The Financial Situation

VER since late last summer the President has given evidence of having made up his mind to emphasize recovery rather than reform in the political battles that lie ahead of him during the coming year. Shortly after the adjournment of Congress and the removal of Senator Long from the scene, it will be recalled, he made public his now well-publicized letter to a widely-known publisher in which he announced the arrival of a "breathing spell" for business. He followed this with a number of statements during his journeys across the country, preparatory to his embarkation upon an extended vacation at sea, in which

the same theme with variations was employed. One of his first utterances upon landing again on the soil of the United States made much of increased business activity and profitability.

Further Assurances

This past week has brought at least two further notable items which evidence of this same general line of policy. In a message to the annual convention of the American Bankers Association, delivered on Tuesday by the Chairman of the Reconstruction Finance Corporation, the President asserted with apparent enthusiasm that "evidences of great recovery are at every hand," and that he was "convinced that with co-operation between banks, business and Governmentand mutual confidencewe will soon solve our remaining problems." His further assurance that "all banks are now in a strong position" is of the same tenor, though, of course, it is not likely to carry great weight with those who are familiar with the real sit-On the following uation.

day the Secretary of Commerce, speaking at the annual dinner of the Associated Grocery Manufacturers, Inc., in New York City, expatiated at length upon the President's earlier "breathing spell" assurances, and added a number of statements of his own evidently designed to soothe and encourage business enterprise. The press reported, although with just what authority we do not know, that the words of the Secretary "had the sanction" of the President. At any rate, it is not likely that so important an utterance was made by the Secretary of Commerce without at least implicit assurances from the President.

What Other Than Soothing Words?

It is evident that assurances such as these, together with certain other developments to be referred

to later are having an effect upon the public mind. In these circumstances it is of the utmost importance that the business community subject what is taking place to realistic appraisal. What is obviously needed is not soothing words, particularly by public officials with an obvious interest in preaching optimism, but constructive action. Highly generalized assurances and vague pronunciamentos may increase popular confidence-and speculative enthusiasm-but only hard, constructive work can in the nature of the case lay the foundations for sound and lasting recovery. Let us therefore take an inven-

tory not of words but of the

most important single fac-

tor in the current situa-

tion is the Federal budget.

The deficit we have been running, and the unwise

methods that have been in

vogue for financing it, touch the life of the busi-

ness community at almost

every point. Often its ef-

fect is many times magni-

fied by reason of the fact

that it reaches the public

via the commercial banks,

through their power to

bring additional deposits

into being against arbi-

trarily enlarged reserves

arranged in advance by

various governmental pro-

grams. What are the facts

concerning this matter, and

what is the outlook?During

the fiscal year ended June

30 last, total expenditures

amounted to somewhat more than \$7,375,000,000

and the deficit to slightly

more than \$3,575,000,000.

The usual budget esti-

mates for the current fiscal

year set forth expected out-

lays at a little more than

\$8,520,000,000 - a figure

most observers did not at

As every one knows, the

steps taken or promised.

The Embargo Proposal

"Since it [the Federal Government] cannot spend without using the bankable funds of the Nation, it is up to us to declare an em-bargo. We must decline to make further purchases [of Government obligations]. We must declare that we will not finance further spending by the Government until a genuine, honset sincere effect is made by the Federal honest, sincere effort is made by the Federal Government to restore a balanced budget."

This is the so-called embargo proposal of Orval W. Adams of Utah, which attracted such wide attention at the New Orleans con-vention of the American Bankers Association during the sectors of

during the past week. This is, of course, not the first time that suggestions of this kind have been made. Neither is it the first time that the idea has caused heated discussion and been grossly misinterpreted. It is easy enough for those who are inclined more to politics than to common sense to retort that what is thus suggested is that the banks exert their power to make themselves dictators to the National

suggested is that the banks exert their power to make themselves dictators to the National Government and therefore to the people of the country. So interpreted, it is of course likely to stir popular resentment. But what Mr. Adams and the others have been suggesting is not that, but is merely that the banks henceforth refuse to permit themselves to be used as instruments by means of which the Federal Government issues the modern equivalent, or something very near it, of fiat currency wherewith to waste the Nation's substance in riotous living. When stated in this way the proposal ap-

very hear it, of flat currency wherewith to waste the Nation's substance in riotous living. When stated in this way the proposal ap-pears in an entirely different light. Why should the banks of the country wish to act as printing presses for the Treasury? Naturally, we are fully aware of the practi-cal difficulties in the way of giving effect to suggestions of this kind. Concerted action among many thousands of banks, indepen-dent except indeed for Government owner-ship and control, is difficult of achievement. ship and control, is difficult of achievement. But whether "academic" or "visionary," of

or whatever else, the suggestion, in our opinion, is sound in economic theory. We/should like is sound in economic theory. W to see it given practical effect. P.3161 ANT

> the time believe would be reached-and the deficit at more than \$4,528,000,000. In a statement made public at the end of September, the President revised these estimates downward, the result being outlays \$7,752,000,000 and the deficit \$3,382,000,000. These latter figures are, of course, still largely estimates and may need further revision, particularly if the courts finally make it impossible to collect processing taxes now being withheld pending final adjudication of the law under which they are being levied. But they are perhaps the best available at present.

The Budget

Press dispatches emanating from Washington on Wednesday asserted that the President had issued informal but definite orders that Federal disbursements

to be included in next year's budget must be reduced by \$500,000,000. This would leave expenditures at some \$7,252,000,000, or less than \$125,000,000 below actual expenditures during the fiscal year ended June 30 last. Washington reporters, who apparently had obtained their information from what they evidently believed to be reliable, if not official, sources, naturally made much of this proposed reduction in expenditures, some of them asserting that this action on the part of the President would "place the budget in a position to be balanced" during the fiscal year 1938, since an increase in receipts expected during next year would enlarge revenues, so it was said, by some \$500,000,000, thus reducing the deficit during the fiscal year 1937 by some \$1,000,000,000, to \$2,382,-000,000.

Unfortunately, however, the ink was hardly dry on these reports before word was forthcoming, apparently from official quarters, that the President had reached no such decision and would not make up his mind about the size of funds to be asked of Congress until about Jan. 1. The business community is thus left to guess whether the earlier reports were merely "trial balloons" sent up to test the air currents, which proved not to be to the liking of the President, or whether some other explanation of these earlier assurances is needed. At any rate, this seems to leave the budgetary plans of the Administration just about where they have been for a good while past-beyond the ken of ordinary man. Thoughtful business men are not likely to feel that they have received dependable assurances of really sound conditions until they have concrete evidence of greater economy in Washington.

The Banking Situation

IN IMPORTANCE second only to the budget, and closely related to it, is the banking situation. As long as the deficit continues in proportions approximating those of the past year or two, there is no hope of sound credit and monetary conditions. Either the Treasury will succeed in financing the deficit by obliging the banks to absorb it, thus bringing the banks constantly nearer the point where another general breakdown is unavoidable, or it will not so succeed, in which case fiat money of one sort or another will probably be our fate. But even if the budget were brought into balance as promptly and as vigorously as possible, careful control of the credit situation would still be essential, so enormously have public policies of the past enlarged both bank reserves and bank deposits.

In other circumstances, the task of caring for this situation would naturally and normally fall to the lot of the bankers themselves. These latter to-day, however, are largely helpless in the face of the existing situation. In the first place a very substantial proportion of the banks of the country are now for all practical purposes owned by the Reconstruction Finance Corporation. In the second, control of Federal Reserve policies lies in the hands of the President in fact if not in theory. In the third, the existence of the huge so-called gold and silver profits in the Treasury places in the hands of the Federal Government an instrument with which it could counterbalance and render of no effect almost any action taken by the Reserve System. Lastly, huge bank deposits now in possession of private citizens and corporations present a danger of the first magnitude, a danger that can really be eliminated only

by action on the part of the banks which would reverse the process by which these deposits were created-namely that of not only refusing to take up more Government obligations but actually disposing of large blocks of those already on hand.

No Evidence of Effective Action

What evidence is there that the political authorities in Washington have become really conscious of this situation or have reached any determination to deal with it vigorously and wisely? Absolutely none that we were able to discover. Opinions, apparently originating in Washington, have been confidentially expressed where it was thought they might have a good effect that excess reserves ought to be drastically reduced. Just where this "movement," if it can be termed that, actually originated we have no way of knowing, but at best it is a poor substitute for definite and courageous action in a situation that cries unto heaven for directness, courage and wisdom.

Meanwhile the President himself has, both in his message to the American Bankers Association and in a recent informal talk with the press, renewed his urgings that the banks adopt a more liberal attitude in lending. He would also have them reduce interest rates, notwithstanding the fact that rates are now so low that according to the best of authority a great many banks are unable to do more at best than about meet operating expenses out of ordinary operations, and thus can make no progress whatever in getting out of debt, or what amounts to that, to the Reconstruction Finance Corporation. What the President ought to be doing, in addition to instituting budgetary reform, is reducing excess reserves and bank deposits of which we have entirely too much at present. What appears to be his attitude toward such matters is much more likely to stimulate an unhealthy and unwholesome spurt to be followed by disaster than it is to encourage healthful business progress.

Open Resistance Encouraging

It has been a source of considerable encouragement to find that various organizations of business men have of late been much more inclined than they were formerly to see some of these things in their true light and to give forthright expression of their views on the subject. There have been two or three notable instances within the past week. Perhaps the most important of them is found in what is described in the headlines as the rebellion of the membership of the American Bankers Association against the regular nominee for the second vice-presidency of that body. In the circumstances, the views of those who deeply regret the incident can of course be understood. Factional difficulties which have really existed close beneath the surface in the Association for a year or two past, and which came very close to an open outbreak a year ago, will not be reduced by what occurred in New Orleans. No doubt to many it seems the part of foolhardiness for bankers, so under the thumb of the Government in many instances, to give what must be violent offense to the powers that be. We are nevertheless of the opinion that net gain rather than loss is likely to result in the long run from the refusal of those gathered in New Orleans to pretend views and feelings not real and to fail to let the country know, in no uncertain terms, that they resented what has been done and is being done in Washington when the results of the

policies in question are obviously threatening the very life not only of the banks but of the Nation. The time in our opinion had definitely come for plain speaking and for use of whatever weapons were at hand. The efforts of the Chamber of Commerce of the United States to marshall business opinion behind sanity and foresight and to render it articulate are likewise to be commended, as is also the similar activity of other business organizations. Only in some such ways as these is it possible to make real progress against the sort of demagoguery that has on all too many occasions been characterizing national policies during the past few years.

Federal Reserve Bank Statement

NOT for long is there any interruption in the accumulation of idle credit resources in this country. The condition statement of the 12 Federal Reserve banks covering the week ended Nov. 13 reflects an increase of \$74,713,000 in member bank deposits with the Federal Reserve institutions on reserve account, and the total established a new record. This gain was due mainly to additional gold receipts from Europe, but a modest decline of currency in circulation also aided. The consequence was an increase of \$60,000,000 in excess reserves over legal requirements, and the official estimate of such excess reserves mounted to \$3,050,000,000, which also is a new record. On many occasions, when excess reserves were far under the current level, we have referred to the dangerous credit inflation potentialities of such masses of idle funds. It is obvious enough that the continued increases are exaggerating the danger. Two remedies are ready to hand in the form of the needlessly large open market holdings of United States Government securities and the new provisions for increasing reserve requirements, and it is the clear duty of the Federal Reserve authorities to employ either or both of these expedients without delay.

The condition statement of the 12 Federal Reserve banks, combined, shows only routine changes save for the indications of increased idle funds. Although the monetary gold stocks advanced only \$33,000,000 in the week covered by the report, the Treasury deposited with the gold certificate fund \$61,000,000 of such instruments, raising the total Federal Reserve holdings to \$7,124,156,000. This gain, together with a return of cash from circulation, increased total reserves by \$71,176,000 to \$7,377,336,000 on Nov. 13 against \$7,306,160,000 on Nov. 6. Federal Reserve notes in actual circulation fell slightly to \$3,562,-087,000 from \$3,563,254,000. Member banks' deposits on reserve account moved up to \$5,745,948,000 from \$5,671,235,000, and as Treasury deposits on general account, foreign bank and other deposits all increased as well, the aggregate of deposits advanced to \$6,072,609,000 on Nov. 13 from \$5,967,-179,000 on Nov. 6. Discounts by the System increased to \$9,066,000 from \$6,801,000, while industrial advances continued their slow climb with an increase to \$32,689,000 from \$32,677,000. Open market bankers' bill holdings were \$1,000 higher at \$4,677,000, and United States Government security holdings fell \$25,000 to \$2,430,172,000.

Corporate Dividend Declarations

INCREASED or resumed dividend declarations by corporate entities have been a prominent feature again the current week. Sears, Roebuck & Co. declared a special dividend of 50c. a share in addition to a regular quarterly of like amount on the common stock, both payable Dec. 16. Eastman Kodak Co. declared an extra dividend of 25c. a share in addition to a regular quarterly dividend of \$1.25 a share on the common stock, both payable Jan. 2; similar payments were made Oct. 1 last. Pennroad Corp. declared a dividend of 20c. a share on the common stock, payable Dec. 28, which will be the first payment since Sept. 15 1931, when a like amount was disbursed. United States Gypsum Co. declared an extra dividend of 50c. a share, payable Dec. 24, and a regular quarterly of 25c. a share, payable Jan. 2, on the common stock. Household Finance Corp. declared special dividends of \$1.221/2 a share on the preference stock and \$1.05 a share on the class A and class B common, payable Dec. 5; regular quarterly dividends of 871/2c. on the preference stock and 75c. on both classes of common also were declared. payable Jan. 15. The Mead Corp. declared a dividend of \$1.50 on account of accumulations on the \$6 cumulative preferred stock, series A; this will be the first distribution on the shares since June 1 1932, when the regular quarterly payment was made. Underwood Elliott Fisher Co. declared a dividend of 621/2c. a share on the common stock, payable Dec. 31, which compares with 50c. a share in each of the five preceding quarters. Kaufmann Department Stores, Inc., declared on Nov. 13 a dividend of 20c. a share on the common stock, payable Dec. 16; same amount was paid last April 27 and Jan. 28. Container Corp. of America declared a dividend of \$19.25 a share on account of accumulations on the 7% cumulative preferred stock, payable Dec. 31, which will clear up all arrearages on the stock as well as provide for the current quarterly dividend. Crown Cork & Seal Co. declared an extra dividend of 50c. a share as well as the regular quarterly of 25c. a share on the common stock, payable Dec. 6. Consolidated Paper Co. declared a quarterly dividend of 25c. a share on the common stock, payable Dec. 1, which compares with 15c. paid in previous quarters.

Government Crop Report

URTHER meddling with the big and important crops of the United States by some of the more ambitious gentlemen at Washington may be abandoned this year. The November report of the Department of Agriculture at Washington was issued this week and it shows some curtailments in the estimates of harvests for this year that will perhaps terminate additional experimentation. The decline in the estimated yield of potatoes attracted most attention. What was now put at 354,000,000 bushels compared with the estimate of Oct. 1 of 366,000,000 bushels; the harvest last year of 385,000,000 bushels, and a five-year average yield, 1928-32, of 363,367,000 bushels. The decline during the past month has been due to early freezing weather in the Western States. When the October estimate was issued the plan was considered by those ruling the Agricultural Adjustment Administration of appropriating some \$5,000,000 of Government funds for the diversion of about one-eighth of this year's yield of potatoes to other uses. It was thought in this way to raise prices. This portion of the crop, or a large part of it, was to be subjected to industrial uses. But Nature has intervened, and prices have advanced from natural causes. This scheme was no part of the Warren Potato Control Act, which has been the subject of some adverse criticism, but which does not apply until next year.

The estimated yield of corn was also reduced in the November crop report. It was now placed at 2,211,-268,000 bushels against 2,213,319,000 bushels in the October report, and a five-year average yield, 1928-1932, of 2,562,147,000 bushels. The average yield of corn was placed at 23.6 bushels per acre this year. The Department states that the important crop sections of the country, excepting the South Atlantic and South Central States, showed increases in production this year ranging from 7 to 23%. "Lower cotton prices in the South," the Department reports, will be helped by the price adjustment payments. These adjusted figures will not appear until the end of the year. Farmers' sales of the principal products this year, the Bureau says, totaled \$4,215,217,000 for the first nine months against \$3,892,052,000 for the same time in 1934 and \$3,234,453,000 in 1933. These figures do not include benefit payments under the AAA control program.

The New York Stock Market

BRISK buying of shares was resumed on the New York stock market this week, after early uncertainty. The business week was short, for the markets were closed on Monday in observance of Armistice Day. When trading was resumed on Tuesday a good deal of profit-taking occurred, and prices slumped rather sharply in all departments. But the upward tendency was re-established on Wednesday, and quotations moved ahead with vigor throughout the latter half of the week. Statements by Administration leaders that business need fear no further governmental meddling contributed to the bullish enthusiasm, but in general the movement appeared to represent chiefly a continuance of the pronounced upswing that started early in the year. Indicative of the current tendency to place an optimistic interpretation on all incidents was a sharp advance on Thursday in response to a Presidential declaration that budgetary economies will be sought by the Administration. Earlier this year the market advanced partly because large Federal expenditures were promised. In view of such circumstances it seems reasonable to assume that speculative fever is beginning to grip the country, and the lack of any corrective action for the advancing total of excess reserves leaves no doubt whatever regarding the responsibility for any such development. Hundreds of new highs for the year were recorded by stock prices in the swift advance of the current week, and trading was active at all times.

The session on the New York Stock Exchange last Saturday resulted in a turnover of considerably more than 1,000,000 shares, but liquidation kept pace with the demand, in view of the extended closing, and net changes were small. After brief firmness early on Tuesday, stocks generally receded, with liquor shares weaker than others because of the belief that the new reciprocal trade treaty with Canada would carry provisions for reduced import levies on Canadian whiskies. A few specialties moved against the trend and closed at better figures. The market was quiet on Wednesday for the first few hours, but a buying wave slowly got under way and toward the end of the session prices moved higher in nearly all groups. Railroad stocks especially were in demand, but industrial issues also

participated, while utility shares joined only moderately in the movement. The upward movement broadened on Thursday, when the turnover was nearly 4,000,000 shares, and the most active session since Feb. 7 1934 was recorded. Industrial stocks of all kinds vied with railway issues in this advance, while utility issues again were laggard, although some gains also appeared in such stocks. Initial trades of 1,000 to 10,000 shares in individual stocks reflected the keen demand and mild profit-taking toward the close modified the gains only a little. The session yesterday was more subdued,, but advances remained the rule in the industrial and railroad divisions. Utility stocks drifted slightly lower.

In the listed bond market only mild reflections of the bullish sentiment on stocks made their appearance. United States Government securities were dull at all times and inclined to lose a little ground, while banks and dealers awaited the terms of the next Treasury financing. Highly-rated corporate bonds showed few changes. Anomalous on Wednesday was a general decline in speculative carrier bonds, while railroad stocks were moving swiftly higher. There was better demand Thursday and yesterday for the carrier issues. Railroad holding company bonds advanced briskly throughout the week, owing to reports of better carrier earnings in some instances. In the foreign dollar bond market movements were small and diverse. Commodity markets were somewhat irregular, but inclined to join the speculative advance in the later sessions of the week. Cotton advanced sharply at times, and most of the grains also did well. In the foreign exchange market gold currencies were under pressure, and large shipments of gold from France were reported daily, while some shipments from other countries also were noted. Sterling exchange was kept within its usual range just above \$4.90 by the British fund.

On the New York Stock Exchange 243 stocks touched new high levels for the year and five stocks touched new low levels. On the New York Curb Exchange 140 stocks touched new high levels and six stocks touched new low levels. Call loans on the New York Stock Exchange remained unchanged at 3/4 %.

On the New York Stock Exchange the sales at the half-day session on Saturday last were 1,166,554 shares; Monday, being Armistice Day and a holiday, the market was closed; on Tuesday, 2,140,010 shares; on Wednesday, 2,047,700 shares; on Thursday, 3,947,950 shares, the heaviest volume of trading for any full session since Feb. 7 1934, and on Friday, 2,937,590 shares. On the New York Curb Exchange the sales last Saturday were 332,850 shares; on Tuesday, 453,505 shares; on Wednesday, 336,770 shares; on Thursday, 580,999 shares, and on Friday, 509,135 shares.

The stock market the present week, after early irregularity, rallied and closed strong on Wednesday, with a sharp rise in prices taking place on Thursday. This advance was attributed to favorable Government pronouncements relating to Federal economies and was interpreted in the light of their attendant effect upon the future of American business. On Friday the market resumed its upward course, and quotations closed higher than for the same day a week ago. General Electric closed yesterday at 40 against 377/8 on Friday of last week; Consolidated Gas of N. Y. at 32 against 327/8; Columbia Gas &

Elec. at 141/4 against 151/4; Public Service of N. J. at 441/2 against 447/8; J. I. Case Threshing Machine at 1093/4 against 1041/2; International Harvester at $64\frac{1}{4}$ against $59\frac{1}{4}$; Sears, Roebuck & Co. at $65\frac{3}{4}$ against 627_8 ; Montgomery Ward & Co. at 375_8 against 361_8 ; Woolworth at 571_2 against 573_4 , and American Tel. & Tel. at 1491/4 against 149. Allied Chemical & Dye closed yesterday at 1631/2 against 1631/2 on Friday of last week; Columbian Carbon at 96 against 100; E. I. du Pont de Nemours at 1421/2 against 1381/2; National Cash Register A at 201/2 against 211/8; International Nickel at 373/4 against 341/4; National Dairy Products at 183/4 against 185/8; Texas Gulf Sulphur at 313% against 313%; National Biscuit at 351/2 against 351/8; Continental Can at 97 against 95; Eastman Kodak at 172 against 166; Standard Brands at 151/4 against 151/8; Westinghouse Elec. & Mfg. at 951/4 against 923/4; Lorillard at 263% against 257%; United States Industrial Alcohol at 47 against 461/4; Canada Dry at 131/2 against 131/4; Schenley Distillers at 521/2 against 523/4, and National Distillers at 313/4 against 327/8.

The steel stocks advanced to higher levels the present week. United States Steel closed yesterday at 491/2 against 47 on Friday of last week; Bethlehem Steel at 4734 against 435%; Republic Steel at 193% against 1834, and Youngstown Sheet & Tube at 3434 against 331/8. In the motor group, Auburn Auto closed yesterday at 371/2 against 37 on Friday of last week; General Motors at 581/2 against 58; Chrysler at 89 against 85%, and Hupp Motors at 234 against 21/8. In the rubber group, Goodyear Tire & Rubber closed yesterday at 21% against 231% on Friday of last week; U. S. Rubber at 141/2 against 147/8, and B. F. Goodrich at 12% against 12%. The railroad shares also record gains for the week. Pennsylvania RR. closed yesterday at 293/4 against 281/8 on Friday of last week; Atchison Topeka & Santa Fe at 523/ against 481/2; New York Central at 253% against 22%; Union Pacific at $101\frac{1}{4}$ against $95\frac{1}{2}$; Southern Pacific at 201/8 against 181/2; Southern Railway at 101/4 against 91/2, and Northern Pacific at 205/8 against 195%. Among the oil stocks, Standard Oil of N. J. closed yesterday at 495% against 491/4 on Friday of last week; Shell Union Oil at 14 against 123%, and Atlantic Refining at 251/8 against 24. In the copper group, Anaconda Copper closed yesterday at 221/4 against 21 on Friday of last week; Kennecott Copper at 28 against 267/8; American Smelting & Refining at 59 against 5734, and Phelps Dodge at 243/4 against 245/8.

Trade and industrial indices assumed a somewhat more favorable cast this week, although the evidence on this score remains somewhat inconclusive as to future trends. Steel-making for the week ending to-day was estimated by the American Iron and Steel Institute at 52.6% of capacity against 50.9% last week and 27.3% at this time last year. The increase of 1.7 points this week amounts to about 3.3%. Production of electric energy for the week to Nov. 9 was reported by the Edison Electric Institute at 1,913,684,000 kilowatt hours as compared to 1,897,-180,000 kilowatt hours in the preceding week and 1,675,760,000 kilowatt hours in the corresponding week of last year. Car loadings of revenue freight for the week to Nov. 9 amounted to 653,525 cars, according to the Association of American Railroads. This is a recession of 27,137 cars from the previous week, but a gain of 58,735 cars over the same week in 1934.

As indicating the course of the commodity markets, the December option for wheat in Chicago closed yesterday at 96% c. as against 96% c. the close on Friday of last week. December corn at Chicago closed yesterday at 60% c. as against 59% c. the close on Friday of last week. December oats at Chicago closed yesterday at 27% c. as against 26% c. the close on Friday of last week.

The spot price for cotton here in New York closed yesterday at 12.35c. as against 11.70c. the close on Friday of last week. The spot price for rubber yesterday was 13.21c. as against 13.25c. the close on Friday of last week. Domestic copper closed yesterday at $9\frac{1}{4}$ c., the same as on Friday of last week.

In London the price of bar silver yesterday was 29 5/16 pence per ounce, unchanged from Friday of last week, and spot silver in New York closed yesterday at 65% c., the same as on Friday one week ago.

In the matter of the foreign exchanges, cable transfers on London closed yesterday at \$4.921/8 as against \$4.925% the close on Friday of last week, and cable transfers on Paris closed yesterday at 6.583/4 c. as against 6.587/8 c. the close on Friday of last week.

European Stock Markets

PRICES of securities moved irregularly this week in the stock markets of the leading European financial centers. There was little activity at London, Paris or Berlin, as there was uncertainty in every case regarding internal political developments and their possible effects on securities. Armistice Day caused a suspension of trading at Paris, and it minimized the dealings at London. The national election on Thursday in Great Britain occasioned mild uncertainty and also tended to keep dealings to small levels. Possibilities of international difficulties were kept in mind by traders and investors in all European centers, but there was no acute disturbance on this account. The French internal situation, on the other hand, caused intense concern everywhere. A capital flight of large proportions took place from France as open debate developed there regarding the advisability of currency devaluation. Gold moved from Paris toward New York on all available vessels and the Bank of France found it advisable on Thursday to raise its discount rate to 4% from 3%. But the other gold currencies were not affected. Gold reserves of the Bank of The Netherlands increased and that institution was able on Tuesday to announce a reduction of its discount rate to $3\frac{1}{2}\%$ from 4%. No better illustration of the confused state of European financial affairs could be cited than these contrary actions in the two chief countries that still are maintaining the old gold standard. Trade and industrial reports from Europe indicate continued good activity in England and Germany, but the French position remains unsatisfactory.

The London Stock Exchange reflected from the beginning of the week the restraint occasioned by the impending national election. Trading on Monday was quiet, with British funds slightly irregular. Industrial issues were in demand and most international securities also moved forward, but a sharp decline appeared in Far Eastern issues owing to the thickening troubles in that part of the world. In another quiet session on Tuesday, small gains were recorded in British funds, but home rail issues eased. Industrial stocks were irregular, with more losses than gains, while other departments of the market likewise reflected the general uncertainty. Interest in securities increased modestly at London on Wednesday, owing to the general realization that the Conservatives would retain an ample margin for control of the House of Commons in the election. British funds reflected increased investment buying and home rail issues also improved. There were numerous good features among the industrial securities, while international shares came in for moderate support. Business improved on the London market while the election was in progress on Thursday. British funds showed small gains and most industrial issues also moved higher, but home rail stocks suffered from mild liquidation. Anglo-American trading favorites were in quiet demand. Election results gave ample assurance that Conservative rule will continue, and the market responded yesterday with a sharp advance in all groups of issues. Trading was active.

The Paris Bourse was closed on Monday in formal observance of Armistice Day. Trading on Tuesday was dull, but the tone was good owing to the general relief that no pronounced political disturbances occurred during the celebrations of the previous day. Rentes improved a little, while French bank, utility and industrial stocks moved irregularly but in a small compass. The internal political situation impressed the Bourse unfavorably on Wednesday and rentes dropped on persistent liquidation. French equities showed no changes of any consequence, but international issues were in demand throughout the session and some good gains were recorded in that group. Gold losses by the Bank of France and the need for increasing the discount rate created an unfavorable impression on Thursday. A downward movement developed which affected rentes, French equities and international securities alike. Shares of the Bank of France moved against the trend, owing to the rate advance and the increased earnings thus indicated. Small gains were recorded in quiet dealings at Paris yesterday.

Trading on the Berlin Boerse was dull in the initial session of the week, with investment interest almost completely lacking. The general atmosphere was one of uncertainty and pessimism, and prices drifted lower on the modest offerings. Recessions were mostly fractional, but some speculative favorites fell 2 to 3 points. An increase of trading was noted on Tuesday, possibly because complaints were made that most transactions in securities are taking place privately in Berlin, leaving the Boerse brokers with little to do. Prices continued to drift to lower levels, with movements again small. The tone improved on Wednesday, although activity was less pronounced than in the previous session. Small gains were recorded in industrial stocks, electrical and shipping shares. No interest was taken in fixedinterest issues. Trading on Thursday was brisk and the improvement was extended. Gains of 1 to 2 points appeared in the heavy industrial stocks, while issues in other groups showed comparable advances. The upward movement was continued on a modest scale yesterday.

Trade Treaty with Canada

T^{RADE} relations between the United States and Canada received brief but thorough consideration during a visit to the White House in Washington by the new Canadian Prime Minister, W. L. Mackenzie King, and joint announcements in Wash-

ington and Ottawa last Monday revealed the virtual conclusion of a new trade agreement in the series negotiated at Washington under the special reciprocal tariff bargaining powers granted to the President by Congress. President Roosevelt made the disclosure of rapid progress in the trade negotiations between the two countries in the course of an Armistice Day address. The new treaty, the President said, "will eliminate disagreements and unreasonable restrictions and thus work to the advantage of both Canada and the United States." Even before the details of the arrangement could be made known, the treaty was hailed generally in the United States as a long step toward that increase of international trade which all observers believe necessary for complete recovery from the depression. In Canada, also, the announcement was regarded with quite general satisfaction. At various times in the past genuine tariff reciprocity has been sought between the United States and Canada, and the new treaty tends in that direction. Conclusion of the agreement stimulated interest in the several additional treaties now under negotiation.

Prime Minister Mackenzie King was elected recently in Canada on a platform that called for better trade relations between Canada and the United States, and he lost no time in moving toward that end. His predecssor, R. B. Bennett, negotiated the accord with Britain for tariff concessions under the Empire pacts, and Mr. Bennett threatened some months ago to curtail Canadian imports from the United States in order to achieve a trade balance. It is, therefore, a vast change for the better that Prime Minister Mackenzie King introduced, so far as the United States is concerned. President Roosevelt received his Canadian visitor on Nov. 7, and it appeared the next day that an exceptionally broad and inclusive trade pact was under consideration in the conferences of the Canadian and United States political heads. Prime Minister Mackenzie King returned hurriedly to Ottawa last Sunday and promptly placed the results of his Washington journey before the Cabinet there at a special meeting. The reaction in Ottawa obviously was favorable, for announcements followed in both capitals on Monday that the accord had been concluded. The impression prevailed in Washington, Tuesday, that conclusion of the treaty with Canada will stimulate the negotiations with other countries and perhaps lead to the conclusion of several additional pacts by the end of this year. Reciprocal trade treaties now are under discussion with Spain, The Netherlands, Switzerland, France, Honduras and Guatemala, while conversations regarding a similar treaty are expected to start soon with Mexico.

American Aims

PRESIDENT ROOSEVELT utilized the occasion of Armistice Day observances to proclaim once again the ineradicable determination of the American people to avoid participation in any international conflict. Not only because of American experiences in and after the World War, but also on account of the skillful propaganda now being waged in Europe for a new American entanglement in the affairs of that continent, it would be impossible to place too much emphasis upon such declarations as the President made before a group of 5,000 war veterans gathered in the Arlington National Cemetery. "The primary purpose of this nation is to avoid being drawn into war," he said. It seeks also in every practicable way to promote peace and to discourage war. Except for those few who have placed or who place temporary selfish gain ahead of national or world peace, the overwhelming mass of American citizens are in hearty accord with these basic policies of our Government, as they are also entirely sympathetic with the efforts of other nations to end war." The United States consistently has endeavored to limit or reduce armaments as a means toward peace, while by definite act and commitment this country has promoted the policy of the "good neighbor" in foreign affairs, Mr. Roosevelt pointed out. But with "disappointment and sorrow," the President confessed that the world's gain thus far has been small. Among the great dangers that confront the future of mankind, he listed continued jealousies between nations, increasing armaments, national ambitions that disturb the world's peace, and waning confidence in the sacredness of international contracts.

Sanctions and Diplomacy

INTERNATIONAL affairs in Europe remained uncertain and confused this week, as the date for full application of League sanctions against Italy approached. The sanctions are to be made fully effective next Monday, and there is no doubt that they will be applied for a short time, at least. Whether they will achieve the aim of isolating Italy commercially is another matter, of course, for important sources of raw materials will remain open to Premier Benito Mussolini in the United States and other countries not parties to the League arrangements. The Austrian Government on Tuesday modified its stand against sanctions by explaining that it backed the League "fully" and had placed an embargo on the export of war materials. It has been pointed out many times that Italy manufactures all the war materials necessary for the conflict with Ethiopia, and the Austrian move is little more than a gesture. The German Government declared on the same day that it would not permit the exportation of a long list of metals and foodstuffs, but this seems to be a matter of safeguarding German supplies of commodities considered essential in that country. Significantly, coal and other basic commodities were omitted from the list.

Although the League sanctions may not prove very effective in a practical sense, their imminence caused increasing bitterness and resentment in Italy this week. The Italian Government last Monday sent notes to all States backing the sanctions. In these communications the threat was made that "consequences" will follow each individual attempt at a trade boycott of Italy. Among the League States the proposal was considered of making a collective reply to the Italian communication, but the French Government opposed this idea. In London, little attention was paid to the Italian threat of reprisals. Rome reports state that hostile demonstrations are planned next Monday against the League member States that have agreed to apply sanctions. There are indications, meanwhile, that the Italian authorities have made good use of the period of grace granted so mysteriously by the League before making the sanctions effective. It is reported that heavy purchases of necessary raw materials have been in progress, and it may be assumed that the gold pavments necessary have seriously depleted the metallic stocks of the Bank of Italy. The customary condition

statement of the Bank was lacking this week, and some dispatches suggest that no further condition statements or Italian Treasury statements will be issued for the duration of the crisis.

Diplomatic conversations were carried on in a dozen directions in Europe, as the date for applications of sanctions approached. The trend of such talks is far from clear, but it is evident that they include all phases of the European scene and not merely the Italian war of aggression and its immediate consequences. The persistent rumors that Great Britain would modify its anti-Italian stand after the British elections were denied by Foreign Secretary Sir Samuel Hoare, last Saturday. But direct conversations between British and Italian representatives were in progress all this week. Results of the discussions were kept secret, but officials in Rome were said to feel confident that a solution soon will be found for the implied threat of the British fleet concentration in the Mediterranean and the Italian troop concentration in Libya, on the border of Egypt. The extent of the current reconsideration of European affairs is perhaps best indicated by negotiations between France and Germany regarding the understood desire of Chancellor Hitler for a free hand in Eastern Europe. The French Premier, Pierre Laval, is known to feel that French safety might be safeguarded in this manner, and a widespread debate now is being waged in France regarding the advisability of abandoning the Franco-Soviet agreement.

Fighting Begins in Ethiopia

Now that Italian lines have been far extended in Ethiopia, both in the north and the south, guerilla operations against the invaders seem to be increasing and the first genuine skirmishes of the war were reported this week. The northern Italian armies, advancing from Eritrea, cautiously moved onwards from Makale while attempts were made to consolidate the territory covered during the six weeks of slow travel. It is generally believed the Ethiopian resistance on this front will start when the Italians are about 40 miles south of Makale. Already one or two attempts to cut the Italian lines of communication have been reported, and bloody encounters resulted. The Italian forces moving northward from Somaliland made spectacular gains early in the week. After a brief struggle Gorahai was taken and Rome stated last Sunday that on outpost had reached Daggah Bur. The fall of the latter place was denied by the Ethiopian Government. Announcement was made at Addis Ababa, Tuesday, that a sharp engagement had taken place at the Anale wells, 30 miles south of Daggah Bur, when a motorized Italian detachment tried to take the watering place. Four Italian tanks and a number of motor trucks fell to the defenders, it was said. Both sides claimed victories on the southern front thereafter, and in all probability this is indicative of increasing contacts and skirmishes. Press correspondents at Addis Ababa reported that the Ethiopians felt no dismay over the Italian advance. Emperor Haile Selassie declared that nothing important is happening as yet, and that real fighting still is a month away.

British Election

RESULTS of the national election held in Great Britain on Thursday were thoroughly in keeping with expectations, and no fundamental change in British external or internal policies is to be anticipated. Conservative Members of Parliament were returned in an overwhelming majority, so that no question can arise regarding the control to be exercised by Prime Minister Stanley Baldwin for the next four or five years. It was estimated yesterday that the Conservatives will have a majority of about 250 in the House of 615 members. This is a marked reduction from the majority of 411 in the last Parliament, but it is ample. The election of 1931, usually called the "panic election," swept the Laborites from power and placed the Conservatives firmly in the saddle. The voting on Thursday reflected a swing back toward the Laborites, who increased their representation sharply, and chiefly at the expense of the Conservatives. Liberal factions, united on the eve of the election, were unable to increase their representation to anything like the degree necessary for making them the official Opposition. Sir Herbert Samuel, leader of one Liberal wing, was defeated in his contest for membership. The Conservatives waged their campaign on a platform of peace, increased armaments and continued support of the League of Nations.

French Deflation

NCREASING political tension in France is noted by all press correspondents in that country, and the omen is a poor one for the program of deflation which Premier Pierre Laval soon must submit to the Parliament for approval. Conservative and radical factions have been tending of late toward ever more violent opposition, and it is symptomatic that Armistice Day observances in France, for the first time since the World War ended, were held separately by the two great rival groups. "Officially it was the past that was being remembered, but in reality it was the future that was being rehearsed," the correspondent of the New York "Times" remarked. There are already some indications that the bitter political rivalry will be carried into the debates on Premier Laval's deflationary decrees, when the Parliament reassembles to enact such decrees into law. The Finance Commission of the Chamber of Deputies has been endeavoring for some weeks to draft the statutes.

M. Laval appeared before the Commission on Tuesday, to protest against amendments to his decrees which would nullify, in good part, the effort to achieve a balanced budget. The Premier debated the problem with the Commission for four hours, and it is noteworthy that a general discussion took place of the advisability of devaluation of the currency. Just before the debate started, M. Laval obtained the approval of the entire Cabinet for his measures, and in the course of the discussion with the Finance Commission he denounced devaluation vigorously as a means for curing French economic ills. Only minor amendments to his deflationary decrees would be acceptable, he declared. The Parliament probably will be called into session late this month for the definitive debate on the problem, and in the meanwhile "nervous capital" in large amounts is moving out of France and chiefly toward the United States.

Egyptian Politics

ACTIVE resentment against British domination of Egypt developed on Wednesday in Cairo, after Nahas Pasha, leader of the Wafd or Nationalist party, stirred a group of 50,000 persons by a frenzied

demand for independence. Groups of students ranged through the city after the meeting was held and riotous disturbances occurred. Shouting their desire for Egyptian independence and their resentment against British spokesmen, the students attacked the British Consulate-General and smashed windows in the building, but no one was hurt in that encounter. Mobs gathered in Cairo and nearby settlements and in several instances the police found it necessary to fire into the crowds. One death resulted on Wednesday and another occurred Thursday, when the rioting was renewed, while scores were injured. The Wafd adherents were especially vociferous in their opposition to Premier Tewfik Nessim Pasha, whose resignation they demanded. Trouble has been brewing in Egypt for some time, partly because British forces were increased several months ago as a precaution against possible Italian attacks from Libya. Feelings ran high on Wednesday as the Egyptians then celebrated "National Independence Day," which is the anniversary of the day in 1918 when Zaghlul Pasha made a ringing demand for independence.

Tension in the Far East

APANESE demands upon China, backed by the threat of further occupation of Chinese territory, continue to occasion ominous incidents and increased antagonism between the peoples of the two countries. The attempt made by a Chinese patriot two weeks ago to assassinate Wang Ching-wei, the pro-Japanese Premier of the Nanking Nationalist Government, apparently released a wave of Chinese sentiment against the Japanese oppressors, and it is now difficult to foresee a peaceful termination of these Far Eastern troubles. The international area in Shanghai and the adjoining native city were thrown into turmoil last Sunday, owing to the overnight murder of a Japanese marine only a short distance from naval headquarters in Shanghai. The culprit was neither apprehended nor identified, but Japanese authorities assumed promptly, and possibly with justice, that the incident was due to the mounting hostility of Chinese against Japan. Rear Admiral Araki, commander of the Japanese naval forces in Chinese waters, declared that Chinese authorities must make immediate satisfactory settlement of what he termed "an act of provocation," and he added that if such satisfaction were not received he would proceed to "take such measures as I may see fit to cope with the emergency." Nearly 2,000 Japanese marines were marched on the same day into the demilitarized area of Shanghai, and there was universal apprehension that another incident might develop similar to that of January 1932, when Japanese forces shelled the unprotected native area in Shanghai and made it a shambles.

Authorities of the international settlement in Shanghai took emergency measures for control of the situation. They rushed ample reserves to the affected area within the settlement and prevented any new outbreaks. But the Chinese of the native city, with their bitter memories of January 1932, streamed into the international settlement in great throngs for protection from any further Japanese assault. Feelings were aroused additionally all this week as Chinese spokesmen in Shanghai and other cities demanded a declaration of war against Japan. Windows of Japanese shops were smashed and Japanese residents of Shanghai were pelted with stones and mud. Additions were made by the Japanese to their landing party, but no sorties were made into the native quarter, and it is possible that the matter will be settled in accordance with the ordinary usages of international intercourse. It is persistently reported from Shanghai, however, that new demands upon China are being formulated by the Japanese authorities. Complete suppression of all anti-Japanese activities in China is said to have been promised by the Nanking Foreign Office in response to Japanese representations, but there is reason to doubt the ability of the Nanking authorities to control the wave of Chinese resentment. The semi-independent war lords in North China, meanwhile, appear to be engaged in a dispute regarding the setting up of an autonomous regime, as urged by Japan, and there are no reliable indications of the outcome. Japanese troops in Manchukuo are reported ready for further invasions of Chinese territory.

Discount Rates of Foreign Central Banks

THE Bank of The Netherlands on Nov. 13 reduced its discount rate from 4% to $3\frac{1}{2}\%$. The 4%rate had been in effect since Nov. 4 1935, at which time it was reduced from $4\frac{1}{2}\%$. The Bank of France on Nov. 14 raised its discount rate from 3%to 4%, at the same time advances on bonds were increased from 4% to 5% and the advances on 30-day bills were raised from 3% to 4%. The 3% discount rate had been in effect since Aug. 8 1935, at which time it was lowered from $3\frac{1}{2}\%$. Present rates at the leading centers are shown in the table which follows: DISCOUNT BATES OF FOREIGN CENTRAL BANKS

Foreign Money Rates

IN LONDON open market discount rates for short bills on Friday were 9-16@ $\frac{5}{8}\%$ as against 9-16@ $\frac{5}{8}\%$ on Friday of last week, and 9-16@ $\frac{5}{8}\%$ for threemonths' bills as against 9-16@ $\frac{5}{8}\%$ on Friday of last week. Money on call in London on Friday was $\frac{1}{2}\%$. At Paris the open market rate remains at $2\frac{7}{8}\%$ and in Switzerland at $2\frac{1}{2}\%$.

Bank of England Statement

THE statement for the week ended Nov. 13 shows another substantial gain in gold holdings amounting to £969,477 and raising the total to a new high of £197,376,683. In each of the 12 preceding weeks new highs were established. As the gain in gold was attended by a contraction of £708,000 in circulation, reserves rose £1,678,000. Public deposits decreased £5,200,000 while other deposits increased £3,366,849. Of the latter amount, £3,307,647 was an addition to bankers' accounts and £59,202 to other accounts. The reserve ratio is up to 38.47% from 36.85% a week ago; last year it was 47.41%. Loans on Government securities fell off £3,740,000 and those on other securities rose £257,875. The latter consists

of discounts and advances and securities which increased £118,948 and £138,927 respectively. The discount rate remains at 2%. Below are the figures with comparisons of previous years:

Bank of Germany Statement

'HE statement dated Nov. 7 for the first quarter of the month shows an increase in gold and bullion of 13,000 marks. The total of gold is now 87,798,000 marks, in comparison with 77,829,000 marks last year and 396,476,000 marks the previous year. A decrease appears in reserve in foreign currency of 76,000 marks, in bills of exchange and checks of 197,374,000 marks, in advances of 23,-630,000 marks, in investments of 182,000 marks, in other assets of 35,115,000 marks, in other daily maturing obligations of 35,860,000 marks and in other liabilities of 1,861,000 marks. The Bank's ratio is now 2.34%, compared with 2.24% a year ago and 12.1% two years ago. Notes in circulation record a loss of 178,925,000 marks, bringing the total of the item down to 3,979,597,000 marks. Circulation last year aggregated 3,651,142,000 marks and the previous year 3,438,716,000 marks. Silver and other coin and notes on other German banks register increases, namely 35,495,000 marks and 4,223,000 marks respectively. Below we furnish a comparison of the various items for three years:

Bank of France Statement

HE statement for the week ended Nov. 8 shows 1 a loss in gold holdings of 667,060,114 francs, bringing the total down to 71,322,732,303 francs. Gold a year ago aggregated 82,164,736,854 francs and two years ago 80,018,475,965 francs. French commercial bills discounted, bills bought abroad and creditor current accounts register decreases, namely 560,000,000 francs, 5,000,000 francs and 191,000,000 francs respectively. The Bank's ratio is at 74.40% as compared with 80.40% last year and 79.60% the previous year. A contraction in note circulation of 761,-000,000 francs brings the total down to 82,544,275,710 francs, in comparison with 80,641,125,170 francs a year ago and 81,526,357,070 francs the year before. The item of advances against securities reveals a gain of 108,000,000 francs. A comparison of the various items for three years appears below:

New York Money Market

EALINGS in the New York money market were quiet this week, with rates unchanged in all departments. Little demand was noted for accommodation, despite the increasing activity in stocks and bonds. Call loans on the New York Stock Exchange held at 34% for all transactions, whether renewals or new loans, while time loans for all maturities up to six months were offered at 1%, with takers few. Commercial paper and bankers' bill rates were continued unchanged. The Treasury sold late last week two series of discount bills at rates that are hardly more than nominal. One series of \$50,000,000 bills due in 124 days was awarded at 0.079% average discount, while another series of \$50,000,000 bills due in 273 days went at 0.143% average discount, both computed on an annual bank discount basis.

New York Money Rates

DEALING in detail with call loan rates on the Stock Exchange from day to day, $\frac{3}{4}$ of 1%remained the ruling quotation all through the week for both new loans and renewals. The market for time money is still in the doldrums, no transactions having been reported this week. Rates are now quoted at 1% for all maturities. The market for prime commercial paper has been fairly strong this week. Paper has been in good supply and the demand has been brisk. Rates are $\frac{3}{4}\%$ for extra choice names running from four to six months and 1% for names less known.

Discount Rates of the Federal Reserve Banks

THERE have been no changes this week in the rediscount rates of the Federal Reserve banks. The following is the schedule of rates now in effect for the various classes of paper at the different Reserve banks:

Federal Reserve Bank	Rate in Effect on Nov. 15	Date Established	Previous Rate
Boston New York Philadelphia Cleveland Richmond Atlanta Chicago St. Louis Minneapolis Kansas City Dallas San Francisco	2 11/2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2	Feb. 8 1934 Feb. 2 1934 Jan. 17 1935 May 11 1935 Jan. 14 1935 Jan. 19 1935 Jan. 3 1935 May 10 1935 May 10 1935 May 10 1935 May 10 1935 Feb. 16 1934	22222222222222222222222222222222222222

DISCOUNT RATES OF FEDERAL RESERVE BANKS

Bankers' Acceptances

TRADING in prime bankers' acceptances has been very quiet this week. Few bills are coming out and dealers' portfolios are practically empty, though the demand has been fairly brisk. Rates are unchanged. Quotations of the American Acceptance Council for bills up to and including 90 days are 3-16% bid and $\frac{1}{8}\%$ asked; for four months, $\frac{1}{4}\%$ bid and 3-16% asked; for five and six months, $\frac{3}{8}\%$ bid and 5-16% asked. The bill buying rate of the New York Reserve Bank is $\frac{1}{2}\%$ for bills running from 1 to 90 days, $\frac{3}{4}\%$ for 91- to 120-day bills, and 1% for 121- to 180-day bills. The Federal Reserve banks' holdings of acceptances increased from \$4,676,000 to \$4,677,000. Open market rates for acceptances are nominal in so far as the dealers are concerned, as they continue to fix their own rates. The nominal rates for open market acceptances are as follows:

	SPOT	DELIVE	RY			
		Days-	-150	Days		Days
	Bid	Asked	Bid	Asked	Bid	Asked
Prime eligible bills	3/8	516	3/8	⁵ 16	1/4	³ 16

, FOR DELIVI	ERY V	VITHIN	THIRTY	DAYS		
Eligible member banks						3/8 % bid
Eligible non-member banks						3/8 % Ed

Course of Sterling Exchange

CTERLING exchange has been exceptionally steady S for a period of four weeks, with day-to-day rates fluctuating within narrow limits. During the past week trading has been extremely dull and all London markets were more or less listless as the entire attention of the country was centered on the general elections. On Monday, Armistice Day, there was no market in New York. The range for sterling this week has been between \$4.915% and \$4.923/4 for bankers' sight bills, compared with a range of between $4.91\frac{1}{2}$ and $4.92\frac{5}{8}$ last week. The range for cable transfers has been between \$4.913/4 and \$4.927/8, compared with a range of $$4.91\frac{5}{8}$ and $$4.92\frac{3}{4}$ a week ago. Sterling is firmer in terms of the French franc owing to the pressure on that unit. The London check rate on Paris had a range this week of from 74.68 to 74.812, compared with a range of between 74.625 and 74.75 last week.

The following tables give the mean London check rate on Paris from day to day, the London open market gold price, and the price paid for gold by the United States:

MEAN LONDON CHE	CK RATE ON PARIS
Saturday, Nov. 9	Thursday, Nov. 1474.702

The return to power of the National Government in the elections on Thursday, with a sizable working majority, was a foregone conclusion. From now on London markets are expected to show greater activity and confidence will be maintained in sterling, as there will be no important change in the Government's financial policies. Currently, sterling is under seasonal pressure and this phase of the market must continue until after the turn of the year. However, owing to the great curtailment of international exchange of goods and services during the past four or five years, the pressure against the pound on seasonal commercial account is of minor importance.

Since 1931 the world's chief financial centers have been under the influence, so far as currency fluctuations are concerned, of the vast movements of uneasy capital from one center to another. At present the outward flow of funds from London and the Continent to the New York security market is the most adverse factor against sterling and other foreign exchanges. The dollar is everywhere in demand. Meanwhile, as for months past, sterling has had an offsetting favorable influence in the extensive purchases of silver in the London open market for account of the United States Treasury. During the past week, however, there has been a sharp drop in Far Eastern offerings of silver in London, so that the offerings required to be absorbed for account of the United States Treasury were of minor importance in their effects on day-to-day sterling quotations.

The movement of gold and funds from London to New York has now attained considerable volume, and the outward flow of gold from Europe to this side since Sept. 9 has exceeded \$546,000,000. Most of this gold has come from France, while that which came from England seems to have been taken almost entirely from private hoardings of gold which had accumulated in London. This movement of funds from London has diminished greatly in the past few weeks and there are again evidences of an increasing demand for open market gold in London for private account which is being left on deposit there. Most of the gold now accumulating for private hoarding in London is for French and other Continental account and reflects to an important extent the nervousness felt with respect to the French situation. In other words, there are signs of a flight from the franc.

In the past two months more than \$150,000,000 of gold has been attracted from private hoards in London to the New York security market. British investors, it would seem, are confident that the rise in Wall Street will continue. The London financial press gives exceptional prominence to the activity of the securities market on this side, and London brokerage firms are issuing special letters concerning American securities to an extent not hitherto experienced there.

The revised condition statement of the reporting member banks in the Federal Reserve System for the week ended Nov. 6 gives more detailed and accurate information on credit conditions here. An important addition to the statement is an item showing deposits due to foreign banks. This information had not been officially reported previously, although much speculation had been made as to their volume. As reported, these balances totaled \$372,000,000 on Nov. 6 and represented an increase of \$249,000,000 over those a year ago. The figures give some idea of the amounts of foreign money which have recently been seeking investment opportunities in New York. The total of such investments must be still greater, as many private accounts are handled directly by brokers and cannot appear as funds due to foreign banks. Practically all the gold that has arrived here was privately owned.

According to the "Wall Street Journal," these foreign deposits to a very substantial degree currently represent balances placed here solely to obtain the benefit of an attractive interest return in connection with transactions in the futures foreign exchange market. It points out: "As an instance, a French bank at the present time could sell spot francs at \$.0659 and cover the commitment in three-months' futures at a discount of 15 points. That discount on an annual basis would be equal to a return of about 9% on the transaction."

The internal business boom in England continues without abatement and well-informed observers feel that it must last for a few years at least. Meanwhile, should there be any improvement in the international exchange of goods and services, British trade would

volume of activity in armament and naval construction and thereby a further enhancement of purchasing power. The National Party is also committed to a road-building program involving an expenditure of £100,000,000 during the next five years and to financial assistance to provide more efficient railway service and to rebuild blighted areas. The program should give large contracts to engineering, steel and cement plants, and stimulate the building trades.

In the six months ended on March 31, 14,357 houses were built in England under State subsidy and 153,062 were erected independently. This compares with 31,043 and 122,247, respectively, in the corresponding period of 1933-34. Preliminary figures supplied by the British Board of Trade show exports for October of £39,865,000, the highest value to be reported for any month in the last five years. The October figures for the ten London clearing banks show an increase of more than £12,000,000 in deposits to a new peak of £2,035,675,000. This accounts in large measure for the cheapness of credit in the London market, as it also reflects the universal confidence in the stability of sterling.

In view of the fact that the British Government wishes to maintain a policy of cheap money, authorities do not expect it to countenance any sharp rise in rates such as might result from an unusual demand for credits for expansion of export trade. On the contrary, it is believed in London that the Government would probably approve an expansion of credits through an expansion of currency, with a two-fold effect: easy money and obviation of necessity for banks to liquidate gilt-edged securities to finance trade. The Bank of England's gold purchases indicate preparations of this nature and further purchases are expected. On Tuesday of this week the Bank of England apparently took all the gold on offer in the open market, being reported to have purchased £522,783 in gold bars. The Bank's gold holdings are now at a new record high, totaling £197,376,683, which compares with £192,638,338 a year ago and with the minimum of £150,000,000 recommended by the Cunliffe Committee. The Bank's note circulation is more than £22,000,000 higher than a year ago, and it is thought that it may expand still further during the holidays.

London open market money rates show hardly any change from day to day. Call money against bills is comfortable at $\frac{1}{2}$ %. Two- and three-months' bills are quoted 9-16% to 5/8%, four-months' bills 5/8% to 11-16%, and six-months' bills 11-16% to 3/4%. Gold on offer in the market this week seems to have been taken chiefly for account of foreign hoarders. On Saturday last there was available £60,000; on Monday, £472,000; on Wednesday, £407,000; on Thursday, £105,000, and on Friday, £212,000. On Tuesday the Bank of England bought £522,783 in gold bars; on Thursday the Bank bought £179,905 in gold bars.

At the Port of New York the gold movement for the week ended Nov. 13, as reported by the Federal Reserve Bank of New York, was as follows:

GOLD MOVEMENT AT NEW YORK, NOV. 7-NOV. 13, INCLUSIVE Exports

Imports \$22,095,000 from France 3,357,000 from Canada 3,258,000 from England 515,000 from Holland 145,000 from Russia

\$29,370,000 total

None

Note-We have been notified that approximately \$500,000 of gold was received from China at San Francisco.

The above figures are for the week ended on Wednesday. On Thursday \$6,666,700 of gold was received, of which \$6,112,200 came from France and \$554,500 from England. There were no exports of the metal, but gold held earmarked for foreign account decreased \$68,300. On Friday \$6,273,000 of the metal was received, of which \$3,497,500 came from France, \$2,437,900 from India and \$337,600 from Russia. There were no exports of the metal or change in gold held earmarked for foreign account.

Canadian funds during the week were quoted in terms of the United States dollar from a discount of 1 3-16% to a discount of 1%.

Referring to day-to-day rates, sterling exchange on Saturday last was firm in exceptionally quiet trading. Bankers' sight was \$4.921/2@\$4.923/4; cable transfers, \$4.925/8@\$4.927/8. On Monday, Armistice Day, there was no market in New York. On Tuesday the pound displayed an easier undertone in a dull market. The range was \$4.915/8@\$4.921/2 for bankers' sight and $4.91^{3}_{4}@$ 4.92^{5}_{8} for cable transfers. On Wednesday the market continued inactive. Bankers' sight was \$4.913/(@\$4.923/s; cable transfers \$4.917/8@\$4.921/2. On Thursday exchange was dull but steady. The range was \$4.913/4@ \$4.921/8 for bankers' sight and \$4.917/8@\$4.921/4 for cable transfers. On Friday sterling was firm and the market more active because of the success of the Nationalist Party in the general elections. The range was \$4.913/4@\$4.92 for bankers' sight and \$4.917/8@\$4.921/8 for cable transfers. Closing quotations on Friday were \$4.92 for demand and \$4.921/8 for cable transfers. Commercial sight bills finished at \$4.917/8; 60-day bills at \$4.911/8; 90-day bills at \$4.905%; documents for payment (60 days) at \$4.907%, and seven-day grain bills at \$4.915%. Cotton and grain for payment closed at \$4.917/8.

Continental and Other Foreign Exchange

RENCH francs have been under heavy pressure since Sept. 9, and in the past two weeks the pressure has been greatly intensified. Since the outward flow of gold from Europe began in the early part of September, approximately \$545,700,000 of gold has been engaged for shipment to New York, of which \$287,400,000 has come from France. Arrivals of gold up to Nov. 13 amounted to \$483,800,000. The current statement of the Bank of France, which covers the week ended Nov. 7, shows an extraordinary decrease in gold holdings of 667,060,114 francs. The forthcoming statement as of the week ended Nov. 14, which will not be published until Nov. 21, is expected also to show a severe decline in gold holdings. On Wednesday of this week it was known, for example, that 170,000,000 francs of gold was withdrawn for shipment to New York and purchases in the preceding few days had been running around 150,000,000 francs. In addition to losing gold to New York, the Bank of France has been shipping gold to Brussels and Amsterdam in response to the weakness of the franc in various foreign exchange markets. Hence there is some alarm over the franc situation in Paris.

To offset the outward flow of gold the Bank of France on Thursday increased its rediscount rate from 3% to 4%. The 3% rate had been in effect since Aug. 8, when it was reduced from $3\frac{1}{2}\%$. In the opinion of market observers the present increase is only a forerunner of a rise which may carry the rate up to 5% or 6%. Last May the Bank of France lifted its rate from 3% to 6% in a week when confronted with a heavy drain of gold created by political difficulties. Since the first of the year France has shipped here approximately \$700,000,000 in gold, an amount which before 1930 would have seemed fantastic. The heavy movement of gold does not reflect an excess of payments due to the United States on ordinary transactions. It is rather the heavy movement of capital to this country, seeking both safety and profit.

The movement of funds from France is due to political uncertainties and to the fear that the franc may suffer devaluation. In addition to the exodus of funds, private hoarders in France are refusing money to the market and it is believed that unless more fortunate circumstances impend, both long- and short-term funds wi'l become dearer. The Government's recent offer of railway bonds yielding around $6\frac{1}{2}\%$ serves to illustrate the complete failure of M. Laval's Government to cheapen long-term money, and the Finance Minister's reiteration that a considerable loan operation is inevitable after the year-end suggests dearer, rather than cheaper, money both for long- and short-term during the next few months.

In contrast to the French situation, the Belgian currency is showing considerable strength and Belgium has been drawing gold from Paris for some weeks. In reviewing the past six months, during which Belgium has operated on a devalued currency, a recent bulletin of the National Bank of Belgium says there has been a 19% rise in wholesale prices and a rise in retail prices of 8% and of 5% in industrial wages. The bulletin states that the improvement in industrial activity which has taken place in that period is mainly internal because of export trade difficulties. Money markets are easy and of the 6,000,000,000 belgas of foreign capital which have entered since devaluation only 1,000,000,000 belgas have been withdrawn. Premier Van Zeeland recently declared that the belga was the surest and most stable of moneys during the recent currency disturbances. The Premier revealed that the exchange equalization fund which had been formed from the gold profit resulting from revaluation of the gold reserves has never been utilized. However, because of the stagnation of the long-term money market he proposes to employ a portion of this profit temporarily to finance public works under an extraordinary budget.

Neither the German mark nor the Italian lira situation show any change from the past few weeks. The currency and credit situation in both Germany and Italy is decidedly unfavorable.

The following table shows the relation of the leading European currencies still on gold to the United States dollar:

New Dollar Parity	Range This Week
	6.58% to 6.59
	16.89½ to 16.92
	8.1016 to 8.1116
	32.51 to 32.53
68.06	67.90 to 67.94
	Parity 6.63 16.95 8.91 32.67

The London check rate on Paris closed on Friday at 74.70, against 74.76 on Friday of last week. In New York sight bills on the French center finished on Friday at $6.58\frac{1}{2}$, against $6.58\frac{1}{2}$ on Friday of last week; cable transfers at $6.58\frac{3}{4}$, against $6.58\frac{7}{8}$; and commercial sight bills at $6.55\frac{3}{4}$, against $6.55\frac{7}{8}$. Antwerp belgas closed at $16.89\frac{1}{2}$ for bankers' sight bills and at 16.90 for cable transfers, against 16.90and $16.90\frac{1}{2}$. Final quotations for Berlin marks were 40.23 for bankers' sight bills and 40.24 for cable transfers, in comparison with 40.23 and 40.24. Italian lire closed at 8.10 for bankers' sight bills and at 8.11 for cable transfers, against $8.09\frac{3}{4}$ and $8.10\frac{3}{4}$. Austrian schillings closed at 18.80, against 18.80; exchange on Czechslovakia at $4.13\frac{3}{4}$, against 4.14; on Bucharest at 0.80, against 0.80; on Poland at 18.84, against 18.84, and on Finland at $2.17\frac{3}{4}$, against 2.18. Greek exchange closed at $0.93\frac{1}{2}$ for bankers' sight bills and at 0.94 for cable transfers, against $0.93\frac{1}{2}$

EXCHANGE on the countries neutral during the war continues to follow trends in evidence for several weeks. The Scandinavian currencies are exceptionally steady in sympathy with the movements of sterling. The Holland guilder situation shows so much strength that the Bank of The Netherlands on Thursday announced a further reduction in its rediscount rate to $3\frac{1}{2}\%$ from 4%. The rate was reduced to 4% from $4\frac{1}{2}\%$ only on Monday of last week. The $4\frac{1}{2}\%$ rate had been in effect since Oct. 21, when it was reduced from 5%, which rate had been operation since Oct. 17, when it was reduced from 6%. The improvement in the position of the Netherlands bank has been continuous since the middle of September. In that month the Bank lost about 10% of its gold reserves. From 600,000,000 guilders on Sept. 9 the Dutch gold stock declined to 536,100,000 guilders on Sept. 30. The Bank's statement on Nov. 11 showed gold reserves of 613,100,000 guilders. The reserve ratio has improved from 62.2% on Sept. 30 to 73.7%. Both the gold and the reserve ratio are the highest since July 22, just before the July cabinet crisis. while the new bank rate is the lowest since July 25.

Bankers' sight on Amsterdam finished on Friday at 67.91, against 67.91 on Friday of last week; cable transfers at 67.92, against 67.92; and commercial sight bills at 67.89, against 67.89. Swiss francs closed at 32.51½ for checks and at 32.52½ for cable transfers, against 32.52 and 32.53. Copenhagen checks finished at 21.97 and cable transfers at 21.98, against 22.00 and 22.01. Checks on Sweden closed at 25.37 and cable transfers at 25.38, against 25.39 and 25.40; while checks on Norway finished at 24.72 and cable transfers at 24.73, against 24.75 and 24.76. Spanish pesetas closed at 13.64 for bankers' sight bills and at 13.65 for cable transfers, against 13.64 and 13.65.

E XCHANGE on the South American countries presents no new features of importance. These currencies are exceptionally steady as the exchange controls endeavor to keep the units in close relation to sterling. Exporters are watching with interest the operation of the unfreezing agreement recently entered into by Brazil and the United States, which affects \$20,000,000 or more of American exporters' funds tied up in Brazil by exchange restrictions. Both Brazil and Argentina are importing more from the United States and there seems to be considerable evidence that in the near future exchanges can be effected for export payments to these countries on a more satisfactory basis.

Argentine paper pesos closed on Friday, official quotations, at 32.80 for bankers' sight bills, against 32.82 on Friday of last week; cable transfers at 327_8), against 327_8 . The unofficial or free market close was $27.15@27\frac{1}{4}$, against $27@27\frac{1}{4}$. Brazilian milreis, official rates, are $8\frac{1}{4}$ for bankers' sight bills and 8.45 for cable transfers, against $8\frac{1}{4}$ and 8.45. The unofficial or free market close was 5.60, against 5.65. Chilean exchange is nominally quoted on the new basis at 5.19, against 5.19. Peru is nominal at 25.32, against 24.91.

XCHANGE on the Far Eastern countries con-E tinues unsatisfactory owing to the complications which have arisen because of the recent sharp declines in silver prices in London. The Chinese Government is experiencing difficulties in its plans for nationalizing silver. Japanese authorities have been strong in condemnation of the plan and it would seem that banks in Tientsin, Peiping, Hankow and Canton are strenuously opposed to the concentration of their silver in either Nanking or Shanghai. In view of this opposition it seems that the Government has decided on a compromise measure to create subcommittees in those cities to supervise the concentration of their silver stocks and the circulation of the unified bank notes issued under the new currency plan. These steps are expected to be facilitated by the fact that the three Government-owned banks have branches in these cities. The entire situation is somewhat complicated and exporters and banks having business with Shanghai are awaiting developments. The Hong Kong Government (British) on Oct. 9 ordered a ban on all exports of silver coins or bullion in another attempt to relieve the currency crisis. The legislative council also announced the establishment of a security fund with moneys to be collected from an issue of new one-dollar notes. The council stated that a proclamation would be issued concerning the coining of new five- and tencent pieces composed of pewter and nickel to offset the shortage of small denominations. Coined dollars are not to be called in.

Closing quotations for yen checks yesterday were 28.65, against 28.79 on Friday of last week. Hong Kong closed at $36\frac{5}{8}@36\ 15-16$, against $35\frac{1}{2}@35\ 13-16$; Shanghai at 29 13-16@297%, against $30\frac{1}{8}$; Manila at 50.05, against 50; Singapore at 57.75, against 57.80; Bombay at 37.17, against 37.21, and Calcutta at 37.17, against 37.21.

Gold Bullion in European Banks

THE following table indicates the amount of gold bullion (converted into pounds sterling at par of exchange) in the principal European banks as of Nov. 14 1934, together with comparions as of the corresponding dates in the previous four years:

Banks of-	1935	1934	1933	1932	1931
England	£ 197,376,683		£ 191,782,245	£ 140.451.771	£ 121,770,967
France a Germany b.	570,581,858 3,303,650			665,867,549 38,195,000	540,642,598
Spain	90,329,000	90,647,000	90,427,000	90,315,000	47,533,150 89,669,000
Italy Neth'lands_	42,575,000 49,066,000			62,687,000 86,240,000	58,918,000 72,033,000
Nat. Belg'm Switzerland			77,501,000	74,650,000	73,080,000
Sweden	21,349,000	15,685,000	14,189,000	89,165,000 11,443,000	53,416,000 11,857,000
Denmark Norway	6,555,000 6,602,000				9,211,000 6,550,000
Total week_	1,132,998,191	1.255.542.133	1.257.816.602	1.274.428.320	1 084 600 711

Prev. week. 1,137,155,545 1,258,221,8141,261,174,432 1,272,228,6161 1,084,600,715 a These are the gold holdings of the Bank of France as reported to the new form of statement. b Gold holdings of the Bank of Germany are exclusive of gold held abroad, the amount of which the present year is £1,086,250.

Foreign Exchange Rates

PURSUANT to the requirements of Section 522 of the Tariff Act of 1922, the Federal Reserve Bank is now certifying daily to the Secretary of the Treasury the buying rate for cable transfers in the different countries of the world. We give below a record for the week just passed:

FOREIGN EXCHANGE RATES CERTIFIED BY FEDERAL RESERVE BANKS TO TREASURY UNDER TARIFF ACT OF 1922 NOV. 9 1935 TO NOV. 15 1935 INCLUSIVE

Country and Monetary		Buying I Val	Rate for Cab ue in Unite	le Transfer d States M	s in New oney	York

National Interest and the General Welfare

In the decision rendered on Nov. 7, at Baltimore, holding the Public Utilities Act of 1935 "invalid in its entirety," Federal District Judge William C. Coleman said, among other things: "The theory upon which this Act is predicated is that public utilities holding companies and their subsidiaries are affected with a 'national public interest.' But under the Constitution there is no 'national public interest' which permits Federal regulation unless the person, corporation or thing affected with such interest is in fact involved directly, not indirectly, in some activity over which the Federal Government, through one or more of the powers delegated to it by the Constitution, has jurisdiction. If the Constitution be construed to permit what the Public Utilities Act aims to accomplish, then Federal authority would embrace practically all the activities of the people, and the authority of the States over their domestic concerns would exist only by sufferance of the Federal Government."

The rebuke which Judge Coleman administered to the Government in the passage just quoted applies to other Federal statutes besides the Public Utilities Act. A considerable number of the Acts in which the policies and methods of the New Deal are embodied affirm, in one phraseology or another, the existence of a "national public interest" as one of the primary reasons for their enactment. The Agricultural Adjustment Act of 1933, for example, declares in its preamble that the disordered conditions in agriculture which it proposes to remedy "have affected transactions in agricultural commodities with a national public interest." The Joint Resolution of June 5 1933, repealing the gold clause, recites in the opening paragraph of its preamble that "the holding of or dealing in gold affect the public interest, and are therefore subject to proper regulation and restriction." One of the purposes of the Act of August 8 1935, regulating inter-State motor bus and truck traffic, is declared to be the establishment of such regulation "in the public interest," while the Guffey-Snyder Coal Act specifically asserts that "the mining of bituminous coal and its distribution by the producers thereof in and throughout the United States are affected with a national public interest," and that the control of production and the regulation of prices are intended to "protect the national public interest therein."

The phrases "public interest" or "national public interest" are not found in the Constitution. An analogous phrase, however, and one often used as if it were synonymous, is "general welfare." The latter phrase occurs twice in the Constitution: first in the preamble, where one of the purposes in establishing the Constitution is declared to be to "promote the general welfare," and later in Section 8, Paragraph 1 of Article I, where Congress is given power "to lay and collect taxes, duties, imposts and excises, to pay the debts and provide for the common defense and general welfare of the United States." This latter is the so-called "general welfare clause" to which allusion is often made.

The first great constitutional debate in our history, although one whose arguments did not become public for many years thereafter, arose over the interpretation of the general welfare clause. In 1791 Washington had before him a bill to incorporate the first Bank of the United States. Strong opposition had been made to the bill on the ground that the Constitution did not authorize Congress to create a corporation, and Washington, in doubt about approving the measure, asked the written opinions of Jefferson, Secretary of State, and Hamilton, Secretary of the Treasury. Jefferson's opinion is the classical statement of the doctrine of strict construction. The power given to Congress, Jefferson declared, was "to lay taxes for the purpose of providing for the general welfare." Congress "are not to lay taxes ad libitum for any purpose they please, but only to pay the debts or provide for the welfare of the Union. In like manner, they are not to do anything they please to provide for the general welfare, but only to lay taxes for that purpose. To consider the latter phrase, not as describing the purpose of the first, but as giving a distinct and independent power to do any act they please which might be for the good of the Union, would . . . reduce the whole instrument to a single phrase, that of instituting a Congress with power to do whatever would be for the good of the United States; and as they would be the sole judges of the good or evil, it would be also a power to do whatever evil they please."

Hamilton's opinion, written with Jefferson's before him, is in turn one of the classical statements of the doctrine of implied or resulting powers. "This general principle," he declared, "is inherent in the very definition of government, and essential to every step of the progress to be made by that of the United States, namely, that every power vested in a government is in its nature sovereign, and includes, by force of the term, a right to employ all the means requisite and fairly applicable to the attainment of the ends of such power, and which are not precluded by restrictions and exceptions specified in the Constitution, or not immoral, or not contrary to the essential ends of political society. . . . If the end be clearly comprehended within any of the specified powers, and if the measure have an obvious relation to that end and is not forbidden by any particular provision of the Constitution, it may safely be deemed to come within the compass of the national authority."

Precisely what the general welfare provision of the Constitution was intended to cover, or may reasonably be held to cover now under changed social conditions, has not, we believe, been decided by the Supreme Court. An attempt to get such a decision was made on Wednesday, by Government attorneys, in a Wisconsin case in which the Home Owners Loan Corporation has been permitted to intervene as "a friend of the Court," the Government counsel contending, it is reported, that the constitutionality of the Home Owners Loan Act of 1933 would be sustained if a "broad view" were taken of the general welfare clause. If Judge Coleman's ruling in the utilities case regarding the limitations of "national public interest" is sustained, however, there seems to be no reason why a similar limitation is not applicable to "general welfare." Substitute the latter expression for the former in the passage from Judge Coleman's decision which we have quoted, and we shall have the sound doctrine that there is no "general welfare" which the Federal Government may foster or regulate unless the person, corporation or action affected or concerned is directly involved in some activity over which the Federal Government is given, by the Constitution, explicit jurisdiction. Any other interpretation would allow the Federal authority, in the words of Judge Coleman, to "embrace practically all the activities of the people," and leave the States to exercise authority over their domestic concerns "only by sufferance of the Federal Government."

The idea that any constitutional limits can or should be set to a definition of general welfare, or that a national public interest can not be appealed to as a sufficient justification for whatever the Federal Government may think fit to do, is obviously far removed from the sweeping claims which the Administration has made. Were it not for the grave crisis in government which Administration policies have brought about, it would be difficult to take seriously the contentions and assumptions which the New Deal has put forward. American agriculture, it has been declared, was in a bad way; the Government, accordingly, must step in and regulate acreage, production, distribution and prices, and tax the consuming public to keep the farmers going and give them a profit. Where in the Constitution is such authority granted? Industry and business, it is said, are suffering from depression, competition is working to their disadvantage and various "unfair" practices are in vogue; the Government proposes to put industry and business under the restrictions of codes, regulate wages, hours and conditions of employment, control the volume of output, and put beyond the pale any business or industry that does not conform. Where in the Constitution has such authority been delegated to the Federal Government by the States? Is there anything in the Constitution which empowers the Federal Government to deal with public utility holding companies and their constituent elements in ways which Judge Coleman denounced as "expressly arbitrary, unreasonable and capricious," or to make the private holding of gold

Digitized for FRASER

or gold coin a crime, or to impose taxes or contract loans for the general relief of unemployment, or to enter into direct competition with private industry or business, or to force employers to accept collective bargaining in wage agreements, or to establish a national system of old age pensions and unemployment insurance, or to buy up submarginal land as an alleged aid to agriculture, or to build houses, refinance mortgages and establish "subsistence homesteads" and rural settlements at Federal expense?

The Constitution of the United States was established for two purposes. It was intended to create a system of government under which the common interests of the people of the several States would be beneficently served, but it was also intended to protect the people and the States against excesses of Federal authority. At no time have the people and the States been more in need than now of the protection which a sound judicial interpretation of the provisions of the Constitution can alone afford. Under the guise of serving a "national public interest" and a "general welfare" the Administration, with the aid of a Congress which it controlled, has assumed that whatever the Constitution did not forbid might lawfully be done. Judge Coleman's decision calls attention sharply to the fact that the jurisdiction of the Federal Government rests, not upon its theories of how the affairs of the people should be managed or what kind of "welfare" should be promoted, but upon specific delegations of authority set out in the Constitution itself. It is no justification of a Federal Act that the Act is thought by the Government to be good; there must be constitutional warrant, directly and not indirectly, for everything that is done. The Tenth Amendment defines the matter conclusively when it declares that "the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively or to the people." Beyond the limits of this declaration, added early as an Amendment to make sure that the principle would not be infringed, there is no "national public interest" or "general welfare" with which the Federal Government may constitutionally be concerned.

War^{*}and Sanctions as "Instruments of National Policy"

The Pact of Paris, commonly referred to as the Kellogg Anti-War Pact, undertook, as between its signatories, to abolish war "as an instrument of national policy." Accepted eventually by most of the nations of the world, it represented the greatest victory that had yet been won by pacifism in its campaign for the "outlawry" of war. The Covenant of the League of Nations, while clearly looking forward to peace as one of its aims, nevertheless recognized war as a possibility and did not formally put it under a ban. The acceptance of the Kellogg Pact, however, was accompanied by conditions and reservations which were soon seen to leave the Pact only a counsel of perfection embodied in an empty form of words. By general agreement, acquiesced in specifically by Secretary of State Kellogg, who with Briand, Foreign Minister of France, had evolved the document, it was understood that the abandonment to which the signatory Powers agreed did not extend to defensive war; and since most parties to wars, whether actually the aggressors or not, have always insisted that they were acting for defense,

and comparatively few wars have ever been open attacks out of hand, no war was likely to occur to which the prohibition of the Pact would inescapably apply. Moreover Great Britain, while accepting the Pact, specifically reserved its right to deal in its discretion with certain unnamed "spheres of influence" over which it claimed and exercised authority, and it was also generally understood that the Monroe Doctrine, long an element of American foreign policy, was not affected. As legal authorities are practically unanimous in holding that the reservations are to be accorded full validity in interpreting the Pact, it followed that the formal relinquishment of war "as an instrument of national policy" amounted in practice to nothing at all.

That, in fact, is the interpretation which the Kellogg Pact has received. War has not been abandoned notwithstanding that the nations have agreed to abandon it. Since the Pact was proclaimed there has been war in Asia between Japan and China and a protracted war in South America between Bolivia and Paraguay, and war is now going on between Italy and Ethiopia. Without exception the Powers, great and small, have gone on preparing for war or preparing to keep out of war, in each case with the expectation that war might happen. The long and dreary debate over disarmament went on for years. not with the idea that military, naval and air establishments were actually to be demobilized and the reign of peace ushered in, but only in the hope that war might be rendered less likely and its incidents less dreadful, and that its spread might be checked and its area localized. Germany has emancipated itself from the armament restrictions of the Treaty of Versailles and in another year will be able to fight, France has completed a formidable line of forts along its eastern and northeastern frontier, the Russian army, next to that of France, is probably the best in the world, Great Britain is increasing its air forces and turning out munitions at top speed, and the United States is expanding its navy. Seventeen years after the great armistice of 1918, war establishments and war expenditures are larger than they have ever been in any time of peace.

War and preparations for war, accordingly, instead of ceasing to be instruments of national policy, continue to be important instruments of policy in both national and international affairs. The systematic cultivation of the military spirit has been a feature of Nazi Germany, as it was of Fascist Italy even before the war with Ethiopia began. To war as an instrument of policy, however, has now been added the economic instrument of sanctions. Calling into action, albeit after long hesitation and delay, provisions of the League Covenant whose full possibilities could hardly have been realized when the Covenant was framed, the members of the League have undertaken to bring to bear upon Italy an economic pressure strong and comprehensive enough to prevent a long continuance of the war in which Italy is engaged, and in which it has been formally branded as the aggressor. In other words, instead of one "instrument of national policy" we now have two, each in its way destructive and each, if it succeeds, a weapon of obvious power for the accomplishment of the purpose for which it is designed. To war at arms, which theoretically had been abandoned, economic war has been added, with neutrality, in the case of the United States, as an exceedingly troublesome by-product of both.

It is proper to inquire, at this juncture, whether sanctions, having been declared by an international body, have for the moment thrust national policy at one side and established an international policy in its place. On this point the protest of the Italian Government which was made public on Wednesday merits attention. The protest, the text of which was communicated on the same date to the individual Governments represented in the League, and to the American Government for its information, declared that the "harsh and hasty steps" which had been taken in imposing sanctions had been "concerted in a co-ordination conference which is not by any means an organ of the League, and which has carried on and is carrying on its investigations and labors without Italy being in any way informed," and that "the various Governments, therefore, remain individually the judges and are responsible to Italy both as regards the scope of the measures they adopt and as regards their legal justification."

The co-ordinating committee, the protest continues, after elaborating its plan, "finally proposed to the Governments to bring all the measures examined simultaneously and definitely into force at a very early date by means of collective actions by certain States represented thereon, and disregarded all opinion in favor of gradual or progressive application. These sanctions would thus be applied for the first time against Italy under de facto and de jure conditions which the Italian Government and people regard as unjust and arbitrary, and against which the Italian Government must raise the most determined opposition." It was further declared that "while the Italian Government have taken all steps capable of preventing further perils from developing from the situation which has been created, they feel nevertheless obliged to draw the attention of the Governments of States members of the League in good time to the responsibility involved by the measures in course of application and to the gravity of their consequences." The note closed with an inquiry regarding the way in which the Governments severally addressed "propose, in their free and sovereign judgment, to conduct themselves in regard to the restrictive measures proposed."

It is clear from these passages that the Italian Government, which of course means Premier Mussolini, intends to hold the individual members of the League responsible for any action they may severally take in carrying out the decision of the League. The League may appoint a committee and accept the recommendations which the committee offers, but that, in the Italian view, does not make the imposition of sanctions a joint matter for which the members of the League may not individually be called to account. The point is a novel one and not without weight, although how much it will amount to can only be determined later. The only way, apparently, in which responsibility can be brought home to a member State of the League would be to institute economic or political reprisals, and the Italian protest has at once been interpreted as forecasting retaliation. For the time being, reprisals might not greatly disturb Great Britain, which can get on without trade with Italy if that should become necessary, and they would be somewhat offset if the League were to take advantage of a provision of the Covenant which looks to some kind of joint contribution to equalize the financial losses resulting from sanctions. Retaliation would mean a good deal to

France, however, whose trade with Italy is large, and might prove a serious matter for some of the States of Eastern Europe which have found in Italy their most important markets. In any case, the Italian protest raises the possibility of an international economic tension which would continue indefinitely after the issue of war had been settled and peace had been formally restored.

The protest has evidently had some effect upon the negotiations which have been proceeding while Italy goes on with its war. The report that Great Britain would ignore the protest was followed quickly by a report that Great Britain and France would make separate replies in substantially identical terms, and that it was hoped that the replies of other Governments would be of the same general tenor. This, of course, would give an appearance of solidarity, but it would not meet the Italian contention. The diplomatic cross-currents, meantime, remain as confused as they have been for some weeks. Great Britain and Italy are conferring amicably in regard to preparations for another conference on the limitation of naval building and armaments, but the British Government is expected to ask the new Parliament for large credits for naval construction, and the withdrawal of part of the British naval force from the Mediterranean still hangs fire. There is strong opposition in France to the imposition of sanctions, and Premier Laval continues to work feverishly for some basis of settlement, but France must work in accord with Great Britain or jeopardize its position on the Continent. The report that France is seeking an agreement with Germany by which, in return for an abandonment of the Franco-Soviet alliance, Germany will be granted a free hand in Eastern Europe, is to be taken with all reserve, especially since such an arrangement would open the way for a further spread of the Nazi form of Fascism. The most disturbing development, next to the Italian protest against sanctions, is the outbreak of riotous demonstrations against the British in Egypt, where the smouldering resentment over British interference in Egyptian affairs needs little to become a fire.

There is reason for thinking that, with war on the one hand and sanctions on the other, the ground is being prepared for some radical readjustment of international relations on the Continent. The peace treaties have been badly shattered, the Locarno Pacts are dead, and new alignments of political and economic interest have appeared which do not fit the artificial post-war pattern. There is no sign as yet that national boundaries are soon to be redrawn, but the post-war political balance has been upset by the Italian adventure, and it is not likely to be readjusted on the old lines.

Correction in Our Figures on New Capital Flotations

In the monthly review of new capital flotations for the month of October and the 10 months ending with October, which appeared in our issue of Nov. 9 1935, we failed to include \$83,000,000 of farm loan and publicly-offered governmental issues in revising our figures for October 1934. The correct figures show \$157,138,755 as the grand total for October 1934, comprising \$121,819,773 new capital and \$35,-318,982 for refunding. For the 10 months ended Oct. 31 1934 the correct totals are \$1,272,695,813 for the grand total, \$830,586,068 as the new capital por-

tion, and \$442,109,745 for refunding, \$693,411,100 of farm loan and publicly-offered governmental issues having been omitted, of which \$395,111,100 was for new capital and \$298,300,000 for refunding purposes.

New Capital Issues in Great Britain

The following statistics have been compiled by the Midland Bank, Ltd. These compilations of issues of new capital, which are subject to revision, exclude all borrowings by the British Government for purely financial purposes; shares issued to vendors; allotments arising from the capitalization of reserve funds and undivided profits; sales of already issued securities which add nothing to the capital resources of the company whose securities have been offered; issues for conversion or redemption of securities previously held in the United Kingdom; short-dated bills sold in anticipation of long-term borrowings; and loans by municipal nad county authorities except in cases where there is a specified limit to the total subscription. They do not include issues of capital by private companies except where particulars are publicly announced. In all cases the figures are based upon the prices of issue.

SUMMARY TABLE OF NEW CAPITAL ISSUES IN THE UNITED KINGDOM [Compiled by the Midland Bank Limited]

	Month of October	10 Months to Oct. 31	Year to Oct. 31
1919	£24,977,000	£157,655,000	£187,158,000

Financial Chronicle Nov. 16 1935 Gross and Net Earnings of United States Railroads for the Month of September

Railroad earnings during September made a distinctly favorable comparison with the same month of last year. It is gratifying to record this fact, for every indication of improvement in the railroad situation, however slight, is to be welcomed. But it also is true, unfortunately, that proper interpretation of the September statistics provides only modest ground for optimism regarding the chief carriers of the country. The sharp gain in gross and net earnings for September, as against the same month of 1934, is due in large part to the very poor results current a year ago, when the business life of the country was prostrate. The widespread drought during the summer of 1934, together with other factors, made railroad operating results one year ago depressing to contemplate, and it as inevitable that some recovery would take place. Accordingly, it is now possible to note an increase of \$31,408,547, or 11.41%, in gross earnings during September as compared to the same month of last year, while net earnings moved up \$16,564,585, or 22.88%. It remains a matter for concern that nearly half the increase in gross earnings had to be expended for added operating expenses, but one of the chief reasons for this is to be found in the restoration of the temporary wage reduction. There is probably much truth in the contentions of most expert observers that further improvement in the railroad situation would result in a sharp increase in net earnings from this point onwards.

Notwithstanding the improvement in railroad operating returns now to be noted, it is evident that the carriers still are not sharing to their full and due extent in the modest business recovery of recent months. This fact has forced itself on the attention of all concerned to an increasing degree of late. Motor transportation is, of course, one of the main reasons for the fact that the railroads are stragglers in the recovery from the depression. The Motor Carrier Act passed by Congress at the last session now is being implemented by the Interstate Commerce Commission and some hope may be gained for the railroads from the tardy regulation of such competition. In these new conditions a rapid and complete recovery of business could be expected to minimize the troubles of the railroads, but such recovery still remains only a hope. The cumulative effect of the depression and overregulation on the railroads is bitterly evident, meanwhile, in the application made by the New York New Haven & Hartford system on Oct. 23 for reorganization under Section 77 of the amended Bankruptcy Act. A study by the savings banks of the country recently disclosed that railroads either in receivership or trusteeship last July represented a mileage of 70,000, or 29% of all the railroad mileage of the country. These circumstances indicate the vast measure of recovery necessary to place the railroads on a sound footing. These factors illuminate the comparison of September earnings with those of one year ago, herewith presented, and it is noteworthy also that results for September 1934 showed the poorest net earnings for that month in any year since 1907.

Month of September— 1935 Mileage of 144 roads	202,767,542	+\$31,408,547 +14,843,962	ec. (—) —0.58% 11.41% 7.32%
Netearnings \$88,955,493	\$72,390,908	+\$16,564,585	22.88%

Apart from such circumstances, it is evident that the business improvement in progress during most of this year is finding at least some reflection in the statistics of railroad operating results. Increased industrial production plainly accounted for most of the gains now apparent. Taking the leading trade indices as the measure of the volume of business done in the month under review, we find that only 89,805 motor vehicles were turned out in the United States in September 1935 as against 170,007 cars in September last year and 191,800 cars in September 1933. Back in September 1932, however, only 84,150 cars were turned out, but in September 1931 the output of automobiles was 140,566 cars; in 1930, 220,649 cars. and in 1929, no less than 415,912 cars. On the other hand, in the case of the iron and steel trades conspicuous examples of business increase are furnished. According to the statistics compiled by the "Iron Age," the make of pig iron in the United States in September 1935 was 1,776,476 gross tons as compared with only 898,043 gross tons in September a year ago; 1,522,257 tons in September 1933; 592,589 tons in September 1932, and 1,168,915 tons in September 1931, but comparing with 2,276,770 tons in 1930 and 3,497,564 tons in September 1929. The output of steel ingots in September, according to the figures compiled by the American Iron and Steel Institute, aggregated 2,829,835 gross tons as against 1,268,977 gross tons in September 1934; 2,283,079 tons in September 1933; 991,858 tons in September 1932, and 1,545,411 tons in September 1931. Going further back, however, we find that the output of steel ingots in September 1930 was 2,840,379 tons, and in September 1929 reached 4,527,887 tons.

Turning to another industry-that of the mining of coal—we find that there was a substantial falling off in September in the production of bituminous coal, but that the anthracite output was on a somewhat larger scale than last year. In September the present year the quantity of soft coal mined in the United States was only 24,944,000 net tons as against 27,772,000 net tons in September 1934; 29,500,000 tons in September 1933; 26,314,000 tons in 1932; 31.-919,000 tons in 1931; 38,632,000 tons in 1930, and 45,334,000 tons in September 1929. In the case of Pennsylvania anthracite, this year's output in September aggregated 4,172,000 net tons as against but 3,977,000 tons in the corresponding period of 1934, but comparing with 4,993,000 tons in September 1933. Going further back, we find the production of hard coal in September 1932 was 4,108,000 tons; in September 1931, 4,362,000 tons; in September 1930, 5,293,000 tons, and in September 1929, no less than 6,543,000 tons.

In the building industries greater activity was decidedly pronounced. The F. W. Dodge Corp. reports that construction contracts awarded in the 37 States east of the Rocky Mountains in September 1935 involved an outlay of \$167,376,200 as compared with an expenditure of only \$110,151,200 in September 1934; \$120,134,400 in September 1933, and \$127,-526,700 in September 1932. Going further back, however, we find that in September 1931 the valuation of building contracts was \$251,109,700; in September 1930, \$331,863,500, and in September 1929 had reached the huge sum of \$445,402,300. In the case of lumber production, the National Lumber Manufacturers Association reports that for the four weeks ended Sept. 28 1935 an average of 601 mills show an output of 946,689,000 feet as compared with only 659,304,000 feet in the corresponding period of 1934. This is an increase of 44% over September last year and of 38% above the record of comparable mills in the same four weeks of 1933. Shipments of lumber in the same four weeks aggregated 879,-067,000 feet as against only 683,223,000 feet in September a year ago, a gain of 29%, while orders received also increased in the same period to 842,-705,000 feet from 624,355,000 feet in the similar period of 1934, or were 35% more than those of last year and 35% above those of corresponding weeks in 1933.

As it happened, too, the Western grain traffic was on a greatly increased scale in September the present year than in September a year ago-in fact, it was the largest recorded for the month in all recent years. The increase extended to all the different staples with the single exception of corn, the movement of which was very much smaller than in September last year. We deal in detail with the Western grain movement in a separate paragraph further along in this article, and will therefore only note here that the receipts at the Western primary markets of the five cereals, wheat, corn, oats, barley and rye, combined, for the four weeks ending Sept. 28 1935 reached 86,523,000 bushels as against only 51,424,000 bushels in the corresponding four weeks of 1934; 57,734,000 bushels in the same four weeks of 1933; 70,539,000 bushels in 1932, and 86,-002,000 bushels in 1931. If we go further back, however, we find comparison is with 105,632,000 bushels in September 1930 and with 86,869,000 bushels in the corresponding four weeks of 1929.

The best indication, however, of railroad traffic as a whole is furnished by the returns of the train loading of revenue freight, as these deal with all classes of freight and cover all parts of the country, and hence furnish a sort of composite picture of freight traffic as a whole on the entire railroad system of the country. On that point the statistics compiled by the Car Service Division of the Association of American Railroads show that for the four weeks of September 1935 the loading of revenue freight totaled 2,631,558 cars as against only 2,501,950 cars in the corresponding four weeks of 1934 and 2,567,071 cars in the same period of 1933, but comparing with 2,867,370 cars in September 1932; 3,685,983 cars in September 1931; 4,696,911 cars in 1930, and no less than 5,722,236 cars in the corresponding four weeks of 1929.

In all the foregoing we have been dealing with the railroads of the country as a whole. In the case of the separate roads the outstanding feature in the comparisons with September last year is that in our compilations showing the increases and decreases in gross and net earnings for amounts in excess of \$100,000, only three roads report a decrease in the case of the gross and but six roads a loss in the net. To name separately, with their increases, even the more conspicuous of the large number of roads reporting gains in both gross and net alike would involve a needless loss of time and space, so we will therefore only mention a few. As might be expected,

the Pennsylvania RR. and the New York Central stand at the head of the list for both gross and net gains, the former reporting \$4,182,539 increase in gross earnings and \$1,624,606 increase in net earnings, and the New York Central \$3,510,511 gain in gross and \$2,372,299 gain in net. These figures cover the operations of the New York Central and its leased lines. Including the Pittsburgh & Lake Erie, the result is an increase of \$3,859,523 in gross earnings and of \$2,575,023 in net earnings. The Great Northern, with a gain in gross earnings of \$2,578,884, reports an increase in net of \$1,858,255; the Norfolk & Western, with an increase of \$994,818 in the gross, has a gain of \$1,121,913 in the net; the Baltimore & Ohio, an increase of \$1,517,674 in the gross but a gain of only \$105,019 in the net; the Southern Ry., \$1,084,950 gain in gross and \$959,321 in net; the Union Pacific, \$1,379,840 gain in gross and \$442,931 in net; the Southern Pacific, \$1,294,763 gain in gross and \$730,774 in net, and the Louisville & Nashville, \$1,190,412 gain in gross and \$597,435 in net. In the subjoined table we show all changes for the separate roads for amounts in excess of \$100,000, whether increases or decreases, and in both gross and net: PRINCIPAL CHANGES IN GROSS EARNINGS FOR THE MONTH

When the roads are arranged in groups or geographical divisions, according to their location, as is our custom, the favorable character of the showing as compared with September a year ago is brought out very clearly by the fact that all three districts-the Eastern, the Southern and the Western-including all the several regions grouped under these various districts, record gains in both gross and net earnings alike. As previously explained, we group the roads to conform to the classification of the Interstate Commerce Commission. The boundaries of the different groups and regions are indicated in the footnote to the table:

NOTE—Our grouping of the roads conforms to the classification of the Interstate Commerce Commission, and the following indicates the confines of the different groups and regions: EASTERN DISTRICT

EASTERN DISTRICT New England Region—Comprises the New England States. Great Lakes Region—Comprises the section on the Canadian boundary between New England and the westerly shore of Lake Michigan to Chicago, and north of a line from Chicago vira Pittsburgh to New York. Central Eastern Region—Comprises the section south of the Great Lakes Region east of a line from Chicago through Peorla to St. Louis and the Mississippi River to the mouth of the Ohio River, and north of the Ohio River to Parkersburg, W. Va., and a line thenee to the southwestern corner of Maryland and by the Potomac River to its mouth.

SOUTHERN DISTRICT

Southern Region—Comprises the section east of the Mississippi River and south of the Ohio River to a point near Kenova, W. Va., and a line thence following the eastern boundary of Kentucky and the southern boundary of Virginia to the Atlantic. *Pocahontas Region*—Comprises the section north of the southern boundary of Virginia, east of Kentucky and the Ohio River north to Parkersburg, W. Va., and south of a line from Parkersburg to the southwestern corner of Maryland and thence by the Potomac River to its mouth.

WESTERN DISTRICT

WESTERN DISTRICT Northwestern Region—Comprises the section adjoining Canada lying west of the Great Lakes Region, north of a line from Chicago to Omaha and thence to Portland and by the Columbia River to the Pacific. Central Western Region—Comprises the section south of the Northwestern Region west of a line from Chicago to Peorla and thence to St. Louis, and north of a line from St. Louis to Kansas City and thence to El Paso and by the Mexican boundary to the Pacific Southwestern Region—Comprises the section lying between the Mississippi River South of St. Louis and a line from St. Louis to Kansas City and thence to El Paso, and by the Rio Grande to the Guilt of Mexico.

Western roads, as we have already indicated, had the advantage of a very much larger grain traffic than in September 1934. With the single exception of corn (the movement of which was on a greatly reduced scale as compared with a year ago), all the different cereals, in greater or less degree, contributed to the increase, the gain in the case of wheat and of oats having been particularly pronounced. Thus for the four weeks ending Sept. 28 the present year, receipts of wheat at the Western primary markets aggregated 43,786,000 bushels as compared with only 18,985,000 bushels in the same four weeks of 1934; of corn, only 6,644,000 bushels against 17,-188,000 bushels; of oats, 21,237,000 bushels as compared with 4,710,000 bushels; of barley, 12,141,000 bushels against 8,517,000 bushels, and of rye, 2,715,000 bushels as compared with 2,024,000 bushels. Altogether, the receipts at the Western primary markets of the five staples, wheat, corn, oats, barley and rye, during the four weeks ending Sept. 28 the current year aggregated \$86,523,000 bushels as against only 51,424,000 bushels in the same four weeks of 1934; 57,734,000 bushels in the same period of 1933: 70,539,000 bushels in 1932, and 86,002,000 bushels in 1931, but comparing with 105,632,000 bushels in 1930 and 86,869,000 bushels in the corresponding period of 1929. The details of the Western grain movement, in our usual form, are set out in the table which follows:

On the other hand, the Western livestock movement appears to have been considerably smaller than in the month a year ago. At Chicago the receipts embraced only 8,366 carloads in September 1935 as compared with 14,117 carloads in September 1934; at Omaha but 4,229 cars against 6,526 cars, and at Kansas City, 5,486 cars as compared with 11,498 cars.

As to the cotton traffic in the South, this was on a greatly increased scale so far as the port movement of the staple is concerned, but fell far below that of last year in the case of overland shipments of cotton. These latter aggregated only 30,190 bales in September the present year as compared with 45,836 bales in September 1934, but comparing with 30,041 bales in September 1933; 20,166 bales in September 1932, and 29,405 bales in September 1931, but against 49,837 bales and 51,520 bales, respectively, in September 1930 and 1929. Receipts of the staple at the Southern outports in September the current year reached 1,097,317 bales as against only 825,635 bales in the corresponding period of 1934;

but comparing with 1,333,280 bales in September 1933. In September 1932 the receipts were 1,065,623 bales; in 1931, 1,053,908 bales, but in September 1930 and 1929 they were, respectively, 1,649,272 bales and 1,327,471 bales. In the following table we give the details of the port movement of cotton for the past three years:

Volume 141

RECEIPTS OF COTTON AT SOUTHERN PORTS IN SEPTEMBER 1935, 1934, 1933 AND SINCE JAN. 1 1935, 1934, 1933.

Results For Earlier Years

It has already been indicated that improving results have marked the course of railroad earnings in September 1935, the month having to its credit \$31,408,547 gain in gross and \$16,564,585 gain in net. These gains, however, follow losses of \$16,643,258 and of \$20,938,789 in gross and net, respec-tively, in September 1934, which, in turn, came after a substantial gain of \$23,446,244 in gross and \$11,129,616 in net in September 1933. In the three years preceding the last-named year huge losses were recorded. It is important to bear in mind, too, that the heavy losses in these three years—\$77,612,781 in gross and \$9,060,608 in net in 1932, following \$117,073,774 in gross and \$55,161,214 in net in 1931 and \$99,634,540 in gross and \$36,255,079 in net in 1930do not, as might be supposed, follow large gains in the years do not, as might be supposed, follow large gains in the years immediately preceding. On the contrary, they come after indifferent results in September 1929 and equally indifferent results in September 1928 and decidedly unfavorable results in September 1927. In 1929 our September compilation regis-tered an increase of no more than \$9,812,986 in gross, and of only \$2,612,246 in net. In September 1928 our tables re-corded \$9,980,689 loss in gross with \$1,711,331 gain in net. In September 1927 there was \$26,058,156 loss in gross and \$13,799,429 loss in net. On the other hand, however, our tabulations for September 1926 showed gains then which did not differ greatly from the losses which followed in 1927. In other words, our statement for September 1926 recorded \$24,192,700 increase in gross and \$14,990,918 in-crease in net. These 1926 increases, too, came after mod-erate increases in the year preceding, our tabulations for September 1925 having shown \$24,381,000 gain in gross and \$18,026,891 gain in net, notwithstanding that at that time the anthracite carriers had to contend with the strike at the anthracite mines, which served to cut off completely all traffic in hard coal. Even in 1924, which was a period of trade reaction, there was in September of that year only a \$116,223), while in the net there was no loss at all then, but rather improvement in the large sum of \$20,947,793 (ex-penses having been reduced in amount of \$35,064,016 at that time). Moreover, this followed \$44,549,658 improve-ment in gross in September 1923 and \$37,441,885 improve-ment in the et. It is true that this notable improvement in 1923 was immediately preceding. On the contrary, they come after indifferent results in September 1929 and equally indifferent

been in considerable measure conceased owing to the fact that the roads were then getting very much higher transpor-tation rates both for passengers and for freight. In other words, in these earlier months of 1921 the loss in gross rev-enues because of diminished traffic was in large part offset by the additional revenue derived from higher rates on the traffic which the carriers actually did handle and transport. In September this was no longer the case, for in that month

comparison was with a time in 1920 when the higher rates authorized by the Interstate Commerce Commission in the summer of that year were already in effect. It was estimated at the time when these great advances were made that on the volume of traffic then being handled they would add \$1,500,000,000 to the annual gross revenues of the roads, or, roughly, \$125,000,000 a month. Deprived of the advantage—in the comparisons—of these higher rates, the naked fact of a tremendous shrinkage in the volume of business then being moved (1921) stood out in

higher rates, the naked fact of a tremendous shrinkage in the volume of business then being moved (1921) stood out in all its grimness. The loss, accordingly, aggregated no less than \$120,753,579, or not far from 20%. But by dint of great effort, the roads managed to cut down their expenses in the prodigious sum of \$132,126,103, leaving a gain in net of \$11,-372,524. The 12% reduction in the wages of railroad em-ployees which had been in effect since July 1, under the authorization of the Railroad Labor Board, was one fact in the big contraction in expenses; the shrinkage in traffic was yet another factor, and of much larger magnitude, in adthe big contraction in expenses, the shrinkage in traine was yet another factor, and of much larger magnitude, in ad-dition to which railroad managers skimped and saved in every direction, in particular cutting the maintenance outlays to the bone, little repair work of any kind being done that could be deferred.

to the bone, little repair work of any kind being done that could be deferred. As against the gain in net in 1921, however, brought about in the way indicated, it is important to note that in preced-ing years very large additions to gross revenues arising either from an increased volume of traffic or from higher rates failed to yield any substantial additions to the net. This remark applies to the results for many successive years of this earlier period, operating costs having steadily risen at the expense of the net. In that respect, the exhibit for September 1920 was particularly disappointing. Great ex-pectations had been built on the benefits to be derived from the noteworthy increase in passenger and freight rates that had then just been put into effect. Gross earnings did reflect the higher rates in an increase of no less than \$113,783,775, or 23.68%, but \$104,878,082 of this was consumed by aug-mented expenses, leaving, hence, a gain of net of only \$8,005,603, or less than 10%. In the years preceding, the showing as to the net was equally unsatisfactory. Thus for September 1919 our tabulations registered \$9,252,922 gain in gross but \$18,828,861 loss in the net. In September 1918 the gain in the gross revenue reached enormous proportions, the gain in the gross revenue reached enormous proportions, the war being still in progress and the volume of traffic ex-tremely large, besides which decided advances in both pas-senger and freight rates had been made only a few months senger and freight rates had been made only a few months before. The addition to the gross was no less than \$129,-367,931, or 36.16%. But this was accompanied by an aug-mentation in expenses of \$126,177,381, or 51.82%, leaving net larger by only \$3,190,550, or 2.79%. The year before rising expenses played a similar part in contracting the net results. In that year (in September 1917) there was \$33,901,638 in-crease in gross, but \$7,699,654 loss in net, owing to an expan-sion of $41\frac{1}{2}$ million dollars in expenses. In the following we furnish the September comparisons back to 1909:

			Mil	Mileage				
Month of September	Year Given				Inc. (+) or Dec. (-)	Per Cent	Year Given	Year Preced'g

Financial Chronicle

The Course of the Bond Market

Bonds have generally held well in price this week, even advancing to new highs for the year in the case of certain utility, industrial and convertible railroad issues. Weakness in rails was followed by a vigorous rally on Thursday, in sympathy with rail stocks. High-grade corporate issues and United States Governments have remained substantially unchanged. Fundamentally helpful to this section of the market was the announcement from Washington of the Administration's efforts to pare next year's budget of expenses by \$500,000,000. Continued inflow of gold, this time accentuated by signs of financial uneasiness in France, remained without effect on high-grade bonds, excess reserves of banks being already so high that new records from week to week have become almost a matter of habit.

Both high-grade and second-grade railroad bonds have moved in a narrow range this week, closing only slightly changed from last week. Among high-grades, Atchison gen. 4s, 1995, closed at 108%, up % for the week, and Chicago Union Station 4s, 1963, declined ¹/₄ point to 109. Among second-grade issues, New York Central 5s, 2013, advanced 1% points to 74%; Baltimore & Ohio 5s, 1995, lost % point to close at 71¹/₄, and Erie 5s, 1967, advanced 1½ points to 66. However, various issues connected with the Van Sweringen interests showed remarkable gains for the week. Chesapeake Corp. 5s, 1947, at 116¹/₂ were up 9%, and the same company's 5s, 1944, at 111³/₄ were up 4 points. Alleghany Corp. stamped 5s, 1950, closed at 27%, up 9%; the 5s, 1944, at 85%, up 3%, and the 5s, 1949, at 78%, up 8%. New York

Chicago & St. Louis undeposited 6s 1935, closed at 83, up $16\frac{1}{2}$ points, and the $5\frac{1}{2}$ s, 1979, advanced $3\frac{7}{8}$ points to $74\frac{1}{8}$.

Higher prices in the utility bond market occurred principally in the more speculative group, bonds of investment grade displaying little change. Moderate gains in the lowergrade issues have been made by American & Foreign Power 5s, 2030, which closed at $67\frac{1}{2}$, up $\frac{3}{4}$ for the week; International Telephone & Telegraph $4\frac{1}{2}$ s, 1952, which advanced $\frac{1}{4}$ to $69\frac{1}{2}$, and Cities Service Power & Light $5\frac{1}{2}$ s, 1949, which advanced $1\frac{3}{4}$ to $65\frac{1}{4}$. Financing was of relatively small proportions, consisting principally of \$15,600,000 Central Maine Power 4s, 1960.

The industrial list has been characterized by general strength. A rising stock market favored convertible issues, American Rolling Mill conv. 4¼s, 1945, advancing 5 points to 126. Philadelphia & Reading Coal & Iron 6s, 1949, dropped 1¼ points to 35, whereas the Hudson Coal 5s, 1962, gained 2 points to close at 42. The Baldwin Locomotive 6s, 1938, w. w., continued their advance to 68½, up 5¼ points. Issues in the building group were led by Certainteed Products 5½s, 1948, with a gain of 2½ points to 91¾. Mead Corp. 6s, 1945, advanced 1¼ points to 100¼.

A mixed trend has been evident in the foreign bond market. Strength has been seen in Belgium bonds, Australians and Japanese Governments. Japanese public utilities, on the other hand, lost ground in certain cases. A strong decline in various Italian issues took place, although the Government 7s declined only slightly.

Moody's computed bond prices and bond yield averages are given in the following tables:

* These prices are computed from average yields on the basis of one "ideal" bond (4%% coupon, maturing in 31 years) and do not purport to show either the average level or the average move nent of actual price quotations. They merely serve to illustrate in a more comprehensive way the relative levels and the relative movement of yield average, the latter being the truer picture of the bond market. For Moody's index of bond prices by months back to 1928, see the issue of Feb. 6 1932, page 907, *Actual average price of 8 long-term Treasury issues. The letest complete list of bonds used in computing these indexes was published in the issue of May 18 1935 page 3291. †† Average of 30 foreign bonds but adjusted to a comparable basis with previous averages of 40 foreign bonds.

Financial Chronicle

Indications of Business Activity

THEISTATE OF TRADE-COMMERCIAL EPITOME Friday Night, Nov. 15 1935.

Most of the business news of the week was of a cheerful Wholesale trade was larger, and despite adverse nature. weather conditions in some parts of the country retail sales as a whole showed further expansion. Furthermore, industry continued its advance, which is unusual for this time of the year. Electric output reached a new high, exceeding the 1929 peak for the sixth consecutive week. Steel operations rose to 52.6%, or close to the year's peak. Crude oil production exceeded the Federal allowable by 238,550 barrels. There was an encouraging increase in railroad freight loadings, and construction awards are larger. Machine tool business increased sharply last month following the show at Cleveland in September. Security markets were more active and scored further advances. Sears, Roebuck & Co. sales in the four weeks ended Nov. 5 were the largest for any corresponding period since 1929. Production schedules were increased for this month and December by manufacturers of automobiles owing to the heavy public demand for new cars and the sharp increased sales at New York and other automobile shows. Cotton of late was stronger and a little more active. Grain markets, however, showed little activity, but have recently shown an upward trend. Other commodity markets were generally quiet and easier. Two tornadoes struck Oklahoma on the 9th inst., injuring four persons and damaging many farm houses over a wide area. An earthquake in the West Indies on the 11th inst. did con-Wintry weather visited the Mid-West siderable damage. early in the week. Temperatures in Texas, Oklahoma, Kansas, Mississippi and Nebraska were below freezing, and snow fell in many sections. In New York it was rainy and warm early in the week, but later temperatures dropped. To-day it was cloudy and cold here, with temperatures ranging from 40 to 43 degrees. The forecast was for cloudy, probably light rains to-night and Saturday; not much change in temperature; Sunday probably fair, turning warmer. Overnight at Boston it was 38 to 48 degrees; Baltimore, 44 to 52; Pittsburgh, 34 to 38; Portland, Me., 34 to 46; Chicago, 40 to 44; Cincinnati, 38 to 40; Cleveland, 40 to 46; Detroit, 36 to 40; Charleston, 58 to 70; Milwaukee, 40 to 46; Dallas, 42 to 52; Savannah, 58 to 74; Kansas City, 38 to 42; Springfield, Mo., 38 to 40; Oklahoma City, 34 to 40; Denver, 26 to 36; Salt Lake City, 26 to 42; Seattle, 44 to 54; Montreal, 32 to 34, and Winnipeg, 4 below to 8 above.

Moody's Daily Commodity Index Rises Moderately

The feature of this week's trading has been the sharp rise in raw cotton prices, which advanced to the best levels since The declining trend of certain other commodities, mid-July. particularly top hogs and wheat, which has been evident for the past month or so was reversed and these commodities have enjoyed a moderate recovery. Moody's Daily Index of Staple Commodity prices closed on Friday at 167.8 compared with 166.4 a week ago.

Among the fifteen commodities in the Daily Commodity Index, advances were registered by cotton, top hogs, wheat, scrap steel, wool and rubber, while hides, sugar, corn, silk and cocoa declined. Silver, copper and lead remained unchanged.

The movement of the Index during the week, with comparisons, is as follows:

Revenue Freight Car Loadings Above a Year Ago

Revenue Freight Car Loadings Above a Year Ago Loadings of revenue freight for the week ended Nov. 9 1935 totaled 653,525 cars. This is a recession of 27,137 cars, or 3.9%, from the preceding week, a rise of 58,735 cars, or 9.9%, from the total for the like week of 1934, and an increase of 77,452 cars, or 12.1%, from the total loadings for the corresponding week of 1933. For the week ended Nov. 2, loadings were 11% above the corresponding week of 1934 and 10.8% higher than those for the like week of 1933. Loadings for the week ended Oct. 26 showed a gain of 13.3% when compared with 1934 and a rise of 10.2% when com-parison is made with the same week of 1933. The first 18 major railroads to report for the week ended Nov. 9 1935 loaded a total of 313,242 cars of revenue freight

on their own lines, compared with 325,841 cars in the preceding week and 282,668 cars in the seven days ended Nov. 10 1934. A comparative table follows:

The Association of American Railroads, in reviewing the week ended Nov. 2, reported as follows:

Loading of revenue freight for the week ended Nov. 2 totaled 680,662 cars. This was an increase of 67,614 cars, or 11.0%, above the corre-sponding week in 1934 and an increase of 66,526 cars, or 10.8%, above the same week in 1933.

Loading of revenue freight for the week of Nov. 2 was a decrease of 27,164 cars, or 3.8%, below the preceding week this year, due to the usual seasonal decline in business.

Loading of revenue freight for the week of Nov. 2 was a decrease of 27,164 cars, or 3.8%, below the preceding week this year, due to the usual seasonal decline in business. Miscellaneous freight loading totaled 278,784 cars, a decrease of 6,594 cars below the preceding week, but an increase of 43,651 cars above the corresponding week in 1934, and 51,910 cars above the same week in 1933. Loading of merchandise less-than-carload-lot freight totaled 165,576 cars, a decrease of 613 cars below the preceding week, but 3,609 cars above the corresponding week in 1934. It was, however, a decrease of 6,392 cars below the same week in 1933. Coal loading amounted to 125,483 cars, a decrease of 3,209 cars below the preceding week, but an increase of 129 cars above the corresponding week in 1934. The same week in 1933. Grain and grain products loading totaled 33,364 cars, a decrease of 4,087 cars below the preceding week, but an increase of 5,477 cars above the corresponding week in 1934 and 2,209 cars above the same week in 1933. In the Western districts alone grain and grain products loading for the week ended Nov. 2 totaled 21,834 cars, an increase of 4,629 cars above the same week in 1934. Livestock loading amounted to 19,553 cars, a decrease of 1,736 cars below the preceding week, 5,015 cars below the same week in 1934. Livestock loading totaled 29,194 cars a decrease of 1,481 cars below the same week in 1934. To the week ended Nov. 2 totaled 29,194 cars a decrease of 1,481 cars below the same week in 1934. Doed livestock for the week ended Nov. 2 totaled 15,738 cars, a decrease of 3,153 cars below the same week in 1933. Ore loading amounted to 21,692 cars, a decrease of 1,481 cars below the preceding week, but an increase of 10,985 cars above the same week in 1933. Ore loading amounted to 21,692 cars, a decrease of 1,481 cars below the preceding week, but an increase of 10,985 cars above the same week in 1933. Coke loading amounted to 7,016 cars, an increase of 3,252 cars above the preceding week, in 1933.

All districts reported increases for the week of Nov. 2 in the number of cars loaded with revenue freight compared not only with the corre-sponding week last year, but also with the corresponding week in 1933. Loading of revenue freight in 1935 compared with the two previous years follows:

		the second se	and the second se

Growing Confidence Evidenced in Upward Movement in Business During Current Autumn According to Col. Leonard P. Ayres of Cleveland Trust Co.-Greatest Problem That of Unemployment

Commenting on the present business trends, Colonel Leonard P. Ayres, Vice-President of the Cleveland Trust Co. of Cleveland, in the company's "Business Bulletin" dated Nov. 15, says: For the first time in six years business activity has had a normal seasonal purpose in volume this generation of the company.

For the first time in six years business activity has had a normal seasonal increase. Since the bottom of the depression we have had a succession of upward movements in business, and one of them following the bank crisis was of exceptional volume and vigor. However, each of them was followed by a recession in which much of the ground gained was lost again, and none of the previous periods of improvement had the convincing quality that characterizes this one characterizes this one

Stating that "the difference seems to be that the prevailing sentiment of business during each one of the previous upturns in the depression period was one of tentative optimism, but that this time it is one of growing confidence," Colonel Ayres adds:

adds: Probably the chief reason for this change is that business improvement this autumn is well distributed over many parts of our economic life. The crops are better this year than they have been previously; retail trade has improved; there is more construction; industrial output is advancing, and there is an encouraging increase in the volume of railroad freight loadings. In addition to these changes for the better there is a considerable and fairly general increase in the profits of many lines of business activity, and especially in manufacturing. This increase in business profits appears to be considerably greater than the advance in the volumes of output and of trade and transportation. Apparently industry and business in general have

utilized the long depression period to effect economies and to periect more efficient methods of operation so that they are now able to utilize relatively small increases in the volume of their operations so as to make them produce much more than corresponding gains in profit margins. Our greatest present problem is still our huge volume of unemployment, which has changed but little during the past two years, despite recent encouraging additions to industrial payrolls. The chief direct and indirect causes for this condition are still the relative stagnation of our heavy industries and of construction. We still need such a solidifying of con-fidence as will impel men to undertake extensions of enterprise, assuming new risks in the hope of making new gains.

Colonel Ayres, in making the further statement as to busi-ness activity that "there is convincing evidence that the increase in business activity this autumn has been both genuine and general," states:

Benuine and general, 'States: Perhaps the best testimony is to be found in the monthly report of the Federal Reserve Board, which regularly publishes monthly figures on eight general indicators of business conditions. They include the volume of industrial production, mineral output, residential building, all other con-struction contracts, factory employment and wages, freight loadings, and department store sales. The report for September shows increases in all eight of these series. It is the first report this year in which all eight of the indexes advanced.

Further Increase Noted in "Annalist" Index of Busi-ness Activity for October—Is Only 2.2 Points Below High for July 1933

Below High for July 1955 Business recovery proceeded at an accelerated rate during October, according to the "Annalist" Index of Business Activity, which rose to 87.1 (preliminary) from 83.6 for September. The index is only 2.2 points below the high for

July 1933; with the exception of that month, it is at the highest level since September 1930, the "Annalist" announced on Nov. 14:

on Nov. 14: The index has risen for five consecutive months and has recovered nearly 50% of the ground lost from the 1929 high of 116.7 to the depression low of 58.4. Last month's business improvement was the result of increased activity in both the durable and non-durable goods industries, a sharp advance in automobile output being the most important single factor in the rise of the combined index, while a marked expansion in cotton con-sumption was the second most important factor. A substantial increase was also shown in freight car loadings per day, after allowance for seasonal fluctuations. Gains were also recorded by the adjusted indices of pig fron production, electric power production and silk consumption. As a result of smaller than seasonal gains in average daily output, the adjusted indices of steel ingot production and zinc production turned downward. The de-creases, however, were slight and the outlook for both industries appears to be favorable. The index of lumber production declined slightly from the relatively high September level.

be favorable. The index of number production detailed signal inter-relatively high September level. Table I gives for the last three months the combined index and its com-ponents, each of which is adjusted for seasonal variation and, where necessary, for long-time trend. Table II gives the combined index by months back to the beginning of 1930:

* Subject to revision. a Based on an estimated output of 8,885,000,000 kilowatt-hours as against a Geological Survey total of 8,218,000,000 kilowatt-hours in September and 7,831,000,000 in October 1934. b Based on an estimated output of 250,000 cars and trucks, as against Department of Commerce total of 95,128 cars and trucks in September and 135,771 in October 1934.

"Annalist" Weekly Index of Wholesale Commodity Prices Increased During Week of Nov. 12 With the first advance in five weeks, the "Annalist" Weekly Index of Wholesale Commodity Prices rose to 127.9 on Nov. 12, from 127.4 on Nov. 4. Advances were general, with corn, cotton, hogs and pork in particular showing advances. In noting the foregoing the "Annalist" said:

advances. In noting the foregoing the "Annalist" said: The advance in corn reflected the small available supplies, in cotton the bullish crop estimate of last Friday, while hogs and pork benefited from the cold wave. Butter also was higher, but eggs, wheat and flour and steers de-clined. The crude petroleum average also showed a loss of nearly half the previous week's gain as prices were brought into better alignment in the various markets. The European situation seems to have disappeared as an active factor in the speculative picture, although so-called war demand continues of some importance.

THE ANNALIST WEEKLY INDEX OF WHOLESALE COMMODITY PRICES

	Nov. 12 1935	Nov. 4 1935	Nov. 13 1934

Increase of 0.4% in Wholesale Commodity Prices Dur-ing Week of Nov. 9 Reported by United States Department of Labor

Wholesale commodity prices advanced 0.4% during the second week in November, according to an announcement made Nov. 14 by Commissioner Lubin of the Bureau of Labor Statistics, U. S. Department of Labor. This increase followed the net cumulative decline of over 1% during the two preceding weeks. In his announcement Mr. Lubin stated:

preceding weeks. In this announcement Mr. Jabbin stated: This advance brought the all-commodity index to 80.1% of the 1926 average. It is, however, 0.7% below the level of a month ago. Compared with the corresponding week of last year, the current index shows an in-crease of 4.6%. Increases were registered during the week for eight of the ten major commodity groups. Chemicals and drugs remained unchanged and miscel-laneous commodities declined slightly. Nineteen of 47 sub-group classifi-cations included in the index were higher, nine were lower, and 19 remained unchanged. unchanged.

The large industrial group of "all commodities other than farm products and processed foods' advanced 0.6% to a new high for the year. The ind for this group, 78.9, is the highest reached since the middle of last year. The index

Comparisons of the present level of wholesale prices with the previous week, a month ago and the corresponding week of last year are shown in the following table contained in Mr. Lubin's announcement:

Commodity Groups	Nov. 9 1935	Nov. 2 1935	% of Change	Oct. 12 1935	% of Change	Nov.10 1934	% of Change
All commodities	80.1	79.8	+0.4	80.7	-0.7	76.6	+4.6
Farm products Foods Textile products Fuel and lighting materials Metals and metal products Building materials Chemicals and drugs Housefurnishing goods Miscellaneous commodities	72.8 75.5	77.4 83.8 95.1 72.7 74.3 85.9 85.6 81.1 82.0 67.5	$\begin{array}{c} +0.1 \\ +0.4 \\ +0.5 \\ +0.1 \\ +1.6 \\ +0.3 \\ +0.1 \\ 0.0 \\ +0.1 \\ -0.1 \end{array}$	$\begin{array}{r} 80.1\\ 85.7\\ 93.8\\ 72.1\\ 74.1\\ 85.8\\ 86.1\\ 80.7\\ 81.8\\ 67.5\\ \end{array}$	$\begin{array}{r} -3.2\\ -1.9\\ +1.9\\ +1.0\\ +0.5\\ -0.5\\ +0.5\\ +0.4\\ -0.1\end{array}$	$\begin{array}{c} 71.1 \\ 75.9 \\ 84.9 \\ 69.4 \\ 75.6 \\ 85.4 \\ 85.1 \\ 76.8 \\ 82.7 \\ 70.5 \end{array}$	$\begin{array}{r} +9.0 \\ +10.8 \\ +12.6 \\ +4.9 \\ -0.1 \\ +0.9 \\ +0.7 \\ +5.6 \\ -0.7 \\ -4.4 \end{array}$
All commodities other than farm products and foods	78.9	78.4	+0.6	78.2	+0.9	78.1	+1.0

The following is also from the announcement:

The index for the fuel and lighting materials group advanced 1.6% to 75.5, a new high for the year. The increase was the result of sharp increases in prices of California crude petroleum and gasoline. Average prices of bituminous coal were fractionally higher, and anthracite coal and coke re-

In prices of California crude petroleum and gasoline. Average prices of bituminous coal were fractionally higher, and anthracite coal and coke remained unchanged.
The hides and leather products group rose 0.5% to the highest point reached in the past five years. The increase was due to higher prices for shoes, leather, and hides and skins.
Wholesale food prices increased 0.4% during the week because of advancing prices of dairy products, fruits and vegetables, and other foods including cocoa beans, coffee, copra, and cured fish. Cereal products and meats, on the other hand, declined. Important individual food items for which lower prices were reported were wheat flour, hominy grits, corn meal, fresh beef at New York, bacon, mess pork, dressed poultry, glucose, lard, inolasses and raw sugar. The present food index, 84.1, is approximately 11% above the level of a year ago.
Rising prices of motor vehicles, iron and steel and non-ferrous metals were the factors contributing to the 0.3% advance in the metals and metal products group. Average prices of agricultural implements and plumbing and heating fixtures were stationary.
In the farm products group, decreases of 3.0% in the index for grains and 1.3% in livestock and poultry were more than offset by an increase of 1.9% in "other farm products." The index for the group as a whole advanced to 77.5% of the 1926 average. Lower prices were reported for corn, ryc, wheat, cows, steers, hogs, oranges, dried beans and cotton. Higher prices were reported for oats, eggs, lemons, peanuts, seeds, potatoes and wool. The farm products group new stands 9% above the level of the corresponding week of last year.
The index for the textile products group, following the slight recession of last week, again rose to the high point of the year. The sub-groups of silk and rayon, woolen and worsted goods and other textile products were higher, and the cotton goods index was lower. Prices of clothing and knit goods were unchanged.
<

and the cotton goods index was lower. Prices of clothing and knit goods were unchanged. Higher average prices for lumber were responsible for the minor increase in the building materials group. Average prices of brick and tile, cement and structural steel were unchanged. A fractional advance was reported for the housefurnishings group, due to higher prices for furnishings. Furniture remained at the level of the pre-ceding week. Lower prices were reported for cattle feed, paper and pulp and crude rubber. The sub-groups of automobile tires and tubes and other miscel-laneous commodities remained unchanged. The index for the chemicals and drugs group remained at \$1.1% of the 1926 average. Drugs and pharmaceuticals and fertilizer materials averaged higher, and chemicals were lower. Average prices of mixed fertilizers re-mained stationary. The index of the Bureau of Labor Statistics includes 784 price series weighted according to their relative importance in the country's markets and based on the average for the year 1926 as 100.0. The following table shows index numbers for the main groups of commodi-ties for the past five weeks and for the weeks of Nov. 10 1934 and Nov. 11 1933:

Commodity Groups	Nov. 9 1935	Nov. 2 1935	Oct. 26 1935	Oct. 19 1935	Oct. 12 1935	Nov.10 1934	Nov.11 1933

Consecutive Increase Noted in Fai Publications Retail Price Index for Nov. 1 Increase Noted in Fairchild Third

Retail prices have advanced for the third consecutive month, according to the Fairchild Publications Retail Price Index. Quotations during the month gained 1.2%, the greatest monthly advance since 1933, said an announcement issued Nov. 13 by Fairchild Publications, from which the following is also taken:

following is also taken: The index on Nov. 1 was the highest since October 1934. For the first time in months, retail prices exceed those of a year ago. The latest index shows a fractional gain of 0.3 of 1% above a year ago. While prices have regained 2.8% since the Aug. 1 low, they still continue 2.3% below the recent high recorded on April 1 1934. Both women's apparel and home furnishings advanced during the month, while piece goods and infants' wear were slightly lower, with men's apparel remaining unchanged. While the composite index shows a fractional gain above a year ago, most of the subdivisions are slightly lower, although home furnishings were slightly higher. With the exception of infants' wear, all groups show gains above the recent low. Analysis of the individual items, comprising the index shows gains among the following: Silks, woolens, sheets and pillow cases, women's hosiery, aprons and house dresses, furs, women's underwear, men's hosiery, shirts and neckwear, clothing, including overalls; men's shoes, furniture, floor

p://fraser.stlouisfed.org/

coverings, musical instruments, luggage and china. Very few items were lower during the month. The latter includes cotton wash goods, blankets and comfortables, men's underwear, hats and caps, infants' socks. A further markup in retail prices will be necessary to reflect replacement, despite the gain thus far realized according to A. W. Zelomek, economist, under whose supervision the index is constructed. The advance thus far has been comparatively slight, considering the recent advance in wholesale prices. Caution in marking up prices is still evident, according to Mr. Zelomet Zelomek.

Increase of 0.8 of 1% Noted in Index of Retail Costs of Food of United States Department of Labor for Two Weeks Ended Oct. 22

Two Weeks Ended Oct. 22 The index of retail food costs advanced 0.8 of 1% during the two weeks ended Oct. 22, Commissioner Lubin of the Bureau of Labor Statistics of the United States Department of Labor announced Nov. 6. "Food costs are higher for all commodity groups except meats, fats and oils, and beverages and chocolate, with the greatest increase in fresh fruits and vegetables," Mr. Lubin said, adding: The current index, 80.5 (1923-25 equals 100.0), is 6.3% higher than for the corresponding period of one year ago, when the index was 75.7. It is 17.7% below the level of Oct. 15 1930, when the index was 97.8. The index for the current period is 127.6 when converted to a 1913 base. Cereals and bakery products increased 1.1%. The two most heavily weighted items in the group, flour and white bread, both advanced by 1.7%. The price of flour rose in 35 cities. In 28 of these cities an increase was reported for Oct. 8. Of the 16 cities in which there was no price change, 14 were in the central and western areas. The price of bread increased in 15 cities. The greatest advances were reported in Washington, D. C., Milwaukee and Philadelphia. INDEX NUMBERS OF RETAIL FOOD COSTS

* Preliminary-subject to revision.

• Preliminary—subject to revision.
Meat prices declined 0.8 of 1%. This group has shown a decrease at each of the last three price-reporting periods beginning Sept. 10. The decrease was due almost entirely to a drop in prices of beef and pork, with the heavier decline for the pork items. Such cities as reported increases in pork prices were in the South and Far West.
Trices of dairy products rose 1.2%. Butter prices advanced 4.1%, with increases reported from every area. There was no change in the price of the evaporated milk and cream dropped slightly. Cheese rose 0.4 of 1%. The continued seasonal advance in egg prices anounted to 2.4%. In the Pacific area the increase for butter amounted to 6.0% and the advance for eggs 8.1%.
Tritis and vegetables rose 3.2% as the result of marked increases in the price of canned goods and dried fruits. Vegetables declined 1.2%. The most important price changes were increases of 5.7% for lemons and 8.7% for potatoes. Prices of all green vegetables except cabbage and celery advanced. Increases in lemon prices were reported for 41 cities, the advances reported hom cities along the Atlantic seaboard. Sweet potato prices. There was a general decline in prices of beverages and chocolate, which included all items except tea, for which no change was reported. Chocolate prices showed the largest change and fell 1.6%.

The fats and oils group dropped 1.0%. Lard prices fell off 1.9%, but

The fats and oils group dropped 1.0%. Lard prices fell off 1.9%, but are higher than for any corresponding period since 1926. There was a close correlation between the changes in pork and lard prices in the same areas. Lard compound also dropped 1.4%. There were increases of 0.1 of 1% for vegetable shortening and 0.6 of 1% for salad oil. Prices of sugar and sweets rose 0.3 of 1%. Sugar prices increased 0.5 of 1%. Molasses fell 0.6 of 1%. Of the 51 cities whose prices are included in the index, 37 reported higher prices, 13 reported decreases, and one city reported no change. The greatest increase, 2.8%, was in Los Angeles, where eggs advanced 8.6% and fruits and vegetables rose 7.9%. Birmingham reported the largest decrease, 1.3%. Fruits and vegetables declined 8.9%, due chiefly to lower prices for sweet potatoes, cabbage and apples. Sweet potatoes, 14.3%, and cabbage, 13.0%, showed the largest decrease, 1.3%.

Slight Increase in Wholesale Commodity Prices During Week of Nov. 9 Reported by National Fertilizer Association

Association The general level of wholesale commodity prices was slightly higher in the week of Nov. 9 than in the preceding week, according to the index of the National Fertilizer Asso-ciation. This index advanced to 79.4% of the 1926-28 aver-age from 79.3 in the week ended Nov. 2. The index is still below the high point for the year, which was reached last month. The index stood at 79.6 a month ago and 75.1 a year ago. An announcement issued by the Association on Nov. 11 also said. year ago. An ann Nov. 11 also said:

Year ago. An announcement issued by the Association on Nov. 11 also said: Tam prices were generally lower last week, showing the fourth con-secutive weekly decline. Moderate advances in hog, sheep and lamb prices were more than offset by declining grain prices. The grains, feeds and livestock index is now at the lowest level reached since last December. The only other group index to show a decline last week was that for fuel, which declined moderately as a result of a drop in the price of crude petroleum, following a sharp advance in the preceding week. Seven of the 14 component groups showed advances, although in most cases they were relatively small. A slight rise took place in the foods index as a result of four commodities rising in price and six declining. The fats and oil group registered an advance with rising prices for butter and cottonseed oil primarily responsible for the increase. The price of lard well, continuing the decline which has been in progress for the past several weeks. The textiles index again rose last week, reaching the highest level since October 1934. With the exception of hemp, which moved downward, all raw textile materials rose in price last week. An increase in the price of pig iron was largely responsible for the upturn in the metals index, although the price of tin also rose during the week. Higher tankage prices caused a fractional rise in the fertilizer materials index. Twenty-six price series included in the index advanced last week, and two declined; in the preceding week there were 24 advances and 27 de-clines; in the second preceding week there were 25 advances and 31 declines. **WEEKLY WHOLESALE COMMODITY PRICE INDEX**

Little Change in Department Store Sales from September to October, According to Board of Governors of Federal Reserve System

Value of department store sales showed little change, on the basis of daily averages, from September to October, a season when these sales usually increase, the Board of Governors of the Federal Reserve System announced Nov. 12. The Board's index, which makes allowance for usual seasonal movements and for differences in the number of business days, was 77% of the 1923-25 average in October as com-pared with 82% in September and 79% in August. Con-tinuing, the Board said:

Aggregate dollar volume of sales in October was 6% larger than a year ago and for the first 10 months of the year was 4% larger than during the corresponding period in 1934.

Weekly Electric Production Establishes Another New High at 1,913,684,000 Kwh.

High at 1,913,684,000 Kwh. The Edison Electric Institute in its weekly statement disclosed that the production of electricity by the electric light and power industry of the United States for the week ended Nov. 9 1935 totaled 1,913,684,000 kwh. This is the third consecutive week that weekly electric output has reached a new all-time high mark. Total output for the latest week indicated a gain of 14.2% over the corresponding week of 1934, when output totaled 1,675,760,000 kwh. Electric output during the week ended Nov. 2 1935 totaled 1,897,180,000 kwh. This was a gain of 13.7% over the 1,669,217,000 kwh. produced during the week ended Nov. 3 1934. The Institute's statement follows: PERCENTAGE INCREASE OVER 1934

Employment and Payrolls in New York State Factories Increased from Mid-September to Mid-October According to Department of Labor—Payrolls in New York City Dropped Although Employment Gained

Gained The number of persons employed in New York State factories increased 0.7% from the middle of September to the middle of October, according to a statement issued Nov. 11 by Industrial Commissioner Elmer F. Andrews of the New York State Department of Labor. Total payrolls advanced 0.1 of 1% during the same period. The usual changes from September to October, as shown by the average movement for the last 21 years, are an increase of 0.3% in employment and a slight decrease of 0.1% in payrolls, Mr. Andrews noted. The employment gain in October followed a greater than usual seasonal increase in forces in September. A good part of the gain in October occurred in some of the metals and machinery industries. In his state-ment of Nov. 11 Mr. Andrews continued: ment of Nov. 11 Mr. Andrews continued:

ment of Nov. 11 Mr. Andrews continued: These statements are based upon reports from 1,703 representative factories located throughout the State. These concerns employed 378,093 workers in October on a total weekly payroll of \$9,238,588. The reports are collected and tabulated and the results analyzed in the Division of Statistics and Information under the direction of Dr. E. B. Patton. The index of factory employment for the State, using the three-year average 1925-1927 as 100, was 77.4 in October, 7.5% above the index for October a year ago. The index of factory payrolls was 65.9, over 15% above last October.

Both Gains and Losses in Employment and Payrolls in Individual Localities New York City factories reported an increase of 1.3% in working forces but a decrease of 2.2% in total payrolls. Seasonal decline in payrolls in some of the clothing industries accounted for a good part of the net decrease. All divisions of the metal and machinery industries registered some net increase in employment. In the clothing industries, women's coat, dress and underwear manufacturers reported net increases in forces. Millinery concerns and men's and boys' clothing manufacturers reported net losses in the number employed. In the miscellaneous stone and mineral products classification in New York City, the representative list of reporting firms employs a relatively small number of workers. Therefore, percentage changes in employment in this group are often more pronounced than in other groups. This month, slight gains in the number of employees in almost all of these concerns resulted in a net increase of 11.8%. Four of the six major up-State industrial areas reported net gains in both working forces and payrolls and two reported net decreases in employment. In Buffalo, further gains in employment and payrolls in some of the metal industries accounted for a good part of the increase. In Utica, larger working forces and total wage payments were noted in some of the textile Both Gains and Losses in Employment and Payrolls in Individual Localities

mills and metal plants. In Syracuse, some of the metal industries and clothing factories contributed to the increases in both employment and payrolls. Somewhat larger forces and higher payrolls were reported in some of the metal plants in the Albany-Schenectady-Troy district. The Binghamton-Endicott-Johnson City district reported a slight decrease in employment in some factories, but somewhat higher payrolls in several industries. A seasonal decline in activity in canning factories in the Rochester area caused a large part of the decrease in both employment and payrolls.

payrolls. The percentage changes from September to October in employment and payrolls by districts are given below:

Trend of Business in Hotels According to Horwath & Horwath—Sales in October Retain Increases of Previous Months Over Year Ago

"Hotel sales in the aggregate show about the same gain in October over last year as the average for the year to date," according to Horwath & Horwath. "The occupancy at 64% has not been exceeded since 1930, which year, how-ever, was 8% below 1929." In their survey of the trend of business in hotels, the firm also states:

Chicago is gradually recovering from the lack of World's Fair business, and in October an increase in convention business over a year ago would have offset the loss if the rates had not been down 12%. In New York the occupancy, at 66%, is only one point below that in 1929, and excepting for that year, the highest for October since 1927. The Pacific Coast again reported a good month with a 12% increase in rates and one of 34% in sales. Since in most groups, further substantial increases in average occupancy are not likely, it is the responsibility of hotel operators to bring up the rates (the general average of which is 27% below the 1929 level) at least sufficiently to cover higher operating expenses and taxes. The sales for this October show the following decreases from the corre-sponding month of 1929: Room sales, 35%; restaurant sales, 19%; total sales (room and restaurant), 27%. The fact that the restaurant sales compare more favorably with 1929 than the room sales is directly attributable to repeal The following table shows the monthly decreases in total sales this year from 1929: Chicago is gradually recovering from the lack of World's Fair business

Increase Noted in World's Visible Supply of Coffee Nov. 1 as Compared with Oct. 1

Nov. 1 as compared with Oct. 1 The world's visible supply of coffee, exclusive of interior stocks in Brazil or the 10,200,181 bags held there as collateral against the 1930-40 coffee loan, totaled 7,793,512 bags on Nov. 1 against 7,652,571 bags on Oct. 1, a gain of 140,941, according to figures compiled by the New York Coffee & Sugar Exchange. Supplies, this Nov. 1, are 729,919 bags above the similar date last year when 7,063,593 bags were in sight, the Exchange announced Nov. 9, adding:

Sight, the Exchange announced 107, 9, attring. During October, the U. S. visible supply increased 74,941 bags from 1,479,571 bags to 1,554,512 bags while European stocks increased 108,000 from 2,991,000 to 3,099,000 bags. Brazilian port stocks, on the other hand, decreased by 42,000 bags from 3,182,000 bags to 3,140,000 bags.

Lumber Orders and Shipments Gain—Production Declines

Declines New business and shipments at the lumber mills gained and production dropped during the week ended Nov. 2 1935, compared with preceding three weeks, according to reports to the National Lumber Manufacturers Association from regional associations. Softwood orders and shipments were each 2% below production compared with 16 and 10% below, respectively, the preceding week, and 16 and 14% below during the week before that. All items were reported by identical mills as appreciably in excess of the corresponding week of 1934, production showing greater gain than either shipments or new business. The Association further reported that: that:

It is estimated that the production of the country is now running 35 to

It is estimated that the production of the country is now running 35 to 40% above the same period of 1934; for the year to date it is only slightly above last year. Due to the comparatively low last quarter of 1934, total 1935 production will probably exceed that of last year by about 5%. During the week ended Nov. 2, 576 mills produced 214,942,000 feet; shipped 212,606,000 feet; booked orders of 210,493,000 feet. Revised figures for the preceding week were: Mills, 588; production, 225,682,000 feet; shipments, 205,350,000 feet; orders, 192,020,000 feet. Figures for both weeks include estimates of hardwood totals, exact reports being tempo-rarily unavailable for Southern hardwoods. -All regions but Western pine, California redwood and Northern hemlock reported both orders and shipments above production during the week ended Nov. 2. Total softwood orders; all but Northern pine and Northern hemlock reported shipments, and all reported production above corresponding week of 1934. Identical softwood mills reported unfilled orders on Nov. 2 as the equiva-

of 1934. Identical softwood mills reported unfilled orders on Nov. 2 as the equiva-lent of 28 days' average production and stocks of 162 days' compared with 22 days' and 180 days' a year ago. Forest products car loadings totaled 29,194 cars during the week ended Nov. 2 1935. This was 1,481 cars less than during the preceding week, 7,507 cars above similar week of 1934, and 6,013 cars above the same week of 1933.

Lumber orders reported for the week ended Nov. 2 1935 by 484 softwood mills totaled 199,657,000 feet, or 2% below the production of the same mills. Shipments as reported for the same week were 201,074,000 feet, or 2% below production. Production was 204,149,000 feet.

Unfilled Orders and Stocks Reports from 477 softwood mills on Nov. 2 1935 give unfilled orders of 586,080,000 feet and gross stocks of 3,407,094,000 feet. The 468 identical softwood mills report unfilled orders as 585,516,000 feet on Nov. 2 1935, or the equivalent of 28 days' average production, compared with 451,179,000 feet, or the equivalent of 22 days' average production on similar date a year ago.

Identical Mill Reports Last week's production of 475 identical softwood mills was 202,946,000 feet, and a year ago it was 120,782,000 feet; shipments were, respectively, 200,362,000 feet and 142,383,000 feet, and orders received, 198,762,000 feet and 136,989,000 feet.

National Industrial Conference Board Reports Further Rise of 0.5% from September to October in Cost of Living of Wage-Earners in United States

Living of 0.5% from September to October in Cost er Living of Wage-Earners in United States Living costs of wage-earners in the United States con-tinued upward, rising 0.5% from September to October, the National Industrial Conference Board announced Nov. 15. Higher prices were reported for each of the major groups of expenditures that compose the wage-earners' budget. Living costs in October of this year were 3.7% above those of a year ago, 17.3% higher than in April 1933, the low point of the depression, but 16.9% lower than in October 1929. the conference Board stated. It continued: Food prices advanced 0.5% from September to October, which made them 7.7% higher than a year ago and 37.6% higher than in the spring of 1933 when they reached their low. They were, however, still 22.5% under their level of October, 1929. Rents continued on their steady upward trend, rising 0.8% from Septem-ber to October. Since October 1934 rents have risen 9.5% and since January, 1934, when they were lowest, they have advanced 15.9%. They were, however, 21.1% lower than in October, 1929. Although clothing prices advanced 0.1% from September to October, they were 4.0% lower than in October 1934. The advance in clothing prices since the low of April, 1933 is 22.6%; the decline since October, 1929. Coal prices advanced 2.8%, considerably more than might be expected

24.8%. Coal prices advanced 2.8%, considerably more than might be expected on seasonal grounds, but they were 0.8 lower than in October 1934, and 8.1% lower than in October 1929. The sundries index for October was 0.3% higher than that for September. The rise is due chiefly to an increase in the cost of admissions to motion picture theaters, information concerning which is obtained in October of each year. There were also slight increases in the prices of housefurnishings. The cost of sundries in October was 0.6% higher than in October 1934 and 4.6% higher than in April 1933 but 5.8% lower than in October 1935 as compared with 119.8 cents in September, 123.6 cents in October 1934 and 100 cents in 1923.

100 cents in 1923.

Tot. lumber 1,140,645 717,798 1,043,683 720,278 1,015,558 729,397 Production during the five weeks ended Nov. 2 1935 as reported by these mills, was 59% above that of corresponding weeks of 1934, and 53% above the record of comparable mills during the same period of 1933. Reported softwood cut in 1935 was 60% above output during the same weeks of 1934 and hardwood cut was 37% above that of the 1934 period. Shipments during the five weeks ended Nov. 2 1935, as reported, were 45% above those of corresponding weeks of 1934, softwoods showing gain of 46% and hardwoods gain of 28%. Reported orders received during the five weeks ended Nov. 2 1935, were 39% above those of corresponding weeks of 1934, and 42% above those of similar weeks of 1935. Softwoods in 1935 showed order gain of 39% and hardwoods gain of 35% over the corresponding weeks of 1934. On Nov. 2 1935, gross stocks as reported by 475 softwood mills were 30% nover a 1935. unfilled orders as reported by 475 softwood mills were ot. lumber 1,140,645 | 717,798 | 1,043,683 | 720,278 | 1,015,558 | 729,397

On Nov. 2 1935, unfilled orders as reported by 475 softwood mills were 590.002.000 feet, the equivalent of 28 days' average production, as compared with 454,411,000 feet on Nov. 3 1934, the equivalent of 22 days' production.

Total (year) Summary for 282 Identic 1935— January February March April May June July August* September

Summary for 456 Identic al Organizat

"textile activity increased to the highest levels since 1933," according to the "Rayon Organon," published by the Textile Economics Bureau, Inc. The paper further states that while business in general may continue good over the next few months "an increase in textile activity should not be expected because of the high levels already obtaining." The following is also from the announcement issued Nov. 7 by the Textile Economics Bureau: With the excention of some dulines in apparel lines, states the "Organon"

The following is also from the announcement issued Nov. 7 by the Textile Economics Bureau: With the exception of some duliness in apparel lines, states the "Organon," sood activity prevails in textile housefurnishings and industrial goods. . . . It is mainly this type of goods which has given the textile industry its snap during 1935. The price situation in both the cotton and silk branches of the industry appear most interesting at the moment, according to the "Organon." For cotton higher prices are expected, whereas for silk, the real test is still ahead in view of the recent sharp price rise. With respect to cotton, it is stated that "as cotton approaches the 12-cent level, there is little inducement for the farmer to sell his cotton. Above 12 cents, he starts to gain, and below 12 cents (and above 10 cents) he cannot lose because of the Governent bounty. It should be expected then that as cotton may approach the 12-cent level, 'country selling' un-doubtedly will fall off sharply. There is this chance, in other words, that cotton prices may be substantially higher in the next few months." Commenting upon the advance in silk prices accompanied by increased deliveries the "Organon" says "we understand that the bulk of the silk delivered even through October was contracted for in earlier months at prices from \$1.25 per pound upward. Thus the test of the effect of high silk prices on its consumption has not yet occurred, but will be seen over the next six months especially." Demand for rayon yarn continued large during October, according to the "Organon." As a result stocks of yarn held by producers declined further during the month, amounting to a five weeks' supply on Oct. 31, compared with a five and one-half weeks' supply held on Sept. 30. The sharp increase in rayon production in the United States, together with the gains reported thus far this year in Japan, Great Britain and other countries will result in a world output of upward of 1,000,000,000 pounds in 1935, a new production peak, the "Organon" esti

60,000,000 pounds for rayon staple.

Automobile Financing During September 1935

A total of 229,302 automobiles were financed in September 1930 on which \$82,148,583 was advanced, compared with 292,614 on which \$106,472,612 was advanced in August, the Depart-ment of Commerce reported this week. Volume of wholesale financing in September was \$41,318,-194, as compared with \$95,588,937 in August.

Monthly statistics on automobile financing, based on data reported to the Bureau of the Census by 456 identical organizations, are presented in the table below for January to September 1935, January to December 1934 and for 282 identical organizations for January to September 1935 and January to December 1934:

J. Byles' Address at A. P. I. Meet—Adequate Crude Oil Stocks Foreseen by Experts—Governor Marland Praises Inter-State Compact Plan—California Urged to Join in Petroleum

Compact

Compact Opposition to Federal control was the keynote of the 16th annual convention of the American Petroleum Institute in session in Los Angeles, Nov. 11 to 14, Axtell J. Byles, head of the trade group eiting the united opposition of the industry to such control and Governor Marland of Oklahoma, stating that not only was it undesirable but inconstitutional. The opening address delivered by Mr. Byles, who was re-elected President at the close of the convention, stressed the point that faced with "the choice of perpetuating a com-petitive, private industry or of socializing industry to sever a political breadline," the oil industry has united in unanimous opposition to Federal control. He argued that there is no power under the Federal Consti-tution for the Feder.l Government to control the production of oil, pointing out that this power was reserved for the States. Six States already have entered in a compact for crude oil regulation, he stated, adding that this method was the "democratic as distinguished from the bureaucratic; the economic as distinguished from the political way of solving our problem." Progress of the industry's producing, refining, transporting

the "democratic as distinguished from the political way of solving economic as distinguished from the political way of solving our problem." Progress of the industry's producing, refining, transporting and marketing branches in serving the public, as well as the forecast of demand, indicates that the period of oil shortage is even more remote than it was 10 years ago, Mr. Byles continued, and there "is no present reason to doubt that the industry cannot meet all requirements for a quarter-century or more." Should a shortage develop, however, he said that the supply gradually would be supplemented by production from bituminous coal and from oil-bearing shales. The technical progress achieved by the industry in recent years, which, through inproved methods of oil discovery, development and production, has made it possible to obtain vast amounts of oil from sands which under the technique of even a decade ago would have remained unrecoverable, was cited by Mr. Byles. The scientific contributions of the oil producer have been matched by those of the refining branch of the industry, he continued. The cracking process alone has reduced the amount of oil necessary to meet consuming demand by 6,000,-

3140 Financial 000,000 barrels during the past decade. The recently-developed polymerization now makes possible the manu-facture of gasoline from refinery gases and from natural gas without using crude oil, he pointed out. A report of the Executive Committee of the Institute to its directors on crude oil prospects stated that no "national crisis caused by a shortage of petroleum products now im-pends or is probable," excerpts from the report following: "There is every reason for confidence that the require-ments of petroleum products to meet national needs and the demands of the consuming public will be met. "Petroleum reserves are more than 100% larger than those estimated 10 years ago. These reserves should be withdrawn at a rate which will insure the maximum recovery. Thus managed, the reserves, together with new discoveries, should relieve us of any possible apprehension regarding our supplies over the next 25 years. "Beyond this period, there is sound insurance against any shortage of petroleum supplies. This insurance in-cludes the certainty of large recoveries from abandoned fields, which impoved recovery methods will make available, together with the development of almost unlimited potential reserve present in our coal and oil shale supply. "The price of crude oil should be such as to insure produc-tion in sufficient quantities, at a reasonable price." Mr. Byles, in a nation-wide radio broadcast from Los

tion in sufficient quantities, at a reasonable price." Mr. Byles, in a nation-wide radio broadcast from Los Angeles Tuesday night, reiterated the assurance of the petroleum industry that there are ample supplies of crude oil

petroleum industry that there are ample supplies of crude oil available for the next 25 years or longer. "So far ahead as the mind of man can run," he said, "there is no possibility of a failure of the Nation's supply of petroleum and its products." He charged that "false prophets" are using warnings of petroleum scarcity "for the purpose of frightening the people and their legislative representative into Federal control of this industry." He said that there is every evdence that the supply of petroleum products is adequate to meet require-

He charged that "false prophets" are using warnings of petroleum scarcity "for the purpose of frightening the people and their legislative representative into Federal control of this industry." He said that there is every evdence that the supply of petroleum products is adequate to meet require-ments for generations, if not centuries, and stated that the Government should not try to "socialize" the industry. In commenting upon technical improvements, he pointed out that whereas in 1914 only 1-6th of a barrel of crude oil could be made into gasoline, by 1926 the proportion was more than 1-3d, and to-day is 44%, or nearly ½. Some modern refining plants, he added, are said to be capable of producing 70 to 75% gasoline from a barrel of erude, while known processes made possible the recovery of almost 100%. At the same time 300 other petroleum products are made. Federal control of the petroleum industry not only is undesirable but unconstitutional. Governor Marland, of Oklahoma, Chairman of the Inter-State Compact Com-mission, told the Convention. A strong plea to California to join the Compact was made by Governor Marland, who pointed out that each oil-producing State is dependent upon the other oil-producing States, and for the benefit of all concerned, close co-operation should be the rule. Governor Marland, however, differed with the stand of Mr. Byles in regards to crude oil stocks and reserves. "Many people say that we shall never have a shortage of oil; that the supply is unliminated," he stated. "The only reason for that is that we have never had a shortage. However, there is no evidence that we shall always produce all the oil and gas we need." A review of the proposed voluntary marketing code for the industry was delivered by C. E. Arnott, Vice-President of the American Petroleum Institute, and Vice-President of the Socony-Vacuum Oil Co., Inc. Mr. Arnott outlined previous attempts to stabilize the marketing branch of the industry, contending that even during the life of the NRA it was inter-industry co-o

code will be presented to these various groups within the near future, he said.

future, he said. Daily average crude oil production of 2,802,250 barrels in the United States for the week ended Nov. 9 was 3,900 barrels above the previous period, the AmericanPetroleum Institute reported. The total compared with the November Bureau of Mines estimate of 2,563,700 barrels, and actual production in the like 1934 period of 2,374,550 barrels. An increase of nearly 20,000 barrels in California lifted production there to the highest point in several years, daily average output totaling 683,500 barrels, in contrast with estimated market demand of 505,000 barrels and actual pro-duction at this time a year ago of 489,200 barrels. The California gain coupled with a rise of 13,000 barrels in Texas production offset lowered output reported by Oklahoma and Kansas.

There were no price changes posted during the week.

REFINED PRODUCTS-HEAFING OIL PRICES ADVANCED-MOVE FOLLOWS INCREASED TRANSPORTATION COSTS-JERSEY STANDARD LIFTS BULK GAS PRICE-PACIFIC COAST MOTOR FUEL PRICES CUT-GASOLINE STOCKS DECLINE

The feature of the week in the refined products markets was the mark-up of ¼-cent a gallon in bulk domestic heating oils initiated by the Socony-Vacuum Oil Co., Inc. late in the week.

The advance, which affected New York and New England

The advance, which affected New York and New England points, was followed by all major competitors. Under the new price schedule, Socony is posting Nos. 2 and 3 at $4\frac{1}{4}$ cents and No. 4 at 4 cents, tank car, New York harbor. Barge prices are $\frac{1}{3}$ -cent a gallon lower. The forward movement was expected to spread into the re-tail price structure although no change had been made up to a late hour last night (Friday). An advance of 10 cents a barrel in Grade C bunker fuel oil also is impending with higher kerosene prices seen indicated. While strengthening of the heating oil price structure at this time of the year is normally a seasonal development.

this time of the year is normally a seasonal development, other factors govern the current advance. The weather has been too warm and demand has been slight in recent weeks for any strength to develop purely on a seasonal basis, trade

other factors govern the current advance. The weather fast been too warm and demand has been slight in recent weeks for any strength to develop purely on a seasonal basis, trade factors contend. The reason behind these increases, and also responsible for the recent advance in bulk and retail gasoline prices in the New York-New England marketing area, is the sharp ad-vances in tanker rates in the Gulf Coast. Prices for "clean-bottoms" have risen to 32 cents a barrel from 18 cents a month ago and 16 cents at this time last year. The sharp forward movement in tanker rates has increased transportation costs for refined products moving from the Gulf Coast, main source of supply for the Atlantic Seaboard markets, to New York and the higher costs are being passed along to the consumer, oil men point out. Standard Oil Co. of New Jersey on Nov. 9 announced an increase of ¼-cent a gallon for 65-66 octane and 62-63 octane gasoline in tank cars in New Jersey, meeting the advance initiated a few days previous by Socony-Vacuum. The New York bulk gas market held firm, following the recent markups. First weakening of the new price structure in the Pacific Coast gasoline markets came Wednesday when the Wilshire Oil Co. reduced tank-wagon gasoline prices ½-cent a gallon in the Los Angeles basis to 10 cents, also paring the dealers' margin by ½-cent a gallon. The company is now selling gasoline at 12½ cents, taxes included, 1 cent under the former level and 1 cent under the retail posting of third-grade gasoline sold by major units. Aided by the Election Day holiday, gasoline stocks dropped 578,000 barrels during the Nov. 9 week to 40,780,000 barrels, the American Petroleum Institute reported. Stocks at refineries were off 209,000 barrels. Reporting refineries oper-ated at 73.6% of capacity, off 1.2 points from the previous week, while daily average runs of crude oil to stills were off 42,000 barrels to 2,506,000 barrels. Cracked gas output held unchanged at a daily average of 568,000. Representative price changes follow: Nov

Nepresentative price changes follow: Nov. 9-Standard Oil Co. of New Jersey advanced New Jersey tank-car prices of gasoline ¼-cent for 65-66 and 62-63 octane. Nov. 13-Wilshire Oil Co. cut tank-wagon prices of gasoline ½-cent a gallon to 10 cents in the Los Angeles basin. Nov. 14-Socony-Vacuum Oil Co. advanced tank-car prices of Nos. 2, 3 and 4 heating oil ¼-cent at New York and New England marketing points. Competitors met the new schedule which puts 2 and 3 at 4¼ cents a gallon, New York, with 4 held at 4 cents a gallon. Barge prices are ¼-cent less. Gasoline, Service Station, Tax Included

Daily Average Crude Oil Production Up 3,900 Barrels The American Petroleum Institute estimates that the daily average gross crude oil production for the week ended Nov. 9 1935 was 2,802,250 barrels. This was a gain of 3,900 barrels from the output of the previous week. The current week's figure was also above the 2,563,700 barrels calculated by the United States Department of the Interior to be the total of the restrictions imposed by the various oil-producing States during November. Daily average pro-duction for the four weeks ended Nov. 9 1935 is estimated at 2,795,350 barrels. The daily average output for the week ended Nov. 10 1934 totaled 2,374,550 barrels. Further details as reported by the Institute follow:

Imports of petroleum for domestic use and receipts in bond at principal United States ports for the week ended Nov. 9 totaled 1,039,000 barrels, a daily average of 148,429 barrels, compared with a daily average of 132,571 barrels for the week ended Nov. 2 and 140,000 barrels daily for the four week ended Nov. 9

weeks ended Nov. 9. There were no receipts of California oil at Atlantic and Gulf Coast ports for the week ended Nov. 9. This compares with a daily average of 33,429 barrels for the week ended Nov. 2 and 13,786 barrels daily for the four weeks

barrels for the week ended Nov. 2 and 13,786 barrels daily for the four weeks ended Nov. 9. Reports received from refining companies owning 89.5% of the 3,806,000 barrel estimated daily potential refining capacity of the United States, indicate that 2,506,000 barrels of crude oil daily were run to the stills operated by those companies and that they had in storage at refineries at the end of the week, 24,656,000 barrels of finished gasoline; 5,051,000 barrels of unfinished gasoline and 107,508,000 barrels of gas and fuel oil. Gasoline at bulk terminals, in transit and in pipe lines amounted to 16,-124,000 barrels.

Cracked gasoline production by companies owning 95.9% of the potential charging capacity of all cracking units, averaged 568,000 barrels daily during the week.

Coal Production Declines in Latest Week

The United States Bureau of Mines in its weekly coal report said that the total production of bituminous coal dur-

ing the week ended Nov. 2 is estimated at 7,685,000 net tons a decrease of 417,000 tons, or 5.1% from the output in the preceding week. Production during the corresponding week in 1934 amounted to 7,407,000 tons. Anthracite production in Pennsylvania during the week ended Nov. 2 is estimated at 608,000 net tons. The de-crease—173,000 tons, or 22.2%—was due in part to the occurrence of "Mitchell Day," which is observed as a holiday in the hard coal fields. Production during the correspond-ing week last year amounted to 878,000 tons. During the calendar year to Nov. 2 1935 a total of 300,-847,000 tons of bituminous coal and 43,310,000 net tons of Pennsylvania anthracite were produced. This compares with 296,857,000 tons of soft coal and 48,697,000 tons of hard

Pennsylvania anthracite were produced. This compares with 296,857,000 tons of soft coal and 48,697,000 tons of hard coal produced in the same period of 1934. The Bureau's statement follows

ESTIMATED UNITED STATES PRODUCTION OF COAL AND BEEHIVE COKE (NET TONS)

Canadian Gold Output in September Reported 35,585 Ounces Above Year Ago During September Canada produced 280,362 ounces of gold, an increase of 35,585 ounces compared with the corre-sponding month last year, the Dominion Bureau of Statistics reported Nov. 9. Production in the nine months ended Sept. 30 totaled 2,378,272 ounces, an increase of 8.4% over the.2,193,831 ounces produced in the same period of 1934. In Canadian Press advices from Ottawa, Nov. 9, it was also stated: stated:

Ontario led the Provinces in gold production during September with 181,592 ounces, with Quebec second with 42,221 and British Columbia third with 34,677. Manitoba and Saskatchewan produced 13,583 ounces and Nova Scotia 668, while the Yukon's alluvial gold production was reported with 34,677. Manitoba and Saskatchewan produced 13,585 ounces and Nova Scotia 668, while the Yukon's alluvial gold production was reported at 7,599 ounces. Jewelery and scrap receipts at the Royal Canadian Mint during September contained 3,149 ounces of gold. Gold quotations in Canadian funds on the New York market during September averaged \$35.28 per ounce, and at this price the month's output was worth \$9,801 171

was worth \$9,891,171.

Heavy Purchases of Zinc at Unchanged Prices—Lead Buying Continues Active "Metal and Mineral Markets," in its issue of Nov. 14, stated that though buying of lead again was on a substantial scale, the feature in the market for non-ferrous metals in the last week was zinc. Favorable October statistics for zinc started rumors going of an impending advance in the price. A buying movement got under way that absorbed more than 20,000 tons of the metal, virtually all of which was disposed

of by producers at the unchanged basis of 4.85c., St. Louis. Copper was easier abroad, on liquidation by speculators, but there was no change in the situation here. The scarcity in spot tin continues, and prices for near-by metal were largely nominal. Advices from Ottawa state that Canada plans to include non-ferrous metals and non-metallic minerals in the trade agreement. Nothing has been released in Wash-ington as yet on what items will be included in the pact so far as this country is concerned. "Metal and Mineral Markets" further stated:

Copper Buying Slow

Copper Buying Slow The domestic copper market was inactive during the week. Sales reported so far this month by the Association total only a little more than 3,000 tons. The price remained unchanged at 9.25c., Valley, with the undertone firm. The October statistics are being anxiously awaited by the trade, as very large shipments for that month are expected. Mean-while, producers believe that some good buying against requirements for the first quarter will have to set in sooner or later. Consumption is reported at a healthy rate, and producers recognize this by the fact that about 25,000 tons of metal that called for November delivery was delivered to fabricators in October. A similar trend is reported developing for De-cember-shipment copper. The American Bureau of Metal Statistic's recent estimate on foreign consumption of copper reveals a moderate downward trend. The three-months moving average of copper consumption for all the world outside of the United States, in short tons, for 1934 and the first nine months of the current year, follow:

current year. follow

	1934	1935		1934	1935
January	78,766	89.565	July	92,536	103,445
February	79.838	88,448	August	90,093	102,598
March	79,341	92,643	September	85,653	95,621
April	84,433	97,253	October	85,564	
May	87,518	100,066	November	90,349	
June	92,183	103,938	December	89,837	

The foreign market was inactive and the price declined moderately toward the end of the week. The coming British elections, together with the involved Continental political situation, tend to encourage speculators to offer copper more freely.

Brisk Trade in Lead

Brisk Trade in Lead Consumers of lead again came into the market for a large tonnage, sales for the week totaling about 12,000 tons. According to producers, the buy-ing reflects a high degree of confidence in the steadiness of the price structure, even though total stocks of lead above ground in this country have been slowly increasing. The demand was chiefly for December-shipment lead, though producers booked enough prompt and November metal during the week to give weight to the belief that consumption must have increased to at least 38,000 tons a month. Several large blocks were included in the week's transactions. Quotations held at 4.50c., New York, the contract settling basis of the American Smelting & Refining Co., and 4.35c., St. Louis. A fair tonnage was disposed of by St. Joseph Lead during the week at a premium of \$1 per ton on Eastern business. Total stocks of lead at the works of smelters and refiners in this country, including lead in ore, etc., on Oct. 1, were 322,135 tons, which compares with 316,041 tons a month previous and 314,287 tons a year ago. Zinc Holds at 4.85c.

Zinc Holds at 4.85c.

Zinc Holds at 4.85c. Close to a record volume in zinc sales for this year was established during the last week. Sales reported by the industry to the Institute for the week ended Nov. 9 totaled 22,484 tons, most of which was sold for first-quarter delivery to consumers. The favorable statistical report, showing increased shipments to consumers and a substantial reduction in stocks, started the activity in the metal. Most sellers were set for an advance in the price, but uneven distribution of business placed in recent purchasing sprees caused at least one operator to hold to the 4.85c., St. Louis basis. A check on sales made in the competitive market discloses that virtually all of the zinc sold during the week was booked at the unchanged price level. The undertone was firmer, but there were sellers at 4.85c. up to the close of yesterday.

undertone was firmer, but there were sellers at 4.85c. up to the close of yesterday. Total sales of Prime Western zinc during October amounted to 22,896 tons, according to the American Zinc Institute. This compares with 29,069 tons in September and 21,992 tons in August. The weighted average selling price of Prime Western sold during October for delivery in that month was 4.80c. per pound, St. Louis. Sales in October for subse-quent delivery were made at an average of 4.77c.

Spot Tin Scarce

Tin quotations, so far as spot and nearby material were concerned, were more or less nominal all week. The shortage continues, in London as well as here, and on Tuesday Straits on spot was quoted in New York as high as 53.625c. On Nov. 13 the price eased, with sellers at 53c., and inquiry almost lacking. On first-quarter business there were sellers at around 49c. Chinese tin, 99%, was quoted as follows: Nov. 7th, 50.25c.; 8th, 50.50c.; 9th, 50.50c.; 11th, Holiday; 12th, 51.125c.; 13th, 50.875c.

Ten Months' Steel Production 23% Ahead of 1934

Ten Months' Steel Production 23% Ahead of 1934 Steel ingot production in the first 10 months of 1935 was 23% ahead of the tonnage produced in the same period of last year and 6% greater than the tonnage produced during the whole of 1934, according to figures released Nov. 7 by the American Iron and Steel Institute. From January through October of this year a total of 27,160,260 gross tons of open-hearth and Bessemer ingots were produced, which compares with 22,024.236 gross tons produced in first 10 months of 1934. Ingot production in the entire 12 months of 1934 was 25,599,118 gross tons. Production of 3.116.184 gross tons of ingots in October was

the entire 12 months of 1934 was 25,599,118 gross tons. Production of 3,116,184 gross tons of ingots in October was 110% above October a year ago and represents the greatest tonnage produced in any October since 1929 when 4,534,326 gross tons were produced. Production in October 1934 totaled 1,481,902 gross tons. During October of this year ingot production averaged 115,414 gross tons a day and operations were at 52.13% of capacity. In February of this year, which contained 24 wokring days compared with 27 in October, daily production averaged 115,740 gross tons and operations were at 52.28% of capacity, but total production during the month was only 2,777,765 gross tons due to fewer working days. Below we show the figures, as reported by the Institute, for 1934 and 10 months of 1935:

MONTHLY PRODUCTION OF OPEN HEARTH AND BESSEMER STEEL INGOTS—JANUARY 1934 TO OCTOBER 1935 [Reported by companies which in 1934 made 97.91% of the open hearth and 100% of the Bessemer ingot production.]

a Calculated on annual capacities as of Dec. 31 1934 as follows: Open hearth and Bessemer ingots, 68,849,717 gross tons. b Calculated on annual capacities as of Dec. 31 1933 as follows: Open hearth and Bessemer ingots, 68,478,813 gross tons.

Steel Output Rises 1½ Points to 54%—Steel Scrap Index Advances The Nov. 14 issue of the "Iron Age" stated that steel production has risen 1½ points to 54% of capacity, the highest level since the first week in February. At the same time, demand for steel has expanded and the "Iron Age" scrap composite, reflecting advances at both Chicago and Pittsburgh, has moved from \$12.58 to \$12.75 a ton in its first recovery from the recession that set in early in October. The "Iron Age" further stated: Railroad buying is steadily improving, automotive demand has shown

The "Iron Age" further stated: Railroad buying is steadily improving, automotive demand has shown a further gain, Government-financed construction projects are being expedited, and finally the expectation of higher prices has resulted in considerable anticipatory covering. The recent advance of \$2 a ton on billets, blooms, slabs, sheet bars and skelp is primarily responsible for the current movement to get under cover on finished steel. The approach of the year-end inventory period would ordinarily discourage stocking by consumers, but numerous requests for requirement contracts for the remainder of the quarter indicate that many in the trade rate protection against price advances above other considerations. considerations.

<text><text><text><text>

50,000 tons. The Missouri Pacific is inquiring for 500 box cars and may buy a total of 4,000 freight cars. The Missouri-Kansas-Texas is considering the purchase of 1,000 cars. The St. Louis-San Francisco will rebuild 1,100 cars, the Wabash will reconstruct 180, and the Rock Island has placed an order for the conversion of 170. Structural steel awards of 19,230 tons compare with 23,100 tons last week. Plate lettings total 2,500 tons. A trans-Atlantic vessel for the United States Lines for which bids were taken this week calls for 16,000 tons of hull steel. Steel works operations are up 1 point to 45% at Pittsburgh. 114 points

Steel works operations are up 1 point to 45% at Pittsburgh, $1\frac{1}{2}$ points to 57 $\frac{1}{2}$ % at Chicago, 8 points to 77% in the Cleveland-Lorain area, 2 points to 83% in the Wheeling district, 3 points to 88% in the southern Ohio River Valley, and 8 points to 54% in the South. Output is off 4 points to 58% in the Valleys, but is holding unchanged at 40% in the Philadelphia district, 33% at Buffalo and 90% at Detroit. The "Iron Age" composite prices for finished steel and pig iron are unchanged at 2.130c. a pound and \$18.84 a ton, respectively. Price lists for silvery iron and Bessemer ferrosilicon up to 12% have been revised to provide for separate prices for each $\frac{1}{2}$ of 1% range in silicon content instead of 1% as heretofore. The prices in the higher range have been marked up 50 cents a ton, those in the lower bracket remaining unchanged. THE "IDON AGE" COMPOSITE PRICES

The American Iron and Steel Institute on Nov. 11 an-The American Iron and Steel Institute on Nov. 11 an-nounced that telegraphic reports which it had received in-dicated that the operating rate of steel companies having 98.2% of the steel capacity of the industry will be 52.6%of the capacity for the current week, compared with 50.9%last week, 50.4% one month ago, and 27.3% one year ago. This represents an increase of 1.7 points, or 3.3%, from the estimate for the week of Nov. 5. Weekly indicated rates of steel operations since Oct. 22 1934 follow:

"Steel" of Cleveland in its summary of the iron and steel markets on Nov. 11 stated:

Actual consumer requirements, and not an artificial demand stimulated

Actual consumer requirements, and not an artificial demand stimulated by rising prices, still are the determining factors in steel works operations, which last week dropped 1½ points to 53%. Semi-finished steels have been raised \$2 a ton, following the increase of \$1 a ton in pig iron. Finished steel products are expected to respond shortly. Scrap prices have already snapped up to the highest level since October 1930. Yet, so far in relatively few instances are there speculative purchases

shortly. Scrap prices have already snapped up to the highest level since October 1930. Yet, so far in relatively few instances are there speculative purchases. The explanation is that consumers have been given an opportunity to over for the rest of the quarter, and the really effective date for higher prices will not come before Jan. 1. Therefore, steel makers do not expect a rush in shipments, to accelerate operations, until late this month or December. This was the industry's experience when prices were raised in the second quarter of 1934. A year-end bulge in demand is unusual, but not without precedent, and it is being fostered by continued strong support from automobile manu-facturers, prospects for considerable railroad buying soon for early 1936, and structural awards sustained by Federal projects. Introduction of new automobile models at this time is largely responsible for an exceptionally steady rate of steel works operations, which for the past 13 weeks have not varied more than 3½ points. Car output last week again increased, 14,000 units to 90,000. Raw material markets are exhibiting strong contra-seasonal activity. Pig iron shipments, after rising sharply in October, so far in November are 30% ahead of the October rate; coke, 20%. Scrap prices are up at October, estimated at 2,976,000 tons, was the highest of any month since October 1930. Heavy tonnages of foreign iron ore, mainly from Chile, are coming in at Baltimore. Abroad, "Steel's" London Editor cables, British pig iron is up \$1.25 a ton. Weather conditions in most sections of the country are favoring outdoor work, one factor contributing to a five-point rise to 75% in sheet mill operations being large consumption of galvanized sheets. For full-finished sheets and enameling stock, used by a wide range of manufacturers, earliest delivery dates now extend three to five weeks ahead. Structural shape awards for the week held close to recent averages, at 21,000 tons. This year there has been a 20% increase over 1934 in awards for industrial and

this year. Daily average steel ingot production in October, 115.414 gross tons, compared with 2.829.835 tons in September. This was the largest October tonnage since 1929. For 10 months this year, 27,160,260 tons is a gain of 23% over the first 10 in 1934. October operations average 52.13%, second only this year to February's 52.28%. Pittsburgh steel works operations last week declined 3 points to 44%; Cleveland, 3 to 69; Birmingham, ½ point to 55; Detroit, 6 to 88; Buffalo, 5 to 37. Chicago advanced ½ point to 55½; eastern Pennsylvania, ½ point to 39; other districts unchanged. "Steel's'' iron and steel price composite is up 18 cents to \$33.16; the finished steel composite is unchanged at \$53.70; and the scrap index is up 16 cents to \$12.83. The steel industry's ingot production for week to Nov. 11

up 16 cents to \$12.83. The steel industry's ingot production for week to Nov. 11 is placed at 52½% of capacity in the compilation by Dow, Jones & Co., Inc., unchanged from preceding week and com-paring with 53% two weeks ago. In the week of Oct. 21 the rate was 53% and in the week of Oct. 14 it was 52½%. Dow, Jones & Co. further showed:

Dow, Jones & Co. further showed: U. S. Steel is estimated at 42%; the same as in the three previous weeks. For the week as of Oct. 14, the corporation was at $41\frac{1}{5}\%$. Leading inde-pendents are placed at about 63%, compared with $62\frac{1}{5}\%$ in the week before and $63\frac{1}{5}\%$ two weeks ago. In the week of Oct. 21, the independents were at $63\frac{1}{5}\%$, and in the week of Oct. 14 at 62%. The following table gives a comparison of the percentage of production with the nearest corresponding week of previous years, together with the approximate changes, in points, from the week immediately preceding:

	Industry		U.S. Steel		Independents

Current Events and Discussions

The Week with the Federal Reserve Banks

The daily average volume of Federal Reserve Banks outstanding during the week ended Nov. 13, as reported by the Federal Reserve banks, was \$2,484,000,000, an increase of \$2,000,000 compared with the preceding week and of \$15,000,000 compared with the preceding week in 1934. After noting these facts, the Board of Governors of the Federal Reserve System proceeds as follows:

of the Federal Reserve System proceeds as follows: On Nov. 13 total Reserve bank credit amounted to \$2,492,000,000, an increase of \$30,000,000. This increase corresponds with increases of \$75,000,000 in member bank reserve balances and \$10,000,000 in non-member deposits and other Federal Reserve accounts and a decrease of \$2,000,000 in Treasury and National bank currency, offset in part by an increase of \$33,000,000 in monetary gold stock and decreases of \$14,-000,000 in Treasury cash and deposits with Federal Reserve balances on \$8,000,000 in money in circulation. Member bank reserve balances of Nov. 13 were estimated to be approximately \$3,050,000,000 in excess of legal requirements. legal requirements.

Relatively small changes were reported in holdings of discounted and purchased bills and industrial advances. An increase of \$5,000,000 in holdings of United States Treasury notes was offset by a decrease of \$5,-000,000 in holdings of United States Treasury bonds.

The statement in full for the week ended Nov. 13, in com-parison with the preceding week and with the corresponding date last year, will be found on pages 3180 and 3181. Changes in the amount of Reserve bank credit outstanding and in related items during the week and the year order

Complete Returns of the Member Banks of the Federal Reserve System for the Preceding Week

Reserve System for the Preceding Week As explained above, the statements of the New York and Chicago member banks are given out on Thursday, simul-taneously with the figures for the Reserve banks themselves, and covering the same week, instead of being held until the following Monday, before which time the statistics covering the entire body of reporting member banks in 101 cities cannot be compiled. In the following will be found the comments of the Board of Governors of the Federal Reserve System respecting the returns of the entire body of reporting member banks of the Federal Reserve System for the week ended with the close of business Nov. 6: The condition statement of weekly reporting member banks in 101

The condition statement of weekly reporting member banks in 101 leading cities on Nov. 6 shows an increase for the week of \$48,000,000 in total loans and investments, a decrease of \$40,000,000 in demand deposits— adjusted, and an increase of \$138,000,000 in deposit balances of domestic banks. banks.

Loans to brokers and dealers in securities in New York City increased \$11,000,000 in the New York district, \$5,000,000 in the Phladelphia district and \$17,000,000 at all reporting member banks; loans to brokers and dealers outside New York City increased \$4,000,000; and loans on securities to others (except banks) increased \$4,000,000; and loans on securities to others (except banks) increased \$4,000,000; and loans on securities to others (except banks) increased \$4,000,000; and loans on securities to others (except banks) increased \$9,000,000 in the New York district and \$6,000,000, respectively; loans to banks increased \$6,000,000; and "other loans" increased \$23,000,000 in the New York district.\$7,000,000 in the Chicago district and \$40,000,000 at all reporting member banks. Holdings of United States Government direct obligations increased \$67,000,000 in the New York district and \$59,000,000 at all reporting member banks, and declined \$10,000,000 in the Philadelphia district; holdings of obligations fully guaranteed by the United States Government increased \$5,000,000; and holdings of "other securities" declined \$75,-000,000 in the New York district and \$82,000,000 at all reporting member banks. Loans to brokers and dealers in securities in New York City increased

Demand deposits-adjusted declined \$45,000,000 in the New York district and \$40,000,000 at all reporting member banks, and increased \$8,000,000 in the Cleveland district. Time deposits declined \$4,000,000. Deposit balances of other domestic banks increased \$67,000,000 in the New York district, \$13,000,000 in the Boston district, \$10,000,000 in the Richmond district and \$138,000,000 at all reporting member banks.

EXPLANATION OF REVISIONS AND CHANGES MADE IN REPORT EXPLANATION OF REVISIONS AND CHANGES MADE IN REPORT Beginning this week the weekly condition statement of reporting member banks, issued by the Board of Governors of the Federal Reserve System, will cover reporting banks in 101 leading cities as it did prior to the banking holiday in 1933, instead of 91 cities as in the recent past. When publication of the statement was resumed following the banking holiday, certain cities were dropped from the published statement temporarily because all or some of

Statement of Condition of Bank for International Settlements as of Oct 31

Settlements as of Oct 31 The Bank for International Settlements' statement of condition as of Oct. 31, issued Nov. 4, shows that deposits increased 8,000,000 Swiss francs, of which the Bank im-mediately put 7,000,000 into gold bars, it was stated in a wireless dispatch from Basle, Switzerland, Nov. 4, to the New York "Times" of Nov. 5, which added: This made its total gold-bar assets 32,230,000 francs, exceeding the previous peak of April 1934, by 4,000,000. Meanwhile gold-bar sight deposits fell 1,000,000 francs to a total of only 20,000,000. Since L. J. A. Trip succeeded Leon Fraser as President, the Bank has made a practice of keeping substantially more gold-bar assets than liabilities. Total bank funds rose to 668,362,000 Swiss francs, 8,000,000 in deposits being all made from central banks for their own account. Except for gold there was no great change in assets, but a general trend toward greater iquidity, as if a strain were foreseen. The following is the statement of the Bank, as contained

The following is the statement of the Bank, as contained Associated Press advices from Basle, Nov. 4 (figures in Swiss francs at par):

New Trade Pact with Canada Signed at Washington-Erosion of Niagara Falls Among Subjects Discussed by President Roosevelt and Premier Mackenzie King at Recent Meeting

Total liabilities_____668,362,145.96 660,873,456.84

King at Recent Meeting The new Canadian-American trade treaty was signed at Washington yesterday (Nov. 15) in the presence of President Roosevelt and his Cabinet. Prime Minister W. L. Macken-zie-King affixed his signature for Canada and Secretary Hull for the United States. President Roosevelt on Nov. 13 took the first formal step toward ratifying the recently concluded reciprocal trade agreement with Canada, when he assigned "full power" to Secretary of State Hull to sign the treaty on behalf of the United States. The President's announcement that the pact had been completed was made in the course of his Nov. 11 Armistice Day address, which is reported elsewhere in this issue of the "Chronicle." Negotiations be-tween Mr. Roosevelt and Prime Minister Mackenzie-King of Canada were noted in the "Chronicle" of Nov. 9, page 2976. An official statement issued at the White House on Nov. 9 said: The President of the United States and the Prime Minister of Canada

The President of the United States and the Prime Minister of Canada have considered the question of increased trade which has been discussed for some time by representatives of the two nations. There is complete agreement on the objective of a greatly increased flow of trade for the benefit of both countries, and substantial progress has been made toward this end.

It is recognized that such an increase would be beneficially felt in all activities, because trade is but another word for increased employment, transportation and consumption.

Following the signing of the agreement, Secretary Hull issued a statement saying:

"While many other parts of the world are slipping in the direction of economic suicide the trade agreement between our two countries marks an outstanding step in the direction of economic sanity. "It seeks to stimulate sound and healthy trade relationships and thereby to restore employment to the unemployed and a wholesome prosperity to

"It sets an example of what must be done to establish a solid foundation upon which to rebuild a suitable structure of world peace."

In reporting the signing of the pact, Associated Press ac-counts from Washington said:

Rarely, if ever before, had the entire American Cabinet participated in such a ceremony. Its members formed a semicircle behind the President's desk as Messrs. King and Hull signed the two copies of the treaty. Then the United States Seal was affixed by Sidney Y. Smith of the State Depart-

Formal proclamations by the heads of both Governments was all that remained to make the treaty operative.

remained to make the treaty operative. A Washington dispatch of Nov. 13 to the New York "Times" discussed the U. S.-Canadian pact as follows: Details of the agreement, which still were being carefully guarded today, will hardly be made public for two or three days after the signing. Secre-tary Hull and Mr. Mackenzie King reached an understanding during the latter's visit here that the text would be made public simultaneously in Washington and Ottawa. The cremony of signing will take place in the Diplomatic Reception Room of the State Department. President Roosevelt disclosed at his press conference this morning that the formalities incident to the trade agreement between the United States and Canada had started. Nianara Falls Discussed

Niagara Falls Discussed

Niagara Falls Discussed He also made known that he had taken up with the Canadian Prime Minister the problem created by the sloughing off of Niagara Falls. He said that he had asked for a report on a study being made jointly by the Federal Power Commission, the New York State Power Authority and the army engineers, indicating that he would give further consideration to the subject after a perusal of this report. The considered a solution of this problem of more immediate importance than negotiation of a new St. Lawrence seaway treaty, although he had taked about possibilities of the development of the St. Lawrence with the canadian Premier. Meta Department officials seemed interested in little to-day but the Ganadian trade treaty. They regarded it as probably the greatest single and, furthermore, expected it to be so acclaimed by the country when its inl benefits became apparent. Some officials who have been following the negotiations are amused at the proposal of the Florida Agricultural Association to test the constitu-

tionality of the whole reciprocal act because of the reduction of the tariff on pineapples from Cuba under the terms of the trade treaty with that

Government. According to these observers, Florida fruits stand a chance to be benefited manyfold by the Canadian agreement. One of the major provisions of the pact, according to the most reliable information here, is an agreement on the part of Canada to do away with her practical embargoes against sea-sonal fruits from the United States and possibly to reduce the duty ma-terially, or at least stabilize it. This, it was argued, would be of such benefit to Florida fruit producers as to discount any possible ill effects of the lowered rate on Cuban pineapples. the lowered rate on Cuban pineapples.

British Court Recognizes United States Gold Clause Ruling—Rules Holder of British Government Bonds Sold in This Country Must Accept United States Currency

States Currency A British court on Nov. 8 ruled that the present United States dollar is the basis on which the British Government should discharge its obligations on bonds containing the gold clause and sold in the United States in 1917. Justice Branson in the King's Bench Division of the High Court dismissed a petition of right that raised the issue of the direct gold clause in a 20-year $5\frac{1}{2}\%$ coupon gold bond issued by the British Government in 1917 and supported the conten-tion that payment was determined by the United States law and the resolution of the United States Congress that the Government was only obliged to pay lawful currency in re-spect to each nominal dollar. Associated Press advices from London Nov. 8 summarized the decision as follows:

the decision as follows:

the decision as follows: Justice Branson in the King's Bench Division upheld the British Government's claim that payment was established by American law and the decision of Congress that the United States need only pay lawful currency for each nominal dollar. He ruled on a potition of the international trustee for the protection of bondholders of the Aktiengesellschaft, incorporated under the laws of Liechtenstein. The company held a 20-year 51% coupon gold bond issued by the British Government Feb. 1 1917. It contained a promise to pay in New York in gold coin of the United States of the standard weight and fineness existing at the date of the bond, or in London sterling at a fixed rate of \$4.865 for each £1. The petitioner asserted that the principal and interest should be paid in currency equivalent to the gold value instead of on a "dollar for dollar" basis. The Court ruled that the American decision making the payment of debts in gold coin illegal made it impossible for the British Government to pay gold in New York. Therefore, he said, the British Government was obliged to pay only at the fixed rate in London. He dismissed the petition. William DeWitt Mitchell, former United States Attorney-General, estified at the hearing.

estified at the hearing.

We also quote from the London "Financial News" of Nov. 1 regarding the British Government's contention, which was ultimately sustained by the Court:

was utilinately sustained by the Court: The Crown contends that payment in the United States was determined by United States law, and that under the provisions of a public resolution of Congress, the Government were only under obligaiaon to pay in the lawful currency of the United States in respect of each nominal dollar. It is further submitted that in London the Government was only liable for the equivalent of that sum in sterling at the rate of \$4.861/2 to the £. Petitioners' case is that the clause is governed by the English law of contract.

contract.

Evidence for Crown

Mr. Wm. D. Mitchell, a former Solicitor-General and Attorney-General of the United States, continuing his evidence for the Crown yesterday, ex-pressed the opinion that American legislation affecting gold applied gen-erally to transactions with foreign Governments, because in some instances exceptions had been made in the case of foreign Governments. Prior to 1933, continued Mr. Mitchell, promises to pay gold contracted in the United States were constructed to mean that, and did not permit pay-ment in paper currency. He pointed out that where gold coins could not be made to fit the exact sum, it was then legal to tender smaller coins to make up odd cents.

make up odd cents.

Gift Tax Law If the British Government shipped gold to the United States and paid the bondholders in America in gold, the Government's custodian in America would be guilty of a criminal offense. In his opinion if the Government paid in excess of dollar for dollar in paper money, the excess would be a voluntary gift without consideration. There was a gift tax law in the United States, and the excess might be sub-ject to that gift law. Mr. Phanor Edge's View

Mr. Phanor Eder's View

Mr. Phanor J. Eder, recalled, said he considered that payment of the gold value would not be a gift, but honoring a moral obligation. Sir Wm. Jowitt, K.C. (for the bondholders): There are a number of countries continuing to honor their obligations in the old way? Mr. Eder: Yes. He added that they included France, Holland and Soviet Puseia

Russia.

Mussia. Mr. Frederick R. Coudert, a member of the Supreme Court Bar and a legal adviser to the British Foreign Office on American law, said gold clauses were now measuring clauses. American legislation did not conflict with the sovereign rights and im-munity of other countries except when statutes so specified.

Italy Threatens Reprisals if Economic Sanctions are Applied—Note to League Members Contends Action in Ethiopian Dispute was Ill Advised—Warns of Danger to World Recovery

Italy has threatened to retaliate commercially in the case Italy has threatened to retaliate commercially in the case of all nations applying sanctions against her in connection with the Italo-Ethiopian dispute, it was revealed this week, with the publication of the text of an Italian note sent to all League members now considering sanctions. The note pointed out that Italy has thus far maintained her member-ship in the League, but warned that membership is growing distasteful under present conditions. The text of the Italian note was made public on Nov. 12 by the British Foreign Office, after the Italian Ambassador to Washington on the preceding day had outlined its main

League had failed to give due consideration to Italian conten-tions before acting in the dispute. By imposing an arms embargo against Italy while lifting the embargo against Ethiopia the League, according to the note, has aggravated the situation, and has compelled Italy to take measures to protect her African colonies. The proposed economic boycott against Italy, the note continued, is in reality an act of hostility which would justify counter measures. The Italians argued that the imposition of sanctions would further threaten world recovery. There is given below the text of the section of the Italian note discus-sing economic sanctions, as it was made public at London sing economic sanctions, as it was made public at London on Nov. 12:

on Nov. 12: In the economic sphere and again in the moral sphere the Italian Govern-ment must draw the attention of each State a member of the League to the gravity of the measures which the co-ordinating committee at Geneva propose to apply to Italy and the consequences which they threaten to bring not only upon a great nation upon which devolves an essential part of the work of reconstruction and collaboration, which is one of the funda-mental tasks of the League, but also upon the economic system of a world, already so sorely tried, whose power of recuperation is being nullified. No one will be able to deny the right and necessity with which the Italian Government will be faced of defending and insuring the very existence of their people. They will thus be obliged to adopt measures of an economic and financial character which may imply among other things substantial deviations from the present currents of exchange and trade in order to obtain all required for the life of the nation. The prohibition of all Italian exports is more than economic measures; a veritable act of hostility which amply justifies inevitable Italian counter-measures.

measures. The Italian Government further consider that their own position as a party to the dispute does not detract from the value of the objective con-sideration that an artificial attempt to exclude from the world economy a market of 40,000,000 souls runs the risk of drying up immediately and surely the sources of sustenance and life of millions of workers all the

world over. Sanctions and counter-sanctions will finally have the gravest conse-quences of a moral and psychological nature by provoking a disturbance of outlook which may last long after the sanctions have fulfilled their functions and achieved their result of increasing the economic disorder of the world.

Pope Pius Joins Italy in Seeking Postponement of League Sanctions—British and Italian Represen-League Sanctions—British and Italian Represen-tatives Continue Discussions—Anti-British Riots in Cairo—Ethiopia Ignores Mussolini's Demand Railroad Be Barred to Troops

Two important efforts were made this week to induce the League of Nations to abandon the application of economic sanctions against Italy, scheduled to become effective next Monday (Nov. 18). On Nov. 11 Italy sent an identical note to all League members, warning them that the applica-tion of sanctions would endanger world recovery, that Italy might be forced to retaliate if sanctions were actually implied, and that withdrawal of Italy from the League might be the eventual result of such action. The contents of this note are described elsewhere in this issue of our paper. On Nov. 14 it was reported that Pope Pius was seeking to have the League powers delay the application of trade bans, in the interest of world peace. Two important efforts were made this week to induce the

14 it was reported that Pope Pius was seeking to have the League powers delay the application of trade bans, in the interest of world peace. Reference to the Italo-Ethiopian war appeared in the "Chronicle" of Nov. 9, pages 2976-77. After the delivery of the Italian note to League members, protesting against the declaration of sanctions, Great Britain was reported to favor a collective reply to Italy, in the belief that one reason for sending the Italian note had been the hope that it would divide the various Powers. Nevertheless, representatives of Italy and Great Britain continued their negotiations in an effort to find a peaceful settlement of the conflict. The most important recent military action in Ethiopia occurred on Nov. 8, when the Italian troops occupied the city of Makale and the surrounding territory, without a major battle. The Southern division of the Italian army meanwhile continued its advance toward Harrar. Sir Samuel Hoare, British Foreign Secretary, announced on Nov. 9 that regardless of the outcome of the British general election (which was held on Nov. 14), he and his Government would carry out their obligations under the League and would continue their efforts in behalf of peace. A London dispatch of Nov. 9 to the New York "Times" quoted from this address in part as follows: British policy, he insisted, has been unchanged since he spoke at Geneva, and will not change after the present scneral election. for "the great ma-

Quoted from this address in part as follows: British policy, he insisted, has been unchanged since he spoke at Geneva, and will not change after the present general election, for "the great ma-jority of my fellow-countrymen are determined to keep their word to Europe and the world." Sir Samuel reaffirmed his pledges not from the election platform but amid the non-political splendor of the Lord Mayor's annual dinner at the Guildhall. Almost every Ambassador and Minister accredited to the Court of St. James was in the brilliant audience, which listened intently to every word. word.

Again, as in the speech at the League Assembly, Sir Samuel spoke slowly and soberly, with a ring of sincerity in his voice. He occasionally slapped the table before him as if to show that he meant every syllable.

Seeks to Remove Distrust

Seeks to Remove Distrust He did not refer directly to the existing tension with Italy, but made flattering references to Egypt, which were clearly intended to remove distrust of British motives in that vital corner of the Mediterranean. Aware of the widespread resentment in Egypt at being treated like a vassal State, he expressed gratitude for Egyptian co-operation in sanctions against Italy. He denied that British Government opposed the return in Egypt of "the constitutional regime suited to her special require-ments." ments."

"History and geography have linked together our fortunes," Sir Samuel said. "As friends and associates we must deal frankly with each other, facing facts and overcoming difficulties if we can and always determined to understand each other's point of view." It was the first attempt by any British Minister to soothe Egypt's ruffled feelings. The fact that it was made at all showed the anxiety of the British not to let Egypt drift further from friendship as long as the crisis with Italy remained acute.

not to let Egypt and Italy remained acute.

not to let Egypt drift further from friendship as long as the crisis with Italy remained acute. Sir Samuel's reference to Egypt, mentioned in the above extract from his speech, was not sufficient to allay the dis-content in that country, and late this week serious anti-British demonstrations were reported at Cairo. A British officer on Nov. 14 killed one rioter and wounded three others, bringing the total number of deaths in anti-British manifes-tations to four, with approximately 200 casualties. The demonstrations were led by the powerful Egyptian Wafd party, which demanded the resignation of the Government and an end to British "domination" of the Kingdom's affairs. The disorders started during Cairo's celebrations smaller towns. The Wafdist leaders demanded that Prime Minister Tewfik Nessim Pasha resign, and said that other-wise the party would refuse to co-operate with the Govern-ment or with British authorities. It was announced in Addis Ababa on Nov. 9 that Emperor Haile Selassie would refuse to reply to a note from Premier Mussolini of Italy, which informed the Emperor that Italians would refrain from bombing the Addis Ababa-Djibouti railroad and thus severing Ethiopia's communications with the outside world, if Ethiopia would promise to discontinue transporting arms, munitions and troops over the railroad. A Government spokesman said that Ethiopia would refuse to make any such concessions and would continue troop and munition transports as usual.

munition transports as usual.

Manuel Quezon Inaugurated as President of New Philippine Commonwealth—Secretary Dern Reads Proclamation by President Roosevelt—Vice-Presi-dent Garner and Other United States Officials Attend Ceremony in Manila

Attend Ceremony in Manila Manuel Quezon was inaugurated as the first President of the new Commonwealth of the Philippines at ceremonies held yesterday (Nov. 15) in Manila, and attended by Vice-President Garner, Speaker of the House Joseph Burns, and Secretary of War Dern. Mr. Dern, whom President Roosevelt designed as his special representative, issued a proclamation by Mr. Roosevelt, announcing "that the heretofore existing Government of the Philippine Islands is now terminated, and that the Government of the Common-wealth of the Philippines, in entering upon its rights, privi-leges, powers and duties as provided under the Constitution of the Commonwealth of the Philippines and the laws of the United States of America, is the successor to the heretofore existing Philippine Government and to all the rights and obligations thereof." This proclamation became effective immediately. It was signed by President Roosevelt on Nov. 14. Nov. 14.

President Roosevelt sent the following cablegram to Mr. Quezon on Nov. 14:

I send my heartiest congratulations upon your inauguration as the first President of the Commonwealth of the Philippines and my best wishes for the success of your administration.

On the same day Mr. Roosevelt sent the following message to Secretary Dern:

Please convey to President Quezon and the Philippino people on the occa-sion of the birth of the Commonwealth of the Philippines my sincere con-gratulations on this great forward step in the establishment of popular self-government and express to them my confidence in their ability to carry out successfully the final steps in the accomplishment of their complete independence.

President Roosevelt on Nov. 14 also sent a cablegram to Frank Murphy, who retires as Governor-General of the Philippines to become United States High Commissioner to the new Commonwealth. It read as follows:

the new Commonwealth. It read as follows: Please accept the expression of my gratitude and appreciation for the loyal and efficient manner in which you have discharged your duties as Governor-General of the Philippine Islands and my congratulations upon your assumption of office as the first High Commissioner of the United States to the Commonwealth of the Philippines. I wish you every success in the task that lies before you and send you my warmest personal regards. The text of Mr. Roosevelt's proclamation, read yesterday by Secretary Dorn is given holow:

by Secretary Dern, is given below:

The Commonwealth of The Philippines The Commonwealth of The Philippines By the Secretary of War of the United States of America

By the Secretary of War of the United States of America A Proclamation By direction of the President of the United States of America, I, George H. Dern, Secretary of War of the United States of America, do hereby promulgate the proclamation of the President of the United States of America announcing the results of the election held in the Philippine, Islands on Sept. 17 1935, for the purpose of electing officers of the Government of the Commonwealth of the Philippines; and I do hereby announce that the heretofore existing Government of the Philippine Islands is now terminated, and that the Government of the Commonwealth of the Philippines and the Constitution of the Commonwealth of the Philippines and the laws of the United States of America, is the successor to the heretofore existing Philippine Government and to all the rights and obligations thereof. In witness whereof, I have hereunto set my hand and caused the seal of the War Department of the United States of America to be affixed. In an account of the ceremonies on Nov. 15, a wireless message from Manila to the New York "Times" on that date said in part:

said in part:

igitized for FRASER tp://fraser.stlouisfed.org/ The solemnity of a great moment in history pervaded the inaugural ceremonies for President Manuel Quezon this morning on the steps of the Legislature Building before 15,000 guests and more than a quarter million other persons. The guests included Vice-President John N. Garner of the United States, Secretary of War George H. Dern, 17 Senators and 26 Representatives

Representatives. A spirit of national rejoicing has been expressed since last midnight by the continuous blowing of steam and factory whistles and the explosion of fireworks throughout Manila and in the provinces. This elation continued this morning as unprecedented crowds cheered the post-inaugural parade, which included United States Army and constabulary units. At the ceremonies a grave note was injected by Mr. Quezon, who devoted a third of his inauguration speech to warning revellious elements to keep the neare or be cruehed.

a third of his inauguration speech to warning revellious elements to keep the peace or be crushed. "No one need have any misgivings," he said, "as to the attitude of the Government toward lawless individuals or subversive movements. They shall be dealt with firmly. Sufficient armed forces will be maintained at all times to quell and suppress any rebellion against authority of this Government or the sovereignty of the United States. "There can be no progress except under the auspices of peace. Without peace and public order it will be impossible to promote education, improve the condition of the masses, protect the poor and the ignorant against support so that tranquility may reign supreme in our beloved land. Wide-spread public disorder and lawlessness may cause the downfall of consti-tional government and lead to American intervention." *Also Fears Foreign Menace*

Also Fears Foreign Menace

The new President envised another form of danger when he said that "even after independence, if we prove ourselves incapable of the protection of life, liberty and property of nationals and foreigners, we shall be exposed to the danger of intervention of foreign powers." On financial matters, however, the President gave reassurance to those who had feared early raids on the Treasury for a governmental socialization program.

program.

"The Government draws its breath of life from its finances," Mr. Quezon said, "and it must balance income and expenditures if it expects to survive. It is my duty to see that the Government of the Commonwealth lives within

its means and stands four-square on a well-balanced budget." The President then proceeded to his positive program for the new

"To raise living conditions," he declared, "we must increase the wealth of the nation by giving greater impetus to economic development, improving methods of agriculture, diversifying crops, creating new industries and fostering domestic and foreign commerce. We are among the least-taxed people in the world, and therefore when necessity arises we should be willing to accept the burden of increased taxation."

Dern Upholds 10-Year Period

Before Mr. Quezon took the oath as President of what is possibly the first nation in history voluntarily being freed by another, Mr. Dern made a significant address as the representative of President Roosevelt. In the face of swelling agitation by followers of General Emilio Aguinaldo for a transition period shorter than ten years for full freedom, Mr. Dern flatly declared that ten years was necessary "in order to launch the Philippine Republic under the most favorable auspices and provide an adequate safeguard for the interests both of the American and the Filipino neonle." people.

Mr. Murphy's speech to the Philippine Legislature yesterday drew an outburst of praise to-day in the press and on the streets. His report on the surplus in the public Treasury caused especially pleasant surprise. It was generally agreed that, no matter what the future might hold for the Commonwealth, he had sent it off to a promising start.

Vice-President Garner's visit to Manila was reported in these columns Nov. 9, page 2989.

Colombian Government Now Capable of Resuming Part Payment of Service on External Debt, Institute of International Finance Believes—Cites Improve-ment in Country's Finances

ment in Country's Finances Incident to the ratification on Sept. 27 1935 of the peace treaty between Colombia and Peru, said a bulletin issued Nov. 14 by John T. Madden, Director of the Institute of International Finance, which is conducted by the Investment Bankers Association of America in co-operation with New York University, states that the Colombian Government now appears to be capable of resuming service payments at least in part on its external debt. "In spite of various protests," the bulletin stated, "the Colombian Government so far has failed to take any effective steps to correct the complete default on its outstanding external obligations. It ceased to issue scrip in respect of interest due after Jan. 1 1935, and since that time has failed to make any eash payments and has not included any provisions for the service of its external bonds in its 1935 and 1936 budgets." The bulletin continued: bulletin continued:

The Colombian Government continues in default despite the fact that hostilities with Peru, which were given as the cause of the default, ended more than two years ago, that the treaty of peace signed by representatives of the two countries during 1934 has finally been ratified by the Colombian Congress, becoming effective on Sept. 27 1935, and that economic condi-tions in the country as well as the Government's finances have shown considerable improvement. Exports, including gold, have consistently exceeded imports throughout the period of the depression. The excess, however, has decreased during the first six months of 1935 to 13,000,000 pesos as compared with 50,000,000 pesos in the first half of 1934, due to a substantial increase in imports rather than a decrease in exports. An analysis of the report of the Board of Control of Exchange and exports shows that in 1934 the supply of foreign exchange derived from merchandise and gold exports exceeded the demand caused by imports, expenses of Colombian residents abroad, etc., but not including the National Govern-ment payments abroad, by about \$20,000,000. The National Government required from the exchange control board during the year more than \$21,000,000 in exchange, of which about \$1,-194,000 were applied to external debt service charges and about \$400,000 for diplomatic representation abroad. The allocation of the balance is not indicated, but it is unofficially reported that the major portion of it was spent for war supplies, not included among imports. The Colombian Government continues in default despite the fact that

Full service requirements on the external debt of the Colombian Govern-ment outstanding at the end of 1934 amount to about \$6,333,000, or 10,214,000 pesos at the average exchange rate for 1934. Of this amount \$4,614,000 represent interest and \$1,719,000 amortization. Payments of principal and interest actually made during 1934, according to the closed accounts, amounted to 1,925,700 pesos, or \$1,194,000. By increasing total payments by \$3,420,000, the full interest payments on the Govern-ment's external debt could have been met. Now that the treaty of peace has been ratified by both Colombia and Peru, thereby removing the necessity for large military expenditures, the Colombian Government would appear to be well capable of resuming ervice payments at least in part on its external debt."

Argentina to Impose Tax on Grain Exports—Is Effective Dec. 1

Buenos Aires (Argentine) advices of Oct. 31, to the London "Financial News" of Nov. 1 had the following to say:

Commencing on Dec. 1 next, a new grain law will come into operation enforcing a tax on exporters of one cent per 100 kilos on all wheat, linseed, maize, oats, barley and rye shipped.

"The Suit at Law in Latin America"—Bulletin Released by Bureau of Foreign and Domestic Commerce

A 52-page bulletin describing the court system of Argentina A 52-page bulletin describing the court system of Argentina and tracing the course of different types of civil actions and proceedings in Argentine law, has recently been released by the Division of Commercial Laws, Bureau of Foreign and Domestic Commerce, United States Department of Com-merce. Against this background comparative references are made to the courts of civil procedure of Brazil, Mexico, and other contrasting countries of Latin America. The bulletin, entitled "The Suit at Law in Latin America," may be purchased at five cents per copy from the New York District Office of the Bureau, 734 Customhouse, or from the Division of Commercial Laws at Washington. A new issue of the Index of Publications of the Division is now available free upon request. available free upon request.

J. P. Morgan & Co. and Guaranty Trust Co. of New York, as sinking fund administrators, are notifying holders of Kingdom of Belgium external loan 30-year sinking fund 6% gold bonds due Jan. 1 1955, that \$1,314,400 principal amount of these bonds have been drawn by lot for redemption as of Jap. 1 1936 at their principal amount, out of monors amount of these bodds have been drawn by lot for redempined as of Jan. 1 1936, at their principal amount, out of moneys now in the sinking fund and moneys to be paid into the sinking fund on or before said date. Payment will be made at the offices of the sinking fund administrators upon pre-sentation and surrender of the bonds on or after Jan. 2 1936. Interest on the drawn bonds will cease on Jan. 1 1936.

Bulgaria Remits 15% of Nov. 15 Interest on 7½% Stabilization Loan 1928—Rulings on Bonds by

Stabilization Loan 1928—Rulings on Bonds by New York Stock Exchange Speyer & Co. and J. Henry Schroder Banking Corp., as American fiscal agents for the Kingdom of Bulgaria 7½% stabilization loan 1928, announced Nov. 12 that the Bul-garian Government has transferred sufficient funds in dollars to provide for payment of 15% of the interest due Nov. 15 1935. Payment will be made, on or after that date, at the rate of \$5.62 per \$37.50 coupon and \$2.81 per \$18.75 coupon, upon presentation of such coupons, with an appropriate letter of transmittal, at the office of either of the fiscal agents for the stamping of such payment thereon. Such coupons will be returned to the bondholders, to be re-attached to their bonds, in order that their claim for the balance may be preserved. The fiscal agents stated: An announcement will be made shortly regarding the additional paymen.

An announcement will be made shortly regarding the additional paymen, in final settlement of the partly paid May 15 1933 and Nov. 15 1933 coupons of the $7\frac{1}{2}$ % stabilization loan and Jan. 1 1934 coupons of the 7% settlement loan.

A recent announcement that Bulgaria would continue to pay 15% of current interest was given in our issue of Nov. 9, page 2977. The New York Stock Exchange, through its Secretary, Ashbel Green, issued the following rulings on the $7\frac{1}{2}\%$ honds:

bonds:

NEW YORK STOCK EXCHANGE Committee on Securities

Nov. 13 1935

Notice having been received that payment of \$5.62 per \$1,000 bond will be made on presentation for stamping of the coupon due Nov. 15 1935, from Kingdom of Bulgaria 7½% stabilization loan 1928 dollar bonds,

from Kingdom of Bulgaria 7½% stabilization 10an 1928 dollar bonds, due 1968: The Committee on Securities rules that the bonds be quoted ex-interest \$5.62 per \$1,000 bond on Nov. 15 1935; That the bonds shall continue to be dealt in "flat" and to be a delivery in settlement of transactions made beginning Nov. 15 1935, must carry the May 15 1933 (\$16.87 paid), Nov. 15 1933 (\$9.38 paid), (ex May 15 1934 to Nov. 15 1934), May 15 1935 (\$5.62 paid), Nov. 15 1935 (\$5.62 paid) and subsequent courses and subsequent coupons.

ASHBEL GREEN

Partial Payment of Nov. 15 Coupons on Sao Paulo (Brazil) 6½% Bonds of 1927—New York Stock Exchange Rules on Bonds

First of Boston International Corp., as special agent for City of Sao Paulo, Brazil, $6\frac{1}{2}\frac{9}{6}$, external secured sinking fund bonds of 1927, announces that funds have been remitted

for payment of Nov. 15 coupons at the rate of 20% of the dollar face amount. Payment at this rate accordingly will be made by the special agent on and after Nov. 16. The following announcement of rulings on the bonds by the New York Stock Exchange was issued yesterday (Nov. 15) by Ashbel Green, Secretary:

NEW YORK STOCK EXCHANGE

Committee on Securities

Nov. 15 1935. Notice having been received that payment of \$6.50 per \$1,000 bond is being made on surrender of the coupon due Nov. 15 1935, from City of Sao Paulo 6½% external secured sinking fund gold bonds of 1927, due 1957: The Committee on Securities rules that transactions made on and after Nov. 16 1935, shall be settled by delivery of bonds bearing only the Nov. 15 1931, to Nov. 15 1933, inclusive (ex May 15 1934 to Nov. 15 1935, inclusive), May 15 1936 and subsequent coupons; and That the bonds shall continue to be dealt in "Flat."

New York Stock Exchange Promulgates New Rules for Margin Requirements on "When Issued" Securities Conform to SEC Regulations

--Conform to SEC Regulations The Committee on Business Conduct of the New York Stock Exchange on Nov. 12 announced new rules governing special margin requirements on "when issued" contracts designed to conform to Rules JD-4 to JD-12 inclusive of the Securities and Exchange Commission. The Exchange will require 100% margin upon net long commitments in a "when issued" right, and added that "for the purpose of computing such margin, such 'when issued' rights shall be deemed to have no value." Other sections of the new rules are given below: are given below:

are given below: Upon a net long commitment in a "when issued" security other than a right, the required margin shall be computed by subtracting 55% of the current market value of such net long commitment from the net sum which will be payable by the member carrying the account upon the settle-ment of the "when issued" contracts representing such net commitment; but if 55% of such current market value exceeds such net sum, the surplus shall be deemed to have no value for margin purposes. Upon a net short commitment in a "when issued" right or a "when issued" security, the required margin shall be ten points, plus any unrealized loss, and(or) minus any unrealized profit not exceeding ten points, on such commitment.

commitment.

committeent. No margin is required upon the sale of a "when issued" security or a "when issued" right for a customer in any case in which the security upon which the "when issued" security or "when issued" right accrues is in the customer's account at the time of such sale. Special Cash Accounts—No margin shall be required in a special cash account, recorded separately, and not used for the purpose of evading or circumventing the provisions of these rules, in which a customer (a) buys through a member acting as a broker or from a member acting as a dealer "when issued" securities and(or) "when issued" rights pursuant to an agreement made in good faith that the customer will, as promptly as pos-sible on or after the delivery date fixed by the Exchange for the settlement of such "when issued" contracts, make full cash payment for such securities and(or) rights; or (b) sells through a member acting as a broker or to a member acting as a dealer "when issued" securities and(or) "when issued" rights pursuant to an agreement made in good faith that the customer will, as promptly as possible on or after the delivery date fixed by the Exchange as promptly as possible on or after the delivery date fixed by the Exchange for the settlement of such "when issued" contracts, deposit such securities or rights in such special account.

or rights in such special account. Special Arbitrage Accounts—In a special arbitrage account, recorded separately, and not used for the purpose of evading or circumventing the provisions of these rules, no margin shall be required with respect to "when issued" commitments entered into for bona fide arbitrage purposes provided any long or short position in an issued security forming part of such arbitrage shall be margined in accordance with the requirements of Circular C-5221, issued by the Committee on Business Conduct on Aug. 2 1933. The amount of margin prescribed by the foregoing rules is the minimum which must be initially required and subsequently maintained with respect to each account affected thereby; but nothing in these rules shall be con-strued to prevent a member from requiring margin in an amount greater than that specified.

than that specified.

Members must exercise due diligence to learn the essential facts in regard to every special account established pursuant to these rules for cash or arbitrage transactions in "when issued" securities or "when issued" rights.

York Stock Exchange Says Applications for Registration of Foreign Corporate Bonds Should Be Made by Feb. 13—Exemption Period Extended for Three Months New

for Three Months The Committee on Stock List of the New York Stock Exchange on Nov. 12 notified issuers and agents of foreign corporate bonds listed on the Exchange that applications for registrations of such securities should be in the hands of the Exchange and of the Securities and Exchange Com-mission not later than Feb. 13 1936, instead of Nov. 15 1935, as originally provided. The Committee points out that the postponement is made because the SEC extended the date of exemption from registration for such issues to March 31 next. This extension was noted in our issue of Nov. 9, page 2979. The communication of the Stock Exchange Committee on Stock List says in part: Section 13 of the Act gives to the SEC power to require in respect of

Section 13 of the Act gives to the SEC power to require in respect of any security registered on a National securities exchange such information and documents as the Commission may require to keep reasonably current the information and documents filed with the registration statement and such annual reports and such quarterly reports as the Commission may prescribe. In addition to this, the Commission may under this section prescribe the form or forms in which the required information shall be set forth, and other matters periment thereto.

section prescribe the form of forms in which the required mormation shall be set forth, and other matters pertinent thereto. As the Commission has not yet issued any rule under this Section 13, it may be well to call the attention of foreign issuers to Rule JD2(c), which provides that if within 30 days after the publication of any rule or regu-lation which substantially alters or adds to the obligations or detracts from the rights of the issuer of a registered security or of its directors, security-holders or persons soliciting or giving any proxy or consent or

authorization with respect to such security, the issuer may file with the Commission a request that the registration shall expire, together with the reasons for making such request, whereupon such registration shall expire immediately upon receipt of such request or immediately before such rule or regulation becomes effective, whichever date is later. We have written direct to the foreign issuers of securities underlying American certificates which have been issued against them, urging an early filing of a registration statement.

Filing of Registration Statements Under Securities Act

Announcement was made by the Securities and Exchange Commission on Nov. 12 (in Release No. 571) of the filing of 19 additional registration statements (Nos. 1727-1745, in-clusive) under the Securities Act of 1933. The total in-volved, it is noted, is \$202,403,465, of which \$153,240,965 represents new issues. The announcement of the SEC con-tinued. tinued:

tinued: The total includes a \$48,750,000 registration statement filed by the North American Co. covering 1,625,000 participating shares representing 65,000 outstanding shares of \$100 par value common stock of Washington Railway & Electric Co. to be deposited under a deposit agreement. It also includes a \$48,750,000 registration statement filed by Washington Railway & Electric Co. to register the above 65,000 outstanding shares of its common stock. (Dockets 2-1732 and 2-1731, Forms C-2 and A-2, in-cluded in Release No. 553.) Also included in the total is \$30,000,000 of first mortgage bonds, 4½% series, due 1965, of the Kansas Power & Light Co. (Docket 2-1733, Form A-2, included in Release No. 554). Also included is \$11,379,000 of first mortgage bonds, of the Public Service Co. of New Hampshire (Docket 2-1735, Form A-2, included in Release No. 557). Also included in the total is \$12,000,000 of 10-year convertible debentures

Release No. 557). Also included in the total is \$12,000,000 of 10-year convertible debentures due Nov. 1 1945 of the International Cement Corp. (Docket 2-1738, Form A-2, included in Release No. 560). Also included is \$25,000,000 of first and consolidating mortgage bonds, 3½%, series of 1935, due Nov. 1 1965, of the New York & Queens Electric Light & Power Co. (Docket 2-1739, Form A-2, included in Release No. 562). Also included in the total is \$6,000,000 of first mortgage bonds, series A, and \$3,000,000 the proposed aggregate offering price of 30,000 shares of no par value preferred stock, series A, of the Laclede Power & Light Co. (Docket 2-1745, Form A-2, included in Release No. 566). The securities involved are grouped as follows: No of Jewes

\$1.20 a share. Burton & Con, of Baltimore, is President C. writer, and Walter J. Kaufman, of Baltimore, is President C. Filed Nov. 5 1935. F. E. Wisecup, Trustee (2-1741, Form A-1), of San Angelo, Tex., seeking to issue \$600,000 of certificates of beneficial interest, to be offered at \$300 each. Filed Nov. 4 1935. Harris, Hall & Co. (2-1742, Form A-1), of Chicago, Ill., seeking to issue 2,500 shares of \$100 par value preferred stock, to be offered at par, and 28,200 shares of \$10 par value common stock, to be offered at \$17.75 a share. Edward B. Hall, of Chicago, is President of the company. Filed Nov. 5 1935.

Keystone Steel & Wire Co. (2-1743, Form A-2), of Peoria, Ill., seeking to issue \$2,000,000 of 10-year serial notes, \$600,000 of which are to bear interest at the rate of 2%, \$600,000 at the rate of 3%, and \$800,000 at the rate of 4%. The notes are to mature serially as follows: \$200,000 on Nov. 1 1936, and a like amount on each Nov. 1 thereafter to and including Nov. 1 1945. F. S. Moseley & Co., of Chicago, and N. L. Rogers & Co., Inc., of Peoria, are the principal underwriters. W. H. Sommer, of Peoria, is President of the company. Filed Nov. 6 1935.
 Menasco Manufacturing Co. (2-1744, Form A-1), of Los Angeles, Calif., seeking to register 158,200 shares of \$1 par value common capital stock, of which 97,197 shares were issued for assets of the predecessor company (Menasco Manufacturing Co., Unincorporated), three shares were issued to directors of issuer for \$1 a share, and the balance of 60,000 shares was sold in California. G. Brashears & Co., of Los Angeles, is principal underwriter, and A. S. Menasco, of Beverly Hills, Calif., is President of the company. Filed Nov. 6 1935.
 In making public the above list the SEC said :

In making public the above list the SEC said:

In no case does the act of filing with the Commission give to any security its approval or indicate that the Commission has passed on the merits of the issue, or that the registration statement itself is correct.

The last previous list of registration statements appeared in the "Chronicle" of Nov. 9, page 2978.

Temporary Exemption from Certain Provisions of Holding Company Act by SEC to Subsidiaries Acting as Brokers or Dealers in Securities

Holding Company Act by SEC to Subsidiaries Acting as Brokers or Dealers in Securities The Securities and Exchange Commission announced, Nov. 8, that it has granted a temporary and limited exemp-tion from certain provisions of the Holding Company Act to holding company subsidiaries which are engaged in the general business of a broker or dealer in securities. The Commission's ruling exempts this type of company, under certain conditions, from three of those provisions of the Act which deal with transactions in securities, Sections 6(c) (2), 9(a) (1), and 17(c). The text of the Holding Com-pany Act was given in our issue of Aug. 31, pages 1331-1344. In its announcement of Nov. 8 the SEC said: The purpose of the exemption is to permit this type of subsidiary company to continue for the period of the temporary exemption and under the specified restrictions, its regular business in securities of com-panies in the same holding company system do not, over a period of a year, exceed 25% of the total business done, and that the exempted company underwriting of securities of companies in the same holding company system. To be eligible for the exemption, a subsidiary company must have been engaged, regularly and continuously, since Dec. 1 1934, in the general business of a broker or dealer in securities. Among other conditions to be met, the company must file a declaration with the Commission, and there-atter a quarterly report including a record of its security transactions during the period.

Hearing on Bond Offerings of Haiti Postponed by SEC Until Further Notice The Securities and Exchange Commission announced Nov. 12 that, on the basis of representations made by the Department of State, the hearing in the matter of readjust-ment of external obligations of the Republic of Haiti is post-poned until further notice. The SEC said:

The Department of State advised the Commission that it was deemed most desirable that this hearing be postponed until further notice for the reason that this Government's negotiations with the Government of Haiti covering their treaty relationship, including certain financial arrangements discussed at a conference in Washington on April 17 1934, have not been completed.

Incident to the postponement of the hearing, Washington lvices, Nov. 12, to the New York "Herald-Tribune" of ov. 13 had the following to say: advices, Nov.

The hearings were to be held by the Protective Committee Study of the SEC, headed by William O. Douglas, professor of law at Yale University. The Study has been scrutinizing reorganization procedure for the last year, with a view to recommendations to Congress in January for change in

with a view to recommendations to Congress in January for change in existing protective committee law. The relation of the SEC hearing to the "treaty relationship" was not clarified, except it was pointed out that in its hearings on situations con-cerning American investor holdings in foreign bonds, the SEC has charted a wide scope, particularly through its scrutiny of the foreign bondholders' protective council which works in co-operation with the Department of State State

State. Study of the Haitian bond situation was scheduled for Thursday (Nov. 14), when the SEC will resume its public hearings on obligations of certain Latin American countries, held in this country. At the SEC it was said that the hearings on the other nations would be held as scheduled. The SEC has already held hearings on the readjustment of obligations of Brazil and Peru, and will also take up the question of issues of Chile. The hearings, to be held on Thursday, it was said, will be directed par-ticularly at the Chilean situation, with further testimony on Peruvian bonds. The study of foreign obligations, sold to and owned by Americans, is one of the last phases of Prof. Douglas's study. Hearings have been held on industrial and business reorganizations and on municipal bond defaults. In all cases the SEC has been particularly interested in the operation of protective committees, on which restrictive legislation is expected to be recommended to Congress.

SEC Exempts Three Exchanges—Honolulu, Milwaukee and Minneapolis-St. Paul Markets Need Not Regis-ter Because of Small Volume of Transactions— Must Comply with Certain Requirements

The Honolulu Stock Exchange, the Milwaukee Grain and Stock Exchange and the Minneapolis, St. Paul Stock Ex-change have been granted exemption from registration as National securities exchanges, under Section 5 of the Securi-ties Exchange Act of 1934, the Securities and Exchange Commission announced Nov. 13. "It was the opinion of the

Commission, after holding hearings and conducting investi-gations," the announcement pointed out, "that by reason of the limited volume of transactions effected on these ex-changes, it was rot practicable and not necessary or appro-priate in the public interest or for the protection of investors to require their registration as National securities exchanges." The SEC also stated:

The exemptions are, however, subject to certain conditions which require the exchanges to be organized, and to conduct their affairs in such a manner as to insure fair dealing and to afford adequate protection for investors. The principal conditions which the exchanges must meet are, briefly, as follows:

The principal conditions which the exchanges must meet are, briefly, as follows:
 "The data contained in the application for exemption, including information on organization, rules, membership and security lists, must be kept up to date and available to the public.
 "To prevent the excessive use of credit, the same restrictions are imposed with regard to the extension of credit on securities listed on these exchanges as are now applicable to registered securities."
 "Members of the excessive use of credit, the same restrictions are imposed with regard to the extension of credit on securities listed on these exchanges as are now applicable to registered securities."
 "Members of the excempted exchanges are subject to such rules and regulations as the Commission may from time to time prescribe with regard to the aggregate indebtedness of members in relation to their net capital, hypothecation and co-mingling of customers', securities, the regulation of trading on the exchanges by specialists, odd-lot dealers and floor traders, fair dealing in securities carried in the accounts of customers', saw and alse, matched orders, and other activities aimed at manipulating the prices of securities or creating a false or misleading appearance of active trading."
 "To provide for the preservation of information for examination and inspection by the Commission may be provided with an adequate background of statistical material, these reports and include among other things information concerning the quotations and amount and dollar value of transactions in securities are now listed on dear Reserve."
 "To provide for the securities erotanges."
 "To rotation whose securities are now listed on the exchanges.
 "To rotation whose securities are now instend their members will also make such reports to the Commission and their deal Reserve Board as are considered necessary for the regulation of the exchanges."
 "To rotation whose securities are now listed on dear takes or things information concerning the q

The commission reserves the right to prescribe such additional condi-tions as may from time to time be considered necessary.

The Commission also announced that the application of Reno Stock Exchange, Inc., for exemption from registration as a National securities exchange has been denied due to the fact that this exchange has suspended operations and ceased to function as a stock exchange. In addition, the temporary exemption of this exchange was terminated. The Commission added:

Commission added: The termination of the temporary exemption granted to Reno Stock Exchange, Inc., together with the elimination of the Seattle Mining Ex-change which was consolidated on Oct. 1 1935, with the Seattle Stock Exchange, leaves the following five exchanges, as well as the three exchanges granted exemptions, in the category of exchanges granted temporary exemption from registration until Dec. 1 1935: Colorado Springs Stock Exchange, Richmond Stock Exchange, Wheeling Stock Exchange.

James M. Landis Warns that Utility Holding Companies Will Be Penalized if Failing to Comply with Law— SEC Head Says Decision Holding Act Invalid Does not Exempt Concerns from Registration Requirements-Court's Ruling

not Exempt Concerns from Registration Reduire-ments-Court's Ruling Judge Walter C. Coleman's decision that the Federal Utility Holding Company Act is unconstitutional does not necessarily exempt companies failing to comply with the law's provision from civil and criminal penalties, James M. Landis, Chairman of the Securities and Exchange Commis-sion, said at a press conference on Nov. 8. Mr. Landis urged utility holding companies to reveal to the public and their stockholders whether or not they intend to comply with the law and register with the SEC by Dec. 1. Should most of the companies refuse to comply, he said that the result might be a disruption of "orderly business" and an approach to a condition of chaos. Mr. Landis's remarks were concerned with the decision of Judge Coleman which was noted in the "Chronicle" of Nov. 9, page 2985. Mr. Landis said that the issue forced by the ruling was one for the utility business to decide, and not for the SEC, which would continue its "normal course of operations." The issue, he continued, was whether the holding companies would follow the "path of safety" by complying with the law, or the uncharted road of non-compliance, where "serious valid doubt" may be raised on most of the important business transactions of non-registrant concerns. A Washington dispatch of Nov. 8 to the New York "Herald

concerns.

A Washington dispatch of Nov. 8 to the New York "Herald Tribune" quoted Mr. Landis in part as follows:

"If you were a stockholder," he asked reporters, "would you not like to know it if your holding company was planning to register by Dec. 1? Would you not like to know whether your company would be able to carry on refunding, buy properties and enter into service and sales contracts?"

<text><text><text><text><text><text><text>

Court.

the belief that the law would be declared unconstitutional by the Supreme Court. Mr. Landis recalled that the question of registration had been raised a year ago under the Security Exchange Act, when compliance by the stock exchanges was in doubt. "I think that the exchange Act offered the ex-changes an opportunity to rehabilitate themselves in public confidence." Mr. Landis said. "Did they toss it away? Not by a long sight. Maybe the same condition is true in the case of the utility law. However, it is not our problem. It is one for the utilities themselves." Reporters asked if the Chairman were "appealing" to stockholders and "warning" the companies. "I am making no appeal and giving no warn-ing." Mr. Landis said. "It is important that the public should know the problem." he con-tinued. "It is the public's problem. Registration will cover only 20 minutes' work. We deliberately made the process easy. We have offered the companies every guaranty of their constitutional right." Asked whether the issue before the utilities was one for "mass action." such as had been reported, Mr. Landis said that "the question was primarily an individual problem. The allegiance of the management is to the stock-holders rather than to the industry." He denied that he was advocating that compliance with the law be put directly before stockholders. "The issue of registration," he said, "is primarily an issue of the management, but that issue, in that it affects the stockholders, should be made known to them."

A summary of Judge Coleman's conclusions in finding the holding company law invalid was given on page 2985 of our issue of Nov. 9. Judge Coleman said that the Act is un-constitutional "in its entirety." He instructed the trustees for the American States Public Service Co., plaintiffs in the litigation, to treat the law as "invalid and of no effect." In addition to what we gave in our issue of a week ago on the Court's ruling, we also quote the following which was contained in a Baltimore dispatch of Nov. 7 to the New York "Times":

YOFK "TIMES": Hearings in September were marked by bitter relations between Govern-ment and opposing counsel, the latter including John W. Davis, 1924 Demo-cratic Presidential nominee. Attorneys for the Government charged that there has been collusion between the lawyers for parties who attacked the Act and those who defended it in Court. Judge Coleman held that there had been no such collusion, and declared that the charge was "not only baseless but unworthy of any representative of any branch of our Government."

Need of Prompt Ruling Stressed

Mr. Davis had appeared as attorney for Dr. Ferd Lautenbach, a Balti-more dentist, whose holdings in the utility company were said to have a market value of \$400, and who had denied the constitutionality of the Public Utility Act.

Judge Coleman's decision, the first made in a Federal court on the law, covered 96 typewritten pages and ran to a length of nearly 20,000 words; it was said to be one of the longest in the history of the Maryland Federal Court

He said that there was an "actual pressing need for a prompt ruling because of the fast-approaching date when the Act, with its multifarious, drastic requirements, becomes effective."

drastic requirements, becomes effective." Three main reasons were given by the Court for finding the Act un-constitutional. Judge Coleman declared that Congress had exceeded its power under the commerce clause of the Constitution in that "the provisions of the Act are neither by their express language nor by any reasonable implication capable of being restricted to the regulation of public utility holding companies and their subsidiaries or affiliates, when engaged in inter-State commerce." He pointed out that all of the companies in the subsidiaries of the formula of the sub-tion of the subsidiaries of the companies in the subsidiaries of the sub

He pointed out that all of the companies in the case were embraced in the Act's provision "although none of them does any inter-State business or is so engaged in any intra-State business that directly affects or burdens inter-State business.

The hearings attracted leading lawyers from all parts of the country. Besides Mr. Davis, the lawyers for parties opposing the Act included James Piper, Francis J. Carey, Huntington Cairns and William L. Rawls, all of Baltimore, counsel for the trustees of the American States Public Service Co.

Upholding the legality of the Act were: Former Judge John J. Burns, General Counsel for the SEC; Benjamin V. Cohen and Thomas G. Corcoran, special assistants to the Attorney-General; Bernard J. Flynn, United

States Attorney for Maryland, and Ralph P. Buell, who represented Burco, Inc.

From the Baltimore "Sun" of Nov. 8 we take the following:

Collusion Charged

In the Government's statement and during the hearing held on Sept. 27 and 28, it was charged that the intervention of Dr. Lautenbach, who owned \$2,500 principal amount of the debtor's bonds, was brought about to bring Mr. Davis into the case, the Government specifically associating him with the Edison Electric Institute, trade association for the electric power inductor

the Edison Electric Institute, that all parties co-operated "in placing industry. The Government also charged that all parties co-operated "in placing before the Court a case where none of them has a substantial and vital interest in supporting the validity of the Act."

Rebukes U. S. Counsel

Rebukes U. S. Counsel Of these charges Judge Coleman said in his opinion: "It is not forbidden 'collusion' for the parties to a case, by agreement, to put it in such shape that the rights and obligations of the parties can be the more readily determined by the court, especially when matters of public moment are involved. requiring speedy settlement, regardless of an adverse effect upon the Government's interests. . . What has just been said applies equally to the status of the other intervening creditor, Ferd Lautenbach and his counsel. The attempt on the part of counsel for the Government and for the SEC to disparage the motives of both interveners and their counsel is not only baseless, but unworthy of any representative of any branch of our Government and an unwarranted reflection upon the trustees—officers of this court, appointed in this proceeding."

Studies "Public Interest"

In taking up the matter of "national public interest," the opinion stated:

In taking up the matter of "national public interest." the opinion stated: "Indeed, this argument of 'National public interest," the opinion stated: "Indeed, this argument of 'National public interest," if permitted to pre-value to most other business activities, with the result that nothing would be left to State or local autonomy under the Constitution. The Tenth Amendment would become a myth. "Consider the automobile, radio and moving-picture industries. The almost universal use of the automobile by every class of society for every type of human activity, bad as well as good; the constant, grave danger to life and limb inherent in each use; the fact that it has become the most we will assume, for increased regulation in the 'National public interest." But what agency may constitutionally do this regulating? Perhaps, be-cause of the vast inter-State character of the automobile's use, it may not be too far a cry from Federal regulation of intra-State ralinoad rates where they directly impinge upon or burden inter-State traffic, and such use hav-ing become virtually as inseparable, practically speaking, from their use intra-State traffic, as the inter-State traffic, and such use hav-ing become virtually as inseparable, practically speaking, from their use intra-State traffic, as the inter-State rational rates where use they directly if must rest upon the basis, if any, for such Federal regula-tion? Clearly it must rest upon the basis fact, that the thing regulated is actually engaged in inter-State commerce and not, as here, upon the purely incidental fact that the producer or seller incidentally uses instrumentalities of inter-State commerce in the prosecution of a business which in every other respect is distinctly intra-State in character." *Legal Question Only*

Legal Question Only Legal Question Only The opinion concludes the discussion of "national public interest," saying: "Finally, it is believed that enough has been said to make it clear that this court is not to be controlled by other than strictly legal and constitu-tional questions. It is stated that this legislation, is not an exercise of politi-cal power for the purpose of augmenting the economic power of organized ndustry. On the contrary, its purpose is to limit the concentration of power of economic enterprise in the public interest so that it will not menace the safety of the Nation.

safety of the Nation. "If government has not the power to curb the economic fascism and the private socialism of holding company domination, the Federal Government would be without power to prevent the very dangers to democracy which the Supreme Court feared lurked in the National Recovery Act. The clearly expressed ultimate end of this legislation is to decentralize into separate regional organizations the few vast overconcentrated national organizations which control our local power plants all over the country. It is a necessary exercise of political power on a national scale to meet the strength and challenge of the organization of economic power on a national scale ("Congressional Record." Seventy-fourth Congress, First Session). "But, as has been explained at great length, every exercise of Congres-sional power must find its justification in some authority delegated by the Constitution. If such authority is lacking, then it matters not how im-potent or unwilling the States may be or may appear to be, with respect to the desired ends. Congress may not interfere.

Admits Serious Abuses Admits Serious Abuses "It is not to be assumed that the States are, in fact, without adequate power to remedy the evils that exist, any more than it is to be assumed that the entire public utility industry is guilty of mismanagement or predatory practices; or that punishment for the sins of some should be visited upon all. But it may be conceded, as the framers and proponents of the Act assert, that there have been serious abuses by public utility holding companies and, turthermore, that the debtor corporation in the present proceedings is no exception. "It may be conceded that the securities of such holding companies have of the been issued and sold without the consent or approval of the States having jurisdiction over their subsidiaries; that such securities have often been issued on the basis of fictitious asset values and in anticipation of excessive revenue and paper profits at the expense of the count-ting has often concealed the financial statements and account-an adequate appraisal of the financial statements and ascount-an adequate appraisal of the financial statements involved, so that often such unsound capitalization of holding companies involved. Substitute of the utility products of the underlying oper-ated to the detriment not only of widely scattered investors but also of consumers of the utility products of the underlying oper-ated to the detriment not only of widely scattered investors but also of the substitute of the utility products of the underlying oper-ated to the detriment not only of widely scattered investors but also of the substitute of the utility products of the underlying operating companies have operating the substitute of the utility products of the detriment not only of widely scattered investors but also of the substitute of the utility products of the underlying operating companies. *Refused Rate Cuts*

Refused Rate Cuts Refused Rate Cuts "Furthermore, it may be assumed that for the purpose of supporting such overcapitalized security structures, those holding companies have often subsidiary operating companies: that they have often resisted voluntary rate reductions which might strengthen their subsidiaries by increasing the consumption of gas and electricity; that they have often sought unfair and undisclosed profits through a great variety of inter-company trans-actions and have obstructed State regulation through their control of the accounting practices and financial policies of their subsidiary operating companies; that there has often been brought under common control, widely distant and unrelated utility facilities in flagrant disregard of eco-nomic management and, the integration and co-redination of properties; that such has tended to concentrate control of the electric and gas operating industry in the hands of a few powerful groups having a relatively insignif-industry in the industry. Repeats Kernel of Buller.

Repeats Kernel of Ruling "Nevertheless, repeating and summarizing what we have said, 'a National public interest' only exists under the Constitution so as to permit of Federal regulation when the person, company or thing affected with a 'public in-terest' is, in fact, involved directly, not indirectly, in activities over which the Federal Government, through one or more of the powers delegated to it by the Constitution, has jurisdiction."

The opinion ended with the statement that the trustees of the American States Public Service Co. "must treat the Public Utility Act as void and of no effect" in carrying out the affairs of the company or orders issued by the Court the Court.

Outstanding Brokers' Loans on New York Stock Ex-change Increased for Third Consecutive Month During October—Total Oct. 31 Reported at \$792,-421,569—\$11,199,700 Above Sept. 30

burning October—Iotal Oct. 31 Reported at \$792, 421,569—\$11,199,700 Above Sept. 30
For the third consecutive month outstanding brokers' loans on the New York Stock Exchange rose during October from \$781,221,869 Sept. 30 to \$792,421,569 Oct. 31, an increase of \$11,199,700. Compared with Oct. 31 1934, however, the figure at the end of October this year shows a drop of \$34,611,847. Demand loans on Oct. 31 1935 were reported at \$335,-809,469, which compared with \$362,955,569 Sept. 30 and \$456,491,416 Oct. 31 1934, while time loans were shown to be \$456,612,100 against \$418,266,300 at the end of September and \$280,542,000 a year ago. In the statement for Oct. 31 it was shown that \$34,359,130 of Government securities were pledged during the month as collateral for the borrowings. This compares with \$42,878,000 pledged in September. The report for Oct. 31, as made available by the Stock Exchange on Nov. 4, follows:
New York Stock Exchange member total net borrowings on collateral, contracted for and carried in New York as of the close of business, Oct. 31 1935, aggregated \$792,421,569.

Short Interest on New York Stock Exchange Oct. 31 Above Sept. 30

Members of New York Stock Exchange Permitted to Pay Commission to Security Salesmen on Sales of **Own Listed Guaranteed Stocks**

The New York Stock Exchange has accorded permission The New York Stock Exchange has accorded permission to its members to pay a commission to security salesmen on sales of listed guaranteed stocks owned by the members. This privilege was granted by an amendment to the rules adopted by the Governing Committee on Nov. 13. An announcement issued by the Exchange on Nov. 14 incident to the adopting of the amendment said:

to the adopting of the amendment said: The Governing Committee of the New York Stock Exchange, at its meeting yesterday, adopted an amendment to "the Rules Adopted by the Governing Committee Pursuant to the Constitution," the effect of which will be to allow members to pay a commission to security salesmen on sales of listed guaranteed stocks ewned by the members. The previous rule permitted the payment of commissions only on sales of unlisted securities and on sales of listed bonds. The guaranteed stocks on which commissions may similarly be allowed will be designated from time to time by the Com-mittee on Quotations and Commissions. The amended rule (Section 7 of Chapter XVI) reads as follows: "See 7. Members may allow to security salesmen a commission on

The amended rule (Section 7 of Chapter XVI) reads as follows: "Sec. 7. Members may allow to security salesmen a commission on sales of unlisted securities, and on sales of listed bonds, owned by said members, and also on sales of such listed guaranteed stocks, similarly owned, as may be from time to time designated by the Committee on Quotations and Commissions. "Members may allow to security salesmen a commission on the sale of have been purchased directly from the issuing company by said members or their firms either alone or acting jointly with other members or non-members, may allow to security salesmen a commission on the sale of have been purchased directly from the issuing company by said members or their firms either alone or acting jointly with other members or non-members, may allow to security salesmen a commission on the sale of other listed securities acquired by said members or their firms in any manner other than by purchase directly from the issuing company and on the sale of listed bonds not owned but upon which said members or their firms have determined that it is not against the interest of the Exchange to an option, provided the members paying such commission shall have they be special Committee on Secondary Distribution and such Committee shall have determined that it is not against the interest of the Exchange to fire such securities and shall not have changed such determination. "In all cases where commissions to such other employees in their offices as may allow similar commissions to such other employees in their offices as may allow similar commissions to such other employees in their offices as may allow similar commissions to such other employees in their offices as may be approved by the Committee on Quotations and Commissions."

Committee of Investment Bankers Seeks Data on Segregation of Brokers and Dealers—To Send Questionnaire to Brokers Throughout Country

Questionnaire to Brokers Throughout Country It was announced in New York on Nov. 14 by the In-vestment Bankers' Committee, of which Trowbridge Calla-way, of Callaway, Fish & Co., New York, is Chairman, that it will send a questionnaire to various brokerage firms throughout the country on the segregation of the functions of brokers and dealers. The questionnaire, it is stated, is similar to one forwarded to over-the-counter dealers by the Securities and Exchange Commission in August. It will be sent to groups in other cities which will distribute them to local houses. The group headed by Mr. Callaway was formed early in 1934 and is composed of investment firms which act as brokers and dealers in securities. Under terms of the Securities Exchange Act of 1934 the

which act as brokers and dealers in securities. Under terms of the Securities Exchange Act of 1934 the SEC is required to report by Jan. 3 to Congress on the feasibility and advisability of complete segregation of the functions of brokers and dealers. A recent meeting in Chicago attended by officials of stock exchanges throughout the United States, at which the problems of segregation were discussed, was referred to in our issue of Nov. 2, page 2816. In its announcement of Nov. 14, Mr. Callaway's committee said: said:

The proposed questionnaire directs itself to the problem of segregation as it relates to brokers and dealers. The answers will reveal the approx-imate number of customers of the various firms for whom these firms transact business as a broker and with whom these firms transact business as a dealer. The number of employees and partners of the individual firms engaged exclusively in the brokerage or dealer end of the business is re-ouested. quested.

The questionnaire attempts to find out the effect on the public of segreation—namely, whether greater brokerage commissions or dealer spreads would have to be charged and whether a security firm will be in a position to give the same type of statistical and other information to customers that it can to-day.

Compilation of World's 50 Largest Banks—18 in New York City—List Compiled at Instance of Lewis Gawtry, President of Bank for Savings, New York

Gawtry, President of Bank for Savings, New York A compilation has recently been made at the instance of Lewis Gawtry, President of the Bank for Savings, New York, as to the status of the 50 largest banks in the world, it was announced on Nov. 7 by the Savings Banks Association of the State of New York. In the list appear seven mutual savings banks in the United States and six of them are in New York City, the Association pointed out, adding: It was impossible to obtain all the figures for these banks throughout the world as of the same date, but they are within a close enough range to be comparable. Sixteen of the 50 banks are in foreign countries, nine in China and the rest in the United States. The showing of the mutual savings banks is the more amazing in that at least 25 of these 50 banks have a substantial number of branches, many of them covering entire countries, while no savings bank on the list has more than two branches and always within the limits of the city. The total deposits in these 50 banks is approximately \$32,000,000,000, while the saven gas banks on the list have \$2,000,000,000, or 614 % of the total. The list follows: DEPOSITS OF THE 50 LARGEST BANKS IN THE WORLD

Tidewater Associated Oil Co. (common)	365,885	365,550
Wheeling Steel Corp. (common)	14.676	14,578
Wheeling Steel Corp. (preferred)	1,620	1,520

a Initial reports. b Company also holds 5,214 shares of 7% preferred stock (old) and 2,259 shares of common stock, no par value (old), which are exchangeable

for a total of 5,214 shares of new 6% preferred stock and 23,115 shares of common stock, \$1 par value. These latter amounts are in addition to those shown above. Notice has been received from The Texas Corp. that of a total of 1,270,207 shares of common stock of Indian Refining Co. outstanding, The Texas Corp. has acquired and holds at the present time 1,153,897 shares.

Record Number of Federal Credit Union Chartered During October

During October The 97 Federal credit unions chartered in October were the largest number in any month since the Federal Credit Union Act was passed, according to a statement, Nov. 11, by Director C. R. Orchard of the Credit Union Section of the Farm Credit Administration. A total of 714 of these co-operative thrift and loan associations are now in operation, including organizations in 42 States and the District of Columbia. In his announcement Mr. Orchard stated: Since the Federal Act was passed last year the credit union movement has gained momentum steadily. Groups of 50 or more employees engaged in the same occupation, or neighbors in the same community, are organizing credit unions to save money in small monthly instalments of as little as 25c. each. Loans are made at the rate of 1% a month or less, making it possible to obtain a loan of \$100 at a cost of only \$6.50 amortized through the year.

Interest Collections by Federal Land Banks at I creased Rate, According to Governor Myers of FCA In-

Interest Collections by Federal Land Banks at Increased Rate, According to Governor Myers of FCA
Collections of interest by the Federal Land banks for the 12 months ended Sept. 30 1935 amounted to nearly \$69,400,000, which was 89.5% of the \$77,500,000 of interest maturing during the period, W. I. Myers, Governor of the Farm Credit Administration, announced Nov. 10. For the calendar year 1934 maturities amounted to \$64,900,000, while collections during the period totaled approximately \$57,000,000, or \$7.8% of maturities, Governor Myers said, continuing:
While, for the country as a whole, collections have increased relative to maturities during the year ending Sept. 30 1935, the situation varied widely among districts. The greatest increase in collections has been in the St. Paul and Columbia districts. In the St. Paul district collections rose from 55.8% of maturities for the year 1934 to 69.2% for the 12 months ended Sept. 30 1935, an increase of 24%. In the Columbia district the increase was from 76.8% to 94.6%, which is an improvement of 23.2%. In addition, the Baltimore, Louisville, St. Louis and Berkeley districts showed significant increases for the year ended Sept. 30 1935 as compared to the calendar year 1934.
The Omaha, Wichita and Springfield districts show a decline in collections from a better than average record for 1934. In the Omaha district, collections as a per cent, of maturities during the period declined from 95% for the year 1934 to 83.3% for the 12 months ended Sept. 30 1935. The Gecline in the Wichita district was from 97.9% to 88.3%, and in the Springfield district from 105.9% to 97.4%. Little change in the collection record as between the periods was experienced in the New Orleans, Houston and Spokane districts.

Springfield district from 105.9% to 97.4%. Little Change in the concertion and Spokane districts.
Collections of interest during the year ended Sept. 30 1935 ranged from 69.2% of maturities during the period in the St. Paul district to 104.4% in the Louisville district, where farmers have been rapidly paying up delinquent accounts. Collections amounted to less than 90% of current maturities in only four of the 12 districts, and these districts are the ones which include most of the area severely stricken by drought in 1934.
It is encouraging to see that all districts in which collections amounted to less than 90%.
These collection records indicate that farmers are continuing to assume their responsibilities as members and stockholders of permanent co-operative credit institutions, and are proving their ability to operate co-operative credit institutions as well as other co-operative businesses. By so doing, they are assuring the permanency of the Federal Land Bank System which was established in 1917 to provide farmers with farm mortgage loans having terms suited to the needs of farming.

Governor Myers stated that collections of interest only are shown because borrowers have been permitted to defer the principal portion of their loan instalments during the period since May 13 1933 if their loans were otherwise in good standing. He also pointed out that a comparison of the year ending Sept. 30 1935 with the year ending Sept. 30 1934 was not possible because comparable data are not available prior to 1934. Periods of at least a year are necessary for comparison because many of the loans in certain districts have annual maturities.

have annual maturities. The following table, showing the amount of maturities and collections, was issued by Mr. Myers:

INTEREST	MATURITIES AND DEC. 31 1934	COLLECTIONS; 12 AND SEPT. 30 1935	ENDED
-			

	Year Ended Dec. 31 1934		Year Ended Sept. 30 1935

Fletcher Joint Stock Land Bank, Indianapolis, Calls \$253,500 of 5% Bonds for Redemption May 1 1936 Announcement was made in Indianapolis, Ind., Nov. 7, by William B. Schiltges, President of the Fletcher Joint Stock Land Bank, that \$253,500 of 5% Fletcher Joint Stock Land Bank bonds, due Nov. 1 1952 and May 1 1953, have been called for retirement by directors of the company. Successful refunding of \$3,739,500 in 5% and 5½% bonds of the Joint

Stock Land Bank into lower-yield issues has been accom-plished during 1935. Mr. Schiltges's announcement also stated:

stated:
The new call of \$253,500 is for payment on May 1 1936, and holders of these bonds, issued Nov. 1 1922 and May 1 1923, maturing Nov. 1 1952 and 1953 but callable Nov. 1 1932 and May 1 1933 or any interest-paying period thereafter, will have the privilege of exchanging their holdings for a new series of bonds with the interest adjustment figured as of May 1 1936, according to H. F. Clippinger, Vice-President of Fletcher Trust Co., the bond department of which is handling the retirement program for the Joint Stock Land Bank securities.
Bonds to be exchanged for the old issues on May 1 1936 will be dated Nov. 1 1935, mature Nov. 1 1944, and provide an interest yield of 34%, and will be callable Nov. 1 1940 any interest-paying period thereafter. Such of the bonds under the most recent call by the directors as are not exchanged were to have been offered for cash at a price of 101, yielding slightly more than 3%, Mr. Clippinger said, but subscriptions have already been received by the bond department of Fletcher Trust Co. which exhaust the entire total of this portion of 5% bonds.
The new bonds to be offered in exchange for the called \$253,500 will be dated Nov. 1 1940. They will bear 3¼% interest.

Mr. Schiltges also announced that a total of \$242,000 of Fletcher Joint Stock Land Bank 5% bonds, due April 1 1936, will be retired in cash. No exchange offer for new bonds will be made to holders of this maturity. He said: Showing the general absorbing power of the present market for securities of this type, Mr. Clippinger pointed out that in the retirement of the \$2,638,500 accomplished Nov. 1 of this year, approximately \$2,800,000 of lower coupon bonds was substituted, the remaining \$388,500 being retired from collections in the Joint Stock Land Bank. from collections in the Joint Stock Land Bank.

Value of Commercial Paper Outstanding as Reported by New York Federal Reserve Bank—Total of \$180,400,000 Oct. 31 Compares With \$183,100,000 Sept. 30

The Federal Reserve Bank of New York issued the follow-ing announcement on Nov. 14 showing the value of commer-cial paper outstanding on Oct. 31:

Reports received by this Bank from commercial paper dealers show a total of \$180,400,000 of open market paper outstanding on Oct. 31 1935. This compares with \$183,100,000 outstanding on Sept. 30 1935 and \$187,700,000 on Oct. 31 1934. Below we furnish a record of the figures since they were first reported by the Bank on Oct. 31 1931:

▶ 1935—	1934—	1932-
	May 31\$141,500,000

New Offering of \$100,000,000 of Treasury Bills in Two Series.—To Be Dated Nov. 20 1935.—\$50,000,000 of 117-Day Bills and \$50,000,000 of 273-Day Bills
Announcement of a new offering of Treasury bills, in two series, to the aggregate amount of \$100,000,000, or thereabouts, was made on Nov. 14 by Henry Morgenthau, Jr., Secretary of the Treasury. The bills, to be sold on a discount basis to the highest bidders, will be dated Nov. 20 1935. Each series will be offered in amount of \$50,000,000, or thereabouts; one series will be 117-day bills, maturing March 16 1936, and the other 273-day bills, maturing Aug. 19 1936. The face amount of the bills of each series will be payable without interest on their respective maturity dates. With the 117-day series, approximately \$400,000,000 of Treasury bills will mature on March 16 1936, inasmuch as six previous offering announced this week will be received at the Federal Reserve banks, or the branches thereof, up to 2 p. m., Eastern Standard Time, Monday, Nov. 18. Tenders will not be received at the Treasury Department, Washington. Secretary Morgenthau said that bidders are required to specify the particular series for which each tender is made. There is a maturity of Treasury bills on Nov. 20 in amount of \$50,045,000. In his announcement of Nov. 14 the Secretary stated:

the Secretary stated: The bills will be issued in bearer form only, and in amounts or denomina-tions of \$1,000, \$10,000, \$100,000, \$500,000, and \$1,000,000 (maturity value). No tender for an amount less than \$1,000 will be considered. Each tender must be in multiples of \$1,000. The price offered must be expressed on the basis of 100, with not more than three decimal places, e. g., 99,125. Fractions must not be used. Tenders will be accepted without cash deposit from incorperated banks and trust companies and from responsible and recognized dealers in invest-ment securities. Tenders from others must be accompanied by a deposit of 10% of the face amount of Treasury bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

are accompanied by an express guarancy of payment by an incorporated bank or trust company. Immediately after the closing hour for receipt of tenders on Nov. 18 1935, all tenders received at the Federal Reserve banks or branches thereof up to the closing hour will be opened and public announcement of the acceptable prices for each series will follow as soon as possible thereafter, probably on the following morning. The Secretary of the Treasury ex-

pressly reserves the right to reject any or all tenders or parts of tenders. and to allot less than the amount applied for, and his action in any such respect shall be final. Any tender which does not specifically refer to a particular series will be subject to rejection. Those submitting tenders will be advised of the acceptance or rejection thereof. Payment at the price offered for 'reasury bills allotted must be made at the Federal Reserve banks in cash or other immediately available funds on Nov. 20 1935. The Treasury bills will be exempt, as to principal and interest, and any gain from the sale or other disposition thereof will also be exempt, from all taxation, except estate and inheritance taxes. (Attention is invited to Treasury Decision 4550, ruling that Freasury bills are not exempt from the gift tax.) No loss from the sale or other disposition of the Treasury bills shall be allowed as a deduction, or otherwise recognized, for the purposes of any tax now or hereafter imposed by the United States or any of its possessions.

\$353,118,000 Received to Offering of \$100,000,000 of Two Series of Treasury Bills Dated Nov. 13-\$50,132,000 Accepted for 124-Day Bills and \$50,-017,000 for 273-Day Bills

017,000 for 273-Day Bills A total of \$353,118,000 was tendered to the offering of \$100,000,000, or thereabouts, of two series of Treasury bills, both dated Nov. 13 1935, Henry Morgenthau Jr., Secretary of the Treasury, announced Nov. 8. He said that of this amount \$100,149,000 was accepted. The tenders to the offering were, as noted in our issue of Nov. 9, page 2983, received at the Federal Reserve banks and the branches thereof up to 2 p. m., Eastern Standard Time, Nov. 8. Each series of the bills was offered in amount of \$50,000,000, or thereabouts. One series was 124-day bills, maturing March 16 1936, and the other 273-day bills, matur-ing Aug, 12 1936. Details of the bids to the two issues were contained as follows in Secretary Morgenthau's announce-ment of Nov. 8: 124-Day Treasury Bills, Maturing March 16 1986

124-Day Treasury Bills, Maturing March 16 1936

124-Day Treasury Bills, Maturing March 16 1936 For this series, which was for \$50,000,000, or thereabouts, the total amount applied for was \$192,570,000, of which \$50,132,000 was accepted. The accepted bids ranged in price from 99.975, equivalent to a rate of about 0.073% per annum, to 99.972, equivalent to a rate of about 0.081% per annum, on a bank discount basis. Only part of the amount bid for at the latter price was accepted. The average price of Treasury bills of this series to be issued is 99.973, and the average rate is about 0.079% per annum on a bank discount basis.

273-Day Treasury Bills, Maturing Aug. 12 1936

213-Day Treasury Bills, Maturing Aug. 12 1936 For this series, which was for \$50,000,000, or thereabouts, the total amount applied for was \$160,548,000, of which \$50,017,000 was accepted. The accepted bids ranged in price from 99.897, equivalent to a rate of about 0.136% per annum, to 99.887, equivalent to a rate of about 0.149% per annum, on a bank discount basis. Only part of the amount bid for at the latter price was accepted. The average price of Treasury bills of this series to be issued is 99.892, and the average rate is about 0.143% per annum on a bank discount basis.

Gold Receipts by Mints and Assay Offices During Week of Nov. 8—Imports Totaled \$19,368,997 Announcement was made on Nov. 11 by the Treasury Department that receipts of gold by the mints and assay offices during the week of Nov. 8 totaled \$23,117,403.81. Of this amount, it is noted, \$19,368,996.51 represented imports, \$705,337.08 secondary, and \$3,043,070.22 new domestic. The amount of gold received during the week of Nov. 8 by the various mints and assay offices is shown in the following tabulation issued by the Treasury:

Philadelphia New York San Francisco Denver New Orleans	$\begin{array}{r} 19,192,000.00\\ 109,322.13\\ 49,213.36\\ 12,936.69 \end{array}$	Secondary \$166,468.64 371,100.00 45,781.20 36,156.24 70,424.77	New Domestic \$297.82 251,200.00 1,660,849.70 461,541.78 587.19
Seattle		15,406.23	668,593.73

\$501,333 of Hoarded Gold Received During Week of Nov. 7—\$18,503 Coin and \$482,830 Certificates
The Federal Reserve banks and the Treasurers' office received \$501,332.84 of gold coin and certificates during the week of Nov. 7, it is shown by figures issued by the Treasury Department on Nov. 11. Total receipts since Dec. 28 1933, the date of the issuance of the order requiring all gold to be returned to the Treasury, and up to Nov. 7, amounted to \$133,021,766.85. Of the amount received during the week of Nov. 7, the figures show \$18,502.84 was gold coin and \$482,830 gold certificates. The total receipts are as follows: Received by Federal Reserve Banks-Week ended Nov. 7_____ Gold Certificates \$478,730.00 Gold Coin \$18,302.84

Received previously	30,882,888.01	99,088,990.00
	\$30,901,190.85	\$99,567,720.00
Received by Treasurer's Office— Week ended Nov. 7 Received previously	\$200.00 266,056.00	\$4,100.00 2,282,500.00
Total to Nov. 7	\$266.256.00	\$2,286,600.00

Note-Gold bars deposited with the New York Assay Office in the amount \$200,572.69 previously reported.

Silver Transferred to United States Under Nationaliza-tion Order During Week of Nov. 8 Amounted to 1,440.30 Fine Ounces

Silver in amount of 1,440.30 fine ounces was transferred to the United States during the week of Nov. 8 under the Executive Order of Aug. 9 1934, nationalizing the metal. Receipts since the order was issued and up to Nov. 8 total 113,015,000 fine ounces, it was noted in a statement issued by the Treasury Department on Nov. 11. The order of Aug. 9 1934 was given in our issue of Aug. 11, page 858. In

the Nov. 11 statement of the Treasury it is shown that the silver was received at the various mints and assay offices during the week of Nov. 8 as follows: Eine Oze

Receipts of Newly-Mined Silver by Mints and Assay Offices from Treasury Purchases Totaled 320,550.34 Fine Ounces During Week of Nov. 8 During the week of Nov. 8, it is indicated in a statement issued by the Treasury Department on Nov. 11, silver amounting to 320,550.34 fine ounces was received by the various United States mints from purchases by the Treasury in accordance with the President's proclamation of Dec. 31 1933. The proclamation was referred to in our issue of Dec. 23 1933, page 4441. It authorizes the Treasury to absorb at least 24,421,410 fine ounces of newly-mined silver annually. Receipts by the mints since the proclamation was issued total 52,566,000 fine ounces to Nov. 8. Dur-ing the week of Nov. 8 the Philadelphia Mint received 211,315.07 fine ounces; the San Francisco Mint, 92,039.02 fince ounces, and the Denver Mint, 17,196.25 fine ounces. Thanksgiving Day Proclamation of President Roosevelt —In Setting Apart Nov. 28 as Day for Expression of Thanks, Says America Must "Strive Against Disorder and Agression" and Act to "Advance Peaceful Trade and Friendship" In the predimension designation of the set of the

In his proclamation, designating Nov. 28 "as a day of national thanksgiving," President Roosevelt urges that "in appreciation of the blessings that Divine Providence has bestowed upon us," America, by example and in practice, must "help to bind the wounds of others, strive against dis-order and aggression, encourage the lessening of distress among peoples, and advance peaceful trade and friendship." The proclamation, dated Nov. 12, follows:

THANKSGIVING DAY, 1935-BY THE PRESIDENT OF THE UNITED STATES OF AMERICA-A PROCLAMATION I, Franklin D. Roosevelt, President of the United States of America, hereby designate Thursday, the 28th day of November, 1935, as a day of national thanksgiving.

thanksgiving. In traversing a period of national stress our country has been knit together in a closer fellowship of mutual interest and common purpose. We can well be grateful that more and more of our people understand and seek the greater good of the greater number. We can be grateful that selfish purpose of personal gain, at our neighbor's loss, less strongly asserts itself. We can be grateful that peace at home is strengthened by a growing willingness to common counsel. We can be grateful that our peace with other nations continue through recognition of our own peaceful purpose. But in appreciation of the blessings that Divine Providence has bestowed on us in America, we shall not rejoice as the Pharisee rejoiced. War and strife still live in the world. Rather must America, by example and in practice, help to bind the wounds of others, strive against disorder and aggres-sion, encourage the lessening of distress among peoples, and advance peaceful

practice, help to bind the wounds of others, strive against disorder and aggres-sion, encourage the lessening of distress among peoples, and advance peaceful trade and friendship. The future of many generations of mankind will be greatly guided by our acts in these present years. We have a new trail. Let us then on the day appointed offer our devotions and our humble thanks to Almighty God and pray that the people of America will be guided by Him in helping their fellow men. In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

FRANKLIN D. ROOSEVELT.

By the President: CORDELL HULL, Secretary of State.

President Roosevelt Issues Appeal for American Red Cross—Urges Generous Gifts to Maintain "Our Great National Relief Agency"

Great National Relief Agency" With the opening on Nov. 11 of the 19th annual roll-call of the American Red Cross, President Roosevelt, that day, issued a message urging generous contributions. Praising the speedy relief given by the Red Cross in 128 disasters which occurred in 37 States during the past year, the Presi-dent said that "it is of the utmost importance that we main-tain the Red Cross as our great National relief agency." The following is the President's message:

The following is the President's message: The American Red Cross is an institution in which our people in every walk of life and in every section of the Nation can unite in a common tie of brotherhood. It represents them in their instinctive desire to be of service to suffering humanity. It knows no distinction of race, creed or color. There are no boundary lines, either State or National, in its never-ending mission of mercy for those who are in distress. During the last year, 128 disasters occurred in 37 of our States. In each catastrophe the afflicted community turned with assurance to the Red Cross for the efflicient relief which was so speedily given. During the same time this great organization has developed a country-wide program for safeguard-ing our homes and our highways from the mounting toll of accidental deaths. Each year, at this time, the Red Cross appeals to our people for the sup-port which will enable it to continue its service to humanity. Each Ameri-can everywhere is given an opportunity in Red Cross as our great National – through individual membership. It is of the utmost importance that we maintain the Red Cross as our great National relief agency. I earnestly urge all who can possibly do so to respond generously and promptly to the Red Cross appeal. FRANKLIN D. ROOSEVELT

FRANKLIN D. ROOSEVELT

President Roosevelt Asks Reduction in Interest Rates by Banks on Real Estate Loans—Says Rate Should be Below 6%

Urging banks to lower the interest rates charged on real estate loans, President Roosevelt, at a press conference Nov. 13, said that the existence of large deposits in banking institutions only tend to retard economic recovery. He said that interest on loans on good land should be held below 6%. As to the President's remarks, Washington advices, Nov. 13, to the New York "Herald-Tribune" of Nov. 14, had the following to say: These remarks at the White House press conference came indirectly as

to the New York "Herald-Tribune" of Nov. 14, had the following to say: These remarks at the White House press conference came indirectly as a further form of Administration advice and appeal to the nation's bankers now meeting in New Orleans at the 61st annual convention of the American Bankers Association. The President's formal comments to-day were stronger than his observations in his letter to the convention yesterday, in which he voiced hope that banks would "provide credit, when it can be done on a sound basis, to business and industry and to real estate." The President's comment to-day was prompted by a question as to whether large bank deposits were necessarily a favorable economic sign. He replied that one essential factor lay in how the deposits were used. If they were not used in a sensible way it would slow up recovery, he said. The President's comment to-day was able to pay 60% of the cost in cash and he wanted to borrow 40% on a mortgage. He shopped around at the banks in his county, according to the President, and the best interest rate he could get was 6%. That kind of rate on good land security slows up economic revival, Mr. Roosevelt remarked. He pointed out also that this projected transaction was in the East where interest rates have not been as high as elsewhere. "What do you think is a proper rate?" the President was asked. He did not commit himself on a definite figure but said it should be less than 6%. The President added that the Administration had been trying to reduce rates all over the country. Of course, in certain regions conditions are not as stabilized as in older parts of the country, he remarked. The worst "pirate rates" which existed in some sections had been prac-tically eliminated, Mr. Roosevelt went on. In Georgia, for instance, it used to be difficult to buy farm land at less than an 8 to 10% interest rate. In the West it had been the same way. According to a dispatch Nov. 14 from New Orleans to the "Horald_Tribuune" Rohert V. Fleming, of Washington.

According to a dispatch Nov. 14 from New Orleans to the "Herald-Tribune" Robert V. Fleming, of Washington, new president of the association, declared, in an interview that the instance of high interest rates, cited by President Roosevelt during his press conference, must have been an isolated one, for he believed that all commercial borrowings were now being handled at 6% or less.

Lower Home Financing Costs Requested by President Roosevelt in Message to United States Building and Loan League Convention in Cincinnati

President Roosevelt, in a message to the United States Building and Loan League on Nov. 13, urged that the cost of home financing be lowered, and pointed out that "nothing in our home financing is more obvious than that family incomes must not be raised to a higher level but that Ameri-can ingenuity must provide better housing at lower cost." The President's message, read at the annual convention of the League held in Cincinnati, Nov. 13-15, follows: The instructive experiences of the past for years make us aware that

The instructive experiences of the past few years make us aware that major improvements in the conditions of home ownership and home finance are needed.

With our great resources of labor, materials, money and management we ought to meet out country's housing requirements with courage and fore-sight. Nothing in our home financing is more obvious that that family incomes must not only be raised to a higher level but that American in-genuity must provide better housing at lower cost. We have the ingenuity to design and execute better construction, to achieve larger economies in production and to fit out pattern to improving standards.

We must also have the courage to lower costs of financing, and by combined economies and good management to increase the security of frugal investors and borrowers

President Roosevelt, in Message to Automobile Con-vention, Urges Campaign for Highway Safety In a message to the American Automobile Association,

In a message to the American Automobile Association, in convention in Chicago, President Roosevelt yesterday (Nov. 15) urged an intensive and continued campaign for highway safety. "Our people must realize once and for all that freedom to use the streets and highways carries with it important responsibilities and obligations," he said in his message. The President wrote (it was stated in Associated Press advices from Chicago last night), that Federal and State Government investments in good roads were largely nullified unless a proper degree of safety were assured. The message continued:

The country is perhaps more conscious than ever before of the extent of the tragedy resulting from highway fatalities and injuries. Both from the humanitarian and economic aspect, I regard this as one of the most serious problems confronting us.

Mindful of the part your organization has had in the battle for greater safety, I can think of no way in which you can better serve the American people than through the continuation of your efforts to solve the problem through constructive legislation, adequate enforcement of laws and regula-tions, and continuing education of drivers and pedestrians, young and old. The Federal and State Concernment on the problem through the second state of the second state of

tions, and continuing education of drivers and pedestrians, young and old. The Federal and State Governments are making an enormous capital investment in highways. This investment should repay us, whether we regard it from the standpoint of transportation to serve business and individuals, or from the standpoint of the opportunity that extended and improved roads afford for the recreational and cultural needs of the people.

President Roosevelt Finds Evidences of "Great Re-covery"—In Letter to Jesse Jones Read at Convention of American Bankers Association Expresses Hope Bankers Will Take Advantage of Banking Act and Provide Credit

Banking Act and Provide Credit A message from President Roosevelt was brought before the American Bankers Association in annual convention at New Orleans this week. It was contained in a letter ad-dressed to Jesse H. Jones, Chairman of the Reconstruction Finance Corporation, a speaker at the convention. The President, in declaring that "evidences of great recovery are at every hand," indicated himself as gratified to know "that all banks are now in a strong position," and he expressed it as his conviction that with co-operation between banks, business and Government "we will soon solve our remaining difficulties." The President's letter follows in full:

Washington, D. C., Nov. 9 1935

Dear Jesse:

Dear Jesse: Please express to the members of the American Bankers Association, in convention in the beautiful and historic City of New Orleans, my very best wishes for a successful and profitable meeting. I have watched with great interest the continued improvement in banks throughout the country during the past two years. The progress which I reported to their convention last year is being maintained. Evidences of great recovery are at every hand. Bank portfolios and deposits reflect this. I am gratified, as I am sure every member of the American Bankers Association is gratified, to know that all banks are now in a strong position, and I hope they will take full advantage of the new Banking Act and pro-vide credit, when it can be done upon a sound basis, to business and industry and to real estate. I am convinced that with co-operation between banks, business and Government—and mutual confidence—we will soon solve our remaining problems.

problems.

Very sincerely yours (Signed) FRANKLIN D. ROOSEVELT.

(Signed) FRANKLIN D. ROOSEVELT. Primary Aim of United States Is Peace, President Rosevelt Declares in Armistice Day Address-Warns, However, That This Nation Will Protects telf Against Aggression—Announces Conclusion of Trade Pact with Canada A renewed pledge that the United States intends to keep of of future wars was given by President Roosevelt on Nov. 11 in an Armistice Day address before almost 5,000 veterans gathered in the Arlington National Cemetery near Washington. This speech was the principal feature of many Armistice Day celebrations throughout the United States. Similar ceremonies were held in foreign capitals. Speaking at the tomb of the unknown soldier, the President said that the primary purpose of this nation is to avoid being drawn into war, while at the same time seeking "in every prac-ticable way" to promote peace and to discourage war. This bountry, he said, had been a leader in every important attempt to limit and to reduce armaments, and has sought to follow the policy of the "the good neighbor." Despite to follow the policy of the "the good neighbor." Despite to follow the policy of the "the good neighbor." Despite to follow the policy of the "the good neighbor." Despite to follow the policy of the "the good neighbor." Despite to follow the policy of the "the good neighbor." Despite to follow the policy of the "the good neighbor." Despite to follow the policy of the "the good neighbor." Despite to follow the policy of the soley of self-protection go to lengths to follow the soley the anount necessary to safeguard usgatus to mere and in ir—is our accepted policy; and the measure of the soncerned. Defense against aggression by others-adequate defense on address is and will be soley the amount necessary to safeguard usgatus to mere quecky and surely shall we decrease ours. Thesident Roosevelt said that in many other ways the

President Roosevelt said that in many other ways the United States is giving an example to the rest of the world by lowering trade barriers which impede friendly intercourse. He took this opportunity to announce the conclusion of a reciprocal trade agreement with Canada, and said that this pact "will eliminate disagreements and unreasonable restrictions, and thus work to the advantage of both Canada and the United States." The agreement, the President said, may well prove an example of peaceful methods to the rest of the world.

dent said, may wen prove an example of practic inclusion to the rest of the world.
The President's address follows:
My Fellow Americans: The living memory of the World War is close to each of us to-day. Our thoughts return to great objectives of the past as the minds of older men go back to their boyhood ideals.
We Americans were so placed that we gained a perspective of the great world conflict that was perhaps clearer than that of our fellow men who were closer to the scene of battle. For most of the first three years of the war we were not participants, but during the final phase we ourselves engaged on many fronts.
For that reason, perhaps, we understood, as well as any, the cries that

For that reason, perhaps, we understood, as well as any, the cries that went up—that the world conflict should be made a war to end war.

United States Seeks to Promote Peace and Discourage War

We were not invaded, nor were we threatened with invasion, then or later; but the very distance of our view led us to perceive the dire results

later; but the very distance of our view led us to perceive the dire results of war through days of following peace. The primary purpose of this nation is to avoid being drawn into war. It seeks also in every practicable way to promote peace and to discourage war. Except for those few who have placed or who place temporary, selfish gain ahead of national or world peace, the overwhelming mass of American citizens are in hearty accord with these basic policies of our Government, as they are also entirely sympathetic with the efforts of other nations to end war.

dd war. That is why we, too, have striven with great consistency to approve steps That is why we, too, have striven with great consistency to approve steps to remove the causes of war and to disapprove steps taken by others to commit acts of aggression. We have either led or performed our full part in every important attempt to limit and reduce armaments. We have sought by definite act and solemn commitment to establish the United States as a good neighbor among nations. We are acting to simplify defi-nitions and facts by calling war "war" when armed invasion and a resulting killing of human beings take place. But though our course is consistent and clear, it is with disappointment and sorrow that we confess that the world's gain thus far has been small.

Cites Dangers Confronting Mankind

I would not be frank with you if I did not tell you that the dangers that confront the future of mankind as a whole are greater to the world and, therefore, to us than the dangers which confront the people of the United States by and in themselves alone. Jealousies between nations continue; armaments increase; national am-bitions that disturb the world's peace are thrust forward. Most serious of all, international confidence in the sacredness of international contracts is on the wave

all, international confidence in the sacredness of international contracts is on the wane. The memory of our hopes of 1917 and 1918 dies with the death of those of us who took part; it is, therefore, your sacred obligation and mine, by conscious effort, to pass that memory on to succeeding generations. A new generation, even in its cradle or still unborn, is coming to the fore. The children in our schools, the young men and women passing through our colleges into productive life have, unlike us, no direct knowledge of the meaning of war. They are not immune to the glamor of war, to the oppor-tunities to escape from the drabness and worry of hard times at home in the glory and heroism of the arms factory and the battlefield. Fortunately, there is evidence on every hand that the youth of America, as a whole, is not trapped by that delusion. They know that elation and prosperity which may come from a new war must lead-for those who survive it—to economic and social collapse more sweeping than any we have experienced in the past. While, therefore, we cannot and must not hide our concern for grave world dangers, and while, at the same time, we cannot build walls around ourselves and hide our heads in the sand, we must go forward with all our strength to stress and to strive for international peace. In this effort America must and will protect herself. Under no circum-stances will this policy of self-protection go to lengths beyond self-protection. Aggression on the part of the United States is an impossibility in so far as the present Administration of your Government is concerned. Defense against aggression by others—adequate defense on land, on sea and in air-is our accepted policy; and the measure of that defense is and will be solely the amount necessary to safeguard us against the armaments of others. The more greatly they decrease their armaments the more quickly and surely shall we decrease ours.

and surely shall we decrease ours.

United States Removing Barriers Impeding Friendly Intercourse

United States Removing Barriers Impeding Friendly Intercourse In many other fields, by word and deed, we are giving example to the world by removing or lowering barriers which impede friendly intercourse. Our soldier and sailor dead call to us across the years to make our lives effective in building constructively for peace. It is fitting that on this Armistice Day I am privileged to tell you that between us and a great neighbor another act cementing our historic friendship has been agreed upon and is being consummated. Between Canada and the United States exists a neighborliness, a genuine friendship, which for over a century has dispelled every passing rift. every passing rift.

Our two peoples, each independent in themselves, are closely knit by ties of blood and a common heritage; our standards of life are substantially the same; our commerce and our economic conditions rest upon the same foundations

Trade Agreement with Canada

Trade Agreement with Canada Between two such peoples, if we would build constructively for peace and progress, the flow of intercourse should be mutually beneficial and not unduly hampered. Each has much to gain by material profit and by in-creased employment through the means of enlarged trade, one with the other. I am, therefore, happy to be able to tell you on Armistice Day that the Canadian Prime Minister and I, after thoughtful discussion of our national problems, have reached a definite agreement which will eliminate disagree-ments and unreasonable restrictions, and thus work to the advantage of both Canada and the United States. The power of good example is the strongest force in the world. It sur-passes preachments; it excels good resolutions; it is better than agreements unfulfilled.

unfulfilled. If we as a nation, by our good example, can contribute to the peaceful well-being of the fellowship of nations, our course through the years will not have been in vain. We who survive have profited by the good example of our fellow Amer-icans who gave their lives in war. On these surrounding hills of Virginia they rest—thousands upon thousands—in the last bivouac of the dead. Below us, across the river, we see a great capital of a great nation.

The past and the present unite in the prayer that America will ever seek he ways of peace, and by her example at home and abroad speed the return of good-will among men.

Joseph P. Kennedy Reports to President Roosevelt— Former SEC Chairman Says European Countries Have Confidence in American Situation

Have Confidence in American Situation Joseph P. Kennedy, former Chairman of the Securities and Exchange Commission, who recently returned from a month's sojourn in Europe, reported to President Roosevelt on Nov. 14 on his findings while abroad, and is quoted as saying "there is very great confidence abroad in the American situation and in the belief that conditions are so secure here that this is much the better place to keep money"—Mr. Kennedy was an overnight guest at the White House. "The leaders of both business and politics abroad," he said, "feel the American recovery accomplishments are remarkable." From a Washington account, Nov. 14, to the New York "Times" of Nov. 15, the following is taken: He (Mr. Kennedy) characterized foreign experts as looking to us as being in a position of success and security, as compared with major European nations.

natio

nations. He expressed a personal opinion that monetary stabilization was a matter for the distant future. He based this view first on an observation by Neville Chamberlin, Chancellor of the British Exchequer, that monetary stabilization could only follow economic stabilization, and, second, a prevalent belief in France that stabilization of the franc in relation to other currencies could come only after that country had settled the problem raised by possibly necessary devaluation.

after that country had settled the problem raised by possibly necessary devaluation. In contrast with doubts which he found in this country about the ad-ministration's recovery measures, Mr. Kennedy said that President Roose-velt enjoyed universally high regard abroad, and that "they pay great compliments both to Secretary Hull and Secretary Morgenthau, and feel that the trade agreements are of great benefits to America."

Risk to Our Market Minimized

The keynote of the international problem was described by Mr. Kennedy as a "nervous.money situation." which he said embraced these three factors accounting for the large transfers of gold to the United States: 1. Shipments for settlement of balances. 2. Shipments for safekeeping. 3. Shipments for purchase of securities in this country.

"England is a great buyer of securities, and while France and other nations of Continental Europe are doing most of their business with England, they now are beginning to swing to America," said Mr. Kennedy. "From 15 to 25% of the volume on the London Stock Exchange is in American securities. "The result is a terrific increase in the stock market business in this country." country

country." This created a hypothetical risk to the market if the foreign buying support were withdrawn, he added, but minimized that contingency. He illustrated France's monetary problem by pointing out that, despite recent decrees permitting refunding of the long-term debt, the Government there would not borrow in the current market at less than 5%. He con-trasted this with refunding operations by the American Government at 245 to 244 %. 21/2 to 23/4 %.

Prospects on Spending Compared

Great Britain's problems, Mr. Kennedy conjunct on sisted of diminish-ing gold reserves and complications caused by the necessity for the Govern-ment taking over spending operations, principally for increased armaments, after private capital had been carrying the principal recovery load in the form of building corrections

after private capital had been carrying the principal recovery load in the form of building operations. He emphasized that this condition contrasted with that in the United States, where there were prospects that the Government could taper off public expenditures, returning the employment problem to private capital. However, Mr. Kennedy made clear that he felt there was no dissatisfaction in England with the new Government spending program, but rather "a willingness on the part of British taxpayers to stand for additional income levies in view of the alarming situation." As to his mission abroad to discuss with foreign Governments the perm-anent registration of their bonds on the New York Stock Exchange, Mr. Kennedy said he had talked with officials in France and England and was satisfied that they would act favorably. He found no disposition not to register; only a question of how details could be worked out. Discussing the Public Utility Holding Company Act of 1935, Mr. Ken-nedy said:

"I don't believe the utilities can imagine that if they don't register or the act is declared unconstitutional that agitation for their control will end. And no business is helped by continued agitation in Congress. "If they feel they will have a square deal why not go along?"

As to the possible future of the over-the-counter markets. Mr. Kennedy said it was apparent to him that the situation could not be worked out under present provisions of the law and that it would be necessary to go to Congress to solve it.

The recent return of Mr. Kennedy from Europe was noted in our issue of Nov. 2, page 2828.

Appearing in Behalf of Government in Carter Suit to Test Validity of Guffey Coal Act, Miss Roche, Ass.stant Secretary of Treasury Indorses Pro-visions of Act—Says Principles Have Been Utilized by Coal Company of Which She is Principal Owner —Act Also Defended by Assistant Attorney-General Dickinson

Appearing as a witness for the Government in the suit of James W. Carter to enjoin the application of the Guffey Coal Conservation Act to the Carter Coal Co. of West Virginia, of which he is President, Miss Josephine Roche, Assistant Secretary of the Treasury, indicated her un-qualified support of the Act, in the District of Columbia Supreme Court, at Washington, on Nov. 12. From a Wash-ington dispatch on that date to the New York "Times" we take the following: Principal owner of the Bocky Mountain End Co. of Colorado Miss

▶ Principal owner of the Rocky Mountain Fuel Co. of Colorado, Miss Roche said that as early as 1927 she had used some of the principles em-bodied in the Guffey bill to solve the problems of her company.

She described the difficulties that beset her company when she became its President in 1927. The miners were dissatisfied with conditions, she testified. They were being paid in scrip instead of cash, were forced to live in company houses and trade at company stores. They were demanding the right to have a check-weighman of their own choosing at every mine. "I found a check-weighman at only one of our mines," she said. "He had been elected under the supervision of the mine superintendent, was one of the industrial spics maintained by the company for years and was in no sense a representative of the workers." She made a contract with the United Mine Workers of America, she related, recognizing the right of the workers to bargain collectively and abolishing abuses against which they had complained. The new policy in her mines, she declared, brought a "very definite gain" for management and workers. She said that it made for price stabiliza-tion and asserted that stabilization of coal prices was "both necessary and desirable."

desirable.

She said that while the agreement called for higher wages, with an increase in the cost of production, the latter was "substantially met" by the increased production of individual miners and by the improvement of general

conditions in the mines. Strikes and labor disturbances, she declared, bring tonnage shifts from one producing district to another thus affecting inter-State commerce. Labor unrest in Colorado, she went on, caused the State to lose its markets in Viewer and Viewer of State and State an

In Kansas and Nebraska. "Unless there is some form of price stabilizing," she asserted, "the inevitable temptation to operators is to cut wages." This leads, she added, to a "vicious circle" of strikes, interference with inter-State commerce shipments of coal and increased costs to consumers.

According to Assistant Attorney-General John Dickinson, deplorable living conditions, lack of sufficient child health protective measures and widespread poverty which has been found prevalent in the soft coal industry is sufficient basis for Federal regulation of the industry under the Guffey Coal Act Act

We quote from Washington advices Nov. 12 to the New York "Journal of Commerce" which also said in part:

York "Journal of Commerce" which also said in part: While recognizing that there is a limitation of Government powers to regulate industries under the Commerce Clause of the Constitution, Mr. Dickinson declared that nevertheless these powers can be used upon a clear showing of due process for regulation of "conditions" which are found to be such as to constitute unfair competition and directly or substantially affect the flow of inter-State commerce. Mr. Dickinson recited the Government's views to the Court during continuation of the hearings on the petition of James W. Carter, West Virginia coal operator, for a permanent injunction against enforcement of the Guffey Act on the grounds that it is unconstitutional.

Enforcement Plans Pressed

Enforcement Plans Pressed Obviously encouraged by the setback suffered by Mr. Carter yesterday when the United States Supreme Court refused to intervene in his suit and declare the injunction in effect, the National Bituminous Coal Com-mission set up to administer the Guffey Act proceeded to-day with its plans of enforcement. The first meeting was held by the Commission with members of the voluntary committee of coal producers, appointed early this month, to assist in an advisory capacity with the marketing provisions of the Act. Meeting in secret session, the Commission sought ways and means of facilitating adoption of uniform and simplified methods of coal classification. Mr. Dickinson reviewed the defense of the Government in the hearings before Justice Jesse C. Adkins in the District of Columbia Supreme Court immediately following testimony detailing the history of coal strikes in the Colorado fields given by Miss Josephine Roche, Assistant Secretary of fue Treasury, who retains a majority control of the Rocky Mountain Fuel Co.

Government counsel's arguments brought an immediate response from William Whitney, counsel for Mr. Carter, that any belief that the Govern-ment can regulate the commerce clause for the welfare of workers has been refuted by the Supreme Court in a number of cases, the latest of which was the Railroad Retirement Act, which was declared unconstitutional a year ago.

Elaborate Terms of Act

Elaborate Terms of Act While everyone agrees that conditions in the mining industry should be placed upon a higher standard, he declared there is nothing in the Guffey Act which said that the children shall be protected from disease or that the miners shall receive "more than a mere pittance." The statute does pro-vide, he added, that whatever hours or wages are agreed upon by the operators—competitors of Mr. Carter—shall be binding and have the effect of law, which amounts to a delegation of congressional power. The contention that Congressional powers under the Commerce Clause be used only for the regulation of inter-State transportation and not for improving the welfare of the country is a narrow construction of the law which has never been upheld by the Court, but, on the other hand, has been rejected on several occasions, Mr. Dickinson argued. "We contend," the Government's counsel said, "that even if it be held that the commerce clause cannot be used to promote healthy conditions, nevertheless conditions are such that regulation of the industry would be

nevertheless conditions are such that regulation of the industry would be valid under the commerce clause." He pointed out that under the Federal Trade Commission Act one of the elements of unfair competition laid down is that of unfair conditions in an

elements of unfair competition latt down is that of unfair conditions in an industry. "Therefore we feel that one of the elements of unfair competition in the bituminous coal industry is the conditions in that industry." he concluded. "We feel that living and working conditions in the industry are pertinent facts warranting the Congressional Act and we want to show that the in-dustry is not a picture of prosperity but a picture of gloom."

Federal Court of Claims in Washington Holds Invalid Retroactive Tax Clause of Silver Purchase Act— 50% Levy Was Imposed by Congress in 1934 on Profits from Silver Sales Made Prior to Signing of Act

of Act The 50% tax imposed by the Silver Purchase Act of 1934 on profits made from sales of silver from May 15 1934 to June 19 1934 (when the Act was signed), was ruled unconsti-tutional on Nov. 14 by the United States Court of Claims in Washington. The decision was given in a suit by Percy K. Hudson, of New York, who sought to recover \$4,311, the sum he paid under the 50% retroactive tax provision on the profit he made on the purchase and sale of 500,000 ounces of silver just prior to the signing of the Act. As to the

decision, handed down by Judge Green, and concurred in by Chief Justice Booth and Judges Littleton, Williams and Whaley, a Washington account, Nov. 14, special to the New York "Times" of Nov. 15, said as follows:

The Court held that the Act was invalid because "the nature and amount of the tax burden imposed could not have been understood and foreseen by the taxpayer at the time he made the purchases." Although the ruling was based on the conclusion that the tax was invalid because it imposed a burden which the taxpayer could not foresee, the Court took osseasion to call attention to the far-reaching results that might

Court took osscasion to call attention to the far-reaching results that might have eventuated had the validity of the tax been upheld. "It should perhaps be noted," said the opinion handed down by Judge Green, "that our conclusion can affect only a very few cases so far as the Silver Act is concerned. A contrary decision, however, if ultimately sustained, would have a very far-reaching effect in enabling similar retro-active taxes to be imposed on practically every kind of business transaction which involved a purchase and sale." The Government resisted the claim, on the ground that the Act was intended to punish speculation in silver that took place between the time President Roosevelt's silver message was sent to Congress and when the Act was put into effect. The law had only a negligible effect in that it discouraged speculation only in American markets, while it could not reach dealings abroad.

Allowing which will be a set of the set of t

tion of the tax.

tion of the tax. "If the taxpayer should be forewarned, the situation would have been very different," the Court decided, "for he could then take his choice. He could avoid the risk of loss on the sale and payment of a heavy tax if there was a profit simply by not entering into the transaction, but after he had made the purchase his status was fixed and he was caught by a taxing statute which he had no reason to anticipate." The record showed that the plaintiff bought 500,000 ounces of silver on May 3 1934, for \$217,285, and had sold it at intervals between May 23 and May 29 for a total of \$226,575. He was allowed to deduct \$668.04 in allowable expenses before the Collector of Internal Revenue fixed the net profit at \$8,621.96, on which the 50% tax was levied.

The text of the Silver Purchase Act of 1934 was given in our issue of July 7 1934, pages 25 and 26.

Federal Judge in Virginia Finds Amended Frazier-Lemke Farm Mortgages Act Unconstitutional-Decision Holds Changes Fail to Overcome Supreme Court Objections to Original Statute

Court Objections to Original Statute A ruling that the amended Frazier-Lemke Farm Mortgage Act is unconstitutional was handed down Nov. 10 by Judge John Paul, in United States District Court at Harrisonburg, Va. Among the creditors in the case who attacked the law was Senator Byrd of Virginia, who later indicated that he was acting, not in his personal capacity, but as guardian of the estate of the late Hal Flood, Virginia Representative in Congress. Judge Paul's opinion held that the law abrogated substantial property rights guaranteed to creditors under Virginia statutes, and that the amendments failed to overcome all of the objections raised by the United States Supreme Court in holding the original Frazier-Lemke Act unconstitutional.

The decision was summarized as follows in Associated Press advices of Nov. 10 from Harrisonburg:

Press advices of Nov. 10 from Harrisonburg: The decision was handed down in dismissing the proceedings under which John Clayton Sherman, Mary Elizabeth Sherman and James Strother Sherman, previously adjudicated as bankrupt, sought to retain their apple-orchard property in Frederick County, Va., under provisions of the Frazier-Lemke Act. The creditors attacking the constitutionality of the law were Senator Byrd, as guardian; the Farmers and Merchants National Bank and Trust Co. of Winchester, Va., and Mattie W. Cooper of Winchester. All hold bonds secured by deeds of trust on the Sherman property. The indebtedness was incurred from 1922 to 1931, prior to the passage of the original Frazier-Lemke Act. The bond held by Mr. Byrd as guardian is dated Sept. 4 1922. The Supreme Court, in the case of Louisville Bank vs. Radford, which resulted in the original Frazier-Lemke Act being declared unconstitutional, called attention to the Fifth Amendment to the Constitution and stated that the Frazier-Lemke Act, by its terms, applied only to debts existing at the time of enactment, and held that because it was retroactive and took away rights of the mortgagee in specific property, it was in contravention of the Fifth Amendment and therefore invalid, Judge Paul pointed out. Referring to the passage by Congress of the Amended Act, Judge Paul said: University of all it should be noted that the provision making the former

said:

said: "First of all it should be noted that the provision making the former applicable only to pre-existing debts has been eliminated and presumably the new act is intended to apply whether the debt was contracted before or after enactment of the statute. But this does not in itself overcome the objections to the retroactive effect of the previous act. "As I understand it, the disapproval of the Supreme Court was not frounded on the failure of the act or before. The objection was that it applied to all pre-existing debts. "So far as this feature of the law is concerned, the objections to the act have not been remedied by extending its applicability to debts incurred offer its passage. It is still retroactive as to pre-existing debts, and the objection growing out of this fact will still arise if the act continued to take away specific property rights as the original act was held to do."

The findings of the Federal District Court at Peoria, III. on Oct. 21, holding invalid certain provisions of the amended Frazier-Lemke 3-year farm mortgage Act were referred to in our Oct. 26 issue, page 2670.

Constitutionality of Guffey Coal Act Upheld by Judge Hamilton in Kentucky Federal District Court

In the Federal District Court in Louisville, Ky., on Nov. 14, Judge Elwood Hamilton upheld the constitutionality of the Guffey Coal Conservation Act. The findings were given in three suits brought by R. C. Tway Coal Co. and some 15 or more coal companies, and a trust company acting as receiver. From United Press advices from Louisville as receiver. From Nov. 14 we quote From United Press advices from Louisville

Nov. 14 we quote Petitions of the various litigants sought to avoid payment of taxes levied under the act. They attacked its constitutionality on the ground that it violated State's rights. "When the States fail or are unable to perform a public duty," Judge Hamilton said in nis 60-day decision, "the doctrine of State's rights should not be a barrier to the Federal Government rendering an essential service to the human race. "If commerce is to be regulated and controlled for the public welfare in this country it must be by the national Government because the States lack the power to make effective their own regulations." Former Federal Judge Charles I. Dawson, Counsel for the petitioners, said to-night that an appeal would be taken. The opinion dealt at length with the history of Constitutional thought and of the coal-mining industry. In effect it dismissed the petition to pre-vent collection of taxes and adjudged it the duty of the various companies to comply with the provisions of the act. A reference to the action of the Tway Co. appeared in our

A reference to the action of the Tway Co. appeared in our issue of Oct. 5, page 2211.

Association of American Railroads to Contest Con-stitutionality of Railroad Retirement Act-J. J. Pelley, President, Expects Court Decision Before March 1

March 1 The constitutionality of the Railroad Retirement Act of 1935 will be contested in the courts by the Association of American Railroads, J. J. Pelley, President, announced Nov. 8. This course of action, Mr. Pelley said, was decided at the first annual meeting of the Association held in Chicago. The meeting, attended by several hundred presidents and executives of railroads, concluded its session on Nov. 8. Mr. Pelley, in making his announcement at a press con-ference, declined to say when the action will be taken, but said that "we hope to have it decided unconstitutional some time before pay day." By "pay day" Mr. Pelley was referring to March 1 1936, the date the Act becomes effective. As to Mr. Pelley's remarks, Associated Press advices from Chicago Nov. 8 said: Mr. Pelley said pensions as ordered by the Act would cost the railroads

Mr. Pelley said pensions as ordered by the Act would cost the railroads \$54,000,000 the first year, and that the sum would increase from year

The railroads now expend about \$36,000,000 a year in pensions, and would be called on to pay an additional \$16,000,000 the first year the Social Security bill covering all industry became effective, Mr. Pelley asserted asserted

Assertat. He added that the lines would "go along and take pot luck with the rest of the country" on the terms of the Social Security law.

Florida Association Plans Test of Tariff Agreements— Contends Congress Had No Right to Delegate Its Authority to President—Cuban Reciprocity Treaty **Basis** of Action

Basis of Action Constitutionality of the Reciprocal Tariff Act of 1934 will be challenged in the courts by the Florida Agricultural Tariff Association, it was announced in Washington, Nov. 12, by A. M. Loomis, representing the organization. Mr. Loomis said that George S. Fletcher, President of the Association, is bringing a tariff test action in the Customs Court in New York City, in a case in which Mr. Fletcher insists upon paying the former duty of 40 cents a crate on pineapples imported from Cuba which entered New York City on Nov. 2. The reciprocal trade agreement between the United States and Cuba reduced the duty to 20 cents a crate, and the Collector of Customs refused to take more than that amount. A Washington dispatch of Nov. 12 to the New York "Journal of Commerce" quoted Mr. Loomis as follows: Mr. Fletcher contends that the reduction represents exercise of powers

Mr. Fletcher contends that the reduction represents exercise of powers

Mr. Fletcher contends that the reduction represents exercise of powers not authorized by the Constitution. Mr. Loomis predicted to-day that the suit under normal condition will be heard by the United States Customs Court, during the December term. Asserting that the association is prepared to force the issue until it is "fairly presented" to the Supreme Court, Mr. Loomis said to-day. "The Cuban reciprocity agreement went into effect just before the open-ing of our Florida 1934-35 fruit and vegetable shipping season. The result to the growers and property owners in the State of Florida was disastrous. Brande Claims False

Brands Claims False

Brands Claims False "Experience of this past season has again demonstrated the absolute falsity of the claim that these Cuban products can be admitted into our markets during certain months of the year without coming in competition with products of Florida and other Southern States. Rate reductions in most cases begin Dec. 1, and continue for three, four or five months. This year's experience proves beyond question that the admission of Cuban products during this period is most harmful. "We are not bringing this case upon an economic argument, however. We believe and are advised that Congress has no constitutional authority to dele-gate its power of tariff making as it is delegated in the Reciprocity Tarfff Act. This improper delegation by Congress of power to the President should be brought to the attention of the Supreme Court in order that a proper remedy may be applied. For that reason, the Florida Agricul-tural Tariff Association has undertaken to sponsor this action at law." Mr. Loomis pointed out that while this particular case is brought with reference only to one particular commodity, imported from Cuba, the net effect of a "favorable" decision in Customs Court or the high court will be to invalidate not only the Cuban agreement, but every other agreement which has been negotiated under the reciprocal trade Act and put an end to all negotiations for future pacts.

On Nov. 11 the United States Supreme Court declined to pass on three important cases involving New Deal legislation, the cases involve the constitutionality of the amended Agricultural Adjustment Act's processing taxes and the Guffey Coal Control Law. The Court refused to review decisions of lower tribunals favorable to these laws, and it also permitted the Government to intervene as "a friend of the Court" in a Texas case involving the validity of the Bankhead Cotton Control Act. The Supreme Court's rejec-tions included a plea of the Washburn-Crosby Co. of Minne-apolis for an immediate ruling on the amended processing taxes, and the request of James Walter Carter, President of the Carter Coal Co. of West Virginia, to prevent collection of the Guffey Coal Tax and also to obtain a restraining order to stop posting of a \$15,000 bond while his case is still pending in the District of Columbia Supreme Court. A Washington dispatch of Nov. 11 to the New York "Times" outlined these cases as follows: The Government also won a point when the Court agreed to allow the On Nov. 11 the United States Supreme Court declined to

These outlined these cases as follows. The Government also won a point when the Court agreed to allow the Department of Justice to plead in a test of the Bankhead Cotton Control Law, brought by Lee Moor, Texas cotton shipper, against a railroad. Meanwhile further attacks against the AAA processing taxes came from eight Louisiana rice millers, who asked the Court for an injunction to stay collection of the levies for September, amounting, their lawyers said to about \$200,000 said, to about \$200,000.

Sought Union with Hoosac Case

Sought Union with Hoosac Case The Washburn-Crosby counsel were eager to have the Court consolidate their issue with the argument over the suit of the Hoosac mills against the processing taxes, now set for Dec. 9. But the Court's ruling to-day means that the flour milling concern must now await the decision of the Eighth Circuit Court of Appeals on the com-pany's challenge that collection of corn and wheat taxes since the AAA amendments last August is illegal. Mr. Carter had likewise sought an opportunity to "jump" a lower court to get a Supreme Court ruling. He is trying to avoid having his company sign the Coal Code, and while he sought a review of the basic issue of the Guffey law, his chief concern was to have the court intervene and prevent posting of the \$15,000 bond designed to indemnify against losses through failure to pay the tax. The Carter suit proceeded in the District of Columbia Court to-day with Isador Lubin, Commissioner of Labor Statistics, and F. E. Birgquist, Chief of the Bituminous Section of the NRA Division of Reviews, appear-ing as Government witnesses.

Chief of the Bituminous Section of the NRA Division of Reviews, appear-ing as Government witnesses. Opportunity for the Government to argue in the Bankhead lawsuit early in the week of Dec. 9, was granted by Chief Justice Hughes. Mr. Moor's attorneys sought to have the Government barred from arguing on the right of lower courts to entertain the suit. They asked that Solicitor General Reed be compelled to adhere to the question of validity of the law, but the Chief Justice declined.

No Limit Put on Argument

"This is a case of great public importance and the Government will be allowed to argue without limitations as to the question," Mr. Hughes said. Arguments were laid before the Court by the Government in a brief opposing Georgia's effort to test the Bankhead Act through an original suit. Georgia claims the law is badly damaging its chances of selling cotton from its State-owned farms. Without going into a discussion of the validity of the law, Mr. Reed in his brief maintained that the suit was essentially against the United States, which may not be sued without its consent and which has not agreed to be sued. He argued that Secretary Morgenthau, Secretary Wallace, Attorney-

agreed to be sued. He argued that Secretary Morgenthau, Secretary Wallace, Attorney-General Cummings and the Internal Revenue Commissioner, Guy T. Helvering, named by Georgia in the suit to stop the Bankhead taxes, were only "nominal" defendants, and "have no individual interest in informment of the law "

In the solution of the law." The Solicitor General insisted that the case was not within the Supreme Court's jurisdiction. No acts were threatened that would justify an in-junction by the court, he maintained.

Superintendent of Insurance Reports \$61,804,000 Interest Payments on Guaranteed Mortgages Taken Over by State Insurance Department

Taken Over by State Insurance Department Superintendent of Insurance Louis H. Pink on Nov. 8 reported the payment of \$61,804,000 as interest to the holders of wholly-owned mortgages guaranteed by the tile and mortgage guaranty companies in rehabilitation or liquidation under the supervision of the Insurance Department. These payments cover the period from August 1933, when the first companies were taken over by the Department until Sept. 30 1935. Of this amount \$43,889,495 necessitating the writing of 406,725 checks has been paid out since Jan. 1 1934. Pay-ments of interest to holders of certificated mortgages are not included here because the certificates are now under the control of the State Mortgage Commission. control of the State Mortgage Commission.

control of the State Mortgage Commission. Superintendent Pink also reported the refunding with the Home Owners' Loan Corporation since Jan. 1 1934 of 9,246 mortgages with an aggregate principal amount of \$46,035,611. It is estimated that \$40,448,000 of these refunded mortgages were wholly owned mortgages and that \$2,871,000 were certificated, leaving \$2,716,000 company owned mortgages refunded. There remain pending before the HOLC applications for the refunding of 2,813 mortgages aggregating \$15,266,290 in principal amount. Schedules made public offer additional evidence of the progress which has been made in conducting the affairs of the guaranteed mortgage com-panies. These figures indicate that the guaranty liability continues in force for 98,000 guaranteed wholly-owned mortgages, full satisfactions remitted or HOLC refunding. In addition to this decrease in whole mortgages, agency revocations have amounted to \$414,000,000 since January 1934. Thus it nay be estimated that wholly-owned mortgages amounting to \$339,000,000 are now being serviced by the Superintendent's servicing corporations. There were some

8.7% Fewer Corporations Reported No Net Income in 1933 Than in 1932—Treasury Analyzes Corporation Income Tax Returns for Two Years

Income Tax Returns for Two Years Further evidence of business recovery in the year 1933 is indicated in an analysis, made public by the Treasury De-partment of corporation income tax returns for the years 1932 and 1933. Of 446,842 corporations which filed returns for 1933,337,056, or 75.4%, showed no taxable net income, as compared with 369,238, or 81.7%, in 1932. The Treasury points out that this represented a decrease of 8.7% in the number showing no net income. Total compiled receipts of these corporations in 1933 amounted to \$37,327,000,000, as compared with \$49,783,-000,000 in 1932, while compiled net deficits were \$4,510,-000,000, as compared with \$6,567,000,000 in 1932. Cash dividends paid in 1933 were \$742,000,000, as against \$1,565,-000,000 in 1932.

000,000 in 1932.

Other supplementary data on corporation returns were made public by the Treasury on Nov. 5. These were sum-marized as follows in a Treasury press release:

Of 446,842 active corporations which filed returns for 1933, 109,786 or 24.6%, showed net income, as against 82,646, or 18.3% of the total, for 1932. This is an increase in the number showing net income of 32.8%.

1932. This is an increase in the number showing net income or 32.5%. Total compiled receipts of these corporations were \$46,907,000,000, as against \$31,855,000,000 for 1932, a rise of 47.3%. Income tax liability for 1933 increased to \$416,000,000 from \$286,000,000 for 1932, a rise of 45.5%. Compiled net profit was \$3,580,000,000, compared with \$2,738,-000,000, an increase of 30.8%. Cash dividends rose 2.8%, to \$2,386,-000,000 for the state of 30.8%. 000,000 from \$2,320,000,000.

Report of Operations of RFC Feb. 2 1932 to Oct. 31 1935—Authorizations of RFC Feb. 2 1932 to Oct. 31 1935—Authorizations During Period Totaled \$10,-281,361,454—\$901,871,734 Canceled—Expenditures for Activities of Corporation Amounted to \$5,-693,931,729

281,361,464—\$901,871,734 Canceled—Expenditures for Activities of Corporation Amounted to \$5,633,931,729
 In a report issued Nov. 4, Jesse H. Jones, Chairman of the Reconstruction Finance Corporation, reports that authorizations and commitments of the Corporation in the recovery program to Oct. 31, including disbursements of \$738,364,560 to other governmental agencies and \$1,299,971,901 for relief, have been \$10,281,361,464. Of this sum, it is noted, \$901,571,734 has been canceled and \$987,865,593 remains available to the borrowers and to banks in the purchase of preferred stock and capital notes. The relief disbursements include \$299,984,999 advanced directly to States by the Corporation, \$499,986,902 to the States upon certification of the Federal Emergency Relief Administrator, and \$50,000,000 to the Federal Emergency Relief Administrator under provisions of the Emergency Appropriation Act—1935, the report said. Of the total disbursements, \$5,603,931,729 was expended for activities of the Corporation other than advances to governmental agencies and for relief, and of this sum \$3,076,847,659, or approximately 54%, has been repaid. The following is also from Mr. Jones's report issued Nov. 4: Lona authorized to 7,453 banks and trust companies agregate \$2,395,595,915. Of this amount \$1,497,470,474, or 78%, has been repaid. Authorizations were made for the purchase of prefered stock, capital notes and debentures of 6,971 banks and trust companies agregating \$1,238,67,550, out, 1,222 banks and trust companies agregating \$1,238,637,550, and 1,122 banks and trust companies agregating \$1,239,691,500,51500,51500,51450 of this automotized for distribution to depositors of 2,655 closed of \$1,269,015,505, \$109,214,580 of this was canceled or withdrawn and \$11,620,1120 or this amount \$240,015,012,015,003,000,000
 Dot his anton and \$1,497,470,474, or 78%, has been repaid. Authorizations were made for the purchase of prefered stock, capital notes and debentures of 6,971 banks and trust co

Under the provisions of Section 5(d), which was added to the Recon-struction Finance Corporation Act, June 19 1934, the Corporation has

Buf

authorized 1,349 loans to industry aggregating \$87,356,997. \$16,858,987 of this amount was withdrawn or canceled and \$37,578,932 remains available to the borrowers. In addition, the Corporation has authorized, or has agreed to, purchases of participations aggregating \$11,396,468 of 244 businesses, \$2,679,964 of which was withdrawn or canceled and \$5,288,431 remains available.

available. The Corporation has purchased from the Federal Emergency Administra-tion of Public Works 683 issues of securities having par value of \$217,-958,700. Of this amount securities having par value of \$95,716,900 were sold at a premium of \$2,989,020, but \$3,903,300 were not actually paid for and delivered to the close of business Oct. 31 1935. Securities having par value of \$23,582,700 purchased from the PWA were subsequently col-lected at a premium of \$25,556, and securities having par value of \$98, 659,100 are still held. In addition, the Corporation has agreed to purchase, at par, to be held and collected or sold at a later date, such part of securi-ties having an aggregate par value of \$109,869,000 as the PWA is in a position to deliver from time to time.

According to the report, disbursements and repayments to Oct. 31 for all purposes were as follows:

Department of Commerce Estimates Net Depression Losses at \$26,631,000,000—Survey Finds Gains However in 1933 and 1934—Agriculture Shows Greatest Relative Improvement

The five depression years of 1930 to 1934, inclusive, have cost American business \$26,631,000,000 in savings, Robert R. Nathan, chief of the Income Section of the Division of Eco-nomic Research, said in the "Monthly Survey of the Current Business," published Nov. 11 by the Department of Com-merce. Sharp decreases in such losses in 1933 and 1934, howmerce. Sharp decreases in such losses in 1933 and 1934, how-ever, brought the line of income produced on the national chart closer to the line of income paid out, Mr. Nathan found. Net income paid out on this chart represents the amount paid to individuals by business from resources for their pro-ductive services, whether labor, management, or the furnish-ing of capital. Net income produced represents the value of all commodities produced or services rendered after de-preciation of capital equipment and depletion of raw ma-terials. terials.

terials. Mr. Nathan's survey was summarized as follows in a Washington dispatch of Nov. 11 to the New York "Times": In 1929 the income-produced line was above the paid-out line, indicating that business of the country, after making the net income paid out available, retained a portion of the product. The lines crossed in the end of 1929 and rapidly drew apart through 1930 and 1931, until a gap representing business losses, after dividends, wages, promotional withdrawals, and the like, or the drain on business resources to maintain the income paid out, reached its widest in 1932 and indicated business losses at \$8,817,000,000. *National Learners Divident*

reached its widest in 1932 and indicated business losses at \$8,817,000,000. National Income Rising Since then the lines converge, Mr. Nathan's studies show, drawing together until the preliminary figures for 1934 indicate business losses of \$1,628,-000,000, and the lines indicating both forms of national incomes are pro-ceeding upward and drawing rapidly closer. Translated into figures, the lines show that the national income produced was \$81,034,000,000 in 1929, \$67,917,000,000 in 1930, \$53,584,000,000 in 1931, \$39,545,000,000 in 1932, \$41,889,000,000 in 1933, and \$48,-561,000,000 in 1934.

in 1931, \$39,945,000,000 in 1932, \$41,589,000,000 in 1933, and \$45, 561,000,000 in 1934. These figures were obtained by adding the business savings in the case of 1929 and subtracting the business losses in the case of the succeeding year to or from the net income paid out for each year.

Authorizations Canceled or Authorized Withdrawn Disbursed Repaid

Arrival of the set of the depression upon our economic structure, it must be recognized that the national income is measured in terms of dollars, and the depression upon our economic structure, it must be recognized that the national income is measured in terms of the depression upon our economic structure, it must be recognized that the national income is measured in terms of dollars, and the depression upon our economic structure, it must be recognized that the national income is measured in terms of dollars, and the estimates.

price level is an important influence in determining the movement of the estimates. "While income produced was declining 51% from 1929 to 1932, the Bureau of Labor Statistics index of wholesale prices fell 32%. During the next two years income produced rose 23%, while the wholesale price index increased 16%. "Since income produced represents the net value of services rendered as well as commodities produced, and since the wholesale price index represents only commodities, it cannot be used to deflate the income estimates. "It is apparent, however, that the fluctuations in the national income were more than mere price phenomena and that there was a substantial reduction from 1929 to 1932 and an increase from 1932 to 1934 in the volume of goods produced and services rendered in the United States. "The marked decline and subsequent rise in the total number of persons employed and commodities produced during this period tend to substantiate this conclusion."

"Breathing Spell" to Be Permanent, Secretary Roper Declares—Says Reform Legislation is Completed, and Business Need No Longer Fear Uncertainties

and Business Need No Longer Fear Uncertainties The "breathing spell" for business, recently referred to by President Roosevelt in a letter to Roy Howard, is per-manent, and the Administration program of basic reform has been completed, Secretary of Commerce Roper told the annual convention of the Associated Grocery Manu-facturers of America in New York on Nov. 13. Secretary Roper's speech was regarded as of particular importance, because it reputedly had the official approval of the White House. Business, Mr. Roper said, need no longer feel any "uncertainty as to what may come with respect to Govern-mental measures." He added that President Roosevelt's "breathing spell" declaration means "specifically that the basic program of reform has been completed," and that while experience may make necessary some modification and experience may make necessary some modification and adjustment of existing laws, "such changes, if made, will function to improve those relationships which are so essential to National progress." Further extracts from Mr. Roper's speech follow, as given in the New York "Herald Tribune" of Nov. 14:

of Nov. 14: Throughout his speech Secretary Roper sought to allay any fears that business men might have in regard to Administration policies. He defended big business with the declaration: "I am convinced that if we are to be motivated primarily by the assumption that bigness must be penalized and restricted merely because of its size, broad and penetrating recovery will be impossible." He also came out clearly for continuance of the profit system. "Busi-ness profits," he said, "cannot be penalized, or the profit-and-loss system will suffer with a bad case of angina pectoris. "Businesses making profits during the depression have been held up to censure because it was pointed out that millions were unemployed, while companies were actually paying dividends. This contrast is unfair. As long as we maintain our present capitalistic system—and it will be main-tained—no obstructions or deterrents must be permanently set up to prevent fair and reasonable profits."

Secretary Roper, in clarifying the recent "breathing spell" correspondence between President Roosevelt and Roy W. Howard of the Scripps-Howard newspapers, said that publication of the letters brought a multitude of interpretations, many of which were "inaccurate."

Explains "Breathing Spell"

Explains "Breathing Spell" "It will be recalled," Secretary Roper said, "that in the letter addressed about two months ago by Roy Howard to the Chief Executive the President's answer to Mr. Howard's communication became the subject of much newspaper discourse and comment. The headlines and news stories featured the fact that the President had promised business a 'breathing sepell.' A multitude of interpretations resulted, with considerable conjecture ex-pressed as to what was meant by 'breathing spell.' Iterally meant only a brief cessation of governmental restriction and regulation, to continue only from September until the reconvening of Congress in January. Various inaccurate implications and deductions resulted. "In his letter Mr. Howard said: . . . 'there can be no real recovery until the fears of business have been allayed through the granting of a breathing spell to industry.' Please, therefore, keep in mind that Mr. Howard, and not the President, first used the words, 'breathing sell,' and in this light let me now read the President's words: "This Administration came into power pledged to a very considerable

in this light let me now read the President's words: "This Administration came into power pledged to a very considerable legislative program. It found the condition of the country such as to require drastic and far-reaching action. Duty and necessity required us to move on a broad front for more than two years. It seemed to Congress and to me better to achieve these objective as expeditionsly as possible in order that not only business but the public generally might know those modifica-tions in the conditions and rules of economic enterprise which were involved in our program. This basic program, however, has now reached sub-stantial completion and the 'breathing spell' of which you speak is here-very decidedly so."

"To hose who insist that there is an antagonism of objectives between the Federal Government and business. I wish to call to their attention, also, this pronouncement of the President's; "The interest of what we broadly

term business are not in conflict with, but wholly in harmony with, mass inter

"It now becomes the task of business, in co-operation with the Depart-ment of Commerce, to see that imaginary oppositions of interests are eliminated and that American business, in accordance with the President's clear cut statements, is able to move forward aggressively into a future of greater progress.

clear cut statements, is able to move forward aggressively into a future of greater progress. "In our form of society there can be no toleration of efforts to divide our people into two groups—the 'Haves' and the 'Have Nots.' The creation of any such line of demarcation is unthinkable in our democracy. The objective of democracy is to bring about a greater distribution of benefits through evolution, not confiscation through any revolutionary methods." Secretary Roper then launched into a lengthy defense of business, which he said had been made the "scapd-goat" of the depression. He said that business men themselves are among the first to admit that corporate management in the decade following the World War made many mistakes and allowed evils and abuses to develop which later contributed to the severity and extensiveness of the depression. "But," he added, "business leadership generally in those years displayed greater vision and ingenuity than did the leadership in many other fields, including those of government and finance." In his praise for big business, Secretary Roper said that the incentive to build and construct on a large-scale basis has been one of the greatest assets in the development of our Nation up to the present time. "I conceive it as the fundamental duty of the Department of Commerce to endeavor," he said, "to see that no extreme measures are initiated which may have deterrent effects upon business recovery. With the consistent support and co-operation of business, 'Secretary Roper reiterated. "It is rather integrity in big and little business which needs to be stressed. Every effort will be made to guarantee all business their proper and profite abus here in our economic system."

Is rather integrity in big and little business which needs to be stressed. Every effort will be made to guarantee all businesses their proper and profitable place in our economic system." A major plank in the Department of Commerce platform to aid business will be found, he said, in "vigilant endeavors directed to clear the debris from profit-making avenues so that a constantly increasing volume of money will find its way into greater working capital and plant and equip-ment expenditures."

ment expenditures."
The unemployed, he felt, will be absorbed in private industry when and as more extensive profit-making develops.
Secretary Roper went into detail concerning the Department of Com-merce plan to stimulate industry and business. It involved, he said, con-ferences with industries looking toward solution of mutual difficulties, studies on new methods and ways to reduce distribution wastes, improve-ment in statistics and exchange of visits with business men in other countries in an effort to promote foreign trade.

An item relative to the correspondence which passed between President Roosevelt and Mr. Howard, referred to above appeared in our issue of Sept. 7, page 1532.

Retirement of Government From Private Business Fields Urged by President Hecht at Annual Con-vention of American Bankers Association—Dangers Cited by Mr. Hecht in Social Relief—Modificaton Urged of Laws Governing Postal Savings System Immediate steps to take the Federal Government out of the many fields of business activity in which it has become engaged were urged by Rudolf S. Hecht, Chairman of the Board, Hibernia National Bank, of New Orleans, in his address as President of the American Bankers Association at the opening general session of the Association's annual convention in New Orleans on Nov. 12. Mr. Hecht declared that the emergency which brought about the Government's business activities is passing and referred to assurances given by President Roosevelt at the last Bankers' Association convention that he favored the curtailment of activity by the Government's financial agencies as fast as the banking institutions of the country could demonstrate their willingness and ability to resume their normal functions. More recent statements of the President, he stated, have borne out this even more em-phatically. Mr. Hecht said:

phatically. Mr. Hecht said: I fear that there are in the President's entourage in Washington many who do not share these views he has so recently reiterated, and who not only believe that the operations of these Government agencies should be made permanent but that they should in fact be considerably expanded. On the other hand, I believe that, regardless of political affiliations, bankers throughout the country are opposed to any socialization of our economic life. They share the conviction that we must put up a strong fight against this tendency toward increased Government control of banking and credit, and they think we are justified in taking the President at his word and in aiding and encouraging him in every way to withdraw Government from business as rapidly as the improving times will permit."

Calling attention to the fact that the number of Federal calling attention to the fact that the number of Federal executive department employees rose from 555,000 in July 1933 to 712,000 in May 1935, that there are in all Federal services 1,438,000 persons and that some 2,409,000 persons are on the various Federal relief roles, Mr. Hecht declared it becomes a Herculean task for the Administration to reverse its policies and reduce the numbers now carried on the Federal payrolls. He went on to say:

Clearly, it will take a well informed and widespread public opinion to remedy this situation. It will require the removal of all barriers to the restoration of business to full normal health to again absorb these and millions of others now employed. I do not for a moment condemn or criticize the stated objectives of these

governmental activities, but after all these activities are palliatives of these governmental activities, but after all these activities are palliatives and not real remedies which could effect a cure. Accordingly they should not be used on a permanent basis lest they become a drug, but should be done away with gradually now that the patient is definitely on the road to recovery. recover

Mr. Hecht urged upon the bankers the duty of recognizing their social responsibility in the conduct of their business. Emphasizing his belief in a certain measure of governmental supervision over banking practice and the total volume of credit, he declared that our so-called capitalistic system "can hope to live and succeed only if out of the chaos of the past

few years there shall develop a new prosperity based on ethical as well as material progress and on a greater sense of social responsibility on the part of those who have so much toward those who have little." He declared no one should be intolerant toward the principles of sincere social legisla-tion, but "we must take care lest the multiplicity of govern-mental activities for social relief will so heavily increase taxation as to crush individual initiative and become a corious deterrent to the proper development of business and serious deterrent to the proper development of business and

mental activities for social fender will so heaving informs a serious deterrent to the proper development of business and industry."
Mr. Hecht declared it is a mistake to permit the public to believe we can go on spending from the Federal Treasury indefinitely. Citing the amount of the present debt of 29 billions, with contingent liabilities of 6 more billions, he asserted the time has come to realize that Government expenditures must be met by means other than further increases in the national debt. In a few more years, he said, "even this rich nation can reach the point where the size of its Government debt may become a serious problem."
Referring again to the competition the Government is giving banks, Mr. Hecht stressed the recent expansion of the Postal Savings System. This competition, he said, which comes through relatively high interest rates and liberal withdrawal privileges, is unfair, "and since every depositor can now get full protection for his deposits up to \$5,000 through any member of the Federal Deposit Insurance Corporation the need for the Postal Savings System has really passed, except perhaps in such rural communities as do not enjoy other banking facilities. A serious effort should therefore be made at the coming session of Congress to at least modify, if not abolish, the law governing the Postal Savings System."
Mr. Hecht also declared his belief that "in view of the ample banking facilities to take care of their reasonable requirements." In this respect, he pointed out, the new authority of the FDIC gives its Board of Directors power to determine the economic necessity for creation of a new bank before that bank may be admitted to the benefits of the Corporation's insurance fund.
Looking to the future, Mr. Hecht said there are many sound reasons for taking a cheerful view. In part, he stated:

sound reasons for taking a cheerful view. In part, he stated: I would not like to be understood as predicting any sudden increase in our business activities, or anything remotely resembling a boom. I merely believe we have definitely turned that proverbial "corner," that the growth and progress of America, retarded by the events of the past five years, will be resumed, and that the problems and difficulties which still are facing us will be conquered as were similar obstacles in the past. For the new responsibilities and opportunities which this new era will bring with it for the business of banking we are, I am sure, well prepared. The drastic ordeal of the long depression and the recent legislation have purged banking of the major sources of its weaknesses, and certainly the bankers who have survived the trials and tribulations of the past few years will have the courage and the ability to meet whatever problems may lie ahead.

He said he felt sure the bankers of the country are united in their opposition to any change in our fundamental form of government which would alter the spirit "or impair the basic principles of our Constitution, or to any attempt which would undermine this bulwark of our national strength and protection of equal rights to all our people."

Retirement of Government From Control of Industrial and Financial Enterprise Urged in Resolutions Adopted By American Bankers' Association— Economic Policy Commission Finds Lag In Busi-ness Due to Continued Unemployment—Advocates Long-Term Capital Issues By Industries and Utilities Utilities

A warning of the dangers at present existing in the Govern-ment intervention in business and banking, the large Govern-ment expenditures and the burden of taxation was sounded in the resolutions adopted on Nov. 14 by the American Bankers' Association, in convention at New Orleans, La. Observing this, a dispatch from that city to the New York "Times" added:

Score Government In Business

With the passing of emergency conditions, the official resolutions declared, "The time is at hand for the recognition as a matter of national policy of the need for the retirement of the Federal Government as rapidly as possible from the field of control and operation of the Nation's industrial, commer-cial and financial enterprise into which it has entered so widely,"

The resolutions further said:

The resolutions in their said. There are well-defined though limited fields within which Government expenditures are justified. While the deficits of the past six years which have carried our direct National debt to a total of 29 billion dollars in part have been justified by efforts to relieve human suffering, this should not obscure the fact that definite efforts to return to a balanced National budget should be the prime consideration of sound National fiscal policy.

budget should be the prime consideration of sound National fiscal poincy. The report of the Economic Policy Commission, while noting strong improvement in the automobile industry, in gasoline, tobacco, rayon and iceless refrigeration industries (we quote from United Press advices from New Orleans Nov. 14) found that construction and the durable goods industries lagged. This lag, it said, was the cause of con-tinued widespread unemployment.

In part the United Press accounts added:

"This part of our National economy is still gripped deeply by the depression," the report said. New capital issues of private enterprise for the first six months of 1935 were 97% below the average for the four years preceding the depression. "The reason why we have prevailing business optimism is that conditions are genuinely improved for the great majority of business men," the report said.

said. The fact remains that about 20% of our workers are idle and their numbers

The fact remains that about 20% of our workers are idle and their numbers have not changed much in the last two years. The We have so far regained only about half the depression losses. Part of the losses are due to shrinkage of export trade, but most of them are in the lines of construction and heavy industries. The firms engaged in these industries are mostly large units and so they are relatively few in number. They are of the first importance as direct and indirect employers of labor, but they have little influence in shaping public opinion. The key to the problem lies in floating new long term capital issues by menufacturing industries and the utilities.

manufacturing industries and the utilities.

M. S. Szymczak Discusses Recent Changes in Federal Banking Legislation—Says Control of Nation's Credit Policy Most Important Provision of 1935 Act

Credit Policy Most Important Provision of 1935 Act One of the most important functions of the Board of Governors of the Federal Reserve System is control of the Nation's credit policy, M. S. Szymczak, member of the Board, told the Cleveland Chapter of the American Institute of Banking on Nov. 7. Two of the principal changes made by recent banking legislation, he said, are the provisions fixing more definitely responsibility for the determination of a national credit policy, and the provisions broadening the classes of member bank assets eligible as security for loans from Reserve banks. Another means of control over the supply of credit, he said, are the so-called open-market operations. He described these operations as follows: Open-market operations consist of the purchase and sale by Reserve banks

supply of credit, ne said, are the so-called open-market operations. He described these operations as follows:
Open-market operations consist of the purchase and sale by Reserve banks of certain classes of securities, chiefly Government obligations. These operations have the effect of increasing or decreasing the supply of credit available in the market. By selling securities the Reserve banks withdraw funds from the market and there is a decrease in the supply of credit. Through a purchase of securities a Reserve bank puts funds into the market, thus tending to ease credit conditions.
Purchases and sales of securities by the Reserve banks were unimportant in the early days of the System. It was not until 1922 that they were large enough to affect the money market. At that time it became necessary to take steps to co-ordinate purchases and sales os that credit conditions.
The responsibility for determining what security transactions should be undertaken and the authority for enforcing a program were not clearly defined by law until the new banking act. At the time this act was passed an Open Market Committee consisting of representatives of the 12 Reserve banks was authorized to propose purchases and sales. Its propoals were then submitted to the Federal Reserve Board, which had the authority to approve or disapprove but not to initiate a polley. Even after purchases or sales by the Reserve banks had been agreed upon by the committee and the Board, the boards of directors of the 12 Federal Reserve banks thoughout the country could frustrate the policy by refusing to participate in its execution.

The new act clearly places responsibility for determining open-market transactions on the new Open Market Committee and directs the Reserve banks to carry out the transactions determined by this committee. This is one of the most important changes in the Federal Reserve System which the act introduce

In conclusion, Mr. Szymczak summarized the principal changes in Federal Reserve procedure as provided by Title II of the Banking Act of 1935.

Economist Views Administration as Having Missed Chance for Needed Banking Reforms—Dr. Melchior Palyi Sees Unlimited Credit Inflation Possible as Result of New Laws

Result of New Laws The Roosevelt Administration has missed an excellent opportunity for much-needed reform of the commercial banking structure of the country, and primary questions of policy are left unsolved by the Banking Act of 1935, accord-ing to Melchior Palyi, Economist of the University of Chicago, writing in the November issue of the magazine "Polity" on "The Problem of Monetary Leadership in the United States." Dr. Palyi warned that the new provisions of the law affecting the Federal Reserve System afford an opportunity for almost unlimited credit inflation. The basic principle of the law, he said, means "a departure from all established standards of credit policy and the acceptance of a new monetary philosophy prevalent, so far, only in certain circles." circles.

Dr. Palyi summarized the change in the Nation's banking laws as follows:

laws as follows: The previous system had insufficient inhibitions against the overexpan-sion of credit, while in the present one even those few medicines against credit-elephantiasis have been diluted. True, the possibility of raising the cash-requirements up to double the present legal minimum ratios means the introduction of a new and substantial form of "checks and balances." But in the given political set-up it is not likely that the Reserve Board would use much of this weapon. A "pleasant" prospect in view of "excess" cash reserves of the banks of about three billion dollars, which alone would permit—theoretically—almost a doubling of the existing deposit volume. But the unique gold reserve of some 9½ billion dollars would make the creation of further "excess reserves" possible, as soon as the banks start to dump even a fraction of their enormous holdings of public bonds into the Reserve System. There are only a few optimists who believe that the new setting of the Reserve System is able to handle the fantastic credit inflation which might follow in due course. Dr. Palvi said that the "new hanking philocophy." has the

Dr. Palyi said that the "new banking philosophy" has the following three main ideas:

1. Complete Government control of all bank resources and over the credit structure, so far as it serves the function of currency supply. This, he said, implies control of the Nation's resources as well. 2. "Liquidity" of funds is regarded as immaterial, and the only important matter is "the quantity of deposits" which may be used as currency. 3. The quantity of deposits can be directly regulated by varying cash cash reserves and compelling banks to "create" or destroy deposits in accordance with them.

National Resources Committee Issues Preliminary Reports on Transportation and Electric Power— Announces Formation of 46 State Planning Boards —Duplication of Transit Facilities Seen as Danger to Country—Other Problems Surveyed

Announces Formation of 4b State Flamming Doards —Duplication of Transit Facilities Seen as Danger to Country—Other Problems Surveyed The effective functioning of 46 State Planning Boards is the most significant step in establishing sound relations be-tween the Federal and State governments in many genera-ning boards, on the one hand, and the National Resources Committee, said on Nov. 5 in commenting on the develop-ment of the new planning boards as shown by a report made public Nov. 4 by the Committee. That report is part of an extended survey which will be published shortly. The Com-mittee said that the new State planning boards fill a gap between some 700 city planning boards and 400 county plen-ning boards, on the one hand, and the National Resources Committee, pointed out on Nov. 3 that nearly 500 leading citizens have participated in State and national planning by giving their time and experience to the study of the natural and human resources of the country. — A committee report on Oct. 28 was devoted to transporta-tion, and declared that there is a danger of an "oversupply" of transportation facilities in the United States. Railroads have suffered from motor vehicle competition and from du-plication, according to the survey, while the Indiana State Planning Board finds that pipe lines, with low operating costs, are also serious competitors and take substantial traf-fic away from the railroads. On Oct. 22 the Committee made public still another report, stressing the importance of low-cost electric power in build-ing the economic and social welfare of communities through-out the country. The Committee said that the States recog-nize a dual problem in this connection: (1) The necessity of developing sources of electric power that can be sold at low rates, in regions where it is still lacking; (2) the need for developing sources of electric power that can be sold at low rates, in regions where its still lacking; (2) the need for developing sources of electric pow

ways, motor vehicle traffic, port and waterway development, and airway transportation.
Aviation interest varies greatly among the States. New Mexico and Missouri reported no special need for intra-State air routes. The Indiana Board reports that in its opinion air transportation has not yet become a major factor in the transportation field. Other Boards differ, California and Florida both finding intra-State aviation important, according to their reports. Such widely separated States as Maine and Colorado find recreational aspects of aviation dominant, air service enabling vacationing family heads to keep in personal contact with their business offices.
Idaho, according to the report of its State Planning Board, makes allaround use of air lines in the State, where the major air-freight service is to mines, which might otherwise be required to shut down during the winter. The report continues: "Planes delivering 50-pound ingots of gold are no exception at the Boise Airport, nor is the flying of a 1,600-pound shaft to a mine, and landing it on the snow. The delivery of fuel oil has been accomplished in the same manner. The most important use of the air service during hot months has been the transporting of men and equipment to fight forest fires."

the air service during hot months has been the transporting of men and equipment to fight forest fires." Another attack on the problem of reducing the millions of dollars of water pollution damage occurring annually in the United States was revealed in the report of the State planning boards to National Resources Committee, released Nov. 11. Both the report made public that day on water problems and the recently published report of a special com-mittee on water pollution emphasize the fact that pollution forms one of the major water problems facing the States. Under date of Nov. 11 the Committee says: An example of the economic loss suffered by damage to State recreation facilities is seen in New Jersey, where the State Planning Board reports that for many miles the streams of the State are so badly polluted that all thought of their recreational use has long since been abandoned. In other States where the serious effects of pollution are understood, the difficulties in the way of immediate remedial steps are quickly recognized. The planning boards of Colorado, Connecticut, New York and Ohio have made special studies of pollution damages resulting from industrial wastes, and New York reports that "to stop industrial pollution without serious injury to the industries causing it, and therefore without detriment to the local people employed by them, requires close co-operation with the indus-tries in studying their problems and assisting them to develop adequate treatment processes."

tries in studying their problems and assisting them to develop adequate treatment processes." Evidence of the serious damage suffered by a particular section of the country is found in the report of the special committee on water pollution, which states that a study made on the upper Mississippi by Minnesota and Wisconsin shows that "the annual loss to commercial fishing and clamming through water pollution is \$95,000; the annual damage to sport fishing and attendant industries is \$35,000, while decreased property values in the Twin Cities was estimated at \$2,000,000, and damage to lands for recreational purposes at \$1,500,000. Other States such as Indiana, Iowa and Virginia have made efforts to evaluate similar economic losses which they believe would aggregate millions of dollars annually."

Decreased salaries for teachers, overcrowded schools, and lack of funds for school maintenance have forced the educa-

tional situation into the front rank of major national social

tional situation into the front rank of major national social and economic problems, according to a report on State plan-ning activities made public Nov. 13 by the National Resources Committee. In part, the Committee states: In the last few years teachers' salaries have declined, taxes collected for school systems are insufficient for adequate maintenance, and overcrowded schools throughout the country have curtailed curricula and eliminated services to a disturbing degree, according to the summary of the State planning boards' reports on education. In Iowa the State Planning Board, after a survey of rural areas, finds that 40,000 boys between the ages of 14 and 21 are not receiving systematic instruction in any school. In Ohio, the State Board's report says: "The outstanding fiscal problem is that of finding revenue to aid the great majority of school districts unable to meet fixed charges or operating expenses." Michigan has suffered a decrease of 45% of its school revenue in the last three years, according to its planning agency. The Kansas and Indiana State Planning Boards point out that new leisure

The Kansas and Indiana State Planning Boards point out that new leisure emphasizes the need of more adequate adult education, and technological advances require more and better vocational training. Arkansas's Board has recommended a general reorganization of its school system, and this is now 60% complete. Oregon's Board believes that schools hereafter must pro-vide ideals and attitudes, and not only skills and techniques for the student. Discussing unemployment and its effects on social and economic trends, the various State boards almost unanimously agreed that an indefenite but permanent number of unemployed can be expected. All States are seeking new industries, and many of them are encouraging the decentraliza-tion, as does Iowa, according to their reports. Texas planners are encour-aged by the influx of new industries to various communities near the coast, and they comment upon the entrance of women into most of these industries. New industries for stranded populations have occupied much of the State boards' time and thought because the location of industry as merely a matter of chance, so often true in the past, is considered a condition which planning may prevent.

matter of chance, so otten true in the past, is considered a contract applanning may prevent. When industry is willing to decentralize and move away from urban areas, the State boards generally agree, the geographical spread will tend to help diminish sharp fluctuations in the economic cycle. Technological ad-vances may permit certain productive activities during unfavorable weather, Iowa's planners believe, especially in the construction industry, and thus decrease unemployment.

New York Board of Trade "Not an Organization of Opposition" Says Its Head in Letter to President Roosevelt—Letter Prompted by Message from Latter Implying that Board Is Opposed to "Most Acts and Policies" of Government—Board Claims Right to Exercise "Prerogative of Free Citizens"— President Invited to Address Board Promited by a lotter from President Recognite in which

President Invited to Address Board Prompted by a letter from President Roosevelt in which it was indicated that the conclusion has been drawn by many persons throughout the country that the New York Board of Trade "is, broadly speaking, opposed to most of the acts and policies of the United States Government," Percy C. Magnus, President of the Board, has addressed President Roosevelt a reply in which he says that "the New York Board of Trade is certainly not an organization of opposition. Nor is it a partisan body. It aims at constructive action." Mr. Magnus, in noting expression of views by the Board on matters affecting trade, commerce and industry, points to its commendation of certain acts of the President, and to opposition of certain policies, and says "we do not regard this attitude as constituting opposi-tion to 'the acts and policies of the United States Govern-ment.' We are simply exercising the prerogative of free citizens and responsible taxpayers and business men to support legislative measures which we deem wise and oppose support legislative measures which we deem wise and oppose those which we regard as unwise."

support legislative measures which " those which we regard as unwise." The letters were made public at the monthly luncheon meeting of the Board at the Hotel Commodore, in New York City on Nov. 14. According to the New York "Times" the correspondence between the Board and the President was started when M. D. Griffith, Executive Vice-President of the organization, wrote to the President assuring him that press reports that the Board of Trade opposed his neutrality proclamation were erroneous. In the same paper the correspondence was given as follows:

The President's Letter THE WHIFE HOUSE

Washington, Nov. 4 1935.

Washington, Nov. 4 1935. My dear Mr. Griffith. I have your letter of Oct. 23 telling me that newspaper accounts re-porting the New York Board of Trade as opposed to the neutrality proclama-tion were erroneous. I am, of course, very glad to know this. I know you will not mind my saying that, in my opinion, many persons throughout the country have drawn the conclusion from this and other published statements that your organization is, broadly speaking, opposed to most of the acts and policies of the United States Government. There-fore, your statement that the Board has not officially opposed the proclama-tion of neutrality is welcome. I shall be very glad if you care to read this letter at the luncheon on Nov. 13.

Very sincerely yours, FRANKLIN D. ROOSEVELT.

r. M. D. Griffith, Executive Vice-President, New York Board of Trade, Inc., 41 Park Row,

New York, N. Y.

Mr.

Mr. Magnus Defends Board

Mr. Magnus Defenas board Mr. Magnus in his reply said: "We would be sorry indeed if you or any considerable number of our fellow-citizens should draw the conclusion that our organization 'is, broadly speaking, opposed to most of the acts and policies of the United States Government." "We have frequently expressed positive views on matters which vitally affect trade, commerce and industry. We have commended such acts as your veto of the Patman Bonus Bill, your recent statements on silver

purchasing and the passage and signing of the Motor Carriers' Act. Our opposition to certain policies has arisen from deep conviction and we have endeavored on all occasions to state clearly the reasoning upon which

have endeavored on an occasions to state clearly the reasoning upon which our conclusions were honestly predicated. "We do not regard this attitude as constituting opposition to 'the acts and policies of the United States Government.' We are simply exercising the prerogative of free citizens and responsible taxpayers and business men to support legislative measures which we deem wise and oppose those which we regard unwise. Surely no one would expect us to abdicate that right.

which we regard unwise. Surely no one would expect us to abdicate that right. "The New York Board of Trade is certainly not an organization of opposition. Nor is it a partisan body. It aims at constructive action. "Probably some people have accepted as the views of the New York Board of Trade the published statements of speakers who have addressed our monthly meetings. Newspaper clippings show that accounts of our meetings are widely published throughout the country. We extend to our speakers complete freedom of expression, but we make clear that their views are not necessarily those of the New York Board of Trade." In renewing the invitation to the President to address the group, Mr. Magnus wrote:

In renewing the invitation to the term of the President of the United Magnus wrote: "We have already expressed the hope that the President of the United States might consent to address a large representative group of Eastern business men under the auspices of the New York Board of Irade, and we have invited you, Mr. President, thus to honor us. We renew now that invitation for such a date as you may consider acceptable."

Secretary Ickes Acts to Restrict Purchase of Foreign Materials on Government Projects—Action Taken Following Protest By Labor Leaders Against Buying German Steel for PWA Jobs

Buying German Steel for PWA Jobs Following protests made by William Green, President of the American Federation of Labor, and officials representing other organizations, against the purchase of German steel for use on two projects of the Public Works Administration, viz., the Triborough Bridge in New York City and the Ocean Terminal at Morehead City, N. C., PWA Adminis-trator, Harold L. Ickes, has barred the purchase of foreign materials for Federal or non-Federal projects unless approval is first obtained from him. Mr. Ickes advised Mr. Green to this effect, in the following letter dated Nov. 13, and forwarded to President Green on Nov. 14: Dear Mr. Green:

Dear Mr. Green:

Dear Mr. Green: Acknowledgment is made of your letter of Nov. 12 raising the question of the effects on American labor of the use of foreign steel under contracts let by the Triborough Bridge Authority of New York City, which received an allotment by way of loan and grant of \$44,200,000 from the Federal Emergency Administration of Public Works. In addition to this project, there is one other where somewhat similar circumstances exist—in Morehead City, N. C. In both instances contracts for foreign steel were given by the contractor or subcontractor. Let me, first of all, tell you in no uncertain terms that it is not the inten-tion, nor has it ever been the intention, of PWA to permit the use of money voted by Congress for relief purposes to be used for the purchase of foreign materials on project construction.

Many months ago this subject construction. Many months ago this subject came up. There was definite legal doubt as to the authority of the executive branch of the Government to forbid the use of foreign materials in the absence of direct legislative sanction. During the discussion of the original National Recovery Administration bill in the Senate an amendment forbidding the use of foreign materials was offered but was not accepted.

bli in the senate an amendment torbidding the use of foreign materials was offered but was not accepted. Therefore, we established a differential of 15% on purchases of materials in excess of \$10,000 under the new program. That is, as you will under-stand, in addition to the protection given by the tariff laws. We thought it would be impossible for sellers of foreign materials to compete under this program successfully with domestic suppliers. So far as I know, out of the tens of thousands of contracts which have been let for the purchase of materials, not only by PWA but by other departments of the Government under relief appropriations, the cases I mentioned are the only two instances where the rule has proved ineffective. The amount involved in these two projects is comparatively small. Such a situation was, of course, neither anticipated nor could it reasonably have been foreseen. Accordingly, PWA is changing its regulations so as to provide that no foreign materials may be purchased for Federal or non-Federal projects instead of allowing purchases to be made directly by contractors or sub-contractors.

Bids to Be Scanned

I intend, if any bids lower than American are received from foreign producers, to determine two important questions before making any decision:

producers, to determine two important questions before making any decision: The first question that will have to be answered is: Is the foreign bid lower than the American bid either because of foreign government subsidy or by foreign exchange regulations which must be considered unfair to the American producer? Full investigation will be made in such case by the proper governmental authorities. Second: If the foreign bid is lower than the American bid, we shall ask this question: Are the American bid or bids collusive or are the American bid or bids so unreasonably high as to justify the belief that advantage is being taken of the Government in administering its relief funds? In one of the cases referred to above, four bids received from American manufacturers were identical, and this fact alone constitutes at least some evidence of collusion. In both cases the American bids were so far above the German bids as to justify inquiry into their fairness. Steps are being taken to have both of these questions investigated and reported on by the Federal Trade Commission. I shall be glad to advise you as to their findings. Sincerely yours,

Sincerely yours, HAROLD L. ICKES, Administrator.

Earlier in the week Mr. Ickes, in a letter to President Green was reported as saying that Nathan Burkan, Chairman of the Triborough Bridge Authority, was trying to "pass the buck" to the PWA on the matter of the contract to buy German steel. A Washington dispatch of Nov. 12 to the New York "Herald Tribune" quoted Mr. Ickes as follows:

Secretary Ickes said that the German steel order, for materials on the Queens approach to the bridge, "amounted to somewhat less than \$100,000." . He said the German price was 47% less than the domestic price.

Mr. Ickes recalled that German steel also had been used for the Morehead City ocean terminal in North Carolina. On that project the successful German bid of \$85,000 was \$35,000 less than the bid of American firms. Mr. Ickes said that all American bids for the Morehead steel were iden-tical. "I can't believe that manufacturing costs were the same for all the steel companies," he said. "But still the bids were identical."

Secretary of Commerce Roper revealed on Nov. 13 that he also had protested to Mr. Ickes against the Government policy. The New York "Times," in a Washington dispatch of Nov. 13, had the following to say:

of Nov. 13, had the following to say: "I believe that we all agree our first duty is at home," Mr. Roper said, after remarking that he had telephoned Mr. Ickes early to-day to discuss the matter with him. The Secretary of the Interior reiterated that if Ameri-can industry required further protection, it was the business of the Fariff Commission, and not of PWA, to act, Mr. Roper reported. "Although I am not nationalistic and realize the importance of developing foreign trade," Secretary Roper continued., "I am firmly of the belief that we should employ American people and use American materials." In view of his talk with Secretary Roper and the flood of protests from labor and industry over the German orders pouring in directly to PWA headquarters, Secretary Ickes called a conference of his legal advisers and other aides to draft a statement in reply. Protest against the nurchase of German steel for the

Protest against the purchase of German steel for the Triborough Bridge in New York City had also been lodged with Secretary Ickes by Mayor La Guardia of New York. Regarding the controversy we quote the following from the "Times" of Nov. 9:

"Times" of Nov. 9: The American steel producers are opposing the use of the German steel on the ground that the PWA funds were voted by Congress to relieve unem-ployment in this country. They declare that in the Postoffice and Fresaury Department Appropriation Act of 1934 it was stated that domestic materials should be used unless "unreasonable" prices are quoted by American pro-ducers. Several months ago, however, the PWA issued an order specifying that borrowers of PWA funds could buy foreign material where the value of the order is \$10,000 or more, and the price is 15% less than any domestic ouotation. quotation.

This differential, the steel producers say, is insufficient in view of the dis-parity between the American wage scale and that of Germany, and also in view of the subsidies received by some of the foreign manufacturers from their governments.

their governments. The Triborough Bridge contract is the second received by the German steel interests on PWA projects within the last month, it became known yesterday. An order for 1,600 tons of German sheet steel piling was awarded recently for the ocean terminal at Morehead City, N. C. The order amounted to \$91,000. Unsuccessful American bidders were the United States Steel Corporation, Bethlehem Steel, Inland Steel and Jones & Laughlin. & Laughlin.

The original specifications, according to American steel executives. The original specifications, according to American steel executives, would not have permitted the use of foreign steel. The specifications were changed, however, and the order was eventually received by the Kloeckner Steel Corp., which imports German steel. The company has offices here. The lowest American bid on the Morehead City project was \$116,000. The Kloeckner Steel Corp. will also provide the sheet steel piling for the Triborough Bridge, unless present plans are changed. The order involves 1,000,000 pounds of steel, valued at about \$20,000.

Soil Conditions a Factor

Use of the sheet piling on the Queens approach was necessitated by the

Use of the sheet piling on the Queens approach was necessitated by the nature of the sub-soil conditions. The low bidder for this work was the Wood Truss Construction Co. of Astoria. William Goldsmith, Treasurer of the latter company, said yesterday that the use of the German steel was decided upon because it was "more suitable on a rush job." He said the construct which his firm received gave it the right to use foreign steel, if the price was 15% less than the lowest priced American steel now available. Engineers identified with the construction of the Triborough Bridge said yesterday that American sheet piling could have been adapted for use in the construction of the Queens approach. The engineering department of the bridge, it was said, approved the use of the German steel "from the ongineering aspect only." The terms of the contract, it was explained, permitted the Wood Truss Co. to use German steel. Me company said that it had received no word that the construct had been held up because of the use of German steel. He said that the question involved was not whether the American on steel. The American producers, he said, were protected sufficiently by a tariff against foreign imports, and by the 15% price differential. American taxpayers would be saved money through the use of the German steel, he said

Cite Wage Scales

According to American steel producers, wages paid workers in German steel mills average 29 cents an hour, while employes of the American mills receive an average of 65.4 cents an hour. For more than a year, the domes-tic producers have been protesting against the steel imports, which are made possible, they declare, by the lower wage scale abroad.

Producers Having Excess Burley, and Dark Tobacco May Purchase Additional Allotment Cards Under AAA Amendment to Administrative Ruling

Contracting growers of burley, fire-cured and dark air-cured tobacco who have complied with their contracts to date but who have produced tobacco in excess of their allotments, may obtain additional allotment cards under an amendment to an administrative ruling announced Nov. 13 by the Agricultural Adjustment Administration. The new ruling provides two methods through which contracting producers with excess tobacco may purchase additional allotment cards, the AAA stated. It said:

allotment cards, the AAA stated. It said: First, producers with excess tobacco may purchase, through county agents' offices, the unused allotments of other producers whose production is deficient. In such cases the producer whose production is less than his allotment will be required to execute a form on which he waives the de-ficiency payment under his contract for 1935. Under the other method, a contracting grower with excess production may, after he has sold his initial allotment, purchase an additional allot-ment card through county agents' offices by refunding three cents for each pound of excess burley tobacco and two cents for each pound of excess fire-cured and dark air-cured tobacco. Under this latter method the pro-ducer purchasing the additional allotment card will be required to sign an agreement and deliver to the county agent a certified check, bank draft

tp://fraser.stlouisfed.org/

cashier's check or postal money order made payable to the order of the United States Department of Agriculture. The funds accumulated through these refunds will be used in making benefit payments to all growers who co-operate under tobacco contracts. The value of excess tobacco sold will not be included in calculating the amount of the adjustment payments under the contracts for 1935. In order to encourage the diversion of the lower grades of tobacco to by-product uses, especially in the case of dark types of tobacco, growers with excess production may sell such excess tobacco to manufacturers who enter into an agreement with the Secretary to use such tobacco only in the manu-facture of nicotine, spray material, fertilizer, or other tobacco by-products. For additional allotment cards to cover such sales to nicotine companies, the contracting grower will pay one-half cent per pound and will be eligible to receive tax-payment warrants if the sale bills are properly certified by the nicotine buyers. Detailed instructions may be obtained through county

the nicotine buyers. Detailed instructions may be obtained through county agents' offices when the markets open. Contracting growers will not be permitted to sell tobacco except on allot-ment cards issued in accordance with the provisions of the contract or the ruling.

A. F. of L. Sees September Job Gain of 427,000—Largest Decrease in Unemployment in Two Years—Urges Shorter Hours to Create More Openings

Unemployment in private industry decreased by 427,000 in September, the most important gain in jobs since Septem-ber 1933, the American Federation of Labor reported on Nov. 8. Pointing out that this increase in employment was Nov. 8. Pointing out that this increase in employment was the first of any importance since the creation of the National Recovery Administration, the Federation said that the upturn would have been even greater if working hours had been shortened last summer, instead of lengthened. The survey said that as a result of increasing production, employ-ment in September 1935, had been lifted to the level of November 1931, but added that production had risen 20% above that level. United Press Washington advices of Nov. 8 added the following from the Federation report: In other words, it took a level of production 20% higher in September 1935, to keep the same number of men at work as in November 1931. With no more men at work earning income, who will buy the 20% increase in production?

production? The September gain of 427,000 jobs compared with 880,000 made in 1933 when NRA shortened working hours, A. F. of L. said. "Unquestionably the gain would have been greater this fall had hours been shortened, or at least not lengthened, last summer," its report said. Fifteen per cent of all union men were unemployed in October, the Federation's preliminaty figures showed. New York Oity showed the greatest unemployment with 24%, and Washington, D. C., the least, This has been were

with 6. This lag between production and employment was mentioned recently by President Roosevelt as one of the chief reasons for retarded prosperity and the biggest problem to be met. The President said he planned to question leading industrialists in an effort to work out methods of equalizing the two levels.

Dr. Joshua Bernhardt Named Chief of AAA Sugar Section

Section The appointment of Dr. Joshua Bernhardt as chief of the sugar section was announced Nov. 11 by the Agricultural Adjustment Administration. Dr. Bernhardt, who has been with the sugar section since September 1933, participated in the formulation of the Administration's sugar program which culminated in the enactment of the Jones-Costigan Act in June 1934. He has been acting chief since the resig-nation of John E. Dalton, who recently resumed his duties as a member of the faculty of the School of Business Adminis-tration, Harvard University. The AAA said:

Dr. Bernhardt has been engaged in governmental activities connected with sugar for a number of years. He was a member of the statistical staff dealing with sugar under the Food Administration during the World War, was chief statistician of the United States Sugar Equalization Board from 1919 to 1920, and was chief of the sugar section of the United States Tariff Commission from 1922 to 1924.

Bruno Richard Hauptmann Appeals to United States Supreme Court for Review of Decision Sustaining His Conviction of Murder of Lindbergh Baby

His Conviction of Murder of Lindbergh Baby Bruno Richard Hauptmann, convicted of the murder of Charles Augustus Lindbergh Jr., on Nov. 12 appealed to the United States Supreme Court for a review of the action of the New Jersey Court of Errors and Appeals in sustaining his conviction by a trial court at Flemington, N. J., last February. (A stay in the execution of the death sentence on Hauptmann was noted in our issue of Oct. 26, page 2678). The petition to the Supreme Court, which was signed by Hauptmann, said that the Court of Errors and Appeals erred in its findings because his constitutional rights of life and liberty were jeopardized by "biased and exaggerated newspaper reports," a "hysterical mob spirit" surrounding the jury that convicted him, and the "picture of a circus maximus" daily presented to the jury. A Washington dis-patch of Nov. 12 to the New York "Times" quoted further from the petition as follows:

"Because of the daily presence of Colonel Charles A. Lindbergh at the trial, which unduly influenced the jury to view him as the real prosecutor and constantly presented to the jury the picture of a bereaved father for whose sorrow the world demanded a sacrifice."

Scores Prosecutor and Judge In addition, Hauptmann asserted, there were "repeated outbursts" in the court room. Attorney General David T. Wilentz made "an inflam-matory summation far beyond the evidence." The State had "varying theo-ries" as to the prisoner's guilt. The trial judge, Supreme Court Justice Thomas W. Trenchard, "portrayed emphatic approval" of the State's theories and witnesses, and delivered to the jury a charge "argumentative to a degree which made comments on evidence characteristically an act of advocacy."

The German machine-gunner's approach to the Supreme Court means either a reopening of his celebrated case or a further delay in his execution. It is now expected that the Court may, through a simple order, perhaps on Dec. 9, 16 or 23, grant or deny the petition.

Death of W. L. Fisher, Former Secretary of Interior Death of W. L. Fisher, Former Secretary of Interior Walter L. Fisher, Secretary of the Interior in the Cabinet of President Taft, died on Nov. 9 at his home near Chicago, following a heart attack. He was 73 years old. Mr. Fisher was special traction counsel for the city of Chicago when President Taft appointed him Secretary of the Interior in 1910 after the removal of Richard A. Ballinger. At the end of the Taft Administration he returned to the practice of law. A brief biography of Mr. Fisher follows, as contained in the New York "Herald Tribune" of Nov. 10: Mr. Fisher had been special counsel for the Interstate Commerce Commis-sion and several Senate and House investigating committees. In recent years he had served as court co-ordinator in negotiations to unify the Chicago

years he had served as court co-ordinator in negotiations to unify the Chicago elevated lines and the street car system.

elevated lines and the street car system. He first attracted national attention by his handling of the street railway franchise question which had dominated Chicago politics for years and had involved both the City Council and the State Legislature. Mayor Dunne, a Democrat, called upon him in 1907 to serve as special traction counsel. He drafted a street railway ordinance under which full protection was guaranteed to the security holders and which assured the city of 55% of the net profit, with the right to purchase the property on fair terms. In 1908 he was elected first President of the National Conservation League, which was organized in Washington. He was Vice-President of the National Conservation Association, when the late President Charles W. Eliot, of Harvard, was its President and Gifford Pinchot was the other Vice-President. President Taft appointed him a member of the Federal Railroad Securities Commission in 1910, which was organized to consider questions of the stock and bond issues of railroads. He became Secretary of the Interior on March 13 of the following year.

Montagu Norman Recommended for Re-election as Governor of Bank of England—Sir E. M. Harvey Retiring as Deputy Governor

In wireless advices from London, England, Nov. 14, to the New York "Times" of Nov. 15, it was stated:

The directors of the Bank of England recommended to-day that Montagu Norman be re-elected Governor next April. Mr. Norman is serving his sixteenth successive year in the governorship, a record for tenure of the position.

position. At the same time it was announced that Sir Ernest Musgrave Harvey is retiring as Deputy Governor after seven years, and the court of directors recommended the election of Basil Gage Catterns, formerly Chief Cashier of the Bank, and a central banker of long training.

Re-election of E.K. Mills and W. C. Teagle as Directors of New York Federal Reserve Bank The member banks in Group 2 of the New York Federal Reserve District have re-elected Edward K. Mills and Walter C. Teagle as directors of the Federal Reserve Bank of New York for terms of three years beginning Jan. 1 1936, it was announced yesterday (Nov. 15) by J. H. Case, Chair-man of the Board. Mr. Mills, who is President of the Morris-town Trust Co., Morristown, N. J., was re-elected a Class A director, and Mr. Teagle, who is President of the Standard Oil Co. (New Jersey), a Class B director. Summaries of the careers of the two directors appeared in our issue of Nov. 2, page 2828, at which time their renomination was indicated.

F. J. McCabe Elected Governor of New York Curb Exchange to Fill Vacancy—Will Serve Until Annual Election in February

At the regular meeting of the Board of Governors of the New York Curb Exchange, held Nov. 13 1935, Frank J. McCabe was elected a member of the Board to fill an existing vacancy. He will serve until the next annual election in vacancy. He v February 1936.

Permanent Board of Directors of 21 Elected for 1939-1940 New York City World's Fair A permanent board of directors, consisting of 21 members, was elected for the world's fair to be held in New York City in 1939 and 1940 at a meeting of the incorporators Nov. 6. The filing of the incorporation papers in Albany for the fair was noted in our issue of Oct. 26, page 2680. The board of directors, which will have charge of the development and conduct of the fair, is as follows:

of directors, which will have charge of the development and conduct of the fair, is as follows:
James G. Blaine—President, Marine Midland Trust Co.
Edward C. Blum—President, Brooklyn Institute of Arts and Sciences.
George A. Brownell—Law firm of Davis, Polk, Wardwell, Gardiner & Reed.
Mortimer N. Buckner—Chairman, New York Trust Co.
William M. Chadbourne—Law firm of Chadbourne, Hunt, Jaeckel & Brown.
F. Trubee Davison—Chairman, American Museum of Natural History.
Cleveland E. Dodgo—Vice-President, Phelps, Dodge Corp.
Harvey D. Gibson—President, Manufacturers Trust Co.
Robert W. Higbie—Vice-President, Jamaica Savings Bank.
Louis W. Kaufmann—President, Anandracturers Trust Co.
George McAneny—President, Title Guarantee & Trust Co., and President Regional Plan Association, Inc.
Morgan J. O'Brien—Former presiding Justice of the Appellate Division.
William Church Osborn—President, Clitzens Budget Commission
W. Francklyn Paris—United States Commissioner to the Paris Exposition.
David Sarnoff—President, R. H. Macy & Co.
Thomas J. Watson—President, International Business Machines Corp.
Grover S. Straus—President, R. H. Macy & Co.
Thomas J. Watson—President, American Federation of Labor.

Production Credit Loans to Farmers Increased 80% During First Nine Months of Year, Presidents of Production Credit Corporations Told

Production Credit Corporations Told An 80% increase in loans of farmers Production Credit Associations during the first nine months of 1935 compared to the corresponding period last year indicates the growing demand for sound short-term farm credit, S. M. Garwood, Production Credit Commissioner of the Farm Credit Administration, stated in a statement made Nov. 12 before the Presidents of the 12 Production Credit Corporations, meeting the past week in a joint conference in Washington. Loans to farmers by Production Credit Associations amounted to \$138,000,000 up to Sept. 30 compared to \$76,300,000 in the first nine months of 1934, Commissioner Garwood said, adding: Garwood said, adding:

Garwood said, adding:
While the total volume of short-term farm credit is still considerably below the pre-depression level it is increasing as the effects of the depression wear off. Low cost money for farm production and for purchasing farm supplies and making improvements has stimulated the flow of credit and a further demand is in sight for the coming winter and next spring. The Production Credit Associations have been making loans available throughout the country at 5% for the past year and a half.
With farm income for 1935 estimated at the highest figure in five years, and land values gradually increasing, farm security is being enhanced and thousands of farmers are now in a position to qualify for loans from country banks. Production Credit Associations, and other cash lending institutions. This will not only broaden the farmer's purchasing power and paying ability but enable him to go on a cash buying basis and save money as compared with time purchases.
In the corn belt, livestock and feeder cattle financing through the Production Credit Associations is considerably ahead of last year and E. R. Heaton, President of the Production Credit Associations in the Omaha district during October was the largest of any month since the associations were set up in the spring of 1934. The Omaha Production Credit Corporation supervises 42 production credit associations in Iowa, Nebraska, South Dakota and Wyoming.

Production Credit Association loans by districts during nine months of this year compared with nine months of last year, it was announced, are as follows:

Springfield, Mass. (New England States, New York and New Jersey)	1934 \$7,389,000	1935 \$10,342,000	
Baltimore, Md. (Pennsylvania, Maryland, Dela- ware, Virginia, and West Virginia).	3,621,000	5,578,000	
Columbia, S. C. (North Carolina, South Carolina, Georgia and Florida) Louisville, Ky. (Ohio, Indiana, Kentucky and	8,129,000	12,789,000	
Tennessee) New Orleans, La. (Alabama, Mississippi and	2,526,000	6,578,000	
Louisiana) St. Louis, Mo. (Illinois, Missouri and Arkansas)	6,220,000 4,880,000	10,225,000 9,018,000	
St. Paul, Minn. (Michigan, Wisconsin, Minnesota and North Dakota)	4,394,000	10,695,000	
Omaha, Neb. (Iowa, Nebraska, South Dakota and Wyoming)	3,358,000	8,693,000	
Wichita, Kans. (Kansas, Oklahoma, Colorado and New Mexico)	6,443,000	13,236,000	
Houston, Texas (Texas) Berkeley, Calif. (California, Nevada, Utah and	4,664,000	8,845,000	
Arizona) Spokane, Wash. (Washington, Oregon, Montana	8,580,000	19,499,000	
and Idaho)	16,121,000	22,432,000	

Business Advisory Council to Continue at Request of President Roosevelt—Henry P. Kendall to Retire as Chairman but Retain Membership—

The Business Advisory Council, organized about two years ago by Secretary of Commerce Roper, was requested on Nov. 12 to continue its activity, it was stated in special Washington advices, that day, to the New York "Times." The President talked with Henry P. Kendall, Chairman, and Delancey Kountze, an active member, the advices said, further noting. further noting:

Mr. Kendall said that the request would be complied with and that the Council would meet Dec. 5 to reorganize. He proposes to retire as Chair-man, but will continue as a member. He said many members felt they had served on the Council long enough. The Council has prepared numerous reports on activities of the Govern-ment in their relation to industry, and on several occasions members have gone to the White House to discuss current affairs with Mr. Roosevelt.

Regret At Absence of Senator Glass From Convention of American Bankers Association Expressed By President Hecht

President Hecht Regret at the inability to have Senator Carter Glass of Virginia, who was Chairman of the Subcommittee of the Senate Banking and Currency Committee in charge of the Banking Act of 1935, as the first guest speaker at the opening session this week of the annual convention at New Orleans of the American Bankers Association was expressed at the session on Nov. 12 by Rudolf S. Hecht, President of the Association and Chairman of the Board Hibernia National Bank, New Orleans. Mr. Hecht explained to the convention that the veteran leader in banking legislation had been required by his physicians to give up the engagement. Quoting from a letter from the Senator, Mr. Hecht read, "Please be good enough to assure your associates of the Bankers Asso-ciation that I feel highly honored at the invitation to make the opening address there, and I genuinely regret that I cannot be among their guests on this occasion."

on this occasion.

In his reply to Senator Glass, Mr. Hecht wrote;

In his reply to Senator Chass, Mr. Heent wrote; "My disappointment is all the greater because I know that no part of the program had attracted more interest and helped to swell the attendence than the prospect of hearing you speak. On the other hand, of course I understand that your health comes first, and we who are your friends cannot find fault with you for being extremely careful, and for taking the necessary precautions to store up a big reserve of energy for your future activities in Congress, which we hope will extend over many years."

Annual Convention of National Association of Super-visors of State Banks-Rudolph Hecht Urges Against Indiscriminate Chartering of New Banks-R. N. Sims Urges Halt in Further National Legis-lation-Comments on FDIC

Addressing the National Association of Supervisors of State Banks, in annual convention at Atlanta on Nov. 7, Rudolph Heeht, President of the American Bankers Asso-ciation, observed that the 16,173 banks now doing business in this country provide ample banking facilities except in a few isolated cases, and care should be taken to prevent a new overproduction of banks. A dispatch from Atlanta Nov. 7 to the New Orleans "Times-Picayune," from which we quote, also said in part: Mr. Hecht stated that bank earnings have been affected seriously by

we quote, also said in part: Mr. Hecht stated that bank earnings have been affected seriously by competition which Government financial agencies have given them during the past few years and that with prevailing low interest rates it is difficult to earn a satisfactory return on their capital funds. Mr. Hecht expressed further the view that State Bank Supervisors as well as Federal authorities should take care to prevent indiscriminate chartering of new banks with small capital in places which are either not large enough to support a bank or in which there are already available sufficient banking facilities to take care of their reasonable requirements. Mr. Hecht asserted that the new Banking Act of 1935 gives the Federal Deposit Insurance Corporation full authority to determine whether there exists an economic necessity for the creation of a new bank before a newly chartered institution will be admitted to the benefits of the insurance fund. A report was presented at the convention by R. N. Sims

A report was presented at the convention by R. N. Sims, of New Orleans, Secretary-Treasurer of the Supervisors Association, giving figures of total resources of State banking institutions of the country, together with similar totals of National banks. In another item in this issue further reference is made to Mr. Sims' report. Among other things Mr. Sims said Mr. Sims said:

The State banks are closest to the producers of this country. They are now controlled by more safety legislation than ever before in the nation's history, and I believe that there should be a halt in further National legis-lation, that our banks should be permitted to pursue their way without uncertainty, so that we may move more swiftly to complete National recovery recovery.

Governor Talmadge of Georgia, who also addressed the convention, is quoted in the Atlanta "Constitution" as follows:

Governor l'almadge urged the Supervisors to "drive the Federal Govern-

Governor raimadge urged the Supervisors to "drive the Federal Covern-ment out of the banking business." "If the bankers would wake up they would put a stop to this Government competition," he said. "This system is all wrong. The Government competes with the banker and then it turns around and taxes him to help pay for the competition."

In its Nov. 9 issue the "Constitution" said in part:

Federal insurance of bank deposits was defended and attacked yesterday before the annual convention of the National Association of Supervisors of State banks.

of State banks. Hearing from Leo T. Crowley, Chairman of the FDIO, that "if the FDIO can't financially take care of losses of depositors then it is a reflection on our banking system and something must be done in a legislative way," the 40-odd Supervisors heard shortly afterwards from W. S. Elliott, Vice-President and cashier of the Bank of Canton, that such insurance is "unfair to good banks and inequitable to large banks." ... In attacking such insurance, Mr. Elliott said "ultimately, weak banks will close and good banks will get out of the system." "We shall see all deposits placed in banks solely because of faith in the management and not because of Government insurance equal in many cases to less than 1% of a depositor's balance," he said. "Banks will have to be operated on this basis or the Government will have to take them over as some of our socialistic friends suggest." Mr. Elliott described himself as a "lifelong Democrat," saying Democrats "must reserve the right, however, to criticize such things as we feel are wrong."

wrong.

Compilation of Capital, Resources, &c., of State and National Banks by R. N. Sims of National Associa-tion of Supervisors of State Banks—Deposits in State Banks Reported 28% in Excess of National Institutions

State Banks Reported 28% in Excess of National Institutions
At the thirty-fourth annual convention of the National Association of Supervisers of State Banks, Nov. 7, R. N. Sins, Secretary-Treasurer, submitted to the Association a statement which shows in detail by States the capital, surplus and undivided profits, deposits, loans and discounts, stocks, bonds and securities, and total resources of all State banking institutions of the United States, together with totals of these items of the National banks, and all covering as of June 29 1935. The report of Secretary Sims, it is stated, covers the only available accurate and detailed data of State banking institutions comparable with the report of the Comproduce of the Currency which covers the National banks. In the securities the statement Mr. Sims said:
This report is made up from the figures covering the close of business of the 29 1935. The figures are very gratifying when we consider the most drug the last several year.
On June 29 1935 there was a total of 16,173 banks, of which 10,742 were state banks and 5,431 were National banks, and in round numbers a total explusion and undivided profits of \$7,440,648,625; total deposits of \$1,438,229,663, and total resources of \$60,433,222,450. Total capital, surplus and undivided profits of 10,202 bance, and total resources were \$2,910,451,022 above figures of June 20 1935, in round numbers, the capital, surplus and undivided profits of 19,742, set, and total resources of the State banks were \$4,406,865,625, and of the National banks, 2,943,788,000, showing the capital resources of the State banks were \$2,919,983,063 and of the National banks \$22,518,246,000, showing the capital scources of the National banks. The deposits of the State banks 28% in excess of the National banks. The second the National banks. The second the National banks, The second the National banks. The second the National banks, the second the National banks. The second the National banks. The second the National banks. T

total resources of the State banks were \$34,372,157,450 and the National banks \$26,061,065,000, showing the resources of the State banks 32% in excess of the National banks. It is significant that during the year ending June 29 1935 there was a

total decrease in the loans and discounts in all of our banks of \$1,130,-000,000, and during the same period an increase in the bonds, stocks and securities of \$1,753,000,000, being an increase of \$415,000,000 in the State banks and \$1,338,000,000 in the National banks. The holdings of Govern-ment securities by our banks are large.

Federal Reserve Banks

Total resources of all member Federal Reserve banks on June 29 1935 were \$40,772,266,000.

Total resources of all memoer Federal Reserve banks on June 29 1000 were \$40,772,266,000. Total resources of the 5,431 National banks on June 29 1935 were \$26,-061,065,000, or 64% of total, an average of \$4,800,417 per bank. Total resources of the 985 State member banks June 29 1935 were \$14,-711,201,000, or 36% of total, an average of \$14,935,229 per bank. These figures show our banks to be in a strong position and emphasize the important part which the State banking institutions play in our great Federal Reserve System, through their voluntary membership. The preponderating volume of State bank resources, as late as June 29 1935, should warn our National authorities that further banking legislation, pointed in the direction of our State banks, must be cautiously pursued so as to guard against injury to this great element of our financial structure. The State banks are closest to the producers of this country. They are now controlled by more safety legislation than ever before in the nation's history, and I believe that there should be a halt in further mational legislation, that our banks should be permitted to pursue their way without uncertainty, so that we may move more switty to complete national recovery.

New Jersey Bankers Association to Hold Mid-Year Trust and Banking Conference Next Week, Nov. 21 and 22

The mid-year trust and banking conference of the New Jersey Bankers Association will be held next week, Nov. 21 and 22, at the Hotel Alexander Hamilton, Paterson, N. J. Previous reference to the coming meeting was made in our issue of Oct. 12, page 2376. The speakers at the conference, as announced on Nov. 11 by Leslie G. McDouall, President of the Association are: of the Association, are: Leslie G. McDouall.

DeWith Hubbell, Executive Vice-President the Plainfield Trust Co., Plainfield.

New Jersey Plan for Conserving Real Estate of Multiple Property Holders Described by Commissioner C. K. Withers—Adoption of Program Urged in Address Before National Association of Real

Estate Boards

Estate Boards The New Jersey plan for conserving the real estate of banks, insurance companies and other institutions being liquidated or rehabilitated by the State Commissioner of Banking and Insurance applies nationally recognized stand-ards of real estate management, Carl K. Withers, State Com-missioner, told the annual convention of the National Asso-ciation of Real Estate Boards, at Atlantic City, on Oct. 19. The plan, he said, is already under consideration by officials of other States and by groups concerned with the problem of orderly absorption of such properties into normal use and normal ownership. Mr. Withers urged other multiple prop-erty owners to unite "in determination and insistence upon able and responsible management according to uniform stand-ards and against the hasty and ill-advised sacrifice of prop-erties to the inevitable detriment of the entire progress of erties to the inevitable detriment of the entire progress of

erties to the inevitable detriment of the entire progress of recovery." The Withers plan, the Commissioner said, involves the crea-tion of a "Division of Conservation" within his Department. That task includes the management and ultimate sale of some 3,000 odd pieces of property of every conceivable kind, scattered through most of the counties throughout the State. In describing details of the plan, Mr. Withers said, in part: The plan simply applies to the liquidation of the assets of scattered, closed institutions, and of those in possession for reorganization and rehabilitation, the same sound principles of centralized management and control which might well be applied to any successful business enterprise. In the practical working of the plan, particularly as it affects the management and sale of real estate, decentralization gives way to centralization; duplicate effort to uniform procedure; delay and indecision to decisive action with the benefit of expert advice, and, above all, the assurance of unbiased and unprejudiced judgment in the interests of those most concerned—the depositors and credi-tors of the institutions involved. But however practical and workable the plan, its success, particularly as

tors of the institutions involved. But however practical and workable the plan, its success, particularly as it relates to real estate, will depend very largely upon the degree of co-operation which may be expected from other multiple property owners; insurance and title companies, building and loan associations and banks, and, inevitably, the various Federal agencies which have become and will continue in volume to be such a factor in the real estate situation. It accordingly becomes vital not only to the success of the plan which I have outlined, but to the ultimate recovery and stability of realty values everywhere, that these so-called "wholesale" owners of real estate, with their vast holdings, unite in their determination and insistence upon able and

responsible management according to uniform standards, and against the hasty and ill-advised sacrifice of properties to the inevitable detriment of the entire progress of recovery. The Division of Conservation of the Department of Banking and Insurance

In New Jersey is already committed to such a policy, and I can conceive of no more worthy objective or accomplishment that may come out of this convention than an aggressive program to this end along national lines.

Texas Centennial Exposition to Open in Dallas June 6 1936—10,000,000 Visitors Expected

The Texas Centennial Exposition of 1936, to be held in Dallas beginning June 6 of next year, will be the first ex-position of world magnitude ever to be given south of the Mason and Dixon Line, according to a recent announcement by the committee in charge. The statement said that this will not only commemorate 100 years of Texas history, but will not only commemorate an operativity to see in one great will also offer investors an opportunity to see in one great central exposition the resources, potentialities and business possbilities of the Southwest. The announcement added, in part:

In part: Not only will this be true as to the investor, but also as to the manu-facturer, distributor and jobber who is doing, or hopes to do, business with the Southwestern empire in the new awakening of a business era. With a minimum of 10,000,000 visitors regarded as practically certain, he will have the opportunity of displaying his wares in beautiful exhibit buildings and of making contacts, in a few weeks or months, with the great buying power of the section. Here are some of the salient facts as concerns Texas which will be of inter-est, both to the investor localing for new fields and to the business man seek

Here are some of the salient facts as concerns Texas which will be of inter-est both to the investor looking for new fields and to the business man seek-ing further avenues for the expansion of his product. Texas has a diversity of climate, of agriculture, of ranching, of mining, such as to offer any visitor just the conditions he desires for his specific purpose. Texas has in its pine timber belt an area as large as the State of Indiana. The resources of the Lone Star State in marble, granites of wide varlety and marvelous beauty, coal, lignites, oil, gas, iron ore, timber, soil and climate give it a commanding position in the sisterhood of American States.

Chamber of Commerce of State of New York to Hold Annual Banquet Nov. 21

Annual Banquet Nov. 21 The 167th annual banquet of the Chamber of Commerce of the State of New York will be held at the Waldorf-Astoria Hotel in New York City on Nov. 21, and will bring together one of the largest groups of business leaders that has attended Chamber dinners in many years. It was announced Nov. 11 that the banking, investment, railroad, public utility and insurance industries will be prominently represented. The speakers at the dinner will be representative men from three sections of the country—the south, the middle west and the east:—United States Senator Lester Jesse Dickinson, of Iowa, who is spokesman for the farm belt and made the keynote address at the Republican National Con-vention in 1932; Governor John C. B. Ehringhaus, of North Carolina, who is prominent in the Democratic councils in the south, and Thomas I. Parkinson, President of the Equitable Life Assurance Society of the United States, who as President of the Chamber will be toastmaster.

Annual Meeting of National Industrial Traffic League to Be Held in Chicago Nov. 20 and 21

to Be Held in Chicago Nov. 20 and 21 Transportation questions that have arisen in the past year and are likely to arise in the coming year will be considered by shippers next week at the annual meeting of the National Industrial Traffic League, to be held at the Palmer House, in Chicago, Nov. 20 and 21. The League, it is stated, is recognized as the spokesman organization of the shippers of the United States. Several reports will be presented to the two-day meeting by various committees of the League, some dealing with legislation adopted at the recent session of Congress or to be considered at the coming session. Carl R. Gray, President of the Union Pacific System, Omaha, Neb., will address the meeting at a luncheon to be held Nov. 20 on "Developments in Transportation."

Annual Convention of American Bankers Association at New Orleans—Robert V. Fleming Elected President—O. W. Adams Installed as 2d Vice-President—Latter a Critic at Convention of Administration's Policies—M. S. Eccles, Head of Federal Reserve System, Defends Government Spending—Next Year's Meeting to Be Held at San Francisco Spending—Nex San Francisco

San Francisco Following criticisms at the annual convention of the American Bankers Association of Government spending, Marriner S. Eccles, Chairman of the Board of Governors of the Federal Reserve System, at the concluding session of the convention on Nov. 14 defended the Government's course. From one of the press accounts from New Orleans Nov. 14 (to the New York "Herald Tribune") we take the following: following:

Governor Eccles adverted to the recommendation made here on Monday by Orval W. Adams, inducted into office to-day as Second Vice-President, that the bankers declare an embargo on further purchase of Government securities until the Administration made a genuine, honest effort to balance the Federal budget, "Those who talk of boycotting Government bonds," he (Mr. Eccles) said, "suggest a drowning man, to whom a life line is thrown, who objects that it is an interference with his individual right and liberty to drown." *Cooperation Urged*

Co-operation Urged

Mr. Adams, over whose election so much heat was generated in the first three days of the convention, followed Mr. Eccles to the rostrum to receive his badge of office. Governor Eccles made much of his address an apologia for the New Deal's monetary and credit policies. He had been at the convention since

Monday night and had had ample opportunity to see the bankers turn on and defeat a candidate for Second Vice-President, E. G. Bennett, of Ogden, Utah, in spite of the fact that Mr. Bennett won the nominating com-mittee's indorsement, principally because the latter, though a Republican, was known to be a business associate of Mr. Eccles and believed to be sympathetic to a good part of what the New Deal stood for.

Mr. Adams, who was a speaker on Nov. 11 at the Clearing House Round Table Conference, is Vice-President of the Utah State National Bank of Salt Lake City. Stating that his election as 2d Vice-President of the Association carries with it the right of succession to the presidency two years hence, New Orleans advices Nov. 13 to the New York "Times" said in part:

"Times" said in part: "Times" said in part: The contest was decided, not by a conclusive vote but by the eleventh-hour withdrawal from the race of E. G. Bennett of Ogden, Utah . . . Mr. Bennett had received the official nomination for the Second-Vice-Presidency at a meeting of the Association's Nominating Committee yesterday evening. He won in the Committee over Frank F. Brooks, President of the First National Bank of Pittsburgh, who had been the choice of Eastern bankers, particularly those from New York. According to the precedents of the association, selection by the nomi-nating committee should carry with it undisputed election. This custom was followed by the association in choosing a new President and First Vice-President, electing to those offices, respectively, Robert V. Fleming, President of the Riggs National Bank of Washington, D. C., who has been First Vice-President for the past year, and Tom K. Smith, President of the Boatmen's National Bank of St. Louis, who has been Second Vice-President.

of the Boatmen's National bank of the section of the Boatmen's National Bank of the Southerness President. Mr. Fleming and Mr. Smith were elected by acclaim when their names were presented by the nominating committee, but when the name of Mr. Bennett was advanced, Charles F. Zimmerman, a Pennsylvania banker who has managed Mr. Adams's campaign, offered the name of the latter in nomination and proposed that the election be settled by secret ballot ...

In nomination and proposed that the election be settled by secret ballot . . . Balloting was arranged for outside the convention hall, in a room of the Hotel Roosevelt, convention headquarters, but when only 100 or so votes had been cast, Rudolf S. Hecht, retiring President of the Association, announced that he had received word from Mr. Bennett that he, Mr. Bennett, had withdrawn from the race "in the interest of peace and har-mony." Upon this announcement voting ceased and Mr. Adams became the unopposed candidate.

At the final session of the convention the concern of business over mounting costs of government and taxation was voiced by Harper Sibley, President of the Chamber of Commerce of the United States, it was noted in a New Orleans dispatch to the "Times" Nov. 14, which also stated in part:

Mr. Sibley declared that to produce from taxes and all other sources Federal revenues equal to the current rate of expenditures was "hopelessly beyond the capacity of American business."

Cost Held "Insignificant."

Cost Held "Insignificant." Mr. Eccles asserted that the cost of government intervention to stop deflation had been insignificant compared with the \$150,000,000,000 loss of the deflation itself and cited figures to show that the recovery of national income in the past three years had outweighed the cost of govern-ment action to bring about that recovery . . . Mr. Sibley gave illustrations of the "appalling" size of the cost of govern-ment, including the assertion that to run the government of the United States for one year would take three-fourths of all the savings deposits in all the banks of the country. Mr. Eccles, who spoke after Mr. Sibley, seemed almost to be replying to the latter's alarm at the cost of government, although his speech was prepared beforehand. Government intervention, he said, had been respon-sible for turning the tide of deflation. Contrasting conditions as they were when the bankers' convention was held three years ago and as they are now, he cited a long series of indices of financial and business conditions to show the improvement that had been achieved . . . *Decries Charges of "Waste.*"

Decries Charges of "Waste."

Decries Charges of "Waste." The money raised by the sale of government securities had not been wasted, Mr. Eccles declared. It has created deposits in the banks—that is, he said, purchasing power. Deviating from the text of his address, Mr. Eccles told the delegates that if they wished the government to get out of business and banking they must, themselves, get in. "If you want the government to lend money and to act as a cushion for you, then you can't complain." he said. "I do not see how any thoughtful man can challenge the conclusion that in order to preserve our capitalistic system, our institutions and traditions, we must use such governmental means of economic and monetary management as we possess in achieving a greater stability in the economic order and in creating conditions under which out man-power and productive capacity may be utilized to a maximum in the production and distribution of wealth.

Robert V. Fleming, who was elected President of the Association, summed up on Nov. 14 the sentiment of the bankers who attended, in the following statement:

The convention has shown that there is a spirit of confidence in the fact that the country is progressing properly and that the bankers are willing to do everything they can to stimulate the recovery of the nation.

Further advices to the "Times" from New Orleans Nov. 14 said:

Earlier in the day, in acknowledging his installation as President, Mr. Fleming had announced plans for expanding the activities of the association through a series of regional conferences on banking problems for the purpose of acquainting the membership with the broad services available through the committees and trained staff of the organization. He also announced plans for promoting good public relations designed to acquaint the public with the laws under which banks operate and to emphasize the vital part which banks play in the economic life of the country

country.

country. Emphasizing the non-political character of the organization, Mr. Fleming declared that it was prepared to cooperate wherever it properly could in every measure for national recovery, adding that it was also prepared to oppose all measures which it believed unsound. Next year's convention of the Association will be in San Francisco, by unanimous vote of the convention this week, on motion of A. P. Glannini, Chairman of the Bank of America National Trust and Savings Association. Total registrations at the New Orleans convention exceeded 30,600 making the convention one of the largest ever held in a Southern city.

A message from President Roosevelt to the convention is given elsewhere in this issue, and under a separate head we likewise refer to the address of President Hecht of the Association, the resolutions adopted and the report of the Economic Policy Commission. There were many speakers of prominence at the convention (besides those mentioned), including Leo T. Crowley, Chairman of the Federal Deposit Insurance Corporation; Major L. L. B. Angas, of New York; J. F. T. O'Connor, Comptroller of the Currency; Lewis H. Brown, President of Johns-Manville Corp., New York; Jesse H. Jones, Chairman of the Reconstruction Finance Corporation, &c. All of the addresses before the general convention, as well as those delivered before the various sections and divisions will be given in full in our American Bankers Convention Section, to be published at a later date. A message from President Roosevelt to the convention is

55 New Members Approved by Investment Bankers Association—Nine Located in New York

Association—Nine Located in New York Growing improvement in the securities business is evi-denced by the fact that one of the largest groups of new members since 1929 was approved at a recent meeting of the Board of Governors of the Investment Bankers Association of America, it was announced Nov. 10 through the Asso-ciation offices in Chicago, III., by Orrin G. Wood, of Esta-brook & Co., Boston, President of the Association. Fifty-five applicants were approved at the meeting, bringing the total membership of the Association from all parts of the United States and Canada up to 686. Among the new members approved were the following firms of New York City: J. E. Baker & Co.; Bear, Stearns & Co.; Jenks, Gwynne & Co.; Lobdell

J. E. Baker & Co.; Bear, Stearns & Co.; Jenks, Gwynne & Co.; Lobdell & Co.; Peter P. McDermott & Co.; Ryan & McManus; Schaumburg, Rebhann & Lynch; Shields & Co., and Harriman & Keech.

ITEMS ABOUT BANKS, TRUST COMPANIES, &c.

Arrangements were made for the sale of a New York Curb Exchange membership Nov. 11 at \$33,000, up \$3,000 from the last sale and a new high for the year. The previous high for 1935 was made on Sept. 16 when a seat exchanged hands for \$32,500.

Arrangements were completed for the sale of two member-ships on the Chicago Stock Exchange: one for \$4,500 on Nov. 5, unchanged from the last previous sale and the other for \$4,800 on Nov. 7.

At a meeting of the Board of Trustees of the Harlem Sav-ings Bank, New York, held Nov. 12, Robert C. Hart was elected Vice-President and Comptroller. Mr. Hart, who joined the institution on Oct. 1 1895, has been Comptroller since 1930. Prior to that he was Secretary, having been elected to the position in 1924.

Eugene F. Devoy was elected Treasurer of the Colonial Trust Co., New York, at a recent meeting of the board of directors.

At the regular meeting of the Board of Directors of the Chemical Bank & Trust Co., New York, held Nov. 14, George A. Peer was appointed an Assistant Treasurer. Mr. Peer entered the service of the Chemical Bank in 1918 and for the past five years has been Assistant Manager of the Foreign Department. At the same meeting Frederick W. Thomas and John G. Boyd were appointed Assistant Man-agers of the bank's Foreign Department.

The General Motors Acceptance Corp., New York City, was granted authority on Nov. 7 by the New York State Banking Department to open a branch office in Oakland, Calif.

David E. Freudenberger, a Vice-President of the Bank of the Manhattan Co., New York, was elected a trustee of the Greenpoint Savings Bank, Brooklyn, on Nov. 12. Mr. Freudenberger is executive head of the Greenpoint branch of the Bank of the Manhattan Co.

The Flatbush Branch of the Greater New York Savings Bank, Brooklyn, N. Y., located at Church Avenue, Beverly Road and East 2nd Street, will be moved on May 15, next, to a new building to be erected at Church and McDonald Avenues. The new building will accommodate 40,000 de-positors, it is announced, and will have facilities for from 6,000 to 7,000 safe deposit boxes. The branch at present has approximately 17,000 depositors with over \$6,000,000 in deposits. The main office of the bank, located at Fifth Avenue and 9th Street, in Brooklyn, has about 68,000 de-positors with over \$38,000,000 in deposits.

Earl H. Harkness, Comptroller of the Jamaica Savings Bank, Jamaica (Long Island), N. Y., has been elected a trustee of the institution, it was announced Nov. 15. Mr. Harkness joined the bank on May 1 1935, coming from the Banking Department of New York State where he was Deputy Superintendent.

Additional payments to depositors of four defunct Massa-chusetts trust companies, totaling \$448,000, were announced on Nov. 12 by Henry H. Pierce, State Bank Commissioner. The institutions are the Belmont Trust Co., Belmont; the Bancroft Trust Co., Worcester; the Medford Trust Co., Med-

ford, and the Plymouth Trust Co., Brockton. The distribu-tions, according to the Boston "Transcript" of Nov. 12, from which this is learned, are to be conducted as follows:

which this is learned, are to be conducted as follows: Belmont Trust Co., Belmont—An additional release of 20% of the remain-ing balance to the savings department depositors and a release of 10% of the remaining balance to the commercial department depositors. In the Belmont bank 6,900 depositors have already been paid in full and the remaining savings depositors have already received 50% of their claims and the commercial depositors 25%. The present dividend will amount to about \$125,000 and will make total releases to date to depositors in this heads of 2724 000.

amount to about \$129,000 and win make total releases to date to depositors in this bank of \$734,000. Bancroft Trust Co., Worcester—A first dividend in the commercial de-partment of 10%. Savings department depositors have already received a release of 60% of their claims, and with this release of about \$83,000 the total amount of dividends paid in this bank to date will amount to \$2,825,000.

\$2,825,000. Medford Trust Co., Medford—A first dividend in the commercial department of 10%. Savings department depositors have already received 50% of their claims. The present release of about \$152,000 will bring total dividends in this bank to date to about \$1,900,000. Plymouth County Trust Co., Brockton—A second dividend of 10% will be paid to the commercial department depositors. Savings department depositors have already received dividends amounting to 80% and with this release of about \$78,000.

William B. Reed, who has been connected with the Central Trust Co. of Altoona, Pa., for many years and its Secretary-Treasurer and Trust Officer since 1930, was recently elected President of the institution to succeed M. H. Canan, whose death occurred recently. At the same time Mayberry W. Miller, who has been with the company since its organization in 1902, was named Secretary-Treasurer; T. J. Lucas and P. J. Williams were appointed Assistant Secretary-Treas-urers, and J. C. Hennen was made Trust Officer. Isaiah Scheeline and George A. Wolfe are Vice-President of the institution. Altoona advices, printed in "Money & Commerce" of Nov. 9, from which the foregoing is learned, added in part : Mr. Reed entered the employ of the Central Trust Co. as Title Examiner, later becoming Trust Officer and then Assistant Secretary-Treasurer as well. For the past five years he has been Manager for the Altoona Clearing House Association and served for several terms as an instructor in the banking courses, A. I. B. William B. Reed, who has been connected with the Central anking courses, A. I. B.

From the Baltimore "Sun" of Nov. 8, it is learned that holders of certificates of beneficial interest of the Carrollton Bank of Baltimore have been informed in a notice from James P. Healy, President of the institution, that the Di-rectors have appropriated \$40,000 for the purchase of such certificates in accordance with its amended charter. We guade the paper.

quote the paper: Under this provision, no holder is under obligation to offer the certificates for sale, but an invitation is extended to do so without awaiting their redemption, Mr. Healy said. The bank will consider scaled offers on or before 12 o'clock noon, Nov. 30. Preference will be given to those certificates offered at the lowest price, the notice stated.

Directors of the First National Exchange Bank of Roan-oke, Va., at their regular meeting on Nov. 5, elected J. Tyler Meadows President of the insitution to succeed E. B. Spencer who died recently. Mr. Meadows was formerly President of the First National Bank of Roanoke, and since the consolida-tion of that institution and the National Exchange Bank has served as Chairman of the Board. Associated Press advices from Roanoke, in indicating this, added: Junius B. Fishburn was elected Chairman of the Board to succeed Mr. Meadows, and accepted the position with the understanding that hereafter the Chairmanship would be neither a full-time nor salaried position. Mr. Fishburn was made Cashier of the old National Exchange Bank at its or-ganization in 1889 and later served as President, then as Chairman of the Board of this bank. Since the consolidation with the First National, Mr. Fishburn has been Chairman of the Executive Committee.

The Directors of the Reconstruction Finance Corporation The Directors of the Reconstruction Finance Corporation have agreed, upon the receipt of an application from the receiver of the Guardian Trust Co. of Cleveland, Ohio, to make an additional loan of \$6,377,028 for distribution to depositors, and it is hoped that distribution can be made before Christmas, the Corporation announced Nov. 10. The additional loan will permit a 10% distribution to all depositors, and is possible by reason of increased values of the assets of the bank through recovery, together with the splendid manner in which the liquidation has been handled. The announcement said: The announcement said:

The RFC made a loan of \$26,950,000 to the receiver of the Guardian Trust Co. on July 20 1933, which enabled the receiver to make a distribu-tion of 20% to depositors and to pay certain secured creditors. The balance due RFC as of October 7, date of appraisal for the present loan, was \$10,-040.644.

The Comptroller of the Currency announced on Nov. 8 completion of the receivership of the First National Bank of Carey, Ohio, according to Associated Press advices from Washington, D. C., on that date, which added: The receivership disbursed \$200,486 to creditors, representing 97.03% of total liabilities. Unsecured depositors received 96.83% of their claims.

We learn from Middletown, Ohio, advices, appearing in "Money & Commerce" of Nov. 9, that plans looking towards the merger of the First & Merchants National Bank of Middletown, and the American Trust & Savings Bank of that place, have been approved by their respective stockholders. The new organization will be known as the First American Bank & Trust Co.

According to the Chicago "Journal of Commerce" of Nov. 5, the Farmers' & Merchants' State Bank of Darlington, Ind., which has been operating as an unrestricted non-member bank, has been admitted to the Federal Reserve System and has been licensed as a member bank by the Federal Reserve Bank of Chicago.

From the Chicago "News" of Oct. 29 it is learned that Edward J. Barrett, State Auditor of Illinois, announced that Edward J. Barrett, State Auditor of Illinois, announced that he had authorized the payment of a 15% dividend, amounting to \$109,800, to depositors of the defunct Universal State Bank of Chicago. We quote the paper: This is the first payment since the bank closed. In addition to this dis-bursement, \$176,283 has been paid on bills payable and \$63,513 has been paid preferred creditors. William L. O'Connell is receiver for the bank.

Seven of the smaller units of the Wisconsin Bankshares Corporation's banks in the State of Wisconsin have been sold, according to an announcement on Nov. 7 by Walter Kasten, President of the corporation. The Milwaukee "Sentinel" of Nov. 8, from which this is learned, went on to say in part:

to say in part: The move, it was explained, is in accord with plans made'some months ago either to consolidate or sell back some of the smaller units to the citizens of the communities in which they operate. The banks sold are the Woodhouse & Bartley Bank, Bloomington; the Bank of Albany, Farmers' & Citizens' Bank, Saux City; Bank of Ellsworth, Black Earth State Bank, the Bank of Oregon and the Citizens' State Bank, Belleville. The Haugen State Bank was consolidated with the First National Bank of Rice Lake, a Bankshares unit. . . .

Effective Nov. 11, The First National Bank of Philip, S. D., capitalized at \$50,000, was consolidated with The First National Bank of Rapid City, S. D. with capital of \$175,000. The enlarged institution, which will be known as The First National Bank of Rapid City, is capitalized at \$260,000, consisting of \$175,000 preferred stock and \$55,000 of common stock, with surplus of \$20,000. The consolidated bank has been authorized to maintain a branch in the City of Philip.

Concerning the affairs of the defunct Central Trust Co. of St. Charles, Mo., a dispatch from Fulton, Mo., on Nov. 9, printed in the St. Louis "Globe-Democrat", carried the following:

Judge Edgar B. Wollfolk of the Thirty-fifth Missouri Judicial Circuit of Missouri has granted W. B. Whitlow of Fulton, Deputy State Finance Commissioner, authority to pay another 10% dividend to the creditors of the Central Trust Co. at St. Charles, payable on Nov. 19. With this payment the creditors of the St. Charles institution will have received 60% of the total indebtedness of the company, with still more to follow.

Final liquidation of the Commercial National Bank of Wilmington, N. C. (which closed on Dec. 30 1922) was an-nounced on Nov. 5 by the Comptroller of the Currency. Ad-vices from Washington on Nov. 5 to the Raleigh "News & Observer," from which this is learned, also stated: Total disbursements were \$1,474,760, representing 55.05% of total liabili-ties. Unsecured depositors received 25.68% of their claim.

Opening of a newly chartered institution at Cut Bank, Mont., to be known as the Bank of Glacier County, and with an initial capital structure of \$35,000, was announced this week by the First Bank Stock Corp., Minneapolis, Minn. With this addition, 91 banking offices in 79 cities and towns throughout the Ninth Federal Reserve District, including the First National Banks in Minneapolis and Saint Paul, are now members of the First Bank Stock Corp. group. The announcement continued: announcement continued:

announcement continued: Cut Bank, located in northwestern Montana, has a population of ap-proximately 2000 and is the center of an area which has within the past two years become notable for extensive oil and gas developments. The town has had no bank since 1922 and a recent petition signed by local residents stressed the need for banking facilities.

According to the "Herald Tribune" of Nov. 14, Joseph M. Pigott, was elected a director of the Dominion Bank, Ltd., Toronto, Canada, on Nov. 13. Mr. Pigott is President of the Pigott Construction Co., Ltd.

THE CURB EXCHANGE

THE CURB EXCHANCE Trading on the New York Curb Exchange was somewhat unsettled during the early part of the present week, but the market turned definitely upward during the late dealings on Thursday and many of the more active of the speculative favorites displayed substantial gains. Specialties have been in fair demand and registered moderate advances. Mining and metal stocks shared the late improvement, but the gain3 in the alcohol group were comparatively narrow. Trregularity, due to week-end adjustments and profit taking, was the dominating feature of the trading during the brunt of the selling though the unsettlement extended to nearly every section of the list. Some of the more active of the trading favorites managed to hold a part of their early gains, particularly those in the specialties group, though most of the advances were small. Prominent in this group were Ainsworth (1½k). 2¼ points to 48; Stroock & Co., 2 points to 18; St. Regis Paper pref., 1 point to 42½; United Shoe Machinery, 1½ points to 85¾; Aluminum Co. of Amer-ica, 1 point to 89, and Georgia Power pref. (5), 3¼ points to 70.

to 70. The Curb Exchange and all other stock and commodity exchanges were closed on Monday in observance of Armistice Day.

^F Curb market prices were moderately firm as trading was resumed following the two-day holiday, but profit taking appeared on a fairly large scale and the trend turned sharply downward. Public utilities again led the downward move-ment, followed by the miscellaneous industrials. Specialties 100

Testimed following the two-day holiday, but profit taking appeared on a fairly large scale and the trend turned sharply downward. Public utilities again led the downward movement, followed by the miscellaneous industrials. Specialties and oil stocks were inclined to resist, but the market, as a whole, was off on the day. The losses included among others American Superpower pref. 4/4 points to 303/(Consolidated Northern Paper, 2/2 points to 22/2; Pittsburgh Plate Glass, 2/4 points to 901/2; Singer Manufacturing Co., 1/2 points to 2061/2; Consolidated Northern Paper, 2/2 points to 22/2; Pittsburgh Plate Glass, 2/4 points to 901/2; Singer Manufacturing Co., 1/2 points to 901/2; points to 47, and Standard Oil of Ohio, 1/2 points to 182; Testoure of sales was periadic the without definite trend. The volume of sales was approximately 337,000 shares against 454,000 on the preceding day. Stocks closing on the side of the advance included among others, American Superpower pref., 2/4 points to 183; Fajardo Sigar, 6 points to 157; Horn & Hardart pref., 4/4 points to 108/4; Masonite Corp., 2/4 points to 63; Pennsylvania Water & Power, 1/2 points to 82/2; Stroock & Co., 2 points to 108/4; Masonite Corp., 2/4 points to 63; Pennsylvania Water & Power, 1/2 points to 82/2; Stroock & Co., 2 points to 189, Fajardo Sigar, 6 points to 157; Horn & Hardart pref., 4/4 points to 90; Consolidated Mining & Smelting Co. of Canada, 2 points to 183; Fajardo Sigar, 6 points do 157; Horn & Hardart pref., 4/4 points to 198/4; Masonite Corp., 2/4 points to 63; Pennsylvania Water & Power, 1/2 points to 82/2; Stroock & Co., 2 points to 198, Fajardo Sigar, 6 points do 157; Horn & Hardart pref., 4/4 points to 82/4; Masonite Corp., 2/4 points to 63; Pennsylvania Water & Power, 1/2 points to 82/4; Stroock & Co., 2 points to 72, and Commonwealth Edison, 1/4 points to 52, and the total transfers dwindled down to approximately 337,000, the preceding day. Stock & Weikey, 3 points to 52, and the down to approximately 337,000, the stock as compared wit

THE ENGLISH GOLD AND SILVER MARKETS

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of Oct. 30 1935:

GOLD

The Bank of England gold reserve against notes amounted to £194,323, 901 on the 23d inst., as compared with £193,673,266 on the previous Wednesday.

Purchases of bar gold amounting to £360,073 were announced by the Bank during the week.

In the open market about £1,080,000 of bar gold changed hands at the daily fixing. Conditions have been rather quiet and with prices maintained at a premium of about 1/3 d. over dollar parity, shipments to New York have been restricted. Quotations during the week:

signed to London and £124,000 to New York.The Southern Rhodesian gold output for September 1535 amounted to
57,328 fine ounces as compared with 61,399 fine ounces for August 1935
and 58,850 fine ounces for September 1934.

SILVER

A rapid decline in the China exchanges, due to operations by speculators in Shanghai following further rumors of devaluation, resulted in heavy sales of silver on China account being made in the London market; the move-ment also influenced other operators and there has been a considerable amount of re-selling by speculators. The cash price has been maintained at 29 5-16d, as the American Treas-

ury continued to give support at this level, purchases during the week being on a substantial scale.

being on a substantial scale. Except for occasional inquiry from the Indian Bazaars, there has been little support for forward delivery and, as offerings were again mostly for forward dates, the difference between the cash and two months' quotations quickly widened under the pressure, the latter being quoted yesterday at a discount of 5-16d., narrowing, however, to ¼d. to-day. Whilst the American support will doubtless keep the cash position steady, the forward position is uncertain owing to conditions in Shanghai and will be influenced by the course of events in that quarter.

The following were the United Kingdom imports and exports of silver registered from mid-day on the 21st inst. to mid-day on the 28th inst.:

COURSE OF BANK CLEARINGS

COURSE OF BANK CLEARINGS Bank clearings this week will again show an increase com-pared with a year ago. Preliminary figures compiled by us, based upon telegraphic advices from the chief cities of the country, indicate that for the week ended to-day (Satur-day, Nov. 16), bank exchanges for all cities of the United States from which it is possible to obtain weekly returns will be 13.0% above those for the corresponding week last year. Our preliminary total stands at \$4,980,912,246, against \$4,406,533,699 for the same week in 1934. At this center there is a gain for the week ended Friday of 14.8%. Our comparative summary for the week follows:

Clearings—Returns by Telegraph Week Ending Nov. 16	1935	1934	Per Cent

Total all cities for week	\$4,980,912,246	\$4,406,533,699	+13.0

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them to-day, inasmuch as the week ended to-day (Saturday) and the Saturday figures will not be available until noon to-day. Accordingly, in the above the last day of the week in all cases has to be estimated. In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results for the week previous—the week ended Nov. 9. For that week there is an increase of 27.9%, the aggregate

of clearings for the whole country being \$5,159,144,587, against \$4,035,218,429 in the same week in 1934. Outside of this city there is an increase of 30.3%, the bank clearings at this center having recorded a gain of 26.1%. We group the cities according to the Federal Reserve districts in which they are located, and from this it appears that in the New York Reserve District, including this city, the totals show an expansion of 26.0%, the Boston Reserve District of 36.2%, and in the Philadelphia Reserve District of 31.1%. In the Cleveland Reserve District there is an improvement of 30.8%, in the Richmond Reserve District of 21.8%, and in the Atlanta Reserve District of 15.5%. The Cheiago Reserve District has enlarged its totals by 40.0%, the St. Louis Reserve District by 31.7%, and the Minneapolis Reserve District by 21.5%. The Kansas City Reserve District enjoys a gain of 15.5%, the Dallas Reserve District of 29.6%, and the San Francisco Reserve District of 34.7%. In the following we furnish a summary by Federal Reserve districts:

districts:

Note 2-The amount to the credit of disbursing officers and certain agencies to-day was \$1,843,761,685.68.

to-day was \$1,843.761,685.68. **MONTHLY REPORT OF THE UNITED STATES TREASURY AS OF SEPT. 30 1935**The monthly report of the Treasury Department, showing assets and liabilities as of Sept. 30 1935 of governmental econorations and credit agencies, financed wholly or in part by the United States, was contained in the Department's daily Statement for Oct. 31. The report is the 16th such to be issued by the Treasury; the last previous one, for Aug. 31 1935, appeared in our issue of Oct. 12, pages 2380-2382.
The report for Sept. 30 shows in the case of agencies financed wholly from Government funds a proprietary interest of the United States as of that date of \$3,340,910,486, which compares with \$3,400,763,477 Aug. 31. In the case of these wholly-owned Government agencies, the proprietary interest represents the excess of assets over liabilities, exclusive of inter-agency items.
The Government's proprietary interest is the Government agencies, the Government's proprietary interest is the excess of Aug. 31. In the case of Sept. 30 was shown to be \$1,142,090,116. This compares with \$1,126,343;365 as of Aug. 31. In the case of these partly-owned Government agencies, the Government's proprietary interest is the excess assets over liabilities exclusive of inter-agency items, less the privately-owned interests. The statement follows:

a The following appropriations included in the 1936 Budget estimate of \$300, 000,000 for general public works annual program and expenditures therefrom are not included in the above statement: Boulder Canyon Project, \$14,000,000; Public highways, \$40,000,000; River and harbor work, \$10,000,000; other public works, \$118,409,000; Tennessee Valley Authority, \$36,000,000; total, \$218,409,000. b The emergency expenditures included in this statement for the Berlod prior to the fiscal year 1934 include only expenditures on account of the Reconstruction Finance Corporation, and subscriptions to capital stock of Federal Land banks under authority of the Act of Jan. 23 1932. Expenditures by the several depart-ments and establishments for public works under the Emergency Relief and Con-struction Act of 1932 were made from general dispursing accounts, and, therefore, are not susceptible to segregation from the general expenditures of such depart-ments and establishments on the basis of the daily Treasury statements. c See note a above.

are not susceptible to segregation from the general expenditures of such departments and establishments on the basis of the daily Treasury statements. c See note a above. d includes (a) \$350,000,000 specific appropriations from the General Treasury under the Acts of May 12 1933, May 25 1934 and June 19 1934; (b) \$1,357,885,000 advanced by the Secretary of the Treasury under authority of Sec. 12-B of the Agricultural Adjustment Act, which must be returned to the Treasury from the proceeds of processing taxes collected on farm products; (c) \$1,753,795 advanced by the Secretary of the Treasury under authority of Sec. 12-B of the sugar under the Act of May 9 1934; less \$753,513.02 transferred to Division of Dis-bursement, Treasury Department. e There are no statutory limitations on the amounts of funds which may be made available by the Reconstruction Finance Corporation for carrying out the purposes of Sec. 5 of the Agricultural Adjustment Act, and for the purchase by the Reconstruction Finance Corporation of preferred stock or capital notes of banks and trust companies under the Act of March 9 1933. The Reconstruction Finance Corporation Finance Corporation. The authority of the Reconstruction Finance Corporation Finance Corporation. The suborts of the seconstruction Finance Corporation Finance Corporation. The suborts for fine the to time by the Reconstruction Finance Corporation. The suborts of the seconstruction Finance Corporation Finance Corporation. The suborts of the the seconstruction Finance Corporation Finance Corporation. The suborts of the purposes of surplus sugar under the Act of March 9 1934. The Reconstruction Finance Corporation Finance Corporation. The suborts of the purposes. f The sum of \$8,000,000 of this amount has been allocated for the purchase of surplus sugar under the Act of May 9 1934. The remainder is reserved to reim-burse the Treasury for the advances referred to in footnote d. g Expenditures are stated on a net basis, i.e., gross expenditures less repayments

g Expenditures are stated on a net basis, i.e., gross expenditures less repayments and collections, details of which are set forth in the supplementary statement below. h Net, after deducting repayments to the Reconstruction Finance Corporation.

4.000.000.000 [6.636.178.246] 18154206.371 [1.304.922.630 [9.827.695.783]7.021,587.956 1 The appropriation of \$950,000,000 provided in the Act of Feb. 15 1934 was allocated by the President as follows: Civil Works Administration, \$345,000,000 Federal Emergency Relief Administration, \$505,000,000.] Excess of credits, deduct. Is Under the provisions of the Emergency Appropriation Act, fiscal year 1935 the Reconstruction Finance Corporation is authorized to purchase marketable securities acquired by the Federal Emergency Administration of Public Works, but the amount which the Reconstruction Finance Corporation may have invested at any one time in such securities may not exceed \$250,000,000. Moneys paid for such securities are available for loans (but not grants) under Title II of the National Industrial Recovery Act. The amount of obligations which the Recon-struction Finance Corporation is authorized to have outstanding at any one time is increased by the sums necessary for such purchases, not to exceed \$250,000,000. The purchase of such securities by the Reconstruction Finance Corporation and seclected as expenditures of the Federal Emergency Administration of Public Works. The amount by which the available funds on account of such transactions has been increased is, therefore, included in the funds of the "Reconstruction Finance Corporation and as credits against expenditures of the Federal Emergency Administration of Public Works. The amount by which the available funds on account of such transactions has been increased is, therefore, included in the funds of the "Reconstruction Finance Corporation Finance Corporation Amount by which the available funds on account of such transactions has been increased is, therefore, included in the funds of the "Reconstruction Finance Corporation Amount by which the available funds on account of such transactions has been functed is, therefore, included in the funds of the "Reconstruction Finance Corporation Amount by which the available funds on account of such transa

Increased is, therefore, included in the funds of the "Reconstruction Finance Cor-poration—direct loans and expenditures." I Includes \$700,000 allocated for savings and loan promotion as authorized by Sec. 11 of the Act of April 27 1934. In The appropriation of \$500,000,000 for subscription to capital stock is included in the figures shown in the column for Reconstruction Finance Corporation. In Under Sec. 3 of the Act of June 16 1934 the Reconstruction Finance Corporation is authorized to purchase at par obligations of the Federal Deposit Insurance Corporation in a face amount of not to exceed \$250,000,000, and the amount of boligations which the Reconstruction Finance Corporation is authorized to have outstanding at any one time is increased by \$250,000,000. The amount to be included in this column will represent the proceed deposited with the Treasurer of the United States on account of the sale of such obligations by the Federal-Deposit Insurance Corporation to the Reconstruction Finance Corporation. • This amount represents the unallocated balance of an allocation of \$400,000,000 by the President to the Administrator of Public Works. As and when such funds are allocated by the Administrator to specific projects, the amounts are transferred from an unallocated status to an allocated status. NOTE—The total amount of expenditures for the fiscal year 1936 in this statement can be reconciled with the total amount of recovery and relief expenditures shown on page 2 by adding to the latter the amounts included in general expenditures under the captions "Agricultural Adjustment Administration" and "Refunds of recepts—processing tax on farm products," and deducting the receipts under the caption "Processing tax on farm products."

United Hospital Campaign Committee to Begin Next Week Appeal for \$2,000,000 for Charitable Hospitals of New York-Chairmen of Various Divisions Named

The United Hospital Campaign Committee will launch its appeal for at least \$2,000,000 for the charitable hospitals of New York at a dinner in the Hotel Astor, Monday (Nov. 18.), it was announced Nov. 10 by Gates W. McGarrah, campaign Chairman. Dr. S. S. Goldwater, City Commis-sioner of hospitals, Mrs. William Woodward, Chairman of the women's division of the campaign, Dr. Charles Gordon Heyd, Past President of the Gampaigh, Dr. Charles Gordon Heyd, Past President of the Medical Society of the State of New York, and former Governor Alfred E. Smith will speak. Mr. McGarrah will preside. Honorary chairmen for the campaign are Cornelius N. Bliss, Mrs. Henry P. Davison, former Justice Joseph M. Proskauer and former Governor Smith.

It was made known on Nov. 11 by Samuel W. M. Reyburn, Chairman of the Commerce and Industry Division of the Campaign Committee, that W. Allston Flagg, of Post and

Flagg, and Chalmers Wood, of Johnson and Wood, have accepted the co-chairmanships of the New York Stock Exchange division. Other chairmen are announced as follows:

Jerome Lewine of H. Hentz and Co., who is President of the New York commodity Exchange, has accepted the chairmanship of the Commodity

Commodity Exchange, has accepted the chairmanship of the Commodity Exchange division. J. Chester Cuppia, of E. A. Pierce and Co., has accepted the chairman-ship of the Curb division. Arthur Ham, Vice-President of the Provident Loan Society of New York, has accepted the leadership of the Personal Loan division. Edwin C. Vogel, Chairman of the executive committee of Commercial Investment Trust, Inc., and Oscar E. Stevens, Vice-President of the same corporation, are the co-chairmen of the Finance Companies division. John W. Cutler of E. B. Smith and Co., is leading the Investment Bankers division.

William L. DeBost, President of the Union Dime Savings Bank, is in charge of the Savings Banks division.

Mr. Reyburn said that expenses of voluntary hospitals exceed receipts because only one out of 18 patients can pay the full cost of his care. He announced Nov. 15 that Albert H. Watson, of H. Hentz and Co., and Chairman of the Cotton Exchange, has accepted the chairmanship of the Cotton Exchange division of the Campaign Committee.

a Non-stock (or includes non-stock proprietary interests).
b Excess inter-agency assets (doubt).
c Defict (defuct).
d Exclusive of inter-agency assets and liabilities (except bond investments).
e Adjusted for inter-agency items and items in transit.
f Excludes contingent assets and liabilities amounting to \$217,542 for guaranteed loans, &c.
f Excludes contingent assets and liabilities amounting to \$217,542 for guaranteed loans, &c.
f Includes Lise of Corporation, U. S. Raliroad Administration, U. S. Spruce Production Corporation, and notes received on account of sale of surplus war supplies.
h Includes Electric Home and Farm Authority (incorporated under date of Aug. 1 1935 to continue functions of Electric Home and Farm Authority, Inc.): Farm Credit Administration (erop-production and other loans): Federal Housing Administration; Federal Prisons Industries, Inc.; Resettlement Administration; Inc.; Newstellement Administration; Inc.; Tenessee Valley Austociated Co-operatives, Inc.; Tonessee Valley Authority, Inc.; Ioans to rallroads, and inter-agency interests held by the United States Treasury.
i Net After deducting estimated amount of uncollectible obligations held by the Farm Credit Administration.
j Includes \$2,907,443 due to Federal Land banks from the U. S. Treasury for subscriptions to paid-in surplus.
k Preliminary statement.
i Includes unissued bonds covering loans in process.
m Assets than \$1,000.
o Includes assessments paid in by member banks and trust companies to the amount of \$41,032,133.
j Includes loans to Faderal Land banks and trust companies to the amount of \$41,032,133.
j Includes loans to Federal Land banks and trust companies to the amount of \$41,032,133.
j Includes loans to Federal Land banks amounting to \$56,583,031.
a Appropring for Vided by Congress.

Loans Under Modernization Credit Plan of FHA

Loans Order Modernization Credit Fian of FIA The Federal Housing Administration announced Nov. 13 that during the week ending Nov. 9, there were 17,965 loans reported under the Modernization Credit Plan, total-ing \$6,833,124.70. This brought the total loans reported since the start of the modernization program 15 months ago to 551,578, valued at \$203,874,892, the Administration wild aontinuing: said, continuing:

Financial institutions reported 1,404 mortgages selected for appraisal under the long-term "Single Mortgage System" totaling \$5.263,110 the same week. This brings the cumulative total since the start of the program last December to 56,109, amounting to \$216,512,577. The estimated total volume of modernization and repair work developed by the program, but not totally financed under its terms, reported during the week ending Nov. 9, amounted to \$19,181,950. This figure brings the estimated total reported since the start of the modernization program to \$1,037,040,028.

GOVERNMENT RECEIPTS AND EXPENDITURES

Through the courtesy of the Secretary of the Treasury we are enabled to place before our readers to-day the details of Government receipts and disbursements for October 1935 and 1934 and the four months of the fiscal years 1935-36 and 1934-35.

• "Other cash" does not include Federal Reserve notes or a bank's own Federal Reserve bank notes. **x** These are certificates given by the U. S. Treasury for the gold taken over from the Reserve banks when the dollar was on Jan. 31 1934 devalued from 100 cents to 59.06 cents, these certificates being worth less to the extent of the dif-ference; the difference itself having been appropriated as profit by the Treasury under the provisions of the Gold Reserve Act of 1934.

Weekly Return of the Board of Governors of the Federal Reserve System

The following is issued by the Board of Governors of the Federal Reserve System on Thursday afternoon, Nov. 14, showing the condition of the twelve Reserve banks at the close of business on Wednesday. The first table presents the results for the System as a whole in comparison with the figures for the seven preceding weeks and with those of the corresponding week last year. The second table shows the resources and liabilities separately for each of the twelve banks. The Federal Reserve note statement (third table following) gives details regarding transactions in Federal Reserve notes between the Reserve Agents and the Federal Reserve banks. The comments of the Board of Governors of the Federal Reserve System upon the returns for the latest week appear in our department of "Current Events and Discussions."

Weekly Return for the Member Banks of the Federal Reserve System

Following is the weekly statement issued by the Board of Governors of the Federal Reserve System, giving the principal items of the resources and liabilities of the reporting member banks in 101 leading cities from which weekly returns are obtained. These figures are always a week behind those for the Reserve banks themselves. The comment of the Board of Governors of the Federal Reserve System upon the figures for the latest week appears in our department of "Current Events and Discussions," immediately preceding which we also give the figures of New York and Chicago reporting member banks for a week later.

immediately preceding which we also give the figures of New York and Chicago reporting member banks for a week tater. The statement beginning with Nov. 6 1935 covers reporting banks in 101 leading cities, as it did prior to the banking holiday in 1933, instead of 91 cities, and has also been revised further so as to show additional items. The amount of "Loans to banks" was included heretofore partly in "Loans on securities—to there" and partly in "Other loans." The item "Demand deposits—adjusted" represents the total amount of demand deposits anding to the credit of individuals, partnerships, corporations, associations, states, counties, municipalities, &c., minus the amount of cash items reported as on hand or in process of collection. The method of computing the item "Net demand deposits," furthermore, has been changed in two respects in accordance with provisions of the Banking Act of 1935: First, it includes United States Government deposits, against which reserves must now be carried, while previously these deposits required no reserves, and, second, amounts due from banks are now deducted from gords demand deposits, rather than solely from amounts due to banks, as was required under the old law. These changes make the figures of "Net demand deposits," not comparable with those shown prior to Aug. 23 1935. The item "The deposits" differs in that it formerly included a relatively small amount of time deposits." The item "The deposits" shown heretofore included only demand balances of domestic banks. The item "Due to banks" shown heretofore included only demand balances of domestic banks. The item serve banks and from duer sources. Figures are shown also for "Capital account," "Other assets—net," and "Other liabilities." By "Other assets—net," and "Other liabilities." By "Other assets—net," and the been deducted from demand deposits.

For footnotes see page 3197. NOTE-Sales of State and City securities occur very rarely on the New York Stock Exchange, dealings in such securities being almost entirely over the counter. Bid and asked quotations, however, by active dealers in these securities, will be found on a subsequent page under the general head of "Over-the-Counter Securities"

3198 New York Curb Exchange—Weekly and Yearly Record Nov. 16 1935 NOTICE—Cash and deferred delivery sales are disregarded in the week's range, unless they are the only transactions of the week, and when selling outside of the regular weekly range are shown in a footnote in the week in which they occur. No account is taken of such sales in computing the range for the year.

In the following extensive list we furnish a complete record of the transactions on the New York Curb Exchange for the week beginning on Saturday last (Nov. 9 1935) and ending the present Friday (Nov. 15 1935). It is compiled entirely from the daily reports of the Curb Exchange itself, and is intended to include every security, whether stock or bond, in which any dealings occurred during the week covered:

Abbott Laboratories—Stock Dividend Accord The 33 1-3% stock dividend recently declared will be distributed on Nov. 15 to holders of record Nov. 1, according to an official announcement. The announcement says that "officials of the company state that the volume of sales and net earnings, after all charges, for the first 10 months of 1935, show a marked increase over the same period last year. It is probable the policy of extra dividends will be maintainted. The next directors' meeting will be held on Nov. 21."—V. 141, p. 2726.

Airway Cargo Express, Inc. (Del.) — Hearing Nov. 22 The Securities and Exchange Commission on Nov. 11 announced that a hearing has been called for Nov. 22 to give the company an opportunity to appear and show cause why the effectiveness of registration statement filed Oct. 19 1935 should not be suspended because the Commission finds reasonable grounds for believing that nine items and the prospectus con-tain untrue statements or omit to state certain required material facts, and that the accountant's certificate fails to comply with Article 15, as amended, of the rules and regulations of the SEC.

Alabama Tennessee & Northern RR.—Hearing Canceled The Interstate Commerce Commission on Nov. 14 cancelled a hearing scheduled for Nov. 20 on a plan of reorganization for the company on the request of the management.—V. 141, p. 2874.

Allied Products Corp. <u>Application Approved</u> The Chicago Stock Exchange has approved the application of the com-pany to list 64,200 shares class A convertible common stock, \$25 par, to be admitted to trading upon notice of issuance. V. 141, p. 2578.

Allis-Chalmers Mfg. Co.—Registration of Rights— The committee on Stock List of the New York Stock Exchange has made application to the Securities and Exchange Commission for the registration as an unissued security, under the Securities Exchange Act of 1934, of 1,337,449 rights to subscribe to the 10-year 4% convertible debentures, which rights are to be distributed to holders of common stock of record Nov. 18, in order that the unissued rights, if approved for registration, may be admitted to dealings on a "when-issued" basis on Nov. 18. The New York Stock Exchange has already approved for listing and registration upon official notice of issuance these 1,337,449 rights.

Debentures Called— All of the outstanding 10-year 5% gold debentures, due May 1 1937. Have been called for redemption on Dec. 20 at 100½ and int. Payment will be made at the Chase National Bank, 11 Broad St., N. Y. City. See also V. 141, p. 3066.

Amalgamated Leather Cos., Inc.—Accumulated Div. The directors have declared a dividend of 50 cents per share on account of accumulations on the \$7 cum. pref. stock, par \$50, payable Jan. 1 to holders of record Dec. 19. Similar distributions were made each quarter since April 1 1934, this latter payment being the first made since Oct. 1 1920, when the regular quarterly distribution of \$1.75 per share was made. -V. 141, p. 1760.

Associated Gas & Electri Put on Non-Profit Basis-II	ic Co	Servicing C.	ompanie

Utilities Mutual Management Association Formed-

Association Formed— Through the formation of Utilities Mutual Management Association, Inc., the ownership of which will rest in the operating companies, the servicing companies of the Associated Gas & Electric System are being placed on a non-profit basis in their relations with the operating companies. The servicing companies, which will be owned by Utilities Mutual Man-agement Association, Inc., are the Utility Management Corp. which ad-vises and consults in connection with operating problems. Many operating problems can be taken care of at greatly lessened cost through co-ordination of activities by the Management Corporation. E. M. Gilbert Engineering Corp., the engineering, construction and contracting company which does work generally as well as for System operating companies. It maintains for

its clients contractors plans and facilities for heavy construction as well as doing routine engineering and advisory work. Public Utilities Appliance Corp., through which appliances for the promotion of the use of electricity and gas are sold. Utilities Purchasing & Supply Corp., the wholesale purchasing company for the System, through which large economics are realized by blanket purchasing contracts and large scale buying. By this setup the operating companies in the Associated Gas & Electric System will obtain services rendered on a cost basis. It is believed the arrangement is in line with the intent of Congress as expressed in the Public Utility Act of 1935 with respect to servicing companies. Ownership of these servicing companies heretofore has rested entirely within the System. There is therefore no change in the situation which has heretofore existed in that any profits resulting from their operation accrued solely to the benefit of the security holders of Associated Gas & Electric Co.

Electric Co. So to the balance of the socialty holders of Associated Cas to Adds Three Units to Inactive List— The following companies, once active in the Associated System, have been rendered inactive: Broome Electric Corp., formerly Binghamton Light, Heat & Power Co. became inactive in 1932, although it had sold its physical assets to New York State Electric & Gas Corp. in 1929. New Hampshire Electric Rys., a Massachusetts trust which held street railway securities, became inactive early in 1934 when the property of the railways it owned was sold at public sale. New Hampshire Water & Electric Power sold its physical assets in 1931 and has been inactive since that time. This brings the total of System companies eliminated or made inactive up to 314 from 1922 down to the present time. Sustem Output at Record Hinh—October Increase at 10 A.

This transfer to be present compares eminated of matter that the matter of the present time. System Output at Record High—October Increase at 10.4%— For the week ended Nov. 2, the Associated Gas & Electric System reports an increase of 11.4% in net electric output over the comparable week of last year. Units (kwh.) produced amounted to 60,292,661, which is the highest figure ever reported by the System for a like period. Production for the month of October was 267,149,490 units, which is an increase of 10.4% above October 1934. For the 12 months ended Oct. 31 there were 2,879,828,804 units produced. This is an increase of 6.1% over the corresponding period a year ago. Gas sendout for October increased 7.7% largely due to heavier demands from industrial users. This tended to offset the declines in domestic con-sumption brought about by the relatively warm weather of recent weeks, particularly in the East. For the year ended Oct. 31, gas sendout was 12 months period.—V. 141, p. 3067 A set the transfer of the previous 12 months period.

Associated Telephone Utilities Co.—Removed from Lister The Chicago Stock Exchange has approved the removal from the list of the common stock, no par; 86 cumulative prior preferred stock, no par; \$7 cumulative prior preferred stock, no par, and the \$6 convertible preferred stock, series A, no par.—V. 141, p. 737.

Atlas Corp.-Sells Blue Ridge Corp. Stock-Five Companies Buyers

Buyers—
 Control of the Blue Ridge Corp., held by the Atlas Corp., is being sold to a group of purchasers under a transaction completed Nov. 8, it was announced by Floyd B. Odlum, president of the Atlas Corp.
 The purchasers of the Blue Ridge stock are American Cities Power & Light Corp., which is controlled by Central States Electric: Electric Shareholdings Corp., virtually controlled by Central States Electric: Chicago Corp., sponsored by Field, Glore & Co., and Selected Industries, Inc., and Tri-Continental Corp., sponsored by J. & W. Seligman & Co.
 The Blue Ridge stock was sold for cash on the basis of asset value but the actual terms of the sale were not revealed. As of Dec. 31, Atlas and subsidiaries owned 87.9% of the Blue Ridge common stock and 23.3% of the \$30 preferred stock.
 Atlas Corp. has sold also 474.368 shares of Chicago Corp., stock.
 The announcement of the transaction was as follows:
 "Floyd B. Odlum, president of the Atlas Corp., announced to-day (Nov. 8) that Atlas Corp. and affiliated companies have made arrangements to sell most of their holdings in Blue Ridge Corp., Chicago Corp., Electric Shareholdings Corp., Selected Industries, Inc., and Tri-Continental Corp.
 "Upon the conclusion of the transaction Atlas representatives will resign as directors and officers of Blue Ridge Corp." -V. 141, p. 2581.

Automatic Voting Machine Corp. —25-Cent Extra Diverse The directors have declared an extra dividend of 25 cents per share on the common stock, no par value, payable Jan. 1 to holders of record Dec. 20. The regular quarterly dividend of 12½ cents per share, which has already been declared, likewise carries the above dates. An extra dividend of 25 cents was also paid on Aug. 1 last.—V. 140, p. 4388.

25 cents was also paid on Aug. 1 last.-V. 140, p. 4388. Baldwin Locomotive Works-Bookings--The dollar value of orders taken in October by the Baldwin Locomotive Works and subsidiary companies, including The Midvale Co., was an-nounced on Nov. 14 as \$1,305,655 as compared with \$1,287,407 for October 1934. These bookings brough the total for the first 10 months in the year to \$14,133,226 as compared with \$17,841,917 in the same period last year. Consolidated shipments, including Midvale, in October aggregated \$1,263,442 as compared with \$1,804,673 in October of last year. Con-solidated shipments for the first 10 months of 1935 were \$17,867,834 as compared with \$12,803,451 for the first 10 months of 1934. On Oct. 31 1935, consolidated unfilled orders, including Midvale, amounted to \$5,676,792 as compared with \$9,462,712 on Jan. 1 1935, and \$9,349,874 on Oct. 31 1934.-V. 141, p. 2877.

Baltimore & Ohio RR.—*RFC Loan Extended*— The Interstate Commerce Commission on Nov. 9 found the company not to be in need of financial reorganization in the public interest at this time and approved the extension, for a further term ending not later than Aug. 1 1939, of the time of payment of loan by the Reconstruction Finance Corporation maturing Nov. 21 1935, in the amount of \$31,610,400.— V. 141, p. 2877.

Bangor & Aroostook RR. Co.—Changes in Collateral— The Old Colony Trust Co. as trustee under the consolidated refunding mortgage dated July 1 1901 has notified the New York Stock Exchange that at the close of business Oct. 31 1935 it held the following bonds as collateral: Bangor & Aroostook RR. Co. 1st mtge. St. John River exten-sion 30-year 5% gold bonds, due Aug. 1 1939, \$1,254,000, and Bangor & Aroostook RR. Co. 1st mtge. Washburn extension 30-year 5% gold bonds, due Aug. 1 1939, \$1,110,000.—V. 141, p. 2877.

to Nov. 27.-V. 141, p. 2728. Bellanca Aircraft Corp.—President Resigns— Temple N. Joyce has resigned as President because of recent develop-ments between the company and the Securities and Exchange Commission over a recent registration statement filed under the Securities Act of 1933. In a letter to the Commission, dated Nov. 13, Mr. Joyce stated: "One of my reasons for resigning was my belief that in light of recent developments, certain assets of the company may have to be revalued in connection with the registration statement now on file with the SEC. "I feel that it is my duty to you to make this statement and also my duty to myself inasmuch as I signed said registration statement both as President of the corporation and as director." "The letter by Mr. Joyce was part of an amendment filed by the company on Nov. 14 delaying the effectiveness of the registration application until Dec. 4.-V. 141, p. 2429. Capital Administration Co., Ltd.—Debentures Called— The company has determined to call for redemption on Dec. 23 1935, at 105 and accrued interest, \$500,000 principal amount of its 5% debentures, series A, due Dec. 1 1953. Debentures to be redeemed will be drawn by lot by the Brooklyn Trust Co., trustee. After this redemption there will remain outstanding in the hands of the public \$2,915,000 of debentures. —V. 141, p. 2431.

-V. 141, p. 2431. Celotex Co. Aplan in Effect— The reorganization committee (William B. Nicols, chairman) has an-nounced that the plan of reorganization for the company had been con-summated, and that the trustees have transferred the assets of the com-pany to a new corporation formed pursuant to the plan, known as the Celotex Corp. Under the committee's plan, 125,000 shares of new common stock were subscribed for by the old stockholders and the Central Securities Corp., thus supplying the new corporation with \$\$32,500 of new money. The total number of common shares to be outstanding will be 277,185. Application has been made to list these shares and the new 5% cumulative preferred shares on the New York Stock Exchange. A notice will be given in a few days of the exchange of the old securities for the securities of the new corporation. Mr. Nicols said the dividend on the new preferred stock would be cumu-lative from Nov. 1 1935.-V. 141, p. 2730.

Mr. Nicols said the dividend on the new preferred stock would be cumu-lative from Nov. 1 1935.—V. 141, p. 2730. — Celotex Corp.—Listing of Stockstandian and the stock (no par) upon official notice of issuance pursuant to the plan of reorganization of Celotex Co.dated May 1 1934 with modifications approved and adopted April 8 1935. July 1 1935. and Aug. 7 1935 (V. 141, p. 2582). — The corporation was organized in Delaware to acquire, pursuant to the plan, the business and properties of the old company and to hold and operate the properties and carry on the business thus acquired. The certificate of incorporation was filed June 29 1935. An amended certificate of incorporation was filed Oct. 4 1935, before payment of capital, changing the name of the corporation from "The Celo Corp." to "The Celotex Corp." Officers include: Pres., Bror G. Dahlberg, Vice-The Celotex Corp." The transfer agent for the pref. stock is Manufacturers Trust Co., New York. The transfer agent for the common stock is Chase National Bank, New York. N. Y. The registrar for the common stock is Chase National Bank. New York. The registrar for the common stock is Chase National Bank. New York. Malace Groves, Walter S. Mack Jr. and James W. Marshall were elected directors on Nov. 5. in addition to those mentioned in last week's "Chron-icle" page 3069. Chicago Rivet & Machine Co.—Extra Dividend decl The directors have declared an extra dividend of 12½ cents per share in addition to the regular quarterly dividend of 37½ cents per share on the common stock, no par value, both payable Dec. 14 to holders of record Nov. 30.—V. 141, p. 2112.

Chicago Rock Island & Pacific Ry.—Committee— The protective committee for the 6% and 7% preferred stocks, headed by C. H. Harrison, Jr., represents slightly less than 40% of the two issues, according to a letter filed with the IOC. The committee represents 122,572 shares, or 42.3% of the 7% preferred and 94,480 shares, or 37.6% of the 6% preferred stock.—V. 141, p. 3070.

Obituary-

Harry Granville Clark, Executive Vice-President, died on Nov. 12 of art trouble.--V. 141, p. 3070.

heart trouble.--V. 141, p. 3070. Chicago Stadium Corp.--Annual Report---The present organization was incorp. in Delaware, Feb. 28 1935 as Chicago Indoor Stadium Corp. to acquire the property located at 1800 West Madison Street in Chicago. This building was erected by Chicago Stadium Corp. (Illinois company) organized June 5 1928. Interest due on the first mortgage bonds of that company Jan. 1 1932 was defaulted. Proceed-ings in bankruptcy were commenced June 25 1934. The final decree was entered Feb. 26 1935 and possession of the property was transferred on March 13 1935. On Aug.27 1935 the name of the present ("Indoor") corporation was changed to Chicago Stadium Corp. The directors recently adopted a resolution to the effect that there was no net income for the period beginning March 1 1935, and ending Sept. 30

1935, applicable to the payment of interest on the first mortgage income bonds_and second mortgage income bonds.

Special Common D	ividend-A	ul-		

The directors have declared a dividend of \$2 per share on the common stock, no par value, payable in cash or, at the option of the stockholder, in 6% bonds of Porto Rican-American Tobacco Co. at 63½, plus \$25 accrued interest, options to be exercised by Nov. 25 1935. The dividend is payable Nov. 30 to holders of record Nov. 18. Dividends of 25 cents per share had been paid on the common stock' each three months from Sept. 30 1931 to and including June 30 1934; none since.—V. 141, p. 915.

Connowingo Power Co.—To Fight Rate Cut— Asking that an injunction order be issued and that the court declare confiscatory and unconstitutional the \$45,000-a-year rate reduction ordered by the Public Service Commission for its customers in Harford and Ceed Counties and other northern sections of Maryland, the company on Nov. 12, filed proceedings against the Commission in the Circuit Court. Judge Joseph N. Ulman signed orders giving the Commission until Dec. 3 to show cause why an injunction should not be issued and until Nov. 15 to show cause why an injunction should not be excused from filing a new schedule of rates carrying out the reductions ordered.—V. 141, p. 2273.

Consolidated Paper Co.—*Dividend Increased*— The directors on Nov. 13 declared a quarterly dividend of 25 cents per share on the common stock, par \$10, payable Dec. 1 to holders of record Nov. 20. This compares with 15 cents paid each three months from Dec. 1 1933 to Sept. 1 1935 inclusive, and 10 cents per share previously each three months.

Christmas Bonus to Workers— The directors also voted to pay a Christmas bonus to all workers who have been with the company a year or more. The minimum is \$50 for men and \$25 for women and the bonus runs as high as \$200 for some of the 2,000 workers. The directors indicated that similar bonuses will be paid from time to time.—V. 140, p. 636.

Consolidated Power & Light Co. of S. Dak.—Merged— See General Public Utilities Co. below.—V. 122, p. 2649.

Consumers Power Co .- Listing of Bonds-Authore The New York Stock Exchange has authorized the listing of \$18,594,000 1st lien & unif. mtge. bonds. 3 % (% series of 1935 due 1965 (V. 140, p. 4396) and \$19,047,000 1st lien & unif. mtge. bonds, 3 ½ % series of 1935 due 1965 (V. 140, p. 4396) 1965 (V. 141, p. 2113), both series to be designated "1st mtge. bonds" on or about Jan. 1 1936, provision having been made to make the lien of the mortgage a first lien upon substantially all of the property of the company, on official notice of issuance in exchange for the outstanding temporary bonds of both series, all of which have been sold and are out-standing in the hands of the public.—V. 141, p. 2733.

Container Corp. of America-Clears Up All Accumulations

The directors have declared a dividend of \$19.25 per share on account of accumulations on the 7% cumul. pref. stock, par \$100, payable Dec. 31 to holders of record Dec. 11. This payment will clear up all accumulations on the pref. stock and provides for the current quarters' dividend as well. See V. 141, p. 1270 for detailed record of dividend payments on this issue. --V. 141, p. 2586.

Corrugated Paper Box Co., Ltd.—Accumulated Div. The directors have declared a dividend of \$1.75 per share on account of accumulations on the 7% cumulative preferred stock, par \$100, payable Dec. 2 to holders of record Nov. 10. A similar payment was made on Sept. 1 and June 1 last, this latter being the first dividend paid since June 1 1930, when a regular quarterly dividend of \$1.75 per share was paid. Accruais after the payment of the current dividend will remain at \$33.25 per share.—V. 141, p. 1092.

Continental-Diamond Fibre Co.—Dividend Doubled— The directors on Nov. 13 declared a dividend of 50 cents per share on the capital stock, par \$5, payable Dec. 30 to holders of record Dec. 16. This compares with 25 cents paid on Sept. 30, last, and 15 cents on June 28 and March 29 1935, this latter being the first distribution made since June 30 1931 when a regular quarterly dividend of 25 cents per share was paid. Davison Chemical Co.—Stockholders' Committee Recom-mends Acceptance of Reorganization Plan— A stockholders committee, recently formed in connection with the plan of reorganization, announced Nov. 11 that it recommended accept-ance of the plan as in the best interests of the shareholder. B. Howell Griswold Jr. of Alex. Brown & Sons, Baltimore, is chairman of the com-mittee and other members are John W. Castles of Chas. D. Barney & Co. and Louis S. Zimmerman of laryland Trust Co., Baltimore. William J. Huber and Alex. Brown & Sons, Baltimore, is Secretary and Clark & Allen, 40 Wall St., New York are Counsel.

In a letter to stockholders, the committee stated that holders of record on Sept. 30 1935 are entitled to accept the plan and urged prompt action on their part prior to the hearing on confirmation before the U.S. District Court at Baltimore on Nov. 15 Net Income Up to \$369,210 for Fiscal Year—

Net Income Up to \$369,210 for Fiscal Year— The combined operating results of the company and all of its subs., incl. those in receivership or trusteeship, for the fiscal year ended June 30 1935 show net income before provision for depreciation and Federal income taxes of \$901,004, according to a report issued by the trustee. After de-ducting provision for depreciation of \$471,900 and provision for Federal income taxes of \$59,893, the net income from operations for the year ended June 30 1935 was \$369,210 compared with net income of \$179,682 for the year ended June 30 1934. The current assets of the company at the date of receivership on Feb. 13 1933 amounted to \$338,906. There was no cash on hand and the current assets after deducting current liabilities created by the trustees of \$136,088, amounted to \$1,399,996, an increase of \$1,061,900 over the current assets akken over by the receivers on Feb. 13 1933. The combined net current assets of all companies (including those in trusteeship or receivership), after deducting current liabilities, increase of \$1,034,580. Only a small part of this increase was represented by the liquidation of capital assets, accord-ing to the report.—V. 141, p. 2114.

 Duquesne Gas Corp.—Receiver's Suit— George W. McCandless, receiver for the corporation, on Nov. 11 won a decision involving about \$2,348,640 in the U. S. Supreme Court in a suit against Maxime H. Furlaud of N. Y. City, and others who financed the company's purchase in 1930.
 The Court acted on an appeal brought from a decision of the Second Circuit Court of Appeals in N. Y. City which held the receiver could not recover.
 Mr. McCandless charged Mr. Furlaud and his associates in Furlaud & Co., a banking house now dissolved, floated a bond issue of \$4,000,000 and an issue of stock after obtaining a fraudulently high appraisal of the company's properties.
 Only a part of the proceeds of the bond issue, it was asserted, was turned over to the company while the bankers took \$2,684,640.
 A Federal District Court in N. Y. City allowed a judgment for the money allegedly withheld on the bond and note issue, but refused it on the stock ossue.
 The Circuit Court of Appeals held Mr. McCandless was entitled to receive.

ossue. The Circuit Court of Appeals held Mr. McCandless was entitled to no recovery at all. The Supreme Court held, however, that the promoters should be allowed a credit of something less than \$300,000.—V. 141, p. 2735.

-Eastern Cuba Sugar Corp.—Plan of Readjustment+edent The bondholders' protective committee for the 15-year 7½% mortgage sinking fund gold bonds (Charles Hayden, Chairman) has filed with the Securities and Exchange Commission a registration statement which became effective Nov. 14, covering a plan of readjustment with respect to the

The bondholders protective committee for the the profest 7.5° monomorphases in king fund gold bonds (Charles Hayden, Chairman) has filed with the Securities and Exchange Commission a registration statement which became effective Nov. 14, covering a plan of readjustment with respect to the above bonds. The company has outstanding \$223,000 Violet Sugar Co. 1st mtge, 7% gold bonds, due June 30 1935, which are a first lien on the Central Violeta and approximately 15,000 acress of land; \$7,500,000 of Eastern Cuba Sugar Corp. 15-year 7½% mortgage sinking fund gold bonds, due Sept. 1 1937, which are a second lien on the above properties and a first lien on approximately 35,000 additional acress of land; \$900,000 6% mortgage gold bonds, due Feb. 1 1932, which are a first lien on the Central Velasco and approximately 35,000 additional acress of land; \$900,000 6% mortgage gold bonds, due Feb. 1 1932, which are a first lien on the Central Velasco and approximately 35,000 additional acress of land; by 900,000 6% mortgage is owned by the Atlantic Gulf Sugar Co. All of the above issues are in default, but foreclosure suits which were started in Cuba have been suspended by the enactment of the Cuban moratorium laws. In addition to the mortgage debt, the principal liability of the corporation is an unsecured indebtedness of over \$2,500,000 heretofore owing to the Cuban Cane Products Co., Inc., but now held by the Atlantic Gulf Sugar Co. The proposed plan contemplates the formation of a new company which would acquire the stock of Eastern Cuba Sugar Corp., and also would acquire either the properties now subject to the Violet bonds, nor the unsecured indebtedness to Atlantic Gulf Sugar Co. Since under the Cuban moratorium it is necessary to get consent of the company, i.e., the stockholders, in order to effect a reorganization, the commany, i.e., the stockholders, in order to effect areorganization, the commany, i.e., the stockholders, in order to effect areorganization, the committee in 1935 purchased from the receiver

Bince inder the Cuban moratorium it is necessary to get consent of the company, i.e., the stockholders, in order to effect a reorganization, the volume is a position to propose a reorganization plan at the proper time.
In effect, the plan proposes, (1) that all back interest on the Violet Sugar Co. bonds be paid in cash and that the maturity of the bonds be sugar Corp. 7.5 (5) bondholders exchange their bonds for capital stock of the Eastern Cuba Sugar Corp. 7.9 (5) bondholders exchange their bonds for capital stock of the sevence of the order of bonds, they thereby becoming the owners of the new company.
In a letter to bondholders outlining the proposed reorganization, the formative points out that when the judical administrator came into a bonds, they thereby becoming the owners of the new company.
In a letter to bondholders outlining the proposed reorganization, the formative points out that when the judical administrator came into a bonds, they thereal and produce the 1932, he was without funds with which to operate and produce the 1933 crop. However, arrangements an irreparable loss to the bondholders was verted.
More satisfactory trends in the sugar market and other favorable developments beginning shortly thereafter, enabled the judical administrator continue the operation of the properties during 1933 and 1934 at a profile and produce the 1932, he was without funds with which to operation of the properties during 1933 and 1934 at a profile and ministrators be added to the bondholders and the physical properties between Cuban moratorium laws suddenly terminated all judicial administrator to provide for 1934 dead season requirements.
In a defining the the company, fortunately, subsequent amendments to the base of the budicial administrator to provide for 1934 dead season requirements.
In a condance with these amendments the judicial administrator, together durins the fundies and under the bases and the under ad administrator loaned thous, the full due on Sept.

Preferred Dividend

The directors have declared a dividend of 371/2 cents per share on the \$3 convertible preferred stock on account of accumulations payable Dec. 2

to holders of record Nov. 15. The balance of 37¹/₂ cents per share will be added to accumulations already accrued. This dividend was declared from capital surplus. A similar payment was made on Sept. 1 and June 1 last.—V. 141, p. 2115.

A similar payment was made on Sept. 1 and June 1 last. - V. 111, P. 214. Electric Storage Battery Co. - Tax Refund --The company has received the tax refund from the Government which has been pending for several years and is expected to net somewhat over \$1,000,000 after all expenses. The company received a judgment in 1933 and the refund has been drawing 6% interest from then until date of pay-ment. The refund represents the claim of the company alone, and does not include the Willard Storage Battery Co., a subsidiary, which has a smaller claim for a similar refund still pending. -V. 141, p. 246.

smaller claim for a similar refund still pending. -V. 141, p. 1826.

Unit sales of Chevrolet, Pontiac, Oldsmobile, Buick, LaSalle and Cadillac passenger and commercial cars are included in the above figures.

Buick Deliveries at Five Year High— Domestic retail deliveries of the Buick Motor Co. during October totaled 14,164 cars, the largest month's business in more than five years and the best October volume since 1929, W. F. Hufstader, General Sales Manager, announced.

The figure compares with 6,373 units sold at retail during October last vear, a gain of 7,791 cars or more than 122%. Steadily increased volume characterized the month's business, Mr. Hufstader said, with substantial gains reported in each 10 day period. Sales during the last 10 days of October were 5,629, he said, a gain of 1,262 cars over the previous 10 days and up 1,461 over the first 10 days of the month. The volume for the final 10 day period compared with sales of 3,378 in the last 10 days of October last year, an increase of 2,251 units or 66.6%. "The strong retail demand for the new Buick cars has necessitated re-peated increases in production schedules at the factory." Mr. Hufstader said, "with the result that the Buick plants are operating at the highest levels since 1929. An average of 800 cars a day are being produced for in the United States. "An overwhelming demand has resulted in an unfilled order bank at the factory of more than 30,000 cars. These represent dealers' require-ments for immediate shipment and are being filled as rapidly as the cars: "An overwhelming demand has resulted in an unfilled order bank at the factory of more than 30,000 of the 1936 models already have been shipped. Domestic dealer stocks now are in the neighborhood of 12,000 cars." "Mr. Hufstader said that November production schedules were boosted twice, now calling for an output of 15,600 cars for domestic shipment. Export requirements will bring the total to close to 18,000 units, he said. Cadillac-La Salle Sales at Peak—

Export requirements will bring the total to close to 18,000 units, he said. Cadillac-La Salle Sales at Peak— Cadillac-La Salle Sales at Peak— Cadillac-La Salle retail sales were larger in October than in any similar month since 1929, showing a 259% gain over October 1934. Factory production and shipments to dealers also established October records for pany has raised its November production schedule in order to handle volume of unfilled orders on hand. 1936 Chevrolet Prices— Chevrolet prices for 1936 show reductions on three of the master de luxe models and advances on four standard models. The standard line, entirely redesigned and offered with turret tops and hydraulic brakes, is priced as follows: Coach \$510, up \$25; coupe, \$495, up \$20; sedan, \$575, up \$25; sedan delivery, \$535, up \$20. Two new models not made last year are the town sedan at \$535 and the sport sedan at \$600, \$27th de luxe line is priced as follows: Coach, \$580, unchanged; sedan, \$640, unchanged; business coupe, \$560, unchanged; town sedan, \$605, off \$10; sport sedan, \$665, off \$10, and sport coupe, \$590, off \$5. Great Northern Ry.—Special Meeting— The stockholders will hold a special meeting on Dec. 20 to consider and act upon proposals that the company accept and come under the Minnesota Business Corporation Act; also to consider proposed change in stock. It is said that the management is considering changing the par of the present stock from \$100 to no par in order to facilitate the refunding of the \$107,000,000 7% bonds which will mature July 1 next.—V. 141, p. 3073.

Gulf Mobile & Northern RR.—To Issue \$767,000 Bonds The company has applied to the Interstate Commerce Commission for permission to issue \$767,000 in 4% coll. trust bonds, of which \$300,000 are to be sold at par to the Public Works Administration and the proceeds used for purchase and installation of new 90-lb. rail on the New Orleans Great Northern. The balance of \$467,000 will be issued in exchange for notes now outstanding. The G. M. & N. also asked permission to pledge \$534,000 principal amount of 1st migg. 5% bonds as additional security for the coll. trust issue. The G. M. & N. application pointed out that the road was engaged in rehabilitation of the New Orleans Great Northern and so far has spent \$612,000 on the property, of which \$440,000 has been loaned to the road by the PWA.—V. 141, p. 2889.

(R.) Hoe & Co.—Meeting Further Adjourned— The adjourned stockholders meeting to vote on proposed change in par value of the common stock to \$10 from \$1 has been further adjuorned to Dec. 7 for lack of a quorum.—V. 141, p. 2889.

Hollinger Consolidated Gold Mines, Ltd.—Extra Div. The directors have declared an extra dividend of 5 cents per share in addition to the regular monthly dividend of like amount on the capital stock, both payable Dec. 2 to holders of record Nov. 15. Similar pay-ments were made on Oct. 7 and July 15 last. See also V. 140, p. 973, for further dividend record.—V. 141, p. 1933.

-Holly Sugar Corp.—Stock Split Approved— The stockholders at a special meeting held Nov. 8 approved the recom-mendation of directors to increase the common stock to 500,000 shares, from 100,000 now outstanding, and to issue five new shares for each present share held. A proposal authorizing the direct

held. A proposal authorizing the directors to set up an employees' bonus plan which would permit payment of bonuses to employees when earnings ex-ceeded preferred dividend requirements by \$500,000, also was approved. The company will make application for listing of the new shares on the New York Stock Exchange.—V. 141, p. 2436.

 Household Finance Corp. — Special Dividends for the directors have declared special dividends of \$1.22½ per share on the creference stock and \$1.05 per share on the class A common and class B common stocks, all payable Dec. 5 to holders of record Nov. 22. Company has already paid \$3.50 a share on preference stock this year and \$3 on the common shares.
 In addition to the special dividends, the directors also declared regular quarterly dividends of \$7½ cents per share on the preference stock and of 75 cents per share on the common stock, all payable Jan. 15 to holders of record Dec. 31.
 In letter to stockholders announcing the special dividends, B. E. Henderson, President, stated that "in the judgment of directors if it were not for Section 351 of the Revenue Act imposes a tax of 30% on the first \$100,000 of undistributed net income of every personal holding company, and 40% on the amount in excess of \$100,000.
 Mr. Henderson explains that the company is an operating company, in Section 351 probably includes operating companies engaged in the small to ab usiness because of the broad use of the word "interest" in this section.

Small total basiness because the section. "Efforts have been made to clear up this erroneous definition," Mr. Hen-derson continues, "and exempt small loan companies from the provisions of this section, as banks, life insurance companies and surety companies are exempted. The exemption has not yet been accomplished. Relief may be given by the Court, but this possibility does not warrant putting stockholders' money in tax jeopardy."—V. 141, p. 2738.

Indiana Hydro-Electric Power Co.-Preferred Div. Heck

Indiana Hydro-Electric Power Co.—Preferred Dut.4.2.
 The directors have declared a dividend of 871/2 cents per share on account of accumulations on the 7% cum. pref. stock, par \$100, payable Dec. 16 to holders of record Nov. 30. A like amount has been paid each quarter quarterly distributions of \$1.75 per share.—V. 141, p. 2118.
 Indianapolis & Louisville Ry.—Statistical Report—The committee for the first mortgage gold bonds due Jan. 1 1956 (Henry R. Hayes, Chairman) has prepared a statistical report with respect to the properties by which these bonds are secured. This report is in possession of the Secretary of the Committee, Paul Porzelt, at the office of Ladenburg, Thalmann & Co., 25 Broad St., New York City. It contains information which it is believed will be of interest to any holder of the bonds. The report indicates that these bonds possess substantial value.—V. 102, p. 1811.

report indicates that these bonds possess substantial value.—V. 102, p. 1811. International Cement Corp.—Listing— The (New York Stock Exchange has authorized the listing of 179.955 shares of common stock (no par), so as to be issuable on official notice of issuance upon conversion of a proposed issue of 10-year 4% convertible debentures, due Nov. 1 1945, instead of upon conversion of 20-year 5% convertible debentures of the corporation due May 1 1948. The corporation proposes to offer and sell \$12,000,000 10-year 4% convertible debentures, due Nov. 1 1950. The proposed 4% convertible debentures are to be convertible on or before Nov. 1 1945, or, if called for redemption, into shares of common stock at fixed rates with respect to which at the present time have not been determined upon. The maximum number of shares that will be required for the conversion of the 10-year 4% convertible debentures cannot be definitely ascertained until the conversion to base included in this application should it at any time appear necessary, in order to provide for additional con-versions.—V. 141, p. 3074. International Harvester Co.—To Maintain Present

International Harvester Co .- To Maintain Present Prices-

The company has notified its dealers in the United States that 1935 prices on the greater part of its farm equipment lines will remain in effect for 1936.

3230

Financial Chronicle

Small increases have been made in certain types and sizes of machines where 1935 prices proved seriously out of line with manufacturing costs. Prices on one of the four models of wheel type tractors have been increased by 3%, but prices on the remaining three remain unchanged. The withholding of advances in list prices is, according to the company, being made despite increases in labor rates and material costs.—V. 141, p. 2280.

International Match Corp.—Hearing Adjourned—

Referee in Bankruptcy Oscar W. Ehrhorn has adjourned the hearing on the application of the Irving Trust Co. to distribute an initial dividend of 5% to debenture holders of the International Match Corp. to Nov. 22. -V. 141, p. 2891.

International Mining Corp.-5-Cent Extra Dividend The directors have declared an extra dividend of 5 cents per share in addition to the regular quarterly dividend of 15 cents per share on the common stock. par \$1. both payable Dec. 20 to holders of record Nov. 29. -V. 141, p. 2739.

Long Island Lighting Co.—Seeks Exemption from Holding

Company Act-

Company Act— The Securities and Exchange Commission on Nov. 9 announced that the Long Island Lighting Co. and its subsidiary companies, Kings County Lighting Co., East Hampton Electric Light Co., Queens Borough Gas & Electric Co., Nassau & Suffolk Lighting Co. and Long Beach Gas Co., Inc., all of New York, had jointly applied for exemption from all of the provisions of the Public Utility Holding Company Act of 1935. The application is made under Section 3(a) (1) of the Act. — The application states that exemption is being asked "by reason of the fact that each and all of the companies joining in this application do only a public utility business of an intra-State nature, the business of all of said utilities being carried on within the territorial limits of the State of New York. — — It is also pointed out that "none of the companies I antware any parent or subsidiary companies doing a public utility business outside of the State of New York, nor do any of said companies transmit natural or manufactured gas or electricity in inter-State commerce, nor do any of the said companies purchase natural or manufactured gas or electricity from any public utility operating outside the territorial limits of the State of New York." — The application was made jointly, it is stated, because substantially the same questions of fact are involved, each company "being a constituent part of what is commonly referred to as the Long Island Lighting System." — V. 141, p. 2741. Lower St. Lawrence Power Co.—Bonds Offered—

Lower St. Lawrence Power Co.—Bonds Offered.— McLeod, Young, Weir & Co.; Hanson Bros., Inc., and R. O. Sweezey & Co., Ltd., Montreal, are offering \$1,400,000 20-year 5% 1st mtge. sinking fund bonds, series A, at 100 and interact and interest.

and interest. Dated Oct. 1 1935; due Oct. 1 1955. Manhattan (Elevated) Ry .- Stockholders Advised to Accept City's Proposal-

Accept City's Proposal— Approval of toe city's transit unification plan by stockholders of the company, owner of the elevated lines which the Interborough Rapid Transit leases and operates, was urged Nov. 13 by officials and attorneys for the company at the annual stockholders' meeting. Charles Franklin, counsel, pointed out that under the tentative uni-fication agreement Manhattan stockholders are to receive 434 % 2d mtge. bonds of the Board of Transit Control, the agency to be set up to operate the unified system, in exchange for the stock. A value of \$42 is to be put on each share which is to be turned over in return for bonds, Mr. Franklin explained. Under the arrangement, he said, stockholders will receive dividends from the bonds equal to \$1.98 for each share of their present holdings.

explained. Under the arrangement, he same scheme of their present dividends from the bonds equal to \$1.98 for each share of their present holdings. Both Mr. Franklin and Nathan L. Amster, President of the company, insisted that the stockholders under the unification program would not be paid as much as they should get. However, both officials held that the agreement was the best that could be obtained, at least so far as the Manhattan stockholders were concerned. The stockholders will meet to act on unification by the end of January. Charles R. Jeffers and Charles G. Mullin have been added to the board of directors to fill vacancies caused by the resignation of E. N. Brown and the death of Middleton Burrill. The protective committee for Manhattan Ry. 2d mtge. 4% bonds, consisting of Bertram Cutler, Warren H. Snow and John C. Traphagen, has informed holders that it will recommend the proposed sale agreement "if and when a satisfactory definite plan is formulated and approved by the Transit Control as "a municipal authority to which the proporties will be leased." It says "numerous details" of the sale agreement "will be the subject of continued negotiation between the representatives of the several parties in interest." Middlesex & Boston Street Ry .- Earnings-

-V. 140, p. 3556.
Middle West Utilities Co.—Creditors Oppose Plan— Efforts to bring about a reorganization of the company met a new obstacle Nov. 9 when attorneys for holders of the company's \$40 000.000 outstanding notes made formal objection in the Federal Court in Chicago to revisions in the plan suggested by Federal Judge James H. Wilkerson. Robert N. Golding, counsel for the noteholders, told the Court that the suggested modifications in the original reorganization terms would result in an entirely new plan which was not to the interest of the creditors. The noteholders' committee, Mr. Golding said, could not take responsibility for approving the changes. The question must be submitted to a vote of noteholders who have deposited with the committee, he added.—V. 141, p. 3077.

Minnesota Valley Canning Co.—\$2 Accumulated Div.— The company paid a dividend of \$2 per share on account of accumulations on the \$7 cumul. pref. stock, par \$100, on Nov. 1. The last regular quar-terly dividend of \$1.75 per share was distributed on Aug. 1 1931. Since this latter date the company paid eight dividends of \$1 per share each. Accruals after the Nov. 1 dividend amount to \$19.75 per share.—V. 141, p. 1445.

<text><text><text><text><text><text><text><text>

The Committee informed the Commission that it represented approxi-mately \$5,900,000 of the first mortgage obligations and \$309,800 of the income bonds. The Missouri Pacific reorganization plan, the Committee's petition said, proposes the issuance of new securities in exchange for the bonds repre-sented by the committee.—V. 141, p. 3077.

Monongahela West Penn Public Service Co .- Bonds

Called

All of the outstanding 1st lien & ref. mtge. 515 % gold bonds, series B, have been called for redemption on Dec. 9 at 105 and Interest. Payment will be made at the Chase National Banz, 11 Broad St., N. Y. City.-V. 141, p. 3077.

Montana Power Co.-Cuts Rates-

Effective Nov. 15, the company reduced rates on domestic electricity and natural gas about 20%, commercial lighting rates 17%, water rates at Missoula and Hamilton 20% and eliminated the \$1.25 monthly service charge on gas meters by placing a \$1 minimum charge. Under an agree-ment with the Montana Public Service Commission, all suits against Montana Power by the Commission will be dropped.—V. 141, p. 2895.

Court Orders Plan	Se Submit	ted by Anr	il 23	

Court Orders Plan Be Submitted by April 23— Judge Carroll C. Hincks of the U. S. District Court on Nov. 13 ordered le trustees to submit a plan for reorganization before April 23 1936. He tid in a briefly worded document, filed with the clerk of the Court in this true. th

said in a oriently worded document of Section 77 of the Bankruptcy Act, "Pursuant to mandatory provisions of Section 77 of the Bankruptcy Act, recently amended, the debtor corporation shall file a plan of reorganization with the Court on or before April 23 1936."

Trustees File with Commission— Applications for ratification of their appointment by the Federal Court as Istees of the road were filed with the ICC Nov. 13 by Howard ... Palmer, M. Daniels and James L. Loomis. ICC Orders Investigation of Road—

ICC Orders Investigation of Road—
The ICC on Nov. 14 ordered an investigation into the management and financing of the company.
The investigation, which will be directed by Charles D. Mahaffie, one of the three commissioners on the ICC finance division, will be the third the Commission has made into the New Haven. The last report on the road was issued on July 11 1914.
The notice issued by the Commission follows:
The notice issued by the Commission follows:
The commission having under consideration the matter of the history, management, financial and other operations, accounts, and practices, particularly expenditures of carrier funds in other than its common carrier operations, of the New York New Haven & Hartford RR:
It is ordered, That a proceeding of inquiry and investigation upon the commission's own motion be, and it is hereby, instituted into and concerning the history management the into in other than its common carrier operations expenditures of carrier funds in other operations, accounts, and practices of the New York New Haven & Hartford RR. in order of orders as may be appropriate upon the record:
It is further ordered. That the New York New Haven & Hartford RR, be, sand it is hereby, made respondent in this proceeding; that this order beserved on said respondent; and that notice to the public be given by possing a copy of this order in the office of the Secretary of the Commission.
And it is further ordered. That the New York New Haven & Hartford RR, be, and it is further ordered. That the New York New Haven & Hartford RR, be, and it is hereby, ande respondent in this proceeding the asigned for hearing at such times and places as the Commission may hereafter direct.—V. 141, p. 3080.

New York & Queens Electric Light & Power Co.— Authorized to Sell \$25,000,000 31/28—

Authorized to Sell \$25,000,000 3½s-The Public Service Commission of New York on Nov. 14 authorized the sale of \$25,000,000 of 3½% first mortgage bonds by the company at not less than par and interest. The Commission's order carried the condition that the Consolidated Gas Co. agree to become a joint petitioner in the proceeding and refund to the New York & Queens Electric Light & Power Co. \$257,460 received by it from that company in 1927 as discount or commission in connection with an issue of debentures of the Queens company. There was a further condi-tion that the Queens company should write off its books charges for the commissions, expenses and discounts. Tonsolidated Gas was directed to retain the amount received by it from the Queens company for the debentures now held by Consolidated Gas in its treasury and not use the money for any purpose without the consent and approval of the commission. Tonsolidated Gas and the Queens company were directed by the order to agree in writing that the granting of the order, under the conditions set forth, was to be taken as conclusive evidence of their acceptance of and agreement to abide by its conditions. The purposes for which the bonds were authorized were to pay a \$500,000 note due National City Bank; to pay \$1,500,000 of advances made by fire insurance trustees; to retire a \$4,000,000 loan made by Brooklyn Edison Co.; to retire a \$7,000,000 loan made by Consolidated Gas Co; to retire \$10,000,000 6% debentures due on March 24 1937; to pay \$1,400,000 expenses for the sale of the bonds, and for additions and betterments to plant and distributing systems, subject to the consent and approval of the commission.—V. 141, p. 3080.

New York Shipbuilding Corp.—*Tenders*— The Union Trust Co. of Pittsburgh, trustee, will until Nov. 25 receive bids for the sale to it of sufficient 1st mtge. 30-year 5% s. f. gold bonds due Nov. 1 1946 to exhaust the sum of \$232,902 at prices not exceeding 1021/2 and interest.—V. 141, p. 2286.

-v. 141, p. 443. **Northwest Bancorporation**—*To Sell Unit*— The company has approved the sale of Spokane & Eastern Trust Co. to the First National Bank of Seattle for a consideration of approximately \$2,000,000 cash. This amount is substantially in excess of book value as carried on the books of Northwest Bancorp. The sale is subject to approval of governmental authorities. Proceeds of the sale when approved will permit the company to retire a large proportion of the unpaid balance of Reconstruction Finance Corpora-tion loan of \$3,000,000 borrowed in 1933 to strengthen capital of certain affiliated banks. It would also mean a reduction of \$80,000 in annual interest charges.—V. 140, p. 1152.

Northwestern Public Service Co.—Preferred Dividends The directors have declared a dividend of \$1.31¼ per share on the 7% cumulative preferred stock, par \$100, and a dividend of \$1.12¼ per share on the 6% cumulative preferred stock, par \$100. The dividends are payable on Dec. 2 to holders of record Nov. 20. The last dividend on the 7% stock was \$1.16 2-3 per share and on the 6% stock, \$1 per share, paid on Sept. 2 1935.—V. 141, p. 2899.

Ohio Oil Co.-Sale-

The Arkansas marketing properties of Marathon Oil Co., a subsidiary, have been sold to Lion Oil Sales Co., marketing subsidiary of Lion Oil Refining Co. in Arkansas, Mississippi, Alabama and Tennessee. The properties sold comprise 32 bulk stations and retail organization of more than 400 dealers.—V. 141, p. 1104.

Pacific American Fisheries, Inc.—Resumes Common Divs The directors have declared a dividend of 25 cents per share on the common stock, par \$5, payable Dec. 16 to holders of record Dec. 2. This will be the first dividend paid on the common stock since Dec. 1 1930, when a quarterly distribution of 50 cents per share was made.—V. 141, p. 763.

stock.—V. 134, p. 3835. Petroleum & Trading Corp.—25-Cent Class A Div.— The directors have declared a dividend of 25 cents per share on account of accumulations on the 5% cumulative class A stock, par \$25, payable on Dec. 20 to holders of record Dec. 10. A similar payment was made on June 28 last, while a dividend of 50 cents per share was paid on Dec. 28 1934. From May 1 1929 up to and including May 1 1930, regular quarterly distributions of 3114 cents per share were made. A similar distribution was made on Sept. 2 1930. Accruals on the above issue after the payment of the Dec. 20 dividend amount to \$4.9334 per share.—V. 140, p. 3562.

St. Louis-San Francisco Ry.—Trustees to Purchase Past Due Equip. Trust Obligations.—
The trustees, J. M. Kurn and John G. Lonsdale, will be prepared, on and after Nov. 13 1935, to purchase at not more than the face value thereof (without interest subsequent to their respective maturities) the following additional past due equipment trust obligations of the company:

(a) Equipment trust certificates, series DD, which matured April 1 1934, together with interest coupons (No. 8) which matured April 1 1934 and

(No. 9) which matured Oct. 1 1934, from all outstanding series DD certificates.
(b) Equipment trust certificates, series CC, which matured May 15 1934, together with interest coupons (No. 12) which matured May 15 1934, and (No. 13) which matured Nov. 15 1934, from all outstanding series CC certificates.
(c) Coupons (No. 29) which matured July 15 1934 from all outstanding series CC and the matured Nov. 15 1934, from all outstanding series CC certificates.
(d) Coupons (No. 17) which matured Aug. 15 1934 from all outstanding equipment trust certificates, series BB, dated Feb. 15 1926.
(e) Equipment trust certificates, series AA, which matured Sept. 1 1934, together with interest coupons (No. 24) which matured Sept. 1 1934 from all outstanding series AA certificates.
Purchases will be made upon tender of above certificates and (or) coupons, on or after Nov. 13 at the office of C. W. Michel, the Eastern representative of the trustes. (Form 1000) will be required from all holders exceept corporations.
This cleans up all equipment trust notes and coupons which matured in 1934.—V. 141, p. 2903.

The directors have declared a special dividend of 50 cents per share in addition to a quarterly dividend of like amount on the common stock, no par value, both payable Dec. 16 to holders of record Nov. 22. A special dividend of 75 cents per share was paid on May 1 1935, this latter being the first disbursement made on the issue since May 2 1932, when 62½ cents per share was distributed (the rate paid each quarter since May 1 1926). -V. 141, p. 2597.

per share was distributed (the rate paid each quarter since May 1 1926). -V. 141, p. 2597.
Seattle Gas Co.—Plan Approved by Court— The plan of reorganization has been approved by the Federal Court and declared operative.
On the basis of exchange, holders of 1st & ref. 5s of 1949 will receive \$37.50 in cash, representing interest on the basis of \$500 bond from April 1 1934, to Oct. 1 1935, and will receive \$300 of new 1st & ref. 5s due 1954, 5 shares of 1st \$5 pref. stock and 1 share of common stock in the new company for each \$1.000 old bond held.
Holders of 1st & ref. Ss due 1949 will receive \$37.50 cash interest, \$500 once will st ker f. 5, bond due 1954, 5 shares 1st \$5 pref. stock, 3 shares 2d pref. stock and 1½ shares common stock for each \$1,000 old bond.
Holders of the 6% debentures due 1936 will receive 10 shares of 2d pref stock and 1 share new common stock for each \$1,000 debenture held.
The plan of reorganization effected by the company and the Harris Trust & Savings Bank of Chicago, as trustees, has the effect of reducing the funded debt from \$12,377,000 to \$5,083,000 and interest charges from \$63,200 to \$254,150.-V. 141, p. 2749.

(Franklin) Simon & Co.—Dividend Date Correction— The \$1.75 dividend recently declared on the 7% cumulative preferred stock will be paid on Dec. 2 to holders of record Nov. 18. Due to a typo-graphical error the payment date was omitted in last week's "Chronicle." See also V. 141, p. 3084.

See also V. 141, p. 3084. Sorg Paper Co.—Accumulated Dividends— A dividend of \$1.60 per share was paid on account of accumulations on the 6% cumulative preferred stock, par \$100, on Oct. 26. This compares with \$1.50 paid on Dec. 20 1934, 50 cents per share paid on Aug. 1, May 1 1934 and on Dec. 1 1933. These were the only payments made since the regular quarterly dividend of \$1.50 per share was paid on April 1 1932.— V. 140, p. 153.

V. 140, p. 153. Southern National Corp.—Dissolved— Holders of 15-year 6% gold debentures are being notified that substan-tially all of the assets of Southern National Corp, have been reduced to cash and the corporation has been dissolved pursuant to the laws of Dela-ware. In order that there may be a final adjudication of the amount to which each debentureholder is entitled and a complete settlement had of the affairs of the corporation. Dudley C. Lunt, Delaware Trust Bldg., Wilming-ton, Del., has been appointed receiver of the corporation by the Delaware Court of Chancery. In order to facilitate distribution, holders of debentures are requested to notify Bank of New York & Trust Co., the trustee, 48 Wall St., New York, of their names and addresses and the numbers of debentures held by them.

York, of their names and addresses and the induced of cash which each them. In the opinion of the board of directors, the amount of cash which each debenture holder will receive in liquidation should be substantially in excess of the present nominal market quotation for the debentures.—V. 141, p.768.

Southern Pacific Co.—Abandonment— The Interstate Commerce Commission on Nov. 1 issued a certificate permitting the company to abandon that part of its so-called West Side branch between milepost 662.349, at or near Cheshire, and milepost 651.250, at or near Transfer, approximately 11.099 miles, all in Lane County, Ore.—V. 141, p. 2905.

Texas Electric Ry .- Reorganization Plan-

Texas Electric Ky.—*Keorganization Plan*— On Oct. 26, an order was entered by Federal Judge Wm. H. Atwell, of the U. S. District Court for the Northern District of Texas, granting leave to M. H. MacLean and others, constituting a bondholders' protective committee, for the 1st & ref. mtge. 30-year gold bonds, and to Francis E Frothingham and others, constituting a bondholders' protective committee, for the 1st mtge. 5% sinking fund gold bonds of Texas Traction Co., to file a plea, and to propose a plan of reorganization. A plan has been filed and a hearing will be held in the U. S. District Court, Dallas, Texas, on Dec. 6 1935, for the consideration and confirmation thereof.

Digest of Plan of Reorganization

Securities, Claims and Stock Interest Presently Outstanding to Be Dealt with Under the Plan

All claims, if any (other than claims secured by mortgage), entered due to priority or preference, including all claims for Federal, State or local taxes.	
Purchase money obligation secured by vendor's lien on Dallas	
Freight and Express Station property	\$50,000
Texas Electric Ry. 1st & ref. mtge, bonds	5,444,000
Accrued interest to Sept. 30 1935	1,429,050
All claims secured under 1st & ref. mtge. for expenses and compensation for services of trustee and its counsel.	
Texas Traction Co. 1st mtge. bonds	741.000
Accrued interest to Sept. 30 1935	194,512
All claims secured under Texas Traction Co. 1st mtge. for ex-	
penses and compensation for services of trustee and its counsel.	
6% convertible debentures	1.348.000

	424,020
All other unsecured claims, if any.	1 710 000
First preferred stock (\$100 par)	1,712,000
Second preferred stock (\$100 par)	2,952,900
Common stock (\$100 par)	6,000,000
Properties Dealt with by the Plan and Treatment of Securities,	Claime and
Interests Affected Thereby	cratino unu

Properties Dealt with by the Plan and Treatment of Securities, Claims and Interests Affected Thereby
The properties dealt with by this plan constitute the interurban electric railway running from Denison through Dallas to Waco, with a branch time to Corsicana and local transportation systems in Waco, Denison and Sherman, together with all appurtenant property and equipment, materials and supplies, cash and receivables in the hands of the debtor.
The plan is proposed on the theory that public convenience and necessity require the continued operation of the property of the debtor and the property of the debtor and the property of the debtor and been to the creditors.
All of the property of the debtor is subject to the prior liens of the debtors?
The annual due for principal and interest on these two bond issues.
Accordingly, the plan asserts the insolvency of the debtor and the court will find that the interest of the debtor and been reduced to the project of the stockholders.
The plan adopts the position for the stockholders are valueless. The plan adopts the position that, taking into consideration (1) the amount of claims based upon each of the two mortgages; (2) the character of the property subject to the first lien of each of the two mortgages, and (3) the relative contribution to earnings of the business traceable to the property subject to the first lien of each of the two mortgages, and flucture principal amount of the two mortgages, holders of a like principal amount of bonds secured by either of the two mortgages.

bonds, and this is accomplished by the issuance only of common stock by the company which will own and operate the properties. The Company

The Company Title to all of the properties of the debtor of every kind and character will, at the effective date of the reorganization, subject only to the \$50,000 purchase money obligation on the Dallas Freight and Express Station, be vested in the company which will operate these properties and which will (a) Assume and agree to pay in accordance with the terms thereof the pur-chase money obligation and all of the claims mentioned above; (b) issue and deliver the new securities issuable upon consummation of this plan; (c) pay certain items of expenses. The charter of the company will be in such form as will be approved by the Court having jurisdiction of the reorganization. The board of direc-tors of the company will be nominated by the two bondholders' protective committees, subject to the approval of the Court and the plan contem-plates that such board of directors will hold office for a period of three years, to effect a continuity of management in the interests of orderly operating policies during the period of readjustment following the reorganiza-tion. Reorganization Ernenses

tion. Reorganization Expenses It has been agreed between the two bondholders' committees and the trustees under the debtor's two mortgages that no compensation for services should be paid to any of the members of either of the bondholders' protective committees, and that the aggregate sum to be allowed and paid to the trustees under the mortgages and their counsel and to the two committees for counsel and expenses both prior to commencement of reorganization proceedings and in connection with the proceedings and with the plan of reorganization, shall not exceed the sum of \$24,000, of which one-third in not to exceed three years, with interest at 3% per annum payable upon discharge of principal.

 In 100 to constant on operation of the form of

entitled to full voting rights.—V. 141, p. 2599. Texas Gas Utilities Co.—Sale Proposed— H. L. Mann, receiver, has filed in the U. S. District Court a report and application for authority to sell the properties. The sale proposed, if authorized, will be for \$400,000 represented by note due and payable on or before 15 years from its date, bearing interest at the rate of 645% per annum, the interest payable semi-annually as it accrues. A vendor's lien and deed of trust lien covering all of the facilities conveyed will be retained and given as security, and the note and the security will be held by the receiver and constitute part of the receivership estate supporting the out-standing bonds in substitution for the property to be conveyed. In addi-tion, a gas sales and purchase contract will be executed under which the vendee will take gas from the receiver to meet its full requirements for at least 15 years. The receiver will have as revenues a fixed amount of \$26,000 per annum plus 20% of all gross revenues accruing to the distribut-tion company from resale of gas and 15c. per 1,000 cubic feet for all unac-counted for gas. A hearing will be had on the report on Nov. 21 1935, at the Court House Del Rio, Val Verde County, Texas, to determine whether or not the sale conveyance will be autorized.—V. 139, p. 1099. Toledo & Ohio Central Ry, Co.—Definitive Bonds Ready

Toledo & Ohio Central Ry. Co.—Definitive Bonds Ready The Bankers Trust Co. announced that it will commence delivrey on Nov. 14 of definitive ref. & imp. mtge. 34 % series A bonds, dated June 1 1935, in exchange for outstanding temporary bonds.—V. 141, p. 1287.

Volume 141

Valspar Corp.—New Treasurer— Geo. M. Bralla has been appointed Secretary and Treasurer in place of E. T. Herndon for this company, Valentine & Co. Detroit Graphite Co., and Con-Ferro Paint & Varnish Co.—V. 141, p. 2294.

Vapor Car Heating Co., Inc. \$2 Extra Dividend— The directors have declared an extra dividend of \$2 per share on the common stock, no par value, payable Dec. 10 to holders of record Dec. 1. -V. 139, p. 2849.

Veeder-Root, Inc.—\$2 Extra Dividend— The directors have declared an extra dividend of \$2 per share in ad-dition to the regular quarterly dividend of 50 cents per share on the common stock, no par value, both payable Nov. 30 to holders of record Nov. 16. An extra dividend of 50 cents per share was distributed on Dec. 29 1934.— V. 141, p. 1111.

Virginia Carolina Chemical Corp.-Special Meeting Sought-

Notices asking stockholders to join in call for a special stockholders' meeting on Dec. 17 are being sent out by Joseph A. Dart and associates, inaugurating a fight which has as its object the ousting of George S. Kemp and some associates from company's directorate and restoration of A. L. Ivey as President and M. S. Purvis as Vice-President. According to Virginia law, holders of 10% of the corporation's stock outstanding and entitled to vote can force a special stockholders' meeting by signing the call. Mr. Ivey, who recently sent holders of all classes of stock a letter de-nouncing methods of the Kemp faction, said that while he is in complete accord with the aims of Mr. Dart's faction he is working independently.— V. 141, p. 3089.

Walworth Co.—To Reorganize— The stockholders will hold a special meeting on Nov. 18 to consider the proposed plan of reorganization (V. 141, p. 2131). The company has notified the New York Stock Exchange of a proposed increase in authorized common stock from 500,000 shares to 1,400,000 shares and elimination of 20,000 shares pref. stock.—V. 141, p. 2911.

Warner Bros. Pictures, Inc .- Acquitted on Monopoly Charge-

Charge— Three motion picture companies and five of their executives, charged with violation of the anti-trust laws, were acquitted Nov. 11 by a Federal jury at St. Louis, Mo. The companies—Paramount, Warner Brothers and R-K-O Radio, and the executives, George J. Schaefer of Paramount, Harry M. Warner, Gradwell Sears and Herman Starr of Warner's, and Ned E. Depinet of R-K-O, were cited in Federal indictments returned last

The Federal Government charged they conspired to withhold releases from three St. Louis theaters after Warner's lost a \$4,000,000 interest in the theaters by foreclosure and their management passed to Fanchon & Marco.

the theaters by foreclosure and their management passed to Fanchon & Marco. New Suit Filed Against Company— A stockholder's suit in equity seeking to recover common stock of the company to the amount of \$6,500,000 which is said to have been transferred for no consideration and for an injunction restraining officers of the company to the amount of \$6,500,000 which is said to have been transferred for no consideration and for an injunction restraining officers of the company to the amount of \$6,500,000 which is said to have been transferred for no consideration and for an injunction restraining officers of the company to the amount of \$6,000,000 which is said to have been transforder to an observe the stock of the plaintiff and all other stockholders' suit was filed Nov. 12 in the Federal Court in Brooklyn. The complaint was filed by Howard W. Amell, former U. S. Attorney, and Milton Paulson of 26 Court St. Brooklyn, attorneys for Martin J. Clougherty, a resident of Massachusetts. The suit was brought on behalf of the plaintiff and all other stockholders of Warner Brothers who wish to join in the action. The suit names as defendants all who have been directors and officers of the corporation since Sept. 1 1928, and members of the firms of Goldman Sachs & Co. and McClure, Jones & Co. The complaint states that on Dec. 1 1928, the directors of Warner Brothers permitted the transfer to Goldman Sachs & Co., without consideration, of \$0,000 shares of the stock of Warner Brothers Pictures, and adds the shares were valued at that time at \$6,500,000. The complaint adds that McClure, Jones & Co. The complaint adds that Waddill Catchings, one of the defendants, was a member of Goldman Sachs & Co. and a director in Warner Brothers. It also states that Henry A. Rudkin, another defendant, warner Brothers. It also states that Henry A. Rudkin, another defendant, warner Brothers.

was a member of the firm of McClure, Jones & Co. and a director in Warne-Brothers. The complaint holds that the directors of Warner Brothers who approved of the transfer are liable to account for the stock. Harry M. Warner, Albert Warner and Jack L. Warner are charged in the complaint with having on Sept. 1 1928, voided a contract with Warner Brothers Pictures, for their exclusive services, which had until March 1 1930, to run. The complaint charges the brothers on the same date contracted to give their services to Renraw, Inc., wholly owned by them, and had Warner Brothers contract with Renraw, Inc., for their services for six years. Renraw, Inc., the complaint states was formed by the brothers as "a cloak and alter ego," to permit them to deal indirectly with Warner Brothers because they were disqualified from doing so directly as directors of the latter.—V. 141, p. 2911. West Virginia Water Service Co.—Accumulated Div.— The directors have declared a dividend of \$1.50 per share on account of accumulations on the \$6 cumulative preferred stock, no par value, payable Jan. 1 to holders of record Dec. 16. A similar payment was made on Oct. 1 last and compares with \$1 paid on July 1, April 1 and Jan. 1 last, this lat-ter being the first distribution to be made on this issue since April 1 1932, when the regular quarterly dividend of \$1.50 per share was paid. Accruals after the payment of the Jan. 1 dividend will amount to \$16.50 per share.—V. 141, p. 2912.

Wieboldt Stores, Inc.—To Vote on Reorganization— The stockholders will vote Nov. 21 on a plan of reorganization which contemplates taking over from Wieboldt Realty Trust properties occupied by the Stores company and other assets.
The directors have approved the project, which calls for the issuance of 60,000 of 6% cumulative convertible preferred and an increase in the com-mon stock to 340,000 shares from the present 275,000 shares. The Trust will receive 58,622½ shares of preferred and 32,443 shares of common. The value of the assets to be received from the Trust is put at \$8,863,579, subject to liabilities totaling \$3,877,558.
If the plan is approved the Stores company plans to refund on Feb. 1 1936 the \$3,573,400 1st mtge, bonds due 1939 into a 4½% 1st mtge, issue to mature in 1956.—V. 141, p. 454.
Williams Oil-O.Matic Heating Comm. Dime Present

Williams Oil-O-Matic Heating Corp.—Divs. Resumed— The directors have declared a dividend of 50 cents per share on the common stock, payable Dec. 2 to holders of record Nov. 19. This will be the first dividend paid since May 16 1927, when a distribution of 371/2 cents per share was made.—V. 140, p. 330.

To-day futures closed 7 to 11 points lower with sales of 52 contracts. Dec. ended at 11.40c.; Mar. at 11.74c., and June at 12.07c. Ocean Freights demand showed no improvement. Chertic reference in poloci 12 load Montreal to Continent at

Ocean Freights demand showed no improvement. Charters included: Grain booked, 12 loads Montreal to Continent at 10c.; 3 to Copenhagen at 12c. Trips across, North Atlantic \$1. Scrap iron-prompt, North Atlantic Bilboa about \$3.70.

Coal demand was disappointing owing to unseasonable weather. Production though held steady. The bituminous output last week was 7,600,000 tons. Late in the week there was a small increase in buying owing to a drop in tem-peratures peratures.

Copper buying was of fair volume abroad but the do-mestic demand was rather small. Export prices were 8.60 to 8.675c. c. i. f. European base ports. The domestic price was firm at 9.25c.

Tin was steadier of late at 52³/₄ to 53c. for spot Straits. Demand was light. Some spot English refined sold at 57%c. Lead was in good demand and steady at 4.50c. New York and 4.35c. East St. Louis. Most of the buying was for

November shipment.

Zinc was in moderate demand and firm at 4.85 to 4.95c. East St. Louis.

Steel operations increased with the automobile industry and railroads purchasing more freely. Quotations: Semi-finished billets, rerolling, \$27 to \$29; forging, \$35; sheet bars, \$28 to \$30; slabs, \$27 to \$29; wire rods, \$38; skelp, 1.70 to 1.80c.; sheets, hot rolled annealed, 2.40c.; galvanized, 3.10c.; strips, hot rolled, 1.85c.; cold rolled, 2.60c.; hoops and bands, 1.85c.; tin plate, \$5.25; heavy steel, bars, 1.85c.; plates and shapes, 1.80c.

Pig Iron sales were rather small during the week. Special analysis iron was in the best demand. Quotations: Foundry No. 2 plain, Eastern Pennsylvania, Buffalo, Chicago and Valley, \$19.50; Cleveland, \$20.50; Birmingham, \$14.50; basic Valley, \$19; Eastern Pennsylvania, \$20; malleable, Eastern Pennsylvania and Buffalo, \$20.

Eastern Pennsylvania and Buffalo, \$20.
Wool continued in good demand at firm prices. Boston wired a Government report on Nov. 14 saying: "Sales of wool in Boston were slower than at any time last week. Prices, however, continued mostly firm. Strong asking prices above what mills were willing to pay were given as one reason for slower trade. Medium Ohio and similar fleeces moved at 33c. in the grease for fair amounts, and at 38½c. for small quantities of strictly combing 56s, three-eighth blood and 48s, 50s, one-quarter blood. Strictly combing 56s, three-eighth blood, territory wools moved at 71 to 75c., scoured basis."

71 to 75c., scoured basis." Silk futures on the 12th inst. closed ½ to 8c. lower except on Dec. which was 1c. higher. Sales were 1,370 bales. Crack double extra spot fell to \$2.13. Nov. ended at \$2.09, Dec. at \$2.04, Jan. at \$2.01, Feb. at \$1.99½, March at \$2.00 and April, May and June at \$1.99. Japanese cables were weaker. On the 13th inst. futures closed 2½ to 5c. lower on sales of 1,820 bales. Crack double extra spot fell to \$2.11. The Yokohama Bourse was lower. Nov. ended at \$2.05, Dec. at \$1.99, Jan. at \$1.97½, and Feb., March, April, May and June at \$1.96½. On the 14th inst. futures ended 4 to 5c. higher on sales of 1,100 bales. Japanese cables were stronger. Dec. ended at \$2.03, Jan. at \$2.02½, Feb. at \$2.01½ and March, April, May and June at \$2.02½, Feb. at \$2.01½ and March, April, May and June at \$2.02½, Sales were 86 contracts. Jan. and Feb. ended at \$2.03, and March, April, May and June at \$2.02.

COTTON

Friday Night, Nov. 15 1935. The Movement of the Crop, as indicated by our tele-grams from the South to-night, is given below. For the week ending this evening the total receipts have reached 330,485 bales, against 363,686 bales last week and 372,149 bales the previous week, making the total receipts since Aug. 1 1935 3,963,821 bales, against 2,524,390 bales for the same period of 1934, showing an increase since Aug. 1 1935 of 1,439,431 bales.

In addition to above exports, our telegrams to-night also give us the following amounts of cotton on shipboard, not cleared, at the ports named:

Nov. 15 at-							
1.00. 15 at-	Great Britain	France	Ger- many	Other Foreign	Coast- wise	Total	Leaving Stock
Galveston Houston New Orleans Savannah Charleston Mobile Norfolk Other ports	4,800 24,278 8,964 5,000 11,112	5,200 13,199 26,779	6,600 14,572 12,645	33,792	2,000 467 250	86,308 55,373 5,000	$\begin{array}{c} 636,253 \\ 701,718 \\ 220,802 \\ 70.861 \end{array}$
Total 1935 Total 1934 Total 1933	54,154 9,138 9,166	$45,178 \\ 7,219 \\ 15,994$	7,176	$100,228 \\ 46,124 \\ 114,155$	800	70,457	2,705,459 3,012,280 3,796,909

Total 1933 [11] 9,166 15,994 28,781/114,155 7.369/175,46513,796,909 Speculation in cotton for future delivery improved slightly and prices advanced. The market continued to feel the effects of the bullish Government crop report. Southern offerings fell off, with farmers showing a disposition to hold back as the price neared the 12c. level. On the 9th inst. prices still felt the effects of the Bureau report showing a reduction of 323,000 bales from the October estimate. Prices ended 7 to 10 points higher. Stronger Liverpool and Egyptian markets also aided the rise. The trade and foreign interests were buying. Liquidation and hedge selling was readily absorbed. The weather recently has been unfavorable especially in part of the western belt and is expected to have a tendency to decrease the final out-turn and lower the grade. On the 12th inst. prices closed 22 to 26 points higher and reached new highs for the season. Demand was more active particularly from the trade, turn and lower the grade. On the 12th inst. prices closed 22 to 26 points higher and reached new highs for the season. Demand was more active particularly from the trade, foreign interests and Wall Street. Stronger foreign markets influenced some of the buying. The outside public has been buying more freely of late. The market held steady despite heavy selling and scattered liquidation on the advance. Scattered hedge selling was easily absorbed. Liverpool cables were 8 to 13 points better than due. Domestic con-sumption of all cotton was estimated by the New York Cotton Exchange at 555,000 bales against 450,000 bales in September and 523,000 in October last year. The daily rate in October was 24,100 bales against 21,700 in September and 23,000 in October last year. On the 13th inst. prices turned downward under liquidation owing to weaker Liver-pool cables and the close was 1 to 12 points lower. Distant months were relatively easier than nearbys. An unfavorably weekly weather report and the strength in stocks stimulated some demand and a partial recovery in the late dealings. Hedge selling recently has fallen off owing to unfavorable weather over the belt and a disposition among farmers to hold back as the price nears the 12 cent level. The weekly weather report showed unfavorable conditions in northern Texas, Arkansas and Oklahoma. Exports are steadily rising. To-day they are 210,761 bales above those of last year, at this time. The trade was a good buyer of near months

throughout the session. Liverpool was a moderate seller of October.

October. On the 14th inst. prices ended at about the highs of the day, or at net gains of 21 to 23 points, on good buying stimu-lated by firmer Liverpool cables, the strength in stocks, fore-casts of freezing weather in the Western belt, and optimistic Washington news. Washington advices stated that the 12c. Government cotton loan might be extended when it expires on Feb. 1. The trade, Wall Street houses, the Far East and local operators were good buyers. There was some early liquidation and moderate hedge selling, but these offer-ings were well absorbed. Liverpool, the Continent, Bombay and Japanese interests were also on the buying side. South-ern offerings have fallen off considerably, owing to the holding back of farmers as the price nears the 12c. level. To-day prices, after early weakness owing to some hedging pressure and better weather than anticipated, rallied on buying by the trade, Far Eastern interests, Liverpool, the Continent and Wall Street. The South and New Orleans sold. sold.

Continental imports for past week have been 154,000 bales. The above figures for 1935 show an increase over last week of 177,912 bales, a loss of 580,278 bales from 1934, a decrease of 2,251,843 bales from 1933, and a decrease of 2,816,774 bales from 1932.

At the Interior Towns the movement—that is, the receipts for the week and since Aug. 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of the previous year—is set out in detail below:

All other States	3,385	10,300	0,308			
United States	*7,749,635	*7,917,671	*10,355,031			

* Includes 94,346 bales of the crop of 1935 ginned prior to Aug. 1 which was counted in the supply for the season of 1934-35, compared with 99,787 and 171,254 bales of the crops of 1934 and 1933. The statistics in this report include 143,881 round bales for 1935; 142,420 for 1934, and 430,163 for 1933. Included in the above are 7,325 bales of American-Egyptian for 1935, 7,759 for 1934, and 2,468 for 1933. The statistics for 1935 in this report are subject to revision when checked against the individual returns of the ginners being transmitted by mail. The revised total of cotton ginned this season prior to Oct. 18 is 6,591,664 bales.

CONSUMPTION, STOCKS, IMPORTS, AND EXPORTS— UNITED STATES Cotton consumed during the month of September 1935 amounted to 449,126 bales. Cotton on hand in consuming establishments on Sept. 30 was 716.807 bales, and in public storages and at compresses 7,148,651 bales. The number of active consuming cotton spindles for the month was 22,683,818. The total imports for the month of September 1935 were 6,374 bales and the exports of domestic cotton, excluding linters, were 486,764 bales.

WORLD STATISTICS

WORLD STATISTICS The world's production of commercial cotton, exclusive of linters, grown in 1934, as compiled from various sources, was 22,624,000 bales, counting American in running bales and foreign in bales of 478 pounds lint, while the consumption of cotton (exclusive of linters in the United States) for the year ended July 31 1934 was 25,324,000 bales. The total number of spinning cotton spindles, both active and idle, is about 157,000,000.

Agricultural Department's Report on Cotton Acreage Condition and Production—The Agricultural Depart-ment at Washington on Friday (Nov. 8) issued its report on cotton acreage, condition, yield per acre and production as of Nov. 1. The production of cotton is placed at 11,141,-000 bales, which is 323,000 bales less than the Department's estimate of a month ago, but is 1,502,000 bales more than last year's crop. None of the figures take any account of linters. Comments on the report were given in the editorial pages last week. Below is the report in full: The United States cotton crop is forecast at 11,141,000 bales by the

pages last week. Below is the report in full: The United States cotton crop is forecast at 11,141,000 bales by the United States Department of Agriculture, based upon conditions as of Nov. 1. This is a reduction of 323,000 bales, or about 3%, from the October forecast. The indicated crop is 1,505,000 bales more than the 1934 crop but it is 3,525,000 bales less than average production in the period 1928-1932. The average yield forecast as of Nov. 1 is 186.1 pounds per acre, com-pared with 170.9 pounds in 1934, and a 10-year average yield (1924-1933) of 177.1 pounds. Most of the decline from last month has taken place in Arkansas, Okla-homa, Tennessee and Missouri, where early frosts occurred and other unfavorable weather conditions checked the development of the late crop. Moderate declines dring the month are shown for North Carolina, Mississippi, Louisiana, and Texas. The forecasts for other States show practically no change from the State Nov. 1 1935

COTTON REPORT AS OF NOV. 1 1935

The Crop Reporting Board of the United States Department of Agriculture makes the following report from data furnished by crop correspondents, field statis-ticians, co-operating State Boards (or Departments) of Agriculture and Agri-cultural Colleges. The final outturn of cotton will depend upon whether the various influences affecting the crop during the remainder of the season are more or less favorable than usual.

World Supply of Cotton Slightly Above Year Ago, but 6% Below Peak of 1933-34, According to Bureau of Agricultural Economics—The world cotton supply is slightly larger than last year, 6% less than the peak in 1933-34 and 12% more than the average for the 10 years ended 1932-33, according to the annual outlook report of the Bureau of Agricultural Economics, United States De-partment of Agriculture. The world supply of American cotton is expected to be slightly larger than last season and about the same as the 10-year average, but 5,500,000 bales less than in 1931-32. The supply of foreign growths is about the same as last season but about 27% more than the 10-year average. In noting the foregoing, an announce-ment issued under date of Nov. 11 by the Department of Agriculture also said:

ment issued under date of Nov. 11 by the Department of Agriculture also said:
 Owing to smaller stocks at the beginning of the season, the supply of Indian and Egyptian cottons in 1935-36 will be somewhat smaller than last season despite the prospective larger crops, whereas the supply of Chinese cotton is likely to be smaller because of a marked reduction in the current crop.
 Russia has a larger crop this year, and the supply of Brazilian cotton is expected to be larger than the record supply of last season.
 World mill consumption of all cotton during the year ended July 31 1935 was the largest since 1928-29. Total consumption of American cotton, however, declined 2,200,000 bales from the preceding year, and was the smallest in 11 years, with the exception of 1930-31. Mill consumption of foreign cotton increased about 2,300,000 bales to a record all-time high figure.
 An important factor contributing to the decline in consumption of American cotton, and the 12-cent Government loan, says the report.
 Another important factor was the difficulty experienced by Germany and a few other countries in obtaining foreign extange. Still another factor was the further shift in cotton consumption from Europe to the Orient and the accompanying tendency for Oriental cotton to replace American.
 The report asys that current conditions indicate that world consumption of American cotton this season will probably increase, although consumption of American cotton by the season will probably increase, although consumption of bases activity, along with prospects for further wing the elarger there the somewhat lower prices of American cotton as rearable factors include the somewhat lower prices of American cotton to replace the prote lays of their cotton last season was the relatively increase, although consumption of a merican cotton this season will probably increase. Although consumption indicate that world consumption of the actors include the

The Bureau of Agricultural Economics' outlook report is also referred to elsewhere in our issue of to-day.

Census Report on Cottonseed Oil Production— On Nov. 13 the Bureau of the Census issued the following statement showing cotton seed received, crushed and on hand, and cottonseed products manufactured, shipped out, on hand and exported for the three-months' period ended Oct. 31 1935 and 1934:

COTTONSEED RECEIVED, CRUSHED, AND ON HAND (TONS)

New York Cotton Exchange Fixes Limitation of Interest—The Board of Managers of the New York Cotton Exchange voted Nov. 12 to set the maximum limit of interest by any member, firm, or corporation, and his or its affiliations, at 1,000,000 bales for delivery in November 1935, and in all months up to and including October 1936. This is the same limitation as fixed a month ago for delivery in October 1935, and in all months up to and including September 1936. September 1936.

September 1936. Census Report on Cotton Consumed and on Hand, &c., in October—Under date of Nov. 14 1935 the Census Bureau issued its report showing cotton consumed in the United States, cotton on hand, active cotton spindles and imports and exports of cotton for the month of October 1935 and 1934. Cotton consumed amounted to 552,187 bales of lint and 67,106 bales of linters, compared with 449,126 bales of lint and 61,127 bales of linters in September 1935, and 523,032 bales of lint and 56,612 bales of linters in October 1935. It will be seen that there is an increase in October 1935 when compared with the previous year in the total lint and linters combined of 39,649 bales, or 6.8%. The following is the statement: OCTOBER REPORT OF COTTON CONSUMED, ON HAND, IMPORTED

WORLD STATISTICS

WORLD STATISTICS The world's production of commercial cotton, exclusive of linters, grown in 1934 as compiled from various sources, was 22,624,000 bales, counting American in run-ning bales and foreign in bales of 478 pounds lint, while the consumption of cotton (exclusive of linters in the United States) for the year ended July 31 1934 was 25,-324,000 bales. The total number of spinning cotton spindles, both active and idle, is about 157,000,000.

Weather Reports by Telegraph—Reports to us by telegraph this evening denote that no more cotton will be picked in some parts of Oklahoma, but what little that will come from the fields will be snaps and bollies. The weather at the present in the cotton belt puts the finishing touches to the worst fall damage the cotton crop has suffered in sourceal seasons. in several seasons.

The above statement shows: (1) That the total receipts from the plantations since Aug. 1 1935 are 5,140,252 bales; in 1934 were 3,334,946 bales and in 1933 were 5,073,040 bales. (2) That, although the receipts at the outports the past week were 330,485 bales, the actual movement from plantations was 359,714 bales, stock at interior towns having increased 29,229 bales during the week.

World's Supply and Takings of Cotton—The following brief but comprehensive statement indicates at a glance the world's supply of cotton for the week and since Aug. 1 for the last two seasons from all sources from which statistics are obtainable; also the takings or amounts gone out of sight for the like period:

Cotton Takings, Week and Season	19	35	1934		
week and Season	Week	Season	Week	Season	
Visible supply Nov. 8 Visible supply Aug. 1 American in sight to Nov. 15. Bombay receipts to Nov. 14. Other India ship'ts to Nov. 14 Alexandria receipts to Nov. 13 Other supply to Nov. 13*b	7,290.893 $501,408$ $35,000$ $7,000$ $88,000$ $15,000$	$\substack{4,295,259\\7,123,143\\235,000\\136,000\\677,600}$	1,000	$246,000 \\ 145,000 \\ 590,200$	
Total supply Deduct— Visible supply Nov. 15	7,937,301 7,468,805	12,579.002 7,468,805	8,380,535 8,049,083	12,821,214 8,049,083

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 18,000 bales. Exports from all India ports record an increase of 6,000 bales during the week, and since Aug. 1 show a decrease of 27,000 bales.

Alexandria Receipts and Shipments—We now receive weekly a cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years:

Alexandria, Egypt, Nov. 13	1935		1	934	1933	
Receipts (cantars)— This week Since Aug. 1	44	40,000 14,619		20,000		10,000 33,209
Export (Bales)	This Week	Since Aug. 1	This Week	Since Aug. 1	This Week	Since Aug. 1
To Liverpool To Manchester, &c To Continent and India To America	6,000 21,000 1,000	$39,234 \\ 218,963$	30,000	$36,453 \\ 182,019$	9,000 18,000 2,000	148,122
metal and a			10 000			

Total exports______28,000 326,404 42,000 269,559 29,000 282,007 Note—A cantar is 99 lbs. Egyptian bales weigh about 750 lbs. This statement shows that the receipts for the week ended Nov.13 were 440,000 cantars and the foreign shipments 28,000 bales.

Manchester Market—Our report received by cable tonight from Manchester states that the market in both yarns and cloths is firm. Demand for yarn is good. We give prices to-day below and leave those for previous weeks of this and last year for comparison:

BREADSTUFFS

Friday Night, Nov. 15 1935 Flour was weaker, with milling interests showing little

buying interest. To-day a better demand was noted.

buying interest. To-day a better demand was noted. Wheat—Interest in the market was very light. On the 9th inst. prices declined ½ to 5%c. under selling influenced by the break in Liverpool, Buenos Aires and Minneapolis. Evening up by shores before the two-day holiday brought about a partial recovery from the early lows. On the 12th inst. prices ended 1 to 15%c. lower on selling prompted by the weakness of foreign and Northwestern markets. December liquidations rather heavy. There was an absence of new buying incentives. Rains fell over practically the entire winter wheat belt. On the 13th inst. prices ended ¼ to 1½c. lower owing to further declines in Liverpool and Buenos Aires. Selling by Eastern interests outweighed Southwestern buying. Export sales of Canadian wheat were reported at around a million bushels. The Canadian crop report issued

buying influenced by the bullish Canadian crop estimate and the strength of the stock market. Stronger foreign markets and rust reports also helped. Shorts were covering. Winnipeg was 1³/₄ to 2¹/₅c. higher, and Liverpool advanced 1¹/₄ to 1¹/₂d. To-day prices ended ¹/₂c. lower to 1¹/₄c. higher. Reports of a better flour demand and a sharp advance at Minneapolis brought about a late upturn. The open interest at Chicago was 129,381,000 bushels.

Corn mirrored the action of wheat in very light trading. On the 9th inst. prices ended unchanged to ¹/₄c. lower. Buying, owing to wet weather over the belt, held the market fairly steady. On the 12th inst. prices closed ¹/₈c. lower to ⁵/₈c. higher. Rains over the belt inspired buying by spreaders of December against sales of May. The Government report showed a reduction of 2,000,000 bushels for the month. On the 13th inst. prices ended unchanged to ³/₈c. lower despite the relative strength of the spot markets. Marketings are expected to increase now that the weather is clearing. On the 14th inst. prices ended ³/₈ to ³/₄c. higher, reflecting the strength in wheat. Country offerings were small. Cash corn was firmer. To-day prices ended ¹/₄ to ³/₄c. higher. The open interest at Chicago was 32,175,000 bushels. DAILY CLOSING PRICES OF CORN IN NEW YORK

Annual Agricultural Outlook Report of United States Department of Agriculture—Foresees Demand for Farm Products in 1936 Greater than in 1935

"The demand for farm products in 1936 is likely to be greater than in 1935," it is stated in the annual farm outlook report of the Bureau of Agricultural Economics, United States Department of Labor, issued Nov. 4. "Consumer buying power in the United States is likely to be increased in 1936," the Bureau's report said, also noting that "buying power of consumers in foreign countries also is likely to increase." A note of caution to farmers is sounded, how-ever, that "an increase in crop production would tend to check the advance in prices" that might otherwise be expected to result from improved consumer buying power. An announcement issued by the Department of Agriculture incident to the issuance of the report also said:

An anouncement issued by the Department of Agriculture incident to the issuance of the report also said: The remainder of the Bureau's outlook report, which was prepared in consultation with State agricultural extension economists and representa-tives of the Agricultural Adjustment Administration, discusses in detail to 1936 prospects for more than 50 farm products. As to wheat, it is stated that average yields on the prospective United States acreage to be harvested in 1936 would produce more wheat than is usually consumed, leaving a surplus for export. Larger world consumption of American cotton is in prospect, says the Bureau. Factors favorable to cotton exports include the somewhat lower prices of American cotton relative to a year ago and relative to foreign growths, and prospects for increased business activity. The livestock industries, with reduced numbers of animals and plenty of feed, are in the best condition in several years to benefit from increased consumer demand, it is indicated. Production of meat animals has passed the low point and an increase is expected, especially in hog numbers. The total market supply of meat in 1936, however, is expected to be little if any greater than this year, as some time is required for the more abundant feed supply and increased livestock numbers to result in larger market supplies of meat. The total market supply of meat in 1936. However, is expected to be little if any greater than this year, as some time is required for the more abundant feed supply and increased livestock numbers to result in larger market supplies of meat. The Bureau foresees relatively short supplies and high prices of poultry the remainder of 1935 and the first half of 1936. The expected increase is an immediate prospect. Milk consumption will increase with be potado control program, however, this reduction is expected with the potato control program, however, this reduction is expected with the potato control program, however, this reduction is expected with eegs supplies during this per

agencies. In a statement on the outlook for farm-family living, the report says cash income available to farm families after meeting production expenses probably will be higher in 1935 than in any year since 1929, although not all sections of the country are sharing equally in the increased income. Largest gains are in the North Central States, and moderate increases in other regions. The outlook for 1936 income it is stated, is for a continuance of the

The outlook for 1936 income, it is stated, is for a continuance of the present upward trend.

Agriculture Department's Official Report on Cereals, &c.—The Crop Reporting Board of the United States De-partment of Agriculture made public late Monday after-

Forme 141
Financial
noon, Nov. 11, its forecasts and estimates of the grain crops of the United States as of Nov. 1, based on reports and data furnished by crop correspondents, field statisticians and cooperating State Boards (or Departments) of Agriculture. This report shows that the production of winter wheat is now placed at 432,000,000 bushels, the same as the Department's estimate a month ago, and comparing with a harvest of 405,552,000 bushels in 1934, with 351,608,000 bushels harvested in 1933 and a 5-year (1928-1932) average production of 618,000,000 bushels. The production of spring wheat is estimated as of Nov. 1 to be 167,226,000 bushels, in 1934 and a 5-year (1928-1932) average production of 618,000,000 bushels. The production of 242,385,000 bushels. Comments concerning the report will be found in our editorial department. We give below the report: Tore frosts and freezes reduced prospects for several late crops according to the November estimates of the Crop Reporting Board. Compared with prospects a month ago, the estimate of grain sorghim production to 242,385,000 bushels. The production severa dure prospects for several late crops according to the November estimates of the Crop Reporting Board. Compared with prospects a month ago, the estimate of the crop according the report. The November estimates of the Crop Reporting Board. Compared with prospects a month ago, the estimate of the crop sheat she the estimate and the estimates of the crop according board. Production the store production settle differences and the estimate of the crop active production the store protect and the estimate of the store heat were accelted in a cross according during October was nearly offset by increases in the estern part. In comparison with average accelted on production is severed bar of the freeze in the Pacific Coast, which severely damaged the tomato, greeze pacific active the store is store reports on south estore in searce the agriture. The store of the severe heat crop was the largest harv

last year when the crop was the largest narvested up to that time. The increase in production resulted chiefly from 86% increase in the acreage threshed. Reports on the milk secured on Nov. 1 show an exceptionally rapid fall decline in production in nearly the whole area from North Dakota, Nebraska, Missouri and Kentucky eastward. In contrast to relatively heavy pro-duction secured during the summer, total milk production in the United States on Nov. 1 appears to have been about 3% below the rather low pro-duction on that date last year, production being particularly low in some of the butter fat producing areas where prices have not been encouraging to producers. On the other hand, the highest summer and fall egg prices since 1929 favored liberal feeding of the hens and the Nov. 1 production of eggs per 100 layers was the highest reported on that date during the 11 years of record. Furthermore, the number of hens and pullets of laying are is gradually recovering from the drastic reduction made last fall and where, and the present number appears to be about 2% above the number on hand a year ago. November reports confirm earlier indications regarding the general crop situation. There still appears to be an adequate supply of nearly all food crops except certain classes of wheat The potato crop is smaller than was expected and includes some potatoes that were damaged by freezing. While there is no real shortage, there will be close utilization of the lower grades than was expected. The bean crop is large, but not seriously ex-cessive. There has been an ample supply of most vegetables. A very large quantity of vegetables have been canned and there are fairly large supplies of winter vegetables in storage. There is a rather large crop of dried prunes. Most other fruit crops have been roughly average. The supply of nuts is unnsually large, peanut production being more than one-third larger than average, and pecans and wainuts together about one-half larger than average.

average,

Initially, insert pecans and walnuts together about one-half larger than average, and pecans and walnuts together about one-half larger than average.
 Feed grain supplies are sufficient to provide about the usual rations for the reduced number of livestock on the farms and leave a rather small carry-over. Hay production was above average and there is sufficient to permit feeding slightly more than the usual ration per head and still leave an average quantity in reserve next spring.
 Corn—The indicated 1935 corn crop for the United States is 2,211,268,000 bushels, a reduction of 2,000,000 from the October estimate and 13,7% under the 5-year (1928-1932) average production of 2,562,147,000 bushels. The crop is 60.6% above the 1,377,126,000 bushels of 1934. October frosts and poor maturing conditions caused reduction in yield forecasts for most of the important corn States west of the Mississipi River. Iowa, Nebraska, Kanasa, South Dakota, North Dakota, Wisconsin and Minnesota are downward, but Missouri stands the same. Michigan, Ohlo, Indiana and Illinois estimates are now for larger corn crops than indicated on Oct. 1. States in the northern corn belt generally report frost with probable result of some chaffy corn. Picking has been delayed in the main belt by wet weather. The United States average yield per acre is 23.6 bushels on 1933 and 26.8 bushels in 1932. The 10-year (1923-1932) average yield is 25.7 bushels.
 Buckwheat—The November indicated production is 7.787,000 bushels.

1933 and 26.8 bushels in 1932. The 10-year (1923-1932) average yield is 25.7 bushels.
Buckwheat—The November indicated production is 7.787.000 bushels, which is 31.000 bushels less than was forecast a month ago. This compares with a production of 9.042.000 bushels in 1934, and the 5-year average (1928-1932) of 8.277.000 bushels. The major portion of the production and acreage is in Pennsylvania and New York. Yields per acre are below last year in both States, and the average yield for the United States is also lower than in 1934.
Flaxseed—With an increase of 98.000 bushels in the prospective flax crop since the Oct. 1 forecast, the p. oduction is now estimated at 14.213.000 bushels, which is nearly three times the small crop of 1934, but 11% below the 5-year average (1928-1932). The acreage this year is more than double that of last year, the increases belog mostly in the Dakotas. Yields per acre average (22% more than last year, but are 4% under the decrease of about 200.000 bushels, and the 5-year (1923-1932).
Rice—Rice production is estimated at 38.730.000 bushels, which is a decrease of about 200.000 bushels, and the 5-year (1923-1932).
Rice—Rice production is estimated at 32.730.000 bushels, which is a decrease of about 200.000 bushels, and the 5-year (1923-1932). average is 43.017.000 bushels. A reported decrease of about a half-million bushels. Harvesting is about completed in Louisiana. Threshing was interrupted by rains in Texas and Arkansas. In the latter State some rice was threshed damp in an effort to save it. Rains caused loss in California through lodging, and recent frosts resulted in moderate damage in northern sections where the crop was late.

and recent frosts resulted in moderate damage in northern sections where the crop was late.
 Grain Sorghums—The indicated production of grain sorghums for all purposes on Nov. 1 is 107.811,000 bushels, compared with 34.542,000 bushels in 1934 and 93.764.000 bushels, the 5-year (1928-1932) average. A preliminary estimate indicates 11,091,000 acres for harvest, compared with 5.60,000 acres a year in all States where this crop is important. The average of grain sorghums was increased materially this year in all States where this crop is important. The average of grain sorghum was increased materially this year in all States where this crop is important. The average of grain sorghums was increased materially this year in all States where this crop is important. The average yield per acre is estimated at 9.7 bushels, compared with 4.6 bushels in 1933. Frosts and freezes the latter part of October and the first of November reduced prospective yields of ate planted grain sorghums. Prospects declined during October in all states except Arizona and California.
 Bromeorn—The preliminary estimate of broomcorn production in the six principal States is 53,500 tons—the largest crop since 1928. Last year, once, Nield per acre averaged slightly above last year, but about 32% of the October for New Mexico shows an increase of 200 tons.
 Tag Beets—A crop of 8.163,000 tons of sugar beets was indicated on Nov, 1 compared with 7,481,000 tons produced last year, and with 8,118,000 tons, the 5-year (1928-1932) average 4.8,180,000 tons, the 5-year (1928-1932) average 4.8,180,000 tons, the 5-year (1928-1932) average 4.8, was expected a month ago. Increases reported in Wyoming and South as was expected a month ago. Increases reported in Wyoming and South as was expected a month ago. \$71,612,285 in Rental and Benefit Payments Made to Farmers Co-operating in Six Agricultural Adjust-ment Programs During July and August

During July and August, the first two months of the

ment Programs During July and August During July and August, the first two months of the current fiscal year, farmers co-operating in six agricultural djustment programs received rental and benefit payments totaling \$71,612,285, according to the monthly report issued for publication Nov. 11 by the Comptroller of the Agricul-tural Adjustment Administration. Rental and benefit pay-ments accounted for the greater part of the total expendi-tures of \$89,111,907 reported for the period. Other disburse-ments included removal and conservation of surplus expendi-tures of \$549,569; drought relief and disease eradication, \$7,114,622, and tax refunds, \$4,612,930. As to the Comp-troller's report, an announcement by the AAA also said: Expenditures were made from total available funds of \$192,780,768, thus appropriations and trust funds, as expenditures chargeable to processing tax receipts as of Sept. 1 exceeded processing tax collections by \$57,280,444. Final and detailed reports on processing tax collections by \$57,280,444. Final and detailed reports on processing tax collections by \$57,280,444. Final and detailed reports on processing tax collections by \$57,280,444. Final and detailed reports on processing tax collections by \$57,280,444. Final and detailed reports on processing tax collections by \$57,280,444. Final and detailed reports on processing tax collections by \$57,280,444. Final and detailed reports on processing tax collections by \$57,280,444. Final and detailed reports on processing tax collections by \$57,280,444. Final and detailed reports on processing tax collections for the month of August were not available at the time the Comptroller's report was pre-pared. This figure, however, is estimated at \$12,820,854, which would reduce the deficit to \$44,459,580. It was pointed out by officials that processing tax collections in August continued to show the effects of the isource of large amounts of processing taxes through court actions. Collections for August this year. If taxes now held up by court actions

Expenditures during the two-month period chargeable against processing tax receipts totaled \$81,038,563, made up of \$71,613,674 in rental and benefit payments, \$113,575 for removal and conservation of surplus agricul-tural commodities, \$4,698,385 of administrative expenses, and \$4,612,930 for refund of taxes on exported commodities and commodities used by charitable inclusion charitab e institutions.

charitable restitutions. Expenditures chargeable against definite appropriations amounted to \$8,073,343, made up of \$435,995 for removal of surplus; \$3,046,275 for drought relief and disease eradication; \$2,176,224 in connection with trust funds for cotton tax-exempt certificates and rice; \$2,416,237 for adminis-trative expenses, and an adjustment of \$1,388 in connection with rental and benefit payments. During the two-month period, the following amounts of rental and benefit

payments were distributed: Corn-hogs, \$35,399,955; wheat, \$13,247,252; sugar, \$10,033,079; cotton, \$8,351,245; tobacco, \$2,134,066, and rice, \$2,446,690.

\$2,446,690. Surplus removal operations involved \$37,000 expended in connection with hogs and pork products; \$435,995 for dairy products, and \$76,574 in con-nection with the diversion of peanuts to oil. Drought relief, disease eradication and food conservation operations in-cluded \$2,489,846 in connection with cattle, of which \$2,479,179 represents indemnities paid producers under the program for the eradication of Bang's disease and bovine tuberculosis; \$511 in connection with the purchase of drought sheep and goats; \$504,033 for conservation of seeds, and \$51,886 expended in the program to make feed and forage available to drought areas. Trust fund operations included \$2,175,139 distributed to producers who placed excess tax-exempt certificates for cotton in the national pool for sale and \$1,085 disbursed from the fund set up by rice millers under a marketing agreement.

marketing agreement.

The Comptroller's report lists in detail the financial operations of the Adjustment Administration for the two-month period, including schedules showing payment of rental and benefits by commodity, State and county.

Sales of Farm Products in 36 States from January to September Above Same Period Year Ago, According to Bureau of Agricultural Economics

Farmers' sales of principal products totaled \$4,215,217,000 in the first nine months of this year compared with \$3,892,-052,000 in 1934, and with \$3,238,853,000 in 1933, according to the Bureau of Agricultural Economics, United States Department of Agriculture. The figures, the Bureau said, do not include Government rental and benefit payments. It Tt. added:

added: All major regions except the South Atlantic and South Central show increases this year. By States, decreased receipts are reported for Maine, Nebraska, North Carolina, South Carolina, Florida, Alabama, Arkansas, Louisiana, Texas, Wyoming, New Mexico and Arizona. In the North Atlantic States as a group, receipts were 7% more in the first nine months of this year than last. A higher level of prices for livestock and livestock products will, it is expected, maintain income from these commodities during the next few months somewhat above the same period last year. The Bureau adds that should potato prices continue to improve in this region, income from crops will be larger in the next few months than in the same period last year. In the East North Central States, receipts were 23% larger in the first nine months of this year than last, due chiefly to the higher level of income from livestock. The Bureau says that should farmers in this region maintain volume of marketings of meat animals at about the same level compared with last year for the remainder of 1935, and should there be no material decline in prices for cattle, calves and hogs, the cash receipts in the region should continue to improve over the corresponding months in 1934. The larger prospective corn output this year is another favorable factor, indicating

Ingrep prospective corn output this year is another favorable factor, indicating higher income during October, November and December. The larger crop production in the West North Central States in 1935 began to move to market in volume in September and was accompanied by a marked advance in income from farm marketings. Cash receipts in September 1935 were 16% greater than in the same month last year, and Petering from form marketing are likely to continue largers than in the receipts from farm marketings are likely to continue larger than in the same months a year earlier during most of the crop marketing season, as the production in cash crops in this area has been greatly increased and larger supplies of feed will permit a more extensive feeding program during the 1935-36 feeding season. In the South Atlantic States receipts were 6% less in the first nine months

In the South Atlantic States receipts were 0% less in the first nine months of this year than a year ago, the change ranging from a decrease of 27% in North Carolina to an increase of 21% in West Virginia. The lower price of cotton this year, says the Bureau, will be larger offset by price adjust-ment payments, but these will not be made in volume until after the word of the year.

ment payments, but these will not be made in volume unit and end of the year. In the South Central States receipts were only 1% less this year than last, with marked gains in income from livestock items having almost offset the declines in income from crops. Receipts in Alabama, Arkansas, Louisiana and Texas were from 6% to 18% less than in 1934, whereas Kentucky and Tennessee had gains, respectively, of 19% and 14%. In Western States receipts were 12% more than in 1934, only Wyoming, New Mexico and Arizona showing declines thus far in 1935. Receipts in California were 15% greater than a year ago, due largely to better income from livestock and from citrus and other fruits. Through August, farmers had received in addition Government rental and benefit payments of \$349,614,000 compared with \$250,869,000 in the first eight months of 1934, and with \$7,517,000 in the corresponding period of 1933.

of 1933. Weather Report for the Week Ended Nov. 13—The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended Nov. 13, follows: — Anormally cold weather continued in most of the far West, the north-eras are markable continued in most of the far West, the north-rates, where temperatures persisted much above normal throughout the week. In the East freezing weather occurred in the Appalachian Moun-the entral south as southwest Virginia, but in the central valleys the freezing line did not extend farther south than Clincinnati, Ohio, and, entral-eastern Missouri. However, in the West a temperature of 28 deg. was reported from as far south as Abilene, Texas, and subzero weather occurred in some Rocky Mountain sections and in central-northern dis-tricts. The lowest temperature reported from first-order stations during the week was 8 deg. below zero at Devis Lake, N. Dak., on the 11th. — That I shows that the weekly mean temperatures from the central Adeg. to as much as 12 deg. above normal. Like departures were shown in this area for the preceding two weeks in succession with abnor-maly bigh temperatures. However, in the Northwest and the Great Basin weaks in succession with abnor-may dig. to as much as 10 deg. bolew normal, while a narrow but from northern Texas northward to southwestern Iowa had substantial

minus departures. The Mississippi Valley and the southwestern Great Plains had about normal warmth. Chart II shows that rainfall was substantial to heavy in most places from central Texas and the central and upper Mississippi Valley east ward, although a limited southeastern area again had very little moisture. In the more northeastern States the amounts were light to moderate, but they were fairly substantial in the Lake region. From the O io Valley southwestward to Mississippi, Louisiana and eastern Texas most stations reported total falls for the week ranging from around one inch to more thar four inches. Between the Mississippi Valley and the Rocky Mountains there was very little precipitation, though in the extreme northern Great Plains considerable snow occurred. There were fairly heavy snows over much of the Rocky Mountain region, but the far Southwest had a prac-tically rainless week. Moisture was fairly abundant in north Pacific districts. The additional substantial rains in most sections from the Mississippi

much of the Rocky Mountain region, but the far Southwest had a practically rainless week. Moisture was fairly abundant in north Pacific districts.
The additional substantial rains in most sections from the Mississippi Valley eastward were beneficial in replenishing soil moisture, the generous falls in much of the southern area being especially helpful. However, the eastern Alabama, southern Georgia and northern Florida. There has been very little precipitation in these sections during the present fall. Aside from this, soil moisture in the Eastern States is now mostly sufficient for present needs and the continued warmth promoted the greening of pastures generally in the Southern and Central States.
In the western Mississippi and the lower Missouri valleys, while the amount of rain was small, the weather was mostly cloudy and damp and decidedly unfavorable for drying out corn and for cribbing. In the west Gulf area soil moisture is mostly ample for growth and conditions are generally favorable, except that field work is being retarded by wet soil lin many places.
In the southwestern Plains the continued absence of precipitation is unfavorable, with the soil dry and dusty, especially in southwestern Kansas and some adjoining sections. Also, in the Plains north of Kansas moispritons of North Dakota and Montana. In the Rocky Mountain States substantial snowfall was beenficial in many places, but was not general.
The continued low temperatures in the far Northwest and California grapes and truck suffered further injury and some heating of orange groves was again in the Song and there has been more or less additional hear to cros. In California grapes and truck suffered further injury and some heating of orange groves was again necessary in the south. In northern sections, as far east as I daho, unpicked apples are a total loss and there has been more or less damage to wheat apparently has not been as great as was feared.

to undug potatoes; in Oregon damage to wheat apparently has not been as great as was feared. Small Grains—In the eastern and central portions of the winter wheat belt conditions were very favorable for growth, with additional moisture in some sections and rather mild temperatures; in the extreme western part of the belt and in much of the Northwest dry weather continued. In the Ohio Valley progress and condition are good, with some wheat reported four inches or more high and some stooling. In Missouri mild, moist weather promoted good growth, but continued wet soil in the south-west delayed seeding, with much wheat still remaining to be planted in that area. In most of Kansas, Oklahoma and Texas progress and con-dition are, fair to very good, but in western Kansas and some adjacent sections the soil is still very dry. In most of the northern Great Plains moisture continued generally in-sufficient for winter grains, while in Montana preclipitation was welcome, but was generally too late to sprout grain in dry soil unless warm weather follows. In the Pacific Northwest light precipitation was general, with some seeding resumed in Oregon, but in Washington the soil is still rather dry and the season too late and cold for germination. In the Southcast beneficial rains were very helpful in many parts, extending northward to the Middle Atlantic States, but some localities in the extreme Southeast still need moisture. Con and Cotton—There was much cloudy, damp weather in the Mis-

the Middle Atlantic States, but some localities in the extreme Southeast still need moisture. Corn and Cotton—There was much cloudy, damp weather in the Mis-sissippi and lower Missouri valleys, making a continuation of conditions unfavorable for drying corn. In the more eastern States husking made good progress, but in many central sections work was retarded, with some damage reported by continued wetness. In southern Illinois, much of Missouri and the eastern portions of the Plains States much corn is too soft to crib. In lowa reports from some localities indicate more moisture than a month ago; husking was slow, with practically none accomplished during the week in the south, and further damage was reported from heat-ing in cribs, though field molding was checked by lower temperatures. In lowa corn suitable for seed is scarce. Continued rains in northern Texas, Arkansas and Oklahoma were un-favorable for picking cotton, and more or less lint damage is reported. In Texas picking is mostly completed, except in the north, where progress was slow. In Oklahoma there was some snapping during the week, but favorable for picking; late boils are opening very slowly, and but little cotton was gathered during the past week; unopened boils are rotting badly in some sections.

The Weather Bureau furnished the following resume of

conditions in the different States: *Virginia*—Richmond: Temperatures above normal; precipitation light to moderate. Favorable for crop growth and general farm work. Seeding winter grains progressing rapidly; some up. Digging potatoes and sweet potatoes and marketing tobacco about finished. Husking and storing corn continue. Meadows and pastures poor to good. Southeastern truck looking mod

winter grains progressing rapidly; some up. Digging potatoes and sweet potatoes and marketing tobacco about finished. Husking and storing corn continue. Meadows and pastures poor to good. Southeastern truck looking good. Noth Carolina—Raleigh: Mild and mostly cloudy. Rain beneficial to truck and winter grains and softened soil to finish seeding, but hindered gathering corn and cotton and threshing peanuts. South Carolina—Columbia: Averaged warm, with much cloudiness; mostly heavy rains first part of week very beneficial. Much grain sown, previously delayed account hard, dry soil. Fall truck responding to additional moisture. Cotton picking practically completed and ginning decreasing. Georgia—Atlanta: Generally favorable for fall seeding and much improvement of pastures, clover and alfala, except some central and southern counties where still too dry. Wheat, oats and cover crops growing nicely in most northern and many western counties. Sweet potato digging and peanut and pecan harvests nearly completed. Thorida—Jacksonville: Storm at end of last week caused great damage to coros in extreme southeast; elsewhere dry weather retarding truck, but cucumbers, peppers, eggplant, tomatoes, celery and squash doing fairly well. Citrus ripening. Mostly warm; moderate to heavy precipitation in north and locally in middle. Missispipi—Vicksburg: Mostly warm; moderate to heavy precipitation of havest and extreme north Thursday, delayed closing of harvesting operations there, with moderate falls in extreme north and excessive, but mostly beneficial, precipitation in numerous localities elsewhere at close of week alding pastures and favoring late plowing. Unusually good seasonal advance of all harvesting operations. Here, weather extended by showers and wet soil in many localities, especially in east. Moisture beneficial to ranges, pastures and early seeded wheat which is scoming up evenly to code seasonal diverse of all harvesting operations. Here, weather extended by showers and west oli in many localities, especially in eas

Arkansas—Little Rock: Weather very unfavorable for cotton for past six weeks; early cotton picked in most sections; late bolls opening very slowly due to rainy weather; very little picked during past week; bolls rotting badly in some sections and lint damaged. Very favorable for growth of wheat, oats, meadows, pastures, potatoes, sweet potatoes and fall and winter truck. Tennessee—Nashville: Gathering corn, picking cotton and sowing winte gtains made some progress early part, but interrupted by frequent showers

latter part. Early sown grains getting good start. Meadows and pastures continue to improve. Favorable for handling tobacco. Top soil wet, but more rain needed for wells and springs. *Kentucky*—Louisville: Moderate temperatures and showers favorable for growth. Rapid improvement of fall grains and condition fair to good. Rye and grass pastures much better and furnishing some grazing. More favorable for tobacco stripping. Muddy fields and rain delaying corn gathering. Water supplies replenished.

THE DRY GOODS TRADE

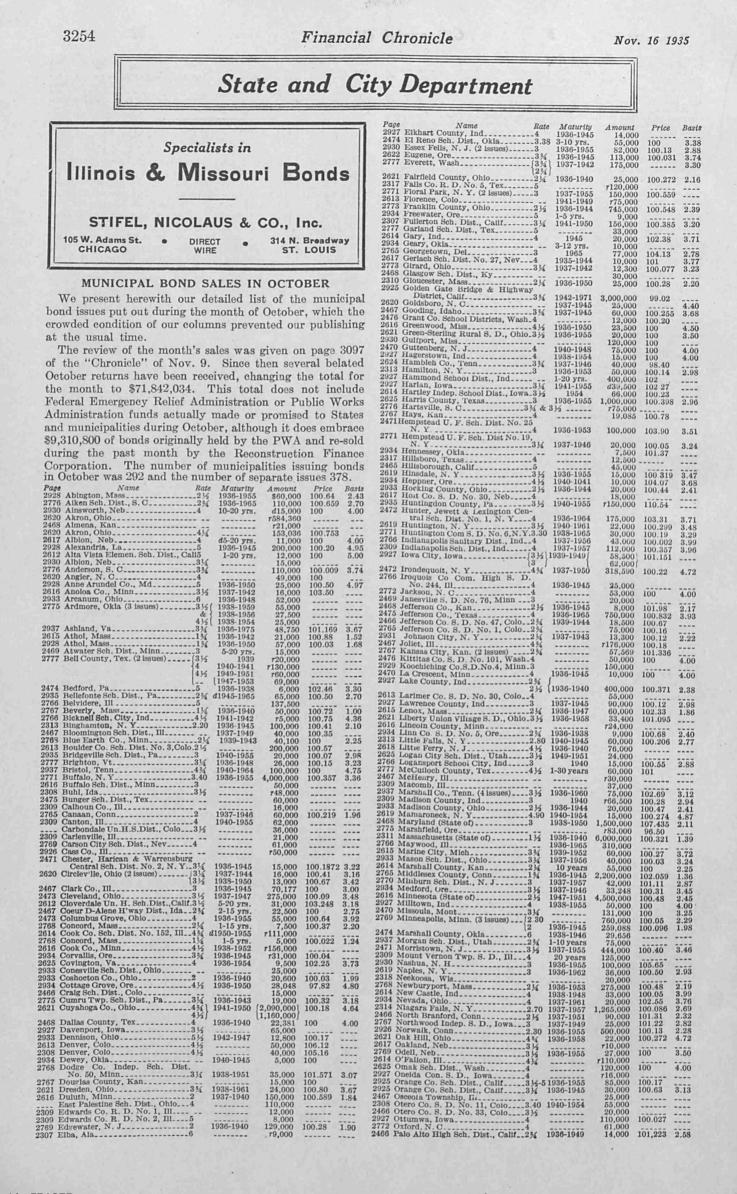

THE DRY GOODS TRADE New York, Friday Night, Nov. 15 1935. While retail trade in the local area during the early part of the week continued to suffer through the abnormally mild weather, the drop in temperature later in the period, caused a quick revival in buying of heavy apparel on the part of the consuming public, with indications that total sales for the week will compare favorably with the corresponding period of last year. Whether it will be possible for retail merchants, even with a stretch of cold weather, to fully overcome the setback experienced during the last few weeks, is an open question, although planned special promotions, with sharper markdowns, should serve to at least recover the loss in volume. In the Middle West and Northwest where the weather was more favorable and where, moreover, agri-cultural and industrial conditions are showing considerable improvement, store sales continued to make a satisfactory cultural and industrial conditions are showing considerable improvement, store sales continued to make a satisfactory showing, with gains over last year running up to 20%. During the month of October county-wide department store sales, according to the Federal Reserve Board, increased 6% over October 1934. The New York district recorded a loss of 1%, while Chicago, Minneapolis and San Francisco reported increases of 12%. Trading in the wholesale dry goods markets continued spotty although prices generally held steady, and quick deliveries in some lines remained hard to obtain. Initial orders on Spring goods having been placed by most whole-salers, the market is now awaiting a resumption of buying by the retail trade before any renewed activity in trading can

salers, the market is now awaiting a resumption of buying by the retail trade before any renewed activity in trading can develop. Moreover, the approaching inventory date for the majority of wholesale houses also tended to slow up activi-ties. Fill-in orders by retail merchants in parts of the Middlewest continued satisfactory; in other sections slacken-ing sales have resulted in holding inventories at ample figures, for the time being. Business in silk goods was a little more active, with the labor troubles in the Paterson area causing a slight increase in the demand, notably for crepes. Prices of greige goods stiffened somewhat reflecting area causing a slight increase in the demand, notably for crepes. Prices of greige goods stiffened somewhat reflecting the renewed strength in the raw silk market. Trading in rayon yarns continued active, with some of the major pro-ducers reported oversold on their December output and with substantial orders already being placed for January delivery. A further reduction of yarn stocks in producers' hands below the subnormal five-weeks supply reported at the end of October, is anticipated for the end of the current month.

October, is anticipated for the end of the current month. **Domestic Cotton Goods**—Trading in print cloths expanded moderately. The sharp advance in raw cotton prices as it developed following the release of the November crop report, served to improve sentiment and prices generally ruled firmer. Although the continued slow movement of finished goods prevented buyers from abandoning their cautious attitude, it is believed that substantial quantities of goods against seasonal requirements are still needed. While total sales showed their first increase in weeks, their volume failed to come up to current output. Considerable activity developed in sheetings, and substantial orders for January and February shipment were reported. Tobacco cloths also ruled stronger, ard some producers of osnaburgs were said to have booked their entire output until the end of January. A better tone also prevailed in the fine goods were said to have booked their entire output until the end of January. A better tone also prevailed in the fine goods market, with inquiries on various types of combed staples showing a gratifying increase and with prices ruling a shade firmer. Fancy shirtings were in moderate demand, and fair-sized inquiries appeared for curtain materials. Closing prices in print cloths were as follows: 39-inch 80's, 85'sc., 39-inch 72-76's, 83'sc., 39-inch 68-72's, 75's to 71'2c., 381'2-inch 64-60's, 63'sc., 381'2-inch 60-48's, 55'2c. Woolen Goods—Trading in men's wear fabrics continued very dull, again reflecting the slow movement of goods in

Woolen Goods—Trading in men's wear fabrics continued very dull, again reflecting the slow movement of goods in retail channels, due to the unseasonally mild weather. Most mills, however, have enough business on hand to carry them well beyond the turn of the year, and with the advent of lower temperatures, a renewed inrush of delayed fill-in orders is confidently expected by both clothing manu-facturers and fabric mills. Business in women's wear goods while currently also affect d by the slack consumer demand for heavy apparel items, nevertheless continues to make a good showing as compared with last year. Little interest existed for Fall goods, but there was an active call for faney woolens for Spring coats and suits.

woolens for Spring coats and suits. Foreign Dry Goods—Trading in linens continued its moderate seasonal expansion. Chief interest centered in holiday gift items, but current requirements of the winter resort and cruise trade also resulted in a fair-sized demand for dress goods and suitings. Burlap prices ruled steady reflecting the better tone reported from Calcutta where the strength of the jute market and the sharp decline in stocks proved a steadying factor. The favorable U. S. consump-tion figures for October also served to support sentiment. Domestically lightweights were quoted at 4.60c., heavies at 5.95c. 5.95c.

Legal opinion, Lines. Spooner, & Quarles, Milwaukee, Wis. Place of delivery, Federal Reserve Bank of Chicago, Chicago, Ill.

News Items

Alabama—Booklet on Bonds Issued—Ward, Sterne & Co. of Birmingham, has prepared a booklet, describing the vari-ous issues of State bonds and the provisions for their pay-ment. It is reported in this survey that the State has no floating debt; that a balanced budget has been the rule for the past three years, that future deficits are prohibited, and that constitutional safeguards prevail for the protection of bondholders. It is pointed out that the tax revenue for the fiscal year ended Sept. 30 was approximately \$2,000,000 more than the State realized during the prior fiscal year.

Colorado—State Secretary Resigns on Eve of Trial—James H. Carr, Secretary of State, impeached by the House of Representatives on 12 charges of malfeasance in office, resigned on Nov. 12, according to an Associated Press dis-patch from Denver. He is said to have delivered his resig-nation to Governor Johnson, his accuser, on the eve of his trial before the Senate. It was announced by Governor Johnson that he had appointed George Saunders of Fort Collins, Sheriff of Larimer County, to succeed Carr as Secretary of State.

Secretary of State. Kansas—Governor Reports on State's Conduct of Financial Affairs—We quote in part as follows from an article in the Cleveland "Plain Dealer" of Nov. 7, commenting on a speech made by Governor Landon of Kansas on the previous even-ing before the Ohio Chamber of Commerce at its annual meeting held in Cleveland, in which the Governor took Works Progress Administrator, that the State was not ex-tending relief to its poor and unemployed: Mhile discussing the manner in which the financial affairs of Kansas have been put in order, Gov. Landon also took occasion to deny the recent of works Progress Administrator, that the State was not ex-tending relief to its poor and unemployed: The discussing the manner in which the financial affairs of Kansas have been put in order, Gov. Landon also took occasion to deny the recent of Kansas "has never contributed a thin dime toward unemployment relief." The Governor asserted Kansas ranked 15th among the States in the per-entage of non-Federal funds used for relief in the last two years. The Constitution. The Landon, Harold G. Hoffman of New Jersey and Martin L. Davey of othe Omerson effect the address of welcome. Mr. Hoffman spoke on the Constitution. The andors beech was marked by the rational and dispassionate manner in which he discussed governmental problems and the complete structs maintained, he sald: The surget way either an individual or a State learns is by experience. The alardini that our modern industrial state is complicated, and far from the simple structure of our founding fathers. But does the fact that we which the wiscom of our forefathers charted for us, not out of the cives, but out of the stern and bitter realities of economics and statesmanship? The

Financial Chronicle

country is beginning to learn that government cannot change its style as easily and with as little effect as men and women. "If the wind rips the roof off a house out in our country, we don't tear down the walls also and abandon the whole structure. We put on a new, better roof, strengthening those parts which we have discovered to be weak. *Kept Politics from Relief* "Similarly, we must not abandon what remains of our American insti-tutions or jeopardize the remainder of our freedom simply because an eco-nomic storm has devastated our nation and shaken confidence. Rather strengthen our structure in every way that experience can suggest. "This is common sense, horse sense, as we say in Kansas. Let us be certain that we are making only those changes which are real improvements —changes dictated not by wishful theory but by the stern teachings of our governmental faculty." Relating how the relief problem has affected Kansas, Gov. Landon soft the national relief aministrator and in co-operating fully in every way." "We did not believe in putting relief in politics," he said. "We continued the relief administrator appointed by my distinguished Democratic prede-cessor, and he is on the job today." *Cites Dangers to Freedom*

Cites Dangers to Freedom Cites Dangers to Freedom Gov. Landon said that in 1933 and 1934 county and local governments of Kansas provided 30.6% of the relief funds, while 27 other States were contributing less than 25% of their own relief moneys and in 14 States the non-Federal contributions were less than 10%. In spite of the added bur-den of relief, the total tax load of Kansas decreased, he said. Recalling that Kansas has been termed "the homestead of the free," Gov. Landon said: "How easy it is for that homestead to become the homestead of the bound and not the free—if bad government and unsound fiscal policies saddle the homesteader with a tax load he cannot carry. That is one of the major problems in your State and in my State and a major problem of the Nation. The errors of other administrative policies may not of themselves be fatal, but the errors of an unwise financial policy have always been fatal to every government in the history of civilization."

New York City—Board of Aldermen Formally Accept Budget Totaling \$545,541,842—The Board of Aldermen on Nov. 12 formally accepted the budget for 1936 as \$545,541,-842 and referred it to their Committee on Finance. A public hearing will be held on the budget Nov. 20. The Board of Aldermen has 20 days to act on it, during which time they may decrease but not increase any item. Water Rate Veto Unchanged—The Board of Aldermen failed to override Mayor La Guardia's veto of the proposed \$5,900,000 cut in water rates. The Board adjourned for two weeks, and as the time limit in which the veto may be acted upon expired automatically on Nov. 14, the veto cannot

upon expired automatically on Nov. 14, the veto cannot again come up for a vote.

Oregon—Legislature Adjourns—The State Legislature ad-journed sine die early on Nov. 10, after a special session in which it enacted measures providing for a \$2,500,000 State Capitol and unemployment insurance, according to an Associated Press dispatch from Salem on that date. The old State Capitol burned down several months ago.

Bond Proposals and Negotiations

ALABAMA

ARIZONA

FLOWING WELLS IRRIGATION DISTRICT (P. O. Tucson), Ariz.—DETAILS ON RFC LOAN—In connection with the report given in these columns recently, to the effect that the Reconstruction Finance Corporation had authorized a loan of \$39,500 for refinancing and \$5,000 for rehabilitation—V. 141, p. 2610—It is stated by the Agricultural Engi-neer that this report is correct. He reports that it is hoped the Board of Supervisors will accept a compromise on the great amount of past-due taxes. He goes on to say that only about \$90,000 out of \$151.000 bonds have been deposited and the remainder will have to be contacted.

ARKANSAS

ARKANSAS, State of -NEW BOND HEARING SCHEDULED The Federal District Court concluded a hearing recently on the suit of Peltason, Tenenbaum & Harris, Inc., of St. Louis, for a permanent in-junction to restrain the State Refunding Board from the purchase of series A highway refunding bonds on tenders above 74.96. The suit was filed after the Board by resolution declined to purchase series B bonds at prices above 35 and thereafter designated the entire road district redemption account for purchase of series A bonds. A temporary injunction is impounding \$119,000 of the redemption account until a court decision is returned.

Counsel were granted until Nov. 20 to file briefs in the matter. It is stated that Appeals Court Judge John W. Woodruff sat with District Judges J. E. Martineau and Heartsill Ragon at the hearing.

County Treasurer, is required. LOS ANGELES, Calif.—*PRIVATE SALE OF BONDS CONTEM-PLATED*—The following report is taken from a Los Angeles dispatch to the "Wall Street Journal" of Nov. 12: "It is probable that the Los Angeles Department of Water and Power will not formally advertise for bids on the \$22,799,000 of revenue bonds authorized by voters two weeks ago, proceeds of which will be used to refund notes held by the Reconstruction Finance Corporation. The Department plans to receive proposals in the nature of bids from underwriting groups indicating interest in the financing operation. "Commenting on the plans of the Department, E. F. Scattergood, Chile Light, said: "We are advised generally that the Department will be able to secure better proposals in this manner than through formal advertising for bids. There are practical and logical reasons in favor of this procedure respecting revenue bonds, evidently the controlling reasons why large private institutions proceed in this manner on to firm and yer of there are formally, will be received. Judgment as to whether or not it may prove expedient ultimately to advertise formally has not been considered by the Board." " LOS ANGELES COUNTY SCHOOL DISTRICTS (P. O. Los Angeles),

ultimately to advertise formally has not been considered by the Board.

LEON COUNTY SPECIAL TAX SCHOOL DISTRICT NO. 1 (P. O. Tallahassee), Fla.—BOND ELECTION—At a special election called for Dec. 5 a proposal to issue \$250,000 school bonds will be voted upon

MIAMI BEACH, Fla.—BOND SALE—The \$1,759,000 coupon refunding onds offered on Nov. 13—V. 141, p. 3100—were awarded privately to a indicate composed of John Nuveen & Co., of Chicago; the Natco Corp. of

Miami; the Wells-Dickey Co. of Minneapolis; the First National Bank of Miami Beach, and Childress & Co. of Jacksonville, Dated Jan. 1 1936. Due on Jan. 1 as follows: \$110,000, 1947; \$120,000, 1948; \$130,000, 1949; \$135,000, 1950; \$215,000, 1951 to 1955, and \$219,000 in 1956. ■ It is stated by C. W. Tomlinson, City Clerk, that the above bonds we sold at private sale inasmuch as no bids were received at the public offeri on that date. He goes on to state that the bonds were purchased as 4½s, le a discount of \$21,390, equal to 98.80, a basis of about 4.60%.

a discount of \$21,390, equal to 98.80, a basis of about 4.60%. SANFORD, Fla.—ADDITIONAL INTEREST PAYMENT ON BONDS —The bondholders' protective committee for the above city announced a fifth distribution of interest to depositing bondholders, amounting to 11% of the face amount of deposited bonds. The committee reports that de-posits of matured bonds will receive interest on the same basis as if their past-due interest were represented by coupons. The current payment will constitute full and final payment of all interest claims of depositors against the city for the fiscal year ended Sept. 30 1935. Bonds on deposit with the committee as of Sept. 30 1935 aggregated \$5,292,000 face amount, representing about 88% of the outstanding bonds.

GEORGIA

MARYLAND

ANNE ARUNDEL COUNTY (P. O. Annapolis), Md.—BOND OFFER-ING—Bids will be received until noon Nov. 19 by the Board of County Commissioners for the purchase of an issue of \$4,500 5% coupon Cedar-hurst District bonds. Denom. \$500. Dated Dec. 1 1935, Prin. and semi-ann int. June 1 and Dec. 1, payable at the County Treasurer's office. Due \$500 yearly on Dec. 1 from 1936 to 1944 incl. Cert. check for 2% of amount of bid, payable to the Board of County Commissioners, required. Approving opinion of Niles, Barton, Morrow & Yost of Baltimore will be furnished to the purchaser.

furnished to the purchaser. **DORCHESTER COUNTY (P. O. Cambridge), Md.**—BOND OFFER-ING DETAILS—In connection with the offering on Nov. 19 of \$75,000 school bonds prc.iously noted in these columns, we learn that sealed bids will be received until 2 p. m. on that day by Francis H. Vincent, Jr., Clerk of the Board of Commissioners. Issue is dated Nov. 1 1935. Denom, \$1,000. Due July 1 as follows: \$7,000 in 1938. 1940, 1942, 1944, 1946, 1948, 1950, 1952, 1954, 1956 and \$5,000 in 1958. Bidder to name the rate of interest, expressed in a multiple of ¼ of 1%. Prin. and int. (J. & D.) payable in lawful money of the United States at the County Treasurer's office. Coupon bonds, registerable as to principal only. A certified check for \$2,500, payable to the order of the Board of County Commissioners, must accompany each proposal. Legal opinion of Emerson C. Harring-ton Jr. of Cambridge and Ritchie, Janney, Ober & Williams of Baltimore will be furnished the purchaser.

will be furnished the purchaser. **MARYLAND, State of (P. O. Baltimore)**—*EXTRA TAX FOR DEBT SERVICE UNNECESSARY*—Governor Nice was informed on Nov. 5 by the Board of Public Works that the State will not have to levy an additional 1¼ cents tax for 1936 to provide funds for the payment of Interest and the retirement of the principal of the \$5,500,000 bond issue authorized by the last Legislature. Such an addition to the State tax bill would be necessary if receipts of the tax of 1% on direct inheritances and 7½% on collateral inheritances proved to be insufficient. Within a few days, the Governor said last night, he will issue an official proclamation notifying the County Commissioners and the City of Baltimore of the Board's findings. *Purposes of Bond Issue* The money from the bond issue was authorized to provide for the deficit

Purposes of Bond Issue The money from the bond issue was authorized to provide for the deficit in the State Treasury, to provide additional working capital in the State Treasury, additional funds for the annuity bond account, for the restoration of salary reductions and for maintenance and operating expenses in the supplemental budget. Interest payments for the current fiscal year will be less than \$200,000. It was estimated that the inheritance tax will produce over \$1,000,000 a Vear.

Since the additional 1¼ cents levy is not necessary, the State tax for 1936 will remain 22 cents.

Proposals to be conditioned only on the approval as to validity of Attorney Hugh C. Morris.

as to validity of Attorney High C. Morris. OAKLAND COUNTY (P. O. Pontiae), Mich.—SUED ON DE-FAULTED DRAIN DEBT CHARGES—The bondholders' answer to the fallure of Oakland County Board of Supervisors to spread taxes on the tax rolls was a mandamus suit filed with the Michigan Supreme Court. Hearing to show cause why the mandamus should not be issued was set for Nov. 21. The plaintiffs are Kenneth M. Keefe and Ernest E. Quantrall of New York, and Pelham C. Wilmerding of New Jersey. Papers which have already been served on county officials ask that delinquent drain taxes of 1933, 1934, 1935 and 1936 be spread on the tax rolls in December. Interest on the bonds is past due four years. The amount of delinquent drain tax and interest, including 1932 which is due at this time, is \$1,234,430. At its last session the Board of Supervisors adopted the report of the ways and means committee on refunding the drain bonds without including the 1932 spread, which the bondholders' committee had demanded. The proposed refunding plan called for the spreading of the bond and interests payments over a period of 22 years at an expenditure of \$4,065,292. If the bondholders win their suit it will mean additional assessments on property of the county in the debt service and materially increase the tax rate. In a study made by the drain department of the financial condition of

The bondholders win their suit it will mean additional assessments on property of the county in the debt service and materially increase the tax rate. In a study made by the drain department of the financial condition of the 15 drains on which bonds are outstanding, it was recently revealed the assessed valuation of the property is in many instances less than the amount of drain taxes outstanding against it and would result in the property being confiscated unless some arrangement is made to relieve the individual taxpayer of the heavy assessments. The drains are in two classifications. On those laid prior to 1927 the bonds were not made a general obligation the county while those issued since then were made a general obligation the county would have to assume in the event the property owner did not pay. **OWOSSO, Mich.**—NOTE OFFERING—G. A. Van Epps, City Clerk, will receive sealed bids until 10 a. m. (Eastern Standard Time) on Nov. 18 for the purchase of \$27,000 not to exceed 6% interest general obligation

Financial Chronicle

delinquent tax notes. Dated Nov. 15 1935. Four notes of \$5,500 each; two notes of \$2,000 each, and three of \$1,000 each. Due \$15,000 July 15 1937 and \$12,000 July 15 1938. Principal and interest (J. & J. 15) payable at the City Treasurer's office. A certified check for \$500 must accompany each proposal. The city will furnish the legal opinion and pay the cost of printing the notes.

pay the cost of printing the notes. **ROYAL OAK**, Mich.—BONDHOLDERS TO CONSIDER REFUNDING PLAN.—The boncholders' protective committee announces that it has adopted a plan for the readjustment and refunding of all of the outstanding bonds (excepting an issue of water mortgage bonds dated April 1 1927) and notes of the city, or village, of Royal Oak, the provisions of which are contained in an agreement reached between the committee and the city dated Sept. 20 1935, a copy of which agreement has been deposited with the Union Guardian Trust Co. Detroit, and the Detroit Trust Co. Detroit, depositaries for the committee. Holders of certificates of deposit issued under the protective agreement dated Feb. 25 1932, as amended, are ad-vised that, in accordance with the agreement, they shall be deemed to have assented to the refinancing plan unless dissent is made within 30 days after Nov. 6 1935. Members of the committee are Henry Hart, Chairman; Hugh J. Ferry and Oscar L. Buhr. The Secretary is Richard T. Purdy, 1859 National Bank Bidg., Detroit.

to 1940, incl., and \$5,000, 1946 to 1950, incl. **MINNEAPOLIS**, **Minn.**—*TAX RATE* SET AT 96 MILLS—Rea estate taxes will be lower by a small margin next year, it developed on Nov, 5 when the State tax rate was fixed at 13.34 mills and adjustments in local levies resulted in a flat rate for Minneapolis of 96 mills. That is a three mill reduction or \$3 on \$1,000 valuation. It is stated that the rate for 1936 was obtained only by putting off some debt obligations and by ordering sharp slashes in several levies.

for 1936 was obtained only by putting off some debt obligations and by ordering sharp slashes in several levies. MINNESOTA, State of — WARNING ISSUED ON INCREASE IN PUBLIC DEBT—The following report is taken from the Minneapolis "Journal" of Nov. 5: "The head of every Minnesota family has a mortgage on his property of \$1,562 that comes ahead of all other debts and that eventually by some process must be paid, J. P. McDonnell, President of the Minnesota Tax-payers Association, said to-day in an address in which he discussed the menace of the public debt. "The Minnesota State bonded debt is now \$117,447,453; the bonded debt of the smaller governmental units in the State such as counties, school districts, townships, cities and villages, is now \$214,849,748 and Min-nesota's share of the Federal debt is \$615,348,720." he explained in pointing out this is a total debt for Minnesota citizens of approximately one billion dollars or \$1,562 for every family head. "He warned this is a first claim on the property and earning power of the people because the taxes levied to pay the debt come ahead of all other debt claims, and urged citizens to demand of their legislators, councilmen, school officials and all others who have the power to levy taxes and spend public money that they heed the debt danger signals. The taxpayers' legislative session convenes, as the best method of curtailing public spending, he said." NORTHFIELD SCHOOL DISTRICT NO. 3 (P. O. Northfield),

The bonded debt as stated above does not include the debt of any other subdivision having power to levy taxes upon any or all of the property subject to the taxing power of the city. The charter of the city is Ohapter 559 of the laws of New York of 1910, as amended and suplemented by general and local law. A detailed report of essential facts will be submitted to any interested bidder upon request. Pertinent Facts About the City Location for the device bonded debt will be over \$1,200,000,00 less

Pertinent Facts About the City Including this issue the city's bonded debt will be over \$1,200,000.00 less at Dec. 31 1935 than it was at Dec. 31 1932. At Dec. 31 1934 the city had a current book surplus of over \$1,600,000.00. As of Oct. 31 1935, \$623,910.16 of this amount has been converted into actual cash surplus. In this manner a revolving fund is made available for the purpose of equalizing and reducing tax rates for future years. A lowered tax rate for 1936 will result. During the past trying years the city has met every obligation in full by a remarkable collection of back taxes. Current tax collections are running about 3% ahead of 1934. The city is operating well within-its current budget, is in good physical condition, and no extensive capital expenditures are anticipated. NEW YORK CITY-REC WILLING TO, HELP FUNANCE OUEENS

The city is operating well within-its current budget, is in good physical condition, and no extensive capital expenditures are anticipated. **NEW YORK CITY**—*RFC WILLING TO HELP FINANCE QUEENS TUNNEL*—The New York "Herald Tribune" of Nov. 8 carried the follow-ing report on a plan to finance the building of a midtown tunnel from Manhattan to Queens through the aid of the Reconstruction Finance Cor-poration and the Public Works Administration: "Jesse Jones, Chairman of the RFC, announced yesterday after a con-ference with the Queens Midtown Tunnel Authority, that his organization would supply \$47,130,000 for a midtown vehicular tunnel from Manhattan to Queens if the Federal Public Works Administration would make a grant of \$11,250,000, which would complete the sum estimated to be necessary for the project. Its promoters want to have the tunnel ready for the World's Fair of 1939 in Queens. " 'We will be glad to co-operate and assist in working out the problem, if it can be done," said Mr. Jones. 'I it seems a desirable one. I believe the tunnel could be made self-supporting and liquidating. Under the law such a project must be paid for within 30 years, but in this case the time might be 40 years.' " 'The Authority has made an application to the PWA for a loan of \$43,224.-'' Oto and a grant of \$15,141,000 for the tunnel, but Mr. Jones said that he had had no official knowledge of this until the conference yesterday. " 'The conference was at the Mayfair House. The members of the Author-ity present were Alfred B. Jones, Chairman; Albert T. Johnston, Vice-Chairman and William H. Friedman, Secretary.'' NEW YORK, State of—LIMITATION OF TAXING POWERS AS-

NEW YORK, State of *LIMITATION OF TAXING POWERS AS*-SAILED-Limitation of taxing powers of municipalities would throw withes and villages into a "financial slough" the State Conference of Mayors warned on Nov. 14. A report of a conference advisory committee is reported to have formed the basis for the warning, which attacked efforts on the part of organized real estate interests to obtain adoption of a con-stitutional amendment limiting taxes on real estate to 2% of the value of the property.

NIAGARA FALLS, N. Y.—CERTIFICATE SALE—The \$199,000 tax certificate notes offered on Nov. 9—V. 141, p. 2932—were awarded to the Bank of the Manhattan Co. at 0.60% interest, plus a premium of \$101. Salomon Bros. & Hutzler bid 1% plus \$103. Dated Nov. 12 1935 and due Dec. 20 1936.

NORTH GREECE FIRE DISTRICT, Monroe County, N. Y.— BOND SALE—The Security Trust Co. of Rochester, offering a \$15 premium, equal to 100.10, for 4s, a basis of about 3.98%, was awarded the \$15.000 fire equipment bonds offered oa Nov. 12—V. 141, p. 2771. The Rochester Trust Co. offered a \$5 premium for 4s. Dated Oct. 1 1935. Due yearly on April 1 as follows: \$1,500, 1937 to 1942, incl., and \$2,000, 1943 to 1945. \$275.45 \$299.98 \$8,010.32 **YONKERS, N. Y.**—SHARP REDUCTION IN EXPENDITURES REPORTED—Substantial reductions in departmental expenditures as well as total expenditures of the city during the current year as compared with previous years, and a consequent improvement in the city's debt situation, were reported Nov. 6 by Mayor Joseph P. Loehr. Total expenditures for 1935 not including reserves, and unemployment relief, are estimated at \$13,305,246 and will probably show approximately a 9% decline under corresponding costs for 1931 which totaled \$14,626,552 and represented the all-time high, the Mayor states. Annual departmental expenditures, ex-clusive of public welfare, estimated at \$7,277,440 for the current year, will probably run about 18% under the 1931 comparable figure of \$8,880,868. At the same time, the Mayor reports, the city expects to reduce the total numicipal debt, less cash on hand, to \$37,294,450 by the end of 1935 which compares with \$40,626,193 in 1931 and a peak debt of \$42,865,247 in 1933
