## The Financial Situation

THE President's reply to the Supreme Court is now in the hands of Congress. It takes the form of a demand that Congress make use of the only means at its disposal to brush the Constitution from his path, which leads directly toward virtual dictatorship. The proposal is imbedded, along with a number of other suggestions which ought to be considered separately on their merits, in an avalanche of words, but if any evidence were needed to indicate what was uppermost in the mind of the President it is furnished in the closing sentence of the message, which reads as follows:
"If these measures achieve their aim, we may be relieved of the necessity of considering any fundamental changes in the powers of the courts or the Constitution of our government - changes which involve consequences so far-reaching as to cause uncertainty as to the wisdom of such course."
Specifically, what the President wants is the privilege of appointing six new Supreme Court justices, one for each of the six present justices who are well above the age of 70 years. The present justices who have attained this age would then be free to retire, resign or to continue to serve as they saw fit. Thus the President would have a Supreme Court consisting of somewhere between nine and 15 justices, six of whom doubtless would have been very carefully chosen by him.

One member of the Senate, when asked his view of the President's proposal, is said to have expressed amazed admiration that so simple a "solution" of a "difficult problem" could be found. The program as outlined is indeed simplicity itself, and it is as disingenuous and sweeping in its effect as it is simple, since it would (assuming sufficient shrewdness in the selection of justices) provide a Supreme Court wholly under the thumb of the President, which is another way of saying that the Constitution of the United States would be laid on the shelf. The mere passage of an Act endorsed by the President would ensure its constitutional validity, since for all practical purposes the Constitution

## Government as Cause and Cure

In his address to the Economic Club in New York City on Tuesday evening last, Sir George Paish, well-known British student of world economics, said:
"Long experience has caused me to come to the conclusion that the economic crises of the world which come from time to time are the result rather of political action than of economic action, and can be avoided only when the statesmen of all nations have a greater understanding of economic law and have some appreciation of the consequences of their own actions. . . . It may be said that the statesmen of the world, taken as a whole, have since the war, and especially in whole, have since the war, and especially in
recent years, acted in such a manner as to recent years, acted in such a manner as to
bring the world machine almost to a standbring
still."
It would probably be difficult to find a serious student of economic history whose mind is free of bias who would deny that there is real substance in this diagnosis. Few would feel any doubt that ignorance of economic law and lack of understanding of the consequences of their own acts have been the consequences of this own actsitical leadpeculiarly characteristic of
ers of the past half decade.

Yet the world over it is being said with greater assurance and larger emphasis, perhaps, than ever before in modern times, that government must take over many of the functions not only of private enterprise, but of economic law itself, in order to save the world from itself.
In certain countries, such as Germany and Italy, it is a special form or variety of the totalitarian State, popularly known as fascism, that is expected to perform miracles. In Russia the State, which again is omniscient, omnipresent and omnipotent, wears the label of communism. Even in the socalled democratic countries of Europe, such as England and France, the role of government has been greatly enlarged and the ubiquitous disposition to lean upon government is plainly evident.
In the United States, the President and those who surround him are preaching a simthose who surround him are preaching a sim-
ilar type of totalitarianism, but are making almost frantic endeavor to have the public think of their efforts in terms of some new and enlightened form of democracy. It is only the American variant of the world-wide epidemic.
Government in the past has caused more economic suffering than it has, or ever will, be able to cure. Complete rejection of the concept of a totalitarian State in the economic sphere at least, will mark the beginning of emergence from our present difficulties.
means what the Supreme Court says it means. To reach such sweeping objectives as this by the direct and open route of constitutional amendment it would at the least be necessary to remove the distinction between interstate and intrastate commerce, abolish the due process clause, and do away with the system of checks and balances devised by the framers of the Constitution. Such changes as these the President says "involve consequences so farreaching as to cause uncertainty as to the wisdom of such course." Precisely why they are of questionable wisdom when undertaken frankly and avowedly, but both desirable and necessary when effected by the method now proposed, is not easy to understand.
What will be the answer of Congress? Will that body continue to be content with the role of the rubber stamp? Will it, as it has so often done in recent years, pass this proposed measure without even troubling to give it the consideration it deserves? Will it take for granted that the election returns carry a mandate that such a course be adopted? Or will this most extraordinary demand upon it awaken it to a sense of public duty? It must be admitted that the quick polls taken by the press yesterday afternoon in the corridors of the Capitol are not particularly encouraging. But there must be some independence left in the members of the national legislature, and one can only hope that the voice of the people will be heard. The President's demand is well suited to shock the Nation into a realization of the nature of the course which the President is marking out for it, and of the dangerous consequences to which that course will certainly lead.

## General Motors Strike Situation

$A^{T}$A LATE hour yesterday the situation in the plants of the General Motors Corp. was still very much in an unsettled state. Reports that a general settlement was imminent were in circulation and appeared to have some credibility. But whether or not, in the interval, a settlement will
have been reached, the events of the past few weeks, and particularly those of the past week, will leave an impression and a stain upon the national record which will not be easily or quickly removed. The weakness of public officials in the face of open and defiant lawlessness, the obvious sympathy for the troublemakers, the unwillingness of law enforcement agencies to act, and the complete lack of support on the part of the general public for those who have courteously but courageously insisted upon law enforcement, cannot fail to leave a mark long after this particular controversy is settled.

It would be encouraging if more of our citizens could be aroused to the truth of the words of the retiring dean of the law school of Harvard University and world renowned legal authority, who declared on Thursday:
"We are sowing the wind, and we may reap the whirlwind. What seems to me most significant is the utter indifference of the people to the effect of allowing any group of persons to be above the law. It is not merely that an executive can influence non-execution of a judgment of a court, in entire excess of his lawful capacity, but that everyone seems to expect, as a matter of course, that law and order can be infringed by a privileged group not merely with impunity but with the active support of those who are sworn to enforce the law."

## Permanent Policies

While the attention of the public is centered very largely upon these more dramatic events in the automobile industry, developments at Washington are slowly from day to day providing further information concerning the precise nature of the policies that the Administration has formulated, or is formulating, to meet what are regarded as the more or less permanent problems of the Nation. In his annual message on the State of the Union, on Jan. 6, again in his inaugural address on Jan. 20, and on various other occasions the President has made it clear that he regards the depression, and presumably therefore the emergency, as largely over, and his task during the next four years as that of formulating and giving effect to permanent, non-emergency policies. The major objectives of these policies he has likewise on a number of recent occasions been at some pains to state.

On Jan. 6, referring to the purposes of his first Administration, he said that "the recovery we sought was not to be merely temporary. It was to be a recovery protected from the causes of previous disasters." Again, on Jan. 20, he said that four years ago "we of the Republic sensed the truth that democratic government has innate capacity to protect its people against disasters once considered inevitable, to solve problems once considered unsolvable. We would not admit that we could not find a way to master economic epidemics just as, after centuries of fatalistic suffering, we had found a way to master epidemics of disease." At other points in his inaugural the President seems to share what seems to be a rather general, if vague, uneasiness in official circles concerning the staying power of the "prosperity" that his first term in office is alleged to have created. "To hold to progress today is, however, more difficult," he conceded, adding that "dulled conscience, irresponsibility and ruthless self-interests already reappear. Such symptoms of prosperity may become portents of disaster!" He
was not occupied, however, solely with the question of preventing future depressions or with making sure that improvement in business conditions continued apace. In his inaugural, as in his earlier annual message, he returned to his favorite theme of the "under-privileged," remarking at one point that "the test of our progress is not whether we add more to the abundance of those who have much," but "whether we provide enough for those who have too little."

## New Catch-words

Where the catch-words of his first term were first reform, salvage (of bankrupt enterprises) and recovery, and later "social security," those of his second term seem to be the safeguarding of recovery and sharing the wealth or income which is the fruit of recovery. Indeed, much that has been said of late rather plainly implies the belief that the two are but opposite sides of the same shield; that a redistribution of income is one of the essentials, if not the most important ingredient, of any program that can make permanent and increasing prosperity possible. All this, of course, has for some time been fairly clear, but the weeks that have elapsed since these objectives crystallized in the public utterances of the President and those immediately around him have served to reveal, in part at least, the nature of the means by which these ends are to be sought, and incidentally of the conception of the difficulties that lie in the way of their real. ization.

## Same Old Programs

It is remarkable how similar the needs of the Nation, now far advanced in recovery, are to those of the Nation prostrate and almost lifeless four years ago! Equally extraordinary is the practical identity of the programs defended in the name of emergency four years ago and those brought forward today as the means by which a restored Nation may keep its health. Four years ago the President must have dictatorial powers in order to save the people from a situation frequently described as more horrible than war. Today he must remain almost an absolute monarch in order that what President Harding called normalcy may be maintained. Business in a state of collapse must then be restored by increasing wages, shortening hours, curtailing production, eliminating or greatly reducing competition, inducing, almost forcing, borrowing, providing government guarantees for borrowers who otherwise could command no credit, and subsidizing all those who seem to have any real political strength. Business must today be kept vigorous by further doses of these same drugs.

What other interpretation can be placed upon the definite proposals as they day by day assume concrete form and substance? Different names are of course often used, programs are given a different presentation and another setting, and legislation is defended on somewhat different grounds, but the substance is about the same. Witness the prolongation of the currency, credit and similar powers granted to the President in the name of emergency in the early years of his first term, and the further lease of life for the Reconstruction Finance Corporation as an active lending agency. It is still not clear just what the President will demand to replace the National Industrial Recovery Act, but it is plain
as a pikestaff that he is determined to have the equivalent of this defunct law if he can, and if he succeeds in "packing" the Supreme Court one of the most formidable of the obstacles heretofore in his path will have been removed. The advice reluctantly given to farmers some time ago to produce abundantly this year is obviously no surrender, but rather a confirmation, of the persistent belief that the National Government must continue to control production and in the years to come restrict production.

## Government Spending

Government expenditures on a colossal scale are evidently viewed as essential to permanent and pervading prosperity, notwithstanding the soothing words about balancing the budget to be found in the annual budget message of the President. It is increasingly obvious that any such balance, if it is to come during the next few years, will be a result not of smaller expenditures but of larger receipts. But one would be an optimist indeed who really expected a balanced budget within the predictable future. Apparently the Administration believes in continued inflation, if it is necessary in order to meet the outlays that are considered essential, as a means of making recovery permanent. On Wednesday of this week the President transmitted to Congress a report of the National Resources Committee which is described by the New York "Times" as "a six-year program of coordinated public works with a view to carrying out an orderly development of the Nation's resources and providing needed facilities for our people." The fact that the report coincides in point of time with one of the worst floods in history has led the press to give the impression that this program is primarily a flood-control undertaking. The fact is, however, that only $24 \%$ of the expenditures proposed for a six-year period are devoted to irrigation, drainage and flood-control combined. Streets and highway construction call for $25 \%$ of the funds to be expended, while buildings, equipment, soil conservation, slum clearance, sewerage and recreational projects, and a long list of other proposals of the usual "pork barrel" type are the beneficiaries of $51 \%$ of the funds. Even a casual inspection of the projects proposed quickly reveals the boondoggling nature of much of the scheme. The President himself refers to the purpose of the business as that of providing "the best use of our resources" and of preparing "in advance against any other emergency." At the worst, the report and the President's evident endorsement of it suggest boondoggling as a permanent public policy. At best, it clearly indicates tenacious belief in government expenditures as a sort of balance wheel to insure smooth functioning of business year after year.

## Diverting Funds

In just what degree the Secretary of Agriculture is able to speak for the Administration in such matters we have no way of knowing, but it is of no little interest to observe that in an address delivered in New York City on Wednesday evening last he had this to say:
"Business men interested in the maintenance of balanced progress for industry and in the assurance of stable political and social conditions recognize the contribution the Federal government may make through a wise, coordinated policy of relieving those
social and economic maladjustments which business men as individuals cannot cope with.
"Given an adequate tax policy, the purchasing power that would otherwise go to unwise investment in plants producing goods that cannot be sold, or harmful speculation, could be diverted so as to conserve our human as well as our natural resources. The government must, in fact, utilize its spendingtaxing power to furnish positive leadership in longneglected matters of social security, farm tenancy, unemployment and conservation of national assets."

If any definite meaning is to be attached to these rather vague generalizations, we must conclude that they assert that the Federal government should continue as a permanent policy to take away in taxes funds which normally would improve and enlarge our stock of capital equipment and pay them out to those who lay claim to "relief," to farmers to persuade them not to produce, and to many others for various purposes but slightly related, if related at all, to economic productivity. This, moreover, it must do in order to maintain a balance in the economic world! Could mischievous nonsense go farther? Yet in view of all that is being said and done in official quarters from day to day, who can doubt that such ideas are in close accord with the plans of the Administration?

## Credit "Control"

The anxiety of the Administration about the durability of its "new recovery" is likewise revealed in the recent increase in the reserve requiremnts of member banks, in warnings by the Chairman of the Securities and Exchange Commission about speculation, particularly in low-priced securities, and in much talk about further restrictions and regulations to be applied to securities markets. But it has not yet reached the stage-and probably will not reach the stage-of causing the Administration to feel it vitally necessary to reduce expenditures and thus the necessity for borrowing, or to revise its habit of financing itself through the banks. Until some such stage is reached and interest rates are allowed to rise substantially, efforts to "control" the situation resulting from the government's own inflationary acts will accomplish nothing of real value.
The trouble with this whole program of making prosperity permanent, vigorous and pervasive, apart from its manifold practical ineptitudes, inconsistencies, and administrative incompetencies, is that it tries to make water run up-hill. Forces which in the past have brought disaster in their wake are carefully created, and then bungling efforts are expected to force them by fiat to operate in ways that are wholly contrary to human nature. The lack of grasp of fundamental factors in the present situation so distressingly in evidence in high official quarters is itself the strongest possible argument against the whole idea of "planned economy" of which current plans are examples.

## Federal Reserve Bank Statement

FAR OVERSHADOWING the immediate banking statistics are the further measures of credit control announced late last Saturday by the Board of Governors of the Federal Reserve System. In accordance with the previous intimations, reserve requirements are to be raised and this will be effected in two stages, with half the remaining power to be exercised March 1 and the other half May 1. This
will mean, when the measures are completed, an increase since last July of $100 \%$ in reserve requirements, which exhausts the current legal power to raise the requirements. The Board notes, in its statement, that member banks still will have excess reserves of approximately $\$ 500,000,000$ after the increase is effected in full, and the Federal Reserve System "will be placed in a position where such reduction or expansion of member bank reserves as may be deemed in the public interest may be effected through open market operations, a more flexible instrument, better adapted for keeping the reserve position of member banks currently in close adjustment to credit needs." Such expectations are fully borne out by the banking statistics for the week ended last Wednesday, as they continue to reflect the plethora of idle funds. Currency in circulation started its seasonal rise with an advance of $\$ 30,000,000$, but there were modest offsets otherwise and the official estimate of excess reserves of member banks remained unchanged at $\$ 2,150,000,000$.
Gold continues to move to the United States from foreign shores, and domestic production also is sizable. In the week to Wednesday night, $\$ 19,000,000$ was added to the monetary gold stocks, raising the total to $\$ 11,364,000,000$, according to the credit summary. For more than a month, however, the gold increases have been sterilized in the so-called inactive gold fund of the United States Treasury. The gold certificate holdings of the 12 Federal Reserve Banks dropped $\$ 1,525,000$ in the week covered by the latest statistics, making the aggregate $\$ 8,848,389,000$. Specie and other outpayments of currency reduced cash in vaults, so that total reserves fell $\$ 20,238,000$ to $\$ 9,150,176$ 000 . Federal Reserve notes in actual circulation increased $\$ 17,575,000$ to $\$ 4,158,067,000$. Total deposits with the 12 Banks were off $\$ 48,303,000$ to $\$ 7,219,244,000$, the account variations consisting of a decrease of member bank balances by $\$ 14,883,000$ to $\$ 6,757,714,000$; a drop in the United States Treasury general account balance by $\$ 4,508,000$ to $\$ 175,745$ 000 ; a gain in foreign bank deposits by $\$ 1,318,000$ to $\$ 76,265,000$, and a decrease of non-member bank deposits by $\$ 30,230,000$ to $\$ 209,520,000$. The reserve ratio remained unchanged at $80.4 \%$. Discounts by the System were down $\$ 56,000$ to $\$ 2,801-$ 000 , while industrial advances receded $\$ 436,000$ to $\$ 23,649,000$. Open market operations remained in complete suspense, with holdings of bankers bills again $\$ 3,081,000$, and United States Government security holdings similarly motionless at $\$ 2,430$ 227,000.

## Corporate Dividend Declarations

AFEATURE of dividend declarations the current week was the action by General Motors Corp. in declaring a dividend of only 25c. a share in comparison with 50 c . in the five preceding quarters as well as a special year-end payment of $\$ 1.50$ on Dec. 12 , last. Of course the reason for this adverse action is directly traceable to the strike which has been afflicting the company for the past several weeks. Sears Roebuck \& Co. declared a dividend of 75c. a share, payable Mar. 15 in comparison with 50 c . in previous quarters; extras were also paid in Jan. and Dec. last. The Standard Oil Co. of Ind. and the Standard Oil Co. of Calif. each declared an extra dividend, while Columbian Carbon Co. declared a special payment and Union Tank Car Co. a larger quarterly distribution than previously. Two min-
ing companies, International Nickel Co. of Canada, Ltd. and Phelps Dodge Corp. declared larger payments than heretofore. Loew's, Inc. declared an extra disbursement in addition to the regular quarterly as did also Collins \& Aitman Corp. A larger dividend was declared by Purity Bakeries Corp. than in three preceding quarters.

## Foreign Trade in December

FOREIGN trade statistics for 1936 reflect to some considerable extent the world-wide improvement in business conditions and the attendant rise in world prices. The restrictions placed on trade during the depression by many countries because of their unsatisfactory exchange situation and nationalistic policies contributed to preventing foreign trade from showing as great improvement as industry in general in 1936, but as the year advanced, some progress was made toward the breaking down of these restraints. Reciprocal trade treaties were entered into by the United States with additional countries and such pacts have now been entered with a total of 15 nations including Canada, Holland, Sweden and France; the devaluation of the franc and the other gold bloc currencies in October last, has permitted to some extent, lowering of trade barreries by those countries.

Imports of the United State in 1936 were $18 \%$ higher than 1935, but exports were only $7 \%$ greater. The Department of Commerce attributes the cause of this variation to a number of factors, chiefly the drought in this country, which considerably reduced our potential exports of foodstuffs; the fact that prices of imports have increased to a greater extent than export prices; and the greater improvement in our purchasing power than that of the world as a whole. In the last two months of the year, the maritime strike is held to have retarded exports. In spite of the strike, however, December exports were larger than November, although seasonally there is $a^{\prime}$ decline.
December imports and exports were each greater than in the corresponding month of 1935 , which statement was true for every month in 1936 except November, when there was a decrease in exports from the previous year. Manufactured products were the items of export contributing to the increase in December, which was to some extent offset by decreases in shipments of fruits, unmanufactured cotton, lumber and petroleum products. The rise in the import total was largely ascribable to larger imports of crude rubber, undressed fur skins, hides and skins, raw wool and silk, tin and newsprint. Other items included alcoholic beverages, sugar, coffee, cocoa and grain.
In December, 1936, shipments of merchandise amounted to $\$ 229,739,000$ and imports $\$ 244,321,000$, leaving an import balance of $\$ 14,582,000$. A year earlier exports of $\$ 223,469,000$ exceeded imports by $\$ 36,501,000$. In November, 1936, there was an excess of exports of $\$ 29,332,000$. Cotton exports in December last amounted to 613,528 bales, valued at $\$ 40,220,415$, which is a reduction from 717,276 bales, worth $\$ 46,969,456$, shipped in November. In December, 1935, shipments were 916,979 bales, worth $\$ 56,768,692$.

For the year 1936, imports totaled $\$ 2,419,229,000$ and exports $\$ 2,453,487,000$, which resulted in a favorable balance of only $\$ 34,258,000$, the smallest for any year since 1895. In 1935, trade was on a lower scale, imports amounting to only $\$ 2,047$,-

485,000 and exports to $\$ 2,282,874,000$, but there was an export excess of $\$ 235,389,000$. During the 1920s, yearly export excesses were in the neighborhood of $\$ 1,000,000,000$ and as late as 1930 the balance was as high as $\$ 782,273,000$.

Gold imports of $\$ 57,070,000$ in December compare with $\$ 75,962,000$ in November and $\$ 190,180,000$ in December, 1935. Exports were but $\$ 99,000$ in December; in November they were $\$ 127,000$ and in December a year ago, $\$ 170,000$. For the third successive year net imports of the metal were over $\$ 1,000,000,000$, and in 1936 amounted to $\$ 1,116$,583,000 . Silver imports in December of $\$ 2,267,000$ were the smallest of any month ince early 1934; in November $\$ 4,451,000$ was imported and in Deccmber, 1935, $\$ 47,603,000$. For the year 1936 imports totaled $\$ 182,816,000$, as compared with $\$ 354,531,000$ in 1935. Exports of the metal throughout the year 1936 were inconsequential.

## The New York Stock Market

$\mathrm{A}^{\mathrm{D}}$DVANCING prices were the rule on the New York stock market this week, until President Roosevelt made his amazing recommendations for reform of the Federal judiciary system, yesterday. When the message of the President was read to Congress, prices of stocks tumbled and much of the gain previously recorded during the week was wiped out. In various parts of the list, however, levels held materially above those current late last week. The market had to contend with several important new developments, as well as continued reports of flood damage. Increase of reserve requirements, as announced last Saturday, failed to produce any immediate repercussions in the stock market. But the proposal for reform of the judiciary, which seems to be a thinly-veiled attempt to change the character of the present court, depressed the market sharply. The tone was optimistic until that development appeared, and best levels since 1931 were attained. United States Steel common advanced to 100 on Thursday. But the gains were modified sharply yesterday. Turnover on the New York Stock Exchange aggregated between $2,000,000$ and $2,500,000$ shares in each of the full sessions.

Dealings last Saturday were fairly active, and steel stocks assumed the leadership in a rather pronounced upswing. Industrials generally were in favor, while rail and utility stocks were quiet. The week-end announcement that reserve requirements are to be increased to the full extent permitted under present law subdued the bulls somewhat on Monday, but the waning flood in the Ohio Valley gave some encouragement. Motor stocks were soft on the fruitless endeavors to end the strike in General Motors plants, while steel issues dipped on realization selling. Oil issues improved on the bet ter statistical position of the industry, while metal shares also advanced, but the market otherwise proved dull. Sentiment improved materially on Tuesday, largely because the courts upheld the contentions of property owners in the motor strike contest with the "sit-down" occupants of the plants. Industrial issues surged forward, with steel and motor shares in the lead. Rail and utility stocks likewise showed good results, and some average compilations reflected the best levels in six years. The advance was continued and increased on Wednesday, with only utility and food stocks failing to participate. Steel, motor, railroad and rail
equipment issues were the favorites. At the opening on Thursday, Steel common touched par value, and the entire market gained a momentary fillip from that circumstance. But thereafter a tendency toward profit-taking prevailed, and closing levels in all groups were not far from the previous day's terminal figures. After a good start yesterday, consternation was caused in the financial markets by the message of the President calling for "reform" of the Federal judiciary. Stocks were offered and buyers were reluctant, so that sharp recessions resulted for the day. All groups of issues joined in the downward trend, with the exception of some of the base metal issues.

In the listed bond market the reserve requirement increase proved the dominant factor of the week, as might have been expected. United States Government securities were idle and virtually unchanged all week, since the large financial institutions hardly care to add to portfolios for the time being. High-grade corporate bonds were equally quiet. In the more speculative departments of the bond market, prices tended to move upward most of the week, but a relapse occurred yesterday after the Presidential message on the judiciary was read. The commodity markets displayed a rather good tone during much of the week, which contributed to the confident buying of some classes of stocks Base metal prices were buoyant, while grains, cot ton and other agricultural commodities did not vary greatly. The foreign exchange markets reflected persistent strength of the United States dollar, and softness of sterling and francs. The French unit was under pressure at all times.

On the New York Stock Exchange 317 stocks touched new high levels for the year while 147 stocks touched new low levels. On the New York Curb Exchange 220 stocks touched new high levels and 112 stocks touched new low levels.

Call loans on the New York Stock Exchange remained unchanged at $1 \%$.

On the New York Stock Exchange the sales at the half-day session on Saturday last were 1,194,730 shares; on Monday they were $2,357,270$ shares; on Tuesday, 2,428,500 shares; on Wednesday, 2,452,070 shares; on Thursday, 2,388,480 shares, and on Friday, $3,320,820$ shares. On the New York Curb Exchange the sales last Saturday were 380,920 shares; on Monday, 629,345 shares; on Tuesday, 682,760 shares ; on Wednesday, 776,710 shares ; on Thursday, 768,275 shares, and on Friday, 1,044,435 shares.

The stock market this week was hesitant in tone and continued to reflect much uncertainty over flood conditions and the General Motors strike. The unusually heavy backlogs on the books of the steel companies have been an important factor in the rise among steel shares in past weeks, and further headway has been made the present week. Trading in the main body of stocks was highly selective, with no great amount of profit-taking evident in the face of a growing volume of business. As a whole, the market for the week was mostly irregular, with the exception of Wednesday, when prices on that day closed generally higher. Yesterday, after a firm opening, equities suffered severe declines when the recommendations of the President in his message to Congress concerning the United States Supreme Court became known. In the face of this and other adverse influences, many stocks managed to close higher gesterday than on Friday of last week. Gen-
eral Electric closed yesterday at $611 / 4$ against $631 / 8$ on Friday of last week; Consolidated Edison Co. of N. Y. at $451 / 4$ against $461 / 2$; Columbia Gas \& Elec. at $171 / 2$ against $173 / 4$; Public Service of N. J. at $501 / 2$ against $511 / 4$; J. I. Case Threshing Machine at $1703 / 4$ against 1523/4; International. Harvester at 104 against $1051 / 2$; Sears, Roebuck \& Co. at $841 / 2$ against $831 / 4$; Montgomery Ward \& Co. at $573 / 8$ against 55 ; Woolworth at $597 / 8$ against $611 / 2$, and American Tel. \& Tel. at 183 against 1827/s. Western Union closed yesterday at $763 / 8$ against $793 / 4$ on Friday of last week; Allied Chemical \& Dye at 235 against 235 ; E. I. du Pont de Nemours at 173 against 173; National Cash Register at $353 / 4$ against 34 ; International Nickel at $643 / 8$ against 63 ; National Dairy Products at $231 / 2$ against $233 / 4$; National Biscuit at 31 against $311 / 4$; Texas Gulf Sulphur at $401 / 2$ against 40; Continental Can at 61 against $61 \frac{1}{2}$; Eastman Kodak at 1735/8 against 169; Standard Brands at $157 / 8$ against $153 / 4$; Westinghouse Elec. \& Mfg. at 158 ex-div. against $1581 / 2$; Lorillard at $261 / 4$ against $233 / 8$; United States Industrial Alcohol at $391 / 2$ against $403 / 8$; Canada Dry at $285 / 8$ against $301 / 4$; Schenley Distillers at $431 / 2$ against $441 / 4$, and National Distillers at $277 / 8$ against 28.
The steel shares were again in the forefront, with one notable feature in this group being United States Steel common, which touched par on Thursday of this week. United States Steel closed yesterday at $965 / 8$ against $941 / 2$ on Friday of last week; Inland Steel at 115 against 113 $1 / 2$; Bethlehem Steel at $813 / 4$ against $815 / 8$; Republic Steel at $343 / 8$ against $323 / 4$, and Youngstown Sheet \& Tube at 82 against $811 / 2$. In the motor group, Auburn Auto closed yesterday at $327 / 8$ against 31 on Friday of last week; General Motors at $677 / 8$ against $681 / 8$; Chrysler at $1261 / 4$ against 123, and Hupp Motors at $21 / 4$ against $23 / 8$. In the rubber group, Goodyear Tire \& Rubber closed yesterday at $341 / 2$ against $333 / 8$ on Friday of last week; United States Rubber at $545 / 8$ against 55 , and B. F. Goodrich at $331 / 2$ against $325 / 8$. The railroad shares made a favorable showing this week and closed yesterday at higher levels than on Friday a week ago. Pennsylvania RR. closed yesterday at $421 / 4$ against $411 / 8$ on Friday of last week; Atchison Topeka \& Santa Fe at $72 \frac{1}{2}$ against $723 / 8$; New York Central at 423/4 against 42; Union Pacific at 1311/2 against $1291 / 2$; Southern Pacific at $483 / 4$ against $465 / 8$; Southern Railway at $311 / 4$ against 27 , and Northern Pacific at $287 / 8$ against $281 / 8$. Among the oil stocks, Standard Oil of N. J. closed yesterday at $703 / 8$ against $697 / 8$ on Friday of last week; Shell Union Oil at $291 / 4$ against $281 / 8$, and Atlantic Refining at $341 / 4$ against $341 / 2$. In the copper group, Anaconda Copper closed yesterday at $543 / 8$ against 53 on Friday of last week; American Smelting \& Refining at $937 / 8$ against $893 / 4$, and Phelps Dodge at $527 / 8$ against $531 / 8$.

Trade and industrial reports were mostly favorable, with the natural exception of the strike news. Steel ingot production for the week ending today was estimated by the American Iron and Steel Institute at $79.6 \%$ of capacity against $77.9 \%$ last week and $50.0 \%$ at this time last year. Production of electric energy for the week ended Jan. 30 amounted to $2,214,654,000$ kilowatt hours, according to the Edison Electric Institute. This compares with $2,256,795,000$ kilowatt hours in the preceding week and $1,955,507,000$ kilowatt hours in the corresponding, week of last year. Car loadings of revenue
freight for the week to Jan. 30 are reported by the Association of American Railroads at 659,790 cars, a decrease of 10,586 cars from the previous week, but a gain of 37,900 cars over the corresponding week of 1936.
As indicating the course of the commodity markets, the May option for wheat in Chicago closed yesterday at 133 c . as against $1271 / 4 \mathrm{c}$. the close on Friday of last week. May corn at Chicago closed yesterday at $1071 / 2 \mathrm{c}$. as against $1063 / 8 \mathrm{c}$. the close on Friday of last week. May oats at Chicago closed yesterday at $505 / 8 \mathrm{c}$. as against $491 / 8 \mathrm{c}$. the close on Friday of last week.
The spot price for cotton here in New York closed yesterday at 13.20 c . as against 13.28 c . the close on Friday of last week. The spot price for rubber yesterday was 13.24 c . as against 21.12 c . the close on Friday of last week. Domestic copper closed yesterday at 13c., the close on Friday of last week.
In London the price of bar silver yesterday was $201 / 16$ pence per ounce as against $205 / 16$ pence per ounce on Friday of last week, and spot silver in New York closed yesterday at $443 / 4$ c., the close on Friday of last week.
In the matter of the foreign exchanges, cable transfers on London closed yesterday at $\$ 4.891 / 4$ as against $\$ 4.897 / 8$ the close on Friday of last week, and cable transfers on Paris closed yesterday at $4.653 / 8 \mathrm{c}$. as against 4.66c. the close on Friday of last week.

## European Stock Markets

TRENDS varied rather widely this week on stock exchanges in the principal European financial centers. On the London Stock Exchange the spirit was buoyant during most sessions, partly because of the encouragement gained from the well sustained improvement at New York. The Paris Bourse was firm and weak by turns, with the recessions more important than the gains. French devaluation is feared generally, owing to the increasing evidence that the stabilization fund of that country is having difficulty in maintaining the franc at the parity established last Sept. 25. The French Finance Ministry arranged late last week a $£ 40,000,000$ loan from London bankers to the French railroads, the intent being to obtain a fresh supply of foreign exchange. Despite this extensive aid, it appeared on Thursday that the Bank of France had transferred $3,000,000,000$ francs gold to the stabilization fund. Such incidents offset the continued official assurances that no further devaluation is contemplated. The Berlin Boerse was quiet and weak in most sessions, for it is realized that the Reich is passing through a severe economic crisis, induced mainly by the heavy armaments outlays and the unbalanced national budget. The European diplomatic situation as a whole remains highly uncertain, and this added to the discomfiture of traders and investors. Industrial production in the leading European countries is being maintained at a good pace, however, and buying of stocks is occasioned by that circumstance, especially in the London market.
A new account was opened on the London Stock Exchange, Monday, but dealings were quiet with the main trend firm. Gilt-edged issues recovered a little from their recent spell of weakness which resulted from fears of higher money rates. British industrial stocks moved upward as a whole, with gains measured almost entirely in fractions. AngloAmerican trading favorites advanced in Shorters

Court on good week-end news from New York. The trend was favorable at London in somewhat larger dealings on Tuesday. British funds were marked fractionally higher, and strength was general in the home industrial list. Oil shares enjoyed a modest boom on price advances in the commodity, while gold and base metal issues likewise improved. Anglo-Americans continued to lead the international group to better figures. The tone on Wednesday again was cheerful, with gilt-edged issues a bit higher, while most industrial stocks also advanced. American issues that are traded at London obtained the major share of attention, however, owing to the gains reported in cables from New York. African gold mining stocks showed large advances, and base metal issues also moved forward. The firm tone was maintained in heavy dealings on Thursday, despite profit-taking in some parts of the list. British funds were marked upward by small fractions, and similar gains appeared in almost all departments of the market for industrial stocks. But oil shares remained the favorites because of the price situation, while gold mining issues likewise improved broadly. Anglo-American issues continued their gains. Gilt-edged securities again were in demand yesterday, but week-end liquidation unsettled the London market otherwise.

The Paris Bourse presented on Monday results that are typical of devaluation fears, which made it evident that the new London loan failed to dispel apprehensions. Rentes were marked lower, but industrial, utility and bank shares advanced, while international obligations surged ahead. Money for the month-end carryover was $61 / 2 \%$, against $51 / 2 \%$ at the end of December. The trend was uncertain on Tuesday, and business was less active. Rentes closed without much change, but French equities generally declined and lost a good part of the previous advances. International issues remained in keen demand, notwithstanding an official denial of rumors that foreign exchange controls might be instituted. Firm assurances were given Wednesday that no further devaluation of the franc is anticipated, and rentes finally were marked higher in that session. French equities were liquidated, while oil stocks reflected the interest shown in such shares at London. The international section remained in favor. After a cheerful opening on Thursday, unsettlement again was occasioned by the Bank of France transfer of $3,000,000,000$ francs gold to the stabilization fund. Rentes dipped sharply, and French bank, utility, chemical and other equities also were soft. Renewed buying of international issues were noted. Dealings yesterday again reflected fears of devaluation, for rentes dipped and most other securities also receded. International issues were firm.
Rather surprisingly, the Berlin Boerse failed on Monday to reflect the enthusiasm that presumably should be felt in all German circles after Chancellor Hitler makes an announcement, as he did last Saturday. Prices drifted slightly lower in a dull market, with some of the heavy industrial issues off a point or more. Dealings were very light throughout the session. The situation was unchanged on Tuesday, with leading speculative issues off and others hardly traded at all. Fixed-interest obligations were neglected. Nor was there any change on Wednesday, for the Berlin market continued to ease on exceptionally light trading. Most losses
were measured in small fractions, but a few issues suffered larger recessions. A better tone finally appeared on Thursday, owing to increased dividend payments by some of the large companies. Heavy industrial stocks regained a part of their earlier losses, and other issues also reflected better demand. The good tone was continued in more active trading at Berlin yesterday, and some extensive gains were recorded.

## World Armaments

WHILE leading European nations are attempting to find some basis upon which they can discuss a general settlement of differences, all countries in the world continue to arm at a frantic rate, which is perhaps the best available indication of real sentiments regarding efforts to maintain peace. Recent reports disclose an ever higher piling of armaments upon armaments in European countries. The French Parliament concluded last Tuesday a protracted debate on national defense, in which such matters were touched upon as the nationalization of armaments factories, coordination of defense and military services, extension of fortifications, augmentation of the navy and motorization of land forces. The debate ended with full approval of the policy of the Blum regime, which calls for an outlay of $19,000,000,000$ francs this year, and a supplementary program calling for expenditure of a further $19,000,000,000$ francs spread over the next four years. It would seem, if London estimates are correct, that German military expenditures for the current year far outdo even those of France. After careful investigation, British experts are reported to have arrived at the estimate of $12,600,000$,000 marks as the arms cost this year. French increases, of course, are designed chiefly to match the headlong rearmament of the Reich. It was reported from Berlin some weeks ago that the German side of the Polish border is being fortified, hastily. Further reports now indicate that Poland is paying the Reich a like compliment, as a "Maginot" line is to be built in Poland, facing German territory.

## European Conciliation

CERMAN arguments in the lengthy European diplomatic debate on conciliation and a possible general settlement were were presented last Saturday by Chancellor Adolf Hitler, in the course of a two-hour address before the all-Nazi Reichstag. The references to foreign affairs made by the German leader were considered rather negative in London, Paris and elsewhere, but it was admitted that a basis for further discussions seems to exist. Indeed, close examination of the pronouncements occasioned an increase of optimism in the British and French chancelleries. Herr Hitler furnished only a modest Saturday "surprise" in the form of a declaration that the Reich solemnly repudiates the stigma of war guilt which underlies the Versailles treaty. He added that the period of surprises now is at an end, and that Germany is quite ready to cooperate with other European nations. Pains were taken to answer some of the specific points brought up recently by Foreign Secretary Anthony Eden of Great Britain, but scant reference was made to the conciliatory speech of the French Premier, Leon Blum. It would appear, however, that both the British and the French arguments were taken into consideration.

After a lengthy discourse on the internal affairs of the Reich; Chancellor Hitler turned to the international aspect of affairs and made much of the restoration of national honor during his four years of office. He declared that the German railways and the Reichsbank no longer are to be considered as administered under the Versailles regime, but this statement was rather superfluous, since the Versailles status really lapsed years ago. There followed a sweeping assertion liquidating "that part of the Versailles treaty which deprived our people of equality and degraded it to the status of an inferior nation." And Chancellor Hitler then declared annulled the confession of German responsibility for the World War, which is written into the Versailles pact. With these declarations, the German spokesman indicated that the era of diplomatic surprises is at an end. "As a State with equal rights, Germany with full loyalty henceforth will do her share in settling European problems," he added. In succeeding passages, the German leader made clear some of the bases of cooperation, as they are viewed in the Wilhelmstrasse. The demand for restoration of the colonies taken from the Reich in the war settlement was reiterated, but Germany does not desire colonies from countries not thus concerned, he said. Communism once again was scored and linked with Judaism, in accordance with one of the pet predilections of the German dictator. Herr Hitler's hatred of Communism again was expressed by a determination to prevent it from spreading in Europe. The League of Nations was criticized bitterly and Herr Hitler urged reconstitution of that body.

Some extensive references were made by Herr Hitler to the points raised at various times by Foreign Secretary Anthony Eden. The isolation that Mr. Eden urged the Reich to abandon does not exist in fact, Herr Hitler said, and he cited in support of his contention the Anglo-German naval treaty, the pacts made by the Reich with Poland and Austria, the intimate collaboration with Italy and the anti-Communist pact with Japan. Little patience was expressed with the aim of the British Foreign Secretary to prevent Europe from being split into two factions. The Versailles treaty first did just that by aligning Europe in opposing camps of victorious and defeated nations, Herr Hitler remarked, while of late the tendency has been toward Communist and anti-Communist opposition. But the German Chancellor also tried to be reassuring, as to some countries. With France, he stated, German has no quarrel, and it was added that there are no humanly conceivable points of dispute. The German Government has assured Belgium and Holland that it is prepared to recognize and guarantee the inviolability of their territories. Cordial relations are maintained by the Reich with Yugoslavia, Hungary, Bulgaria, Turkey and Greece. On the question of armaments, Herr Hitler was aloof and conciliatory, by turns. He declared that only Berlin can determine the arms needed by the Reich, just as London alone can fix the limits of British armaments. But he also made much of the offers formerly made for a standing army of 300,000 men, if France and Great Britain would agree not to exceed that figure, while reference was made similarly to the suggestion of some years ago for equality with France and Great Britain in the air.

International views on these pronouncements by
the German leader naturally varied, but in most capitals it was admitted that a basis for further diplomatic negotiations apparently remains. It was recognized even in the German capital that the speech really presented no surprises, since the repudiation of the war guilt clause and the full restoration of sovereignty over the German railways and the Reichsbank do not mean much. In London a little disappointment seemed to prevail, possibly because Herr Hitler maintained the German viewpoint on colonies so firmly. British spokesmen have stated categorically on a number of occasions that no question of relinquishing colonies can be brought up in London. In British references to Herr Hitler's address, not a great deal was said on this matter. The British complaint was simply that the speech was negative, but it also was indicated quite definitely that hope for German cooperation in a European settlement has not been abandoned. The French authorities took a far more positive stand on the speech. Foreign Minister Yvon Delbos declared in a speech last Sunday that Germany and France appear to desire the same ends, but differed as to methods. France remains ready to try all means of reaching an accord, he said, but he also added that the German wish to exclude Soviet Russia from negotiations hardly is admissible. In Czechozlovakia some concern was expressed over the failure of Chancellor Hitler even to mention that country. Comments in Moscow naturally were caustic.

Of lesser importance, but indicative of the trend of European diplomacy, are conversations in Milan between the Italian and Turkish Foreign Ministers, regarding problems of mutual interest. These talks were started Wednesday, with the general aim of obtaining Italian adherence to the Montreux treaty permitting Turkey to refortify the Dardanelles. Just what terms Italy might exact in return for such a gesture caused concern in a number of capitals. German Government influence has occasioned a decided antagonism in Italian official circles toward Communism, and it seems possible that Rome will attempt to insert a wedge between Turkey and Russia. Count Galeazzo Ciano conducted the Milan conversations for Italy, while Tewfik Rushdu Aras headed the Turkish delegation. Also of interest was another illustration of the curious lack of diplomatic finesse in German circles. Chancellor Hitler issued a brief decree last Saturday prohibiting the acceptance by German nationals of Nobel prizes, this being an obvious reference to the award of the 1935 Nobel peace prize to Dr. Carl von Ossietzky, the peace advocate imprisoned by the Nazi regime. This action created a most painful impression in Sweden, and was said in some reports to have swept away much of the goodwill toward the Reich built up in the last two years.

## Spanish Rebellion

ITTTLE change was apparent in the Spanish situation this week, other than a resumption by the insurgents of their attacks on the Mediterranean port of Malaga. The endeavor to prevent further aid from reaching either side still is in progress in London, but so far the international aspects of the conflict remain serious and threatening. France, Russia, Germany and Rome all are in agreement, according to their notes to London, regarding the advisability of halting the flow of munitions and
"volunteers" to Spain. It would seem, however, that full advantage is being taken by some countries of the interim period, before the restrictions can be declared effective. London dispatches of Wednesday stated that another large contingent of Italian "volunteers" had been landed at Cadiz to aid the Spanish insurgents. The danger of other complications was emphasized on the same day, when Spanish airplanes bombed but narrowly missed the British battleship Royal Oak, in the straits of Gibraltar. Rebel forces renewed early this week their attempt to take Malaga, and by Thursday the opposing armies were said to be locked in a fierce struggle. Gibraltar dispatches indicated that the rebels were closing in on the city, despite a desperate defence by loyalist contingents. In the main theater of the war, around Madrid, hardly any change was noted this week. Bad weather and deep mud hampered operations early in the week, and when the skies cleared the loyalists claimed small gains to the south of the capital.

## The Trend in Germany

LTTLLE information of a basic nature as to German plans for financial and economic procedure was revealed by Chancellor Adolf Hitler, in his long address before the Reichstag last Saturday. Reich Government finances, which are causing concern everywhere, apparently were not even touched upon. As his foremost aim, the German leader set the full execution of the four-year plan for making the Reich independent of foreign supplies and raw materials. Living standards of the German people, now extremely low, are to be improved, but the means for accomplishing this laudable purpose remain quite vague. In retrospect, Herr Hitler remarked that the livelihood of $65,000,000$ Germans had to be assured, and he admitted that the creation of employment involved a ruthless exploitation of German natural resources. "It has been our aim," he continued, "to make strikes and lockouts impossible. Security now is assured by our national unity. But security does not exist by virtue of the fictitious value of money, but by virtue of real production, which gives money its value. Such production is our gold coverage, not metal which may be in the vaults of some bank."
But Chancellor Hitler also admitted subsequently that the large German population desires not only to work, but also to eat. Markets must be found at home and abroad, he said. Much of the address was given over to a laudatory account of Nazi accomplishments in recent years. A long-term program for beautifying Berlin, Hamburg, Munich and Nuremberg was announced, and other cultural enterprises also were foreshadowed. A new constitution is to be formulated as "the imperishable basic law for all Germans." Some indications of what such a constitution might contain were afforded, meanwhile, in the extreme regimentation displayed by the Nazi Reichstag. The members, dispatches state, rose with curious unanimity when their approval was required for an act continuing the current regime for another four years. "The assembly came to its feet and sat down again exactly as a well-trained company of soldiers might come to attention and relax again at the word of command," said Frederick T. Birchall, special correspondent of the New York "Times." After the Reichstag session ended, the Cabinet met, and all non-Nazi members
then were received formally into the fold. Foreign Minister Konstantin von Neurath, Finance Minister Count Lutz Schwerin von Krosigk, Economics Minister Dr. Hjalmar Schacht, and several others all embraced the faith, formally at least.

## Russian Plots

T${ }^{\top}$ ERRIBLE expiation has been made by 17 prominent Russians for their alleged crimes of treason, espionage, sabotage and conspiracy, for - which they were tried and convicted last week, but the great questions raised by such strange trials remain. The high Soviet Court decided last Saturday that 13 of the self-confessed guilty should be put to death and the sentence was carried out on Monday. Of the remaining four, Karl Radek, Gregory Sokolnikoff, and V. V. Arnold were sentenced to imprisonment for 10 years, while M. S. Stroiloff rếceived an eight-year sentence in prison. Many attempts have been made by outside observers to account for the eagerness with which the accused confessed their guilt, and in some cases even called for the direst punishment to be visited upon themselves, but it may easily be that the only real answer is to be found in the Russian temperament and the strange psychological excrescences produced by the Communistic experiment. The trials themselves, it is suggested by some who have lived long in Russia, probably are engineered largely to placate sentiment among the oppressed Russian masses and divert attention from bad records being made in various walks of economic life. Thus, Walter Duranty, special correspondent of the New York "Times," notes sagely that production of pig iron on Jan. 31 was only $67.7 \%$ of the program; steel, $76.5 \%$, and rolled metal, $80.9 \%$. Coal production was $85.7 \%$, and freight car loadings only $76.2 \%$. Leon Trotsky, from his refuge in Mexico, suggests much the same thoughts, and his views naturally carry weight, since he is accused as the arch conspirator.

## Japanese Government

CABINET difficulties in Japan were adjusted last Saturday through the selection by Emperor Hirohito and his advisers of General Senjuro Hayashi as Premier. The military branches of the government, which hold the power of veto over the formation of any regime, agreed to this selection, and a general attitude of conciliation thereupon prevailed. General Hayashi was chosen after the Army objected to General Kazushige Ugaki as Premier, and it would seem that the militarists had things very much their own way. Despite this obvious fact, however, Japanese business and financial leaders were reliably reported as relieved over the outcome of the crisis. Spokesmen of the high military command insisted that the militarists were not trying to impose a Fascist regime or a military dictatorship on the country, which probably aided sentiment somewhat. General Hayashi found it a bit difficult to form a complete Ministerial list, and he announced last Tuesday that he would assume not only the Premiership, but also the Foreign Affairs and Education posts, for the time being. The Finance Ministry will be headed by Toyotaro Yuki, President of the Industrial Bank of Japan, while staunch militarists naturally occupy the Army and Navy posts. In order to provide time for the formulation of policies, the Diet was requested to remain in suspension until Feb. 10.

## Discount Rates of Foreign Central Banks

THERE have been no changes during the week in the discount rates of any of the foreign central banks. Present rates at the leading centers are shown in the table which follows:
discount rates of foreign central banks

| Country | Rate in Effect Eeb <br> Feb. 5 | Date Established | $\begin{aligned} & \text { Pre- } \\ & \text { oious } \\ & \text { Rate } \end{aligned}$ | Country | Rate in Effect Feb. 5 | Date Established | $\begin{aligned} & \text { Pre- } \\ & \text { vious } \\ & \text { Rate } \end{aligned}$ |

## Foreign Money Rates

IN LONDON open market discount rates for short bills on Friday were $9-16 \%$ as against $9-16 \%$ on Friday of last week, and $9-16 @ 5 / 8 \%$ for three months' bills, as against 9-16@ $5 / 8 \%$ on Friday of last week. Money on call in London on Friday was $1 / 2 \%$. At Paris the open market rate remains at $41 / 4 \%$ and in Switzerland at $11 / 4 \%$.

## Bank of England Statement

T${ }^{\prime}$ HE statement for the week ended Feb. 3 shows a gain of $£ 107,277$ in gold holdings raising the total to $£ 314,167,237$ which compares with $£ 201,-$ 187,547 a year ago. The affect of the gold increase in the direction of enlarging reserves was much more than counteracted by an expansion of $£ 5,014,000$ in circulation and consequently reserves decreased $£ 4$,906,000 . Public deposits rose $£ 81,000$ while other deposits fell off $£ 2,485,552$. Of the latter amount $£ 2,317,547$ was from bankers accounts and $£ 168,005$ from other accounts. The reserve proportion dropped to $38.70 \%$ from $41.40 \%$ a week ago; last year it was $40.66 \%$. Loans on government securities increased $£ 1,814,000$ and those on other securities $£ 706,563$. Of the $£ 706,563, £ 502,568$ represented an addition to discounts and advances and $£ 203,995$ to securities. No change was made in the $2 \%$ discount rate. Below are the figures with comparisons for several years:

|  | ${ }_{\text {Feb }}^{\substack{\text { Feb } \\ 1937}}$ | ${ }_{\substack{\text { Feb } \\ \text { 1936 } \\ \text { 5, } \\ \hline}}$ | ${ }_{\text {Feb, }}^{\substack{\text { Feb } \\ 1935}}$ |  |  |

## Bank of France Statement

THE weekly statement dated Jan. 29 shows a loss in gold holdings of $3,000,000,000$ francs, the first change in the item since the week of Dec. 4 , 1936. Gold holdings now aggregate $57,358,742,140$ francs, in comparison with $65,223,422,365$ francs a year ago. French commercial bills discounted, advances against securities, and temporary advances without interest to State record increases, namely $1,344,000,000$ francs, $141,000,000$ francs and $374,-$ 000,000 francs respectively. Notes in circulation
reveal a large increase of $1,143,000,000$ francs, bringing the total up to $87,687,466,485$ francs. A year ago circulation stood at $81,503,345,245$ francs. The Bank's reserve ratio is now $54.67 \%$, compared with $70.60 \%$ last year. Credit balances abroad register a decline of $2,000,000$ francs and creditor current accounts of $1,340,000,000$ francs. A comparison of the various items for three years is furnished below:

T'HE Bank's quarterly statement dated Jan. 30 showed a slight increase in gold and bullion of 40,000 marks, which brought the total up to $66,-$ $\overline{904,000}$ marks. A year ago gold aggregated 76,618,000 marks and the year before $79,782,000$ marks. The proportion of gold and foreign currency to note circulation is now $1.5 \%$, slightly lower than the previous quarter, when it was $1.7 \%$. Last year it was $1.99 \%$. An expansion in note circulation of $421,000,000$ marks, increased the total outstanding to $4,799,774,000$ marks compared with $4,097,788,000$ marks a year ago. Reserves in foreign currency showed a loss of 130,000 marks and other daily maturing obligations of $47,343,000$ marks. Bills of exchange and checks, advances, and investments register increases, namely $407,217,000$ marks, $28,-$ 583,000 marks and $1,005,000$ marks, respectively. Below we furnish a comparison of the different items for three years:
reichsbankis comparative statement

## New York Money Market

ASLIGHT hardening of rates on longer maturities of bankers acceptances was the only reflection in the money market this week of the week-end announcement by the Board of Governors of the Federal Reserve System that reserve requirements will be increased progressively to the full extent permitted under present law. Bills due in 30 and 60 days were unchanged, as they will be payable before the reserve requirement increase takes full effect. Bid and asked levels were raised $1-16 \%$ on three and four months bills, while for five and six months bills the bid level was raised $1 / 8 \%$ and the ask level $1-16 \%$. Commercial paper rates were unchanged., Little

Volume 144
Financial Chronicle
business was done in such sections of the market, as a spirit of caution naturally prevailed after the announcement. The Treasury sold last Monday an issue of $\$ 50,000,000$ discount bills due in 273 days, and awards made at an average discount of $0.401 \%$, computed on an annual bank discount basis. Call loans held to $1 \%$ on the New York Stock Exchange, and time money remained available at $11 / 4 \%$ for all maturities to six months, but rumors were in circulation that these rates may be raised. The comprehensive New York Stock Exchange tabulation of brokers loans, covering the month of January, reflects a decline of such loans in the amount of $\$ 25,053,069$, to a total of $\$ 1,026,372,092$.

## New York Money Rates

DEALING in detail with call loan rates on the Stock Exchange from day to day, $1 \%$ was the ruling quotation all through the week for both new loans and renewals. The market for time money is still at a standstill, no transactions having been reported this week. Rates continue nominal at $114 \%$ for all maturities. The supply of prime commercial paper has shown moderate improvement this week and the market has been correspondingly active. Rates are $3 / 4 \%$ for choice names running from four to six months and $1 \%$ for names less known.

## Bankers' Acceptances

T'HE market for prime bankers' acceptances has been very quiet this week. The demand continues good but bills are still very scarce. Rates were advanced on Monday 1-16 of $1 \%$ in the bid and asked columns for 90 and 120 day bills and $1 / 8$ of $1 \%$ in the bid column and $1-16$ of $1 \%$ in the asked column for bills running for 150 and 180 days. Official quotations as issued by the Federal Reserve Bank of New York for bills up to and including 60 days are $5-16 \%$ bid and $1 / 4 \%$ asked; three and four months, $7-16 \%$ bid and $3 / 8 \%$ asked; for five and six months, $5 / 8 \%$ bid and $1 / 2 \%$ asked. The bill-buying rate of the New York Reserve Bank is $1 / 2 \%$ for bills running from 1 to 90 days, $3 / 4 \%$ for 91 - to 120 -day bills and $1 \%$ for 121- to 180 -day bills. The Federal Reserve Bank's holdings of acceptances remain unchanged at $\$ 3,081,000$. Open market dealers are quoting the same rates as those reported by the Federal Reserve Bank of New York. The rates for open market acceptances are as follows:

Discount Rates of the Federal Reserve Banks

THERE have been no changes this week in the rediscount rates of the Federal Reserve banks. The following is the schedule of rates now in effect for the various classes of paper at the different Reserve banks:
discount rates of federal reserve banks.

## Course of Sterling Exchange

$S^{T}$TERLING exchange is dull and on several occasions this week ruled at as low levels as at any time since Jan. 1. This is contrary to the normal seasonal trend. There is an element of uncertainty in important quarters respecting the future course of foreign exchange and the monetary arrangements of the several nations adhering to the tripartite currency agreement. The direction of money rates appears also to be in doubt, a factor of importance to foreign exchange. The range for sterling this week has been between $\$ 4.883 / 4$ and $\$ 4.90$ 1-16 for bankers' sight bills, compared with a range of between $\$ 4.895 / 8$ and $\$ 4.91$ last week. The range for cable transfers has been between $\$ 4.88$ 3-16 and $\$ 4.901 / 8$, compared with a range of between $\$ 4.89$ 11-16 and \$4.91 1-16 a week ago.
The increase announced on Jan. 31 of $331-3 \%$ in the reserve requirements of member banks is likely to exert an important influence on future exchange and money rates. The present action of the Federal Reserve Board increases reserve requirements to the full extent allowed by law. Details of the increase are given in our news columns. The action has been expected for some time and is viewed as part of a movement to effect an advance in both short- and long-term money rates.
Present short-term rates are unprofitable to bankers and the low rates on the best security have no attraction for investors. The abundance and low yield of government issues have long been regarded as a source of credit and currency inflation which, if not controlled, must eventually disturb the steadiness of foreign exchange relations. Since the action of the Federal Reserve Board there has already been evidence of a higher trend in time money, bank acceptances, and commercial paper here.

It should be noted that London bankers have for some time been advocating higher money rates on the ground that the prevalent low rates have ceased to act as a stimulant to trade activity. Gilt-edged issues in London have been neglected for the past year or more and even more conservative elements have been turning attention to somewhat speculative issues. London bankers have been urging an increase in yields on Treasury paper as a sure method of making first-class private issues more attractive to the investing public.

Government authorities have long resisted suggestions of this type, but it is now believed that the logic of the bankers' position can hardly be longer denied. It is not believed in either London or New York that any degree of firmness which the markets may assume will remotely approach hardness. Though money rates should advance much further in both markets, accommodation would still be extremely reasonable for all classes of business.
It is a known fact that between the extremely low market rates of the past several years and the small volume of international trade the London discount houses have almost ceased to function. Were it not for the intervention of Government authorities in the money markets here and in London, neither the British Treasury nor Washington could succeed in obtaining accommodation as low as has been secured for more than a year. On an average yield basis United States Treasury bonds were $2.10 \%$ on Dec. 8, and on Jan. 30 they were selling to yield
$2.22 \%$. Such low yields on Treasurys are not helpful to bond offerings of business enterprises, and were it not for the influence of the Treasury Department with the banks it would be impossible for Government issues to find acceptance through private investment.
The London position is much the same. British War Loan $31 / 2 \mathrm{~s}$ have been quoted in the past few days at $£ 1035 / 8$. Expanding business needs here and in London will undoubtedly require more funds, but the available supply in both markets is so large that business will not run out of credit for a long time. Mr. Edwin Fisher, chairman of Barclays Bank recently pointed out:
"Cheap money is one of the traditional correctives for industrial depression and there is little doubt that the availability of large funds for employment, at low rates of interest, has been a factor in the revival of industry in this country. Very properly it acts as a stimulus to business; but it is necessary to guard against the danger of too much emphasis being placed on the importance of cheap money and too little on those other essentials which are necessary for the maintenance of healthy conditions, in which alone real prosperity can be assured.
"The general recovery which we are now experiencing undoubtedly owed its initial impetus to the wise action of the Government, which took the courageous step of placing our national finances on a sound basis and thus restoring confidence in sterling, not only at home, but also abroad. The extent of the faith in our currency is evidenced by the fact that certain people in foreign countries have been content to invest their resources in Bank of England notes for hoarding purposes despite the fact that the money so invested produces nothing by way of interest.
"The Right Honorable Reginald McKenna, Chairman of the Midland Bank, took occasion to point out the many favorable aspects of British business but said: 'Despite these favorable factors, cheap and abundant money provides a fertile filed for the growth of adverse influences which are likely to cause an upward spiral of costs and prices if left uncontrolled.' "
Lord Wardington, Chairman of Lloyds Bank, Ltd., in his annual reports coincides closely with Mr. Fisher of Barclays Bank, Ltd. They and all British bankers are strongly urging the necessity of taking all possible measures to increase foreign trade before the two chief causes of present British internal activity, building and rearmament, come to an end.
None of the London bankers seem greatly disturbed by the unfavorable trade balance of Great Britain, which now amounts to approximately $£ 36,-$ 000,000 . It is believed that this visible balance will be completely offset by invisible returns. Although the need for greater exports is emphasized in London, there seems to be fairly general agreement that the prospect is slowly improving. World trade in 1936 showed a great advance over that of 1935 and even the least optimistic believe that the coming year will show still further international trade activity and a corresponding improvement in foreign exchange volume, though it must be admitted that trade recovery is far from attaining the high level which prevailed before the abandonment of gold by Great Britain in 1931. The American foreign trade position is far from satisfactory so far as the visible
balance is concerned. For the whole of 1936 United States trade showed the smallest merchandise export surplus since 1893 , being only $\$ 34,200,000$ as compared with $\$ 235,300,000$ in 1935 , with $\$ 1,036$,900,000 in 1928 , and with $\$ 691,400,000$ even in 1913.

Money rates in Lombard Street continue unchanged, although it is believed that the clearing banks will soon take measures to move rates upward a fraction in order to benefit the discount houses. Two-and three-months' bills are $9-16 \%$, fourmonths' bills $19-32 \%$, and six-months' bills $21_{4} 32 \%$.

All the gold on offer in the London open market continues to be taken for unknown destination. Much of it is believed to be shipped to the United States. Since early in January 1936 the, total gold received from England at New York has reached approximately $\$ 235,000,000$. On Saturday last there was on offer in the London open market $£ 457,000$, on Monday $£ 253,000$, on Tuesday $£ 403,000$, on Wednesday $£ 210,000$, on Thursday $£ 383,000$, and on Friday $£ 301,000$.

At the Port of New York the gold movement for the week ended Feb. 3, as reported by the Federal Reserve Bank of New York, was as follows:
GOLD MOVEMENT AT NEW YORK, JAN. 28-FEB. 3, INCLUSIVE

Net Change in Gold Earmarked for Foreign Account Decrease: $\$ 174,000$
Not-We have been notified that approximately $\$ 42,000$ of gold was received at San Francisco from Australia.
The above figures are for the week ended on Wednesday. On Thursday $\$ 3,650,400$ of gold was received of which $\$ 1,696,800$ came from Canada, $\$ 122,500$ from India and $\$ 1,831,100$ from Sisitzerland. There were no exports of the metal or change in gold held earmarked for foreign account. On Friday there were no imports or exports of the metal or change in gold held earmarked for foreign account.

Canadian exchange during the week ranged between a discount of $3-32 \%$ and par.

The following tables show the mean London check rate on Paris, the London open market gold price, and the price paid for gold by the United States:

MEAN LONDON CHECK RATE ON PARIS
 LONDON OPEN MARKET GOLD PRICE
Saturday, Jan. $30 \ldots \ldots$ 142s. $\quad$ Wednesday, Feb. 3...... 141s. 11d. Monday, Feb. 1------142s. 1/2d. Tuesday, Feb. 2-.---142s. Saturday, Jan. 30_.....-.-. $\$ 35.00$ Wednesday, Feb. 3......... $\$ 35.00$

Referring to day-to-day rates sterling exchange on Saturday last was inclined to ease in a limited market. Bankers' sight was $\$ 4.8911-16 @ \$ 4.893 / 4$, cable transfers $\$ 4.893$ / $@ \$ 4.8913-16$. On Monday sterling was dull but steady. The range was \$4.89 7-16@\$4.89 11-16 for bankers' sight bills and $\$ 4.891 / 2 @ \$ 4.893 / 4$ for cable transfers. On Tuesday the pound was slightly more active. Bankers' sight was $\$ 4.893 / 4 @ \$ 4.90 \quad 1-16$ and cable transfers were $\$ 4.8913-16 @ \$ 4.901 / 8$. On Wednesday exchange on London was steady with trading limited. The range was $\$ 4.893 \times 1$ @ $\$ .90$ 1-16 for bankers' sight and $\$ 4.8913-16 @ \$ 4.901 / 8$ for cable transfers. On

Financial Chronicle

Thursday sterling was steady. The rate was $\$ 4.893-16 @ \$ 4.895 / 8$ for bankers' sight and $\$ 4.891 / 4$ @ $\$ 4.893 / 4$ for cable transfers. On Friday fluctuations were narrow, the market more active. The range was $\$ 4.883 / 4 @ \$ 4.895-16$ for bankers' sight bills and $\$ 4.8813-16 @ \$ 4.893 / 8$ for cable transfers. Closing quotations on Friday were $\$ 4.89$ 3-16 for demand and $\$ 4.891 / 4$ for cable transfers. Commercial sight bills finished at $\$ 4.89$ 3-16 60-day bills at $\$ 4.887$-16, 90 -day bills at $\$ 4.883$-16, documents for payment ( 60 days) at $\$ 4.887-16$, and seven-day grain bills at $\$ 4.883 / 4$. Cotton and grain for payment closed at \$4.89 3-16.

## Continental and Other Foreign Exchange

THE French franc situation shows no essential improvement, although following the increase in the bank rate from $2 \%$ to $4 \%$ the spot rate for francs moved up promptly. For some weeks previous to the raising of the rate the mean London check rate on Paris ruled around 105.15. On Friday of last week the rate went to 105.10 . On several occasions in the past few days the London check rate on Paris was firmer and on Monday ruled as high as 104.98. Now the rate is gradually moving further against Paris. This applies to the spot rate with which the exchange equalization fund concerns itself.
All markets are bearish on the franc outlook so that future francs are at a sharp discount. In midweek 30 -day francs were at a discount of $51 / 4$ points under spot and the discount on 90 days had widened to $131 / 4$ from $111 / 2$ on Monday. French money continued to move into other markets, especially into London and New York. The increasing discount on forward francs, the popularity of international stocks in Paris, imposing an additional strain upon French money, and the transfer of $3,000,000,000$ francs in gold from the Bank of France to the French stabilization fund point to another impending crisis in the franc. At present it is apparent that there is substandtial opposition to the government within the French Chamber. It has been evident for some time that despite some indications of improvement in the French economic position following the latest devaluation, there is not sufficient confidence in the Government to induce French capital to return to France. On the contrary there are frequent developments which merely frighten more out.
In Amsterdam the plight of the franc is having a disquieting effect. It is pointed out there that in view of the record adverse trade balance and the extremely unfavorable position of the French Government's finances, all factors indicate that chiefly because of new economic experiments in France and the political uncertainty there devaluation of the franc has proved ineffective. Commentators in London have frequently asserted in recent weeks their expectation that the franc may drop to 112 to the pound.
The German mark situation shows no change for the better. The quoted rates for the so-called free or gold mark are steady around 40.24 but these quotations are fixed by the Reichsbank and there are no free marks avabilable to the market, while all the registered or blocked marks are at severe discounts. The Reichsbank statement for Jan. 30 showed gold hold'ngs of only $66,900,000$ marks and reserve ratio of $1.51 \%$.
However precarious the position of the mark, German authorities are confidently pointing to
economic improvement and steadiness of the currency. Only a few days ago Dr. Hjalmar Schacht, Minister of Economics and President of the Reichsbank, reviewed Germany's finances during the four years of Nazi rule and mentioned four features which, he said, aided in the attainment of success: Financing of extensive public works and armament programs; the policy of paying off foreign debts which, he asserted, netted Germany a book profit of $8,000,-$ 000,000 marks or more within the period (this profit accrued to the German authorities as a result of the devaluation of other currencies-chiefly the United States dollar and the former gold bloc units); commercial policy which, he said, consisted in the last analysis of "buying what we want, not what others want to sell:" stability of currency.
The following table shows the relation of the leading European currencies to the United States dollar

|  | old Dollar Parity | New Dollar Parity a | Range This Week |
| :---: | :---: | :---: | :---: |
| France (franc) | 3.92 | 6.63 | 4.65 to $4.683^{\circ}$ |
| Belgium (belga) | 13.90 | 16.95 | $16.861 / 2$ to 16.89 |
| Italy (ira) | 5.26 | 8.91 | $5.261 / 8$ to $5.261 / 2$ |
| Switzerland | 19.30 | 32.67 | $22.843 / 2$ to $22.901 / 2$ |
| Holland (guilder) | 40.20 | 68.06 | $54.751 / 2$ to 54 | a New dollar parity as before de

between Sept. 25 and Oct. 5,1936 .
The London check rate on Paris closed on Friday at 105.14, against 105.10 on Friday of last week. In New York sight bills on the French center finished at $4.643 / 8$, against $4.655 / 8$ on Friday of last week; cable transfers at 4.65 7-16, against 4.66. Antwerp belgas closed at $16.871 / 8$ for bankers' sight and at 16.88 for cable transfers, against $16.851 / 2$ and 16.86 . Final quotations for Berlin marks were 40.24 for bankers' sight bills and $40.241 / 2$ for cable transfers, in comparison with 40.24 and $40.241 / 2$. Italian lire closed at $5.263 / 8$ for bankers' sight bills and at $5.261 / 2$ for cable transfers, against $5.263 / 8$ and $5.261 / 2$. Austrian schillings closed at 18.70, against 18.70; exchange on Czechoslovakia at 3.49, against 3.49; on Bucharest at 0.74 , against 0.74 ; on Poland at $18.951 / 2$, against $18.951 / 2$; and on Finland at $2.161 / 2$, against $2.161 / 2$. Greek exchange closed at $0.897 / 8$, against $0.897 / 8$.

EXCHANGE on the countries neutral during the - war presents no new features of importance. The Scandinavian units are steady, moving in close relation to sterling. Swiss francs are only relatively firm despite the exceptionally strong position of the Swiss banks. The comparative weakness in the Swiss unit reflects fears that if the French franc is further devalued the Swiss authorities may feel compelled to follow suit. The Swiss National Bank at the end of January had gold stocks of $2,717,100,000$ Swiss francs and a ratio of $96.53 \%$.

Holland guilders have been ruling exceptionally firm for some weeks. The Dutch economic situation is showing gradual improvement and capital is constantly being repatriated. The Netherlands exchange control has again sold $50,000,000$ guilders in geld to the Netherlands Bank, the third sale of like amount since early in January. It is understood that the control's total sales to the bank up to Feb. 1 amount to $300,000,000$ guilders.
Spanish pesetas are not quoted in New York, but it is understood that since the end of January there has been some resumption of peseta dealing in London. If so, this would be for the first time since last September. On the basis of London quotations on Feb. 1 the peseta rate was at about 7.15 cents. In New York "red" pesetas have a nominal quota-
tion of 6.90 and the "white" or Seville pesetas are nominally quoted around 7.75 cents. It is understood that some business has been done, but it has all been contingent upon payment in Spain of the drafts drawn.
Bankers' sight on Amsterdam finished on Friday at $54.761 / 2$, against $54.761 / 2$ on Friday of last week; cable transfers at 54.77, against 54.77; and commercial sight bills at 54.66 , against 54.66 . Swiss francs closed at $22.851 / 2$ for checks and at 22.86 for cable transfers, against $22.851 / 2$ and 22.86 . Copenhagen checks finished at 21.86 and cable transfers at 21.86 , against $21.881 / 2$ and $21.881 / 2$. Checks on Sweden closed at $25.231 / 2$ and cable transfers at $25.231 / 2$, against $25.271 / 2$ and $25.271 / 2$; while checks on Norway finished at $24.591 / 2$ and cable transfers at $24.591 / 2$, against $24.631 / 2$ and $24.631 / 2$. Spanish pesetas are not quoted in New York.

EXCHANGE on the South American countries presents no new features. These currencies move in close relationship to dollar-sterling exchange. The undertone of the South Americans is better than it has been in several years. The exceptionally sound position of Argentina is shown by the fact that on Feb. 2 the Argentine Republic filed a registration statement under the Securities Act of 1933 covering $\$ 70,000,000$ of sinking fund external conversion loan $4 \%$ bonds due Feb. 15, 1972. The proceeds of the sale of the bonds will be applied to the retirement to two $6 \%$ series, 1957 and 1960.
Argentine paper pesos closed on Friday, official quotations, at $325 / 8$ for bankers' sight bills, against 32.65 on Friday of last week; cable transfers at $325 / 8$, against 32.65. The unofficial or free market close was 30.10@30.25 against 301/8@30.15. Brazilian milreis, official rates, closed at 8.75 , against 8.75 . The unofficial or free market in milreis is 6.10@6.20, against 6.15@6.20. Chilean exchange is nominally quoted at 5.19 , against 5.19. Peru is nominal at $261 / 4$, against $261 / 8$.

EXCHANGE on the Far Eastern countries shows L no new developments. The Japanese yen has for some time shown a tendency toward weakness as the Japanese financial situation is greatly disturbed because of cabinet difficulties arising from the conflict between the military and parliamentary forces. Other Far Eastern currencies follow closely the dollar-sterling rate.
Closing quotations for yen checks yesterday were 28.53 , against 28.50 on Friday of last week. Hongkong closed at 30.51@305/8, against 30.61@30 11-16; Shanghai at 29.85@30, against 297/8@301-16; Manila at $501 / 2$, against $503 / 8$; Singapore at $571 / 2$, against $575 / 8$; Bombay at 37.02 , against 37.07 ; and Calcutta at 37.02 , against 37.07 .

## Gold Bullion in European Banks

THE following table indicates the amounts of gold bullion (converted into pounds sterling at par of exchange) in the principal European banks as of respective dates of most recent statements reported to us by special cable yesterday (Friday); comparis ins are shown for the corresponding dates in the previous four years:

| Banks of- | 1937 | 1936 | 1935 | 1934 | 1933 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Eng | 314,167,237 | 201,187,547 | 193,022,108 | $191,787,025$ | 127 |
| France | 458,869,937 | 521,787,379 | 655,038,218 | 614,883,627 | ${ }_{655,151,335}$ |
| Germany b- | 2,442,050 | 2,817,700 | 2,928,900 | 16,192,500 | 39,208,600 |
| Spain....- | c87,323,000 | 90,123,000 | 90,714,000 | 90,462,000 | 90,349,000 |
| Italy - | a42,575,000 | 42,575,000 | 62,731,000 | 76,666,000 | 63,095,000 |
| Netherlands | 68,298,000 | 55,726,000 | 67,960,000 | 76,603,000 | 86,045,000 |
| Nat. Belg. | 105,401,000 | 97,088,000 | 72,860,000 | 78,433,000 | 74,427,000 |
| Switzerland | 83,495,000 | 46,825,000 | 69,112,000 | 67,518,000 | 88,965,000 |
| Sweden | 25,504,000 | 23,677,000 | 15.953,000 | 14,545,000 | 11,439,000 |
| Denmark -- | 6,551,000 | 6,555,000 | 7,395,000 | 7,398,000 | 7,397,000 |
| Norway | 6,603,000 | 6,602,000 | 6,852,000 | 6,574,000 | 8,015,000 |
| Total week | 1,201,229,224 | 1,094,963,626 | 1,244,566,226 | 1,241,062,152 | 1,252,026,276 |
| Prev. week. | 1,220,978,647 | 1,095,854,699 | $1,245,913,725$ | 1,243,527,934 | 1,253,595,438 |

Note-The par of exchange of the French franc cannot be exactly determined, as
yet, since the legislation enacted Sept. 26, 1936 empowers the Government to flx yet, since the legislation enacted Sept. 26, 1936 empowers the Government to fix
the frane's gold content somewhere between 43 and 49 milligrams. However, calculated on the basis on which the Bank of France has revalued its gold holdings,
the parity between francs and pounds sterling is approximately 165 franes to the the parity between francs and pounds sterling is approximately 165 franes to the
pound (the old parity was about 125 francs to the pound). It is on thls new basis that we have here converted the French Bank's gold holdings from francs to pounds.

## Cooperative Societies and the New Deal

Whether President Roosevelt, in sending a roving commission to Europe last summer to study the operation of cooperative societies, had in mind to buttress himself with up-to-date information before recommending some encouragement to cooperation to Congress, or sought merely to postpone a decision on a controversial matter which was being pressed upon him, has been for some time a subject of speculation. It was believed at the time that the move was inspired by Secretary Wallace, who presumably expected support for consumer cooperatives from the farmers, many of whom had for years been marketing their crops through cooperative associations, but there was no evidence that his interest was widely shared elsewhere at Washington. Where such leaders of the cooperative movement as were not farmers stood on the question was not known. The fact that the previous Congress, however, had had before it the Scott Consumers' Credit bill, which contemplated the creation of a consumers' advisory council with $\$ 500,000$ for expenses and an appropriation of $\$ 75,000,000$ to launch a central bank to finance consumer cooperatives, was a suggestive indication that some, at least, of the cooperative leaders were thinking in terms of a Federal grant, and the failure of the bill is the House did not mean that it might not be revived.

If some of the claims and predictions put forward at the tenth biennial congress of the Cooperative League of the United States, held at Columbus, Ohio, early in last October, are to be taken at their face value, the profit system as a method of doing business is marked for extinction as cooperation advances. The delegates felicitated themselves over the rapid gains which cooperation was reported to be making, especially in the central West, Secretary Wallace was praised for his "missionary work" in speaking in behalf of a "cooperative in place of a competitive economy," and copies of a bulletin of the Department of Labor, issued two years previously to inform the public regarding the "organization and management of consumers' cooperative associations and clubs," were distributed. The cooperative electrical power plants financed by the Rural Electrification Administration were cited by one speaker as, in his opinion, "only the beginning of complete cooperative ownership of the system of furnishing electricity to ourselves." While pains were taken to identify cooperation with the private ownership of property and to keep it separate from socialism, communism or fascism, the emphasis was placed upon consumer ownership of the economic system. As summarized by a correspondent of the New York "Times," "the program of the movement, until the League meets two years hence, is to displace the profit system by the approved capitalistic method of free competition. When the competitive pressure of a cooperative becomes too much for any profit enterprise, the latter is to have an opportunity to transform itself into a cooperative without losing the ownership of its fixed capital. The substance of the arrangement is that the yield on the fixed capital will thereafter be restricted to the
prevailing interest rate, while the goods and services of the enterprise will thereafter be supplied to consumers at cost."
Not all of the delegates shared the enthusiasm of those who professed to see the early control by cooperative societies of the larger part of the production and distribution of the country, nor was everyone eager to accept Federal aid. The veteran President of the League, Dr. James P. Warbasse, warned the congress against the dangers of political control, and insisted that the movement was non-political and should not risk entanglement with government. In spite of the warning, however, the League resolved in favor of dropping the "rural" limitation from the Rural Electrification Administration so that all classes of consumers might be reached, and of the creation by Congress of "an agency similar to the Farm Credit Administration for the purpose of assisting consumers' cooperative housing activities through the provision of low-priced credit."
If Federal subsidies such as the League called for or the Scott bill contemplated are granted, the cooperative movement will be added to the long list of agencies, State as well as Federal, through which private enterprise is being systematically attacked. Channing E. Sweitzer, managing director of the National Retail Dry Goods Association, pointed out some time ago that in 34 States members of incorporated consumer cooperatives are exempted from individual liability if the organization fails, that in some States exemption from various taxes is also granted, and that farmers' cooperative organizations are exempt under Federal law from the payment of Federal income taxes on the proceeds from sales on which dividends to members are paid. A committee of the Chamber of Commerce of the United States has called special attention to consumers' cooperatives as enterprises to which "it is improper for governmental agencies to extend preferential treatment by means of tax exemption, financing or other aid," on the obvious ground that such enterprises "are but another form of competitive force seeking to win the support and patronage of the American consumer." In an address before the annual convention of the National Association of Retail Secretaries at New York, on Jan. 19, Colonel C. O. Sherrill, President of the American Retail Federation, pointed out that discriminating government subsidies which gave cooperatives an advantage in distribution "might also allow the development of a form of dangerous racketeering in the promotion of consumers' cooperatives at the hands of unscrupulous and skillful demagogues who, with an evangelical appeal, might easily secure large numbers of memberships to organizations that probably never would be designed to come into successful operation."
Whether consumer cooperation, if it attained the country-wide dimensions which some of its enthusiastic supporters hope for, would help or hinder the organized labor movement is an open question, but at the moment the two undertakings profess, at least, a desire to work together. In a message addressed to the League congress at Columbus, William Green, President of the American Federation of Labor, after expressing the fear that the cooperatives "may become merely the means of helping lowpaid workers to exist on a mere pittance," declared that trade unions and the cooperatives "must go hand in hand" in raising the standard of living, and
that the cooperative movement "can do much to build up its alliance with labor by insisting that the goods sold in cooperatives are manufactured under fair labor standards, by demanding the union label, and by encouraging employees of cooperatives to organize in unions." The Federation, he added, "is ready to work with any constructive movement for consumers' cooperation. We realize what cooperation can mean to wage earners and are anxious to see a strong and lasting movement built up in this country." The League replied by passing a resolution in favor of cooperation with organized labor and agriculture "to the fullest extent possible," and voted to send a fraternal delegate to the coming convention of the Federation.

Colonel Sherrill's reference to "an evangelical appeal" points to one of the striking characteristics of the cooperative movement, namely, the combination of crusading and reforming zeal with which the claims of cooperation are urged. The New York "Times" correspondent at Columbus commented on the "evangelical earnestness" with which the delegates discussed the outlook for a system of nonprofit organizations under consumer control. There is no doubt that the leaders of the movement look forward to effecting, through its agency, a fundamental change in the present economic system, and that some of them appear willing to jeopardize the present independence by soliciting Federal financial aid. Dr. Warbasse, who is not to be accounted a radical, characterized the movement as one "which can and will Americanize our still un-Americanized national economic establishment" and commended it to those who "believe in social planning," while the Scott bill, using more elevated language, announced the purpose "to extend democracy into the economic field, reduce maladjustments between demand and supply, and control and reduce the uneconomic exactions of monopoly."

Nothing could do more to discredit cooperation than to force it out of its proper sphere, tie its organization to a Federal subsidy and the supervision of a Federal board, and make its membership the plaything of any Administration that saw political advantage in using it. In rural areas and small urban communities, where the population is relatively homogeneous and stable, consumer cooperatives have performed, and may continue to perform, a useful service. They are ill fitted to operate in populous communities where a variety of distributing services is available, where chain and department stores doing a large business are able to sell with a small margin of profit, and where population is constantly changing. The menace of cooperation to private business enterprise lies in the revolutionary nature of its economic program, its inherent hostility to profits and hence to capitalist methods of production and distribution, its apparent belief that a nation's business can be successfully carried on by methods appropriate only to a small community or local group, and the possibility that it may become, through Federal subsidies, tax exemptions or other favors, another institution for whose maintenance and extension the consuming public whose interests it professes to serve will have to pay. American business may well look with suspicion upon the whole movement if it aspires to erect what it calls "a cooperative economic democracy of America" on the basis of Treasury grants, discriminating legislation and political control.

## Administrative Commands and Democracy

When the monarch was a law unto himself and his people, irresponsible and irresistible, it was with gracious condescension that he, sometimes and when it pleased him to conceal the mailed fist within the velvet glove, expressed his potent commands to his loyal and obedient subjects in the amiable and dulcet tones of invitation or request. They were none the less commands, and the mightiest and most subborn of subjects only saved something of their amour propre by feigning to acquiesce in an invitation, while actually and consciously yielding an enforceable obedience to the implacable command of admitted authority. Thus, in the polite fiction that a mere formula of words transformed that which must be obeyed and made of it an invitation which none could be so bold as to decline, there originated the maxim which asserts that the royal invitation is a royal command to which but one response, acceptable, is admissible.

It is indeed strange that in 1937, when the authority of the few remaining monarchs has diminished to a point where it is almost wholly without substantial content, there should be, in the United States, where every citizen has been declared equal, a recrudescence of this outworn dogma. Yet, when the head of a great manufacturing corporation declined, a few days ago, the invitation of one of the President's subordinates, on the ground that acceptance involved negotiation with one whom he believed to be in conspiracy with ex-employees of the enterprise unlawfully to exclude it from the possession and operation of corporate property, it was gravely asserted that the underling's invitation had the full force of one from the President himself and that the President's invitation is the complete equivalent of a command. To such surprising conclusions are some men led by unreasoning faith in the verity of dogmatic assertions that have no foundation other than in the assumed authority of an imported precept.

In truth, there was never warrant for attributing mandatory force to any action, request, or direction of any American executive or President, outside of the strictly defined boundaries of his official powers. Much less was it ever warrantable to attribute compulsory force to any request of any President, or any representative of any President, to attend the person of such President or representative for any purpose whatsoever, unless, perhaps, as Chief Magistrate, the President may, if threatened with personal attack, summon in aid of his personal defense any loyal citizen actually present while the threat is genuine and impending.
Courtesy to the President is ethically due from every citizen, and the dignity of the Nation is involved in the unimpaired maintenance of the high dignity that has always appertained to the Presidency. Nevertheless, there are ascertainable limits beyond which the obligations of courtesy do not extend; the requirements of courtesy are always mutual and reciprocal, and the highest dignity is completely established only on behalf of the individual, whatever his rank or position, who commands respect by the reasonableness of his demands and by according to all equal consideration and respect. Any influence of office not thus soundly based is doomed to early impairment and to ulti-
mate disappearance. More than this, resort to such extra-legel expedients may easily defeat itself by unbecoming frequency or by palpably occurring in pursuit of ends that are not impartially determined or purposes that are narrow or partisan. A Presidential invitation can never be the equivalent of a command where commandment would be authorized and could be disobeyed with impunity. Democracy has no place for arbitrary action or for official pressure or coercion beyond the well-defined limits of official authority.
Boundaries of power do exist, and awareness of their existence should at least result in reasonableness and consideration upon both sides. In recog. nition of such boundaries, perhaps the most zealous officer of government might not regard it as suitable to ask gentlemen to sit down with notorious lawbreakers while the latter are almost publicly aiding and abetting crimes against society and order which the same officers of government are doing nothing to discourage or to prevent.

## What Reward Courage?

While the Federal Administration, by the agency of Secretary Perkins, has been impotently meddling, where it could have no authority, with the relation between local manufacturing concerns and their employees or men once in their employ who have surrendered their employment by violating the terms of their contracts, and while the State of Michigan, directed by Governor Murphy, has been paltering with the violent exclusion of tens of thousands of its citizens from the right to work upon terms fully acceptable to themselves, disinterested thought inevitably turns to some of the fundamentals of sound government.

Whatever judgment must declare concerning the propriety of assumptions of additional authority, all must agree that the primary function of government is to protect the inalienable personal rights of citizens against subversive forces actually or potentially expressed. Whenever any government, within the field of its recognized jurisdiction, refuses or omits to protect its freemen in the legitimate exercise of the right to bestow their labor in the pursuit of their own happiness and the maintenance of the lives and comfort of their dependents, upon such terms as they may elect, it has abdicated its primary prerogative, which is the preservation of the people's peace and order, and has stultified itself. Only those who can be misled by phrases which they are incapable of comprehending or which they are too careless and irresponsible to consider thoughtfully can be misled by tawdry attempts to contrast human rights with property rights. 'Property without humanity is inert and has neither rights nor capacity to assert any. Men and women have the right to possess and use, without injury to other men and women, those goods (property) which their industry has created and their frugality and foresight have accumulated. By the universal judgment of mankind, expressed in different ways but recognized in every realm and clime, the organ of society, government, has everywhere established a secondary human right, variously restricted, to transfer, by succession in the event of death, the personal title to such possession and use to selected successors. Precisely as every individual is entitled to security in his home, so also he has the right to go unimpeded to his labor, to exercise his chosen
vocation in peace, to control although not to misuse his property, whether held in direct and immediate ownership or through that convenient device of modern industrial organization, a corporation. These are primary conceptions, not of property rights but of manhood rights. They are the bare essentials of freedom; whoever is denied one of them is no longer a freeman, but a slave. Any government that denies any of them, or fails to protect the humblest of its citizens in the exercise of any of them, is weak and inadequate and must amend its ways or admit that it has permitted the development, within the proper field of its authority, of another government more powerful than it dares to be and currently and contumaciously exercising revolutionary functions in defiance and contempt of its existence.

It is impossible to indict a nation or a State; there is no reason to believe that any preponderating public sentiment, in Michigan or elsewhere, sustains any doctrine which could support a few disgruntled ex-employees in seizing and holding great manufacturing properties to the exclusion of their owners and multitudes of willing men desiring to assist in their operation, or in waylaying, molesting, and mis-handling such willing men on their way to and from their employment, or because, in independent enjoyment of their manhood rights, they have accepted employment upon terms not dictated by the numerically insignificant and usurping minority. Yet such usurpation has been in progress, and those temporarily in authority permitted its continuance, compounding its contempt of organized democracy.

Whether they are thus supine because of misapprehension of the vital principles at stake or in wilful derogation of human rights, or merely because they are deficient in courage, is almost, if not quite, beside the point. It is, however, pertinent to note the strange subservience of political officers to any meager group which presumes to entitle itself "labor" and chooses to be represented by professional intermeddlers between productive enterprise and great masses of satisfied workingmen. Men suddenly called from the activities of private life to positions of prominence and leadership in public affairs seem especially to fear political penalties should they act bravely for the protection of individual human rights, but some even among experienced politicians palpably and vastly exaggerate the power at the polls of such meager minorities. Intimidated, they weave complicated webs of weakness and indecision, falter in the performance of the simple functions entrusted to them, and by their futility undermine the governments, municipal, State or Federal, which they have sworn to protect and to preserve.

Such failures of courage, as must be obvious to every student of American history, have not even the unworthy excuse of political expediency. The few ringing words from the chief representatives of the people's government that would immediately restore order and start the arrested wheels of industry have been courageously uttered in the past, and upon every occasion popular applause has spontaneously silenced the impotent arrogance that would criticize or attack. Illustrations are abundant, and there is no precedent to the contrary. There was Governor "Jerry" Rusk of Wisconsin, who became a national figure when, sternly refusing to palter
with violence and disorder, he indomitably asserted the majesty and power of his State and, upon the instant, quelled the mob that was threatening the public peace of Milwaukee. There was Calvin Coolidge, whose prompt courage when mischiefmakers from outside Massachusetts had induced members of the police force of Boston to attempt, in conspiracy, to withdraw from its people protection against interferance with their peace and order, found expression in the utterance: "There is no right to strike against the public safety, by anybody, anywhere, at any time." This single sentence won such widespread applause that dissent was vanquished before it began, and it made a President of the United States. And there was Grover Cleveland, usually too uncompromising and direct for popularity, whose most commonly applauded acts were the suppression of an organized attack upon the right to work and violent destruction of property during the Chicago strike of 1894 ; the veto of a bill cutting in half the rate of fare for transportation on the elevated railroads of New York City, and his Venezuelan message, which induced Great Britain to arbitrate a South American boundary involving the integrity of the Monroe Doctrine. Academic caviling at the use of Federal troops in Chicago may not yet have ceased, but forcible denial of the right to work, wrecking of trains, and burning of cars ceased at once and has never, anywhere, recurred upon a comparable scale. The veto of the arbitrary fare bill caused Theodore Roosevelt to reverse his position on a measure for which he had voted, and without stint to praise its author. The Venezuelan message, although it may still be questioned by smaller men, profoundly advanced the cause of international arbitration and peace, provided the Monroe Doctrine with a new sanction, and vastly augmented the prestige of the United States in world affairs.
Always will it be so. The people of the United States are, in their final attitude toward brave men of sound principles, fair-minded, reasonable, and wise. They ask of their leaders leadership, convictions simply and strongly held, devotion to essential principles, and courageous resolution to act promptly and decisively in emergencies. Before such leadership, such devotion, and such resolution, selfishness and attack shrink invariably to insignificance, and demagogues in political life or in the organizations of so-called "labor" which seek to set up an arrogant and rebellious government intended to defy the purposes and polity of the people's government never fail to slink to their lairs, defeated, discredited and dismayed. It is certain that before long someone, somewhere, will find the courageous and simple way thus finally to put an end to the crude anomaly of the "sit-down" strike. When such courage comes to the front and such a course is uncompromisingly pursued a man will have appeared who is deserving well of his countrymen and is certain to be greatly rewarded by them.

## After the Hitler Speech

The speech which Chancellor Hitler delivered before the Reichstag last Saturday is far and away the most important pronouncement recently made by the head of any European State. Underneath the ornate and rather heavy rhetoric which the Chancellor is accustomed to use, the speech reveals a program of foreign policy which Germany may be
expected to pursue if the Hitlel dictatorship, extended by the Reichstag for another four years, lives out its appointed time. Further study of the speech, in the interval since it was delivered, while confirming in general the impressions that were first made, has served to impart to some of the statements an added significance, and since Germany, as the British Foreign Secretary has lately admitted, holds the center of the political stage, what Germany proposes is obviously a foremost matter of international concern.

Regarding the restrictions and imputations of the Treaty of Versailles there has remained only one thing for Germany to do. Reparations were rejected and abandoned years ago, and Chancellor Hitler's announcement that the Reichsbank and the national railways had returned fully to German control was only formal notice that the restrictions which the reparations agreements laid upon them were at an end. The armament limitations of the treaty have also been cast off, and German troops have again occupied the Rhineland. There remained the admission of "war guilt" which the makers of the peace forced upon Germany. No provision of the treaty has rankled so much in the minds and hearts of the German people as this, and impartial historians are agreed that the charge was unjust because no one nation was responsible for the war. The "war guilt" charge the Chancellor emphatically repudiated, thereby, he declared, "giving back to Germany her honor and reputation." With that declaration the last remnant of the treaty provisions that held Germany in leading strings and branded it with sole war responsibility has been consigned to the political scrap-heap.

What was said about the German colonies, another matter which the peace treaty dealt with to Germany's heavy cost, was not entirely new, since Chancellor Hitler had already announced that the former colonies must be recovered. There was special significance, however, in the way in which the subject was referred to in the speech. Declaring that Germany's attitude toward Spain "is not dictated by colonial aspirations," Chancellor Hitler immediately added that "Germany is on good terms with the nations which have not taken away Germany's colonies." Taken literally, the statement would seem to dispose of the fear that Germany seeks to appropriate territory in Eastern Europe or the Ukraine, or, for that matter, anywhere else if a former colonial title were lacking, but it is a pointed hint to Great Britain, the Union of South Africa, France, Belgium and Japan, all of which are holding former German territory under mandates, that "good terms" may not continue if the colonies are not restored. Even Japan, perhaps, is not an exception notwithstanding the agreement into which the two countries lately entered to combat bolshevism.
The issue of peace, specific as well as general, bulks large in the Reichstag speech. "Between Germany and France," Chancellor Hitler declared, "there can be no humanly thinkable cause for a quarrel," and Belgium and Holland have been assured of the readiness of the German Government to recognize and guarantee at any time their complete neutrality. The British argument for collective security, however, put forward in a recent speech by Anthony Eden, British Foreign Secretary, found no support from the German Chancellor, and
since collective security has been for years the only kind of security in which France professed to have any confidence, French opinion was by inference included in Chancellor Hitler's dissent. The speech indicated several reasons for his distrust. "Three times," he declared, he had made "the most concrete proposals" for the reduction or limitation of armaments, the "greatest offer" being "to reduce the German and French armies to 300,000 each and equalize the British, French and German air forces," but not only had the offers been rejected, but they had been answered "by the conclusion of military alliances and the introduction of Soviet Russia into the central European political field, thus making limitation of armaments impossible." With Soviet Russia, as was made clear elsewhere in the speech, Germany could have no fellowship, while to the British plea that armaments should be reduced to the scale needed for national defense, the Chancellor replied that in that case each State must be the judge of what its defense needs are.

Collective security, moreover, in the view of Great Britain and France, should be administered through the League of Nations, and for that institution Chancellor Hitler frankly expressed contempt. "I do not believe," he said, "that the League of Nations can save any of its members. . . . May I be permitted to point out that hitherto the decisive characteristics of the League of Nations have been speeches rather than actions, except once when it would have been better to have confined action to speeches [a reference, apparently, to the imposition of sanctions upon Italy]. . . . If the League of Nations is given only the task of guaranteeing existing conditions and perpetuating them, it might just as well address itself to the task of supervising the rise and fall of the tide or preserving the direction of the Gulf Stream. The League's existence will depend ultimately upon insight into the necessity of reform in the relations between nations."

Almost equally prominent in the speech was the attack on bolshevism. Replying directly to Foreign Secretary Eden's optimistic forecast of an economic revival if Germany would cooperate, Chancellor Hitler declared that "if Europe does not awake from the chaos of bolshevistic infection, then I fear that international trade, despite all the goodwill of individual statesmen, will decrease rather than increase, for this trade is built not only on the undisturbed, secured production of individual people, but on the production of all peoples." Against the division of Europe into two parts, victors and vanquished, which the Treaty of Versailles decreed, he set a second division occasioned by "the proclamation of bolshevist ideas, the essential feature of which was that it was not to be limited to one nation but imposed upon all nations." "We intend to defend ourselves in Germany," it was further announced, "from a pest which tried to make our country the same desert as Spain. . . . The bolshevist idea is the most venomous poison, and I do not want any German citizen to come in contact with it."

The Reichstag speech has been hailed in some quarters as conciliatory. It is such in its repudiation of any ground of quarrel with France and its expression of a continuing willingness to guarantee the neutrality of Belgium and Holland, and in its reminder of the peace offers which have been rejected. Its complete distrust of collective security,
however, implies a condition which neither France nor Great Britain seems likely to accept, at the same time that the professions of peaceful disposition are offset by the continued expansion of German armament, unofficially stated on Tuesday to involve, for 1836-37, an expenditure of $12,600,000,000$ marks. The immediate response of France is to be seen in the approval by the Chamber of Deputies, on the same day, of a defense program calling for 19 ,$000,000,000$ francs during the next four years, in addition to an equal amount for the present fiscal year already included in the budget. The assurances regarding peace in Western Europe, moreover, were not matched by any assurance of peace in the East, and even Switzerland, a neutralized State, is reported to be alarmed at the absence of any reference to its own status in the speech.

None of the problems which center about the war in Spain appears to have been made any easier of solution by the German Chancellor's declarations. Taken in connection with the conditions which the recent German and Italian notes attached to joint action by the Powers-conditions which, in so far as they called for the expulsion of foreign propagandists and agitators from Spain, it would probably be impossible for either Spain or the other Powers to meet-the only thing to be expected is, apparently, a continuance of German aid to the Franco forces. While this will doubtless mean a prolongation of the war, it is, perhaps, all that should have been looked for. In the present state of apprehension and irritation in Europe, on one seems able to devise a procedure which the interested Powers will accept. The Hitler speech, in short, holds out no hope except for continued political uncertainty and a feverish speeding of armaments. Exactly how the Chancellor proposes to cope with the bolshevist peril was not explained, nor is it certain that Premier Mussolini, in spite of his public declarations, shares Hitler's animosity, but it is clear that any attempt to include Soviet Russia in a concert of the European Powers will have to count upon the open opposition of Germany, and possibly of Italy as well. If the Italo-German understanding holds, the attitude of those two Powers will go far to determine the course which international relations, in the immediate future, will take.

## A Threatening Situation

By H. Parker Willis
Discussion among banking authorities, both practical and academic, during the past month has revealed an attitude of worry, not to say alarm, concerning our financial situation that should be frankly faced. The publication of the annual financial reports at Washington, including that of the Secretary of the Treasury, has done nothing to alleviate this feeling, but has furnished official data, previously only vaguely or broadly known, which go a long way to confirm it. The flood disasters of the West, with their need for additonal large expenditures, aggravated by a number of other factors, have put to flight the hopes of early economy in public finance that have been tentatively expressed by some optimistic persons, and have been accompanied by outspoken acknowledgment that a new borrowing program is considered unavoidable. The fact in the case is that the banking community, which means the entire financial and business world, is facing a prospect of no common danger.

Will it be crushing taxation, repudiation of debt, or plain "inflation"? These are the alternatives now talked of at the capital.

In the face of present conditions, the Federal Reserve Board of Governors has postponed for some weeks the application of an increase in reserve requirements, just as had been foreshadowed. The news has brought a strengthening of the bond market and an advance in the price of governmentbonds, reflecting the consciousness on the part of securities owners and buyers that they had heard the worst, and that there was nothing in it that need seriously alarm them. Even if the full application of the new reserve requirements, now deferred until May 1, be reckoned with, there is still a half billion of excess reserves that cannot be touched, while, as things have been going during past months, additional excesses may be expected to be built up before the date when the new requirements become effective in amounts sufficient to offset the latter. It is computed at Washington that the banks now hold about $72 \%$ of the entire public debt of the United States, as against a corresponding holding by English banks of only about $18 \%$ of British indebtedness. One of the main arguments for the increase of reserves has been, here in the financial community, that such an increase would restrain banks from buying more extensively of corporate bonds. It is well to remember that, even under the influence of the highest reserve requirements for New York City banks in force on the first of May, total reserves will be only $26 \%$ of outside demand deposits. The great reductions in reserve requirements, made when the Federal Reserve System was still expected to be a liquid banking system, and still further reduced under the stress of war and the inflationary policies of the McAdoo administration, are generally forgotten. Few remember that during the "old days," prior to the Federal Reserve System, central reserve city reserve requirements were $25 \%$ of deposits, whereas, under our "credit control" policy, the addition now spoken of will amount to only $1 \%$, making $26 \%$ in all. Many banks throughout the country are still going actively into further bond investments and may be expected to continue to do so. Politically-minded bankers have lately been active in bringing pressure to bear against any intervention on the part of the Federal Reserve Board which might possibly impair their profits, present or prospective, from bond purchases or from the bond appreciation for which they still hope.

In view of these facts, the non-partisan observer cannot avoid the conviction that the time is such as emphatically to call for an uprising on the part of the banking community, designed to safeguard the financial safety and soundness of the country. Nothing of the sort is in prospect. Tom K. Smith, President of the American Bankers Association, in his address last week at Pittsburgh, suggested the larger application of bank funds in sound, carefullywatched securities, in mortgage loans, or in "consumer credit," although he has evidently been keenly conscious of the doubts and dangers suggested by such courses of action. Heads of some of our ablest institutions, chief among them Chairman Aldrich of the Chase Bank, have constructively and courageously made reference to the hazards with which the financial situation is faced, and have recommended programs of reform which involve the discontinuance of our silver experiment, the genuine
balancing of the Federal budget, and the application of credit control through reserve increase. The latter suggestion has, at long last, and subject to great postponement, been authorized; but it, of course, is the least important of the suggestions that he had made and, as things stand, is of doubtful efficacy in any case. Banking and Currency Committee members of Congress do not hesitate to say that without more genuine and vigorous support from the community, their efforts at rectification of the present financial and currency situations will continue to be vain. They complain that the wide distribution of government bonds and the effort of the bankers to maintain their value have, in many cases, superseded the more general considerations of banking (and community) soundness which were formerly paramount, and have practically brought further discussion of the subject to a close for the time being. From the banking community as a whole, excepting, as we have said, a few outstanding names, there is apparently nothing for the present to be expected.

At the time of the adoption of the Banking Act of 1935, with its broadening of the powers of the Reserve Board, many hopeful expressions were heard concerning the possibilities of financial leadership and outstanding courage on the part of the latter organization. Every one of the new appointees was specifically and authoritatively asked whether he had any affiliations or engagements that would prevent his acting independently and free of pressure, and gave assurance that he had no such affiliations or engagements. Yet the Board has already degenerated into very much its old situation. Today, according to the most trustworthy information, it is sufficient for the Chairman of the organization, in case of opposition or division of opinion, to distribute among the membership a card bearing the words "F. D. R. wants this" in order to insure a satisfactory majority for his proposal. It would be perfectly idle to comment upon this situation existing in what has proudly been termed "a supreme court of finance"-one whose members President Wilson, during its earlier years, would neither see nor communicate with, in the effort to avoid even the suggestion of political pressure. Enough to say that, as things stand, there is nothing to be expected in the way of leadership from the Board in question, whether this state of things be due to weaknesses of human nature or to the enormous powers of control which have been vested in the Treasury Department by Congreśsional action, and which would suffice to permit the influence of the Department to override any opposing considerations. In these circumstances, the Nation stands in the shadow of extreme financial danger. There are many who are prone to say that thus far no such danger has made itself manifest in any concrete way, and that those who keep reasserting it have placed themselves in the same position as the shepherd boy who was in the habit of calling out "Wolf, wolf," when the beast of prey was nowhere in the neighborhood. It is always easier for the average man to steel himself against "pessimism" with the thought that "big men," or the "government," or some overruling power will bring us out of our difficulties and that those who are disposed to worry are either "morbid" or "trouble-makers." The point of view would be much more powerful in its appeal if those who adopt it would either show
that no threatened danger exists, except in the imagination, or would demonstrate the existence of some practical means of protection against obvious hazards. They have done neither and have made no effort to do so.

Is there, in fact, no way out of the present impasse? A review of the past few years shows that such serious progress as has been made by the United States in financial and business legislation has come at the instance of organized business led by outstanding leaders of resource and public spirit. This was true of the remedial legislation of 1908, and again of the Federal Reserve Act itself. The same is true of many other periods of emergency and of the legislation to which they gave rise. A time has now arrived when some expedient of the same sort must be invoked. There can be no doubt that, in 1933, many unwise steps then taken had the approval, perhaps were taken at the demand of, hasty business men, thrown off their balance by the dangers they were then confronting and apologizing to themselves on the basis of "emergency." This emergency, whatever it was, is officially announced to have disappeared. The President assures us that the danger is largely past and that the time has now come to go on, with courage. Whatever we think of this advice, the time for the emergency legislation which violated all canons of past experience is certainly over. Yet it is a fact that within the past two weeks, and without any save the most casual discussion either in the press or on the floor of Congress, we have reenacted the abominations of 1933-34, reconfirming the "Thomas Amendment" with its "greenbacks," its fiat credit, and its other dangerous features, extending both it and our disastrous silver legislation, as well as our dangerous "stabilization fund," up to 1939, while other measures of an even more extreme nature-if that be pos-sible-are awaiting immediate action. Has not the time come, in the mere interest of self-preservation, for united action on the part of the business community, through its recognized agencies, looking to a combined effort to restore some semblance of order or rationality to our financial structure? Earnestly must we hope, fervently must we pray, for some means of escape from the dangers which now threaten us.

George L. Harrison Elected to Federal Open Market Committee-Roy A. Young Named AlternatelMember
Acting under the provisions of Section 12A of therFederal Reserve Act, as amended by the Banking Act of 1935, the directors of the Federal Reserve Banks of Boston and New York have elected George L. Harrison a representative of the Federal Reserve banks on the Federal Open Market Committee for the year beginning March 1, 1937, and ending Feb. 28, 1938, and have elected Roy A. Young as alternate member of the Committee for the same period, it was anmember of the Committee for Mr. Harrison is President of the New nounced on Feb. 4. Mr. Harrison is President of the New York Reserve
Boston Bank.

Beardsley Rumi Appointed Class C Director of New York Reserve Bank-Board of Governors of Federal Reserve System Also Appoints W. T. Nardin Chairman of St. Louis Bank
F The appointment of Beardsley Rumi, of New York, as $a^{r}$ Class C director of the Federal Reserve Bank of New York was announced in Washington on Jan. 16 by the Board of Governors of the Federal Reserve System. Mr. Rumi will fill the unexpired term ending on Dec. 31, 1938.
The Board also announced the appointment of William T. Nardin, of St. Louis, as Chairman and Federal Reserve Agent for the St. Louis Federal Reserve Bank for the remainder of 1937 and a Class C director for the unexpired term ending on Dec. 31, 1939; and the appointment of J. Frank Porter, of Columbia, Tenn., as a director of the Federal Reserve Bank of Atlanta, for the term expiring on Dec. 31, 1939.

## The New Capital Flotations In the United States During the Month of January

The grand total of new capital flotations in this country during the month of January reached $\$ 622,486,385$, represented by $\$ 305,973,139$ of corporate securities, $\$ 205,513,246$ State and municipal issues, a loan of $\$ 85,000,000$ to the Dominion of Canada and $\$ 26,000,000$ of Farm Loan financing. Refunding operations continued to predominate during January, as we find no less than $\$ 373,960,252$ out of the grand total of $\$ 622,486,385$ comprised refunding, with only $\$ 248,526,133$ representing strictly new capital. Our compilation, as always, includes the stock, bond and note issues by corporations, by holding, investment and trading companies, and by States and municipalities, foreign and domestic, as well as Farm Loan and publicly-offered governmental agency issues.
United States Government financing was along the usual lines during January and consisted of one double and three single offerings of Treasury bills. The details in respect to these offerings are recorded in our remarks further below.

In view of the magnitude and importance of the United States Government financing, we set forth a summary of all Treasury issues marketed during January, giving full particulars of the various offerings

## New Treasury Financing During the Month of January,

 1937Secretary of the Treasury Morgenthau on Dec. 31 announced a new offering of $\$ 100,000,000$ or thereabouts of 71-day bills and 273-day bills in the amount of $\$ 50,000,000$ or thereabouts, respectively. The two issues of Treasury bills were dated Jan. 6, the 71-day bills maturing March 18 and the 273-day bills falling due Oct. 6, 1937.

Subscriptions for the 71-day Treasury bills totaled $\$ 105$, 265,000 , of which $\$ 50,055,000$ was accepted. The average price of Treasury bills of this series was 99.961 , the average rate on a bank discount basis being $0.199 \%$.
Tenders for the 273-day Treasury bills total $\$ 131,041,000$, of which $\$ 50,125,000$ was accepted. The average price of Treasury bills of this series was 99.760 , the average rate on a bank discount basis being $0.316 \%$. This financing provided for the refunding of $\$ 50,180,000$ of maturing bills, leaving $\$ 50,000,000$ as an addition to the public debt.
On Jan. 7 Mr . Morgenthau announced a new offering of $\$ 50,000,000$ or thereabouts of 273 -day Treasury bills. The bills were dated Jan. 13 and will mature Oct. 13, 1937. Applications to the offering totaled $\$ 125,862,000$, of which $\$ 50,022,000$ was accepted. The average price for the bills was 99.747 , the average rate on a discount basis being $0.333 \%$. Issued to replace maturing bills.
Mr. Morgenthau on Jan. 14 announced a further new offering of $\$ 50,000,000$ or thereabouts of 273 -day Treasury bills. The bills were dated Jan. 20 and will mature Oct. 20, 1937. Tenders to the offering totaled $\$ 124,392,000$, of which $\$ 50,015,000$ was accepted. The average price for the bills was 99.738 , the average on a discount basis being $0.345 \%$. This financing provided for the refunding of a similar amount of maturing bills.
On Jan. 21 Mr . Morgenthau announced a new offering of $\$ 50,000,000$ or thereabouts of 273-day Treasury bills. The bills were dated Jan. 27 and will mature Oct. 27, 1937. Subscriptions to the offering totaled $\$ 134,878,000$, of which $\$ 50,038,000$ was accepted. The average price of Treasury bills was 99.726 , the average rate on a bank discount basis being $0.361 \%$. Issued to replace maturing bills.

In the following we show in tabular form the Treasury financing done during the month of January, 1937. The results show that the Government disposed of $\$ 250,255,000$, of which $\$ 200,255,000$ went to take up existing issues and of which $\$ 200,255,000$ went to take up existing issues
$\$ 50,000,000$ represented an addition to the public debt. UNITED STATES TREASURY FINANCING DURING JANUARY, 1937

## Features of January Private Financing

Proceeding further with our analysis of the corporate flotations announced during Janvary, we observe that industrial and miscellaneous issues accounted for $\$ 164,902,445$, as against $\$ 181,082,035$ reported for them in December. Public utility offerings amounted to $\$ 77,734,694$ during January, as compared with $\$ 395,594,300$ for that group in December, while railroad emissions in January totaled $\$ 63,336,000$, as against $\$ 49,236,000$ in December.

The total corporate securities of all kinds put out during January was, as already stated, $\$ 305,973,139$, of which $\$ 149,946,000$ comprised long-term bonds and notes, $\$ 9,050$,000 was of short-term maturity and $\$ 146,977,139$ represented stock offerings. The portion of the month's corporate flotations used for refunding purposes was no less than $\$ 203,516,962$, or about $67 \%$ of the total; in the previous month the refunding portion was $\$ 407,706,562$, or more than $65 \%$ of the total. In January a year ago the amount for refunding was $\$ 200,972,556$, representing about $73 \%$ of that month's total. Refunding issues of importance during January (1937) were as follows: $\$ 50,000,000$ Great Northern Ry. Co. gen. mtge. $33 / 4$ s, I, 1967, used entirely for refunding; 547,788 shs. Consumers Power Co. $\$ 4.50$ cum. pref. stock, all used for refunding, and 500,000 shares Tide Water Associated Oil Co. $\$ 4.50$ cum. conv. pref. stock, used entirely for refunding.
The largest corporate offering during January was 547,788 shares Consumers Power Co. $\$ 4.50$ cum. pref. stock, priced at $1001 / 2$, yielding about $4.48 \% ; 500,000$ shares Tide Water Associated Oil Co. $\$ 4.50$ cum. conv. pref. stock, issued at 103, to yield about $4.37 \%$; $\$ 50,000,000$ Great Northern Ry. Co. gen. mtge. $33 / 4 \mathrm{~s}$, I, Jan. 1, 1967, offered at $971 / 2$, to yield $3.90 \%$, and $\$ 40,000,000$ Tide Water Associated Oil Co. deb. $31 / 2 \mathrm{~s}$, Jan. 1, 1952, floated at 101, to yield $3.41 \%$

Included in the financing done during the month of January was an offering of $\$ 26,000,000$ Federal Intermediate Credit Banks consolidated debenture $11 / 2 \mathrm{~s}$, dated Jan. 15 , 1937, and due in three and six months, offered, as usual, at price on application.
Two of the offerings made during January carried rights to acquire stock on a basis of one kind or another. They were as follows:

500,000 shares Tide Water Associated Oil Co. \$4.50 cum. conv. pref. stock, convertible into common stock at any time on or before Jan. 1, 1947, in ratios ranging from 3 7-11 shares to $21 / 2$ shares of common stock
90,000 shares Emporium Capwell Co. $41 / 2 \%$ cum. pref. stock with warrants to purchase 1 share of capital stock of Emporium Capwell Corp., the holding company, over a period of 10 years, at prices ranging from $\$ 26$ to $\$ 34$ per share.

In the following we furnish a complete summary of the new financing-corporate, State and city, foreign government, as well as Farm Loan issues-brought out in the United States during January, and covering all classes of issues except those of the United States Government:
summary of corporate, foreign government, farm loan AND MUNICIPAL FINANCING

In the elaborate and comprebensive table on the succeeding page we compare the foregoing figures for 1937 with the corresponding figures for the four years preceding, thus affording a five-vear comparison: We also furnish a detailed analysis for the five years of the corporate offerings, showing separately the amounts for all different classes of corporasepara
tions.
tions
Following the full-page table we give complete details of the new capital flotations during January, including every issue of any kind brought out in that month.

## THE ST. LOUIS STOCK EXCHANGE-STOCKS AND BONDS

In the following we furnish a monthly record of the high and low prices on the St. Louis Stock Exchange for each month of the last two years. The tables include all stocks and bonds in which any dealings occurred during the years 1935 and 1936, and the prices are all based on actual sales. The number of shares traded in during the year 1936 was 424,455 shares, as compared with 149,630 shares during the year 1935 . The money value of transactions in 1936 was $\$ 9,302,491$ and in 1935 was $\$ 3,470,441$.

For the record of previous years see "Chronicle" of Feb. 8, 1936, page 850; Feb. 2, 1935, page 697; Feb. 3, 1934, page 739; Feb. 4, 1933, page 720; Feb. 6, 1932, page 912; Feb. 7, 1931, page 914; Feb. 1, 1930, page 695; Feb. 2, 1929, page 636; Feb. 4, 1928, page 632; Feb. 5, 1927, page 697.

## Course of Security Prices in Kansas City, Mo.

The Prescott, Wright, Snider Co. and Steer Brothers \& Co. keep a record of the securities having a market in Kansas City, and they have courteously placed that record at our disposal. The table below shows the high and low prices of these securities for the calendar year 1936, together with the bid and asked prices Dec. 301936.

## The Course of the Bond Market

An increase of $331 / 3 \%$ in reserve requirements for Federal Reserve member banks was announced a week ago, raising requirements to the $14-20-26 \%$ level, or double what they were before the $50 \%$ increase of last August. The new rules will go into effect partially on March 1 and completely on May 1. It is estimated that excess reserves should be reduced from the current $\$ 2,150$ millions to around $\$ 500$ millions. The bond market, which had been selling off for two weeks upon hints that reserve requirements were to be raised again, rallied moderately on Monday. Lower-
grade bonds continued to strengthen fractionally throughout the week, but high-grades softened somewhat. On Monday quotations on bankers' acceptances were raised $1 / 16$ to $1 / 8$ of $1 \%$.

High-grade railroad bonds displayed a firmer undertone. Atchison gen. $4 \mathrm{~s}, 1995$, declined $1 / 4$ to $1131 / 4$; Baltimore \& Ohio $4 \mathrm{~s}, 1948$, advanced $1 / 2$ to 107 ; Union Pacific $4 \mathrm{~s}, 1947$, were unchanged at $1141 / 2$. Lower-grade railroad bonds have been somewhat higher, several issues regaining a part of their losses of last week. Baltimore \& Ohio 5s, 1995, ad vanced' $11 / 2$ to $921 / 2$; Illinois Central 5 s , 1963, gained $31 / 2$ at $901 / 2$; Erie 5 s, 1975, at 87 were $11 / 2$ points higher. Issues
of several bankrupt or receivership railroads showed sub stantial gains in sympathy with favorable earnings reports and encouraging prospects. Mobile \& Ohio $41 / 2 \mathrm{~s}, 1977$, ad ranced $31 / 2$ to 37 , and New Orleans Texas \& Mexico 5s, 1054 , rose $41 / 4$ to $561 / 4$.
Following several weeks of decline, high-grade utility bonds recorded some recovery this week. New York Edison 31/4s, 1965, closed at 1031/4, up $1 / 4$; Potomac Electric Power $31 / 4$ s, 1966, were unchanged at $104 \% / 4$; Pacific Gas \& Electric $3 \frac{3}{4}$ s, 1961, at $1047 / 8$ were up $5 / 8$. The trend of lower grades has also been up. Bonds of companies operating in the neighborhood of the Tennessee Valley Authority have been little affected by news of the expiration of existing contract arrangements. New offerings were limited to $\$ 18,000,000$ Atlantic City Electric gen. $31 / 2 \mathrm{~s}, 1964$, for refunding purposes.

With the exception of bonds having conversion or stock purchase privileges and securities of companies in reorganization, most of the industrial list has fluctuated over a narrow range. The foods have tended to seek fractionally
higher levels, The amusements have been soft. Non-fer rous metal issues have been steady, General Cable $51 / 2 \mathrm{~S}$, 1947, advancing $1 / 8$ to $105 \frac{5}{6}$. Some of the oils moved for ward, Consolidated Oil $31 / 2 \mathrm{~s}, 1951$, closing at $1053 / 4$, up $1 / 2$ Hew important price changes have been recorded among the equipments, but Baldwin Ldcomotive 6s, 1938, ex-warr (stamped) skyrocketed 44 points to 203 on the news that final court approval of the reorganization plan had been received. Obligations of tobacco companies declined; at $1811 / 4$ Lorillard $7 \mathrm{~s}, 1944$, were off $7 / 8$.
The foreign bond market has been quiet, with a firm undre Italian issues have been outstanding for their trength; among Europeans, German issues have been irreg ar as were French, while Scandinavian bonds moved narrowly. Chilean issues have been soft in the South American lepartment, which in general showed little change. Some of the Japanese utilities displayed a firming tendency in an therwise inactive list.
Moody's computed bond prices and bond yield averages are given in the following tables:

## Indications of Business Activity

## THE STATE OF TRADE-COMMERCIAL EPITOME

Friday Night, Feb. 5, 1937.
With the floods in the Ohio and Mississippi Valleys cutting heavily into coal production and steel activity, and also having a marked effect in reducing merchandise car loadings last week, business activity experienced a temporary setback. The "Journal of Commerce" weekly business index registered a decline of four points from the previous week's figure of 96.6 , the current index figure being 92.5 (a preliminary figure). This compares with 77.0 during the corresponding week of last year. However, according to the "Iron Age" the steel industry is more than holding its own, despite floods and strikes and the threats of labor leaders that the steel industry would eventually come in for its share of labor disturbance. The "Review," in its weekly summary of the steel industry, reports that schedules for the week are at $79 \%$ of capacity against $75 \%$ a week ago, due to resumption of operations at plants closed by floods, Pittsburgh output being at a peak for the sixyear period. As flood waters recede some fair idea is obtained of the extent of damage in many areas, and already indications are that there will be a tremendous replacement business. As a matter of fact, prospects for steel are so bright that there is talk of higher prices by the end of the current quarter, and this is being further reflected in marked advances in the securities markets. Resumption of work at some of the plants of General Motors Corp. has resulted in the release of suspended tonnages of some products, particularly sheets and strip. Meanwhile, other automobile companies are straining for higher production, Ford having reached 6,000 cars a day. That company has inquired for 80,000 tons of square and round bars and slabs, the latter for processing in its own sheet mills. Total output of motor cars is moving up slowly, having gained a little more than 3,000 units last week. Production of electricity in the United States for the week ended Jan. 30 was $2,214,654,000$ kilowatt hours, a decrease of $1.9 \%$ from the preceding week, but an increase of $13.3 \%$ over the corresponding week a year ago. After a brief interruption by flood conditions last week, retail trade volume shows an increase of $10 \%$ to $15 \%$ over the corresponding week of 1936. Wholesale volume expanded, showing an increase of $18 \%$ to $22 \%$ over last year. Car loadings totaled 659,790 cars for the week ended Jan. 30, a decrease of 10,586 cars from the previous week, but an increase of 37,900 cars over the like period of 1936. The net operating income of the Class I roads during 1936 totaled $\$ 665,479,894$, or a return of $2.57 \%$ on their property investment, compared with $\$ 497$,359,578 in 1935, as reported today by the Association of American Railroads. With only light to moderate rains during the past week, flood reports show a marked fall in the upper Ohio River and a slight recession in its lower portions. Latest advices are that Cairo mastered the crest of the flood last night. The stage rose minutely before midnight to 59.62 feet, and there remained until $9: 30 \mathrm{a} . \mathrm{m}$. today when the flood tide began to fall. But more satisfactory is the river situation below Cairo. Now, the flood at crest is bearing down on Memphis. A crest is expected by Sunday night, to remain two days, unless there is additional heavy rain. The sky has been unusually fair in most of the flood areas since Feb, 1. For the country as a whole, temperatures over the western half continued abnormally low, and they remained generally above normal east of the Mississipni River, as during several preceding weeks, but the Southeast was considerably cooler than previously with temperatures averaging near normal. The line of sub-zero temperatures extended southward approximately to the same position as last week. Precipitation was frequent in the more eastern States and most Pacific sections, but there was much less than recently in the Central Valleys and Great Plains. In the New York City area it was cold and clear during most of the week. 'Today it was snowing and cold here, with temperatures ranging from 27 to 37 degrees. The forecast was for cloudy and colder tonight. Saturday fair. Overnight at Boston it was 26 to 32 degrees; Baltimore, 30 to 32 ; Pittsburgh, 14 to 32: Portland, Me., 20 to 30 ; Chicago, 6 to 28; Cincinnati, 18 to 32 ; Cleveland, 18 to 32 ; Detroit, 20 to 28; Charleston, 36 to 52: Milwaukee, 6 to 26 ; Savannah, 38 to 56 ; Dallas, 38 to 56 ; Kansas City, 18 to 24 ; Springfield, Mo., 12 to 22 ; Oklahoma City, 36 to 44 ; Salt Lake ICity, 40 to 50; Seattle, 34 to 48 ; Montreal, 4 to 14. and Winnipeg, 12 below to 4 below.

## Moody's Commodity Index Advances

Moody's Daily Index of Staple Commodity Prices advanced this week, closing at 206.0 this Friday, as compared with 205.0 a week ago.
The main factors affecting the index were the rise in wheat and hog prices, and the declines in cocoa and sugar prices. There were also advances in rubber, corn, and steel, and declines in silk, hides, cotton, wool and coffee. There were no net changes in the prices of silver, copper andllead.

The movement of the index during the week, with comparisons, is as follows:

| Fri. | Jan. 29.-.-----------205 | 2 Weas AbO, Jan |

## "Annalist" Weekly Index of Wholesale Commodity Prices Declined 0.1 Point During Week Ended Feb. 2 -

Decline of 0.1 point in the "Annalist" Weekly Index of Wholesale Commodity Prices reflected a number of offsetting price changes. The "Annalist" added:
The grains were off on prospects of larger 1937 crops, butter and steers declined, rubber was weaker as the motor strike continued, and cocoa broke in the past six months. Hogs, however were up, as were coffee, cotton and crude petroleum.

## Revenue Freight Car Loadings Drop 10,586 Cars in

 Week Ended Jan. 30Loadings of revenue freight for the week ending Jan. 30, 1937, totaled 659,790 cars. This is a decline of 10,586 cars, or $1.6 \%$, from the preceding week, a gain of 37,900 cars, or $6.1 \%$ over the total for the like week of 1936 , and an increase of 62,829 cars, or $10.5 \%$ over the total loadings for the corresponding week of 1935. For the week ending Jan. 23 1937 ladings $14.7 \%$ above those for the like week of 1936, land $20.7 \%$ 1 1936, and $20.7 \%$ over those for the corresponding week of 1935. Loadings for the week ended Jan. 16, 1937, showed a gain of $14.5 \%$ when compared with 1936 , and a rise of $24.4 \%$ when comparison is made with the same week of 1935.
The first 18 major railroads to report for the week ended Jan. 30, 1937 loaded a total of 306,649 cars of revenue freight on their own lines, compared with 315,718 cars in the preceding week and 295,383 cars in the seven days ended Feb. 1, 1936. A comparative table follows:

The Association of American Railroads in reviewing the week ended Jan. 23 reported as follows:
Loading of revenue freight for the week ended Jan. 23 totaled 670,376 cars. This was an increase of 85,739 cars or $14.7 \%$ above the corresponding eek in 1936 and an increase of 114,848 cars or $20.7 \%$ above the corresponding week in 1935
Loading of revenue freight for the week of Jan. 23 was a decrease of 29,862 cars or $4.3 \%$ below the preceding week partially due to flood conditions on the Ohio River.
Miscellaneous freight loading for the week ended Jan. 23, totaled 261,838 cars, a decrease of 13,208 cars below the preceding week, but an increase of 53,836 cars above the corresponding week in 1936, and 73,665 cars above the corresponding week in 1935.

Loading of merchandise less than carload lot freight totaled 158,937 cars, a decrease of 2,342 cars below the preceding week, but an increase of 14,756 cars above the corresponding week in 1936 and 12,625 cars above the same week in 1935.
Kht Coal loading amounted to 154,833 cars, a decrease of 6,216 cars below the preceding week, but an increase of 7,283 cars above the corresponding week in 1936, and 1,377 cars above the same week in 1935.
Grain and grain products loading totaled 30,101 cars, a decrease of 2,034 cars below the preceding week, but an increase of 990 cars above the coresponding week in 1936 and 6,503 cars above the same week in 1935. In the estern districts alone, grain and grain products loading for the week ndi. in 1936. a 1936.
Live stock loading amounted to 12,876 cars, a decrease of 2,957 cars In 1936, this was, however, a decrease of 923 cars below the same week in 1935. In the western districts alone, loading of live stock for the weak ended Jan. 23 totaled 9,531 cars, a decrease of 2,591 cars below the preceding week, but an increase of 260 cars above the corresponding week in 1936.
whorest products loading totaled 30,631 cars, a decrease of 1,289 cars below the preceding week, but an-increase of 2,325 cars above the same week in 1936, and 12,702 cars above the same week in 1935.

Ore loading amounted to 9,002 cars, a decrease of 2,075 cars below the preceding week, but an increase of 3,741 cars above the corresponding week in 1936 and 5,579 cars above the corresponding week in 1935.
Coke loading amounted to $\mathbf{1 2 , 1 3 8}$ cars, an increase of 259 cars above the preceding week, 2,466 cars above the same week in 1936 and 3,320 cars above the same week in 1935.
All districts reported increases in the number of cars loaded with revenue freight, compared with the corresponding weeks in 1936 and 1935.
Loading of revenue freight in 1937 compared with the two previous years follows:

In the following table we undertake to show also the loadings for separate roads and systems for the week ended Jan. 23, 1937. During this period a total of 100 roads showed increases when compared with the same week last year:

REVENUE FREIGHT LOADED AND RECEIVED FROM CONNECTIONS (NUMBER OF CARS)-WEEK ENDED JAN, 23

Increase of $21 \%$ in Retail Food Costs Between Dec. 15 and Jan. 12 Reported by United States Department of Labor
The retail cost of food advanced $2.1 \%$ between Dec. 15 , 1936, and Jan. 12, 1937, Commissioner Lubin of the Bureau of Labor Statistics, United States Department of Labor announced Jan. 30. "Seventy-two of the 84 foods included
in the Bureau of Labor Statistics index showed price rises over the month," Mr. Lubin said. "Food costs rose in 47 of the 51 reporting cities." The Commissioner added:
On Jan. 12 the index for all foods was $84.6(1923-25=100)$. This is $3.6 \%$ higher than for Jan. 14 of last year. Food costs are now higher than they b and Jan. 12. Prices for 10 of the 13 items in the group advanced. The

Volume 144
Financial Chronicle
largest average increase, $2.3 \%$, was shown for flour, with higher prices reported in 36 of the 51 cities. Bread prices also rose. For white bread, $0.3 \%$. Whole wheat bread was $0.7 \%$ higher and rye bread $1.5 \%$ above prices for last period. Rice showed the greatest decrease, $1.3 \%$. There were no other significant price changes in the group.
The cost of meats, which has been falling since Sept. 15, advanced $2.9 \%$ as a result of higher prices for 18 of the 21 items. Higher meat costs were reported in 49 of the 51 cities. In 22 of these cities, the increases amounted to more than $3 \%$. Advances for the sub-groups were: Beef and veal, $3.1 \%$; pork, $3.1 \%$; lamb, $3.1 \%$; chickens, $2.6 \%$; salmon, canned, $0.3 \%$. The two fresh pork items, pork chops and loin roast, showed the largest gains 7.1 and $7.7 \%$, respectively. The advances for beef ranged from $1.1 \%$ for liver to $5.9 \%$ for plate beef. Leg of lamb was $3.4 \%$ higher than last month and rib chops $4.1 \%$ higher.
Contrary to the usual seasonal movement, dairy products moved upward $1.1 \%$. Butter prices rose in 48 of the 51 cities. Fresh milk increased $0.4 \%$ partially the result of a sales tax becoming effective in Birmingham and Mobile on the first of the year.

a Prellminary.
Egg costs declined $11.2 \%$ following closely the normal seasonal trend, Lower prices were recorded the country over. On Jan. 12, egg prices were $3.4 \%$ above Jan. 14 of last year.
The cost of fruits and vegetables moved upward $7.9 \%$ due chiefly to a continued advance throughout the country for the fresh items in the group. Increases for the fresh items ranged from $0.6 \%$ for oranges and higher prices for potatoes and the average for the United States was above that for any January since 1930. Other significant price advances for fresh products were $10.5 \%$ for carrots, $9.7 \%$ for celery, $7.7 \%$ for green beans, and $5.0 \%$ for apples. The index for canned fruits and vegetables rose $0.3 \%$ and for dried, $1.7 \%$. All items in these sub-groups registered gains, except canned corn and raisins. Navy beans increased $3.5 \%$, continuing the upward movement which began in May.
Beverages and chocolate costs showed an advance of $1.1 \%$. Coffee prices were higher in 47 cities. The average increase for coffee was $1.8 \%$. Increases for other items in this group were as follows: Chocolate, $1.1 \%$; tea, $0.8 \%$; and cocoa, $0.2 \%$.
The index for fats and oils rose $3.2 \%$ between Dec. 15 and Jan. 12. Lard prices followed the upward movement of fresh pork prices and showed an advance of $5.3 \%$. Lard compound, for which a gain of $4.0 \%$ was rer istered, was higer inan an pring period dur 1931 . leomargarine prices are higher than they have been since May,
this item during the past month amounted to $3.2 \%$.
this item during the past month amounted to of sugar rose $1.8 \%$, and as a result, the index for the sugar and sweets group moved upward, $1.5 \%$. Other items in this group were also higher than on Dec. 15 .
Food costs increased in 47 of the 51 cities and declined in four. Manchester showed the greatest increase, $4.5 \%$. In this city, prices of fresh pork, potatoes, and apples rose sharply. Other significant advances were $4.4 \%$ for Seattle, and $3.6 \%$ for Detroit, Kansas City and St. Louis. The rise in fresh vegetable prices was the chief factor in the advance shown for these cities.
The four cities in which lower food costs were reported are all in the South Atlantic region. They are Jacksonville, - $0.6 \%$; Richmond, - $0.5 \%$; Savannah, $-0.3 \%$, and Charleston, $-0.2 \%$.

a Preliminary.
Wholesale Commodity Price Average Further Declined During Week Ended Jan. 30, According to National Fertilizer Association
The general level of wholesale commodity prices again declined in the week ended Jan. 30, according to the index compiled by the National Fertilizer Association. Last week the index (based on the 1926-1928 average of 100\%) stood at $84.6 \%$, as compared with $85.0 \%$ the previous week. A at $84.6 \%$, as compared with $85.0 \%$ the previous week. A
month ago it registered $84.0 \%$ and a year ago $77.9 \%$. The month ago it registered $84.0 \%$ and a year ago ${ }^{\text {announcement by the Association, under date of Feb. 1, }}$ continued:
As had been the case in the preceding week the decline last week was due to lower prices for farm products and foods, with all other commodities showing a continuation of the rise which began last fall. Grains and live stock were generally lower during the week with the only important price increase in the farm product group being in cotton. Ohanges in prices of food products were mixed with 10 items included in the group declining and seven advancing; declines in several of the more heavily weighted items resulted ins group index far petroleum and fuel oil weached in the last
the upturn in the fuel index, taking it to the highest point reached in the recovery period. Slight advances were registered by the indexes representing the prices of textiles, fertilizer materials, and miscellaneous commodities.
Twenty-seven price series included in the index declined during the week and 23 advanced; in the preceding week there were 30 declines and 34 advances.

Wholesale Commodity Prices Advanced Moderately During Week Ended Jan, 30 According to United States Department of Labor
A moderate advance marked the trend in wholesale commodity prices during the week ended Jan. 30, according to an announcement Feb .4 by Commissioner Lubin, of the Bureau of Labor Statistics, United States Department of Labor. "The Bureau's index rose 0.1\%," Mr. Lubin said, adding:
A sharp increase in market prices of farm products largely accounted for the rise in the all commodity index. The recent advance brought the index to $85.4 \%$ of the 1926 average. The advance over a month ago was $0.8 \%$ As compared with a year ago, the index is up by $6.1 \%$.
In addition to the rise in farm products, prices of foods, hides and leather
products, fuel and lighting materials, housefurnishing gods products, fuel and lighting materials, housefurnishing goods, and miscelTextile products metals and motal products and building materials. Textile products, metals and metal
mained unchanged at last week's level.
The index for the nonagricultural commodities group remained unchanged at 84.1 It is $0.7 \%$ above a month ago and $4.2 \%$ above a vear aganged dustrial commodity prices as measured by the index for the group of 'all commodities other than farm products and processed foods' rose $0.1 \%$, to a point $0.7 \%$ above a month ago and $5.2 \%$ above a year ago.
Wholesale prices of raw materials increased $0.9 \%$ during the week. The index for this group is $1.3 \%$ higher than for the corresponding week of a month ago and $11.5 \%$ above that of a year ago.
The group of semi-manufactured articles declined $0.2 \%$. Prices for this group of partially manufactured commodities are $1.3 \%$ above the level of last month and $14.2 \%$ above that of last year.
The index for finished products remained at 84.6 and shows increases of $0.6 \%$ over a month ago and $2.8 \%$ over a year ago.
The announcement issued Feb. 4 by Commissioner Lubin also contained the following:
Due to a $1.8 \%$ increase in livestock and poultry prices together with higher prices for barley, corn, rye, cotton, apples, lemons, oranges, dried beans, sweet potatoes, and wool the index for the farm products group advanced $1.2 \%$. The grains subgroup declined $1.9 \%$ as a result of falling prices for oats and wheat. Lower prices were reported for eggs, peanuts, product index- $91.4-$ is $1.1 \%$ above the corresponding index of last month and $15 \%$ of that of last year.
The wholesale food index advanced $0.2 \%$ as a result of a sharp advance in fruit and vegetable prices. Cereal products and meats declined and dairy products remained firm. Food items which advanced in price were butter, raisins, fresh fruit and vegetables, cured pork, cocoa beans, peppor, and cottonseed oil. Lower prices were reported for cheese in the New York market, flour, canned fruits, lamb, mutton, fresh pork, mess pork, veal, coffee, copra, glucose, lard, oleo oil, coconut oil, and peanut oil. The current food index- 86.9 -shows increases of $0.8 \%$ over a month ago and 4.4\% over a year ago.

The index for the hides and leather products group rose by $0.2 \%$ to $102.8 \%$ of the 1926 average. Prices of hides, skins, and leather advanced. Shoes and other leather products such as gloves, belting, harness, and luggage remained steady.

A minor advance in petroleum product prices caused the index for the fuel and lighting materials group to increase $0.1 \%$. Average prices of coal and coke remained stationary.
Advancing prices of furnshings were responsible for the slight increase in the ho
Wholesale prices of crude rubber rose $3.5 \%$ during the week, and paper and pulp advanced $0.7 \%$. Higher prices were also reported for cylinder and pulp advanced $0.7 \%$. Higher prices were also reported for cylinder oll and cigarettes.
Falling prices for chemicals and mixed fertilizers caused the index for the chemicals and drugs group to decline $0.5 \%$. Fertilizer materials advanced fractionally. The drug and pharmaceuticals subgroup was unchanged at last week's level.
The textile products group index remained unchanged at 76.9. Olothing and woolen and worsted goods advanced. Silk prices fell sharply, and minor decreases were reported in cotton goods and other textile products including burlap, raw jute, and sisal. Knit goods remained firm.
Advancing prices for scrap steel and certain plumbing and heating fixtures did not affect the index for the metals and metal products group as a whole. It remained at $90.7 \%$ of the 1926 average. Pig tin declined and motor vehicles were steady
No change was shown in the building materials group. Brick, sand, gravel, and roofing slate prices were higher. Rosin and turpentine declined.
Average wholesale prices of cement and structural steel showed no change.

The index of the Bureau of Labor Statistics includes 784 price series and is based on the average for the year 1926 as 100

## Production of Electricity for Public Use During December $15 \%$ Above a Year Ago

The Federal Power Commission in its monthly electrical report disclosed that the production of electricity for public use in the United States during the month of December, 1936 , totaled $10,477,667,000 \mathrm{kwh}$. This is a gain of $15 \%$ when compared with the $9,138,638,000 \mathrm{kwh}$. produced in December, 1935. For the month of November, 1936, output totaled $9,774,832,000 \mathrm{kwh}$.

Of the December, 1936, output a total of $3,618,422,000$ kwh. was produced by water power and $6,859,245,000$ kwh. by fuels. The Survey's statement follows:

STATES (IN KILOWATT-HOURS)

The average daily production of electricity for public use in the United States in December was $337,989,000 \mathrm{kwh}$., $3.6 \%$ more than the average daily production in November and the highest average daily production for any month of record. The normal change from November to December is $+1.1 \%$.
The production of electricity by the use of water power in December was $35 \%$ of the total.
The total output for the year 1936 amounted to $113,473,000,000 \mathrm{kwh}$. according to preliminary data. This is $14 \%$ above the output for the year 1935 which was the year of the previous maximum.

|  |  |  |  |  |  |  |

The quantities given in the tables are based on the operation of plants engaged in generating electricity for public use, including central stations, both publicly and privately owned, electric railway plants, plants operated by steam railroads generating electricity for traction, Bureau of Reclamation plants, miscellaneous Federal and State projects, and that part of the output of manufacturing plants which is sold. Accurate data are received each month representing approximately roming $2 \%$ of the output is estmated and corrections are made as current month re preliminary while those for the preceding morth the corrected in accordance with actual reports received and wary slightly from the preliminary data.

## Coal Stocks and Consumption

The total stocks of coal held at electric power utility plants on Jan. 1. 1937 amounted to $8,261,860$ net tons. This was an increase of $3.9 \%$ when compared with the amount of coal in reserve on Dec. 1, 1936. Of this total stock, $7,161,796$ tons were bituminous coal and $1,100,064$ tons were anthracite, which were increases, respectively, of $4.4 \%$ and $1 \%$ when compared with the corresponding stocks on Dec. 1, 1936.
Electric power utility plants consumed $3,927,592$ net tons of coal in December, 1936. This was an increase of $6.7 \%$ when compared with the coal increased $6.9 \%$ and the use of anthracite increased $3.9 \%$ bituminous pared with the tinnage consumed in November 1936.

In terms of days' supply, which is calculated at the current rate of consumption, there was enough bituminous coal on hand on Jan. 1, 1937 to last 59 days and enough anthracite for 203 days' requirements.
(The Coal Division, Bureau of Mines, cooperates in the preparation of these reports.)

## Electric Output for Week Ended Jan. 30, 1937, Totals 2,214,654,000 Kwh.

The Edison Electric Institute, in its weekly statement, disclosed that the production of electricity by the electric light and power industry of the United States for the week light and power industry of the United States for or $13.3 \%$ ended Jan. 30, 1937, totaled 2,214,654,000 kwh., or $13.3 \%$ week of 1936 . The Institute's statement follows:
percentage increase over previous year

Weekly Report of Lumber Movement, Week Ended Jan. 23, 1937
The lumber industry during the week ended Jan. 23, 1927, stood at $45 \%$ of the 1929 weekly average of production and $52 \%$ of 1929 shipments. Production and shipments continued low, due to strikes and floods; new orders, like those of the preceding week, were appreciably above the holiday weeks, though not equal to the high order records of early December. National production reported during the week ended Jan. 23 by $9 \%$ fewer mills was $6 \%$ below the output of the previous week, shipments were $7 \%$ below shipments, and new orders $5 \%$ below orders of that week, according to reports to the National Lumber Manufacturers Association from regional associations covering the operations of important hardwood and softwood mills. Reported rew business during the week ended Jan. 23, 1937, was $43 \%$ in excess of production; shipments were $12 \%$ above output. Reported new business of the previous week was $43 \%$ above production; shipments were $14 \%$ above output. Production in the week ended Jan. 23 was shown by reporting hardin the week ended Jan. 23 was shown by reporting hardwood and softwood mills $13 \%$ below the corresponding week
of 1936, shipments were $9 \%$ below shipments of last year's of 1936, shipments were $9 \%$ below shipments of last year's
week, and new orders $9 \%$ above orders of a year ago. The Association's report further disclosed:
During the week ended Jan. 23, 1937, 500 mills produced $158,249,000$ feet of hardwoods and softwoods combined, shipped 177,952,000 feet, booked orders of $225,830,000$ feet. Revised figures for the preceding week were: Mills, 550 ; production, $168,928,000$ feet; shipments, 191,815,000 feet; orders, $236,609,000$ feet.
All regions but Southern cypress, Northern hemlock and Northern hardwoods reported orders above production in the week ended Jan. 23, 1937. All but West Coast, California redwood, Northern hemlock and Northern hardwoods reported shipments above output. All reporting regions but West Coast and Northern hemlock showed orders above those of corresponding week of 1936; all but West Coast and Northern pine reported
shipments above shipments of last year's week, and all but Southern pine shipments above shipments of last year's week, and all but Southern pine and West Coast reported production above similar week of 1936.
Lumber orders reported for the week ended Jan. 23, 1937, by 430 softwood mills totaled $214,419,000$ feet, or $45 \%$ above the production of the same mills. Shipments as reported for the same week were $165,535,000$ eet, or $12 \%$ above production. Production was 147.908,000 feet.
Reports from 89 hardwood mills give new business as $11,411,000$ feet, ir $10 \%$ above production. Shipmens as repor Pithe $12,417,000$ feet, or $20 \%$ above production. Production was $10,341,000$ feet.

## Identical Mill Reports

Last week's production of 422 identical softwood mills was $146,172,000$ feet, and a year ago it was $170,650,000$ feet ; shipments were, respectively, $164,302,000$ feet and $183,852,000$ feet, and orders received, $213,186,000$ feet and $197,282,000$ feet. In the case of hardwoods, 68 identical mills reported production last week and a year ago $8,01,00$ feet and $7,353,000$ feet; shipments, $10,214,000$ feet and $7,159,000$ feet, and orders, $9,373,000$ feet and $6,437,000$ feet.

Country's Foreign Trade in December-Imports and Exports
The Bureau of Statistics of the Department of Commerce at Washington on Jan. 29 issued its statement on the foreign trade of the United States for December and the 12 months ended with December, with comparison by months back to 1931. The report is as follows:

United States foreign trade increased sharply in December despite the restrictive tendencies of the maritime strike. Exports, which usually
decline seasonally in December as a result of smaller shipments of unmanufactured cotton and tobacco, were $2 \%$ larger in value than in November, while imports were $24 \%$ larger.
Exports, including reexports, amounted to $\$ 229,739,000$, compared with $\$ 225,767,000$ in November, 1936, and $\$ 223,469,000$ in December, 1935. General imports (goods entered for storage in bonded warehouses plus goods which entered merchandising channels immediately upon arrival in the country) amounted to $\$ 244,321,000$, compared wit
November, 1936 , and $\$ 186,968,000$ in December, 1935 .
November, 1936, ans $\$ 186,968,000$ in December, 1935 .
Imports for consumption (goods which entered merchandising or conImports for consumption (goods which entered merchandis from warecouse for consumption) amounted to $\$ 239835000$ compared with $\$ 200$ 335,000 in November, 1936, and $\$ 179,760,000$ in December, 1935.
Imports exceeded exports in value by $\$ 14,582,000$ in December. In November, 1936, there was a net export balance of
The value of imports was larger in every month of 1936 than in the corresponding month of 1935 and the value of exports larger than in every month except November. For the year as a whole imports, which amounted to $\$ 2,419,229,000$, were $18 \%$ larger than in 1935 and exports, which totaled $\$ 2,453,487,000$ in value, were $7 \%$ larger.
The greater increase in the value of imports than of exports in 1936 was the result of a number of influences. Important among these were the drought, the more pronounced increase in prices of imports than of exports, the greater improvement in United States purchasing power than in that for the world as a whole, and the maritime strike in the closing months of 1936. Primarily as a result of these influences the net balance of merchandise exports declined to $\$ 34,258,000$ in 1936 from an export balance of $\$ 235,389,000$ in 1935 and of $\$ 477,745,000$ in 1934 . The 1936 export balance was the smallest in any year since the year 1895. In that ear exports exceeded imports by $\$ 23,191,000$.
Although exports of unmanufactured cotton declined $\$ 6,700,000$ and of following the usual seasonal tendency, and exports of coal and petroleum products decreased $\$ 5,200,000$ these losses were more than offset by the sharp gain of $\$ 7,600,000$ in exports of automobiles and by moderate increases in a broad range of other commodities.
Gains in imports over November were apparent in almost the entire list of import commodities with the exception of corn, fruits, nuts, oilseeds, imports of coffee, cocoa, alcoholic spirits, textile fibers and manufactures, uncressed fur skins, crude rubber, and tin.
Compared with December, 1935, the increase in the December exports was mainly due to larger shipments of manufactured articles. Exports of automobiles, including parts, increased from $\$ 19,723,000$ to $\$ 28,769,000$, of machinery, including electrical apparatus and agricultural implements, from $\$ 22,508,000$ to $\$ 30,788,000$, and of metals and manufactures from $\$ 17,648,000$ to $\$ 23,144,000$, as between the two months, respectively. Exports of fruits, unmanufactured cotton, lumber and petroleum products were substantially smaller in December, 1936, than in December, 1935.
In imports the December increase in value, in comparison with December, 1935, was due in part to larger purchases of crude rubber, undressed fur skins, hides and skins, unmanufactured wool, raw silk, tin, and newsprint. Imports of alcoholic beverages, sugar, coffee, cocoa and grain wew commodities imported in smaller quantity in December 1936 hen in December, 1935, were veretable oils, tallow, han in December, 1935, were vegetable oils, tallow, and copper.
Exports of November, 1936, and $\$ 170,000$, in December, 1935 . Imports of gold and $\$ 190,180,000$ in December, 1935. Silver exports amounted to $\$ 236,000$, compared with $\$ 411,000$ in November, 1936, and $\$ 769,000$ in December, 1935. Silver imports amounted to $\$ 2,267,000$, compared with $\$ 4,451,000$ in November, 1936, and $\$ 47,603,000$ in December, 1935.

Lloyd's Shipbuilding Statistics for Last Quarter of 1936 Merchant Vessels Under Construction Reported 140,000 Gross Tons in Excess of Previous Quarter
Continuance of the upward trend in the world production of merchant vessels is shown by the $2,251,000$ gross tons reported by Lloyd's Register of Shipping as under construction at the end of the quarter closing on Dec. 31 last. This figure represents a gain of 140,000 gross tons over the previous quarter ending Sept. 30 last. Lloyd's returns cover all merchant ships of 100 gross tons each and upwards, being built throughout the world, except in Russia, from which country no authentic returns have been available for some time past. An announcement issued by Lloyd's on Jan. 13 also had the following to say:
With the exception of Germany and Denmark, all the leading maritime countries showed advances in ship production during the quarter just ended. with an increase of 20,000 tha the gain was 35,000 gross tons, as compared the other countries, taken as a group. Comparisons in the construction under way during the last two quarters is shown by Lloyd's Register in the following table of gross tonnage:

|  | Dec. 31, 1936 | Sept. 30, 1936 |
| :---: | :---: | :---: |
| Great Britain and | 963,642 | 928,571 |
| United States | 110,356 | 90,960 |
| Other countries. | 1,177,223 | 1,091,926 |
| World total | 2,251,221 | 2,111,457 |

Of the entire current production, Lloyd's Register points out, approximately $43 \%$ is being constructed in' Great Britain and Ireland, $5 \%$ in the United States, and $52 \%$ in the other countries.
Of all the merchant vessels now building throughout the world, a total Register and is intended for classification with that Society. Of this aggre-
gate 830,237 tons are being built in Great Britain and Ireland, and 567,967 tons in other countries. Not far from $90 \%$ of the entire output of Great Britain and Ireland, therefore, is being supervised by Lloyd's Register, and over $60 \%$ of the entire world production
New steamers and motorships on which work was begun during the quarter just ended represented 49,000 gross tons more than the volume of tonnage launched during the same period. shows the contrasts between new orders and tonnage launched during the last two quarters in the following table, the figures representing gross tons:

## Great Britain and Ireland.-.

World total

Production of steam and motor tankers, of 1,000 gross tons each and upward (Russia excluded) shows a slight decrease from the output for the september quarter. How tanker production has compared in table:

|  | Dec. 31, 36 | Sept. 30, 36 |  | Dec. 31, 36 | Sept. 30, ${ }^{\prime} 36$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Great Britain \& |  |  | Japan | 29,180 | 45,400 |
| Ireland...-- | 179,790 | 202,030 | Italy | 22,000 |  |
| Germany-.-- | 124,980 | 123,270 | Spain | 20,220 | 20,220 |
| United States- | 79,840 | 77,140 | France. | 15,456 | 15,456 |
| Sweden.....- | 61,766 | 62,000 | Other countries | 17,550 | 14,550 |
| Henmark. | 54,680 46,800 | 48,380 46,850 | World total_ | 652,202 | 655,236 |

Of the tankers now building, about $80 \%$ are being motorized, aggregating 511,732 gross tons. Of the 179,790 tons being constructed in Great Britain and Ireland, 169,990 are motor ships
Motorsh construction generally continues to increase, a gain of 38,000 gross tons being shown for the quarter just ended. This compares, however, are being built than of all At present, 321,000 tons more of motor vessels the motorship excess was 385,000 tons. . . Lloyd's shows the comparison of motor vessel production in the last two quarters in the following gross tonnage table:

|  | Dec. 31, '36 | Sept. 30, '36 |  | Dec. 31, '36 | Sept. 30, '36 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Great Britain \& Ireland | 443,736 | 466,663 | Denmark_...- | 68,950 62786 | $78,740$ |
| Germany. | 306,464 | 320,356 | Italy-...---...- | 33,680 | 3,360 |
| Sweden. | 119,696 | 107,560 | United States. | 32,376 | 14,188 |
| Holland.-. | 107,550 | 102,325 | France.-.---- | 24,466 | 19,184 |

The construction of motor vessels represents $57 \%$ of the world's shipping production at present, as compared with $59 \%$ at the end of September. How the output by types has compared in the last two quarters is shown by Lloyd's in the following table of gross tonnage:

|  | Dec. 31, 1936 | Sept. 30, 1936 |
| :---: | :---: | :---: |
| Motor vesse Other types | $\begin{array}{r} 1,286,507 \\ 964,714 \end{array}$ | $\begin{array}{r} 1,248,459 \\ 862,998 \end{array}$ |
| World total. | 2,251,221 | 2,111,457 |

Construction of oil engines for marine use also showed an increase, the total indicated horsepower of those being produced throughout the world advancing from $1,293,981 \mathrm{ihp}$. in the September quarter to $1,393,944$ in December quarter.
A small decrease was reported, Lloyds states, in the total shaft horsepower of steam turbines being constructed throughout the world, the September quarter total of 530,248 dropping to 519,265 in the December quarter.
A gain was reported in the total indicated horsepower of steam reciprocating engines for all countries, the worid total rising from 332,171 ihp. to 388,363 . . . As was the case in the two previous quarters, no change whatever occurred in the December quarter in the relative ranking of the principal shipbuilding countries. . The production ranking of the various countries during the last wo quarters is shown by Lloyd's Register in the following table of gross tonnage

|  | Dec, 31, '36 | Sept. 30, '36 |  | Dec. 31, '36 | Sept. 30, '36 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Great Britain \& |  |  | Sweden | 123,796 | 111,860 |
| Ireland....-- | 963,642 | 928,571 | United States. | 110,356 | 90,960 |
| Germany,...- | 408,465 | 424,264 | Denmark | 75,950 | 82,015 |
| Japan_.-...-- | 203,146 | 175,801 | France | 66,876 | 60,234 |
| Holland....-. - | 150,850 | 140,475 | Italy | 33,830 | 3,360 |

Of the larger type of ships, those of 20,000 gross tons each and upwards, ten are now being built throughout the world: Five in Great Br
Ireland, three in Germany, and one each in France and Holland.

No Change in Living Costs in United States During Quarter Ended Dec. 15, According to Secretary of Labor Perkins
The cost of goods purchased by wage earners and lowersalaried workers in 32 large cities of the United States combined remained unchanged from Sept. 15 to Dec. 15, 1936, Secretary of Labor Frances Perkins announced 1936, Secretary of Labor Frances Perkins announced Jan. 29 . "Lower food costs at the end of the quarterly period
counter balanced increases in the cost of all other groups of counter balanced increases in the cost of all other groups of
items included in the index," Secretary Perkins said. She added:
The food index, which covers the most important group of purchases in the budget of moderate-Income families, was $1.7 \%$ lower on Dec. 15 than on Sept. 15. An increase of $1.3 \%$ occurred in the cost of each of three groups of items-clothing, rent and housefurnishing goods-and smaller advances took place in the cost of fuel and light and miscellaneous items.
The December index for the 32 large cities included in the survey of the Bureau Labor statistics was 82.4, the same as on Sept. 15. Average costs in 1923-25 are used as 100. Comparison with Jan. 15, 1936, shows an increase of $1.3 \%$ over the 11 -month period. The current index is $10.6 \%$ above the low point of June, 1933. As compared with December, 1929, average living costs are down by $17.3 \%$.
The index of total living costs advanced in 18 cities. Fourteen cities showed declines. Oincinnati reported a drop of $1.4 \%$, Kansas City of $1.1 \%$, and st. Louis of $1.0 \%$. Los Angeles showed an increase of $1.0 \%$. In all living costs, increases and decreases were fractional.

The following is from an announcement issued by the United States Department of Labor (Office of the Secretary). The drop in food costs occurred for the most part between Sept. 15 and Oct. 13, when declining costs for meats, milk, butter, fresh vegetables, lard and sugar, lowered the food index $1.8 \%$. Between the middie of October and the middle of November, food costs continued to decline slightly, but from Nov. 17 to Dec. 15, the average index for 51 cities for which the
Bureau prepares food indexes increased $0.5 \%$ due largely to a rise in the Bureau prepares food indexes increased $0.5 \%$ due largely to a rise in the
cost of fruits and vegetables. Food costs were lower at the end of the quarter in all but four of the 32 cities for which indexes of all groups are quarter in all but four of the 32 cities for which indexes of all groups are
prepared. Food costs were slightly higher in Philadelphia, Scranton, prepared. Food costs were sighty higher in Philadelphia, scranton, exception of those in the north central States, where six out of eight cities showed decreases of $3 \%$ or more. In Cincinnati, the cost of food dropped $5.3 \%$ during the quarter, and in Kansas City, $5.0 \%$. In both cases, the declines resulted from large decreases in the price of meats, potatoes and fresh vegetables and fruits.
Clothing costs rose in each of the 32 cities covered in the Bureau of Labor Statistics' survey. In six cities, the increase was $2 \%$ or more. New Orleans was the only city to report a rise of over $3 \%$. The increase of $3.8 \%$ noted in New Orleans was largely due to state and city sales taxes that became effective Oct. 1, 1936
Since the spring of 1935, rents paid throughout the country have been rising consistently. This tendency continued during the quarter ending Dec. 15, 1936. The average increase of $1.3 \%$ for the 32 cities combined wase the Birmingham showed by far the greatest rise in rental costs during this Birmarter $6.2 \%$. In these cities, the percentace decline in rents from 1023-25 quarter, $6.2 \%$. In these cities, the percentage cecline in rents from 1923-25 ${ }^{\text {to }} 1923-25$ wase was 41.4 for Birmingham and 41.7 for Detroit whereas the index for the 32 cities combined was 63.9 . Since early in 1934, Detroit has been leading the advance in rental costs until by Dec. 15, 1936, the rent index in Detroit had risen to 62.1, as compared with 65.4 for the 32 citles combined. The increase in rents in Birmingham has been less rapid, the index reaching 51.0 in December, 1936.
Changes in fuel and light costs during the quarter ending Dec. 15, 1936 were relatively slight, with an average increase of only $0.5 \%$. Increases were noted in 24 cities, but only three cities, Houston, Atlanta and Memphis, reported increases of as much as $3 \%$. The rise in Houston was due to increased wood costs; in the other two cities, to advances in the cost of coal. Declines in fuel and light costs were reported in five cities. In all instances, the declines were slight, except in Detroit, where a $4 \%$ drop in fuel and light costs resulted from a decrease in gas prices, caused by a change from manufactured The sit were not being served natural gas at that time.
were not being served natural gas at that time. A rise in the cost or house included in the Bureau's studies. The average rise was $1.3 \%$ reflecting advances in all but two cities. In those two cities, St. Louis and Atlanta. the decline was negligible. By far the largest increase occurred in New Orleans, where the cost of house furnishing goods rose $4.8 \%$, but here the increase was chiefly the result of the sales tax mentioned above.
The group of miscellaneous items showed little change in cost. average increase was $0.3 \%$, reflecting increases in 20 cities, and decreases in 12. All changes were slight, with increases of more than $1 \%$ occurring in only two cities. Los Angeles reported a rise of $1.8 \%$, and Chicago, $1.1 \%$. Percentage changes in the cost of goods purchased by wage earners and lower-salaried clerical workers from Sept. 15 to Dec. 15, 1936, are shown in Table 1 for 32 large cities of the United States, by groups of items.
Table 2 presents indexes based on average costs in the years 1923-25 as 100, by groups of items, for each of these cities aff for the cities combined. Group indexes with costs in 1913 taken as 100 , for the 32 cities combined, are also presented in Table 2. The index on the 1913 base was 143.6 on Dec. 15, the same as on Sept. 15.
Indexes on other bases for individual cities and for the 32 cities combined may be secured directly from the Bureau of Labor Statistics.

## Record Amount of Coffee Consumed by World During January-However, Consumption During First

 Seven Months of Crop Year Below Year AgoWorld consumption of coffee during January, as measured by disappearance from visible stocks, broke all records with distribution of $2,530,891$ bags, the New York Coffee \& Sugar Exchange announced Feb. 2. However, for the seven months of the present crop year, July 1, 1936 to Jan. 30, 1937, deliveries were $14,594,720$ bags against $15,181,249$ during the similar 1935-36 period, a decrease of 586,529 bags bags or $3.9 \%$, the Exchange said, adding:
Broken up into areas, it was revealed that in Europe deliveries this season at $6,683,000$ bags were off but 70,000 bags or $1 \%$ while in the United States deliveries of $7,149,720$ bags showed a decline of 520,529 bags or $6.8 \%$. Outside of the United States and Europe, a gain of $1 / 2$ of $1 \%$ was registered for the seven months. Of interest in trade circles was the fact that whereas distribution of Brazil coffees totaled $8,732,717$ bags against $9,905,454$ during the previous similiar period, a drop of $1,172,737$ bags or $11.8 \%$, all other growths at $5,862,003$ bags against $5,275,795$ bags showed an increase of 586,208 bags or $11.1 \%$.

## Coffee Deliveries for Consumption in United States

 Reached Record in JanuaryDeliveries of coffee to consuming channels in the United States during January totaled $1,392,891$ bags breaking the previous record for any single month and exceeding December disappearance by 273,931 bags or approximately $25 \%$, the New York Coffee \& Sugar Exchange erported on Feb. 1. It added:
In Jan. 1936, deliveries were 1,312,102 while Feb. 1936, with distribution of $1,390,707$ bags was the previous record total. However, deliveries of or
coffee for the seven months of the crop year, July 1, 1936 to Jan. 31, 1937 cargregated but $7,149,720$ bags against $7,670,249$ during the similar $1935-36$ period, a loss of 520,529 bags or $6.8 \%$. Moreover, Brazilian grades this season totaled but 4,547,717 bags against 5,307,454 in 1935-36, a drop of 759,737 bags or $14.3 \%$ while all other growths were $2,602,003$ bags against 2,362,208 bags during the similar previous period, a gain of 239,208 bags or $\mathbf{1 0 . 1 \%}$.

Petroleum and Its Products-Texas Again Sets Allowable Above Bureau's Recommendations-February Quota 80,571 Barrels Higher-Oklahoma Allowable Set at 581,900 Barrels-Further Crude Adjustments -Daily Average Oil Output Dips in Week
The Texas Railroad Commission ignored the recommendations of the United States Bureau of Mines in establishing the February allowable for the State in orders effective Feb. 1. In announcing the higher quota, C. V. Terrell, Chairman of the Commission, pointed out that 104,000 barrels of crude are being withdrawn from storage daily and the new allowable is necessary to meet the market demand which is now running above output
The quota, with adjustments that may be necessary during the month by the completion of additional wells, calls for a daily average allowable of $1,329,478$ barrels as of Feb. 1. This is 80,571 barrels daily in excess of the Texas allowable for January set by the Commission. The new allowable is

126,078 barrels above the estimated level of $1,203,400$ barrels set by the Bureau of Mines.
While all fields in the Lone Star State participated in the upward revision in allowables, the Southwest area received the largest increase at 18,000 barrels daily. Production in the East Texas field was lifted to 451,000 barrels daily, against 447,681 barrels in January. The allowable for the Gulf Coast region was increased by approximately 15,000 barrels daily, and that of the West Texas district by 17,000 barrels.

The Railroad Commission, according to rumors from Austin, had delayed setting the February allowables because of the tardiness of the major companies in meeting, in part, at least, the 17 -cent a barrel increase in crude oil prices initiated on Jan. 4 by the Continental Oil Co. It was rumored that unless the major companies met the advance, the February quota would have been sharply curtailed in order established. The Commission set Feb. 20 as a hearing date to consider the March allowable.

The Okfahoma Corporation Commission on Jan. 30 issued the expected order establishing daily average production for February at 581,900 barrels. The new allowable, while 8,800 barrels above the quota for the previous month, was in line with the estimate of market demand for Oklahoma crude set by the United States Bureau of Mines. Oklahoma held its January quota in line with the Bureau although both Texas and Kansas ordered allowables far in excess of those recommended by the Federal agency.
The sharpest increase in the new February allowable was given to the Fitts-Hunton pool, which received a boost of 4,000 barrels. Other flush pools to receive higher allowables were the Oklahoma City Wilcox zone with a boost of 1,800 barrels; the Moore pool with 2,000 barrels; and North Bethel, Billings-Wilcox and Crescent, 500 barrels each. The new orders provided for a decline of 500 barrels daily in the stripper output.

The Connally "Hot-oil" bill should be made permanent as it has proven successful and has withstood all legal onslaughts in the Federal courts, Secretary of the Interior Ickes stated in a letter to the Senate Finance Committee, made public in Washington Feb. 4. The law can be made permanent, Mr. Ickes pinted out, by the simple expedient of repealing Section 13 which sets June 16,1937 , as the date of its expiration.
Hearings on the measure will begin Feb. 12 before Senator Connally, chairman of Senate finance sub-committee, with Secretary Ickes as the first witness. Senator Connally stated in Washington this week that full hearings will be held in an effort to determine where the "unknown" opposition becoming more evident is originating. In Texas, the House Committee on oil and Gas on Feb. 4 favorably reported the Davison bill which would extend the oil proration laws, now due to expire Sept. 1, next, to Sept. 1, 1941.
Despite the record production of crude oil in recent weeks, demand is running far ahead of output if the supply figures published by the United States Bureau of Mines can be accepted as an accurate barometer. Stocks dropped 833,000 barrels during the week ended Jan. 23, the dip bringing total losses for the first three weeks of the month to more than $2,500,000$ barrels. Total holdings of domestic and foreign crude in the United States on Jan. 23 were 285,211,000 barrels, a new 15 -year low.

Further changes in crude oil prices during the week were confined to readjustments in several areas. The Humble Oil \& Refining Co., Standard of New Jersey affiliate which led in the upturn, advanced the price of West Central Texas crude oil 2 cents a barrel on Feb. 3, retroactive to Jan. 28. The crudes in this district include Brown, Callahan, Coleman, Commanche, Eastland, Fisher, Haskell, Jones, Shackleford, Stephens, Throckmorton and Young counties. The new schedule posted 28-28.9 gravity at 96 cents, with a 2-cent spread for each degree of gravity up to and including 40 gravity, which carried a top price of $\$ 1.20$ a barrel.
After establishing new record highs for several consecutive weeks, daily average crude oil production slumped in the final week of January as the customary month-end cutbacks in Oklahoma, Kansas and California pared the national output. Daily average outturn of crude was off 11,100 barrels to $3,194,050$ barrels, according to the American Potroleum Institute. This compared with the January estimate of $2,998,400$ barrels set by the Bureau of Mines and actual production in the like 1936 week of $2,815,550$ barrels.
A decline of 16,500 barrels in daily average production in Oklahoma pared the total to 587,750 barrels, against the Bureau of Mines' figure of 573,100 barrels. Kansas cut production by 5,300 barrels, but the 173,600 -barrels total was far in excess of the Federal recommended figure of 165,600 barrels. An increase of 6,200 barrels in Texas lifted production to $1,268,100$ barrels, against the United States estimate of $1,176,000$ barrels. Louisiana kept pace with Texas, its 6,600-barrel spurt lifting output to 251,500 barrels, against a recommended quota of 216,300 . Although California showed a nominal dop of 2,400 barrels, the 583,400 . barrel output compared with the Bureau's 559,900-barrel estimate.
Crude oil price changes follow:
Feb. 3-Humble Oil \& Refining advanced West Central Texas crude 2 cents a barrel, retroactive to Jan. 28, setting a new top of $\$ 1.20$ for 40 gravity and above.

REFINED PRODUOTS-HIGHER GASOLINE PRICES FOLLOW ORUDE ADVANCES-FIRST GENERAL INCREASE SINCE EARLY 1936 POSTED-ALL AREAS AFFECTED BY CONCERTED ADVANCES-MOTOR FUEL STOCKS GAIN
The first general increase in gasoline prices since early in 1936 came on Feb. 1 when all major companies advanced motor fuel prices in reflection of the higher crude oil postings which were announced in the closing days of January.

First advance was posted by Standard of New Jersey which lifted tank-car prices of gasoline $1 / 2 \mathbf{c}$. a gallon throughout its marketing area, with the exception of Delaware. SoconyVacuum, Shell' Union Oil, Texas Corp. and Tide Water Associated Oil promptly followed the markups. Standard of Louisiana, a Standard of Jersey affiliate, posted a corresponding increase in its territory

First to post increases in the mid-continent area following the crude markup was the Mid-Continent Petroleum Corp. which on Jan. 28 posted an advance of $1 / 2$ c. a gallon in gasoline and kerosene prices. Standard Oil Co. of Indiana on Feb. 2 announced an increase in tank wagon prices and prices to dealers of all grades of gasoline of 0.3c. a gallon in the lower peninsula of Michigan, effective immediately. The company raised Detroit prices 0.6c. a gallon. Other companies followed. Standard of Ohio Friday advanced retail prices of motor fuel $1 / 2$ c. a gallon, effective Feb. 6

Later in the week, the Atlantic Refining Co. announced that it would meet the increase in tank car prices of gasoline throughout its marketing territory in Pennsylvania and Delaware. The increase, announced on Feb. 4, was effective immediately. On the previous day Humble Oil and other major marketing units in Texas advanced service station prices of gasoline $1 / 2 \mathrm{c}$. a gallon to $161 / 2 \mathrm{c} ., 181 / 2 \mathrm{c}$. and $201 / 2 c$., respectively, for the three grades at the "pump.' First reverberation from the West Coast came Feb. 4 in the news of a 1c. a gallon markup in prices of premium gasoline by Standard of California. The increase included all of the company's Pacific Coast territory except Idaho and Utah.

Price advances were not confined solely to the United States but spread quickly to both Canada and England, both of which use substantial quantities of American crude and refined products. Wholesale prices of gasoline were marked up 1 cent a gallon in Quebec and Ontario provinces. Gas oil, fuel oil and Diesel oil were advanced $1 / 2$ cent a gallon, American currency, in London on Jan. 30.

The gasoline advances failed to affect the metropolitan New York City area until Feb. 5, when $1 / 2$ cent a gallon advances by Socony-Vacuum Oil Co., Inc., posted Thursday, became effective. Other major companies followed Socony in the advance, which affected all of the company's New York and New England marketing territory.
Motor fuel stocks rose $1,360,000$ barrels during the final week of January, totaling $69,540,000$ barrels, the American Petroleum Institute reported. Refinery operations dipped 1.4 to $76.8 \%$ of capacity, with daily average runs of crude to stills off 60,000 barrels to $2,995,000$ barrels. Stocks of gas and fuel oils were off $1,363,000$ barrels to $102,078,000$ barrels.
Representative price changes follow:
Feb. 1-Standard of New Jersey advanced tank-car prices of gasoline $1 / 2$ cent a gallon throughout its marketing area with the exception of Delaware. All major units met the advance. Standard of Louisiana posted a corresponding mark-up in its territory.
Feb. 2-Standard of Indiana advanced tank-wagon and dealers' prices of gasoline 0.3 cents a gallon on the lower peninsula in Michigan, and Detroit prices 0.6 cents a gallon.
Feb. 3-Humble Oil \& Refining led in a State-wide increase in "pump" gas prices in Texas of $1 / 2$ cent a gallon for all grades.
Feb. 4-Atlantic Refining advanced wholesale prices of gasoline $1 / 2$ cent a gallon in Delaware and Pennsylvania.
Feb. 4-Standard of California advanced premium gasoline 1 cent a allon at the "pump."
Feb. 4-Socony-Vacuum advanced New York and New England wholeale gasoline prices $1 / 2$ cent a gallon, effective Feb. 5
Feb. 5-Standard of Ohio advanced retail ,gasoline prices $1 / 2$ cent a gallon, effective Feb. 5.

Renewed Non-Ferrous Metal Buying in London at Sharply Higher Prices Excites Domestic Trade
"Metal \& Mineral Markets" in its issue of Feb. 4 stated that the unbridled bullishness of London operators in nonferrous metals, coupled with a good volume of business in that market from the Continent, chiefly France, resulted in another week of rising prices on the London Metal Exchange. This development again caused no end of excitement in the domestic trade, and strengthened prices for copper, lead, and zinc. Tin advanced in sympathy with London, where the market moved upward in the face of larger stocks. Platinum experienced another advance of $\$ 10$ per ounce, partly to discourage buying for account of outsiders. The news that General Motors executives and strike leaders met in Detroit on Feb. 3 was favorably received.

## Copper

The rise in copper prices in London brought out another spell of nervousness in the domestic market. Business here was livelier toward the close. Sales for the week amounted to 8,060 tons, the bulk of which was sold in the last few days, all on the 13c. basis. Domestic sales for January totaled 53,815 tons, against 117,715 tons in December. In the sales booged during January slightly more than 39,000 tons called for April delivery, and 10,8 for May forward.
Consumers, investors, and speculators were credited with a substantial volume of business in the European market, chiefly London. Orders from France were tied in with currency rumors and armament activity. The foreign price, converted to an f.o.b. refinery basis, advanced to 12.600 c . on yesterday's business.
Imports and exports of copper by the United States, consisting chiefly of metal treated here in bond, were smaller in 1936 than in the preceding year, according to the records of the Bureau of Foreign and Domestic Commerce. Foreign trade in copper for the two years, in short tons, was:

|  | Imports |  | Exports |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 1935 | 1936 | 1935 | 1936 |
| In ore, de |  |  |  |  |
| Unrefined, | $\begin{array}{r} 198,471 \\ 18,094 \end{array}$ | $\begin{array}{r} 138,135 \\ 4,786 \end{array}$ | $\begin{array}{r} 7,677 \\ 261,147 \end{array}$ | $\begin{array}{r} 3,384 \\ 220,390 \end{array}$ |
| Totals | 257,154 | 188,733 | 268,824 | 223,774 |

## Imports

Additional preliminary estimates on mine output of copper by states, in short tons, show the following:

|  | 1935 | 1936 |
| :---: | :---: | :---: |
|  | 37, 373 | $\begin{array}{r}5,160 \\ 67,825 \\ \hline\end{array}$ |

## Lead

Buying of lead again was on a modest scale, sales for the week amounting to about 2,800 tons. However, there was no uneasiness over the price situation, and the undertone in all directions remained firm. There is a possibility that stocks of refined lead will show an increase for January, as shipments ducers are about convinced that at expected to exceed 42,000 tons. Producers are about convinced that actual consumption of lead has not di
minished appreciably in the last month, and smaller shipments, compared with the December rate, are said to indicate that consumers have been taking metal out of their own holdings.
Quotations held at 6c., New York, which was also the contract settling basis of American Smelting \& Refining Co., and at 5.85c., St. Louis Business was booked by St. Joseph Lead on its own brands at a premium.

Zinc
The movement of zinc into consumption continues large, and, with stocks decreasing, all sellers entertain strong views. Demand was better than in recent weeks and there was talk of a higher market. Shipments
of the ordinary grades to consumers in the last week amounted to 8,600 tons, an unually large total The shortage in High Grade is diverting tons, an unually large total. The shortage in High Grade is diverting on Prime Western though late yesterday one producer advanced his asking price to 6.10 c .

## Tin

The excitement in other metals in London carried prices for tin upward in spite of the increase in stocks. Business was good during the last week, in spite of the increase in stocks. Business was good during the last week,
and Straits for February-March delivery was purchased by both consumers and professionals.
The January statistics of the tin industry confirmed the view inter tained in consuming circles that surplus stocks would increase at the current rate of production. The world's visible supply, including the Eastern and Arnhem carry-overs, was 26,179 long tons at the end of January, which compares with 23,787 tons a month previous and 17,233 tons a year ago. Deliveries totaled 11,524 tons, against 10,617 tons in December, and 9,858 tons in January last year. United States deliveries for January came to 7,615 tons, against 6,930 tons in December, and 6,635 tons in January, 1936. Stocks of tin in the United States amount to 5,478 tons, against 2,985 tons a year ago.
Chinese, $99 \%$, was quoted nominally as follows: Jan. 28, 49.400c.; Jan. 29, 49.100c.; Jan. 30, 49.100c.; Feb. 1, 49.150 c.; Feb. 2, 49.750 c.; Feb. 3, 50.250 c .

## Daily Average Crude Oil Output Off 11,100 Barrels in Week Ended Jan. 30

The American Petroleum Institute estimates that the daily average gross crude oil production for the week ended Jan. 30, 1937, was $3,194,050$ barrels. This was a falling off of 11,100 barrels from the output of the previous week. The current week's figure remained above the $2,998,400$ barrels calculated by the United States Department of the barrels calculated by the United States Department of the
Interior to be the total of the restrictions imposed by the various oil-producing States during January. Daily average production for the four weeks ended Jan. 30, 1937, is estimated at $3,175,400$ barrels. The daily average output for the week ended Feb. 1, 1936, totaled 2,815,550 barrels. Further details, as reported by the Institute, follow:
Imports of petroleum for domestic use and receipts in bond at principal United States ports for the week ended Jan, 30 totaled 687,000 barrels.
daily average of 98,143 barrels, compared with a daily average of 74,571 barrels for the week ended Jan. 23 and 105,143 barrels daily for the four weeks ended Jan. 30.
Receipts of California oil at Atlantic and Gulf Coast ports for the week ended Jan. 30 totaled 117,000 barrels, a daily average of 16,714 barrels, compared with a daily average of 29,449 barrels for the week ended Jan. 23 and 11,536 barrels for the four weeks ended Jan. 30.
Reports received from refining companies owning $88.4 \%$ of the $4,066,000-$ barrel estimated daily potential refining capacity of the United States ndicate that the industry as a whole ran to stills, on a Bureau of Mines basis, $2,995,000$ barres of crue oil daily during the week, and that all companies had the end of the week, 09540,000 barrels of finished and pipe nished gasoline and $102,078,000$ barrels of gas and fuel oil
finished gasoline and 102,07 by
Cracked gasoline prodlchential chole, on a Bureau of Mines basis, produced an average of 670,000 barrels daily during the week.

Coal Production Lower in Week Ended Jan. 23, 1937
The weekly coal report of the U. S. Bureau of Mines disclosed that coal output for the week ended Jan. 23, 1937, was below the totals for the previous week. Soft coal production, however, continued above a year ago. The Bureau's statement follows:
ESTIMATED UNITED STATES PRODUCTION OF COAL AND BEEHIVE

|  | Week Ended |  |  | Coal Year to Date |  |  |

## Steel Production Regains Most of Losses Due to Floods

The "Iron Age" in its issue of Feb. 4 reported that with the resumption of steel making by units in the Pittsburgh, Wheeling and Youngstown districts that were affected by flood conditions, the ingot production rate for the country has risen to $79 \%$ from an estimated $75 \%$ a week ago. Mills at Ashland and Newport, Ky., and Potsmouth, Ohio, are still idle, but the Middletown, OMhio, plant, where operations stil idle, but the Middletown, ohio, plant, where operations had been reduced to $50 \%$ because of diversion of power, has The "Age" further reported:
The Pittsburgh district has reached an $82 \%$ rate, the peak that was attained the week before the flood, and the Wheeling district has quickly snapped back to a $95 \%$ operation, one point higher than in the week preceding the flood. The Youngstown district has advanced to $78 \%$ from $76 \%$ last week. The southern Ohio output is estimated at $19 \%$ only a slight rise over a week ago.
As flood waters recede the extent of the damage to industrial plants, dwellings, bridges and highways will become apparent. Preliminary surveys indicate that there will be an urgent need for considerable steel for quick repairs and a much heavier demand later on for reconstruction work and flood cond pref it may it of them resume production, thereby causing delays in shipments of machine tools, for which duction, thereby causing delays in shipments of machine tools, for which in the Ohio Valley have been flooded, and new shipments in large volume will be required together with reconditioning of damaged material at the mills.
Resumption of work at several of the plants of the General Motors Corp. has resulted in the release of suspended tonnages of some products, particularly sheets and strip. Meanwhile, other automobile companies are straining for higher production, Ford having reached 6,000 cars a day. That company has inquired for 80,000 tons of square and round bars and slabs, the latter for processing on its own sheet mills. Total output of motor cars is moving up slowly, having gained a little more than 3,000 units last week.
There was heavy ordering of plates, sheets, bars, structural shapes and sheet piling in the last few days of January for identified construction projects, including railroad equipment, owing to the requirement of steel companies that formal contracts for such work be entered into by Jan. 30 against price protections given in December. The amount of business that was thus driven in probably totaled several hundred thousand rons. In rairroad equipment ach 14000 cars plus abut 400 , hat will be buit in railroads' own shops. Unfilled orders for plates and shapes have reached in railroads own shops. Unfined
Notwithstanding the extremely heavy backlogs on mill books, further additions are in sight. Resumption of water shipments to the Pacific Coast, following settlement of the seamen's strike, will release considerable suspended business; the United States Navy program and rejuvenation of American shipbuilding under the auspices of the new Maritime Commanuforfur prospects for large steel tonnages; the agricultural equipmoa machinery builders are extremely busyं; general construction work, including home building, is on the upward swing, and household equipment concerns, especially refrigerator manufacturers, are taking increasing amounts of steel. Tin plate production has regained its pre-flood average of $95 \%$. Settlement of the General Motors strike, with its consequent rush for steel, would place a still heavier burden on steel mills to satisfy customers' requirements. This settlement may have been brought a step nearer by the Court injunction against sit-down strikers.
The warning of John L . Lewis of a steel strike, if demands to be formulated about April 1 by a convention of the Steel Workers' Organizing Committee are not met, carries forebodings of intense pressure upon the mills by consumers who dislocation caused by the automobile strike this
 lightly by those who have seen the breakdown of official authority in the lightly by those who have seen the breakdown of official
law-breaking tactics of the sit-down automobile strikers.
Although some blast furnaces in flood areas were banked for several days as a precaution against high water, total pig iron output in January total for last month is $3,212,135$ gross tons against $3,115,037$ tons in Decem-
ber. The daily rate last month was 103,617 tons, a gain of $3.1 \%$ over the ber. The daily rate last month was 103,617 tons, a gain of $3.1 \%$ over the
100,485 tons of December. There were 170 furnaces in blast in Feb. 1, unchanged from Jan. 1.
Heavy melting steel scrap has risen at Chicago, Increasing the "Iron Age" composite to $\$ 18.92$, a new high.

Fbe. 2, 1937, $\$ 18.92$ a Gross Ton
ne week ago-. (Based on No. $\begin{gathered}1 \text { heavy melting stee } \\ \text { quotations at }\end{gathered}$ One month ago. One year ago

The American Iron and Steel Institute on Feb. 1 announced that telegraphic reports which it had received indicated that the operating rate of steel companies having $98 \%$ of the steel capacity of the industry will be $79.6 \%$ of capacity or the week beginning Feb. 1, compared with $77.9 \%$ one week ago, $79.4 \%$ one month ago, and $50.0 \%$ one year ago. This represents an increase of 1.7 points, or $2.2 \%$, from the estimate for the week of Jan. 25, 1937. Weekly indicated estes of steel operations since Jan. 6, 1936, follow:

"Steel" of Cleveland, in its summary of the iron and steel markets, on Feb. 1 stated:
Flood and strike have had relatively little effect on the steel industry's production, contrasting strongly with the situation in March, 1936, when high water brought the Pittsburgh district from about $43 \%$ of capacity to $18 \%$. Most steel operations interrupted by water have resumed.
Due to flood conditions and some necessity for repairs the operating rate is off four points to $6 \%$ of capacily. Eastern Pennsylvania and Birmingham districts showe no change from the prevous week. sl. was from 100 to 90 beculse of two furnaces off for repair; Pittsburgh lost half a point Youngstown and Cleveland two points each and New England five points.
Heavy backlogs of unfilled orders at the beginning of the year have not been reduced by large shipments through January, current new buying being sufficient to offset efforts to reduce book tonnage.
Six leading steel producers making financial reports the past week, representing $64 \%$ of ingot capacity, show 1936 nel profits $264 \%$ above 1935. All companies report heavy backlogs of unfilled orders.

American Iron and Steel institute reports improvements and extensions so far authorized for 1937 exceed $\$ 290,000,000$.
Surmises as to second quarter prices are beginning to appear and are backed by protective action by producers. An early sign appears at Chicago where sheet capacity to April 1 is fully sold. Producers there are accepting orders for second quarter delivery with the proviso that the price be that prevailing at time of dellvery. Oher signs indind noin amon advance may be made in at least some products, wire and nalls berg among thase.
Need for adar man coke ductlons bedg duction in 700 beehive ovens in the Connellsville region, making 2,000 tons per day.
Bolt and nut interests are considering the largest inquiry in at least two years, for 1875 tons for the Queens-Midtown tunnel at New York. The bolts are of large size.
Shipbuilding offers prospects of considerable plate tonnage, with the usual proportion of other steel. Bids have been called for April 1 on the Iner for United States Lines, taking 15,000 tons or more. Panama Railway 5.000 thip Co. is about to ask bids on two or three ships requiring aboun three packet ships requiring about 400 tons each. Two lake cargo boats for the ore trade in the Great Lakes, mentioned last week, promise further hull tonnage.
R Railroads continue to be an important factor in spite of some tendency to await decision on new rates and its effect on income. Two western roads have placed 25 and nine locomotives and are in the market for eight more. A total or 7,500 cars were placed last week and several thousand are still pending. Some rail tonnage is appearing also. Much of the equipment buying has been under protections expiring at the end of January.
Strike effects on General Motors and shortage of glass for Chrysler cars cut automotive production for the week ending Jan. 30 to 71,373 units, a drop of about 10,000 cars from the preceding week. 1936 was 4,616,857 units, close to 500,000 ous
: Structural awards were dominated by placing of 28,000 tons by the Pennsylvania Railroad for electrifcation work You Hanisburg to Paoll. a.. , the and 29.346 tons in the reik of Jin 16. Expiration of protections at the end of the manth probably drove in considerable of this tonnage. Other end of the month probably drove in considerable of and steel piling for a Mississippi river dam at New Boston, Ill, 4.600 tons for an airplane plant at Baltimore, 3,160 and 1,900 tons, respectively, for an express highway and viaduct in New York City and 4,300 tons for a building at Washington. Strength in all markets, more especially in the East where export demand is a factor, has raised scrap quotations sharply, the composite price for steel-making grades reaching $\$ 18.70$ per ton, a rise of 41 cents from the preceding week. Domestic and export quotations on the Atlantic seaboard have become misaligned and will require correction. This is the fifth consecutive weekly rise, the gain from the first weelk in January being $\$ 1.12$ per ton.
Scrap strength has increased the iron and steel composite price five cents. to $\$ 36.62$. Th finished steel composite is unchanged at $\$ 55.80$.

## Current Events and Discussions

The Week with the Federal Reserve Banks
The daily average volume of Federal Reserve bank credit outstanding during the week ended Feb. 3, as reported by the Federal Reserve banks, was $\$ 2,483,000,000$, a decrease of $\$ 2,000,000$ compared with the preceding week and of $\$ 9,000,000$ compared with the corresponding week in 1936. $\$ 9,000,000$ compared with the corresponding week in 1936.
After noting these facts, the Board of Governors of the After noting these facts, the Board of Geral Reserve System proceeds as follows:
On Feb. 3 total Reserve bank credlt amounted to $\$ 2,463,000,000$, a decrease of $\$ 9,000,000$ for the week. This decrease corresponds with decreases of $\$ 15,000,000$ in member bank reserve balances and $\$ 27,000,000$ In non-member deposits and other Federal Reserve accounts and an increase of $\$ 19: 000,000$ in monetary gold stock, offset in part by increases of $\$ 30,000,000$ in mones in circulation and $\$ 22,000,000 \mathrm{in}$ Treasury cash and deposits with Federal Reserve banks. Member bank reserve balances on Feb. 3 were estimated to be approximately $\$ 2,150,000,000$ in excess of legal requirements.
Relatively

Relatively small changes were reported in the System's holdings of bills discounted, purchased bills, industrial advances and United States government securities.
The statement in full for the week ended Feb. 3, in comparison with the preceding week and with the corresponding date last year, will be found on pages 884 and 885 .

Changes in the amount of Reserve bank credit outstanding and in related items during the week and the year ended Feb. 3, 1937 were as follows:

Returns of Member Banks in New York City and Chicago-Brokers' Loans
Below is the statement of the Board of Governors of the Federal Reserve System for the New York City member banks and also for the Chicago member banks for the current week, issued in advance of full statements of the member banks, which latter will not be available until the coming Monday:

ASSETS AND LIABILITIES OF WEEKLY REPORTING MEMBER BANKS in Centrat, reserve cities (In Millons of Dollars)

Complete Returns of the Member Banks of the Federal Reserve System for the Preceding Week
As explained above, the statements of the New York and Chicago member banks are given out on Thursday, simultaneously with the figures for the Reserve banks themselves, and covering the same week, instead of being held until the following Monday, before which time the statistics covering the entire body of reporting member banks in 101 cities cannot be compiled.
In the following will be found the comments of the Board of Governors of the Federal Reserve System respecting the returns of the entire body of reporting member banks of the Federal Reserve System for the week ended with the close of business Jan. 27:
The condition statement of weekly reporting member banks in 101 leading cities on Jan. 27 shows decreases for the week of $\$ 30,000,000$ in total loans and investments, $\$ 17,000,000$ in demand deposits-adjusted, $\$ 34,000,000$ in government deposits, $\$ 30,000,000$ in deposits credited to domestic banks and $\$ 53,000,000$ in balances with domestic banks, and
$\$ 30,000,000$ in reserve balances with Federal Reserve banks.
Loans to brokers and dealers in New York City increased $\$ 2,000,000$; Loans to brokers and deaters in New York City increased $\$ 2,000,000$ loans to brokers and dealers outside New York increased $\$ 6,000,00$, a and New York district and $\$ 24,000,000$ at all reporting member banks. HoldNew York district and $\$ 24,000,000$ at all reporting member banks. Hole ings of acceptances and commercial paper bought increased $\$ 7,000,000$ $\$ 3,000,000$ "Other loans" declined $\$ 14,000,000$ in the New York district and $\$ 21,000,000$ at all reporting member banks.
Holdings of United States Government direct obligations declined $\$ 80$, 000,000 in the New York district and $\$ 50,000,000$ at all reporting member banks, and increased $\$ 16,000,000$ in the Chicago district. Holdings of obligations fully guaranteed by the United States Government declined $\$ 9,000,000$ in the Dallas district and $\$ 17,000,000$ at all reporting member banks. Holdings of "other securities" increased $\$ 22,000,000$ in the New York district and $\$ 17,000,000$ at all reporting member banks.
Demand deposits-adjusted declined $\$ 12,000,000$ in the San Francisco district, $\$ 8,000,000$ in the Boston district, and $\$ 17,000,000$ at all reporting member banks, and increased $\$ 7,000,000$ in the Dallas district. Time deposits increased $\$ 6,000,000$ in the New York district and $\$ 2,000,000$ at all reporting member banks. Government deposits declined in nearly all districts, the aggregate net decrease at all reporting member banks being $\$ 34,000,000$. Deposits credited to domestic banks increased $\$ 36,000,000$ in thp New York district and declined $\$ 13,000,000$ in the Chicago district, $\$ 11,000,000$ in the Richmond district, $\$ 10,000,000$ in the Kansas City district and $\$ 30,000,000$ at all reporting member banks. Deposits credited to foreign banks declined $\$ 7,000,000$.

A summary of the principal assets and liabilities of the eporting member banks, together with changes for the week and the year ended Jan. 27, 1937, follows:

Spanish Government Accepts Arms Control Plan, but Reserves Right to Buy Munitions-Rebels Launch Air, Sea and Land Attack on Malaga
The Spanish Government announced on Feb. 2 that it had accepted the principle of the arms control plan proposed by the International Non-Intervention Committee, but would reserve the right to purchase munitions. Premier Largo Caballero announced the Government's decision at a session of Parliament.

The Spanish rebel forces on Feb. 4 renewed their assault on the port of Malaga, with a combined attack of infantry, warships and airplanes. Aside from activity on the Malaga front, there has been little important fighting in Spain this week, with bad weather curtailing rebel attacks on Madrid.

The Spanish civil war was last referred to in the "Chronicle" of Jan. 30, page 695 . The decision of the Government with regard to arms control proposals was noted as follows in Associated Press Madrid advices of Feb. 2:
No power, Largo Caballero declared, has authority to interfere with shipments of war materials to the government, "the only legitimate government in Spain." The Fascists, he maintained, should be deprived of munitions enabling them to continue the civil war.
Largo Caballero declared he was "supremely confident of victory" and that every means would be taken to terminate the seven-months-long civil strife as quickly as possible.
"Each hour brings further loss of life and further economic damage," he said, exhorting the parliament's members and workers' groups to submerge ing Spanish Fascism.

Offering of $\$ 29,000,000$ of Norway $4 \%$ External Loan Coupon Bonds, due Feb. 1, 1963 -Proceeds to Be Used to Refund $\$ 28,334,000$ Issue of $5 \%$ Gold Bonds, due March 15, 1963
A new issue of $\$ 29,000,000$ Kingdom of Norway 26 -year $4 \%$ sinking fund external loan coupon bonds, dated Feb. 1, 1937 and due Feb. 1, 1963, was being offered to the public on Feb. 3 at $981 / 4 \%$ and accrued interest by a banking group headed by Lazard Freres \& Co., Inc. Proceeds from the issue are to be applied to the refunding of $\$ 28,334,0005 \%$ sinking fund external loan gold bonds, of 1928, due March 15. 1963, which bonds are to be called for redemption on March 15, 1937. Lazard Freres \& Co. announced on Feb. 3 that over half of the issue has been placed in foreign and Canadian markets. Placements in Europe were handled on behalf of the underwriting group by Lazard Brothers \& Co. Ltd. Associated with Lazard Freres in underwriting the Lts. Associated with Lazard Freres in underwriting the issue were Halsey, Stuart \& Co., Inc.; Glore, Forgan \& Co.;
Kidder, Peabody \& Co.; Ladenburg, Thalmann \& Co.; Bancamerica-Blair Corporation; Goldman, Saćhs \& Co.; Harris, Hall \& Co., Inc.; E. H. Rollins \& Sons, Inc.; Bell Gouinlock \& Co., L'td., and Baker, Weeks \& Harden. The filing with the Securities and Exchange Commission of a registration statement covering the new offering was referred to in our issue of Jan. 30, page 696.
The offering represents Norway's third refunding operation in this country. An announcement bearing on the offering also said. With its credit rating supported by a budget that is in balance, the prospectus reporting a surplus for each of the last three fiscal years, Norway is one of under the 'Securities Act of 1933. In March 1936, an issue of $\$ 17,000,000$ 6s of 1952 fwere refunded by a 20 -year $41 / \%$ issue of the same amount and in April, 1936, an issue of $\$ 30,000,0005^{1} / \mathrm{s}$ of 1965 were refunded by and issue of $\$ 31,500,00044 / 4 \mathrm{~s}$ due 1965 . The $41 / 2 \mathrm{~s}$ were offered at par and are selling currently around $1031 / 8$, while the $41 / 4 \mathrm{~s}$, offered at $971 / 2$, are quoted at around 101.

- A description of the bonds offered this week was contained as follows in the prospectus:
The bonds *will constitute the direct, valid and unconditional obligations of the Kingdom of Norway, which has agreed that if, in the future, it shal sell, offer for public subscription or in any manner dispose of any bonds or loans secured by a lien on any revenue or asset of the State, the bonds offered hereby shall be secured equally and ratably with such bonds or loans. Principal of and interest on the bonds will be payabie in lawful money of the Unite states of America at the principal orfic Bank of Newa York, state of New Ye ander or owner be a citizen or resident of a freindly peace per annum sami-annually on Feb, 1 and Aug. 1. Both principal and per annum, semi-arilefwithout deduction for or on account of any present or future taxes or duties imposed or levied by or within the Kingdom of Norway or by or within any political subdivision or taxing authority thereof except when in hands of holders or owners otherwise subject to taxation thereon in Norway. The bonds are redeemable at the option of the Government, in whole or in part (in the latter case the bonds to be selected by lot), on Feb. 1, 1942, and thereafter on any semi-annual interes date, and, except through the operation of the sinking fund hereinafter described, not eariier, at the principal amount thereof and accrued interest upon at least 30 days notice, by pubilcation, and by mall to registered holders. Payment of the principal of the bonds is to be effected during the last 25 years 3 prior to their maturity by a cumulative sinking fund, viz. on Aug. 1, 1938 and on each semi-annual interest date thereafter the Govern ment is to remit to the Fiscal Agent the sum of about $\$ 923,000$, of which so much thereor as may exceed tiond semi-annual date is to constitute sinking fund moneys and may be pald in whole or in part byдalivery of he of cash pald into conds in substantially the manner above described.
The bonds will be iscued in the first instance in temporary Porm withoub KTis in the denomination of $\$ 1,000$. Temporary bonds will be ex cupneable for definitive bonds, with coupons, in the denomination of $\$ 1,000$, registerable as to principal only
It is expected that the bonds, in temporary form, will be ready for delivery on or about Feb. 9, 1937, at the office of Lazard Freres \& Co., Inc.. 15

funds.
The
The Government has agreed to use its best efforts to procure the listing of the bonds on the New York Stock Exchange and their registration under the Securities Exchange Act of 1934, The underwriters have agreed to
give, without expense to the Government, full cooperation to that end

## French Bondholders Association Opposes Chile's Offer for Service of Bonds

The Foreign Bondholders Protective Council, Inc., announced Feb. 1 that it.has been informed by the French Bondholders Association-the Association Nationale des Porteurs Francais de Valeurs Mobilieres-that it has again issued a statement pointing out to holders of Chilean bonds the effect of accepting the service offered by the Chilean Government. The Association states it cannot advise the bondholders to accept the proffered service because of the destructive effect of such acceptance upon the bond obligation. It also states that other like European organizations will take the same action as the Association.
The Foreign Bondholders Protective Council, Inc., as noted in our issue of Jan. 22, page 538, has also advised against the acceptances of the Chilean Government's offer; reference to the offer of Chile was made in these columns of Jan. 16, page 366 .

No New Conversion Offer to Be Made to Holders of $51 / 2 \%$ Bonds of United Kingdom of Great Britain and Ireland Due Feb. 1
Announcement is made (Feb. 5) by the British Treasury that "there is no foundation for the suggestion that any fresh conversion offer will be made to holders of United Kingdom of Great Britain and Ireland 20-year $51 / 2 \%$ bonds due Feb. 1, 1937, which were the subject of the judgment of the House of Lords given on Jan. 28." Reference to the of the House of Lords given on Jan. 28." Reference to the
ruling of the House of Lords appeared in these columns ruling of the House of Lords appeared in these columns
Jan. 30, page 695. The British Treasury announcement Jan. 30, page 695 . The British Treasury announcement
also states that bearer bonds presented in the United States "are being repaid in dollars at their face value." It is added that "they may also be presented in London at the Bank of England for payment in Sterling at exchange $\$ 4.861 / 2$ to the $£$. Coupons are being met on the same basis."

## Member Trading on New York Stock and New York Curb Exchanges During Week Ended Jan. 9 Above Previous Week, According to SEC

In the first week of this year trading by all members of the New York Stock Exchange (except odd-lot dealers) and of the New York Curb Exchange for their own account increased over the preceding week, ended Jan. 2, in relation to total transactions on those Exchanges, it was shown in data issued yesterday (Feb. 5) by the Securities and Exchange Commission. The number of shares traded in for the account of the members during the week ended Jan. 9 was also above the previous week; there was one less trading day in the preceding week, ended Jan. 2-New Year's Day.
During the week ended Jan. 9 trading on the Stock Exchange for the account of members (in round-lot transactions) totaled $5,865,198$ shares, which amount was $20.37 \%$ of total transactions on the Exchange of $14,395,270$ shares. This compares with member trading during the previous week ended Jan. 2 of $3,752,753$ shares, or $19.37 \%$ of total trading of $9,689,160$ shares. On the Curb Exchange member trading during the week ended Jan. 9 amounted to 1,753,815 shares, or $20.84 \%$ of the total volume on that Exchange of $4,206,700$ shares; during the preceding week trading for the account of Curb members of $1,022,595$ shares was $19.42 \%$ of total trading of $2,632,502$ shares.

The data issued by the SEC are in the series of current figures being published weekly in accordance with its program embodied in its report to Congress last June on the "Feasibility and Advisability of the Complete Segregation "Feasibility and Advisability of the Complete Segregation of the Functions of Broker and Dealer." The figures for
the week ended Jan. 2 were given in these columns of Jan. 30, page 696. In making available the data for the week ended Jan. 9 the Commission said:
The figures given for total round-lot volume for the New York Stock Exchange and the New York Curb Exchange represent the volume of all round-lot sales of stock effected on those exchanges as distinguished from the volume reported by the ticker. The total round-lot volume for the week ended Jan. 9 on the New York Stock Exchange, 14,395,270 shares, was $10.6 \%$ larger than the volume reported on the ticker. On the New York Curb Exchange total round-lot volume in the same week, 4,206,700 shares, exceeded by $9.6 \%$ the ticker volume (exclusive of rights and warrants).
The data published are based upon reports filed with the New York Stock Exchange and the New York Curb Exchange by their, respective members. These reports are classified as follows:

 *in stocks in whter regstered" are not strictly comparable with data similariy deatgnated tor the New York Stock Exchange, since speolallsts on the New York

John Haskell of New York Stock Exchange, Suggests Changes in Form of Company Balance Sheets and Earnings Statements
Research by accounting societies and by corporate accounting officers, looking toward improvements in the form of company balance sheets and earnings statements, was suggested Jan. 25 by John Haskell, Executive Secretary to the Committee on Stock List of the New York Stock Exchange, in an address before the Pittsburgh Control of the Comptroller's Institute of America. Mr. Haskell said:
The biggest job which faces listed corporations, the Exchange and the accounting profession today is the simplification of reports to stockholders. In the last year or two the financial statements in these reports have and constellations of coomplex and crowded with qualifications, asterisks included in some cases that essential information, although fully disclosed, is lost in a maze of non-essential detail.
If the accounting principles upon which reports are based are sound and consistent there should be/no need for accountant's qualificatons, and voluminous footnotes. If they are unsound, then no amount of footnotes and hedging can really make them serve their purpose.
Mr. Haskell pointed out that financial statements should not be used for purposes other than those for which they were designed. He added:
We know that the rules of accounting prescribed by State and Federal taxing agencies are designed primarily to bring in revenue, and not to give a true and undistorted picture of a company's earnings to its stockholders. The form of accounts and repọts set up for utility companies by most local bodies carry out their rate-making duties-they certainly cannot be taken as examples of the kind of earnings statement that a prospective investor should use in considering the attractiveness of a public utility stock for investment. As general recognition of the importance of using financial statements for the purpose for which they were intended grows, the investor will not be forced to eat his peas with the knife designed to slice the melon of his corporation's surplus.
The listing requirements of the New York Stock Exchange are separate and distinct from the registration requirements of the Securities and Exchange Commission. Compliance with the Federal securities law is, of course, a prerequisite to listing, and many of the SEC's rules reiniorce Stock Exchange should and do provisions of any statute or 0 go of univer an provisions of any statute or rules of universal application.

Market Value of Listed Stocks on New York Stock Exchange Feb. 1 \$61,911,871,699, as Compared with
$\$ 59,878,127,946$ Jan. 1-Classification of Listed Stocks
As of Feb, 1, 1937 there were 1,216 stock issues, aggregating $1,366,590,299$ shares, listed on the New York Stock Exchange, with a total market value of $\$ 61,911,871,699$, the Exchange announced on Feb. 3. This compares with 1,212 stock issued, aggregating $1,360,349,902$ shares, listed on the Exchange Jan. 1, with a total market value of $\$ 59$,-

878,127,946, and with 1,191 stock issues, aggregating 1,320,759,574 shares, with a total market value of $\$ 50,164,547,052$ on Feb. 1, 1936. . The Stock Exchange, in its announcement of Feb. 3, said:
As of Feb. 1, 1937 New York Stock Exchange member total net borrowings on collateral amounted to $\$ 1,026,372,092$. The ratio of these member total borrowings to the market value of all listed stocks on this date was those only on listed share collateral from those on other collateral; thus these ratios usually will exceed the true relationship between borrowings on all listed shares and their market values.
As of Jan. 1, 1937 the Stock Exchange member total net borrowings on collateral amounted to $\$ 1,051,425,161$. The ratio of these member total borrowings to the market value of all listed stocks on that date was therefore $1.76 \%$.
In the following table listed stocks are classified by leading industrial groups with the aggregate market value and average price for each:

## Directorate in New York of Nicaraguan National Bank to be Reorganized

Whe following advices from Managua, Nicaragua, Jan. 30, are from the New York "Times" of Jan. 31:
President Anastasio Somoza sent Rafael Huezo, Assistant Manager, and Alfred Gini, Auditor of the Nicaraguan National Bank, to New York today by alrplane to reorganize the directorate in New York. Both will ser ve as members of the new board.
The functions of the bank will be enlarged to give financial aid to small farmers and the salaried class, who have paid as
loans. The bank will lend money at 4 and $5 \%$.

National City Bank of New York Finds Trade and L Industrial Reports Excellent, Allowing for Labor Troubles in Automobile Industry and Floods in W Ohio River Basin
While noting that "the labor troubles in the automobile industry and the floods in the Ohio River basin have naturally overshadowed other news of the business situation during January," and that "in these respects the month has been unfavorable," the National City Bank of New York, in its February "Monthly Letter," adds that "on the other hand, trade and industrial reports continue excellent, allowing for these handicaps." The bank observes that "the slowing up is confined to the areas affected, and otherwise the detailed business news gives satisfaction. Merchants continue to prepare for a good spring season, manufacturers are busy with full order books, and both are looking ahead with confidence moderated only by the uncertainties in the with confidence moderated only by the uncerta
labor situation." In part, the bank continued:
The floods which have caused such devastation and suffering in the Ohio Valley have of course brought many business activities to a standstill. However, the rebound following the widespread floods in March of last year supplies a precedent for believing that the interruption will be of the damage usually prove to be exaggerated. In various ways, through of the damage usually prove to be exaggerated. re various ways, through
relie contributions, insurance, use of corporate reserve funds and recourse
to borrowing, losses of wealth due to natural calamities are spread out and part of the costs carried over to the future, to make them less burdensome on the immediate situation. Meanwhile, the work of reconstruction is to be done, requiring labor and supplies, and probably this is where the emphasis belongs for the early future.
Retail trade has been held back also in sections affected by strikes and bad weather, but elsewhere gains over last year have run into good percentages, and the figures on balance are satisfactory. There is evidence that on the average merchants are looking for an increase in spring trade of around $10 \%$ over 1936. Wholesale business is off to an exceptional start. More buyers are in the markets than since 1929, and they are placing more orders and at higher prices than a year ago; in some cases covering of fall requ
usual buying season.
Manufacturers also
cng time. In all lines been buying materials further ahead than in a cng time. In all lines, buying policies are influenced not only by increasing sales and the signs of an upward price trend, but because in many feasible, and it is necessary to place orders for longer terms. Also, no one can assume too confidently that labor difficulties will not interfere with shipments.
As the trade reports suggest, in most industries operations hold at the high December rate, and unfilled orders are large
The chief threat of disturbance to the recovery now is through labor troubles stopping production and raising costs. The strike against th General Motors Corp. is itself important enough to check the business up swing, in view of the corporation's leading position in one of the key industries in the recovery. No other corporation in this country is directly responsible for so much employment, counting its own payrolls and those of its dealers, and no other buys such quantities of materials, part and supplies of all kinds, from such widespread sources. It is a grave matter to have a business of this magnitude suspended. If the activities of the corporation are long paralyzed at its center, which is the assembly o? finished automobiles, the effects will be felt, directly and indirectly, in all industries and all sections.
In the present situation forward buying has reached boom proportions in a few of the industries, notably textiles, and a few of the commodity markets.

While many experienced business men consider that a slackening of the recovery pace in consumer goods industries will be in order some time during 1937, it is unquestionable that the trend in the capital goods indus tries is upward, and that in them no reaction need be apprehended. Th improvement in these lines adds to consumer purchasing power. It gives other year.

New York Federal Reserve Bank Fixes Minimum Fees for Handling Securities of Members' Customers Imposes Charge Effective Feb. 1 of $\$ 1.50$ for Each Transaction and Draft
In a circular dated Jan. 28, the Federal Reserve Bank of New York notified all member banks and non-member clearing banks in the Second (New York) Reserve District that on and after Feb. 1 it would make "a minimum charge of $\$ 1.50$ for each transaction involving the receipt, delivery, or handling the exchange or transfer of, securities for or upon the instructions of a member bank if such securities do not belong to such member bank but belong to, or are handled by such member bank for account of a customer." This follows similar action recently taken by the New York Clearing House, referred to in our issue of Jan. 9, page 191. The Reserve Bank also made known that effective Feb. 1 it would make a minimum charge of $\$ 1.50$ for each draft with securities attached recieved at its head office or Buffalo branch from a member (or non-member clearing) bank, if the securities are handled by the bank for the account of a customer.
The circular of the New York Reserve Bank, which was made public on Jan. 29, follows:

FEDERAL RESERVE BANK OF NEW YORK
Circular No. 1729, January 28, 1937
Amending Circular No. 856, dated July 2, 1928
Charge for Handling Certain Securities
To Member Banks and Non-member Clearing Banks
in the Second Federal Reserve District:
We have been informed that regulations have been adopted by the New York Clearing House Committee to the effect that on and after Feb. 1, 1937, no member of the New/York Clearing House Association (or other institution to which the regulations apply) shall receive or deliver for a domestic bank, trust company, or other enumerated institution or dealers or brokers, a defined in such regulations, any security without making a charge for receiving and delivering the same in accordance with a schedule of minimum charges, except as specifically permitted. The adoption of these regulation with respect to the handling of securities.
On and after Feb. 1, 1937, this Bank will make a minimum charge of $\$ 1.50$ for each transaction involving the receipt, delivery, or handling the exchange or transfer of, securities for or upon the instructions of a member bank if such securities do not belong to such member bank but belong to, or are handled by such member bank for account of, a customer
In order that our practice with respect to handling drafts with securities attached may be consistent with our revised practice with respect to handling securities as hereinabove described, we will, on and after Feb. 1, 1937 make a minimum charge of $\$ 1.50$ for each draft with securities attached received by us at our head office or at our Buffalo Branch from a member (or non-member clearing) bank if such securities do not belong to such bank but belong to or are handled by the bank for account of a customer; and our Circular No. 856, dated July 2, 1928, entitled "Collection of Maturing Noter and Bills, or Other Noncash cular, entitled "Collection Charges") is hereby modified and amended ac cordingly.
Our practice with respect to safekeeping, receiving, delivering, and otherWise handling securities owned by member banks is not affected by this circular, and no charge for such transactions will be made by us except for out-of-pocket expenses. It is requested that member banks indicate in their owned by such member banks or by their customers. Member banks are also reminded that it is our policy not to accept for safekeeping for member banks any securities except those which are owned by such member banks.

GEORGE L. HARRISON, President.

Annual Statement of New York Federal Reserve Bank - $\$ 3,699,000$ Net Earned During 1936, Against $\$ 4,336,000$ in 1935-Expenses Lower During Past Year
Net earnings of the Federal Reserve Bank of New York, after all additions and deductions, amounted to $\$ 3,699,000$, which compares with net earnings for 1935 of $\$ 4,336,000$, it is shown in the Bank's annual statement, issued Jan. 29 by George L. Harrison, President. Current net earnings of the Bank during the past year amounted to $\$ 3,096,000$, as against $\$ 5,195,000$ in 1935; net expenses during 1936 are shown as $\$ 7,441,000$, whereas in 1935 they totaled $\$ 7,936,000$. Total additions to current net earnings during 1936 (profit on Sales of government and other securities) were $\$ 2,891,000$, against $\$ 2,760,000$ in 1935, while deductions from current net earnings totaled $\$ 2,288,000$, in comparison with $\$ 3,619$,000 the preceding year.
From the net earnings for 1936 the Bank paid dividends to members of $\$ 3,037,000$, paid $\$ 14,000$ to the United States Treasurer under Section 13-B of the Federal Reserve Act, and transferred $\$ 648,000$ to surplus under Section 7 of the Act. A year ago the Bank paid dividends of $\$ 3,411,000$, Act. A year ago the Bank paid dividends of $\$ 34,000$ to the United States Treasurer, and transpaid $\$ 64,000$ to the Unite
During 1936 total assets of the New York Reserve Bank increased to $\$ 4,449,759,000$ Dec. 31 from $\$ 4,342,062,000$ Dec. 31, 1935. Reserves increased during the year to $\$ 3,505,237,000$ from $\$ 3,377,145,000$, while holdings of United States Government securities dropped to $\$ 645,243$,000 from $\$ 741,883,000$ at the close of 1935. Total deposits at the latest date amounted to $\$ 3,183,684,000$, which compares with deposits on Dec. 31 , 1935 of $\$ 3,254,054,000$.
The following is the profit and loss account of the Bank for 1936 in comparison with 1935, as contained in the annual statement issued Jan. 29:
PROFIT AND LOSS ACCOUNT FOR THE CALENDAR YEARS 1936 AND 1935

## Effective Date of Definition of Interest Deferred Until

 May 1 by Board of Governors of Federal Reserve System-Action Taken at Request of Senator Wagner and Representative Steagall-Amendments to Law Being ConsideredThe Board of Governors of the Federal Reserve System announced on Jan. 30 the postponement from Feb. 1 to May 1, 1937, of the effective date of the clause in its amended Regulation Q defining interest on deposits. The Board has announced on Dec. 21, as noted in our issue of Dec. 26, page 4079, that the clause would become effective on Feb. 1 . In postponing the effective date to May 1, the Board explained that the action was taken at the request of Senator plained that the action was taken at the request of Senator
Robert F. Wagner, of New York, Chairman of the Senate Banking and Currency Committee, and Representative Henry B. Steagall, of Alabama, Chairman of the House Banking and Currency Committee. TheBoard said that the extension was also warranted by the fact that "a number of members of Congress are giving consideration to the question of the advisability of amending the law under which the Board's regulation was issued."

The following is the Board's announcement:
Chairman Steagall, of the House Banking and Currency Committee, and Chairman Wagner, of the Senate Banking Currency Committee, have requested the Board of Governors of the Federal Reserve System to postpone the effective date of the definition of interest contained in subsection (1) of section 1 of the Board's Regulation Q. which the B
The Board, after careful consideration, had reached the conclusion that the law and the existence of certain banking practices required the adoption of this definition but the Board feels that the request which these two Chairman have now made should be granted in view of the fact that the Board has been informed that a number of Members of Congress are giving consideration to the question of the advisability of amending the law under which the Board's regulation was issued, and desire additional time for that purpose. The Board, therefore, has postponed from Feb. 1 to May 1,
1937, the offective date of subsection (f) of section 1 of Regulation Q, which 1937, the effective date of subseccion
contains the definition of interest.
In commenting on the Board's announcement, Washington advices, Jan. 30, to the New York "Hearld-Tribune" of Jan. 31, said:

While the official Fannouncement of the Board made no mention of the background of the requests from the heads of the two Congressional committees, it was reported that their action came because of protests, particularly from interior banks, that the result of the Board's regulation was to give State non-member banks a competitive advantage over membe banks.

## Board Defines Interest

In its definition of interest, the Board, as part of the prohibition against paying interest on demand deposits, defined interest to include absorption of exchange and check-collection charges. In other words, the Board, according to legal interpretation, prohibited the banks from paying "out of pocket" expenses in connection with demand deposits.
The Federal Deposit Insurance Corporation, having a control over non-member State banks, however, according to the FDIC lawyers did not have the power to define interest, with the result that, under FDIC regulation, State non-member banks could apparently absorb, for example, charges on the collection of checks.
According to the protesting bankers that "leeway" would give nonmember State banks a competitive advantage over nember banks in attracting the names of depositors. Proposals have been received in Congresa definition of the Federal Reserve Board or to limit the power of the board in connection wilh its existing definition.

Total Earnings of St. Louis Federal Reserve Bank in 1936 Reported at $\$ 1,863,000$-Net Earnings of $\$ 410,000$ Compare with $\$ 200,000$ in Preceding Year
William McC. Martin, President of the Federal Reserve Bank of St. Louis, announced under date of Jan. 9 that preliminary figures indicate that current earnings of the Bank during 1936 amounted to $\$ 1,863,000$, of which $\$ 1,-$ Bank during 1936 amounted to $\$ 1,863,000$, of which $\$ 1,-$
804,000 were on United States Government securities and the remainder, $\$ 59,000$, on discounted and purchased bills, industrial advances and miscellaneous items. Operating expenses of the bank during 1936, after deducting reimbursements received for certain Fiscal agency and other expenses, amounted to $\$ 1,312,000$. Cost of Federal Reserve currency amounted to $\$ 91,000$ and assessments for expenses of the Board of Governors of the Federal Reserve System of the Board of Governors of the Federal Reserve System
were $\$ 50,000$. The addition of assessments for current exwere $\$ 50,000$. The addition of assessments for current ex-
penses of the Board of Governors and the cost of Federal penses of the Board of Governors and the cost of Federal net expense of $\$ 1,453,000$, a decrease of $\$ 153,000$ as compared with the year 1935. The announcement by Mr. Martin continued:
Current earnings of $\$ 1,863,000$ less total expenses of $\$ 1,453,000$ leaves current net earnings from normal operations for the year of $\$ 410,000$ as compared with $\$ 200,000$ in 1935. Additions to current net earnings during the year amounted to $\$ 321,000$, of which $\$ 308,000$ came from profits on sales of United States government securities and $\$ 13,000$ from miscellaneous items. Deductions from current net earnings include an assessment of $\$ 60,000$ to apply on the cost of the building for the Board of Governors of the Federal Reserve System, authorized by the Act of June 19, 1934, which is scheduled to be completed and occupied by the Board of Governors during 1937; $\$ 145,000$ for prior service contributions to the Retirement System of the Federal Reserve banks which will. be completed, under the present schedule, by the end of 1939 ; and $\$ 4,000$ for other miscellaneous purposes.
Making these additions to and deductions from current net earnings leaves a balance for the year of $\$ 522,000$ available for special reserves, charge-offs, dividends and surplus. This amount was distributed as follows: Dividends to member banks, $\$ 226,000$; reserve for contingencies, $\$ 296.000$,

## Increase of $33 \mathbf{1 - 3} \%$ in Reserve Requirements of Member

 Banks of Federal Reserve System Announced by Board of Governors-Designed to Eliminate as Basis of Possible Credit Expansion Excess Reserves Basis of Possible Credit Expansion Excess Reserves Estimated at $\$ 1,500,000,000$-Action Follows Meet-ing of Governors with Presidents of Reserve Banks and Meeting of Open Market Committee
Following the increase of $50 \%$ in reserve requirements of member banks of the Federal Reserve System in August last, the Board of Governors of the Reserve System announced on Jan. 30 a further increase of $33 \mathbf{1 - 3 \%}$; one-half of the latest increase is to become effective on March 1, and the other half on May 1-this procedure being adopted "for the purpose of affording member banks," said the announcement pose of affording member banks," said the announcement of the Governors, "ample time for orderly, adjustment to ment also states, "completes the use of the Board's power
to raise reserve requirements to not more than twice the amount prescribed for member banks." The Board describes its present action as eliminating "as a basis of possible credit expansion an estimated $\$ 1,500,000,000$ of excess reserves which are superfluous for the present or prospective needs of commerce, industry and agriculture." It is estimated by the Board that "after the full increase has gone into effect, member banks will have excess reserves of gone into effect, member banks will have excess reserves of
approximately $\$ 500,000,000, "$ "a sum sufficient "to maintain easy money conditions." Reserve requirements for member banks are increased as follows under the Board" latest action:
*/Y On demand deposits, at banks in central reserve cities, from $191 / 2$ to $26 \%$;
At banks in reserve cities, from 15 to $20 \%$.
At "country" banks, from $101 / 2$ to $14 \%$.
On time deposits, at all banks, from $43 / 2$ to $6 \%$
In announcing its present action the Board repeats what it said at the time of the $50 \%$ increase-viz: that it "will operate to prevent an injurious credit expansion and at the same time give assurance for continued progress toward full recovery." Last week, on Jan. 25, the Governors of the Reserve System met in Washington with the Presidents of
the Federal Reserve banks, and on Jan. 26 there was a meeting of the Federal Open Market Committee of the Reserve System, headed by Marriner S. Eccles as Chairman. A survey of financial and economic conditions throughout the United States was entered upon at the Jan. 25 meeting, said advices from its Washington bureau to the New York "Journal of Commerce" which added in part:
The nature of the discussion was not revealed by the Board, although it was said that everything in the credit picture was touched upon-from excess reserves to interest rates. Earlier today the Presidents mey by themselves and it is said that this session was devoted largely to matters affecting administration of the banks.
There has been much talk of the effect on member bank reserves of additions to the gold supply, and it is thought probable that the bankers today reviewed the action of the Treasury in sterling newly acquired gold as a means of relieving the situation. The question of excess reserves is said to be outstanding in all discussions among bankers.

According to the same paper, the Open Market Committee devoted the entire day, Jan. 26, to a discussion of the excess reserves situation, and adjourned their session without making any recommendations. The Washington advices the same day to the New York "Times" said in part:
While there was no official statement after the meeting, it was the opinion of experts that the Board would act in the next six weeks to curb the gradually increasing excess reserves of the member banks of the Federal Reserve System which are now at a level of about $\$ 2,130,000,000$.
The Open Market Committee was agreed that the Nation's credit base was expanding at a too rapid rate. Some officials that excess reserves of a billion dollars would be adequate to meet any reasonable expansion of business and speculative activity that might be expected within the next year.
Most experts regarded it as likely that the Board would decide to increase the reserve requirements rather than make a wholesale disposal of Government securities. This thought came from statements of Secretary Morgen-
thau that the Treasury and the Federal Reserve Board were in accord on the credit and monetary program.
The announcement of the Board of Governors on Jan. 30 follows:
The Board of Governors of the Federal Reserve System today increased eserve requirements for member banks by $331-3 \%$, as follows: On demand deposits, at banks in central reserve cities from $191 / 2$ to $26 \%$; at banks in reserve cities, from 15 to $20 \%$, and at "country" banks, from $10 / 2$ ing member requirements, one-half of the increase will become effective as of the opening of business on March 1, 1937, and the remaining half will become effective as of the opening of business on May 1.
The following table shows what the reserve requirements are at present, what they will be from March 1 through April 30, and what they will be commencing May 1:

RESERVE REQUIREMENTS (PER CENT OF DEPOSITS)

| Class of Bank | Demand Deposits |  |  | Time Deposits |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Present Requirements | $\begin{aligned} & \text { Mar. } 1 \\ & \text { Through } \\ & \text { Apr. } 30 \end{aligned}$ | $\begin{gathered} \text { May } 1 \\ \text { and } \\ \text { After } \end{gathered}$ | Present <br> Requirements | $\left\|\begin{array}{c} \text { Mar. } 1 \\ \text { Through } \\ \text { Apr. } 30 \end{array}\right\|$ | $\begin{aligned} & \text { May } 1 \\ & \text { and } \\ & \text { after } \end{aligned}$ |
| Central reserve city | 191/2 | 2234 | 26 | $41 / 3$ |  |  |
| Reserve city | 15 | 171/2 | 20 14 | 41/28 | $51 / 4$ $51 / 4$ | 6 |

This action completes the use of the Board's power under the law to raise raise reserve requirements to not more than twice the amount prescribed for member banks in Section 19 of the Federal Reserve Act.
The section of the law which authorizes the Board to change reserve requirements for member banks states that when this power is used it shall be "in order to prevent injurious credit expansion or contraction." The to use its power to change reserve requirements not only to counteract an injurious credit expansion or contraction after it has developed, but also to anticipate and prevent such an expansion or construction.
By its present action the Board eliminates as a basis of possible credit expansion an estimated $\$ 1,500,000,000$ of excess reserves which are superfluous for the present or prospective needs of commerce, industry and agriculture and which, in the Board's judgment, would result in an injurious credit expansion if permitted to become the basis of a multiple expansion of bank credit. The Board estimates that, after the full increase has gone into effect, member banks will have excess reserves of approximately $\$ 500,000,000$, an amount ample to finance further recovery and to maintain will be placed in a position where such reduction or expansion of member bank reserves as may be deemed in the public interest may be offected through open-markec operations, a more flexible instrument, better adapted for teaping the reserve position of member banks currencly in close adjustment to credit needs.
As the Board stated on July 15, 1936, in its announcement of the previous increase of reserve requirements, excess reserves then held by member banks had resulted almost entirely from the inflow of gold from abroad rather than from the System's credit policy. Since that time the country's gold stock has been further increased by a large inflow of gold, amounting to $\$ 600,000,000$. Between the time of the banking holiday in 1933 and December 24, 1936, when the United States Treasury put into effect its program for preventing acquisitions of gold from adding to the country's banking reserves, the gold inflow aggregated approximately $\$ 4,000,000,000$. This inflow of gold had the effect of adding an equal amount to the reserves of member banks as well as to their deposits. The total amount of deposits in banks and the Postal Savings System, plus currency outside of banks, is now $\$ 2,000,000,000$ larger than in the summer of 1929.
The present volume of deposits, if utilized at a rate of turnover comparable to pre-depression levels, is sufficient to sustain a vastly greater rate of business activity than exists today. In order to sustain and expand ecovery, the country's commerce, industry and agriculvis, exing deposits require a more complete and productive utilization of existing deposits
rather than further additions to the amount now available.
The excess reserves of about $\$ 1,500,000,000$ eliminated as a increase in the supply of money, in the form of bank credit, which beyond any doubt would conof money, in the form of bank credit,
stitute an injurious credit expansion.
The present is an opportune time for action, because, as was the case when the Board announced its prior action last July, excess reserves are banks are twice as large as they have generally been in the past. All but
a small number of member banks have more than sufficient excess reserves and surplus balane of the 6,367 member banks lacked sufficient funds to meet such an increase in reserve requirements by utilizing their present excess balances with the reserve banks and not more than one-half of their balances with correspondent banks. On this basis these 197 banks, in order to meet the full requirements, would have needed an additional $\$ 123,000,000$, of which $\$ 110,000,000$ would have been needed by banks in central reserve cities, $\$ 11,000,000$ by banks in other reserve cities and only $\$ 2,300,000$ by country banks.
Another reason for action at this time is that, as stated by the Board last July, "it is far better to sterilize a part of these superfluous reserves. while they are still unused than to permit a credit structure to be erected upon them and then to withdraw the foundation of the structure.
The available methods of absorbing excess reserves have been under consideration. It has been decided that under present circumstances changes. in reserve requirements should precede reduction in reserves through openmarket operations, because changes in requirements affect all banks, regardless of their reserve position, and consequently should be made whileeserves are widely distributed
This action increases reserves requirements to the full extent authorized by law. It is not the present intention of the Board to request from Congress additional a
reserve requirements.
It is the Board's expectation that, with approximately $\$ 500,000,000$ of excess reserves remaining with the banks, credit conditions will continue to be easy. At the same time the Reserve System will be in a position to take promptly such action as may be desirable to ease or tighten credit conditions through open market and rate policy.
In announcing the previous increase in reserve requirements, the Board said:
"The prevailing level of long-time interest rates, which has been an important factor in the revival of the capital market, has been due princi-
pally to the large accumulations of idle funds in the hands of individual and paly to the large accumulations of idle funis in the hands of individual and
instutional investors. The supply of investment funds is in excess of
the demand. The increase in reserve requirements of member banks will not dominish the volume of deposits held by these banks for their customers ment. The maintenance of an adequate supply of funds at favorable rates for capital purposes, including mortgages, is
bringing about and sustaining a lasting recovery:"
The same considerations apply with equal force at the present time. The Board's action does not reduce the large volume of existing funds available for investment by depositors, and should not, therefore, occasion an advance in long-term interest rates or a restrictive polcy on the part industrial and agricultural credit
In view of all these considerations, the Board believes that the action taken at this time will operate to prevent an injurious credit expansion and at the same time give assurance for continued progress toward full recovery.
Along with the above announcement the Board of Governors issued the following Supplement to Regulation D, governing reserves required to be maintained by member banks with Federal Reserve banks:
Pursuant to the provisions of Section 19 of the Federal Reserve Act and Section 2 (a) of its Regulation D, the Board of Governors of the Federal
Reserve System increases by $331-3 \%$ the reserve requirements established by the supplement to Regulation $\mathbf{D}$ made effective at the close of business on Aug. 15, 1936: Provided, however, That one half of such increase shall be effective as to each member bank at the opening of business on March 1 . 1937, and the remaining one-half of such increase shall be effective as to each member bank at the opening of business on May 1, 1937.*

Among those commenting on the action of the Board of Governors this week is Dr. Benjamin M. Anderson Jr. of Governors this Week is Dr. Benjamin M. Anderson Jr., was quoted as follows in the "Times" of Jan. 31:
Dr. Anderson, who has advocated an increase, said it accomplished three things:
"It uses a resource of credit control which probably could not be used if a real boom had already started and a good many banks had allowed themselves to be short of reserves," he said. "The method had to be used now, if it were ever to be used.
"It reduces excess reserves to a point where the problem becomes easily manageable by the old measure of rediscount changes and open marke operations.
"Reserve requirements had been placed too low under the Federal Reserve Act and the war-time amendments, and this made it possible for both bank expansion and bank contraction to move too violently with hanges in reserves.
requirements now are about where they ought to be mough we may still have
The $50 \%$ increase in reserve requirements last summer was announced on July 14, effective Aug. 15; reference thereto appeared in our July 18 issue, page 356.
> * Effective at the opening of business on March 1, 1937, the requirements as to
en eserves to be maintained by each member bank will be $75 \%$ above the requirements.
prescribed by Section 19 of the Federal Reserve Act and, effective at the opening of business on May 1 . 1937 , the requirements as to reserves to be maintained by
each member bank will be $100 \%$ above the requirements prescribed by Section 19 of the Federal Reserve Act.

## Stock of Money in the Country

The Treasury Department at Washington has issued the customary monthly statement showing the stock of money in the country and the amount in circulation after deducting the moneys held in the United States Treasury and by Federal Reserve banks and agents. The figures this time are for Dec. 31, 1936, and show that the money in circulation at that date (including, of course, what is held in bank vaults of member banks of the Federal Reserve System) was $\$ 6,542,752,261$, as against $\$ 6,465,632,968$ on Nov. 30, 1936, and $\$ 5,881,525,846$ on Dec. 31, 1935, and comparing with $\$ 5,698,214,612$ on Oct. 31, 1920. Just before the outbreak of the World War, that is, on June 30, 1914, the total was: only $\$ 3,459,434,174$. The following is the full statement:

a Does not Include gold other than that held by the Treasury
b These amounts are not Included in the total, slnce the gold or silver held as security against gold and silver certificates and Treasury notes of 1890 is included under gold, standard silver dollars, and sil ver bullion, respectively.
c This total Includes credits with the Treasurer of the United States payable in old certificates in (1) the Gold Certincate Fund-Board of Governors, Federa Federal Reserve notes in the amount of $\$ 12,741,006$.
Includes $\$ 1,800,000,000$ Exchange Stabilization Fund; $\$ 26,528,697$ inactiv and $\$ 141,014,255$ bin en inement resulting from reduction in welght of the gold dollar.
e Includes $\$ 60,800,000$ lawful money deposited as a reserve for Postal Saving deposits.

The amount of gold and silver certiftcates and Treasury notes of 1890 should be educted from thls amount before combining with total mone
I Includes money held by the Cuban agency of the Federal Reserve Bank of tlanta.
h The money in crrculation includes any paper currency held outside the con nental limita or the United states.
Note-There is maintained in the Treasury - (i) as a reserve for United Statee Treasury notes of 1890 -an equal dollar amount in standard silver dollars (these notes are belng canceled and retired on recelpt); (iil) as security for outstanding qual to the face amount of such silver certificates; and (iv) as security for gold certificates-gold bullion of a value at the legal standard equal to the face amount of unch gold certificates. Federal Reserve notes are obllgations of the United States and a irst lien on all the assets of the lssuing Federal Reserve Bank. Federal Reserve old certiftcates or of gold certificates and such discounted or purchased paper as is engible under the terms of the Federal Reserve Act, or, until March 3, 1937, of Board of Governors of the Federal Reserve System. Federal Reserve banks must maintain a reserve in gold certificates of at least $40 \%$, Including the redemption fund Which must be deposited with the Treasurer of the United States, against Federa reserve notes Reserve bank notes and National bank notes are in process of retirement.
$\$ 191,855,000$ Bid to Offering of $\$ 50,000,000$ of 273 -Day Treasury Bills Dated Feb. 3- $\$ 50,385,000$ Accepted at Average Rate of About $0.401 \%$
Tenders totaling $\$ 191,855,000$ were received to the offering of $\$ 50,000,000$, or thereabouts, of 273 -day Treasury bills, dated Feb. 3 and maturing Nov. 3, 1937, it was announced on Feb. 1 by Acting Secretary of the Treasury Taylor. Of this amount, Mr. Taylor said, $\$ 50,385,000$ was accepted. The tenders to the offering, which were invited on Jan. 25, were received at the Federal Reserve banks and the branches thereof up to 2 p. m., Eastern Standard Time, Feb. 1. Previous reference to the offering was made in our issue of Jan. 30 page 701.

Details of the bids to the offering were announced by Acting Secretary Taylor as follows:
The accepted bids ranged in price from 99.760, equivalent to a rate of about $0.316 \%$ per annum, to 99.694 , equivalent to a rate of about $0.404 \%$ per annum, on a bank discount basis. Only part of the amount bid for at the latter price was accepted. The average price of Treasury bills to be issued is 99.696 and the average rate is about $0.401 \%$ per annum on a bank discount basis.
The average rate of $0.401 \%$ is the highest at which an issue of Treasury bills has been sold since March, 1934. Recent offerings have sold at rates of 0.361 o (bills dated Jan. 27), $0.345 \%$ (bills dated Jan. 20), and $0.333 \%$ (bills dated Jan. 13).

New Offering of $\$ 50,000,000$, or Thereabouts of 273-Day
Treasury Bills-To Be Dated Feb. 10, 1937
A new offering of 273 -day Treasury bills to the amount of $\$ 50,000,000$, or thereabouts, was announced on Feb. 4 by Acting Secretary of the Treasury Taylor. The bills, to be sold on a discount basis to the highest bidders, will be dated Feb 10, 1937, and will mature on Nov. 10, 1937, and on the maturity date the face amount will be payable without interest. There is a maturity of similar securities on Feb. 10 in amount of $\$ 50,111,000$.

Tenders to the offering announced this week will be received at the Federal Reserve banks, or the branches thereof up to 2 p. m., Eastern Standard Time, Monday, Feb. 8. Tenders will not be received at the Treasury Department, Washington. In his announcement of Feb. 4 Mr . Taylor stated:

They (the bills) will be issued in bearer form only, and in amounts or denominations of $\$ 1,000, \$ 10,000, \$ 100,000, \$ 500,000$ and $\$ 1,000,000$ (maturity value)
No tender for an amount less than $\$ 1,000$ will be considered. Each tender must be in multiples of $\$ 1,000$. The price offered must be expressed on the basis of 100 , with no
Fractions must not be used.
Tenders will be accepte
nd trust companies and from respeash deposit from incorporated banes ment securities. Tenders from others must be accompanied by a deposit of $10 \%$ of the face amount of Treasury bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.
Immediately after the closing hour for receipt of tenders on Feb. 8, 1937. all tenders received at the Federal Reserve banks or branches thereof up to the closing hour will be opened and public announcement of the acceptable prices will follow as soon as possible thereafter, probably on the followig morning. The secretary of the Treasury expressly reserves the right to reject any or all tenders or parts of tenders, and to allot less than the amoun applied for, and his action in any such respect shall be final. Those sub mitting tenders will be advised of he aceplance or reje ment at the price offered for freasury bis allod sum on Federal Feb. 10, 1937.

The Treasury bills will be exempt, as to principal and interest, and any gain from the sale or other disposition thereof will also be exempt, from all Treasury Decision 4550 , ruling that Treasury bills are not exempt from the gift tax) No loss from the sale or other disposition of the Treasury bills shall any tax now or hereafter imposed by the United States or any of its pos any tax
sessions.

Treasury Department Circular No. 418, as amended, and this notice prescribe the terms of the Treasury bills and govern the conditions of their issue.

President Roosevelt Proclaims Emergency in Flood Disaster-Permits Free Entry of Donations from Foreign Countries
An emergency in the present flood crisis was proclaimed on Feb. 1 by President Roosevelt to permit the importation duty free, of food, clothing, and medical, surgical and other supplies from foreign countries for use in relief work. The President acted under authority of the Tariff Act of 1930. The emergency will continue until proclaimed ended by the President.

Following is the President's proclamation, made public on Feb. 2;
EMERGENCY DUE TO FLOOD CONDITIONS-FREE IMPORTA TION OF FOOD, CLOTHING, AND MEDICAL, SURGICAL
AND OTHER SUPPLIES FOR USE IN EMERGENCY WORK by the president of the united states of ameriod A Proclamation
Whereas There have recently occurred and are occuring disastrous flood in various localities in the valleys of the Ohio and Mississippi rivers and tributaries thereof, resulting in great loss of life and property and causing much sickness, suffering, and privation among the residents of the striken localities, making it necessary for charitable, philanthropic, relief, and other organizations to extend aid on a large scale to the flood sufferers,

And Whereas Section 318 of the Tariff Act of 1930 ( 46 Stat. 696) provides:
exist by reason of a state of war or otherwie, he may authorize the Secreexist by reason of a state of war, or otherwie, he may authorize the secre-
tary of the Treasury to extend during the continuance of such emergency the time hereen pryscribed for dur performance of anyy act, and mayency
thou-
thize the Secretary of the Treasury to permit, under such regulations as the Secretary of the Treasury may prescribe, the importation free of duty of food clothing, and
ergency relief work.
Now, Therefore, I, Franklin D. Roosevelt, President of the United States of America, acting under and by virtue of the authority verted me by the foregoing provisions of section 318 of the Tariff Act of 1930, do by this proclamation declare an emergency to exist, and I do hereby authorize the Secretary of the Treasury to permit, during the continuance of such emergency (the termination of which will be determined by the President and delcared by his Proclamation), within such limits and subject to such conditions as he may deem necessary to meet the emergency, the importation free of duty of such food, clothing, and medical, surgical, and other supplies as he may designate and under such regulations as he may prescribe, when imported for use in such emergency relief work.
In Witness. Whereof I have hereunto set my hand and caused the seal of the United States to be affixed.
Done at the City of Washington this first day of February in the year of our Lord nineteen hundred and thirty-seven, and of the Independence

FRANKLIN D. ROOSEVEL
By the President
Cordell Hull, Secretary of State

President Roosevelt Thanks Nation for Aid in Fight Against Infantile Paralysis-Calls Birthday Balls Finest Present You Could Give -Also Expresses Gratitude for Contributions to Flood Sufferers
On the occasion of his fifty-fifth birthday-Jan. 30Presiden Roosevelt broadcast his thanks to the several milliong of 'persons attending the fourth annual birthday balls held Jan. 30 throughout the nation, the proceeds from which are used in the fight against infantile paralysis. At the same time the President also expressed his gratitude to the nation for its "splendid" response to the call of the Red Cross for funds to aid flood sufferers in the Ohio and Mississippi Valleys.
President Roosevelt, himself a victim of infantile paralysis in 1920, in expressing his thanks for the "finest birthday present which you could possibly give me," said that the fight against the disease "will not cease until some day the disease itself is brought under control and proper aid has been rendered to all." The birthday balls have aided greatly in the fight, having provided funds for the expansion of the Warm Springs, Ga., Foundation, of which the President is head, for national coordination of the cases and research.
The President celebrated his birthday at an informal dinner party in the White House, attended by a group of men who accompanied him during his campaign in 1920 for the Vice-Presidency. The dinner was followed by storytelling before the fire place after which the President broadcast his message, beginning at $11: 24 \mathrm{p} . \mathrm{m}$. The text of the President's address follows:
You are participating in the finest birthday present which you could possibly give me; and at the same time, you are participating in birthday presents to many thousands of children in every part of the country. Because devoted volunteers, who have worked for the success of the yarties tonight, are numbered by the tens of thousands, I cannot, I regret, nake personal acknowledgment to each and every one of my appreciation of their unselfish services. I take this occasion, therefore, to thank you
all and, in addition, to thank the many other thousands who have all and, in addition, to thank the many other thousands who have
written me and telegraphed me written me and telegraphed me.
I cannot express this word of heartfelt appreciation without acknowledging with pride and with satisfaction the splendid response the Nation
has made in answering the call of suffering which comes to us from the has made in answering the call of suffering which comes to us from the
Ohio and Mississippi Valleys. Truly, "one touch of nature makes the Ohio and Mississipp
whole world kin."
The preliminary response to the Red Cross appeal has been generous and I know that every dollar necessary to help the flood sufferers will be ferthcoming from the rest of the Nation. The appeal for our friends in the flood areas is one of high emergency. Through national effort on a national scale, we shall hope in the days to come to decrease the probability
of future floods and similar disasters. In the meantime, we proposed to of future floods and
meet this emergency.
The problem of infantile paralysis is not in the same sense an immediate emergency. It is with us every one of the three hundred and sixty-five ate emergency. It is with us every one of the three hundred and sixty-five
days of the year. It is an insidious and perfidious foe. It lurks in un. days of the year. It is an insidious and perfidious foe. It lurks in un-
expected places and its special prey is little children. It may appear in expected places and its special prey
epidemic form, in any community.
May I tell you a little history? As most of you know, the Warm Springs Foundation undertook treatment and investigation of infantile paralysis in a very small way in 1927. The first birthday parties were held
parties were used, in part, for necessary equipment at Warm Springs, in part for taking care of patients from every section of the country who cculd not afford the cost of the treatment and, in part, in studying the wkole national problem of infantile paralysis. As this study developed three years ago, we came to the conclusion that the work of the Warm Springs Foundation should concern itself far more with the broad national problem of infantile paralysis than with the work of taking care of only a few hundred children each year at Warm Springs, with its necessarily limited accommodations.
Therefore, with the birthday parties on January 30, 1935, and in 1936 the proceeds from these parties in thousands of communities were devoted and, in 1937, will be devoted not to the work at Warm Springs, but to the broader national problem of infantile paralysis. Seventy per cent of all the money which has been raised has gone and goes to the care of children crippled by infantile paralysis within their own communities. A committee of doctors and of leading citizens determines how best that money shall be spent in each community. With that determination Warm Springs has nothing to do.
The other $30 \%$ of the proceeds goes primarily to two objectives. The of a medical advisory committee, outright grants for nearly three hundred
thousand dollars have been made to about
Much has been learned, much has been accomplished. While it is too early to say that infantile paralysis, in its epidemic form, can be stopped, we hope that through new methods we can soon arrive at a substantial dccrease in the numbers of children who become infected. We believe that we are on the right track.
The second function has taken the form of establishing a central office of coordination. Every year there come thousands of letters from every part of the country, from parents of children who have recently been stricken or from parents of children who were attacked and crippled years ago by infantile paralysis.
When the individual case is brought to the attention of this office of coordination, it is carefully checked and sent to an orthopedic surgeon or an orthopedic hospital or to a nursing service or clinic or to a State saciety for the handicapped. Some kind of help is obtained-perhaps an operation, or a new wheel chair, or a new brace or a new corset. In many cases good advice or a careful medical examination gives helpful results. of infantile paralysis and the research into its cos been putting the care for the first time. for the first time. tion of these cas
birthday parties.
You are giving tremendous help, not only to the crippled children of your own community, but also to the fight against the continuance of infantile paralysis in the Nation. The work, with your help, is going on. It will not cease until some day the disease itself is brought under control and proper aid has been rendered to all.

I wish that some physical way might be found for me to come in person to each of your parties tonight. I am with you in spirit. I am grateful to you for the splendid work that you are doing, and I thank you from the bottom of my heart.
The main Birthday function in New York City was held at the Waldorf-Astoria, at which Mrs. James Roosevelt, mother of the President, was the guest of honor. The Birthday balls were held in some 5,000 or 6,000 communities throughout the country.

Six-Year Public Works Program Recommended to Congress by President Roosevelt Based on Report Total Expenditures of $\$ 5,011362$ Nould Involve $\$ 2,750,000,000$ Would be Applied to Flood Control
President Roosevelt, in a special message to Congress on Feb. 3, urged the adoption of a six-year program of coordinated public works, designed to provide for an orderly development of the country's resources and to furnish "needed facilities for our people." The President transmitted a report of the National Committee on Water Resources, suggesting a plan for Federal public works involving total expenditures of $\$ 5,011,362,237$. The proposed expenditure in the first year would be $\$ 1,058,568,650$, with successive decreases in following years to $\$ 753,733,438$ in the sixth and decreases in following years to $\$ 753,733,438$ in the sixth and
final year. The report stresses the importance of floodcontrol projects to prevent such disasters as those in the Ohio and Mississippi River valleys. Of the total expenditures proposed, $24 \%$ would go to irrigation, drainage and flood-control projects. Other percentages of proposed expenditures follow: streets and highways, $25 \%$; buildings and equipment, $17 \%$; soil conservation, $8 \%$; slum clearance, sewage, recreational projects, etc., 8\%; forestry, game protection and pest control, $6 \%$; grade crossing elimination, $6 \%$, and navigation aids, $6 \%$.
Stating that the President in his message placed before Congress a $\$ 2,750,000,000$ plan for bulwarking the nation against such floods as the current disaster United Press accounts Feb. 3 from Washington said:
The program calls for immediate expenditure of $\$ 116,000,000$ in the Ohio and Lower Mississippi River areas now stricken by flood. Most of the money would go for improving dike and levee systems and constructing new reservoirs.
In the Ohio River section, the National Resources Committee recommended the immediate expenditure of $\$ 500,000$ for "a continuation and expansion of previous (flood control) surveys by the corps of engineers." The spending of $\$ 600,000$ more at Middlesboro, Ky., to construct levees protecting property from flood ravages also was put before Congress. In the Lower Mississippi Valley the committee urged the spending of $\$ 100,000,000$ in the next two years for constructing flood control projThe committoe outlined $\$ 15,190,000$
hould be built along the Misisippi woth of other centrol profects that should be built along the Mississippi.
Behind lotment of $\$ 85,350,000$ for the deferred construction of an Ohio River flood
In his message Mr . Roosevelt said that it is now time to "develop a long-range plan and policy for constructionto provide the best use of our resources and to prepare in dvance against any other emergency."
The President's message follows:
To the Congress of the United States
During the depression we have substantially increased the facilities and developed the resources of our country for the common welfare through public works and work-relief programs. We have been compelled to underake actual work somewhat hurriedly in the emergency. Now it is time to develop a long-range plan and policy for construction-to provide the best In a previousces and to prepare in advance against any other emergency. under the Chief Executive in order works proposals may filter from the many individual departments and bureaus to a central planning place and thence to the President.
I have also suggested to the Congress that following this course of planning the President will annually submit to the Congress a list of projects which have been studied and approved, and, at the same time, inform the Congress, through the budget, of the total amount of Federal funds which in his judgment should be appropriated for public works during the following fiscal year.

The list of public works submitted by the President in the budget message would, of course, be wholly advisory, for it is within the discretion of the Congress to eliminate projects from this list, to alter the scope of projects or to add other projects.
The report of the National Resources Committee on public works planning which I submit today should, of course, be read in conjunction with the ecommendations for highways, bridges, dams, flood control, and so forth the buder construction, estimates for which have been submitted eports, such as the report of the Great Plains Committee, which I expect to submit to Congress in a few days.
The National Resources Committee submits a six-year program, based on selection and priorty of public works. The period of six years is ar bitrarily chosen, and can, of course, be made to fit into annual future appropriations made by the Congress.
The report also contains recommendations on the timing of public works and division of costs in their relation to necessary organization of ruture continued planning. I have already referred to this in my message elating to the reorganization of the executive branch of the government. As an example of the kind of reservoir of projects constituting the sixyear program, a drainage-basin study is included in the report. This as fixed or final is the rert the uses of water is not rega forward step in the development of the planning process, considering not one proiect alone but the relationships between a great group op projects dealing with water use and control
Through the formulation and annual revision of a program of all types of construction, revision and adoption of the program by Congress and appropriations under regular budgetary procedure, timed in part in relation to economic needs, we can provide for the orderly development of our resources and the provision of needed facilities for our people.

FRANKLIN D. ROOSEVELT
The Wh ite House, Feb. 3, 1937.
The National Resources Committee summarized in part as follows the report which the President submitted:
Basing its recommendations on the experience of the Army Engineers with river and harbor projects, the Public Works Administration and the Federal Employment Stabilization Office, the National Resources Com(a) rocommends.
(a) Formulation and annual revision of a six-year program of Federal (b) Revision and adoption of this list of approved projects by the Congress;
(c) A lump sum annual appropriation under regular budget procedures or expenditure on these approved projects;
(d) An allocation of these funds to appropriate construction agencies by To effectuate this policy the Committeo agency.
ro enent public works organization based on the exds the creation of a PWA and the FESO. The functions of this proposed permanent public works or national development organization, as outlined by the Committee, would include preparation and annual revision of six-year public works programs, negotiation for division of costs between Federal, State and local governments and the allotment of funds to Federal and nonFederal agencies.
The Committee also urges a permanent advisory national resources board and a fiscal advisory committee to advise as to the manner in which public unds shall be provided to meet the public works expenses needed during any given period. The Committoe holds that advance programming of public works will resuit in the development of consistent six-year programs which, with anmal revision, will provide a reservoir of selected projects hich can be utilized in periods of economic depression
and mandic works are also recommended by the Committee

## President Roosevelt Signs Bill Authorizing $\$ 50,000,000$ for Feed and Seed Loans to Farmers-Text of Measure

President Roosevelt on Jan. 29 signed the bill passed by Congress last week authorizing the Farm Credit Administration to make feed and seed loans to farmers during 1937 in an amount up to $\$ 50,000,000$. The loans, to bear interest at the rate of $4 \%$ per annum, are limited to $\$ 400$ to an one borrower, except in extraordinary cases where larger loans are justified. Passing of the bill by Congress was referred to in our issue of Jan. 30, page 703.
The following is the text of the bill as signed by the President on Jan. 29:
[Public-No. 3-75th Congress] [Chapter 7-1st Session] [H. R. 1545] AN AOT
To provide for loans to farmers for crop production and harvesting during the year 1937, and for other purposes.
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Governor of the Farm Credit Administration, hereinafter in this Act referred to as the Governor, is hereby authorized to make loans to farmers in the United States (including Hawaii and Puerto Rico), for fallowing, for planting, for cultivation, for production of crops, for harvesting of crops, for supplies incident and necessary to such production or harvesting, and for feed for livestock, or for any of such purposes. Such loans shall be made and collected through such agencies, upon such terms and Sec, 2 (a) No
sec. 2. (a) No loan shall be made under this Act to any applicant who shall not have first established to the satisfaction of the proper officer or that such applicant is unable to procure from other sources a loan in an amount reasonably adequate to meet his needs for the purposes for which loans may be made under this Act; and preference shall be given to the applications of farmers whose cash requirements are small.
(b) There shall be required as security for any such loan a first lien, or an agreement to give a first lien, upon all crops of which the production or harvesting, or both, is to be financed, in whole or in part, with the proceeds of such loan; or, in case of any loan, for the purchase or production of feed for livestock, a first lien upon the livestock to be fed.
(c) No loan made under the provisions of this Act to any borrower shall exceed $\$ 400$, nor shall a loan be so made in any calendar year which, together with the unpaid principal of prior loans so made to such borrower in that year, shall exceed $\$ 400$ in amount: Provided, however, That in any area certified by the President of the United States to the Governor as a distressed emergency area, the Governor may make loans without regard to the foregoing limitations as to amount, under such regulations, with such maturities,
and in such amounts as he may prescribe.
(d) Each loan shall bear interest at the rate of $4 \%$ per annum Sec. 3. The proceeds of each loan made by the Governor under the provisions of this Act shall be impressed with a trust for the purposes for which loans may be made under this Act, and may be used only for the purposes tated in the application therefor, and such trust shall continue, and the execution, until such proceeds have been used by the borrower for such purposes.
Sec. 4. (a) Fees for recording, filing, registration, and examination of records (including certificates) shall not exceed 75 cents per loan, and may be paid from the proceeds of the loan.
(b) No fees for releasing liens given to secure loans made pursuant to this Act, nor any other fee not specified herein, shall be paid from the funds herein authorized to be appropriated.
Sec. 5. (a) The Governor shall have power, without regard to the proisions of other laws applicable to the employment and compensation of officers and employees of the United States, to employ and fix the compensaion and duties of such agents, officers, and employees as may be necessary o carry out the purposes of this Act; but the compensation of such officen and emplas
(b) Such and
(b) Such agents, officers, and employees, or any of them, and the agents, fficers, employees, and facilities of the FCA available for use in connection seed, and feed loan Acts of the same reneral character may be used by the Governor to perform services for any institution operating under the supervision of the FCA, upon such terms and conditions as the Governor may determine; and such institutions are hereby expressly empowered to enter into agreements with the Governor for such purpose.
(c) For the purpose of carrying out the provisions of this Act, and for collecting loans made under other Acts of the same general character, including loans made by the Governor with funds appropriated by the Emergency Appropriation Act, fiscal year 1935, or the Emergency Relief Appropriation Act of 1935, the Governor is authorized also to use the facilities and services of any agency or corporation operating under the supervision of the FCA, and of any officer or employee of any such agency or institution, or of the FCA, and may pay for such services and the use of such facilities from the funds made available for the payment of necessary administrative expenses, and such agencies and institutions are hereby expressly empowered to enter into agreements with the Governor for the accomplishment of such purposes and to perform the services provied for therein

(2) For the purpose of fallowing, or for the planting, production, or harvesting of any
for such loan.
(b) It shall be unlawful for any person to make any material false representation for the purpose of obtaining, or assisting another to obtain, a loan under the provisions of this Act; or willfully to dispose of, or assist in disposing of, except for the account of the Governor, any crops or other property upon which there exists a lien securing a loan made under the provisions of this Act.
(c) It shall be unlawful for any person to charge or accept a fee for preparing or assisting in the preparation of any papers of an applicant for a loan (d) Any persons of this Act.
(d) Any person violating any provision of this section of this Act shall, upon conviction thereof, be punished by a fine of not more than $\$ 1,000$, or by mprisonment for not more than six months, or both.
Sec. 7. (a) There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $\$ 50,000,000$ for the purpose of enabling the Governor to carry out the provisions of this (b) The moneys appropriated in pursuance of subsection (a) of this secall colloctions ants collected for services rendered under section 5 (b), and ased by the Governor for making loans under this Act, and for all necessary administrative expenses incurred in connection with the making and collection of such loans.
(c) Expenditures for printing and binding necessary in carrying out the provisions of this Act may be made without regard to the provisions of ection 3709 of the Revised Statutes.
Approved, Jan. 29, 1937.
President Roosevelt Urges Legislation by Congress to Permit Acceptance by Government of Art Gift of Andrew W. Mellon-In Special Message Calls Collection "One of Finest and Most Valuable'
In a special message to Congress on Feb. 1 President Roosevelt recommended the passage of legislation enabling the acceptance by the United States of Andrew W. Mellon's art collection. Mr. Mellon, former Secretary of the Treasury, tendered his collection, valued at $\$ 19,000,000$, to the government in letters exchanged between himself and President Roosevelt, which were made public on Jan. 2. Mr. Mellon also offered to construct a building in Washington, at a cost of approximately $\$ 8,000,000$, to house the collection. Previous reference to the offer was made in our issue of Jan. 16, page 385.
In urging Congress, on Feb. 1, to pass the necessary legislation for the accentance of Mr. Mellon's "magnificent gift," Fresident Roosevelt said that "the works of art thus offered to the government constitute one of the finest and most valuable collections in existence." He also advised Congress that the Attorney General and the trustees of the Smithsonian Institution are willing to cooperate witb Congressional committees in formulating the required legislation. The President's message follows:
To the Congress of the United States:
I commend to the consideration of the Congress the matter of enacting appropriate legislation to effect the acceptance by the United States of the magnificent gift referred to in my recent exchange of letters with Andrew
W . Mellon. The conditions under which the gift is tendered are set out W. Mellon. The conditions under which the gift is tendered are set out in the correspondence, copies of which are transmitted herewith.
The works of art thus offered to the covernment constitute
The works of art thus offered to the government constitute one of the finest and most valuable collections in existence, containing only objecta
of the highest standard of quality.

It is with a keen sense of appreciation of the generous purpose of the donor and the satisfaction that comes with the knowledge that such a splendid collection will be placed at the seat of our government for the benefit and enjoyment of our people during all the years to come, that I submit this matter to the Congress.
The Attorney General and the trustees of the Smithsonian Institution have conferred with representatives of the donor and will be glad to discuss the necessary legislation with the appropriate committees.
The White House, Feb. 1, 1937.
FRANKIIN D. ROOSEVELT.

Message of President Roosevelt to Congress Recommending Legislation For Reorganization of Judicial Branch of Government-Power to Increase Membership of Supreme Court to 15 Federal Courts Also Proposed
I have recently called the attention of the Congress to the clear need for a comprehensive program to reorganize the administrative machinery of the executive branch of our Government. I now make a similar recommendation to the Congress in regard to the judicial branch of the Govern The Constitution provides that the Preside "th 1 give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expeto their consideration such measures as he shall judge necessary and expe-
dient." No one else is given a similar mandate. It is therefore the duty of the President to advise the Congrass in regard to the judiciary whenever he deems such information or recommendation necessary.

I address you for the further reason that the Constitution vests in the Congress direct responsibility in the creation of courts and judicial offices and in the formulation of rules of practice and procedure. It is, therefore, one of the definite duties of the Congress constantly to maintain the effective functioning of the Federal judiciary.
The judiciary has often found itself handicapped by insufficient personnel with which to meet a growing and more complex business. It is true that the physical facilities of conducting the business of the courts have been greatly improved, in recent years, through the erection of suitable quarters, the provision of adequate libraries and the addition of subordinate court officers. But in many ways these are merely the trappings of judicial office. They play a minor part in the processes of justice.
Since the earliest days of the Republic, the problem of the personnel of the courts has needed the attention of the Congress. For example, from the beginning, over repeated protests to President Washington, the Justices to hold trials throughout the length and breadth of the land-a practice which endured over a century.

Changes Affecting Supreme Court Since Establishment In 1789
In almost every decade since 1789 , changes have been made by the Congress whereby the numbers of Judges and the duties of judges in Federal courts have been altered in one way or another. The supreme Court was established with six members in 1789; it was reduced to five inj1801; it was increased to seven in 1807; it was increased to nine in 1837;
it was increased to ten in 1863; it was reduced to s6ven in 1866; it was it was increased to ten in
increased to nine in 1869.

The simple fact is that today a new need for legislative action arises because the personnel of the Federal judiciary is insufficient to meet the business before them. A growing body of our citizens complain of the complexities, the delays, and the expense of litigation in United Siates
courts. A let
by reasoning and statistics the common impression thit herewith, jusifies by reasoning and statistics the common impression created by our over
crowded Federal dockets-and it proves the need for additional judges crowded Federal dockets-and it proves the
Dolay in any court results in injustice.
It makes lawsuits a luxury available only to the few who can afford them or who have property interests to protect which are sufficiencly large to repay the cost. Poorer litigants are compelled to abandon valuable rights or to accept inadequate or unjust settlements because of sheer inability to finance or to await the end of a long litigation. Only by speeding up the processes of the law and thereby reducing their cost can we eradicate the growing impression that the courts are chiefly a haven for the well-to-do.
Delays in the determination of appeals have the same effect. Moreover if trials of original actions are expedited and existing accumulations of cases are reduced, the volume of work imposed on the Circuit Courts of Appeals will further increase.
The attainment of speedier justice in the courts below will enlarge the task of the Supreme Court itself. And still more work would be added by the recommendation which I make later in this message for the quicker determination of constitutional questions by the highest court.

## Says Supreme Court Labors Under Heavy Burden

Even at the present time the Supreme Court is laboring under a heavy burden. Its difficulties in this respect were superficially lightened some years ago by authorizing the court, in its discretion, to refuse to hear appeals in many classes of cases. This discretion was so freely exercised that in the last fiscal year, although 867 petitions for review were presented to the Supreme Court, it declined to hear 717 cases. If petitions in behalf of the Government are excluded, it appears that the court permitted private litigants to prosecute appeals in only 108, cases out of 803 applications,
Many of the refusals were doubtless warranted.. But can it be said that Many of the refusals were doubtless warranted.. But can it be said that
full justice is achieved when a court is forced by the sheer necessity of keepfull justice is achieved when a court is forced by the sheer necessity of keep-
ing up with the business to decline, without even an explanation, to hear ing up with the business to decline, without even an expla

- It seems clear, therefore, that the necessity of relieving present congestion extends to the enlargement of the capacity of all the Federal courts

237 Life Tenure Permanent Judgeships In Federal Courts

## 27 Over 70 Years of Age

A part of the problem of obtaining a sufficient number of judges to dispose of cases is the capacity of the judges themselves. This brings forward the question of aged or infirm judges-a subject of delicacy and yet one which requires frank discussion.
In the Federal courts there are in all 237 life tenure permanent judgeships. Twenty-five of them are now held by judges over 70 years of age and eligible to leave the bench on full pay. Originally no pension or retirement allowance was provided by the Congress. When after 80 years of our national history the Congress made provisions for pensions it found a well-entrenched tradition among judges to cling to their posts, in many instances far beyond their years of physical or mental capacity. Their salaries were small. As with other men, responsibilities and obligations
accumulated. No alternative had been open to them except to attempt accumulated. No alternative had been open to them except to attempt to perform the duties of their offices to the very edge of the grave. advanced age full mental and physical vigor. Those not so fortunate an
often unable to perceive their own infirmities. "They seem to be tenacious of the appearance of adequacy." The voluntary retirement law of 1869 provided, therefore, only a partial solution. That law, still in force, has not proved effective in inducing aged judges to petire on a pension.

This result had been foreseen in the debates when the measure was being considered. It was then proposed that when a Judge refused to retire upon reaching the age of 70, an additional judge should be appointed to assist in the work of the

With the in the senate.
With the opening of the 20th century and the great increase of population and commerce and the growth of a more complex type of litigation, similar 1913, 1914, 1915, and 1916, the Attorneys-General then in office recommended to the Congress that when a district or a circuit Judge failed to mended to the Congress that when a district or a circuit Judge failed to affairs of the court might be promptly and adequately discharged.
In 1919 a law was finally passed providing that the President " "may" appoint additional district and circuit Judges, but only upon finding that the incumbent Judge over seventy "is unable to discharge efficiently all the duties of his office by reason of mental or physical disability of permanent character." The discretionary and indefinite nature of this legislation has rendered it ineffective. No President should be asked to determine the ability or disability of any particular Judge.

The duty of a judge involves more than presiding or listening to testimony or arguments. It is well to remember that che mass of details involved in the average of law cases coday is vastly greater and more complicated than even 20 years ago. Records and briefs must be read: Statutes, decision and extensive material of a technical, scientific, scatistical and economic nature must be searched and studied; opinions must be formulated and written. The modern tasks of judges call for the use of full energies.
Modern Complexities Calt For Constant Infusion of New Blood In Courts
Modern complexities call also for a constant infusion of new blood in the courts, just as it is needed in executive functions of the Government and in private business. A lowered mental or physical vigor leads men to avoid an examination of complicated and changed conditions. Little for the needs of anocher generation; older men, assuming that the scene is the same as it was in the past, cease to explore or inquire into the present or the future.
We have recognized this truth in the civil service of the nation and of many States by compelling retirement on pay at the age of 70 . We have recognized in the army and navy by retiring officers at the age of 69 . A number of States have recognized it by providing in their constitutions for compulsory retirement of aged judges.
Life tenure of Judges, assured by the Constitution, was designed to place the courcs beyond temptations or influences which might impair their judgments: it was not intended to create a static judiciary. A constant and systematic addition of younger blood will vitalize the courts and better equip them to recognize and apply the essential concepts of justice in the light of the needs and the facts of an ever-changing world.
it is obvious, therefore, from both reason and experience, that some the work of die Judger and accerate the work of older Judges and accelerate the work of the court

## Recommends Increase In Number of Judges

I therefore earnestly recommend that the necessity of an increase in the number of Judges be supplied by legislation providing for the appointment of additional Judges in all Federal courts, without exception, where there resign. If an elder of retirement age who do not choose to retire or to from the presence of an additional Judge in the crowded state of the dockets; if the capacity of an elder Judge is in fact impaired, the appointment of an additional judge is indispensable. This seems to be a truth which can not be contradicted.
I also recommend that the Congress provide machinery for taking care of sudden or long-standing congestion in the lower courts. The Supreme Court should be given power to appoint an administrative assistant who may be called a proctor. He would be charged with the duty of watching the calendars and the business of all the courts in the Federal system. The Chief Justice thereupon should be authorized to make a tomporary assignment of any Circuic or District judge hereaf er appointed in order that he may serve as long as needed in any circuit or district where the courts are in arrears.
I attach a carefully considered draft of a proposed bill, which, if enacted, would, I am confident, afford substantial relief. The proposed measure also contains a limit on the total number of judges who might thus be appoint
These proposals do not raise any issue of constitutional law. They do not suggest any form of compulsory retirement for incumbent judges. Indeed, those who have reached the retirement age but desire to continue strain and would would be able to do so under less physical and mental gestion in the business of our courts. Among them are men of eminence and great ability whose services the Government would be loath to lose. If, on the other hand, any Judge eligible for retirement should feel that his court would suffer because of an increase in its membership, he may retire or resign under already existing provisions of law if he wishes so to do. In this connection let me say that the pending proposal to extend to the Justices of the Supreme Court the same retirement privileges now available to other Federal judges, has my entire approval.

Cites Conflicting Decisions In Trial and Appelate Courts on
Constitutional Issucs
One further matter requires immediate attention. We have witnessed the spectacle of conflicting decisions in both trial and appellate courts on the constitutionality of every form of important legislation. Such a welter and indeed, the entire administration of justice dangerously near to disrepute.
A Federal statute is held legal by one Judge in one district; it is simultaneously held illegal by another Judge in another district. An act valid in one judicial circuit is invalid in another judicial circuit. Thus rights fully accorded to one group of citizens may be denied to others. As a practical matter this means that for periods running as long as one year or two years or three years-until final determination can be made by the Supreme Court-the law loses its most indispensable element-equality. Moreover, during the long processes of preliminary motions, original trials, petitions for rehearings, appeals, reversals on technical grounds requiring re-trials, motions before the supreme Court and the final hearing by the highest tribual-durng all this ine laber industry, agniculure, commerce and and ombar 1 is well to remember that during long processes the normal operations of society and government are handi-
capped in many cases by differing and divided opinions in the lower courts and by the lack of any clear guide for the dispatch of business. Thereby our legal system is fast losing another essential of justice-certainty. Finally, we find the processes of government itself brought to a complete stop from time to time by injunctions issued almost automatically, sometimes even without notice to the Government, and not infequently in clear violation of the principle of equity that injunctions should be granted which these rare catutes which whe the rat of time, the Congress in cases to which the Government is not a party.
In the uncertain state of the law it is not difficult for the ingenious to In the uncertain state of the law the validity of new legislation or its application. While these questions are laboriously brought to issue and debated through a series of courts, the Governments must stand aside. It matters not that the Congress has enacted the law, that the Executive has signed it and that the administrative machinery is waiting to function. Government by injunction lays a heavy hand upon normal processes and no important statute can take effect-against any individual or organization with the means to employ lawyers and engage in wido-flung litigationuntil it has passed through the whole hierarchy of the courts. Thus the judiciary, by postponing the effective date of acts of the Congress, is assuming an additional function and is coming more and more to constitute a scattered, loosely organized and slowly operating third House of the National Legislature.
This state of affairs has come upon the nation gradually over a period of decades. In my annual message to this Congress I expressed some views and some hopes.

## Recommendations

Now, as an immediate step, I recommend that the Congress provide that no decision, injunction, judgment or decree on any constitutional question be promulgated by any Federal court without previous and ample notice to the Attorney-General and an opportunity for the United States to present evidence and be heard. This is to prevent court action on the constitutionality of acts of the Congress in suits between private individuals, where the Government is not a party to the suit, without giving opportunit
law of the land.
law of the land
Instance earnestly recommend that in cases in which any court of first instance determines a question of constitutionality, the Congress provide
that there shall be a direct and immediate appeal to the Supreme Court and that such cases take precedence over all other matters pending in that court. Such legislation will, I am convinced, go far to alleviate the inequality, uncertainty and delay in the disposition of vital questions or constitutionality arising under our fundamencal law.
My desire is to strengthen the adminiscration of justice and to make it a more effective servant of public need. In the American ideal of government the courts find an essential and constitutional place. In striving to fulfill that ideal, not only the Judges but the Congress and the Executive as well, must do all in their power to bring the judicial organization and personnel to the high standards of usefuln
government and modern conditions require.
This message has dealt with four present needs
This message has dealt with four present needs:
First, to eliminate congestion of calendars and to make the judiciary as a whole less static by the constant and systematic addition of new blood to its personnel;

Second, to make the judiciary more elastic by providing for temporary transfers of circuit and district judges to those places where Federal courts are most in arrears;

Third, to furnish the supreme Court practical assistance in supervising the conduct of business in the lower courts;
Fourth, to eliminate inequalicy, uncertainty and delay now existing in the decermination of Constitutional questions involving Federal statutes. If we increase the personnel of the Federal courts so that cases may bo promptly decided in the first instance, and may be given adequate and
prompt hearing on all appeals; if we invigorate all the courts by the persistent infusion of new blood; if we grant to the Supreme Court further power and responsibility in maintaining the efficiency of the entire Federal judiciary; and if we assure Government participation in the speedier consideravion and final determination of all constitutional questions, we shall go a long way toward our high objectives. If these measures achieve their aim, we may be retieved of the necassity of considering any fundamental changes in the powers of the courts or the Constitution of our Governmentchanges which involve consequences so far-reaching as to cause uncertainty as to the wisdom of such course.

Neutrality Resolution of Senators Clark, Bone, Vandenberg and Nye Designed to Enforce So-Called Cash-and-Carry" Policy-Resolution By Senator Lewis Would Give Pr
Senator Connaly's Bill
New and stringent legislation designed to protect American neutrality during foreign wars was introduced in Congress on Feb. 1 by Senators Clark, Bone, Vandenberg and Nye. Submitted in the form of a joint resolution, it would add three sections to existing law, including a provision denying Federal protection to shippers of American goods into belligerent zones. The resolution provides that goods into belligerent zones. The resolution provides that
the United States Government would not recognize any "right, title or interest" in such shipments. Meanwhile, it was reported in Washington on Jan. 30 that President Roosevelt would base the Administration's policies regarding permanent neutrality legislation on measures already introduced by Senator Pittman and Representative McReynolds.

Neutrality legislation introduced in the Senate on Feb. 1 was described as follows in a Washington dispatch of that date to the New York "Times":
Two other neutrality bills were introduced in the Senate, one by Senator Tom Connally, Democrat of Texas, and the other by Senator J. Hamilton Lewis, Democrat of Illinois. The Connally bill carries the endorsement of the Finance Committee and is the same as the bill introduced at the last session. The bill is a "take-the-profit-out-of-war" plan, and Senator Connally said it had been "expertly drawn to fit in with the Federal tax structure."
The Lewvis bill deals; as does the Munitions Committee bill, with neutrality only. It is brief and vests the widest possible discretionary power in the President, the only stipulation being that the President shall report ail his orders to Congress, these orders to be subject to the "supervision
and jurisdiction" of Congress.

The Clark-Bone-Vandenberg-Nye resolution is intended by its sponsors to enforce a so-called "cash-and-carry" policy and makes all "credit" transactions risks that must be borne by the exporter without the backing of his government.
Under the proposed law recognition of rights, titles and interests in goods destined for belligerents would be denied not only by the Federal Government but also by all States and Territories. All insurance risks on any commodities so exported, or on any American interest in the goods would be void and unenforceable in any American court, Federal, State or Territorial. The insurance provision would apply also to American ships that engaged to
at war within nations.
That the resolution will command strong support was indicated when Senator Key Pittman of Nevada, Chairman of the Foreign Relations Committee, issued a statement saying that the proposed amendments were substantially in accord with neutrality provisions introduced by him and now being considered by the Foreign Relations Committee.
"These proposals by Senator Clark and the other Seantors," said Senator Pittman, "do not deal with the arming of American merchantmen engaged in commerce with belligerent countries, nor with the other Pittman amendments making it unlawful for American citizens to travel on belligerent vessels and, therefore, it is to be assumed that such Senators approve such provisions in the Pittman amendment.

## Sees Embargo Principle Adopted

"The Clark et al. amendments also adopt in principle the proposal in the Pittman amendment that the President shall proclaim from time to time articles which ents. The Clark et all proposals, in this particular, are more detailed. ents. The Clark et all proposals, in this particular, are more detailed.
They attempt to provide that no insurance shall be granted on such shipments, and that our courts shall not be open to any claims for damage or otherwise by reason of loss occasioned by the transport of such articles or materials, whether by domestic or foreign vessels."

A group of 30 Representatives on Feb. 2 issued a statement demanding House action on a strong program of neutrality legislation, including embargoes on arms and ammu* nition exports and loans to belligerents, a "cash-and-carry" trade policy with belligerents, and other features of the program proposed in the Senate.

House Approves Independent Offices Appropriations Bill-Total of $\$ 1,046,757,143$ Authorized for Next Fiscal Year Represents Increase of $\$ 78,601,558$
The House witholt a record vote on Feb. , passed the Independent Offices Appropriations Bill, carrying \$1,046,757,143 in appropriations and authorizations for the fiscal year ending June 30,1938 for almost 40 independent agencies, year ending and commissions. The Appropriations Committee bureaus and commissions. Feb. 1, after reducing the total reported the measure on Feb. 1, after reducing the total
of proposed appropriations by $\$ 5,950,000$, including a decrease of $\$ 5,000,000$ in the salary and expense fund for the Social Security Board. As approved by the House, the bill was unchanged from the form in which it was originally reported, except for minor amendments advocated by the Committee. The appropriations are $\$ 78,601,558$ greater than for the present fiscal year, as far as regular agencies are concerned. Its passage by the House was described as follows in a Washington dispatch of Feb. 3 to the New York "Times":
The bill embodies the committee decision to ban the use of government employees by Congressional investigating committees, carrying a provision to prevent any of the funds appropriated from being used for the payment of salaries or expenses in connection with investigations of either the House or Senate.

An attempt to remove this provision by some of the members, led by Representatives Maverick of Texas and Eilenbogen of Pennsylvania, was defeated.

Mr. Ellenbogen offered an amendment along the lines of the amendment to the First Deficency Bill adopted by the Senate yesterday which would allow committees to make use of government employees, but require a report as to the cost of such service by the government departments. rum of Virginia, who handled the bill on the floor.
However, House leaders indicated an intention to reach a compromise on the matter with the Senate. Mr Woodrum and Representative Rayburn of Texas, the majority leader, said that the matter would be threshed out in conference and that the conclusion reached would be embodied in this bill and in all future supply bills.
Other amendments defeated today included one by Representative Wigglesworth of Massachusetts to cut the authorization for publicity work by the Federal Housing Administration from $\$ 500,000$ to $\$ 250,000$; one by Representative Taber, Republican of New York, to cut the authorization for the Home Owners Loan Corporation from $\$ 30,000,000$ to $\$ 29,000,000$ and one by Representative William P. Connery Jr, of Massachusetts to bar the purchase of labor-saving devices.

House Tables Resolution Calling for Information from Secretary Perkins Regarding Activities of Strikers Seeks Investigation
The House on Feb. 4 tabled a resolution introduced by Representative Clare E. Hoffman (Republican of Michigan) calling upon Secretary of Labor Perkins for information regarding the activities of strikers in the plants of the General Motors Corp. In a debate before the vote was taken Chairman William P. Connery (Dem., Mass.) of the House Labor Committee, declared "not one of the Committee indorses sit-down strikes."
"We haven't gone into the merits of sit-down strikes, but the action of the Committee should not be construed as indorsing them," Mr. Connery said, according to United Press advices from Washington, which also quoted Mr. Connery as saying that "the reason the Committee reported the resolution adversely is because it would put the Secretary
of Labor in the position of being a partisan in the present labor dispute."

The House Labor Committee decided on Feb. 3 to submit an unfavorable report on the Hoffman resolution. It was stated on that date that Miss Perkins views on the resolution were contained in a letter addressed to Representative Connery in which she is reported to have said that the resolution was unfair in taking only the side of the employers.
On Feb. 2 a resolution seeking a Congressional investigation into the financial set-up and labor policies of the General Motors Corporation was introduced by Senator Matthew M. Neely (Dem., West Va.). The resolution was referred to the Committee on Education and Labor, headed by Senator Hugo Black. In reporting this, United Press dispatches from Washington Feb. 2 said:
It was introduced soon after John L. Lewis, automobile strike leader, had departed for Detroit to take charge of union strategy in the dispute. Mr. Lewis warned two weeks ago that such an inquiry would be sought from Congress. He said he would forestall introduction of the resolution pending outcome of conferences in Washington and Lansing to mediate the strike.
The sudden change in plans was interpreted here as a counter blow by Mr. Lewis and his aides at General Motors whose officials today obtained an injunction against the sit-downers in Flint. At the time Mr. Lewis announced the proposed Congressional investigation, G. M. O. officials issued a statement saying they would. welcome an impartial inquiry of the corporation.

Senate and House Committees Approve Two-Year Extension of Government Guarantee of FHA Debentures
The Senate Banking and Currency Committee on Feb. 2 approved a measure to extend for two years the guarantee by the United. States of debentures issued by the Federal Housing Administrator. Under present legislation the guaranty will expire on July 1. As introduced on Jan. 12 byi Senator Robert L. Buckley, of Ohio, the joint resolution provided for a three-year extension of the period, but this was reduced to two years on Jan. 28 by a sub-committee of the Senate Banking and Currency Committee. On Jan. 27 the House Banking and Currency Committee approved a similar measure, extending the guarantee to July 1, 1939.

Increase In Membership of U. S. Supreme Court Sought By President Roosevelt-Would Make Maximum Membership 15, Thus Providing For 6 Additional Justices If Those Now Over 70 Remain In TribunalAdded Judges Also Asked For Lower Courts
Important changes in the Federal Government's judiciary system, are proposed by President Roosevelt in a message addressed to Congress yesterday ( Feb . 5). In the proposals for the reorganization of the Federal Court machinery, presented by the President, provision would be made for an increase in the membership of the United States Supreme Court, the maximum number of Justices being fixed at 15. This proposal is embodied in a bill which the President submitted to Congress along with his message. In his message the President recommends "that the necessity of an increase in the number of Judges be supplied by legislation providing for the appointment of additional judges in all Federal courts, without exception, where there are incumbent Judges of retirement age who do not choose to retire or to resign." In the case of the Supreme Court, which now consists of 9 Justices, there are six members over 70 years of age.
According to the President "modern complexities call for a constant infusion of new blood in the courts, just as it is needed in executive functions of the Government and in private business." "A constant and systematic addition of younger blood," he says "will vitalize the courts and better equip them to recognize and apply the essential concepts of justice in the light of the needs and the facts of an everchanging world." The President adds:
We have recognized this truth in the civil service of the nation and of
many States by compelling retirement on pay at the age of 70 . We have many States by compelling retirement on pay at the age of 70 . We have recognized it in the army and navy by retiring officers at the age of 64.
Approval is expressed by the President of "the pending. proposal to extend to the Justices of the Supreme Court proposal to extend to the Justices of the Supreme Court Federal Judges."
Recommendation was made by the President that Congress "'provide machinery for taking care of sudden or longstanding congestion in the lower courts. The Supreme Court," he goes on to say, "should be given power to appoint an administrative assistant who may be called a proctor. He would be charged with the duty of watching the calendars and the business of all the courts in the Federal system."
The President's plans as summarized by the United Press, provide:

1. That in each instance where a Federal judge reaches 70 and fails to retire the President be empowered to name an additional judge, providing such appointments do not increase the number of Supreme Court justices bove 15 nor 50 for the judiciary as a whole.
2. That no Federal judge be allowed to issue any decision or injunction nvolving constitutional questions without ample previous notice to the government; and that immediate appeals of all such questions be allowed matters pending in the Supreme Oourb.
3. That transfers and shifts of Federal judges be allowed from district to district in order to speed up court business.
4. That the supreme Court be provided with an additional officer to be termed a proctor, charged with watching all Federal court business
in order to expedite and facilitate it.

The President in his message says:
If these measures achieve their aim, we may be relieved of the necessity of considering any fundamental changes in the powers of the courts or the
constitution of our Government-changes which involve consequences so far-reaching as to cause uncertainty as to the wisdom of such course.

It was pointed out in the Associated Press accounts from Washington yesterday that the 9 Justices now on the high court have ruled against New Deal legislation 11 times to five favorable decisions; enactment of the President's plan would put six of the nine in the retirement class-or else six justices could be added to the court.
The President's message to Congress, which was accompanied by a letter to him from Attorney General Cummings on the reorganization of the Judiciary, is given in full elsewhere in this issue.

Montgomery Circuit Court Declares Valid Alabama
Unemployment Compensation Law-Also Upholds
Provisions of Federal Social Security Act Provisions of Federal Social Security Act

Alabama's unemployment compensation law was upheld on Jan. 23 by Judge Walter B. Jones, of Montgomery Circuit Court, who sustained the State's demurrers to bills filed by the Beeland Mercantile Co. of Greenville, and several other Alabama firms. This was the first test of the law in other Alabama firms. appeal to the Alabama Supreme Court was planned. The same law was held on Dec. 15 to violate both the State and Federal Constitutions by a 3-judge Federal Court in Montgomery. The 3 -judge tribunal also granted a permanent injunction against the enforcement of the law; this previous ruling on the law was referred to in our issue of Dec. 19, page 3927.

Judge Jones in his decision on Jan. 23 also held valid the unemployment compensation provisions of the Federal Security Act, which the complainants had sought be declared unconstitutional. As to Judge Jones' decision, we take the following from the Montgomery "Advertiser" of Jan. 24:
By stipulation of counsel, the Beeland case and three others, which involved the same constitutional questions and which sought the same relief, were submitted for the decision of the Court upon the demurrers to the bills of complaint. The three other cases were those of the Talladega Ice \& Cold Storage Co., Alpha Portland Cement Co., and the West Point
Mfg. Co. Scores of other business enterprises in many parts of the State Mfg. Co. Scores of other business enterprises in many parts of the State were also parties to the suits, either as complainants or intervenors.
In concluding a lengthy opinion, Judge Jones held:
"After a careful consideration of all the points urged against the Alabama State constitutional provisions that have been called to the attention of the
Court. The Court is of the opinion that the Alabama law is within the constitutional power of the legislative department of the Government, and the other objections raised to the law are without merit.
The Judge declared in the opinion that the fundamental purpose in con struing a constitutional provision is to ascertain and give effect to the intent of the framers and of the people who adopted the constitution. "It is a well-settled principle of constitutional construction that such construction should not be technical, and that the courts should aim to give effect to the purpose indicated by a fair interpretation of the language used." Judge Jones added.

Differs With 3-Judge Court
Judge Jones, who sat as a "guest Judge" in the three-judges hearing of a similar case here last year in Federal Court, took cognizance in his opinion yesterday of that Court's unanimous opinion in invalidating the State law. in the U. S. District Court of Montgomery in the case of Gulf States Paper Co. vs. Carmichat Court or Montgomery in the case of Guir states Paper judges declared the, Ahern judges declared the Alabama law to deny due process, in that the classificaopinion was unable to find any reason for the distinction made. This Court is of the was unable to and prefers to follow that case," the opinion by Judge Lones stated.
The California case referred to was that of Gillum vs. Johnson, in which this classification was also attacked.

Delegated Authority
Judge Jones further held that the Alabama law legally confers on the Unemployinient Compensation Commission authority to make rules and delegation of legislative power, as contended by the complainants, unlawful as to legisla ive pow, as contended by the complainants.
the opinion that this allegation is correctly disposed of in the case of willum vs. Johnson, supra, where it held there was no coercion in the Federal act

United States Supreme Court Holds Invalid Tax Under Washington State Utility Tax Law by 5-to-4 De-cision-Justice Stone Returns to Bench After
Illness-Tribunal Refuses to Review Attack on Social Security Act-Ruling on "Windafll Tax" Sitting with its full membership of nine for the first time in several months, the United States Supreme Court on Feb. 1 handed down a five-to-four decision declaring that railroads had been charged more than the cost of their own regulation under a Washington State law imposing a tax on railroads and other public utilities to finance regulatory activities. Justice Stone sat with the Court for the first time since Justice Stone sat with the court forced him from the bench several months ago. The Court on Feb. 1 also refused to review a Massachusetts case challenging the State unemployment insurance law on the ground that the Federal Social Security Act is unconstitutional. It also rejected a plea for reconsideration of the "windfall tax" provisions of the 1936 Revenue Act.
The majority opinion in the Washington utility tax law case was delivered by Justice Roberts, who said that the State had not proved that the tax exacted from a railroad
did "not exceed what is reasonably needed for the service rendered." Those concurring in Justice Roberts views were Justices Van Devanter, Sutherland, McReynolds and Butler, the minority opinion was delivered by Justice Cardozo, who was joined by Chief Justice Hughes and Justices Stone and Brandeis.

United Press Washington advices of Feb. 1 outlined the opinions handed down by the Court on that date as follows:
The Washington State tax on public utilities' gross income, levied to pay the expenses of the State's Public Works Department, was tested by means of a suit filed by Great Northern RR. Co.
me The court failed to hold the Washington State statute entirely void on its face, but ruled that, under the evidence taken at the trial, it was clear the railroads had been charged more than the cost of their own regulation. Whe company sought to recover taxes and interest totaling $\$ 25,465$. It won a decree for this amount from the Superior Court which held the law invalid.
The trial court found that the law was unconstitutional on its face because the fee was not limited by the cost of regulating the company and because it went to pay expenses of the regulatory body for judicial, ad ministrative and police duties for which the railroad could not be charged
The State Supreme Court reversed the decision and upheld the law. parent deadlock over several New Deal issues, which have been pending a long time was not revealed because the Court failed to pass on two closely watched cases.
W.One was a plea by New York manufacturers for rehearing of the New York State Unemployment Insurance Law, a part of the social security program. The State law was upheld earlier in the term when the court split four to four in passing on its validity, thus tentatively permitting the favorable decision of New York State's highest court to stand.
The other pending case involves an attack on constitutionality of Wash ington State's minimum wage law for women. The court has struck down similar laws several times.
The attack on the Federal social Security Act came from Howes Bros. Co., Boston company, in a complicated case involving the Massachusetts Unemployment Insurance Law
While the Howes Co. attack centered on the Massachusetts law, Constitutionality of this act was only challenged on the grounds that the Federal aw with which it is associated is invalid.
Briefs filed in the case by counsel for the company asserted that the company wanted the Massachusetts Act to be sustained if the Federal law Federal law is in effect.
The act differs in this respect from the New York law.
The Massachusetts law was sustained by the Supreme Court of that State and the appeal taken from that tribunal.
"Windfall Tax"
The "windfall tax" was passed at the last session of Congress to preven processors from what was described by President Roosevelt as "unjust enrichment" after the Supreme Court invalidated the processing taxes of the Agricultural Adjustment Act. The tax was designed to take from processors money they obtained from producers or consumers in anticipation of processing levies they finally did not have to pay.
The court refused to hear argument in the appeal of the First Bank Stock Corp. of Minneapolis, Minn., from the Minnesota Supreme Court ruling which held that stock it holds in 84 State banks in its chain are subject to the Minnesota Credits Tax law.
The ruling was made in a test case involving stocks held by the holding company, a Delaware corporation doing business in Minnesota,
Montana and North Dakota banks. Taxes of $\$ 3,081$ are involved.

Federal Judge Mack Rules Utility Holding Companies Must Register with SEC-Decision Against Electric
Bond \& Share Co. Does Not, However, Discuss Constitutionality of Entire Act
Utility holding companies are legally required to register with the Securities and Exchange Commission, under the terms of the Public Utilities Act of 1935, Federal Judge Julian W. Mack of New York City decided on Jan. 29 Judge Mack dismissed a cross complaint filed against the Government by the defendants, the Electric Bond and Share Company and 21 affiliates, but he did not rule upon the constitutionality of the entire Act. The court merely held that the registration provisions are in themselves a system of holding company regulations within the power of the Federal Government, and are therefore constitutional, even though separated from the rest of the Act.
It was pointed out in the New York "Times" of Jan. 30 that during the litigation the defendants declared that registration would deprive them of the right to contest the validity of the other provisions of the Act. Continuing, that paper said:

The government's position was that by failure to register they had no standing in court. If they did register, however, Bond and Share and the other companies might have their day before the proper tribunal on any provision and on any SEC order.
Judge Mack dwelt on this point as follows:
"Any doubt as to thls is clearly dispelled by a rule of the Commission, issued pursuant to its rule-making power under the Act, which permits registration with that if such reservation shall be judicially adjudged invalid, the registration shall voldable at the option of the registrant.
The Court pointed out that Congress had written the principle of separability into the Act in Section 32. This, Judge Mack said, could be rebutted by showing that standing alone the registration provisions did not constitute a workable law to which legal effect could be given, or by evidence that Congress did not intend them to stand if the others fell.
Apter citing Associate Justice Cardozo of the Supreme Court to support him, Judge Mack wrote:
"It seems clear, and indeed does not appear seriously to be contested, that the
registration provisions in and of themselves could constitute a workable regulatory registration provisions in and of themselves could constitute a workable regulatory
devlce through the pubicity that may be given to the extensive information which reglistered holding companies must file pursuant to Sectlon 5 , especially when supplemented by the periodical reports,
30 Ill. Law Rev. 648,657 (Jan., 1936).
"The mere statement of some of the evil practices engaged in by some public
utility holding companies, as found by the Federal Trade Commission in its investigation, upon which, in part, the Act is recited to be based, suffices to dem-
onstrate that publicity of that financlal Information which is now seldom made
public, will tend to mitigate and perhaps to eliminate at least some of those abuses Students of public utility holding company regulation have recognized that enfo

In noting that the court limited itself to considering the validity of the two registration provisions only, thus es pousing the doctrine urged by the government that all provisions of the Act are separable-that they may stand or fall individually without wrecking the entire law the "Times" commented:

The ntithesis of this, that the court must pass on the whole before judging the part, as argued by the defendants, was rejected.
Therefore the utilities industries failed to obtain adjudication of the pamous "death sentence" clause of Section 11, which Congress designed to simplify or eliminate interstate holding company systems, beginning Jan. 1, 1938.
The entire act, including the two provisions ruled upon yesterday will remain inoperative in pursuance of government policy until the United States Supreme Court has finally passed on the case.

The provisions of the Act on which the Court passed are Sections 4(a) and 5. Regarding the Court's conclusions S. R. Sections 4(a) and 5. Regarding the Court's conclus
Inch, President of Bond and Share on Jan. 29 said:
Inch, President of Bond and Share on Jan. 29 said:
"I have not had an opportunity to see the decision and I only know of its general tenor. Counsel, however, are now studying the decision, and When we are in receipt of their report as to its implications we hope to be able to make a statement for publication."

According to advices to the "Wall Street Journal" of Feb. 1 from its Washington bureau an agreement between counsel for the government and counsel for North American Co. and American Waterworks \& Electric Co. to hold up proceedings in the District of Columbia Court Utility Act test cases, is in the District of Columbia court Utility Act test cases, is automatically terminated by the decision of Judge Julian
Mack in the Electric Bond \& Share case. In part these advices added:
The New York Court decision also gives new life to the bill of complain now pending in the District of Columbia Court and it is up to the Govern ment elther to answer the complaint to enjoin enforcement of the Utility Act on constitutional grounds, or to ask the Court for another limited stay of the case. The latter move undoubtedly will be taken, government counsel states, if the Electric Bond \& Share case is appealed to the New York Supreme Court. If the decision is not appealed, the whole Utility Act constitutionality fight may center in the Washington Court cases.
The decision of Judge Mack results in the expiration of the maximum time limit on a United States Supreme Court opinion in the North American case involving the power of the lower Court to stay the proceedings. The order of the District of Columbia Court has since been vacated. The pro ordedings which will now be reopened had been held up under an agreemen ceedings which

Charman James M. Landis, of the SEC, at a press conference Saturday during which he commented on the decision of Federal Judge Mack in the Electric Bond \& Share case, said the court's ruling leaves no excuse for holding companies not to register now.

Senator Borah Warns of Danger Gin Governmental Curb on Courts-In Radio Address Urges That People Be Given Chance to Weigh Controversies Between Tribunals and Political Branches of Government
Senator Borah of Idaho, in a speech broadcast over a national network on Feb. 1, urged that the people of the United States be consulted on the issues that have recently developed between the courts and the executive and legislative branches of the government. A question has arisen, he said, which only the people have the right or the authority to settle. That question he defined as whether there should be "a redistribution of power between the State should be "a redistribution of power between the State and the Federal government." If the people desire the Fed-
eral government to control local affairs, he said, "it is for eral government to control local affairs, he said, "it is for
the people to say so." The only proper way for the Federal government to obtain more power, he continued, is by con stitutional amendment. In part, Senator Borah said:
In a free government, no public official, the records and policies of no public institution, should be regarded as exempt from searching consideration, or criticism at the hands of the people. Neither can infallibility be expected of any man, or set of men.
In considering the history, decisions and opinions of the Supreme Court of the United States, and in seeking to estimate its worth in the machinery and strength of our government, it would be unreasonable, if not absurd to proceed upon any different theory. That the Supreme Court in its long history has erred I would be the last to deny; that it will err in the future, I entertain no doubt; that it has on some occasions felt the effect of mad party passions raging about it is probably true. But, after all, this is admitted, when its worth is measured by the service it has ren dered to the cause of human liberty, to the advancement of human happi ness, and to the maintenance of a govennment of law rather than a govern ment of men, that it stands among the foremost institutions of the world seems true beyond peradventure of a doubt.

Faction and party zeal, debate and political ambitions, cannot hold the scales of justice in impartial hands or weigh either the charges or the evidence with unresentful judgment. The most enlightened political leader and the most advanced of governments have utterly falled to wisely admin That has been true from Pericles to Washington, and from Washington to Roosevelt.
We need not travel outside our own history or seek examples outside our own country. From time to time the executive and legislative, or, in our own country. From time to time the executive and legislative, or, in
other words, the political side of the government, have disregarded on other words, the political side of the government, have disregarded or
trampled under foot grounds upon which party leaders thought proper to advise disregard of the Constitution and defiance of the court.
Experience teaches that it is difficult to set constitutional bounds to the action of a political party enjoying great political power or to political party not enjoying power and striving in desperation to secure it It seems unnecessary to recall more of these historic incidents relating to attacks upon the court because of decisions which afterward come to be looked upon and regarded as sound in principle and some of them as bul-
warks of human liberty. There are other and numerous instances of this nature which I doubt not will come readily to the minds of my audience. I make this comment, however, that it is a demonstrable truth, supported by a wealth of facts, that the Supreme Court, in instances too abcut the rights of the citizen when all other appeals for relief have abcut the rights of the citizen when failed him. When war, passion, or mob passion or political zeal or selfish failed him. When war, passion, or have carried men beyond reason or justice, the court, when called upon, has interposed to avert great wrongs.

The great problem now is: Do modern conditions make it imperative that the Federal government have greater, if not complete, control over most of the internal affairs of the States. That we have, in our legislation, not only since this depression, but for the last 40 years, been crowding more and more upon the undoubted internal affairs of the State can hardly be doubted. And it has seemed that the court has gone to the utmost limit in sustaining some of these measures. That it has felt, however, compelled to hold the Congress has at times transgressed the plain terms of the Constitution has been no surprise to those who still believe in our dual system of government.

## NRA Decision

In the case involving the validity of the National Industrial Recovery Act, this question was one of the determining factors. The court was unanimous-conservatives and liberals, Republicans and Democrats-in holding that Congress had gone an arrow's flight beyond the terms of the Constitution. This unanimous opinion is difficult to explaị away. He would be a bold liberal. who would declare that Justice Brandeis is not a liberal, a humanitarian, and profoundly learned in constitutional law.
In conclusion, many proposals are being made relative to our supreme judicial tribunal-all the way from designating the number of judges required to declare an Act of Congress unconstitutional to that of withdrawing from the court jurisdiction entirely. I presume some, or all, of these proposals will come along for discussion and consideration, and there is no reason why they should not. In my opinion, there is every reason why they should. By all means let the subject in all its ramifications and implications be discussed in the Congress and before the people. problems.

## General/Motors Corp. Obtains Iniunction to Expel "Sit-Down" Strikers from Plants-Peace Negotia-

 Employees Wish to Return to WorkLegal steps to oust the "sit-down" strikers who have been occupying plants of the General Motors Corp. Were taken on Feb. 2 when Circuit Judge Paul V. Gadola granted an injunction restraining strikers from occupying two of the company's plants at Flint, Mich. The injunction also restrained the strikers from picketing and ordered the men to evacuate the plants within 24 hours. Meanwhile, 1,200 National Guardsmen moved into Flint at the command of Governor Murphy of Michigan and took immediate action Governor Murphy of Michigan and took serious disorders to preserve order. This action followed serious disorders
at Chevrolet plants on Feb. 1, when several hundred memat Chevrolet plants on Feb. 1, when several hundred mem-
bers of the United Automobile Workers Union moved into the factories and began a new sit-down strike. A reference to the strike, which has curtailed General Motors produc tion since the latter part of December, appeared in the "Chronicle" of Jan. 30, pages 705-706. John L. Lewis, Chairman of the Committee for Industrial Organization, which is sponsoring the strike, left Washington for the which is sponsoring the strike, left wasion leaders. On strike area on Feb. 2 to confer with union leaders. On
Jan. 29 the second attempt within 10 days to bring about a Jan. 29 the second attempt within 10 days to bring about a
basis for negotiations in the General Motors strike collapsed basis for negotiations in the General Motors strike collapsed
as President Alfred P. Sloan Jr. of General Motors Corp. returned to New York after a meeting with Secretary of Labor Frances Perkins. In United Press advices on that date from Washington it was intimated that Secretary Perkins had expected to announce a new peace conference between union and General Motors Corp. leaders, the plan being to have Governor Frank Murphy of Michigan call the conference at which both Mr, Sloan and John L. Lewis were conference at which both Mr. Sloan and John L. Lewis were
to have been represented. From the same advices we quote: to have been represented. From the same advices we quot Mr. Sloan telephoned Miss Perkins from New York upon his arrival in the city. He told her he would give her a final word by $10 \mathrm{a} . \mathrm{m}$. tomorrow or two points that had been discussed by them in a lengthy private meeting.

However, Miss Perkins, who had been in touch with Governor Murphy, had counted upon the General Motors Corp. President to remain in Wash ington. His departure ended her second attempt to break the strike stalemate.

A statement was issued in New York on Jan. 30 by Mr. sloan in which he referred to one attributed to Miss Perkins to the effect that she "had his [Mr. Sloan's] word when he left here [Washington] this afternoon that he would consent to enter the negotiations. I was at dinner when his call came from New York." Miss Perkins was further quoted:
He had hardly had time to reach there when he called to say he felt he could not go through with the agreement in view of the court proceed ings instituted at Detroit for next Monday morning.

Mr. Sloan, in his statement regarding his talk with Secretary Perkins on Jan. 29, which he described as "a private, confidential discussion," said:
The conference lasted for about two hours. After considerable discussion the Secretary asked whether we would be willing to go back to the status prior to Governor Murphy's intervention and attempt again to negotiate the men out of the plants. That was the Secretary's specific proposal. I made no agreement with her about it, or anything else.
I told the Secretary that I would take that proposal under advisement and give her an answer not later than 10 o'clock this [Jan. 30 ] morning. The Secretary urged immediate action. Our general counsel, John Thomas
Smith, was in Washington and I wished to consult with him. Before Smith, was in Washington and I wished to consult with him. Before
leaving Washington with him I telephoned the Secretary from the Union leaving Washington with him I telephoned the Secretary from the Union would try to give her my answer as soon as I got back to New York.

This I did. When I reached home I telephoned the Secretary about $10 \mathrm{p} . \mathrm{m}$. and informed her that in view of our court proceedings and the desirability of getting our people promptly to work it was not fair to ask us to go back and start all over again to negotiate whether the strikers would get out of the plants.
How the Secretary could have understood that any agreement had been reached with her when it was distinctly understood that I was to telephone my answer to her proposal is beyond my comprehension.
The one main issue which is now, and from the beginning has been, paramount in this situation is whether the sit-down strikers will or will not be allowed to remain in unlawful possession of our plants.

A telegram was sent to Governor Murphy at Detroit, on Feb. 2, by 250 "sit-down" strikers at Flint declaring that they would defy the court injunction ordering them out of Fisher Body Plant No. 2. The strikers, together with about 800 fellow members of the United Automobile Workers of America who occupy Fisher Plant No. 1 were given until $\overleftarrow{5}$ p. m. on Feb. 3 to quit the factories in an injunction issued by Judge Gadola, said United Press advices from Flint, Feb 2, which also stated:

Plans were expected for taking an appeal from Judge Gadola's injunction to the Michigan Supreme Court and for fighting further attempts to oust strikers holding other General Motors plants.
The injunction was issued this afternoon after Judge Gadola had con sidered arquments of union and General Motors Corp. attorneys. The order prohibits further picketing and restrains strikers from interfering with non-strikers.
Homer Martin, President, and 30 other officials of the U. A. W. were named specifically.
Shortly before the injunction was signed, a note of conciliation was injected into the turbulent strike picture when William S. Knudsen, Execu tive Vice-President of General Motors, said the corporation would enter negotiations with the union as soon as its plants are cleared of strikers. . Service of the injunction calling for removal of strikers occupying Fisher Body plants and control of the Chevrolet area by National Guardsmen were two legally unrelated aspects of the same issue-the nation-wide strike against General Motors Corp.

Pending establishment of complete control by State and city authorities of the explosive Flint situation, all attempts to mediate the strike had ceased.

A General Motors statement on Jan. 30 said that $83 \%$ of the workers affected by the strike wish to return to work immediately. The statement said, in part:

An immediate "back-to-work" movement, originating among General Motors employees, is supported by 123,724 of the 149,249 workers affected, or nearly $83 \%$, figures compiled in Detroit, Saturday, reveal. Through various ways, workers have protested strikes which have cost them their jcbs, reduced their normal hours of employment, or caused them a lose of income.

Preliminary figures made public last week, when employees voiced various protests through bargaining agencies and departmental committees, disclosed that $79 \%$ had joined the "back-to-work" plea.
Largest addition to the new tabulation, now comprising 44 plants in 22 cities, is the Delco-Remy Plant at Anderson, Ind., where 7,706 employees out of a total of 8,213 or $94 \%$, are on record against curtailment of their jobs. This plant is now operating on a partial basis.
New returns, as additional workers have had an opportunity to express their sentiments through petitions, mass meetings, secret ballots and other demonstrations disclose that those favoring the "back-to-work" move ment have increased at Flint, Mich., to 30,187 out of 36,700 contacted, as additional Fisher Body workers have been heard from; that protests at Pontiac, Mich., has gone up to $85 \%$ of the 16,579 at the Pontiac Motor and Fisher Body plants there ; that signers of strike protests at the Cadillac Motor Car plant at Detroit represent $75 \%$ of all workers as compared with the previously reported $52 \%$, and that an employees' committee at the Fisher Body plant at Cleveland now has 5,000 signatures from 7,211 employees, demanding resumption of work.

It is stated that 25 persons were injured in rioting around General. Motors plants in Flint on Feb. 1, and as a result of these disorders, Michigan National Guardsmen were ordered to patrol the strike area. More than 4,000 troops finally arrived in Flint.
Despite the issuance of the injunction by Judge Gadola, General Motors officials postponed filing a petition for a writ to eject the strikers from the plants. Attorneys for the company said that the writ would not be filed pending the outcome of conferences between company officials and union leaders in Detroit. These conferences began on Feb. 3, under the sumervision of Governor Murphy, and were attended by Mr. Lewis, Mr. Knudsen, Mr. Martin and others prominent in previous strike negotiations. It was reported that President Roosevelt was keeping in personal reported that President Roosevelt was keeping in personal
communication with Detroit to follow the progress of the communication with Detroit to follow the progress of the
conferences. A union official said on Feb. 4 that the conferees were seeking a comprehensive formula providing for the reopening of the plants while the negotiations on wages hours and working conditions proceeded.

## United Automobile Works of America Appeals to

 A. F. of L. for Contributions-President Green Indicates That International Unions Will Not Be [- Asked to Help Strikers in Automobile PlantsAn appeal to the American Federation of Labor that members of all labor unions give financial aid to the United Automobile Workers of America, was criticized by President Green of the A. F. of L., who is quoted as saying
It is surprising that the United Automobile Workers [who were sus-
pended along with several other unions allied with Mr. Lewis's C. I. 0.] pended along with several other unions allied with Mr. Lewis's C. I. O.]
now comes to an organization which it deserted with a plea for financial , misit

In reporting Mr. Green as above, a dispatch from Washiscton Feb. 4 to the New York "Herald Tribune" said:

Mr. Green recalledl that the A. F. of L. had always stood loyally by member unions when they needed funds, but he stated emphatically that

Financial Chronicle
he would not ask the international unions to contribute a dollar to the antomobile strike. The A. F. of L., he said, had contributed $\$ 750,000$ in 1927 to help Mr. Lewis's United Mine Workers in a strike against the coal operators but that was before Mr . Lewis set up his rival labor Federation.

The appeal of the U. A. W. A, to members of the international unions said:

The fight for the right to organize is your fight as well as ours. It is the fight for the American right to belong to a labor union, a right that must be defended with every lawful resource at our command."

Tire Plant in Akron of B. F. Goodrich Co. Closed by "Sit-Down" of 31 Employees-10,000 Workers Affected
Following a "sit-down" strike engaged in by 31 workers in the compounding department of the tire manufacturing plant of the B. F. Goodrich Co., in Akron, Ohio, officials of the company on Jan. 28 ordered all operations in the plant suspended on Jan. 28. There are approximately 10,000 workers employed in the plant in four shifts. The compounding department processes crude rubber for use in other departments.
T. G. Graham, Vice-President of the company, claimed that the 31 employees participated in the "sit-down" strike after making demands for wage increases. A statement issued by the company said:

Due to a stoppage of work by 31 employees on the fourth shift in the company's compounding department, occurring after $6 \mathrm{p} . \mathrm{m}$. Thursday, was necessary to halt all manufacturing operations at midnight, Thursday, Jan. 28.

It is said that an indefinite suspension of operations in the compounding department would cripple production throughout the plant.

Gas Workers in Toledo, Ohio, End 10-Day StrikeAccept Nine-Point Agreement
A 10-day strike in Toledo, Ohio, of union employees of the Ohio Fuel Gas Co. and the Northwestern Ohio Fuel Gas Co. ended on Jan. 25 following the acceptance of a nine-point agreement, which, among other things, provides for wage increases. The workers returned to their jobs on Jan. 26 restoring normal gas service. The settlement of the strike was reached, it was stated in the Toledo "Blade" of Jan. 26, through the efforts of Edward F. McGrady, Assistant Secretary of Labor, and Edmund Ruffin, Director of the Toledo Industrial Peace Board, in meetings with the committee of the striking Gas Employees' Union and officials of the company over a period of several days. The following is also from the paper quoted:
Union members late yesterday voted at a meeting in the Central Labor Union headquarters, 177 to 34, to ratify a working agreement drawn by its strike committee with the assistance of Attorney Eldon Young; officials of of negotiation in the Commodore Perry Hotel.
The contract . . . provides the following:
Wage increases ranging from $5 \%$ to $49 \%$, plus an additional $5 \%$ for all omployees if and when the companies receive a higher rate for gas service Dismissal bonuses in case of retrenchment.
Overtime to be paid for at rates of time-and-a-half and double time.
Vacations of one and two weeks with pay for ail employees depending on length of service.
More adequate seniority system.
A 40-hour week for all employees.
For the first time in the history of gas service in Toledo employees will be assured of continued wage payments during sickness and disability.
Greater protection of all employees in cases of discharge and demotion, is assured.
Pay increases in all cases are retroactive to Jan. 1. Wages in the lower brackets have been raised to the former highest level in all classifications.

Maritime Strike Ended on Pacific Coast-98-Day Walkout Longest and Most Costly in American History Atlantic and Gulf Seamen Win Wage Increase
The 98-day Pacific Coast maritime strike, the longest and costliest in American history, came to an end on Feb. 4, after the strikers voted, seven-to-one, to accept tentative agreements reached between representatives of the shipowners and the unions. It is estimated by business interests that the strike has cost them about $\$ 7,000,000$ daily. Approximately 40,000 marine workers participated in the walkout, leaving nearly 240 ships stranded at Pacific piers and tying-up several hundred tons of cargo, valued at $\$ 50,000,-$ 000. The strike was 15 days longer and cost millions of dollars more than that of 1934 .
Settlement of the present Pacific Coast dispute followed by a little over a week the terminating by Atlantic and Gulf seamen of their strikes, which had been called in sympathy with the Pacific Coast walkout. Ending of the Atlantic seaboard and Gulf strikes, which were conducted by an insurgent group of the International Seamen's Union, without the latter's sanction, was noted in our issue of Jan. 30, page 705. On Feb. 2, at a conference between spokesmen of the American Steamship Owners Association and the Inter national Seamen's Union, wage increases were granted to nearly every member of the unlicensed personnel of the 41 nearly every member of the unlicensed personnel of the 41
ship lines operating from Atlantic and Gulf ports. As to ship lines operating from Atlantic and Gulf ports. As to
this the New York "Times" of Feb. 3 had the following to say:
Most of the increases were of $\$ 10$ a month, with a straight overtime wage of 70 cents an hour in excess of eight hours a day. The owners also agreed to recognize Şaturday afternoon and Sunday and legal holidays
as days off in port, and granted preferential hiring of union men and the creation of a mediation board to rule on disputes.
WThe exceptions to the general increase occurred in the steward's do partments, where conditions were governed by the types of ships. The stewards under some conditions will work nine hours a day and in certain posts they will receive 60 cents an hour overtime. The change will become effective today.
The changes represent amendments to a wage agreement which was first signed in December, 1935, then modified in March and September 1936. The strike of seamen on the Atlantic and the Gulf last March was in protest against the terms of the modification then made, the men charging that they had ordered the union delegates to obtain a cash payment for overtime provision and that the delegates had signed an agreement that did not include it. The ship lines would concede overtime only in the form of time off, whereas the men demanded cash.

The following bearing. on the settlement of the Pacific Coast strike is from United Press advices from San Francisco, Feb. 4, appearing in the New York "Journal of Commerce" of Feb. 5:

* It was more of an armistice than a peace, however, for the end of the dispute left unsettled a number of loose ends likely to cause trouble in the future.
The Joint Strike Policy Committee representing seven maritime unions, banded together in the Maritime Federation of the Pacific, meeting at noon, checked the vote of the strikers in the referendum on its proposal to call off the strike.
The vote was announced as 18,406 to end the strike, 2,604 against the complete.

Then the committee took up the matters still hanging fire. Among these were the dissatisfaction of the Marine Firemen, Oilers, Watertenders and Wipers' Association with their agreement with deep sea operators; the unsettled strikes of tug-boat workers in Los Angeles and San Francisco, and of shipyard workers in San Francisco and Seattle; and the efforts of Honolulu longshoremen, Pacific ship scalers, and dock clerks and checkers to obtain satisfactory agreements.

Sweeping these aside momentarily, the committee voted to end the strike and so notified the shipowners officially.
The notification was based on the agreement among the unions to let a majority vote decide the strikers' course.

At the last minute an attempt was made to delay settlement until the shipyard question had been settled. But Harry Bridges, district president of the the public looked as the leader of the strike, succeeded in overruling the attempt.

Bridges' success in squashing this attempt indicated the bargemen's and machinists' strikes would not stand in the way of final approval of the agreements negotiated during the three months of the strike. Ship-owners and union leaders must sign these agreements formally to make them official The men are going back to work, starting tomorrow, when the first ships are scheduled to clear Western ports, under agreements which generally provide higher wage scales, cash for overtime, and union recognition. The agreements represent compromises, "meetings of the minds," in three months of steady negotiations. Neither side claimed a victory.
The men returned to work under wage scales which their employers said were the highest for maritime work in the world; with the shortest hours and the best working conditions of any seamen.

## Mississippi Rises as Ohio River Recedes and Rehabilitation Work Is Begun-President Roosevelt Indicates

That RFC Will Give Financial Aid-President's
Commission of Five Surveys Flooded Area-Red
Cross Asks Further Contributions
As cities and towns along the Ohio River Valley this week began the work of rehabilitation after disastrous floods, residents of homes along the lower Mississippi River juepared to cope with similar record-breaking high waters. While it was anticipated that the flood danger along the
Mississippi would continue for another fortnight, army engineers believed that the system of levees would hold back the rising river. Meanwhile, it was estimated that the total of homeless as a result of recent floods exceeds $1,000,000$, while property damage approximates $\$ 500,000,000$ and more than 400 are dead.

The Ohio and Mississippi floods were referred to in our issue of Jan. 30, page 708. As indicated in that item, President Roosevelt on Jan. 29 ordered a special commission to leave for Memphis, Tenn., to conduct a survey of the Ohio River flood destruction and begin a comprehensive rehabilitation and sanitation program. The membership of the commission includes Harry L. Hopkins, Works Progress Administrator; Major-General Edward M. Markham, Chief of Army Engineers; Surgeon-General Thomas Parran Jr. of the Public Health Service Colonel F. C. Harrington, army ewgineer attached to WPA, and James I Feiser, Vice Chairman of the American Red Cross, the last named being the only one not in the list originally made known. Administrator Hopkins, with the others of the commission, left Washington by train on Jan. 31 and arrived on Feb. 1 at Memphis, where they went into conference with relief executives of Tennessee, Arkansas and Missouri. The party planned to travel by boat along the swollen Mississippi and Ohio Rivers. Noting that the President planned (as out lined at his press conference Jan 29) a pranned (as out cial aid to help flood victims in their rehabilitation, United Press accounts from Washington, Jan. 29, said:
First, he appealed to banks in the area to be as liberal as possible in granting loans to owners of damaged houses and merchants whose stocks lave been destroyed or lost.
The President said the Red Cross is prepared to make small loans, ranging from $\$ 25$ to $\$ 50$, to make up small losses.
He recalled the Reconstruction Finance Corporation made $\$ 8,000,000$ in loans last year when sections of New England, Pennsylvania and West Virginia were ravaged.
Mr. Roosevelt expressed the hope, however, that the RFC could hold its

Meanwhile, a number of government agencies were developing a broad program of rehabilitation to aid flood victims. It will include placing 200,000 persons on relief rolls, and inspecting food supplies.
As soon as the water recedes, inspectors from the Food and Drug Administration will check all food supplies in flooded regions. Everything will be destroyed.

From Associated Press advices from Washington, Jan. 29, we take the following:
The Federal Housing Administration will provide insurance on private loans for rebuilding homes, Red Cross officials estimate more than 800,000 homes have been flooded.
All Army Corps Area commanders reported today to General Malin Craig, Chief of Staff, that they had perfected plans to evacuate any of the cities or towns on the Mississippi which might be flooded through any failure in the levee system. They expressed confidence, however, no widespread evacuation would be necessary.
Nation-wide permanent flood control was discussed in Congress. Senator Robert J. Bulkley, Democrat of Ohio, proposed an appropriation of \$150,000,000 for an Ohio Valley Authority to provide flood control on the Ohio and its tributaries. Representative Thomas O'Malley, Democrat of Wisconsin, who has demanded a Congressional investigation of flood-control phojects on the Mississippi and Ohio Rivers, asserted he had data to show taxpayers "have not received one-half of what they paid for."
On Feb. 1 it was stated in Washington advices to the New York "Times" that a small subcommittee of the general informal flood relief committee met to discuss the plight of residents of flooded areas who might be unable to obtain financing for rehabilitation and construction. These advices went on to say:
Representative Vinson of Kentucky was elected Chairman of the group, which was in touch with the White House in an effort to obtain some idea of what additional powers, if any, the President wants to meet the demands for rehabilitation.
A canvass of the possibility of special taxation to support a comprehensive long-range program of flood control was begun, said the "Times" dispatch of Feb. 1 which added that the tax proposal was first put forward by Representative McCormack of Massachusetts, a member of the House Ways and Means Committee.
The American Red Cross, which last week asked for contributions of $\$ 10,000,000$ to aid flood sufferers, said on Feb. 1 that present known needs indicated a fund of "far greater proportions than now received" would be required. We quote in this connection from an Associated Press Washington dispatch of Feb. 1:
The Red Cross expended $\$ 17,000,000$ on the Mississippi Valley floods of 1927, and officials estimated that at least that sum and possibly much more would be required for the present disaster. Officials said 932,109 persons already were being given Red Cross aid, of which 774,612 were isted as homeless in 11 States. These figures, it was pointed out
relude other thousands being cared for by friends and relatives.
General Malin Craig, Army Chief of Staff, told the President today he was "optimistic" about the Mississippi River situation, where doubt exis
whether levees can withstand the flood crest surging out of the Ohio. Whether levees can withstand the flood crest surging out of the Ohio. Engineers generally agree what happens at Cairo, Ill., junction of the
Ohio and Mississippi, when the flood crest reaches there will determine the Ohio and Mississippi, when the flood crest reaches there will determine the going to get by at Cairo," General Craig said.
A proposal for a long-range flood-control and prevention program was issued jointly on Jan. 31 by H. H. Bennett, Chief of the Soil Conservation Service, and F. A. Silcox, Chief of the Forest Service of the Department of Agriculture. The program would cover a period of between 30 and 40 years, and its sponsors estimated that it would begin to show results in 10 or 15 years. It would provide for Federal, State, local and private co-operation.

## New York City's Free Port Opens at Stapleton, Staten Island-First in Country

The first free port in the United States, established on and around four of the 12 New York City piers at Stapleton, Staten Island, was officially opened on Feb. 1. The charter for the port was issued to New York City last year under the special act of Congress providing for the "establishment, operation and maintenance of foreign trade zones in ports of entry of the United States to expedite and encourage foreign commerce and for other purposes." A free port is merely a restricted zone where foreign goods may be brought, unpacked, graded, stored, mixed with either domestic or foreign merchandise and then transhipped to some other foreign country without the necessity of going through the United States customs.

## New Orleans "Times-Picayune" Celebrates 100th Anniversary - President Roosevelt Extends Good

 WishesThe New Orleans "Times-Picayune," one of the oldest and largest daily newspapers in the South, celebrated its 100th anniversary on Jan. 25. The occasion was marked by the publication of a 268-page paper, in 17 sections, the largest ever to be printed by the "Times-Picayune's" presses. The edition was also one of the largest ever published. The edition was also one of the largest ever published. Leonard K. Nicholson, President of the Times-Picayune Publishing Co., received many congratulatory messages, in-
cluding one from President Roosevelt. The President excluding one from President, Roosevelt. The President ex-
pressed his "earnest hope" that "the "Times-Picayune,' through years to come, will continue to bear its full share in promoting the public weal and will keep its place in the forefront of movements to advance the well-being of your city, your State and our nation."

New "Arbitration Journal" Published by Chamber"of Commerce of State of New York and American Arbitration Association
The "Arbitration Journal," a new quarterly publication, was issued in New York on Jan. 28 by the Chamber of Commerce of the State of New York, which has maintained an arbitration tribunal in New York since 1768, and the Ameriarbitration Arbitration Association, New York, organized nationally in 1926, in collaboration with the Inter-American Commercial Arbitration Commission. The "Journal," with headquarters at 521 Fifth Avenue, New York, will be international in scope and collaborators have been appointed in seventeen countries to supply news and comment on arbitral thought and activity from all over the world. An announcement bearing on the new publication, issued by the American Arbitration Association, also had the following to say:
A former member of the Permanent Court of International Justice and former counselor of the Department of State, John Bassett Moore, heads the group of business and professional men launching the new publication, the ultimate aim.
arbitration.
Judge Moore, as Honorary Editor of the "Journal," will have serving with him an editorial board composed of 20 men and women, including Isalab Bowman, of Johns Hopkins University; Clarence N. Callender, of the University of Pennsylvania; John T. Madden, of New York University, and Roswell C. McCrea, of Columbia University, representing educational groups; Lucius R. Eastman, President, American Arbitration Association; Lee J. Eastman, President, Packard Motor Car Co. of New York; James A. Farrell, Chairman, National Foreign Trade Council; Malcolm Muir, President, McGraw-Hill Publishing Company, and Thomas J. Watson, President, International Business Machines Corp., representing industry.

Death of W. W. Durbin, Register of United States Treasury
William W. Durbin, Register of the United States Treasury, died at his home in Kenton, Ohio, on Feb. 4 of a cerebral hemorrhage, at the age of 71 years. Mr. Durbin had been in Kenton for several weeks on a rest from his duties in Washington. In Associated Press advices from Kenton, Feb. 4, it was noted:
For fifty years Mr. Durbin was active in the Democratic party. He was the first chairman of the William Jennings Bryan campaign for"the Presidency in 1896. He was a delegate to six national Democraticiconventions. At the Houston convention on 1928 he was chairmanIof the committee on permanent organization.
He was a candidate for the Democratic senatorial nomination in 1930. inishing second to Robert J. Bulkley, who was elected in November. Mr. Durbin was appointed Register of the Treasury soon after Mr. Roosevelt was elected. He was responsible for the receipt, examination and custody of retired public debt securities, including paid interest coupons. . His first political job was under President Cleveland, in the department of the Treasury which he headed at his death.

## Death of Representative A. J. Montague, of Virginia-

 Was Former Governor of StateAndrew Jackson Montague, member of the House of Representatives from the Third Virginia District since 1913, and former Governor of the State of Virginia, died on Jan. 24 at his residence in Urbanna, Va. He was 74 years old. Mr. Montague, a life-long Democrat, had served as Governor of Virginia from 1902 to 1906. The following regarding Mr. Montague's career prior to his election to Congress in 1913 is from the New York "Herald-Tribune" of Jan. 25: Representative Montague, who was born in Campbell County, Virginia. was graduated from Richmond College in 1882, and received his LL.B. from the University of Virginia three years later. He received honorary legal degrees from Brown Un
1903 and 1923 , respectively.
He was admitted to the bar in 1885 and started his law practice in DanVille, Va. Eight years later he was appointed United States Attorney for the western district of Virginia by President Cleveland, serving in this capacity until 1898, when he became Attorney General for Virginia, Four years later he was elected Governor of Virginia, and served in this position until 1906.
From 1906 to 1909 he was dean of the Richmond Coillege Law School. In 1906 he was a delegate to the Third Conference of American Republics in Rio de Janerio, and in 1909 and 1910 he was a delegate to the Third International Conference on Maritime Law in Brussels. Later he became vicepresident and subsequently president of the American group of the Interpariliamentary Union, and attended conferences of this organization in Paris, Berlin, London, Stockholm, Berne, Vienna, Copenhagen and Washington.

## Secretary of Treasury Morgenthau Vacations at Sea

 Island, Ga.It was announced on Feb. 1 that Henry Morgenthau Jr., Secretary of the Treasury, accompanied by Mrs. Morgenthau, planned to spend this week at Sea Island, Ga. It is understood that the Secretary has, however, been in close touch with the Treasury Department and the White House.

## Walter Runciman Following Talks With President Roosevelt Sails For England

Walter Runciman, President of the British Board of Trade, sailed for England on January 29, following his brief visit to the United States, during which he held conferences with President Roosevelt, Secretary of State Hull and Secretary of Commerce Roper. No statement was issued by Mr. Runciman with his departure. The following Manchester advices (Canadian Press-Havas) Jan. 27, appeared in the Toronto "Globe \& Mail"
The Manchester Guardian today declared that by the time Walter Runclman, President of the Board of Trade, leaves Washington "the
ground will have been covered for an Anglo-American trade agreement
to be worked out in detail to be worked out in detail by experts."
Mr. Runciman's visit was referred to in our Jan. 30 issue, page 702.
B. J. Rabin Becomes Chairman of New York State Mortgage Commission-Succeeds Wendell P. Barker
Benjamin J. Rabin, of New York City, took the oath of office on Feb. 1 as Chairman of the New York State Mortgage Commission, succeeding Wendell P. Barker, of Yonkers, who resigned on Jan. 25 after serving two years. Mr Rabin was sworn in by Presiding Justice Francis Martin of the Appellate Division, in the courthouse in New York City.

Mr. Rabin was appointed to the post by Governor Lehman on Jan. 25, shortly after the acceptance of the resignation of Mr . Barker, and the appointment was unanimously confirmed by the State Senate on Jan. 26. In accepting Mr. Barker's resignation, Governor Lehman thanked him for the service which he had rendered the State. The following regarding the new Chairman is from the New York "Herald Tribune" of Feb. 2:

Mr. Rabin assisted in drafting the legislation which created the Mortgage Commission. He was invited to help draft the measure because of his experience as counsel for the joint legislative committee which had investl gated the guaranteed mortgage situation in the spring of 1935. When the general attorney.

In the early part of 1936 the Commission formed a subsidiary known as the Mortgage Commission Servicing Corp., to handle its real estate problems, supplanting the agencies formerly established by the Superintendent of Insurance. Since the middle of summer Mr. Rabin has been acting President of the servicing corporation. In the fall he was made a Deruty Commissioner to sreve in the absence of any of the members of the Com mission.

Mr. Rabin is a member of the Bar Association of the City of New York, the New York County Lawyers' Association and the Bronx County Bar Association. His home is in the Bronx.

## E. A. Skehan to Direct Savings, Building and Loan Activities of FHA

Coles of the division. The banquet will close the eighteenth annual mid-winter trust conference which meets Feb. 9-11. Mr. Riley will speak on various economic developments of nation-wide interest
Previous reference to the coming trust conference was made in our issues of Jan. 23, page 551, and Dec. 5, page 3562.

Semi-Annual Survey of Real Estate Market by National Association of Real Estate Boards-Steady Advance Noted in Every Phase of Market
Renewed demand for business property is already refiected in higher rental scales for the downtown sections of cities in about three-fourths of the principal cities of the country, said the National Association of Real Estate Boards in making available its twenty-eighth semi-annual survey of the real estate market. Reports from 253 cities, made by officials or committees of the National Association's member boards over the country, are included in the survey, released Jan. 30. A steady advance is shown in every phase of the market, the Association said, more nearly uniform for cities of every type and every geographical section than has been the case for years. The Association's announcement, bearing on its survey, continued:
Many cities report the gain as far enough consolidated as to indicate a very active building year ahead, but new construction is very definitely for use. A steady healthy rise is indicated.
In cities where real estate advance has been most marked, new building is reported as having stabilized the upward movement of residential rents. New apartment construction has begun to join new home building to counterbalance the growing absorption of existing residential space. . . . Real estate prices are higher. The advance now ehown in $80 \%$ of the
cities of the country began, of course, in built property cities of the country began, of course, in built property. The present survey shows the first post-depression reports of an advance in the price of home sites. The rise here reported by some cities has been as much as $10 \%$. Subdivision lots are selling more actively than last year in Details of the citres
Details of the survey findings as to demand and supply of various types of structures, mortgage supply, interest costs, and the like, follow:

Residential space Well Absorbed-But Rental Rise Gradual
Residential space is shown to be well absorbed. But notwithstanding the increased space absorption, rise in residential rents, while very general over the country, has been very gradual. This is true both for detached hcuses and for apartments.
Undersupply of single family dwellings is shown in $72 \%$ of the citles. Only $11 / 2 \%$ of the cities report any oversupply. In a like survey of six months ago, $76 \%$ of cities reported an undersupply of single-family dwellngs. The slight decrease would appear to be an indication of the balancing effect of new home building.
An undersupply of apartments exists in $55 \%$ of the cities, according to these official confidential reports from local real estate boards. One clity reports every desirable apartment unit occupied. Only $2 \%$ of the cities report any remaining oversupply of apartments.
No city of over 100,000 population shows any oversupply in single-
family dwellings, but the very largest cities (over 500,000 ponel family dwellings, but the very largest cities (over 500,000 population) in
$22 \%$ of the cases show oversupply of apartments $22 \%$ of the cases show oversupply of apartments.
in $90 \%$ of the cities, and are down in less compared with a year ago in $90 \%$ of the cities, and are down in less than $11 / 2 \%$ of the cities. Apartment space is higher in $86 \%$ of the cities, and not a single city of the country shows any down-trend of apartment rents.

Business and Office Space
Increasing demand for business space is reflected in higher rent levels in $72 \%$ of the cities reporting. Not a single city in the country reported business space rates as down over last year. In $28 \%$ of the cities they hold to last year's levels. In outlying business districts the pick-up has not gone so far. But even here $45 \%$ of the cities report higher rental
scales, and only $1 \%$ show a lower scale then scales, and only $1 \%$ show a lower scale than last year. Undersupply of
business property is already reported in bueiness property is already reported in $13 \%$ of the cities. Cities of
under 25,000 population most frequently show the shortase under 25,000 population most frequently show the shortake of commercial
snace, with $25 \%$ so reporting. Oversupply is still shown in $13 \%$ of the cities.
Office space still lags behind business space. But higher rental scales are in effect for downtown office buildings in $36 \%$ of the cities, and not a city anywhere in the country shows a lower scale than last year. In outlying centers, $24 \%$ of the cities show higher office rentals, end only $1 \%$ show a lower rate than last year. Apparently the change in office build ing demand has come with about the same rapidity in cities of every size
Interest Costs Still Falling, But Chist
Gross cost to the borrower on first mortgages whe cities, with $37 \%$ eported to be at about last yens in $2 \%$ of the cities, all of them comparatively small cities.
present actual interest rate at which first mortgage loans on new moderately-priced homes are now most commonly being made is still the of cities reporting, $64 \%$ cite it as the rate in most common use. This is exactly the percentage of cities so reporting six months ago A $5 \%$ rate prevails as common in $30 \%$ of the cities on this kind of mortgage.
Only four
common use.
Capital is seeking loans in $75 \%$ of the cities. Desirable loans are avail Cle in excess of capital supply in $14 \%$ of the cities. This is almos exactly the proportion of cities so reporting six months ago.

ITEMS ABOUT BANKS, TRUST COMPANIES, \&c.

Over from an Assistant Trust Officer to Trust Officer, and named Alan S. Christner an Assistant Trust Officer.

State Senator J. Allen Coad of Maryland was elected President of the County Trust Co. of Maryland (head office Cambridge, Md.) and of its affiliated institution, the County Corp. of Maryland, at meetings of the directors of the respective companies held in Annapolis, Md., on Jan. 27 Senator Coad, who said he would assume his duties about April 1, will have offices in the Union Trust Building, Baltimore, Md He succeeds Hooper S. Miles, State Treasurer of Maryland, who resigned to become Executive Vice-Presilent of the Baltimore National Bank, Baltimore. Annapolis advices on Jan. 27 to the Baltimore "Sun," from which the above information is obtained, added, in part:
The County Trust Co. of Maryland has branches in Cambridge, Hurlock, Vienna, East New Market, Wingate, Federalsburg, St. Michaels, Salisbury, sharptown, Snow Hill, Annapolis, \&c., \&c.

Checks aggregating $\$ 64,416$ were mailed on Jan. 22 to lepositors of the defunct Forest Park Trust \& Savings Bank of Chicago, Ill., it is learned from the Chicago "Tribune," which added that the payment represents a distribution of $5 \%$ of total deposit claims and brings the total paid so far to $25 \%$.

Stockholders of the Industrial Morris Plan Bank of Detroit, Mich., at their annual meeting on Jan. 12 elected William M. Walker a member of the Board and reelected all the old directors, it is learned from the Detroit "Free Press" of Jan. 13. At the subsequent meeting of the direc tors the following promotions were made: John B. Rich ardson, H. R. Huffman and Edward Taub advanced to Assistant Vice-Presidents ; J. P. Beattie, Keith G. Cone and Lee S. Carrick promoted to Assistant Secretaries, and How ard Sparks and H. E. Klockow advanced to Assistant Treas urers. All other officers were reappointed. Eugene W. Lewis is President.

A new banking institution was opened in Raleigh, N. C. on Jan. 28 under the title of the Raleigh Industrial Bank In noting the opening, the Raleigh "News and Observer" of Jan. 29 said:
The bank, only one of its type in Raleigh, is headed by Alexander Webb as President. E. Headen is Teller. The institution is a member of the Federal Deposit Insurance Corporation, insuring deposits up to $\$ 5,000$ by each customer.

The Royal Bank of Canada (head office Montreal) an nounced on Jan. 26 that it had closed its Costa Rican branch as a result of the Republic's new banking laws. In noting this, the Montreal "Gazette" of Jan. 27 had the following to say:
Closing of the Royal Bank of Canada branch at San Jose, Costa Rica s made necessary by legislation "restricting our operations to such an extent we would not be able to make a worth-while profit," officials at the :ead office of the bank said here yesterday (Jan. 26).
The Costa Rican legislation requires setting up of certain capital within郎 country and restricts the amount or loans in certain cases to an extent incompatible with the amount of capital set up, according to the oreign department of the bank.
The last three months, it the third closed in Central and South America in the last three months, it was learned. Branches of the bank at Valencia and barquisimeto in the interior of Venezuela have been closed due to re "We in operation

K Wrigh he Royal Bank for the past 19 years Routine Inspector of the Royal Bank of Canada, retired on Jan. 30, completing a banking service in Canada of 42 years. In outlining his career, the Montreal "Gazette" of Jan. 29 said, in part:
In September, 1899, he joined the Merchants Bank of Halifax, in Montreal, and in 1900, the year before the Merchants Bank of Halifax became the Royal Bank of Canada, Mr. Wright was transferred to Van couver. . During the next 18 years he served the Royal Ban in many British Columbia centers, and in 1912 was appointed Inepector with headquarters at Vancouver. In 1918 he returned to Montreal as Routine Inspector at head office.

Our booklet "Foreign Exchange Regulations Affecting Exports" contains valuable information for manufacturers and merchants who sell abroad.

## THE CURB EXCHANGE

Trading on the New York Curb Exchange was fairly active at improving prices until Friday when President Roosevelt's message requesting power to add six Justices to the Supreme Court had an unsettling effect on the market. Public utilities have been active at improving prices and specialties have gradually worked up to higher levels. Oil stocks have been firm but with one or two exceptions have shown little change. The volume of transfers registered a steady increase since Monday when the total for the day was approximately 629,000 shares.

Public utilities attracted considerable attention during the brief period of dealings on Saturday and a number of the popular trading shares recorded modest advances despite Judge Mack's decision that utility holding companies must register. Electric Bond \& Share common moved up and down but finally closed with a net gain of $11 / 2$ points. There was some activity apparent among the metal stocks, particularly Shattuck Denn which broke into new high ground above 25. Specialties also were moderately active and so were the oil issues. Prominent among the gains were Carrier Corp, 2 points to 39; Jones \& Laughlin Steel, 1 point to 109; Penn Salt, $31 / 4$ points to 170 and Pittsburgh Plate Glass, $11 / 2$ points to $1421 / 2$.
The market continued to move on the side of the advance during most of the dealings on Monday. In the opening hour trading was very active but as the day progressed strength was considerably reduc d and the transfers declined in volume. Specialties attracted some buying especially Singer Manufacturing Co. which forged ahead 15 points to Singer Manufacturing Co. Which forged ahead 150 with a gain of 3 points; Brill Corp., pref. which closed at 70 with an advance 3 points; Brill Corp., pref. Which closed at
of $51 / 2$ ppints and Gamewell Co. pref. which climbed up 15 points to 90 . Smaller gains were registered by Ferro Enamel, $21 / 4$ points to $443 / 4$; Margay Oil, 2 points to $261 / 2$; Mead Johnson, 2 points to 110; Perfect Circle, 2 points to 37 and Safety Car Heating \& Lighting, 3 points to 126.
Good gains in most of the active groups were in evidence on Tuesday, and while the improvement in the specialties and public utilities was fairly substantial, there were a number of smaller gains scattered through the list. The volume for the day showed a moderate increase over the volume for the day showed a moderate ing session, the transfers totaling 683,000 shares preceding session, the transfers totainst 629,000 on Monday. The gains included among cthers Sherwin Williams, $21 / 4$ points to 146 ; Thew Shovel, $31 / 2$ points to $501 / 2$; Newmont Mining, $31 / 4$ points to 12533 ; Mead Johnson, $43 / 4$ points to $1143 / 4$; National Gypsum (A), 2 points to 72 and Bell Telephone of Canada 3 points to 165.
Many fresh peaks for the recovery were registered on Wednesday as the market continued its forward movement. Public utilities were in demand at higher prices and there was considerable buying interest manifested in the specialties. The transfers for the day were 781,210 shares against 683,000 The transfers for the day were 781,210 shares against 683,000
on the preceding day. Outstanding among the advances registered at the close were American Cyanamid A, $21 / 2$ points to 36; American Manufacturing Co., 4 points to 41 ; Babcock \& Wilcox, 2 points to 152; Jones \& Laughlin Steel, $41 / 4$ points to $114 ;$ Penn Water \& Power, 3 points to 95 ; Pepperell Manufacturing Co., $21 / 4$ points to $1383 / 4$; Quaker Oats, $31 / 2$ points to 150 ; Royalite Oil, $21 / 2$ points to 52 ; Sherwin Williams, 4 points to 150 and Western Auto Supply, $31 / 4$ points to 82 .
Curb stocks continued to climb upward on Thursday, and while there were occasional weak spots scattered through the various groups, the list, as a whole, was firm and a number of substantial gains were apparent as the session came to a close. New tops were registered by several of the market leaders including among others Pittsburgh Plate Glass to $1471 / 2$, Sherwin Williams 152 and Eagle Picher Lead at 26. Jones \& Laughlin Steel also broke into new high ground at $1161 / 2$ and Detroit Steel Products raised its top to 63 with an advance of 4 points but lost $1 / 2$ point in the final hour. Many other substantial gains were scattered through the list.
On Friday stocks continued the forward movement during the early trading, but tumbled rapidly downward following the announcement of President Roosevelt's request for authority to add six new Justices to the Supreme Court. Many active stocks that had been fairly strong throughout the week declined from 2 to 5 or more points. Jones \& Laughlin Steel dipped $51 / 2$ points to 111, Pepperell Manufacturing Co. slipped back to $1361 / 2$ with a loss of $31 / 2$ points and Singer Manufacturing Co. receded 8 points to 342. Following the decline on Friday, prices were lower, Aluminum Co. of America closing last night at 163 against 164 on Friday a week ago, American Cyanamid B at $331 / 8$ on Friday a week ago, American Cyanamid B at $335 / 8$, Consolidated Gas of Baltimore at 86 against $875 / 8$, Creole Petroleum at $351 / 8$ against $371 / 4$, Fisk Rubber Corp. at $123 / 8$ against $131 / 8$, New Jersey Zinc at 80 against 81 , Niagara Hudson Power at 16 against $161 / 2$, and United Shoe Machinery at 91 against $951 / 2$.

| Total all cittes for week | \$6.721,760,230 | \$6,043,389,612 | +11.2 |

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today inasmuch as the week ends today (Saturday) and the Saturday figures will not be available until noon today. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results for the week previous-the week ended Jan. 30. For that week there was an increase of $17.2 \%$, the aggregate of clearings for the whole country having amounted to $\$ 6,991,925,500$, against $\$ 5,968,019,997$ in the same week in 1936. Outside of this city there was an increase of $18.1 \%$, the bank clearings at this center having recorded a gain of $16.6 \%$. We group the cities according to the Federal Reserve districts in which they are located, and from this it appears that in the New York Reserve District (including this city) the totals record an increase of $16.6 \%$, in the Boston Reserve District of $27.8 \%$ and in the Philadelphia Reserve District of $10.5 \%$. In the Cleveland Reserve District there is an expansion of $24.1 \%$, in the Richmond Reserve District of $25.5 \%$ and in the Atlanta Reserve District of $29.5 \%$. The Chicago and Minneapolis Reserve Districts have both managed to enlarge their totals by $20.5 \%$, but the St. Louis Reserve Districtreports the totals smaller by $10.1 \%$. In the Kansas City Reserve District the totals show a gain of $5.5 \%$, the Dallas Reserve District of $23.1 \%$ and the San Francisco Reserve District of $16.8 \%$.
In the following we furnish a summary by Federal Reserve districts:

| Week End. Jan. 30, 1937 | 1937 | 1936 | $\left\lvert\, \begin{gathered} \text { Inc.or } \\ \text { neen } \end{gathered}\right.$ Dec. | 1935 | 1934 |

CLEARINGS-(Concluded).

OANADIAN CLEARINGS FOR JANUARY, AND FOR WEEK ENDING JAN. 28 FOR FOUR YEARS

THE ENGLISH GOLDEAND SILVER MARKETS
FWe reprint the following from the weekly circular of Samuel Montagu \& Co. of London, written under date of Jan.[20, 1937:

## GOLD

The Bank of England gold reserve against notes amounted to $£ 313$,660,659 \%on Jan. 13 , showing no change as compared with the previous Wednesday.
In the open market the amount of gold offered at the daily fixing was about $£ 1,400,000$. There was very little change in prices, which, based on the exchange ruling at the time of fixing, included a small premium over dollar parity Most of the gold offered, however, wa $\ddagger$ secured for the
United States of America.
Quotations:

The following were the United Kingdom imports and
registred from mid-day on Jan. 11 to mid-day on Jan. 18:

The SS. Cathay which sailed from Bombay on Jan. 16 carries gold to
the value of about $£ 443,000$. - silver

Prices have shown wider fluctuations, but the tendency has been down
ward, quotations today being 20 20 . for cosh and

a week ago. Bazaars and speculators have made further resales but there has been less inclination to sell at the lower prices, at which India has also has been less inclination to sell at the lower prices, at which India has also
made purchases; buying from this quarter, however, has been limited and
the demand for early shipment appears to have been satisfied for the time the demand for early shipment appears to bave been satisfied for the time
being. being. market has rather a dull tone, but there are indications that more resistance might be encountered at a slightly lower level.

## DIVIDENDS

DividendsTare grouped in two separate tables. In the first we bring together allw the dividends announced the current week. Then we follow with a second table in which we show the dividends previously announced, but which have not yet been paid. Further details and record of past dividend payments in many cases are given under the company name in our "General Corporation and Investment News Department"' in the week when declared:
The dividends announced this week are:

| Name of Company | $\begin{aligned} & \text { Per } \\ & \text { Share } \end{aligned}$ | $\begin{aligned} & \text { When } \\ & \text { Payable } \end{aligned}$ | Holders <br> of Record |

## Condition of the Federal Reserve Bank of New York

The following shows the condition of the Federal Reserve Bank of New York at the close of business Feb. 3, 1937, in comparison with the previous week and the corresponding date last year:

|  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |
|  |  |  |

$\dagger$ "Other cash" does not include Federal Reserve notes or a bank's own Federa Reserve oank notes.
XThese are certilicates glven by the United States Treasury for the gold taken
over trom the Reserve banks when the dollar was on Jan. 31, 1934, devalued from over from the Reserve banks when the dollar was on Jan. 31 . 1934 , devalued from
100 cents to 59.06 cents, these errtificates being worth less to the extunt of the difference, the difference itself having been approoriated as profit by the Treasury difference, the difference itseif having been appropriate.
under the provisions of te Gold Reserve Act of 1934.

## Weekly Return for the Member Banks of the Federal Reserve System

Following is the weekly statement issued by the Board of Governors of the Federal Reserve System, giving the principal items of the resources and liabilities of the reporting member banks in 101 leading cities from which weekly returns are obtained. These figures are always a week behind those for the Reserve banks themselves. The comment of the Board of Governors of, the Federal Reserve System upon the figures for the latest week appears in our department of "Current Events and Discussions,
mmediately preceding which we also give the figures of New York and Chicago reporting member banks for a week later.
The statement beginning with Nov. 6, 1935, covers reporting banks in 101 leading eities, as it did prior to the banking hollday in 1933, fnstead of 91 cities, and has also been revised further so as to show additionai items., The amount of "Loans to banks" was included heretofore partly in "Loasns on securitiles-to others""and partly assoclations, states, counties, mundecipalities, \&o., minus the amount of cash items reported as on hand or in process of collection. The method of computing the item "Net demand deposits,' 'urth hermore, has been changed in two respects in accordanee with provisions of the Banking Act of 1935 . Frrst, it includes United States Government gross demand deposits, rather than solely from amounts due to banks, as was required under the old law. These changes make the figures of "Net demand deposits" not comparable with those shown prior to Aug. 23, 1935. The item "Time deposits" differs in that it formeriy included a relatively small amount of time deposits of other banks, whlth are now included in "Inter-bank deposits.". The ittem "Due to bank"s" shown heretofore included only demand balances of domestic bankss. The item "Borrowings" assets-net," and "other llabilities." By "Other assets-met" is meant the aggregate of all assets now otherwise speelified, less cash items reported as on hand or in process of collection which have been deducted from demand deposits.

## Weekly Return of the Board of Governors of the Federal Reserve System

The following was issued by the Board of Governors of the Federal Reserve System on Thursday afternoon, February 4 showing the condition of the twelve Reserve banks at the close of business on Wednesday. The first table presents the results for the System as a whole in comparison with the figures for the eight preceding weeks and with those of the corresponding week last year. The second table shows the resources and liabilities separately for each of the twelve banks. The Federal Reserve note statement (third table following) gives details regarding transactions in Federal Reserve notes between the Reserve Agents and the Federal Reserve banks. The comments of the Board of Governors of the Federal Reserve System upon the returns for the latest week appear in our department of "Current Events and Discussions."

COMBINED RESOURCES AND LIABILITIES OF THE FEDERAL RESERVE BANES AT THE CLOSE OF BUSINESS FEB. 31937

*"Other cash" does not include Federal Reserve notes. + Revised figure.
These are certificates given by the United States Treasury for the gold taken over from the Reserve banks when the dollar was devalued trom 100 cents to 59.06 oents on Jan. 31, 1934, these oertifieates being worth less to the extent of the difference, the difference itself having been addropriated as profits by the Treasury under the provisions of the Gold Reserve Act of 19344

In the following extensive list we furnish a complete record of the transactions on the New York Curb Exchange for the week beginning on Saturday last (Jan. 30, 1937) and ending the present Friday (Feb. 5, 1937). It is compiled entirely
from the daily reports of the Curb Exchange itself, and is intended to include every security, whether stock or bond, in from the daily reports of the Curb Exchange itself, an
which any dealings occurred during the week covered:

The C. \& O. desires to exercise an option granted by the Alleghany capital stock of the Erie. Its subsidiary, the Virginia Transportation Co. owns $7.44 \%$ of the Nickel Plate and $45.67 \%$ of the Erie stock. Permission was sought by the O. \& O. to unify the affiliated system
under the IOC's modified plan for consolidation, offered in 1932. By acquisition of the stock under option, the C. \& O. said, it will have brought under unified control $70.6 \%$ of the 12,852 miles embraced in System No. 6 ,
as proposed by the ICC. The transaction also will simplify the corporate
structure, the application said, and reduce administrative expenses. By terms of the option granted by the Alleghany Corp
has the the

To Retire Treasury Stock and Eliminate Reference to $61 / 2 \%$ Preferred-
Preferred -
Holders of common stock are bing notifiod that the annual meating of
stockholders will be held on March 9 , for the following purposes: (a) to
elect directors; (b) to reduce the capital stock by $\$ 1,800,000$ by the retire ment of 120,000 shares of common stock (no par) now held in the treasury; and for the transaction of such other business as may properly come befor helmeeting.
Holders of
$\$ 4.25$ series of 1935 stock and the holders of convertible preferencestock March 9 for the purp being notified that a special meeting will be held on disable by the board of directors, to amend the certificate of incorporaion by eliminating from the authorized capital stock the 225,000 shares of onnection therewith, removing from Article fourth of the certifice) in onnection therewith, removing from arporation various references to first preferred stock there certificate o and substituting for the first five paragraphs of article fourth the following "The total number of shares that may be issued by the corporation is $4.500,000$, all of which are to be without par salue
"Said $4,500,000$ shares shall consist of 500,000 shares of serial preference
stock and $4,000,000$ shares of common stock."-V. 144, p. 768
Commonwealth Edison Co.-Registration Is Filed for Additional Stock-To Further Program of Simplifying Financial Structure-
The Commonwealth Edison Co. and Commonwealth Subsidiary Corp
on Feb. 4 filed applications with the Securities and Exchange Commission in Feb. 4 filed applications with the Securities and Exchange Commissio shares of stock, and the acquisition through exchange of stock, of complet stock ownership of Public Service Co. of Northern Illinois, Western Unite Gas \& Electric Co. and Minois Northern Utilities Co. This action follows The applications set forth upper and lower limits of the proposed ratios of exchange of Commonwealth Edison's shares of $\$ 25$ par value for pre ferred stocks of Public Service Co. of Northern Ill., for preferred stock Northern Utilities Co.
Holders of both $6 \%$ and $7 \%$ preferred shares ( $\$ 100$ par) of Public Service
Co. of Northern lllinois will be offered not less than three and not more than 4 4-10ths shares of Edison $\$ 25$ par value shares. The exact numbe of Edison $\$ 25$ shares to be offered for the $6 \%$ and $7 \%$ preferred shares of
Public Service Co. of No. Ill., respectively, will be determined later, and may not be the samer limits to govern exchanges in the case of both $6 \%$ and $61 / 2 \%$ preferred shares of Western United Gas \& Electric Co. of $\$ 10$ par value are similarly 26 -10ths and $39-10$ ths shares of Edison $\$ 25$ par
value shares. Likewise, the exact exchanges will be determined later and Holders of both $6 \%$ preferred shares (par \$100) and junior preferred Co. will be offered not less than 28 -10ths shares, and not more than four Shares of Edison $\$ 25$ par value shares; in the same manner the exact ex change will be determined later, and may not be the same for both classes of Illinois Northern Utilities Co. preferred shares.
of Edison stock in denominations Three shares of Edison stock of the par value of $\$ 25$ will be offered for ach share of the common stock of Public Service Co.
The application states that a sufficiently large acceptance of the offers nancial steps to retire, as is contemplated, approximately $\$ 31.000$ takin the mortgage debt of Public Service Co. of Northern Illinois. Such action Would greatly strengthen the capital structure and credit base of Public Service Co. of Northern Ilinois which at present has a high percentage of
debt outstanding and a low proportion of share capital.-V. 144, p. 768 .

Commonwealth Investment Co.-Net AssetsThe company reports net assets, on the basis of Dec. 31, 1936 market shares of stock outstanding at the year end. This compares with ne assets of $\$ 4.50$ per share on the 142,000 shares outstanding on Dec. 31 ,
1935 . Including dividends paid during the year, the resultant gain in net assets value was equivalent to $42.6 \%$.
Net income for the year 1936, after provision for Federal taxes, was
$\$ 233,311$. Net gain realized from the sale of marketable securities was $\$ 233,311$. Net gain realized from the sale of marketable securities was
$\$ 187,897$, while income from dividends and interest amounted to $\$ 62,059$ The company declared dividends in the amount of $\$ 232,000$ during 1936 . Regular quarterly dividends at the rate of 4 cents per share were paid in The payment of the special dividend enabled the company to or 24,1936 benefits which the Federal Revenue Act of 1936 affords mutual investbenents which the Federal Revenue
ment companies.-V. 143, p. 3994.

(E. I.) Idu |Pont de $]$ Nemours '\& Co.-Annual 'Report $=$ Extracts |from |the remarks lof Pierre S. du Pont, Chairman, and L. du Pont, President, follow:

Sales Volume-The volume of business of company and its wholly owned an increase of about $18 \%$ over 1935. Increase in physical volume o sales accounted for the entire increase in dollar volume. Such changes as were made ingage selling price of the company's products. increase of the company's dollar volume of business for the year 1936 over year: $\quad$ Dollar Volume of Business by Quarters

 products enables it to supply important materials for many branches o industry, which tends to produce a comparatively even volume of business foregong tabulation, hroughany's 11 departments or divisions.
Votume of Emplopment-For the year 1929 the average number of wageof December, 1936, the total number of your company's, employees had ncreased to approximately 53,000 , or a gain of about $26 \%$.
nd salaries to the entire body of work whereas for the month of December, 1936 , this total was at the rate of approximately $\$ 94,000,000$ yearly, or a gain of about $30 \%$. 1929 the 5 -day
Hours, Wage Rates, Weekly Earnings-Subsequent to Hours, Wage Rates, Weekly Earnings-Subsequent to 1929 the 5 -da Working week has been made general throughout company's plants and as weli as for salaried employees is now a regular feature of its operating policy, Hourly wages are now, in general, substantially above the rates paid in 1929, Notwithstanding the fewer working hours, the average were somewhat above the 1929 averages, although the accepted
iving indices shows a late 1936 level about $14 \%$ below that of 1929 riant Extension and Modernization-Company continued its policy of oxtending and modernizing its manufacturing facilities in order to improve and technical advances. year. About $\$ 18,700,000$ of this amount provided additional capacity for some of the older processes and enlarged facilities for operation of the newer processes, and approximately $\$ 12,300,000$ provided for renewal and moder filities. Subsidialy companies-During the year the following wholly-owned
subsidiaries were cissolved and their assets and activities transferred to the parent company. The businesses of these former companies are now con
Lucted as follows: Corp., operated as office building division
Du Pont Building Corp., operated as office building division, "
Du Pont Cellophane Co., Inc., operated as "cellephane" division of the rayon department. Co., operated as rayon division of the rayon department. Du Pont Viscoloid Co., operated as plastics department. Araselli Chemica Co., operated as transfer the administrative oganizations of these departments to Wilmington, Del it is expected that by
June, 1937, all of company's general offices will be located in Wilmington, partly in the du Pont Bldg. and partly in the Nemours Bldg. the latter a modern, completely air-conditioned office building, now nearly completed.
Company's stockholding in International Freighting Corp., Inc., was compased from $100 \%$ to $66.67 \%$ through the issuance and sale of additional capital stock by that company to a minority interest.
Du Pont securities Co., a wholly-owned subsidiary, was dissolved. The principal asset of this fo
du Pont Cellophane Co. Inc.
The smokeless powder depar
department. The smokeleps powder was consolidated with the explosives as a division of the explosives department.
In September, Remington Arms Co., Inc. announcedfa plan of capital In september, Uemington Arms Co. inc. announcedf a plan of capital
reorganization. Under the terms of the plan, du Pont exchanged its
holdings of the $7 \%$ preferred stock for an equal number of shares of newly holdings of the $7 \%$ preferred stock for an equal number of shares of newly
issued $6 \%$ preferred stock and 357,310 shares of common stock, and subscribed to $2,254,192$ additional shares of common stock. At the end of the year company owned $60.17 \%$ of this company's common stocs and $96.97 \%$ of its $6 \%$ preferred stock.
Other changes are referred to under "Foreign Affiliates."
Foreign Affliates. Net earnings of the company's foreign affiliates, as a whole, were slightly higher than for the previous year. Industrial y Commercial continued to broaden the scope of its manufacturing operations. Satisfactory, progress was made in the construction or the rayon plant of "Ducilo" S. A. Productora de Rayon. It is expected

a minority interest Company owns $50 \%$ of the capital stock of "Duperial." Company and Imperial Chemical Industries, Ltd. of England, have
concluded negotiations to amalgamate their interests, both manufacturing and sales, in Brazil. A jointly-owned company will be formed to carry on the import business of the two companies and to operate a plant near sao
Paulo which manufactures coated fabrices. It is expected that this new company will undertake the manufacture of various other products in Investment in General Motors Corp.-At the beginning of the year General Motors Securities Co. held $11,880,529$ shares of General Motors Corp.
common stock. During the year holders of class A stock of Generai Motors Securities Co., under a provision of its certificate of incorporation, exchanged 69,538 shares of class A stock of the Securities company for a like number of shares of General Motors Corp. common stock held by General Motors Securities Co. At the end of the year the assets of General
Motors Securities Co. consisted of a small cash balance and $11,810,991$ Mhaters of General Motors Corp. common stock, representing $27.15 \%$ of the
sissued common stock of that corporation. Company's holdings of the entire common stock of General Motors Corp. common stock, which, together with 156,250 shares directly owned, makes the total of $10,000,000$ shares of General Motors Corp. common stock shown in the balance sheet, $10,000,000$ shares, carried as a permanent investment, are equal to The $10,000,000$ shares, carried as a permanent investment, are equal to
approximately $9-10$ ths of a share of General Motors Corp. common stock approximately $9-1$ ths of a share of General Motors Corp. common stock
for each share of common stock of company outstanding at the end of the year.
Number of Stockholders-The number of stockholders holding the capital
stock of company at the end of each of the last five years is as follows:
 Future Outlook-Looking basce over 1906 , it seems clear that the favorable
forces of current general business have sprung mainly from two distinct sources: first, from the natural recuperative powers of the country, recovering at last from a long, severe depression, withystocks of goods generally surgence of the normal spirit of American business enterpriselisecond, from the enormous measures of artificial stimulation whichthave ibeen applied,
on a scale unprecedented in economic history, and at. the cost of a huge new on a scale unprecedented in economic history, and atside infuences, its would
burden of public debt. Of these two powerful outsid surd reasonable to expect that the first, or natural, factorbof recovery should continue in force for some time. The"second, or artificial, factor should by
its nature plainly be of limited duration, and there can hardly be'any dissent its nature plainly be of limited duration, and there can hardly be any dissent
from the hope that, for the Nation's good, it be terminated promptly. In just what proportions these two factors havefcontributed to the farorable 1936 results of company's activities is a question that defies close
analysis and must remain a matter of opinion. What is is desired here to
point out is that the 1936 results cannot soundly be taken as a starting point in seeking to arrive at any reasonable evaluation of future probabilitie recovery is borne in mind. In what degrees these two factors remain effective; how long the natural factor will continue; to what extent its effect may ultimately be impaired by the cost of the artificial factor; and to what extent the artificial factor can or
which no one can answer today.

Hercules Powder Co., Inc.-Annual Report -
upward trend, according to the annual statement by R. $\mathbf{R}$. $\mathbf{H}$. Dunheng President. For the year as a whole, the volume averaged approximately
$20 \%$ greater than in 1935 . All departments partiched $20 \%$ greater than in 1935 . All departments participated in the improveexplosives. Arthough the explosivies business registered a substantial gain, satisfactory level.
The company's naval stores business was larger in volume and rosin prices at the end of the year reached a level more than double that pre-
vailing a year ago. The nitrocellulose business showed a substantial gain; while less than average improvement in the chemical cotton business was
occasioned by the displacement of this occasioned by the displacement of this product by cotton business was
materials in some consuming industries. Paper Makers Chemitive materials in some consuming industries. Paper Makers Chemical Corp. a
subsidiary, has been dissolved and the business formerly conducted by subsidiary, has been dissolved and the business formerly conducted by
that corporation is now being carried on by the Paper Makers Chemical
Division. This branch of the business enjoyed a further gain dut Division. This branch of the business enjoyed a further gain during the Mr. Dunham pointed out in his statement that Hercules expenditurea
on research activities amounted to $\$ 850,000$ for the year and that its
experiment station at Wilmington experiment station at Wilmington, representing a capital investment its
$\$ 1,250,000$, affords complete facilities for industrial research of the highest order.
In summing up the prospects for business in 1937, Mr. Dunham stated:
"Business analysts seem generally of the opinion that the recovery under way in 1936 should continue in the new year. By virtue of the fact that Hercules supplies a diversified list of products to basic industries, the
company should fully share in any further improvement in general business.' Consolidated Income Account for Calendar Years

Home Title Insurance Co., Brooklyn, N. Y.-Superintendent of Insurance to Recommend Reorganization -
Reorganization of the company based on a plan of deferment of claims
and part payment, will be recommended by Louis H. Pink State Super and part payment, $\begin{aligned} & \text { intendent of Insurance, he announced Jan. 29, if the creditors virtually }\end{aligned}$ are unanimous in favor of such action.
His attitude toward reorganization
His attitude toward reorganization of the company, now in liquidation and with about $848,000,000$ outstanding guarantees, was made known In a report to Wilam H. Parke, appointed as referee by supreme Court "Essentially the plan is one which requires creditors to waive in part restored to its old officers and personnel, subject no longer to supervision restored superintendent of Insurance,", Mr. Pink said.
"The plan is so developed as to create an estoppel on the part of creditors to prevent them from enforcing their existing guarantees, and as such is
one that essentially requires practically $100 \%$ consent of those affected by one that essentially requ.
He asserted that plan in effect asked creditors to defer their claims for
Heven years for part payments meanwhile, in the hope that by careful seven years for part payments meanwhile, in the hope that by careful
management and through the improvement in the real estate market the management and through the improvement in the real estate market the preciate to such an extent that the assets of the old company would meet "One obstacle to the final success of the plan lies in the financial condition of the company," Mr. Pink said. "Figures have been submitted in the
record of this hearing which show that the company can reasonably expect record of this hearing which show that the company can reasonably expect
to meet all its obligations on its estimated finalized losses, but to do so may mean practically the complete liquidation of all of its assets with the exception of the stock of the Home Title Guaranty Co. and the main office
building. Even these assets may be pledged with the Reconstruction FH building. Even these assets may be pledged with the Reconstruction Fi-
nance Corporation in the event that it is necessary to borrow from that corporation as provided in the plan of reorganization.'
In his report Mr. Pink also said:
In his report Mr. Pink also said:
"The Superintendent approves
for their reaction. Few companies submission of this plan to creditors for their reaction. Fiw companies in the hanas of Co. It is one of the few companies taken over by the State which deserve an opportunity to prove that it can reestablish itself as a factor in the real estate and mort-

Exchange for 60 days immediately proceding the exercise by Mr. McKinsey of his election.
of common Mckinsey agrees that he will purchase at least 20,000 shares of common stock of the company under his first option before he shall be covered by said option.
(5) It is agreed that the number of shares to which each of the two options contained in the original agreement refers shall not be affected in capitalization of the company,
(6) The determination of "market price" under the terms of the option agreement as amended shall not be aifocted by the issuance of any stoc (7) The determination of the book value of the stock to which Mr McKinsey's second option relates shall not be affected by the consummation of the plan of reorganization, and in determining such book value there is such stock plus any and all dividends in arrears, and the balance of the
equity in the corporation shall be allocated to the common stock.- V . 144, p. 284 .
Martin-Parry Corp.-Listing-

- The New York Stock Exchange has authorized the listing of 50,000 additional shares of capital stock (no par) on official notice of issuance pursuant
to the offer to stockholders, making the total amount applied for 175,000 shares. The company intends to offer to stockholders of record Feb. 10 the righ to subscribe to $4-10 \mathrm{ths}$ of a share of stock at $\$ 9$ per share in respect of each share of stock held. The right of subscription witions, payments and transfers of warrants are to be made at the office of the transfer agent, Lawyers Trust Co.. 160 Broadway, New York. New York, has agreed to purchase at $\$ 9$ per share so much of the 50,000 shares as will not be subscribed for
by stockholders. Its compensation for this underwriting is to be an under writing commission of $\$ 22,500$.
The proceeds of the sale of the stock at $\$ 9$ per share will be $\$ 450,000$, less with the issue, estimated to be $\$ 8,500$. Accordingly, the net proceeds of the sale of the stock are estimated to be $\$ 419.000$.
The underwriter, Sandsdown Corp., was organized in New York on ing securities of all kinds. After its formation, however, Sandsdown Corp remained comparatively dormant until 1936, at which time it detiermined to underwrite the issue of Martin-Parry Corp. stock. The authorized capital
of Sandsdown Corp. consists of 10,000 shares (par $\$ 1$. There are now issued and outstanding only 90 shares, while an additional 1,030 shares are presently held in the treasury. In order to raise funds to enter into the above underwriting, subscriptions to 1,000 shares of the authorized capital stock now held in the treasury were obtained at the price of $\begin{gathered}\text { satuired by the }\end{gathered}$ officers of Sandsdown Corp., payment to be made in cash forthwith after demand. The subscription agreements further provide that the obligawhich shall not have been demanded prior to that date The present officers and directors of Sandsdown Corp, are as follows: Aubrey Romine, Pres. and director; Harold A. Pierce, Vice-Pres., Treas Net proceeds of the sale of this issue, estimated at $\$ 419,000$, are to be used for the following purposes.
(1) To pay obligation of company to Reconstruction Finance $\$ 308,750$ (2) To pay second mortgage, together with accrued interest-...

Standard Gas \& Electric Co.-Protective Committee Reviews Present Situation of Company-
The flood situation came in for the attention of the holders of notes and
debentures in a letter being sent to the holders by the McRoberts protective committee.
Company owns approximately one-third of the common stock of Louis-
ville Gas \& Electric Co. of Del. Which in turn controls Electric Co. of Kentucky. This is the operating company of the Louisville public utilities. The committee's letter states that they have received inquiries regarding the effect of the flood upon the property of Louisville Gas \& Electric \&o. and continues: "The edger value of the company's
(Standard Gas \& Eiectric Oo.) investment in Louisville stock compared to
its total ledger value of investments in subsidiaries is its total ledger value of investments in subsidiaries is somewhat less than $3 \%$. The income realized on this investmentrepresents somewhat less than
$7 \%$ of the income of the company from dividends on subsidiaries' stocks.
Experience Experience by the company in connection with the damage to the properties of the subsidiaries of the Philadelphia Co. in the March, 1936, floped at
Pittsburg, Pa., indicates that the loss from physical damage casued by Pittsburg, Pa., indicates that the loss from physical damage casued by
flood is not permanent and considering the size of the operating property is not disastrous, although probably extensive, and that the loss in revenue
should be partially made up for the by increased activity resulting from should be partially made up for the by inscreased activity resulting from
reconstruction work following the flood.: The committee's letter also advised holders of notes and debentures of the progress being made on a plan of reorganization. The letter states that the committee, "had hoped by this time to be able to present to you a plan of
reorganization. The delays, however, have been many and varied, and reorganization. The delays, however, have been many and varied, and
although progress has been steady, it has not been as rapid as we had hoped. We are very close to the completion of our work now, but have, nevertheless decided to send you this interim report as we believe that you should
have constant information on the progress being made., The problems delaying the plan are indicated by the letter to be the
reconciliation of the various interests concerned which, it is implied is on the way to a solution, and the litigation instituted by certain holders of

Delaware, to sue certain of the officers and directors and other parties for Weekly Output-
Gas and Electric Co the public utility operating companies in the Standard which data is not available due to flood conditions, for the week ended Jan. 30, 1937, totaled $98,450,480$ kilowatt-hours, an increase of $12.2 \%$
Standard Oil Co. of Calif. (Del.)-Extra Dividend
The directors on Feb. 3 declared an extra dividend of 5 cents per share
 common stock, no par value, both payable March 15 to holders of record
Feb, 15 Similar payments were made on Dec. 15, Sept. 15 , June 15 and
March i6, 1936.-V. 143, p. 3163 .

Standard Oil Co. of Ind.-15-Cent Extra Dividend-
The directors on Feb. 1 declared an extra dividend of 15 cents per share In addition to the regular quarterly dividend of 25 cents per share on the An extra dividend of $\$ 1$ was paid on Dec. 15 , last; an extra of 25 cents was paid on Sept. 15, last, and one of 15 cents was paid on June 15, last.-V. 144 466.

dissents from the deposited with the committee with respect of which no dissents from the plan were filed, and the undeposited bonds which were
tendered for sale under the plan, will be sold at the price of $\$ 73$ in cash for
each $\$ 100$ in unpaid princial each $\$ 100$ in unpaid principal amount of the bonds, accompanied by interest coupons, and the full amount of such purchase price win
tributed as soon after the sale as practicable.-V. 144, p. 292 .

Swift \& Co.-Registers 250,000 Shares-To Be Offered to Officers and Employees-
The company on Jan. 28 filed with the Securities and Exchange Oommission a registration statement (No. 2-2823, Form A-2), under the Securities Act of 1933 covering 250,000 shares ( $\$ 25$ par) capital stock to be
offered to "employees, shareholders, customers and friends.".
The company states that 102,270 shares of the stock being offered are The company states that 102,270 shares of the stock being offered are presently held in the treasury and the remaining 147,730 shares are to be market price.
The company proposes to offer to its officers and employees the right to purchase a limited number of the shares being registered on a deferred from shareholders, customers and friends and fill such orders from the 250,000 shares being registered. Sales to officers and employees under the deferred payment plan, or to shareholders, customers and friends for cash,
will be made at the market price on the New York Stock Exchange on receipt of the purchase order unless a specific purchase price is fixed by the buyer, in which event the order will be held open and not executed unless and until shares are sold on the New York Stock Exchange at such prospective purchaser.
According to the prospectus, the proceeds from the sale of 102,270 shares held in the treasury will be used for general corporate purposes and the
amounts received from the sale of 147,730 shares subsequently acquired will be applied to extinction of cost of acquisition of such shares. Any profit or loss arising from sales of snares at less or more than original const
will be debited or credited to surplus, it is stated, inasmuch as original cost in excess of the present carrying value of shares in treasury was charged to in excess of the present car

Sylvanite Gold Mines, Ltd.-Special DividendThe directors have declared a special dividend of five cents per share in addition to the regular quarterly dividend of like amount on the com-
mon stock, both payable March 31 to holders of record Feb. 15.-V. 142.

Tennessee Products Corp.-Present Status, \&c.From an analysis of the company prepared by Campagnoli \& Co., Inc. 41 Broad St., New York we take the following: of History-Corporation was amatgamation of a number of plants, some dates back to the beginning of 1926 and its business has rather closely
paralleed the trend of the so-called "heavy industry"? during the past paralleled.
11 years.
Corpor
Corporation owns three main plants, a gas and coke and by-products plant at Chattanooga, a ferro-phosphorus iron and insulating materia by-products at Wrigley. Corporation also owns in fee approximatel i48, 00 acres of minerai and timber lands, mostly located in the area
defined by the Tennessee Valley Authority as the Tennessee River Basin derinined by the Tennessee Valley Authority as the Tennessee River Basin
where lately a number of well-known corporations have been building and expect to build new manufacturing plants. On this large acreage, the corporation obtains most of its raw materials, namely, iron ore, timber,
limestone, \&ct, which places it in a position to take advantage of industrial limestone, sc., which places it in a position
The business of corporation decreased rapidly from 1929 and sales found theit low point in 1934 with the result that on Sept. 1, 1934 corporation
filed a petition for reorganization under Section 77-B. After various amend med a petition for reorganization under Section 77 -B. After various amend ments and modirications, a plan was conirimed oyn the court on sept. 26 . Board of directors and officers of the corporation to proceed with the management of the business.
The corporation has eme
decrease in bond interest, no preferred dividend requirements, freed from
 Corporation is the only producer of Southern charcoal pig iron, which is Pig Iron and Diamond "D, "tow Phosphrus Charcoal Pig Iron
The main sales outiets for the products corporation are to manufacturers and exporters or chemicals,
 Common stock-.-.-.-.-......................... 700,000 shs. y 616,000 shs $x$ It is to be the policy of the management to sell all of the lands which are not deemed advantageous to the corporation's operations. The funds and it is expected that over the next two year period a substantial amount of this debt will be retired through the sale of these lands.
with the exchange of former first mortgage bonds, debentures as issued stock, claims and old common shares warrants. Finance Corporation loan
The terms of repayment of Reconstruction
are as follows: From Sint. 1938 to Sept. $1942, \$ 100.000$ a year and interest; on the same date in 1943 and 1944 , payment to be $\$ 200,000$ per year and interest, and the balance on or before Jan. 1,1945 . Corporation is to create an annual sinking fund for the redemption of the note equivalent
to the amount by which $50 \%$ of its net earnings for the preceding fiscal year, before depreciation and as defined by the RFC, exceed the amount o principal scheduled for fixed retirement in such fiscal year. While any part of the loan remains outstanding it is understood that the consent of common shares. Sales
tion, \&cc., are as follows:

x Profit
dep 289,017 def69,070
104,910 * Approximate. x After operating costs and taxes, but before depreciaIn only one year in the period shown above did the corporation fail to show a plant operating profit. This was in 1932 when a plant operating dividends were paid on the common stock
The corporation will now operate with fixed interest charges of only about $\$ 62,500$ per annum, instead of average interests charges for the last corporation's auditors, depreciation and depletion allowance will be somewhat reduced.
Corporation averaged a production capacity of less than $60 \%$ during February production will be stepped up rapidly, which increased volume February production will be steppe
should be maintained for some time

1937, of all of its outstanding 1st mtge. $5 \%$ gold bonds dated April 1, 1912, Company 50 Company was incorporated on March 16, 1912 in Texas for term of 50 years, expiring 1962, for the purpose of the construction, Dallas, Texas, and the country surrounding the City of Dallas. Company now owns a union passenger station in Dallas, together with coach yard, connecting tracks and tracks for the movement of through traffic outside of the terminal. Eight railroads have access to the properties of the com-
pany over their own tracks or over the tracks of other railroads under Capitalization-Capitalization as of Dec. 31, 1936 was as follows:

Capital stock. 48,000
The company's capital stock is now owned in equal amounts of $\$ 5,800$ each by the following eight railroad companies: Texas \& Pacific Ry. Co.,
Texas \& New Orleans RR., Gulf, Colorado \& Santa Fe Ry., Missouri-Kansas-Texas RR, of Texas, Fort Worth \& Denver City Ry., St. Louis,
San Francisco \& Texas Ry. Co., Chicago, Rock Island \& Gülf Ry Co., San Fraincisco \& Texas Ry. Co., Ch
St. Louis Southwestern Ry. of Texas.
Each of above railroad companies has two directors on the company's
board of directors, each director holding one share of stock (par $\$ 100$ ).
United Gas Improvement Co.-Weekly Output-

## -V. 144, p. 793.

United Milk Products Co.- 50 -Cent Dividend-
The company paid a dividend of 50 cents per share on its common stock, no par value, on Jan. 2 to holders of record. Dec. 24 . A dividend of $\$ 1.25$ per share were paid on Oct. 1, July 1, and on Jan. 2, 1936, this latter, being the initial distribution on the issue.
Dividends similar to the above have been paid on the $\$ 3$ cumulative participating preferred stock, no par value, in addition

United Shipyards, Inc.-Present Status, \&c.-
Company was incorp. in 1928 as United Dry Docks and acquired six Harbor. The plants of these concerns included 24 drydocks. In 1934 the company filed petition for reorganization under section 77-B the reorganization, it eliminated many properties which were found to be of little value and great expense to the concern, and when the company emerged from bankruptcy in 1936 it had a group of plants precisely suited
to its needs. Company now has 18 drydocks in New York Harbor, ranging in size to accommodate ocean-going vessels up to 27,000 tons. Included is the Staten Island shipbuilding plant.
Company commenced business in 1928 with a capitalization consisting of
$\$ 8,800,000$ of mortgages, $\$ 1,627,500$ of $6 \%$ preferred stock and approximately 588,000 shares of common stock, which was sold to the public at mate per share. Thus the capital exceeded $\$ 22,000,000$. Under this capital
arrangement, interest charges totaled $\$ 470,000$ rent $\$ 310,00$ and taxes arrangement, interest charges totaled $\$ 470,000$, rent $\$ 310,000$ and taxes
$\$ 210,000$ an aggregate of $\$ 990,000$ of annual fixed charges. Reorganization-Under the plan of reorganization the company's' mort-
ages and debts were reduced from $\$ 11,143,000$ to two mortgages of $\$ 5,340$, gages and debts were reduced from $\$ 11,143,000$ to two mortgages of $\$ 5,340,-$
000 . These mortgages, which mature in 1946 , are secured on specific of these mortgages will be $\$ 50,000$ for the first year; $\$ 100,000$ annually for the second and third years; $\$ 150,000$ annually for the fourth and fifth years, and $\$ 200,000$ annually thereafter. They may be extended for an addi-
tional 10 years upon terms similar to those which apply during the last five years of their existence.
In addition, the company is required to pay to the holders of these mortgages $30 \%$ of net operating income, less real estate taxes paid on the prop-
erties covered by the mortgages and the payments cited above. The total amount to be paid, however, shall not exceed $\$ 200,000$ annually during the first five years and $\$ 250,000$ annually during the last five years, unless net income during these last five years exceeds $\$ 1,500.000$ annually, in which Mortgagees who did not receive new mortgages received class A stock on the basis of one share of stock for each $\$ 10$ of mortgage. General creditors received class A stock at the rate of one share of class A stock for each
$\$ 20$ of claims.
Holders of the preferred stock received four shares of class B stock for each preferred share, and holders of the common stock received one-half share of new class B for each common share. . E. Rogers, John E. Aldred, H. G. Place, Earle G. Hines and Thomas L.
 The statements do not reflect approximately $\$ 16,000,000$ of new ships which the company was constructing.

project in Cuba, largest contract of the kind in world history. Of the otal length miles miles of continuous roadway, Warren Brothers con000,000 . Under the contract terms it. Was a cash job. In 1930 , however, Cuba became hard pressed, financially. Owing Warren Brothers $\$ 7,000,000$ finished the job, and instead of the cash to which it was entitied, received notes and other obligations of the Cuban Government, all due in 1935 or earlier. From interest and principal of these obligations Warren Brothers counted upon servicirg and retiring its own indebtedness, but this expectaof interest and principal. The agreement effected by the company in Sept., 1935, with $71 \%$ of its note and debenture holders whereby the latter consented to a conditional securities will consequently be returned. It was not practicable to extend the time limit of this agreement beyond Feb. 1 owing to the maturity of the $51 / 2 \%$ note issue on March 1 .
holders, "to enable the company to carry on its normal operations without interruption and to conserve what appears to the directors to be the best interests of the company's creditors, it has been deemed desirable to file Bankruptcy Act so that sufficient additional time may be made available to the company in its effort to bring the Cuban negotiations to a final conclusion, at which time a more intelligent decision may be made respecting
the ultimate disposition of the company's affairs."

$$

## COMMERCIAL EPITOME

Friday Night, Feb. 5, 1936
Coffee-On the 30th ulto. futures closed 3 to 6 points lower for Santos contracts, with sales of 28 lots. New Rio contracts closed 4 to 9 points off, with sales of 36 lots. Old Rio contracts closed unchanged, with sales of one lot. Rio futures were 400 to 525 reis up at 19.700 in February and 19.225 in April. The Rio spot quotation was 600 reis up at 19.800 milreis, and the Santos spot was 200 higher at 24.300 . All three contracts traded on the Santos exchange advanced All three contracts traded on the Santos exchange advanced
from the previous day, with the A contract unchanged to from the previous day, with the A contract unchanged to
600 up; the $B$ contract was unchanged and the $C$ contract up 500 throughout the list. The open market dollar rate held steady at 16.160 milreis to the dollar, while the Bank of Brazil still quoted 16.180. Havre futures were unchanged to .75 of a franc higher. On the 1st inst. futures closed 7 to 14 points higher for the Santos contract, with sales of 125 contracts. The new Rio contract closed 5 to 9 points up, with sales of 31 contracts. The old Rio contract closed 4 points off, with sales of 8 lots. Rio futures closed 100 to 225 reis off at 19.600 milreis in February and 19.00 in April. The reis off at 19.600 milreis in February and 19.00 in April. The rate was unchanged at 16.160 milreis to the dollar, while the Bank of Brazil still quotes 16.180. On the Santos Exchange the " $B$ " contract opened unchanged to 500 reis up from Saturday's close at 24.500 in March, May and July. Havre futures were 3.75 francs lower all around. On the 2 d inst. futures closed 5 to 8 points off for the Santos contract, with sales of 104 lots. The new Rio contracts closed 9 to 7 points off, with sales of 26 lots. The old Rio contract closed 6 points off, with sales of 6 lots. Rio futures were 200 reis points off, with sal es of 19.400 for February and 18.800 for April. The Rio spot quotation also declined 200 reis to 19.600 milreis. The open market dollar rate was unchanged at 16.160 milreis to the dollar, while the Bank of Brazil still quoted 16.180. Havre futures were .50 frane up to unchanged. On the 3 d inst. futures closed 4 to 2 points higher for the Santos contract, with sales of 90 lots. The new Rio contract closed unchanged to 2 points off, with sales of 36 lots. The old Rio contract closed 3 points higher, with sales of 10 lots. Rio futures closed 100 to 50 reis up at 19.500 in February and 18.500 in April. The Rio spot quotation was unchanged at 19.600 milreis. The open market dollar rate was steady at 19.160 mireis. The open market dollar rate was steady at
16 to the dollar', while the Bank of Brazil still quotes 16.180 .
On the 4th inst. futures closed 4 to 8 points up for the Santos contract, with sales of 163 lots. The new Rio contract closed 3 points off to 2 points up, with sales of 63 lots. The old "A" contract, which was not traded, was quoted nominally unchanged. Rio futures closed 100 to 350 reis higher at 19.600 in Feb. and 19.200 in April. The Rio spot quotation was unchanged at 19.600. The open market dollar rate held at 16.160 milreis to the dollar, while the Bank of Brazil still quoted 16.180 milreis. Havre futures were of Brazil still quoted 16.180 milreis. Havre futures were
4.50 to 5.50 francs up. Today futures closed 10 to 4 points 4.50 to 5.50 francs up. Today futures closed 10 to 4 points
up for the Santos contract, with sales of 150 contracts. The up for the Santos contract, with sales of 150 contracts. The
New Rio contract closed 11 to 9 points up, with sales of 34 contracts. The old Rio contract closed 10 points up, with sales of one contract. Rio de Janeiro futures were 200 to 250 reis higher, while in Santos the "C" contract was 300 to 675 reis higher. Cost and freight offers continued scarce. Santos 4 s ranged from 11.60 to 11.75 c . Havre futures were $21 / 2$ to 3 francs higher.
Rio coffee prices closed as follows:

Santos coffee prices closed as follows:

Cocoa-On the 30th ult. futures closed 20 to 24 points down. Transactions totaled 303 lots, or 4,060 tons. Liquidation continued on a rather substantial scale, and there being no appreciable support, prices yielded rather easily. The market closed a trifle above the lows of the day. Local closing: March, 10.92; May, 11.04; July, 11.14; Oct., 11.16; closing: March, 10.92 ; May, $11.04 ;$ July, 11.14; Oct., 11.16;
Dec., 11.09. On the 1st inst. futures closed 100 points down, which was the maximum limit, or $\$ 300$ per contract. In one of the most spectacular sessions in many a day, the market suffered one of the most violent setbacks, if not the market suffered one of the most violent setbacks, if not the July, 1933. Trading volume reached the highest figure on record since that time, the volume totaling 1,866 lots, or 25,004 tons changing hands. There was a combination) of manufacturer selling and liquidation, a good part of the latter being of a forced nature. Much stress was laid on persistent selling by a leading domestic manufacturer, some going so far as to claim this pressure was largely responsible for the flood of stop-loss and margin call sales that followed. It was also stated that this consuming interest was selling
to create a more favorable market on which to cover his actual needs. The feeling was general among the trade that the recent heavy decline had greatly strengthened the market's technical position. It is now thought this drastic decline has badly shaken the confidence of the speculative element. Local closing: March, 9.92; May, 10.04; July, 10.14; Sept., 10.18; Oct., 10.16; Dec., 10.09. On the 2 d inst 10.14; Sept., 10.18 ; Oct., 10.16 ; Dec., 10.09 . On the 2 d inst. futures closed 8 to 20 points up. In a wild trading session previous close. For a time it looked as though the market would break through to the extreme 100 -point limit, the same as it did the day before. At the critical moment however, a bid for 1,000 lots of September cocoa was entered at prices slightly under the market. This had an electrifying effect on traders and brought the market back with a sharp rebound. Shorts jumped in to grab off profits and this greatly accelerated the rally. The dramatic bids, which had so much to do with the sharp rebound of prices-represented so much to do with the sharp rebound of prices-represented
from 250,000 to 500,000 bags of cocoa beans. These bids from 250,000 to 500,000 bags of cocoa beans. These bids
made their appearance after the market had crashed almost made their appearance after the market had crashed almost
400 points from its recent high of a fortnight ago. Local closing: March, 10.00; May, 10.16; July, 10.26; Sept., 10.38 Oct., 10.36; Dec., 10.25. On the 3d inst. futures closed 14 to 17 points higher. More normal trading conditions prevailed during this session after the hectic markets of Monday and Tuesday. Opening sales of 80 lots were worked at gains of 13 to 23 points, while the close was at approximately the highs of the day for the nearby deliveries. Sales totaled 7,102 tons. London came in 1s. 6 d . higher on the totaled 7,102 tons. London came in 1 s . 6 d . higher on the
outside and 2 s . to 3 s . stronger on the Terminal Cocoa Maroutside and 2s. to 3 s. stronger on the Terminal Cocoa Mar-
ket, which closed strong after a trade of 3,210 tons. Local closing: March, 10.20; May, 10.40; July, 10.44; Sept., 10.55; Dec., 10.44 .
On the 4th inst. futures closed 7 to 13 points down. Opening sales of 72 lots had been worked at gains of 15 to 20 points. The apparent instability of the market despite recent violent declines, does not make for confidence on the part of those inclined to buy. London came in 6 d higher for actuals and 1s 3d to 6d higher on the Terminal Cocoa Market, with 2,310 tons trading. Transactions in the local market totaled 656 lots, or 8,690 tons. Local closing: Mar. 10.13; May 10.27 July, 10.35; Sept., 10.45; Oct., 10.43; Dec., 10.33. Today futures closed 48 to 53 points down. General liquidation continued and caused heavy declines throughout the list. A recovery followed of 15 to 20 points, but this was subsequently shaved down, with the market closing a little above the lows of the day. Good buying from manufacturers was reported on the scale down. Sales totaled 953 contracts Local closing: Mar., 9.62; May, 976; July, 987; Oct., 9.91; Dec., 9.84; Jan., 9.89.
Sugar-On the 30th ulto. futures closed 5 to 9 points down. Transactions totaled 550 lots. The heaviness of the market was attributed largely to the prospects of an excise tax. This latest recession in prices brought the market to the lowest point since Nov. 5 and measured by the active September position, 39 points under the best price for the year, which was recorded on Jan. 4. In the market for raws there were definite offerings at the basis of 3.65 c . comprising Philippines, now loading, Feb.-March or AprilMay shipment. However, refiners showed no interest. In the world sugar market prices declined $31 / 2$ to $41 / 2$ points Transactions totaled 224 lots. There was nothing in the news to influence world prices, the weakness being attributed entirely to the weakness of the domestic sugar market London was $1 / 4$ to $3 / 4 \mathrm{~d}$. lower, with the market for raws re ported as quiet. On the ist inst. futures closed 2 to 3 points higher. At last the almost steady descent of prices was checked in today's session. Steadied by trade and Cuban buying, prices generally were ruling 5 to 6 points higher at one stage of the trading, but later on prices eased and half of these gains were erased. Sales totaled 412 lots, more than half this volume being transacted in September In the market for raws, National bought 10,000 bags of Puerto Ricos, due on Feb. 22, at 3.68c., delivered, estab lishing a new spot price. At the same basis Revere got 1,000 tons of Philippines for April-May shipment. On the recent recessions from the previous spot basis of 3.81c., there were sales effected at 3.75 c . and reported sales at 3.70 c ., but none of them changed the spot. The world sugar market was quiet, closing with net gains of 2 to $41 / 2$ points. Sales totaled 9,550 tons. London terme market closed unchanged to $3 / 4 \mathrm{~d}$. lower, with raw market unchanged. On the 2 d inst. futures closed 1 to 2 points lower. Sales totaled 200 lots or 10,000 tons. The narrow range and light trading reflects the indisposition of traders to make any substantial commitments until this uncertainty of the processing tax has been more or less cleared up. In the market for raws Arbuckle bought 15,000 bags of puerto Ricos at 3.65e., delivered, off 3 points from the price paid the previous day. Part of the shipment of 5,000 bags is for February shipment and
establishes a new spot price. In the world contract market prices closed unchanged to 2 points off. Sales were 294 lots, or 114,700 tons. On the 3 d inst. futures closed 1 to 2 points off. Transactions totaled 279 lots. The March delivery at 2.70 c ., which reflected sales late in the previous session of actuals at the equivalent blasis of 2.75 c . for Cubas-was the lowest price on the current downward swing. It was said that producers are becoming more and more alarmed by the prospects of the new processing tax. In the market for raws the only reported sale of raw sugar was one of 3,000 tons of Philippines for second half of March arrival at 3.65c. to McCahan. Definitely on offer at 3.65 c . were 10,000 bags of Puerto Ricos for March shipment, and the belief developed that more was available at the same level. The world contract market closed unchanged to 1 point lower. Volume of trading for the first time fell under 100 lots. London of trading for the first time fell under 100 lots. London raw market was quoted at 6 s , equa
Cuba, based on a freight rate of 22 s .
On the 4th inst. futures closed 3 to 5 points down. The weakness of raw sugars together with the great uncertainty concerning the effects of the prospective processing tax, was responsible to a large extent for the heaviness of sugars generally". Volume of business was moderate, amounting to 262 lots, of which half were in September. In the market for raws it was stated, though not confirmed, that sales were effected at 3.60 c., delivered, which would represent a decline of 5 points. Refiners however, were showing little or no interest. At the close of the market there were offerings at 3.62 c . definitely, parcels of about 4,000 tons of Puerto Ricos and a cargo. The world sugar contract market closed unchanged to 2 points lower. Transactions totaled 157 lots, or 7,850 tons. An important development was the definite fixing of a world conference in London April 5th, to study better organization for the production and sale of sugar. Today futures closed 4 to 1 point down. Selling of the domestic contract continued, resulting in price declines to new lows, with May, July and Sept. selling at 2.64 c . In the market for raws sugar could be bought at 3.60 c . The No. 4 or world contract sagged on rumors at 3.60 c. The No. 4 or world contract sagged on rumors
that British Dominion sugar producers might not attend the international conference in April. London futures were $1 / 4$ to $3 / 4 \mathrm{~d}$. higher. Refined was reduced $11 / 2 \mathrm{~d}$. per cwt., while raws sold at the equivalent of 1.09 c ., f.o.b. Cuba. The world contract market here closed 1 down to $1 / 2$ up, with sales of 143 contracts.

Prices were as follows:

Lard-On the 30th ult. futures closed 7 to 15 points lower. This made a total decline for the week of 50 to 55 points, due largely to speculative selling. Trade interests are still on the sidelines and apparently are unwilling to support the market owing to the present large inventories. During the past few months stocks have increased rapidly due to the heavy hog marketings, and with very meagre cash demand for lard, no substantial decreases in supplies have been recorded. Closing hog prices at Chicago were unchanged to 5 c . lower, with the top price registering $\$ 10$, and major portion of sales ranging from $\$ 9.75$ to $\$ 9.85$. Liverpool closed 6d. to 1 s . lower. No export clearances of lard from the Port of New York were reported. On the 1st inst. futures closed 7 to 12 points off. In the early trading the market showed substantial improvement, but this was all erased later on rumors of a substantial increase in the monthly lard stocks at Chicago, which induced considerable selling. It was stated that the earlier expectations of the trade had been for a report showing approximately $9,000,000$ pounds, whereas the report showed that stocks in January had increased 19,186,123 pounds. Total stocks now are $99,715,814$ pounds, against pounds. Total stocks now are $99,715,814$ pounds, against at Chicago totaled 14,000 head, whereas 30,000 were exat Chicago totaled 14,000 head, whereas 30,000 were exagainst 70,300 for the same day a year ago. There were no exports of lard reported from the Port of New York over the week-end. Liverpool lard prices were unchanged to 3 pence higher. On the 2d inst. futures closed 27 to 32 points down. The sharp decline was attributed to heavy speculative selling prompted by the bearish monthly report on lard stocks at Chicago, issued after the close on Monday. As soon as the market opened prices fell off 15 to 25 points. As soon as the market opened prices fell off 15 to 25 points.
Lard stocks at Chicago in January increased over 19,000,000 Lard stocks at Chicago in January increased over $19,000,000$
pounds, and this was about $10,000,000$ pounds over trade expectations. Closing hog prices were 10c. to 15 c . higher at Chicago, the top price registering $\$ 10.40$, with the bulk of sales ranging from $\$ 10$ to $\$ 10.30$. Western hog run was below expectations and totaled 50,200 head, against 41,900 for the same day a year ago. Liverpool lard prices were 4 d . lower on the spot position and 1s. 9 d . lower on May and 2s. 3d. lower on July. Export shipments of lard from the Port of New York were a little above recent average and totaled 74,200 pounds, destined for London, Liverpool and Southampton. On the 3 d inst. futures closed 25 to 27 points higher. After a prolonged decline of approximately 200 points in futures the past several weeks, it was figured the market's technical position was pretty strong, and this view was more or less justified by the action of the market today, which responded in a substantial way to the upward move ment in grains and lighter marketings of hogs. The hog market closed firm with Chicago prices 10c. higher. Total
receipts for the Western run were 56,400 head, against 36,200 for the same day a year ago. The top price at Chicago was $\$ 10.45$, with the bulk of sales ranging from $\$ 10.10$ to $\$ 10.45$. There were no export clearances reported from the Port of New York. Liwerpool lard prices were 1s. 3d. to 3d. off from the previous close.
On the 4th inst. futures closed 10 to 15 points down. Persistent selling by packers was largely responsible for the heaviness of this market. Western hog receipts were 66,000 head against 68,500 for the same day last year. Hog prices at Chicago declined 10c. to 15c., the top price registering $\$ 10.30$, with the bulk of sales ranging from $\$ 10$ to $\$ 10.25$. Liverpool lard futures were firmer at 6 d . to 1 s .6 d . higher. Export clearances of lard from the Port of New York were moderately heavy, totaling 95,000 pounds destined for Manchester. Today futures closed 18 to 20 points up. The firmness of this commodity was attributed largely to a slight pick-up of cash demand and to somewhat lighter hog receipts.

Cottonseed Oil, sales, including switches, 106 contracts. Crude, S. E., 10c. Prices closed as follows:

Petroleum-The summary and tables of prices formerly appearing here regarding petroleum will be found on an earlier page in our department of "Business Indications," in the article entitled "Petroleum and Its Products."
Rubber-On the 30th ult. futures closed unchanged to 7 points lower. The December options closed 2 points higher. Transactions totaled only 420 tons. The outside market continued dull, apparently awaiting developments in the automobile strike situation, which did not materialize Outside quotations were unchanged at $211 / \mathrm{c}$. for standard sheets. No factory buying developed. London and Singapore closed steady, with/prices slightly higher. Local closing Feb., 21.01; March, 21.06; May, 21.07; July, 21.00; Sept. 20.95; Oct., 20.92; Dec., 20.90 . On the 1st inst. futures closed 2 points up to 1 point down. Transactions totaled 660 tons. Trading was quiet. Quotations in the outside market remained unchanged on a spot basis of $211 / 4 \mathrm{c}$. for standard sheets. Local closing: Feb., 21.03; March, 21.08; May 21.06; July, 21.00; Sept., 20.97; Dec., 20.92. On the 2 d inst futures closed 4 to 8 points down. Trading was light, with transactions totaling 800 tons. Futures opened 12 to 21 points lower, but subsequently recovered considerable of the losses. Outside prices were reduced to a spot quotation of $211 / 8 \mathrm{c}$. for standard sheets and some brokers even quoted a slightly lower figure. Local closing: Feb., 20.95; March 21.00; May, 21.00; July, 20.96; Sept., 29.92; Dec., 20.86 On the 3d inst. prices closed 10 to 11 points higher. Trans actions totaled 1,430 tons. Outside prices were quoted on a spot basis of $211 / 4 \mathrm{c}$. for standard sheets. London and Singa pore closed steady, with prices slightly higher. Local closing Feb., 21.06; March 21,11; May, 21.11; July, 21.06; Sept. 21.02; Oct., 21.00.

On the 4th inst. prices closed 23 to 30 points higher. The market continued its upward trend of the previous day with a marked increase in trading activity. Transactions totaled 2,400 tons. Trading in the outside market, however was dull. London and Singapore closed steady and dull respectively, with prices unchanged to slightly higher Local closing: Feb., 21.29; Mar., 21.34; May, 21.34; July, 21.29; Sept., 21.29; Oct., 21.27 ; |Dec., 21.25. Tod futures closed 9 to 12 points up. Sales totaled 279 con tracts. Crude rubber futures made further upward progres in fairly active trading. London prices were 1-16d to $11-8 \mathrm{~d}$
higher in London, and it was reported that a decrease of 2,925 tons in United Kingdom stocks this week was indicated, owing to a large shipment to Russia. Local closing: March, 21.43; May, 21.44; July, 21.41; Sept., 21.40; Dec., 21.36 .

Hides-On the 30 th ult. futures closed 6 to 8 points down. Transactions totaled $1,240,000$ pounds. Stocks of certificated hides in warehouses licensed by the Exchange remained unchanged at 741,956 hides. No new sales were reported in either the domestic or Argentine spot hide markets during the day. The market for New York City calfskins, however, the day. The market for New York City calskins, however, appears easier and prices are reported somewhat lower than heretofore. Local closing: Feb., 21.01; March, 21.06 ; May,
21.07; July, 21.00 ; Sept., 20.95 ; Oct., 20.92. On the 1st inst. 21.07; July, 21.00 ; Sept., 20.95 ; Oct., 20.92 . On the 1st inst.
futures closed 15 to 19 points down. Transactions totaled $2,560,000$ pounds. Stocks of certificated hides in warehouses licensed by the Exchange remained unchanged at 741,956 hides. No business reported from the domestic or Argentine spot hide markets. Local closing: March, 14.99; June, 15.32 ; Sept., 15.60; Dec., 15.83. On the 2 d inst. futures closed 7 to 13 points down. Transactions totaled $3,840,000$ pounds. Stocks of certificated hides in warehouses licensed by the Exchs of. certificated hides in warehouses remained unchanged at 741,956 hides. No new Exchange remained unchanged at was reported from the local spot hide market or the business was reported from the local spot hide market or the
Argentine spot center. Local closing: Dec., 15.70; March, Argentine spot center. Local closing: Dee., 15.70; March,
14.92; June, 15.25; Sept., 15.47. On the 3d inst. futures closed unchanged to 4 points up. Transactions totaled $2,400,000$ pounds. Stocks of certificated hides in warehouses licensed by the Exchange remained unchanged at 741,956 hides. A weaker spot situation was reported yesterday, light native cow hides having been offered at 14c. against the last previous price of $141 / 2$ c. Local closing: March, 14.92; June, previous price of 141 ; 2 c. Local., 15.51 ; Dec., 15.74 .
On the 4 th inst. futures closed 10 to 16 points down. Transactions totaled $4,920,000$ pounds. Stocks of certificated hides in warehouses licensed by the Exchange remained unchanged at 741,956 hides. There were sales reported in the Chicago market of 18,700 hides, with light native cows at 14 c ., or a half cent a pound below the last previous sales price. Local closing: Mar., 14.80; June, 15.10; Sept., 15.40; Dec., 15.64. To-day futures closed 25 to 20 points down. Transactions totaled 148 contracts. The easier tendency in raw hide futures continued with losses of 5 to 20 points the opening, and prices closing at the lows of the day. Local closing: March, 14.55; June, 14.90; Sept., 15.20.

Ocean Freights-Nothing spectacular happened in the market for charters. For a time there appeared to be a rate deadlock in connection with scrap iron, but this apparently deadlock in connection with scrap iro

April.
Coal-Improvement in the local anthracite trade of New York and New Jersey has been most marked this week, with consumption in real volume, and retailers being favored with a good share of favorable though not dependable cold weather. New York tidewater bituminous dumpings on Tuesday were about 575 cars. Southern smokeless producers car loadings are again rising. West Virginia mines are for the most part running at capacity. Industrial slack has for the most part running at capacity. Industrial slack has the call, wherever transport conditions are not too bad. A medium cold wave enlivened the domestic market east and
west of the Ohio, and particularly in the upper central Great Plains.

Copper-The outstanding feature of the week was the heavy speculative buying in Europe, accompanied by reports that France is seeking large tonnages of the red metal. On the London Metal Exchange the heaviest trading in a week or more brought about advances of 13 s 9 d . and 12 s .6 d . respectively, in standard spot and futures. Export copper prices here went as high as 12.975c. a pound, c.i.f. European ports, with other transactions at the equivalent of 12.95, 12.90 and 12.87 c . Export sellers reported that they are not anxious to sell any large tonnages, attributing, as they do, the latest rise principally to the same speculative groups which have been active in copper all along. The speculative purchasing is not confined to copper, but applies to other metals and commodities. To local interests the sharp advance in copper abroad seems illogical as factors of the market indicate declines rather than advances, it is pointed out. Thus, the foreign market is regarded as overbought, production of copper is now unrestricted, the American floods and automobile strikes exert bearish influences. The renewed flight from the franc has caused French speculators to invest in commodities, which at least partly accounts for copper's buoyancy. The Navy Department, which invited bids on 2,735,000 pounds of copper, received bids yesterday on $1,035,000$ pounds for shipment to various of its Navy yards. The American Smelting \& Refining Co. bid 13c. on 435,000 The American Smelting \& Rerining Co. 13id 13c. on 435,000 pounds, the American Metal These two companies were successful bidders.

Tin-The spectacular happenings in the tin market at London are focusing the attention of the trade. Tin in common with the other metals has felt the effects of strong
speculative buying on the London Metal Exchange. However, reports were received in certain quarters that the industrial demand for tin in Europe was brisk and that the rise in prices have a firm foundation. The Navy Departmen here opened bids on 370,000 pounds of grade A tin. On the entire lot the National Lead Co. bid 51.30c, Brooklyn, while Tuthill \& Co. bid 50.85 c on 320,000 pounds; Pope Trading Co. bid 51.23c on 320,000 pounds and Trench \& Co. bid 50.98 c on the same amount. H. P. Winter turned in a bid 50.98 e on the same amount. H. P. Winter turned in a bid of 50.92 c . Outside of Navy purchasing, there was comparatively little business, prices apparently being too high for American consumers and dealers. Tin afloat to the United
States is 9,861 tons. Tin arrivals this month have been: States is 9,861 tons. Tin arrivals this month have boen.
Atlantic ports, 330 tons; Pacific ports, nil. Stocks in local warehouses are unchanged at 1,070 tons.

Lead-A strange speculative buying wave is carrying the metals forward on the London Metal Exchange, and lead hared in the upward movement. London prices rose $£ 1$ for two sessions. With the strikes and floods here, domestic traders look upon the sharp rise of the metal abroad as not warranted by conditions. Some American producers, however, understood that a genuine consumer demand appeared in Europe during the recent heavy buying movement. Demand for pig lead here is only moderate, but prices are firm at 6 to 6.05 e per pound, New York, and 5.85 c , East St. Louis. It is thought in some quarters that with the maritime strike about to be settled and with London prices rising sharply, it may be logical for American producers to sell lead to London.
Zinc-Although there have been rumors current this week that American zinc prices may go higher, most producers state that business by no means warrants any move in this direction just now. However, it is pointed out that in the past sudden outbursts of buying have developed, and if this should happen, it would find the market responsive, especially in view of the firm undertone and remarkable absence of offerings. Recently it was reported that consumers were bidding 6.05 c per pound, East St. Louis, for April delivery zinc, thus proving the strength of the market. Sales of slab zinc last week were small again, consisting of 1,461 tons of prime. Western and 700 tons of brass special. Unfilled orders of prime Western at the end of the week were 79,084 tons, with unfilled orders of brass special 5,139 tons and of select grades 1,110 tons. Shipments of prime Western were the real feature of the statistics, coming to 8,000 tons, with shipments of brass special 622 tons. All prime Western sold on the basis of 6c, East St. Louis, and about threequarters of the sales were for first quarter shipment.
Steel-The steel industry still presents a glowing picture in spite of floods, strikes and threats of strikes. The "Iron Age" in its weekly summary of the industry, reports that schedules for the week are at $79 \%$ of capacity, against $75 \%$ a week ago, due to resumption of operations at plants closed by floods, Pittsburgh output being at a peak for six years. As flood waters recede some fair idea is obtained of the extent of damage in many areas, and already indications are that there will be a tremendous replacement business. Several factors contribute to the feeling in industrial quarters that steel prices are due for another mark-up. Deadlines on price protection granted consumers in December and uneasiness over steel strike threats uttered by John L. Lewis, have contributed to the large volume of orders booked by mills in recent weeks. Some mills are booked so far ahead that they have been declining specifications for material to be shipped after the end of the current quarter. In addition, analysis of some company statements tend to In addition, analysis of some company statements tend to show that the price increases announced for December 1st
and January 1st have been insufficient to offset higher wage costs and additional expenses in other departments. The "Iron Age" states that notwithstanding the extremely heavy backlogs on mill books, further additions are in sight. Resumption of water shipments to the Pacific Coast, following settlement of the seamen's strike, will release considerable suspended business: the United States Navy program and rejuvenation of American shipbuilding under the auspices of the new Maritime Commission offer prospects for pices of the new
large tonnages.

Pig Iron-The floods played havoc with foundries in many areas. The foundries in Cincinnati were hard hit by the floods, according to reports to the trade here. Most of the foundries connected with the machine tool manufacturers are close to the railroad and the river, and few survived the high waters, which damaged the sand, patterns and other equipment. It is thought that several weeks will elapse before normal conditions can be restored. There are rumors of another rise in pig iron, but it is believed that no change will be made except to apply to second quarter. Prices for that period would normally be named about March 1st, or, if the old steel code rules are still observed, about Feb. 18th. The New York pig iron trade apparently believes that it would be unwise to advance prices just now since demand is not brisk enough to warrant it. Demand for pig iron in this district continues rather slow, but is by no means stagnant. Inquiry for American pig iron for export is expanding, the following countries being in our market now: Greece, Japan, Uruguay, Italy, Great Britain and China.

Wool-The upward trend in wool here continues. The steady advance in the overseas markets has halted for the

Volume 144
time being, although general opinion among importers here holds that higher prices may yet be made as the season progresses. Domestic wools are being sold well above the duty paid cost of similar foreign wools, and there is nothing in the near future to warrant expectations of lower values, according to a leading authority in the wool trade. With not more than $25,000,000$ pounds of unsold domestic wool in the entire United States, a return to an average normal use in 1937 would easily take care of the new clip as such wools will come into bare warehouses. Contracting in Texas has been going on at a good rate, not only for wool but for mohair, some of the buying for both fibres for mill account on a commission basis. About half the Texas clip of 12 and 8 months wool is said to have been placed under contract at prices from 35 to 36c. Meanwhile the tendency in London and Australasia is for wool values to level off somewhat, and where the demand has been satisfied in part, for purchasers of such wool to offer lower bids.

Silk-On the 1st inst. futures closed 3 to 5 c . up. New buying was quite general. The promise of more stable conditions in Japan and general expectation of a good mill consumption for the month of January appeared to be the chief influences in the development of renewed buying. Sales totaled 2,960 bales. Statistics furnished by the Exchange revealed that Japanese exports of raw silk during January to all countries ran only 30,555 bales, while the into-sight movement showed the usual drop. Cables from Japan remoaled advance of $121 / 2$ yen in Yokohama and 10 yen at Kobe, both markets quoting 910 yen for grade D. Bourse Kobe, both markets quoting 910 yen for grade D. Bourse
quotations at Yokohama were 5 to 7 yen up, while at Kobe quotations at Yokohama were 5 to 7 yen up, while at Kobe
they were 2 to 8 yen higher. Cash sales for both places totaled 650 bales, while transactions in futures totaled 5,500 bales. Local closing: Feb., 2.00; March, 2.00; May, 2.01 June, 2.01; July, 2.01; Aug., 2.00; Sept., 1.97 $1 / 2$. On the 2d inst. futures closed 4 to $51 / 2 \mathrm{c}$. lower. Transactions totaled 1,490 bales. Cables came in unchanged for grade D, which stood at 910 yen at Yokohama and Kobe. Bourse quotations on these markets ranged 7 to 13 yen lower at Yokohama and 3 to 8 yen lower at Kobe. Spot sales at both centers were 700 bales, while transactions in futures totaled 5,775 bales. Local closing: Feb., 1.96; March, 1.96; May $1.961 / 2$; July, 1.96; Aug., 1.951 2 ; Sept., 1.92. On the 3d inst. futures closed 1c. to 3c. down. Japanese cables were lower, which accounted for the easier domestic market Sales here totaled 2,160 bales. Cables reported grade D at Yokohama 5 yen lower, while at Kobe the same grade was 10 yen lower, the price being 910 yen at Kobe and 905 yen at Yokohama. Bourse quotations at Yokohama were 16 to 23 yen lower and at Kobe 6 to 12 yen down. Cash sales were 700 bales, while transactions in futures for both centers totaled 6,600 bales. Local closing: Feb., 1.93; March 1, $1.931 / 2$; May, 1.95; July, 1.94; Aug., $1.931 / 2$; Sept., $1.901 / 2$

On the 4 th inst. futures closed $11 / 2$ to 40 . down. Trans actions totaled 3,340 bales. The weakness was attributed to bearish cables from Japan. At Yokohama Grade D was 20 yen lower at 885 yen, and 20 yen lower at Kobe, putting the price of grade D at 880 yen in Kobe. Bourse prices were 9 to 21 yen lower at Yokohama and 14 to 20 yen lower Kobe Sales of actual silk in these markets were 650 t bales, while transactions in futures totaled 13,650 bales Local closing: Feb., 1.91 12 ; Apr., 1.90; May, 1.91; July 1.90; Aug., 1.90; Sept., 1.88. Today futures closed at $31 / 2$ to 1c. down. Transactions totaled 305 contracts. Mixed changes in foreign markets caused irregularity in the raw silk market. The opening was $11 / 2 \mathrm{c}$. lower to 2 c . higher. The price of crack double extra in the New York spot market was $1 / 2 \mathrm{c}$. lower at $\$ 1.97$. The Yokohama Bourse closed 5 to 10 yen higher, with the exception of February, which was 2 yen lower. The price of grade $D$ in the outside marat was 5 yen lower at 880 yen a bale Local closin Feb., 1.88; Mar., 1.88½; May, 1.89; July, 1.89; Aug., 1.87; Sept., 1.86

## COTTON

Friday Night, Feb. 5, 1937
The Movement of the Crop, as indicated by our tele grams from the South tonight, is given below. For the week ending this evening the total receipts have reached 54,826 bales, against 61,831 bales last week and 82,643 bales the revious week, making the total receipts since Aug. 1, 1936 $5,317,312$ bales, against $5,805,345$ bales for the same period of 1935-36, showing a decrease since Aug. 1, 1936, of 488,033 bales.

Speculation in cotton for future delivery was moderately active, with prices ruling within a comparatively nar-
row range, Attention of the trade appeared to be focused on the liquidation of loan-cotton, though nothing of a spectacular nature developed in this connection.
On the 30 th ult. prices closed 5 to 7 points higher for the old-crop positions, while the new-crop months closed 1 point lower to 1 point higher. The firmness of the old-crop deliveries was attributed to an announcement that Italy had secured credits in the United States for the purchase of secured credits in the United States for the purchase of
American cotton. This, coupled with reports from Washington that the Commodity Credit Corporation does not contemplate any immediate alterations in the grade and location differentials in connection with the sale of loan cotton to begin Monday, had a cheerful effect on sentiment, inducing some substantial buying of the old-crop positions. The trade, however, seemed to be wary of the new-crop months because of the general uncertainty concerning the new crop development, the eventual effects of the floods and the reaction of planters to Secretary Wallace's recent statements concerning future crops. There was considerable ments concerning future crops. There was considerable concern upon the part of not a few traders as to the possimaintained, held cotton above a working basis. Southern spot markets as officially reported were 5 to 10 points higher. The average price of middling at the 10 designated spot markets was 13.12 cents.
On the 1st inst. priees closed 2 to 6 points down. While there were no substantial sales of loan cotton on the opening day of these Government operations, yet the threat of heavy unloading of loan cotton and the possibility of hedge selling hung like a pall over the market during the entire session There was no real activity, traders apparently just waiting to see what was going to happen on the first day of loan cotton operations, which did not materialize in any real volume. Reports from the South indicated small sales of loan cotton and spot houses continued of the opinion that under prevailing differentials buyers would not be interested in purchases. Reports from the flood district indicated that levees were holding at most strategic points, but that cotton was being moved from numerous warehouses along the Mississippi to higher ground. Flood news during the day failed to stimulate much buying, though uneasiness still prevails over the possibility of unfavorable developments. Demand for spot cotton was quiet. Southern spot markets as officially reported were 4 to 7 points lower. Average price of middling cotton at the ten designated spot markets was 13.06 cents.

On the $2 d$ inst. prices closed 4 to 8 points lower. The market at the start showed heaviness, and this heaviness was accentuated later on as fresh liquidation developed and continued heavy throughout the morning session. Long cotton came out in considerable volume, and the offerings were net readily absorbed. The fact that no breaks were reported in the Mississippi levees gave the flood news a more favorable appearance, and this inclined those who had bought recently on the prospects of flood damage to cotton, to sell. Other bearish factors were inactivity in the textile markets and heaviness in prices for goods. Little loan cotton has moved in the south, so advices state. It was pointed out that if the Commodity Credit Corporation is desirous of disposing of any quantity of the $3,000,000$ bales of loan cotton it may reduce its basis and bring out more low-grade cotton. Spot demand was comparatively quiet. Southern spot markets, as officially reported, were 3 to 15 points lower The average price of middling at the ten designated spot markets was 13.00 cents.

On the 3d inst. prices clesed 3 to 6 points up. Trading was comparatively light, with fluctuations continuing within a narrow range. Trade interests were the best buyers, concentrating their demand in old crop positions. The early decline of May to 12.49 cents was watched closely, but when the market broke below Tuesday's $121 / 2$ cent resistance point, the failure of any severe pressure to develop gave courage to many traders and their buying caused considerable short covering in other quarters. The undertone ruled steady at around the previous closing levels. At no time during the session was there any aggressiveness on the buying or selling side, a feeling of apathy apparently prevailing among traders generally. The market received small encouragement from sales of loan cotton. According to Southern advices limited demand has developed for this cotton owing to technical difficulties in obtaining its release and the higher basis asked, compared with free stocks. Southern spot markets, as officially reported, were 4 to 6 points higher. Middling quotations ranged from 12.62 cents up to 13.40 cents, compared with 12.80c the close for March in New York.
On the 4th inst. prices closed unchanged to 5 points down. There was nothing remarkable about the session today outside of the fact that the market felt its first influence of hedge pressure against sales of loan-cotton. As a result, prices fell off 7 to 13 points from the highs of the early morning. Trade buying on the scale down, and late covering brought a partial rally, and at the close prices were almost even with yesterday's finals. Hedge selling against loan-cotton was not large, probably not exceeding 10,000 bales in the different positions. The appearance of this selling, however, had its psychological effect and influenced considerable liquidation through wall Street commission houses, and for a time the market displayed considerable houses, and for a time the market displayed considerable heaviness. Houses with trade connections were good buyselling. This, in combination with some short covering
towards the close, rallied the market, and the final undertone was steady. Foreign orders were on both sides of the market. Southern spot markets, as officially reported were unchanged to 5 points lower. Average price of middling at the 10 designated spot markets was 13.02 c
Today prices closed 3 to 7 points down, Trading was quiet and without special feature, the market ruling heavy during most of the session. Most of the early hedge selling was in May and July, and was believed to be chiefly against the movement of cotton in the South. The influence of weak Liverpool cables was partially offset by good trade demands for nearby positions. Liverpool bought the far months, and there was a fair demand from commission houses. The reported settlement of the maritime strike on the Pacific Coast was considered a favorable factor, inas much as several hundred thousand bales of cotton are expected to be moved from these ports.

The official quotation for middling upland cotton in the New York market each day for the past week has been: Middling upland 30 to $\qquad$ $\begin{array}{rlllll}\text { Sat. } & \text { Mon. Tues, } & \text { Wed. Thurs. Fri. } \\ -13.33 & 13.29 & 13.25 & 13.30 & 13.25 & 13.20\end{array}$

W. Ray Bell Reelected President of Association of Cotton Textile Merchants of New York-At a meeting of the directors of the Association of Cotton Textile Merchants of New York, held Feb. 2, W. Ray Bell was reelected President and John C. Hughes Jr. of McCampbell \& Co.; Inc., Treasurer for the ensuing year. George M: Miller of Turner Halsey Co. was made the new Vice-President of the Association. To serve with these officers as an Executive Committee were named: Elroy Curtis of Southeastern Cottons, Inc.; George P. Ray of Riverside \& Dan River Cotton Mills, and Frank L. Walton of Catlin Parish Co., Inc.

Weather Reports by Telegraph-Reports to us by telograph this evening denote that the soil is still too wet in many sections especially in the East. In the extreme south of Texas planting is being hampered by cold weather. Less rain has fallen in the cotton belt lately and temperatures have been moderate, but there are few reports coming of any great amount of plowing of cotton lands.

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 39,000 bales. Exports from all India ports record a gain of 2,000 bales during the week, and since Aug. 1 show an increase of 249,000 bales.

Alexandria Receipts and Shipments-We now receive weekly a cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years:

Note-A cantar is 99 lbs. Egyptian bales weigh about 750 lbs,
This statement shows that the receipts for the week ending
250,000 cantars and the foreign shipments 55,000 bales.
Manchester Market-Our report received by cable tonight from Manchester states that the market in both yarns and cloths is firm. Demand for both home trade and foreign markets is good. We give prices today below and leave those for previous weeks of this and last year for comparison:

## BREADSTUFFS

## Friday Night, Feb. 5, 1937.

Flour-In spite of the price advance, no important improvement in sales could be confirmed. However, it is believed that odd carlot trade has become brisker, but there is still no evidence of any desire to book far forward. Although mills have not indicated any big trade, it seemed likely that some substantial business is being worked in the family patents, since the advertised brands have been marked 25 c . higher in two days.

Wheat-On the 30th ulto. prices closed $1 / 4$ to $5 / 8 \mathrm{c}$. higher. The strength in Chicago wheat during this session was ascribed to the stronger Liverpool quotations, which were considerably higher than due; also a factor of considerable weight was the more than a cent overnight gain at Winnipeg. Advices from the latter market estimated export purchases of Canadian wheat today (Saturday) at 400,000 purchases of Canadian wheat today (item which served as an influence for better prices at Chicago, was the report of a better flour demand at Minneapolis. These bullish developments seemed to effectually discourage any substantial offerings; and the market held firm throughout. Upturns of wheat prices were in the face of official estimates showing world-wide increases of 1937 acreage sown to winter wheat, compared with 1936 figures. Seeding in the United States is reported to be the largest on record. On the 1st inst. prices closed unchanged to $3 / 4 \mathrm{c}$. lower. The Chicago wheat market showed a poor response to the steep rise in the Liverpool market and strong Winnipeg prices. In the earlier trading prices did show some gains, but this was all lost later in the day. As trading approached the close, much selling came from various wheat operators who previously had been buyers because of the unexpected upturns of values at Liverpool and Winnipeg, but were disappointed at the lack of aggressive buying, especially on the part of the speculative element. A bearish factor was the announcement that the amount of wheat on ocean passage to importing countries totaled today more than double the quantity a year ago. Chicago May wheat contracts suffered the most reaction, falling $13 / 4 \mathrm{c}$. a bushel from the day's top and touching $\$ 1.271 / 8$ in final dealings. The sharp rise in the Liverpool market was rather surprising in view of the increase in world shipments as well as an enlargement of upwards
of $4,000,000$ bushels in wheat afloat. On the 2 d inst. prices closed $3 / 4$ c. to $11 / 4 \mathrm{c}$. up. Buying by previous speculative sellers was an outstanding feature, especially in the late afternoon trading. Reports of dust storms in parts of Kansas were received, and with reports also of thick ice covering fields of domestic new winter wheat elsewhere, apprehension concerning crop damage was quite general. Other bullish items were statements that for this time of year the U. S, wheat visible supply total is now the smallest since 1923. It was also pointed out that wheat primary domestic receipts today were only 147,000 bushels, which was the lightreceipts today were only 147,000 bushels, which was the light-
est yet this season. As a further help to the Chicago market were late estimates that 500,000 bushels of Canadian wheat had been taken today for export. There were advices too, that Italy had reduced her wheat import duty $50 \%$ and had bought $1,000,000$ bushels of Czechoslovakian wheat. On the other hand the Liverpool wheat market closed lower than due at 1 to $17 / 8$ c. off. On the 3 d inst. prices closed $21 / 8$ to $31 / 2 \mathrm{c}$. higher. Spectacular trading was evidenced in this day's session. Shyrocketing $31 / 2 \mathrm{c}$. a bushel late today, wheat prices showed the effects of a sudden overwhelming demand for wheat on the part of European buyers. Gerdemand for wheat on the part of European buyers. Ger-
many was stated to have purchased $1,468,000$ bushels of Argentine wheat and 2,400,000 of Argentine corn, with other European countries also buyers from Argentine. In addition, fully $1,000,000$ bushels of Canadian wheat were estimated to have been bought for export. Unfavorable crop developments, together with higher asking prices from shippers of wheat generally-served as the incentive for this heavy wave of buying, especially on the part of European countries. The action of the Liverpool market recently, with its pronounced strength, implies, in the opinion of many, that the severe temporary burdensome results of extra heavy Argentine new crop shipments had passed. Possibilities of a short crop in the Danube Valley this summer and likewise in North America, were considerations in the minds of many. Chicago wheat prices closed at about the highs of the day.

On the 4 th inst. prices closed $1 / 4$ to $7 / 8 \mathrm{c}$. lower. There was heavy profit-taking in evidence during a good part of the session, traders wishing to take advantage of the 6c. upturn from Tuesday's low. Contributing to the reaction were reports that German purchases had ceased. On the other reports that German purchases had ceased. On the other estimates that export buying of Canadian wheat today totaled $1,000,000$ bushels, principally for Great Britain. The Liverpool market closed $25 / 8$ to $31 / 8 \mathrm{c}$. up at the topmost point yet reached. Another bullish item was the report that English millers had bought five cargoes of Australian wheat as well as considerable quantities of Argentine. Yet, in spite of the fact that bullish news more than countered bearish developments, prices failed to hold. Spain was also reported to have purchased 750,000 bushels of wheat from Argentina, and Germany was said to have taken some Argentine wheat in addition to large amounts acquired the previous day. Chicago September wheat led the late decline, and from $\$ 1.12$ fell to $\$ 1.101 / 8$, but rallied a little at the close.
Today prices closed $18 / 8$ to $21 / 4$ c. up. Despite transient setbacks because of sympathy with securities market tumbles, wheat prices went upward late today as well as early in the session. A dominating factor as to wheat, especially in the late dealings, was evidence of continued strong demand for surplus supplies of wheat in exporting countries. It was estimated 700,000 bushels of Canadian wheat were bought today for shipment abroad. Influenced by settlement of the maritime strike and by new upturns of Liverpool quotations, Chicago wheat prices scored decided gains early today. It was predicted that as a result of the strike settlement, the export of Pacific Coast wheat would be resumed. Open interest in wheat was $103,748.000$ bushels.

Corn-On the 30th ulto. prices closed $1 / 4 \mathrm{c}$. off to $1 / 4 \mathrm{c}$. up. Trading was comparatively light, with little or no feature. The floods of course are causing quite a little uncertainty as to stocks and primary receipts, and with the threat of Argentina shipments no little consideration, traders are in clined to hold aloof awaiting further developments. On the 1 st inst. prices closed $5 / 8$ to $11 / 8 \mathrm{c}$. lower. The heaviness of the wheat market had its influence on corn. There is still uncertainty regarding the effects of the floods. Substantial shipments are looked for from the Argentine as the strike situation on the Pacific Coast clears. On the 2d inst. prices closed unchanged to $3 / 4 \mathrm{c}$. down. This grain showed an extreme break of $13 / 4 \mathrm{c}$., but later recovered most of the loss. The strength of wheat was more than countered as an influence by bearish reports to the effect that on the West Coast seven ships carrying $2,520,000$ bushels of corn from

Argentine were waiting to be unloaded. A statement quoting Secretary of Agriculture Wallace as suggesting the likelihood of a $450,000,000$ bushel corn surplus in the United States this year, was an added influence in depressing corn prices. On the 3 d inst. prices closed $11 / 4 \mathrm{c}$. to $23 / 8 \mathrm{c}$. up. The pronounced strength of the wheat market naturally influenced corn, together with the reported heavy purchases of Germany in the Argentine market, the amount of these purchases being estimated at $2,400,000$ bushels. It would seemfrom this that Argentine's surplus supplies will not prove so burdensome as a market factor. German competition with the United States as a buyer of Argentine corn accentuates this prospect.

On the 4th inst. prices closed $1 / 4$ to $1 / 2$ c. lower. Cables reported that a record big crop of corn in Argentina is likely if additional rains are received this month. On the other hand, today's receipts of corn in Chicago were only 53 cars, and estimated Argentine shipments for the week were somewhat smaller than recently. Today prices closed $3 / 4$ to 1c. up. Trading in this grain was relatively quiet, though the undertone was firm. Open interest in corn was $37,873,000$ bushels.

DAILY CLOSING PRICES OF CORN IN NEW YORK
 DAILY CLOSING PRICES OF CORN FUTURES IN CHICAGO

Oats-On the 30 th ult. prices closed $3 / 8 \mathrm{e}$. to $33 / 4 \mathrm{c}$. advance The flood situation is believed to have some bullish influence here, there being considerable demand for this feed grain. On the 1 st inst. prices closed $1 / 8 \mathrm{c}$. to $1 / 2 \mathrm{c}$. lower. These lower values were largely in sympathy with the declines in the other grains. On the 2 d inst. prices closed $1 / 8 \mathrm{c}$. to $1 / 20$. up. This advance in futures was credited to a better spot demand On the $3 d$ inst. prices closed $7 / 8 \mathrm{c}$. to $11 / 4 \mathrm{c}$. up. The strength displayed in this grain was largely influenced by the pronounced upward movements in the other grains, especially wheat and corn

On the 4th inst. prices closed $7 / 8$ to $1 / 8 \mathrm{c}$. down. This de cline was largely in sympathy with wheat and corn. Today prices closed $5 / 8$ to $3 / 4 \mathrm{c}$. up. This improvement was influenced largely by the upward movement of wheat and corn.

 DAILY CLOSING PRICES OF OATS FUTURES IN WINNIPEG May:-

Rye-On the 30th ult. prices closed unchanged to $1 / 2 \mathrm{c}$. up. Trading was light, with demand principally in May and July. On the 1st inst. prices closed $3 / 8 \mathrm{c}$. to 1c. down. There was no news bearing in a particular way on this grain, its weakness being ascribed to the downward tendency of other grains. On the 2 d inst. prices closed $3 / 8 \mathrm{c}$. to $5 / 8 \mathrm{c}$. up. In view of the news and the action of wheat, it was thought this market should have responded in a more substantial way. However uneasiness concerning possible shipments from the Argentine was regarded as a restraining influence. On the 3 d inst. prices closed $13 / 8 \mathrm{c}$. to $15 / 8 \mathrm{c}$ higher. With wheat prices skyrocketing, it was only natural that rye should follow closely in the wake of this closely related grain.

On the 4 th inst. prices closed 1 to $11 / 2 \mathrm{c}$. lower. A falling off in spot demand, together with optimistic reports concerning crops in the Argentine and prospects of large grain supplies from this source with the maritime strike removed as an obstacle to further shipments, all played their part as influences in lowering prices. Rye showed the most pronounced weakness of all the grains. Today prices closed $11 / 8$ to $1 \frac{1}{4}$ c. up. The pronounced strength of wheat had a very wholesome effect on rye, which was very strong throughout the day's session.

Weather Report for the Week Ended Feb. 3-The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended Feb. 3, follows: Over the western half of the country temperatures continued abnormally
low and they remained generally above normal east of the Mississippi
River, as during several preceling weeks, but the Southeast was considRiver, as during several preceding weeks, but the Southeast was consid-
erably coler than previously, with temperatures averaging near normal. Precipitation was frequent in the more eastern States and most Pacific
sections, but there was much less than recently in the central valleys and Great Plains.
the same position as last week. Below zero occurred in the interior of the same position as last week. Below zero occurred in the interior of Wisconsin, southern Iowa, and extreme southern Nebraska. In the Eastern States the line of freezing weather extended considerably farther
south than during January, reaching Norfolk, Va., Charlotte, N. C., and Atanta, Ga. The lowest temperature reported from a first-order station
was 34 degrees below zero at Havre, Mont., on Jan. 30 . was 34 degrees below zero at Havre, Mont., on Jan. 30 .
5 degrees above normal over the area east of the Mississippi River; they were 5 degrees above normal over the area east of the Mississippi River; they were
somewhat above in the west Gulf sections. However, from the contral and upper Mississippi Valley westward the week was from 5 degrees to as many as 23 degrees corthwestern Great Plains., Precipitation was heavy ranging fouthward. In the interior valleys the amounts were mostly light to moderate, with less than one-half an inch rains which resulted in the disastrous floods. Over most of the Plains region the weekly totals were inappreciable, but were large in central and northern Pacific coast sections where some very heavy rains and snows occurred. 8 a. m., Feb. 2, show a marked fall in the upper Ohio River and a silght recession in its lower portions, At Pittsburgh the gage reading was 15.5 feet, representing a fall of 19.0 feet since the crest, representing a fall of 19.0 since the crest; Parkersburg, W. Va., 19.1 feet, fall 36.3 feet; Oincinnati,
Ohio, 68.3 feet, fall 11.7 feet; Louisville, Ky.i 50.7 feet, fall 6.4 feet; and Ohransvile, Ind., 53.6 feet, with a fall of 0.1 foot. At Cairo, IM., the reading
Was 59.5 feet, with a 24 -hour rise of 0.1 foot; New Madrid, Mo., 47.9 feet, was 59.5 feet, with a 24 -hiour Tenn., 48.2 feet, rise 0.4 foot. The following
rise 0.1 foot; and Memphis Teing
give comparative readings between the flood crest and the previous high record for the respective stations: Pittsburgh, Pa.., crest 34.5 feet, previous high 46.0 feet; Parkersburg, W. Va., 55.4 feet, 58.9 feet; Oincinnati, Ohio,
80.0 feet, 71.1 feet; Louisville, Ky., 57.1 feet, 46.7 feet; and Evansville, Ind.. 53.7 feet, 48.4 feet. The previous high for Cairo, Iil., was 56.4 feet,
New Madrid, Mo 44.6 feet, and Memphis, Tenn., 46.6 feet. While the
Ohio River was faliing at 8 a. m. of February 2 , the gage reading at that time at Louisville was still 4.0 feet above the previous high record, and at Evans-
ville 5.2 feet above; the 8 a. m. stage on Feb. 2 at Cairo was 3.1 feet. New Madrid, 3.3 feet, and Memphis, 1.6 feet higher than ever before recorded. agriculture. The persistently low temperatures and snow-covered range were hard on livestock throughout most western sections; continued heavy feeding was necessary, with considerable shrinkage and some additional losses, especially among sheep. Many ranges in the ns.
of the country are inaccessible because of heavy snows.
$\rightarrow$ In the Southeast, while temperatures were more seasonable, the premature advancement of vegetation became more pronounced. At the close of the week tree fruit blooms blooming to central Georgia, with much alarm as to possible damage by frost. In fact, at the close of the week the frost line had advanced almost to districts where peach trees were in bloom. bruck susceptible to low temperatures. West and saturated soil in the East farm Because of the cold weather in the West and saturated soil in the
work was largely at a standstill in nearly all sections of the country.
Small Grains-In the more eastern States winter wheat is unusually far
advanced, and in mostly fair to good condition. In the Ohio Valley many

Wheat fields are water logged or inundated, with some reports of drowning in Plains a continued ice cover is causing increased apprehension as to possible smothering. In general, recent conditions in the principal Winter Wheat Belt have been unfavorable. The southwestern Plains are still dry, with
moisture needed. However, in Montana, the Great Basin, and the Paclfic Northwest, grain fields are well protected by an ample snow cover.

## THE DRY GOODS TRADE

New York, Friday Night, Feb. 5, 1937
Retail trade during the past week made a very satisfactory showing. Ideal weather conditions stimulated the sale of Winter apparel in the Atlantic districts, and on the Pacific Coast the prospects of an early settlement of the maritime strike found their expression in a noticeable increase of consumer buying. The retarding effects of floods and strikes in other districts of the country, were thereby largely offset, and as a result earlier estimates of department store sales during January underwent an upward revision. For the country as a whole, an average gain of approximately 8 per cent over last year is now predicted. Early forecasts of February sales, subject to weather conditions remaining favorable, point to an increase of around $10 \%$, taking into consideration that this month has one business day less than a year age.
Trading in the wholesale dry goods markets quieted down somewhat, as the initial buying of Spring goods was nearing its end. However, with the waters in the Ohio Valley slowly receding, a substantial amount of orders was expected soon receding, a substantial amount of orders was expected soon destroyed stocks. Wholesalers displayed increased resistance to the steadily advancing prices and limited their commitments mostly to covering immediate requirements. Business in silk goods was quiet, only a small amount of orders being placed during the week, and prices declined moderately. Trading in rayon yarns continued brisk, as the demand for all classes of yarns remained heavy. Books were opened for April delivery last Monday, and the amount of orders received thus far points to the necessity of sellers continuing their previous method of allotments. Although some producers expect a change in the present tight delivery situation within the next few months, others feel that the improved flow of goods in distributive channels and the need of replenishing stocks in flood areas, will cause the demand to exceed production until the middle of the Summer.
Domestic Cotton Goods-Trading in the gray cloth markets continued in a desultory fashion during the first half of the period under review, but subsequently a brisk demand for print cloths developed, and sales during the last few days were reported to have amounted to more than onehalf week's production. The earlier dullness had caused a substantial weakening of the price structure as a number of second-hand offerings at concessions made their appearance, and several converters pushed goods on the market which they were unable to deliver to flood areas. Later in the week, however, prices recovered part of their losses, with activity broadening considerably. Business in fine goods continued active. Second-hand offerings practically disappeared, and prices regained their former strength. Closing prices in print cloths were as follows: $39-$ inch 80 's, $101 / 2$ to $91 / 2$ c., 39 -inch $72-76$ 's, $101 / 2$ c., 39 -inch $68-72$ 's $81 / 2$ to 8c., $381 / 2$-inch $64-60$ 's, $77 / 8$ to $7 \mathrm{c} ., 381 / 2$-inch $60-48$ 's, $65 / 8$ to 6 c.
Woolen Goods-Trading in men's wear fabrics was moderately active. Although business in Spring goods tapered off still further, mills continued to operate at capacity. Some producers were able to add to their substantial backlog of unfilled orders, owing to the receipt of a few early commitments on Fall goods, although the latter have not been formally opened. Moreover, considerable Government orders in addition to those awarded last week, were expected to be placed soon. Prices held steady at existing levels. Clothing manufacturers continued active on Spring merchandise, and reports from retail clothing centres showed noticeable improvement in consumer demand for Winter apparel, due to more seasonal temperatures. Business in women's wear goods was marked by continued heavy demand for coatings and suitings as well as for sports materials such as fleeces, and some mills were forced to withdraw their lines, having booked all the business they can handle. Garment manufacturers continued very busy with deliveries to their retail accounts of suits and cloaks before Easter, as the flow of goods in distributive channels made a much better showing.
Foreign Dry Goods-Trading in linens remained active. The demand for cambrics and sheers was again outstanding, and some new orders were rejected, as most mills are booked ahead for several months. Dress linens and household items also moved in satisfactory volume. Prices continued to advance, as the rise in raw material quotations showed no sign of abating. Business in burlap was marked by increased activity. Although stocks in Calcutta at the end of January showed an increase, prices, nevertheless, were higher in view of reports of strikes in three mills, and also due to the shortage of available space on vessels leaving Calcutta. While the supply of used bags was reported to have been exhausted for use as sandbags in the flooded districts, bag manufacturers did not as yet place a considerable amount of orders, as their stocks were said to be ample. Domestically lightweights were quoted at 3.90 c ., heavies at 5.40 c .

## MUNICIPAL BOND SALES IN JANUARY

Long-term financing by States and municipalities was negotiated on a strikingly large scale during the month of January, the principal amount of the loans sold being no less than $\$ 205,513,246$. This was the heaviest output for any month since March, 1931, and constitutes a record high for disposals in January of any year since 1927. The bulk of the month's total is made up of such emissions as those of $\$ 50,000,000$ by New York City, $\$ 47,000,000$ by the Los Angeles, Calif., Department of Water and Power, $\$ 24,973,-$ 000 by the Boston Metropolitan District, Mass., $\$ 12,000,000$ by the State of Louisiana, and that of $\$ 11,000,000$ by Chicago, Ill. In addition, the Reconstruction Finance Corporation was responsible for $\$ 4,935,900$ of the January Corporation was responsible for $\$ 4,935,900$ of the January awards, having marketed various bonds which had been
originally acquired by the Public Works Administration.
riginally acquired by the Public Works Administration.
Although most of last month's flotations were sold on terms which reflected no material change in the trend of markedly low-interest cost on tax-exempt financing, in several situations the underwriters encountered not a little difficulty in placing the obligations into investment accounts. In a few cases, a reduction in the original offering prices was required in order to stimulate investment demand for the liens and accelerate the closing of syndicate accounts. This condition, it should be noted, was not peculiar in the case of condition, it should be noted, was not pecular with respect to municipal securities, but was also evident with respect to market action of Treasury and recently issued corporate
bonds. Heaviness of the bond market, according to some bonds. Heaviness of the bond market, according to some
observers, was occasioned by the uncertainty which prevailed throughout the month as to the imminence and extent of the anticipated action of the Federal Reserve Board with respect to an increase in reserve requirements of member banks. Announcement of an advance in reserve requirements was not made by the Reserve Board until the closing day of the month.
Issues of $\$ 1,000,000$ or more sold during January are summarized herewith:
$\$ 50,000,000$ New York, N. Y., 3\% corporate stock, due in 1977, awarded Na a yndicate headed by the National City Bank of New York, at a price or 102.33 a basis of about 1.24 . The city used the
made by the bankers at a price of 103.50 the proceeds to redeem on Jan. $25,1937, \$ 50,000,0006 \%$ corporato stock

to maturity.
2.549,000

Nowark, N. J., 23\%\% various purpose bonds, maturing serially York and associates, at at purchased by Lehman Bros. of New 2.68\%; Reoffered at prices to yield from $0.80 \%$ to $3.05 \%$,
2.500,000 Buffalo, N. Y. $2.20 \%$ construction bonds purchased by ${ }^{\text {ran }}$ account headed by Phelps, Fenn \& Co. of New York at a price
of 100.059 a basis of about $2.19 \%$. Due serially from 1938 to 1947 incl.
2,225,000 Minnesota (State of) $2 \%$ certificates of indebtedness, due in 1942 , awarded to a group headed by Halsey, Stuart \& Co. Cow Inc., of New York, at a price of $1.95 \%$. Reoffered to yield $1.80 \%$.
$1,900,000$ Michigan (State of) $41 / 5 \%$ Port Huron-Sarnia 20-year, optional bridge construction bo
1,384,000 Woodbridge Township, N. J., 414\% serial funding and
 purchased by a syndicate managed by J. S. Rippel \& Co. of
Newark. Reoffered on a yield basis of from $2 \%$ to $4.50 \%$, according to maturity.
1,240,000 Little Rock, Ark., 4\% water revenue bonds, due serially from 1939 to Ar 1976 incl.' purchased by an account headed by
the Bancamerica-Blair. Corp. of New York. Re-offered to the Bancamerica-Blair Corp. of New York,
yield from $2 \%$ to $3.80 \%$, according to maturity.
1,073,000 Mecklenburg County, N. C., $234 \%$ and $3 \%$ school building bonds, mituring serially from 1938 to 1967 incl. awarded to
Lehman Bros. of New York and associates, at a price of 100.20 . a basis of about $2.805 \%$.
$1,000,000$ Board of Supervisors of the Louisiana State University and Agricultural and Mechanical College, La. 4 . $4 \%$ bonds awarded to H. L. Allen \& Co. of New York and Weil \& Co. or

The following is a record of the issues aggregating \$5,397,350 , which failed of sale at the time of offering during January. As pointed out in the past, these failures have been few in number in comparison with the situation several years ago, when a large wave of defaults occasioned a marked retinence on the part of investment interests to add to their holdings of tax-exempts. The default problem, however, has almost been entirely composed and, as indicated in the large output of new issues in the month just ended, also in the calendar years 1936 and 1935, municipal liens are again very much in investment demand.
In recording below the loans which were not sold in January, we include the page number of the "Chronicle" in which an account of the unsuccessful offering will be found:

Financing of budgetary requirements, pending collection of current taxes, resulted in the disposal of an aggregate of $\$ 75,207,641$ notes and other evidences of temporary debt by States and municipalities during the month of January. There has been a slight increase in the cost of such borrowing in the past two months, in line with a similar progression in the cost of interim financing to the Federal Government. However, notwithstanding the tightening of short-term money rates, municipal units are still able to finance their requirements on an unusually low interest basis. The total of municipal loans for the month includes borrowings of $\$ 40,600,000$ by the City of New York.

Canadian municipal bond financing in January was featured by the offering in the United States of $\$ 85,000,000$ refunding bonds of the Dominion of Canada. This was the Dominion's first bid for credit in this country since the $\$ 48$,000,000 flotation a year ago. The new offering, which was underwritten by a large syndicate under the management of Morgan Stanley \& Co., Inc. of New York, included \$30,000,000 seven-year $21 / 4$ s and $\$ 55,000,00030$-year 3s. In addition to this financing, the Dominion offered at public subscription to its own citizens an issue of $\$ 35,500,000$ Canadian National Railway bonds, guaranteed as to both principal and interest by the Government. This issue was made up of $\$ 15,500,000$ seven-year $21 / 2 \mathrm{~s}$ and $\$ 20,000,00015$ year 3s. The borrowing was undertaken in order to reimburse the Dominion for funds made available to the railway company in order to redeem debt which matured or had been redeemed prior to maturity. These emissions by the Federal Government, together with a flotation of $\$ 20,000,000$ by the Province of Ontario, increased the grand total of Canadian Prunicipal bond financing during January to $\$ 141,016,500$. Moreover, the Dominion indulged in the sale of temporary Treasury bills in the amount of $\$ 55,000,000$.
None of the United States Possessions appeared in the longterm capital market in January

Below we furnish a comparison of all the various forms of municipal obligations sold in January during the last five years:

| January | 1937 | 1936 | 1935 | 1934 | 1933 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Perm. 10 | 205,513,246 | 89,523,614 | 97,172,419 | $\stackrel{8}{8}$ |  |
| * Temp, loans(U. S. ) | 75,207,641 | 173,965,568 | 141,812,000 | 130,353,200 | 47,293,039 |
| Canad'n l'ns (temp.) | 55,000,000 | 25,000,000 | 500,000 |  | 4,300,000 |
| Canad'n 1'ns (perm.): Placed in Canada. | 56,016,500 |  |  | 40,817,849 | 19,332,400 |
| Placed in U. S.-.- | 85,000,000 | 48,000,000 | 34,172,600 |  |  |
| Bonds U.S. Posses'ns |  |  | 433,000 |  |  |
|  | 476,737,387 | 337,039,096 | 274,090,019 | 226,242,2 | 106,760,045 | * Includes temporary securlties issued by New York Clty- $\$ 40,600,000$ in 1937 ,

$\$ 54,838,000$ in $1936, \$ 33,000,000$ in $1935, \$ 56,672,200$ in $1934, \$ 17,000,000$ in 1933 .

The number of municipalities in the United States emitting permanent bonds and the number of separate issues made during January, 1937, were 312 and 403, respectively. This contrasts with 434 and 489 in January, 1936
For comparative purposes, we add the following table showing the aggregate of long-term bonds put out in the United States for January for a series of years. It will be observed that the 1937 January output was the largest of any year since 1927:

| 1937 | 4 | 19 | \$108,587,109 | 7 | \$10,160,146 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 193 | 89,523,614 | 1921 | 87,050,550 | 1906 | 8,307,582 |
|  | 97,172,419 | 19 | 83,529,891 | 1905 | 8,436,253 |
| 193 | 55,071,20 | 1919 | 25,090,625 | 19 | 23,843,801 |
| 1933 | 35,834,606 | 1918 | 24,060,118 |  | 15,141,796 |
| 1932 | 138,248,064 | 1917 | 40,973,081 | 1902 | 10,915,845 |
| 1931 | 50,648,907 | 1916 | 50,176,099 | 1901 | 9,240,864 |
| 1930 | 109,842,814 | 1915 | 34,303,088 | 1900 | 20,374,320 |
| 1929 | 75,710,723 | 1914 | 84,603,094 | 1899 | 6,075,957 |
|  | 100,343.627 | 1913 | 30,414,439 |  | 8,147,893 |
| 1927 | 206,877,975 | 1912 | 25,265,749 | 1897 | 10,405,776 |
| 1926 | 70,366,623 | 1911 | 78,510,274 |  | 6,507,721 |
| 1925 | 135,536,122 | 1910 | 16,319,478 | 1895 | 10,332,101 |
| 1924 | 99,625,470 | 1909 | 29,318,403 | 189 | 7,072,267 |
|  | 96 |  |  |  | 5,438,577 |

In the following table we give a list of January loans in the amount of $\$ 205,513,246$, issued by 312 municipalities. In the case of each loan reference is made to the page in the "Chronicle" where accounts of the sale are given.
Owing to the crowded condition of our columns, we are obliged to omit this week the customary table showing the month's bond sales in detail. It will be given later.

Course Offered in Analysis of Municipal SecuritiesThe course in the analysis of municipal securities offered the first semester will be repeated the second semester at the Wall Street Center of New York University, 90 Trinity Place. This course deals with domestic public securities, including district, city, county and State obligations, from the point of view of the investor. Financial statements will be analyzed in the light of assessment methods, debt structure, revenue sources, tax limits and tax delinquency. Current developments in the field of municipal finance will be considered each session and attention will be devoted to municipal debt adjustment and revenue with special refernce to the bankruptey law.
Dr. Bert C. Goss will give the course, as usual. Registration for this course should be made before Wednesday, Feb. 10.
Greenwood County, S. C.-Federal Court Temporarily Restrains Buzzard's Roost Power Project-The following is the text of an Associated Press dispatch from Rock Hill, S. C. dealing with the granting by the local Federal Court of a restraining order on a proposed PWA power allotment, which would conflict with the interests of the Duke Power Co., the plaintiff in this long-drawn litigation:
The Duke Power Co. obtained a temporary restraining order here today to prevent Greenwood County authorities from proceeding with construc-
tion of the $\$ 2,352,000$ Buzzard $R$ Roost power project on Saluda River pendtion of the \$2,352,000 Buzzard Roost power project on Saluda River pend ing a hearing on the merits of the case set for Feb. 23 . he order on petition of Duke attorneys. who contended the proposed expenditure of Federal funds by the Works Progress Administration for the development was unconstitutional. His order contained a clause, however, allowing the ex-
penditure of not more than $\$ 100.000$ for legal, administrative, engineering penditure of not more than $\$ 100,000$ for legral, administrative, engineering
and conservation costs that might be incurred before a final rulimg. The county authorities had requested that this figure be set at $\$ 600,000$. The U. S. Supreme Court recently sent the Duke Co, 's original suit contesting the validity of the Pubic works Administration loan and grant back
to the lower courts, holding that proper procedure had not been followed in acting on it. The high tribunal expressed no opinion upon the merits of he case.
Maine-State Income Tax Bill Introduced-A State income tax bill, intended to reduce taxes on real estate, was introduced in the Legislature on Jan. 26 by Representative Newton, of Readfield, according to an Associated Press dispatch from Augusta. It is reported that the measure would impose a tax of $1 \%$ on taxable incomes of not more than $\$ 1,000 ; 2 \%$ on not more than $\$ 2,000 ; 3 \%$ on not more than $\$ 1,000 ; 2 \%$ on not more than $\$ 2,000 ; 3 \%$ on not
han $\$ 3,000$, and $4 \%$ on amounts in excess of $\$ 3,000$.
We are advised that the same tax would apply to that
portion of income received by non-residents from Maine portion of income received by non-residents from Maine
business. A person having a net income of $\$ 1,000$ or more

would be required to pay an annual filing fee of $\$ 3$, it is said. The bill would repeal the poll tax law.
New Hampshire-Governor Urges Constitutional Amendment on Relief-The following is the text of an Associated Press dispatch from Concord on Feb. 3, reporting on an unusual proposal for a referendum to land relief money, advocated by Governor Murphy:
A State-wide vote on amendment of New Hampshire's constitution was urged today by the Republican Governor, Francis $\mathbf{P}$. Murphy, after the State's Supreme Court had rejected his proposal to set up what, would in
effect, have been a "Baby Reconstruction Finance Corporation" to lend money out of reliof funds to private industry
for welfret that the constitution prevents us from using money appropriated "welfare relief to provide work for our citizens," the Governor said. amend the constitution so that modern thoughts of government of this lind may be put into effect."" referred to it by the Legislature, but found it unconstitutional.

New Jersey-Mandatory Salary Schedules Again Become Effective-The Legislature on Feb. 1 ignored the pleas of numerous local officials to contimue the authorization of suspension of mandatory salary schedules by local governing according to Trenton dispatches of that date. The law giving such authority expired at midnight on Feb. 1, and from then to the mandatory local salaries reverted to the pre-depression scale.
Millions as a result will bo added to local budgets, Prequently in commun-
ities long pinched for funds. In some cases, it is sstimated, a reversion to ities long pinched for funds. In some cases; it is estimated, a reversion to the oid pay scale would mean a arise of firty points in the tax rates. some
local officials have threatened to retain the reduced pay scale anyhow and others are thinking of trying to persuade municipal employees not to and others are thinking of trying to persuade municipal. Senator Charles E. Loizeaux, Republican leader, said he had tried in vain to reach an agreement with Democratic leaders to re-enact the meas-
ure It is generally believed, however, that both parties were afraid of offending policemen, firemen and others affected.

New York City-Estimate Board Votes to Restore Pay Cuts to Employees-The Board of Estimate, at a special meeting on Feb. 3, unanimously voted full restoration of the salaries of more than 110,000 city employees, at a cost of approxi mately $\$ 9,000,000$ for the half-year beginning July 1, 1937 The Board, which planned in the 1937 budget to restore half the pay cuts imposed during the city's financial crisi in 1932 and 1933, acted in haste after a letter from Governor Lehman asking for an emergency message to clear the way for salary restorations was made public.

It is understood that the restorations would affect all civi service employees affected by the cuts of 1932 , including firemen, policemen and school teachers, as well as certain other classifications not yet defined. Based on early esti mates by Comptroller Frank J. Taylor of the city's financial condition during 1937, the sum of $\$ 4,500,000$ was earmarked in the budget to restore part of the cuts on July 1, 1937 However, when the meeting of the Board was called on Feb. 3 Mr . Taylor introduced a report which showed he had underestimated the city's income for the current year and that the full restoration of almost $\$ 9,000,000$ would be possible.

New York City-Large Increase in 1938 Budget Held Likely-The city faces a further increase of $\$ 29,000,000$ in the 1938 budget "unless its spending is curtailed," according to the annual report of the Citizens Budget Commission, issued on Jan. 30. The commission suggested four major proposals for economy and efficiency as a partial means of keeping the 1938 budget within bounds. It urged repeal of the mandatory State laws which arbitrarily impose $\$ 51$, the mandatory 000,000 in annual expenses on the city; reorganization on a 000,000 in annual expenses on the city; reorganization on a
sound actuarial basis of the city's pension and retirement sound actuarial basis of the city's pension and retirement
system, which totals $\$ 31,533,000$ this year, an increase of system, which totals $\$ 31,533,000$ this year, an increase of
$\$ 9,340,000$, or $42 \%$, in four years; transit unification upon economically sound principles, including a flexible fare, and the construction of public improvements only after accurate appraisal of their usefulness.

New York State-Governor's Budget Touches New HighAsks Gas Tax Rise-The largest budget in the history of the State- $\$ 365,555,789.69$-was submitted to the Legislature on Feb. 1 by Governor Herbert H. Lehman for the fisca year 1937-1938. The figure is almost $\$ 67,900,000$ higher than that for the current year and exceeds even the previous record budget presented in 1932, by more than $\$ 37,000,000$
To meet the record outlay, Mr. Lehman, in his fifth annual budget message, called for the re-enactment of all emergency taxes now in force and the immediate re-imposition of the second one-cent emergency gasoline tax, which was dropped second one-cent emergency gasoline tax, which was dropped
from his revenue program last year by the Republican-controlled Assembly. The following is a summary of the emergency taxes which the Governor insists be re-enacted:
The emergency $1 \%$ special income tax.
A $4 \%$ tax on the net income of all unincorporated businesses, professions excluded in excees of $\$ 5,000$.
A special stocks transfer tax of $11 / 2$ cents a share on stocks selling for less than $\$ 20$ a share, and two cents on those selling for $\$ 20$ or more.
A spectargency rasoline taxes on ouse cent a gallon each, making the total tax on gasoline four .cents a gallon.

In opening his message, the Governor once again declared that during his administration the state had lived well within its income, each year Economic recovery, having reached a point where improved earnings and business activity were being shown in the State's revenue, he continued, it was time the state thought not only of adopting a pay-as-you-go policy depression.
Taking up the troublesome deficit question, Mr. Lehman pointed out
that June 30 should see it reduced to $\$ 21.869,040$, while if his prediction that June 30 should see it reduced to $\$ 21,869,040$, while if his predictions of $\$ 4,040,909.65$ in the treasury. Of this amount, however, he added. about $\$ 3,115,000$ would be needed to meet the State's share of the social In addition to the above tax recommendations, Mr. Le pass shortly. in-Appropriations totaling $\$ 365,555,789.60$, an increase of $\$ 67,851,409.35$ 2-A tax program to yield $\$ 379,019,711.26$. 3-An appropriation of $\$ 20,000,000$ for unemployment relief and initia-4-An appropriation of $\$ 123,057,804$ for $\$$ state aid to education, an in-5-State aid to municipalities totaling $\$ 137,859,072.72$, an increase of 6-A broad highway construction maintenance and farm-to-markets roads program calling for State expenditures of $\$ 33,000,000$. Anticipated Federal $\$ 80,000,000$.
to completo the program for estiablish ment of an eight-hour day for all institutional employees.
9 -An increase of $\$ 3,000,000$ in appropriations for maintenance of State
wards. Increased appropriations for 15 of the State's 18 departments.
Social Security Bill Tentatively Approved-Governor Lehman and legislative leaders in conference at Albany on Feb. 1 agreed on several amendments to the social security bill according to report. It is said that the changes are mostly in phraseology and do not alter the provisions of the measure

Speedy passage of the bill was forecast as a result of this agreement, attended by both Democratic and Republican leaders. The bill has already passed the Senate, where it passed last year but was defeated in the Republican-controlled Assembly.

Pennsylvania- $\$ 4,800,000$ for Idle A pproved by GovernorGovernor George H. Earle on Jan. 30 signed the first law passed by the 1947 Legislature, an act appropriating $\$ 4,800$, 000 for support of 450,000 unemployed persons in February according to Harrisburg advices. It was expected that the Governor would order the sum borrowed from the motor fund, depository of vehicle registration fees and gasoline taxes earmarked for highway improvement. The fund is said to have a balance of about $\$ 20,000,000$. The general fund owes it more than $\$ 17,000,000$ previously borrowed for relief. The borrowings are payable before the end of the biennium, May 31.

DAYTON BEACH, Fla-DETALLSON RECENT COURTDECLSION

obligations previously approved by freeholders. Homesteads which were subject to taxation when the original bonds were issued remain taxable for retiring the refunding bonds. The General Refunding Act of 1931 , the
Court stated, authorized refunding bonds even though an approving election has not been held
JACKSON COUNTY SPECIAL TAX SCHOOL DISTRICT NO. 69
(P. O. Marianna), Fla.-BOND OFFERING-The Board of Public Instruction of Jackson County will receive bids until $10 \mathrm{a} . \mathrm{m}$. Feb. 26 for the purchase of a $\$ 5004 \%$ bonds of Special Tax School District No. 69 . Dated LAKELAND, Fla.-BOND REFUNDING PROGRAM TO EFFECT carrying out its own bond refunding program, City Attorney A. R, Carver
estimates. The program calls for refunding about $\$ 1,000,000$ in back inestimates. 40 cents on the dollar, with no interest on this total for the first to years. It calls for issuance of new bonds, at dollar for dollar, on outstanding principal of some $\$ 6,500,000$, with a graduated interest rate over 30 -year period
MARION COUNTY (P. O. Ocala), Fla.-INTEREST RATE-It is stated by the Clerk of the Board of Commissioners that the $\$ 83,000$ re-
funding bonds sold to D. F. McRae \& Co. of Jacksonville, and the RobinsonHumphrey Co of Atlanta, jointly, at a price of 100.78 , as noted here re-cently-V. 144, p. 644 -were purchased as $43 / 4 \mathrm{~s}$, giv
$4.68 \%$. Dated Feb. 1, 1937 . Due on Feb. 1, 1954 .
MIAMI, FIa.-DEBT REF UNDING PLAAN VIEWED AS DOUBTFUL -We quote in part as follows from an article appearing in the "Wall Street of the above named city: with the prome "Reports from Miami that a group of New York and Chicago investment firms had proposed the refunding of that city's entire indebtedness,
approximating $\$ 28,800,000$, on a lower interest basis have been accepted with reservations by the financial district.
"In most circles it is contended that taik of refunding on a $4 \%$ basismade considerable progress toward credit improvement in the past two years. and a continuance of the gains in general business and winter tourist trade. which have been noticeable, should enhance the citt's credit rating, to preclude the possibility of an early refunding on a $4 \%$ basis, Miami's $5 \%$ bonds are currently quoted at $971 / 2$ to 98 ; the 4348 are about 96 and the 415 s at 9444 . At these prices they are yielding between $4.85 \%$ and $5.20 \%$, a level which dims the prospects of a refunding at or near $4 \%$. Coupon
rates on the outstanding bonds of the city range between $41 / 2 \%$ and $6 \%$ and the average rate is $4.97 \%$ o city was to refund the outstan at $4 \%$, with the interested investment houses offering to pay $991 /$ for $^{\text {for the }}$ at $4 \%$. With the interested investment houses offering to pay $991 / 2$ ior the new bonds when and if issued. Another offer is said to bave been given
to the city for a refunding at $41 / 2 \%$ interest. The second suggession, it is
understood, was turned down when the higher offer was received."
PASCO COUNTY (P. O. Dade City), Fla. SEALED TENDERS
INVITED-It is announced by Stanley Cochrane, Chairman of the Board INVITED-It is announced Dy Stanley Cochrane, Chairman of the Board of County Commissioners, that he will consider sealed offerings on Feb.
at 11 a. m., of the following issues:
County-wide road and bridge refunding bonds, dated Oct. 1, 1932.

pursuant to Chapter 25, Laws of New Jersey of 1936 . Bids for less than of said bonds may be considered and accepted only if the bonds bid for are those first maturity and the amounc bid equals or exceeds $\$ 24,000$. A certified check for $2 \%$ of the bonds, payable to the order of the Borough
Treasurer, must accompany each proposal. The approving opinion of
Caldwell \& Raymond of New York City will be furnished the successful bidder.
NEW JERSEY (State of)-SEEKS RELEASE OF \$4,000,000 FOR INVESTMENT PURPOSES-State Treasurer William H. Albright has can legally arrange for the investment of more than $\$ 4,000,000$ in State can legally arrange for the investment of more than $\$ 4,000,000$ in state
funds now reposing in local banks. The situation, according to report,
arises from the fact that the money in question is earning interest at only arises from the fact that the money in question is earning interest at only
$1 \%$ as against that of $4 \% \%$ being paid on the bonds which provided the
and runds in the initial instance. The bonds were issued under Chapter 387
of 1933 to provide loans to school districts for payment of teachers' salaries and other educational needs. More than $\$ 4,000,000$ has been repaid to
the State and the apparent lack of provision in the law as to what should be done with the money has caused the Treasurer to apply for a ruling in the matter from the Attorney General. The bonds, it is pointed out, are not callable, hence the money cannot be used in that direction. They mature
serially until 1942. Democrats in the Legislature are in favor of using the money for relief purposes. This cannot be done, according to report, withmoney for relief purposes.
out approval of the voters, as the referendum authorizing the bonds dedi-
cated the proceeds specifically for school loans.
NEW MILFORD, N. J. BOND SALE DETAILS-The Peoples Trust Co. of Bergen County, of Hackensack, which was the successful and only bidder for the $\$ 35,000$ coupon or registered sewer bonds offered

CALGARY, Alta.-NOTICE TO BONDHOLDERS-Taylor \& Taylor, solicitors for the Board of Sinking Fund Trustees, 227 A 8 th Ave. West,
Calgary, announce that the trustees will apply on March 8 in Chambers
in the court house in Calgary, "for advice and directions in in the court house in Calgary, "for advice and directions involving the City of Calgary and as amongst ourselves,", Such advice and directions are required, it is said, due to the fact that the present holdings of the earnings of the fund are in immiment danger of being reduced below the statuory requirement. Copies of the originating notice to be issued returnable on March 8 are available for inspection at the principal offices of the
branches or agencies of the Bank of Montreal in various Con aranches or agencies of the Bank of Montreal in Various Canadian cities,
also in Now York City and London, England. The court has appointed several persons to represent holders of various classes of the city's bonds,
as herewith indicated: as herewith indicated:
J. E. A. Macleod, K., Canada Life Bldg., Calgary, for holders of debentures outstanding June-1, 1925. Bldg., Calgary, for holders of bonds
D. S. Moffat, K.C., Grain Exchange Blater issued since June 1, 1925.
A. MacLeod Sinclair, K.C., Insurance Exchange Bldg., Calgary holds of local improvement debentures. Life Bldg., Calgary, holders of deben-
W. H. McLaws, K. C., Canada Lif tures issued in respect of public utilities of the city.
H. G. Nolan, K.C., Lancaster Bldg., Oalgary, to
not embraced in any of the above-mentioned categories. Holders of the bonds are requested to advise their repsective representa-
tive of any views which they should like presented to the court in respect tive of any views which they should like presented to the court in respect
to any contentions they may desire to raise. The order made, the notice
states, may declare rights and give directions, and will be binding on all
debenture holders.

CALGARY, Alta.-ELECTION ON DEBT PLAN-Tne Civic Finance Committe on Jan 28 decided to hold an election to permit property
owners to pass on the plan recently drafted by a bondholders' group for the refinancing of the city's entire $\$ 17,463,148$ bonded debt. No date columns sometime ago, include the the refinancing plange of as given in these $41, \%$ giverear bonds
for the liens presently outstanding. Holders of bonds for the liens presently, outstanding. Holders of bonds bearing interest at
more than $41 / \%$ would be reimbursed by cash payments to make up the
difference more than $41 / 2 \%$ would be reimbursed by cash payments to make up the
difference. It is proposed to retire the refunding bonds on the basis of
about $\$ 1,195,000$ annually. Under the proposal, annual debt service
requirements would Vber reduced from the present total of $\$ 1,917,460 \stackrel{0}{\stackrel{0}{4}}$
$\$ 1,244,439$. Sinking fund holdings of city bonds in the amount of abo
$\$ 6,600,000$ would bes canceled.
CANADA (Dominion of)-HIGHER RATE ON TREASURY BILLS
-Tenders for the full amount of an offering of $\$ 30,000,000$ Treasury bills, maturing the full amount of an offering of $\$ 30,000,000$ Treasury on behalf of the Minister of Finance. The average discount price was $\$ 99.815$ and the average yield $0.759 \%$. This compares with an average
rate of $0.747 \%$ at which an issue of $\$ 25,000,000$ was sold earlier in January. rate of $0.747 \%$ at which an issue of $\$ 25,000,000$ was sold earlier in January. CANADA (Dominion of)-PROVINCIAL DEBTS STEADILY RISING between 1925 and 1935 , according to a compilation issued recently by the
Bank of Canada. This was the first of a series of mone Bank or Canada. this was the first of a series of monthly statistical
summaries, which the bank plans to issue.,
In 1925 the total indebtedness of the Provinces in excess of the amount they had deposited in sinking funds was $\$ 813,400,000$ excess of the amount
1935 , it was $\$ 1,622,100,000$. The increase was later, in Debts have been increasing faster than revenues. In 1926 the debt was
$563 \%$ of the annual revenue of the Provinces. In 1935 it was $777 \%$. The public debts of the Provinces in 1935, less the sinking fund with the relation of the debt to the annual income that year in brackets follow:
Prince Edward Island, $\$ 5,200,000(381 \%)$; Nova Scotia, $\$ 81,100$.
 chewan, $\$ 183,400,000(1,105 \%)$; ; Alberta, $\$ 165,600,000(984 \%)$; $\begin{aligned} & \text { Saskat- } \\ & \text { Columbia, } \$ 158,200,000(598 \%) \text {. }\end{aligned}$
CANADA (Dominion of)-BOND OFFERINGS HIGHER IN JANUARY, Total offering of new Canadian bonds for January amounted to Dominion Securities Corporation. These included offerings of $\$ 30,000,000$ Dominion of Canada $21, \%$ bonds due Jan. 15 , 1944 and $\$ 55,000,000.0 \%$
bonds due Jan. 15, 1967 made in the United States. Subscription lists Were also opened in Canada on an issue of $\$ 35,500,000$ Canadian National bonds were offered by the Bank of Canada and are payable only in Canadian
funds The following table summarizes by various classes the new issues for
January 1937 as compared with January 1936: Dominion of Canada.
