 8 5-16d; Apr.-June, 8½d.; July-Sept., 8¾d.; Oct.-Dec., 9 1-16d. Singapore closed firm at 5-16 to 7-16d. net higher; No. 3 amber crepe spot, 6⅞d. or ⅛d. higher. Final prices show an advance for the week of 40 to 60 points. It was unofficially estimated that stocks in London this week would increase 200 tons and those in Liverpool 100 tons.

Rubber prices closed as follows:

Spot-----16.50@nom.	May-----16.90@trad.	August----17.50@nom.

April-----16.60@nom.		

HIDES.—New York on the 15th inst. ended 1 to 30 points lower with sales of 440,000 lbs. Feb. ended on that day at 13.75c.; March at 13.85c.; April, 14c.; May, 14.15 to 14.30c.; July, 14.60c.; Sept., 15.15 to 15.20c.; Dec., 15.55 to 15.65c. Frigorifico in Buenos Aires fell to 17c. c. & f. New York, a decline of ¼c. In general, other hides, like common dry packer, &c., have been quiet. Common dry Orinocos, 15c.; Maracaibo, Central America, Savanillas and Puerto Cabello, 14c.; Santa Marta, 15c.; spready native steers, 16½ to 17c.; New York City calfskins, 5-7s, 1.70 to 1.75c.; 7-9s, 2.10 to 2.15c.; 9-12s, 2.50 to 2.55c. On the 17th inst. New York closed 10 points lower to 5 higher with sales up to 1,280,000 lbs. in a brisk market. Feb. closed on that day at 13.80c.; May at 14.20c.; Sept. at 15.10 to 15.20c., and Dec. at 15.45 to 15.60c. Of frigorifico, 25,000 Argentine steers sold recently at 17 to 17 3-16c.; later 17c. On the 18th inst. in small trading prices ended 12 points off to 5 up. May sold at 14.10c. and closed at 14.08c. bid; Sept. sold at 15.05 to 15.10c., closing at 15.07 to 15.10c.; Dec. sold at 15.45 to 15.50c., closing at 15.50c. The total business was 480,000 lbs. New York on the 19th inst. declined 2 to 8 points with sales of 1,360,000 lbs. May sold at 14.05 to 14.10c., closing at 14c.; Sept. sold at 15.05 to 15.10c., closing at 15.05 to 15.15c., and Dec. sold at 15.45 to 15.50c., closing at 14.45 to 15.60c. On the 20th inst. prices ended unchanged to 15 points higher with sales of 320,000 tons. Uncertainty about the tariff interferes with business. March ended at nominally 13.95c.; Sept. sold at 15.15 to 15.16c. and closed at about the same prices. Of River Plate frigorifico, 4,000 National steers sold at $40, or equal to 16⅝c. To-day prices ended 5 to 15 points off with sales of 30 lots. March closed at 13.80c.; May at 14c.; Sept. at 15.10 to 15.15c., and Dec. at 15.50 to 15.60c. Final prices are 30 to 40 points lower for the week.

OCEAN FREIGHTS.—Sugar rates were lower. California oil went at 60s.

CHARTERS included sugar from Santo Domingo, 15s., Cuba 15s. 6d., April, to United Kingdom-Continent; Cuba to Odessa, March, 17s.; Cuba, about 7,000 tons, to United Kingdom-Continent, 13s. 6d., first half March; early March, Cuba to United Kingdom-Continent, 13s. 6d. Tankers: Clean, March, Curacao to north of Hatteras, 38c.; Boston 41s.; Fall River 40c.; clean, April-May, Black Sea to United Kingdom-Continent, 39s. 6d., a new high record; 11,500-ton steamer building, delivery 1931, 10 years, five at 6s. 9d. and five remaining at 6s. 6d.; dirty, Sept.-Oct., two years at 7s. 6d.; California, March to United Kingdom-Continent, 60s.; Gulf, clean, March to French Atlantic, 50s.; commencing March, two Gulf cargoes to north of Hatteras, Sabine, 40c., Smith Bluff, 41c.; Gulf to north of Hatteras trade to Nov. 30 1930, 35½c.; clean, Constanza to United Kingdom-Continent, 35s., March-April; clean, Constanza to Antwerp and (or) London, 32s. 6d. one port, 34s. two ports, May; clean, Gulf to United Kingdom-Continent, 43s., April; clean, Constanza-French Atlantic at 37s. 6d., April. Time, steamer 2,179 tons, May period, Europe, 4s. 6d. Coal, Hampton Roads to West Italy, Feb., $2

COAL.—Domestic business was better owing to much colder weather. Independent producers have been selling buckwheat at up to $3.50, rice up to $1.90 and barley to $1.50. The retail movement of all sizes was good, chiefly chestnut followed by stove, egg and pea. A 1,000,000 ton central Pennsylvania order has evoked some inquiry. Cold weather has done more for Pittsburgh coal than the rally in the steel trade. Domestic consumers at Pittsburgh and Chicago want high quality coal. In early February retail trade was stimulated by cold weather. After the cold snap over Sunday and Monday of this week it became much milder on the 18th. Tidewater business at one time was better. Western trade was stimulated by recent cold weather, but prices showed the restraining effect of ample supplies. Besides of late it has been much milder at the West. Here the belief is that the most that can be hoped for in February if not in March is a steady market.

TOBACCO has been quiet here. Havana advices to the U. S. Tobacco Journal said: "Wrapper leaf was exported in Jan. to three countries, the average price being $2.36 per pound or $5.14 per kilo. Unstemmed filled in bales was shipped to 14 countries, the average price being 28 cents, or 61 cents per kilo. Shipments were as follows: To the United States, 169,201 kilos; to Argentine, 180,869; Holland, 571,816; Spain, 756,888; Porto Rico, 45,726; Germany, 109,209; Canada, 7,220; Great Britain, 4,202; Chile, 3,295; Canary Islands, 4,735; Japan, 1,400; Belgium, 34,258 kilos. Stemmed fillers in barrels or packs were shipped to 6 countries, the average price being 87 cents per pound, or $1.89 per kilo as follows: To the United States, 559,213 kilos; Canada, 37,621; Argentine, 3,879; Great Britain, 2,562. Scraps and cuttings packed in barrels or packs were shipped to 4 countries, the average price being 32 cents per pound, or 70 cents per kilo, as follows: To the United States, 68,594 kilos; to Argentine, 4,049 kilos; to Chile, 2,789 kilos; Russia, 967 kilos. In Japan there is an agitation in the press for lower prices for cigarettes. In Louisville, burley is slightly lower, but they still pay a profit. At Mayfield, Ky., sales for the week were 1,541,175 lbs.; average price $9.99 or 21 cents lower than the preceding week. At Paducah: Sales for the week, 642,025 lbs.; average price $9.63 or 13 cents higher than the preceding week; at Murray sales 591,650 lbs.; average $10.21, or 13 cents higher. At Hopkinsville sales 2,712,770 lbs. of dark; average $11.41 or 50 cents higher for the week. At Clarksville 1,934,385 lbs. sold average $13.39 or 19 cents lower. At Springfield sales 1,645,460 lbs.; average $14.62 or 55 cents higher. At Owensboro sales 1,516,790 lbs. of dark; average $11.05 and 789,760 burley; average $14.94. Dark, 56 cents, and burley $1.50 decline. At Henderson sales 762,470 lbs. of dark; average $11.10, or 20 cents decline. At Blackstone sales 460,501 lbs.; average $16.93, or $2.75 decline. At Farmville sales 416,000 lbs.; average $14.74 or 80 cents higher. At Lynchburg sales 414,460 lbs., at an

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

average of $16.60. Sales for the week in the One Sucker district, which includes Bowling Green, Franklin, Russellville, Scottsville and W. Moreland were 919,590 lbs.; average $10.46, or 11 cents lower than the preceding week.

COPPER.—The recent business has been mostly in small lots. Prompt deliveries are often desired. That may be more or less significant. Consumers may be sailing rather close to the wind. It would not be very surprising. Meantime, brass mills are said to have received quite a good many orders recently. Electrolytic, 17¾ to 18c. Export sales in two days (the 19th and 20th inst.) were 1,025 tons. At the Exchange here Feb. closed on the 20th inst. at 17.10c.; March, 16.90 to 17.25c.; April, 16.70c. London on the 20th inst. dropped 2s. 6d. for spot standard, touching £69 17s. 6d.; futures, on the other hand, were reported as 12s. 6d. up to £68 15s.; sales were 150 tons spot and 250 futures. Electrolytic remained at £83 10s. bid and £84 5s. asked. At the second session spot standard advanced 2s. 6d. with futures unchanged; sales, 50 tons additional. To-day prices ended with March 17c. and July 16.90 to 17.25c.

TIN.—There has been a better business of late at rising prices here and in London. Straits tin nearby sold at 39c. Early March was quoted at 39.05c.; April, 39.20c. Most of the business was on the Exchange. In two days the sales there were 440 tons. On the 20th inst. prices at the Exchange closed five points off to 10 points higher, with most of the business in March, and some indications of expanding speculation. March ended at 38.55c. at the Exchange, April at 38.70 to 38.80c. and May at 39c. In London on the 20th inst. standard advanced 10s. to £174 15s. for spot and £177 15s. for futures; sales, 20 tons spot and 330 futures. Spot Straits up 12s. 6d. to £177 2s. 6d. Eastern c. i. f. London ended at £180 2s. 6d. with sales of 350 tons. To-day prices ended with March 38.35c.; April 38.55c.; May 38.70c.; sales 110 tons.

LEAD has been in fair demand at falling prices with London cables off. New York for the time being seems to have little power of recovery. Still the quotation here is 6.10c. for East St. Louis and 6.25c. for New York. There was no snap to the trading. That is clear. The falling prices in London tend to keep consumers out of the market here. On the 20th inst. London spot fell 11s. 3d. to £20 13s. 9d.; futures off 10s. to £20 11s. 3d.; sales, 200 tons spot and 1,800 futures. At the second session futures up 2s. 6d. The sales in London for future delivery in two days were 2,900 tons.

ZINC.—Trading has been on a small scale. Consumers doubt the stability of present prices. They are watching the market and buying only as they are compelled to. Prices remain at 5.15c. East St. Louis, though some quote 5.20c. New York, 5.50 to 5.57½c. nominal. On the 20th inst. London spot advanced 1s. 3d. to £18 17s. 6d.; futures remained at £19 10s. with sales of 850 tons for future delivery.

STEEL.—In structural steel a good new business was reported. Buildings projected were on a normal scale. Operations are gradually increasing. It is only gradual. It is not so noticeable this month as it was in Jan. That is plain. Fabricated steel attracts the most attention. Inquiries are for 50,000 tons. Last week the sales were 32,000. That itself was 20,000 tons less than three weeks ago. Operation of the tin plate plants is at the rate of 75 to 80% or 15% less than a year ago, and about 10% under the average rate for this time in the last 4 years. Production according to the "Iron Age," has made a further slight gain, but has lost momentum that caused it to rise rapidly in Jan. Demand is uneven with declines in certain districts offset by increases in others. This contrast is especially sharp in automotive steels with Pittsburg reporting heavier and other centers lighter releases.

PIG IRON.—The sales have been smaller. The Buffalo trade denies that $16 was accepted recently unless it was for off grade or very low silicon. They asserted that the regular quotations were $16.50 to $17. In any case with prices here the lowest in two years many doubt whether they are likely to decline further. Melters are taking their time about buying. The market therefore hangs fire awaiting developments. Recent sales of Buffalo iron are said to have been at $16.50, although there are persistent intimations that $16 has now and then been accepted, whatever may be said to the contrary. In some quarters it is said that shipments are increasing. New York received last week 1,700 tons of Southern iron. Southern iron is still being sold to New England. Eastern Pennsylvania nominally $19 to $20; Chicago, $19.50 to $20. This is supposed to be for small lots.

WOOL.—A government report from Boston said: "A considerable volume of business in wool is believed to be withheld pending definite action in the goods market. The season in goods has been delayed and as a result mills are uncertain as to the grades of wool they will need, although they feel reasonably certain of a fair aggregate volume of orders. The receipts of domestic wool at Boston during the week ended Feb. 15 amounted to 259,800 lbs. against 3,619,600 lbs. during the previous week. At Geelong on Feb. 14 offerings 16,000 bales and 92% sold. Compared with Jan. 23 greasy merinos were unchanged with the exception of superfine merinos, which were in sellers' favor. Fine greasy comebacks were unchanged. Fine greasy crossbreds ranged from par to 5% higer. Best greasy merinos realized 18¾d., merino lambs, 19¾d.; comeback, 17¾d.; comback lambs, 20¾d. At Sydney on Feb. 14 sales continued with a good general demand at firm recent prices. There was a keen demand for f'ner descriptions but faulty merinos and crossbreds were irregular. Future daily offerings will be reduced to approximately 8,000 bales. The next Adelaide sales will be held Feb. 20 and May 2. Melbourne cabled Feb. 18 that wool exports from July 1 1929 to Jan 31 1930 included 245,000 bales of Autralian and 253,000 of New Zealand, as compared to 1,446,000 and 277,000 respectively during the same period the year previous. A further sales at Perth will be held July 10. The final sale at Adelaide will be held July 4 instead of in April.

SILK to-day ended one to six points off with February 4.35 to 4.57; March, 4.36; May, 4.36 to 4.37. Sales were 141 lots or 1,410 bales.

COTTON

Friday Night, Feb. 21 1930.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 65,886 bales, against 53,506 bales last week and 82,277 bales the previous week, making the total receipts since Aug. 1 1929 7,289,189 bales, against 8,014,272 bales for the same period of 1928, showing a decrease since Aug. 1 1929 of 725,083 bales.

*Beginning with the season of 1926, Houston figures include movement of cotton previously reported by Houston as an interior town. The distinction between port and town has been abandoned.

The exports for the week ending this evening reach a total of 108,951 bales, of which 19,430 were to Great Britain, 15,250 to France, 16,537 to Germany, 13,559 to Italy, 29,239 to Japan and China and 14,936 to other destinations. In the corresponding week last year total exports were were 129,545 bales. For the season to date aggregate exports have been 5,197,338 bales, against 5,971,726 bales in the same period of the previous season. Below are the exports for the week.

*Estimated.

Speculation in cotton for future delivery has been on a liberal scale in a market dominated largely by the fluctuations in wheat and a fear that the Farm Board, for the time being at any rate, would do nothing further to stabilize prices. It is now said that some 360,000 bales of co-operative cotton credited to the Farm Board have been shifted to distant months and that the Farm Board will therefore not stop the notices next Tuesday. Also there has been March liquidation and that has pressed upon the price. As the situation stands now it is believed to be short. On the 15th inst. prices advanced a dozen points on better Liverpool cables, some improvement in the cotton goods demand here and in Lancashire, a scarcity of contracts here and in Liverpool, trade buying, and covering. Spot markets advanced 5 to 10 ponts. Bombay and the Continent were buying in Liverpool. Even the yarn trade was better in Manchester. The belief seemed to be very general here that the Farm Board, which is supposed to hold 300,000 bales in co-operative cotton futures, will require delivery on March contracts.

On the 17th inst. prices declined 30 to 35 points on a weaker technical position and heavy liquidation, partly in March. As to the Farm Board, there were rumors that it might not be so ready to accept delivery on March contracts as had previously been supposed. In Chicago wheat broke 2 to 2½c., and in Winnipeg 4 to 4½c. Farm Board aid looked more problematical in wheat, and to many somewhat less assured in cotton. Spot markets were dull and lower. Worth Street and Manchester were plainly more quiet. Wall Street, the West, the South and local traders were sellers. On the 18th inst. prices fell 20 to 25 points on weakness in Liverpool, an early decline in wheat, and continued liquidation in March and other months, with March notice day on Tuesday, Feb. 25. There were intimations from Washington that under certain circumstances the Farm Board might not for the time being try to maintain wheat prices. But later, with the technical position better, offerings small, and a noticeable rally in wheat and a rise in stocks, cotton recovered the early loss and closed very steady at practically unchanged prices.

On the 19th inst. prices, after a small early decline, suddenly wheeled about and advanced 20 to 25 points net on heavy selling following a decline in wheat of 4 to 6c. It caused cotton people to fear that it was all up with price stabilizing plans in wheat and that it would be useless to try anything of the kind in cotton. No cotton stabilization corporation has yet been established. Big selling included many old accounts. A disturbing rumor, too, was that the co-operative March holdings here kept heretofore under the direction of the Farm Board were being sold and transferred to later months. In Japan mills are curtailing 12½% for six months. Spot markets were 20 to 25 points lower and quiet. Goods were quiet on both sides of the water. The weather was better for field work. Planting has begun in the lower Rio Grande Valley. Houston reported that the outlook pointed to little decrease in the Texas acreage despite poor financial conditions. Memphis looks for a sizable decrease in the acreage due to the efforts of banks, merchants and others who control loans. Some firms in Wall Street are keeping an eye on commodities, regarding them as too low.

On the 20th inst. prices, after an early moderate decline, advanced some 18 to 20 points from the low and ended on some months 5 or 6 points net higher in a short market. Some felt that the bear points had been discounted. Moreover, wheat, which declined 2c. early in the day, recovered half the loss later. Shorts covered, the trade bought, and there was a certain amount of Liverpool buying. Some spot houses bought March and sold later months. There was a good deal of switching done from the near to distant months. Out and out new trading was rather small. Everybody was awaiting new developments. Exports were small. Spot markets were generally unchanged, though one or two of the Southern centers were 5 points higher. Manchester was quiet and Worth Street slow. Bombay declined 6 rupees and silver was lower. The weather was generally favorable for field work at the South. On the whole, the market seemed to be in a waiting attitude.

To-day prices were irregular, declining moderately at the start, then rallying some 15 points, making a net advance for the time being of 5 to 8 points, under the stimulus of higher prices for wheat, then declining again as wheat reacted and March liquidation made itself felt to some extent and ending 10 points net lower. Some were evening up for the holidays, and also for the notices here next Tuesday. Southwestern interests sold March, May and July freely, early in the day. Spot markets were 10 points lower and quiet. Goods were quiet on both sides of the water. Final prices show a loss for the week of 47 to 56 points. Spot cotton closed at 15.30c. for middling, a decline of 10 points to-day, and 55 points for the week.

The official quotations for middling upland cotton in the New York market each day for the past week has been:

Feb. 15 to Feb. 20—	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
Middl'ng upland	15.90	15.65	15.65	15.40	15.40	15.30

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Foreign stocks as well as afloat are this week's returns, and consequently all foreign figures are brought down to Thursday evening. But to make the total the complete figures for to-night (Friday) we add the item of exports from the United States, including in it the exports of Friday only.

February 21—	1930.	1929.	1928.	1927.
Stock at Liverpool ---- bales	921,000	970,000	778,000	1,313,000
Stock at London	------	------	------	------
Stock at Manchester	113,000	91,000	68,000	174,000
Total Great Britain	1,034,000	1,061,000	846,000	1,487,000
Stock at Hamburg	------	------	------	------
Stock at Bremen	496,000	607,000	545,000	622,000
Stock at Havre	295,000	249,000	321,000	284,000
Stock at Rotterdam	8,000	16,000	15,000	16,000
Stock at Barcelona	106,000	80,000	97,000	109,000
Stock at Genoa	70,000	61,000	57,000	72,000
Stock at Ghent	------	------	------	------
Stock at Antwerp	------	------	------	------
Total Continental stocks	975,000	1,013,000	1,035,000	1,103,000
Total European stocks	2,009,000	2,074,000	1,881,000	2,500,000
Indian cotton afloat for Europe	226,000	162,000	158,000	109,000
American cotton afloat for Europe	33,700	483,000	401,000	589,000
Egypt, Brazil, &c. afloat for Europe	86,000	96,000	77,000	103,000
Stock in Alexandria, Egypt	473,000	439,000	403,000	420,000
Stock in Bombay, India	1,314,000*a*	1,109,000	743,000	646,000

Broach, fine, Liverpool	6.30d.	9.00d.	9.35d.	6.95d.
Tinnevelly, good, Liverpool	7.65d.	10.10d.	18.15d.	7.40d.

a Houston stocks are now included in the port stocks; in previous years they formed part of the interior stocks.
* Estimated.

Continental imports for past week have been 111,000 bales.

The above figures for 1930 show a decrease from last week of 113,852 bales, a gain of 615,600 from 1929, a decrease of 1,037,910 bales from 1928, and a loss of 567,377 bales from 1927.

AT THE INTERIOR TOWNS the movement—that is, the receipts for the week and since Aug. 1, the shipments for the week and the stocks to-night, and the same items for the corresponding periods of the previous year, is set out in detail below:

The above statement shows: (1) That the total receipts from the plantations since Aug. 1 1929 are 8,361,898 bales; in 1928 were 8,608,154 bales, and in 1927 were 7,606,589 bales. (2) That, although the receipts at the outports the past week were 65,886 bales, the actual movement from plantations was 46,440 bales, stocks at interior towns having decreased 19,446 bales during the week. Last year receipts from the plantations for the week were 50,481 bales and for 1928 they were 49,263 bales.

WORLD'S SUPPLY AND TAKINGS OF COTTON.

Cotton Takings, Week and Season.	1929-30.		1928-29.

a This total embraces since Aug. 1 the total estimated consumption by Southern mills, 3,040,000 bales in 1929-30 and 3,197,000 bales in 1928-29—takings not being available—and the aggregate amounts taken by Northern and foreign spinners, 9,759,020 bales in 1929-30 and 10,380,883 bales in 1928-29, of which 6,159,820 bales and 6,793,683 bales American.
b Estimated.

INDIA COTTON MOVEMENT FROM ALL PORTS.—The receipts of India cotton at Bombay and the shipments from all India ports for the week and for the season from Aug. 1, as cabled, for three years, have been as follows:

Feb. 20. Receipts at—	1929-30.		1928-29.		1927-28.	
	Week.	Since Aug. 1.	Week.	Since Aug. 1.	Week.	Since Aug. 1.
Bombay	113,000	2,117,000	79,000	1,581,000	70,000	1,717,000

Exports from—	For the Week.				Since August 1.			
	Great Britain.	Contin-nent.	Japan & China.	Total.	Great Britain.	Contin-nent.	Japan & China.	Total.
Bombay—								
1929-30	5,000	27,000	79,000	111,000	45,000	452,000	812,000	1,309,000
1928-29	2,000	3,000	63,000	68,000	28,000	426,000	846,000	1,300,000
1927-28	4,000	15,000	9,000	28,000	37,000	312,000	533,000	882,000
Other India—								
1929-30	1,000	11,000	----	12,000	71,000	343,000	------	414,000
1928-29	6,000	8,000	----	14,000	62,000	284,000	------	346,000
1927-28	1,000	14,000	----	15,000	595,000	283,000	------	342,500
Total all—								
1929-30	6,000	38,000	79,000	123,000	116,000	795,000	812,000	1,723,000
1928-29	8,000	11,000	63,000	82,000	90,000	710,000	846,000	1,646,000
1927-28	5,000	29,000	9,000	43,000	965,000	595,000	533,000	1,224,500

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 34,000 bales. Exports from all India ports record an increase of 41,000 bales during the week, and since Aug. 1 show an increase of 77,000 bales.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—We now receive weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years:

Alexandria, Egypt, Feb. 19.	1929 30.		1928 29.		1927-28.	
Receipts (cantars)—						
This week	190,000		120,000		90,000	
Since Aug. 1	6,305,660		6,521,352		4,782,453	
Exports (bales)—	This Week.	Since Aug. 1.	This Week.	Since Aug. 1.	This Week.	Since Aug. 1.
To Liverpool	4,000	106,242	----	116,362	----	87,859
To Manchester, &c	4,000	106,677	----	116,157	----	95,200
To Continent and India	13,000	304,851	8,000	313,322	5,000	248,745
To America	----	69,418	----	100,906	8,500	85,569
Total exports	21,000	587,188	8,000	646,747	13,500	517,373

Note.—A cantar is 99 lbs. Egyptian bales weigh about 750 lbs.
This statement shows that the receipts for the week ending Feb. 19 were 190,000 cantars and the foreign shipments 21,000 bales.

MANCHESTER MARKET.—Our report, received by cable to-night from Manchester, states that the market in yarns is easy and in cloths is quiet. Demand for yarns is poor. We give prices to-day below and leave those of previous weeks of this and lats year for comparison:

	1929.			1928.		
	32s Cop Twist.	8¼ lbs. Shirtings, Common to Finest.	Cotton Midd'g Upl'ds	32s Cop Twist.	8¼ lbs. Shirtings, Common to Finest.	Cotton Midd'g Upl'ds.

BREADSTUFFS

Friday Night, Feb. 21 1930.

Flour was 10c. lower late last week in sympathy with a decline in wheat. The decline brought no increase in business. The export trade was quiet. Not a few looked for a marked decline in food products. On the 19th inst. a sharp decline was reported. Exports from New York were about 12,000 barrels to British and German ports. Later prices declined. Argentine bran was offered here in a keen struggle for the market. The export clearances from New York last week were 860 barrels and 9,743 sacks as against 1,046 barrels and 113,000 sacks in the previous week. New York cleared on Jan. 15 9,000 barrels, or 13,000 sacks. Boston cleared 22,000 barrels of bonded flour. Generally the export business was said to be small. Argentine bran was offered here in quantity at $5 a ton cheaper than American. Feed markets were depressed. At the recent decline in flour Northwestern and Southwestern mills are said to have done a little. Exports from New York on the 18th inst. were 23,009 sacks and 938 barrels to Liverpool, Hamburg, Rotterdam, Genoa and Naples. New Orleans cleared 4,000 barrels. Atlantic and Gulf exports for the day were 22,000 barrels. Clearances from New York were on nine steamers, so small were the individual exports.

Wheat has collapsed badly into low ground for the season, with export trade dull and very disappointing, as Argentine has persistently pressed its wheat on the European markets. Moreover, reports have been rife that members of the Canadian pool were unsuccessful in attempts to obtain loans in London and had returned much discouraged. Along with all this went intimations attributed to Chairman Legge that situations might arrive wherein the Farm Board would not maintain the price of wheat. It certainly has not.

On the 15th inst. prices ended 1 to 1⅛c. lower in Chicago and 1¼ to 2c. off in Winnipeg. The decline, it is believed, would have been greater but for the fear of some aggressive action by the Farm Board. Liverpool was ½d. lower than due. It ended 1⅜ to 1¾d. lower. That was due to increased offerings by Argentina, pressure of Manitoba wheat, wide and disturbing fluctuations in Argentina exchange, and dullness of trade. Buenos Aires ended ½ to 1c. lower. Advices as to the condition of winter wheat in the United States and Europe were on the whole favorable. Export demand was generally small, although a fair business in Manitoba was done with the Orient. The open interest at the end of last week was put at 193,717,000 bushels against 197,175,000 a year ago. Sales of wheat futures on the Chicago Board of Trade last week were 177,673,000 bushels, a decrease of 150,000,000 bushels as compared with the same week last year. On the 17th inst. prices fell 2 to 2½c. in Chicago and 4¼ to 4½c. in Winnipeg, with some unfavorable financial reports from there. Confidence in the Farm Board's ability to handle the situation lessened. The visible supply was a facer for the bulls; in other words, the decrease was unexpectedly small, i.e., 632,000 bushels. A year ago, it is true, the decrease was only 743,000. The total now, however, is 159,052,000 bushels, against 123,630,000 a year ago. Liverpool closed 2d. to 2⅛d. lower, and Buenos Aires 2½c. off. Export trade was dull. Offerings were pressing in keen rivalry with Canadian and Russian wheats. World's shipments for the week were 12,236,000 bushels, with the total from July 1 402,000,000 bushels against 580,000,000 for the same period a year ago. The quantity afloat was 40,720,000 bushels against 39,464,000 a week ago and 70,000,000 for the same week last year. France, it was stated, would at once offer 18,000,000 bushels for export.

On the 18th inst. prices reached new low levels for the year, dropping 1½ to 2⅝c. Then they rallied 2 to 3¼c., with big export sales, i.e., 2,000,000 bushels, mostly, however, Manitoba. Shorts covered freely. Big houses bought heavily. There were intimations early from Chicago, however, that a situation might arise in which the Farm Board might not act to support prices. Also Liverpool fell 2½ to 2⅞d. Argentine shippers were pressing Plate wheat for sale at 4c. a bushel decline. Buenos Aires, after closing at a decline, was unchanged to ⅛c. higher at midday. Freights in Argentine were reported easy. Favorable weather conditions prevailed on the Continent, though snow covering was lacking. Australia estimated the total crop at 125,000,000 bushels against the preliminary estimates of 110,000,000 bushels. On the 19th inst. prices declined on big selling partly on stop orders and 4c. in Chicago from the high of the day and 4 to 6c. in Winnipeg, owing to rumors that Canadian wheat pool delegates to London were unsuccessful in endeavors to get financial assistance, and had returned discouraged. There was a rumor that the British were boycotting Canadian and American wheat. The net decline for the day was 3½ to 3¾c. in Chicago and 2½ to 4c. in Winnipeg. New lows for the season were reached at Chicago. Liverpool closed ¼ to ⅜d. higher. Argentine reported that there was a renewal of pressure of wheat afloat in the nearby positions. Argentine wheat was selling it seems at $1.14 c.i.f. Europe, or about 12c. a bushel discount under American No. 2 hard winters for nearby shipment. The Government weekly weather report said that while in the main producing sections there was an absence of snow covering, no particular damage had occurred. Export sales were only 200,000 to 400,000 bushels, mostly Manitoba. The United States holds big supplies, that is, 159,000,000 bushels in the visible supply, and even if this were reduced at the rate of 3,000,000 bushels a week for the next ten weeks, it would still leave on hand 129,000,000 bushels as against the 10-year average carryover of 47,000,000. New York reported a little No. 2 hard sold f.o.b. Baltimore at 1½c. under Chicago May, which is far under replacement values.

On the 20th inst. prices broke 2c., but half of this decline was recovered later. Winnipeg, on the other hand, declined 2 to 2½c., and ended at about the lowest. Liverpool closed 1⅞ to 2⅛d. lower on further offerings of Argentine wheat afloat. Russia offered wheat. Its shipments were smaller than in the previous week, however. Export demand was small. It was called not over 400,000 to 500,000 bushels, mostly Manitoba. The weather in the United States and Europe was favorable. There were some intimations that European takings of North American wheat would increase in the near future. This had some effect. But towards the end prices reacted somewhat on uncovering of stop orders. Argentine exports for the week were 2,867,000 bushels, or about the same as in the previous week and 6,742,000 in the same week last year. Chicago reported that on the 20th inst. No. 2 hard winter wheat f.o.b. Gulf, was offered at the Chicago May price, or about 1¼c. a bushel over the actual close at Liverpool March wheat, and it was felt that there was little prospect for export business. The East asked for offers on No. 2 hard wheat at Chicago and holders quoted 5c. a bushel under Chicago May, which would suggest a price around $1.08¼ or almost 10c. a bushel under what was being paid in the sample market by co-operatives for country run of grain. Favored by a decline of some 40,000,000 bushels of the visible supply of wheat since the peak last October, improvement in prices from the recent marked decline, said the Department of Agriculture, appears likely in the next few weeks. Much of the improvement is expected as a result of an anticipated increase in European demands. The statement predicted that the general level of farm

Federal Reserve Bank of St. Louis

prices during the next few months would remain below the corresponding figure for the same period a year ago.

To-day prices ended 1 to 1¼c. higher. The cables were surprisingly strong. Liverpool ended 2¼ to 2⅝d. higher. Buenos Aires was up 2⅜c. Shorts were evening up for the holiday. There was a better foreign demand for futures. What is more, the actual export sales were estimated at anywhere from 2,000,000 to 4,000,000 bushels, mostly Canadian. The co-operatives took 45 cars or more at Kansas City, 60 at Omaha, and more or less at Minneapolis. Weather conditions in the winter wheat belt were good, but the forecast was for colder weather at the Northwest. The Continent was the main buyer for export. Winnipeg ended 2½ to 3¼c. higher. The technical position at home and abroad was better. The market acted short everywhere. Final prices were 5⅜ to 6c. net lower for the week.

Indian corn has naturally been depressed by the great fall in the price of wheat. Besides, the weather has been better and the tendency has been towards some increase in the receipts, although bad, wet, and thawing roads offer no slight hindrance to the marketing of the crop. On the 15th inst. prices advanced ½ to ¾c., owing partly to a decline in wheat and partly to favorable weather and reports of a larger country movement and partly to liquidation. Total sales last week were 37,500,000 bushels against 53,000,000 in the previous week and 79,000,000 in the same week last year.

On the 17th inst. prices declined 1¾ to 2¼c. net owing to a drop in wheat. The United States visible supply increased last week 1,755,000 bushels against 3,702,000 last year. The total is 18,929,000 against 31,665,000 a year ago. The weather was good for moving the crop. Receipts increased. Shipping demand was fair; over 100,000 sold. On the 18th inst. prices ended ⅝ to 1c. higher. This was traceable to a 2 to 3c. rally in wheat. The weather was very good for moving the crop, yet there was no really great pressure to sell. Country offerings to arrive were small. Shippers had a better demand, with sales of 112,000 bushels. The country is consigning corn by preference.

On the 19th inst. prices dropped 1¾ to 2c. to new low levels because of a decline in wheat, better weather, and the likelihood of larger country offerings. Yet the mild weather and thawing make the roads bad. Shippers reported a moderate outside demand. Cash prices fell 1 to 2c. Actual country offerings on the 19th inst. were small. On the 20th inst. prices declined ½ to ¾c. with wheat, but rallied sharply and ended unchanged to ½c. higher, owing to the later rally in wheat and the unsettled weather and bad roads at the West. Cash markets were 1 to 3c. lower with trade dull. But growers were not disposed to market their corn freely. If the country movement falls off it is believed that cash prices will rise.

To-day prices ended ¾c. higher, with the assistance of a rise in wheat. Country offerings were light. Roads were bad. The weather was good but the forecast was rather unsettled. Higher prices caused realizing. There was covering of hedges against shipping sales of 400,000 bushels at Chicago. Final prices show a decline for the week of 2½c.

Oats have simply been more or less of an echo of the declining other markets, although not actually so weak as they have been. On the 15th inst. prices declined ½c. net in response to a drop in other grain and more or less liquidation. On the 17th inst. July sold at a new low. Generally, prices ended 1⅛ to 1⅜c. lower following other grain. The United States visible supply last week decreased 486,000 bushels against an increase last year of 799,000 bushels. The total is now 23,194,000 bushels against 14,432,000 a year ago. On the 18th inst. prices ended ⅛c. lower to ¼c. higher. Prices rallied ⅞ to 1½c. from the early new lows which were reached on heavy selling due to a drop in other grain. Shippers had a better outside demand, and a fair business was done. On the 19th inst. prices fell 1c. net owing to the decline in other grain, further liquidation, less cash demand and larger receipts. On the 20th inst. prices ended unchanged to ⅛c. higher. At one time they were ⅜ to ½c. lower. Liquidation played a part in the trading and for a time weakened prices. The visible stocks are very large; also to all appearance the country holdings. The weakness of barley is something of a handicap. Some think there will be selling pressure on advances. That remains to be seen. To-day prices ended ¼ to ½c. higher in answer to the advance in other grain. Shorts were covering. The shipping demand was fair. In the end profit takng caused a setback from the high point of the day of ⅝ to 1c. Final prices show a decline for the week of 2 to 2⅝c.

DAILY CLOSING PRICES OF OATS IN NEW YORK.

Rye has broken badly in answer to the debacle in wheat. What has made matters worse is the regrettable and very prolonged absence of an export trade. On the 15th inst. prices ended unchanged to ½c. lower on some months but ⅝c higher on March, in which there was some covering and other buying. There was nothing doing for export, however. On the 17th inst. prices ended 1¼ to 2⅝c. lower at new lows for the season in accord with a decline in wheat. The United States visible supply decreased last week 8,000 bushels against 43,000 last year; total 14,142,000 bushels against 6,254,000 last year. The German Government bought rye in Germany for a week, but could not sustain the price owing to large stocks.

On the 18th inst. prices ended ½ to 2c. net higher. They rallied with wheat after an early decline of ¾ to 1c. Many sold May rye and bought July wheat. On the 19th inst. prices declined 2½ to 3½c., due to a lower wheat market bearish foreign crop advices and cash demand small. On the 20th inst. prices ended ¼ to 2c. lower. They reached a new low for the season. Scattered liquidation had its effect. But there was another side to it for a time. Shorts covered. But the foreign news continued to be bearish. Export trade was absent and the domestic demand small. To-day prices ended ½ to 2c. higher. Wheat helped to pull it up. So did the covering of shorts. March was noticeably firm. It advanced 2½c. At one time other months were 1¼ to 1½c. higher. Realizing caused a reaction from the top of ½c. on May and July. Final prices show a decline for the week of 2½ to 5c.

WEATHER BULLETIN FOR THE WEEK ENDED FEB. 18.—

The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended Fen. 18 follows:

At the beginning of the week there was a rather general reaction to warmer from the cold weather that prevailed at the close of the preceding week and temperatures in general were not unusually low anywhere. Precipitation was reported from many parts of the Central and Northern States on the 13th, while it had become much colder over the Northwest. There was a further reaction to colder in parts of the Northwest on the 14th, while rain or snow was fairly general over much of the Atlantic coast area.

A widespread area of high pressure obtained over the central valley States on the 15th, attended by low temperatures, with subzero weather reported south to Iowa. On the following day this "high" moved eastward, bringing much colder weather to the East, with freezing reported locally to the east Gulf coast. There was further rain or snow over the Atlantic Coast States, but the latter part of the week had only local precipitation, with a moderation to warmer over central areas.

Chart I shows that the week, as a whole. was abnormally warm west of the Mississippi River and moderately cold in the Atlantic area, except in the Florida Peninsula. In the Ohio and the immediate Mississippi Valleys, as well as in central and east Gulf sections, the mean temperatures for the week were near normal, while in the central and southern Florida Peninsula they were 3 deg. or 4 deg. above. In the Great Plains States, the Great Basin of the West, and the northern Rocky Mountain sections the period was abnormally warm, with the weekly mean temperatures ranging generally from 9 deg. to 18 deg. above the seasonal average.

During the cold wave the latter part of the week some rather low temperatures were experienced in central and southern parts of the eastern area, with the line of freezing extending as far south as Mobile, Ala., while at the same time some low readings were reported from the northern sections of the country. Temperatures 6 deg. to 18 deg. below zero were rather general in the interior of the Northeast and in north-central districts, with subzero readings extending southward over the middle Appalachian Mountain section. The lowest temperature reported for the week was 26 deg. below zero in parts of northern Michigan on the 16th.

Chart II shows that precipitation was moderate to fairly heavy in the middle Atlantic area, in Tennessee, and locally in other parts of the Ohio Valley and in east Gulf districts, while rainfall was heavy in northwestern Washington. Otherwise precipitation during the week was generally light, with a large area of the Southwest, extending from central Texas and the central Great Plains westward to the Pacific, practically rainless.

Digitized for FRASER
http://fraser.stlouisfed.org/
Federal Reserve Bank of St. Louis

Notwithstanding the rather severe cold wave over the eastern half of the country toward the close of the week, the period, in general and for the country, as a whole, had rather favorable weather for agricultural interests. In the middle Atlantic area wheat fields had a fairly good snow protection during the prevalence of low temperatures, and there was some snow in the main Wheat Belt, but the mild weather toward the close of the week caused rapid thawing, and wheat fields in the principal producing areas are now generally bare of snow. There were some complaints of unfavorable thawing and freezing of the soil in the interior valleys, and even as far west as southeastern Kansas, but no widespread or serious harm is apparent.

There were no materially damaging low temperatures in the Southern States, although freezing was rather general in the east Gulf area, except in the extreme Southeast. Winter truck crops made fairly good progress, and show improvement in many sections, while the beginning of planting gardens and hardy truck has become more general. In Florida there was too much moisture on some lowlands, but the weather, in general, was favorable; strawberries are unusually late in Texas, while moisture is needed in the western half of that State and some adjoining districts. The weather was unusually favorable for livestock interests, being mild and sunny over much of the great western grazing section, with large areas of the range accessible for browsing.

In the Corn Belt plowing was rather inactive, especially in central and eastern portions, but in the more western districts this work and disking were in progress, except in northern sections of the belt. Corn planting continued in northern Florida. In the Cotton Belt conditions were mostly favorable for field operations and considerable plowing was accomplished, especially in the west where warm, sunny weather was the rule. In the central belt the preparation of soil was more of a local character, as considerable areas continued too wet to work; plowing was rather active in the eastern portion of the belt.

SMALL GRAINS.—The main Winter Wheat Belt continues generally bare of snow, with much reduction of cover over the Northwest. There were many reports of freezing and thawing conditions, especially in the Ohio Valley, but apparently there is no extensive damage thus far. Condition of the crop is satisfactory in most areas, while greening was reported from the southwestern belt. Precipitation during the week was favorable in the Pacific Northwest, while there is generally ample soil moisture in the West, except for parts of the Southwest where rain is needed. Winter cereals are improving in the South and spring oats are being sown north to Oklahoma and Arkansas, with some being seeded in the southeastern quarter of Kansas. Winter grains were favored in the more eastern districts, while an ample snow cover remains in the Northeast and the Lake region.

The Weather Bureau furnishes the following resume of the conditions in the different States:

Virginia.—Richmond: First and middle of week moderate and favorable for outdoor operations and considerable farm work accomplished; planting early crops begun in southeast. Decidedly colder, with snow, last of week interrupted farm work. Winter grains and truck generally good.

North Carolina.—Raleigh: Farm work progressed satisfactorily under fair, mild weather first part of week, but retarded by rain and cold latter part. Hardy truck and winter grains doing fairly well. Cold period favorable for killing hogs and keeping fruit back.

South Carolina.—Columbia: Mild weather early in week; local rains midweek; closing cold and raw. Wheat, oats, rye, and hardy truck generally good. Spring oats being planted; early oats being pastured. Potato planting extending into interior. Tobacco beds being prepared. Spring plowing fairly active.

Georgia.—Atlanta: Moderately cold week, with frosts. Rainfall light and sunshine adequate. Considerable plowing accomplished; cereals improving; oats stooling well. Some spring gardens and potatoes planted in south. Peach buds swelling and forest vegetation showing advance in south.

Florida.—Jacksonville: Rains unfavorable for strawberries and truck on some lowlands, but weather, as a whole, favorable. Tobacco beds good. Oats improved. Truck well advanced and much being shipped. Planting cane and corn in central and north and locally in west. Melons good progress. Moderate shipments of strawberries and citrus; groves in splendid condition.

Alabama.—Montgomery: Temperatures averaged decidedly above normal first half; much below thereafter. Scattered, mostly moderate, rains. Some plowing locally, but ground too wet in most sections. Oats surviving severe freezes improving; spring oats being sown in some sections. Winter vegetables, pastures, and ranges made fair to good progress in coast section; elsewhere pastures and ranges dead or poor. Planting early vegetables progressing in northwest.

Mississippi.—Vicksburg: Mostly light precipitation in north Thursday, in central Friday and Saturday, and in extreme south Sunday; otherwise generally fair. Killing frost in north and central Sunday, but damage negligible. Some plowing accomplished, but activity not general. Progress of pastures good and of truck fair.

Louisiana.—New Orleans: Mild and cloudy first half of week; moderate rains, followed by clear and colder latter part. Plowing and preparing soil for spring crops and planting potatoes making fair progress. Pastures beginning to grow. Truck doing fairly well.

Texas.—Houston: Mild and sunshiny, with light precipitation in much of eastern half, but in none in west. Plowing made good progress, but still backward in east. Pastures greening and wheat, oats, and barley made good progress; condition poor to fair and needing rain in west. Condition and progress of winter truck good in extreme south and truck planting started in eastern half nearly to Red River. Fruit buds swelling. Strawberries unusually late. Livestock poor and feeding still necessary.

Oklahoma.—Oklahoma City: Warm and mostly clear; no precipitation. Ground dried out rapidly and much plowing done. Seeding oats begun in most sections. Not much wheat winterkilled and condition generally good; growing nicely and some again being pastured. Native pasture brown and poor; livestock thin.

Arkansas.—Little Rock: Farm work progressed rapidly in northwestern half of State, but delayed in southeastern half. Light to moderate rains on 12-13th. Plowing, gardening, and sowing spring oats progressing rapidly in west and starting in east. Wheat, rye, meadows and pastures becoming green.

Tennessee.—Nashville: Temperatures about normal; rain mostly in central and east. Crops advanced fairly well, except in a few western and eastern counties where wheat, oats, and rye continue poor, while barley is coming slowly. Considerable plowing and transplanting fruit trees under way. Livestock fair.

Kentucky.—Louisville: Temperatures variable; precipitation light. Drainage better and much less water in top soil; some freezing and thawing, but little apparent injury to winter grains, which are mostly in good condition. Dirt roads very bad and macadam injured.

THE DRY GOODS TRADE

New York, Friday Night, Feb. 21 1930.

During the past week textile markets have been influenced by a further decline in prices for raw materials. Quotations for raw wool, silk and cotton have reached lower levels coincident with a further recession in other commodities such as wheat, corn and oats. These developments have been most disconcerting to factors, as they have led to price instability, hesitation among buyers, and generally restricted purchases. Apparently both buyers and sellers are feeling their way and are fearful of the ultimate economic effects of the continued weakness of the commodity markets. In an effort to overcome this apprehension, and to stimulate buying confidence, the American Woolen Co. reduced prices on their fall men's wear staple lines which they had but recently opened. It was generally felt that the move will be successful, especially if the fall fancy lines are opened on a basis of current raw wool values. However, buyers will have to come into the market shortly to cover their normal seasonal requirements, and this situation is believed to exist in practically all branches of the textile trade. A good example of this was found in the cotton goods section, where a large number of buyers were in the market making commitments much later than usual for the spring retail trade. Naturally, with prices of the raw commodity declining at a disturbing rate, orders were confined to spot and near-by needs, but the aggregate volume was so satisfactory that factors were quite encouraged. As to the silk division, the situation was somewhat the same. While the recession in raw silk values has exercised a restraining influence upon buyers of finished goods, the need of spring merchandise has necessitated purchases.

DOMESTIC COTTON GOODS.—Two developments of equal importance, but of conflicting nature, featured the domestic cotton goods markets during the past week. First, was the renewal of the decline in raw cotton prices which was taken to indicate that the efforts of the Farm Board to stabilize prices were unsuccessful, for the time being at least. This was most discouraging, and led to the offering of a number of concessions on cotton goods, particularly of the unfinished type. These lower prices, nevertheless, failed to stimulate business, which was confined to immediate needs. However, diametrically opposed to these declines were the definite indications that a belated demand for spring merchandise was beginning to assert itself. The premature taste of spring-like weather experienced during the past week no doubt made buyers conscious of the fact that they would need considerably more merchandise to meet the normal spring consuming demand. This sudden realization, confronting them practically at the inception of the spring retail season, prompted many of them to enter the market in an effort to provide for needed constructions. As a result, business on quite a few finished cloths showed a gratifying increase over the previous week. According to reports, sales of prints, percales and wash goods overtopped the distribution of other cloths. Buyers, however, did not seem to be able to break away from their hand-to-mouth buying tactics. Individual orders continued to be confined to small lots, but this was largely offset by the fact that they were placed in a steady volume. It was noted that out-of-town buyers were inclined to be somewhat more liberal in regard to the size of their orders, but local purchasers adopted the habit of placing commitments day by day as needed. Practically all orders stipulated either spot or nearby delivery. Print cloths 27-inch 64x60's construction are quoted at 4⅜c., and 28-inch 64x60's at 4¾c. Gray goods in the 39-inch 68x72's construction are quoted at 7⅜c., and 39-inch 80x80's at 9⅛c.

WOOLEN GOODS.—Woolens and worsteds continued fairly active during the past week, although business in the women's wear section was more active than in the men's wear. The most important development of the week was the announcement made by the American Woolen Co. that owing to the continued decline in raw wool value they felt justified in reducing prices on fall staple fabrics for men which had been opened but a short time ago. This move was considered as highly constructive, and one which should encourage a return of buying confidence and result in a substantial expansion of business. It also prompted the belief that when the new fall fancy lines are opened they will be on a basis of current values in the raw market. The statistical position of the trade continues healthy, and factors are confident regarding the future.

FOREIGN DRY GOODS.—Little change was noted in the markets for linens. The call for suitings and dresses still featured the market. Although aggregate orders failed to reach substantial yardages, demand is gradually broadening with prospects favoring a gradual increase in sales as the summer approaches. The household accessories section of the trade appears to be nearing the end of its seasonal lull. Several houses have reported fairly satisfactory sales of damask table cloths and luncheon sets, while the distribution of sheets and pillow cases is estimated to be about on a par with that of the corresponding period last year. Burlaps continued quiet, with business spotty, and prices practically unchanged. Light weights are quoted at 5.15c., and heavies at 6.75c.

MUNICIPAL BOND SALES IN JANUARY.

sent herewith our detailed list of the municipal bond issues put out during the month of January, which the crowded condition of our columns prevented our publishing at the usual time.

The review of the month's sales was given on page 1002 of the "Chronicle" of Feb. 8. Since then several belated January returns have been received, changing the total for the month to $109,137,143. The number of municipalities issuing bonds in January was 294 and the number of separate issues 420.

NEWS ITEMS

Canada, Dominion of.—*Funded Debt Reduced* $58,258,119 *During* 1929.—In a report submitted on Feb. 14 to the Department of Commerce by Commercial Attachee Meekins of Ottawa it was shown that a reduction of over $58,000,000 in the total funded debt of the Government had taken place in the past year. We quote as follows from a Washington dispatch as it appeared in the New York "Times" of Feb. 15:

"A statement of the public debt, revenue and expenditure of Canada up to the end of last year shows that the funded debt was decreased from $2,362,852,341 in 1928 to $2,304,594,222 in 1929 by retiring maturing obligations payable in New York.

"Dominion notes increased nearly $20,000,000 and government annuities, insurance and superannuation funds nearly $9,000,000. There was a decrease of about $3,500,000 in the deposits of postoffice and government

Federal Reserve Bank of St. Louis

savings banks. The figures were shown in a statement by the Department of Commerce to-day.

"The most significant changes in assets are a decline of more than $28,000,000 in specie reserve, and an increase of over $46,000,000 in loans to banks under the finance act.

"Federal revenues from April 1 to Dec. 31 increased by more than $6,000,000 over the corresponding period of 1928, the gains in income tax collections and customs and excise duties more than offsetting the loss in excise tax. Expenditures in that period were almost $18,000,000 larger than during the corresponding nine months of 1928."

Kansas.—*Special Legislative Session Called for Feb. 27.*—The State Legislature will convene in extraordinary session at noon on Feb. 27, for the purpose of considering the repeal of the intangible tax and mortgage registration laws, reports the Topeka "Capital" of Feb. 14. The official proclamation as it appeared in the above newspaper reads as follows:

PROCLAMATION CONVENING LEGISLATURE IN SPECIAL SESSION.

Executive Department.

Topeka, Kan., Feb. 13 1930.

Whereas, The recent decisions of the Supreme Court of Kansas on questions of taxation of intangible property leave the tax question in this State in an uncertain and unsatisfactory condition, thereby creating an extraordinary condition requiring legislative action:

Now, Therefore I, Clyde M. Reed, Governor of the State of Kansas, by virtue of the authority vested in me by the Constitution of the State, do hereby convene the legi(lature of the State of Kansas to meet at the Capitol of the State in Topeka at the hour of noon on the 27th day of Feb., A. D. 1930, to enact laws for the betterment of the tax situation in the State of Kansas.

In testimony whereof I hereunto subscribe my name and cause to be affixed the Great Seal of the State of Kansas.

Done at Topeka, Kansas, on the day and year first above written.

CLYDE M. REED, Governor.

(Seal) Attest: E. A. CORNELL, Secretary of State.

Kentucky.—*State Progress Commission Submits Report to Legislature.*—We are in receipt of a copy of the first detailed report of the Kentucky Progress Commission, created by an Act passed in 1928, to the 1930 session of the Legislature, and which recounts in full the activities and plans of the Commission up to date to carry out proposed improvements and to disseminate information regarding the State's attractions and resources. A complete analysis is presented in interesting fashion.

New Hampshire.—*Legislature Convenes in Special Session.*—Called in special session by Gov. Charles W. Tobey to consider what are reported to be radical changes in the taxation statutes, the 1929 Legislature convened on Feb.18. According to report, by a tacit agreement only bills relating to taxation will be submitted by the Committee on Rules. A Concord dispatch to the New York "Times" of Feb. 19 reads as follows:

With the opening to-day of the special sessions of the State Legislature, two tax programs were introduced into the House of Representatives.

One sponsored by the Recess Tax Commission provides for a tax on personal incomes and a tax against electric and gas utilities and corporations. The Recess Tax Commission's program also provides for an exemption from taxes of growing timber and finished goods, which are now classed as stock in trade.

The other measure introduced by Eliot Carter of Nashua eliminates ax on incomes, but provides for tax exemption of manufacturers' finished product and standing timber. It will, if adoped, tax utilities.

A tax of 2% will be levied against income and corporations according to the Rexcess Tax Commion's plan. Tax against utilities will be at State rate, which is about $28 per thousand.

This is the fourth special session of the Legislature which has been held in 150 years.

New York City.—*Legislature Passes Bill Re-opening City Budget.*—On Feb. 20 both houses of the State Legislature passed the bill to permit New York City officials to re-open the 1930 budget for the insertion of an appropriation of not to exceed $5,000,000 to equalize salaries in the Police and Fire Departments, without opposition in either branch of the Legislature. The bill was signed immediately by Governor Roosevelt.

New York City.—*Comptroller Berry Issues Statement on City's Financial Soundness.*—Comptroller Charles W. Berry has recently issued a lengthy statement in which he enumerates six reasons why the city can never be put in an embarrassing financial position and then undertakes to analyze the reasons in detail. The statement furnishes a comprehensive outline of the basic structure of the city's credit standing and voices the conviction that New York City enjoys a splendid financial status.

New York State.—*Bill Introduced to Legalize Whiteface Mountain Bonds.*—A bill was introduced in the Senate on Jan. 21 by Mr. Brereton (S. No. 253) (Int. 248) which provides that bonds issued for the construction of a State highway in Essex County be legal investments for savings banks and trust funds in the State. The text of the bill reads as follows:

AN ACT to amend chapter four hundred and twenty of the laws of nineteen hundred twenty-nine, entitled "An Act to provide for the construction by the State of a State highway in Essex County leading from Wilmington to the top of Whiteface Mountain, and making an appropriation therefor," in relation to the sale of securities for the financing thereof.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Section seven of chapter four hundred and twenty of the laws of nineteen hundred twenty-nine, entitled "An Act to provide for the construction by the State of a State highway in Essex County leading from Wilmington to the top of Whiteface Mountain, and making an appropriation therefor," is hereby amended to read as follows:

Sec. 7. The money needed for such work, above the amount appropriated by this Act, shall be furnished to the State by the commission, and may be either contributed by the commission or its members or raised on its own obligations, secured by the pledge of its revenues and tolls arising out of the use of such highway. *The obligations which may be issued by the commission for the construction of the highway mentioned in this Act are hereby made securities in which all public officers and bodies of this State, and of its municipal subdivisions, all insurance companies and associations, all savings banks and savings institutions, including savings and loan associations, executors, administrators, guardians, trustees and other fiduciaries in the State may properly and legally invest the funds within their control.* Not more than twenty-five thousand dollars of the money appropriated by this Act shall be available, until the Commission shall have provided and deposited with the Comptroller at least twenty-five per centum of the difference between the amount appropriated and the amount needed for such work according to such estimates, together with the Governor's certificates provided for in Section 5. A copy of such estimates shall be filed with the Superintendent of Public Works, and he shall certify the amount of such estimates to the Comptroller. The Comptroller shall be the custodian of such money and shall deposit the same in a bank or banks in which he is authorized by law to deposit State moneys. He shall pay out such moneys on the requisition of the Chairman of such Commsision, and may make advancements, as needed. Vouchers therefor shall be subject to the Comptroller's audit.

Sec. 2. This Act shall take effect immediately.

Explanation.—Matter in *italics is new*; matter in brackets [ ] is old law to be omitted.

Assembly Bill to Repeal Park Land Act Introduced.—The following bill (A. No. 477, Int. No. 462) was introduced in the Legislature on Jan. 27 by Mr. Downs:

AN ACT to repeal chapter eighty-seven of the laws of nineteen hundred six, entitled "An Act to authorize the towns of Suffolk County to acquire lands for park purposes, and to issue bonds therefor," relating to issuance of bonds for the acquisition of lands for park purposes.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Chapter eighty-seven of the laws of nineteen hundred six, entitled "An Act to authorize the towns of Suffolk County to acquire lands for park purposes, and to issue bonds therefor," is hereby repealed.

Sec. 2. This Act shall take effect immediately.

Newburgh, N. Y.—*Charter Amendment Proposed in Legislature.*—The following bill was introduced in the Senate on Jan. 31 (S. No. 530, Int. 511) by Mr. Baumes:

An Act, to amend chapter 590 of the laws of 1917 as amended, entitled "An act to provide a charter for the City of Newburgh," in relation to excluding refunding bonds from the limitation of bonds which may be issued in any one year.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

"Section 1. Section 130 of chapter 590 of the laws of 1917, entitled 'An act to provide a charter for the City of Newburgh,' as last amended by chapter 357 of the laws of 1919 is hereby amended to read as follows:

"§ 130. All bonds issued by the city other than revenue bonds or certificates of indebtedness issued in anticipation of the receipt of taxes or to secure temporary loans shall be serial bonds, payable in annual installments as nearly equal as the council shall decide to be practicable and expedient, except bonds issued to provide the supply of water. No installment of any improvement bond shall run for a longer period than the estimated life of the improvement for the cost of which it was issued, as determined by the council. Bonds issued to provide the supply of water may be bonds running not to exceed 20 years, in which case a sinking fund shall be created on the issuing of the said bonds, for their redemption, by raising annually a sum which will produce an amount equal to the sum of the principal and interest of said bonds at their maturity; or, in the discretion of the council, bonds issued to provide the supply of water may be serial bonds running not longer than the estimated life of the improvement for the cost of which they are issued, as determined by the council, payable in annual installments as nearly equal as the council shall decide to be practicable and expedient. Any bonds issued to provide the supply of water may be in part 20-year sinking fund bonds as hereinbefore provided and in part serial bonds as hereinbefore provided.

"The power of the city to issue bonds is limited in amount to $150,000 in any one year. But this limitation shall not apply to revenue bonds or certificates of indebtedness issued in anticipation of the receipts of taxes to secure temporary loans; *or to serial refunding bonds issued and sold to provide money to pay up and retire outstanding and existing bonds other than serial bonds when sufficient funds are not available and adequate provision has not been made for their payment when they become due*; or to bonds issued with the approval of the resident taxpayers as provided for in section 103 of this act.

"§ 2. This act shall take effect immediately.

Explanation.—Matter in *italics* is new; matter in brackets] is old law to be omitted.

Rhode Island.—*Resolution Introduced to Create Investigation Committee on Banking Practices.*—We are in receipt of a communication from Grace M. Sherwood, Legislative Reference Director, bearing date of Feb. 8, calling our attention to House Bill No. 674, which is a resolution creating a special legislative committee of the General Assembly to investigate the banking practices in the State. The text of the resolution reads as follows:

Resolved, That a joint special legislative committee, of five members, consisting of the floor leaders of the majority and minority parties, respectively, upon the part of the Senate, and the floor leader and deputy floor leader of the majority party and the floor leader of the minority party, upon the part of the House of Representatives, be and the same hereby is created to investigate the banking practices in this State and for this purpose said committee may question the bank commissioner or the deputy bank commissioner and may call before the committee and examine the presidents, vice-presidents, cashiers and other officers of the several banks and trust companies in this State. Said committee may also inquire from such banks and trust companies the securities held as collateral by such banks and trust companies on Tuesday, Oct. 29 1929, and may further inquire as to the ultimate disposition of such collateral, or the operation of the discount departments of the several banks and trust companies in the months of October and November, 1929. Said commitee shall have full power to subpoena witnesses and to compel the production of such books, papers and documents as will enable it to effectively accomplish the purpose for which it is created. Said committee shall serve without compensation and shall report its findings to the general assembly at the present session.

BOND PROPOSALS AND NEGOTIATIONS.

ABERDEEN, Bingham County, Ida.—*BONDS NOT SOLD.*—The $21,000 issue of not to exceed 6% semi-ann. sewer system bonds offered on Feb. 11—V. 130, p. 1006—was not sold as there was an error in the offering advertisement.

BONDS RE-OFFERED.—Sealed bids will again be received for the purchase of the above bonds by J. E. Toevs, Village Clerk, until Mar. 7. A certified check for 5% payable to the Village, must accompany the bid.

(These bonds were voted at a special election held on Jan. 7.)

AITKIN COUNTY (P. O. Aitkin), Minn.—*BONDS OFFERED.*—Sealed bids were received until 1.30 p. m. on Feb. 21 by H. C. Beecher, County Auditor, for the purchase of a $67,000 issue of 6% semi-ann. refunding bonds.

ALBANY COUNTY (P. O. Albany), N. Y.—*BOND SALE.*—The $1,200,000 4¼% coupon or registered jail bonds offered on Feb. 20—V. 130, p. 1143—were awarded to Barr Bros. & Co. of New York and the New York State National Bank of Albany, jointly, at a price of 101.405, a basis of about 4.15%. The bonds are dated March 1 1930 and mature on March 1 as follows: $20,000, 1931 to 1959 incl., and $620,000 in 1960. The purchasers are re-offering the obligations for public investment at prices to yield 4.10%.

ARKANSAS, STATE OF (P. O. Little Rock).—*NOTE OFFERING.*—Sealed bids will be received until 10 a. m. on Mar. 7 by Ralph Koonce, State Treasurer, for the purchase of a $9,000,000 issue of 4¼, 4½, 4¾ and 5% highway notes. Denom. $1,000 or multiples thereof. Dated Mar. 7 1930. Due on Dec. 7 1930. Purchaser will be furnished with the legal approval of Thomson, Wood & Hoffman of New York, and Rose, Hemingway, Cantrell & Loughborough of Little Rock. The State reserves the right to reject any and all bids and to waive all formalities and to sell by private negotiations any notes for which a satisfactory bid is not offered. The proceeds of this issue is to be used on the State highway system.

ASHTABULA COUNTY (P. O. Jefferson), Ohio.—*OTHER BIDS.*—The following is an official tabulation of the other bids received on Feb. 10 for the $70,000 improvement bonds awarded as 4¾s to Stranahan, Harris

HOUSTON, Harris County, Tex.—*CITY VALUATIONS SHOW LARGE INCREASE.*—The following article on the growth of the city's financial rating appeared in the Houston "Post" of Feb. 18:

"Houston's assessed valuations have increased more than $100,000,000 in the last five years, according to a table of city finance comparisons compiled by H. A. Giles, City Controller, and made public Friday by Mayor Walter E. Monteith.

"On Dec. 31 1929, Houston's assessed valuations totaled $317,075,000 as compared with $215,350,200 on the same date in 1925.

"This gain was reflected in accrued revenues totaling $8,114,638 at the end of 1929 as compared with $5,465,071 on Dec. 31 1925.

"Current expenses of the city totaled $4,651,209 on Dec. 31 of last year as compared with $3,186,499 on the same date in 1925, while general expenses on Dec. 31 1929 totaled $1,840,828 as compared with $1,007,759 on the same date in 1925.

"Houston wound up 1929 with a total indebtedness of $32,496,663 as compared with $17,787,677 on Dec. 31 1925. Of this amount, bonded indebtedness totaled $31,339,009 on Dec. 31 1929, as compared with $18,693,000 on the same day in 1925. Houston's net bonded debt at the end of 1929 was $28,086,551 as compared with $15,924,053 at the end of 1925.

"During 1929, $1,228,993 was placed in the sinking fund as compared with $600,184. Bond retirements in 1929 totaled $1,193,250 as compared with $435,250 in 1925."

HOUSTON COUNTY (P. O. Crockett), Tex.—*BOND ELECTION.*—The Commissioners Court has ordered an election to be held on Mar. 22 to decide upon the issuance of bonds in the sum of $1,450,000 to provide for the hard-surfacing of all the State and Federal highways in the county omitting but three road districts and a few heavily bonded levee districts.

MOXLEY SCHOOL DISTRICT NO. 16 (P. O. Louisville), Jefferson County, Ga.—*BOND DETAILS.*—The $2,000 issue of 5% school bonds that was reported sold—V. 130, p. 1146—was jointly purchased by two local investors at a price of 95.00, a basis of about 6.06%. Due 200 from Apr. 1 1930 to 1939, incl.

MURPHY, Cherokee County, N. C.—*BOND OFFERING.*—Sealed bids will be received until 7.30 p. m. on Mar. 6, by H. A. Fain, Town Clerk, for the purchase of a $40,000 issue of 6% semi-annual water and sewer refunding bonds. Dated Apr. 1 1930. Due $2,000 from 1932 to 1948, and $3,000, 1949 and 1950. A certified check for 2% of the bonds bid for, payable to the Town Clerk, is required.

MURRAY (P. O. Salt Lake City), Salt Lake County, Utah.—*BOND SALE.*—A $75,000 issue of 5% school bonds has recently been purchased by the Central Trust Co., of Salt Lake City, for a premium of $29, equal to 101.37, a basis of about 4.86%. Due from 1935 to 1949, incl.

NASHUA, Hillsborough County, N. H.—*TEMPORARY LOAN.*—The First National Old Colony Corp., of Boston, on Feb. 18 was awarded a $150,000 temporary loan at a 4.27% discount. The notes are dated Feb. 20 1930 and mature on Dec. 2 1930. S. N. Bond & Co., of New York, the only other bidders, offered to discount the loan at 4.38%.

NAZARETH SCHOOL DISTRICT, Northampton County, Pa.—*BOND OFFERING.*—C. J. Knauss, Secretary of the School Board, will receive sealed bids until March 18 for the purchase of an issue of $150,000 4½% school bonds. Interest payable semi-annually.

NEWARK, Essex County N. J.—*BOND SALE.*—The following issues of 4½% coupon or registered bonds aggregating $10,670,000 offered on Feb. 18—V. 130, p. 1011—were awarded to a syndicate composed of the Bankers Company of New York, the Guaranty Company of New York, Roosevelt & Son, Estabrook & Co., E. H. Rollins & Sons, R. L. Day & Co., Barr Bros. & Co., Inc., Kountze Bros., George B. Gibbons & Co., Inc., Dewey, Bacon & Co., H. L. Allen & Co., Graham, Parsons & Co., Curtis & Sanger, Robert Winthrop & Co., Hannahs, Ballin & Lee, and Edward Lowber Stokes & Co., all of New York, at various prices as shown below. Although bids were asked for bonds totaling $10,800,000, only $10,670,000 were awarded as the laws of New Jersey stipulate that premiums paid in addition to the par value of the bonds are to be utilized in the reduction of the principal amount offered. The award consisted of:

$2,169,000 water bonds ($2,200,000 offered). Purchasers paid $2,200,401.70, equal to 101.44, a basis of about 4.39%. The bonds mature on March 1 as follows. $50,000, 1931 to 1950 incl., $55,000, 1951 to 1960 incl., $65,000, 1961 to 1969 incl., and $14,000 in 1970.
1,970,000 Port Newark impt. bonds ($2,000,000 offered). Purchasers paid $2,000,249.64, equal to 101.53, a basis of about 4.38%. The bonds mature on March 1, as follows: $40,000, 1931 to 1950 incl., $60,000, 1951 to 1969 incl., and $30,000 in 1970.
1,987,000 street and sewer bonds ($2,000,000 offered). Purchasers paid $2,000,444.88, equal to 100.67, a basis of about 4.42%. The bonds mature on March 1 as follows: $80,000, 1931 to 1940 incl.; $100,000, 1941 to 1951 incl., and $87,000 in 1952.
1,723,000 public impt. bonds ($1,742,000 offered). Purchasers paid $1,742,905.04, equal to 101.15, a basis of about 4.40%. The bonds mature on March 1 as follows: $42,000, 1931; $50,000, 1932 to 1947 incl.; $60,000, 1948 to 1961 incl., and $41,000 in 1962.
1,629,000 school bonds ($1,650,000 offered). Purchasers paid $1,650,501, equal to 101.31, a basis of about 4.39%. The bonds mature on March 1, as follows: $40,000, 1931 to 1946 incl., $45,000, 1947 to 1955 incl., $55,000, 1956 to 1965 incl., and $34,000 in 1966.
986,000 city railway construction bonds ($1,000,000 offered). Purchasers paid $1,000,932.24, equal to 101.51, a basis of about 4.38%. The bonds mature on March 1, as follows: $20,000, 1931 to 1950 incl., $30,000, 1951 to 1969 incl., and $16,000 in 1970.
206,000 Passaic Valley sewer bonds ($208,000 offered). Purchasers paid $208,999.54, equal to 101.45, a basis of about 4.38%. The bonds mature on March 1, as follows: $5,000, 1931 to 1962 incl., $6,000, 1963 to 1969 incl., and $4,000 in 1970.

All of the above bonds are dated March 1 1930 and are being offered by the purchasers for public investment at prices to yield 4.25% and 4.30%. With the exception of the 1931 maturity all of the bonds are priced to yield 4.30%. The obligations are stated to be legal investment for savings banks and trust funds in New York, New Jersey and other States and are also said to be exempt from all Federal income taxes. A detailed statement of the financial condition of the City of Newark appeared in V. 130, p. 1147.

NEW MEXICO (P. O. State College).—*BOND OFFERING*—Sealed bids will be received by H. L. Kent, President of the Regents of the Agricultural College, until 11 a. m. on Mar. 12, for the purchase of an issue of $110,000 New Mexico College of Agriculture and Mechanic Arts, Building and improvement, series B bonds. Int. rate is not to exceed 6%. Denom. $1,000. Dated Mar. 15 1930. Due on Mar. 15, as follows: $4,000, 1932 to 1934; $5,000, 1935 and 1936; $4,000, 1937 and 1938; $5,000, 1939 and 1940; $6,000, 1941; $4,000, 1942; $5,000, 1943 and 1944; $6,000, 1945 and 1946; $7,000, 1947 and 1948; $9,000, 1949, and $15,000 in 1950. Prin. and int. (M. & S.) payable at the Chase National Bank in New York City, or at the First National Bank, Las Cruces. A certified check for 5% of the bonds, payable to the Secretary-Treasurer of the Regents of the Agricultural College, must accompany the bid.

NEWPORT, Newport County, R. I.—*TEMPORARY LOAN.*—Salomon Bros. & Hutzler, of Boston, on Feb. 14 were awarded a $100,000 temporary loan at a 4.18% discount, plus a premium of $1.25. The loan is due on Sept. 2 1930. The following is a list of the other bids received:

Bidder—	*Discount.*
R. W. Pressprich & Co	4.23%
S. N. Bond & Co. (Plus $8.00)	4.48%
Faxon, Gade & Co	4.28%
Aquidneck National Exchange Bank & Savings Co	4.335%
Arthur Perry & Co	4.35%
S. N. Bond & Co (Plus $8.00)	4.48%

NEWTON, Jasper County, Iowa.—*BOND SALE.*—An issue of $103,000 funding bonds was recently purchased by Geo. M. Bechtel & Co., of Davenport, for a premium of $141, equal to 100.136.

TORONTO, Ont.—*BOND SALE.*—The $5,590,000 4½% and 5% bonds issued for various purposes, as shown in the table below, offered on Feb. 18 (V. 130, p. 1150), were awarded to a syndicate composed of the National City Co., Dillon, Read & Co., Harris, Forbes & Co., the Guaranty Co. of New York and the Bankers Co. of New York, all of New York, also the Dominion Securities Corp. and the Canadian Bank of Commerce, both of Toronto, at a price of 97.597 (Canadian funds), an interest cost basis of about 5.08%. The purchasers are re-offering the bonds for public investment for payment in U. S. funds as follows: The 4½% bonds, aggregating $3,201,000, are priced to yield 5%; the 5% bonds, totaling $2,389,000, are priced at 100 and interest. The purchasers announced on Feb. 19 that of the entire award only about $500,000 bonds remained unsold.

The offering notice goes on to say that the City of Toronto never renews or refunds any of its obligations, and in conformity to this established practice has since Jan. 1 1919 extinguished $81,000,000 of debt, of which $19,700,000 was before maturity. In addition, debentures amounting to $6,000,000 will mature, this year and provision will be made for the payment of same.

The table below shows the purposes for which bonds are issued, by-laws under which they are authorized, term of years to run and amount of each by-law. Approximate average maturity of the entire offering is 10.7 years.

* Accepted bid.

TORONTO, Ont.—*ADDITIONAL $2,000,000 BONDS SOLD.*—In addition to the award of the above $5,590,000 bonds, The National City Co. syndicate on Feb. 20 exercised its option to purchase an issue of $2,000,000 5% Harbor Commissioners of Toronto bonds, the price paid being 98.95, a basis of about 5.08%. No public offering of this issue was made. The option was secured in accordance with the clause herewith which appeared in the official prospectus soliciting tenders for the $5,590,000 bonds: An option for one month to purchase $2,000,000 Toronto Harbor Commissioners 5% straight term debentures guaranteed by the City of Toronto, dated Aug. 1 1929, maturing Sept. 1 1953, payable both as to principal and interest in Toronto, London, England, or New York, will be given to the successful tenderer for the City of Toronto 4½% and 5% debentures enumerated in this prospectus at the rate for straight term debentures which is the equivalent af the rate paid for the serial debentures.

WELLAND, Ont.—*BOND SALE.*—An issue of $215,000 5% improvement bonds was recently sold to Gairdnew & Co., of Toronto, at a price of 97.24, a basis of about 5.25%. The bonds mature in 30 years. The following is a list of the other bids received:

Plan and Agreement
Dated January 15, 1930

Extension of Time for Deposits Under Plan

The Committee is highly gratified by the response which the stockholders have made to the request for the deposit of stocks in support of the Plan and Agreement for the combination of the assets of your Companies in a single corporation. Nevertheless, the Committee is advised that many stockholders of these Companies for various reasons have found it inconvenient or impossible to deposit their stocks within the time originally limited, to-wit, February 17, 1930.

In view of the number of stockholders involved and the desirability of giving all of them an opportunity to assent to the Plan, the Committee has decided to extend the time for such deposits to and including Saturday, March 1, 1930. All stockholders who have not already deposited their stock are urged to do so within the period above specified.

COMMITTEE ACTING UNDER PLAN AND AGREEMENT,
F. J. GRIFFITHS, Chairman
RICHARD JONES, JR., Secretary
